Objectives

- **DETERMINE** proper PLACARDING requirements for non bulk and bulk shipments.
- **IDENTIFY** special PLACARDING provisions.
- **IDENTIFY** some critical PLACARDING exceptions.

Why Placard?

- Hazard Communication
- Response Mitigation
- Regulatory Requirement

Placarding – Part 172, Subpart F

Each person who offers or transports hazardous materials must comply with the placarding requirements.

Placarding Requirements

Placarding requirements **do not** apply to:

- Small quantities of certain hazard classes
- Limited quantities
- Infectious substances
- Other regulated material (ORM-Ds)
- Combustible liquids in non-bulk packagings
- Materials prepared in accordance with §173.13

Prohibited Placarding

Placards **may not** be displayed on a transport vehicle, portable tank, or freight container **unless**:

- Transported material is a hazardous material
- Placarding represents a hazard of the material
- Placarding conforms to the regulations

General Placarding Requirements

Placard a container or vehicle:

- on each side and each end
- for any quantity of hazardous material

Some exceptions exist based on:

- the hazard and quantity present

ID Numbers

ID Numbers may be placed on placards, However this is a “MARKING” Requirement.

Conditions are found in Section 172.332 – 172.338

- Placed on Placard
- Orange Panel
- White Square on Point

When ID Numbers Must Be Used

- **Non-Bulk Packages if:**

- Except:

- Class 1, 7, or any other material not requiring ID #s.
- Small quantities, LTD QTY's, Combustibles, etc.

- **Bulk Packages: (all)**

- 4 Sides if > 1,000 Gallons
- 2 Sides if < 1,000 Gallons
