

Warrior Transition Command

The past eight years have been a time of significant investment in the development of the Warrior Care and Transition Program (WCTP). The Army Medical Action Plan was established in 2007 and the Warrior Transition Command (WTC) stood up in 2009 as the Army's proponent for the WCTP. WTC is a subordinate command of the U.S. Army Medical Command.

The WTC's mission is to provide centralized oversight, guidance, and advocacy, empowering wounded, ill, and injured Soldiers, Veterans, and Families through a comprehensive transition plan for successful reintegration back into the force or into Veteran status with dignity, respect, and self-determination. The WCTP's top priority is the welfare of Soldiers and their Families through commitment to the best care and treatment of wounded, ill, and injured Soldiers and commitment to education, training and careers.

Warrior Transition Units (WTUs) were developed in 2007 in order to provide better care and management to wounded, ill, and injured Soldiers and their Families. Soldiers assigned to WTUs include active duty Soldiers who require at least six months of rehabilitative care and complex medical management and Army Reserve Component Soldiers who require definitive medical care.

The Army recognizes warrior care as an enduring mission. WTC has the following core warrior care competencies:

- Acts as the overall proponent for the U.S. Army's Warrior Care and Transition Program (WCTP)
- Evaluates and standardizes Warrior Transition Unit (WTU) policies and procedures
- Supports wounded, ill and injured Soldiers throughout their Comprehensive Transition Plan (CTP)
- Assists wounded, ill and injured Soldiers and Veterans with career and education opportunities
- Ensures execution of warrior care programs, including the U.S. Army Wounded Warrior Program (AW2), for the MEDCOM commander
- Coordinates with the U.S. Department of Army staff, Congress, and other services and departments on warrior care matters

While WTUs resemble a traditional Army unit, their singular mission is to provide comprehensive outpatient management that allows Soldiers to successfully heal and transition.

Within the WTUs, Soldiers receive personalized support from a Triad of Care that includes a Nurse Case Manager (NCM), a Squad Leader (SL), and a Primary Care Manager (PCM). The Triad of Care coordinates clinical and non-clinical issues to successfully transition Soldiers and their Families either back to the force or back to Civilian life. Since inception, WTUs have helped more than 70,000 Soldiers to heal and transition and returned more than 30,375 Soldiers back to the force.

Today, the Army's WCTP consists of 24 Warrior Transition Units on Army installations throughout the United States, (including Alaska and Hawaii) Puerto Rico and Germany. Currently, 11 installations have Community Care Units (CCUs), allowing Soldiers with non-complex medical cases to heal in their home communities with the support of their Families and Caregivers. As the WCTP moves forward, it will continue to evolve to meet the changing needs of its population as well as the Army. Warrior care remains an Army priority and a sacred obligation.

WTC also oversees the Army Wounded Warrior Program (AW2). AW2 assists and advocates for the Army's most severely wounded, ill, and injured Soldiers, Veterans, and their Families wherever they are located, regardless of their military status. Soldiers who qualify for AW2 are assigned to the program as soon as possible after arriving at the Warrior Transition Unit. Through the local support of AW2 Advocates, AW2 strives to foster the Soldier's independence. There are more than 22,860 Soldiers and Veterans currently in AW2.

BY THE NUMBERS

*** 2,659 Soldiers currently recovering at 24 WTUs and 11 CCUs**

◇ **Active Duty: 1,482**

◇ **National Guard: 496**

◇ **Reserve: 681**

*** More than 2,500 professional military and civilian Cadre**

*** Soldiers in WTUs who have deployed to theater at some point in their careers:**

78 percent of current population

*** Battle injured: 77**

*** PTSD as primary condition: 340**

*** Soldiers supported by WCTP since 2007: more than 70,017**

*** Soldiers returned to the force: 43 percent**

Numbers current as of February 2016
