

23,000 Ton Container/Bulk Carrier

Project Title: 23,000 Ton Container / Bulk Carrier

Primary Consortium Member: Halter Marine Group, Inc.

Additional Contractor/Consortium Members: Ishikawajima-Harima Heavy Industries Marine Technology, Inc. (IHI)

Project Objectives/Overview: Combine an innovative design with a more efficient construction, outfitting, production management, material management, and productivity improvement which will result in a new generation of U.S.-made medium-sized multi-purpose dry cargo container vessels, which can successfully compete with foreign-made vessels.

Project Status: Completed the shipyard and market surveys, resulting in recommendations to modernize the facility, processes, and procedures. A shipyard modernization plan has been instituted in one of Halter's larger shipyards.
