SUSPECTED SERIOUS INJURY CONVERSION

INJURY CODE	CONVERSION	DEFINITIONS / INSTRUCTIONS / NOTES	SOURCE	LOCATION
Suspected Serious Injury	2010 - Present		MI Traffic Crash Report Manual 2010, MI Traffic Crash Report Manual 2014	
A - Incapacitating Injury	A	<p>Any injury, other than fatal, that prevents the injured person from walking, driving, or normally continuing the activities which he or she was capable of performing prior to the motor vehicle traffic crash. Includes: Severe lacerations, broken or distorted limbs, skull fracture, crushed chest, internal injuries, unconscious when taken from the crash scene, unable to leave crash scene without assistance.</p> <p>Excludes: Momentary unconsciousness.</p> <p><i>General: Determinations are made at the time the injured person leaves the crash scene. It is not necessary to consult with doctors or hospitals unless information is not otherwise available. Apparent condition immediately after the crash does not govern classification because the person may recover from hysteria quickly or may begin to feel the effects of internal or other injuries between the time of the crash and the time of leaving the scene. (a.) Medical treatment at the crash scene or later makes no difference. What the person does at the scene is important. (b.) Hospitalization normally will be required for incapacitating injuries. (c.) Duration of the disability after injury makes no difference. Incapacitation is important. (d.) Developments after leaving the scene make no difference except in case of death.</i></p>	Injury/Injury Severity Classification	definitions found of pg3-8,3-9 (PDF pg50-51 [2010], pg49-50 [2014])

PEDESTRIAN AND PEDALCYCLIST (NON-MOTORIZED) CONVERSION

PERSON TYPE	CODE	STATE DEFINITIONS / INSTRUCTIONS / NOTES	SOURCE	LOCATION
