

## Battle Rhythm - Daily and Periodic Tasks Performed in GCSS-Army

### Transaction Codes (T-Codes) Used Regularly in the GCSS-Army Portal

<b>LL01</b>	Use this transaction (Warehouse Activity Monitor) to view incomplete goods movements within the warehouse.
<b>ZOAREP</b>	Use this transaction to view the overage reparable report for recoverable items being returned to the Supply Support Activity (SSA).
<b>ZMD07X</b>	Use this transaction to view and manage excess inventory.
<b>ZPODCHK</b>	Use this transaction to view the status of Purchase Orders and the late delivery report.
<b>ZPODRPT</b>	Use this transaction to collect data on shipments that have a supply or transportation discrepancy.
<b>ZATF</b>	Authorized to Forecast (ATF). Use this transaction to review the SSA's current stock situation and to run the zero balance report, and the type of stock status for all ASL line items.
<b>ZMB59</b>	Use this transaction to view movements, including receipts, inventory adjustments, and customer issues picked up by your customers.
<b>ZPROSTAT</b>	Use this transaction to view all open and closed orders (POs & STOs).
<b>VL06i</b>	Use this transaction to view the items available for customer pickup. This is the Inbound Delivery Monitor.
<b>MiGO</b>	Use this transaction to perform Condition Code changes and receipts without reference (FOI).
<b>ZiAR</b>	Use this transaction to view year-to-date totals of gains and losses that have been posted to the inventory adjustment report.
<b>ZAiT</b>	Use this transaction to setup and maintain user settings for the Automatic Identification Technology (AIT) software on the handheld terminals and GCSS-Army desktops.

### Inventory Overview

<b>Li02N</b>	Use this transaction to activate, deactivate or delete a physical inventory record.
<b>ZLi21</b>	Use this transaction to clear the differences between quantities in the bins and quantities shown in GCSS-Army. (Quantities posted to 999 Differences interim storage type (IST)). When the differences are cleared, quantities will match.
<b>LB10</b>	Use this transaction to view transfer requirement and list for storage type.
<b>LB02</b>	Use this transaction to change a transfer requirement.
<b>LX22</b>	Use this transaction to view current and past physical inventory reports.
<b>LX17</b>	Use this transaction to view inventory losses and gains by storage type.
<b>LX18</b>	Use this transaction to view statistics for inventory differences.
<b>LX25</b>	Use this transaction to view inventory status.
<b>LS03N</b>	Use this transaction to view storage bins.
<b>LX04</b>	Use this transaction to assess the warehouse bin situation.
<b>LX10</b>	Use this transaction to evaluate movements per storage type.
<b>ZLM55</b>	Use this transaction to print bar code labels for verification control in the warehouse.
<b>ZDWMSE</b>	Use this transaction to validate items issued (Post-Post) when the warehouse comes back online after it was disconnected from the network.
