

68W Sustainment Course

ATRRS Course Title: 68W Sustainment Course

ATRRS Course Number: 964-68W10 (S)

Course Length: 7.0 Days

Description: This is a 7 day, table orientated course that is conducted IAW the guidance provided in TC 8-800, Medical Education and Demonstration of Individual Competence (MEDIC). Graduates of this course will receive up to 48 hours of continuing educational units (CEU) and will also receive credit for the Annual Combat Medic Skills Validation Test (ACMS-VT), which is a requirement of the 68W MOS. During this course, students will receive instruction on:

1. Trauma Assessment and Treatment
2. Airway Management
3. Intravenous Access, Medications, and Management
4. Medical Assessment and Treatment (including CBRN)
5. Triage and Evacuation
6. Cardiopulmonary Resuscitation Management
7. Obstetrics, Gynecology, and Pediatric Treatment

Students will be expected to demonstrate proficiency in these seven areas throughout the week and apply those skills during a culminating exercise in a simulated combat environment.

Annual attendance of this course will guarantee that students meet all the requirements for maintaining their National Registry Emergency Medical Technician Basic (NREMT-B) certification and Cardiopulmonary resuscitation (CPR) certification at the healthcare provider level.

Requirements: Students must be fully transitioned 68W (Y2 removal) and not be on temporary medical profile or permanent profile which will prevent full participation in the course.
