Fuel Economy Guide

EPA Fuel Economy Estimates
These estimates reflect new EPA methods beginning with 2008 models.

CITY MPG
18
Expected range for most drivers
15 to 21 mpg

Estimated Annual Fuel Cost
\$2,039
Based on 15,000 miles at \$2.80 per gallon

HIGHWAY MPG
25
Expected range for most drivers
21 to 29 mpg

Combined Fuel Economy
This Vehicle
21
10 25
All SUVs

Your actual mileage will vary depending on how you drive and maintain your vehicle.

See the **FREE** Fuel Economy Guide at dealers or www.fueleconomy.gov

USING THE FUEL ECONOMY GUIDE

The U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy (DOE) produce the Fuel Economy Guide to help car buyers choose the most fuel-efficient vehicle that meets their needs. The guide is published in print and on the Web at www.fueleconomy.gov. For additional print copies, please send your request to EERE Information Center, 20440 Century Boulevard, Suite 150, Germantown, MD 20874.

Fuel Economy Estimates

Each vehicle in this guide has two fuel economy estimates:

- A city estimate that represents urban driving, in which a vehicle is started in the morning (after being parked all night) and driven in stop-and-go traffic
- A highway estimate that represents a mixture of rural and interstate highway driving in a warmed-up vehicle, typical of longer trips in free-flowing traffic

These fuel economy estimates are based on laboratory testing. All vehicles are tested in the same manner to allow fair comparisons.

New Estimates Effective This Year!

EPA has revised its methods for estimating MPG to better represent current real-world driving conditions. Beginning with 2008 model year vehicles, city and highway estimates will account for more aggressive driving (higher speeds and faster acceleration), air conditioner use, and cold temperature operation. Details about the new methodology are available at www.epa.gov/fueleconomy.

Comparing New and Old Estimates

The new testing methods cause MPG estimates for 2008 (and later) model year vehicles to be noticeably lower than those for previous years, even though the actual fuel economy you would achieve may be the same. This makes it difficult to directly compare 2008 (and later) model year vehicles with older models. A tool for comparing the new estimates with those of older vehicles is available at www.fueleconomy.gov.

Sample Fuel Economy Label

(Attached to New Vehicle Window)

Check the fuel economy label on the vehicle at the dealer showroom for its specific fuel economy (mpg) ratings. The ratings may vary slightly from the values in this guide because of engine and fuel system differences not listed here.

Annual Fuel Cost Estimates

This guide provides fuel cost estimates for each vehicle. The estimates are based on the assumptions that you travel 15,000 miles per year (55% under city driving conditions and 45% under highway conditions) and that fuel costs \$2.80/gallon for regular unleaded gasoline and \$3.00/gallon for premium. Cost-per-gallon assumptions for vehicles that use other fuel types are discussed at the beginning of those vehicle sections. The fuel costs are updated weekly in order to reflect current national average fuel prices. Visit www.fueleconomy.gov to personalize fuel costs based on current fuel prices and your driving habits.

Your Fuel Economy Will Vary

Fuel economy is not a fixed number it varies significantly based on where you drive, how you drive, and other factors. Thus, it is impossible for one set of estimates to predict fuel economy precisely for all drivers in all environments.

For example, the following factors can lower your vehicle's fuel

economy:

- Aggressive driving (hard acceleration and braking)
- Excessive idling, accelerating, and braking in stop-and-go traffic
- Cold weather (engines are more efficient when warmed up)
- Driving with a heavy load or the air conditioner running
- Improperly tuned engine, dirty air filter, under-inflated tires

In addition, small variations in vehicle manufacturing can cause MPG variations in the same make and model, and some vehicles don't attain maximum fuel economy until they are "broken in" (around 3,000–5,000 miles).

So, please remember that the EPA ratings are a useful tool for comparing vehicles when car buying, but they may not accurately predict the MPG you will get. This is also true for annual fuel cost estimates. For more information on fuel economy ratings and factors that affect fuel economy, visit www.fueleconomy.gov.

UNDERSTANDING THE GUIDE LISTINGS

We hope you'll find the Fuel Economy Guide easy to use! Fuel economy and annual fuel cost data are organized by vehicle class (see page 2 for a list of classes). Within each class, vehicles are listed alphabetically by manufacturer and model.

Vehicle models with different features, such as engine size or transmission type, are listed as different vehicles—engine and transmission attributes are shown in columns 2 and 3. Additional attributes needed to distinguish among vehicles are listed in the "Notes" column (e.g., fuel type, suggested fuel grade). A legend for all abbreviations is provided at the bottom of the first page of each section.

A "P" in the "Notes" column indicates that the manufacturer recommends or requires the vehicle be fueled with premium grade gasoline. The higher price of premium gasoline is reflected in the annual fuel cost.

The most fuel-efficient vehicles in each class and alternative fuel vehicles are indicated with special markings (see diagram below). Vehicles that can use more than one kind of fuel have an entry for each fuel type.

Interior passenger and cargo volumes are located in the index at the back of the guide.

Sample Vehicle Listing

(Not Actual Data)

	Trans Type / Speeds	Eng Size / Cylinders	MPG City / Hwy	Annual Fuel Cost	Notes
SUBARU					
Impreza AWD.....	M-5.....	2.5/4.....	19/24.....	\$2,142.....	P T

MERCURY					
Grand Marquis FFV.....	A-4.....	4.6/8.....	11/16.....	\$2,999.....	E85
.....	A-4.....	4.6/8.....	15/23.....	\$2,335.....	Gas

Manufacturer

Model

The most fuel-efficient automatic and manual vehicles per class are listed in black boldface type and marked with a black pointer ▶

Alternative fuel vehicles are highlighted by a blue bar, and those that can use two kinds of fuel, such as flexible fuel vehicles, have an entry for each fuel type

Transmission information: type (A=automatic, A-S=automatic transmission-select shift, AV=continuously variable transmission, M=manual, etc.) followed by number of gears or speeds

Engine size (in liters) followed by number of cylinders. EXAMPLE: 4.6 liter, 8-cylinder engine

Additional information to help further identify the vehicle (e.g., engine and fuel system info) along with other useful information about taxes, required fuel grade, etc.

EXAMPLE:
P=Premium Gasoline
T=Turbocharger

Vehicle Class

EPA city & highway MPG estimates
EXAMPLE: 24 mpg city, 34 mpg highway

Flexible-fuel vehicles (FFVs) can run on gasoline or E85 (a mixture of 85% ethanol & 15% gasoline)

Estimated annual fuel cost, assuming 15,000 miles of travel a year (55% city and 45% highway) and an average fuel price

VEHICLE CLASSES USED IN THIS GUIDE

CARS		TRUCKS	
CLASS	Passenger and Cargo Volume (cu. ft.)	CLASS	Gross Vehicle Weight Rating* (pounds)
TWO-SEATER CARS		PICKUP TRUCKS	
SEDANS		Small	Under 6,000
Minicompact	Under 85	Standard	6,000 to 8,500
Subcompact	85 to 99		Under 8,500
Compact	100 to 109	VANS	
Midsize	110 to 119	Passenger	
Large	120 or more	Cargo	
STATION WAGONS		MINIVANS	Under 8,500
Small	Under 130	SPORT UTILITY VEHICLES	Under 8,500
Midsize	130 to 159	SPECIAL PURPOSE VEHICLES	Under 8,500
Large	160 or more		

*Gross Vehicle Weight Rating = vehicle weight plus carrying capacity.

WHY SOME VEHICLE ARE NOT LISTED

- Fuel economy regulations currently do not apply to vehicles with a Gross Vehicle Weight Rating (vehicle weight plus carrying capacity) of more than 8,500 pounds. Therefore, some large pickup trucks, vans, and SUVs are not tested, and fuel economy labels are not posted on their windows.
- Some vehicles' fuel economy information is not available in time to be printed in the guide. However, you can find more up-to-date information at www.fueleconomy.gov.
- The availability of some vehicles is restricted.

TAX INCENTIVES AND DISINCENTIVES

Tax Credits and Deductions

If you purchase a qualifying hybrid or dedicated alternative fuel vehicle (AFV) in 2007–08, you may be eligible for a federal income tax credit of up to \$3,400 for hybrids or \$4,000 for AFVs—compressed natural gas (CNG) vehicles are the only AFVs commercially available as of publication of the Guide. The credit amount varies from vehicle to vehicle, and the hybrid credit will be gradually phased out based on manufacturer sales. Flexible fuel vehicles are not eligible for the alternative fuel credit.

Visit www.fueleconomy.gov for more information on qualifying models, credit amounts, and phase-out dates.

Gas Guzzler Tax

The Energy Tax Act of 1978 requires auto companies to pay a gas guzzler tax on the sale of cars with exceptionally low fuel economy. Such vehicles are identified in the guide by the word "Tax" in the "Notes" column. In the dealer showroom, the words "Gas Guzzler" and the tax amount are listed on the vehicle's fuel economy label. The tax does not apply to light trucks.

WHY CONSIDER FUEL ECONOMY

Save Money

You could save \$200–\$1,500 in fuel costs each year by choosing the most fuel-efficient vehicle in a particular class. This can add up to thousands over a vehicle's lifetime. Fuel-efficient models come in all shapes and sizes, so you need not sacrifice utility or size.

Each vehicle listing in the Fuel Economy Guide provides an estimated annual fuel cost (see page i). The online guide at www.fueleconomy.gov features an annual fuel cost calculator that allows you to insert your local gasoline prices and typical driving conditions (% city & highway) to achieve the most accurate fuel cost information for your vehicle.

Strengthen National Energy Security

Buying a more fuel-efficient vehicle can help strengthen our national energy security by reducing our dependence on foreign oil. More than half of the oil used to produce the gasoline you put in your tank is imported. The United States uses more than 20

million barrels of oil per day, two-thirds of which is used for transportation. Petroleum imports cost us about \$5.2 billion a week—that's money that could be used to fuel our own economy.

Protect the Environment

Burning fossil fuels such as gasoline and diesel adds greenhouse gases, mostly carbon dioxide (CO₂), to the Earth's atmosphere. Large-scale increases in greenhouse gases in the Earth's atmosphere can lead to global climate change.

Vehicles with lower fuel economy burn more fuel, creating more CO₂. Your vehicle creates about 20 pounds of CO₂ (170 cu. ft.) per gallon of gasoline it consumes. Therefore, you can reduce your contribution to global climate change by choosing a vehicle with higher fuel economy.

By choosing a vehicle that achieves 25 miles per gallon rather than 20, you can prevent the release of about 17 tons (260,000 cu. ft.) of greenhouse gases over the lifetime of your vehicle.

FUELING OPTIONS

Ethanol Blends – E85 & E10

Ethanol is an alcohol fuel made by fermenting and distilling starch crops, such as corn. It may also be made from "cellulosic biomass" such as trees and grasses in the near future. The use of ethanol can reduce U.S. dependence on foreign oil and reduce greenhouse gases.

E10 or "gasohol" is a blend of 10% ethanol and 90% gasoline sold in many parts of the country. All auto manufacturers approve the use of blends of 10% ethanol or less in their gasoline vehicles.

E85, a blend of 85% ethanol and 15% gasoline, can be used in flexible fuel vehicles (FFVs), which are specially designed to run on gasoline, E85, or any mixture of the two. FFVs are offered by several vehicle manufacturers. To determine if your vehicle is an FFV, check the inside of your car's fuel filler door for an identification sticker or consult your owner's manual. Several hundred filling stations in the United States currently sell E85. Visit <http://afdcmap2.nrel.gov/locator/> for locations near you.

There is no noticeable difference in vehicle performance when low-level ethanol blends are used. However, FFVs operating on E85 usually experience a 20–30% drop in miles per gallon due to ethanol's lower energy content.

Biodiesel

Biodiesel is a commercially available diesel-replacement fuel manufactured from vegetable oils or animal fats. It produces fewer

greenhouse gases than petroleum diesel and, since it is made domestically from renewable resources, increases national energy security.

Biodiesel can be blended at any ratio with petroleum diesel, but it is most commonly sold at ratios of 2%, 5%, or 20%, denoted as B2, B5, and B20. Most vehicle manufacturers do not yet recommend using biodiesel blends greater than B5, and some state that doing so may void the engine warranty. Check your owner's manual or with your vehicle manufacturer to determine the right blend for your vehicle.

Purchase commercial-grade biodiesel from a reputable dealer. Never refuel with clean or used grease or vegetable oil that has not been converted to biodiesel. It will damage your engine.

Use of biodiesel blends may reduce fuel economy slightly, less than 1% for B5.

Visit <http://afdcmap2.nrel.gov/locator/> for locations of service stations selling biodiesel.

Premium- vs. Regular-Grade Gasoline

The recommended gasoline for most cars is regular unleaded. Using a higher-octane gasoline than recommended by the owner's manual does not improve performance or fuel efficiency; it only costs more money. Check your owner's manual to determine the lowest grade of fuel you can use.

TIPS FOR IMPROVING FUEL ECONOMY

Keep Your Car in Shape

- Fixing a car that is noticeably out of tune can improve gas mileage by about 4%. Repairing a faulty oxygen sensor can improve fuel economy by much more!
- Replacing a clogged air filter can significantly improve gas mileage.
- Keeping tires inflated to the recommended pressure and using the recommended grade of motor oil can improve fuel economy by up to 5%. The manufacturer's recommended tire pressure can be found on the tire information placard and/or vehicle certification label located on the vehicle door edge, doorpost, glove-box door, or inside the trunk lid.

Plan and Combine Trips

- A warmed-up engine is more fuel efficient than a cold one. Many short trips taken from a cold start can use twice as much fuel as one multipurpose trip covering the same distance when the engine is warmed up and efficient.

Note: Letting your car idle to warm-up doesn't help your fuel economy, it actually uses more fuel and creates more pollution.

For more tips and more information about gasoline pricing, visit www.fueleconomy.gov.

Drive More Efficiently

- Aggressive driving (speeding and rapid acceleration and braking) can lower your gas mileage by as much as 33% at highway speeds and 5% around town.
- Observe the speed limit—each 5 miles per hour (mph) you drive over 60 mph can reduce your fuel economy by 10%.
- Avoid idling—idling gets 0 miles per gallon!

MODEL YEAR 2008 FUEL ECONOMY LEADERS

Listed below are vehicles with the highest fuel economy in the most popular classes, including vehicles with both automatic and manual transmissions. Please note that many vehicle models come in a range of engine sizes and trim lines, resulting in different fuel economy values. Vehicles powered by electricity are not included in this list.

	Transmission Type	MPG City/Hwy		Transmission Type	MPG City/Hwy
TWO-SEATER CARS			Volkswagen Passat Wagon		
smart fortwo convertible	automatic	33/41		manual	20/29
smart fortwo coupe	automatic	33/41	SMALL PICKUP TRUCKS		
Mazda MX-5	manual	22/27	Toyota Tacoma 2WD	automatic	19/25
MINICOMPACT CARS			Ford Ranger Pickup 2WD	manual	21/26
MINI Cooper	automatic	26/34	Mazda B2300 2WD	manual	21/26
MINI Cooper	manual	28/37	STANDARD PICKUP TRUCKS		
SUBCOMPACT CARS			Chevrolet Silverado C15 2WD*	automatic	15/20
Toyota Yaris	automatic	29/35	Dodge Dakota Pickup 2WD	automatic	15/20
Toyota Yaris	manual	29/36	GMC Sierra C15 2WD*	automatic	15/20
COMPACT CARS			Honda Ridgeline Truck 4WD	automatic	15/20
Honda Civic Hybrid	automatic	40/45	Mitsubishi Raider Pickup 2WD	automatic	15/20
Toyota Corolla	manual	28/37	Dodge Dakota Pickup 2WD	manual	16/20
MIDSIZE CARS			Mitsubishi Raider Pickup 2WD	manual	16/20
Toyota Prius	automatic	48/45	CARGO VANS		
Nissan Versa	manual	26/31	Chevrolet Van 1500/2500 2WD	automatic	15/20
LARGE CARS			GMC Savana 1500/2500 2WD (cargo)	automatic	15/20
Honda Accord	automatic	21/31	MINIVANS		
Honda Accord	manual	22/31	Mazda 5	automatic	21/27
SMALL STATION WAGONS			Mazda 5	manual	22/28
Honda Fit	automatic	27/34	SPORT UTILITY VEHICLES		
Honda Fit	manual	28/34	Ford Escape Hybrid FWD	automatic	34/30
MIDSIZE STATION WAGONS			Mazda Tribute Hybrid 2WD	automatic	34/30
Volkswagen Passat Wagon	automatic	20/28	Mercury Mariner Hybrid FWD	automatic	34/30
			Jeep Compass 2WD	manual	23/28
			Jeep Patriot 2WD	manual	23/28

* Applies to both gasoline-only and flexible fuel models.

FUEL ECONOMY AND ANNUAL FUEL COST RANGES FOR VEHICLE CLASSES

The graph below provides the fuel economy and annual fuel cost ranges for the vehicles in each class so you can see where a given vehicle's fuel economy and cost fall within its class. Combined city and highway MPG estimates are used; these assume you will drive 55% in the city and 45% on the highway. Annual fuel costs assume you travel 15,000 miles each year and fuel costs \$2.80/gallon for regular unleaded gasoline and \$3.00/gallon for premium. Visit www.fueleconomy.gov to calculate annual fuel cost for a specific vehicle based on your own driving conditions and per-gallon fuel costs. Vehicles powered by electricity are not included in this graph.

2008 MODEL YEAR VEHICLES

This section contains the fuel economy values for 2008 model year vehicles. Alternative fuel vehicles are highlighted with a blue bar, and those that can use two kinds of fuel, such as flexible fuel vehicles, have an entry for each fuel type. The most fuel-efficient automatic and manual vehicles per class are listed in black boldface type and marked with a black pointer (▶).

DIESEL VEHICLES

Diesel-powered vehicles typically get 30-35% more miles per gallon than comparable vehicles by gasoline. Diesel engines are inherently more energy efficient, and diesel fuel contains 10% more energy per gallon than gasoline. In addition, new advances in diesel engine technology have improved performance, reduced engine noise and fuel odor, and decreased emissions of harmful air pollutants. New ultra-low sulfur diesel fuels now available also reduce emissions from these vehicles.

Annual fuel costs below are estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and a diesel fuel cost of \$2.80 per gallon.

HYBRID-ELECTRIC VEHICLES

It's no accident that the most fuel-efficient vehicles in some classes for the 2008 model year are hybrid-electric vehicles (HEVs). Hybrids combine the best features of the internal combustion engine with an electric motor and can significantly improve fuel economy without sacrificing performance or driving range. HEVs may also be configured to provide increased performance or provide electrical power to auxillary loads such as power tools.

HEVs are primarily propelled by an internal combustion engine, just like conventional vehicles. However, they also convert energy normally wasted during coasting and braking into electricity which is stored in a battery until needed by the electric motor. The electric motor assists the engine when accelerating or hill climbing and at low speeds where internal combustion engines are least efficient. Unlike all-electric vehicles, HEVs now being offered do not need to be plugged into an external source of electricity to be recharged; conventional gasoline and regenerative braking provide all the energy the vehicle needs.

Potential buyers should also be aware that the federal government is currently offering tax incentives for HEVs. Some states also offer incentives. Additional information on HEVs, including tax incentives, can be found at www.fueleconomy.gov.

Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and a gasoline fuel cost of \$2.80 per gallon for regular unleaded gasoline, and \$3.00 per gallon for premium unleaded gasoline.

ETHANOL FLEXIBLE-FUEL VEHICLES

This section contains the fuel economy and driving range values for ethanol flexible-fuel vehicles (FFVs). These vehicles are designed to operate on gasoline, E85 (a mixture of 85% ethanol and 15% gasoline), or any mixture of the two fuels. Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and an average fuel cost of \$2.60 per gallon for E85, \$2.80 per gallon for regular unleaded gasoline, and \$3.00 per gallon for premium unleaded gasoline. The price of ethanol is highly variable from region to region; it is typically lower in the midwestern United States and higher in other areas. Therefore, actual consumer experience may differ significantly from the annual fuel cost estimate presented here.

Fuel economy and driving range values are shown for both gasoline and E85. When operating your FFV on mixtures of gasoline and E85, such as when alternating between using these fuels, your driving range and fuel economy values will be somewhere between those listed for the two fuels, depending on the actual percentage of gasoline and E85 in the tank.

COMPRESSED NATURAL GAS VEHICLES

This section supplies the driving range and fuel economy values for vehicles that operate on compressed natural gas (CNG). CNG fuel is normally dispensed in "equivalent gallons", where one equivalent gallon is equal to 121.5 cubic feet of CNG. Therefore, the fuel economy values are shown in miles per gallon-equivalent. Annual fuel cost estimates are based on an average fuel price of \$1.65 per gasoline equivalent gallon of CNG. The driving range is shown in miles and represents the distance the vehicle can travel on a full tank (or tanks) of fuel during combined city and highway driving (55% city and 45% highway).

The federal government is currently offering tax incentives for some CNG vehicles. Some states also offer incentives. For more information, visit www.fueleconomy.gov.
