Motor Fuel Trends

Gasoline Sales

Based on reports of 48 States, gasoline consumption for January-August 2001 increased by 1.6 percent compared to the same period in 2000.¹ During this period, vehicle-miles of travel increased by 0.8 percent.

The gasoline volume shown in this report is a cumulative tabulation of gross volume reported by wholesale distributors to State motor fuel tax agencies. It includes highway use, nonhighway use and losses. There is a lag of up to 6 weeks between the wholesale transactions reported and retail sales to consumers. Travel trends are reported monthly in *Traffic Volume Trends* based on actual traffic counts at permanent traffic recorders operated by the State highway agencies and, thus, reflect only highway use of fuel. The vehicle-miles reported include all vehicles, regardless of fuel type. While data in both reports reflect changes in trends, large monthly changes can be caused by exceptional weather conditions, variations in timing of holidays, or processing delays.

Motor Fuel Taxation

All States levy volume taxes on gasoline and diesel fuel. The rates in effect for 2001 are shown in Table MF-121T. The gasoline rates vary from a low of 7.5 cents per gallon to 29 cents with an average of 19.96 cents. Four States provide for full or partial exemptions for gasohol, a blend of 90 percent gasoline and 10 percent fuel alcohol. Diesel fuel rates vary from 7.5 cents to 30.9 cents per gallon.

Traditionally, State fuel tax rates could only be changed with legislation, but 11 States now have variable rate motor fuel taxes. These taxes are adjusted at specified intervals—annually, semiannually, or quarterly—usually on the basis of an index or formula specified in the enabling legislation. These States are identified in the notes on Table MF-121T. Adjustments to variable rate taxes are announced by State tax agencies shortly before the effective date of the change. In addition to rate changes under variable rate tax laws, the following rate changes are anticipated through the end of 2002:

Hawaii	Effective 1/1/02, alternative fuels pay an amount proportional to the diesel tax (round to the nearest .1 cent and also add 1 cent to these amounts)—ethanol .29 times the diesel tax rate, bio-diesel .50 times the diesel tax rate, and LPG .33 times the diesel tax rate.
Kansas	Effective 7/1/01, gasoline and gasohol will increase to 21 cents per gallons, diesel will increase to 23 cents per gallons, and LPG will increase to 20 cents per gallon. Effective 7/1/03, gasoline and gasohol will increase to 22 cents per gallon, diesel will increase to 24 cents per gallon, and LPG will increase to 21 cents per gallon.
Mississippi	Effective by administration certification of two State programs, special fuel rates will drop to 14.75 cents per gallon.
Wisconsin	Effective 4/1/02, gasoline and diesel increased to 28.1 cents per gallon. Effective 4/1/02, LPG increased to 20.6 cents per gallon. Effective 4/1/02, compressed natural gas increased to 22.5 cents per gallon.

¹ This percentage change is a comparison for those States for which data are available for the report month. However, the percentage increase on the national map is a comparison of cumulative data for all States for which both 2000 and 2001 data are available.

1/ This table shows gross volume of special fuels (primarily diesel fuel with small amounts of liquefied petroleum gas) reported by the State motor fuel tax agencies. To the extent possible, fuel consumed by Federal, State, and local government agencies and all nonhighway use has been excluded from this table. Further adjustments may be made during the year-end analysis. In many cases, the data reflect retail sales, but a number of States tax special fuels at the wholesale level. In some cases, corrections for interstate motor carrier use have not

been made. When interstate motor carrier fuel volume is reported quarterly to FHWA, the volume is shown in the third month of the quarter. Highway use of special fuels is reported in table MF-21 in the annual report, Highway Statistics.

2/ Total includes only those States for which data are shown.

1/ This table shows gross volume of special fuels (primarily diesel fuel with small amounts of liquefied petroleum gas) reported by the State motor fuel tax agencies. To the extent possible, fuel consumed by Federal, State, and local government agencies and all nonhighway use has been excluded from this table. Further adjustments may be made during the year-end analysis. In many cases, the data reflect retail sales, but a number of States tax special fuels at the wholesale level. In some cases, corrections for interstate motor carrier use have not

been made. When interstate motor carrier fuel volume is reported quarterly to FHWA, the volume is shown in the third month of the quarter. Highway use of special fuels is reported in table MF-21 in the annual report, Highway Statistics.

2/ Total includes only those States for which data are shown.

Only taxes that are levied as a dollar amount per volume of motor fuel are included on sheet 1. Taxes that apply to all petroleum products without distinguishing motor fuel are omitted. Local option taxes are included only when they have been adopted uniformly Statewide. For States marked with an asterisk, see the notes below:

Alabama - The gasoline, gasohol, and diesel rates include a 2¢ per gallon inspection fee. Alabama-registered LPG vehicles pay an annual fee based on vehicle type in lieu of the volume tax.

Arizona - The fuel tax on diesel remains at 18 cents per gallon for light and exempt vehicles, but is set at 27 cents per gallon if used to propel a truck with more than two axles or with a declared gross vehicle weight over 26,000 pounds.

Arkansas - The gasoline, gasohol, and diesel rates include 0.4 ¢ per gallon Environmental Assurance Fee. Applicants for LPG user permits must pay a fee in lieu of the volume tax.

California - LPG users may pay an annual fee in lieu of the volume tax.

Colorado - Owners of LPG vehicles registered in the State must pay an annual fee in lieu of the volume tax.

Connecticut - The tax is computed at 5% of the gross earnings from the first sale of a petroleum product in the State.

1/ Source for foreign rates is data collected by the U.S. Department of Energy from various sources. Rates were converted to U.S. currency using current exchange rates.

Note to Users of Monthly Motor-Fuel “Retail Price” Data:

Beginning with the January 1997 issue, the Federal Highway Administration (FHWA) reinstated motor fuel price data using data collected by the U. S. Department of Energy, Energy Information Administration (EIA) as the source for Table MF-5, “Retail Prices of Motor Fuel”. The EIA Table 31 - “Motor Gasoline Prices by Grade, Sales Type, PAD District (Cents per Gallon Excluding Taxes)” will be used as the base information for the FHWA Table MF-5. The EIA data, which is based on the EIA-782 survey, was implemented in 1983 to fulfill EIA legislative requirements and community data needs. The FHWA will follow EIA protocols and requirements in making the data available to “Monthly Motor Fuel” customers.

Because the “Sales to End Users - Through Retail Outlets” data does not include Federal, State, and local taxes, FHWA will add Federal motor fuel and State motor fuel taxes to the EIA data. Federal Highway User Taxes (Table FE-21B) and State Tax Rates on Motor Fuel (Table MF-121T) are the FHWA sources for this data. Excluded from the total are other taxes such as local taxes and sales taxes applied to motor fuel, etc.

Users of Table MF-5 should consult the “Explanatory Notes” of the EIA Publication “Petroleum Marketing Monthly” (DOE/EIA-0380) before making use of the retail price information. The “Explanatory Notes” contain important information on the design of the sample, the continuity of the data, collection methods processing, non-disclosure, and revisions.

Pre-January 1997 retail price data was furnished by a source other than EIA. Because the sample design, collection methods, processing, and other data considerations differ between the two sources, users are particularly cautioned not to make direct comparisons of the data using previous MF-5 retail price data for any trend line comparisons.
