Save money and fuel by following these fuel economy tips:

- **Drive sensibly.** Aggressive driving can lower your MPG by up to 33% on the highway and 5% around town.
- **Observe the speed limit.** Each 5 mph over 50 mph lowers your fuel economy by about 7%.
- **Avoid hauling cargo on your roof.** It increases aerodynamic drag, which lowers fuel economy.
- **Remove excess weight.** Avoid keeping unnecessary items in your vehicle, especially heavy ones.
- **Avoid unnecessary idling.** Idling gets 0 miles per gallon.
- **Keep your engine tuned.** Fixing a car that is out of tune can improve your fuel economy about 4%.
- **Keep tires properly inflated.** Check the sticker inside your door or glove box for the proper pressure.
- **Use the recommended grade of motor oil.** Look for motor oil that says "Energy Conserving" on the API label.
- **Plan and combine trips.** Several short trips use more fuel than one combined trip.
- Walk, bike, and take advantage of carpools and public transportation when possible.
