

Army Single Face to Industry (ASFI) is the designated Army portal for communicating contracting opportunities and notices to our industry partners and the general public. ASFI provides industry partners with a single Army entry point and a simplified method for conducting new business opportunities searches. ASFI is integrated with the Army Contract Writing Systems/Applications (PD2/SPS/PADDS) that allow seamless posting of contracting opportunities directly. ASFI interfaces with the Central Contractor Registration (CCR) System, Federal Business Opportunities (FedBizOpps), and On-Line Representation and Certification Application (ORCA) website. To further disseminate business opportunities, solicitations requiring advertisement at the Government Point of Entry (GPE) are also posted at FedBizOpps. The ASFI supports electronic submission of vendor responses to contracting opportunities.
