

Searching by Keyword

To search for Recall Communications information by keyword, follow these steps:

1. Use the search tools available in your PDF reader to locate occurrences of the keyword text you wish to find within this document.
2. If your search was successful, note the "NHTSA ID" for the row(s) containing your keyword that you wish to view. Also note the Document Names for the documents you would like to access for the chosen NHTSA IDs.
3. Select the link below to access the NHTSA Keeping You Safe page with the search by ID Number selected for Recalls:
<http://www-odi.nhtsa.dot.gov/owners/SearchSafetyIssues?searchType=ID&prodType=A&targetCategory=R>
4. Enter the NHTSA ID Number(s) from your search in the textbox in the "Safety Issues by NHTSA ID" block. You can enter up to 25 IDs separated by comma, slash (/) or new line.

The screenshot shows a search interface titled "Select Type". On the left, there is a vertical menu with options: Vehicles, Car Seats, Tires, Equipment, Keyword (Complaints Only), and ID Number. The "Vehicles" option is selected. The main area is titled "Safety Issues by NHTSA ID" and contains the instruction: "Select one or more areas to search, then enter up to 25 NHTSA IDs separated by comma, slash (/) or new line." Below this instruction are four checkboxes: "Recalls" (checked), "Investigations", "Complaints", and "Manufacturer Communications". A large text input field is provided for entering NHTSA IDs. At the bottom right of the form is a yellow "GO" button.

5. Select the GO button to view the available information for those IDs.
6. Select "Associated Documents" to expand the listing of relevant documents for the given NHTSA ID (Campaign Number). The listing is displayed below the Details section. Locate the Document Name from this index file in the Name column and select it to display the document.

If you have any additional IDs you wish to view, you can enter those in the "Refine/New Search" block at the bottom of the search results page after removing the existing IDs with the Clear Entries button. Be sure to reselect the Recalls checkbox.

Note: If your search within this document returns no matches, try using a different keyword.

11V577	RCRN-11V577-6254.pdf	KEYSTONE	ALPINE	2011	This communication is a 6th notice to owners for advisory 11-170, for IOTA ITS-50R transfer switches experiencing heat related failures when exposed to the elevated electrical loads associated with RV use in higher ambient temperatures. The failure is causing connections and wiring in the transfer switch to degrade and heat leading to elevated case temperatures and an increased risk of electrical damage to other appliances from loss of neutral in a 240V circuit. Continued use of the vehicle without replacing the transfer switch increases the risk of a fire, personal injury, and property damage
11V577	RCRN-11V577-6254.pdf	KEYSTONE	ALPINE	2010	This communication is a 6th notice to owners for advisory 11-170, for IOTA ITS-50R transfer switches experiencing heat related failures when exposed to the elevated electrical loads associated with RV use in higher ambient temperatures. 12V373	RCMN-12V373-2601.pdf	LEXUS	HS 250 HYBRID	2010	<p>Dealer Letter: Background Safety Recall COJ involved inspecting the right and left Rear Suspension Lower Arm No. 1 (arm) for looseness. Based upon this inspection, it may have been necessary to replace the arm(s). Toyota received reports from dealers indicating that some vehicles experienced symptoms of the recalled condition after being inspected or repaired. Upon investigation, it was discovered that some inspections were not adequate and portions of the repair procedure may not have been performed correctly. Based upon this information, Toyota will be re-notifying all owners covered by Safety Recall COJ. The notification will apologize to customers and inform them that their vehicles may not have been inspected or repaired correctly. The letter will request the customer to return to the dealership for a revised inspection and remedy procedure. The revised inspection and remedy will be performed at No Charge</p>

13V335	RCRN-13V335-8123.pdf	FORD	FOCUS	2012	13C04 renotification. Mailed September 21, 2016
13V338	RCRN-13V338-2842.pdf	KEYSTONE	BULLET	2013	This is the 3rd notice to owners for advisory 13-196, a limited number failures with the mounting fasteners for the stabilizer jacks in the population. The head of the fastener may snap off and cause the jack to become loose and separate from the vehicle in transit. If the fastener fails and the jack separates from the vehicle, there is an increased risk of personal injury and property damage
13V338	RCRN-13V338-2842.pdf	KEYSTONE	PASSPORT	2013	This is the 3rd notice to owners for advisory 13-196, a limited number failures with the mounting fasteners for the stabilizer jacks in the population. The head of the fastener may snap off and cause the jack to become loose and separate from the vehicle in transit. If the fastener fails and the jack separates from the vehicle, there is an increased risk of personal injury and property damage
13V393	RCRN-13V393-8136.pdf	DUTCHMEN	VOLTAGE	2014	This is the 2nd notice to owners for advisory 13-197, vehicles subject to this recall campaign may not have the clamp installed correctly at the generator fuel filter. If the fuel line becomes disconnected it increases the risk of a fuel leak leading to an increased risk of fire, personal injury and property damage
13V449	RMISC-13V449-5954.pdf	SUZUKI	GSX-R1000	2013	This recall reminder was sent as part of an outreach effort to a subset of owners of affected motorcycles that have not yet had the recall repair performed. The reminder informs owners of the defect and potential consequences, and encourages them to make an appointment to have the recall repair performed
13V449	RMISC-13V449-5954.pdf	SUZUKI	GSX-R1000	2012	This recall reminder was sent as part of an outreach effort to a subset of owners of affected motorcycles that have not yet had the recall repair performed. 14V604	RCMN-14V604-6225.pdf	TOYOTA	TACOMA	2011	dealer letter: The subject vehicles rear suspension system contains leaf springs that are constructed of either three or four leaves. There is a possibility that a leaf could fracture due to stress and corrosion. If this occurs and the vehicle continues to be operated, the broken leaf could move out of position and contact surrounding components, including the fuel tank. If the broken leaf contacts the fuel tank repeatedly, it could puncture the tank and cause a fuel leak. In the presence of an ignition source, this could result in a fire

If this occurs and the vehicle continues to be operated, the broken leaf could move out of position and contact surrounding components, including the fuel tank. If the broken leaf contacts the fuel tank repeatedly, it could puncture the tank and cause a fuel leak. In the presence of an ignition source, this could result in a fire
14V604	RCMN-14V604-6225.pdf	TOYOTA	TACOMA	2008	dealer letter: The subject vehicles rear suspension system contains leaf springs that are constructed of either three or four leaves. There is a possibility that a leaf could fracture due to stress and corrosion. If this occurs and the vehicle continues to be operated, the broken leaf could move out of position and contact surrounding components, including the fuel tank. If the broken leaf contacts the fuel tank repeatedly, it could puncture the tank and cause a fuel leak. In the presence of an ignition source, this could result in a fire

15V320	RCMN-15V320-2122.pdf	HONDA	ODYSSEY	2004	Dealer message - general Takata airbag recall status update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture
15V320	RCMN-15V320-2122.pdf	HONDA	ODYSSEY	2003	Dealer message - general Takata airbag recall status update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture
15V320	RCMN-15V320-2122.pdf	HONDA	ODYSSEY	2002	Dealer message - general Takata airbag recall status update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture
15V320	RCMN-15V320-2122.pdf	HONDA	PILOT	2008	Dealer message - general Takata airbag recall status update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture
15V320	RCMN-15V320-2122.pdf	HONDA	PILOT	2007	Dealer message - general Takata airbag recall status update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture

15V320	RCMN-15V320-3692.pdf	HONDA	ELEMENT	2011	Alpha population update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture
15V320	RCMN-15V320-3692.pdf	HONDA	ELEMENT	2010	Alpha population update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture

15V561	RCRN-15V561-9502.pdf	KEYSTONE	BIG SKY	2009	This is the 3rd notice to owners for advisory 15-234, some IOTA ITS-50R transfer switches are experiencing heat related failures when exposed to the elevated electrical loads associated with RV use in higher ambient temperatures. The failure is causing connections and wiring in the transfer switch to degrade and heat leading to elevated case temperatures and an increased risk of electrical damage to other appliances from loss of neutral in a 240V circuit. Continued use of the vehicle without replacing the transfer switch increases the risk of a fire, personal injury, and property damage

15V696	RCRN-15V696-9483.pdf	BLUE BIRD	VISION	2017	<p>15V-696 (R15YH Non-School Bus) Renotification Issue Date: 06/06/2016</p> <p>Blue Bird Body Company has decided that a defect which relates to motor vehicle safety exists in certain 2016 through 2017 model year Blue Bird Vision model school and non-school buses manufactured from September 3, 2015, through September 18, 2015, with electric windshield wiper motors.</p> <p>On the subject buses, the windshield wiper motor harness electrical connector may have been assembled incorrectly causing the wiper system to stop working without warning. Inoperative windshield wipers may decrease the drivers visibility during inclement weather, increasing the risk of a crash.</p> <p>To correct this defect, the windshield wiper harness should be inspected and repaired, if necessary.</p> <p>Blue Bird recommends you contact your local or nearest Blue Bird Dealer to arrange for this recall to be performed. The Dealer can perform the repairs, or arrange for repairs to be performed by a service facility authorized by the Dealer. However, you may elect to perform this recall yourself or pay another independent repair facility to perform this recall. A qualified technician should perform this recall.</p> <p>If a terminal or connector is found to be defective during the inspection process, please e-mail your request to Lisa Hancock lisa.hancock@blue-bird.com for a replacement terminal or connector. Be sure to provide a valid shipping address as UPS does not deliver to Post Office Boxes</p>

NHTSA ID	DOCUMENT NAME	MAKE	MODEL	MODEL YEAR	SUMMARY
15V730	RCRN-15V730-4117.pdf	BLUE BIRD	ALL AMERICAN	2015	<p>15V-730 (R15YI) Renotification Final Issue Date: 06/21/2016 2007 through 2015 model year All American model 2007 through 2011 model year Micro Bird model 2007 through 2015 model year Vison model 2007 through 2008 model year Conventional model</p> <p>Under certain conditions present in some applications, the platforms included on the S-Series Model Wheelchair Lifts (S2005, S2010, S5005, S5010, S5505, S5510) can exhibit cracking of the platform pivot plate while in the stowed position. If left unchecked, the crack can propagate to the point where separation of the rear portion of the pivot plate occurs rendering the lift potentially inoperable and possibly unsafe for the operator. In the event the crack occurs on both sides of the platform and is allowed to propagate to the point of material separation on both sides it is possible for the lift platform to lean against the vehicle lift door(s) and fall out of the vehicle when the door(s) is (are) opened putting the lift operator at risk. The holes in the folding link arms may have been manufactured oversized allowing a substantial amount of free play in the platform. Replacing the link arms does alleviate the issue.</p> <p>The link arms should be inspected for damage or bearings moved out of position. If damage is found Ricon Corporation will provide parts required to remedy the issue at no cost. The Ricon recall number is 15E-068.</p> <p>You can locate your nearest Ricon wheelchair servicing dealer by using the Ricon Dealer Locator at the lower left of the Ricon Website www.riconcorp.com. 15V730	RCRN-15V730-4117.pdf	BLUE BIRD	MICRO BIRD	2011	<p>15V-730 (R15YI) Renotification Final Issue Date: 06/21/2016 2007 through 2015 model year All American model 2007 through 2011 model year Micro Bird model 2007 through 2015 model year Vison model 2007 through 2008 model year Conventional model</p> <p>Under certain conditions present in some applications, the platforms included on the S-Series Model Wheelchair Lifts (S2005, S2010, S5005, S5010, S5505, S5510) can exhibit cracking of the platform pivot plate while in the stowed position. If left unchecked, the crack can propagate to the point where separation of the rear portion of the pivot plate occurs rendering the lift potentially inoperable and possibly unsafe for the operator. In the event the crack occurs on both sides of the platform and is allowed to propagate to the point of material separation on both sides it is possible for the lift platform to lean against the vehicle lift door(s) and fall out of the vehicle when the door(s) is (are) opened putting the lift operator at risk. The holes in the folding link arms may have been manufactured oversized allowing a substantial amount of free play in the platform. Replacing the link arms does alleviate the issue.</p> <p>The link arms should be inspected for damage or bearings moved out of position. If damage is found Ricon Corporation will provide parts required to remedy the issue at no cost. The Ricon recall number is 15E-068.</p> <p>You can locate your nearest Ricon wheelchair servicing dealer by using the Ricon Dealer Locator at the lower left of the Ricon Website www.riconcorp.com. 15V731	RCRN-15V731-7800.pdf	BLUE BIRD	VISION	2015	<p>15V-731 (R15YI Non-School Bus) Renotification Date: 06/21/2016</p> <p>2007 through 2015 model year All American model 2007 through 2011 model year Micro Bird model 2007 through 2015 model year Vision model 2007 through 2008 model year Conventional model</p> <p>Under certain conditions present in some applications, the platforms included on the S-Series Model Wheelchair Lifts (S2005, S2010, S5005, S5010, S5505, S5510) can exhibit cracking of the platform pivot plate while in the stowed position. If left unchecked, the crack can propagate to the point where separation of the rear portion of the pivot plate occurs rendering the lift potentially inoperable and possibly unsafe for the operator. In the event the crack occurs on both sides of the platform and is allowed to propagate to the point of material separation on both sides it is possible for the lift platform to lean against the vehicle lift door(s) and fall out of the vehicle when the door(s) is (are) opened putting the lift operator at risk. The holes in the folding link arms may have been manufactured oversized allowing a substantial amount of free play in the platform. Replacing the link arms does alleviate the issue.</p> <p>The link arms should be inspected for damage or bearings moved out of position. If damage is found Ricon Corporation will provide parts required to remedy the issue at no cost. The Ricon recall number is 15E-068.</p> <p>You can locate your nearest Ricon wheelchair servicing dealer by using the Ricon Dealer Locator at the lower left of the Ricon Website www.riconcorp.com. You may also contact Gerald Quimpe, Customer Support Manager, gquimpe@wabtec.com or you may call Gerald at (818) 267-3033 or Customer Service at (800) 322-2884 or (818) 267-3000.</p> <p>When the recall remedy has been performed on your Ricon wheelchair lift(s) complete and return the enclosed R15YI Recall Completion Reply Sheet so we may update our records. This will prevent you from receiving additional follow up notices</p>

16E045	RCMN-16E045-1409.pdf	BENDIX	SR-5	9999	The Bendix SR-5 valves covered by this campaign can be identified by the supplier code and date of manufacture located on the valve body. This document provides instructions on finding and interpreting these codes
16E045	RCMN-16E045-2628.pdf	BENDIX	SR-5	9999	This Interim Notice informs Bendix Aftermarket Distributors and Dealers of the SR-5 Valve campaign. It provides instructions to stop sale of suspect valves and how to return any remaining stock. Dealers and Distributors are also asked to provide valve purchaser contact info so that Bendix may notify them directly of the campaign. The remedy is currently being finalized. When those details become available, Bendix will notify them of any additional actions to take
16E045	RCONL-16E045-1583.pdf	BENDIX	SR-5	9999	This is the Bendix Final Remedy notice to Bendix OE purchasers for campaign 16E045
16E045	RCONL-16E045-2565.pdf	BENDIX	SR-5	9999	This document is the Owner Notification of the Final Remedy for 16E045
16E045	RCRIT-16E045-0829.pdf	BENDIX	SR-5	9999	This Technical Bulletin describes how to identify suspect SR-5 trailer spring brake valves and the process for obtaining the remedy kit for campaign 16E045
16E045	RIONL-16E045-0039.pdf	BENDIX	SR-5	9999	This Interim Notice informs Bendix OEM customers of the actions they need to take regarding the Bendix SR-5 Valve recall. They are instructed to determine if they need to file a defect notice with NHTSA and, if necessary, choose how they wish the campaign to be administered. The remedy is currently being finalized. When those details become available, Bendix will notify them of additional actions
16E045	RIONL-16E045-2562.pdf	BENDIX	SR-5	9999	This form requests Bendix OEM customers decide who will administer the SR-5 Valve campaign

16E076	RCOHL-16E076-8785.docx	THIEMAN	STEEL FRAME LIFTGATE	9999	<p>SUMMARY: Thieman Tailgates, Inc. is recalling certain TVL series liftgates, models TVL125, TVL125A, TVL16, and TVL16A, including those with SP and BO prefixes, manufactured between Sept. 25, 2014 and July 2, 2015 and roller chain parts orders between the same period. Only those liftgates which use roller chain running on sprockets (with teeth) as the main drive (lifting) chains are involved. Affected liftgates have a defective batch of roller chain with improperly heat treated side plates dispersed throughout, which may fail during normal liftgate operation.</p> <p>CONSEQUENCE: If either the street or curb side's main lifting chain fails during liftgate operation, that side of the liftgate will drop immediately to the ground causing an uneven load surface, increasing the risk of personal injury to the operator or bystanders.</p> <p>REMEDY: Thieman will notify truck equipment and body manufacturers, which purchased these liftgates or ordered parts or known owner's who sent warranty cards to Thieman. Thieman will replace the lifting chains free of charge. Owners or others involved may contact Alan Freeman at 1-800-524-5210 (ext 104)</p>

The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture
16V061	RCMN-16V061-7960.pdf	HONDA	INSIGHT	2012	Dealer message - general Takata airbag recall status update. The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture

If the nut comes off, the yoke can separate from the axle input shaft and cause the drive shaft to disconnect

NHTSA ID	DOCUMENT NAME	MAKE	MODEL	MODEL YEAR	SUMMARY
16V099	RCONL-16V099-4276.pdf	MACK	TITAN (TD)	2012	Mack Trucks, Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2012 through 2015 model Mack Pinnacle (CHU, CXU), Granite (GU), TerraPro (LEU MRU), and Titan (TD) trucks manufactured from September 1, 2011 through April 30, 2014 with a Mack proprietary axle. The cap nut that retains the interaxle driveshaft yoke to the rear axle input shaft may be subject to premature loosening. If the nut comes off, the yoke can separate from the axle input shaft and cause the drive shaft to disconnect
16V109	RMISC-16V109-7818.pdf	HONDA	NSS300	2014	Reminder postcards. During assembly of the rear brake line, the rear brake line joint may have been improperly torqued. If the rear brake line joint is improperly torqued, brake fluid may leak from the loose connection causing a reduction or loss of rear brake pressure

16V127	RCMN-16V127-9926.pdf	LEXUS	SC	2010	Dealer Letter: The Pontiac Vibe was manufactured by New United Motor Manufacturing, Inc. (NUMMI), a joint venture between Toyota and GM. Toyota has decided that a defect, which relates to motor vehicle safety, exists in all 2008 model year Pontiac Vibe vehicles that are not currently registered and, have never been registered, in Alabama, Florida, Georgia, Hawaii, Louisiana, Mississippi, South Carolina, Texas, Guam, Puerto Rico, Saipan, U.S. Samoa or U.S. Virgin Islands. As a result, GM is conducting a safety recall. The subject vehicles are equipped with front passenger air bag inflators (Takata-designated SPI, PSPI, or PSPI-L) which may have been manufactured in such a way as to have a potential for the intrusion of moisture over time. Depending on the circumstances, this potential condition could create excessive internal pressure when the air bag is deployed, which could result in the body of the inflator rupturing upon deployment. In the event of an inflator rupture, metal fragments could pass through the air bag cushion material, which may result in injury or death to vehicle occupants

16V169	RCOVL-16V169-1582.pdf	PORSCHE	CAYENNE	2016	Porsche has determined that a circlip at the brake pedal hinge may be missing. If the circlip is missing, the pedal pivot could start to move and the pedal could lose guidance. The pedal hinge could fracture, allowing the pedal to dislodge. If this occurs, the driver may not be able to apply the brakes, increasing the risk of crash. Porsche is conducting a safety recall on these vehicles. The brake pedal assembly circlip will be inspected, installing any missing circlips, free of charge

Automatic shipments will no longer be provided for part numbers once they are available for order on DCS.</p> <p>Dealers should place orders, as needed, on DCS. Orders will be filled as parts are available on a first in, first out basis. Dealers will need to enter a VIN for each order with a maximum order quantity of 1 part per VIN. Dealers should ensure that the correct part number is ordered for each VIN. If the part that is ordered is not for the VIN provided then the order will be REJECTED. Only the parts listed as available on DCS will be processed.</p> <p>Nissan is working towards adding additional part numbers on the DCS system for SVC ordering and will issue announcements as additional part numbers are added. Automatic shipments will continue for OCS parts not available for order on DCS</p>

16V244	RCMN-16V244-4428.pdf	NISSAN	NV200 TAXI	2015	<p>Parts Update 2 - R1606 Occupant Classification System (OCS) - VSRC - Retailer Announcement</p> <p>Parts Update</p> <p>The purpose of this update is to inform Retailers that select parts are now orderable on DCS as an SVC order type. Automatic shipments will no longer be provided for part numbers once they are available for order on DCS. For instruction on how to order on DCS refer to IPSB/16-384.</p> <p>Retailers should place orders, as needed, on DCS. Orders will be filled as parts are available on a first in, first out basis. Retailers will need to enter a VIN for each order with a maximum order quantity of 1 part per VIN. Retailers should ensure that the correct part number is ordered for each VIN. If the part that is ordered is not for the VIN provided then the order will be REJECTED. Only the parts listed as available on DCS will be processed.</p> <p>Infiniti is working towards adding additional part numbers on the DCS system for SVC ordering and will issue announcements as additional part numbers are added. Automatic shipments will continue for OCS parts not available for order on DCS</p>

16V244	RCMN-16V244-5534.pdf	CHEVROLET	CITY EXPRESS	2016	<p>Parts Update 5 R1607 Occupant Classification System Dealer Announcement</p> <p>Parts update:</p> <p>The purpose of this update is to inform dealers that select parts are now orderable on DCS as an SVC order type or no longer on restriction. Automatic shipments will no longer be provided for part numbers once they are available for order.</p> <p>Dealers should place orders, as needed, on DCS. Orders will be filled as parts are available on a first in, first out basis. Dealers will need to enter a VIN for each order with a maximum order quantity of 1 part per VIN. Dealers should ensure that the correct part number is ordered for each VIN. If the part that is ordered is not for the VIN provided then the order will be REJECTED. Only the parts listed as available on DCS will be processed.</p> <p>Nissan is working towards adding additional part numbers on the DCS system for SVC ordering and will issue announcements as additional part numbers are added. Automatic shipments will continue for OCS parts not available for order</p>

Automatic shipments will no longer be provided for part numbers once they are available for order on DCS. For instruction on how to order on DCS refer to IPSB/16-384.</p> <p>Retailers should place orders, as needed, on DCS. Orders will be filled as parts are available on a first in, first out basis. Retailers will need to enter a VIN for each order with a maximum order quantity of 1 part per VIN. Retailers should ensure that the correct part number is ordered for each VIN. If the part that is ordered is not for the VIN provided then the order will be REJECTED. Only the parts listed as available on DCS will be processed.</p> <p>Infiniti is working towards adding additional part numbers on the DCS system for SVC ordering and will issue announcements as additional part numbers are added. Automatic shipments will continue for OCS parts not available for order on DCS</p>

Nissan is working towards adding additional part numbers on the DCS system for SVC ordering and will issue announcements as additional part numbers are added. Automatic shipments will continue for OCS parts not available for order on DCS</p>
16V244	RCMN-16V244-7447.pdf	NISSAN	SENTRA	2014	<p>Occupant Classification System Voluntary Safety Recall Campaign Parts Update 2</p> <p>***** Parts update *****</p> <p>The purpose of this update is to inform dealers that select parts are now orderable on DCS as an SVC order type. Automatic shipments will no longer be provided for part numbers once they are available for order on DCS.</p> <p>Dealers should place orders, as needed, on DCS. Orders will be filled as parts are available on a first in, first out basis. Dealers will need to enter a VIN for each order with a maximum order quantity of 1 part per VIN. Dealers should ensure that the correct part number is ordered for each VIN. If the part that is ordered is not for the VIN provided then the order will be REJECTED. Only the parts listed as available on DCS will be processed. Nissan is working towards adding additional part numbers on the DCS system for SVC ordering and will issue announcements as additional part numbers are added. Automatic shipments will continue for OCS parts not available for order on DCS</p>
