

# Grant Expenditures on the Needs of Children in Disasters

*October 22, 2015*

Fiscal Year 2015 Report to Congress

Homeland  
Security

*Federal Emergency Management Agency*

# Message from the Administrator

October 22, 2015

I am pleased to submit the following report, “Grant Expenditures on the Needs of Children in Disasters,” as prepared by the Federal Emergency Management Agency.

The report was compiled in response to Senate Report 113-198 accompanying the *Department of Homeland Security Appropriations Act, 2015* (P.L. 114-4), enacted on March 4, 2015. The Senate Report requested an updated report on expenditures in all grant programs related to ensuring that the needs of children are met in disasters.

Pursuant to congressional requirements, this report is being provided to the following Members of Congress:

The Honorable John R. Carter  
Chairman, House Appropriations Subcommittee on Homeland Security

The Honorable Lucille Roybal-Allard  
Ranking Member, House Appropriations Subcommittee on Homeland Security

The Honorable John Hoeven  
Chairman, Senate Appropriations Subcommittee on Homeland Security

The Honorable Jeanne Shaheen  
Ranking Member, Senate Appropriations Subcommittee on Homeland Security

Inquiries relating to this report may be directed to me at (202) 646-3900 or to the Department’s Deputy Under Secretary for Management and Chief Financial Officer, Chip Fulghum, at (202) 447-5751.

Sincerely,

A handwritten signature in blue ink, appearing to read "W. Craig Fugate". The signature is fluid and cursive, extending to the right with a long horizontal stroke.

W. Craig Fugate  
Administrator  
Federal Emergency Management Agency

# I. Legislative Requirement

This document was compiled pursuant to Senate Report 113-198 accompanying the *Department of Homeland Security Appropriations Act, 2015* (P. L. 114-4), enacted on March 4, 2015, which directed FEMA to report on expenditures in all grant programs that specifically address the needs of children in disasters, and benchmarks for meeting those needs.

## CHILDREN AND DISASTERS

The National Commission on Children and Disasters highlighted the unique disaster-related needs of America's 73 million children. The Committee notes the progress that focusing on these unique needs has caused in recent disaster response and recovery. The Committee directs FEMA to sustain its ongoing efforts to address children's disaster-related needs both in headquarters and regional offices. Further, FEMA is directed to provide an updated report, not later than 120 days after the date of enactment of this act, on grant expenditures related to ensuring the needs of children are met, including all sources of FEMA grants, such as preparedness and mitigation.

This Fiscal Year 2015 report on "Grant Expenditures on the Needs of Children in Disasters," is submitted to the Senate and House Committees on Appropriations in fulfillment of this requirement, and to provide continuity in reporting for FEMA preparedness grant expenditures.

## II. Background

Children under the age of 18 comprise nearly 25 percent of the United States population and have important and often complex planning and emergency response needs.

The National Commission on Children and Disasters (“the Commission”) was established pursuant to the *Kids in Disasters Well-being, Safety, and Health Act of 2007* as provided in Division G, Title VI of the *FY 2008 Consolidated Appropriations Act* (P.L. 110-161). Under the Act’s provisions, the Commission was instructed to conduct a comprehensive study to examine and assess independently the needs of children (0-18 years of age) in relation to the preparation for, response to, and recovery from all hazards, including major disasters and emergencies, by building upon the evaluations of other entities and avoiding unnecessary duplication by reviewing the findings, conclusions, and recommendations of these entities. In its 2010 Report to the President and Congress, the Commission reported specific findings, conclusions, and recommendations related to:

- Child physical health, mental health, and trauma
- Child care in all settings
- Child welfare
- Elementary and secondary education
- Sheltering, temporary housing, and affordable housing
- Transportation
- Juvenile justice
- Evacuation

The Commission also provided specific recommendations on the need for planning and establishing a national resource center on children and disasters, and reported on the coordination of resources and services, administrative actions, policies, regulations, and legislative changes as the Commission considered appropriate.

Beginning in FY 2010, and in each subsequent fiscal year, the FEMA Grant Programs Directorate, in coordination with the FEMA National Preparedness Directorate, incorporated children-specific language into the Notices of Funding Opportunity (NOFO) for several grant programs. For relevant FEMA preparedness grant programs, FEMA encourages recipients to address some of the planning and preparedness recommendations made by the Commission concerning the needs of children during disasters. The relevant preparedness grant programs include:

- Homeland Security Grant Program
  - State Homeland Security Program
  - Urban Area Security Initiative

- Emergency Management Performance Grants
- Nonprofit Security Grant Program
- Tribal Homeland Security Grant Program
- Intercity Passenger Rail

The NOFOs articulate the importance of addressing the needs of children affected by disasters and promote inclusion of these issues in preparedness and response planning across the Nation. The NOFOs do not prescribe a set amount or percentage of grant funds that must be expended on the needs of children in disasters. Grant recipients are given significant flexibility in how they expend grant funds so that they can address the particular capability gaps identified in their specific jurisdictions.

### III. Notices of Funding Opportunities Language Addressing the Needs of Children in Disasters

The FY 2015 Homeland Security Grant Program (HSGP) Notice of Funding Opportunity (NOFO) re-emphasizes the importance of creating or utilizing existing governing bodies to act on this guidance and coordinate grant resources. Examples include state Senior Advisory Committees, Urban Area Working Groups, statewide Interoperability Governing Boards, county emergency management and fire departments, Area Maritime Security Committees, Citizen Corps Councils or their equivalent, and Children's Working Groups. To ensure ongoing coordination efforts, State Administrative Agencies are encouraged to share community preparedness information submitted in the state's Biannual Strategy Implementation Report with the State Citizen Corps Program Manager or equivalent.

As part of the application process for State Homeland Security Program (SHSP) and Urban Area Security Initiative (UASI) funds, applicants must develop a formal investment justification (IJ) that addresses each investment proposed for funding. The IJ must demonstrate how projects address gaps and deficiencies in delivering one or more core capabilities outlined in the National Preparedness Goal and also must describe engagement with and/or impacts on the general population, to include children and individuals with disabilities, and those with access and functional needs. The IJ must demonstrate the ability to provide enhancements consistent with the purpose of the program and guidance provided by FEMA.

The FY 2015 HSGP NOFO identifies requirements for grant recipients regarding the needs of children in disasters:

- *Each IJ must demonstrate how proposed investments engage and/or impact the whole community, including children, older adults, pregnant women, individuals with limited English proficiency, individuals with disabilities, and others with access and functional needs.*
- *Funds used to support whole community and individual preparedness related efforts, such as engaging non-governmental organizations demonstrating the integration of children and individuals with disabilities or access and functional needs in all phases of emergency management, participation of disaster volunteers, such as Community Emergency Response Teams (CERTs) in training, exercises and response and recovery operations, and educating the public should be coordinated with local CERT programs and/or Citizen Corps Councils.*
- *Recipients must also integrate the needs of children and individuals with disabilities and other with access and functional needs into activities implemented with SHSP and UASI funds.*

- *Mass Casualty Incident Preparedness and Citizen Preparedness recipients must also demonstrate how their investments will increase the effectiveness of emergency preparedness planning and response for the whole community by integrating and coordinating activities including children, older adults, pregnant women, and individuals with disabilities and others with access and functional needs.*
- *Any training or training gaps, including those for children, older adults, pregnant women, and individuals with disabilities and others who also have or access and functional needs, should be identified in the After Action Report/Improvement Plan (AAR/IP) and addressed in the state or Urban Area training cycle.*

The FY 2015 Emergency Management Performance Grants NOFO identifies requirements for grant recipients regarding the needs of children in disasters:

- *Training should provide the opportunity to demonstrate and validate skills learned, as well as to identify any gaps in these skills. Any training or training gaps, including those for children and individuals with disabilities or access and functional needs, should be identified in the AAR/IP and addressed in the training cycle.*
- *Exercises should provide the opportunity to demonstrate and validate skills learned, as well as to identify any gaps in these skills. Any exercise or exercise gaps, including those for children and individuals with disabilities or access and functional needs, should be identified in the AAR/IP and addressed in the exercise cycle.*
- *With regard to exercises, costs associated with inclusive practices and the provision of reasonable accommodations and modifications that facilitate full access for children and adults with disabilities are allowable.*

The FY 2015 Nonprofit Security Grant Program NOFO identifies requirements for grant recipients regarding the needs of children in disasters:

- *Costs associated with inclusive practices and the provision of reasonable accommodations and modifications to provide full access for children and adults with disabilities are allowable.*

The FY 2015 Tribal Homeland Security Grant Program NOFO identifies requirements for grant recipients regarding the needs of children in disasters:

- *Tribes are encouraged to include disciplines responsible for the health, safety, education, and care of infants and children and those responsible for integrating the accessibility and functional needs of children and adults with disabilities.*

The FY 2015 Intercity Passenger Rail NOFO identifies requirements for grant recipients regarding the needs of children in disasters:

- *Training should provide the opportunity to demonstrate and validate skills learned, as well as to identify any gaps in these skills. Any training or training gaps, including those for children and individuals with disabilities or access and functional needs, should be identified in the After Action Report/Improvement Plan (AAR/IP) and addressed in the training cycle.*
- *Any exercise or exercise gaps, including those for children and individuals with disabilities or access and functional needs, should be identified in the AAR/IP and addressed in the exercise cycle.*
- *Costs associated with inclusive practices and the provision of reasonable accommodations and modifications that facilitate full access for children and adults with disabilities are allowable.*

## IV. FEMA Grant Funding Addressing the Needs of Children in Disasters

### PREPAREDNESS GRANTS

To determine Preparedness Grant funding specifically related to the needs of children in disasters, FEMA reviewed the Biannual Strategy Implementation Reports (BSIR). The BSIR is compiled twice each year with data reported by grant recipients directly to FEMA. While the BSIR provides a comprehensive database of all grant expenditures, the data is reliant on grant recipients to report the information accurately and comprehensively to FEMA. Therefore, if the grant recipient does not report preparedness expenditures as directly related to the needs of children, the BSIR may capture it in a different category, even if the grant was used for child-related activities.

A complete list of expenditures for prevention, protection, and other preparedness activities that directly impact children affected by disasters can be found in [Appendix A - Preparedness Grants BSIR Table](#). These data represent a compilation of BSIRs from the period of Fiscal Years (FY) 2004–2014. It should be noted that preparedness grants administered by the FEMA Grant Programs Directorate are awarded at the end of the fiscal year, and therefore FY 2015 funds have not been awarded.

Further review of BSIRs from the period of FY 2004–2014 reveals that 27 states, the District of Columbia, and one tribe have expended more than \$17 million combined in FEMA preparedness grant funding on prevention, protection, and other disaster-related preparedness activities that directly impact children. The predominant activities funded (rounded down to the nearest \$0.5 million) include:

- Physical security enhancements to facilities where large populations of children are present:
  - Children’s Hospitals: \$1.5 million
  - Childcare Centers: \$2.1 million
  - Schools: \$1.5 million
  - Other: \$1.0 million
- Community preparedness activities such as community outreach programs, the Community Emergency Response Teams (CERT) Program, community notification systems incorporating Amber Alerts, and identification card programs for children: \$6.0 million

- Response and medical preparedness including pediatric medical surge capacity in hospitals and accommodation of shelter facilities, and first responder equipment: \$3.5 million
- Citizen Corps training and awareness: \$0.5 million

## **RECOVERY GRANTS**

Several FEMA recovery grant programs have had a direct impact on the recovery of children and families from the effects of disasters. Recovery grant programs include the IHP, Crisis Counseling Assistance and Training Program (CCATP), and Disaster Case Management Program (DCMP). The National Commission on Children and Disasters worked closely with these programs to raise awareness and better meet children's disaster-related needs.

### **Individual and Households Program**

The IHP provides financial assistance and services to individuals and families residing in a declared disaster area whose property has been damaged or destroyed and whose losses are not covered by insurance. This assistance comes in the form of financial assistance for repairing or replacing a home, temporary housing through rental assistance or a government-provided housing unit, and other needs, including costs for medical, dental, funeral needs, and personal property loss. This assistance is designed to help survivors address the needs of their family and children as they recover from a disaster.

The *Sandy Recovery Improvement Act of 2013* (P.L. 113-2) provided FEMA with specific authority to allow childcare assistance under the other needs assistance provision of IHP to assist survivors who apply for assistance (referred to as applicants) with disaster-related childcare expenses. On January 22, 2014, FEMA released Policy RP9461.1, Disaster Assistance for Child Care. This policy applies to all major disasters and emergencies declared on or after January 17, 2014, and provides eligibility criteria and parameters for awarding financial assistance to eligible applicants for disaster-related childcare needs. Eligible childcare expenses include standard childcare service fees (i.e., the cost that is established in a contract between the childcare provider and the applicant) as well as childcare registration fees and health inventory fees for survivors who require a new childcare service provider.

In FY 2014, more than \$143 million of IHP assistance was provided to disaster survivors. Of that total, more than \$60 million were to households with children. This represents 43 percent of all households having received IHP. More detailed information on funding for IHP for FYs 2012–2014 can be found in [Appendix B - Recovery Disaster Snapshots](#).

## **Crisis Counseling Assistance and Training Program**

In FY 2014, CCATP provided close to \$63 million in funding and served up to 80,000 individuals, including 9,000 children. Authorized under the *Robert T. Stafford Disaster Relief and Emergency Assistance Act*, as amended (P.L. 93-288) (*Stafford Act*), the CCATP requires a presidential declaration of disaster for individual assistance. The CCATP is intended for short-term behavioral health support when disaster response needs are beyond capacity.

This program is funded by FEMA and administered through an interagency federal partnership between FEMA and Department of Health and Human Services (HHS)-Substance and Mental Health Services Administration (SAMHSA) and consists of two grant programs, the Immediate Services Program and the Regular Services Program. CCATP uses a combination of mental health professionals and paraprofessionals, who are trained and supervised to deliver an array of resources, including individual outreach and group crisis counseling; basic supportive or educational contact; public education; community networking and support; assessment, referral, and resource linkage; and development and distribution of educational materials and media or public service announcements.

To ensure that the needs of children are not overlooked, FEMA and/or SAMHSA typically suggest to the respective applicants that they include a Child Coordinator(s) and/or Children's Specialist in their CCATP application request. The purpose of this position is to ensure that the emotional/mental health needs of children are addressed comprehensively, and in an efficient and effective manner. The CCATP has funded Children's Specialists to work with schools, childcare facilities, camps, youth groups, etc., in affected communities to hold individual and group counseling sessions with children to discuss reactions to disasters and to help mitigate the effects of the disaster on their behavioral health. The program works with parents and teachers to help talk with, and comfort, children that have survived a disaster.

The SAMHSA also provides tip sheets on talking with children, teachers, and parents about disasters that are shared with program partners upon request at:

<http://www.samhsa.gov/sites/default/files/tips-talking-to-children-after-traumatic-event.pdf>.

## **Disaster Case Management Program**

In the event of a presidentially declared disaster that includes Individual Assistance, the governor of the affected state may request the DCMP. In partnership with the affected state, the DCMP enables a whole community approach through funding support to voluntary, faith-based, and nonprofit organizations.

The DCMP is a Stafford Act funded program promoting:

- Effective delivery of post-disaster case management services
- Partner integration
- Provider capacity building
- State-level program development

The DCMP is designed to identify and assist with unmet needs of those affected by disasters. Through Immediate Disaster Case Management (IDCM) or a State grant, survivors are provided resources for case managers who will develop a recovery plan and identify resources available for the identified unmet needs of families including those with children.

The HHS Administration on Children and Families (ACF) assists with strategic leveraging of resources from federal human services programs, including program flexibilities and waivers; establishes human services liaisons to state, regional, and national emergency operations centers; and advises on the needs of children and at-risk individuals. Figures for children served through this program are not available.

## **MITIGATION GRANTS**

### **Hazard Mitigation Grant Program (HMGP)**

HMGP is authorized by Section 404 of the *Stafford Act* (42 U.S.C. § 5170c). The purpose of HMGP is to ensure that the opportunity to take critical mitigation measures to reduce the risk of loss of life and property from future disasters is not lost during the reconstruction process following a disaster. HMGP is available, when authorized under a presidentially declared major disaster, in the areas of the state requested by the governor. Tribal governments also may submit a request for a major disaster declaration within their affected areas. The amount of HMGP funding available to the applicant is based upon the estimated total of federal assistance, subject to the sliding scale formula outlined in 44 C.F.R. § 206.432(b). HMGP funds a variety of projects, including school safe rooms like those built in Joplin, Missouri, in 2011.

### **Pre-Disaster Mitigation (PDM)**

The PDM program is authorized by Section 203 of the *Stafford Act* (42 U.S.C. § 5133). PDM is designed to assist states, territories, tribal governments, and local communities to implement a sustained pre-disaster natural hazard mitigation program to reduce overall risk to the population and structures from future hazard events, while also reducing reliance on federal funding in future disasters.

### **Flood Mitigation Assistance (FMA)**

The FMA program is authorized by Section 1366 of the *National Flood Insurance Act of 1968*, as amended (42 U.S.C. § 4104c), with the goal of reducing or eliminating claims under the National Flood Insurance Program. The National Flood Insurance Fund provides the funding for FMA. With recent change in legislation, the Repetitive Flood Claims and Severe Repetitive Loss programs have been rolled into FMA.

The PDM and FMA programs are subject to the availability of appropriations funding, as well as any program-specific directive or restriction made with respect to such funds. Funding tables can be viewed in [Appendix C - Mitigation Funding](#). FEMA Hazard Mitigation Assistance currently does not collect specific metrics that would allow it to determine if funded projects have a direct benefit on children. The data in Appendix C is the result of a specialized query of keywords within project titles and descriptions.

## V. Accomplishments

Below are specific activities to prepare for long-term needs of children. The accomplishments listed below are current as of April 2015.

### **SCHOOL PREPAREDNESS**

- In June 2013, DHS/FEMA, the U.S. Department of Education (DoED), the Federal Bureau of Investigation (FBI), and other Federal agencies published updated Guides for Developing High-Quality Emergency Operations Plans for Schools, Institutes of Higher Education, and Houses of Worship.
  - The guides outline the principles of school/campus/house of worship emergency management planning, provide a process for developing and implementing emergency operations plans with community partners at the building and campus levels, and discuss the function and content of these emergency operation plans. The guides also consider key topics that support school emergency planning, including addressing an active shooter incident, school climate, psychological first aid, and information-sharing.
- FEMA is consulting with the DoED's Office of Safe and Healthy Students as it creates and implements school-based training to build comprehensive all-hazards plans. The DoED has implemented 19 trainings in school districts across the country. A hybrid of this training is implemented by Save the Children to serve childcare facilities.
- America's PrepareAthon!<sup>SM</sup> is a nationwide community-based campaign for action to increase emergency preparedness and resilience through hazard-specific drills, group discussions, and exercises. The campaign includes materials tailored to K-12 schools to help them conduct preparedness discussions and conduct drills.

### **YOUTH PREPAREDNESS**

- As a significant segment of the United States population, America's youth and schools must be empowered to become active participants in community preparedness. FEMA supports preparedness in communities through youth engagement because:
  - Children are positive influencers. Educators and social researchers agree that children can bring the message of preparedness home to their families effectively.
  - Children can become leaders. By participating in youth preparedness programs, children are empowered to become leaders at home and in their schools and communities.
  - Children who are prepared are more confident during emergencies and disasters. Social science research and anecdotal evidence support the idea

that children who have learned about emergency preparedness experience less anxiety during an actual emergency or disaster.

- FEMA developed a robust Youth Preparedness Technical Assistance Center, to encourage the creation of youth preparedness programs in various sectors, and strengthen existing youth preparedness programs across the country. Highlights of the efforts are:
  - Built a clearinghouse of resources, tools, research, and relevant announcements on Ready.gov/youth-preparedness under the “Start A Program” tab.
  - Hosted 28 regional and state “Youth Preparedness Implementation” workshops (7,250 attendees).
  - Created a suite of tools for practitioners: Implementation Guide, Fundraising Guide, Risk Management Guide, Activity Workbook, Quick Tips for Liability, and a Supplemental Implementation Checklist.
  - Built an active direct technical assistance (TA) center with live service providers. Between August 2012 and September 2013, 15 requests for technical assistance were received and fulfilled. In FY 2014, the TA Center had 148 interactions with individuals interested in youth preparedness. In FY 2015, the TA Center reported 185 interactions.
  - Provided printed materials available for a myriad of programs – Student Tools for Emergency Planning (STEP), Teen CERT, Coloring Books, Monthly Children & Disasters Newsletters, Spanish-translated materials, and a program catalogue.
  - Pursued research in the arenas of youth behavior campaigns, youth behavior trends, successful program modeling for school-based programs, and the impact of youth preparedness programming on overall national resiliency.
- Currently working with FEMA Corps to refine the school-based program, “Ready, Steady, Strong” which was developed by teams working in New Jersey during Hurricane Sandy. The program brings FEMA Corps members into high schools to present information to students on disaster preparedness. The goal is to have this program available for future disasters.
- FEMA developed the National Youth Preparedness Council (YPC), a competitive member-based youth council, to elevate the voice of children in all phases of disaster. The 15 YPC members represent their generation by providing input into FEMA’s youth initiatives and programs. The council also leads projects to enhance youth preparedness in schools, social media, and communities nationwide.
- FEMA authored, along with the American Red Cross and the DoED, the *National Strategy for Youth Preparedness Education: Empowering, Educating and Building Resilience*. The strategy aligns government and nongovernment partners committed to and institutionalizing youth preparedness into their portfolio of offerings. Along with other partnership development strategies, FEMA has

currently engaged more than 50 key partners to affirm the strategy and to build a comprehensive report on the state of youth preparedness nationwide.

## YOUTH IN RECOVERY

- In partnership with the National Center for Missing and Exploited Children (NCMEC), FEMA launched the Unaccompanied Minors Registry (UMR) <https://umr.missingkids.com/>. The UMR is the first nationwide repository to support the ability to collect, store, report, and act on information related to children separated as a result of a disaster, and to assist in the expeditious reunification of children with their parents or legal guardians.
- FEMA began building a partnership with the NCMEC in 2006 as a result of Hurricanes Katrina and Rita, and in response to the *Post-Katrina Emergency Management Reform Act of 2006* (PKEMRA) (P.L. 109-295). More specifically, PKEMRA mandated that the Administrator, in coordination with the Attorney General of the United States, establish within the NCMEC the National Emergency Child Locator Center (NECLC). The Administrator also was directed to establish procedures to make all relevant information available to the NECLC in a timely manner to facilitate the expeditious identification and reunification of children with their families.
- In April 2011, FEMA and the NCMEC executed a formal agreement allowing FEMA to reimburse, with no cost share, the NCMEC for the deployment of personnel to a presidentially declared disaster to assist law enforcement with the reunification of displaced children.
- FEMA and the NCMEC co-led the development of the “Post-Disaster Reunification of Children: A Nationwide Approach.” This document reflects the first attempt to establish a national framework and whole community approach for reunifying children separated from their parents or legal guardians in the aftermath of a disaster <http://nationalmasscarestrategy.org/reunification/>.
- FEMA established and staffed the Child Coordination Office, leading FEMA’s efforts to address children’s disaster-related needs in response to Hurricane Sandy in partnership with federal, state, local, and nongovernmental organizations.

## VI. Conclusion

FEMA preparedness, recovery, and mitigation grants provide funding to prepare communities to care for the needs of children throughout all phases of disasters. These grant funds increase the ability of state, tribal, territorial, local governments, and nonprofit organizations to protect citizens against threats and hazards while focusing on the needs of children.

Over the years, FEMA grants have funded a wide range of investments to support the needs of children during disasters. Preparedness grants have been used by hospitals to procure child-sized medical equipment for mass-casualty events, equip large childcare facilities to store and maintain emergency shelter equipment and supplies for children, and fund multijurisdictional training and exercises to prepare for large-scale disasters with emphasis on how to respond to the needs of children. Recovery funding through programs like the Individual and Households Program provides critical support to child survivors and addresses their immediate needs resulting from disasters. Mitigation projects aid in the recovery of the whole community by providing funding to build safe rooms, retrofit schools for earthquake stabilization, and install shutters on school windows to protect children during storms, and other hazardous situations. FEMA will continue to ensure that the needs of children in disasters continue to be addressed across the spectrum of preparedness, recovery, and mitigation grant programs.

## VII. Appendix A - Preparedness Grants BSIR

The following table shows Biannual Strategy Implementation Reports (BSIR) for FEMA Preparedness Grants from the period of Fiscal Years (FY) 2004–2014 addressing the planning and preparedness needs of children in disasters.<sup>1</sup> It is important to note that FYs 2008-2014 grant cycles have not been fully closed out and therefore final funding amounts may change.

---

<sup>1</sup> This report is generated for keyword search FY 2004-2014 for all preparedness grant programs. The following keywords were used: 'CHILD', 'INFANT', 'YOUTH'.

REPORTING PERIOD	STATE	AGENCY NAME	PROJECT TITLE	PROJECT DESCRIPTION	Grant Program	TOTAL FUNDING	
2004 Close-Out	Florida	County of Clay	Issue 05: Establish/enhance Citizen Corps Councils (FDEM)	This unique program prepares school administrative personnel for dealing with the vulnerabilities of hurricanes, tornadoes, flooding, transportation incidents and terrorism incidents to be better able to protect, respond and recover school children if an incident occurs during school hours.	CCP	\$8,000.00	
	Florida Total						\$8,000.00
	Georgia	Twiggs County Public Schools Campus Police Department	Establish/enhance citizen emergency preparedness awareness campaign	To equip our teachers and staff to respond, maintain and protect our children at any given moment on our school campuses, field trips, athletic events or any related activity that may affect one or more of our students, teachers, staff or visitors. We will train a team of 30 members annually in the CERT program, ARC First Aid & CPR, Community Health, and Disaster Relief/Mass Care and Shelter, fire extinguisher use and provided GEMA School Safety Programs.	CCP	\$4,816.70	
	Georgia Total						\$4,816.70
	Missouri	Douglas County	Establish/enhance Citizen Corps Councils	Involve citizens in promoting safety, awareness and preparedness by involving youth, amateur radio operators and affiliate organizations	CCP	\$2,462.44	
		Reynolds County Health Center	Establish/enhance Citizen Corps Councils	Increase ability of local communities to respond to emergencies and disasters by establishing a Citizen Corps Council, increasing awareness of need for emergency preparedness, and training volunteers, particularly youth, to meet emergency needs.	CCP	\$10,800.00	
		Stoddard County Citizens Corps	Establish/enhance citizen emergency preparedness awareness campaign	Offer education and training to as many individuals as possible to increase safety, particularly among youth and seniors.	CCP	\$1,290.00	
	Missouri Total						\$14,552.44
	Nebraska	Keya Paha County	Establish/enhance Citizen Corps Councils	Provide training and basic information to the youth and senior population of the county and encourage participation in CERT activities.	CCP	\$2,500.00	
		Nebraska Center for Bioterrorism Education	Establish/enhance sustainable homeland security training program	The NE Center for Bioterrorism Education is proposing training workshops across Nebraska to fill this need. All training materials will be converted to a web-based venue to ensure training is available beyond workshops. The training will be submitted for ODP approval.	SHSP	\$340,000.00	
	Nebraska Total						\$342,500.00
	Ohio	Ohio Department of Youth Services	State Homeland Security Initiative	Enhancing agency's response personnel Interoperable Communications capabilities.	SHSP	\$110,845.66	
	Ohio Total						\$110,845.66
	Rhode Island	City of Providence-Hospitals	Enhance the CBRNE capabilities within Rhode Island	Increase the ability of Women and Infants Hospital to respond to CBRNE incidents through the purchase of PPE and also a video surveillance system.	SHSP	\$60,606.00	
	Rhode Island Total						\$60,606.00
	Tennessee	Claiborne County Emergency Management Agency	C - Establish/enhance citizen emergency preparedness awareness campaign	To enhance existing citizens corps programs to better respond/serve locally/regionally. Placing priorities on enhancement of current programs, and establishing new programs such as the VIPS. The funding will also be used for outreach programs for youth through partnerships with the Board of Education. Development of a community plan by the council, to support efforts of other outreach programs in effect.	CCP	\$28,000.00	
	Tennessee Total						\$28,000.00
	Wisconsin	Office of Justice Assistance	School and Youth initiatives	Supplies and other costs associated with school crisis preparedness conferences, READY program.	SHSP	\$112,280.30	
	Wisconsin Total						\$112,280.30
	<b>2004 Close-Out Total</b>						<b>\$681,601.10</b>

REPORTING PERIOD	STATE	AGENCY NAME	PROJECT TITLE	PROJECT DESCRIPTION	Grant Program	TOTAL FUNDING	
2005 Close-Out	Alabama	Talladega County Commission	Communication, HAZMAT, and Law equipment	Communication equipment (ACU1000, UHF/VHF Control station), HAZMAT training, and equipment to enhance Law enforcement agencies in Talladega.	CCP	\$120,000.00	
	Alabama Total					\$120,000.00	
	California	Children's Hospital Los Angeles	Projects A, B, C		Installation of six new cameras and the replacement of one existing camera. Upgrade CCTV recording digital video recorders compatible with the access control system. Barrier protection with doors that are impact resistant and locking devices with access control.	UASI	\$99,903.00
		Jewish Family and Children's Services	Project A – Security/Surveillance Equipment		Install security/surveillance equipment	UASI	\$100,000.00
		Long Beach Memorial Center/Miller Children's Hospital	Project A – Security/Surveillance Equipment		Install security/surveillance equipment	UASI	\$99,790.00
		OA-Modoc County	G - 004a - purchase mannequins for emergency medical training		AEL Code 9.1.4 - Purchase adult, pediatric, and infant advanced life support mannequins for training emergency medical personnel.	SHSP	\$13,161.00
	California Total						\$312,854.00
	District of Columbia	Children's National Medical Center	Non Profit Target Hardening		Assist Children's National Medical Center to harden their facility to help prevent, respond to, and recover from threats or acts of terrorism, due to their high profile status and highly symbolic status.	UASI	\$100,000.00
		Mary's Center for Maternal & Child Care, Inc.	Non Profit Target Hardening		Assist Mary's Center for Maternal & Child Care to harden their facility to help prevent, respond to, and recover from threats or acts of terrorism, due to their high profile status and highly symbolic status.	UASI	\$49,350.00

## VIII. Appendix B - Recovery Disaster Snapshots

The following tables show the total Eligible Applicants and Amount Approved under the Individuals and Households Program for Fiscal Years (FY) 2012, 2013, and 2014 data. The data is shown per disaster and includes the portion of the totals that was approved to Households with Children, based on applicant response. Some of these declared disasters continue to be programmatically open; therefore totals may not be final. For FYs 2012-2014, between 37 and 44 percent of all homes that received funds were households with children.

## IX. Appendix C - Mitigation Funding

The following table shows the total funding for the Hazard Mitigation Grant Program, Pre-Disaster Mitigation, and Flood Mitigation Assistance from Fiscal Years (FY) 2004-2012. Due to reporting requirements of grant recipients, FYs 2013 and 2014 funding amounts are not yet available. Additionally, Mitigation currently does not have a specified way of tracking how projects meet the needs of children in disasters. The following tables were built using a project title and description query.

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
2004	Florida	Charlotte County School District	Charlotte Co. School Board, Liberty Elementary, Wind/Lightning Protection	Charlotte Co. School Board, Liberty Elementary, Wind/Lightning Protection	HMGP	\$286,377.00
		Charlotte County School District	Charlotte Co. School Board, Vineland Elementary, Wind and Lightning Protection	Site to be retrofitted with wind and lightening protection.	HMGP	\$334,574.00
	Kansas	St. Mary's Colgon Catholic School	Safe room storm shelters within an Elementary School to be newly constructed	St. Mary's Colgon proposes to create 3 "safe rooms" using reinforced concrete block walls with a concrete roof in 3 rooms within a new Elementary School. A total of 3490 square feet will be strengthened in order to accommodate the 375 students and staff that will be housed in the new building as well as to provide shelter for the neighboring public sector.	HMGP	\$111,386.00
		Wichita Public Schools	Tornado Shelter Area Payne Elementary School	Construct 7,372 sq. ft. shelter area in order to reduce the threat of death or severe injuries to students and staff during tornadoes and severe wind storms.	HMGP	\$101,250.00
<b>2004 Total</b>						<b>\$833,587.00</b>
2005	Arkansas	Fort Smith School District	Fort Smith School District Safe Room at Carnall Elementary	Carnall Elementary in Fort Smith, Arkansas in Sebastian County is located in an area that has a high incidence of tornado activity. FEMA 361 places Arkansas in Zone IV area for highest risk of F3, F4, and F5 tornado events and places Fort Smith in the highest category of 25 or more dangerous storm events/year. Past history suggests a high degree of probability for death, injury, and property damage for the proposed project area due to a tornado.	PDM	\$531,329.97
		Fort Smith School District	Fort Smith School District Morrison Elementary Safe Room	Morrison Elementary in Fort Smith, Arkansas in Sebastian County is located in an area that has a high incidence of tornado activity. FEMA 361 places Arkansas in Zone IV area for highest risk of F3, F4, and F5 tornado events and places Fort Smith in the highest category of 25 or more dangerous storm events/year. Past history suggests a high degree of probability for death, injury, and property damage for the proposed project area due to a tornado.	PDM	\$531,329.97
		Fort Smith School District	Fort Smith School District Cavanaugh Elementary Safe Room	Cavanaugh Elementary in Fort Smith, Arkansas in Sebastian County is located in an area that has a high incidence of tornado activity. FEMA 361 places Arkansas in Zone IV area for highest risk of F3, F4, and F5 tornado events and places Fort Smith in the highest category of 25 or more dangerous storm events/year. Past history suggests a high degree of probability for death, injury, and property damage for the proposed project area due to a tornado.	PDM	\$531,329.97
	Florida	Miami-Dade County/Miami Children's Hospital	Miami Children's Hospital Pre-Disaster Wind Mitigation Project	Main Campus Hospital Equipment and Patient Protection Shutters: Miami Children's Hospitals Research and Foundation buildings currently do not have permanent wind storm protection on their windows or glazed doors. The Research buildings contain the blood bank and pathology services and are critical to the function of the operating rooms.	PDM	\$415,470.68

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
2005 (continued)	Florida (continued)	Miami-Dade County/Miami Children's Hospital	Miami Children's Hospital Satellite, Pre-Disaster Wind Mitigation Project	Main Campus Hospital Equipment and Patient Protection Shutters: Miami Children's Hospital's Research and Foundation buildings currently do not have permanent wind storm protection on their windows or glazed doors. The Research building contains the blood bank and pathology services and is critical to the function of the operating rooms.	PDM	\$55,933.00
	Mississippi	Stone County	Stone County Stand Alone Shelter Project- Perkinston Elementary	The proposed FEMA 361 stand-alone community shelter to be located on the Perkinston Elementary school campus will be completed in 2 phases- Phase 1 the design stage and Phase 2 the construction stage. The community shelter will provide near absolute protection as described in FEMA 361. The shelter will be constructed to maintain structural integrity in 3 second bursts of 200 MPH winds, as well as withstanding a missile impact test of a 15 lb. 2X4 traveling at 100 MPH horizontally.	HMGP	\$1,137,175.00
		Stone County	Stone County Stand Alone Shelters-Stone Elementary	The proposed shelter will be constructed on site with the Stone Elementary School Campus. This site will allow for convenient exercising and routine maintenance. The structure will be separate from structures on the campus but will allow for quick access for students, faculty and the general public in response to warning of severe weather or tornadoes.	HMGP	\$1,083,933.00
		Hancock County School District	Hancock County Schools 361 Upgrade, Hancock North Central Elementary MM# 1579	Hancock County School District plans to build a FEMA 361 hardened shelter into its new Hancock North Central Elementary to be built at 6122 Cuevas Town Road, Kiln MS. This is the site of an existing school that will be demolished prior to the construction of a new building. We will harden 10,000 square ft. to FEMA 361 Standards in the 44,000 square feet new school.	HMGP	\$2,157,406.00
		Desoto County Board of Education	DeSoto County Schools-Hope Sullivan Elementary FEMA 361 Safe Room	The proposed project, DeSoto County Schools at Hope Sullivan Elementary School New Stand Alone Safe Room, has had a Preliminary Scope of Work prepared by the Architect and Grant Management Team. This proposed Project consists of a new 65' x 80' (5,850 SF) FEMA 361 Stand Alone Safe Room structure on the Hope Sullivan Elementary School Campus. A total of 4,477 s.f. will be capable of housing a total of 883 occupants during a severe weather event. Of the 883 occupants, space is reserved for two (2) bedridden and two (2) Wheelchair bound occupants, if needed. Restrooms are provided inside the envelope of the shelter as well.	HMGP	\$1,280,645.00
		Desoto County Board of Education	DeSoto County Schools-Olive Branch Elementary FEMA 361 Safe Room	The proposed project, DeSoto County Schools - Olive Branch Elementary School New Stand Alone Safe Room, has had a Preliminary Scope of Work prepared by the Architect and Grant Management Team. This proposed Project consists of a new 65' x 80' (5,850 SF) FEMA 361 Stand Alone Safe Room Structure on the Olive Branch Elementary School Campus. A total of 4,477 s.f. will be capable of housing a total of 883 occupants during a severe weather event. Of the 883 occupants, space is reserved for two (2) bedridden and two (2) wheelchair bound occupants, if needed. Restrooms are provided inside the envelope of the Stand Alone Safe Room structure as well.	HMGP	\$1,308,453.00

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
<b>2005</b> (continued)	Mississippi (continued)	Desoto County Board of Education	DeSoto County Schools- Walls Elementary FEMA 361 Safe Room	The proposed project, DeSoto County Schools - Walls Elementary School New Stand Alone Safe Room, has had a Preliminary Scope of Work prepared by the Architect and Grant Management Team. This proposed Project consists of a new 65' x 80' (5,850 SF) FEMA 361 Stand Alone Safe Room Structure on the Walls Elementary School Campus. A total of 4,477 s.f. will be capable of housing a total of 883 occupants.	HMGP	\$1,314,994.00
		Desoto County Board of Education	DeSoto County Schools- Hernando Elementary FEMA 361 Safe Room	The proposed project, DeSoto County Schools - Hernando Elementary School New Stand Alone Safe Room, has had a Preliminary Scope of Work prepared by the Architect and Grant Management Team. This proposed Project consists of a new 65' x 80' (5,850 SF) FEMA 361 Stand Alone Safe Room Structure on the Hernando Elementary School Campus. A total of 4,477 s.f. will be capable of housing a total of 883 occupants.	HMGP	\$1,266,271.00
		Desoto County Board of Education	DeSoto County Schools- Lewisburg Elementary School FEMA 361 Safe Room	The proposed project, DeSoto County Schools - Lewisburg Elementary School New Stand Alone Safe Room, has had a Preliminary Scope of Work prepared by the Architect and Grant Management Team. This proposed Project consists of a new 65' x 80' (5,850 SF) FEMA 361 Stand Alone Safe Room Structure on the Lewisburg Elementary School Campus. A total of 4,477 s.f. will be capable of housing a total of 883 occupants.	HMGP	\$1,288,712.00
		Desoto County Board of Education	DeSoto County Schools-Horn Lake Elementary FEMA 361 Safe Room	The proposed project, DeSoto County Schools at Horn Lake Elementary School New Stand Alone Safe Room, has had a Preliminary Scope of Work prepared by the Architect and Grant Management Team. This proposed Project consists of a new 65' x 80' (5,850 SF) FEMA 361 Stand Alone Safe Room Structure on the Horn Lake Elementary School Campus. A total of 4,477 s.f. will be capable of housing a total of 883 occupants.	HMGP	\$1,241,497.00
<b>2005 Total</b>						<b>\$14,144,479.59</b>
<b>2006</b>	Virgin Islands of the U.S.	Department of Education	Guy Benjamin Elementary School FMA	The goal is to eliminate flooding to the Guy Benjamin Elementary School which impedes regular classroom activity during and after heavy rainfall.	FMA	\$108,000.00
	Alaska	Kodiak Island (Borough)	Kodiak Island Borough, East Elementary School - Window Seismic Upgrade	The Kodiak East Elementary School has substantial structural seismic vulnerabilities, including the large single pane classroom windows original to the school. Kodiak is a very high seismic hazard area and includes a high level of seismic risk and hazard. The replacement of the existing windows will not only reduce the potential for damage and economic loss, but also a high potential for deaths and injuries in future earthquakes.	HMGP	\$101,188.00
<b>2006 Total</b>						<b>\$209,188.00</b>
<b>2007</b>	Alabama	Enterprise High School	Rucker Elementary School Wind Retrofit	This project consists of hardening a wing of classrooms at the Rucker Blvd. Elementary School, located in Enterprise, Alabama. This structure will provide protection for the school's students and faculty as well as people in the surrounding area, from tornadoes. This structure will be designed and constructed according to FEMA Publication 361. The building will be hardened to sustain winds up to 250 mph. The shelter will be constructed for an occupancy level of 1538 people with a total area of 10,226 square feet.	HMGP	\$292,500.00

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
2007 (continued)	Alabama (continued)	Enterprise High School	Enterprise City Board of Education - Hillcrest Elementary School Safe Rooms	This project involves constructing a total of 19,584 square feet of tornado safe room space within the Hillcrest Elementary School Complex, in Enterprise, (Coffee County), Alabama. This safe room space will be designed and constructed to the requirements of FEMA Publication 361 and hardened to sustain winds up to 250 mph. The shelter area will have an occupancy level of 3,916.	HMGP	\$396,750.00
	Kansas	Maize Unified School District #266	USD 266 Construct Safe Room for Maize South Elementary School	The proposed project is to design and construct a safe room in the new multipurpose room / gymnasium of the elementary school. The room will be constructed using structural concrete panels with precast tee roof, structural concrete topping.	HMGP	\$288,578.00
		Maize Unified School District #266	USD 266 Maize, Construct Safe Room in Pray-Woodman Elementary School	Project consists of hardening the new multipurpose room addition to the Pray-Woodman Elementary School. Rooms would be constructed using tilt up concrete walls with brick veneer and a reinforced concrete ceiling.	HMGP	\$325,966.00
		Maize Unified School District #266	USD 266 Maize, Construct Safe Room in Elementary School	Project consists of hardening the new multipurpose room / gymnasium addition to the Maize Elementary School. Room would be constructed using tilt up concrete walls with brick veneer and a reinforced concrete ceiling.	HMGP	\$303,300.00
		Consolidated Neosho County School District #101	CUSD 101 Erie / Galesburg, Construct Safe Room in Erie Elementary Addition	The proposed project is to design and construct a safe room in the new addition to the school; the addition will be a CMU structure that is load bearing masonry with steel joist and concrete roof, the addition will be hardened.	HMGP	\$239,688.00
		Unified School District #262	USD 262 Valley Center, Construct a Safe Room in Abilene Elementary School	Project consists of hardening the new gymnasium addition to the Abilene Elementary School, USD 262 Valley Center, Kansas. Room would be constructed using precast concrete walls and steel supported concrete slab roof.	HMGP	\$351,697.00
		Unified School District #262	USD 262 Valley Center, Construct Safe Room in West Elementary School	Project consists of hardening the new gymnasium addition to the West Elementary School, USD 262 Valley Center, Ks. Room would be constructed using precast concrete walls and steel supported concrete slab roof and will be constructed to FEMA 361 Standards.	HMGP	\$422,396.00
		Eudora School District #491	USD 491 Eudora Elementary School Safe Room Construction	Project is to design and construct a safe room (tornado shelter) in Eudora Elementary School. The new shelter will serve an elementary school with a population of 800 students and faculty. The total square footage is 7,737 square feet.	HMGP	\$887,591.00
		Missouri	Willow Springs R-IV Elementary School Storm Shelter	Willow Springs R-IV Elementary School Storm Shelter	The objective of this shelter is to provide a storm shelter safe room for the elementary population as well as the community within the five minute travel time of the shelter in the case of an environmental emergency.	PDM
	Oklahoma	Weatherford Public Schools	East Elementary Safe Room , Weatherford, Oklahoma	The goals for this project are facilitating responsible development to reduce or eliminate the potential impacts of tornados and extreme high winds, and to reduce the risk of personal injury or death.	PDM	\$161,437.50
<b>2007 Total</b>						<b>\$3,726,153.50</b>

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
2008	Arkansas	Center Valley Elementary School	Center Valley Elementary Safe Room Project	The Russellville School District Center Valley Elementary Safe Room/Gym will attach to the southwest corner of the existing school and is surrounded by minimal trees on the northwest outskirts of the Russellville area. The proposed 4,720 sq. ft. shelter will accommodate a design load of 816 people when used as a community shelter after schools hours or in combination during school hours.	HMGP	\$606,215.00
		London Elementary School	London Elementary Safe Room, Russellville SD, Pope County Arkansas	The Russellville School District London Elementary Safe Room will attach to the south side of the existing multi-purpose annex of the school and sit on the north edge of town between Interstate 40 and Highway 64. The proposed 1,440 sq. ft. shelter will accommodate a design load of 240 people when used as a community shelter after school hours or in combination during school hours.	HMGP	\$199,248.00
		Oakland Heights Elementary	Oakland Heights Elementary Safe Room	The Russellville School District Oakland Heights Elementary Safe Room/Gym will attach to the northeast corner of the existing building and surrounded by minimal trees and along the central/eastern edge of town. This low-lying area is prone to high winds. The proposed 4,400 sq. ft. shelter will accommodate a design load of 800 people when used as a community shelter and after school hours or in combination during school hours.	HMGP	\$685,964.00
		Dwight Elementary School	Dwight Elementary Russellville School District	The Russellville School District Dwight Elementary Safe Room/Gym will attach to the north side of the existing cafeteria and is situated in the middle of the Russellville area. It is about 1 block South of Highway 64 and in the lower elevation of Russellville. It is surrounded by heavily populated residential areas. The proposed 3,168 sq. ft. shelter will accommodate a design load of 505 people when used as a community shelter and after school hours or in combination during school hours.	HMGP	\$448,059.00
		Sequoyah Elementary School	Sequoyah Elementary School Safe Room Russellville School District	The Russellville School District Sequoyah Elementary Safe Room/Gym will attach to the south west corner of the existing building and surrounded by minimal trees and along the edge of the low-lying city area which is surrounded by higher elevations to the south. The proposed 4,000 sq. ft. shelter will accommodate a design load of 800 people when used as a community shelter and after school hours or in combination during school hours.	HMGP	\$648,761.00
		Crawford Elementary School	Crawford Elementary Safe Room, Russellville School District, Russellville, AR	The goals and objectives of this safe room are to provide event-only life safety protection for approximately 678 students, faculty and area residents when extreme weather threatens. This project will provide individuals and families immediate life-safety protection against extreme wind hazards for those that cannot evacuate out of harm's way prior to an event. The Russellville School District Crawford Elementary Safe Room/Gym will attach to the north face of the existing school and is located on the northern residential area of the city limits.	HMGP	\$543,025.00

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
2008 (continued)	Arkansas (continued)	Russellville ISD	Russellville Upper Elementary Safe Room Project	This project is for a safe room shelter for Russellville Upper Elementary. This project will protect will provide a mass shelter to protect approximately 800 students, faculty, and staff at the school for two hours in the event of extreme weather. This building will be constructed adjacent to the north end of the existing school	HMGP	\$749,891.00
	Illinois	Lake County	2009 Gurnee Elementary School Buyout Project	The proposed mitigation activity involves the acquisition of the Gurnee Elementary School, located at 900 Kilbourne Road in Gurnee, IL demolishing the school and restoring the land back to floodplain open space. The acquisition includes the purchase of the 51,115 square foot school building and three parcels of that that the school, parking lots, playground and a maintenance garage extend across.	HMGP	\$2,428,463.00
	Iowa	West Central High School	West Central Valley PreK-5 Elementary School Tornado Safe Room, Stuart	West Central Valley Community School district is proposing to build a tornado safe room as a classroom/ safe room addition to the elementary school building. The proposed tornado safe room will be added onto this elementary building. When not use as a safe room, the addition is will be used as classrooms for the elementary students.	HMGP	\$497,850.00
	Kansas	Unified School District #470	Adams Elementary Safe Room Project	The proposed project is to design and construct a safe room (tornado shelter) in accordance with criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500 and the National Storm Shelter Association (NSSA).	HMGP	\$518,895.00
		Unified School District #470	Roosevelt Elementary Safe Room Project	The proposed project is to design and construct a safe room (tornado shelter) in accordance with criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500 and the National Storm Shelter Association (NSSA).	HMGP	\$517,754.00
		Unified School District #470	USD 470 Safe Room IXL Elementary	The proposed project is to design and construct a safe room in accordance with the criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500, and National Storm Shelter Association (NSSA).	HMGP	\$549,923.00
		Unified School District #470	Frances Willard Elementary School Safe Room Project	The proposed project is to design and construct a safe room (tornado shelter) in accordance with criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500 and the National Storm Shelter Association (NSSA).	HMGP	\$482,640.00
		Unified School District #470	USD 470 Safe Room C-4 Elementary	The proposed project is to design and construct a safe room in accordance with the criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500, and National Storm Shelter Association (NSSA). USD 470 Arkansas City proposes to add tornado shelters to six existing elementary schools, at C-4 Elementary two new classrooms and two new restrooms will be hardened to provide tornado shelter protection.	HMGP	\$376,489.00

2008 (continued)	Kansas (continued)	Unified School District #470	Jefferson Elementary School Safe Room Project	The proposed project is to design and construct a safe room (tornado shelter) in accordance with criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500 and the National Storm Shelter Association (NSSA).	HMGP	\$491,696.00
		Unified School District #375	Towanda USD 375 / Greenwich Elementary Safe Room	The proposed project is for a new PreK-6 elementary building which will have a designed and constructed safe room (tornado shelter) in accordance with the criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500, and the National Storm Shelter Association (NSSA)	HMGP	\$507,254.00
		Unified School District #402	USD 402 Butler County (Augusta) Ewalt Elementary School Safe Room	The proposed project is to design and construct a safe room (tornado shelter) in accordance with criteria set forth in FEMA 361, Design and Construction Guidance for Community Shelters, ICC 500 and the National Storm Shelter Association (NSSA).	HMGP	\$528,773.00
		Unified School District #473	Chapman (USD 473) Elementary School Safe Room	This safe room is a 41'-4" x 35'-8" room located in the basement at the northwest corner of the school building. The room will be constructed of cast in place concrete walls, steel beam and reinforced concrete structure at floor above.	HMGP	\$18,379.00
		Unified School District #453	Anthony Elementary School Safe Room	Construct a safe room in four classrooms of the new addition. Exterior walls of the storm shelter portion of the building are constructed with 12" block masonry with voids grouted full. Two pairs of exterior doors are installed per FEMA standards, interior shutter doors are also installed over exterior window openings. The roof is constructed of 6" concrete over steel W sections.	HMGP	\$641,541.00
		Unified School District #453	Southwest (Henry) Elementary School Safe Room USD 453	The proposed project is to design and construct a safe room (tornado shelter). Rooms that will be hardened: The rooms located in the classroom addition will be hardened. This area will include classrooms and a corridor. Please refer to the attached floor plans for exact metrics on the areas to be hardened in accordance with FEMA guidelines.	HMGP	\$475,005.00
		Unified School District #453	David Brewer Elementary School Safe Room	The proposed project is to design and construct a safe room (tornado shelter).	HMGP	\$719,814.00
		Unified School District #259	USD 259, Anderson Elementary School Safe Room	The proposed project is to design and construct a safe room (tornado shelter). Multipurpose room will be constructed and hardened for use as a tornado shelter. Number of people that will be utilizing the safe room is as follows 600 students, 65 staff, and 16 visitors.	HMGP	\$655,760.00
		Unified School District #259	USD 259, Clark Elementary School Safe Room	The proposed project is to design and construct a safe room (tornado shelter). The number of people that will be utilizing the safe room is as follows 340 students, 65 staff, and 15 visitors. The safe room meets the criteria of 5 ft. minimum; see the BCA for justification of people and size of the safe room.	HMGP	\$262,558.00

2008 (continued)	Kansas (continued)	Unified School District #259	USD 259 Cleveland Elementary Safe Room	The proposed project is to design and construct a safe room (tornado shelter). One classroom, an Art room and adjacent corridor will be constructed and hardened for use as a tornado shelter. Number of people that will be utilizing the safe room is as follows 340 students, 43 staff, and 18 visitors.	HMGP	\$289,310.00
		Unified School District #259	USD 259 Stanley Elementary School Safe Room	The proposed project is to design and construct a safe room (tornado shelter). 4 classrooms, nurses' office, restrooms, and corridors will be constructed and hardened for use as a tornado shelter. Number of people that will be utilizing the safe room is as follows 400 students, 80 staff, and 20 visitors.	HMGP	\$354,882.00
		Unified School District #402	USD 402 New Lincoln Elementary School Safe room	The proposed project is to design and construct a safe room (tornado shelter). The safe room will consist of a new school being built to house the growing community in the Augusta school district. A kindergarten classroom addition will be the protection envelop utilizing fully reinforced masonry walls, protected wall and mechanical openings, and composite steel/concrete roof deck.	HMGP	\$553,016.00
	Missouri	NIXA R-II School District	Nixa R-II Community Safe Room at Inman Elementary	The proposed project is the construction of a community safe room. The structure will be a single story above grade building that is constructed with precast wall panels and a precast double T roof structure. The proposed structure will be approximately 4,400 square feet and will provide refuge for 692 students, staff, and local residents, and include space for storage, MEP, and restroom facilities.	HMGP	\$550,935.00
	Tennessee	Henry (County)	Henry County Paris Elementary School Safe room	During the construction of the four (4) classrooms at Paris Elementary School and Civic Center, a classroom wing containing the occupant safe room within the four (4) rooms, will be constructed. The total occupant safe area will consist of 4,462 square feet. The ceiling will either be poured in place slab or precast planks. The Safe Room will be able to accommodate up to 892 individuals.	HMGP	\$401,383.00
		Gibson County	Gibson County Medina Elementary School Safe Room	The purpose of this project is to construct a Safe Room to be built within a twelve room addition at Medina Elementary School. The safe room will be approximately 9,500 square feet, include male and female rest rooms, and will house up to 1,900 people. The structure will have ceilings that will either a poured-in-place slab or pre-cast planks. The walls will be reinforced to withstand up to 250 mph.	HMGP	\$671,510.00
		Hardin County	Hardening of school hallways in the new Sod Farm Property Elementary School	The proposed new elementary school is approximately 78,900 square feet. The school will incorporate (3) corridors that will be designed as internal shelters in accordance with "Design and Construction Guidance for Community Shelters" by FEMA, July 2000. Each corridor will provide protection to the students and staff within the school facility.	HMGP	\$415,182.00

<b>2008</b> (continued)	Washington	Bethel School District	Bethel School District - Roy Elementary School seismic retrofit- CLOSEOUT DEOBLIGATION	This project is to retrofit the 1937 portion of Roy Elementary School to meet seismic standards. This portion of the school comprises 12,596 sq. ft., approximately 1/3 of the size of the school. Roy Elementary is the only building in Roy that can serve as an emergency shelter.	HMGP	\$357,591.00
<b>2008 Total</b>						<b>\$17,147,766.00</b>
<b>2009</b>	Alabama	Orrville (CCD)	Five Points Elementary School Weather Siren Installation	The proposed project is a weather siren to be installed in a rural section of Dallas County. This area encompasses Five Points Elementary School. This proposed site has numerous mobile homes located within two miles as well as substandard housing.	HMGP	\$14,121.00
		Orrville (CCD)	Salem Elementary School Weather Siren Installation	The system upgrade will consist of installation of an outdoor weather siren, attached to a Sixty-foot (60) Class 2 pole approximately (10) ten feet in the ground with approximately (50) fifty feet above the ground. All anchoring will be installed per code.	HMGP	\$14,121.00
		Sardis	Shiloh Elementary School Weather Siren Installation	The proposed project is a weather siren to be installed in a rural section of Dallas County. This area encompasses Shiloh Elementary School. This proposed site has numerous mobile homes located within two miles as well as substandard housing. This is a small rural section of Dallas County.	HMGP	\$14,121.00
	Arkansas	Dover Schools	Dover Elementary School Safe Room	The Dover School District proposes to construct a free-standing safe room located at the Elementary School. It will serve as shelter for 580 students, faculty and staff including [individuals with disabilities and others with access and functional needs]. The safe room will contain 3,575 gross square feet.	HMGP	\$479,910.00
		Mena School District	Mena Holly Harshman Elementary Safe Room	The goals and objectives of this safe room are to provide protection for students, faculty and area residents when extreme weather threatens. The shelter will reduce the number of future deaths and injury from tornado events, and also provide a peace of mind to the students, parents, faculty, and general public while protecting their lives. It will accommodate 640 individuals.	HMGP	\$506,119.00
		Lonoke Public Schools	Lonoke Middle School/Elementary Safe Room	The goals and objectives of this safe room are to provide safety and protection for approximately 1,000 students, faculty and staff during weather events. The safe room will consist of 5,000 square feet of protected space and be located between the Middle School and Junior High Campuses on Palm St., Lonoke, AR.	HMGP	\$795,759.00
		Cleveland County Public Schools	Kingsland Elementary School Safe Room	The goals and objectives of this project are to provide event-only life safety protection for approximately 271 students, faculty, and staff when extreme weather threatens the area. The safe room will be a new, free-standing safe room with 1,514 gross square feet and 1,260 protected square footage to accommodate 250 people.	HMGP	\$308,456.00

PROGRAM YEAR	STATE	SUBGRANTEE	PROJECT TITLE	PROJECT DESCRIPTION	PROGRAM	FUNDING AMOUNT
2009 (continued)	Arkansas (continued)	Cedarville School District	Cedarville Elementary School Campus	The goals and objectives of this safe room project are to provide protection for approximately 1,000 individuals (students, faculty, & staff) when extreme weather threatens. Over 5,025 of usable protected square footage will be provided.	HMGP	\$897,090.00
		Bismarck Public Schools	Bismarck High & Elementary School Safe Rooms	The purpose of this project is to construct two safe rooms for the Bismarck School District. One safe room will be located at the High School Campus and provide protection for approximately 775 individuals when extreme weather threatens. This safe room will have over 4,985 usable square feet in the event of a tornado. The other safe room will be located at the Elementary School Campus and provide 1,344 usable sq. ft. for approximately 195 persons.	HMGP	\$945,966.00
		Van Buren School District	Van Buren King Elementary Safe Room Project	The King Elementary School campus at the Van Buren School District in Van Buren, Arkansas in Crawford County is located in an area that has a high incidence of tornado activity. A mass shelter will provide near absolute protection from severe weather for students, faculty, and staff at the school as well as the citizens who live and work in close proximity to the shelter.	PDM	\$1,055,974.43
	California	Tahoe Truckee Unified School District	Tahoe Truckee USD, Kings Beach Elementary School Roof Snow Load Retrofit	Perform structural upgrades to increase the roof snow load capabilities of school's multipurpose room. The existing snow load capacity of the multipurpose room is rated at 100 pounds per sq. ft. The current local building code requires structures to be designed with a snow load of 160 pounds per square foot.	HMGP	\$507,215.00
		Tahoe Truckee Unified School District	Tahoe Truckee USD, Truckee Elementary School Roof Snow Load Retrofit	The goals and objectives of this project are to perform structural upgrades/retrofits to increase the roof snow load of the Truckee Elementary School Gym Truckee Elementary School was constructed many years ago under old building code. The main building, along with the gym was constructed in 1958. They gym is a single story stack masonry structure measuring approximately 3,500 sq. ft.	HMGP	\$348,212.00
		Tahoe Truckee Unified School District	Tahoe-Truckee USD, Donner Trail Elementary School Roof Snow Load Retrofit	The goals and objectives of this project are to perform structural upgrades/retrofits to increase the roof snow load of the Donner Trail Elementary School Gym/Multi-Purpose Room and its adjacent structure.	HMGP	\$342,554.00
	Kansas	Unified School District #437	USD 437 Auburn Elementary Safe Room	The Auburn Washburn USD 437 school district is going to build two safe rooms on the north end of the west wing of the Auburn Elementary school. The safe rooms will double as classrooms. The surrounding walls of the safe rooms will be constructed of grout filled masonry block with vertical reinforcing steel.	HMGP	\$315,830.00
		Unified School District #320	USD 320 Central Elementary Weather Shelter	Project consists of two (2) Community Safe Rooms based on FEMA guidelines. These Safe Rooms are located within the new construction. The exterior walls of SR-A are constructed of cast in place concrete, Interior walls adjoining existing construction are constructed of reinforced masonry.	HMGP	\$602,357.00

<b>2011</b> (continued)	Texas (continued)	City of Eastland	City of Eastland Community Safe Room at Siebert Elementary	The overarching goal of this activity is to protect the lives of citizens in the City of Eastland, Texas. The objective to meet that goal is the development of an 11,900 square foot, concrete community safe room to protect residents, school children and at-risk populations in the event of a tornado.	PDM	\$1,452,752.75
<b>2011 Total</b>						<b>\$16,886,927.75</b>
<b>2012</b>	Kansas	Unified School District #259	Minneha Elementary Safe Room	The design phase began in June 2011 and will be submitted to contractors for bid in December 2011. The plan is for construction to begin in January 2012 and be completed in Jan 2013.	PDM	\$449,576.25
	Ohio	Stark County Park District	Pathway Caring for Children-Zimber Ditch Mitigation Project	The solution recommended by the Stark County Engineer, Stark County Commissioners, and the Stark County Emergency Management Agency consists of proper demolition and site clean-up and transfer of the property to the Stark County Park District (SCPD) for creation of green space and maintenance of the conservation easement and floodway in perpetuity.	RFC	\$1,213,189.17
	South Carolina	Medical University of South Carolina	MUSC: Children's Hospital Generator & Emergency Equipment Relocation	The creation of a vertical mechanical/electrical room expansion with lowest level above the storm surge level. The proposed solution would allow construction of a replacement emergency power generation system without disruption of the existing emergency power system.	PDM	\$3,000,000.00
<b>2012 Total</b>						<b>\$4,662,765.42</b>
<b>2013</b>	Iowa	John Glen Elementary School	North Scott Community School - John Glenn Elementary Tornado Safe Room	The tornado safe room is located within the North Scott Community Schools-John Glenn Elementary School, in Donahue, Iowa Scott County. The North Scott Community-John Glenn Elementary is located off of county highway Y52 (Main Street). The safe room will protect 312 at-risk students, staff, and visitors during a tornado or high wind event.	HMGP	\$100,875.00
	Oklahoma	Okemah	Okemah Elementary School Dual Use Tornado Safe Room	Okemah Public Schools proposes to construct an ADA compliant dual-use safe room/PE center on the elementary school campus @101 N 16th Street in order to provide near absolute protection against severe weather events for its entire student body & staff (373) during school hours plus an additional 220 local residents for a maximum occupancy of 593. By servicing as a dual-use tornado safe room this project will make efficient use of valuable school space & be cost effective by serving the surrounding community (those within a 1/2 mile radius) during the day & non-school hours, such as weekends, evenings, holidays & summer vacation. The useable area of the facility is 2983 sq. ft.	HMGP	\$859,611.00
		Chandler	East Side Elementary School Safe Room, Chandler, OK	The activity proposed is a multi-purpose community safe room to be constructed at East Side Elementary School in Candler Public School District in Chandler, OK. The safe room will act as the school cafeteria. The total gross building area will be 3,900 square feet with a usable space of 2,156 square feet. The safe room will be used by students, faculty and staff of East Side Elementary during the hours of 7 AM to 6 PM. The safe room will not be open to the general public or available outside of normal operating hours.	HMGP	\$886,890.00
<b>2013 Total</b>						<b>\$1,847,376.00</b>
