

FMCSA Systems Release Notice

May 08, 2013

DataQs

In April, the Federal Motor Carrier Administration (FMCSA) launched an enhanced DataQs Website with new features to improve the user experience. Since the launch, FMCSA has released the following modifications:

- A patch addresses several functionality issues related to Internet Explorer 10, including direct login to DataQs and several bugs that affected search features on the My DataQs page.
- Export functionality for the My DataQs page has been added back to the system. This update also addresses display issues when DataQs is accessed via the Portal.
- Edit checks have been added to inspection report number and US DOT number when applicable.
