On August 8, 2012, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA), pursuant to Chapter 601 of 49 United States Code, inspected your Public Awareness Program at your office in Great Falls, Montana. As a result of the inspection, it appears that you have committed a probable violation of the Pipeline Safety Regulations, Title 49, Code of Federal Regulations. The item inspected and the probable violation is:

Calumet Montana Refining, LLC did not have program documentation for 2008. Per 49 CFR §192.616(c), the operator must follow the general program recommendations, including baseline and supplemental requirements of API RP 1162, unless the operator provides justification in its program or procedural manual as to why compliance with all or certain provisions of the recommended practice is not practicable and not necessary for safety.

API RP 1162, Section 8.3 recommend guidance states, "*Has the operator performed an audit or review of its program implementation annually since it was developed? If not, did the operator provide justification in its program or procedural manual?*" Calumet Montana Refining, LLC had documentation for 2006, 2007, 2009, 2010, 2011, and for 2012, however, there was no documentation of an annual audit for 2008.

We have reviewed the circumstances and supporting documents involved in this case, and have decided not to conduct additional enforcement action or penalty assessment proceedings at this time. We advise you to correct the item(s) identified in this letter. Failure to do so will result in Calumet Montana Refining, LLC being subject to additional enforcement action.
