

11th International Bridge and Structure Management Conference

April 24-28, 2017 (Tentative)

Organized by
**Bridge Management Committee (AHD-35) of the
Transportation Research Board**

Co-Sponsored by **TRB, FHWA, & AASHTOWare™**

The 11th International Bridge and Structures Management (BSM) Conference will cover a broad range of topics on bridge and transportation structures in all stages of implementation of asset management practices. Themes will include comprehensive implementation within and across organizations, establishing and monitoring asset management plans, performance measures for asset management, tools and technology to assist decision making, state of good repair, and adaptation of transportation to extreme weather events and climate change. This meeting will serve as the forum for moving MAP-21 asset management initiatives into practice and will be the venue for a wide range of federal, state, MPO/local, and transit agencies, as well as private sector practitioners and university researchers to share knowledge, sponsor peer to peer learning, and work together.

Save the Date and Interest in Attending

Topic Areas - Papers/presentations on the following subject areas will be solicited in May:

- **Implementation of Bridge and Structures Management (BSM) Programs and Processes**
- **Inspection and Assessment for BSM Decision Making**
- **Recent Developments and Future Trends**
- **Improving BSM Data, Models and Tools**
- **Changes in BSM Programs and Processes**
- **Innovative Repair Methods and Materials**
- **Workshops on Experiences Implementing Performance-Based Management**
- **Workshops on Implementation of Management Systems and Tools**

Interest in Attending
