(FOURTH REVISION)

1. Mallinckrodt, Incorporated, Paris, Kentucky is hereby granted an exemption from certain provision of this Department's Hazardous Materials Regulations to offer packages of a corrosive liquid for transportation in commerce in the manner described below subject to the limitations and special requirements specified herein. This exemption authorizes the use of a DOT 33A polystyrene case to contain four 5-pint glass bottles of nitric acid, and provides no relief from any regulation other than as specifically stated. NOTE: Reference to 49 CFR Sections in this exemption are to regulations in effect on September 30, 1991.

2. BASIS. This exemption is based on Mallinckrodt Chemical, Incorporated's application dated July 14, 1994, submitted in accordance with 49 CFR 107.105 and supplemental letter dated February 9, 1995.

3. HAZARDOUS MATERIALS (Descriptor and class). Nitric acid other than red fuming with more than 70 percent nitric acid, Class 8, UN2031 or Nitric acid other than red fuming, with not more than 70 percent nitric acid, Class 8 UN2032.

4. PROPER SHIPPING NAME (49 CFR 172.101). Nitric acid.

5. REGULATION AFFECTED. 49 CFR 177.839(a) and (b).

8. SPECIAL PROVISION.

a. No new construction of the packaging identified in Paragraph 7 of this exemption is authorized after September 30, 1994. As the holder of this exemption, you may request a renewal to continue the use of the packaging, manufactured prior to September 30, 1994, however, the exemption will not carry an expiration date subsequent to September 30, 1996 since use of the packaging is prohibited after that date. This is consistent with the transitional provisions of 49 CFR Section 171.14 and the implementation of the new packaging requirements adopted under Docket HM-181.

- o All terms and conditions prescribed in this exemption and the Hazardous Materials Regulations, 49 CFR Parts 171-180.
