Apr 15	1594.8	ft

- /a. LRC is DWORSHAK LOCAL RULE CURVE.
/b. Under certain conditions, the GCL, BRN and DWR rule curves may be "shifted".
The rule curves shown are the "maximum" allowable. All or part of the "max" volume may be "shifted". DWR has priority over BRN if all volume can't be shifted. "shifts" will be determined on a case by case basis, from year to year, and month to month.
/c. Shift operation based on Dworshak shift only to Grand Coulee.
/d. Flood control elevations for LIBBY are based on VARQ flood control procedures.
/e. Flood control elevations for HUNGRY HORSE are based on VARQ flood control procedures.
/f. Duncan 28 Feb flood control target elev based on deviation request from BCH dated 29 Dec 2004
