

Using eClient V3 for NAVFAC Supported Commanders

Overall Learning Objectives

- Understand how to access eClient
- Understand how to use the eClient Query Screen to retrieve project records and export the list of projects to excel
- Understand how to run the three eClient reports

eClient retrieves eProjects data for the following project types:

- E2: NAVFAC prepared design and engineering documents, and associated construction projects.
- E9: Non-NAVFAC (e.g., Marine Corps) prepared design documents such as plans and specifications and Design-Build RFPs.
- O7: Design, inspection, maintenance and repair of underwater cable facilities and systems
- Expeditionary Business Line projects performed by the NAVFAC Engineering and Expeditionary Warfare Center (EXWC)

After receiving notification that your eClient account has been established:

1. Navigate to ieFACMAN (link may be obtained by requesting it via an email to: eClient_Access_Help@navy.mil)
2. Click on the eClient “**Home**” icon to open the eClient Query Screen

A screenshot of the NAVFAC My NAVFAC web interface. The page features a blue header with the NAVFAC logo and the text "My NAVFAC". Below the header, there is a navigation menu with a red arrow pointing to the "Home" link. The "Home" link is highlighted with a red box. The page also includes a footer with the text "This is an official U.S. Navy web site" and links to "DOD Privacy and Security Notice" and "GILS NUMBER DOD-USN-000702". The browser's address bar shows "Source Data - iDS -HomePage.jsp".

Querying Tips

- A **free form** text field uses the “%” symbol as a wildcard. Example: To search for a project with “Pearl Harbor” in the **Project Name**, type “**%Pearl Harbor**”

A screenshot of a software interface showing a text input field. The label "Project Name" is on the left. The input field contains the text "%Pearl Harbor" and has a small 'x' icon on the right side to clear the text.

- A **select** box allows the user to select from a set list of values. Note that the select box has a plus (+) sign to the right. This give the user the ability to select multiple values.

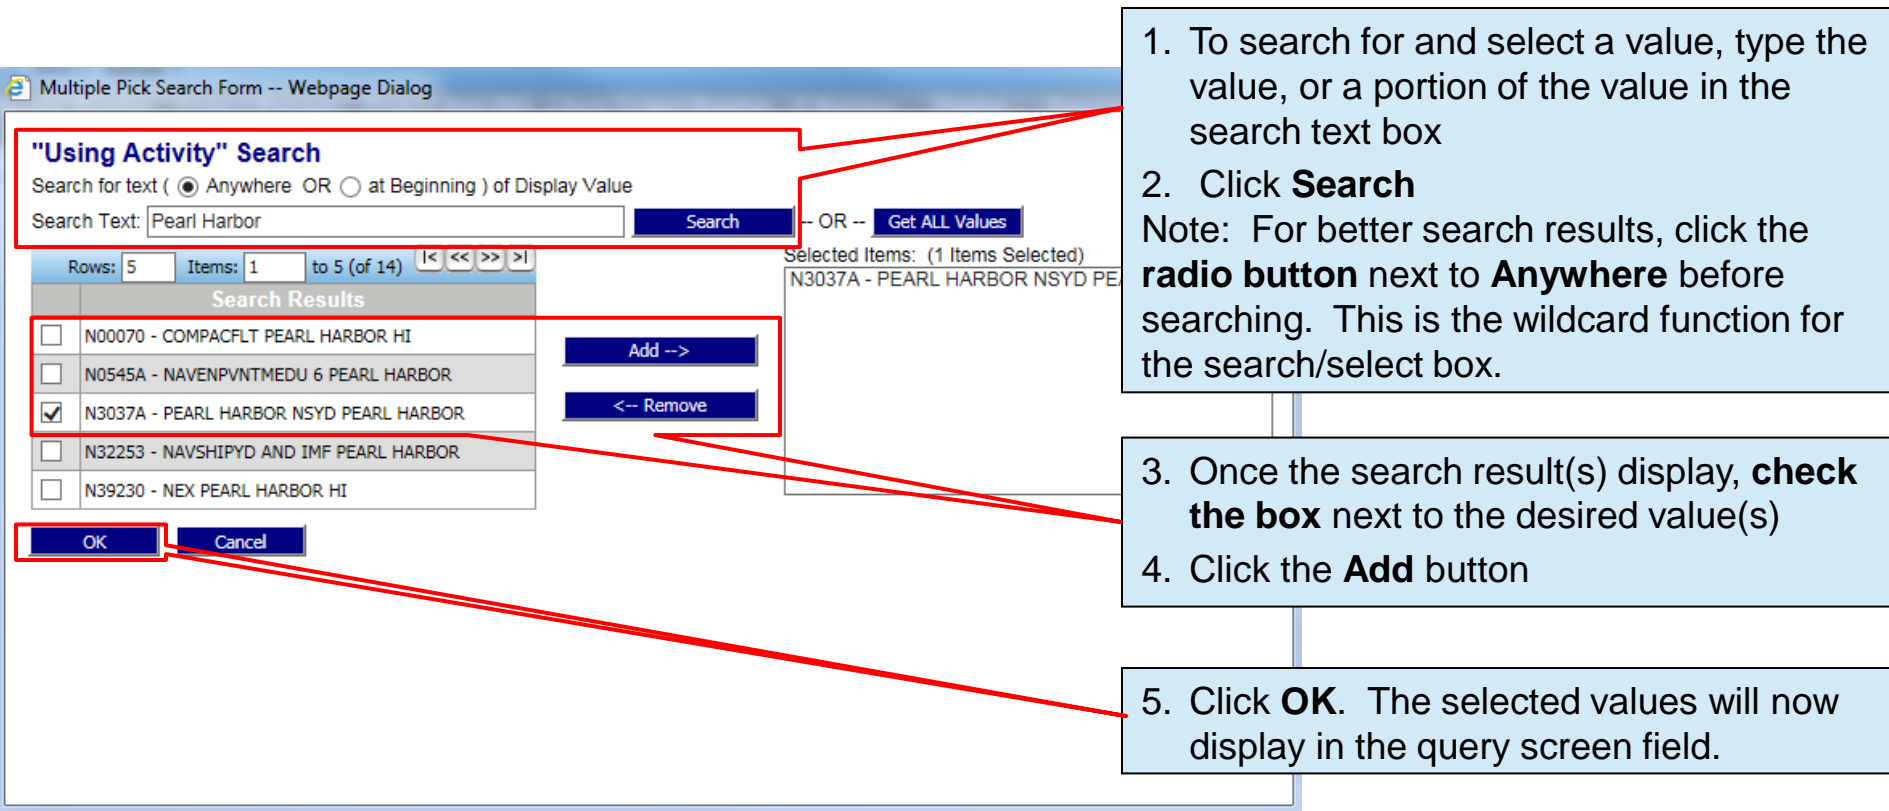

A screenshot of a software interface showing a select box. The label "Command Sponsor" is on the left. The select box is open, showing a list of options: ARMY, BUMED, BUPERS, CMC (MCICOM), CNIC, and DECA. A plus sign (+) is visible to the right of the list, and it is highlighted with a red square.

Clicking the **Plus** sign to the right of **Command Sponsor** expands the box and allows the user to select multiple values using the **CTRL key+Mouse** click combination

- The **Workorder Number** (WON) field can be used retrieve multiple project records by listing multiple WONS separated by commas

A screenshot of a software interface showing a text input field. The label "Workorder Number" is on the left. The input field contains the text "1140501,1141829,1304513".

- A **search box** allows the user to search for a value from a long list, then select the correct value. Below is the **Using Activity** search box that pops up when the **magnifying glass** for **Using Activity** is clicked.

The screenshot shows a dialog box titled "Multiple Pick Search Form -- Webpage Dialog" with a sub-section titled "'Using Activity' Search". The search criteria are set to "Anywhere" and the search text is "Pearl Harbor". The search results table lists five items, with the third item, "N3037A - PEARL HARBOR NSYD PEARL HARBOR", selected. The "Add -->" button is highlighted, and the "OK" button is also highlighted. Red lines connect the numbered callouts to the corresponding UI elements.

1. To search for and select a value, type the value, or a portion of the value in the search text box

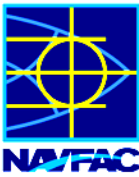

2. Click **Search**
Note: For better search results, click the **radio button** next to **Anywhere** before searching. This is the wildcard function for the search/select box.

3. Once the search result(s) display, **check the box** next to the desired value(s)

4. Click the **Add** button

5. Click **OK**. The selected values will now display in the query screen field.

Saving List Report Layout

Layout(s) may be saved

The screenshot shows the eClient Query Screen interface. The 'Layout' menu is open, showing options: 'Reset to Default', 'Reset to System Default', 'Add New Layout', 'Manage Layouts', 'Choose Layout', 'System Default', 'My Layouts', and 'Client Project # first'. A dialog box titled 'Please input a name for your saved report layout.' is displayed, with a text input field, 'Default?' and 'Public?' checkboxes, and 'Save Layout' and 'Cancel' buttons. A red callout points to the 'Add New Layout' option in the menu, and another red callout points to the dialog box. A third red callout points to the 'Choose Layout' option in the menu.

Selecting **Add New Layout** brings up

Please input a name for your saved report layout.

Default?

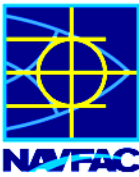

Public?

Save Layout Cancel

which lets you name and save your new layout

Later, you can then **Choose Layout** to pick it or other layouts to control your display

Exporting Project List to Excel

To export the project list to excel, use **Mode** in the blue menu bar

PDF Reports

There are three PDF reports available from the eClient Query Screen

1. Execution Report

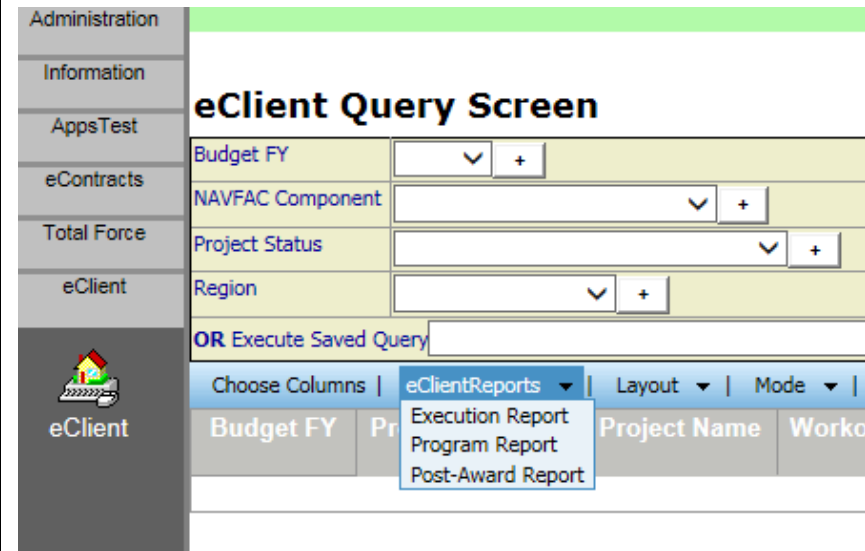

- Pre-award milestone data and status notes
- One project per page format
- Note: MILCON projects display more milestones than O&M funded projects

2. Program Report

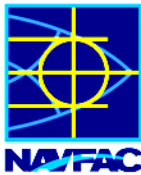

- Primarily pre-award milestone data and status notes
- Three projects per page format

3. Post-Award Report

- Post-award primary construction contract data and status notes
- One project per page format

Running a Report

Hot List Report		
<p>Contract - N4425513C7005 - Construct new Operations/Emergency Medical Facility</p> <p>Location UIC/Name: N00620 -- NAS WHIDBEY ISLAND WA</p> <p>Budget FY: 2013 P#:246 CUSTREF#:</p> <p>SUPCOMPRGM: MILCON COMSPONSOR: CNIC</p> <p>Scope: This project will construct a new approximately 2000 square foot building to accommodate the consolidation of Buildings 36 and 39 at Naval Weapons System Training Facility (NWSTF), Boardman, Oregon. The new facility will support range operations and emergency medical treatment with spaces for administration, briefing/training, medical treatment, storage, utilities, restrooms, showers, kitchen and duty berthing spaces. The project includes all the necessary utility work to support the new construction, and the demolition/removal of Buildings 36 and 39. The new building is anticipated to be numbered as Building 43, and this RFP will use this designation to indicate the new building.</p>	<p>Construction Photo:</p>  <p>AS OF 12-NOV-14 File Name: roofing 5.JPG</p>	<p><u>Monthly OPS Status Notes:</u> AS OF 09-JAN-15 **Work in Progress** - Interior finishes, painting.</p> <p>**Discussions** - Fire alarm annunciation to be local to Boardman range. - New building number to be 2996.</p>
