Water and Wastewater Systems Sector

9. *October 20, WWMT 3 Kalamazoo* – (Michigan) **Boil water advisory announced in White Pigeon.** White Pigeon, Michigan officials issued a boil water advisory October 20 for the town after community leaders discovered coliform bacteria in the water supply. Officials stated customers will be alerted when the advisory is lifted.
Source: <http://wwmt.com/news/local/boil-water-advisory-announced-in-white-pigeon>
10. *October 20, Burleson Star* – (Texas) **Line blockage caused 50,000 gallon wastewater spill.** Officials in Burleson, Texas, reported that blockage of a 12-inch wastewater collection line reportedly caused approximately 50,000 gallons of wastewater to spill in the North Creek area October 19. Officials stated the public water supply was not affected by the spill.
Source: <http://www.burlesonstar.net/news-local-news/line-blockage-caused-50000-gallon-wastewater-spill>
11. *October 20, Hagerstown Herald-Mail* – (West Virginia) **New wastewater treatment plant dedicated in Martinsburg.** Martinsburg, West Virginia officials announced October 20 the completion of a \$53.5 million renovation project to the city's wastewater treatment plant, which was mandated in response to Federal requirements to decrease the plant's emissions of phosphorous and nitrogen into the Chesapeake Bay watershed. In addition to reducing pollution, the upgrades increased the combined sewer system plant's treatment capacity to 12 million gallons per day flow during storms.

Information Technology Sector

15. *October 21, SecurityWeek* – (International) **Weebly breach affects over 43 million users.** Weebly, a San Francisco-based Web hosting service, confirmed that hackers stole the account information of over 43 million users, including usernames, Internet Protocol (IP) addresses, and password hashes after breaching the company's systems in February 2016. The company advised its user to reset their passwords and the cause of the breach remains under investigation. Source: <http://www.securityweek.com/weebly-breach-affects-over-43-million-users>
16. *October 20, Softpedia* – (International) **Linux kernel zero-day CVE-2016-5195 patched after being deployed in live attacks.** The Linux kernel team patched a zero-day security flaw named Dirty COW, as it is caused by a race condition in the way Linux kernel's memory handles copy-on-write (COW) breakage of read-only memory mappings, which could allow an attacker to escalate their privileges, potentially to root level, on a targeted system. A security researcher notified Red Hat of attackers deploying an exploit that leverages this vulnerability in the wild. Source: <http://news.softpedia.com/news/linux-kernel-zero-day-cve-2016-5195-patched-after-being-deployed-in-live-attacks-509494.shtml>
17. *October 20, Help Net Security* – (International) **Cisco plugs critical bug in ASA security devices.** Cisco patched a critical vulnerability affecting the Identity Firewall feature of its Cisco Adaptive Security Appliance (ASA) Software, which could allow a remote attacker to take control of the system, cause a reload, and execute arbitrary code

by sending a specially crafted NetBIOS packet in response to a NetBIOS probe sent by the software. Cisco reported the vulnerability is caused by a buffer overflow in the affected area code.
