Business	Logistics	Modeling & Simulation	Application	

Description:

SYSPARS 2.x is a Government developed multi-service expert program that assists Program Managers and Integrated Logistics Support Managers in the preparation of required acquisition and program management documentation. This product assists in building program planning documents utilizing tailored interactive questions and answer sessions. The decision networks embedded within SYSPARS lead the user through the supportability issues to be considered, and automated consistency checks to help the user avoid inconsistencies in document generation. There is also a question report capability that allows users to view all questions within a document and a commenting capability through which users can leave notes as they progress through the construction of a document. After completing a module in SYSPARS, the user has a standardized, system-specific document that can be readied for submission.

SYSPARS 2.x is installed on individual computers. This product is accessed as a desktop application. Data is entered manually to this product, and data is only created by direct user input. This product does not pull data or transmit data to other devices/systems/servers. Data is saved to the local hard drive, and this product data stays internal to the local enclave.

Facts:

- This is a renewal for Certificate 201210285.

CoN Link: https://portal.netcom.army.mil/apps/networthiness/_layouts/NetcomCON/rqstcon2.aspx?requestId=25082

Restrictions:

1. SYSPARS 2.x is restricted for use within certified and accredited networks and/or data centers having a current ATO.

POC: netcom.hq.networthiness@mail.mil /(520)538-1199

This Certificate of Networthiness is based on a trusted standardized platform, configured per FDCC. All patches and updates will be provided by the host network administrator (NEC or DECC) in accordance with all technical directives, mandates, and IAVM. This Certificate of Networthiness is no longer valid should the assessed configuration be significantly altered. Per Army Cyber Command guidance, all operating environment will implement HBSS capabilities. Upon expiration of this Certificate of Networthiness, this application must be reassessed to ensure it is still compliant with the GNEC architecture and is still networthy. Should this software version be upgraded prior to this expiration, the new version must be evaluated for networthiness.
