

Fiscal Year 2018 Community-Specific Integrated Emergency Management Course (IEMC) Application Process

The deadline for applying to the Emergency Management Institute (EMI) for a community-specific IEMC in FY 2018 is February 1, 2017. Applications must be submitted to your respective FEMA Region by this date.

Each year state, local, tribal, territorial, and specialized jurisdictions throughout the United States can apply to EMI to conduct a community-specific IEMC.

IEMCs are exercise-based training workshops that place a jurisdiction's emergency operations center (EOC) personnel in realistic crisis situations within a structured learning environment. The jurisdiction selects the hazard(s) and the Core Capabilities it wishes to include in both the plenary and exercise components of the course to reflect the jurisdiction's hazards or events, EOC type, and organizations included in emergency plans. Data reported in the applicable State Preparedness Report and the Threat and Hazard Identification and Risk Assessment should be used as a basis for the request.

A community-specific IEMC builds awareness and skills needed to develop/refine and implement a jurisdiction's policies, plans, procedures, and mutual aid agreements in an EOC environment. Skilled EMI curriculum and exercise specialists conduct extensive virtual planning with jurisdictional staff to collect local information, identify critical infrastructure, study transportation systems, and analyze current response plans. From this information, exercises are built to access the jurisdiction's planned approach to specific hazards and to surface issues that IEMC participants may need to re-evaluate and develop corrective action plans.

Target Audience and Personnel

IEMCs are Homeland Security Exercise and Evaluation Program (HSEEP) consistent and designed for personnel who fill specific emergency support positions within their community. A sample of appropriate attendees include:
