15.533 CALIFORNIA WATER SECURITY AND ENVIRONMENTAL ENHANCEMENT

California Bay-Delta Authorization Act (CALFED)

FEDERAL AGENCY:

Bureau of Reclamation, Department of the Interior

AUTHORIZATION:

Water Supply, Reliability, and Environmental Improvement Act, Title I California Water Security and Environmental Enhancement, Public Law 108-361, Title I, Section 103 (f)(4), P.L. 85-624, Fish and Wildlife Coordination Act, and Section 9504(a), Omnibus Public Lands Management Act of 2009, (P. L.111-11).

OBJECTIVES:

The purpose of the CALFED Bay-Delta Authorization Act authorizes the Secretary of the Interior and the heads of the other Federal implementing agencies to carry out specific activities identified in the Act in furtherance of the CALFED Bay-Delta Program as set forth in the CALFED Bay-Delta Program Record of Decision dated August 28, 2000. The financial assistance objectives of the Program are to provide assistance for outreach efforts to improve the public awareness and understanding of the water supply and eco-system issues in California's Sacramento San Joaquin River Delta, and to expand water supplies to ensure efficient use through an array of projects and approaches, improve water quality from source to tap, improve the health of the Bay-Delta system through restoring and protecting habitats and native species, and improve the Bay-Delta levees to provide flood protection, ecosystem benefits, and protect water supplies.

The development of the BDCP is expected to result in a 50-year, ecosystem-based Habitat Conservation Plan designed to restore fish and wildlife species in the Delta in a way that also provides for the protection of reliable water supplies while minimizing impacts to Delta communities and farms. The San Joaquin River Salinity Management Project implements the stakeholder developed Westside Regional Drainage Plan (WRDP), which

includes activities to manage, reduce, and eliminate agricultural drainage to the lower San Joaquin River and adjacent wetlands water supply channels. The WRDP is a key element of Reclamations Action Plan to Address the Lower San Joaquin River Salinity total maximum daily load and contributes to resolution of San Luis Unit drainage provision responsibilities.

The Science program provides for the collection and assembly of environmental data and information needed to help inform the biological requirements for threatened and endangered species that are affected by the Central Valley Project. The Bay Area Regional Water Recycling Program (BARWRP) is a partnership of federal, state, and local agencies focused on the feasible use of recycled water in the five-county San Francisco Bay Area. BARWRP will assist CALFED in meeting its objectives related to water supply, water quality, and ecosystem enhancement. By maximizing utilization of recycled water for its permitted demands, water agencies can reduce the demands on their current high-quality water supplies and limit the need for new, possibly lower-quality supplies in the future. Water conservation is designed to encourage cost shared water conservation projects that meet the objectives contained in the CALFED Water Use Efficiency Program. Benefits include increased water supply reliability, water quality improvements, and contributions to ecosystem restoration.

CRITERIA FOR SELECTING PROPOSALS:

The Las Vegas Wash Coordination Committee has decided that the SNWA will be the lead agency for receiving funding for this program due to the high costs and types of environmental improvement and enhancement, and ability to maintain restoration projects. The Las Vegas Wash Program plays an important role in environmental and water resource issues in Southern Nevada. Historically, the Las Vegas was an ephemeral stream carrying storm flows from the Las Vegas Valley to Lake Mead and the Colorado River. Urban development over the past 60 years has resulted in the formation of the wetlands that helped remove nutrients from these wastewater flows. As the rate of discharges increased, erosion also increased, gradually destroying the existing natural treatment systems and wildlife habitat and creating a large delta in the Las Vegas Bay of Lake Mead. Accelerating erosion, declining water quality, and loss habitat are some of the more pressing issues. Proposals submitted will be reviewed and awarded based on priority fulfillment of the 44 action items identified in the Plan and the availability of funding appropriations.

Fiscal Year 2013: All of the project funded will work towards the implementation of the Stipulation of Settlement in NRDC, et al., v. Rodgers, et al., consistent with and as supplement by, the San Joaquin River Restoration Settlement Act. These projects will contribute towards meeting the Restoration and Water Management goals of the Settlement. The SJRRP focuses on restoring flows and fish, including Chinook salmon, to the San Joaquin River. These efforts will have wide reaching benefits, including: restoring riparian habitat to more than 30 miles of the San Joaquin River; restoring ecosystem function and aquatic, riparian, and upland species habitats along the river; improving river channel capacities and flood control operations; and reconnecting the upper San Joaquin River to the Sacramento-San Joaquin Delta. Beyond the scope of the Settlement, a restored river will enhance recreational access and opportunities for many communities along the river.

Specific Program accomplishments include, but are not limited to the following:

- Completed the Program Environmental Impact Statement and Record of Decision
- Modified Reclamations water rights at Friant Dam to implement the Settlement flows on a long-term basis
- Began spring-run Chinook salmon broodstock efforts
- Successfully moved fall-run adults into the upper reaches of the San Joaquin River and documented successful fall-run spawning in the river
- Completed the Restoration Flows Guidelines and began the Programs long-term flow releases, termed Restoration Flows
- Completed various planning and design efforts in working towards implementing the Programs highest priority infrastructure projects
- Continued flow releases since 2009 and worked to recapture and recirculate these release consistent with the Settlements Water Management Goal. Fiscal Year 2014: Information not available. Fiscal Year 2015: Information not available.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: The Utah Division of Wildlife Resources is conducting a wild fire research project, titled, Understanding the Effects of Wildfire on Fish Populations and Stream Geomorphology. An afternoon lightning strike set nearly 33,000 acres ablaze in Utah near the Fish Lake National Forest in 2010. The area burned included prime habitat for recently reintroduced Bonneville cutthroat (*Oncorhynchus clarki utah*), and established populations of rainbow trout (*O. mykiss*), brown trout (*Salmo trutta*), and brook trout (*Salvelinus fontinalis*). The Wildlife and Sport Fish Restoration Program (WSFR) in Region 6 is funding a 4-year research project that will assess how wildfire differentially impacts watershed habitat and fish populations. Specifically, the results of this research will model recovery rates of 4 streams from the impacted upland and watershed systems. Two PhD students from the College of Natural Resources at Utah State University will conduct the work with a combination of landscape level geomorphological, and aquatic biota surveys.

The Florida Fish and Wildlife Conservation Commission continued to collect important sport fish catch trend data used by fisheries managers. The data provides age, size, and sex composition information to be used for management of recreationally-caught species. This information is used to estimate the status of the fishable stocks.

The Vermont Fish and Wildlife Departments aquatic resource education program continued to aim to increase understanding and support of land conservation issues, facilitate a land stewardship ethic in Vermont citizens and support responsible fish and wildlife-based recreation, consistent with resource management goals. Fiscal Year 2014: In support of the Secretary's priority for engaging the next generation and enjoying America's great outdoors, the Alaska Department of Fish and Game (ADF&G) delivers Aquatic Education programs throughout Alaska. In Anchorage, the most populous city in Alaska, ADF&G staff will continue to provide content-rich, hands-on Aquatic Education (AE) programs throughout the Anchorage School District (ASD) and community events. The programs with ASD reach an incredibly culturally diverse youth audience, with minority students comprising over 50% of the 48,000-plus student population, who speak 93 different languages at home. AE staff work with about 60 schools and interact with about 5,500 students a year to deliver in-classroom and out-of-doors education experiences involving aquatic habitat, salmon lifecycle, salmon anatomy, and outdoor sport fishing. Though Anchorage is surrounded by natural areas and fish-filled waters, many students experience their first encounter with live fish in their natural habitats through this program, providing early and positive steps in engaging youth with nature.

The Alaska Department of Fish and Game continues to use innovative methods to communicate sport fishing opportunities to anglers. One ongoing and recently upgraded tool is the Alaska Lake Database, a web-based searchable mapping tool with lake location, description, access, stocking data, and bathymetric map. View it at <http://www.adfg.alaska.gov/index.cfm?adfg=fishingSportStockingHatcheries.lakesdatabase>

The Alaska Department of Fish and Game is improving sport fish opportunities to anglers as two (Anchorage and Fairbanks) new state-of-the-art indoor hatcheries come into full production. Both facilities use well water exclusively and recirculate up to 95% of the water for high efficiency. The William Jack Hernandez Sport Fish Hatchery in Anchorage is the largest indoor sport fish hatchery in North America, and contains many sustainable features. It has won engineering awards, and in 2013, it was the first ever recipient of the Envision Gold Award from The Institute for Sustainable Infrastructure.

The State of Kansas has a shortage of public fishing access. Therefore, the Fishing Impoundments and Stream Habitat (F.I.S.H.) program was implemented by the Kansas Department of Wildlife and Parks to offer interested landowners a per/acre, per/site, or per/stream mile fee for providing public access to impounded waters, or a sliding scale fee for access to stream fisheries. The fishing access is expected to provide approximately 600 hours of angling per site, with an average catch per angler hour of 2.25. The increased fishing opportunity on private waters will address the angling preference of more than 41% of the state's anglers. The project's objective is to increase fishing access to private waters by leasing 1,500 acres of impounded waters, 100 miles of stream, and 8 stream access (boat launch) sites

Colorado Parks and Wildlife's Fishing Is Fun (FIF) Program annually provides up to \$400,000 in grant funds for angling improvements across the State of Colorado using Sport Fish Restoration grant program funds, matched with local funding. Recipients of FIF funds range from local and county governments, park and recreation departments, water districts, angling organizations, land trusts and other organizations. One example of a FIF project for FY14 is the Paonia River Park project. The objectives of this grant are to make the following improvements to fishing access on the North Fork of the Gunnison River: Construct ADA access ramp and trail from parking lot to ramp; Improve aquatic habitat conditions through point bar stabilization, reconstruction of 2 cross-vanes and bank side improvements such as restoring vegetation; and install educational and directional signage along the trails near the river. Fiscal Year 2015: The Program has not yet selected projects for funding. The Program anticipates funding projects that increase sport fishing and boating opportunities through wise investment of excise tax dollars in sport fishery development, research and management projects.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their fish resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: : Dickinson Bayou Wetland Restoration Project The Texas Parks and Wildlife Department was awarded \$500,000 to restore and enhance approximately 27 acres of estuarine intertidal emergent wetlands and tidal channels along Dickinson Bayou within the Galveston Bay estuary, a nationally significant ecosystem benefiting invertebrates, fish and wildlife species. The project also will improve water quality and enhance recreational fishing and birding opportunities for the public.

Illinois Wolf-Lake Powderhorn Lake Connection The Illinois Department of Natural Resources, in partnership with the Forest Preserve District of Cook County and Openlands, was awarded \$1 million to acquire coastal wetlands within the Millennium Reserve in southeast Chicago. The acquisition will expand the amount of contiguous, protected coastal wetland and natural areas to about 1,200 acres on an important bird migration route. This acquisition will increase opportunities for outreach, education and outdoor recreation in economically disadvantaged and underserved communities in the Chicago area.

Penobscot River Restoration The project was awarded \$1 million to remove the Veazy Dam on the Penobscot River and restore about 225 acres of in-stream habitat and about 65 acres of streamside habitat. Removal of the dam will enhance connectivity and functional value of 188,000 acres of wetland habitats for native sea-run fish, including endangered Atlantic salmon, endangered shortnose and Atlantic sturgeon, and eight other fish species. The project is a joint effort between the Penobscot Indian Nation, the Penobscot River Restoration Trust, six other non-governmental organizations, the State of Maine, the Department of the Interior, the National Oceanic and Atmospheric Administration, and hydropower companies. Fiscal Year 2014: Lillian Swamp Wetlands

The Alabama Department of Conservation and Natural Resources (ADCNR) was awarded \$464,750 to acquire the 675-acre Lillian Swamp Wetlands tract as an addition to the Lillian Swamp Wetlands Complex. The wetlands complex lies within the Perdido River Coastal Area at the mouth of the Perdido River and borders Perdido Bay. Acquisition of this tract will support the goals of multiple federal, state, and other agencies to protect sensitive species and their habitats. The ADCNR has recommended this area as a Geographical Area of Particular Concern (GAPC), which are managed according to conservation plans. The wetlands have also been designated as a Gulf Ecological Management Site (GEMS), which means that it is considered to be important to the environmental quality of the Gulf of Mexico. Perdido Bay has also been identified as a conservation priority in Alabamas Wildlife Action Plan and by the Northern Gulf Coast Wetlands Planning Program.

Popes Creek Coastal Wetland Conservation

The Maryland Department of Natural Resources (MD DNR) was awarded a \$1 million grant to permanently protect 220 acres of marsh, palustrine wetlands, and forested land in Newburg, Charles County, Maryland. The property will be acquired through fee simple purchase, with the property to be held and managed by Charles County Department of Parks and Recreation. The property contains 92 acres of upland forest and 128 acres of wetlands, as well as some open water and beach front. Popes Creek is a conservation focus area, having been identified by MD DNR as both a Targeted Ecological Area and a Natural Heritage Area. It lies within the Zekiah Swamp area, which is a priority for protection through the USFWS Chesapeake Bay Program, MD DNR, and Charles County. Plans for the site also include the creation of a biking/walking trail along an abandoned railway bed.

South Slough Shorelands Project

The Oregon Department of State Lands, partnering with Coos Watershed

Association and the South Coast Land Conservancy, was awarded \$1 million to acquire and permanently protect 596 acres of estuarine wetland habitats in South Slough in Oregon's Coos Estuary. South Slough is the site of a longstanding effort to conserve estuarine wetland habitat. The project site is adjacent to South Slough National Estuary Research Reserve and state protected lands. The project site contains tidally influenced coastal wetlands, adjoining coastal fresh water wetlands, and forested uplands. This project supports goals of multiple management plans and will benefit numerous wildlife and plant species, including shorebirds, harbor seals, shellfish, federally listed coho salmon and western bog lilies. It also is identified as a priority in the Oregon Strategic Plan for the Coastal Program, the Partners for Fish and Wildlife Program and the 1994 Pacific Coast Joint Venture 1994 Implementation Plan for the Southern Oregon Focus Area. Fiscal Year 2015: Program has not yet selected projects for funding. Program anticipates funding projects that acquire, restore, and enhance wetlands in coastal States.

This acquisition project will protect the bog turtle through a purchase of four tracts totaling over 143 acres. This property connects two known bog turtle habitat areas within a large wetland complex and stream corridor. The property also provides landscape-level protection with upland forest and grassland habitats, thus conserving the hydrology and water quality of the wetlands.

An HCP Land Acquisition grant was awarded to the Washington County HCP Desert Tortoise Acquisition in Utah. This \$1,419,266- grant will support the acquisition of up to 1,245 acres of habitat for the desert tortoise in the Red Cliffs Desert Reserve in southwestern Utah. Acquisition of these lands is essential in preserving the integrity of the reserve as these unburned parcels provide critical refugia for desert tortoises and seed sources for restoration of other areas of the reserve impacted by wildfires due to cheat grass invasions. Fiscal Year 2014: The program has not yet selected projects for funding. However, we expect to award over 200 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands. Fiscal Year 2015: The program has not yet solicited States and Territories for proposals. However, we expect to award over 200 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands.

CRITERIA FOR SELECTING PROPOSALS:

Proposals for grant funding must be submitted by the State fish and wildlife agency. The State must have an approved cooperative agreement with the Secretary of the Interior which provides for sharing responsibilities for endangered species, prior to receiving Cooperative Endangered Species Conservation Fund (section 6 of the Endangered Species Act) funds. Individual project proposals must compete with other State submissions for funding. For additional information please visit <http://www.fws.gov/endangered/grants/index.html>.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Arkansas Inland \$1,500,000 The Arkansas Department of Health plans to construct fixed and mobile pumpout facilities, including purchasing 10 fixed pumpout stations, 12 new pumpout boats, 12 floating restrooms, 10 plumbing docks; renovating 4 pumpout boats; operating and maintaining 20 pumpout boats; and assisting in marine sewage hauling. They will also continue their campaign to increase awareness, understanding, and compliance with the goals of the CVA program in their State. The Arkansas Marina Sanitation Act requires all vessels with marine sanitation devices to lock them to prevent direct sewage discharge, increasing the need for operational pumpout facilities.

California Coastal \$945,000, Inland \$1,134,000 - The California Department of Boating and Waterways will reduce vessel sewage pollution from overboard discharges into the waters of the State of California through the installation of 6 new or replacement pump-out stations, one dump station, and operation and maintenance funding for all CVA equipment along the coast. They will also install ten new floating restrooms, rehabilitate 13 existing floating restrooms, one pump out / dump station, and one pump out boat at ten lakes throughout California. The new facilities will help meet the demand for adequate boater generated sewage collection facilities and help prevent the discharge of sewage into California waterways. In addition, the proposed education program will reach out to the millions of recreational boaters in California and educate them why it is so important to do the right thing and not discharge sewage into the water.

Maryland Coastal \$757,615 The Maryland Department of Natural Resources plans to install ten new pumpouts and replace or upgrade 30 pumpouts along tributaries of the Chesapeake Bay as well as the Coastal Bays of Maryland. They also plan to provide operations and maintenance support to pumpouts at 100 marinas along the coast and two pumpout boats that operate in four creeks within the City of Annapolis, College Creek, Weems Creek, Spa Creek, and Back Creek, and within the West and Rhode Rivers, south of Annapolis, to increase the number of available and operational pumpout facilities for recreational boaters. They also plan to publish and distribute an updated version of a booklet entitled, A Maryland Boaters Guide to Sewage Pumpout Stations and Clean Boating Tips, update their pumpout website, continue to conduct courtesy head examinations at special events throughout

the State, and provide pumpout location signs and packages.

Massachusetts Coastal \$1,094,874 The Commonwealth of Massachusetts Division of Marine Fisheries plans to construct six new and replace two existing shore-side pumpout stations and purchase one new and one replacement pumpout boat in the towns and cities of Swansea, Salem, Plymouth, Hyannis, Quincy, Newburyport, and Tisbury on Marthas Vineyard. The State will provide operation and maintenance assistance to 82 operators for the support of 64 pumpout vessels, 67 shoreside stations, and 10 dump stations and conduct annual compliance checks of all pumpout facilities. They will continue their outreach to the public through their CVA pocket Boater Guide, Web site, maps, and other education. Fiscal Year 2014: Program has not yet selected projects for funding. Program anticipates funding projects that construct, renovate, operate, and maintain sewage pumpout stations, waste reception facilities, and pumpout boats for recreational boaters and for educational programs that inform boaters of the importance of proper disposal of their sewage. Fiscal Year 2015: Program has not yet selected projects for funding. Program anticipates funding projects that construct, renovate, operate, and maintain sewage pumpout stations, waste reception facilities, and pumpout boats for recreational boaters and for educational programs that inform boaters of the importance of proper disposal of their sewage.

CRITERIA FOR SELECTING PROPOSALS:

Projects must be submitted by the State, the District of Columbia, Commonwealth, or territorial agency given responsibility for the program by the Governor of that State, the District of Columbia, Commonwealth, or territory. Purpose of the project must be consistent with the purpose and conditions of the Act. The criteria for selecting proposals for coastal States are based upon the extent the project will contribute to conducting a survey; develop a plan for installing pumpouts/dump stations; and construct pumpouts/dump stations according to the approved plan. Criteria for selecting proposals for all States, the District of Columbia, Commonwealths, or territories are based upon the extent the project will contribute to public/private partnerships; innovative approaches to increasing availability and use of pumpouts/dump stations; implementation of an education program; contribution toward protecting sensitive areas; and lowering the ration of vessels with holding tanks and portable toilets to pumpouts and dump stations.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: The program supported: 1) The development and expansion of the use of acoustic recording devices in providing information about imperiled forest elephants that are very difficult or costly to monitor by direct observation or traditional transects. This project trained Gabonese and Congolese students in monitoring and analyzing elephant activity at five sites (Jobo/Djoumou River, Precious Woods, Langoue Bai, Kessala, and northern Congo bas), and further developed a tool to analyze elephant calls on recordings to interpret data more easily and rapidly for long-term elephant population monitoring. 2) Anti-poaching activities, foot surveys to identify elephant population trends and areas of poaching, and infrastructure to promote tourism to the area in southwestern Republic of Congo. 3) Anti-poaching activities in and around Lac Tele Community Reserve in order to improve security for elephants and other endangered species (including chimpanzee and gorillas). Activities included anti-poaching patrols throughout the landscape, training in and implementation of spatially explicit law enforcement monitoring systems, establishing three basic camps in Epena, Bouanela and Mboua, and conducting education /awareness raising campaign towards local population, schools and local authorities. Fiscal Year 2014: Program has not yet selected

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Examples of FY13 funded projects include: construction of tie-up facilities for non-trailerable, recreational vessels of 26 feet or greater in length; development of amenities for eligible boaters, such as restrooms and other facilities; development of utilities such as shore power and fueling stations for eligible boaters. For example, the Commonwealth of Massachusetts is supporting the City of Lynns Seaport Landing Marina in a project to develop new dockage for eligible vessels. Currently, there are no adequate public facilities within Lynn Harbor for transient boaters to safely dock their boats. The project will install 12 ADA compliant slips and provide a deep-water safe harbor. In Michigan, the Department of Natural Resources, Division of Parks and Recreation is providing a safe and convenient stop for eligible vessels traveling between Detroit/Port Huron and Mackinaw City. The project will add up to 42 slips, utility pedestals, water and related amenities, increasing use of the State Harbor by eligible boaters by an estimated 75%. The Florida Fish and Wildlife Conservation Commission will partner with the City of Riviera Beach, the local redevelopment agency and others to complete Phase II of the City Marina expansion. The project includes dockage for up to 26 eligible vessels, which will be installed to withstand a Category 3 hurricane. Additional features for the benefit of eligible boaters include utilities, a gangway, a fueling platform, fire suppression equipment, and communications infrastructure. Fiscal Year 2014: Program has not yet selected projects for funding. Program anticipates funding projects that include: construction of tie-up facilities for non-trailerable, recreational vessels of 26 feet or greater in length; development of amenities for eligible boaters, such as restrooms or other facilities; development of utilities or other services for eligible vessels. Program anticipates funding projects that include: construction of tie-up facilities for non-trailerable, recreational vessels of 26 feet or greater in length; development of amenities for eligible boaters, such as restrooms or other facilities; development of utilities or other services for eligible vessels.

CRITERIA FOR SELECTING PROPOSALS:

The designated State, the District of Columbia, Commonwealth, or territorial agency must submit proposals to participate in this program. The purpose of these projects must be consistent with the purpose and conditions of the Act. The criteria for selecting proposals are based upon the extent the proposed project: contributes to construction of tie-up facilities according to the State's, the District of Columbia's, Commonwealth's, or territory's approved plan; contributes to public/private partnerships; implements innovative approaches to increasing availability and use of tie-up facilities; includes private, local, or other State, District of Columbia, Commonwealth, or territorial funds in addition to the 25 percent match; is cost efficient; provides a significant link to prominent destination way points such as those near cultural or natural sites; provides access to recreational, historic, cultural, natural, or scenic opportunities of local, regional, or national significance; provides significant economic impacts to a community; and includes multistate efforts that result in coordinating location of tie-up facilities.

RELATED PROGRAMS:

15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: The North Carolina Wildlife Resources Commission continued to fund their Hunter Education Enhancement Program. The project provided an enhanced level of support and service to volunteer instructors, which would in turn improve instructor retention rates and increase the quality of instruction for students. The project also refined an Internet Hunter Education course. The state developed an archery education program, including a pilot program for youth archery in schools.

The Oregon Department of Fish and Wildlife used \$20,935 of enhanced funds to purchase a shotgun shooting curtain for the Douglas Ridge Rifle Club in order to protect a small wetland area from lead shot.

The West Virginia Division of Natural Resources utilizes Enhanced hunter educational funds for projects such as their Archery in Schools Program; a Special Needs Hunt Program; to provide training and recognition for volunteer instructors; and to purchase classroom aids to improve instruction.

The Nevada Department of Wildlife subcontracted for the enhancement of two public shooting ranges; the Elko County Shooting Range, which used \$35,000 federal funds to construct a new 300-foot shooting range training area and restroom; and the Humboldt County Shooting Range which used \$30,000 of federal funds for a ADA accessible restroom.

The Tennessee Wildlife Resources Agency continued to work on educating the public regarding deer herd health, population dynamics, and safety. The agency will be increasing the number of public hunter education programs and further developing their Scholastic Clay Target Program to provide for a safe and convenient location for participants. Fiscal Year 2014: FY14: The Texas Parks and Wildlife Department will utilize these funds to provide general administrative support and coordination to efficiently meet the needs of the program, including actions such as planning, record keeping, reporting, supervision of volunteers and coordination with state, federal, and private organizations having mutual interest in the program.

The Colorado Outreach Program is funded with Enhanced Funds annually. The purpose of the program is to recruit and retain current and future generation of hunters in Colorado by developing a system of programs that implement the Strategic Plan, enhance hunter skills and opportunities and cultivate an informed consent of hunting by the general public. A major component of the Outreach Program is offering youth hunts which include big game (moose, elk, deer and Pronghorn), upland birds, waterfowl, and turkey. In addition to conducting youth hunts, the Outreach program offers skills seminars and clinics for general public. The seminars and clinics are normally

one day or less but still provide participant hands-on opportunity to learn hunting skills, practices, and techniques. Clinics have covered species specific information such as elk, waterfowl, grouse, big horn sheep and mountain goats. Due to the popularity of elk hunting in Colorado, the Outreach Program developed a comprehensive on-line elk hunt education course named Elk Hunting University. The online course provides a thorough curriculum on everything and anything related to elk hunting. The curriculum is delivered through a series of articles, videos, and other educational tools. It truly helps new and experienced hunter on the how to for a successful elk hunt in Colorado.

In 2013 and 2014, the states of New York and Maine are making a concerted effort to increase public access for recreational shooting by working with non-profit sportsmen clubs. Clubs are provided small grants to improve safety features, disabled access, or improve lead management at their facilities in return for regular, publicized hours that the public can use the shooting range. These range grants are funded with both Section 4 Basic and Section 10 Enhanced Hunter Education funds. Fiscal Year 2015: The Program has not yet selected projects for funding. The Program anticipates funding Section 10 Enhanced Hunter Educational projects and activities that are eligible each year.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territory agency having responsibility for the management of their resources must submit the projects. The State, Commonwealth's, or territory's wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: The Association of Fish and Wildlife Agencies (AFWA) continues its efforts in promoting strategic fish habitat conservation through regional collaboration to allow fish habitat partnerships to address habitat data needs and analysis at both local and larger landscape levels.

The States Organization for Boating Access will continue to compile information to determine whether a lack of boating access has contributed to the decline of boating/fishing participation and complete a baseline assessment of the adequacy of availability of obstacles and challenges to and priorities for boating access and develop recommendations and strategies for improving access.

The Archery Trade Associations project. Explore Bowhunting: National Implementation will work to expand their program nationwide; build partnerships; build on the programs capabilities as a recruitment tool and work on the next step from various introductory programs. The grant will also gather information through instructor and student surveys on the impact of Explore Bowhunting. Fiscal Year 2014: The Georgia Department of Natural Resources will start a project titled, Recruiting and Retaining Nontraditional, Young Adult Participants into Hunting and Fishing through Targeted Marketing, Instruction, Mentoring and Social Reinforcement. The project will develop key tools to teach hunting and fishing techniques to young adults in urban/suburban settings. This community already has the desire to learn but lacks the necessary tools and experience. This project will facilitate the development of a toolbox and audio/visual resources for instruction and mentoring.

The Texas Parks and Wildlife Department will start work on the development and registration of toxicants and delivery strategies for controlling wild hogs. Invasive wild hogs damage North American flora and fauna and pose severe threats to human health and livestock markets. In the U.S. annual damage and control costs are estimated at \$1.5 billion.

The American Sportfishing Association will begin a project titled, Increase Participation and State Revenues through State-Industry Cooperative Research into Churn Rates (anglers who do not renew their licenses each year) and First Time License Buyers. The goal is to increase angling participation and conservation revenues through a two phase project. One, improve our current science-based knowledge of angler dropout and license churn rates, and two; identify the primary factors that encouraged first-time anglers to try the sport. Fiscal Year 2015: The Program has not yet selected projects for funding. The Program anticipates funding projects that address species or habitat research activities, hunting and fishing recruitment and retention information collection, aquatic or hunter education activities, conservation planning, outreach and coordination.

CRITERIA FOR SELECTING PROPOSALS:

Projects will be reviewed and evaluated for scope, significance, feasibility, and cost effectiveness. In addition, projects must address one or more focus areas as described in the National Conservation Needs established annually by the Association of Fish and Wildlife Agencies (AFWA).

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Johnston Atoll Ant Eradication, Johnston Atoll National Wildlife Refuge, Pacific Islands. -Johnston Atoll National Wildlife Refuge (NWR), located in the Central Pacific Ocean, is the only available seabird nesting habitat in over 750,000 square miles of ocean. The atoll also supports one of the world's largest populations of Red-tailed tropicbirds. A super-colony of invasive, Yellow crazy ants, was discovered covering approximately 70 acres of migratory shorebird and seabird habitat. The ants also spray formic acid as a defensive measure and in large concentrations the acid can burn skin and eyes. On the atoll, swarming ants and high concentrations of acid have caused once commonly seen ground-nesting birds to abandon their nests. The Service assembled a team of experts, including Coastal Program and NWR biologists, to craft and implement an ant eradication strategy. After 14 months of active management, the team reduced the ant population by 99 percent, and the Red-tailed tropicbird returned to their nesting areas. Service biologists will continue to monitor and implement the ant eradication plan.

Indian Point Saltmarsh Restoration, San Patricio County, Texas - The South Texas Estuarine and Salt Lakes is a priority ecosystem that contains coastal marshes, marine habitats, and near-coastal saline lakes. Working with the Coastal Bend Bays and Estuaries Program, Coastal Program biologists assisted with the restoration of a 72-acre coastal marsh in Nueces Bay near Indian Point, in Nueces County, Texas. This restoration project involved stabilizing a tidal berm, constructing marsh mounds, and planting marsh vegetation. This project complements another 76-acre marsh restoration completed in 2011. In addition to benefiting fish and shellfish, this project provides important nesting habitat for migratory birds. Black skimmers, Least terns, and, Gull-billed terns began nesting within the first year the 2011 marsh restoration was completed.

South San Diego Bay Restoration and Enhancement Project San Diego County, California- The Coastal Program worked with the California Coastal Conservancy, Port of San Diego, San Diego Bay National Wildlife Refuge, and Southwest Wetlands Interpretive Association to cooperatively plan and implement the South San Diego Bay Restoration and Enhancement Project. Since 2008, Coastal Program biologists have been working with partners to acquire grants, design the restoration project, and guide project implementation. The Coastal Program also contributed funds to implement and enhance on-the-ground restoration activities. This project restored 300 acres of shallow subtidal and intertidal habitats, providing benefits for more than 90 species of migratory and coastal dependent birds. It also improved water quality, and nesting and foraging habitat for birds and fish. The project empowered communities through stewardship events and stimulated the local economy by supporting 72 jobs. It was the recipient of a 2012 Coastal America Partnership Award. Fiscal Year 2014: The Coastal Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitat such as coastal wetlands and watersheds that benefit Federal trust species. Fiscal Year 2015: The Coastal Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitat such as coastal wetlands and

watersheds that benefit Federal trust species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species and be cost effective. Project selection occurs at the field level. See the annual "Notice of Availability of Federal Assistance" in <http://grants.gov> for more details.

15.630 Coastal Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Balmoral Dam Restoration Project- Balmoral Dam is the first barrier to passage on the Shawsheen River, and both impounds riverine habitat and restricts fish movement. A Feasibility Study has preliminarily identified the preferred alternative of removing this structure to improve habitat connectivity and allow free access to migratory fish such as American shad, river herring and American eel. Removing the Balmoral Dam will restore 165 feet of fluvial habitat, reconnect over five miles of river, and provide diadromous fish passage up to the base of the Marland Place Dam. Once fish passage has been secured at all three dams, diadromous fish will have access to over 20 miles of mainstem and tributary habitat. Coolidge

Fish Ladder Fremont County, Wyoming - In partnership with The Tribes, BIA and the State of Wyoming, the Partners for Fish and Wildlife Program addressed one of four fish passage obstructions. Coolidge Irrigation on the Little Wind River was modified to open an additional 20 miles in the South and North Forks of the Wind River while removal of the Ray canal dam opened an additional 10 miles of the South Fork. A fish ladder constructed adjacent to the concrete weir spanning the river provides passage for the Little Wind River. This project benefits Tribal designated priority species of Yellowstone cutthroat trout, ling and mountain whitefish. For this project, the Service provided funding, design input, obtained permits and was involved in construction management. Through this collaborative partnership, fish passage on 30 miles of the Little Wind River was restored, saving 500,000 fish annually.

Cape Cod New England Cottontail Habitat Restoration Barnstable County, Massachusetts - On Cape Cod, the Partners for Fish and Wildlife has joined forces with various partners to return fire to the land and restore resilient habitats for both New England cottontails and the residents. The team targeted areas with the most burnable vegetation and strategically cut undergrowth, thinned the forest, and conducted controlled, planned burns that will continue the natural renewal process and reduce fire danger to nearby homes and businesses. With over 8,000 homes valued at \$2.5 billion, the town of Mashpee was designated a community at risk to wildfire in 2001 due to volatile pitch pines and scrub oaks in the neighboring Mashpee National Wildlife Refuge. The Service provided technical and financial assistance and partners cleared over vegetation from 64,000 feet of roads. The team successfully burned 13.5 acres in an effort to restore fire-dependent systems on Cape Cod, improve habitat for the New England cottontail and protect an estimated 250 homes worth \$87 million. Fiscal Year 2014: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species. Fiscal Year 2015: The Program anticipates supporting projects similar to those of 2013.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species, involve on-the-ground habitat

restoration, and be cost-effective. Specific criteria for reviewing and ranking projects were established in the national Partners policy, at <http://www.fws.gov/policy/640fw1.html>. The program gives high priority to proposed projects that benefit the National Wildlife Refuge System, species at risk, conserve globally or nationally imperiled habitats; and reduce habitat fragmentation. Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered
Species Conservation Fund; 15.634 State Wildlife Grants

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: In New Hampshire, funds will help develop a program to
assist private landowners in protecting and managing at-risk species and their
habitats. The program will also identify quantifiable outcomes that can evaluate
progress in restoring and conserving habitats and viable populations of species
at risk on private lands. The expected benefits of this grant are improved
conditions for at-risk species on private lands throughout state and expanded
partnerships with private landowners in conserving these species.

In Virginia, program funds provide, via technical assistance, private landowners
and partners with information and techniques necessary to restore, protect,
enhance, and manage important habitats on their properties resulting in
significant gains for species recovery and conservation. Virginia expects that
implementing this grant will result in improved and protected habitat for at least
100 at-risk species and improved water quality in at least five of the major river
systems (Upper Tennessee, New, Roanoke, James and Shenandoah) of
Virginia.

In Utah, funds protect species of greatest conservation need in Cache, Juab, and
Sanpete counties through acquisition of conservation easements including:
Green Canyon (Cache County) - 434 acres for Bonneville cutthroat trout and
sharp-tailed grouse; Crawford, Sanpete County - 75 acres for Columbia spotted
frog and southern leatherside chub; Graham, Sanpete County - 20 acres for
Columbia spotted frog and southern leatherside chub; Turpin, Sanpete County -
100 acres for Columbia spotted frog and southern leatherside chub; and Mills
Valley, Juab County - 110 acres for least chub. Fiscal Year 2014: Texas Parks
and Wildlife will directly restore 955 acres of Trans-Pecos grasslands, which
have been encroached upon by shrubs. These acres are adjacent to existing
restoration areas and also adjacent to an existing black-tailed prairie dog town.
The restoration of this grassland area will provide habitat and corridors for
expansion of the town. Upon the completion of this project this ranch will have
restored 5,209 acres of grassland habitat. Black tailed prairie dogs, pronghorn
antelopes, burrowing owls, and Texas horned lizards are expected to receive the
greatest benefit from the proposed habitat restoration. This landowner
cooperator is a 2011 Texas Parks and Wildlife Department Lone Star Land
Steward Award winner. Fiscal Year 2015: The program does not anticipate
funding any projects in FY 15.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency
having lead responsibility for the management of their fish and wildlife
resources must submit the projects. The State, the District of Columbia,
Commonwealth, or territorial agency selects those projects submitted for
funding under the program. If approved, projects must meet the basic criteria
outlined in the regulations and the Fish and Wildlife Service Manual.

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Creating Golden-winged Warbler Habitat in Minnesota
This project is part of a long-term, multi-partner initiative to reduce threats to the Golden-winged Warbler through conservation actions taken throughout its range. It will restore 1,192 acres of high quality young forest breeding habitat in a Golden-winged Warbler focal area in Minnesota. The project will also train public and private foresters operating in Golden-winged Warbler focal areas in new best management practices and how to implement them. The long-term goal of the project is to meet Golden-winged Warbler population goals by 2050 by creating an estimated 9,000 new acres of breeding habitat annually in Minnesota.

Conserving Neotropical Migrants in High Andean Wetlands III High Andean wetlands are important for a number of Neotropical migrants (White-rumped Sandpiper, Stilt Sandpiper, Lesser Yellowlegs, American Golden-plover, and Upland Sandpiper) as well as threatened resident birds, and because they provide essential services to local people. This project will engage stakeholders and increase local capacity to improve habitats for Neotropical migrants at four Wetlands of International Importance (Ramsar Sites) in Argentina, Bolivia, Ecuador and Peru. The project will result in 411,300 hectares of improved habitats at these four sites. The potential for ecotourism to help provide financial sustainability will also be explored at one of the sites.

Saving Critical Wintering Habitat for Hudsonian Godwit on ChiloIsland
The marine bays and shorelines of Chilosupport approximately 21,000 Hudsonian Godwit (99% of the Alaskan population and 29% of the global population) and 31,000 Whimbrel (61% of the Pacific Coast population) that overwinter there. Deforestation and degradation due to agricultural expansion are major threats to these species and their coastal habitats. This project will help local landowners take better stewardship of natural resources on private lands, improving watershed quality, managing livestock and agricultural production sustainably, and protecting shorebird habitat in the bays of Chilo
Fiscal Year 2014: Projects not yet selected. Program expects to fund 25-35 awards to support public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education. Fiscal Year 2015: Projects not yet selected. Program expects to fund 25-35 awards to support public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education.

CRITERIA FOR SELECTING PROPOSALS:

Proposals will be screened and selected for funding primarily on the basis of criteria contained in 16 U.S.C. 6101. However, proposals will also be evaluated on: scope and significance of effort; importance of resource values; relationship of project to other efforts locally/regionally; and feasibility and cost-effectiveness. Selection criteria are available on the program website.

15.636 ALASKA SUBSISTENCE MANAGEMENT FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Alaska National Interest Lands Conservation Act (ANILCA) of 1980, Title VIII, Public Law 96-487, 16 U.S.C. 3101-3233, Section 809. Fish and Wildlife Coordination Act (16 U.S.C. 661 to 666).

OBJECTIVES:

To identify and provide information needed to sustain subsistence fisheries and wildlife management on Federal public lands, for rural Alaskans, through a multidisciplinary, collaborative program. Three programs are administered under ANILCA to fulfill this objective. The Fisheries Resource Monitoring Program (Monitoring Program) funds approximately 80 studies annually to provide information on stock status and trends, harvests, and traditional ecological knowledge to manage and regulate Federal subsistence fisheries. The Partners for Fisheries Monitoring Program (Partners Program) strengthens Alaska Native and rural involvement in subsistence fisheries management and research. The program provides funds directly to Alaska Native and rural organizations to hire fishery biologists, social scientists, and educators to implement fisheries monitoring projects and rural internship programs. The Liaison and Staff Support Grant to the State of Alaska is directed specifically to the Alaska Department of Fish and Game. The grant defrays salary and travel expenses that occur in support of the coordination between State and Federal subsistence fish and wildlife programs.

Award Procedure:

For the Monitoring Program, an inter-agency technical review committee evaluates proposals, and, for those selected for further consideration, subsequently the full investigation plans. The committee develops a draft monitoring program from the highest priority projects, based on their technical review and available funds. The draft monitoring plan is reviewed by ten regional advisory councils and the public. An inter-agency staff committee reviews all recommendations, and provides recommendations. The Federal Subsistence Board selects projects for the Monitoring Plan taking into account all recommendations and comments. Funding of the Monitoring Plan is administered by the Office of Subsistence Management (OSM).

For the Partners Program, an internal review is conducted to evaluate proposals and make recommendations for funding. The evaluations are based on the criteria outlined in the request for federal assistance. The proposals are ranked and the OSM Assistant Regional Director selects proposals that best support the program within available funding. Once a Monitoring Program project or Partners Program position is selected for funding, a funding instrument, i.e., notice of award, between Fish and Wildlife Service and the recipient is drafted by the OSM. The award is processed by OSM through the contracting office and sent to the recipient for signature. The award is considered executed when signed copies of the agreement are received from the recipient and the contracting office has obligated funds to the agreement. The awards are administered by OSM. For the Liaison and Staff Support Grant, the Alaska

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: FY2012 and 2013: Ex. 1 - 12-352 Upper Kuskokwim River Whitefish Climate Change Trends. This three-year project examines whitefish harvests within the broader context of non-salmon harvest efforts in two Kuskokwim River drainage communities, Lime Village and Nikolai. Given the importance of whitefish subsistence harvests in the upper Kuskokwim River, this research will attempt to determine why harvest levels for key species have declined over the past few decades.

Ex. 2 - 12-500 Copper River Chinook Salmon RFID Feasibility. This two-year project examines the feasibility of placing radio frequency identification readers into a Copper River tributary to monitor Chinook salmon escapement.

Ex. 3 - 12-207 Yukon River Bering Cisco Spawning Origins Telemetry. This three-year project would use radio telemetry to document the spawning locations and timing of Bering cisco in the Yukon River drainage. Fiscal Year

2014: New awards begin April 2014. Final recommendation from the Federal Subsistence Board in January 2014. An example as identified in the Information Needs document for the 2014 Funding Opportunity:

For the Northern Alaska Region, the 2014 Request for Proposals is focused on the following priority information needs:

Baseline and ongoing harvest assessment and monitoring of subsistence fisheries in the Northwest Arctic and North Slope regions to supplement available information.

Historic trends and variability in harvest locations, harvests, and uses of non-salmon fish, particularly for North Slope communities.

Ipiaq natural history of fish, land use, place name mapping, species distribution, and methods for and timing of harvests, and Ipiaq taxonomy of nonsalmon fish species. Fiscal Year 2015: No current information available.

CRITERIA FOR SELECTING PROPOSALS:

For the Monitoring Program, each proposal is evaluated using the following four criteria: (1) Strategic Priorities: Studies must be responsive to identified issues and information needs. All projects must have a direct association to a Federal subsistence fishery, and either the subsistence fishery or fish stocks in question must occur in waters within or adjacent to Federal public lands; (2) Technical and Scientific Merit: Technical quality of the study design must meet accepted standards for information and collection, compilation, analysis, and reporting. Studies must have clear objectives, appropriate sampling design, correct analytical procedures, and specified progress and final reports; (3) Investigators Ability and Resources: Investigators and their organizations should have demonstrated technical and administrative expertise to complete prior studies, or have co-investigators or appropriate partnerships with other organizations to meet all requirements of the study; (4) Partnership-Capacity Building: Studies must include appropriate partners and contribute to building capacities of rural organizations, local communities, and residents to participate in fisheries resource management. Investigators and their organizations should be able to demonstrate the ability to maintain effective local relationships and a commitment to capacity building. For the Partners Program, each proposal is evaluated using the following equally weighted criteria: (1) Each project must have direct linkage to Monitoring Program projects; (2) Ability to successfully implement program identified under section IV, ii, Content and Form of Application, Describe the Program; (3) Strategic priority and past performance of the Monitoring Program projects identified in the proposal; (4) Letters of support from tribal and rural organizations, government agencies, project investigators, and schools/ universities; (5) Annual and total cost of the proposal, including use of in-kind or matching contributions that either decrease cost or expand support for implementing the Partners Program; (6) Past performance on implementing Monitoring Program projects; (7) Past performance on current or past agreements with the Office of Subsistence Management; (7) Previous experience in mentoring, training, and supervising personnel; and (8) Past and current accounting practices to ensure deliverables and accountability.

Each of these items carries a "Go/No-Go" impact: direct linkage of a Monitoring Program project, enrollment in CCR; affirming in writing in your application that you have enrolled in CCR; providing your DUNS Number; submission of completed SF-424, SF-424A, and SF-424B package; and submission of approved Indirect Cost Negotiation Agreement if requesting reimbursement for indirect costs. For the Liaison and Staff Support Grant, the Alaska Department of Fish and Game is the only non-federal entity with management authority over fish and wildlife resources. This grant agreement is not open to competition outside the Alaska Department of Fish and Game.

conservation of migratory birds.

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

Joint Ventures are public/private partnerships, guided by a Management Board of public/private representatives and use a U.S. Fish and Wildlife Service (USFWS) approved Implementation Plan that establishes conservation goals, priorities, and strategies. The Implementation Plan typically includes stepped down goals and objectives from a variety of national and international bird planning efforts. A Joint Venture Coordinator facilitates the coordination and implementation of the Joint Venture program. The USFWS provides basic administrative funding to the Joint Venture to cover costs associated with coordination; planning; monitoring, evaluation and applied research; communications and outreach; and project development and implementation. Joint Ventures may provide Federal assistance to partners within these categories to achieve the goals of the Joint Venture. The USFWS does not fund the entire scope of Joint Venture operations. Joint Venture partners are expected to contribute funding towards one or more of these categories. Non-federal match is not required, but leveraging USFWS dollars provided for Joint Ventures administration is a critical component of the Joint Ventures program. Varies annually.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Penobscot Indian Nation (\$197,542) Atlantic Salmon Enhancement on Tribal Lands: The project will allow the Penobscot Indian Nation (PIN) to actively enhance endangered Atlantic salmon populations on PIN trust lands. The project will use and refine a technique used to introduce and enhance Atlantic salmon populations within designated critical habitat, within PIN trust lands and reservation lands in the Penobscot River watershed. It would build upon recent efforts by the Maine Department of Marine Resources (MDMR) and the USFWS to plant fertilize Atlantic salmon eggs into identified spawning habitat.

Houlton Band of Maliseet Indians (\$199,625) Fish Passage Enhancement and Demonstration: The Aquatic Habitat Restoration Program works toward improving opportunities for traditional uses of the Meduxnekeag River with a focus on sustenance fishing. This Project - Phase II of our Program consists of fish passage enhancement/demonstration projects at four culvert/stream crossings on tributaries of the Meduxnekeag River. The Project will mitigate impacts of poorly functioning culverts on fish passage/habitat identified, prioritized and detailed in a comprehensive aquatic habitat study funded by a 2008 Tribal Wildlife Grant. Project Objectives include: 1) improving fish passage/habitat at four (4) culverts/stream crossings on tributaries of the Meduxnekeag River; 2) improving fish habitat on a section of Pearce Brook that is a prime access point and fishing spot for area youth; 3) publicizing these improvements in the Meduxnekeag and its tributaries; and 4) developing Tribal capacity to implement these projects (post design/engineering) as part of our ongoing effort to improve aquatic habitat throughout the Meduxnekeag Watershed.

15.647 MIGRATORY BIRD CONSERVATION

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Fish and Wildlife Act of 1956, as amended, 16 U.S.C. 742a-754; Fish and Wildlife Coordination Act of 1958, 16 U.S.C. 661-667(e); Fish and Wildlife Conservation Act, 16 U.S.C. 2901-2911; and Migratory Bird Treaty Act, 16 U.S.C. 709a.

OBJECTIVES:

To maintain and enhance populations and habitats of migratory bird species found in the Upper Midwest (IL, IN, IA, MI, MN, MO, OH, WI).

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE; Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Grants may be used for the conservation of any bird species protected by the Migratory Bird Treaty Act and occurring in U.S. Fish and Wildlife Service (USFWS) Region 3 (Upper Midwest, including IL, IN, IA, MI, MN, MO, OH, and WI). Special emphasis will be placed on Birds of Concern in the Midwest (see <http://www.fws.gov/midwest/midwestbird/concern.html>) as these species are experiencing known or suspected population declines, are recreationally important, or are causing biological or social conflicts. Implementing national, regional, and flyway bird conservation plans, including the Partners in Flight North American Landbird Conservation Plan (<http://www.partnersinflight.org>), U.S. Shorebird Conservation Plan (<http://shorebirdplan.fws.gov>), North American Waterbird Conservation Plan (<http://www.waterbirdconservation.org>), North American Waterfowl Management Plan (<http://www.fws.gov/birdhabitat/NAWMP/index.shtm>), and Mississippi Flyway bird management plans, is the USFWS's highest priority, and proposals related to the priorities identified in these plans and Bird Conservation Region and state-level bird conservation planning efforts will receive high funding consideration. The following activities are also of high interest to the USFWS: a) Population surveys, monitoring, and assessments to determine the status, trends, distribution, demography, and responses to management of bird species and groups of concern. Emphasis will be placed on landscape-level applications of standardized inventory and monitoring protocols as identified through the Midwest Coordinated Bird Monitoring Partnership (<http://midwestbirdmonitoring.ning.com>). Local-scale bird monitoring (e.g., local land management units) will generally not be a focus of this grant program, nor will support for long-term operational bird monitoring efforts. Rather, the program seeks to address coordination of monitoring efforts and development and evaluation of new survey and monitoring techniques (both field and analytical); b) Conservation of focal species for which conservation plans and/or working groups have been developed and research, monitoring, and other priorities have been identified. Examples of focal species include: Golden-winged Warbler, Cerulean Warbler, Henslows Sparrow, Bobolink, other Midwestern grassland birds, American Woodcock, Wilsons Phalarope, Upland Sandpiper, Marbled Godwit, Common Tern, Black Tern, King Rail, and Lesser Scaup (for further information on focal species, contact Steve Lewis, USFWS, steve_j_lewis@fws.gov); and c) Strategic Conservation, wherein the USFWS and partners integrate biological planning, landscape design, conservation delivery, and monitoring and evaluation in a way that generates the adaptive feedback loops that enable sound decisions and constantly improve our efficiency and effectiveness in saving birds (<http://www.fws.gov/midwest/science/SHC/FAQ.htm>). Strategic conservation involves applied research, including studies of bird habitat requirements, threats, limiting factors, and population responses to habitat conservation activities; and use of Geographic Information Systems, modeling, and similar tools to identify bird habitat focus areas and further bird conservation planning

efforts. 25%.

Through this Agreement, ANPN, FWS, and government and non-governmental organization (NGO) partners aim to safeguard Gabons large forest elephant population; ensure a future for humankinds closest relatives, the great apes of the Congo Basin; maintain the ecological resilience of tropical rain forests and forest biodiversity; and preserve the ocean giants and protect ecologically important marine ecosystems. 2) Maintenance of the ecological integrity and connectivity, and the wealth of wildlife in the Sangha Tri-National and Northern Congo by extending the protected area network and improving management effectiveness of existing protected areas; strengthening and monitoring wildlife law enforcement to reduce illegal killing of wildlife; surveying large mammal populations to better understand abundance and distribution in key areas, and defining and implementing strategies to minimize impact and to better understand Ebola outbreaks on key ape populations. 3) The operational capacity of the 300 strong ranger force in Virunga National Park while also strengthening the parks long-term conservation strategy and the financial sustainability of Africas oldest national park, which is home to a quarter of the worlds remaining mountain gorilla populations. Fiscal Year 2014: Program has not yet selected projects for funding. Program anticipates funding projects that support capacity building in Central Congo Basin Africa only. Fiscal Year 2015: Program anticipates funding projects that are similar in scope to FY 2014.

OBJECTIVES:

The U.S. Fish and Wildlife Service (USFWS) uses a science-based, adaptive framework for setting and achieving broad-scale conservation objectives that strategically address the problems fish and wildlife will face in the future. This framework, called Strategic Habitat Conservation, is based on the principles of adaptive management and uses population and habitat data, ecological models, and focused monitoring and assessment efforts to develop and implement strategies that result in measurable fish and wildlife population outcomes. This process uses the best available scientific information to predict how fish and wildlife populations will respond to changes in the environment, thus enabling the USFWS to focus habitat conservation and other management activities where they will be most effective. In addition, the USFWS needs focused, applied science directed at high impact questions surrounding threats to fish and wildlife resources for which management and/or mitigation is required to maintain species at healthy, sustainable, desired levels. USFWS must base its decisions on the best science available, in order to defend its regulatory decisions, biological opinions and species conservation recommendations to land managers.

TYPES OF ASSISTANCE:

15.671 YUKON RIVER SALMON RESEARCH AND MANAGEMENT

ASSISTANCE

R&M Fund

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

The Yukon River Salmon Act of 2000 (16 USC 5701 et seq., P.L. 104-43, November 3, 1995, 109 Stat 392) as amended by P.L. 106-450, November 7, 2000, 114 Stat 1941; P.L 108-219, April 13, 2004, 118 Stat 615.

OBJECTIVES:

The U.S. Fish and Wildlife Service (Service) receives funds for implementation of the Yukon River Salmon Agreement with Canada which was reached in March 2001. The Yukon River Salmon Act of 2000 authorizes funds for implementation of the Agreement including funds for cooperative research and management projects on the Alaska portion of the Yukon River. The Service administers these funds through financial assistance on a competitive basis for projects/studies that advance the scientific community's understanding and management of Chinook and chum salmon in the Yukon River of Alaska.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

This funding is intended to support projects that are focused on improving the understanding of the biology and management of Yukon River Chinook salmon and summer and fall chum salmon. Discretionary funds are available through this program. Generally we have \$260,000 to \$400,000 worth of funding that is set aside to award to projects that focus on Chinook salmon and chum salmon in the Yukon River Basin.

Applicant Eligibility:

The intended result of this funding is to improve the understanding of the biology and management of Yukon River salmon species.

Beneficiary Eligibility:

Projects that are awarded money from this source will ultimately benefit the rural and urban American and Canadian public that subsist off of the salmon resources of the Yukon River.

Credentials/Documentation:

Federal law mandates that all organizations applying for Federal financial assistance must have a valid Dun & Bradstreet Data Universal Number System (DUNS) number and have a current registration in the Central Contractor Registry (CCR). Individuals submitting an application on their own behalf and not on behalf of a company, state, local or tribal government, academia or other type of organization are exempt from the DUNS number and CCR requirements. OMB Circular No. A-87 applies to this program.

Detailed instructions for submitting both an initial proposal and a detailed proposal will be posted on Grants.gov. The Project Officer for the grant announces the call for initial proposals via newspapers, email, and Grants.gov. Links to the initial call for proposals are posted on the Fairbanks Fish and Wildlife Field Office website and are distributed to state, federal, NGOs, and universities.

Award Procedure:

The initial project proposals will be evaluated by an interagency review committee which will provide recommendations to the U.S. Section of the Yukon River Panel (Panel) for final approval. Authors of selected initial proposals will be notified by the Service to submit detailed proposals for final review and selection. Service staff will notify applicants of review results by

either sending them an approval letter stating their selection and a project agreement to sign and return to the Service or by sending written notification to the applicant that the application was not selected. Potential recipients must sign the project agreement and return it before funds can be obligated. Once the potential recipients sign the project agreement, the Service will obligate funds and issuing a fully executed Award either electronically or through the mail.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Program funded projects that helped build and maintain public support for management of the Yukon River salmon through outreach events, weekly teleconferences, and public meetings. Programs also funded several projects that dealt with monitoring salmon returns in rivers that produce large numbers of salmon. Fiscal Year 2014: Program anticipates funding projects that increase/improve understanding of the biology and management of Yukon River salmon species in the Alaska portion of the basin. Fiscal Year 2015: Program has yet to identify specific project needs, but anticipates directing significant funding towards projects that increase/improve the understanding of in-season subsistence harvest of Yukon river salmon species.

CRITERIA FOR SELECTING PROPOSALS:

Review criteria are based on the applications requirements as posted in the call for proposals. Selections for funding are principally based on the merit of the project and how well the project addresses one or more of the priorities and factors identified in the call for proposals. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: Program supported 1) A conservation effort for the Itombwe massif clawed frog, Luvubu reed frog, white-striped reed frog, Itombwe screeching frog, Mwana screeching frog, Mukuzira long-fingered frog, Itombwe golden frog, parkers tree toad, Mokanga forest tree frog, and the Itombwe river frog in Democratic Republic of Congo, by seeking to create a predictive model of Bd distribution for the entire Albertine Rift area. 2) A conservation effort for the Lao newt, by increasing the protection of the species from human overexploitation. 3) A conservation effort for the Hong Kong Cascade frog, by mitigating population level impacts of batrachochytrium dendrobatidis, the fungus responsible for the disease chytridiomycosis, using enhanced surveillance techniques and will influence amphibian trade policies at an international wildlife trade hub. 4) A conservation effort for the critically endangered Spotted Harlequin frog, Coyne Harlequin frog, Elegant Harlequin frog, Sad Harlequin frog, Webbed Harlequin frog, and the vulnerable Amazon Harlequin frog in Ecuador, by building an additional isolated frog propagation facility or a Noahs Ark, by building a facility approximately 60 square meters. Fiscal Year 2014: Undetermined. Fiscal Year 2015: Undetermined.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested proposal elements. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the high degree of threat or extinction risk that the target species experiences;
- Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate what quality makes the species exceptional, but examples would include a species that strongly influences the ecological community in which it occurs, a species that is genetically distinct with few close relatives, a species that exhibits a distinctly unusual behavior, or a species whose conservation would catalyze the conservation of multiple species);
- Occurs in a region or conserves a taxon poorly represented in the Amphibians in Decline portfolio;
- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;
- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;
- Applies the best scientific and technical information and methods available in support of project activities;
- Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;
- Is feasible and likely to be successfully implemented as stated;
- Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;
- Emphasizes conservation action rather than data collection; and
- Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

The above considerations are not listed in any order of importance. All considerations listed do not necessarily apply to every proposal. Following review, applicants may be asked to revise the project scope and/or budget before a final funding decision can be made.

15.673 WILDLIFE WITHOUT BORDERS CRITICALLY ENDANGERED ANIMAL CONSERVATION FUND

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to reduce threats to highly endangered wildlife in their natural habitat. Proposals should identify specific conservation actions that have a high likelihood of creating durable benefits, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue.

Project activities that emphasize data collection and status assessment should describe a direct link to management action, and explain how lack of information has been a key limiting factor for management action in the past. Proposals that do not identify how actions will reduce threats, or do not demonstrate a strong link between data collection and management action, have a lower likelihood of being selected. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: The Program supported 1) A conservation effort for the Saint Lucia Racer on the Caribbean island nation of Saint Lucia, to create the first action plan for the species. Specific activities included: (1) Creating a ten year action plan using a participatory process for the recovery of this species in the wild; (2) Vital Racer habitat will remain free of invasive alien species; (3) a multi-agency Racer working group was established and will oversee the development and implementation of the ten year action plan; (4) Increased public awareness and support for the Racer; (5) lessons learned from similar captive husbandry will help inform the breeding and reintroduction program for the Saint Lucia Racer. 2) Conservation efforts that put the Batagur trivittata on a trajectory towards a genetically diverse, self-sustaining wild population. Specific activities included: (1) incubation of trivittata eggs; (2) created modern facilities to host head-starting turtles and a captive assurance population; (3) conducted surveys of the Chindwin River and tributaries in the Htamanthi Wildlife Sanctuary for hitherto over-looked populations; (4) expanded nest protection, head-starting, and threat abatement programs to encompass new areas found to be inhabited by B. trivittata; (5) initiated a trial release program of juvenile B. trivittata; (6) increased the safety of those released hatchlings through patrols, education, and incentives for turtle protection. 3) A project aimed at increasing the population of Ricords Iguana by removing three invasive species. Specific activities included: (1) Removal of remaining invasive feral cats, burros, and cattle from Isla Cabritos; (2) work with local officials to develop and implement an operational plan detailing field activities, staff and timeline, which also included monitoring and evaluation. Fiscal Year 2014: Undetermined. Fiscal Year 2015: Undetermined.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species, listed above in the Description of Funding Opportunity. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested elements listed in the Application and Format section above. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the qualification of the target species as experiencing a high degree of threat or extinction risk; Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate the exceptional quality of the species, but examples would include a species that strongly influences the ecological community in which it occurs, that is genetically distinct with few close relatives, that exhibits a distinctly unusual behavior, or whose conservation would catalyze the conservation of multiple species);
- Occurs in a region or conserves a taxon poorly represented in the CEACF portfolio;
- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;
- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;
- Applies the best scientific and technical information and methods available in

support of project activities;

Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;

Is feasible and likely to be successfully implemented as stated;

Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;

Emphasizes conservation action rather than data collection; and

Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

These considerations are not listed in order of importance. All considerations listed do not necessarily apply to every proposal. The Division of International Conservation occasionally receives and funds proposals outside of the announced submission deadlines that are of such a critical nature (examples include projects resulting from a natural disaster, disease outbreak, other imminent threats or population crash, among others) that they warrant immediate consideration.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2013: One State will index and rescue the Lake Superior Legacy Collection, which contains original field notes, hand samples, thin sections, and a 24-volume index compiled between 1882 and 1922. Many of the thin sections have little or no location information (section, township, range); notebooks and other paper records will be mined in the collection to recover these missing locations. Many fragile paper records, including field notebooks and lithologic descriptions of thin sections, will be scanned, which will preserve these documents and allow for increased access. Metadata will be created for the digitized paper records and for the physical samples that still require location information.

Another State will digitally scan and create metadata for their geologic hazard and engineering geology document collection and for historical aerial photography housed at their State geological survey. This State will also scan and create metadata for historical geologic maps housed, and will digitally scan and create metadata for coal exploration well data. This project will enable the State geological survey to catalog and digitally convert a portion of their holdings for easier access by users. Engineering geology and geologic hazard reports will be available to the public for searching, viewing, and download with the new State GeoData Archive System. Historical aerial photography will be available to the public for searching, viewing, and download with the new Aerial Imagery Collection application of this State.

A third example is that a State will digitally archive, increase accessibility to, and promote knowledge of data contained in 200 geology field notebooks through creation of a digital infrastructure for the notebooks which date back to the 1850s. A second goal is to generate metadata appropriate for entry in the National Digital Catalog to facilitate use and awareness of the notebooks and the valuable and unique geologic information contained therein. It is anticipated that this project will increase use of the geologic data contained in the field notebooks, reaching a wide variety of users, including geologists, other technical professionals, educators, students, the general public and others.

Fiscal Year 2013: This program focuses on satellite remote sensing data and technologies in support of applied research, K-16 education, workforce development and technology transfer. Federal funds are leveraged to work together with other State organizations, Federal agencies and across States (StateViews). Continued work to develop remote sensing curricula that can be shared with and tailored to each participating educational institution (as well as work force training). Select States worked to create a shareable archive of all kinds of remote sensing data that all State organizations can access. Increased education and training in Earth sciences (K-16). Conducted critical applied research-real-time applicants relevant to each State, sometimes expanding to a region of the U.S. Provided feedback to the U.S. Geological Survey to better understand State needs. Fiscal Year 2014: In early part of FY14 America View completed the final report for the previous five year period and was awarded the competitive grant for the National Land Remote Sensing Education Outreach and Research Activity covering a period not to exceed five years. Additionally, America View is exploring a distributed cloud based network utilizing key educational institutions throughout the U.S. to aid in the more efficient distribution of large data sets such as Landsat. Properties nominated to, or already listed in, the National Register of Historic Places at a national level of significance by the State Historic Preservation Officer may be reviewed by the National Historic Landmarks Survey staff.

Award Procedure:

When the property has been investigated, findings, in the form of a thorough NHL nomination form, are presented to the National Park System Advisory Board which evaluates the property's national significance and high integrity and recommends a final action to the Secretary of the Interior. Owners of proposed landmarks are contacted prior to a landmark study, given an opportunity to comment on a final study, and then notified after designation of the landmark.

Deadlines:

(National Register)

FEDERAL AGENCY:

National Park Service, Department of the Interior

AUTHORIZATION:

National Historic Preservation Act of 1966, as amended, Public Law 89-665, 16 U.S.C. 470, 80 Stat. 915 et seq.; Executive Order 11593, May 13, 1971; Tax Reform Act of 1976, Public Law 94-455; Public Law 94-442; 90 Stat. 1519; Revenue Act of 1978; Public Law 95-600; National Historic Preservation Act Amendments of 1980; Public Law 96-515; Tax Treatment Extension Act of 1980; Public Law 96-541; Economic Recovery Tax Act of 1981, Public Law 97-340; Tax Reform Act of 1984, Public Law 98-369; Tax Reform Act of 1986, Public Law 99-514; National Historic Preservation Act Amendments of 1992, Public Law 102-575; Executive Order 13287, March 3, 2003.

OBJECTIVES:

To expand and maintain the National Register of Historic Places for planning, preservation, research, public education and tourism efforts; to make the information on districts, sites, buildings, structures and objects of historical, architectural, archeological, engineering and cultural significance more accessible to the public in order to increase and broaden the public's understanding of the information, foster a national preservation ethic, and to promote greater appreciation of America's heritage; to coordinate with Federal agencies, State and Tribal preservation offices, and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; and to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218).

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING

USES AND USE RESTRICTIONS:

Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60. Listing does not affect the range of actions an owner may take, as long as Federal funding, licensing or assistance is not involved and no governmental unit receives any authority or control over the property, including its use and disposition. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.904), when funding is available, to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act

as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major Federal tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" and for charitable contributions for conservation purposes of partial interests in historic properties.

Applicant Eligibility:

Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix IV of the Catalog); or the Tribal Preservation Officers; Federal agencies required to nominate and consider historic properties within their jurisdiction or as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, and the National Historic Preservation Act operating under programs administered by representatives (listed in Appendix IV of the Catalog) appointed by the heads of the agencies; and, in States without approved State Historic Preservation Programs, persons and local governments. Applicants eligible for Federal Tax benefits include owners of individually listed properties and properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Beneficiary Eligibility:

Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Credentials/Documentation:

Nominations are submitted on standard nomination forms provided upon request to the State Historic Preservation Officers, Federal Preservation Officers, and Tribal Preservation Officers who must certify that each property was properly nominated. Procedures for National Register nominations are found in 36 CFR Part 60. Request for determinations of eligibility must be adequately documented as described in Appendix A of 36 CFR Part 63. Requests for certification of historic properties must be documented as described in Section 36 CFR Part 67 and requests for certification of State and local statutes and districts must be documented as described in Section 36 CFR Part 67. To participate in the program, each State must have an approved review board, an approved State staff, and an accepted State historic preservation plan. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

For National Register nominations the signature of the State Historic Preservation Officer on the nomination form certifies that the State review board has reviewed the nomination and that all applicable procedures, including notification to the property owner at least once during the nomination process, have been followed. The signature of the Federal Preservation Officer for Federal property or the Tribal Preservation Officer on Tribal lands on the nomination form certifies that the property has been nominated in compliance with the National Historic Preservation Act. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Anyone may prepare a National Register nomination. After the property is approved by the State Historic Preservation Officer, Tribal Preservation Officer, or Federal Preservation Officer, the nomination form or letter of request for a determination of eligibility should be forwarded to the Keeper of the National Register, National Park Service, Department of the Interior, 1849 C Street, NW, Mail Stop 2280, Washington, DC 20240. Nominations submitted for review are announced in the Federal Register to provide a period of comment. Documentation for certification for Federal tax benefits of historic buildings and structures, State and local statutes and districts should be forwarded to the appropriate State Historic Preservation Office, which sends it to the appropriate National Park Service Office.

Award Procedure:

The professional review staff of the National Register determines whether the properties meet the National Register criteria as contained in 36 CFR Part 60. Properties that meet the criteria are then officially listed in the National Register

and become eligible for Federal tax benefits and Historic Preservation Fund grants when they are available.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

After nomination by State, 45 days at Federal level.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Land acquisition and development grants may be used for a wide range of outdoor recreation projects, such as picnic areas, inner city parks, campgrounds, tennis courts, boat launching ramps, bike trails, swimming pools, playing fields, and support facilities such as roads, water supply, etc. Facilities must be open to the general public and not limited to special groups. Every park or outdoor recreation area acquired or developed with assistance under this program must remain available and accessible for public outdoor recreation use forever. Development of basic rather than elaborate facilities is favored. Operation and maintenance of facilities are not eligible expenses for funding. States only are also eligible to apply for grants to revise and update existing SCORPs; prepare new SCORPs; conduct statewide surveys, technical studies, data collection and analysis; and for other planning purposes that are clearly related to SCORP refinement and improvement.

Applicant Eligibility:

For planning grants, only the State agency formally designated by the Governor or State law as responsible for the preparation and maintenance of the SCORP is eligible to apply. (Treated as States for this purpose are the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, and Guam.) For acquisition and development grants, the above designated agency may apply for assistance for itself, or on behalf of other State agencies or political subdivisions, such as cities, counties, and park districts. Additionally, Indian tribes that are organized to govern themselves and perform the functions of a general purpose unit of government qualify for assistance. Individuals, nonprofit organizations, and private organizations are not eligible.

Beneficiary Eligibility:

The general public. For planning grants, same as Applicant Eligibility.

Credentials/Documentation:

The State Liaison Officer (SLO), who is appointed by the Governor or designated in State legislation to administer the program in the State or Territory, must provide assurance that the project is consistent with the SCORP; i.e., that it meets high priority recreation needs shown in the action program portion of the Plan. The State must have a sufficient balance of LWCF funding and the required match available for the project. The sponsoring agency must permanently dedicate the project to public outdoor recreation and assume responsibility for its operation and maintenance. SCORPs must cite the State's legal authority to participate in the Land and Water Conservation Fund program. Eligibility of costs will be determined in accordance with OMB Circular A-102 (43 CFR Part 12, Subpart C), "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local

Governments" and OMB Circular A-87, Cost Principles for State, Local and Indian Tribal Governments. OMB Circular No. A-87 applies to this program. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

The SLO has the prerogative for initial determination of project eligibility, priority need, and order of fund assistance within the State. All project proposals are submitted to the National Park Service by the SLO. Environmental impact information is required for this program; a screening form is used to determine whether an EA or EIS is necessary. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance. Proposals selected by the State to forward to NPS must be accompanied by the standard federal application forms required by 43 CFR Part 12, Subpart C, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments." Proposal budgets must comport with OMB Circulars A-87 and A-102. Basic environmental information or evaluation is required and will be assessed by the National Park Service to determine whether an environmental impact statement is needed. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance.

Award Procedure:

Proposals are reviewed by the NPS field office, where final action may be taken. All grants are made to the State lead agency and if applicable passed through to the project sponsor, whether State or local government.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Approximately 30-60 days for acquisition and development projects; 60 days for planning projects.

Appeals:

State may appeal to the Secretary of the Interior.

Renewals:

Project agreements may be amended to change the scope, funding amount, or duration. Must be approved by the National Park Service.

Formula and Matching Requirements:

Statutory Formula: Each year, States and Territories receive an overall allocation of funds based on a statutory formula. Depending on the amount appropriated by Congress, a certain percentage (forty percent of appropriations of up to \$225 million, thirty percent of the next \$275 million, and twenty percent of any additional appropriation) is split equally among the 51 States (for this purpose American Samoa, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands are treated as one State and split an apportionment). The remaining percentage is apportioned on the basis of need.

Matching Requirements: The Land and Water Conservation Fund Act requires that the share of federal funds not exceed 50 percent of the total project cost. Generally, match must be derived from State, local, or private sources, but under certain conditions all or part of the project sponsor's matching share may be from other Federal assistance programs, such

as Community Development Block Grants, when such use is allowable under the other programs sponsoring legislation. Otherwise, no other Federal funds may be applied to the project cost, even if all matching requirements are met. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Funds are available for obligation during the fiscal year in which they are appropriated and for the two following fiscal years. The assistance period for individual projects varies and may be extended but on average is three years. Complex projects may be broken down into stages, with one being initially approved and the remainder qualified for activation at a later date. Except for project preparation costs, all costs must be incurred within the project period to be eligible for reimbursement. Planning projects may not be phased. See the following for information on how assistance is awarded/released: On an average of three years.

Reports:

Program reports are not applicable. Cash reports are not applicable. All projects are monitored for progress through consolidated performance reports, which should be at least annually. State inspection reports are submitted every 5 years on completed projects stating whether the properties acquired and/or developed with fund assistance are still being used in accordance with the agreement. For planning projects, end products are specified in the application for assistance. Financial reports are required with all billings which should be at least annually. 15.957 HISTORIC PRESERVATION FUND GRANTS TO PROVIDE DISASTER RELIEF TO HISTORIC PROPERTIES DAMAGED BY HURRICANE SANDY

HPF Hurricane Sandy Relief Grant Program

FEDERAL AGENCY:

National Park Service, Department of the Interior

AUTHORIZATION:

Disaster Relief Appropriations Act, 2013 (P.L. 113-2)

National Historic Preservation Act, as amended, 16 U.S.C. 470(e) and (h), Establishment of Historic Preservation Fund

National Historic Preservation Act, as amended, 16 U.S.C. 470a(j), Develop and implement a comprehensive preservation education and training program.

OBJECTIVES:

The purpose of this supplemental funding is to provide technical assistance and emergency repairs to historic and archeological resources impacted by Hurricane Sandy. Only hurricane-related damage is eligible for grant assistance. The NPS will rely on the assessment and documentation of the SHPO offices to determine eligibility of storm damaged resources and eligible grant expenditures related to the storm damage.

TYPES OF ASSISTANCE:

Formula Grants; Project Grants

USES AND USE RESTRICTIONS:

Hurricane Sandy HPF relief grants must be used to preserve properties listed in or eligible for listing in the National Register of Historic Places. States may also use the funds for 1) hiring additional term, temporary, or contractor staff to enable the SHPOs to expeditiously conduct the reviews of all Federally funded or sponsored projects required by Section 106 of the National Historic Preservation Act, 2) providing technical assistance to local government officials

and to all owners of properties listed in or considered eligible by the State Historic Preservation Officer for listing in the National Register of Historic Places; and 3) architectural/engineering plans and specifications, economic feasibility studies, survey and damage assessments, construction work to stabilize and repair historic and archeological properties, and survey of hurricane-damaged properties.

Applicant Eligibility:

Eligible applicants are State and Tribal Historic Preservation Offices located within areas receiving major disaster declarations from FEMA.

Beneficiary Eligibility:

States and Tribes.

Credentials/Documentation:

National Register listing, or certification of eligibility, of properties for which grant assistance be being applied. OMB Circular No. A-87 applies to this program.

The standard application forms required by 43 CFR 12, Subparts C and F, must be used. In addition, applicants must also submit an Action Plan Narrative providing an overview of needs in the State.

Award Procedure:

Using the FEMA major disaster declarations as a starting point for determining the method of apportioning the \$47.5 million, the NPS will divide the appropriation into two groups. Group 1 includes \$38 million and will be apportioned to the four States containing counties that FEMA designated as eligible to receive both Individual and Public Assistance Connecticut, New Jersey, New York, and Rhode Island. The remaining funds will comprise Group 2, and will be awarded to the remaining eight States, the District of Columbia, and any Federally-recognized Indian Tribes located in those States, through an application process and based on need as described in proposals submitted by the States and Tribes to the NPS. In apportioning the \$38 million from Group 1 that will be assigned to CT, NJ, NY, and RI, because State Historic Preservation Offices (SHPO) in those States have not yet completed damage assessments to historic properties, there is no single best method of determining need. Funds will be distributed using a formula that takes into account three evaluation factors, each having equal weight: 1) population of counties eligible for both IA and PA, 2) land area of counties eligible for both IA and PA, and 3) the number of properties listed in the National Register of Historic Places in counties eligible for both IA and PA.

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Consolidated Appropriations Act, 2009, Public Law 111-8.

This program provides funds for projects that aid in the protection and location of missing persons living with Alzheimers disease and related dementias and other missing elderly individuals. Law enforcement agencies often expend resources searching for missing persons with Alzheimers disease, and if not found quickly, they are at high risk of serious injury or even death. In addition, law enforcement officers may not be trained or equipped to handle the special needs of those with Alzheimers, once they are found.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Applications are solicited for projects, pursuant to Congressional appropriations, that may include one or more of the following: (1) Develop or enhance local and national outreach programs to increase awareness among law enforcement agencies and the public in addressing the needs of missing persons with Alzheimers disease; (2) Develop and/or implement a process for aiding in the location of lost persons with Alzheimers disease; and/or (3) Provide training and substantive informational material to law enforcement agencies through a national or regional initiative.

**16.123 COMMUNITY-BASED VIOLENCE PREVENTION PROGRAM
FEDERAL AGENCY:**

Office of Juvenile Justice and Delinquency Prevention, Department of Justice

AUTHORIZATION:

Public Law 111-117.

OBJECTIVES:

To support and enhance the coordination of existing community-based violence prevention and intervention programs and strategies that are attempting to replicate models and strategies which have been proven to have a positive impact on the reduction of violence in target communities. The Community-Based Violence Prevention Program has three main goals: to change community norms regarding violence; to provide alternatives to violence when gangs and individuals in the community are making risky behavior decisions; and, to increase the perceived risks and costs of involvement in violence among high-risk young people. This Program will work with community-based organizations to develop and implement strategies to reduce and prevent violence, particularly shootings and killings. This will be accomplished by relying on outreach workers, clergy, and other community leaders to intervene in conflicts or potential conflicts and promote alternatives to violence. The Community-Based Violence Prevention Program will also involve law enforcement in its efforts and depends heavily on a strong public education campaign to instill in people the message that shootings and violence are not acceptable. Finally, the model calls for the strengthening of communities so they have the capacity to exercise informal social controls and to respond to issues that affect them, including community violence. These activities are organized into five core components that address both the

community and those individuals who are most at risk of involvement in a shooting or killing: community mobilization, outreach, faith leader involvement, police participation and public education.

16.309 LAW ENFORCEMENT ASSISTANCE_NATIONAL INSTANT CRIMINAL BACKGROUND CHECK SYSTEM

(NICS)

FEDERAL AGENCY:

Federal Bureau of Investigation, Department of Justice

AUTHORIZATION:

None.

OBJECTIVES:

To provide a system so that any Federal Firearm Licensee (FFL) could receive an immediate determination by telephone or by other electronic means, on whether receipt of a firearm and/or explosive by a prospective buyer would violate Federal or State laws.

TYPES OF ASSISTANCE:

PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

The NICS Operations Center conducts NICS background checks by analyzing and evaluating criminal history records to determine whether the transfer of a firearm to an individual may violate State or Federal law. The staff at the Operations Center provides technical and operational support to users, provides customer service to FFLs and State Point of Contacts (POCs), processes appeals of denied transactions, and prepares management and statistical reports on the operation of the NICS.

Applicant Eligibility:

All persons purchasing firearms.

Beneficiary Eligibility:

The Federal Firearm Licensees and American public.

Credentials/Documentation:

Initial request for services must be from a licensed and enrolled FFL. For checks performed by the FBI, FFLs may contact the NICS Section by telephone via a toll-free number or, electronically by the NICS E-Check via the Internet. The FFLs will provide the required descriptive information requested on the Bureau of Alcohol, Tobacco, Firearms and Explosives Form 4473 and each background check is assigned a unique NICS Transaction Number. If a NICS background check results in no matching records, the transfer will be a proceed.

If one or more matching records are found, a NICS Legal Instruments Examiner (Examiner) will review the record(s) to determine if the subject of the record may be identical with the prospective purchaser and to determine if the record contains state and/or federal firearm prohibitive criteria which may prohibit the transfer of the firearm. If it is determined that prohibitive criteria exists, the NICS Examiner will advise the FFL to deny the firearm transaction. If potentially prohibitive criteria exists and more information is required in order to make the determination, the NICS Examiner will advise the FFL to delay the firearm transaction. When a transaction is delayed, the NICS Examiner begins extensive research on the potential prohibitor. The NICS Examiner will contact local, state, and federal law enforcement agencies and courts to resolve questions about an individual who appears to be prohibited from purchasing or possessing a firearm, as well as to request clarification regarding information in a prior record or disposition. When the research is complete, the NICS Examiner calls the FFL and gives a decision on the firearm transaction. Individuals who are denied the purchase of a firearm will be advised by the FFL of the process for appealing the denial decision if he/she believes it is incorrect. This program is excluded from coverage under OMB Circular No. A-87.

USES AND USE RESTRICTIONS:

Funding under this program is intended to address the needs of victims of severe forms of human trafficking as defined by the Trafficking Victims Protection Act (TVPA) of 2000. This includes male and female victims of sex and labor trafficking. The Office for Victims of Crime (OVC) awarded its first cooperative agreements to victim service organizations in FY03 to provide a comprehensive array of direct services to pre-certified foreign national victims. Pre-certification refers to the period of time between when trafficking victims

are initially identified by law enforcement and officially certified by the Federal government as such.

OVC funds victim service agencies to provide high-quality services to victims of human trafficking as defined by the Trafficking Victims Protection Act of 2000, as amended, and to enhance interagency collaborative and coordination in the provision of services to such victims. Administered jointly by OJP's Bureau of Justice Assistance (BJA) and the OVC, grant funding is made available each year to state and local law enforcement agencies and victim services organizations in support of multidisciplinary, victim-centered task forces dedicated to investigating trafficking crimes and providing culturally competent assistance to victims. These task forces include federal law enforcement agencies, such as the Federal Bureau of Investigation (FBI) and Immigration and Customs Enforcement (ICE), as well as U.S. Attorneys Offices and state and local prosecutors.

OVC also makes annual grant funding available exclusively for direct, comprehensive services tailored to the needs of human trafficking victims. These services include intensive case management, food, clothing, shelter, medical and dental care, mental health treatment, translation and interpretation services, immigration legal assistance, and more. This OVC funding also supports efforts to increase the capacity of communities to respond to victims through the development of interagency partnerships and public outreach and awareness campaigns.

**16.321 ANTITERRORISM EMERGENCY RESERVE
FEDERAL AGENCY:**

Office for Victims of Crime, Department of Justice

AUTHORIZATION:

42 U.S.C. 10601(d)(5), 42 U.S.C. 10603b(b), 42 U.S.C. 10603c.

OBJECTIVES:

Encompasses two programs for victims of terrorism and/or mass violence: (1) Antiterrorism and Emergency Assistance Program (AEAP) and (2) The International Terrorism Victim Expense Reimbursement Program (ITVERP). The AEAP provides assistance and compensation services for victims of domestic terrorism and intentional mass criminal violence and assistance for victims of international terrorism. ITVERP provides reimbursement for victims of acts of international terrorism that occur outside the United States for expenses associated with that victimization.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

AEAP funds are available specifically for services to victims of terrorism and/or intentional mass criminal violence. Funded activities may include compensation, emergency relief, including crisis response efforts, assistance, and ongoing assistance, including during any investigation or prosecution to victims of terrorist acts or mass violence occurring within and outside the United States. Nonmonetary assistance is available for training and technical assistance. ITVERP provides direct reimbursement for out-of-pocket expenses to victims of international terrorism. Claimants may seek reimbursement for expenses incurred for medical, mental health, funeral and burial, property loss, and other miscellaneous costs (including emergency travel, temporary lodging, and telephone costs).

Applicant Eligibility:

AEAP: Criteria will vary depending on the grant. For terrorism or mass violence occurring within or outside the U.S., eligible applicants for funding

under VOCA, Title II, 42 U.S.C. 10603b, 1404B, include states, victim service organizations, and public agencies (including federal, State and local governments) and non-governmental organizations that provide assistance to victims of crime. With the exception of ITVERP, OVC does not provide funding directly to individual crime victims. ITVERP: For an applicant to be eligible to receive reimbursement under ITVERP as authorized under VOCA, Title II, 42 U.S.C. 10603c, 1404C, an individual must be a national of the United States or an officer or employee of the U.S. Government, as of the date on which the act of terrorism occurred. In addition, the individual must have suffered direct physical or emotional injury or death as a result of an act of international terrorism occurring on or after October 23, 1983, with respect to which an investigation or prosecution was ongoing after April 24, 1996.

Beneficiary Eligibility:

AEAP: Public and private nonprofit victim assistance agencies; victims of domestic and international terrorism. Eligibility depends on the nature of the grant. ITVERP: The law requires that the individual victim must have suffered direct physical or emotional injury or death as a result of an act of international terrorism occurring on or after October 23, 1983, with respect to which an investigation or prosecution was ongoing or was commenced after April 24, 1996. In the case of a victim who is a minor, incompetent, incapacitated, or is killed, a family member or legally designated representative of the victim may receive expense reimbursement on behalf of the victim. In addition to the victim, claimants may include the following: Spouse of the victim, Parents of the victim, Children of the victim, Siblings of the victim, Legally designated victim representative.

Credentials/Documentation:

All potential applicants shall submit a written proposal along with a budget and budget narrative to the OVC Director for consideration. Proposals submitted by State crime victim compensation program administrators should include the following: (1) a description of the qualifying crime; (2) the projected number of claims to be paid and the projected number of claimants to receive payments; (3) the state's maximum award amount by category, such as medical, mental health, lost wages, funeral, etc.; and (4) a description of the range of expenses covered by the program and the amount of state funding available to cover victim claims. Proposals submitted by State crime victim assistance administrators, and all other applicants seeking crime victim assistance, should include the following: (1) type of crime and description of the criminal event; (2) identification of the lead law enforcement agency conducting the investigation; (3) estimated number of victims affected by the crime; (4) description of the applicant's role in responding to the victim population since the date of the incident; (5) description of services that this funding will support and how these efforts will complement services already in place or will respond to an unmet need; (6) the amount of funding requested and the time frame for support; and (7) description of outreach and coordination with other public and private entities during the process of preparing the request for assistance. Once approved for applying, an AEAP solicitation, with detailed instructions on applying as well as reporting requirements, will be posted on the OJP electronic Grants Management System (GMS). Applicants, except Federal agencies, must submit through GMS (1) SF-424, Application for Federal Funding and applicable assurances and forms; and (2) Budget and budget narrative including a description of all other federal and nonfederal contributions (cash or in-kind). Applications for the AEAP must be submitted to the OVC Director as soon as practical following a terrorist or mass violence event by the appropriate State or federal official or private victim service and non-governmental organizations. ITVERP: All potential applicants shall submit a written application along with all supporting documentation to OVC for consideration. Claimants may apply for itemized, interim emergency, or supplemental reimbursement. An Itemized application should be used by those eligible claimants who are making a first-time request for reimbursement of out-of-pocket expenses that were paid following an international terrorism event. An Interim Emergency application should be used by eligible claimants seeking funds for an immediate need such as medical treatment, short-term lodging, or emergency transportation. A Supplemental application should be used by eligible claimants whose expenses have changed since they submitted an initial application. The supplemental application is for bills that may have been received late, or for new services that were not originally thought necessary or included in the original application. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. AEAP: Whereas the previously submitted proposal letter, budget, and budget narrative were key factors in determining eligibility for funding, they were submitted prior to the posting of a solicitation. Application materials submitted electronically through GMS in response to either the assistance or compensation solicitation become permanent parts of the award file. Thus, it will be necessary to resubmit the proposal letter, budget, and budget narrative documents as part of the application package. Applications will be accepted following an incident of terrorism or mass violence in accordance with the timetable set forth in the AEAP Guidelines. There are two factors that determine the application submission requirements for the AEAP: (1) the applicant status, i.e., government agency (Federal, State, or local), non-governmental organization, or victim service organization; and (2) the type of support requested, i.e., crisis response, consequence management, criminal justice, victim compensation, technical assistance (nonmonetary assistance). Application requirements are listed below. Application requirements for State crime victim compensation programs - Funding will be made available to State crime victim compensation programs in response to an incident of terrorism or intentional mass criminal violence within the United States in the form of a grant. Requests for funding from State crime victim compensation programs may be made at any time in the aftermath of an incident and should include: (1) Responses to the questions or issues raised in the AEAP Compensation Solicitation; (2) Proposal letter; (3) Budget; (4) Budget narrative; and (5) SF-424, Application for Federal Assistance and applicable assurances and forms.. Application requirements for all other recipients of funds -All other applicants seeking Antiterrorism Emergency Reserve support are required to submit: (1) Responses to the questions or issues raised in the AEAP Assistance Solicitation; (2) Proposal letter; (3) Budget; (4) Budget narrative; and (5) SF-424, Application for Federal Assistance and applicable assurances and forms. While no direct funding is available, OVC may provide its own consultants to meet the training and technical assistance needs of applicants. Training and technical assistance may be requested by submitting a letter describing the nature of the problem; the type of expertise or assistance needed; the duration of assistance; and the projected outcomes of the technical assistance or training. See OVC guidelines published in the Federal Register (Vol. 67, No. 21, Thursday, January 31, 2002) for additional information on application requirements for the AEAP. ITVERP: Step 1: Identify the type of application you are applying for by marking the appropriate type at the top of the application form. In addition, a supplemental sheet must be filled out by applicants. Sections B, F and H should be answered by all applicants; section G should be answered by Itemized and Supplemental applicants only. Detailed instructions are included. Step 2: If you believe that you are an eligible victim of a "designated" international terrorism event, please use the following forms and information to prepare your application for reimbursement. Required Documentation: A victim is required to submit documentation that provides proof of identity, citizenship, employment, and damage/injury sustained during the international terrorism event. A victim's family member or representative is required to submit documentation of his/her relationship to the victim plus medical information or a death certificate as appropriate, in addition to the items named above. In all cases, receipts for expenses incurred in the recovery process will be required. If any of the required documents have been destroyed and are unavailable from any other source, you must provide and certify a list of destroyed documents and how each would apply to your ITVERP application.

Award Procedure:

AEAP: Upon receipt and internal review of a complete application, it is the intention of OVC to notify applicants of funding decision within 5 business days or as soon as practicable. The applicant may be notified by telephone, Internet or facsimile. ITVERP: After review of each application, the Director shall determine the eligibility of the victim or representative and the amount, if any, eligible for reimbursement, specifying the reasons for such determination and the findings of fact and conclusions of law supporting it. A copy of the determination shall be mailed to the claimant at his last known address.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

AEAP: It is OVC's intention to make a funding decision within 5 business days of receipt of a complete application or as soon as practicable. ITVERP: It is OVC's intention to review and process payments as soon as practicable. For itemized and supplemental claims, range of approval/disapproval is dependant upon receipt of an official determination of a reasonable indication of an act of international terrorism from the Assistant Attorney General of National Security for a particular event. Processing time is also dependant upon timely response by claimants of any outstanding documents or information required to process claim applications. Claimants may apply for an interim emergency payment, prior to a determination under Section 94.21(a). If the Director determines that such payment is necessary to avoid or mitigate substantial hardship that may result from delaying reimbursement until complete and final consideration of an application, such payment may be made to cover immediate expenses such as those of medical care, funeral and burial, short-term lodging, and emergency transportation.

Appeals:

For both programs, hearing by the Assistant Attorney General, Office of Justice Programs.

Renewals:

Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. AEAP: All organizations that expend financial assistance of \$500,000 or more in any fiscal year must have a single audit for that year in accordance with OMB Circular No. A-133, as amended, unless the audit condition on the award says otherwise. OBJECTIVES:

To provide communities with critical resources that help them forge partnerships across agencies and disciplines to respond effectively to violent crimes against women. OVW's Technical Assistance Program was created to provide grantees with the expertise and support they need to develop and implement successful local projects, increase victim safety, and bolster offender accountability. Grantees participate in educational initiatives, conferences, peer-to-peer consultations, and targeted assistance that allow them to learn from experts and one another about how to overcome obstacles and incorporate promising practices in their efforts to address violence against women. In addition, the Technical Assistance Program focuses on building the capacity of national criminal justice and victim advocacy organizations to effectively address violent crimes against women and examine issues of special interest to OVW and its constituents.

TYPES OF ASSISTANCE:

USES AND USE RESTRICTIONS:

OVW funds a constellation of technical assistance projects to support the activities of its grantees and to forge partnerships among organizations that have not traditionally worked together to address domestic violence, dating violence, sexual assault, or stalking. Grantees learn from national experts and each other how best to develop and implement locally responsive programs. OVW encourages applicants to the Technical Assistance Program to design educational initiatives that are interactive and experiential and that seek to change values and attitudes that have traditionally prevented victim advocates and criminal justice professionals from responding effectively to sexual assault, domestic violence, dating violence, and stalking. Applicants proposing education programs must detail the adult education methods they will use to promote new insight, knowledge, skills, and abilities in the individuals with whom they propose to work.

Applicant Eligibility:

Eligible applicants are nonprofit national, tribal and statewide organizations and institutions of higher education. In rare circumstances, state/local government agencies or local nonprofits may be eligible.

Beneficiary Eligibility:

Beneficiaries are organizations or individuals partnered with organizations.

Credentials/Documentation:

No Credentials or documentation are required. OMB Circular No. A-87 applies to this program.

16.576 CRIME VICTIM COMPENSATION

FEDERAL AGENCY:

Office for Victims of Crime, Department of Justice

AUTHORIZATION:

42 U.S.C. 10602 (a).

OBJECTIVES:

The Office for Victims of Crime (OVC), Department of Justice, administers the Crime Victim Compensation formula grant program. OVC annually awards a grant to each state, the District of Columbia, the U.S. Virgin Islands, and the Commonwealth of Puerto Rico to support state crime victim compensation programs. These programs help pay for some of the expenses resulting from crimes involving violence or abuse.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Funds under this program shall be used by the States for awards of compensation benefits to crime victims, with the following exception: States may retain up to 5 percent of their total grant for administrative and training purposes. As provided in recent VOCA amendments, formula grant funds to an eligible State crime victim compensation program is based on 60 percent of the amounts States expended during the fiscal year preceding the year of collections for the Crime Victims Fund, other than amounts awarded for property damage. If the sums available in the Fund for grants under this program are insufficient to provide grants of 60 percent as provided above, grants from the sums available will be made to each eligible crime victim compensation program so that all such programs receive the same percentage of the amounts awarded by such programs during the preceding fiscal year, other than amounts awarded for property damage. A crime victim compensation program is an eligible crime victim compensation program if (1) such program is operated by a State and offers compensation to victims and survivors of victims of criminal violence, including drunk driving and domestic violence for: (A) medical expenses attributable to a physical injury resulting from a compensable crime, including expenses for mental health counseling and care; (B) loss of wages attributable to a physical injury resulting from a compensable crime; and (C) funeral expenses attributable to a death resulting from a compensable crime; (2) such program promotes victim cooperation with the reasonable requests of law enforcement authorities; (3) such State, possession or territory certifies that grants received under this program will not be used to supplant funds otherwise available to provide crime victim compensation; (4) such program, as to compensable crimes occurring within the State, possession or territory, makes compensation awards to victims who are nonresidents of the State, possession or territory on the basis of the same criteria used to make awards to victims who are residents of the State, possession or territory; (5) such program provides compensation to victims of Federal crimes occurring within the State on the same basis that such program provides compensation to victims of State crimes; (6) such program does not, except pursuant to rules issued by the program to prevent unjust enrichment of the offender, deny compensation to any victim because of that victim's familial relationship to the offender, or because of the sharing of a residence by the victim and the offender; (7) such program does not provide compensation to any person who has been convicted of an offense under Federal law with respect to any time period during which the person is delinquent in paying a fine, other monetary penalty, or restitution imposed for the offense; and (8) such program provides such other information and assurances related to the purposes of this section as the Director may reasonably require. Section 1403(c), any amount of crime victim compensation that the applicant receives through a crime victim compensation program under this section shall not be included in the income of the applicant until the total amount of assistance that the applicant receives from all such programs is sufficient to fully compensate the applicant for losses suffered as a result of the crime. As used in this section; (1) the term "property damage" does not include damage to prosthetic devices, eyeglasses or other corrective lenses, or dental devices; (2) the term "medical expenses" includes, to the extent provided under the eligible crime victim compensation program, expenses for eyeglasses and other corrective lenses, for dental services and devices and prosthetic devices, and for services rendered in accordance with a method of healing recognized by the law of the State; (3) the term "compensable crime" means a crime the victims of which are eligible for compensation under the eligible crime victim compensation program, and includes crimes involving driving while intoxicated and domestic violence; and (4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and any other possession or territory of the United States.

Formula and Matching Requirements:

Statutory Formula: Title 28, Part 90, Subpart B.
Matching Requirements: Percent: 25%. Each eligible entity receives a base amount of \$600,000. Remaining funds are divided in an amount that bears the same ratio to the amount of remaining funds as the population of the State bears to the population of all of the States that results from a distribution among the States on the basis of each State's population in relation to the population of all States (not including populations of Indian tribes). The Federal share of these grants may not exceed 75 percent of the total costs of the projects described in the applications. Projects to victim service providers for victim services or for tribes do not count towards the total costs of the projects for purposes of calculating match. States may satisfy this 25 percent match through in-kind services. All funds designated as match are restricted to the same uses as the Office on Violence Against Women funds and must be expended within the grant period. States and subgrantees may apply for a waiver of the match requirement based on an adequate demonstration of financial need. Match may not be required in subgrants to victim service providers or tribes.

Matching Requirements: Percent: 50%. The program requires that each applicant jurisdiction be responsible for providing at least 50 percent of the cost of each vest purchased. Tribal governments may use Federal funds to provide this match; all other jurisdictions must use nonfederal match funds. Nonfederal fund sources include State and/or local jurisdiction revenues, private or personal funds, and contributions from insurance or workman's compensation consortiums. Asset forfeiture funds may also be used to meet the jurisdiction's matching requirement. Beginning in FY 2002, changes (Bulletproof Vest Partnership Act of 2000; Public Law 106-517) gives preference to small jurisdictions (those populations below 100,000) guaranteeing them the full 50 percent match payment before payments are calculated and approved for larger jurisdictions.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Jurisdictions with approved applications must request the federal match no later than August 31st of the second federal fiscal year following the end of the federal fiscal year in which their application was approved. In other words, the jurisdiction has two years beyond the year of their application to request payments for vests contained in that application. Payments of the federal match will be made whenever the jurisdiction indicates that at least part of the approved vest order was received and invoiced. See the following for information on how assistance is awarded/released: See program office for more information.

Reports:

No reports are required.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. Payments and transactions are subject to audits by the General Accounting Office, Department of Justice's Office of the Inspector General, state or local government auditors, and auditors from independent public accounting firms. Jurisdictions must follow their local procurement policies and procedures, including maintenance of reliable and accurate accounting systems, record keeping, and systems of internal control.

Recipients of federal funds are expected to retain documentation supporting all program transactions for at least three years after the closure of audit reports related to such funding. If any litigation, claim, negotiation, audit, or other action involving records has been started before the expiration of the three-year period, the records must be retained until completion of the action and resolution of all related issues, or until the end of the regular three-year period, whichever is later.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2013: In FY 2013 more than 94,710 vests were purchased and distributed to officers at an average cost, to the BVP program, of only \$288 per vest.

Based on data collected and recorded by BJA staff, in FY 2013, vests were directly attributable to saving the lives of at least 17 law enforcement and corrections officers, in various states and the District of Columbia. BVP funds had been used toward the purchase of a portion of the life-saving vests, worn by the officers, in the incidents described below.

 On August 16, 2013, a deputy with the Butler County (KS) Sheriffs Office received a new bullet-resistant vest, bought in part with BVP funds.

Less than three weeks later, while conducting a motor vehicle equipment stop, this deputy was shot, in the chest at point-blank range, by a subject with an extensive criminal record and outstanding felony warrant. Without his protective vest, this would have been a deadly encounter for this officer.

 On December 21, 2012, a Pennsylvania State Trooper was shot in the chest while trying to apprehend a person wanted in the killing of three persons.

The vest he was wearing is credited with saving his life. His agency implemented a mandatory wear policy, following the BVP programs mandate in 2011. Fiscal Year 2014: No Current Data Available Fiscal Year 2015: No Current Data Available

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Prison Rape Elimination Act of 2003, Public Law 108-79.

OBJECTIVES:

Safeguarding Communities focuses on training and technical assistance to states on moderating the growth of prison populations without compromising public safety; developing and utilizing analyses of prison populations and risk assessment instruments to educate State and local governments' understanding of risks to the community of inmate reentry; preparing and updating maps that provide on a community-by-community basis a roster of returning offenders; promoting collaborative efforts with State and local governments to understand and address the risks involved when a large number of inmates reenter a community; and developing policies and programs that reduce spending on prisons by effectively reducing rates of parole and probation revocation without compromising public safety.

Applicant Eligibility:

Eligible applicants are States which are interested in: (1) protecting inmates by undertaking efforts to more effectively prevent, investigate, and prosecute prison rape incidents and providing the appropriate victim services and treatment, and (2) safeguarding communities through various mediums such as intergovernmental collaboration, assessment, training, and technical assistance. Applicants in varying stages of developing a prison rape initiative are eligible and encouraged to apply. Applicants must coordinate their proposal with other stakeholders in their State to ensure a collaborative response to this solicitation and ensure that agencies within a single jurisdiction are not competing against one another in the grant process. Formula and Matching Requirements:

1. Computing an initial JAG allocation for each state and territory, based on their share of violent crime and population (weighted equally).
2. Reviewing the initial JAG allocation amount to determine if the state or territory allocation is less than the minimum (de minimus) award amount defined in the JAG legislation (0.25 percent of the total). If this is the case, the state or territory is funded at the minimum level, and the funds required for this are deducted from the overall pool of JAG funds. Each of the remaining states receives the minimum award plus an additional amount based on their share of violent crime and population.
3. Dividing each states final award amount (except for the territories and District of Columbia) between state and local governments at a rate of 60 and 40 percent, respectively.
4. Determining local unit of government award allocations, which are based on their proportion of the states three-year violent crime average. If a local eligible award amount is less than \$10,000, the funds are returned to the state to be awarded to these local units of government through the state agency. If the

eligible award amount is \$10,000 or more, then the local government is eligible to apply for a JAG award directly from BJA.

Matching requirements are not applicable to this program.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Awards of at least \$25,000 or more begin October 1 of the FY and are four years in length. Awards that are less than \$25,000 begin October 1 of the FY and are two years in length. 16.740 STATEWIDE AUTOMATED VICTIM INFORMATION NOTIFICATION (SAVIN) PROGRAM

(SAVIN)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Pub. L. 110-5, emb. secs. 101-104; Pub. L. No. 109-108, 119 Stat. 2290, 2299; 28 U.S.C. 530C(a)(1).

OBJECTIVES:

The SAVIN Program, administered by the Bureau of Justice Assistance (BJA), helps protect victims and survivors of crime from further victimization and ensures their rights are secured by providing registered individuals with timely and accurate information about any important dates and developments relating to the criminal proceedings at issue in their case (e.g., trial dates, times, or changes; probation hearings; inmate relocation; and offender release). This program allows victims and survivors to discretely receive information that can help them make informed decisions about their level of participation in the legal process. Effective SAVIN programs require broad multiagency support, increased victim safety, compliance with legislative requirements, and minimization of costs associated with keeping registered participants informed throughout the criminal justice process. SAVIN programs provide a single point of shared services for victims located anywhere in a state to learn about the status of their offenders case.

Key SAVIN components include:

Governance: An authorized statewide agency to oversee the planning and implementation of the SAVIN program. The administering agency should establish a governance process that includes representatives of criminal justice and law enforcement agencies, technology staff, and victim advocates, including direct participation of a cross-section of victims of crime to guide the development and delivery of SAVIN services. The governance committee or board should meet (in person or via conference call) on a regular basis to discuss help inform the progress of the grant goals and objectives and the overall SAVIN program.

Technology: The use of technology solutions designed to collect, manage, and share critical information to and from victims that provide these services in a timely, confidential, and cost-effective manner.

Program Management: An organizational structure that will execute the program as directed by the established governance process and will enable the state to establish or expand existing notification capabilities based upon measures of the effectiveness of the program by collecting data on victims and survivors served and cost effectiveness. For example, conducting surveys with victims and survivors to ensure that the system is meeting their needs.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Technology improvement programs. SAVIN grantees are required to use the National Information Exchange Model (NIEM) (www.niem.gov), follow associated SAVIN implementation guidelines, and adopt the guidelines as part of their SAVIN program planning. Funds may not be used to supplant State and local funds.

Applicant Eligibility:

Applicants are limited to state-approved agencies that are authorized to manage the SAVIN program. State-approved agencies must be authorized either through state legislation or identified through the Governors office to manage the planning and implementation of a SAVIN program. Federally recognized Indian tribes (as determined by the Secretary of the Interior) are also eligible to receive grant funding for the planning and implementation of an automated victim notification program.

In order to apply for SAVIN program funding, eligible applicant agencies must include the state legislation designating authority to manage the SAVIN program for their state. If there is no authorizing state legislation, a letter from the Governor must be attached as part of the application. The letter must designate the applicant as the approved SAVIN program manager on behalf of the state.

Beneficiary Eligibility:

States, Territories and Tribal governments.

Credentials/Documentation:

Each applicant must submit a completed application that meets the requirements specified in the program guidance. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

The standard application forms (SF-424) as furnished by the Federal agency in accordance with 28 CFR, Part 66 must be used with this program. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Specific application instructions for solicitations are available at the Office of Justice Programs web site (<http://www.ojp.gov/funding/solicitations.htm>).

Award Procedure:

Upon approval by the Assistant Attorney General, successful applicants are notified via the Grants Management System. One copy of the grant award must be signed by the authorized official and returned to the Office of Justice Programs.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

The Bureau of Justice Assistance shall not finally disapprove any application (or amendment to that application) without affording the applicant reasonable notice of any deficiencies and providing an opportunity to correction and reconsideration.

Appeals:

Hearing and appeal procedures will follow 28 CFR Part 18, Code of Federal Regulations.

Renewals:

Renewals are subject to annual appropriations.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.

Matching Requirements: It is not anticipated that a match will be required (depending upon final appropriation authority) but is recommended to promote program sustainability and partnerships across the state. If you include a match in your proposed budget, clearly denote which budget lines items are matching funds. If a successful application proposes the optional match amount, the match amount incorporated into the OJP-approved budget becomes mandatory and subject to audit and must be reported quarterly in the SF-425 (financial status reports).

16.741 DNA BACKLOG REDUCTION PROGRAM

FEDERAL AGENCY:

National Institute of Justice, Department of Justice

AUTHORIZATION:

Department of Justice Appropriations Act, 2012; 42 USC 14136a; 42 USC 14136e(b); 42 USC 14135(j).

OBJECTIVES:

To assist eligible States and units of local government to process, record, screen, and analyze forensic DNA and/or DNA database samples, and to increase the capacity of public forensic DNA and DNA database laboratories to process more DNA samples, thereby helping to reduce the number of forensic DNA and DNA database samples awaiting analysis.

TYPES OF ASSISTANCE:

FORMULA GRANTS; Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Expenditures from Forensic DNA Backlog Reduction Program awards may include the following:

(1) Salary and benefits of additional laboratory employees: Funds may be used to hire additional full-time or part-time laboratory employees to directly process, record, screen, and/or analyze forensic DNA and/or DNA database samples. Funds may also be used to hire additional full-time or part-time laboratory employees to directly perform capacity enhancement-specific activities, such as validating new DNA analysis technologies for the forensic DNA laboratory and/or the laboratory responsible for analysis of DNA database samples.

Funds are subject to applicable restrictions on supplanting and may be used to retain full-time or part-time laboratory employees for the above purposes if there are no other funding sources allocated for the retention of such personnel (e.g., personnel acquired through previous Federal assistance). Matching funds are not required.

Note: NIJ makes no assurance that funds will be available for this purpose in future award announcements.

(2) Overtime for existing laboratory staff: Funds may be used to pay overtime for existing laboratory employees to directly process, record, screen, and/or analyze forensic DNA and/or DNA database samples. Funds may also be used

to pay overtime for existing laboratory employees to directly perform capacity enhancement-specific activities such as validating new DNA analysis technologies for the forensic DNA or DNA database laboratory. Any payments for overtime must be in accordance with the applicable provisions of the OJP Financial Guide, available at www.ojp.usdoj.gov/financialguide/.

(3) Training: Funds may be used for appropriate training of forensic DNA and DNA database laboratory personnel. Existing members of the DNA Unit: Appropriate training includes internal or external training, continuing education/training opportunities, and/or applicable graduate-level coursework that is directly related to the applicant's forensic DNA or DNA database laboratory operation and is for members of the DNA laboratory.

Funds used towards travel and registration expenses for appropriate continuing education/training opportunities that are associated with professional meetings and conferences (including workshops provided at such meetings and conferences) are limited to no more than 5 percent of the total award. Funds used towards travel expenses, registration fees, and tuition and required learning aids (e.g., textbooks) for appropriate training and continuing education opportunities that are not associated with professional meetings and conferences are not subject to the 5-percent cap.

In general, funds used for training are intended to aid existing members of the DNA laboratory to meet continuing education requirements mandated in the DNA Quality Assurance Standards established by the Director of the Federal Bureau of Investigation. New members of the DNA Unit: States and units of local government that wish to use funds to train new employees to process, record, screen, and/or analyze forensic DNA and/or DNA database samples should submit a detailed plan in their proposal. There is no fixed-percentage cap on use of funds for this purpose.

(4) Travel (Limited): Funds may be used for travel to conduct required site visits to public or private accredited laboratories that will be conducting DNA analyses on behalf of the applicant agency to review procedures and practices prior to initial sample shipment; funds may also be used to make one additional unannounced site visit. Funds may be used for travel associated with DNA training, described in 3, above. Travel expenses must be reasonable and must comply with the applicable provisions of the OJP Financial Guide.

Note that, absent prior express written approval from NIJ, rates for lodging charged to any award under this solicitation may not exceed the posted GSA rate for the location. If an award recipient opts to book lodging at a higher rate, the cost differential, including associated taxes, may not be charged to the award.

(5) Equipment: Funds may be used to upgrade, replace, or purchase laboratory equipment, instrumentation, and computer hardware for the forensic DNA and/or the DNA database laboratory.

(6) Laboratory supplies for validation: Allowable supply expenses include the purchase of laboratory supplies that can be directly attributed to the validation of new DNA analysis technologies.

(7) Supplies for DNA database sample collection: Convicted offender and/or arrestee related sample collection kits may be purchased.

(8) Laboratory supplies for in-house processing, recording, screening, and analysis of forensic DNA casework and/or DNA database samples.

(9) Renovation: Funds may be used to renovate existing space within the crime laboratory, if it can be demonstrated that the renovation will directly and specifically improve the efficiency of the analysis of forensic DNA samples and/or DNA database samples. Expenses that may be allowable include the purchase or upgrade of benches, cabinets, interior dividing walls, plumbing, HVAC systems, electrical wiring, evidence examination and preparation rooms, evidence storage rooms, drying rooms, walk-in freezers, and extraction or amplification rooms.

If renovations are requested, they must be justified in the application and

renovations must be completed within the initial award period of 18 months. Grant recipients should not anticipate that NIJ will approve no-cost extensions in order to complete renovation projects. Renovations may not be requested as part of a Grant Adjustment Notice once the award has been made.

(10) Contracts for analysis of forensic DNA casework samples or DNA database samples by public or private accredited DNA laboratories: Funds may be used to send forensic DNA and/or DNA database samples to fee-for-service laboratories to conduct DNA analyses. Funds may also be used to enter into agreements with government-owned laboratories to conduct forensic DNA and/or DNA database sample analyses, perform data review, enter eligible DNA profiles into CODIS and, where applicable, upload to NDIS.

Every laboratory that is contracted to conduct forensic DNA or DNA database sample analyses under this program must undergo an external audit, not less than once every 2 years, in order to demonstrate compliance with the requirements of the Quality Assurance Standards for Forensic DNA Testing Laboratories and/or the Quality Assurance Standards for DNA Database Laboratories established by the Director of the Federal Bureau of Investigation, and must be accredited by a nonprofit professional organization actively involved in forensic science that is nationally recognized within the forensic science community.

Note: All contracts and procurements made under this program are subject to the standards set forth in 28 C.F.R. section 66.36 and other applicable Federal law, including the provisions of 28 C.F.R. section 66.36 that relate to competition. Prior approval from OJP is required for all sole-source procurements in excess of \$100,000. Approval may be obtained in the form of a sole-source request with adequate justification submitted directly to GMS with the application for funding.

(11) Contracts for DNA audits (after September 30, 2012): DNA laboratories may establish contracts with vendors (individuals or entities) that can provide an external DNA audit once every 2 years, as required by the Quality Assurance Standards for Forensic DNA Testing and DNA Database Laboratories established by the Director of the Federal Bureau of Investigation. DNA Backlog Reduction Program funds may not be used to defray the cost of an external DNA audit that is part of an accreditation inspection/assessment, or of an internal DNA audit.

An award recipient is expected to examine carefully any costs charged by the vendor for a DNA Audit, including auditor fees (not to exceed \$450 per auditor for each day on site) and auditor travel expenses, and to determine whether all such charges are reasonable and justified. All audit-related costs must be detailed in the budget. Note that NIJ will use the rates established by the GSA schedule (www.gsa.gov/portal/category/21287) as a benchmark in examining the reasonableness of audit-related travel expenses.

Auditors must meet the requirements specified in the Quality Assurance Standards for Forensic DNA Testing and/or DNA Database Laboratories and, must reside outside the State where the laboratory to be audited operates. The same auditors cannot be used in consecutive audits, and all auditors must sign a conflict of interest and nondisclosure form prior to performing any work.

(12) Additional contracts and contractor services: Contracts may be established to purchase and install DNA modules to existing Laboratory Information Management Systems (LIMS), or for service, maintenance, or licenses for the DNA unit users for an existing LIMS system.

Contracts may be established for Lean Six Sigma-type studies or process mapping. One example of the potential benefits from such approaches is highlighted in the following report: www.ncjrs.gov/pdffiles1/nij/grants/235190.pdf.

Contracts may be established to hire contract staff to process, record, screen, and analyze forensic DNA casework; to process, record, and analyze DNA database samples; or to validate new DNA analysis technologies. Contracts may be established for data review in accordance with the Quality Assurance Standards for Forensic DNA Testing and DNA Database Laboratories.

Contracts may also be established for in-house training, or for validation testing.

(13) Direct administrative expenses or indirect costs: Up to 3 percent of the Federal portion of an award under this program may be used for either: (1) direct administrative expenses specifically related to grant administration and management, or (2) indirect costs. Applicants may not request both direct administrative expenses and indirect costs.

Applicant Eligibility:

Eligible applicants are State and units of local government with existing crime laboratories conducting DNA analysis that are either: (1) accredited by a nonprofit professional organization actively involved in forensic science that is nationally recognized within the forensic science community, (2) Undergo external audits, not less than once every 2 years, that demonstrate compliance with DNA Quality Assurance Standards established by the Director of the Federal Bureau of Investigation, (3) Participate in the National DNA Index System (NDIS) or have an agreement with an NDIS participating laboratory to upload their data.

16.746 CAPITAL CASE LITIGATION INITIATIVE (CCLI)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

42 U.S.C. Section 14163; 42 U.S.C. Section 14163a.

OBJECTIVES:

Capital Case Litigation Initiative (CCLI) - In an effort to improve the quality of legal representation and to ensure reliable jury verdicts in state capital cases, the CCLI seeks to improve the quality and effectiveness of representation in death penalty cases through training for both the prosecutors who represent the public and the defense attorneys who represent indigent defendants in state capital cases. Wrongful Conviction Review Program - The objective of the Wrongful Conviction Review Program is to provide high quality and efficient representation for defendants in post-conviction claims of innocence.

Post-conviction innocence claims are likely to include complex challenges to the reliability or accuracy of evidence presented at trial that fall mainly into three categories: 1) eyewitness identification evidence; 2) confession evidence; and 3) forensic evidence. In some cases, post-conviction DNA testing alone can establish innocence, but the majority of cases will rely on other forms of evidence, and many will involve DNA testing together with additional sources of proof and/or expert testimony, which may be extremely costly.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Capital Case Litigation Initiative (CCLI): Funds are given to States that currently enforce their death penalty statutes or to a national organization capable of providing training and technical assistance. CCLI funds may not be used to fund, either directly or indirectly, representation in, or prosecution of, specific capital cases. Wrongful Conviction Review Program: Funds are awarded to institutions of higher education, non-profit organizations with missions dedicated (in whole or in part) to exonerating the innocent, to state or local public defender offices, to public and nonprofit organizations that have experience and expertise in providing representation to wrongfully convicted defendants in post-conviction claims of innocence cases, as well as providing training and technical assistance on the subject. Funds may not be used to supplant State and local funds.

Applicant Eligibility:

Capital Case Litigation Initiative: Applicants are limited to state agencies in states that authorize capital punishment and that conduct, or will conduct prosecutions in which capital punishment is sought. For the state agency to be eligible, its state must have an effective system for providing competent legal representation for indigent defendants in capital cases. An effective system is defined in 42 U.S.C. 14163(e) as a system that invests the responsibility for appointing qualified attorneys to represent indigent defendants in capital cases either: (A) In a public defender program that relies on staff attorneys, members of the private bar, or both, to provide representation in capital cases; (B) In an entity established by statute or by the highest state court with jurisdiction in criminal cases, which is composed of individuals with demonstrated knowledge and expertise in capital cases, except for individuals employed as prosecutors; or (C) Pursuant to a statutory procedure enacted before the date of the enactment of the CCLI Act [October 30, 2002] under which the trial judge is required to appoint qualified attorneys from a roster maintained by a state or regional selection committee or similar entity. Wrongful Conviction Review Program - Eligible applicants are limited to institutions of higher education, non-profit organizations with missions dedicated (in whole or in part) to exonerating the innocent, to state or local public defender offices, as well as to public and nonprofit organizations that have experience and expertise in providing representation to wrongfully convicted defendants in post-conviction claims of innocence cases.

Beneficiary Eligibility:

Capital Case Litigation Initiative: Defense counsel, prosecutors and judges in the States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, America Samoa, Guam, and the Northern Mariana Islands that currently enforce their death penalty statutes.
