800 Spring Street, Suite 205
Shreveport, LA 71101

**Re: CPF 5-2010-5012H- Consent Agreement
Close Out with Notification Stipulation**

Dear Mr. Rios:

On July 1, 2013, I received your Quarterly Progress Report for the second quarter 2013 per the Consent Agreement referenced above. In that report you state that there has been no change in the status of the pipeline since the last quarterly report submitted on April 3, 2013, and that all repair activities were completed in November of 2012. The pipeline is now complete and ready for service.

You have complied with all of the requirements of the original CAO and the Consent Agreement. However, you have not been able to secure delivery of crude oil for your 6-inch pipeline and you have reported that it may be a long time before you are ready to receive crude oil and thus return your pipeline to service.

Since the imminent harm has been removed, I am terminating this Consent Agreement per Section IX, paragraph 28. Bridger Lake will no longer have to submit quarterly reports. You are reminded that Bridger Lake must notify the Western Region 30 days prior to resuming pipeline operations to provide my staff suitable time to schedule a pre-return-to-service inspection of your facilities.

Please feel free to contact me at 720-963-3160 or Mr. Peter Katchmar at 303-807-8458 to discuss this matter or if you have any questions.

Sincerely,

Chris Hoidal
Director, Western Region
Pipeline and Hazardous Materials Safety Administration
