MSC.1/Circ.1405
23 May 2011

**INTERIM GUIDANCE TO SHIPOWNERS, SHIP OPERATORS, AND SHIPMASTERS ON
THE USE OF PRIVATELY CONTRACTED ARMED SECURITY PERSONNEL ON BOARD
SHIPS IN THE HIGH RISK AREA**

1 The Maritime Safety Committee, at its eighty-ninth session (11 to 20 May 2011), approved the interim guidance given in the annex.

2 This document was developed taking into account the guidance provided by the Organization for preventing and suppressing piracy and armed robbery against ships, including the guidance contained in MSC.1/Circ.1334 on Guidance to shipowners and ship operators, shipmasters and crews on preventing and suppressing acts of piracy and armed robbery against ships, and MSC.1/Circ.1333 on Recommendations to Governments for preventing and suppressing piracy and armed robbery against ships.

3 This circular should be read in conjunction with MSC.1/Circ.1406 on Interim Recommendations for flag States regarding the use of privately contracted armed security personnel on board ships in the High Risk Area.

4 Member Governments are recommended to bring this circular to the attention of all national agencies concerned with anti-piracy activities, shipowners, ship operators, shipping companies, shipmasters and crews.

5 Member Governments are also recommended to take any necessary action to implement, as appropriate, the interim guidance given in the annex.

6 Member Governments, international organizations and non-governmental organizations with consultative status are invited to bring to the attention of the Committee, at the earliest opportunity, the results of the experience gained from the use of the interim guidance so as to assist the Committee in deciding on any action to be taken.

ANNEX

INTERIM GUIDANCE TO SHIPOWNERS, SHIP OPERATORS, AND SHIPMASTERS ON THE USE OF PRIVATELY CONTRACTED ARMED SECURITY PERSONNEL (PCASP) ON BOARD SHIPS IN THE HIGH RISK AREA

1. Introduction

The increased threat to commercial shipping by Somalia-based pirates has led to extended use of armed guards and a marked expansion in the number of firms offering armed maritime security services for vessels transiting the High Risk Area. The Organization, whilst not endorsing the use of privately contracted armed security personnel (PCASP), understands that shipping companies may find it difficult to identify reliable, professional private providers of armed security.

The decision on the employment of PCASP on board ships is a complex one for a ship owner. The absence of applicable regulation and industry self-regulation coupled with complex legal requirements governing the legitimate transport, carriage and use of firearms gives cause for concern. This situation is further complicated by the rapid growth in the number of Private Maritime Security Companies (PMSC) and doubts about the capabilities and maturity of some of these companies. Significant competence and quality variations are present across the spectrum of contractors offering services.

The purpose of this guidance is to assist shipowners, ship operators and ship masters considering the use of PCASP on board ships to provide additional protection against piracy.

It is important to note that flag State jurisdiction and thus any laws and regulations imposed by the flag State concerning the use of PMSC and PCASP apply to their vessels. Furthermore it is also important to note that port and coastal States' law may also apply to such vessels.

The use of PCASP should not be considered as an alternative to Best Management Practices (BMP) and other protective measures. Placing armed guards on board as a means to secure and protect the vessel and its crew should only be considered after a risk assessment has been carried out. It is also important to involve the Master in the decision making process.

1.1 Definitions

High Risk Area: an area as defined in the BMP unless otherwise defined by the flag State.

Private maritime security companies (PMSC): Private contractors employed to provide Security Personnel, both armed and unarmed, on board for protection against piracy.

Privately contracted armed security personnel (PCASP): armed employees of PMSC.

1.2 Risk assessment

Shipowners should ensure that the flag State is consulted at an early stage in their consideration of the decision to place PCASP on board to ensure that any statutory requirements are met.

Whether to use PCASP within the High Risk Area is a decision for the individual shipowner after a thorough risk assessment and after ensuring all other practical means of self protection have been employed.

The risk assessment should include and document the following factors and considerations, prior to making the determination to take such actions:

- .1 vessel and crew security, safety and protection;
- .2 whether all practical means of self protection have been effectively implemented in advance;
- .3 the potential misuse of firearms resulting in bodily injury or death;
- .4 the potential for unforeseen accidents;
- .5 liability issues;
- .6 the potential for escalation of the situation at hand; and
- .7 compliance with international and national law.

2. PMSC Selection Criteria

2.1 General

As with any other type of contractor it is important to undertake the usual due diligence, which normally includes investigation and enquiries in relation to:

- .1 Company structure and place of registration;
- .2 Company ownership;
- .3 Financial position (e.g. annual accounts/bank references);
- .4 Extent of insurance cover (in particular covering third-party risks);
- .5 Senior management experience; and
- .6 Quality management indicators – e.g. ISO accreditation.

2.2 PMSC Background Information

To assess the capability of the PMSC to carry out a proposed task, a thorough enquiry regarding the prospective PMSC should be undertaken, particularly in the absence of a robust accreditation scheme for PMSC.

The PMSC should be able to provide documentary evidence which may include:

- .1 maritime (as opposed to land-based) experience;
- .2 written procedures on management including team-leading skills, chain of authority, change in command, responsibilities in life saving;
- .3 understanding of flag State, port State and coastal State requirements with respect to carriage and usage of firearms;
- .4 availability of written testimonials/references from previous clients in the maritime industry;
- .5 availability of documentary evidence that firearms are procured, transported, embarked and disembarked legally;
- .6 understanding of the Somalia-based piracy threat including the military operations in the area, and the means to maintain current knowledge;
- .7 understanding of BMP and, in particular, ship protection measures; and
- .8 access to legal advice (e.g. in-house counsel / external legal advisers) on a 24/7 basis.

2.3 Selection and Vetting of PMSC

As the quality of the service delivery depends to a very great extent on the quality and experience of the individuals that make up the onboard PCASP, the quality of the selection and vetting of that team is essential. The PMSC should demonstrate that they have verifiable, written internal policies and procedures for determining suitability of their employees.

The PMSC should be able to provide documentary evidence which may include:

- .1 criminal background checks;
- .2 history of employment checks;
- .3 military and law enforcement background checks, where applicable;
- .4 records of medical, physical, and mental fitness of personnel (including drug and alcohol testing);
- .5 verifiable system in place to ensure continued suitability for employment of their personnel;

- .6 documentary evidence of relevant experience and certification in the use and carriage of firearms to be deployed; and
- .7 systems for provision of security identity documentation, travel documents and visas.

2.4 Training of PCASP

As the quality of professional training given to PCASP is of extreme importance, the shipowner should verify that the PMSC have adequate training procedures in place. The records of that training should give confidence that the PCASP have been provided with appropriate knowledge and skills.

The PMSC should be able to provide documentary evidence which may include:

- .1 comprehensive and detailed records of training, both initial and refresher training, available for inspection;
- .2 subject to any additional requirements of the flag State, PCASP have received, as a minimum, ship-board familiarization training;
- .3 personnel trained and qualified to documented company standards in the appropriate use of force following recognized principles/guidelines recognized by the flag State;
- .4 personnel trained to operate the specific firearms and other security equipment that will be used on the vessels on which they will be deployed;
- .5 personnel given medical training to a recognized international standard; and
- .6 personnel given appropriate training and/or briefing with specific reference to the vessel type, where that vessel will be trading, and the provisions of the International Ship and Port Facility Security (ISPS) Code, International Safety Management (ISM) Code and the BMP.

3. Service Provision Considerations

3.1 Insurance

Owners should verify that PMSC maintain insurance cover for themselves, their personnel and third-party liability cover and that the PMSC terms of engagement do not prejudice or potentially prejudice the shipowners' insurance cover.

Shipowners insurance cover

Liabilities, losses and expenses arising out of the deployment of PCASP may impact on the shipowner's property and liability insurance cover. Shipowners are strongly recommended to consult with their insurers prior to contracting with and embarking PCASP to assess the potential impact on their insurance cover, particularly as it relates to armed engagements and liability insurance held by the PMSC.

PMSC insurance cover

PMSC should provide evidence that they hold and will maintain for the duration of the contract:

- .1 public and employers liability insurance cover to an appropriate level and as required by the shipowner; and
- .2 personal accident, medical expenses, hospitalization and repatriation insurance.

The PMSC should insure its personnel to carry and use firearms on the high seas and territorial waters, for accident, injury and damage arising from the use of firearms and liability for any claim that might arise from the carriage and the use of firearms.

It is vital that shipowners, charterers and underwriters review all provisions in their charters and policies and ensure adequate attention is paid to the questions raised.

3.2 PCASP Team Size, Composition and Equipment

The size, composition and equipment of the proposed PCASP team should be carefully discussed and agreed as necessary by the shipowner contracting with the PMSC. Factors for consideration may include:

- .1 **Size of the PCASP Team** – this will be influenced by factors including: length of the estimated time of the vessel transit, latest threat assessment, the agreed duties of the PCASP team (will they act as additional lookouts, assist with rigging self protection measures?) and the size and type of vessel. The analysis should indicate the number of persons that should form the security team.
- .2 **Ship safety certificate** – the size of the PCASP team plus the crew should not exceed that specified in the Ship's Safety Certificate. If the ship safety certificate requirements cannot be met due to added security personnel, then the flag Administration should be consulted.
- .3 **Composition** – it is important that there is an appropriate hierarchy, experience and skill mix within the onboard PCASP team. The team leader should be competent in vessel vulnerability and risk assessments and be able to advise on ship protection measures. It is recommended that one of the PCASP personnel be qualified as the team medic.
- .4 **Equipment requirements** – this will be influenced by factors including: length of the estimated time of the vessel transit, latest threat assessment, the agreed duties of the PCASP team, (will they act as additional lookouts, utilize day and night vision equipment, assist with rigging self protection measures?) and the size and type of vessel. Enhanced medical equipment is recommended.

3.3 Command and Control of Onboard Security Team – including relationship with the Master

A shipowner / operator when entering into a contract with a PMSC should ensure that the command and control structure linking the ship operator, the Master, the ship's officers and the PCASP team leader has been clearly defined and documented.

Further, prior to boarding the PCASP, the shipowner should ensure that the Master and crew are briefed and exercises are planned and conducted so that all the roles and responsibilities are understood by all personnel on board prior to entering the High Risk Area.

In order to provide the required clarity, the documented command and control structure should provide:

- .1 A clear statement that at all times the Master remains in command and retains the overriding authority on board;
- .2 A clearly documented set of vessel and voyage-specific governance procedures, *inter alia*, covering procedures in 3.4, 3.5 and 3.6 which include procedures for conducting exercises based on these procedures;
- .3 A documented list of duties, expected conduct, behaviour and documentation of PCASP actions on board; and
- .4 Transparent two-way information flow and recognizable coordination and cooperation between the shipowner, charterer, PCASP, PMSC and the vessel's Master, officers and crew.

Factors to determine such success may include:

- .1 Providing regular updated intelligence-based threat assessments throughout the contracted period on board, and utilizing this information to offer suggestions as to the vessel's proposed routeing, amending same if required, and under the ship's contractual arrangements;
- .2 Monitoring the daily activities of the onboard PCASP;
- .3 Having a 24-hour Emergency Response and a Contingency Plan in place covering all potential actions; and
- .4 Providing feedback on crew training and ship hardening requirements based upon reports received from the PCASP.

3.4 Management of Firearms and Ammunition from Embarkation to Disembarkation

An essential requirement of the PCASP team will be to demonstrate responsible management and use of weapons and ammunition at all times when on board.

Issues to be considered should include:

- .1 Documented compliance with the relevant flag, coastal and port State legislation and relationships governing the transport and provision of firearms, ammunition and security equipment to the point of embarkation

- and disembarkation or ports/places at which the vessel may call as part of its intended voyage whilst the PCASP team is on board. PCASP should be able to prove that actual inventory carried matches all documented declarations;
- .2 Appropriate containers for firearms, ammunition and security equipment at the point of transfer to the ship;
 - .3 Documented standards and procedures for a complete inventory of all firearms, ammunition and security equipment available upon arrival aboard the vessel (inventory should detail make, model, calibre and serial number of all firearms; and details of ammunition and amount);
 - .4 Control procedures for separate and secure onboard stowage and deployment of firearms, ammunition and security equipment;
 - .5 Areas where firearms may or may not be carried, together with the weapon state (e.g. unloaded & magazine off, magazine on and safety catch on and no round chambered) and what will initiate a change in that state should be confirmed;
 - .6 Detailed and exercised orders for when firearms can be loaded and "made ready" for use should be confirmed, trained and documented during certain periods as listed in the PCASP contract, to ensure the highest of safety and operational capabilities for use of arms aboard the vessel; and
 - .7 The inventory should be reconciled on disembarkation of all arms and ammunition from the vessel.

3.5 Rules for the Use of Force

It is essential that all PCASP have a complete understanding of the rules for the use of force as agreed between shipowner, PMSC and Master and fully comply with them. PCASP should be fully aware that their primary function is the prevention of boarding using the minimal force necessary to do so. The PMSC should provide a detailed graduated response plan to a pirate attack as part of its teams' operational procedures.

PMSC should require their personnel to take all reasonable steps to avoid the use of force. If force is used, it should be in a manner consistent with applicable law. In no case should the use of force exceed what is strictly necessary, and in all cases should be proportionate to the threat and appropriate to the situation.

PMSC should require that their personnel not use firearms against persons except in self-defence or defence of others against the imminent threat of death or serious injury, or to prevent the perpetration of a particularly serious crime involving grave threat to life.

3.6 Reporting and Record Keeping

The Master should maintain a log of every circumstance in which firearms are discharged, whether accidental or deliberate. Such actions should be fully documented in sufficient detail in order to produce a formal written record of the incident.

The requirements of a formal written report may be considered to include the following:

- .1 Time and location of the incident;
- .2 Details of events leading up to the incident;
- .3 Written statements by all witnesses and those involved from the vessel crew and security team in the incident;
- .4 The identity and details of personnel involved in the incident;
- .5 Details of the incident;
- .6 Injuries and/or material damage sustained during the incident; and
- .7 Lessons learned from the incident and, where applicable, recommended procedures to prevent a recurrence of the incident.

In the event that the PCASP uses force, PCASP team leaders should be advised to photograph (if appropriate), log, report and collate contemporaneous written statements from all persons present at the incident in anticipation of legal proceedings.

In addition to incident reporting it is suggested that following a tour of duty the PCASP team should submit a full report to the shipowner / ship operator, via their employers if required, giving full details of the deployment, operational matters, any training and/or ship hardening conducted, and offering advice as to any further enhancements to security that may be considered.

3.7 Familiarization for Master and the crew

Shipowners and ship operators should ensure that the Master and the crew receive familiarization in relation to this guidance.
