Federal Lands Access Program (FLAP)

Improving access to and within federal and tribal lands

Oklahoma

MAP-21 Funding Authorized:

FY 2013: \$1,335,882

FY 2014: \$1,345,917

Federal land acreage for the five core FLMAs: 3.13 percent

Federal public road miles: 1,063

Number of Federal public bridges: 44

Recreational visitation: 19,617,825 visitors per year

Highlighted Project: Belle Star Park Road

To Be Constructed: FY 15

Success Story:

The roadway carries a large number of recreational visitors to the Army Corp of Engineers Belle Starr Park site. Belle Starr Park Road is a straight 2 mile long and 24' wide chip sealed roadway east of Lake Eufaula State Park. The pavement is in poor condition with signs of distress and failure. Existing drainage structures along the roadway are failing.

Through working with the Oklahoma DOT the original scope of the project which originally included resurfacing at 2 inch in-place finishing course was increased.

The proposed improvements will include pulverizing the existing roadway down 6 inches and overlay with 3 inches of hot asphalt concrete pavement matching the 24 ft roadway width to provide a smooth drivable pavement surface improving safety. In addition, the clear-zone will be evaluated and safety measures implemented. Furthermore, this expanded scope provides a longer service life of the facility ensuring access to Belle Star Park site for years to come.
