

Range Complex

Fort Devens offers 26 training areas for land navigation, orienteering, and conducting unit Field Training Exercises (FTX), to include an active Drop Zone. Fort Devens has 3,003 acres of maneuver land or 12.15 square kilometers (SQ. KM). Its size allows light infantry companies to conduct most platoon and squad level training requirements as prescribed by TC 25-1. However, the amount of available maneuver land severely limits company level tactical maneuver operations. Fort Devens is best suited for Combat Support (CS) and Combat Service Support (CSS) units because these types of units require less maneuver space to accomplish their training mission.

There are modern small arms ranges with both paper and pop up targeting, allowing units to sharpen their skills with M9, M16, M203, M249, MK19, and M240/M60 machine guns. We also support both AT-4 and SMAW firing. The range complex wouldn't be complete without a Demolition Range, Mortar Range, Hand Grenade Range, and a Sniper Qualification Course.

24 Facilities on South Post

- Basic Compass Course
- Land Navigation Course
- Rappel Tower
- Leadership Reaction Course
- Convoy Operations Course
- Vehicle Recovery Course
- Two POL Training Sites
- Classroom Building
- Three Refueling Sites
- Confidence Course
- Turner Drop Zone
- NBC Chamber
- Two ROWPU Sites
- Two Bridge Sites Wet/Dry
- IED Petting Zoo
- Urban Assault Course

- MOUT Course
- Tactical Training Base
- Automated Live Fire Shoot House

Major USARC combat support and combat service units that are heavy users of Fort Devens include engineering, medical, military police, military intelligence, transportation, maintenance, and quartermaster units. The major National Guard units are mainly infantry, aviation, engineer, military police, and multiple other CS and CSS units.

As part of the Army's Sustainable Range Program we are committed to providing the best possible training events for our soldiers.

Visit the Fort Devens website for more information.
