

U.S. Fish & Wildlife Service

Transportation Project Description Form

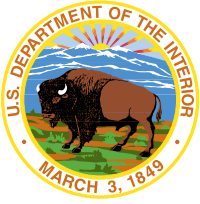

Station Name and Region _____

Project Title:

Project Description: Describe purpose and need for project, intended usage, connections to other facilities, type of project (planning, design, NEPA, construction) funding needed and any other relevant info:

Usage Estimation:

| | | | |
|--------------------|-------|---|--------|
| Non-consumptive | ____% | Net yearly visitation (RAPP) | _____ |
| Big game hunting | ____% | Resident (<50Mi.) | _____% |
| Small game hunting | ____% | Non-resident (>50Mi.) | _____% |
| Waterfowl hunting | ____% | Is project identified in a station CCP? | Y / N |
| Freshwater fishing | ____% | Could project be a MAT team? | Y / N |
| Saltwater fishing | ____% | Project improves ingress/egress | Y / N |
| TOTAL | 100% | Is station identified as 'Urban'? | Y / N |

Transportation Project Description Form

Coordinated Opportunities - Points Possible: 10

Describe both the internal and external support for this project. Scoring criteria may include assistance for planning, design, construction, operation and financial/material support. See project scorecard in national long range transportation plan for more scoring criteria.

Asset Management - Points Possible: 20

Describe how this project helps maintain state of good repair. Scoring criteria include bringing assets to “good” condition, taking into account vulnerability to extreme and changing weather patterns, and life-cycle costs.

U.S. Fish & Wildlife Service

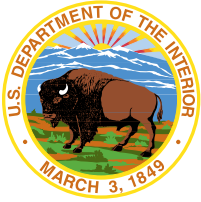

Transportation Project Description Form

Safety - Points Possible: 20

Describe how the project improves overall safety. Scoring criteria cover all modes of travel and include the 4E's of transportation safety, namely: engineering, education, enforcement and emergency medical services.

Environmental - Points Possible: 20

Describe how the project improves natural and cultural resources. Scoring criteria may include projects that adhere to the FWS Roadway Design Guidelines and/or projects that reduce carbon (GHG) emissions.

Transportation Project Description Form

Access, Mobility and Connectivity - Points Possible: 15

Describe how the project expands transportation mode options or improves circulation to or within the station. Criteria elements may include improved access for underrepresented populations or alleviation of a congestion 'hot spot'.

Visitor Experience - Points Possible: 15

Describe how this project improves the quality of the visitation experience at the station. Criteria elements may include improvement of an auto tour route or vehicular pullouts for interpretation/education/recreation.

Transportation Project Description Form

Points Summary

| PLAN 2035 Strategic Goal Area | Points |
|-------------------------------|--------|
| Coordinated Opportunities | |
| Asset Management | |
| Safety | |
| Environmental | |
| Access | |
| Visitor Experience | |
| TOTAL | |
