Federal Lands Access Program (FLAP)

Improving access to and within Federal and tribal lands

Texas

MAP-21 Funding Authorized:

FY 2013: \$2,687,396

FY 2014: \$2,707,584

Federal land acreage for the five core FLMA's: 2.07 percent

Federal public road miles: 2,117

Number of Federal public bridges: 68

Recreational visitation: 40,602,177 visitors per year

Highlighted Project: *Farm Market (FM) 409 Rehab Widening*

To Be Constructed: FY 15

Success Story:

The FM 409 is a 7.9 mile highway that meanders through the Bois d'Arc Creek Unit of the Caddo National Grassland Wildlife Management Area in Fannin County, Texas. Currently, the pavement structure has widespread distresses and poor ride quality. Several areas along FM 409 received a "poor" distress score classification in the FY 12 Pavement Management information System survey.

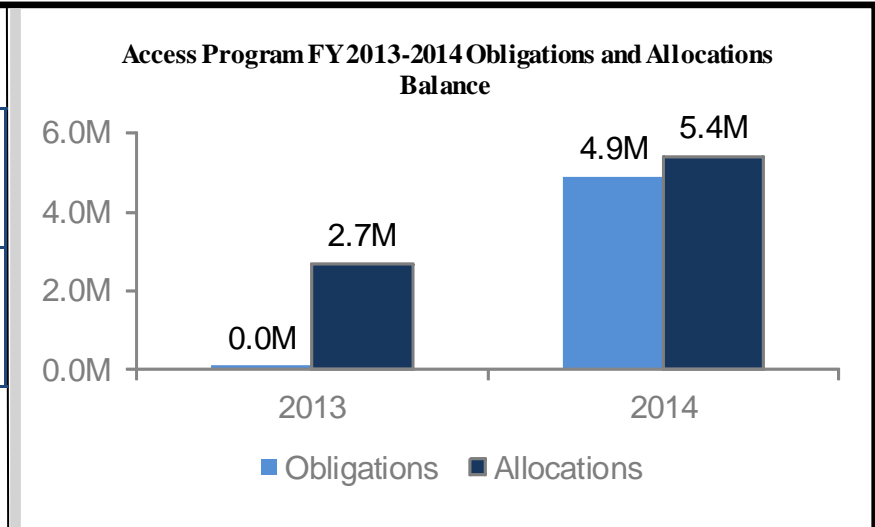

This project consists of reconstructing and widening the pavement structure of FM 409 from 20 feet to 32 feet-wide with two 11 feet travel lanes between FM 2029 and FM 100. Additionally, the project will widen the roadway for 5 feet shoulders to allow for bicycle lanes on each side of the road, which would be a beneficial addition as this roadway traverses Caddo National Grassland areas as well as the Coffee Mill Lake and Lake Davy Crockett areas.

Partnership between TXDOT and CFLHD allowed for this addition in scope and for the widening of the roadway for alternative transportation use.
