 - a. TECS Modernization will provide newer technologies that make it easier to maintain the system without taking the entire system down which disrupts critical field activities; and
- 7. Comply with CBP and DHS mandates such as Service Oriented Architecture.
 - a. TECS Modernization will significantly improve how components and functions can be combined and configured into an overall compliant architecture.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funding will enhance the ability of TECS Modernization to meet technical and schedule requirements which allows for cost avoidance of maintaining the mainframe and associated database beyond FY 2015.

During FY 2013 TECS Modernization will have all five major projects under the TECS Modernization program underway. The requested increase of \$5 million will facilitate the coordination and dependencies between these projects, primarily High Performance Primary Query (HPPQ) and Primary Inspections Processing (PIP), to ensure that TECS Modernization stays on schedule and is completed by the end of FY 2015, and is not delayed into FY 2017. Not completing TECS Modernization by the end of FY 2015 extends CBP's reliance on expensive, unsupportable technology of critical border security functions for CBP, DHS, and OGAs who depend on TECS for their daily operations, which CBP will not be able to support.

The COPPS PPA supports the following CBP and DHS goals:

DHS Mission 1: Preventing Terrorism and Enhancing Security

DHS Mission 2: Securing and Managing Our Borders.

CBP Mission Set 2: Securing and Expediting Travel.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For expenses for U.S. Customs and Border Protection automated systems, [\$327,526,000] **\$340,105,000**¹, to remain available until September [2015] **2016**², of which not less than \$140,830,000 shall be for the Automated Commercial Environment. *Note.—A full year 2013 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 112-175). The amounts included for 2013 reflect the annualized level provided by the continuing resolution.*

¹ [\$327,526,000] <u>\$340,105,000</u>	Dollar change only. No substantial change proposed.
² [2015] <u>2016</u>	Fiscal year change only. No substantial change proposed.

ACE/ITDS Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing the U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	\$7,292	\$10,290	\$10,348	\$3,056
12.1 Benefits	1,272	1,801	1,811	539
Total, Salaries & Benefits	8,564	12,091	12,159	3,595

In 2014, an increase of \$3,527,000 is for ACE contractor insourcing. In 2014, an increase of \$68,000 is for the 2013 pay increase.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$84,161	\$76,491	\$81,396	-\$2,765

In 2014, a decrease of -\$3,527,000 is for ACE contractor insourcing. In 2014, a decrease of -\$7,000,000 is for realignment of funding for Targeting Systems. In 2014, an increase of \$7,762,000 is for an increase to maintain current operational capability.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Border Security Fencing, Infrastructure, and Technology (BSFIT)

I. Appropriation Overview

A. Mission Statement for Border Security Fencing, Infrastructure, and Technology:

The Border Security Fencing, Infrastructure, and Technology (BSFIT) appropriation supports the Department of Homeland Security (DHS) and U.S. Customs and Border Protection (CBP) missions by delivering operationally appropriate, agile, and cost-effective detection and surveillance technology systems, Tactical Infrastructure (TI), and Tactical Communications Modernization (TACCOM). These technology systems enhance CBP's ability to know what is happening along our borders, referred to as situational awareness, and respond and resolve to illegal activity. Additionally, investments in surveillance technology, in particular, have a workforce multiplier effect. Prior to recent investments in technology, many Border Patrol agents provided situational awareness through detection related duties. With the deployment of fixed and mobile surveillance capabilities, the technology now performs those duties, freeing agents to focus on other vital tasks such as identification, tracking, interdiction, and resolution of events along our borders. As a result, these investments have a two-fold impact, both increasing visibility on the border and increasing Border Patrol's operational capabilities as agents can shift to other duties. Furthermore, these investments lead to more accurate and timely information which is critical to CBP's new risk-based operational strategy. By gaining sufficient situational awareness, CBP can determine the activity level in all border regions, monitor evolving threat patterns, and strategically deploy assets (agents and technology) based on threat.

DHS's border security mission, as outlined in the 2010 Quadrennial Homeland Security Review (Mission II – Securing and Managing Our Borders), is to prevent the illegal flow of people and goods across U.S. air, land, and sea borders, while both expediting the safe flow of lawful trade and commerce, and disrupting and dismantling transnational criminal organizations. DHS has set an objective of substantially increasing situational awareness at the Nation's borders in order to help detect and classify potential threats and effectively resolve them. In addition, DHS has made building our existing partnerships with our North American neighbors a priority in order to collaboratively address threats. Correspondingly, the mission of CBP, as outlined in the agency's Mission Statement, is to safeguard the American homeland at and beyond our borders, protect the American public against terrorists and instruments of terror, and enforce U.S. laws, while fostering our Nation's economic security through lawful international trade and travel.

To turn the CBP mission into action, the Agency set goals in *CBP's Missions, Goals, and Priorities, FY 2011–2013*. For FY 2014, CBP will continue to work toward these goals. CBP's first outlined goal is to secure the southwest border by increasing the probability of apprehension and costs of attempting to enter the United States illegally or engaging in cross-border crime. Furthermore, another CBP goal for border enforcement is to secure the northern border, littoral borders, and associated airspace. The northern border spans thousands of miles where Federal law enforcement personnel assets are limited; therefore, intelligence, aviation assets, partnerships, and technology are essential to addressing threats and reducing vulnerabilities. Moreover, CBP continues to evaluate the conditions

and risks along the U.S. border in order to effectively address changing vulnerabilities and adjust priorities as required.

BSFIT supports the deployment of the Arizona Technology Plan, a multi-year effort to provide a cost-effective mix of technology solutions across all of Arizona. The deployment of the Arizona Technology Plan completes Phase IA of a CBP Analysis of Alternatives (AoA). This AoA was drafted in 2011 by CBP and presents a plan for cost-effective and operationally efficient technology deployment.

The AoA was divided into three phases: Phase IA, Phase IB, and Phase II. Phase IA of the AoA focuses on the Tucson and Yuma Border Patrol Sectors, while Phase IB focuses on the San Diego, El Paso, and Rio Grande Valley Sectors. Phase II focuses on the El Centro, Marfa, Del Rio, and Laredo Sectors. Phase IA recommended a wide range of mature systems and analyzed the benefits of agent-centric, fixed, ground-mobile, and aviation alternatives. The options identified in Phase IB and II of the AoA were found to be suitable based on different threats, geographic areas, and terrain. In addition to the technologies considered in Phase IA, Phase IB, and II, the AoA also considered aerostats and other systems identified as appropriate alternatives. Future plans may include conducting business cases for investments in surveillance; command, control, and communications technologies; and additional TACCOM upgrades along the southwest and northern borders. Future plans also include continuing to work directly with the Department of Defense (DoD) on testing and, ultimately, reusing their assets.

CBP presently manages the BSFIT account which provides for several major capabilities, such as: (1) surveillance systems and technologies as part of the Arizona Technology Plan, and (2) expanded and secure Land Mobile Radio (LMR) systems through TACCOM. To complete the Arizona Technology Plan, CBP is preparing to award a major contract to acquire and deliver Integrated Fixed Tower (IFT) systems to priority Border Patrol station Areas of Responsibility (AoR). It is anticipated that the IFT contract will be awarded by the beginning of FY 2014 and deliveries will start by FY 2015.

The TACCOM program was initially intended to upgrade sectors on the southwest border, but was later expanded to include all CBP sectors. It consists of 20 Focus Areas, each with approximately 50 to 60 communication sites. These geographical Focus Areas were established to ensure a uniform baseline of technology across the CBP TACCOM LMR infrastructure. CBP is now focused on completing ongoing modernization projects in 5 of the 20 geographic Focus Areas (Tucson, Yuma, Houlton, El Paso, and Rio Grande Valley) and conducting a Digital-in-Place (DIP) “capstone” replacement of any remaining legacy analog Land Mobile Radio (LMR) equipment in the remaining sectors. To date, modernization projects in Tucson and Yuma focus areas have been completed, while the Houlton, Rio Grande Valley, and El Paso focus areas are under development and scheduled to be completed in FY 2013. In addition, DIP replacement will ensure a uniform baseline technology across the CBP TACCOM infrastructure, and will also position CBP for migration to next-generation TACCOM capabilities.

In FY 2012, DoD notified DHS that DoD would no longer operate the Tethered Aerostat Radar System (TARS) Program, as it was no longer a mission requirement for the Department. TARS are fixed site, aerostat-based radar systems which provide air surveillance across the entire U.S.-Mexico Southern border (approximately 2,000 miles). They are designed to detect compliant and non-compliant low-

altitude aircraft attempting to smuggle narcotics or other contraband into the U.S. Because TARS is the only capability that provides visibility to identify this type of aircraft along the southern border, DHS and CBP agreed to take over the program beginning in FY 2014.

The BSFIT technology portfolio, including the Arizona Technology Plan, is managed by the Office of Technology Innovation and Acquisition (OTIA) Program Management Office (PMO). BSFIT technology programs deliver detection and surveillance systems to both the southwest and northern borders – increasing situational awareness and assisting law enforcement personnel in identifying and resolving illegal activity. The TI program is managed by the Office of Administration’s Border Patrol Facilities and TI (BPFTI) PMO, and consists of projects that provide persistent impedance (fencing, etc.) and agent access (roads, drainage, etc.) to the border. TACCOM is managed by the Office of Information and Technology (OIT) Wireless Systems Program Office (WSPO), and provides expanded digital, secure communications capabilities that enable CBP agents and officers to coordinate activities, thereby enhancing agent safety.

For additional information regarding the BSFIT technology portfolio, see the FY 2014-2017 Multi-Year Investment and Management Plan. This Plan was compiled pursuant to language set forth in the *Fiscal Year (FY) 2012 Department of Homeland Security (DHS) Appropriations Act (P.L. 112-74)* and its accompanying Joint Explanatory Statement and House Report 112-91. The Multi-Year Plan highlights CBP’s surveillance and communications investment projects.

B. Budget Activities:

The BSFIT appropriation consists of two major accounts, or Program, Projects, and Activities (PPA): 1) Development and Deployment, and 2) Operations and Maintenance.

- Development and Deployment (D&D):
 - D&D funds provide for the activities associated with acquisition programs, such as procurement, technical, and program management support; systems engineering services; advanced technology development; operational test and evaluation support; and environmental planning, assessment, and mitigation activities associated with deploying technology.
- Operations and Maintenance (O&M):
 - O&M funds provide logistics support – supply, maintenance, repair, and training services – to operate and maintain all border surveillance technology deployments, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, inventory records management, field services, and training.

C. Budget Request Summary:

DHS requests \$351,454,000 for the FY 2014 BSFIT appropriation. The FY 2014 BSFIT request will fund acquisition, delivery, and sustainment of prioritized border security capabilities and services for CBP’s front-line agents and officers. Funding will also be used to respond to changing threats and

evolving operational needs. The Department's FY 2014 BSFIT request includes funding for the following:

1. **Integrated Fixed Towers (\$85.276 million)**—Southwest border technology investments remain focused in Arizona, using existing, proven technology tailored to the distinct terrain and population density of each border region. The FY 2014 appropriation request continues to fund the acquisition of IFT systems, as described in the Arizona Technology Plan. These systems will be classified as a Non-Developmental Items (NDI) and CBP will use a full and open competition acquisition strategy with a Firm Fixed Price contracting vehicle.
2. **Tactical Communications Modernization (\$54.300 million)**—The TACCOM program is managed by WSPO, which is responsible for upgrading the LMR systems used by CBP agents and officers. TACCOM systems are the primary communications lifeline for more than 44,000 agents and officers and are critical to the success of CBP missions and operations. TACCOM capabilities are fundamental tools that permit CBP agents and officers to coordinate their activities in all environments, thus increasing agent safety and effectiveness. In FY 2014, the TACCOM program is projected to continue DIP deployments nationwide and complete the decommissioning of legacy systems for the El Paso, Rio Grande Valley, and Houlton Border Patrol sectors.
3. **Tethered Aerostat Radar System (\$37.400 million)**—The TARS program has assisted CBP with interdicting suspect aircraft for more than 20 years and is a critical component of CBP's bi-national narcotics and contraband interdiction operations with Mexico. DHS is scheduled to take over ownership of the TARS program as part of a transfer from DoD in FY 2014. The appropriation request will provide O&M support in FY 2014 for the TARS units that are presently in operation along the U.S. Southern border.
4. **Program and Technical Support (\$43.069 million)**—Provides for activities related to technical and program support, such as systems engineering services, contractor PMO support, advanced technology road mapping, and modeling and simulation.
5. **Operations and Maintenance of Fielded Systems (\$131.409 million)** —Provides logistics support, supply, maintenance, repair, and training services to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

1. The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.
2. FY 2012 FTE displayed in the Congressional Justification for CBP are Revised Enacted.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:
Program Management
Program Performance Justification
 (Dollars in Thousands)

PPA: Program Management

	Perm. Pos	FTE	Amount
2012 Revised Enacted	205	205	54,375
2014 Adjustments-to-Base	(205)	(205)	(54,375)
2014 Current Services	-	-	-
2014 Total Request	-	-	-
Total Change 2012 to 2014	(205)	(205)	(54,375)

CBP requests \$0 million for Program Management. The request includes:

- Decrease of -\$27.327 million for an adjustment in Program Management PPA and realign funding to Development & Deployment PPA;
- Decrease of -\$23.627 million for a transfer to realign OTIA funding to Salaries and Expenses
- Decrease of -\$3.247 million for a transfer to realign OTIA funding: TI
- Decrease of -\$.174 million for consolidation of rent into the Rent PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

In response to direction in the conference report accompanying the *FY 2012 DHS Appropriations Act* (P.L. 112-74) that “all funds for OTIA shall be requested within the “Salaries and Expenses” appropriation for fiscal year 2013,” CBP has taken two actions. Starting in FY 2014, all OTIA Government FTE and associated expenses were moved from the BSFIT PM PPA into either the S&E HQ M&A PPA or, in the case of those associated with tactical infrastructure, to Facilities Management. This funding restructuring complies with Congressional guidance and provides Congress a clearer, consolidated view of Government FTE throughout CBP. This also removes ambiguity regarding OTIA authority to use its organizational resources across CBP (i.e. non-BSFIT programs) to fulfill its role as CBP Component Acquisition Executive (CAE).

**Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:
Operations and Maintenance
Program Performance Justification
(Dollars in Thousands)**

PPA: Operations and Maintenance

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	118,348
2014 Adjustments-to-Base	-	-	72,671
2014 Current Services	-	-	191,019
2014 Total Request	-	-	191,019
Total Change 2012 to 2014	-	-	72,671

CBP requests \$191.019 million for Operations & Maintenance. The request includes:

- Increase of \$37.4 million for the transfer of TARS O&M from DOD;
- Increase of \$21.5 million for annualization of prior deployment;
- Increase of \$14.9 million for non-recur 2012 Reprogramming
- Increase of \$5.035 million for an increase to the Operations & Maintenance PPA;
- Decrease of -\$3.0 million for Tactical Infrastructure O&M;
- Decrease of -\$3.0 million for RVSS OIT Legacy O&M; and
- Decrease of -\$ 164 thousand for Utilities Consolidation.

CURRENT SERVICES PROGRAM DESCRIPTION:

O&M funds support recurring requirements related to life cycle logistics—supply, maintenance, repair, and training services—to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, electrical systems, and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be clearly identified and planned. Finally, O&M provides M&R services for the real property associated with tower-based systems, including M&R of the site itself, mechanical and electrical components, fuel tanks, racks, and other components, and may even include the replacement of the entire physical tower itself.

Legacy RVSS are useful tools to the Border Patrol as they are already deployed and used across the southwest border. However, these legacy systems have outlived their expected life cycle, and

requirements for repairs have increased. CBP will undergo a review to determine an appropriate refresh plan for these assets.

TI helps U.S. Border Patrol (USBP) execute CBP missions. A decrease in O&M funding may impact the extent to which CBP will be able to repair roadways; remove debris and vegetation; and maintain fences, gates, lighting, and towers. Some operational impacts could result from this funding decrease, such as: impeding agent access to various areas along the border, and impacting agents' visibility in the field. CBP will accept the potential risks associated with the reduction in O&M funding for both Legacy RVSS systems and TI.

The Tethered Aerostat Radar System program is a multi-mission capability that supports both counter-narcotic enforcement and air domain awareness missions. As a transfer from DoD, TARS funding of \$37.4 million will provide O&M support in FY 2014 for the eight TARS units currently in operation along the U.S. border. Six sites are located on the Southern border with one in Florida and one in Puerto Rico. Program funding would support full operations and maintenance for TARS sites via a contract that provides for: a 24/7 TARS Control Center, logistics center, and depot support for government-furnished, prime mission, and ancillary equipment; minor equipment sustainment modifications and upgrades; and acceptance testing for all aerostats. Funding also allows for the purchase of special purpose vehicles, helium, utilities, support agreements, leases, as well as the delivery of surveillance data. The TARS program will provide a unique look-down capability from an altitude of 10,000 feet permitting a vast detection range of 180 nautical miles with a single system. No other capability exists today that provides visibility at this altitude level.

PROCUREMENT ACTIVITY

FY 2012 Activity Funding \$8,488	FY 2013 Activity Funding \$9,988	FY 2014 Activity Request \$22,294
Block 1	The main mission for Block 1 Sustainment is increased situational awareness and persistence surveillance across the Tucson and Ajo Stations within the Tucson Sector. Block 1 technology supports CBP agents and officers to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 covers approximately 53 miles of international border in Arizona. Funding for the Block 1 is funded out of this PPA and the Salaries and Expenses Headquarters Management and Administration (HQ M&A) at the POE (HQ01), and HQ M&A between the POE (HQ02). Total funding for this procurement activity is \$9,770 in FY 2012, \$11,270 in FY 2013, and \$22,734 in FY 2014.	

FY 2012 Activity Funding \$62,000	FY 2013 Activity Funding \$62,000	FY 2014 Activity Request \$48,994
Facilities Management & Engineering Tactical Infrastructure (FM&E TI)	The primary goal of the Tactical Infrastructure Program (TIP) is to support the operational requirements of the Office of Border Patrol (OBP) in an effort to directly serve the CBP mission of preventing illegal cross-border activity. The TIP provides the following activities in order to maximize the effectiveness of CBP personnel: Maintaining tactical infrastructure (TI), including fielded pedestrian and vehicle fencing; roads; lighting; low water crossings; bridges; drainage and grate systems; marine ramps; vegetation/debris removal; and other similar efforts, as per Border Patrol's (BP) operational needs. TIP projects are crucial in impeding and denying illicit cross-border activities, while also increasing visibility and access along the border for BP agents.	
FY 2012 Activity Funding \$0	FY 2013 Activity Funding \$0	FY 2014 Activity Request \$7,910
Integrated Fixed Towers (IFT)	IFT is a system that provides automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, IFTs equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest. With an IFT system, a single COP operator can maintain persistent surveillance over a large area whereas previously, multiple agents exposed to threats were required to provide coverage in the same amount of area. Funding for the Integrated Fixed Towers is funded out of this PPA and the HQ01 at the POE, and HQ01 between the POE. Total funding for this procurement activity is \$119,394 in FY 2012, \$119,394 in FY 2013, and \$87,322 in FY 2014.	
FY 2012 Activity Funding \$13,000	FY 2013 Activity Funding \$13,000	FY 2014 Activity Request \$14,300
Tactical Communications (TACCOM) Modernization	CBP is responsible for securing the nation's borders against illegal entry of people and goods while facilitating legitimate travel and trade. To support this mission, CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal government. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where their radio is often their only communications channel to coordinate activities or summon assistance. By improving coverage, capacity,	

	<p>reliability, and encryption, the modernization effort provides critical communications support to the agents and officers who secure the nation's borders. CBP requires a uniform technology platform. LMR systems in use in CBP cover a variety of technology platforms. Bringing the enterprise to a common digital platform will simplify and improve operations, training, interoperability between sectors, and systems sustainment, as well as allowing for a Radio Over IP (ROIP) platform that will pave the way for interoperability solutions along and across the borders. Reliability and Availability. CBP requires high reliability and availability of LMR systems. Existing analog hardware has been in service since the late eighties and is failing at an increasing rate resulting in more downtime. Funding for the TAC-COM Modernization is funded out of this PPA and the HQ01 at the POE and HQ01 between the POE. Total funding for this procurement activity is \$57,783 in FY 2012, \$67,783 in FY 2013, and \$78,854 in FY 2014.</p>	
FY 2012 Activity Funding \$6,500	FY 2013 Activity Funding \$7,500	FY 2014 Activity Request \$6,200
Northern Border Remote Video Surveillance System (NB-RVSS)	<p>The NB-RVSS systems consist of day/night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist. Funding for the NB-RVSS is funded out of this PPA and the HQ02 Rent and FM02 FO&M. Total funding for this procurement activity is \$6,927 in FY 2012, \$7,927 in FY 2013, and \$6,637 in FY 2014.</p>	
FY 2012 Activity Funding \$1,000	FY 2013 Activity Funding \$1,000	FY 2014 Activity Request \$16,600
Remote Video Surveillance System (RVSS)	<p>A RVSS is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities. At the current time, FY11 funding is being executed in acquisition of the RVSS system. Funding for the RVSS is funded out of this PPA and the HQ01 at the POE and HQ01 between the POE. Total funding for this procurement activity is \$2,282 in FY 2012, \$2,282 in FY 2013, and \$17,916 in FY 2014.</p>	

FY 2012 Activity Funding \$4,000	FY 2013 Activity Funding \$4,500	FY 2014 Activity Request \$5,600
Mobile Surveillance Capabilities (MSC)	<p>The MSC program is an integrated suite of sensor equipment attached to the flat skid cargo bed of a Government-furnished Ford F-450 truck, with an operator workstation located inside the truck cabin. The purpose of MSC is to provide mobile area surveillance in remote rural areas over a range of 8 to 12 kilometers. This allows CBP to adjust the location of its surveillance capabilities to keep pace with the ever-changing border threat. The capabilities of MSC are detection, identification, and tracking of items of interest (IOIs) until successfully culminating in a Law Enforcement conclusion. Sensory equipment may include electro-optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication systems. Funding for the Mobile Surveillance Capabilities is funded out of this PPA and the HQ01 at the POE and HQ01 between the POE. Total funding for this procurement activity is \$4,570 in FY 2012, \$5,070 in FY 2013, and \$5,891 in FY 2014.</p>	

SUMMARY OF FY 2014 O&M FUNDING LEVELS:

The following table is a summary of the O&M funding levels anticipated for the BSFIT Portfolio for FY 2014. As previously stated, O&M funding will be used for M&R services and to support recurring requirements based on life cycle logistics. O&M costs are forecasted to increase over the next several years in anticipation of technology deployment. O&M costs are also expected to increase due to the CBP adoption of the TARS Program, which was previously managed through DoD.

Summary of FY 2014 O&M Funding Levels (\$ in Thousands)	
Project	FY 2014 Funding
Fielded Systems	
Block 1	22,294
RVSS Legacy	10,849
Integrated Logistics Support Core	2,852

Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:
Development and Deployment
Program Performance Justification
(Dollars in Thousands)

PPA: Development and Deployment

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	212,377
2014 Adjustments-to-Base	-	-	(168,073)
2014 Current Services	-	-	44,304
2014 Program Change	-	-	116,131
2014 Total Request	-	-	160,435
Total Change 2012 to 2014	-	-	(51,942)

CBP requests \$160.435 million for Development and Deployment. The request includes:

- Increase of \$77.366 million for an enhancement of IFT;
- Increase of \$40.0 million for Tactical Communication;
- Increase of \$27.327 million for realignment from the Program Management PPA;
- Decrease of -\$192.653 million for FY 2012 enacted BSFIT D&D;
- Decrease of -\$2.747 million for realignment of OTIA funding to Salaries and Expenses (S&E);
- Decrease of -\$1.235 million for Environmental Mitigation.

CURRENT SERVICES PROGRAM DESCRIPTION:

D&D funds new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras, to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (i.e. wheeled vehicles), and on the ground.

Additionally, D&D provides for related activities, such as technical support; systems engineering services; prime contractor program management; advanced technology development; Operational Test & Evaluation support; and environmental planning, assessment, and mitigation activities associated with deploying technology and TI.

D&D investment funding is requested as a program change, causing a portion of D&D funding to be recorded as a "new initiative." The adjustments-to-base reflect the non-recurrence of previous D&D program changes and funds previously requested through the Program Management PPA. The FY 2014 request consists of two D&D program increases – the IFT program and the TACCOM program.

FY 2014 funding for the Arizona Technology plan will be used to procure IFT deployments in Arizona. In addition, TACCOM will receive funding to continue with the DIP project and decommission legacy systems for the El Paso, Rio Grande Valley, and Houlton Border Patrol sectors. IFT will provide persistent surveillance and Command, Control, Communication, Coordination, and Intelligence capabilities needed by CBP. It will provide automated, wide-area surveillance in order to detect, track, identify, and classify illegal entries. This information will allow Border Patrol agents to respond in a timely and efficient manner. Furthermore, the DIP program will complete a one-for-one replacement of all narrowband systems nationwide to P25 standards and Advanced Encryption Standard (AES) encryption. This will enhance Border Patrol effectiveness by providing increased capability, security, and interoperability. More information about these programs is included in Section IV: Program Justification Changes.

SUMMARY OF FY 2014 D&D FUNDING LEVELS:

The following table is a summary of the D&D funding levels anticipated for the BSFIT Portfolio for FY 2014. As previously stated, D&D funding will be used for creating, testing, and deploying detection and surveillance technology systems; conducting environmental planning, assessment, and mitigation activities; and modernizing TACCOM. In addition, CBP will provide for technology management.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Integrated Fixed Towers (IFT)
PPA: Development and Deployment
Program Increase: Positions 0, FTE 0, Dollars \$77,366

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	9,948
Program Increase							-	-	77,366
Total Request	-	-	119,394	-	-	119,394	-	-	87,314

Description of Item

The FY 2014 request for \$77.366 million is designed to support the acquisition and delivery of one or more IFT Areas of Responsibility (AoR) system deployments.

Justification

\$77.366 million is requested to support the deployment of effective surveillance technology along the highest trafficked areas of the southwest border in Arizona. Funds will be used to procure and deploy commercially available technology tailored to the operational requirements of the Border Patrol, distinct terrain, and population density of each border region. IFT will provide automated, wide-area surveillance to assist Border Patrol agents in responding to illegal entries in a timely and efficient manner. It is projected that the IFT contract will be awarded by FY 2014 and deliveries will start by FY 2015.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funds requested will be used to respond to the operational needs of the Border Patrol in the border environment through surveillance and detection to facilitate apprehension.

IFT technology is a critical force multiplier which will increase both agent safety and operational effectiveness. Through detecting and identifying threats from a safe distance, Border Patrol Agents will be able to determine the time, method, and location of an interdiction – providing Agents with an operational advantage. Block 1 fixed tower systems have illuminated significant activity levels in the Border Patrol's Ajo AoR – an expansive remote area which was previously known for relatively high levels of trafficking and smuggling. Border Patrol Agents in the Ajo AoR are now able to respond to threats more effectively due to the technology; and, as a result, the quantity of apprehensions and

contraband seizures increased. Like the Block 1 fixed tower systems, CBP expects the IFT acquisition to enhance the security of high-traffic corridors that are tactically advantageous to smugglers and traffickers by providing persistent, wide-area surveillance.

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	25,183
Program Increase							-	-	40,000
Total Request	-	-	57,783	-	-	67,783	-	-	65,183

Description of Item

The FY 2014 request includes \$40 million in Development and Deployment funding that will be used to:

- Complete the decommissioning of legacy systems for the El Paso, Rio Grande Valley, and Houlton Border Patrol sectors;
- Continue implementation of Digital in Place (DIP) project; and
- Provide Wireless Systems Program Office (WSPO) support, such as contractor support staff, supplies, leases, travel, etc.

Justification

CBP’s Land Mobile Radio (LMR) TACCOM systems are the primary communications lifeline for more than 44,000 agents and officers, and are critical to the success of CBP missions and operations. The TACCOM program upgrades and expands legacy analog hand-held radio communications to provide new digital technology with Advanced Encryption Standard (AES) encryption protection, expanded coverage and capacity, and enhanced interoperability.

This project will use funds formerly planned for the Laredo Focus Area Modernization to refresh all remaining CBP analog land mobile radio equipment nationwide to the digital P25 interoperability standard with AES and Over the Air Rekeying (OTAR) capabilities. This refresh will mean more reliable communications and interoperability for front-line agents and officers. It will also serve as the baseline configuration from which to continue modernization under TacNet. This approach addresses CBP’s immediate need for a P25 AES platform and would allow CBP to achieve multiple benefits from working from a common, unified, and digitized platform by FY 2015. For instance, incorporating the P25 open standard would promote interoperability with Federal, state, local, tribal, territorial, and international law enforcement officers – utilizing latest secure voice communications

encryption (AES), location-based situational awareness through built-in GPS and improving operational availability.

TACCOM will now focus on decommissioning legacy systems for the El Paso, Rio Grande Valley, and Houlton Border Patrol sectors and conducting a DIP “capstone” replacement. DIP will not provide any of the coverage or capacity enhancements provided by the other modernization projects, but will ensure a uniform baseline technology across the CBP TACCOM infrastructure. Moreover, it will position CBP for migration to next-generation tactical communications capabilities. Through TacNet, CBP is analyzing the most operationally effective and cost efficient way to provide data and video communications to the current voice-only capability as the next generation of tactical communications to support current, emerging, and future requirements.

Impact on Performance (Relationship of Increase to Strategic Goals)

The TACCOM Modernization Program is upgrading tactical communications radio systems employed by CBP Border Patrol Agents, Air Interdiction Agents, Marine Interdiction Agents, and CBP Officers nationwide to provide a robust, open architecture, P25-based system.

The LMR systems are the primary communications lifeline for agents and officers and are critical to their safety, as well as the success of their missions and operations. Upgrades will benefit CBP law enforcement agents and officers by providing increased capability, including security, and improved interoperability. These improved abilities will enhance agent and officer effectiveness and enhance Border Patrol’s mobile and flexible response capabilities. For instance, incorporating the P25 open standard would promote interoperability with federal, state, local, tribal, territorial, and international law enforcement officers. Radio equipment that demonstrates compliance with P25 is able to meet a set of minimum requirements to fit the needs of public safety. The P25 standard was developed with Federal, state, and local representatives and Telecommunications Industry Association (TIA) governance. It was created by, and is intended for, public safety professionals. From this common platform, which is based on open standards, the TACCOM program facilitates interoperability with law enforcement agency partners as required by the CBP mission and defined by the communications requirements of the local OBP, OFO, and OAM branches. This also ensures that CBP’s LMR systems align with future DHS-wide wireless systems.

CBP’s approach to providing tactical voice communications capabilities to end-users has evolved over the years. The immediate need for a P25 AES platform would allow CBP to achieve all the operational, training, and sustainment benefits of working from a common, unified, and digitized platform by the end of FY 2015. The need for a more lifecycle cost-effective approach to tactical communications has driven CBP to pursue an AoA for the next generation of tactical communications delivery, and to re-scope its own TACCOM Modernization Program to minimize LMR investments while meeting critical near-term communications needs. The TACCOM investment will have a lifecycle of at least 10 years, and thus will support CBP law enforcement end-users through the transition period needed to establish a next-generation broadband network.

Department of Homeland Security

Border Security Fencing, Infrastructure, and Technology:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: Environmental Mitigation
PPA: Development and Deployment
Program Decrease: Positions 0, FTE 0, Dollars \$(1,235)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,000
Program Decrease							-	-	(1,235)
Total Request	-	-	3,000	-	-	3,000	-	-	1,765

Description of Item

The \$1.235 million reduction represents a decrease in FY 2014 to bio-monitoring, re-vegetation efforts, habitat restoration and reintroduction, and the implementation of construction alterations.

Justification

In addition to manpower and technology increases, Tactical Infrastructure (TI) serves as an additional tool that allows CBP Border Patrol agents to do their job more effectively. Constructing, operating and maintaining tactical infrastructure is a key aspect of CBP’s efforts to fulfill its mission to secure the border. Roads, low-water crossings, temporary and permanent vehicle barriers, pedestrian barriers, stadium lighting, fencing, and bridges provide access, increase safety and enhance our law enforcement capabilities along the border. CBP has been steadfast in building, operating, and maintaining TI in an environmentally responsible manner. The Agency collaborates with local government, state, tribal, and Federal land managers, as well as with the interested public, to identify, understand, and, to the extent possible, minimize impacts to the environment. CBP will continue to promote environmental stewardship with the D&D funding provided in FY 2014.

Impact on Performance

CBP works closely with the Department of Interior (DOI) and the Department of Agriculture (USDA), collaborating to fulfill CBP’s enforcement mission while respecting and enhancing the environment. Funding for environmental mitigation is managed by CBP as part of the BSFIT appropriation.

Completion of infrastructure along the border, as well as identifying and minimizing potential impacts, has been a high priority for DHS and CBP. CBP is committed to responsible environmental planning, and will continue to work with DOI and USDA to maintain the Agency’s commitment to

environmental and cultural stewardship. The decrease in environmental mitigation funding will reduce bio-monitoring, re-vegetation efforts, habitat restoration and reintroduction, and the implementation of construction alterations. CBP will monitor the impact of this program change on a regular basis upon and after implementation, and continuously seek to make alternative changes/solutions in order to maintain appropriate capability needs along the southwest and northern borders and ensure that mission requirements are met.

V. Exhibits and Other Supporting Material
A. Justification of Proposed Legislative Language

For expenses for border security fencing, infrastructure, and technology, [\$327,099,000] \$351,454,000¹, to remain available until September 30, [2015] 2016². *Note.--A full-year 2013 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 112-175). The amounts included for 2013 reflect the annualized level provided by the continuing resolution.*

¹ ...[\$327,099,000] <u>\$351,454,000</u> ...	Dollar change only. No substantial change proposed.
² ... [2015] <u>2016</u> ...	Fiscal year change only. No substantial change proposed.

Operations and Maintenance Mission Statement

O&M funds support recurring requirements related to life cycle logistics-supply, maintenance, repair, and training services-to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training. In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, electrical systems, and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be clearly identified and planned. Finally, O&M provides M&R services for the real property associated with tower-based systems, including M&R of the site itself, mechanical and electrical components, fuel tanks, racks, and other components, and may even include the replacement of the entire physical tower itself.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	0	0	\$75	\$75

In 2014, an increase of \$75,000 is for the Tethered Aerostat Radar System.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$118,348	\$131,045	\$158,792	\$40,444

In 2014, a decrease of -\$164,000 is for utilities consolidation. In 2014, a decrease of -\$3,000,000 is for RVSS OIT legacy O&M. In 2014, a decrease of -\$3,000,000 is for Tactical Infrastructure O&M. In 2014, an increase of \$37,325,000 is for the Tethered Aerostat Radar System. In 2014, an increase of \$4,248,000 is to non-recur one-time 2012 reprogrammings. In 2014, an increase of \$5,035,000 is for an increase to the Operations & Maintenance PPA.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	0	0	\$32,152	\$32,152

In 2014, an increase of \$32,152,000 is an Annualization of O&M for 2013 BSFIT Deployments.

Development and Deployment Mission Statement

D&D funds support new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras, to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (i.e. wheeled vehicles), and on the ground. Additionally, D&D provides for related activities, such as technical support; systems engineering services; prime contractor program management; advanced technology development; Operational Test & Evaluation support; and environmental planning, assessment, and mitigation activities associated with deploying technology and TI.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Construction and Facilities Management

I. Appropriation Overview

A. Mission Statement for Construction and Facilities Management:

The Construction and Facilities Management (C&FM) account provides the resources for CBP's Construction and Facilities Management Program, which delivers the critical facilities and associated infrastructure and program support services that enable CBP's mission of protecting America and its citizens while, facilitating the flow of legitimate trade and travel. The account funds the personnel and tools to plan, acquire, manage, and sustain CBP's multifaceted facilities portfolio across the acquisition life cycle. This allows CBP to determine the most effective facilities solution and strategy to fulfill operational priorities in support of agents, officers, and pilots on the frontline securing the Nation's borders. CBP occupies more than 4,000 buildings and structures, over 25 million square feet, and over 4,700 acres of land across the United States, consisting of CBP owned and leased facilities, U.S. General Services Administration (GSA) owned and leased facilities, and other facilities acquired through interagency or other agreements.

Mission Statement

CBP is the frontline border security agency within the Department of Homeland Security (DHS) charged with the priority mission of preventing terrorists and terrorist weapons from entering the United States, while also facilitating the flow of legitimate trade and travel. Approximately 61,000 CBP employees manage, control, and protect the Nation's borders at and between the official ports of entry (POE). CBP is responsible for protecting more than 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline.

The success of CBP's mission depends heavily on the facilities and infrastructure that support the operational and administrative requirements of the United States Border Patrol (USBP), Office of Air and Marine (OAM), the Office of Field Operations (OFO), and the mission support offices, both at headquarters and in the field. The C&FM account provides consolidated resources for CBP's Construction and Facilities Management Program, which encompasses the entire CBP facilities portfolio of owned and leased real property through all stages of a property asset's life cycle. This account addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission-driven operational needs. It accommodates increasing capacity demands associated with new agent, officer, pilot, support, and asset deployments, and provides resources to correct deficiencies within existing facilities and structures.

CBP requires a diverse, multifaceted facilities portfolio to meet its broad range of operational mission requirements and operating environments, ranging from the cold of the northern border to the intense heat of the southern border in both urban and remote areas. These physical assets serve as economic gateways and critical enforcement tools to counter a wide range of threats to the Nation. The facilities and associated infrastructure supporting CBP's operational and mission support components include, but are not limited to:

Office	CBP Facilities Portfolio	Facility Space Based on Square Feet ¹
Border Patrol Facilities	<ul style="list-style-type: none"> • 139 Border Patrol Stations • 133 Checkpoints • 20 Sector Headquarters • 10 Forward Operating Bases 	25%
Air and Marine Facilities	<ul style="list-style-type: none"> • 23 Air Branches • 11 Air Units • 26 Marine Units • 6 National Facility Centers • 2 Operations Centers • 3 Unmanned Aerial Systems (UAS) Operation Centers 	11%
Field Operations Facilities	<ul style="list-style-type: none"> • 261 Air Ports of Entry • 168 Land Ports of Entry (LPOE) • 203 Sea Ports of Entry • 20 Field Offices 	47%
Mission Support Facilities	<ul style="list-style-type: none"> • 848 Tactical Communications Towers • 296 Housing Units • Canine Training Facilities • Numerous administrative and training facilities, and laboratories • Advanced Training Center in Harpers Ferry, WV 	17%

The GSA and direct lease rent associated with these facilities is funded in the Salaries and Expenses appropriation under the Rent Program, Project, and Activity (PPA).

B. Budget Activities:

Resources for CBP’s construction and facilities program are consolidated in the C&FM appropriation and the Salaries & Expenses (S&E) Rent PPA. The C&FM account consists of two PPAs, which are discussed in detail below: the Facilities Construction and Sustainment (FC&S) PPA and the Program Oversight and Management (PO&M) PPA. Together, the three PPAs capture CBP’s costs for facilities, program support, and rent costs.

Facilities Construction and Sustainment

The FC&S PPA provides resources for all necessary activities supporting the construction, acquisition, leasing, sustainment, and management of CBP’s real property program and facilities portfolio. This includes, but is not limited to: program, facilities, and portfolio planning activities; environmental mitigation and compliance requirements; real estate acquisition and disposal activities; construction

¹ CBP owns 23 percent of its diverse portfolio of facilities, which spans over 25 million square feet nationwide. The remaining 77 percent of CBP facilities are provided through GSA-owned federal and commercial leased space, direct leases, free space, and interagency agreements.

and demolition of real property assets; property improvements, including modernization, expansion, and alterations of facilities; architecture and engineering services; project management support; infrastructure connectivity and sustainment activities, such as building operations, maintenance, and repairs. Resources for rent and rent-related costs, such as security services provided by the Federal Protective Service, are included in the S&E appropriation Rent PPA.

The FC&S PPA also includes funding to support CBP tunnel remediation, the process whereby discovered cross-border tunnels are physically secured and rendered unusable. The remediation process includes initial analyses, environmental services, project oversight and support, obtaining rights of entry, engineering/surveying, filling/plugging, inspection/acceptance, and reporting of associated status. The table below displays the number of tunnels that CBP remediated along the southwest border from Fiscal Year (FY) 2010 – 2012.

*Tunnels Remediated – FY 2010-2012		
FY 2010	FY 2011	FY 2012
16	18	13

*The table includes all types of illicit cross-border tunnels: point-to-point tunnels; tunnels connecting to existing municipal drain systems; and complex, as well as simplistic, tunnel variations.

Effective October 1, 2013, GSA and CBP are planning to implement a delegation of authority of maintenance, repairs, operations and capital requirements for 101.5 GSA-owned LPOEs from GSA to CBP. Under this delegation CBP will no longer pay rent to GSA for these delegated facilities and instead will use these funds to perform the property and asset management functions. To support costs of facilities services for the GSA-owned LPOEs under the delegation of authority, CBP proposes a transfer of existing resources from the S&E Rent PPA. The overall goal of transferring the real property responsibilities for these unique facilities that are specifically designed to facilitate CBP’s mission from GSA to CBP is to improve and integrate border security through the alignment of infrastructure with mission and operational priorities, increase responsiveness and flexibility to meet the evolving DHS mission, improve control of reinvestment decisions, consolidate the capital planning and budgetary processes, and integrate information and inspection technology programs.

Program Oversight and Management

The PO&M PPA provides salaries and benefits for Government personnel, planning and program services and support, as well as environmental and energy management programs and studies. This PPA enables Government and support personnel to successfully implement, at the enterprise-level, all program objectives and ensures strategic alignment across the CBP Construction and Facilities Management Program. Additionally, these resources fund the necessary programs to support enterprise-level tools, planning, processes, and procedures, which enable effective and efficient management of CBP’s diverse, multifaceted facilities portfolio, as well as CBP rent and tactical infrastructure.

C. Budget Request Summary:

CBP requests \$471,499,000 and 633 full-time equivalents (FTE) employees for the FY 2014 C&FM appropriation. This request includes a net adjustments-to-base increase of \$236,590,000, which reflects a transfer of existing resources for centralized facilities sustainment and utilities management, facilities management personnel, and the delegation of authority of facilities services for GSA-owned LPOEs from GSA to CBP. In addition, the request includes a net program decrease of \$1,687,000.

D. Legislative Proposal:

Enhanced Partnership Authority for Land Ports of Entry. – This proposed legislation would allow CBP to accept donations of real and personal property (including monetary donation) and non-personal services from private parties and state and local government entities for the purposes of constructing, altering, operating, or maintaining a new or existing land port of entry facility. The growing demand for facilities, especially on the southwest border, the ongoing modernization needs of CBP’s land port-of-entry portfolio, and the hold on federal funding via GSA’s Federal Buildings Fund for land POE projects since FY 2010, have led CBP to evaluate alternative methods to finance these major modernization and construction projects.

The proposed legislation addresses the limitations of CBP’s existing authorities by broadly encompassing all land POE project-related costs regardless of port ownership. The legislation mitigates the Government cost-burden of land POE construction and modernization by enabling CBP to accept donations of real and personal property (include monetary donations) and non-personal services from private, state, or local entities.

E. Efficiencies and Reductions:

Supplies and Materials Efficiencies

\$1.6 million

Efficiencies [OFPP Directed Purchasing Savings] (\$1.6 million) – In a November 2011 Memorandum, the Office of Federal Procurement Policy directed federal agencies to reduce spending by 15 percent in FY 2011-2012 on management support service contracts, including engineering & technical services, acquisition services, information technology services, and program management support services. For FY 2013, DHS identified an additional \$31.5 million reduction for these service contracts. The \$31.5 million in savings will be allocated across CBP based on FY 2010 spend data.

Other Contract Services Efficiencies and Reductions

\$10.8 million

Efficiencies [OFPP Directed Purchasing Savings] (\$1.7 million) – In a November 2011 Memorandum, the Office of Federal Procurement Policy directed federal agencies to reduce spending by 15 percent in FY 2011-2012 on management support service contracts, including engineering & technical services, acquisition services, information technology services, and program management support services. For FY 2013, DHS identified an additional \$31.543 million reduction for these service contracts. The \$31.5 million in savings will be allocated across CBP based on FY 2010 spend data.

Facilities, Maintenance, Repairs, and Operations (\$9.1 million) – The Facilities, Maintenance, Repairs, and Operations reduction of \$9.1 million will primarily affect the existing CBP facilities portfolio and may extend to leasehold improvements of GSA leased spaces. Planned facilities management and

sustainment activities, such as maintenance, repairs, operations, alterations, and lease renewals, will be delayed, deferred, or foregone, as a result of this reduction. To minimize the effect on critical operational needs, CBP will assess its facilities portfolio to identify and prioritize core mission and facilities requirements.

2014 Total Request	-	-	385,398
Total Change 2012 to 2014	-	-	202,898

CBP requests \$385.398 million for Facilities Construction and Sustainment. This request includes:

- An increase of \$183.876 million is for Land Port of Entry Delegation of Authority
- An increase of \$22.636 million is for Utilities Consolidation
- An increase of \$13.200 million is for Consolidation of National Targeting Center
- A decrease of -\$9.144 million is for Facilities Maintenance; Repairs; and Operations
- A decrease of -\$6.398 million is for 114 FM&E Insourcing Positions
- A decrease of -\$1.002 million is for 2012 OFO Positions for New Ports of Entry - Year 1
- A decrease of -\$270 thousand is for 2012 National Targeting Center - Year 1

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests \$385.398 million in FY 2014 for the FC&S PPA. This PPA supports the Construction and Facilities Management Program, which provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border, a primary requirement of CBP’s mission to prevent terrorists and terrorist weapons from entering the United States. It delivers critical logistical and operational support to agents, officers, pilots, and other CBP personnel that operate out of CBP’s facilities on a daily basis.

In FY 2014, the FC&S PPA will focus mainly on sustaining CBP’s existing real property inventory to keep CBP facilities in working order. Adequate sustainment is essential to maintain CBP’s expanded and modernized facilities portfolio, which has increased in owned square footage by 76 percent over the last five years. The portfolio has grown significantly to accommodate the unprecedented growth in operational personnel and asset deployments. Core sustainment requirements in FY 2014 will include basic building operations (e.g. custodial services, grounds services, trash and snow removal, and

utilities), maintenance and repairs (e.g. preventative maintenance and regional contracts, planned and unplanned emergency repairs, and tunnel remediation), and costs associated with leased space (e.g. moving costs for forced re-locations, physical security requirements, voice/data cabling infrastructure updates and configuration of space).

Procurement Activities

FY 2012 Activity Funding \$73,939	FY 2013 Activity Funding \$75,056	FY 2014 Activity Request \$101,829
Border Patrol Facilities: The Border Patrol Facilities Program (BFPF)	<p>The Border Patrol Facilities Program (BFPF) directly supports CBP’s Border Patrol agents and houses technology needed to fulfill CBPs mission. The program provides Border Patrol Stations, Sector Headquarters, Permanent Checkpoints, and Remote Forward Operating bases that are strategically placed near the areas of highest illegal activity which allows agents and special teams to respond quickly and maintain maximum time on patrol. The facilities are provided through new construction, lease acquisition, alterations, and maintenance, repairs, and operations, as well as rent and leasing activities. Operational impact, agent safety, cost effectiveness, and the conditions of existing facilities are evaluated to prioritize the investment in this program. The BFPF maintains, upgrades, and constructs facilities, including BP stations; sector headquarters; checkpoints; and remote forward operating bases. BFPF facilities presently accommodate approximately 21,000 agents, an increase of over 120% from FY 2005.</p> <p>Funding for the BFPF is funded out of this PPA and the HQ02 Rent and FM02 PO&M. Total funding for this procurement activity is \$135,263 in FY 2012, \$136,380 in FY 2013, and \$202,655 in FY 2014.</p>	
FY 2012 Activity Funding \$15,957	FY 2013 Activity Funding \$15,957	FY 2014 Activity Request \$223,854
OFO Facilities	<p>This Program oversees facilities and infrastructure management for the Office of Field Operations (OFO) to ensure the timely and effective planning, delivery, operation, and sustainment of the portfolio of facilities and infrastructure for OFO, as well as rent and lease management activities. It administers financial management, communications, data collection and reporting for all programs and projects related to the OFO facilities portfolio. The OFO Facilities Modernization Initiative will address the needs within CBPs port of entry facilities portfolio to fully support CBP operations. More specifically, this initiative will address serious deficiencies at land ports of entry such as dilapidated and undersized buildings, inefficient site configuration and congestion, and deferred maintenance. Using the \$420 million received from Congress under</p>	

	<p>the American Recovery and Reinvestment Act of 2009 (ARRA) for the modernization of CBP-owned LPOEs, CBP is completely replacing 31 of the agency’s 41 LPOEs, effectively addressing the critical CBP-owned facility needs. Built or modernized in the last two decades, the remaining CBP-owned inventory meets the agency’s present day operational requirements and does not require rehabilitation. CBP was able to accomplish the complete modernization of the portfolio for \$364 million. Upon completion of the modernization projects funded through ARRA, all CBP-owned ports will meet today and tomorrow’s operational standards, with the average age of the CBP-owned LPOEs being less than three years. Funding for the Land Ports of Entry Modernization is funded out of these PPAs: FM02 PO&M, APHIS, Immigration User Fee and HQ02 Rent. Total funding for this procurement activity is \$356,289 in FY 2012, \$359,250 in FY 2013, and \$429,469 in FY 2014.</p>	
<p>FY 2012 Activity Funding \$73,029</p>	<p>FY 2013 Activity Funding \$73,029</p>	<p>FY 2014 Activity Request \$45,507</p>
<p>Mission Support Facilities</p>	<p>The Mission Support Facilities (MSF) PMO develops, plans, executes, and sustains the facilities and infrastructure inventory necessary to support the mission of the CBP Mission Support Offices nationwide. These facilities include administrative offices, training centers, laboratories, warehouses, tactical communications sites, and consolidated/co-located facilities/campuses. The Mission Support PMO also manages CBP Consolidation/DHS Co-Location Facilities, Residential Housing, all National Capital Region Facilities and any Facilities impacted in a National Emergency. The focus of the MSF PMO is shifting from lease acquisition of new space for relocations or expansions for business partners to sustainability function managing maintenance and repair of owned facilities, administering leases of existing space, and reconfigurations where necessary to modify functional spaces to support additional staffing where expansions are no longer feasible. Acquisition of new space is limited to existing projects already underway, and the anticipated NTC expansion currently awaiting approval. The PMO is in the process merging the Advanced Training Facility into MSF, and absorbing the maintenance and operations functions at that location, including the management of the Base Operations Support Services contract for the ATC (Advanced Training Center). The PMO also manages tower leases and management of MRO functions for the Land Mobile Radio program which has now been fully transitioned from OIT. The PMO is also actively exploring ways in which to reduce the cost of our MRO programs and working with business partners to identify locations that offer potential opportunities to reduce our overall footprint through consolidation or alternate workplace strategies. The Increments/Units consist of needed upgrades and consolidation of Labs, Housing and Administrative</p>	

	<p>Facilities. Funding for the Mission Support Facilities is funded out of this PPA, FM02 PO&M, and HQ02 Rent. Total funding for this procurement activity is \$215,196 in FY 2012, \$215,527 in FY 2013, and \$236,315 in FY 2014.</p>
--	---

The following table provides a crosswalk of the FY 2012 – 2014 spend plans for the FC&S PPA by facility activity. The upward trend in funding allocated toward sustainment activities reflects CBP’s core strategy to sustain the expanded and modernized facilities portfolio. Investments in critical infrastructure in FY 2014 support CBP’s highest priority operational needs. (Note that the allocation between offices and activities are subject to change to ensure CBP’s highest priorities for critical facilities and infrastructures are funded.)

Facilities Construction and Sustainment – FY 2012 to FY 2014 Crosswalk (\$ in Thousands)

Activity	FY 2012	FY 2013	FY 2014
1 Recovery and Preparedness	5,893	7,292	3,000
2 Compliance: Fire, Life, & Safety; OSHA; Environmental; Security	15,392	16,780	27,268
3 Building Operations & Services	40,922	81,056	165,489
Maintenance - Preventative	16,022	20,358	89,967
Maintenance - Deferred	3,618	12,852	-
Repairs	14,692	24,792	11,123
4 Lease Renewals	16,280	8,261	3,226
5 Tailend Costs - Projects in Progress	69,681	12,226	-
6 New Requirements/Initiatives	-	-	85,325
Total	182,500	183,617	385,398

The planned allocation of FY 2014 FC&S funds across CBP’s facilities portfolio is shown in the table below. (Note that the allocation between offices and activities are subject to change to ensure CBP’s highest priorities for critical facilities and infrastructures are funded).

Facilities Construction and Sustainment – FY 2014 Spend Plan (\$ in Thousands)

Activity	USBP	OFO	OAM	MS	Total
1 Tunnel Remediation	3,000	-	-	-	3,000
2 Compliance: Fire, Life, & Safety;	27,246	22	-	-	27,268
3 Building Operations & Services	50,985	76,226	11,851	26,427	165,489
Maintenance - Preventative	20,598	61,132	2,357	5,880	89,967
Repairs	-	11,123	-	-	11,123
4 Lease Renewals	-	3,226	-	-	3,226
5 Tailend Costs - Projects in Progress	-	-	-	-	-
6 New Requirements/Initiatives	-	72,125	-	13,200	85,325
Total	101,829	223,854	14,208	45,507	385,398

Facilities Construction and Sustainment – Select Adjustments to Base

This PPA includes adjustments to base of \$22.636 million for Utilities Consolidation and \$183.876 million for the Land Port of Entry Delegation of Authority. Other adjustments to base are listed above. Consolidating real property resources in this PPA allows CBP to manage its Construction and Facilities Management Program more efficiently by funding the highest priorities, while enabling operational offices to focus solely on their core mission responsibilities. Further, consolidation of resources yields significant cost savings for the program through bulk purchase agreements and regional contracts. To this end, CBP is pursuing the centralization of existing facilities resources from across CBP into the FC&S PPA in FY 2014. This includes \$2.899 million for facilities management of recurring sustainment activities from OAM, the Office of Training and Development (OTD), and the Office of Information and Technology (OIT); and \$5.607 million for utilities management of CBP owned facilities from OFO, OAM, OTD, OIT, the Office of Technology Innovation Acquisition (OTIA), and the Office of Intelligence and Investigative Liaison. The base transfer of \$14.130 million is from USBP for centralized utilities management of USBP-owned facilities.

In addition, this PPA requests the transfer of \$183.876 million from the S&E Rent PPA to fund the real property responsibilities to be assumed by CBP under a delegation of authority from GSA for GSA owned LPOEs to CBP. The distinctive nature of LPOEs as mission-oriented, 24/7 operational assets of CBP, as well as national trade and transportation infrastructure, differentiates this part of the portfolio from other federal buildings managed by GSA. These special purpose facilities allow CBP to meet growing trade and travel demands, provide infrastructure that is adaptable for handling evolving inspection technologies, and maximize the safety and effectiveness of CBP officers. This type of specific, single tenant facility situated on the front lines is typically operated by the organization occupying the facility to best meet mission needs. To this end, the delegation of authority facilitates faster delivery of service tailored to the specific needs of CBP’s Field Operations mission and the ability to explore an effective service model that will be more responsive to changing priorities and critical operations.

Under the delegation, CBP will assume the responsibility to provide all facilities services for the 101.5 LPOEs owned by GSA. Of the \$183.876 million transfer from the S&E Rent PPA, \$72.125 million is for capital reinvestment projects such as major repairs and replacements of building systems that have reached the end of their service life (i.e. heating/air system, roofs, and windows). These projects renew the assets' capital value and extend their service life. The remaining balance is for minor facility repairs and alterations, along with building operations and maintenance costs for the LPOEs. In addition, GSA is requesting funds in the FY 2014 budget for three of the top priority LPOE facilities as described in CBP's annual report "Land Port of Entry Modernization: Promoting Security, Travel, and Trade," which is submitted with this Budget. The three LPOEs included in GSA's FY 2014 budget request are San Ysidro Phase III, Laredo Phase I, and Laredo Phase II.

**Department of Homeland Security

Program Performance Justification**
(Dollars in Thousands)

PPA: Program Oversight and Management

	Perm. Pos	FTE	Amount
2012 Revised Enacted	219	200	54,096
2014 Adjustments-to-Base	462	462	37,748
2014 Current Services	681	662	91,844
2014 Program Change	(29)	(29)	(5,743)
2014 Total Request	652	633	86,101
Total Change 2012 to 2014	433	433	32,005

CBP requests \$86.101 million for PO&M Program. This request includes:

- An increase of \$18.886 million is for Realignment of Wage Grade Facilities Positions
- An increase of \$12.359 million is for Land Port of Entry Delegation of Authority
- An increase of \$6.398 million is for 114 FM&E Insourcing Positions
- An increase of \$3.247 million is for Realignment of OTIA Funding: TI
- An increase of \$221 thousand is for Pay Increase
- An increase of \$5 thousand is for 2012 OFO Positions for New Ports of Entry - Year 1
- An increase of \$1 thousand is for 2012 National Targeting Center - Year 1
- A decrease of -\$5.743 million is for Managed Hiring & Support Services
- A decrease of -\$3.369 million is for Management Efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests 633 FTE and \$86.101 million in FY 2014 for the PO&M PPA, which provides necessary resources to maximize operational efficiencies and guide strategic initiatives of the Construction and Facilities Management Program. The FTE will support the entire CBP Construction and Facilities Management Program. The FTEs also support USBP tactical infrastructure activities associated with the Border Security Fencing, Infrastructure, and Technology appropriation, as well as rent and rent-related activities associated with the S&E appropriation Rent PPA.

Resources in the FY 2014 PO&M PPA provide for Government salaries and benefits, program planning and support services, energy initiatives and environmental compliance assessments, and enterprise-level tools, planning, processes, and procedures, which enable the successful implementation of CBP's Construction and Facilities Management Program objectives. The FY 2014 request includes the transfer of a number of facilities specialists from OTIA and USBP to support the centralization of responsibilities previously dispersed throughout CBP, such as utilities and rent, tower leasing, and regional maintenance of facilities. These FTEs are integral to managing the increased portfolio requirements and realizing efficiencies from CBP's efforts to consolidate facilities resources.

This PPA provides funding to maintain and enhance TRIRIGA, which is CBP’s Integrated Workplace Management System. TRIRIGA allows CBP to integrate real property and project management functions necessary to manage the lifecycle of a real property portfolio into a single web-based technology platform. This capability provides CBP the data needed to make more cost-effective decisions that will sustain the long-term life of the facilities. The system also improves CBP’s ability to enhance energy efficiencies, including tracking LEED requirements, which permits CBP to comply with Executive Orders and other regulations for energy efficiency.

Procurement Activities

FY 2012 Activity Funding \$24,918	FY 2013 Activity Funding \$24,918	FY 2014 Activity Request \$41,611
Border Patrol Facilities: The Border Patrol Facilities Program (BFPF)	<p>The Border Patrol Facilities Program (BFPF) directly supports CBP’s Border Patrol agents and houses technology needed to fulfill CBPs mission. The program provides Border Patrol Stations, Sector Headquarters, Permanent Checkpoints, and Remote Forward Operating bases that are strategically placed near the areas of highest illegal activity which allows agents and special teams to respond quickly and maintain maximum time on patrol. The facilities are provided through new construction, lease acquisition, alterations, and maintenance, repairs, and operations, as well as rent and leasing activities. Operational impact, agent safety, cost effectiveness, and the conditions of existing facilities are evaluated to prioritize the investment in this program. The BFPF maintains, upgrades, and constructs facilities, including BP stations; sector headquarters; checkpoints; and remote forward operating bases. BFPF facilities presently accommodate approximately 21,000 agents, an increase of over 120% from FY 2005.</p> <p>Funding for the BFPF is funded out of this PPA and the HQ02 Rent and FM01 FC&S. Total funding for this procurement activity is \$135,263 in FY 2012, \$136,380 in FY 2013, and \$202,655 in FY 2014.</p>	
FY 2012 Activity Funding \$7,125	FY 2013 Activity Funding \$7,125	FY 2014 Activity Request \$22,588
OFO Facilities	<p>This Program oversees facilities and infrastructure management for the Office of Field Operations (OFO) to ensure the timely and effective planning, delivery, operation, and sustainment of the portfolio of facilities and infrastructure for OFO, as well as rent and lease management activities. It administers financial management, communications, data collection and reporting for all programs and projects related to the OFO facilities portfolio. The OFO Facilities Modernization Initiative will address the needs within CBPs port of entry facilities portfolio to fully support CBP operations. More</p>	

	<p>specifically, this initiative will address serious deficiencies at land ports of entry such as dilapidated and undersized buildings, inefficient site configuration and congestion, and deferred maintenance. Using the \$420 million received from Congress under the American Recovery and Reinvestment Act of 2009 (ARRA) for the modernization of CBP-owned LPOEs, CBP is completely replacing 31 of the agency’s 41 LPOEs, effectively addressing the critical CBP-owned facility needs. Built or modernized in the last two decades, the remaining CBP-owned inventory meets the agency’s present day operational requirements and does not require rehabilitation. CBP was able to accomplish the complete modernization of the portfolio for \$364 million. Upon completion of the modernization projects funded through ARRA, all CBP-owned ports will meet today and tomorrow’s operational standards, with the average age of the CBP-owned LPOEs being less than three years. Funding for the OFO Facilities is funded out of this PPA and the HQ02 Rent, Immigration User Fee, APHIS and FM01 FC&S. Total funding for this procurement activity is \$356,289 in FY 2012, \$359,250 in FY 2013, and \$429,469 in FY 2014.</p>	
<p>FY 2012 Activity Funding \$18,747</p>	<p>FY 2013 Activity Funding \$19,078</p>	<p>FY 2014 Activity Request \$16,731</p>
<p>Mission Support Facilities</p>	<p>The Mission Support Facilities (MSF) PMO develops, plans, executes, and sustains the facilities and infrastructure inventory necessary to support the mission of the CBP Mission Support Offices nationwide. These facilities include administrative offices, training centers, laboratories, warehouses, tactical communications sites, and consolidated/co-located facilities/campuses. The Mission Support PMO also manages CBP Consolidation/DHS Co-Location Facilities, Residential Housing, all National Capital Region Facilities and any Facilities impacted in a National Emergency. The focus of the MSF PMO is shifting from lease acquisition of new space for relocations or expansions for business partners to sustainability function managing maintenance and repair of owned facilities, administering leases of existing space, and reconfigurations where necessary to modify functional spaces to support additional staffing where expansions are no longer feasible. Acquisition of new space is limited to existing projects already underway, and the anticipated NTC expansion currently awaiting approval. The PMO is in the process merging the Advanced Training Facility into MSF, and absorbing the maintenance and operations functions at that location, including the management of the Base Operations Support Services contract for the ATC (Advanced Training Center). The PMO also manages tower leases and management of MRO functions for the Land Mobile Radio program which has now been fully transitioned from OIT. The PMO is also actively exploring ways in which to reduce the cost of our MRO programs and working with business</p>	

	<p>partners to identify locations that offer potential opportunities to reduce our overall footprint through consolidation or alternate workplace strategies. The Increments/Units consist of needed upgrades and consolidation of Labs, Housing and Administrative Facilities.</p> <p>Funding for the Mission Support Facilities is funded out of this PPA and the HQ02 Rent and FM01 FC&S. Total funding for this procurement activity is \$215,196 in FY 2012, \$215,527 in FY 2013, and \$236,315 in FY 2014.</p>
--	---

The following table provides a crosswalk of the FY 2012 – 2014 PO&M PPA by activity. The change in the distribution of funds between activities from year to year reflects CBP’s continued efforts to consolidate facilities personnel into this PPA, along with the balanced workforce initiative. (Note that the allocation between activities is subject to change to ensure CBP’s highest priorities for critical facilities solutions are funded.)

Program Oversight and Management – FY 2012 to FY 2014 Crosswalk (\$ in Thousands)

Activity	FY 2012	FY 2013	FY 2014
Government Salaries and Benefits	25,540	35,604	67,648
TRIRIGA Maintenance and Enhancements	3,818	6,323	9,487
Program Services	13,538	5,890	4,699
Environmental and Energy Initiatives	9,600	4,986	1,565
Operational Requirements	1,600	1,624	2,701
Program Oversight and Management Total	54,096	54,427	86,101

The planned allocation of FY 2014 PO&M funds is shown in the table below. (Note that the allocation between activities is subject to change to ensure CBP’s highest priorities for critical facilities solutions are funded.)

Program Oversight and Management – FY 2014 Spend Plan (\$ in Thousands)

Activity	Total
Government Salaries and Benefits	\$ 67,648
TRIRIGA Maintenance and Enhancements	\$ 9,487
Program Services	\$ 4,699
Environmental and Energy Initiatives	\$ 1,565
Operational Requirements	\$ 2,701
Program Oversight and Management Total	\$ 86,101

Program Oversight and Management – Select Adjustments to Base

The transfer of 220 FTEs and the associated \$18.886 million is for the realignment of USBP facilities maintenance staff to the Construction and Facilities Management Program, to enable USBP to focus on its core border security mission. This transfer has the potential to produce savings through consolidation of maintenance resources and the reduction of duplicative facilities and tactical infrastructure maintenance activity. The transfer of \$3.247 million from OTIA contributes to this effort, focusing specifically on personnel required to administer the Border Patrol tactical infrastructure program. Another personnel transfer in FY 2014 is 104 FTEs, and the associated \$12.359 million from the S&E Rent PPA, for resources associated with the delegation of authority of 101.5 GSA owned LPOEs to CBP.

CBP real property personnel are instrumental in the development and delivery of mission-critical core capabilities related to CBP's multifaceted facilities portfolio as well as CBP rent and tactical infrastructure. Among other abilities, the cadre of highly skilled real property specialists offers architectural, environmental, energy, real estate, and engineering services, along with long-term strategic planning expertise that allows CBP to strengthen operational support and enhance operational capabilities and efficiencies. The transfer of existing resources for facilities personnel into PO&M in the FY 2014 request aligns the appropriate staffing level needed to support CBP's real property portfolio.

In addition, CBP is completing a balanced workforce initiative to achieve the appropriate mix of Federal and contractor skills, expertise, experience, and other assets necessary to effectively manage the Construction and Facilities Management Program. This initiative allows CBP to realize efficiencies, risk reduction, and cost savings. The request to realign \$6.398 million from the FC&S PPA reflects funding to support the 114 government personnel in-sourced under this initiative. This amount represents only a portion of the overall savings CBP realized from this initiative; additional funds will be reinvested to support critical requirements of the CBP facilities portfolio.

The PPA also reflects a program change decrease of \$5.743 million for managed hiring and support services, which includes a reduction of management and administration staffing and services in FY 2012 – 2014, and a mission support workforce shaping initiative that ensures CBP's highest mission priorities are funded. In addition, an adjustment-to-base decrease of \$3.369 million is included for the Office of Federal Procurement Policy (OFPP) Directed Purchasing Savings.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Consolidation of National Targeting Center
PPA: Facility Construction and Sustainment
Program Increase: Positions 0, FTE 0, Dollars \$13,200

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	381,342
Program Increase							-	-	13,200
Total Request	-	-	182,500	-	-	183,617	-	-	394,542

Description of Item

CBP's National Targeting Centers (NTC) are presently located in over 81,371 square feet in two different GSA National Capital Region locations. The NTC Passenger and Cargo facilities have been in place at their current locations since 2003 and 2007, respectively. Since initial occupancy, the NTCs have experienced considerable staff growth and mission expansion due to recent and ongoing events. Every effort has been made to reconfigure the existing space to accommodate the increased requirements associated with each mission expansion, but the NTC facilities are now maximized to their full potential and offer no additional opportunities for expansion or reconfiguration.

The allocation of funds for the NTC Consolidation is shown in the table below. (Note that the allocation between activities is subject to change as cost estimates and project details are further refined).

Activity	Cost (\$ in Thousands)
Design and Construction	\$ 8,400
Security Upgrades	\$ 1,500
UPS System	\$ 1,250
Voice/Data Cabling	\$ 1,750
High Density Shelving	\$ 300
NTC Consolidation (Year 1) Total	\$ 13,200

Justification

The requested increase of \$13.200 million in the FC&S PPA will fund the initial consolidation of CBP's NTC). Improved space that better meets the mission needs of the organization and its people, including strategic co-location of appropriate groups and other liaison organizations will improve the NTC's mission effectiveness. The Targeting and Analysis Program Office (TASPO) supports the NTC's automated targeting systems by writing and managing specific algorithms in response to security threats and concerns. The NTC Consolidation will allow the TASPO team to be housed in one location to better support the automated targeting systems, and facilitate teaming sessions to develop algorithms in immediate response to terror incidents. Being housed in one location will facilitate improved response time for algorithm development, and as a result increase the effectiveness of the NTC operation. Specifically, the NTC consolidation will enhance CBP's mission outcomes by:

- Identifying passengers and cargo that threaten national security, while facilitating the flow of legitimate travel and commerce into and out of the United States;
- Shortening response times to provide immediate attention to emerging intelligence and events; and
- Improving data processing and automated targeting systems capabilities, thereby allowing targeting officers to view and immediately process critical information.

The total office space utilization currently does not adequately support NTC's specialized mission operations. The NTC consolidation project will fulfill the mission operation needs of the program by providing expanded special space areas for CBP personnel working in rotating shifts at this 24/7 operation in support of national security. By reducing office space utilization and better accommodating special space requirements, the consolidated NTC facility will provide a more appropriate utilization rate for increased capacity and operational effectiveness.

In addition, after the initial expenditures for a new facility, the consolidation of the two targeting centers and ancillary offices into one location will provide cost savings by eliminating redundant LAN rooms, conferencing and team rooms, HSDN rooms, Sensitive Compartmented Information Facilities, and IT infrastructure, as well as duplicate emergency power generation systems.

The proposed milestone time line for the NTC consolidation is:

Date	Milestone
November 30,2012	GSA submitted prospectus package to Congress.
January 1, 2013	GSA began lease acquisition process.
October 1, 2013	GSA awards lease and begins tenant improvements – pending Congressional approval and subject to availability of funds.
October 1, 2015	Complete Construction and begin phased occupancy.

Impact on Performance (Relationship of Increase to Strategic Goals)

The NTC consolidation supports the DHS Strategic Goal: Preventing Terrorism and Enhancing Security and CBP Strategic Goal 1: Secure the Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

Performance metrics for this initiative include:

- Increased passenger and cargo discretionary targeting through the improvement of targeting methodologies;
- Quantity of identifiable events as a result of the pre-departure screening initiatives; and
- Increased targeting efficiencies through functional integration of Passenger Analytical Units and Advanced Tactical Units.

**Department of Homeland Security
U.S. Customs and Border Protection
Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Managed Hiring, Awards and Support Services
PPA: Program Oversight and Management
Program Decrease: Positions (29), FTE (29), Dollars \$(5,743)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							681	662	91,844
Program Decrease							(29)	(29)	(5,743)
Total Request	219	200	54,096	219	200	54,427	652	633	86,101

Description of Item

The \$5.743 million reduction is for 29 FTEs and other PO&M PPA activities. The reduction covers the realignment of facilities staffing in FY 2012 – 2014. This PPA enables Government and support personnel to successfully implement, at the enterprise-level, all program objectives and ensures strategic alignment across the CBP Construction and Facilities Management Program. The reduction allows CBP to fund priority operations and personnel securing our Nation’s borders.

Justification

This reduction will primarily affect the support for the administration and management of facilities and construction programs, and program and project management oversight, along with other mission support areas. Workforce shaping and realignment ensures CBP’s highest priority needs for mission critical personnel are addressed.

Impact on Performance (Relationship of Decrease to Strategic Goals)

CBP will ensure its highest priority operations are not significantly affected by this reduction. To minimize the effect on critical needs, CBP will assess its division of labor and mission support areas to identify and prioritize critical requirements.

**Department of Homeland Security
U.S. Customs and Border Protection
Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: Facilities Maintenance; Repairs; and Operations
 PPA: Facility Construction and Sustainment
 Program Decrease: Positions 0, FTE 0, Dollars \$(9,144)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	381,342
Program Decrease							-	-	(9,144)
Total Request	-	-	182,500	-	-	183,617	-	-	372,198

Description of Item

The reduction of \$9.144 million is applied to activities within the FC&S PPA in order to prioritize frontline CBP operations. This PPA supports critical maintenance, repairs, and operations requirements of existing CBP facilities.

Justification

The program decrease will ensure CBP’s highest priority capabilities are fully funded to achieve core mission outcomes. To minimize the effect on critical operational needs, CBP will assess its facilities portfolio to identify and prioritize core mission and facilities requirements.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The reduction will primarily affect the existing CBP facilities portfolio and real property inventory and may extend to leasehold improvements of GSA leased spaces. Planned facilities management and sustainment activities, such as maintenance, repairs, operations, alterations, and lease renewals, will be delayed, deferred, or foregone as a result of this reduction.

Although the reduction will impact planned facilities management and sustainment activities, CBP will ensure its highest priority operations are not significantly affected.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to plan, acquire, construct, renovate, equip, furnish, operate, manage, and maintain buildings, facilities, and related infrastructure necessary for the administration and enforcement of the laws relating to customs, immigration, and border security, [\$243,666,000] \$471,499,000¹, to remain available until September 30, [2017] **2018**²: Provided, That for fiscal year 2013 and thereafter, the annual budget submission of U.S. Customs and Border Protection for ``Construction and Facilities Management" shall, in consultation with the General Services Administration, include a detailed 5-year plan for all Federal land border port of entry projects with a yearly update of total projected future funding needs delineated by land port of entry: Provided further, That the Commissioner of U.S. Customs and Border Protection shall submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted each year under section 1105(a) of title 31, United States Code, an inventory of the real property of U.S. Customs and Border Protection and a plan for each activity and project proposed for funding under this heading that includes the full cost by fiscal year of each activity and project proposed and underway in fiscal year 2013]³. Note.--A full-year 2013 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Resolution, 2013 (P.L. 112-175). CONSTRUCTION AND FACILITIES INITIATIVES

1. Project Description, Justification, and Scope

The CBP C&FM account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. It addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission-driven operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provides resources to modify and/or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio. The FY 2014 request focuses mainly on sustainment activities of CBP's Construction and Facilities Management Program. Additionally, it supports the delegation of authority of facilities services from the U.S. General Services Administration (GSA) to CBP of GSA owned land ports of entry (LPOE). The FY 2014 budget submission also provides funding for the consolidation of the National Targeting Center to enhance mission operations.

2. Significant Changes

The FY 2014 request includes the centralization of facilities resources from across CBP operational and mission support components into the C&FM account. Consolidating facilities resources in this account allows CBP to manage its facilities portfolio more efficiently by funding the highest priorities while enabling offices to focus solely on their core mission responsibilities and can also yield significant cost savings and achieve efficiencies for the Construction and Facilities Management Program. The FY 2014 request also includes a transfer of FTE into the C&FM account to support the centralization of these facilities responsibilities and an enhancement for consolidation of the National Targeting Center to enhance mission operations.

6. Method of Performance

CBP's C&FM requirements are executed through the U.S. Army Corps of Engineers (USACE), U.S. General Services Administration (GSA), and the CBP Office of Procurement.

Through a memorandum of agreement, USACE provides CBP with consolidated program management services for real estate planning and acquisition, planning and programming, environmental planning and compliance, design and cost engineering, construction and warranty enforcement, and integrated occupancy services.

CBP's Facilities Management & Engineering Directorate (FM&E) provides the facilities, infrastructure, and related services to CBP's organizational components in direct support of their individual missions, and, collectively, in support of the overall CBP and DHS missions. CBP's operational components identify mission needs that require facility solutions that are communicated to FM&E's four Program Management Offices (PMO), each of which has a

mission-aligned portfolio: Air and Marine Facilities, Border Patrol Facilities and Tactical Infrastructure, Field Operations Facilities, and Mission Support Facilities.

Once FM&E receives the mission needs from the operational components, it will scope, schedule, and analyze alternative options and provide cost-estimates for the proposed facilities requirements. During this process owned and leased options are explored, along with cost-efficiency solutions such as consolidation opportunities, co-locations, and public-private partnerships.

Other facility requirements, primarily focused on sustaining the current portfolio, are identified by the PMOs using the following specific indices:

1. Facility Condition – Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Facility Condition Assessment is the primary means by which this information is generated.
2. Facility Utilization – These indices track the square footage of space and the number of full-time equivalents assigned.

In order to best align facility projects with mission needs, facility requirements are analyzed through a thorough mission alignment process. Requirements are first consolidated through a prioritization scheme that aligns potential projects with essential CBP missions, including remediating life safety issues and major compliance violations, along with the necessary sustainment actions at existing facilities. All requirements are then reviewed and approved by FM&E's senior leadership.

Final prioritization of facility requirements and necessary trade-offs are made at the Facilities Management Council, where senior leadership of CBP's Operational Components and FM&E discuss and determine which high priority facility projects should be funded.

For those projects that receive funding, more detailed schedules and cost estimates are developed by FM&E's PMOs and tracked through Program Management reviews on a bi-monthly basis. Project completion schedules and funding allocated to specific projects are tracked within the CBP accounting system and FM&E's Integrated Workplace Management System, which provides real property lifecycle management capability. These systems include modules that store specific information on all aspects of each asset, which is automatically linked to key information systems. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects in progress are tracked and reported on a monthly basis by project managers in the field. This tracking monitors the project delivery for construction and leasing through industry standards, including tracking each project's schedule, scope, and budget.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department of Homeland Security established a DHS Balanced Workforce Strategy in mid-2010. DHS is committed to establishing an appropriate mix of in-house and contract skills, experience, and other resources to balance the DHS workforce overall. Pursuant to section 736 of Division D of the *Omnibus Appropriations Act, 2009* (P.L. 111-8), the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved by the public sector (e.g. to maintain control of and sustain agency operations) and obtains contract services when it is appropriate and cost-effective to do so. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of the total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 also requires the Department to review all existing contracts in order to identify any functions currently being performed by contractors that should be reserved for federal employees. As the Department has many contracts, all contracts have prioritized based on risk into Tiered ranking.

U.S. Customs and Border Protection requests 8 FTE for the FY 2014 DHS Balanced Workforce Strategy.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Air and Marine Interdiction

I. Appropriation Overview

A. Mission Statement for Air and Marine Interdiction:

U.S. Customs and Border Protection (CBP) protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. The CBP Office of Air and Marine's (OAM) core competencies include air and marine interdiction, air and marine law enforcement, and air and national border domain security.

Mission critical assets for FY 2014 are: 267 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), 302 marine vessels, the Air and Marine Operations Center (AMOC), fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangars, and marine facilities located along the land and maritime borders and at key interior support locations.

B. Budget Activities:

The Air and Marine Interdiction appropriation is comprised of two major Program, Project, and Activities (PPAs): Operations and Maintenance, and Procurement.

Operations and Maintenance:

The Operations and Maintenance PPA funds aircraft and marine vessel maintenance and logistic support, training, fuel, material repairs, operating base support, and engineering needed to operate and maintain aircraft and marine vessels. A combination of government and contractor logistics activities provide maintenance management, system support analysis, asset management, critical property, spare parts storage, inventory records management, and field services through a National Aircraft Maintenance contract and the National Marine Center (NMC). Aviation law enforcement training services are made available by the National Aircraft Training Center (NATC). Funding is also provided to the Federal Aviation Administration (FAA) to ensure that a Long Range Radar (LRR) capability is maintained and operated for joint Department of Defense (DOD)/Department of Homeland Security (DHS) use.

Operations and Maintenance also funds the Air and Marine Operations Center (AMOC), which provides detection, monitoring, sorting, tracking, and coordination of law enforcement response to suspect airborne and maritime activity and is used to conduct airspace security, respond to natural disasters and act as the clearinghouse for information.

Operations and Maintenance funds also support field operating costs, including costs for Regional Director Offices, Air and Marine Branches, and Units, as well as headquarters operations and Field Centers, training and travel expenses, and fuel, which is a major portion of the field office expense.

Procurement:

Procurement funds are used to purchase new aircraft and marine vessels and to recapitalize existing assets. This extends their service lives, enhancing their mission effectiveness and/or lowering their life-cycle maintenance costs.

C. Budget Request Summary:

DHS requests \$427,701,000 for FY 2014 Air and Marine Interdiction. This request includes a non-recurring \$138.9 million for prior OAM procurements, a program decrease of \$11.0 million for Operations and Maintenance, \$8.3 million for transfers, \$8 million for Flight Hours for Priority Operations, and enhancements totaling \$73.95 million for the procurement of the following:

- \$24 million for P-3 Service Life Extension Program (SLEP);
- \$3.5 million for Sensor Upgrades;
- \$43 million for two (2) KA-350CER MEA; and
- \$3.45 million for Marine Vessels (various).

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	365,087
2014 Adjustments-to-Base	-	-	(288)
2014 Current Services	-	-	364,799
2014 Program Change	-	-	(11,048)
2014 Total Request	-	-	353,751
Total Change 2012 to 2014	-	-	(11,336)

CBP requests \$353.751 million for Operations and Maintenance. The request includes:

- Increase of \$8.0 million for Flight Hours for Priority Operations
- Decrease of -\$6.293 million for Marine Maintenance; Travel; Surveillance/Sensor Technology
- Decrease of -\$4.755 million for Aged Aircraft Retirements
- Decrease of -\$4.481 million for Utilities Consolidation
- Decrease of -\$3.807 million for Rent Consolidation

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests \$353.751 million for Operations and Maintenance as described below. Of this total, \$194.351 million is intended for operations and \$159.4 million for maintenance, providing approximately 62,000 flight hours.

Aviation and Marine Missions, Investments, and Performance

OAM supports a variety of missions consistent with DHS and CBP priorities by utilizing the available intelligence on threats and how they are evolving and the experience of the air and marine field leaders who respond daily to the operational requirements of the mission owners. While OAM still conducts annual reviews of the priorities and requirements that inform its strategy – and changes its strategic plan to address emerging threats, technological opportunities, program realities, or practical constraints – the new CBP operations and intelligence constructs now provide the integrated agency framework for the future. Along with the new Planning, Programming, Budgeting, and Accountability process, the new joint operations and intelligence constructs will determine how future investments are defined and prioritized.

Air and Marine Mission Sets

OAM's implementation strategies are based on positioning CBP's aviation and maritime assets to provide expertise and responsiveness in several strategic mission sets, each critical to the overall success of priority CBP and national missions. The following mission sets reflect OAM's core competencies:

- Air to Land Enforcement – Involves the capability to search, detect, identify, track, and respond to suspect ground targets of interest moving by vehicle or on foot. Interdiction can occur on approach to the land border, at crossing points, or after the border has been breached. Air to land interdiction is conducted in all geographic conditions and at all borders.
- Air to Air Enforcement – Involves the capability to search, detect, track, and sort airborne suspect targets of primarily general aviation aircraft. In a national security role, this serves the function of determining hostile intent of the suspect aircraft. Air interdiction is conducted over both land and sea in all weather conditions and operating environments. This mission includes, but is not limited to, an apprehension capability far before a suspect air target approaches the border, as the border is crossed, and well into interior airspace.
- Water to Water Enforcement – Involves the capability to search, detect, identify, and track waterborne suspect targets of interest. Marine interdiction can involve an integration of aviation and maritime asset capabilities. Waterborne apprehensions include, but are not limited to, preventing persons or items from illegally entering the United States from foreign ports of call.
- Air and Marine Domain Awareness - Involves the employment of OAM's reconnaissance, surveillance, and target acquisition (RSTA) capabilities to provide situational awareness in all operating environments. This includes determining suspect targets requiring enforcement actions. OAM has ground based, airborne, and coastal/riverine RSTA capabilities with hemispheric reach to manage this capability.
- Critical Infrastructure and Port Security – Involves the capability to detect, deter, and prevent terrorist attacks on critical infrastructure and at POEs. This includes the tracking of possible terrorist threats as they approach the border, apprehension of suspect targets, and monitoring of border areas through air and marine tactical and strategic assets. In addition to these duties, OAM assets provide security and surveillance at special events on an as-needed basis.

Description of Selected Adjustment to Base

Flight Hours for Priority Operations: The FY 2014 Budget level will sustain CBP flight hours for operations along the southwest border and within the source, transit, and arrival zones. The funds will be used primarily for fuel for a variety of aircraft to support these operations including the P-3 and D-8 aircraft.

U.S. Customs and Border Protection
Air and Marine Interdiction:
Procurement
Program Performance Justification
(Dollars in Thousands)**

PPA: Procurement

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	-	-	138,879
2014 Adjustments-to-Base	-	-	(138,879)
2014 Current Services	-	-	-
2014 Program Change	-	-	73,950
2014 Total Request	-	-	73,950
Total Change 2012 to 2014	-	-	(64,929)

CBP requests \$73.95 million for Procurement. The request includes:

- Increase of \$43.0 million for 2 KA-350CER MEAs
- Increase of \$24.0 million for P-3 SLEP
- Increase of \$3.5 million for Sensor Upgrades for Tactical Aircraft
- Increase of \$3.45 million for Marine Vessels (various)
- Decrease of -\$138.879 million for Non-recur Air & Marine Procurement

CURRENT SERVICES PROGRAM DESCRIPTION:

Procurement investment funds are used to purchase new aircraft and marine vessels and recapitalize existing assets to extend their service lives, enhance mission effectiveness, and lower maintenance costs.

In August 2006, when the original Strategic Air and Marine Plan was submitted to Congress, four specific objectives were delineated:

- to unify and integrate CBP Air (and later, Marine) and all of its forces;
- to enhance border security and surveillance;
- to recapitalize aging aviation and marine assets, creating a more flexible and responsive air and marine force; and,
- to continue support for traditional missions, specifically support for ICE investigations and drug Source, Transit, and Arrival Zone missions under the integrated command of the Joint Interagency Task Force South (JIATF-S).

CBP envisioned that its 26 different types of aircraft would be reduced to 8 or 9 types including the Predator B Unmanned Aircraft System (UAS), the only new capability added to the service. The total number of aircraft would remain roughly the same as in 2006, about 260. The marine service was originally planned to expand by nearly 200 vessels, to over 300 total, and the number of marine operating sites was to grow by up to 22, with the operating tempo increasing to meet known threats

along the coastal approaches to the United States, Florida Keys, Puerto Rico, the U.S. Virgin Islands, and the Great Lakes. CBP also planned to establish five new air branches along the northern border, while consolidating a small number of interior air units with larger border branches. The OAM work force was to grow from just over 1,100 personnel to a force of nearly 3,000.

The major components of the plan included:

- a service life extension program (SLEP) for the P-3 long range patrol aircraft, all 16 of which were grounded briefly in FY 2006 due to age-related wing box stress cracks;
- the purchase or overhaul of 3 light and medium lift helicopter types needed to replace unserviceable assets used to support border security and interior enforcement operations;
- the purchase of 2 types of twin-engine medium range patrol aircraft to replace aging assets that were becoming unsafe to fly and were needed for air-to-ground, air-to-water, and air-to-air surveillance and enforcement missions;
- the introduction of a high-end UAS, the Predator B, and its maritime equivalent, the Guardian; and,
- marine interceptors and riverine vessels needed to replace aging assets and meet expanded mission requirements along the coastal approaches to the borders, and the rivers and lakes near the borders.

As CBP moves into the seventh year of the original 10-year effort, OAM has been successful in achieving most of the objectives listed above. A single, integrated air and marine service now exists; the five air branches along the northern border are fully operational; CBP has established, outfitted, and staffed 11 new marine units; and more than 70 new or upgraded helicopters have been delivered with 8 more on the way.

The P-3 program is on cost and scheduled for completion in FY 2016, and ten Predator B and Guardian UAS are operational. The delivery of new and upgraded medium range fixed-wing aircraft has lagged, but nine new and two upgraded aircraft have been delivered with four more planned for this year. OAM has retired entire types of aircraft, including the OH-6 and MD-600 light helicopters and the C-404 patrol aircraft, and has begun to retire the PA-42 and C-12M type twin-engine aircraft.

Air Mobility Helicopters (UH-1) ^{2,5}															0.0
Medium Range Patrol Aircraft (DHC-8)	30.1			107.5											137.6
Multi-role Enforcement Aircraft (KA-350)						43.6	28.6	7.0						22.5	101.7
Jet Interceptor Sensor Upgrades (C-550)			11.4		9.4		7.7		10.0						38.5
Aircraft Sensors (Radars/Cameras)		15.0	1.9		1.9						10.0				28.8
Northern Border Stand-Up & Marine Sites				12.0		12.0									24.0
Marine Vessels				7.0	2.0		2.7	7.4	6.5	8.0	6.5		4.7		44.8
Congressional Initiatives ³		14.0		10.0		5.3		5.0		6.0					40.3

1. The \$16 million for the P-3 was originally appropriated in base Operations and Maintenance, then applied for the repair of cracked wing boxes.

2. UH-1 to UH-119 recap funded with expired contract recoveries; no funds appropriated to date.

3. Includes the Manned Covert Surveillance Aircraft (USCG lead), the Wireless Airport Surveillance System (WASP), and AMOC Phase B.

4. \$18.7 million was reprogrammed from the DHC-8 MPA to the KA-350 MEA in FY 2008, enabling the purchase of 5 aircraft.

5. The contract for the UH-1 has expired; OAM reallocated the \$4.9 million for FY 2011 into the UH-60 Black Hawk line.

6. The \$22.1 million for the UAS in FY 2010 was used to acquire ground control stations, antennas, sensors, and support equipment, not aircraft.

7. The \$32 million for 2 unmanned aircraft systems was included in the President's FY 2010 Supplemental Request.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: KA-350CER MEA
PPA: Procurement
Program Increase: Positions 0, FTE 0, Dollars \$43,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	43,000
Total Request	-	-	22,500	-	-	20,500	-	-	43,000

Description of Item

The budget requests \$43 million for two King Air (KA)-350CER Multi-Role Enforcement Aircraft (MEA).

Justification

The MEA was introduced to fill the gaps created by the end of the DHC-8 production line and the termination of the PC-12 contract, and to replace 26 aging twin-engine patrol aircraft.

Initiated in FY 2008, a total of seven aircraft have been funded, with three already delivered and placed in operation, and the fourth and fifth scheduled for delivery by May, 2013. Funding was provided in FY 2012 for a sixth aircraft, which will be delivered in late FY 2013, and the FY 2013 Budget request contained funding for a seventh aircraft. This request funds the eighth and ninth platforms.

The MEA is a multi-role aircraft with a multi-mode radar for use over water and land and for air-to-air situational awareness. It also has an Electro-Optic/Infrared (EO/IR) sensor, basic and advanced Law Enforcement Technical Collection (LETC) packages, and Ku-Band and Iridium downlink system capabilities which allow for communication by voice and sensor data anywhere in its operating area in near real time. It is the most capable new, twin-engine aircraft to be purchased by CBP.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP operates seven DHC-8 Q200/Q300 aircraft equipped with SeaVue maritime radars, day/night infrared cameras, and the capability to support 8-hour missions. Since this type of aircraft is no longer manufactured, CBP shifted to the smaller KA-350CER, twin-engine aircraft in late FY 2007, and

developed it as a truly multi-role asset with a multi-mode Selex radar, day/night infrared cameras, law enforcement technical collection (LETC) capabilities, and Ku-Band satellite down-link, and modest cargo carrying capability. These aircraft are replacements for 26 older and unsupportable twin-engine patrol aircraft now being retired. They are also needed to fill gaps created when DHC-8 aircraft production ended and single-engine PC-12 aircraft, another legacy purchase, proved to be less capable of supporting the variety of mission requirements being placed on OAM, in particular missions over the coastal borders and Great Lakes, as well as over extremely rugged terrain.

This aircraft and associated sensor capabilities provide direct support to CBP efforts to secure the Nation's borders. Unlike the older, less capable aircraft they are replacing, the MEA addresses threats along the border from the air, land, and sea. During FY 2012, the two aircraft deployed to the southwest border flew 268 hours of Reconnaissance, Surveillance, and Target Acquisition (RSTA) missions in support of the Joint Field Command in Arizona. The aircraft has begun operations off the Southern California coast to respond to growing threats from the go-fast vessels attempting to reach the coast of California and deposit bulk cocaine where it can be quickly distributed inland.

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Marine Vessels (various)
PPA: Procurement
Program Increase: Positions 0, FTE 0, Dollars \$3,450

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	3,450
Total Request	-	-	4,700	-	-	900	-	-	3,450

Description of Item

The budget requests \$3.45 million for marine vessels. This funding will allow CBP to procure up to five Coastal Interceptor Vessels (CIV).

Justification

In August 2006, OAM was given the responsibility to organize, train, and equip marine operations falling under the Border Patrol and the Office of Field Operations, and to assume control of operations in the coastal and Great Lakes regions. In February 2008, OAM reported its first revision of the Strategic Air and Marine Plan to Congressional Committees on Appropriations. The revised plan contained a broad approach for enhancing marine operating capabilities by expanding the number of marine units along the northern border and southeast coastal operating areas, increasing the number of Marine Interdiction Agents (MIAs), support personnel, and the number of marine vessels. The number and types of vessels to be acquired was based on the operating environment and the planned operating tempo for each CBP marine unit, in addition to the need to replace some existing assets deemed to be of limited value due to age, capability, and/or safety.

Today, the CBP marine fleet stands at 302 vessels of all types, with 78 more requested in the FY 2013 President's Budget. Only two marine vessel procurements remain to be completed for the marine program to achieve its original objectives. The new Coastal Interceptor Vessel (CIV) contract was awarded in early FY 2012, and is currently funded to provide 31 new vessels, with the first production prototypes delivered in September 2012. The contract for the new Riverine Shallow Draft Vessel (RSDV) was awarded in late FY 2011, and is funded to provide up to 47 vessels. The RSDV production prototypes have been delivered and are currently undergoing field evaluations. The requested program increase will fund one CIV and up to three RSDVs.

Impact on Performance (Relationship of Increase to Strategic Goals)

From FY 2008 and into FY 2012, Congress provided funding for 11 new marine units, 197 new marine interdiction agents, and 101 new marine vessels, including 63 new interceptors of all types. In late FY 2008, CBP acquired an Advanced Concept Technology Demonstration vessel for a new class of fast coastal interceptors that completed a year of test and evaluation in November 2009. The results of the Advanced Concept Technology Demonstration effort enabled OAM to define its requirements for a highly capable replacement for the slower, aging Midnight Express vessels. CBP also acquired 172 new and used vessels, including 32 coastal and SAFE Boat interceptors, 12 coastal enforcement vessels, 12 airboats, and 114 riverine vessels of various types, mainly through the transfer of used SAFE Boat and other riverine craft from the United States Coast Guard. Over the same period, CBP retired 87 aged and unserviceable vessels, mainly through the General Services Administration sales/exchange program that enabled the funds obtained to be reinvested in new boats and equipment, thus reducing the need for appropriated funds. CBP has gained the equivalent of over \$22.7 million in acquisition cost avoidance through these efforts, and has returned 76 used vessels to service.

Over the past few years, as CBP has been better able to respond to cross-border criminal activity, it has seen an increase in the amount of illicit traffic transiting around our borders and through the littorals. Since FY 2008, CBP has increased total float hours by over 83,000. With the establishment of 11 new marine units in FY 2008, and the increase in vessels and float hours, CBP has been successful in increasing arrests and drug seizures. From FY 2008 thru FY 2012, arrests have increased from 150 to 768, respectively, and drug seizure events have increased from 14,782 to 53,261, respectively. The requested assets would provide CBP with the ability to maintain the increased float hours as the older marine assets are retired.

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: P-3 SLEP
PPA: Procurement
Program Increase: Positions 0, FTE 0, Dollars \$24,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	24,000
Total Request	-	-	42,000	-	-	28,100	-	-	24,000

Description of Item

The budget requests \$24 million for the P-3 Service Life Extension Program (SLEP).

Justification

CBP’s P-3 aircraft are high-endurance, all-weather, tactical turbo-prop aircraft that are used primarily for long-range patrols along the entire U.S. border, near choke points off the coast of source and transit zone countries, and throughout Central and South America. It is the primary DHS asset used to detect and target bulk drug shipments carried by self-propelled semi-submersible vessels. The aircraft provides advanced sensor capabilities, can track and identify targets over extended periods, and remains vital to Joint Interagency Taskforce South (JIATF-S) support. The P-3 provides mission support capabilities beyond those of any other aircraft available to law enforcement.

The P-3 SLEP is a 10-year, \$420 million effort successfully entering its seventh year of execution. Designed to be completed in two phases, it is on cost and within on schedule. The first phase involved special structural inspections and repairs designed to keep some of the 16 aircraft flying while all new wing and tail assemblies were purchased to enable safe operations for another 18 to 20 years (The average age of the P-3s is 47 years.). The original estimate to complete delivery provided to the Congress in 2008 is still on schedule for completion in FY 2016. This effort will see 14 of the 16 aircraft returned to flight for an average cost of \$28 million per aircraft, which is highly cost-effective since a new aircraft with the same capabilities as the P-3 cannot be purchased for under \$250 million per unit in today’s aircraft market. To date, \$344 million has been invested in the SLEP, and FY 2014 is the next-to-last year of planned funding requests before the program proceeds to completion.

All 14 wing and tail sets are on order, seven aircraft have been completed, with the last aircraft due for return to operations by the end of FY 2016, or early FY 2017 at the latest. The new wings are produced in Marietta, Georgia, and the SLEP is conducted in Greenville, South Carolina.

Impact on Performance (Relationship of Increase to Strategic Goals)

During the past five fiscal years, the P-3's were directly responsible for seizing or disrupting more than 863,000 pounds of cocaine shipments to Central America, Mexico and the U.S. During the same timeframe, P-3s have detected 87 percent of the self-propelled semi-submersible vessels captured in the source and transit zones. In FY 2012, in cooperation with the Guardian UAS, P-3 aircraft helped to successfully disrupt \$284 million worth of bulk cocaine during only 45 days of operations aimed at stemming the flow of drugs into Puerto Rico. The P-3 aircraft provide more counter-drug air mission hours to JIATF-S than any other partner agency. In FY 2012, 5,585 flight hours were provided in direct support of the JIATF-S mission (over 86 percent of CBP's total P-3 flight time). The average age of the P-3s, however, is 47 years. Funding the SLEP will extend the life of the fleet by more than 20 years, thus enabling CBP to continue support of the JIATF-S mission at a far lower cost than purchasing new aircraft would require.

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 4: Sensor Upgrades for Tactical Aircraft
PPA: Procurement
Program Increase: Positions 0, FTE 0, Dollars \$3,500

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	3,500
Total Request	-	-	-	-	-	-	-	-	3,500

Description of Item

The budget requests \$3.5 million for up to three tactical aircraft sensor upgrades.

Justification

CBP aircraft are operating with Electro-Optic/Infrared (EO/IR) sensors that are up to 35 years old. The technology used to produce these older sensors is obsolete, which renders them marginally effective in comparison to newer EO/IR systems. Sixty-nine percent of CBP’s sensors are no longer in production and 46 percent of the EO/IR sensors owned by CBP are no longer supported by the Original Equipment Manufacturer (OEM).

Newer, more capable sensors provide better detection and identification ability, greater standoff ranges for more covert operation and safety, and laser range finder and illumination functionality which enhance mission coordination between airborne and ground agents. Newer sensors are fully supported by OEMs for software upgrades and integration with other new, mission-enhancing technologies.

Impact on Performance (Relationship of Increase to Strategic Goals)

Without replacement EO/IR sensors, aircraft will have to share assets, thereby increasing the risk of damage during system swap-outs. Additionally, operational missions will be flown without a sensor, greatly decreasing operational effectiveness, especially during night missions when criminal activity is highest.

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Marine Maintenance; Travel; Surveillance/Sensor Technology
PPA: Operations and maintenance
Program Decrease: Positions 0, FTE 0, Dollars \$(6,293)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	364,799
Program Decrease							-	-	(6,293)
Total Request	-	-	365,087	-	-	367,321	-	-	358,506

Description of Item

The budget requests a \$6.293 million decrease to Air and Marine Operations and Maintenance (O&M).

Justification

Increasing costs for operations and maintenance have driven OAM to spread available funding over all missions and borders. The following reductions will be taken:

- \$1.5 million from the marine maintenance budget for the overhaul of the Midnight Express Interceptor vessels.
- \$2.5 million from the Air and Marine Headquarters and field travel budget.
- \$993 thousand from the Air and Marine operations and maintenance support contract.
- \$1.3M from contract funds to support software and hardware sustainment on airborne and ground based Navel Sea Command Applied Physics Lab Ocean Surveillance Initiative (NAVSEA APL OSI) units and Broad Area Electronic Sensor.

Impact on Performance

This reduction will enable CBP to support its highest priority of maintaining core frontline personnel. CBP will continue to balance investments and operations support to obtain the best, most effective mix that addresses the highest mission needs as well as the agency's future asset requirements.

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: Accelerate Aged Aircraft Retirements
PPA: Operations and maintenance
Program Decrease: Positions 0, FTE 0, Dollars \$(4,755)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	364,799
Program Decrease							-	-	(4,755)
Total Request	-	-	365,087	-	-	367,321	-	-	360,044

Description of Item

CBP requests a \$4.755 million decrease to Air and Marine Operations and Maintenance (O&M) for Aged Aircraft Retirements.

Justification

CBP will continue to balance investments and operations support to obtain the best, most effective mix that addresses the highest mission requirements as well as the agency's future asset requirements. The three primary aviation O&M cost drivers within CBP are:

- (1) the number and location of air branches and supporting units;
- (2) branch/unit operating tempo (annual flight hours and surge operations); and
- (3) the numbers and types of aircraft, along with aircraft age.

A key objective of the Strategic Air and Marine Plan (StAMP) has always been to reduce the number of types of aircraft and the average age of the aircraft, while increasing the flexibility to respond to a variety of threats along and beyond the land and maritime borders. In terms of magnitude, the numbers and locations of air branches have a first order effect on annual O&M costs, while operating tempo is a close second. The retirement of aged assets can lead to cost reductions, but only if a significant number of aircraft are retired and the mix of aircraft at the various branches and units is made more efficient. CBP plans to balance its aircraft investments with operational needs to address Department and Agency priority missions, principally covering threats to the Southwest Border, while at the same time securing the delivery of the most critical assets needed to ensure the future viability of the air service.

CBP has been actively pursuing aged aircraft investigations since FY 2010. The initial investigations targeted three specific assets that were experiencing age-related problems. CBP attempted to keep each type of aircraft in service for as long as possible. Over time, the aged aircraft investigations and

new aircraft deliveries converged, and CBP began to retire large numbers of aircraft, including entire types.

In order to properly address the aging aircraft problem, an aged aircraft investigation and sustainment effort was undertaken, not unlike that conducted for the P-3, but with little or no opportunity for any kind of service life extension due to the age of the aircraft and cost involved. The components of the effort included:

- Lifetime assessments by aircraft type;
- Structural inspections and maintenance repairs; and
- Visibility into aging aircraft trends.

Through FY 2012, CBP has retired five types of aircraft: the OH-6 and MD-600 light helicopters; the C-172 and PA-18 single-engine aircraft; and the C-404 twin-engine aircraft. Some twin-engine aircraft are also being retired one at a time, including the PA-42 “Chet,” and the C-12M maritime patrol aircraft, and nine of the 16 UH-60A Black Hawks currently in operation may be grounded temporarily until funds can be provided for induction into the Army A to L conversion line. CBP has also noted aged-aircraft problems with its C-550 jet interceptors, but to date these have been repairable.

CBP will perform an annual aged aircraft reassessment beginning in the March/April 2014 timeframe to decide how best to continue managing its aged aircraft inventory to meet annual mission needs.

Impact on Performance

CBP will continue to balance investments and operations support to obtain the best, most effective mix that addresses mission needs as well as the agency’s future asset requirements. CBP’s Air Council will assist in deciding what mission priorities will be supported by the aircraft and available flight hours.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aircraft systems, and other related equipment of the air and marine program, including operational training and mission-related travel, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and, at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, [\$435,769,000] \$427,701,000¹ to remain available until September 30, [2015] 2016²: Provided, That no aircraft or other related equipment, with the exception of aircraft that are one of a kind and have been identified as excess to U.S. Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year [2013] 2014³ without the prior notice to the Committees on Appropriations of the Senate and the House of Representatives. *[Provided further, that the Secretary of Homeland Security shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act, on the update to the 5-year strategic plan for the air and marine program directed in conference report 109-241 accompanying Public Law 109-90 that addresses missions, structure, operations, equipment, facilities, and resources including deployment and command and control requirements, and includes a recapitalization plan with milestones and funding, and a detailed staffing plan with associated costs to achieve full staffing to meet all mission requirements.]*⁴

1. Project Description, Justification and Scope

Project Description

In the summer of 2006, CBP OAM developed and submitted to Congress a Strategic Air Plan that defined the end state for the nation-wide air service based on ongoing threat assessments and mission requirements determined by the agency and higher authority. In 2007, this plan was updated to incorporate the CBP marine service and the Unmanned Aircraft System (UAS) Program, and was re-named the Strategic Air and Marine Program (StAMP). The separate UAS PPA was formally merged into the CBP OAM Procurement PPA in FY 2007.

In April 2010, CBP accelerated the transition of StAMP from an acquisition program to a sustainment program. While no new acquisitions are planned, aged assets will be maintained in operating condition as long as they are safe to fly. CBP will continue to standardize the types of aircraft and marine vessels, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The OAM Procurement PPA is used to acquire new aircraft and marine vessels, upgrade older aircraft and vessels to extend their service lives, purchase new aircraft and marine sensors, acquire UASs, enhance surveillance and data/video distribution and sharing capabilities, and support the expansion of aviation and marine mission capabilities along the borders, in response to ongoing threat assessments and mission assignments directed by higher authority.

CBP has established new Planning, Programming, Budgeting and Accountability (PPBA) processes, along with a new line of business budget structure, that will supersede the StAMP and provide the framework and analyses needed to determine future funding needs for aviation and marine elements supporting homeland security missions.

Program Justification

CBP protects the American people and the Nation’s critical infrastructure through the coordinated use of integrated air and marine forces to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP OAM support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively, ground and maritime interdiction missions to be supported, air interdiction missions to be executed, and interior investigations to be supported. OAM also provides rapid-response relocation of personnel and equipment to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract supports the aircraft that makes it possible for CBP OAM to perform this mission.

2. Significant Changes

The funds requested will enable continued support for program operations through FY 2014.

6. Method of Performance

1	Is there a project (investment) manager assigned to the investment?	If so, what is his/her name?
	Yes	John A. Wells
2	Is there a contracting officer assigned to the investment?	If so, what is his/her name?
	Yes	Susan Baptist
3	Is there and Integrated Project Team (IPT)?	If so, list the skill set represented.
	Yes	The IPT is comprised of individuals from the CBP Office of Air and Marine, Office of Administration, Office of Information and Technology, Technology Systems Program Office, Office of Chief Counsel, Office of Technology Innovation and Acquisition, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.
4	Is there a sponsor/owner for this investment?	If so, identify the sponsor/process owner by name and title and provide contact information.
	Yes	Randolph D. Alles, Assistant Commissioner, Office of Air and Marine.

Operations and maintenance Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangars. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Small Airport User Fee

I. Appropriation Overview

A. Mission Statement for Small Airport User Fee

The Small Airport User Fee is authorized under 19 U.S.C. 58b and administered under 19 U.S.C. 58c(b)(9)(A)(i). The Small Airport User Fee program supports inspection services at participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the user fee airports and U.S. Customs and Border Protection (CBP). It may be adjusted annually as costs and requirements change.

B. Budget Activities

A User Fee Airport (UFA) is a small airport that has been approved by the Commissioner of CBP to receive, for a fee, the services of a CBP Officer (CBPO) for the processing of aircraft entering the United States, and their passengers and cargo. The applicant must meet the following criteria for UFA consideration:

- The volume or value of business at the airport is insufficient to justify the availability of inspectional services at such airport on a non-reimbursable basis.
- The current Governor of the State in which the airport is located declares support for the designation, in writing to the Commissioner of CBP.
- The requestor (e.g. airport authority) agrees to reimburse CBP for all costs associated with the services, including all expenses of staffing a minimum of one full-time inspector.
- The requestor completes an Agriculture Compliance Agreement (ACA) with fixed base operators and garbage haulers for handling the international garbage.

The basic steps required in considering an application for designation as an UFA include:

- Receipt of a letter from the current Governor of the state supporting the user fee airport designation, addressed to the Commissioner;
- An initial site visit in which CBP officials discuss workload and services;
- A final site visit in which CBP officials verify that facilities are 85 percent complete and adequate for inspectional services to be provided;
- Completion of a Memorandum of Agreement (MOA) with CBP, which states the responsibilities, fees, and hours of service; and
- Completion of an ACA with CBP for handling international garbage.

An approved UFA receiving CBP services is responsible for payment of the following fees:

- Per Inspector - \$140,874 for the first year and \$123,438 for succeeding years;
- Automatic Data Processing costs per inspector - \$17,042 to \$21,062 (1st year) and \$13,620 to \$17,640 for succeeding years, depending on the location; and
- Other associated costs, such as overtime.

The Small Airport User Fee provides funding for the full costs of inspection services by CBPOs. At the end of the FY 2012, CBP supported 49 small airports. There are numerous pending applications for UFA status:

Pending (9):

- Ardmore Airport (Ardmore, TX)
- Ellington Field (Houston, TX)
- Griffiss International (Rome, NY)
- Charlotte Monroe Airport (Monroe, NC)
- South Texas International Airport (Edinburg, TX)
- Marathan Airport (Marathon, FL)
- Van Nuys Airport (Van Nuys, CA)
- Witham Airport (Stuart, FL)
- Concord Airport (Concord, NC)

C. Budget Request Summary

In FY 2014, CBP requests 69 full-time equivalent employees and \$8,533,000 in anticipated collections for the Small Airport User Fee program. The projections are based on the number of CBPOs required to fulfill agreements with the small airports. Some agreements require more than one CBPO. CBP estimates collections as follows:

Figure 1: Estimated Collections – In Thousands of Dollars

Small Airports	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	7,381	8,284	8,533	8,789

**FY 2012 represents actual collections.*

Program Performance Justification**
(Dollars in Thousands)

PPA: Small Airport User Fee

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	69	69	7,381
2014 Adjustments-to-Base	-	-	1,152
2014 Current Services	69	69	8,533
2014 Total Request	69	69	8,533
Total Change 2012 to 2014	-	-	1,152

CURRENT SERVICES PROGRAM DESCRIPTION:

The Small Airport User Fee program supports inspection services provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. Revenue from the Small Airport User Fee program funds processing of aircraft entering the United States, the passengers, and cargo.

Small Airport User Fee Mission Statement

Small Airport Facilities is authorized under 19 U.S.C. 58b and administered under 19 U.S.C. 58C (b)(9)(A)(i). The User Fee Airports Program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the small airport facility and the agency, and may be adjusted annually as costs and requirements change.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection COBRA Passenger Inspection Fee

I. Appropriation Overview

A. Mission Statement for COBRA Passenger Inspection Fee

The *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) created a series of user fees to recover costs incurred by U.S. Customs and Border Protection (CBP). P.L. 99-272, codified as 19 U.S.C. 58c (a)(1-8), established processing fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers.

Collections from COBRA user fees are made available through permanent/indefinite appropriation created by the aforementioned user fee statute with the exception of COBRA fees collected from the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011*. The fees are deposited in the Customs User Fee Account (No Year) and are available only to the extent provided in Appropriations acts.

Effective November 5, 2011, certain exemptions under the *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) were eliminated. Section 601 of the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and Caribbean and adjacent islands¹ from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees. Due to the elimination of the exemptions, CBP collected additional COBRA revenue (the exemption went into place partially through the fiscal year (FY)) in FY 2012. CBP expects to collect \$110,000,000 in FY 2013 and FY 2014. These figures are not included in the FY 2014 request for COBRA and are not represented in any of the tables within this document for fiscal years 2012 and 2013. The collections associated with the elimination of the exemptions have been marked as unavailable and placed into a separate Treasury Account (*Treasury Account Symbol 70 5695.050*).

The FY 2013 fee collections associated with lifting the country exemptions are regarded as offsetting receipts and are not available to CBP without further appropriation. In the President's FY 2014 Budget, these fee collections (\$110 million) are treated as an offsetting receipt to the S&E account and the COBRA user fee proposal under the DHS General Provisions, proposes to make these fees available by offsetting them with discretionary appropriations.

¹ Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda-UK, British VI-UK, Cayman Islands, Cuba, Dominica, Dominican Republic, Grenada and South Grenadines, Guadeloupe-France, Haiti, Jamaica, Martinique-France, Netherlands Antilles, St. Kitts and Nevis, St. Lucia, St. Vincent and North Grenadines, Trinidad and Tobago, Turks, and Caicos Islands-UK.

B. Budget Activities

COBRA collections fund activities mandated by law. These activities involve Customs and Border Protection Officers (CBPOs) ensuring that all carriers, passengers, and their personal effects entering the United States are compliant with U.S. customs laws. To the extent that revenues are available, the estimated FY 2014 collections will fund the activities in the COBRA statute; however, the fees are not legislatively set to fully recover these costs. Therefore, the estimated collections will only partially fund the authorized activities listed:

- All inspectional overtime;
- Premium pay;
- Civil Service Retirement and Disability Fund (agency contribution);
- Excess preclearance;
- Foreign language proficiency awards; and
- Enhanced equipment and support.

The Office of Field Operations (OFO) of CBP uses overtime for inspectional activities and for seizure/arrest processing that goes beyond an employee's regular duty hours. The majority of OFO's inspectional overtime needs are often related to seasonal, daily, and after-hours operations. OFO implements a comprehensive inspectional overtime strategy to augment standard port of entry needs by adding flexibility to support changing operations as a result of surge and peak-time operations. Overtime flexibility ensures that sufficient staffing is available to administer the full range of inspection, intelligence analysis, examination, and law enforcement activities that relate to the arrival and departure of persons, conveyances, and merchandise at our nation's ports of entry.

Additionally, the travel industry requests the approval of services at new locations, new flights at existing locations, and/or to move flights to peak or outside normal operating hours (outliers). Peak arrivals can exceed current facility and CBP capacity, while outlier flights reduce available staff during peaks and/or further impact decreasing overtime budgets.

Based on the current Workload Staffing Model, OFO estimates that a CBP officer performs 1,182 hours of frontline work a year. Every hour of overtime buys an additional frontline hour without additional administrative overhead.

Premium Pay and Civil Service Retirement and Disability Fund expenses include pay and compensation benefits that enable CBP to fully staff according to mission requirements on holidays and weekends and to compensate eligible employees for benefits governed by 19 U.S.C. 267 (overtime and premium pay for Customs Officers).

The *Trade Act of 2002* (P.L. 107-210) section 337, codified as 19 USC 58c (b) (9) (A) (ii) and (b) (9) (B), authorized the establishment of the Express Consignment Courier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. The original fee was set at 66 cents per individual airway bill or bill of lading and was later increased to \$1 effective July 2008. Congress also mandated that 50 percent of the ECCF fee collection be transferred to the Treasury's General Fund. Because the ECCF fees are deposited in the Customs User Fee Account, for budgetary purposes, they are reported as part of the COBRA user fees.

The fee rates under the current law are as follows:

Barge/Bulk Carrier Fee (\$110; \$1500 cap): This fee applies to barge or bulk carrier arrivals in the United States from Mexico or Canada. A barge or bulk carrier is considered to be arriving from Mexico or Canada when all of its cargo was loaded in either country, even if the vessel went to another country to discharge cargo prior to arriving in the United States. If all or part of the cargo was laden in another country, the vessel is considered to have arrived from that country (for user fee purposes only), even if the barge or bulk carrier called in Canada or Mexico to unlade and/or lade some cargo just prior to arriving in the United States.

Broker Permit (\$138 annually): Customs brokers are private individuals, partnerships, associations or corporations licensed, regulated, and empowered by CBP to assist importers and exporters in meeting federal import and export requirements.

Commercial Truck (\$5.50; \$100 cap): A driver, owner, agent, or other person in charge of the vehicle can pay a single arrival fee or prepay the fee by purchasing an annual transponder.

Commercial Vessel (\$437; \$5,955 cap): Masters, licensed deck officers, or pursers of commercial vessels of 100 net tons or more arriving within the limits of a U.S. port from a foreign location are required to pay regardless of the number of arrivals at U.S. Ports in the course of a single voyage.

Dutiable Mail (\$5.50): The addressee of each item of international mail that contains dutiable merchandise is required to pay the fee.

Passenger Commercial Air (\$5.50): Passengers arriving in the U.S. by commercial airline whose journeys originate in a place outside the U.S. are required to pay the fee.

Passenger Commercial Vessel (\$5.50; Cruise and Ferry \$1.93): Passengers arriving in the U.S. by commercial vessel are required to pay the fee. This fee is commonly known as a cruise or ferry vessel fee

Private Vessel and Aircraft (\$27.50 annually): Master or other individual in charge of a private aircraft and private vessel is required to pay the fee.

Railroad Car (\$8.25; \$100 cap): Railroad companies moving or receiving loaded or partially loaded passenger or commercial freight rail cars into the U.S. are required to pay the fee for each loaded car. In lieu of this fee, an annual prepayment per calendar year may be made for each rail car.

Express Consignment Carrier Fee (\$1.00; \$0.50 CBP; \$0.50 remitted to Treasury): Carriers operating Express Consignment Facilities are required to pay the fee.

All components of COBRA were last adjusted in April of 2007.

CBP initiated a service contract in the beginning of FY 2013 to conduct an independent assessment of CBP user fee forecast methodology and resource management. The goal of this effort is to assess

existing processes and provide input that can be used to improve variables CBP uses to forecast fee revenue and provide recommendations on improvement opportunities for the management of fee revenue.

C. Budget Request Summary

CBP requests 2,478 full-time equivalent employees and \$694,627,440 in FY 2014 for COBRA user fees and the ECCF fees to recoup the costs incurred for performing COBRA- related inspections. Of the \$694,627,440 in total collections, COBRA represents \$667,620,181 while the ECCF portion is \$27,007,259. The COBRA portion is composed of \$473,127,168 based on existing rates, while \$194,493,013 is from an increase in COBRA fee rates.

	FY 2014
COBRA	\$473,127,168
Fee increase	194,493,013
Total, COBRA	\$667,620,181
ECCF	27,007,259
Total	\$694,627,440

Future year collections are based primarily upon international travel projections for passengers and all conveyances under COBRA. Additional factors such as anticipated economic growth and inflation were also considered.

This level reflects a legislative proposal in the President’s FY 2014 Budget under the DHS General Provisions to increase the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees by \$2 and proportional increases to all other COBRA components. Most of these fees were last raised in 2007. Assuming enactment at the beginning of FY 2014, this proposal will increase collections by \$194.5 million, allowing CBP to hire up to 903 additional CBPOs.

Figure 1: Estimated Collections – In Thousands of Dollars

COBRA	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	463,107	481,003	694,627	722,421

*FY 2012 represents actual collections.

Estimating and allocating COBRA collections:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is primarily used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, staff uses numerous sources, and focus mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. GDP and anticipated economic vitality of a region are two factors that are considered in detail.

The bulk of COBRA collections, mainly those attributable to international air travel, are remitted quarterly. The first remittance occurs annually in November and the collections are made available in December. CBP relies on carryover balances to address requirements during the first two fiscal months. In FY 2012, CBP carried over \$37.6 million, which equates to roughly eight percent of the FY 2013 projected collections. CBP mitigates the risks associated with COBRA cash flows by minimizing the reimbursement of costs incurred in the annual appropriations during the first two months of the fiscal year until the initial collections become available in December.

*The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L. 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request. Of the \$231.5 million increase, \$194.5 million is attributable to the increase in fee rates and \$37 million is associated with an increase in passenger and conveyance volume.

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Customs and Border Protection
COBRA Passenger Inspection Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: COBRA Passenger Inspection Fee

	Perm. Pos	FTE	Amount
2012 Revised Enacted	1,575	1,575	463,107
2014 Adjustments-to-Base	903	903	231,520
2014 Current Services	2,478	2,478	694,627
2014 Total Request	2,478	2,478	694,627
Total Change 2012 to 2014	903	903	231,520

CURRENT SERVICES PROGRAM DESCRIPTION:

The components of the COBRA User Fees account are: international air and sea passenger; commercial trucks; loaded/partially loaded rail cars; commercial vessels; private aircraft and vessels; dutiable mail; customs broker permits; barges/bulk carriers; cruise vessel passenger fees; and express consignment carrier fees. As COBRA fees are set by statute they do not fully recover the costs associated with customs inspections and each year their “buying power” diminishes. Costs in excess of fee funding are supported by annual appropriations.

Proposals for Promoting Travel and Trade

Strengthening the U.S. economy through the promotion of travel and trade is a Presidential priority and the FY 2014 Budget includes the following proposals in support of this priority:

- Adding 1,600 new CBP officers (+ \$210 million) through discretionary appropriations;
- Increasing COBRA (customs inspections) user fees to fund up to 903 more CBP officers;
- Increasing Immigration Inspection user fees to fund up to 974 more CBP officers; and
- Authorizing CBP to enter into reimbursable fee agreements to provide service above currently funded levels.

These proposals will address the gap in staffing identified in the FY 2013 Report to Congress on Resource Optimization at Ports of Entry by OFO’s Workload Staffing Model (WSM). These new resources will reduce wait-times and increase seizures of illegal items and counterfeit goods.

In the case of COBRA user fees, CBP is proposing, via the General Provisions, a \$2.00 increase to the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees and proportional increases to all other COBRA components. Assuming enactment of the proposal at the beginning of FY 2014, CBP will collect an additional \$194.5 million in that fiscal year. For

illustrative purposes only (as decisions on allocation of new CBPOs have not been determined), these new CBP officers requested in the FY 2014 President's budget are estimated to decrease peak wait times at some ports of entry by 30 minutes or more and have an estimated enforcement impact in increased seizures of \$85.8M.

The General Provision language

Sec. 541.

(a) (1) For fiscal year 2014, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection:

(A) For paragraph (1), \$594;

(B) For paragraph (2), \$7.50;

(C) For paragraph (3), \$11.25;

(D) For paragraph (4), \$37.50;

(E) For paragraph (5), \$7.50 for the fee imposed in subparagraph (A) and \$2.60 for the fee imposed in subparagraph (B);

(F) For paragraph (6), \$7.50;

(G) For paragraph (7), \$188; and

(H) For paragraph (8), \$150.

(2) For fiscal year 2014, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection:

(A) For paragraphs (2) and (3), \$135;

(B) For subparagraph (A) of paragraph (5), \$8,316;

(C) For paragraph (6), \$2,100;

(D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and

(E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.

(3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.

Background: The COBRA commercial aircraft passenger (currently \$5.50) and commercial vessel passenger fees (currently \$5.50; and \$1.93 for ferry/cruise passengers) were established in 1985 at a rate of \$5.00 per person (\$1.75 for ferry/cruise passengers). The rest of the COBRA fees were set at \$397 for commercial vessels (\$5,995 cap); \$5.00 for commercial trucks (\$100 cap); \$7.50 for railroad cars (\$100 cap); \$25.00 for private aircraft and private vessels; \$5.00 for dutiable mail; \$125 for Broker Permits; and \$100 for barges/bulk carriers (\$1,500 cap). ECCF was originally set at \$0.66 per airway bill or bill of lading in 2002.

Under the proposed increase, the rate would increase to \$7.50 for air and sea passengers and \$2.60 for cruise and ferry passengers. The rest of the COBRA fees are being proposed to increase to: \$594 for commercial vessels (\$8,316 cap); \$7.50 for commercial trucks (\$135 cap); \$11.25 for railroad cars

(\$135 cap); \$37.50 for private aircraft and private vessels; \$7.50 for dutiable mail; \$188 for Broker Permits; and \$150 for barges/bulk carriers (\$2,100 cap). ECCF is proposed to increase \$1.36 per airway bill or bill of lading.

These fees have not been raised since 2007. If these fees had been adjusted for inflation since 1985 using the Consumer Price Index (CPI), the fee would be \$10.67 in FY 2012 for the air and commercial vessel passengers and \$3.73 for ferry/cruise passengers. If the rest of the COBRA fees were increased based upon the CPI, they would be set as follows: \$847.12 for commercial vessels (\$12,792.19 cap); \$10.67 for commercial trucks (\$213.38 cap); \$16.00 for railroad cars (\$213.38 cap); \$53.35 for private aircraft and private vessels; \$10.67 for dutiable mail; \$266.73 for Broker Permits; and \$213.38 for barges/bulk carriers (\$3,200.72 cap).

	Established Rates (COBRA 1985, IUF 1987, ECCF 2002)	Dollar Increase (Established to Current Rate)	Current Rates (FY13)	FY14 Proposed Increases	Dollar Increase (Current to FY14 Proposed)	Percent Increase (Established to FY14 Proposed)	Fee with CPI Inflation (From Established Rates)	Dollar Increase (Established to CPI Rates)	Percent Increase (Established to CPI Rates)
COBRA									
Commercial Air Passenger	\$5.00	10%	\$5.50	\$7.50	\$2.00	36%	\$10.67	\$5.67	113%

Cruise and Ferry	\$1.75	10%	\$1.93	\$2.60	\$0.67	35%	\$3.73	\$1.98	113%
Commercial Trucks	\$5.00	10%	\$5.50	\$7.50	\$2.00	36%	\$10.67	\$5.67	113%
Railroad Cars	\$7.50	10%	\$8.25	\$11.25	\$3.00	36%	\$16.00	\$8.50	113%
Private Vessel & Aircraft (decal)	\$25.00	10%	\$27.50	\$37.50	\$10.00	36%	\$53.35	\$28.35	113%
Commercial Vessel Passenger	\$5.00	10%	\$5.50	\$7.50	\$2.00	36%	\$10.67	\$5.67	113%
Dutiable Mail	\$5.00	10%	\$5.50	\$7.50	\$2.00	36%	\$10.67	\$5.67	113%
Broker Permit	\$125.00	10%	\$138.00	\$188.00	\$50.00	36%	\$266.73	\$141.73	113%
Barges/Bulk Carriers	\$100.00	10%	\$110.00	\$150.00	\$40.00	36%	\$213.38	\$113.38	113%
ECCF*	\$0.66	52%	\$1.00	\$1.36	\$0.36	36%	\$0.84	\$0.18	27%

*The \$.84 CPI rate was calculated using \$.66 set in 2002 and inflated using CPI since 2002 while the rest of the COBRA fees were calculated using the rates set in 1985 and inflated using CPI since 1985. This is because ECCF was authorized in 2002 and the rest of the COBRA fees were authorized in 1985.

CPI - Consumer Price Index

Assessing User Fees

CBP intends to pursue the following actions as a way to assess existing user fees and explore options for new user fees:

- Report on Use of User Fees and Associated Service Levels - CBP will provide an annual electronic report to the general public and interested stakeholders to provide transparency on the amount of reimbursable activity that occurred and how the fees were spent to support this activity. The report will also provide annual average wait time data for high volume port locations receiving additional COBRA and IUF fee resources in order to assess the connection between service levels and resources. Each port's current average wait time will be measured against wait time averages from the prior year to measure the impact that the additional resources have made with respect to service levels and other related economic benefits.
- Allocation of Resources - As part of its resource optimization efforts, CBP is committed to improving service levels by increasing efficiency and throughput. This will be informed by OFO's Workload Staffing Model and achieved through CBP's transformation efforts.

- Study to Determine Feasibility of User Fee collection in the Land Border Environment –CBP is in the process of initiating a full study of land border fee options and continues to review collections and cost recovery for the sea environment. CBP will first explore the feasibility of collecting from existing operators such as bridge commissions, toll operators, commercial passenger bus, commercial passenger rail, and any potential legal impediments. In the course of the study, CBP intends to pursue a pilot that tests all steps to be involved in fee collection short of actual collections without the statutory or regulatory authority to do so. Finally, CBP will follow by assessing how to address land border pedestrians and passenger vehicle fees.
- Accounting for Inflation in User Fees – It is the Administration’s intent to adjust COBRA fees annually for inflation. Barring a change to the underlying statutes governing these fees that would authorize such an adjustment, future budget requests (beginning in FY 2015) will propose increases in line with the Consumer Price Index.

Projected Performance Impact and Cost Recovery of COBRA Increases

CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP’s *Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress*, and include fluctuating user fee collections, expansion of workload including new or expanded facilities, and historic levels of travel volumes - up 12% since FY 2009 and projected to increase 3-4 percent each year for the next three years.

In order to help address these challenges, CBP proposes raising the COBRA fee in order to generate funds to decrease the gap between CBP’s reimbursable inspectional activity and the actual reimbursements from COBRA. This will allow CBP to dedicate resources to increased CBPO hiring, which will result in improved customs inspection services provided to those who pay this fee when traveling to the United States.

This proposal is part of CBP’s integrated Resource Optimization Strategy, which incorporates optimizing business processes to maximize current resources, identifying staffing needs, and exploring alternative funding strategies through a comprehensive funding plan to provide for additional CBP officers. The \$2.00 increase to COBRA (and proportionate increases to other COBRA components) is expected to provide \$194.5 million in additional funding, which could fund up to 903 additional CBPOs. Of the \$194.5 million, \$40.7 million is attributable to the fee increase from previously exempt passengers from Canada, Mexico, and Caribbean and adjacent islands. These proposals compliment the WSM by identifying alternative sources of funding to provide for additional CBP officers. These funds could be used for a combination of additional officers, overtime, and infrastructure support.

In thousands

User Fee	Additional Funding	Number of CBPOs
Increase for regular collections	\$153,766	903
Fee increase from previously exempt FTA countries	40,727	Additional officers, overtime, infrastructure
COBRA	\$194,493	903

Recent staffing deployments continue to indicate that additional CBPO staffing reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. The following estimated outcomes of hiring 903 additional CBP officers could be expected:

- 20,769 more enforcement actions.
 - \$36,120,000 increase in drug seizure value.
 - \$2,483,250 increase in currency seizure value.
 - \$7,088,550 increase in trade penalty assessments.
 - \$2,257,500 increase in IPR seizures.
 - \$37,926,000 increase in liquidated damage assessments.
- \$85,875,300 in Total Economic Impact²**

A \$2 increase to the COBRA fee will enable CBP to collect and spend an additional \$40 million from passengers traveling to the United States by air and sea from countries previously exempt from paying the COBRA fee.³ These funds will be used for a combination of additional officers, overtime, and infrastructure support.

In FY 2012, CBP recovered 54 percent of all COBRA eligible costs. Since the first quarter of FY 2010, average wait times have increased steadily by 7 minutes, with more dramatic increases experienced at international gateway airports. Additionally, the commercial air travel environment continues to be the primary threat for future terrorist attacks on the United States. With the fee increase, CBP would potentially be able to recover 99 percent of current COBRA eligible costs for customs inspectional activity in the air environment, 19 percent in the land environment, and 98 percent in the sea environment in FY 2014.

The projected cost recovery in FY 2014 assumes FY 2012 costs and service levels and does not take into consideration an estimated 4-5 percent growth in passenger volume in future fiscal years or infrastructure requirements assumed in CBP's Resource Optimization Strategy. Even with increasing volume and requirements in future fiscal years, the proposed increase in collections, a potential 27

² These statistics were formulated using impact statistics found in the 2013 Resource Optimization Report.

³ This refers to passengers whose journeys originated from countries formerly exempt from paying COBRA air and sea passenger fees: Canada, Mexico, and certain Caribbean islands. The exemption was lifted by Section 601 of *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42).

percent increase in the air passenger environment alone assuming current service levels, will mean greater security, lower wait times, and increased services for those traveling to the United States.

COBRA Passenger Inspection Fee Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain Customs services. The fees were created by the *Consolidated Omnibus Budget Reconciliation Act of 1985* (COBRA). COBRA fees are made available through permanent /indefinite appropriation created by the user fee statute. CBP collects customs fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Inspection User Fee

I. Appropriation Overview

A. Mission Statement for Immigration Inspection User Fee (IUF)

The *Department of Justice Appropriation Act of 1987* (P.L. 99-591) authorized the collection of user fees from international passengers traveling into the United States. This fee is primarily used to fund inspection and detention services at air and sea ports-of-entry. This law, codified as 8 U.S.C. 1356(h), established the air and sea passenger fees to generate revenues that would reimburse the “expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.”

After the creation of the Department of Homeland Security (DHS), most of the immigration inspection functions were transferred to U.S. Customs and Border Protection (CBP); however, the functions funded by the IUF for detention and removal of inadmissible aliens and other investigative activities were transferred to U.S. Immigration and Customs Enforcement (ICE). As a result, a Memorandum of Agreement (MOA) was established between CBP and ICE in 2004 to determine the allocation of fee collections between the two DHS Components. Although CBP retains 100 percent of Administrative Carrier Fines, CBP only receives 82.63 percent of the Airline and Vessel User Fees. The remaining 17.37 percent of the Airline and Vessel User Fees go to ICE.

B. Budget Activities

Individuals seeking entry into the United States are inspected at ports of entry by Customs and Border Protection Officers (CBPO) who determine their admissibility. Often, these CBPOs are the first persons to welcome both visitors and citizens to the United States, while performing the full range of their inspectional duties. The inspection process includes all work performed in connection with the entry of aliens and U.S. citizens into the United States, including pre-inspection performed CBPOs outside of the United States. A CBPO is responsible for determining the nationality and identity of each applicant for admission and for preventing the entry of ineligible aliens, including criminals, terrorists, and drug traffickers, among others. U.S. citizens are automatically admitted upon verification of citizenship. Aliens are questioned and their documents are examined to determine admissibility based on the requirements of U.S. immigration law.

Under the authority granted by the *Immigration and Nationality Act (INA)* (P.L. 89-236), as amended, a CBPO may question, under oath, any person coming into the United States to determine his or her admissibility. In addition, a CBPO has the authority to search, without warrant, the person and effects of any person seeking admission, when there is reason to believe that grounds of exclusion exist that would be disclosed by such a search.

The INA is based on the law of presumption: an applicant for admission is presumed to be an alien until he or she shows evidence of citizenship; an alien is presumed to be an immigrant until he or she proves that he or she fits into one of the non-immigrant classifications.

In FY 2014, the IUF will be used to fund a portion of the salaries, benefits, and overtime for the CBPOs performing immigration inspection, detention, and removal of inadmissible aliens. By statute, CBP appropriations can be reimbursed for the following activities:

- Providing immigration inspection and pre-inspection services;
- Providing overtime inspection services;
- Administration of debt recovery;
- Detection of fraudulent documents;
- Detention and Removal of inadmissible aliens; and
- Asylum proceedings at airports and seaports.

The fee rates are as follows:

Passengers Aboard Commercial Aircrafts Originating in Foreign Countries: \$7

Passengers Aboard Commercial Vessels Originating in Foreign Countries: \$7; \$3 for passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands.

As part of CBP's commitment to continue improving resource management, CBP initiated a service contract in the beginning of FY 2013 to conduct an independent assessment of CBP user fee forecast methodology and resource management. The goal of this effort is to assess existing processes and provide input that can be used to improve variables CBP uses to forecast fee revenue and provide recommendations on improvement opportunities for the management of fee revenue.

C. Budget Request Summary

CBP requests 5,100 full-time equivalent employees and \$764,267,000 in FY 2014 for the IUF. The IUF is composed of Administrative Carrier Fines and Airline and Vessel User Fees. CBP projects an increase of \$197.3 million over FY 2013.

This level reflects a legislative proposal in the President's FY 2014 Budget under the DHS General Provisions to increase the IUF by \$2. This fee was last raised in 2001. Assuming enactment at the beginning of FY 2014, this proposal will increase collections by \$165.7 million, allowing CBP to hire up to 974 additional CBPOs. Fee collections based on the existing fee rate are estimated at \$598.6 million.

The Administrative Carrier Fines portion of IUF differs from the fines collected under the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208). CBP receives 100 percent of the Administrative Carrier Fines and 82.63 percent of the Airline and Vessel User Fees. ICE receives 17.37 percent of the Airline and Vessel User Fees. The percentage split is based on an established MOA between CBP and ICE.

CBP projected the FY 2014 collections (as well as other fiscal years) by taking into account future projections for international travel, both for air and sea passenger

Figure 1: Estimated Collections – In Thousands of Dollars

IUF	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	566,919	577,007	764,267	\$799,464

**FY 2012 represents actual collections.*

The IUF collections are on a quarterly remittance schedule. The first major remittance occurs annually in February. The February collections will not be deposited until March 1. CBP relies on carryover balances to support inspectional activities during the first five fiscal months. CBP mitigates the risks associated with IUF funds availability flows by using IUF carryover from prior years during the beginning of the fiscal year then using current year funding for reimbursements as collections become available.

Immigration Inspection User Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Immigration Inspection User Fee

	Perm. Pos	FTE	Amount
2012 Revised Enacted	4,126	4,126	566,919
2014 Adjustments-to-Base	974	974	197,348
2014 Current Services	5,100	5,100	764,267
2014 Total Request	5,100	5,100	764,267
Total Change 2012 to 2014	-	-	197,348

CURRENT SERVICES PROGRAM DESCRIPTION:

As established in an MOA between CBP and ICE, funds from the IUF account are used by CBP and ICE to recover some of the costs of immigration inspection services, detention, and removal of inadmissible aliens related to the inspection and pre-inspection services for commercial aircraft or vessels. CBP receives 100 percent of the Administrative Carrier Fines and 82.63 percent of the Airline and Vessel User Fees. ICE receives 17.37 percent of the Airline and Vessel User Fees. At air and sea ports of entry specifically, the fees cover some of the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment. However, because these fees are statutorily set, their “buying power” diminishes each year.

Figure 1: FY 2012 Allocation of IUF Fees – In Thousands of Dollars

Program Office	FY 2012 * Allocation	Allocation in %
Office of Field Operations	466,598	80.8%
Office of Information Technology	83,413	14.4%
Office of Administration	24,356	4.2%
Office of Internal Affairs	1,883	0.3%
Office of the Commissioner	435	0.1%
Office of International Trade	512	0.1%
Office of Human Resources Management	188	0.0%
Total	577,385	100.0%

**The difference between FY 2012 allocations vs. FY 2012 collections is covered by carryover*

Proposals for Promoting Travel and Trade

Strengthening the U.S. economy through the promotion of travel and trade is a Presidential priority and the FY 2014 Budget includes the following proposals in support of this priority:

- Adding 1,600 new CBP officers (+ \$210 million) through discretionary appropriations;
- Increasing COBRA (customs inspections) user fees to fund up to 903 more CBP officers;
- Increasing Immigration Inspection user fees to fund up to 974 more CBP officers; and
- Authorizing CBP to enter into reimbursable fee agreements to provide service above currently funded levels.

These proposals will address the gap in staffing identified in the FY 2013 Report to Congress on Resource Optimization at Ports of Entry OFO's Entry by OFO's Workload Staffing Model (WSM). These new resources will reduce wait-times and increase seizures of illegal items and counterfeit goods.

In the case of IUF, CBP is proposing, via the General Provisions, a \$2.00 increase to the commercial aircraft passenger and commercial vessel passenger Immigration Inspection User Fees. Assuming enactment of the proposal at the beginning of FY 2014, CBP will collect an additional \$165 million in that fiscal year. For illustrative purposes only (as decisions on allocation of new CBPOs have not been determined), the new CBP officers requested in the FY 2014 President's budget are estimated to decrease peak wait times at some ports of entry by 30 minutes or more and have an estimated enforcement impact in increased seizures of \$92.6M.

The General Provision language

Sec. 541. (b) For fiscal year 2014, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:

- (1) For subsection (d), \$9; and
- (2) For paragraph (3) of subsection (e), \$5.

Background: The IUF commercial aircraft passenger and commercial vessel passenger fees were established in 1987 at a rate of \$6.00 per person and \$3.00 for vessel passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands . They were last increased in 2001, when the \$6.00 rate was increased to \$7.00 per passenger. Under the proposed \$2.00 increase, the rate would increase to \$9.00 for air and sea passengers and \$5.00 for vessel passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands. If these fees had been adjusted for inflation since 1987 using the Consumer Price Index, the fee would be \$12.13 in FY 2012 for the air and commercial vessel passenger component and \$6.06 for vessel passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands.

	Established Rates (COBRA 1985, IUF 1987, ECCF 2002)	Dollar Increase (Established to Current Rate)	Current Rates (FY13)	FY14 Proposed Increases	Dollar Increase (Current to FY14 Proposed)	Percent Increase (Established to FY14 Proposed)	Fee with CPI Inflation (From Established Rates)	Dollar Increase (Established to CPI Rates)	Percent Increase (Established to CPI Rates)

CPI - Consumer Price Index

Assessing User Fees

CBP intends to pursue the following actions as a way to assess existing user fees and explore options for new user fees:

- Report on Use of User Fees and Associated Service Levels - CBP will provide an annual electronic report to the general public and interested stakeholders to provide transparency on the amount of reimbursable activity that occurred and how the fees were spent to support this activity. The report will also provide annual average wait time data for high volume port locations receiving additional COBRA and IUF fee resources in order to assess the connection between service levels and resources. Each port's current average wait time will be measured against wait time averages from the prior year to measure the impact that the additional resources have made with respect to service levels and other related economic benefits.
- Allocation of Resources - As part of its resource optimization efforts, CBP is committed to improving service levels by increasing efficiency and throughput. This will be informed by OFO's Workload Staffing Model and achieved through CBP's transformation efforts.
- Study to Determine Feasibility of User Fee collection in the Land Border Environment - CBP is in the process of initiating a full study of land border fee options and continues to review collections and cost recovery for the sea environment. CBP will first explore the feasibility of collecting from existing operators such as bridge commissions, toll operators, commercial passenger bus, commercial passenger rail, and any potential legal impediments. In the course of the study, CBP intends to pursue a pilot that tests all steps to be involved in fee collection short of actual collections without the statutory or regulatory authority to do so. Finally, CBP will follow by assessing how to address land border pedestrians and passenger vehicle fees.
- Accounting for Inflation in User Fees - It is the Administration's intent to adjust the IUF annually for inflation. Barring a change to the underlying statute governing these fees that would authorize such an adjustment, future budget requests (beginning in FY 2015) will propose increases in line with the Consumer Price Index.

Projected Performance Impact and Cost Recovery of IUF Increases

CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP's *Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress*, and include fluctuating user fee collections, expansion of workload including new or expanded facilities, and historic levels of travel volumes, up 12% since FY 2009, and projected to increase 3-4 percent each year for the next three years.

In order to help address these challenges, CBP proposes raising the IUF fee in order to generate funds to decrease the gap between CBP’s reimbursable immigration inspectional activity and the actual reimbursements from IUF. This will allow CBP to dedicate resources to increased CBPO hiring, which will result in improved immigration inspection services provided to those who pay this fee when traveling to the United States.

This proposal is part of CBP’s integrated Resource Optimization Strategy which incorporates optimizing business processes to maximize current resources, identifying staffing needs, and exploring alternative funding strategies through a comprehensive funding plan to provide for additional CBP officers. The \$2.00 increase to IUF (expected to provide \$165.7 million in additional funding) could fund up to 974 additional CBPOs.

User Fee	Additional Funding (\$K)	Number of CBPOs
IUF	\$165,715	974

Recent staffing deployments continue to indicate that additional CBPO staffing reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. The following estimated outcomes of hiring 974 additional CBP officers could be expected:

- 22,402 more enforcement actions.
 - \$38,960,000 increase in drug seizure value.
 - \$2,678,500 increase in currency seizure value.
 - \$7,645,900 increase in trade penalty assessments.
 - \$2,435,000 increase in IPR seizures.
 - \$40,908,000 increase in liquidated damage assessments.
- \$92,627,400 in Total Economic Impact¹**

IUF are paid by air and sea passengers and are used to determine compliance with immigration laws and admissibility for passengers entering the U.S. by air and sea. In FY 2012, CBP recovered 78 percent of the costs to provide these inspectional services in the air environment and 42 percent in the sea environment. Since the first quarter of FY 2010, average wait times have increased steadily by 7 minutes, with more dramatic increases at international gateway airports. Additionally, the commercial air travel environment continues to be the primary threat for future terrorist attacks on the United States. The proposed \$2.00 increase will allow CBP to recover an additional \$165 million in FY 2014 assuming that the fee increase takes place at the beginning of the FY 2014. This means that CBP will recover 98 percent of the current costs for immigration inspectional activity in the air environment and 56 percent of the costs in the sea environment.

The projected cost recovery in FY 2014 assumes FY 2012 costs and service levels and does not take into consideration an estimated 4-5 percent growth in passenger volume in future fiscal years or infrastructure requirements assumed in CBP’s Resource Optimization Strategy. Even with increasing

¹ These statistics were formulated using impact statistics found in the 2013 Resource Optimization Report.

volume and requirements in future fiscal years, the proposed increase in collections, a potential 20 percent increase in the air passenger environment alone assuming current service levels, will mean greater security, lower wait times, and increased services for those traveling to the United States.

Figure 2: Percentage of Cost Recovery– In Thousands of Dollars

IUF	FY 2010	FY 2011	FY 2012	FY2013	4 Year Average

Immigration Inspection User Fee Mission Statement

The *Department of Justice Appropriation Act of 1987* (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Land Border Inspection Fee

I. Appropriation Overview

A. Mission Statement for Land Border Inspection Fee

The *Department of Justice Appropriation Act* of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the Land Border Inspection Fees (LBIF) to recover the full costs incurred for the inspection services provided at land border ports of entry.

B. Budget Activities

The funds in the LBIF account are used to support the following CBP activities:

- Overtime inspection services;
- Expansion, operation, and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

Collections from LBIF fund the salaries and benefits of Customs and Border Protection officers (CBPO), as well as operational and maintenance costs. The law authorizes Land Border fees to recover the full costs of LBIF-related expenses; however, the current fee rates do not allow for enough in revenue collections to reimburse all LBIF expenses during the course of the fiscal year. The difference between collections and LBIF expenses are supported by CBP's annual appropriation. The following fees are deposited into the LBIF account.

- Arrival/Departure Land Border (I-94): \$6
- Non-Immigrant Visa Waiver (I-94W): \$6
- Canadian Boat Landing Permit Individual (I-68): \$16 (individual); \$32 (family)
- NEXUS \$50 (every 5 years)
 - NEXUS replacement card: \$25
- Free and Secure Trade Program (FAST) Driver Application Fee: \$50 (every 5 years)
- Secure Electronic Network for Travelers Rapid Inspection (SENTRI): \$122.25 (individuals); \$160 maximum (families). Fee is for 5-year membership. In addition to application fee, SENTRI includes the following:
 - Dedicated Commuter Lane Fees: \$80
 - Dedicated Commuter Lane additional vehicle (DCL): \$42
- F.B.I. Fingerprint Fee (applicable to SENTRI, NEXUS, FAST, and Global Entry): \$14.50 per applicant; (\$17.25 for SENTRI applicants)
- Replacement of Papers for Non-resident Mexican Crossing (I-190): \$26

The purpose of each fee is as follows:

I-94: This fee is assessed upon the completion of Form I-94 by foreign citizens that are being admitted to the United States under the nonimmigrant visa status. The fee is issued to visitors who hold a valid U.S. Visa.

I-94W: This fee is charged to individuals who enter the U.S. under the Visa Waiver Program. The Visa Waiver Program allows visitors to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

I-68 Canadian Boat Landing Permit (individual or family): This fee permits a boater to report their arrival into the United States telephonically without having to appear at a port-of-entry for an in person inspection. The initial inspection involves an interview, checking the individual in the Interagency Border Inspection System (IBIS) and possibly other law enforcement databases, completion of the form I-68, and payment of the fee.

NEXUS: CBP Trusted Traveler Program. This is a joint program with the Canada Border Services Agency that allows pre-screened, approved travelers faster processing. The NEXUS program allows pre-screened travelers expedited processing by United States and Canadian officials at dedicated processing lanes at designated northern border ports of entry, at NEXUS kiosks at Canadian Preclearance airports, and at marine reporting locations. Approved applicants are issued a photo-identification, proximity Radio Frequency Identification (RFID) card. To participate, both the United States and Canada must approve an individual's application. Denial of an application by either country will keep an individual from participating in the NEXUS program.

FAST Driver Application Fee: CBP Trusted Traveler Program. FAST is a commercial clearance program for known low-risk shipments entering the U.S. from Canada and Mexico. FAST Driver cards are Western Hemisphere Travel Initiative-compliant documents for entry into the United States by land or sea and also afford expedited release to approved commercial truck drivers making fully-qualified FAST trips between the U.S and Canada or to the U.S. from Mexico.

F.B.I. Fingerprint Fee (applicable to SENTRI, NEXUS, FAST, and Global Entry): This fee is charged to cover costs of F.B.I. fingerprint check for application to SENTRI, NEXUS, FAST, and Global Entry.

Replacement of Papers for Non-resident Mexican Crossing (I-190): Citizens of Mexico must apply for a nonresident border crossing card on Form I-190.

SENTRI: CBP Trusted Traveler Program. SENTRI is CBP's trusted traveler program for approved frequent border crossers. SENTRI allows members access to a dedicated commuter lane that expedites crossing between the U.S. and Mexico.

Dedicated Commuter Lane additional vehicle (DCL): If an approved participant wishes to register more than one vehicle for use in the SENTRI DCL lane (maximum of 4 vehicles), or an approved participant wishes to be registered in more than one vehicle (maximum of 8 persons per vehicle), an additional fee of \$42.00 per vehicle will be assessed.

C. Budget Request Summary

CBP requests 284 full time equivalent employees and \$42,941,319 in FY 2014 for LBIF. This request will fund the salaries and benefits of CBPOs and related operational and maintenance costs. Based upon arrivals from Mexico and Canada into the U.S. under all Land Border Programs, CBP projects to collect the following amounts.

Figure 1: Estimated Collections – In Thousands of Dollars

Land Border	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	38,147	41,602	42,941	44,153

* FY 2012 are actual collections.

Figure 2: Percentage of Cost Recovery – In Thousands of Dollars

The delta between LBIF collections and costs is denoted below:

LBIF	FY 2010	FY 2011	FY 2012	3 Year Average
Collections	30,799	34,678	38,147	34,541
Costs	70,557	79,553	91,144	80,418
Collections/Costs	44%	44%	42%	43%

Figure 3: FY 2012 Allocation of LBIF Fees – In Thousands of Dollars

Program Office	FY12 Allocation	Allocation in %
Office of Field Operations	33,768	99.1%
Office of Information Technology	291	0.9%
Office of International Trade	31	0.1%
Total	34,090	100.0%

*The difference between FY 2012 allocations vs. FY 2012 collections is covered by carryover

Estimating and allocating Land Border collections:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, the staff uses numerous sources, and focus mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

CBP initiated a service contract in the beginning of FY 2013 to conduct an independent assessment of CBP user fee forecast methodology and resource management. The goal of this effort is to assess existing processes and provide input that can be used to improve variables CBP uses to forecast fee revenue and provide recommendations on improvement opportunities for the management of fee revenue.

To address stakeholder concerns regarding potentially inequitable collections, CBP is in the process of initiating a full study of land border fee options and continues to review collections and cost recovery for the sea environment. The land border fee study would have a target completion date nine months from the date of enactment. CBP will first explore the feasibility of collecting from existing operators such as bridge commissions, toll operators, commercial passenger bus, commercial passenger rail and any potential legal impediments. In the course of the study, CBP intends to pursue a pilot that tests all steps to be involved in fee collection short of actual collections without the statutory or regulatory authority to do so. Finally, CBP will follow by looking into how to address land border pedestrians and passenger vehicle fees.

Land Border Inspection Fee Mission Statement

The *Department of Justice Appropriation Act of 1990* (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs: Overtime inspection services; Expansion, operation, and maintenance of information technology systems for non-immigrant control; Hiring of temporary and permanent inspectors; Minor construction costs associated with the addition of new traffic lanes; Detection of fraudulent travel documents; and Administrative expenses of account.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Enforcement Fines

I. Appropriation Overview

A. Mission Statement for Immigration Enforcement Fines

The Immigration Enforcement Account was established under Section 382 of the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208; IIRIRA). In addition to creating this account, IIRIRA also added new types of fines in order to include fines levied against aliens for failure to depart the United States if so ordered. Fines are also levied on carriers transporting passengers to the United States that violate element(s) of immigration law.

B. Budget Activities

Subject to the availability of funds, the fines collected are used to support the following CBP Officer activities: identification, investigation, apprehension, detention, and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border, in areas with high apprehensions, to deter illegal entry; and the repair, maintenance, and construction of border facilities.

C. Budget Request Summary

CBP requests \$772,634 in FY 2014 to support five full-time equivalents and operating costs of collecting enforcement fines. Because violations of immigration are not easily quantifiable, enforcement-related collections are relatively fluid and difficult to forecast. Thus, CBP primarily utilizes real Gross Domestic Product (GDP) estimates to project future year revenue collections.

Figure 1: Estimated Collections – In Thousands of Dollars

Enforcement Fines	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	721	743	773	773

* FY 2012 represents actual collections.

The delta between Enforcement Fines collections and costs is noted below:

Enforcement Fines	FY 2010	FY 2011	FY 2012	3 Year Average
Collections	208	632	721	521
Costs	39,116	36,808	41,187	39,037
Collections/Costs	1%	2%	2%	1%

Figure 3: FY 2012 Allocation of Enforcement Fines – In Thousands of Dollars

Program Office	FY 2012 Allocation*	Allocation in %
Office of Field Operations	801	100%
Total	801	100%

**Carryover used for FY 2012 allocations*

Estimating and allocating collections for Enforcement Fines:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, the staff uses numerous sources, and focus mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. For Enforcement Fines, GDP is the factor that is considered in greatest detail.

CBP initiated a service contract in the beginning of FY 2013 to conduct an independent assessment of CBP user fee forecast methodology and resource management. The goal of this effort is to assess existing processes and provide input that can be used to improve variables CBP uses to forecast fee revenue and provide recommendations on improvement opportunities for the management of fee revenue.

Immigration Enforcement Fines Mission Statement

The Immigration Enforcement account was established under Section 382 of the *Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996*. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those levied against aliens for failure to depart the United States after being so ordered. The authorized uses of this funds consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Global Entry User Fees

I. Appropriation Overview

A. Mission Statement for Global Entry User Fees

The Global Entry Program is authorized under the *Consolidated Appropriations Act of 2008* (P.L. 110-161) Section 565(3) (A). The program establishes an international registered traveler program that incorporates technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. All applicants must be pre-approved, and they must undergo a rigorous background check and interview before enrollment. Global Entry allows expedited clearance for pre-approved and low-risk travelers upon arrival in the United States. Though intended for frequent international travelers, there is no minimum number of trips necessary to qualify. Participants may enter the United States by using automated kiosks located at selected airports.

Section 565 (3) (B) of the *Consolidated Appropriations Act of 2008* authorized the imposition of a fee to recover the full cost of the program. The implementing regulation to establish an application fee was issued in November 2009 (74 FR 59936 (2009-11-19)). On the basis of cost estimates and enrollment projections, a charge of \$100 per application is deemed appropriate to generate necessary revenue to cover the full cost of processing Global Entry applications. The Office of Trade and Office of Field Operations of CBP initiated a fee study in Fiscal Year (FY) 2012 of the Trusted Traveler Programs (TTP) to include Global Entry, NEXUS, and SENTRI fees. This fee study is intended to harmonize the SENTRI, NEXUS and Global Entry fees to maximize the benefits of the Trusted Traveler Programs for the enrollees.

Currently, Global Entry kiosks can be found in 207 international U.S. airports, 20 Canadian pre-clearance locations, and four pre-clearance locations in Ireland. Beginning in FY 2012, the *Asian-Pacific Economic Cooperation Business Travel Card* (P.L. 112-54) was developed as an extension to the Global Entry Program in response to the need for business people to gain streamlined entrance to the economies of the Asia-Pacific region. This enables business people to explore new business opportunities, attend meetings, and conduct trade and investment activities.

B. Budget Activities

CBP designed Global Entry to allow for expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without having to see a CBP officer (CBPO). This program facilitates entry into the United States, and is especially beneficial to frequent international flyers. Global Entry is currently available at Atlanta, Boston, Dallas/Ft. Worth, Washington Dulles, Charlotte, Chicago, Denver, Detroit, Ft. Lauderdale, Honolulu, Houston, Las Vegas, Los Angeles, Miami, Minneapolis, Newark, New York (JFK), Orlando, Philadelphia, Phoenix, Raleigh-Durham,

Sanford (FL), San Juan, San Diego, San Francisco, and Seattle airports. Global Entry is also available at all eight Canadian preclearance sites (Calgary, Edmonton, Halifax, Montreal, Ottawa, Toronto, Vancouver, and Winnipeg) and at two preclearance sites in Ireland (Dublin and Shannon). In FY 2013, Global Entry will expand to include airports at Baltimore (BWI) and Portland (PDX). Additionally, CBP is expanding the number of urban enrollment centers for the Global Entry program, including locations in Chicago, Houston, and Washington, D.C.

Global Entry applications and enrollments are growing quickly. In FY 2012, CBP expanded Global Entry to include an additional eight airports. Since the program's inception in FY 2008, CBP has accomplished the following:

- Since April 2009, CBP has operated a joint program with the government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch trusted traveler program, and allows Dutch citizens to join Global Entry. Participants in this program must pass vetting by both CBP and the Netherlands government.
- On December 29, 2010, a Federal Register Notice was published announcing the expansion of Global Entry eligibility to Mexican Nationals. Participants in this pilot must pass vetting by both CBP and Mexican government officials.
- In June 2011, CBP began implementing a limited pilot with the United Kingdom (UK), allowing UK citizens to participate in Global Entry. UK applicants are subjected to vetting by both CBP and UK government officials.
- In October of 2011, CBP began implementing a limited pilot with Germany, allowing German citizens to participate in Global Entry. German applicants are subjected to vetting by both CBP and German government officials.
- In February of 2012, CBP began implementing a limited pilot with Qatar, allowing Qatari citizens to participate in Global Entry. Qatari applicants are subjected to vetting by both CBP and the Qatari government.
- On June 12, 2012, CBP implemented a trusted traveler arrangement with the Republic of Korea. The arrangement allows qualified U.S. citizens to join the Smart Entry Service, the Republic of Korea's trusted traveler program, and allows Korean citizens to join Global Entry. Participants in this arrangement must pass vetting by both CBP and the Republic of Korea.

CBP has signed joint statements with Australia, Israel, New Zealand, and Panama, laying the framework for the development of trusted traveler arrangements with each of these countries. CBP continues to work with representatives from these governments to develop individual bilateral arrangements to enable trusted travelers from either country to receive expedited custom clearance.

Cost Avoidance/Workforce Multiplier Effect:

In FY 2012, Global Entry kiosks were used approximately 2.5 million times¹, producing an inspection time savings equivalent to 54 CBPOs (valued at approximately \$6.7 million in salaries and benefits). Global Entry usage in FY 2012 increased throughput by 2.1 percent from passengers that did not use Global Entry kiosks. Global Entry passengers represent only 2 percent of total arriving passengers in FY 2012, but kiosk usage is increasing sharply. Continued growth in Global Entry will result in further savings.

The program has been used as a basis for cooperation with other nations and other agencies in order to further expedite passenger processing. For example, Global Entry participants can join the Fast Low Risk Universal Crossing program, offered by the Netherlands to provide preferred treatment at the Amsterdam Airport.

The Global Entry user fee is used to support the full cost of the program, including the direct and indirect costs of CBPOs at enrollment centers, the technology required to administer the program, the cost of help desk, the cost of producing the Radio-frequency identification (RFID) cards, and the fingerprinting fees charged by the Federal Bureau of Investigation (FBI).

C. Budget Request Summary

CBP requests \$34,835,000 in FY 2014 for Global Entry. The budget request is based on an estimate of 10,150 additional enrollees in FY 2014. In FY 2015, CBP projects an estimated \$35,880,000 in collections, which is 3 percent higher than the FY 2014 level. All projections take into account expansion of the Global Entry program and the opening of additional enrollment centers.

Figure 1: Estimated Collections – In Thousands of Dollars

Global Entry	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	23,811	33,820	34,835	35,880

*FY 2012 represents actual collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The program authorizes the use of technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. The application fee is set at \$100 per applicant to cover the costs of the program. These items include the costs of CBPOs at the enrollment centers, equipment such as kiosks, software, and help desk support, the cost of producing the RFID cards, and background investigations via an interagency agreement with the FBI.

Global Entry User Fees Mission Statement

The Global Entry Program is authorized under the *Consolidated Appropriations Act of 2008* (P.L. 110-161) Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the Consolidated Appropriations Act of 2008 authorized the imposition of a fee to recover the full cost of the Program. The current fee rate has been set at \$100 per applicant.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.5 Other personnel compensation	\$379	-	-	\$(379)
12.1 Benefits	56	-	-	(56)
Total, Salaries & Benefits	435	-	-	(435)

In 2014, a decrease of -\$379,000 is for object class realignment.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$23,376	\$33,820	\$34,835	\$11,459

In 2014, an increase of \$379,000 is for object class realignment. In 2014, an increase of \$11,024,000 is for an increase in user fee collections.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Electronic System for Travel Authorization Fee

I. Appropriation Overview

A. Mission Statement for Electronic System for Travel Authorization Fee

P. L.110-53, or the *Implementing Recommendations of the 9/11 Commission Act of 2007* (or the Act) established an electronic authorization system to pre-screen aliens prior to arrival in the United States. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA). ESTA operates under informed compliance, requiring all Visa Waiver Program travelers to obtain authorization prior to travel. The Visa Waiver Program allows visitors to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

Section 711 (h)(3)(B) of the Act authorizes the Secretary of the Department of Homeland Security (DHS) to establish a fee via regulation to recover the cost of operating and administering ESTA. U.S. Customs & Border Protection (CBP) conducted a fee study and, in August 2010, published the results in an interim final rule. The fee is broken into two parts (the total fee amount is \$14.00):

- **Processing Fee:** All applicants requesting an electronic travel authorization are charged \$4.00 for the processing of the application. Revenue from the processing fee is retained by CBP to fund the costs of operation. The CBP budget request for ESTA only includes the processing fee collection.
- **Authorization Fee:** If the application is approved and the individual receives authorization to travel to the United States under the Visa Waiver Program, an additional \$10.00 will be charged. If the electronic travel authorization is denied, the individual is only charged for the processing portion of the application, \$4.00. Revenue from the authorization fee is not available for CBP use. This revenue is reserved for the U.S. Travel and Tourism Advisory Board, also known as Brand USA, (under the U.S. Department of Commerce) to enhance the international competitiveness of the U.S. travel and tourism industry and increase its exports. The CBP budget request for ESTA does not include this authorization fee collection.

The authorization to travel to the United States is valid for a 2-year period, and travelers pay only once during the 2-year period.

B. Budget Activities

ESTA collections fund operational costs to administer the ESTA program and maintain information technology (IT) equipment. The costs of the revenue program funds the salaries and benefits of personnel, overtime, and the costs to maintain kiosks and other IT equipment.

The Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L.110-53) required DHS to implement an electronic travel authorization system and other measures to enhance the security of the Visa Waiver Program. ESTA adds a layer of security that allows DHS to determine, in advance of

travel, whether an individual is eligible to travel to the United States under the Visa Waiver Program and whether such travel poses a law enforcement or security risk. The following countries participate in the ESTA program:

Andorra, Iceland, Norway, Australia, Ireland, Portugal, Austria, Italy, San Marino, Belgium, Japan, Singapore, Brunei, Republic of Korea, Slovakia, Czech Republic, Latvia, Slovenia, Denmark, Liechtenstein, Spain, Estonia, Lithuania, Sweden, Finland, Luxembourg, Switzerland, France, Malta, Taiwan, Germany, Monaco, United Kingdom*, Greece, The Netherlands, Hungary, New Zealand

** British citizens only with the unrestricted right of permanent abode in England, Scotland, Wales, Northern Ireland, the Channel Islands, and the Isle of Man*

C. Budget Request Summary

CBP requests 110 full-time equivalent employees and \$55,168,000 in FY 2014 for ESTA to fund the direct and indirect costs of performing ESTA activities. These costs include but are not limited to, salaries, benefits, overtime, travel, supplies, and equipment. The Office of Field Operations estimates that more than 13.4 million applications will be processed in FY 2014. This estimate is supported by the U.S. Department of Commerce’s projection of an increase of 4% inbound travel volume in FY 2013 and FY 2014; the fact that Taiwan has been recently added to the Visa Waiver Program; and the possibility of adding Poland to the program. When taking international travel projections into account (in addition to the factors mentioned above), CBP projects the following amounts in collections.

Figure 1: Estimated Collections – In Thousands of Dollars

ESTA	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	48,069	53,562	55,168	56,823

2014 Total Request	110	110	55,168
Total Change 2012 to 2014	-	-	7,099

CURRENT SERVICES PROGRAM DESCRIPTION:

All passengers from countries that are part of the Visa Waiver Program are required to submit an application via ESTA to determine eligibility to travel to the United States. A passenger whose ESTA application has been rejected must apply for a visa before traveling to the United States. ESTA counterbalances vulnerabilities inherent in visa-free travel by adding a layer of advance scrutiny that enables CBP frontline personnel to focus even more on the small population of potentially dangerous travelers.

Electronic System for Travel Authorization Fee Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the *Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA)*. COBRA fees are made available through permanent /indefinite appropriation created by the user fee statute. CBP collects customs fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

The fees are deposited in the Customs and Border Protection user Fee Account (No Year) at the U.S. Treasury. The excess of collections over inspectional overtime and preclearance are available without fiscal year limitation, except that \$30 million of such excess remains as a contingency for use in any year in which receipts are insufficient to cover the costs of providing the services described by the statute.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	\$2,662	\$8,443	\$9,278	\$6,616
11.5 Other personnel compensation	342	1,919	2,128	1,786
12.1 Benefits	1,057	3,727	4,093	3,036
11.1 Total FTE & personnel compensation	4,061	14,089	15,499	11,438

In 2014, an increase of \$4,339,000 is for object class realignment. In 2014, an increase of \$7,099,000 is for an increase in user fee collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$44,008	\$39,473	\$39,669	\$(4,339)

In 2014, a decrease of -\$4,339,000 is for object class realignment.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection APHIS User Fees

I. Appropriation Overview

A. Mission Statement for APHIS User Fees

Section 2509 of the *Food, Agriculture, Conservation and Trade Act of 1990* (P.L. 101-624) authorized the United States Department of Agriculture (USDA) to collect user fees for various services. The law codified, as 21 U.S.C. 136a, established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. These fees are collected to recover the costs of providing inspectional activities for international arrival of passengers, conveyances, animals, plants, and agricultural goods at ports of entry. This authority established fees on five modes of international passenger and conveyance transportation: (1) commercial aircraft (passenger and aircraft inspection); (2) sea going vessels; (3) trucks with single entry; (4) trucks operating under a multiple entry decal; and (5) loaded rail cars.

The *Homeland Security Act of 2002* (P.L. 107-296) transferred certain inspection functions from the USDA to the Department of Homeland Security (DHS). The revenues from these fees are to be used to reimburse the full cost incurred in providing inspectional activities. Section 421(f) of the *Homeland Security Act of 2002* mandates that U.S. Customs and Border Protection (CBP) and USDA agree on a periodic transfer of funds from the latter to the former. Under a Memorandum of Agreement between CBP and USDA, CBP receives approximately 60.64 percent of the collections from the APHIS user fee.

In Fiscal Year (FY) 2012, the revenues from the current fee level covered 73 percent of CBP's costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees. USDA conducted a comprehensive fee review to determine the appropriate fee rates associated with this program and will draft a fee rule for public notice and comment.

Protecting our Homeland, specifically the agricultural health of our nation, is the dual responsibility of the Animal and Plant Health Inspection Service (APHIS) of USDA and CBP. This joint responsibility is performed seamlessly, with APHIS responsible for promulgation of rule and regulation and CBP responsible for policy implementation, and conducting examinations for agricultural purposes. CBP Agriculture Specialists, strategically deployed at our CBP ports of entry, are highly trained to serve as experts and technical consultants in the areas of inspection, intelligence, analysis, examination, and law enforcement activities related to the importation of agricultural/commercial commodities and conveyances at the various ports of entry.

Our critical mission requires application of a wide range of federal, state, and local laws and agency regulations when determining the admissibility of agriculture commodities, while preventing the introduction of harmful plant pests, foreign animal diseases, and potential agro-terrorism into the United States. In addition to CBP's partnership with APHIS, CBP Agriculture Specialists work in

tandem with a number of other governmental agencies, including the U.S. Fish and Wildlife Services and the Center of Disease Control to help prevent the introduction of zoonotic diseases associated with the importation of animals, animal products, and animal by-products. CBP Agricultural Specialists even help enforce endangered species regulations on plant imports.

The mission of the CBP Agriculture Specialist is vital. According to APHIS, if the Mediterranean fruit fly and Asian long horned beetle, two major agricultural pests, were left unchecked, they would result in several billions of dollars in production and marketing losses annually. Similarly, if foot-and-mouth disease or highly pathogenic avian influenza were to become established in the United States, foreign trading partners could invoke trade restrictions and producers would suffer devastating losses. In addition to the APHIS contributions to protect the health of U.S. agriculture in the international trade arena, CBP has developed and implemented advanced science-based training programs, and interfaced with our importing and trade community to ensure agricultural imports meet stipulated entry requirements.

In FY 2012, CBP Agriculture Specialists seized over 1.57 million prohibited plant and animal products, and intercepted over 170,967 pests that were submitted to USDA for identification.

To highlight the importance of the CBP agriculture mission, one harmful pest intercepted by CBP Agriculture Specialists is the Asian gypsy moth (AGM) (*Lymantria dispar*), named for its home continent. The AGM is a voracious pest of trees that poses a major threat to forest habitats in North America. If established in the United States, each AGM female could lay egg masses that in turn could yield hundreds of voracious caterpillars with appetites for more than 500 species of trees and shrubs. AGM defoliation would severely weaken trees and shrubs, killing them or making them susceptible to diseases and other pests. Caterpillar silk strands, droppings, destroyed leaves, and dead moths would be a nuisance in homes, yards, and parks. In the East, European gypsy moths defoliate an average of about 4 million acres each year, causing millions of dollars' worth of damage. If AGM were to become established in the United States, the damage could be even more extensive and costly due to the ability of AGM females to fly long distances (up to 20 miles), making it probable that the AGM could quickly infest and spread throughout the United States.

From 2008 to 2012, CBP Agriculture Specialists intercepted live AGM egg masses on 62 ships and 18 containers, preventing the spread of this economic and environmentally distressing pest to U.S. forests.

CBP Agriculture Specialists require the use of APHIS and CBP databases to record inspectional examination findings and provide agricultural data for risk analysis and operational oversight. Although CBP Agriculture Specialists must input data into both agencies' systems at this time, the Agriculture Programs and Trade Liaison (APTL) office is working on a business transformation initiative to develop an Agriculture Integrated Database Management System to prevent dual input of data, to improve data quality for operational decision making, and to optimize resources.

CBP Agriculture Specialists are professionals on the frontlines of America, protecting agriculture security, and are committed to continued improvement of the APHIS program. Within CBP, the Office of Field Operations, APTL, will be working with the USDA to strengthen the Agriculture Canine Program, to develop a strategic plan for agriculture programs, improve agricultural data

integrity and reliability, and complete the Agriculture Resource Allocation Model for CBP Agriculture Specialists to identify additional agriculture related performance measures.

CBP Technicians assist CBP Agriculture Specialists by preparing complex broker-importer cases for decision and by reviewing declaration and cargo manifests. CBP Technicians also support both CBP Agriculture Specialists and CBP Officers (CBPO) in performing primary agriculture inspections and in the inspection, processing, and examination of passengers, baggage, and cargo by operating scanning equipment and processing data into various automated systems.

B. Budget Activities

APHIS fees reimburse the costs of:

- Salaries and benefits, including overtime, for Agricultural Specialists;
- Salaries and benefits, including overtime, for CBPO's performing agriculture inspection services; and
- Support costs for these staffs including, rent, supplies, equipment and other contractual services.

Salaries and benefits comprise approximately 96 percent of the obligations in this account.

Fee Rates for APHIS are currently set to:

Aircraft Clearance (\$70.75): An APHIS user fee will be charged for each commercial aircraft which is arriving, or which has arrived and is proceeding from one United States airport to another under a Bureau of Customs and Border Protection "Permit to Proceed." Each carrier is responsible for paying the APHIS user fee.

Commercial Truck (\$5.25; \$105 annual decal): The driver or other person in charge of a commercial truck that is entering the customs territory of the United States and that is subject to inspection must, upon arrival, proceed to Customs and pay an APHIS user fee for each arrival.

Commercial Vessel (\$496; \$7,440 Max): The master, licensed deck officer, or purser of any commercial vessel, which is subject to inspection, shall, upon arrival, proceed to Customs and pay an APHIS user fee.

Passenger Commercial Air (\$5): Each passenger aboard a commercial aircraft, who is subject to inspection upon arrival from a place outside of the customs territory of the United States, must pay an APHIS user fee.

Railroad Car (\$7.75; \$155 prepaid): An APHIS user fee will be charged for each loaded commercial railroad car which is subject to inspection upon each arrival. The railroad company receiving a commercial railroad car in interchange at a port of entry or, barring interchange, the railroad company moving a commercial railroad car in line haul service into the customs territory of the United States, is responsible for paying the APHIS user fee. If the APHIS user fee is prepaid for all arrivals of a

commercial railroad car during a calendar year, the APHIS user fee is an amount 20 times the APHIS user fee for each arrival.

CBP initiated a service contract in the beginning of FY 2013 to conduct an independent assessment of CBP user fee forecast methodology and resource management. The goal of this effort is to assess existing processes and provide input that can be used to improve variables CBP uses to forecast fee revenue and provide recommendations on improvement opportunities for management of fee revenue.

C. Budget Request Summary

In FY 2014, CBP requests 2,708 full-time equivalent employees and \$355,216,367 for APHIS to partially fund the direct and indirect costs of performing the APHIS activities. These costs include, but are not limited to salaries, benefits, overtime, travel, supplies, and equipment costs for CBP Agriculture Specialists, CBPOs, and CBP technicians who perform APHIS-related functions. CBP’s intent is for the full costs of APHIS activities to be recovered through fees and we will work with USDA to ensure that routine reviews are conducted to assess costs against the fee levels.

Future year collections are projected as follows, based upon no change in the current fees and the anticipated transfers from the USDA. All collection estimates for APHIS also take into account future forecasts for international travel and conveyances.

Figure 1: Estimated Collections In Thousands of Dollars

APHIS	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	348,805	349,521	355,216	365,872

* FY 2012 represents actual collections.

APHIS fee rates are set by USDA and CBP’s share of these fees is determined by a codicil agreement with USDA each year. USDA is required by law to fully recover its costs associated with the APHIS program. CBP typically receives 62 percent to 63 percent of the total collections. The amount received by CBP does not cover CBP’s costs of providing agriculture inspection services. The projected transfer amount for FY 2014 is estimated at 2 percent over the FY 2012 amount, but is subject to the availability of actual collections.

Figure 2: Percentage of Cost Recovery – In Thousands of Dollars

APHIS	FY 2010	FY 2011	FY 2012	3 Year Average
Collections	312,227	319,116	348,805	326,716
Costs	455,449	469,907	479,010	468,121
Collections/Costs	69%	68%	73%	70%

Figure 3: FY 2012 Allocation of APHIS Fees – In Thousands of Dollars

Program Office	FY 2012 Allocation	Allocation in %
Office of Field Operations	303,702	87.8%
Office of Administration	16,626	4.8%
Office of Information Technology	24,761	7.2%
Office of Internal Affairs	816	0.2%
Total	345,905	100.0%

**The difference between FY 2012 allocations vs. FY 2012 collections is covered by carryover*

2014 Current Services	2,708	2,708	355,216
2014 Total Request	2,708	2,708	355,216
Total Change 2012 to 2014	-	-	6,411

CURRENT SERVICES PROGRAM DESCRIPTION:

APHIS funds will be used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck (per crossing and annual decal), and loaded rail car agricultural inspection activities. The revenues from these fees are to be used to partially reimburse the cost incurred in providing agricultural inspection activities.

While CBP's top priority for the FY 2014 budget is addressing the gap between current frontline CBP officer staffing and the staffing needs identified by the Workload Staffing Model (WSM), it is recognized that it is unlikely that this gap will be addressed solely through appropriations.

CBP and the Department of Agriculture are reviewing existing fee rates to ensure they are set at a level that recovers the full cost of performing agricultural inspection services. After a comprehensive review of program resource requirements, CBP and the Department of Agriculture will propose user fee rate adjustments. While rate adjustments for the APHIS fees are set in regulation and do not require legislative proposals, CBP's WSM takes a comprehensive review of staffing requirements and the APHIS fee adjustments will be important to ensure sustainability of agricultural inspection services in the future.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Puerto Rico Trust Fund

I. Appropriation Overview

A. Mission Statement for the Puerto Rico Trust Fund

The Puerto Rico Trust Fund (PRTF) is established by 48 U.S.C. § 740, which states, in pertinent part: “The duties and taxes collected in Puerto Rico...less the cost of collecting the same shall be paid into the Treasury of Puerto Rico to be expended as required by law for the government and benefit thereof.” As per this primary statute, U.S. Customs and Border Protection (CBP) acts as Puerto Rico’s sole customs service. CBP and the Homeland Security Investigation (HSI) directorate of U.S. Immigration and Customs Enforcement (ICE) also perform investigative law enforcement activities under statute, 48 U.S.C. § 1469c. This secondary statute provides any U.S. government agency or instrumentality the authority to provide additional services to Puerto Rico, at the Government of Puerto Rico’s behest, on a reimbursable basis.

The primary mission of Customs and Border Protection Officers (CBPO) is to screen all people, vehicles, and goods entering the United States, while facilitating the flow of legitimate trade and travel into and out of the United States. Their mission also includes carrying out traditional border-related responsibilities, including narcotics interdiction, enforcing immigration law, protecting the nation’s food supply and agriculture industry from pests and diseases, and enforcing trade laws.

Collections in Puerto Rico, less the costs of collecting duties and taxes, are transferred to Puerto Rico’s Treasury (Hacienda) to be expended as required by law for the Government of Puerto Rico. CBP continues to focus on its agricultural, immigration, and counter-terrorism missions in Puerto Rico. These additional expenses, as well as overtime, are reimbursed with their respective Consolidated Omnibus Budget Reconciliation Act user fees, Immigration User Fees, and Agriculture Quarantine and Inspection user fees.

B. Budget Activities

CBP administers the PRTF and retains a portion of the funds to pay for expenses associated with the CBP mission in Puerto Rico. CBP annually transfers funding from PRTF to ICE for investigative and enforcement duties it performs in Puerto Rico. The reimbursement from the PRTF to ICE is based on a biennial agreement that ICE negotiates directly with the Government of Puerto Rico. This transfer, however, is subject to the availability of funds in the PRTF. PRTF funding, as it is used within DHS, is prioritized in the following order: the Office of Field Operations in CBP, ICE, the Office of Information and Technology in CBP, and then the Office of Air and Marine in CBP. The remaining balances in excess of eligible expenses are remitted to the Government of Puerto Rico.

For CBP, most of the PRTF collections cover the costs of performing collection and inspection duties in Puerto Rico. This includes the salaries and benefits of personnel, contractual services, information technology, equipment, and technical support.

C. Budget Request Summary

CBP requests 292 full-time equivalent employees and \$98,602,139 in actual collections in Fiscal Year (FY) 2014 for the PRTF. These projections are based upon multiple factors underlying the economy of Puerto Rico. Actual collections for FY 2012 (\$106,746,238 million) are inflated, due to potential duty refunds related to exempted goods. The refund amount from FY 2012 is \$11,073,370. Thus, actual collections for CBP use are \$95,672,868. CBP assumes the collections will increase into the out years at a rate of 1.5 percent per year (similar to Gross National Product projections put forth by the Economist Intelligence Unit).

Figure 1: Estimated Collections – In Thousands of Dollars

PRTF	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	106,746	97,103	98,602	100,054

**Refund in dispute in FY 2012 for \$11M (\$95.7m in normal collections. FY 2012 represents actual collections.)*

Figure 2: FY 2012 Allocation of PRTF – In Thousands of Dollars

Program Office	FY12 Allocation	Allocation in %
Office of Field Operations	49,075	51%
Office of Information Technology	1,965	2%
Office of Air and Marine	6,956	7%
U.S. Immigration and Customs Enforcement	32,851	34%
Surplus Transferred to Puerto Rico Treasury	4,826	5%
Total	95,673	100%

Estimating and allocating collections from the PRTF:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, the staff use numerous sources, and focus mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

PRTF collections are monitored monthly and adjusted as economic indicators are reviewed. Travel initiatives such as the Travel Promotion Act of 2009, the American Express endorsement of the Global Entry Program, and free trade agreements such as those with Colombia, Panama, and Korea will be studied independently throughout the year to address the impact to global trade and travel. In addition, the unemployment rate and inflation are taken into consideration to determine to what extent these factors might have on the forecast process.

As an example, in Puerto Rico and the Caribbean, there are several economic factors that will be carefully monitored in FY 2013. The unexpected closure of the Hovensa refinery will likely have a profound impact on the jobless rate in St. Croix. It is expected that this will have a negative impact on the U.S. Virgin Islands, both in tourism and trade, and this is expected to impact Puerto Rico as well. Over 2,000 direct and indirect jobs are expected to be affected.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP is authorized to use collections in the Puerto Rico Trust Fund to cover costs related to the collection of duties and taxes in Puerto Rico. CBP's Office of Administration and ICE negotiate biennial agreements with Puerto Rico's Treasury that are funded with the anticipated surplus Puerto Rico expects to receive after CBP covers its customs-related costs.

Puerto Rico Trust Fund Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under Title 48 U.S.C. 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements who have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Virgin Islands Fees

I. Appropriation Overview

A. Mission Statement for the Virgin Islands Deposit Fund

The United States Virgin Islands (USVI) is an unincorporated territory of the United States. The unincorporated status establishes the USVI as outside of the more specific customs territory of U.S. Section 36 of the *1936 Organic Act*, codified as 48 U.S.C. § 1406i. This Act gives U.S. Customs and Border Protection (CBP) the authority to collect duties and taxes levied by the USVI Legislature that are deposited into the Virgin Islands Deposit Fund (VIDF) for use as revenue for the USVI. Under 19 U.S.C. § 1469c, CBP may also provide reimbursable services to the USVI at the USVI's behest. This reimbursable arrangement is denoted in a 1994 Memorandum of Agreement, which outlines the services provided by CBP and the funding sources to be used in their execution. Per these two statutes, CBP deducts the costs of collection and other agreed upon services in the 1994 MOA from the VIDF, and then remits the remaining funds to the USVI.

The primary mission of Customs and Border Protection Officers (CBPO) is to screen all people, vehicles, and goods entering the United States, while facilitating the flow of legitimate trade and travel into and out of the United States. Their mission also includes carrying out traditional border-related responsibilities, including narcotics interdiction, enforcing immigration laws, protecting the nation's food supply and agriculture industry from pests and diseases, and enforcing trade laws.

The VIDF funds the costs of customs services and the inspection of passengers departing to the continental United States. CBP's presence in the USVI, however, is not unlike that of any other U.S. port of entry. Specifically, CBP focuses on intercepting illegal immigrants and combating criminal elements that have focused on the USVI as a gateway to illegally introduce narcotics into the U.S. mainland. CBP continues to focus on its agricultural, immigration, and counter-terrorism missions in the USVI. These additional expenses are reimbursed with their respective Immigration User Fee and Animal Plant Health Inspection Services user fee sources.

B. Budget Activities

CBP collects duties and taxes in the USVI on behalf of the Government of the USVI; the revenue is used to reimburse the Office of Field Operations for the costs incurred to perform customs services and the inspection of passengers departing to the continental United States. In addition, VIDF funding is considered part of CBP's reimbursable program, thus it is not included as part of the Budget's appendix.

For CBP, the costs of performing duty collection and passenger inspection in the USVI include the salaries and benefits of personnel, contractual services, information technology, equipment, and technical support.

Exclusion from prior submissions for President's Budget

As stated previously, the duties and taxes collected and deposited into the VIDF support the cost of operations in the USVI. After the cost of CBP operations are taken into consideration, any remaining or unused funds in the USVI Trust Fund must be remitted to the Government of the USVI. Due to the extent of the issues facing CBP operations in the USVI, CBP feels it is appropriate to now include the USVI Trust Fund in the Fiscal Year (FY) 2014 Congressional Justification as well as future submissions.

C. Budget Request Summary

CBP requests 61 full-time equivalent employees and \$11,302,242 in FY 2014 for the Virgin Islands Deposit Fund. This estimate is for USVI customs duties charged on goods imported from within U.S. customs territory. Actual collections in FY 2012 came in at \$12,017,035, which was a \$2,319,191 decrease from collections of FY 2011 of \$14,336,226. The large drop was largely due to the closure of a major petroleum refinery (Hovensa LLC, St. Croix refinery). Because of the significance of the Refinery closure, CBP projects a drop in collections in the future years compared to FY 2012.

Figure 1: Estimated Collections – In Thousands of Dollars

VIDF	FY 2012*	FY 2013	FY 2014	FY 2015
Collections	12,017	11,171	11,302	11,429

* FY 2012 is actual collections

Figure 2: FY 2012 Allocation of USVI – In Thousands of Dollars

Program Office	FY12 Allocation	Allocation in %
Office of Field Operations	12,017	100%
Total	12,017	100%

Estimating and allocating collections in the Virgin Islands:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal fluctuations. In developing forecasts, the staff used numerous sources, and focused mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

In the USVI, there are several economic factors that will be carefully monitored in FY 2013. The unexpected closure of the Hovensa refinery will likely have a profound impact on the jobless rate in St. Croix. It is expected that this will have a negative impact to the USVI both in tourism and trade. Over 2,000 direct and indirect jobs are expected to be effected and will potentially reverse any anticipated growth in the region for some time.

Virgin Islands Fees Mission Statement

The United States Virgin Islands (USVI) are a territory of the United States, but are considered an independent customs territory. Section 36 of the 1936 Organic Act, codified as 48 U.S.C. §1406i, gives Customs and Border Protection (CBP) the ability to administer USVI fees at its own discretion. CBP may also provide reimbursable services to the USVI under 19 U.S.C. §1469c. The reimbursable arrangement is denoted in the 1994 Memorandum of Agreement, which outlines the duties provided by CBP and the funding sources to be used in the execution of those duties. The USVI fee collections fund the costs of customs services and the inspection of passengers departing to the continental United States. CBP's presence in the USVI is to intercept illegal immigrants and to combat criminal elements that have focused on the USVI as a gateway to illegally introduce narcotics into the U.S. mainland. CBP continues to focus on agricultural inspections and counter-terrorism in the USVI as well.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	\$1,399	\$1,251	\$1,291	\$(108)
11.3 Other than full-time permanent	103	101	102	(1)
11.5 Other personnel compensation	5,820	5,284	5,325	(495)
12.1 Benefits	2,102	2,021	2,070	(32)
Total, Salaries & Benefits	9,424	8,657	8,788	(636)

In 2014, a decrease of -\$636,000 is for a decrease in user fee collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	134	55	55	(79)

In 2014, a decrease of -\$79,000 is for a decrease in user fee collections.

A. Component Overview

U.S. Customs and Border Protection (CBP) continued its efforts this year to completely overhaul the budget formulation process to follow more of a “Planning, Programming, Budgeting, and Execution (PPBE)” model. The cornerstone of the approach is the introduction of managing by Lines of Business (LOB); the Strategic Context is presented in this new structure. The LOB Framework addresses the Commissioner’s mission requirements and can also be mapped to the Quadrennial Homeland Security Review (QHSR). This approach provides strategic and tactical oversight and insight into portfolios of similar programs, projects, and initiatives. It also provides improved visibility into how CBP executes funding. Although we expect it will take multiple planning and budgeting cycles to fully mature this process, the effort has again enabled us to conduct a thorough review of our base budget to identify efficiencies and realign funding from lower priorities to higher priority operations.

CBP is comprised of the following programs or LOBs that support achievement of the DHS strategic missions, goals, and objectives.

Securing America’s Borders: This program is charged with securing America’s Southwest, Northern, and certain Coastal borders. Through the coordinated use of operational capabilities and assets of the U. S. Border Patrol and the Office of Air and Marine, CBP prevents terrorists and terrorist weapons, illegal aliens, smugglers, narcotics, and other contraband from moving across the border of the United States.

Securing and Expediting Trade: This program encompasses a multi-layered system of people, technology, intelligence, risk information, targeting, international cooperation and expanded shipper vetting that provides CBP greater flexibility and capacity in shifting functions away from the physical border, allowing CBP to better intercept potential threats before they can cause harm while expediting legal trade/commerce.

Securing and Expediting Travel: This program encompasses a multi-layered system of people, technology, intelligence, risk information, targeting, international cooperation and expanded traveler vetting that provides CBP greater flexibility in shifting functions away from the physical border, allowing CBP to intercept potential threats before they can cause harm while expediting legal travel.

Intelligence and Targeting: The intelligence and targeting program supports a flexible enforcement capability that anticipates and detects border violations threatening our security, economy, and public safety. Serving as a powerful partnership that connects the law enforcement and intelligence communities, the enterprise develops, provides and coordinates capabilities to support the Agency’s primary mission to secure our borders, and works toward its vision to become a responsive enterprise enabling CBP to serve as a premier intelligence-driven law enforcement agency. The enterprise promotes four essential outcomes: (1) detect threats away from our borders; (2) identify travelers and shipments according to the threat they pose; (3) integrate and coordinate our intelligence and targeting capabilities; and (4) establish stronger partnerships with domestic and foreign partners.

Integrated Operations: This program has established the foundation for an integrated, all-hazards planning framework that considers routine emergencies or interruptions of border security operations including trade and travel and catastrophic events, either natural or man-made. Integrated into responses are CBP perspectives, which include internal as well as external communications, and interagency coordination with communications. CBP will adopt both the National Incident Management System (NIMS) and the National Response Framework (NRF) as the common doctrine for communications planning, execution and response.

Management and Administration: This program captures activities that provide enterprise leadership, management and business administration services, such as human resources management, finance and accounting, information technology, and procurement.

FY 2014 Budget Request

The table below shows CBP’s FY 2014 Budget request by its Future Years Homeland Security Programs (FYHSP). CBP’s FYHSP was developed to help us align our resources to our mission requirements and also allow us to align to DHS Mission goals. The FYHSP structure is supported by CBP’s activity based costing efforts which map actual costs to FYHSP programs using labor and workload data, and provide the basis for CBP’s Statement of Net Cost.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Securing America’s Borders	22,565	4,344,136
Securing and Expediting Trade	11,654	1,833,793
Securing and Expediting Travel	20,971	3,549,142
Intelligence and Targeting	2,195	568,659
Integrated Operations	2,637	770,119
Management and Administration	3,542	1,828,262
Total Budget Request	63,564	12,894,111

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of CBP’s programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					Providing Essential Support to National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Securing America’s Borders	2%	94%	4%	0%	0%	0%	0%
Securing and Expediting Trade	9%	76%	0%	0%	0%	15%	0%
Securing and Expediting Travel	6%	76%	18%	0%	0%	0%	0%
Intelligence and Targeting	53%	46%	1%	0%	0%	0%	0%
Integrated Operations	21%	67%	4%	0%	6%	2%	0%
Management and Administration	7%	82%	8%	0%	0%	3%	0%

Mission 1: Preventing Terrorism and Enhancing Security

CBP protects the Nation through the coordinated efforts to detect, interdict, and prevent acts of terrorism. These coordinated efforts include ground agents, aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), marine vessels, and a national air and marine operations centers (AMOC) that provide air and national border domain security.

CBP’s cargo inspection and security processing activities deter and disrupt terrorist operations and prevent terrorist capabilities while facilitating the lawful flow of goods across the border. CBP achieves focus by gathering advance data regarding incoming conveyances and goods to focus its law enforcement resources on high-risk and items. The agency also uses technology, such as non-intrusive inspection (NII) devices, to make the most of its resources. NII technology helps to detect and interdict weapons, narcotics, currency, and other contraband concealed in large containers and commercial shipments. CBP screens 100 percent of all containers for illicit radiological materials and inspects 100 percent of all targeted high-risk containers.

Additionally, CBP’s inspection and passenger processing activities deter and disrupt terrorist operations while facilitating the lawful flow of people across the border. CBP achieves focus by gathering advance data regarding incoming travelers to focus its law enforcement resources on high-risk individuals.

One of CBP’s key assets is the National Targeting Center (NTC). Established in 2001 as a direct response to the terrorist attacks of 9/11, the NTC uses automated risk management at the national level to provide tactical targeting expertise to support the Nation's anti-terrorism efforts and serves as the centralized coordination point for all CBP anti-terrorism activities. The NTC’s capabilities are discussed in further detail below, under Missions 2 and 3.

Resources Requested

CBP resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

\$ in thousands

Program	FY2012		FY 2013		FY2014	
	\$	FTE	\$	FTE	\$	FTE
Securing America's Borders	72,706	217	77,867	217	71,710	219
Securing and Expediting Trade	146,223	885	148,944	882	169,980	1,017

*Totals account for rounding.

Performance Measures

For *Preventing Terrorism and Enhancing Security* Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Management Measures

Measure: Percent of time TECS is available to end users						
Description: This measure quantifies the availability of the TECS service to all end-users based on a service level of 24X7 service. TECS is a U.S. Customs and Border Protection (CBP) mission-critical law enforcement application system designed to identify individuals and businesses suspected of or involved in violation of federal law. TECS is also a communications system permitting message transmittal between the Department of Homeland Security law enforcement offices and other National, state, and local law enforcement agencies, access to the Federal Bureau of Investigation's National Crime Information Center and the National Law Enforcement Telecommunication Systems (NLETS). NLETS provides direct access to state motor vehicle departments.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

*Totals account for rounding.

CBP's Border Patrol secures the border between the ports through patrolling and interdiction activities. The Agency currently devotes 21,370 agents to this task with nearly 90 percent deployed along the southwest border. The National Border Patrol Strategy articulates one clear, strategic mission for the Border Patrol: To establish and maintain control of the border of the U.S. between

the ports of entry. The strategic goal includes interdicting illegal aliens, smugglers, narcotics and other contraband entering the U.S. CBP employs a mix of people, technology and infrastructure to implement the strategy.

CBP's Air and Marine assets help to secure the immediate border environment and conduct operations in the source and transit zones to prevent the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. CBP operates the largest law enforcement air force in the world and uses its integrated capabilities to detect, track, intercept, and apprehend criminals attempting to penetrate our borders. These capabilities are complemented by the Air Marine Operations Center (AMOC's) strategic-level hemispheric detection, surveillance, interdiction, and enforcement capabilities.

CBP's commitment to meeting QHSR Mission 2 objectives is strengthened through the application of Alternative (Southwest) Border Technologies. The continued acquisition, design, development, installation, and integration of technology solutions will help CBP agents and officers more effectively detect, identify, classify, and resolve illegal incursions at the border.

CBP facilitates the movement of legitimate trade as the agency processes all cargo entering the United States. CBP officers prevent cross-border smuggling of contraband such as controlled substances, unsafe products, and diseased plants and animals. On a typical day, CBP officers screen more than 60,000 cargo containers before they enter the country. The foremost cargo modernization effort is the phased implementation of the Automated Commercial Environment (ACE). ACE will provide tools and enhance the business processes that are essential to securing U.S. borders by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. The National Targeting Center-Cargo (NTC-C) provides critical capability to achieving Mission 2 through programs that include Pre-Departure Screening of Cargo, Air Cargo Advanced Screening, and Agriculture/Bioterrorism Cargo Screening.

CBP also facilitates the movement of legitimate travelers as the agency processes all people and vehicles entering the United States. CBP officers prevent cross-border smuggling of contraband such as controlled substances, unsafe products, and diseased plants and animals. CBP inspects all travelers entering the United States using a risk-based approach. Automated advance data combined with intelligence and new biometric travel documents are tools that facilitate travel while keeping our borders safe. In addition, CBP has established expedited traveler programs that facilitate the admission process for frequent travelers who have undergone prior screening of their biographical and biometric data.

CBP also strives to prevent the illegal export of U.S. currency or other monetary instruments, firearms, stolen goods such as vehicles, and other items.

CBP's Intelligence and Targeting program contributes to Mission 2 in a variety of important ways. Intelligence is collected and disseminated through dedicated field and headquarters staff. Targeting is widely used primarily at the field level and complemented by the significant capabilities of the (NTC) and several related capital investment programs.

Performance Measures

For *Securing and Managing Our Borders*, two types of performance measures are presented. Strategic Performance Plan Measures represent CBP’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results. Each year, targets for measures are reassessed in the context of actual performance, and to account for observed trends in the data. Footnotes included in the tables reflect the measures for which targets have been adjusted and the reasons for the change.

Strategic Performance Plan Measures

Measure: Amount of smuggled outbound currency seized at the ports of entry (in millions)						
Description: This measure provides the total dollar amount of all currency in millions seized during outbound inspection of exiting passengers and vehicles, both privately-owned and commercial. The scope of this measure covers both the southwest and northern borders and includes all modes of transportation, (land, air, and sea).						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	\$40	\$35	\$30	\$30
Result:	N/A	N/A	\$47	\$31.9	N/A	N/A

Measure: Number of apprehensions on the Southwest Border between the ports of entry						
Description: Protection of our Southwest border against threats from illicit cross-border activity is a key element needed to secure our country. This measure calculates the number of apprehensions made of those attempting entry along the Southwest border between ports of entry. DHS's border security strategy is based on a layered approach of strategically positioning personnel, technology, and defensive infrastructure; developing strong partnerships with law enforcement partners on both sides of the border; and increasing consequences to repeat offenders to provide a deterrent effect.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=390,000	<=371,000	<=391,000	<=361,200
Result:	N/A	N/A	327,577	356,873	N/A	N/A

Note: Targets reflect current trends in apprehensions

Measure: Number of smuggled outbound weapons seized at the ports of entry						
Description: This measure provides the total number of illegal weapons seized during outbound inspection of exiting passengers and vehicles, both privately-owned and commercial. Weapons are defined as pistols, rifle-shotgun combinations, rifles, revolvers, shotguns, disguised weapons, machine guns, submachine guns or machine pistols. Seizing weapons being smuggled for criminal purposes strengthens our border security by preventing the movement of assault weapons and ammunition.

U.S. Customs and Border Protection - Strategic Context

Year:						
Target:	N/A	N/A	N/A	N/A	400	400
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of cargo by value imported to the U.S. by participants in CBP trade partnership programs						
Description: This measure describes the percent of all cargo that is imported from CBP trade partnership programs based on the value compared to total value of all imports. Partnership programs include both Customs-Trade Partnership Against Terrorism (C-TPAT) and Importer Self Assessment (ISA). CBP works with the trade community through these voluntary public-private partnership programs, wherein some members of the trade community adopt tighter security measures throughout their international supply chain and in return are afforded benefits. A variety of trade actors are included in these partnership programs, such as importers, carriers, brokers, consolidators/third party logistic providers, Marine Port Authority and Terminal Operators, and foreign manufacturers.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	45%	45.0%	57.0%	59.0%
Result:	N/A	N/A	55.07%	54.7%	N/A	N/A

Measure: Percent of detected conventional aircraft incursions resolved along all borders of the United States						
Description: The measure represents the percent of conventional aircraft, once detected visually or by radar, that are suspected of illegal cross border activity and are brought to a successful law enforcement resolution. In some cases, Office of Air and Marine (OAM) assets are launched to interdict the aircraft. In most cases, resolution of the aircraft identity is made by the Air and Marine Operations Center (AMOC) working with interagency partners such as the Federal Aviation Administration (FAA). If the incursion is deemed legal, OAM considers the incursion resolved. If not resolved, AMOC working with our partners including OAM assets - could not identify the target and is thus considered illegal.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	95.3%	96%	N/A	N/A

Measure: Percent of imports compliant with U.S. trade laws						
Description: This measure reports the percent of imports that are compliant with U.S. trade laws including customs revenue laws. Ensuring that all imports are compliant and free of major discrepancies allows for lawful trade into the U.S.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	98%	98%	98%	97.50%	97.50%
Result:	N/A	98.89%	97.67%	96.46%	N/A	N/A

Measure: Percent of inbound cargo identified by CBP as potentially high-risk that is assessed or scanned prior to departure or at arrival at a U.S. port of entry						
Description: This measure gauges the percent of international cargo coming to the United						

States via air, land, and sea identified as potentially high-risk using the Automated Targeting System (ATS) that is assessed or scanned prior to lading or at arrival at a U.S. port of entry. Assessing, resolving, and when necessary scanning potentially high-risk cargo prior to lading or at arrival at the ports of entry ensures the safety of the U.S. public and minimizes the impact to the trade through the effective use of risk-focused targeting.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO
Result:	FOUO	FOUO	FOUO	FOUO	N/A	N/A

Measure: Percent of people apprehended multiple times along the Southwest border						
Description: This measure examines the percent of deportable individuals who have been apprehended multiple times by the U.S. Border Patrol. This measure calculates the number of people apprehended multiple times divided by the total number of apprehensions of people during a fiscal year. Effective and efficient application of consequences for illegal border crossers will, over time, reduce overall recidivism.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Result:	N/A	N/A	N/A	N/A	N/A	N/A

Management Measures

Measure: Average number of apprehensions for persons with multiple apprehensions along the Southwest border						
Description: This measure examines the average number of apprehensions for deportable individuals who have been apprehended multiple times by the U.S. Border Patrol. Effective and efficient application of consequences for illegal border crossers will, over time, reduce the average number of apprehensions per recidivist and reduce overall recidivism.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	<=2.48	<=2.45
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Compliance rate for Customs-Trade Partnership Against Terrorism (C-TPAT) members with the established C-TPAT security guidelines						
Description: This measure provides the overall compliance rate achieved for all validations performed during the Fiscal Year. After acceptance into the Customs-Trade Partnership Against Terrorism (C-TPAT) program, all C-TPAT members must undergo a periodic validation in which U.S. Customs and Border Protection (CBP) examiners visit company locations and verify compliance with an industry-specific set of CBP security standards and required security practices. These validations are prepared using a weighted scoring system that is used to develop an overall compliance rate for each company. Compliance with security guidelines enhances the security of cargo shipped to the U.S.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Note: FY 2013 and 2014 targets adjusted based on FY 2012 results

Measure: Number of joint operations conducted along the Northern Border by Border Patrol Agents and Canadian law enforcement partners						
Description: This measure tracks the number of initiated joint operations that are formalized by operations orders to engage in joint operations along the Northern Border. These bi-lateral law enforcement efforts between Customs and Border Protection and Canadian law enforcement partners at federal, provincial, territorial, and municipal (local) levels enhance the ability to ensure legal trade and travel, while mitigating border security threats, including illicit activity by criminal organizations and others who would do harm to our Nation.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	12	18	24
Result:	N/A	N/A	N/A	50	N/A	N/A

Measure: Number of joint operations conducted along the Southwest Border by Border Patrol Agents and Mexican law enforcement partners						
Description: This measure tracks the number of initiated joint operations that are formalized by operations orders which define levels of participation and dedication of resources. Bi-lateral law enforcement efforts between CBP/Border Patrol and Mexican law enforcement partners at local, state, and federal levels enhance the ability to ensure legal trade and travel, while mitigating border security threats, including illicit activity by criminal organizations and others who would do harm to our Nation. (For FY12 on, this measure will be part of the management set.)						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	9	10	11	12
Result:	N/A	N/A	12	22	N/A	N/A

Measure: Percent of air passengers compliant with laws, rules, and regulations						
Description: This measure is the compliance rate of international air passengers with all of the laws, rules, and regulations that U.S. Customs and Border Protection (CBP) enforces at the Ports of Entry, with the exception of agriculture laws and regulations. It is also referred to as the Air Compex rate, and includes all customs and immigration violations, both category I (major) and category II (relatively minor). Category II violations far out-number category I violations and include all noncompliance with established customs and immigration laws, rules, regulations, as well as violation of all rules and regulations of other agencies. This includes inadmissible alien travelers, prohibited items for other agencies, such as the Food and Drug Administration, confiscation of alcoholic beverages on behalf of state authorities, Consumer Product Safety Commission safety alerts, and trade violations such as amended declarations resulting in additional revenue or CBP action.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	99.2%	98.0%	98.0%	98.0%	98.0%	98.0%
Result:	98.1%	98.63%	98.62%	98.6%	N/A	N/A

Measure: Percent of air support launches accomplished to support Homeland Security missions						
--	--	--	--	--	--	--

U.S. Customs and Border Protection - Strategic Context

Description: A primary and important measure for Air and Marine is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which the program was able to respond.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	95%	95%	95%	95%
Result:	N/A	N/A	84%	85%	N/A	N/A

Measure: Percent of border vehicle passengers in compliance with agricultural quarantine regulations						
Description: The measure shows the U.S Customs and Border Protection's (CBP) success at maintaining a high level of security in the land border environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions. CBP randomly samples border vehicle passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	95.5%	95.5%	95.5%	95.5%	95.5%	95.5%
Result:	97.06%	96.95%	97.56%	97.6%	N/A	N/A

Measure: Percent of international air passengers in compliance with agricultural quarantine regulations						
Description: The measure shows the U.S. Customs and Border Protection's (CBP) success at maintaining a high level of security in the international air environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions by international air passengers. CBP randomly samples international air passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	96%	95.5%	95.5%	95.5%	95.5%	95.5%
Result:	96.12%	96.38%	96.89%	96.9%	N/A	N/A

Measure: Percent of land border passengers compliant with laws, rules, and regulations						
Description: This measure is the Compliance Rate of land border vehicle passengers with all of the laws, rules, regulations that U.S. Customs and Border Protection (CBP) enforces at the Ports of Entry, with the exception of agricultural laws and regulations. It is also referred to as the Land Complex rate, includes all customs and immigration violations, both category I (major) and category II (relatively minor). Category II violations far out-number category I violations and include all noncompliance with established customs and immigration laws, rules, and regulations, as well as violation of all rules and regulations of other agencies. This includes inadmissible alien travelers, prohibited items for other agencies, such as the Food and Drug Administration, confiscation of alcoholic beverages on behalf of state authorities, Consumer Product Safety Commission safety alerts, and trade violations such as amended declarations resulting in additional revenue or CBP action.

Mission 3: Enforcing and Administering Our Immigration Laws

Resources Requested

CBP resources supporting *Enforcing and Administering Our Immigration Laws* are provided in the table below.

Program	FY2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Securing America's Borders	196,337	803	212,050	803	190,634	811
Securing and Expediting Travel	467,642	3,255	471,495	3,255	639,116	3,642
Intelligence and Targeting	3,567	19	4,029	19	3,754	19
Integrated Operations	33,786	98	33,867	98	29,886	115
Management and Administration	136,320	243	138,957	243	137,949	243
Total*	837,652	4,417	860,397	4,417	1,001,339	4,830

*Totals account for rounding.

Much of CBP's enforcement effort between the ports of the Southwest Border prevents illegal entry by addressing the illegal flow of criminal, fugitive, dangerous, or inadmissible aliens. Border Patrol apprehends and removes these aliens through the use of agents and a dedicated transportation program. Additional activities that support immigration enforcement include traffic check point operations, intelligence gathering, and liaising with other federal, state, local and tribal organizations.

At the U.S. ports of entry, CBP enforcement activities prevent the entry or admission of criminal fugitives, dangerous foreign nationals, and other unauthorized entrants and ensure their arrest, detention, prosecution and removal. Each passenger is screened for admissibility and vehicles (including rail and cargo) are inspected for human smuggling using many of the same processes and technologies that support Mission 1 and Mission 2.

Additionally, CBP operates a number of specialized programs in support of immigration enforcement. Under the Immigration Advisory Program, CBP deploys officers overseas (London-Heathrow, Amsterdam, Tokyo, Frankfurt, Madrid, Manchester, London-Gatwick, and Paris) to support CBP's goal of enhancing the security of air travel by preventing inadmissible persons from boarding commercial aircraft destined for the U.S. and reducing the number of improperly documented passengers traveling from or through a country to the United States. CBP also operates a Fraudulent Document Analysis Unit (FDAU) to remove fraudulent travel documents from circulation and to prevent the use of these documents by *mala fide* travelers attempting to enter the U.S. Finally CBP's Admissibility Review Office (ARO) provides a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility under the Immigration and Nationality Act (INA).

The National Targeting Center-Passenger (NTC-P) also provides critical capability to meet Mission 3. NTC-P pre-departure vetting of passengers at foreign locations where CBP does not have an IAP presence keeps high-risk travelers from boarding flights to the United States. This program began in January 2010 and through close cooperation with the CBP Regional Carrier Liaison Groups, the airline industry, as well as the local ICE and CBP Attachés, nearly 3,000 *mala fide* passengers have experienced refused boarding on U.S. bound flights.

Additionally, the new NTC-P Advance Targeting Team (ATT) focuses on passengers departing from the United States. Since the outbound apprehension of the Times Square bomber and the increase in the number of watch-listed individuals, a new emphasis has been placed on outbound targeting operations.

The primary areas of concern are threats to civil aviation, subjects of the National Crime Information Center (NCIC) arrest warrants, and new efforts to identify previously unknown terrorists. NTC-P has also implemented the Visa Hot List for recurrent re-vetting of all recently issued U.S. non-immigrant visas against numerous law enforcement databases to identify persons who have become inadmissible to the United States subsequent to the issuance of the visa. Individuals with valid visas who match a record of interest are now referred to DOS for possible visa revocation.

Performance Measures

For *Enforcing and Administering Our Immigration Laws*, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Percent of apprehensions at Border Patrol checkpoints						
Description: Checkpoints are facilities used by the Border Patrol to monitor traffic on routes of egress from areas on the Southwestern and Northern borders. Checkpoints are an integral part of the Border Patrol's defense-in-depth, layered strategy. As such, measurements of activities occurring at checkpoints serve not only to gauge checkpoint operational effectiveness, but also serve as barometers of the effectiveness of the Border Patrol's overall national border enforcement strategy to deny illegal entries into the United States. This measure examines one component of checkpoint activity, the number of persons apprehended by Border Patrol agents, and compares these apprehensions to Border Patrol apprehensions made nationwide.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<3%	<5%	<5%	<5%	<5%	<5%
Result:	2.85%	2.8%	2.51%	2%	N/A	N/A

Mission 5: Ensuring Resilience to Disasters

Resources Requested

CBP resources supporting *Ensuring Resilience to Disasters* are provided in the table below.

\$ in thousands

Program	FY2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Securing America's Borders	7,344	44	9,461	44	9,584	44
Integrated Operations	57,202	583	62,741	583	45,687	517
Total*	64,546	627	72,202	627	55,271	561

*Totals account for rounding.

CBP activities include incident management, operations coordination, and maintaining a 24x7 situation room. Additional capability for incident management exists at CBP's first Intelligence and Operations Coordination Center (IOCC) located in Tucson, Arizona. The IOCC was established to enable CBP field leadership to plan and coordinate joint operations and share intelligence with CBP operational components and law enforcement and intelligence partners. The IOCC also has the capability to serve as a primary or secondary incident management center during natural disasters or other critical incidents in support of our federal, state, local, and tribal partners. As a result, the IOCC with its operational functions and interagency linkages strengthen DHS' disaster response capabilities.

Performance Measures

CBP contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Providing Essential Support to National and Economic Security

Resources Requested

CBP resources supporting *Providing Essential Support to National and Economic Security* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Securing and Expediting Trade	256,944	1,946	256,029	1,945	275,956	2,002
Securing and Expediting Travel	0	0	0	0	2,269	1

Total*	330,800	2,097	331,177	2,097	352,960	2,160

*Totals account for rounding.

CBP continues to play a vital role as a revenue collector for the U.S. Treasury – customs revenue remains the second largest source of revenue for the U.S. government. CBP has set revenue collection as a Priority Trade Issue in order to ensure that CBP effectively collects revenue (\$37 billion in FY 2012) for the U.S. Government. CBP strives to provide high-quality financial management and efficiently and effectively collect, report, and account for revenue collections.

Performance Measures

For *Providing Essential Support to National and Economic Security*, two types of performance measures are presented. Strategic Performance Plan Measures represent CBP’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results. Each year, targets for measures are reassessed in the context of actual performance, and to account for observed trends in the data. Footnotes included in the tables reflect the measures for which targets have been adjusted and the reasons for the change.

Strategic Performance Plan Measures

Measure: Percent of import revenue successfully collected						
Description: This measure estimates the collected duties, taxes, and fees (called net undercollection of revenue) expressed as a percent of all collectable revenue due from commercial imports to the United States directed by trade laws, regulations, and agreements. The total collectable revenue is total collected revenue plus the estimated net undercollected revenue based on trade violations. The revenue gap is a calculation of uncollected duties (the difference between estimated undercollection and overpayment) based on statistical sampling.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	99.4%	100%	100.00%	100.00%	100.00%
Result:	N/A	N/A	99.12%	98.88%	N/A	N/A

Management Measures

Measure: Number of shipments seized as a result of intellectual property rights violations						
Description: This trade discrepancy measure provides the number of seizures made by U.S. Customs and Border Protection (CBP) and U.S. Immigration and Customs Enforcement (ICE) for Intellectual Property Rights (IPR) violations. IPR infringement undermines the economic vitality of the United States by reducing the competitiveness of U.S. industry, threatens national security due to infiltration of counterfeit parts in the supply chain for defense systems and other critical infrastructure, and poses risks to the health and safety of consumers. CBP and ICE are actively engaged in protecting America by seizing these infringing goods.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	23,000	24,000	25,000
Result:	N/A	N/A	N/A	22,880	N/A	N/A

Measure: Value of shipments seized as a result of intellectual property rights violations (in millions)						
Description: This trade discrepancy measure provides the value of seizures made by U.S. Customs and Border Protection (CBP) and U.S. Immigration and Customs Enforcement (ICE) for Intellectual Property Rights (IPR) violations. IPR infringement undermines the economic vitality of the United States by reducing the competitiveness of U.S. industry, threatens national security due to infiltration of counterfeit parts in the supply chain for defense systems and other critical infrastructure, and poses risks to the health and safety of consumers. CBP and ICE are actively engaged in protecting America by seizing these infringing goods.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	\$304.00	\$136.00	\$123.00
Result:	N/A	N/A	N/A	\$156.10	N/A	N/A

Note: CBP is making more seizures in express shipments and mail, which tend to be lower value seizures. The projections were revised to accurately reflect this reality.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

Department of Homeland Security Immigration and Customs Enforcement

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2012	1/1/2012	Senate Report 112-74 p. 58	Second Semi-Annual Deportation of Parents of U.S. Born Children Report FY11 - The Committee directs ICE to continue to submit the report on collection of data on deportation of parents of U.S.-born children, as mandated in the joint explanatory statement accompanying Public Law 111-83, to the Senate Committee on Appropriations and the Committee on the Judiciary.	Report is with OMB for clearance.
2012	2/13/2012	House Report 112-91 p.51	National IPR Coordination Center Budget Report - ICE is directed to report to the committee on the budget for the National IPR Coordination Center for fiscal year 2012, the number of agents in the U.S. and abroad dedicated to IPR investigations, and the number of hours spent by agents in fiscal year 2011 on IPR investigations.	Report is with ICE for final clearance.
2012	4/21/2012	Senate Report 112-74 p. 54	Visa Overstay Strategy Report with US-VISIT - Directs ICE to coordinate with US-VISIT and develop a comprehensive strategy to address the visa overstay problem. The strategy should consider the suggestions offered by the GAO and should be submitted not later than 120 days after the date of enactment of this act.	Report is with OMB for clearance.
2012	7/1/2012	Senate Report 112-74 p. 58	First Semi-Annual Deportation of Parents of U.S. Born Children Report FY12 - The Committee directs ICE to continue to submit the report on collection of data on deportation of parents of U.S.- born children, as mandated in the joint explanatory statement accompanying Public Law 111-83, to the Senate Committee on Appropriations and the Committee on the Judiciary.	Report is with DHS for clearance.

2013	1/1/2013	Senate Report 112-74 p. 58	Second Semi-Annual Deportation of Parents of U.S. Born Children Report FY12 - The Committee directs ICE to continue to submit the report on collection of data on deportation of parents of U.S.- born children, as mandated in the joint explanatory statement accompanying Public Law 111-83, to the Senate Committee on Appropriations and the Committee on the Judiciary.	Report is within ICE for clearance.
2013	2/15/2013	FY 2013 CR P.L. 112-175 Conference Report 2055 p. 0562 House Report 112-91 p.50	Investigative Activities and Expenditures Report FY13 Q1 - HOUSE LANGUAGE: The Committee directs ICE to continue to provide quarterly data on investigative activities and expenditures on a timely basis. CONFERENCE LANGUAGE: ICE is directed to continue to provide quarterly data on investigative activities and expenditures on a timely basis.	Report is with DHS for final clearance.
2013	2/15/2013	FY 2013 CR P.L. 112-175 Conference Report 2055 p. 0564	Secure Communities Quarterly Report FY13 Q1 - CONFERENCE LANGUAGE: ICE is directed to continue quarterly reports on the Secure Communities program, submit those reports within 45 days of the close of the quarter, and provide briefings within 45 days of the close of the quarter. Further, ICE is directed to develop analyses, for inclusion in these reports, to track the effect Secure Communities is having on ICE detention facilities, the EOIR docket, and the speed with which ICE is able to remove criminal aliens and high-risk detainees from the country once they are judged deportable. The reports shall also provide statistics on results of the program, including the number of individuals administratively arrested by ICE in each jurisdiction by the crime for which they are charged and the crime for which they have been convicted (if applicable); the number of individuals whom ICE identifies each quarter and intends to administratively arrest but must await the adjudication of the individual's criminal charges and/or the completion of a sentence as well as identify the crimes for which they are charged and crimes for which they have been convicted (if applicable); and the number of removals achieved as a result of the program, as outlined in the Senate report.	Report is with DHS for clearance.

2013	2/15/2013	FY 2013 CR P.L. 112-175 Conference Report 2055 p.0564	DRO Quarterly Report FY13 Q1 - CONFERENCE LANGUAGE: For fiscal year 2012, ICE is directed to continue reporting quarterly on detention and removal, including the number of deportation, exclusion, and removal orders sought and obtained by ICE. The first fiscal year 2012 quarterly report is to be submitted no later than February 15, 2012. ICE shall include "policy closure" reporting subdivided to clearly report where deferred action has been granted.	Report is with OMB for clearance.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

Programs funded through the Salaries and Expenses account contribute to the ICE mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. Salaries and Expenses resources are used to combat terrorism, protect our Nation's borders, deter illegal immigration, and protect our cyber border. ICE accomplishes these missions by investigating, detaining, and prosecuting criminals and aliens who pose a risk to national security and public safety. These activities protect the infrastructure and persons within the United States.

B. Budget Activities:

Management and Administration

Management and Administration (M&A) provides a range of mission and operational support for ICE. M&A oversees ICE's budget, expenditures, accounting, finance, and procurement. M&A is responsible for all human resources services, workforce recruitment, equal employment opportunity, and training for all employees and special agents. M&A oversees all information technology systems, facilities, and property and equipment, as well as the National Firearms and Tactical Training Unit (NFTTU), which ensures that ICE, U.S. Customs and Border Protection (CBP), and the Federal Protective Service (FPS) have the necessary firearm, protective equipment and training to carry out their jobs. In addition, M&A identifies and tracks the agency's performance measurements to ensure that strategic priorities, missions, and goals are met.

Legal Proceedings

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the United States Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations and applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

Domestic Investigations

The ICE Office of Domestic Investigations, as part of Homeland Security Investigations (HSI), enforces trade and immigration laws through the investigation of activities, persons, and events

that may pose a threat to the safety or security of the United States and its people. The program also investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child pornography, child sex tourism, and health and public safety dangers.

International Affairs

The ICE Office of International Affairs (OIA), as part of HSI, represents DHS's largest investigative law enforcement presence abroad and helps protect the Nation beyond its borders. ICE OIA has the broadest international footprint in DHS with offices in 48 countries. Through OIA, ICE works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States. ICE's international mission is to protect the United States through international criminal investigations; to prevent acts of terrorism by targeting the people, money, and materials that support terrorist and criminal activities; and to identify and eliminate vulnerabilities in the Nation's border, economy, transportation networks, and infrastructure security systems.

Intelligence

The Office of Intelligence, as part of HSI, develops, processes, analyzes, and disseminates relevant information and intelligence needed to support executive management and investigative units. Information is gathered to identify threats, patterns, trends, methods, and organizations related to transnational crimes. This information supports law enforcement efforts and investigations across ICE, DHS and many levels of government.

Enforcement and Removal Operations

Enforcement and Removal Operations (ERO) is responsible for ensuring that every alien who has been ordered removed departs the United States through enforcement of the Nation's immigration laws and coordination with foreign governments to ensure countries will accept removable aliens. ERO is comprised of six Program/Project Activities:

Custody Operations Program – This program as part of ERO provides safe, secure, and humane detention of removable aliens who are held in government custody because they present a risk of flight, a risk to public safety, or are subject to mandatory detention. ICE carefully monitors which aliens are detained to ensure its detention space is used to best support border security and public safety.

Fugitive Operations Program – This program as part of ERO locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, with an emphasis on those aliens posing the greatest risk to public safety. This creates a deterrent to potential absconders and promotes the integrity of the immigration process.

Criminal Alien Program – This program as part of ERO identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these

criminal aliens are removed rather than released into the community, ICE strives to secure a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to be removed from the United States.

Alternatives to Detention Program – This program, as part of ERO, places low-risk aliens under various forms of intensive supervision or electronic monitoring rather than in detention. These systems can be a cost-effective way to ensure individuals’ appearance for immigration hearings and for removal. This program also lowers the risk that aliens ordered removed will become fugitives.

Transportation and Removal Program – This program as part of ERO provides for the safe and secure transportation of aliens in ICE custody and the removal of aliens from the United States.

Secure Communities / Comprehensive Identification and Removal of Criminal Aliens (SC/CIRCA) - Secure Communities completed nationwide activation of IDENT/IAFIS interoperability in 2013. In FY 2014, full responsibility for the day-to-day management of interoperability will transition from SC/CIRCA to the Criminal Alien Program (CAP). The program will continue its strategy, business transformation, and analytical roles by maturing and leveraging its analytic capabilities and systems. SC/CIRCA will also oversee ERO’s IT strategy, including the Modernized Alien Criminal Response Management (ACRIME) and Automated Threat Prioritization (ATP).

C. Budget Request Summary:

U.S. Immigration and Customs Enforcement (ICE) requests 20,573 positions, 18,977 FTE, and \$4,956,822,000 in FY 2014 for the Salaries and Expenses (S&E) appropriation. In order to accomplish the agency’s objectives and mission, ICE requests \$5,111,163,000 and 19,047 FTE to maintain current services, and (\$154,341,000) and (70) FTE in program changes for the S&E account appropriation.

Program Change Requests

ICE requests program changes for the Salaries and Expenses appropriation in the following key areas:

- **OPLA Increase.....\$10.0M 36 FTE**
This request will provide for 73 attorney positions that will use prosecutorial discretion to help prioritize the immigration court docket and reduce the backlog of criminal alien prosecutions projected to be generated by full Secure Communities (SC) interoperability deployment.,
- **Commercial Trade Investigations Increase.....\$5.6M 0 FTE**
This request will provide non-personnel costs to support intellectual property rights and commercial trade fraud investigations at the Intellectual Property Rights (IPR)

Coordination Center, as well as transnational commercial trade fraud investigations conducted by Transnational Criminal Investigative Units.

- **Human Trafficking Investigations Increase.....\$8.8M 0 FTE**
 This request will increase funding for the Extraterritorial Criminal Travel Strike Force (ECT) Initiative, Anti-Trafficking Coordination Teams, and Transnational Criminal Investigative Units to conduct human smuggling and trafficking investigations, as well as identify and rescue victims of smuggling and trafficking.
- **Secure Communities Realignment.....\$0.0 0 FTE**
 This realignment of funds and personnel allows for the transfer of full responsibility of day-to-day management of SC to the CAP due to the completion of nationwide interoperability deployment in FY 2013.
- **Realignment and Reduction of 287(g).....(\$44.0M) (-83 FTE)**
 This budget reduces the 287(g) program by \$44.0 million, reflecting full deployment of Secure Communities and elimination of low performing task force model agreements. The combination of jail force model MOAs and Secure Communities will provide consistent, efficient, and cost effective screening to identify and remove criminal and other priority aliens.
- **OPLA Reduction.....(\$5.0M) (0 FTE)**
 This reduction includes reducing contracts, utilizing courtroom wiring in lieu of air cards, utilizing video teleconferencing, and reducing non-corporate training in the Office of Legal Proceedings.
- **Reduction in Detention Beds to 31,800.....(\$119.6M) (0 FTE)**
 This request would set ICE’s average daily detention bed level to 31,800, a level sufficient to detain those individuals who pose a danger to national security or a risk to public safety, including aliens convicted of crimes, with particular emphasis on violent criminals, felons, and repeat offenders. ICE estimates an average bed rate of \$119.00 per day in FY 2014.
- **International Footprint Reductions.....(\$10.2M) (23 FTE)**
 The budget reduces ICE’s international footprint through the closure of one lower-risk office and staffing reductions at 20 other offices around the world. ICE utilized a risk-based methodology to determine which offices would close or face staffing reductions.

D: Efficiencies and Reductions

Personnel Costs and Benefits

\$251.662 million

Staffing Reduction Savings through Attrition (\$205.262 million) – Both Mission Support and Frontline positions will be reduced through staffing reductions achieved through attrition. Only the targeted hiring of the most critical positions will be allowed.

Staffing Reduction through Programmatic Change and Efficiencies (\$41 million) – FTE and Position reductions are due to PPA right-sizing adjustments and program specific efficiencies included in this budget.

Agency/Enterprise Wide Reductions (\$5.4 million) - This reduction includes cost savings attributed to a Department Enterprise-Wide Efficiency initiative to reduce overall administrative expenses. Savings in Personnel Costs and Benefits are planned through reductions in overtime.

Travel Efficiencies **\$10.833 million**

Agency/Enterprise Wide Reductions (\$10.833 million) - This reduction includes cost savings attributed to a Department Enterprise-Wide Efficiency initiative to reduce overall administrative expenses. It is a reduction to areas such as vehicle fleet, Permanent Change of Station (PCS) costs, Temporary Duty (TDY) and travel, professional service contracts, and overtime.

Communication, Utilities, and Misc Charges Efficiencies **\$8.531 million**

Administrative Savings and Servicewide Reductions (\$5.65 million) – This reduction is an effort to achieve cost savings in administrative spending in areas such as professional service contracts, supplies and materials, and printing.

Programmatic Efficiencies (\$2.881 million) – These efficiencies are program-specific reductions brought about through process improvement and prioritization, or reorganization of activities inside individual PPAs.

Advisory and Assistance Services Efficiencies **\$92.837 million**

Service Contract Reductions (\$17.854 million) – Through a review of procurement support service requirements and other contractual requirements, ICE has identified savings that can be realized in 2014 with minimal impact on front-line operations, such as M&A and HQIT support, material leases and contracted training and travel.

Administrative Savings and Servicewide Reductions (\$35.25 million) – This reduction is an effort to find cost savings in administrative spending in areas such as professional service contracts, supplies and materials, and printing. ICE will also continue its efforts to reduce costs through on-going initiatives such as the Balanced Workforce Strategy.

Agency/Enterprise Wide Reductions (\$22.422 million) - This reduction includes cost savings attributed to a Department Enterprise-Wide Efficiency initiative to reduce overall administrative expenses. It is a reduction to areas such as vehicle fleet, PCS costs, TDY and travel, professional service contracts, and overtime.

Programmatic Efficiencies (\$17.311 million) – These efficiencies are program-specific reductions brought about through process improvement and prioritization, or reorganization of activities inside individual PPAs.

Furniture, Vehicles, & Equipment Efficiencies **\$34.527 million**

Administrative Savings and Servicewide Reductions (\$2.041 million) – This reduction is an effort to find cost savings in administrative spending in areas such as professional service

contracts, supplies and materials, and printing. ICE will also continue its efforts to reduce costs through on-going initiatives such as the Balanced Workforce Strategy.

Agency/Enterprise Wide Reductions (\$23.885) - This reduction includes cost savings attributed to a Department Enterprise-Wide Efficiency initiative to reduce overall administrative expenses. It is a reduction to areas such as vehicle fleet, PCS costs, TDY and travel, professional service contracts, and overtime.

Programmatic Efficiencies (\$8.601 million) – These efficiencies are program-specific reductions brought about through process improvement and prioritization or reorganization of activities inside individual PPAs.

Other Services and Minor Object Class Efficiencies **\$84.030 million**

Administrative Savings and Servicewide Reductions (\$34.247 million) – This reduction is an effort to find cost savings in administrative spending in areas such as professional service contracts, supplies and materials, and printing. ICE will also continue its efforts to reduce costs through on-going initiatives such as the Balanced Workforce Strategy.

Agency/Enterprise Wide Reductions (\$49.783 million) - This reduction includes cost savings attributed to a Department Enterprise-Wide Efficiency initiative to reduce overall administrative expenses. It is a reduction to areas such as vehicle fleet, PCS costs, TDY and travel, professional service contracts, and overtime.

2014 Program Change	(63)	(63)	(13,846)
2014 Total Request	1,682	1,586	192,236
Total Change 2012 to 2014	(145)	(42)	(41,015)

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$192.2 million, 1,682 positions, and 1,586 FTE for the four offices that comprise the Personnel, Compensation and Benefits (PC&B) PPA to provide management and administrative support for ICE’s programs, including finance, human resources, training, and procurement, to the ICE operational programs.

Funding includes a net \$27.2 million Adjustment to Base decrease from FY 2012 and a \$13.8 million programmatic decrease. The Adjustment to Base includes attrition of non-mission critical FTE, and administrative efficiencies resulting in an overall net decrease but also includes increases for pay inflation and GSA rent. The request includes a programmatic decrease of \$13.8 million as part of the reduction and realignment of 287(g) which is described in more detail in the programmatic change section.

As part of ICE’s ongoing efforts to identify required savings, PC&B will reduce some mission essential training and non-mission critical spending by \$15.5 million through efficiencies in the areas of servicewide reductions, service contracts, travel, training, fleet, personal change of station (PCS), and temporary duty (TDY). \$14.9 million and 82 FTE will be reduced through staffing reductions achieved through attrition, and only allowing targeted hiring of the most critical positions.

QHSR Alignment

6.3 Conduct and Support Other Law Enforcement Activities

ICE Strategic Plan Alignment

4.4 Use Resources Wisely

Offices within PC&B are leading ICE's efforts related to the Balanced Workforce Strategy Initiative. Through this effort, in FY 2012, ICE realized \$6 million in savings and identified \$14 million in future savings related to review of 172 contracts. ICE also introduced several strategic-sourcing initiatives that led to new Department of Homeland Security-wide ammunition contracts with an estimated savings of more than \$20 million over the next five years.

Justification

Salaries (\$134 million)

The ICE PC&B offices will have a staffing level of 1,586 FTE in FY 2014.

Expenses (\$58.2 million)

The ICE PC&B offices will spend \$58.2 million in FY 2014 on general expenses to support the ICE operational programs. This includes purchasing law enforcement equipment, providing basic training to HSI special agents and ERO officers, processing Freedom of Information Act (FOIA) requests, investigating allegations of misconduct involving employees of ICE and CBP, and overseeing the physical and operational security for ICE employees and facilities.

Description

Management and Administration provides a unique range of mission and operational support for ICE. PC&B oversees ICE's budget, expenditures, accounting, finance, and procurement. PC&B is responsible for all human resources, personnel, workforce recruitment, equal employment opportunity, and training for all employees. All information technology systems, facilities, and property and equipment are overseen by PC&B as well as the National Firearms and Tactical Training Unit (NFTTU), which ensures that ICE, CBP, and the FPS have the necessary firearm, protective equipment and training to complete their jobs. In addition, PC&B investigates allegations of misconduct, manages personnel security, conducts on-site inspections of field offices and HQ programs and identifies and tracks the agency's performance measurements to ensure that strategic priorities, missions, and goals are met.

ICE NFTTU provided armory services (firearms and ammunition) to over 62,000 DHS agents and officers.

The Office of the Assistant Secretary (OAS) – directs the overall advancement of the agency's objectives outlined in the ICE strategic plan. This includes both operational and management support to meet day-to-day organizational needs, as well as long-term agency goals. The operational support areas provide leadership and coordination of all of ICE's operational components, address operational challenges, and support ICE's continued growth and development as a premier law enforcement agency. The management support areas provide coordination of all administrative and managerial components of ICE. Offices that report directly to the OAS are responsible for human capital, congressional relations, public affairs, policy, diversity and civil rights, training and development, FOIA activities, privacy, firearms and tactical training.

ICE FOIA reviewed, processed, and disclosed more than one million pages of documents in response to over 21,000 requests, with average cycle time of less than 21 days.

One of the major initiatives that the OAS is undertaking is the “workforce right sizing” initiative. The ICE Office of Human Capital (OHC) will use this initiative to promote better efficiency at ICE as well as create a more effective and well-balanced workforce for the future. As such, OHC plans to assist with implementing “right sizing” initiatives related to workforce planning, succession planning, and Voluntary Early Retirement Authority/Voluntary Separation Incentive Payment (VERA/VSIP). For example, ICE will be submitting a VERA/VSIP request through the Department to OPM for possible implementation in FY 2013 or 2014. OHC will develop this request based on input from each program office regarding their mission priorities, future workforce/skill set needs, and projected budget cuts for FY 2013 and FY 2014. In addition, OHC is developing the required process to check and confirm accuracy of personnel data in the National Finance Center to implement workforce downsizing over the next few years.

The Office of Professional Responsibility (OPR) – investigates allegations of misconduct involving employees of ICE and CBP. OPR conducts independent inspections and reviews of ICE offices, operations, and processes in order to provide executive management with an independent review of the agency’s organizational health, effectiveness, and efficiency. OPR manages the Personnel Security Unit, which ensures that all ICE applicants are properly screened prior to entering on duty, and the Security Management Unit, which oversees physical, communication and operational security for ICE employees and facilities. In addition, the OPR Office of Detention and Oversight (ODO), investigates all allegations of detainee abuse and/or detainee deaths referred by DHS, the Office of Civil Rights and Civil Liberties (CRCL), and the Joint Intake Center.

ICE implemented a tracking process for detention-related allegations. Information obtained through this process is used to better inform ICE leadership of trends, patterns, analysis and oversight at specific detention facilities.

The Office of the Chief Financial Officer (OCFO) – manages ICE’s financial and physical resources, promotes integrity and accountability, delivers financial management services, provides facilities and property management services, and manages the development, execution and monitoring of sound performance-based budgets. Included in its work is an effort to deliver best-in-class customer service and the co-location initiative to consolidate 367 leases in 55 U.S. metropolitan areas to support operational effectiveness. As ICE works to complete the co-location projects that have received funding, a tailored city solution approach is being undertaken in cities where co-location into one location is not feasible financially and/or operationally.

ICE delivered co-location projects in Jacksonville, FL, Charleston, SC, Albuquerque, NM, and San Francisco, CA. Seventeen leases were consolidated into 3 leases. ICE also implemented the Real Property Management System.

The ICE OCFO maintains a funds control policy and budget execution handbook for all ICE programs and continues to advance the accuracy and sophistication of its managerial cost accounting model, which is compliant with Federal Accounting Standards Advisory Board (FASAB) standards. In addition, OCFO began a study of the detention bed sourcing process to improve the cost-effectiveness of bed space operations and understand ICE’s exposure to contingent liabilities. The project will result in an analysis of alternatives for detention space sourcing strategies by evaluating cost, risk, and implementation feasibility. ICE OCFO is also working to develop a consolidated solution approach that will enable both ICE and its customers to

In FY 2012, ICE leveraged its Managerial Cost Accounting model to develop business intelligence. In addition to quantifying the costs for key operations, ICE began to assess and model how funding or staffing changes to ICE or other agencies, like EOIR, can impact ICE’s output and costs.

transition from the current Federal Financial Management System (FFMS) when the existing contracts expires to a shared service provider environment while addressing the need for a Data Warehouse to capture historical information from the existing FFMS environment. The scope of this initiative will not only provide an integrated repository of ICE information to better and more efficiently enable the analysis of relationships and dependencies of interconnected business actions, provide timely data to support business and mission decisions, and facilitate planning, reporting, and trend analysis but also enable ICE and its customers to migrate out of a proprietary financial system environment

The Office of Acquisition Management (OAQ) – is a customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ operates as a full business partner with internal and external organizations and serves as a strategic asset dedicated to improving the agency's overall business performance. In FY 2012 OAQ processed over 9,200 contract actions worth \$2.2 billion.

OAQ is leading ICE's effort to strategically source major contracts, including detention beds and transportation.

The Office of State, Local, and Tribal Coordination (OSLTC) – partners with non-federal law enforcement agencies to enforce immigration and customs law and protect our communities. OSLTC builds awareness and understanding of partner services offered under ICE Agreements of Cooperation in Communities to Enhance Safety and Security (ACCESS).

FY 2014 Planned Activities

In FY 2014, ICE will:

- continue efforts to find efficiencies in the delivery of mission support services to ICE by consolidating mission support functions to leverage resources and implement process improvements;
- develop an acquisition governance policy to ensure adequate oversight of major acquisition programs and consolidation of enterprise requirements;
- implement ICE-wide workforce and succession planning strategies/processes to ensure ICE has a sufficient talent pool of future leaders and bench strength needed for future mission success;
- resolve and close all administrative allegations of misconduct within 180 days of receipt;
- inspect detention facilities utilizing a risk-based approach that includes allegations of non-compliance with ICE detention standards and promptly investigate all detainee allegations related to these standards;
- continue to conduct compliance inspections for 287(g) Agreement activities; and
- develop a Consolidated Solution Approach (CSA) for current FFMS solution transition.

2014 Total Request	348	331	141,294
Total Change 2012 to 2014	-	(69)	(42,933)

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$141.3 million, 348 positions and 331 FTE, for the ICE Office of the Chief Information Officer (OCIO) Headquarters Managed Information Technology Investment (HQIT) program to provide IT infrastructure and support to over 19,000 ICE personnel in 818 locations. Funding includes a net \$43.3 million Adjustment to Base decrease from FY 2012. The Adjustment to Base net decrease includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. This budget includes an increase of \$0.3 million in additional funding for HQIT as part of a larger 287(g) program reduction and realignment of funds. This program change is described in more detail in the programmatic change section.

As part of ICE’s ongoing efforts to identify savings, HQIT will reduce non-mission critical spending by \$39.4 million through efficiencies in the areas of service wide reductions, service contracts, and travel, training, fleet, PCS, and TDY. \$4.7 million and 25 FTE will be reduced through staffing reductions achieved through attrition, and only allowing targeted hiring of the most critical positions.

QHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Justification

Salaries (\$49.4 million)

OCIO will have a staffing level of 331 FTE in FY 2014.

Expenses (\$91.9 million)

OCIO will spend \$91.9 million to develop new IT solutions, purchase equipment, and provide maintenance and oversight to the existing IT infrastructure.

Description

OCIO provides IT services and products that contribute to the achievement of ICE's mission. OCIO has developed a number of critical IT initiatives that will help ICE modernize its IT systems, adapt and conform to modern IT management disciplines, and provide IT solutions throughout ICE.

Over the past three years, ICE has consistently achieved an 'A' on the DHS Information Security Scorecard. These scores have been achieved as DHS has steadily increased the requirements that constitute an 'A'. ICE has implemented the required security controls (as defined by the national Institute of Standards and Technology) allowing ICE to better manage its information security risks.

Specifically, OCIO handles the operation and maintenance, as well as other back-end support functions, for Automation Modernization initiatives.

ICE OCIO provides continual support for the ICE agency wide-area, local-area, and wireless networks (WAN, LAN, and radio), voice communications systems, video conferencing systems, web-hosting environment, data center infrastructure, database management, tactical communications, and all associated infrastructure to secure end-to-end support for 34,000 end-users. OCIO is also responsible for the regular IT refresh of computers, file and print servers, local area networks, cables, and switches. OCIO works to ensure that the IT enterprise architecture is in place to provide ICE with full IT capabilities including disaster recovery, cyber security, IT operations, IT systems development, and engineering. In FY 2014, OCIO will also provide the delivery of IT equipment and services to the 39 remaining state and local law enforcement entities participating in the 287(g) program.

There are four divisions of OCIO which each contribute to achieving ICE's mission.

The Architecture Division:

Creates, manages and enforces the ICE System Lifecycle Management (SLM) process. The SLM process ensures OCIO's delivery of services and information infrastructure is transparent and reliable to meet the needs of ICE and DHS by assessing the risk and need for testing of systems based on their size, complexity, and business impact.

The Engineering Division:

Provides technical solutions and expertise for all ICE telecommunications, networking, and IT infrastructure needs. This includes end-to-end support for the agency's wide-area, local area, and

wireless networks, as well as voice communications systems, video conferencing systems, web-hosting environment, and data center infrastructure and its associated support systems.

The Information Assurance Division – ensures the overall security of the technological and operational environment, including systems, user access, internal and external compliance, and security authorization of IT systems.

ICE has implemented the required security controls (as defined by the national Institute of Standards and Technology) allowing ICE to better manage its information security risks.

The Operations Division:

Provides ICE-wide Service Desk support for access, desktops, servers, applications, voice, video and tactical communications 24 hours a day, 7 days week, 365 days a year. It also provides email and Blackberry support and maintains accountability for the successful delivery of all Service Desk activities, and the overall high level of business and customer satisfaction.

FY 2014 Planned Activities

In FY 2014, OCIO will focus on addressing four IT Infrastructure areas: IT Refresh, IT Deployment and Implementation, IT Security and Monitoring, and IT Migration. OCIO will refresh security

ICE OCIO successfully migrated over 90 systems into DHS enterprise Data Centers with FY 2010 and FY 2011 funding.

infrastructure device technology; engineer and acquire Single Sign-On (SSO) (QESSO) Functionality Gap solutions; continue implementing the national build-out of wireless capability; complete enhanced disaster recovery (DR) build-out for critical enterprise systems at

the DHS Data Centers; deliver anti-virus updates and host firewalls policies to ICE servers and workstations; conduct monthly and ad-hoc security patches to ICE workstations and servers; sustain security configuration management and oversight through Federal Information Security Management Act (FISMA) reporting; and continue O&M services to sustain ICE IT infrastructure systems.

Procurement Activities

FY 2012 Activity Funding (thousands)	FY 2013 Annualized CR Activity Funding (thousands)	FY 2014 Activity Request (thousands)
FY 2012 Activity Funding \$16,668 <i>M&A</i>	FY 2013 Activity Funding \$16,950 <i>M&A</i>	FY 2014 Activity Request \$17,281 <i>M&A</i>
<i>Federal Financial Management System (FFMS) (P)</i>	FFMS is the financial management System of Record that addresses a performance gap for DHS by providing a core financial system platform. This system allows the ICE Office of Financial Management to perform all aspects of the Standard General Ledger activities along with accounts receivable, accounts payable, and other agency financial transactions and services for each of these beneficiaries. The system is fully backed up, has contingency measures in place, and is compliant with all appropriate security and privacy requirements.	

Note: Funding reflects the ICE portion of the consolidated numbers of: FY12 \$28,941; FY13 \$29,339; FY14 \$27,998.

FY 2012 Activity Funding \$232,582 <i>M&A</i>	FY 2013 Annualized CR Activity Funding \$188,494 <i>M&A</i>	FY 2014 Activity Request \$188,656 <i>M&A</i>
<i>IT Infrastructure (Atlas) (P)</i>	The infrastructure investment for ICE is the IT Infrastructure (Atlas) Program, consisting of 10 sub-programs that align to the lines of business specified by DHS. These sub-programs are comprised of projects and initiatives that enhance ICE's technology foundation, maximize workforce productivity, secure the IT environment, and improve information sharing. It consists of the architectural design, acquisition, integration, operations and maintenance of the ICE IT foundation. It supports the agency's wide-area, local-area, and wireless networks, voice communications systems, web-hosting environment, data center infrastructure, database management, tactical communications, and all associated infrastructure. The investment delivers IT products and services that provide systems availability required to enable ICE and DHS to achieve the mission. Beneficiaries include all of the ICE user community and ICE's partners in federal, state and local law enforcement.	

Note: IT Infrastructure (Atlas) activity request is funded through several sources to include Reimbursable Agreement, servicewide charged to all ICE PPAs, as well as some IT base funding.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$204.7 million, 1,270 positions, and 1,408 FTE for the Office of the Principal Legal Advisor (OPLA). It is the largest legal program in DHS and the exclusive legal representative for the U.S. government in exclusion, deportation, and removal proceedings before the Department of Justice’s Executive Office of Immigration Review (EOIR).

Funding includes a net \$15.9 million Adjustment to Base decrease from FY 2012 and a net \$4.7 million programmatic increase. The Adjustment to Base net decrease includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. This budget request includes a \$10.0 million increase to add 73 attorney positions, a \$5.0 million decrease to general expenses due to efficiencies, and \$337,000 decrease in 287(g) funding. These changes are described in more detail in the programmatic change section.

As part of ICE’s ongoing efforts to identify savings, OPLA will reduce non-mission critical spending by \$6.3 million through efficiencies in the areas of servicewide reductions, service contracts, and travel, training, fleet, PCS, and TDY. \$12.8 million and 73 FTE will be reduced through non-attorney staffing reductions achieved through attrition, and only allowing targeted hiring of the most critical positions.

QHSR Alignment

3.1 Strengthen and Effectively Administer the Immigration System

ICE Strategic Plan Alignment

3.4 Protect the Integrity of the Immigration System

Justification

Salaries (\$164.8 million)

The FY 2014 budget request will support over 1,000 full and part-time attorneys to litigate and process immigration and customs cases generated by HSI and ERO. Attorneys also provide administrative and legal counsel.

Expenses (\$39.9 million)

In FY 2014, OPLA will fund operational support and services that contribute to the enforcement of our nation's immigration laws.

Description

OPLA provides legal advice, training, and services in cases related to the ICE mission. OPLA attorneys handle immigration-related hearings that involve both criminal and non-criminal aliens, terrorists, and human rights abusers, as well as provide critical legal support to ICE components focusing on customs, worksite enforcement, ethics, procurement, appropriations, labor law, tort claims, litigation, and administrative issues.

OPLA's work is pivotal to ICE operations through two of its main components: Field Legal Operations (FLO) and the Enforcement and Litigation Directorate (E&LD). FLO represents the Federal Government in exclusion, detention, and removal proceedings in immigration court. E&LD provides oversight of administrative immigration appeals from immigration court to the Board of Immigration Appeals (BIA), handles national security matters, and works closely with other law-enforcement and intelligence agencies to provide immigration-related legal advice on national security, human rights and criminal issues. It also provides legal advice and training to ERO officers, litigation support and legal guidance on matters including detainee medical care, and advises ICE operational component personnel on sensitive matters related to asylum and refugee law. OPLA also coordinates with the Department of Justice (DOJ) on federal litigation involving immigration, tort, habeas corpus, and other cases in which ICE has a stake.

ICE also assigns 44 attorneys to the DOJ, U.S. Attorney's Office (USAO) as full-time criminal Special Assistant U.S. Attorneys (SAUSAs) to prosecute immigration and customs related crimes in federal court. Placing SAUSAs in strategic locations within the USAO allows ICE to increase the prosecution of criminal cases important to its mission. FY 2012 payroll costs for SAUSAs were approximately \$8.0 million with no reimbursement of these costs to ICE. In FY 2012, ICE SAUSAs aided in securing a total of 5,137 convictions (an increase of approximately 20 percent over FY 2011) with over 92 percent of these convictions relating to improper entry, re-entry of removed aliens, bringing in and harboring aliens, importation of controlled substances, and immigration fraud (18 U.S.C. 1028, 8 U.S.C. 1324, 8 U.S.C. 1325, 8 U.S.C. 1326, 21 U.S.C. 952 and 18 U.S.C. 1546).

Major Directorates

Field Legal Operations (FLO) – FLO is a headquarters directorate that oversees 26 ICE Offices of the Chief Counsel (OCC). The OCCs have over 750 attorneys who represent the government in immigration proceedings and handle over 300,000 immigration-related cases before EOIR. OCC cases include contested removals, custody determinations, and applications for protection or relief from removal.

Enforcement & Litigation Directorate (E&LD) – E&LD is composed of four Divisions and approximately 90 attorneys that collectively perform the operational and substantive policy counsel functions at OPLA Headquarters. E&LD has broad responsibilities that focus on providing legal advice and training to ERO and HSI as well as overseeing and coordinating litigation efforts to include litigation oversight for cases involving national security matters, terrorism, and counter-proliferation; providing legal advice on the identification, investigation, prosecution and removal from the United States of human rights violators; legal support of the Cyber Crimes Center; legal counsel on a variety of enforcement matters including 4th amendment requirements, rapid repatriation of criminal aliens, and detainee medical and mental health care; overseeing OPLA's advocacy before EOIR and the appellate caseload before BIA; and the monitoring of immigration related federal Circuit Court and Supreme Court developments; adjudication of administrative tort claims filed against the agency; processing of representation requests for agency personnel sued in their individual capacities for work performed in the scope of their duties; and coordination with DOJ in defending challenges to ICE's enforcement authorities, including arrest, detention, and removal, in federal district court. E&LD's divisions include:

Homeland Security Investigations Law Division (HSILD) - HSILD is composed of three sections that specialize in providing legal advice and training to HSI special agents, as well as litigation support and legal guidance on HSI matters to OPLA field offices:

National Security Law Section (NSLS) - NSLS provides legal advice, training, and litigation oversight for cases involving international terrorism, counter-terrorism, espionage, classified evidence, and other national security matters. NSLS attorneys work closely with other law enforcement and intelligence agencies, including the FBI and CIA, and routinely make decisions that have an immediate impact on national security. NSLS also act as liaisons with the DOJ, Department of State, and Intelligence Community.

Human Rights Law Section (HRLS) - HRLS coordinates ICE's litigation efforts with other intelligence agencies, foreign governments, international criminal tribunals, and non-governmental organizations to provide legal advice in the identification, investigation, prosecution and removal of individuals involved in human rights abuses, including genocide, extrajudicial killings, persecution, the recruitment or use of child soldiers and torture. HRLS currently has a caseload of over 1,800 cases involving individuals from 99 different countries.

Criminal Law Section (CLS) - CLS provides counsel on HSI legal issues, excluding denaturalization cases, Student and Exchange Visitor Program (SEVP) matters, and issues addressed by either HRLS or NSLS. CLS directly supports the Cyber Crimes Center (C3),

National Intellectual Property Rights Coordination Center, Bulk Cash Smuggling Center (BCSC), and the Office of International Affairs (OIA).

Enforcement and Removal Operations Law Division (EROLD) – EROLD is composed of two sections that specialize in providing legal advice and training to ERO officers and agents, as well as litigation support and legal guidance on ERO matters to OPLA field offices. For special interest cases, EROLD also coordinates with OPLA field offices, headquarters ERO agents and HSI agents, and other U.S. government agencies to achieve the most-favorable resolution of a matter and to ensure consistency in the application of immigration laws nationwide.

Enforcement Law Section (ELS) - ELS provides legal advice and training to operational divisions, including the Criminal Alien Program, Secure Communities, the Juvenile and Family Residential Management Unit, the Fugitive Operations Unit, and the HSI Student and Exchange Visitor Program. Attorneys provide advice and legal counsel on significant immigration enforcement related issues including, but not limited to: requirements of the 4th Amendment, rapid repatriation of criminal aliens, 287(g) delegation of immigration authority, and the authorities related to the detention of families and/or unaccompanied alien children. ELS also manages the litigation of civil and/or criminal denaturalization cases to the Office of Immigration Litigation.

Detention and Removal Law Section (DRLS) - DRLS provides legal advice, counsel and training on issues including, but not limited to, detainee medical and mental health care, detention officer authorities, expedited removals, detainers, deferred actions, alternatives to detention, and continued detention under specialized authorities. DRLS also provides legal and procedural guidance to the Office of Detention Policy and Planning regarding liability and/or litigation risks that could impact detention reform initiatives and new policies.

Immigration Law & Practice Division (ILPD) – ILPD has four areas of responsibility: (1) providing immigration law advice and counsel to the OCCs, ICE programs and leadership, the DHS Office of General Counsel and other agencies; (2) providing specialized advice on sensitive issues related to refugee status, asylum, Temporary Protected Status, withholding of removal, the Convention Against Torture and helping to make asylum fraud prevention tools available to the OCCs; (3) overseeing OPLA’s advocacy before EOIR and its appellate caseload before the BIA; and (4) monitoring immigration-related Federal circuit court and Supreme Court developments, and working with DOJ to address immigration cases on appeal to the circuit courts of appeals.

District Court Litigation Division (DCLD) – DCLD adjudicates claims against ICE personnel brought under the Federal Tort Claims Act, coordinates with DOJ on a range of district court legal matters involving ICE liability or challenging agency enforcement authorities, and works to achieve settlement of such matters, when appropriate, to mitigate agency legal and financial exposure.

OPLA Headquarters is also comprised of a number of legal divisions. These include the Commercial and Administrative Law Division (CALD), the Government Information Law Division (GILD), the Labor and Employment Law Division (LELD), and the Ethics Office.

FY 2014 Planned Activities

In FY 2014, OPLA will leverage the transition of its OCCs to full-service operations to provide a broad range of legal services to ERO and HSI clients. OPLA will provide the necessary training and support to OCCs to ensure this new model enhances the Chief Counsels' relationships with their SAC, FOD and their managerial staffs, and ensure that the OCC is fully engaged in, and current with, the legal issues, policies and procedures faced by HSI and ERO personnel in the execution of their duties. Additionally, OPLA will begin to leverage the enhanced capabilities of its new case management system to provide timely and accurate case and workload data. Further, OPLA will continue its efforts, in cooperation and coordination with the EOIR and U.S. Citizenship and Immigration Services (USCIS), to improve docket scheduling and recognize other efficiencies in immigration court with the goal of increasing the number of priority cases handled. Finally, OPLA will pursue improvements to the expeditious handling of cases involving alternate removal methods such as stipulated and reinstated orders of removal.

In FY 2014, OPLA will establish quantifiable performance measures in each of their core areas of service to assist in developing performance based budgeting.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, Immigration and Customs Enforcement (ICE) requests \$1,600.0 million, 8,317 positions, and 7,840 FTE for its Homeland Security Investigations (HSI) Domestic Investigations program to support the Department’s mission of disrupting and dismantling transnational criminal organizations.

Funding includes a net \$228.1 million Adjustment to Base decrease from FY 2012 and a net \$17.7 million programmatic decrease. The Adjustment to Base net decrease includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. Programmatic changes include the elimination of Domestic Investigation funding for the 287(g) program as part of a larger reduction and realignment of the program, and increases of \$4.1 million for commercial trade fraud investigations and \$7.3 million for human trafficking investigations. These three changes will be described in more detail in the programmatic change section.

Domestic Investigations will reduce spending by \$72.9 million through reductions to operations and efficiencies in the areas of servicewide reductions, service contracts, and travel, training,

fleet, PCS, and TDY. An additional \$72.9 million and 131 FTE will be reduced through attrition of non-mission critical staff, with only targeted hiring of the most critical positions.

Justification

Salaries (\$1,196.5 million)

HSI Domestic Investigations will maintain a staffing level of 7,840 FTE in FY 2014.

Expenses (\$403.5 million)

HSI Domestic Investigations will spend \$403.5 million on general expenses to support ICE's mission. This includes contractual support for wiretap and surveillance services, the purchase of equipment and supplies to maintain field operations at 26 Special Agent in Charge (SAC) offices nationwide, equipment for undercover operations, and travel related to pending investigations (i.e. travel to interview a victim of human trafficking).

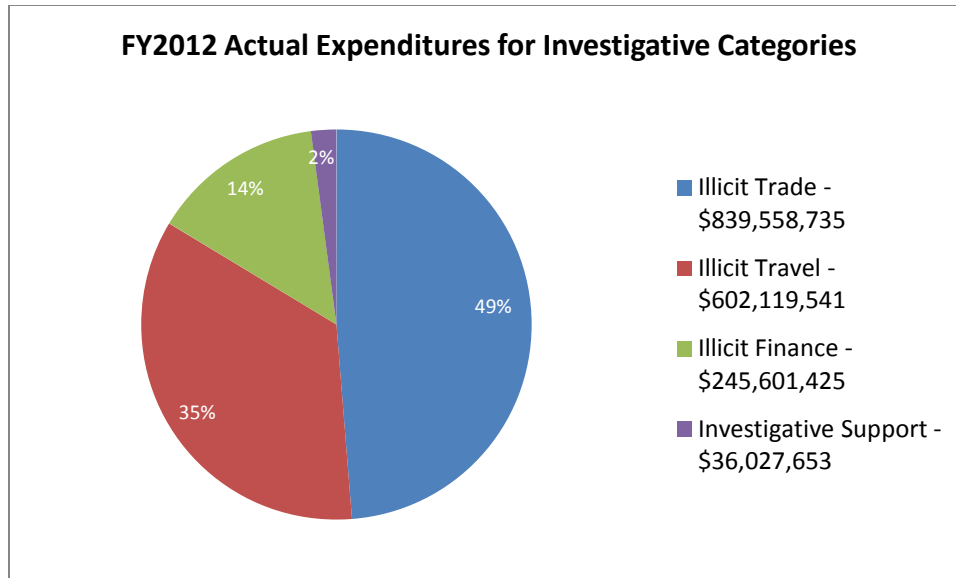

This also includes funding for the visa overstay activities of US-VISIT, which now reside within ICE. HSI Domestic Investigations will continue to provide leads to develop investigations of individuals who overstay their visas or potentially pose a threat to national security. ICE field operations use these leads to identify, locate, and remove aliens who have overstayed their visas and mitigate threats to national security by removing potential terrorists.

Description

The ICE HSI Directorate is a critical asset in the ICE mission, responsible for disrupting and dismantling transnational criminal threats facing the United States. HSI uses its legal authorities via its Domestic Investigations program to investigate immigration and customs violations such as human rights violations; narcotics; weapons smuggling and the smuggling of other types of contraband; financial crimes; cyber crimes; human trafficking; transnational gangs; child pornography; worksite enforcement; intellectual property violations; commercial fraud; export violations; and identity and benefit fraud. HSI conducts terrorism investigation as part of the Joint Terrorism Task Forces (JTTF) and also conducts national security investigations aimed at protecting critical infrastructure that may be vulnerable to sabotage, attack, or exploitation.

ICE is the largest federal contributor to the Joint Terrorism Task Force (JTTF) program and has Special Agents assigned to all 103 JTTFs nationwide. Since 2007, ICE agents assigned to JTTFs have made 1,266 criminal arrests and 2,134 administrative arrests.

As the principal investigative arm of DHS, HSI works closely with local, tribal, state, federal, and international law enforcement partners to ensure national security, public safety, and border security. HSI Domestic Investigations program expenditures fall into four broad investigative areas: Illicit Trade, Illicit Travel, Illicit Finance, and Investigative Support. A breakdown of spending between these four areas is shown below below.

Domestic Investigations has four Investigative Divisions

(1) National Security Investigations

- The National Security Unit (NSU) integrates ICE’s national security investigations and counterterrorism responsibilities in a single overarching umbrella unit. HSI Domestic Investigations Special Agents assigned to NSU employ a broad range of investigative techniques to identify, investigate and disrupt national security threats against the United States. For example, HSI investigates aliens who overstay non-immigrant visa terms and are involved in illegal activities such as the export of precursor chemicals, transnational criminal organizations, terrorism, drug smuggling, and money laundering. The NSU also oversees HSI Domestic Investigations’ participation in the JTTFs, which are charged with investigating, detecting, interdicting, prosecuting and removing terrorists and dismantling terrorist organizations.
- The Counter-Proliferation Investigations Program oversees a broad range of investigative activities related to the illegal obtainment of U.S. military products and sensitive technology, including weapons of mass destruction. HSI Domestic Investigations enforces U.S. laws involving the export of sensitive technologies, weapons, and controlled dual-use goods, as well as exports to sanctioned or embargoed countries.
- The Counterterrorism and Criminal Exploitation Unit (CTCEU) investigates non-immigrant visa status violators as well as visa overstays. An estimated 1.8 million non-immigrant aliens annually overstay or violate the terms of their authorized period of admission for economic, personal, and criminal reasons. The CTCEU collects data and leads from the Student and Exchange Visitor Information System (SEVIS), and the U.S. Visitor and Immigrant Status Indicator Technology

See
<http://www.ice.gov/news/library/factsheets/counter-proliferations.htm> for more information on the Counter Proliferation work ICE does.

(US-VISIT), to proactively develop investigations on those individuals who potentially pose a threat to public safety and national security.

- The Visa Security Analysis and Coordination (VSAC) Section is responsible for the strategic mandates of the Visa Security Program through the screening and vetting of visa applications under the authority of Section 428 of the Homeland Security Act of 2002. This includes the review of Visas Mantis Security Advisory Opinions (SAO) sought by the Department of State (DOS) on visa applicants who may pose potential threats related to the export of controlled sensitive technology or materials. It also includes the screening and vetting of visa applicants from certain high-threat Consular posts, as well as coordination with the intelligence community and law enforcement partners.
- The Human Rights Violator and War Crimes Unit oversees investigations involving torture; genocide; extrajudicial killings; recruitment of child soldiers; war crimes; extreme forms of religious persecution; and immigration and visa fraud where the underlying offense is based on substantive human rights abuses and war crimes. The unit's goal is to deny safe haven in the United States to human rights violators.

(2) Financial, Narcotics & Special Operations Investigations

The Financial, Narcotics & Special Operations Division oversees a wide variety of programs and special operations targeting transnational criminal organizations involved in money laundering, bulk

Since inception, BEST Units have initiated more than 8,680 cases with more than 10,285 criminal arrests and 6,570 administrative arrests. BEST Units have also seized more than 91,129 pounds of cocaine, 1,438 pounds of heroin, 889,824 pounds of marijuana, 4,514 pounds of ecstasy, and more than 4,709 pounds of methamphetamine. In addition, BEST Units have seized more than 14,325 weapons, 2,936,175 rounds of ammunition, 3,935 vehicles, and \$112.644 million in currency. See more at <http://www.ice.gov/best>.

currency smuggling, narcotics smuggling and other crimes investigated by HSI Domestic Investigations. These programmatic areas support the targeting of cross-border criminal organizations that exploit America's legitimate trade and financial systems for illicit purposes.

- ICE's 34 Border Enforcement Security Task Forces (BEST) units partner federal, state, local, tribal, and foreign law enforcement agencies together to combat illicit activities along the northern border, southern border, and at major seaports.
- Through the Illicit Finance & Proceeds of Crime Unit, HSI Domestic Investigations takes a systemic rather than a case-by-case approach towards investigating money laundering, illicit finance, and other financial crimes by looking at all the ways by which individuals and criminal organizations earn, move, and store their illicit proceeds. HSI Special Agents work with the private sector, regulatory agencies, domestic and foreign law enforcement as well as international organizations in order to build the capacity of all pertinent parties in the United States and abroad to identify and investigate complex money laundering schemes.
- The Trade Transparency Unit (TTU) addresses the exploitation of the international trade system, including its financial mechanisms to launder illicit proceeds. HSI Domestic Investigations analyzes trade and financial data to identify trade transactions and other information that do not follow normal patterns. HSI Domestic Investigations works with

international TTU partners to identify indicators of money laundering, customs fraud, contraband smuggling, as well as the evasion of duties and taxes. These international partnerships offer another means of linking global customs and law enforcement agencies to combat transnational crime.

- HSI Domestic Investigations leads the national Bulk Cash Smuggling Center (BCSC), an operational, intelligence driven investigative unit targeting bulk cash smuggling from both a national and international perspective. Bulk cash smuggling is one of the preferred methods used by all types of transnational criminal organizations to move their funds across borders, and the BCSC is focused on disrupting such facilitation pipelines used to move currency derived from illicit activities such as the smuggling of drugs, weapons and contraband as well as human trafficking and foreign political corruption.

(3) Transnational Crime and Public Safety Investigations

Transnational Crime and Public Safety Investigations oversees programs designed to identify, disrupt and dismantle significant organizations that smuggle or traffic humans into the United States, utilize transnational gangs that pose a threat to the health, safety and rights of our people, threaten our critical infrastructure, or defraud the United States.

- HSI Domestic Investigations targets identity and benefit fraud through 19 HSI-led Document and Benefit Fraud Task Forces situated across the country. Fraudulent documents, in terms of the immigration system, give an appearance of legitimacy and are primarily used by those illegally present in the U.S. for employment purposes. Benefit fraud is an extremely lucrative form of fraud that can enable terrorist and criminals to exploit the legitimate immigration process and obtain legal status in the United States. Both types of fraud damage the immigration system by undermining public trust and confidence in the system.
- HSI Domestic Investigations employs a comprehensive worksite enforcement strategy that addresses employers who knowingly hire illegal workers and creates a culture of compliance through the expansion of the ICE Mutual Agreement between Government and Employers (IMAGE) program, Form I-9 inspections and fines, and debarment.

What is IMAGE?

IMAGE is a voluntary partnership initiative between the federal government and private sector employers. The initiative is designed to foster cooperative relationships and to strengthen overall hiring practices. ICE developed this initiative as a new concept for employer self-compliance within the worksite enforcement program, through which employers can achieve a lawful workforce through self-policing of their hiring practices.

One of the successes of HSI's Human Smuggling and Trafficking efforts is the disruption of human trafficking organizations based in Tlaxcala, Mexico. Utilizing a multi-agency approach with DHS, DOJ, and FBI, 30 human trafficking victims have been identified with over 40 criminal indictments lodged against defendants located in the United States.

- HSI Domestic Investigations identifies human smuggling and human trafficking organizations, prioritizes investigations according to the degree of risk posed to national security and public safety, and coordinates field office investigations into those targeted organizations with the goal of eliminating their ability to function. HSI Domestic Investigations pursues these organizations under the auspices of the Extraterritorial Criminal Travel Strike Force (ECT) and

ICE Trafficking in Persons initiatives, as well as serving on human trafficking task forces across the country. By working closely with our partners, HSI Domestic Investigations moves aggressively to counter the vulnerabilities posed by human smuggling organizations, and works diligently to rescue the victims of human trafficking and bring to justice those that perpetrate these crimes.

- Given the rapid growth in transnational gang membership and the resulting increase in gang violence in both urban and suburban communities nationwide, HSI Domestic Investigations developed and implemented anti-gang initiatives focused on violent criminal activities and on crimes with a nexus to the border. HSI Domestic Investigations enforces immigration law in coordination with state, local, and tribal agencies to disrupt gang activity and to develop investigations against transnational street gang members resulting in charges under the Racketeer Influenced and Corrupt Organizations (RICO) and Violent Crimes in Aid of Racketeering (VICAR) statutes.

(4) Investigative Services

HSI Domestic Investigations' Investigative Services is responsible for providing investigative support functions to assist in ongoing criminal investigations. Investigative Services broad range of investigative support functions provides the field a wide array of services that contribute to the success of the HSI mission.

- The Undercover Operations Unit is responsible for providing guidance and oversight for all HSI Domestic Investigations undercover activity. The use of undercover operations allows the agency to combat threats posed by transnational criminal organizations through covert infiltration of these organizations by a specialized cadre of HSI Special Agents
- The HSI Domestic Investigations Forensic Laboratory is the only federal crime laboratory specializing in the scientific authentication and research of travel and identity documents. The Forensic Laboratory also conducts a variety of forensic, intelligence, and investigative support services for ICE, fellow Department components, and many other U.S. and foreign law enforcement agencies.

HSI Domestic Investigations also includes the following other areas:

In June 2010, the IPR Center launched Operation In Our Sites (IOS). IOS is an effort to combat the rampant use of the internet to distribute and sell counterfeit merchandise or provide counterfeit or pirated material. IOS identifies and targets internet domain names distributing and selling infringing goods and uses the legal avenues available to seize those domain names, pursue assets and criminally prosecute principals.

- The Cyber Crimes Center leads HSI's efforts to identify, disrupt, and dismantle criminal organizations engaged in criminal activity facilitated by the use of computers or cyberspace. The Cyber Crimes Center also provides operational training, guidance, and assistance to HSI offices located throughout the world.
- The National Intellectual Property Rights Coordination Center's (IPR Center) uses the expertise of its

21 partner agencies to share information, develop initiatives, coordinate enforcement actions, and conduct investigations related to intellectual property theft and commercial fraud, including the increasing health and safety risks posed by counterfeit products, predatory and unfair trade practices that threaten our economic stability or restrict the competitiveness of U.S. industry in world markets. ICE is the only federal agency that investigates predatory and unfair trade practices under Title 19 of the U.S. Code.

FY 2014 Planned Activities

In FY 2014, HSI Domestic Investigations will expend additional resources on commercial trade fraud and intellectual property rights investigations, including the \$4.1 million requested enhancement that will support those efforts. HSI’s focus in this area will be to enhance training and enforcement efforts; increase investigations of health and safety products; and continue to target criminals illegally importing and selling fraudulent consumer goods.

Domestic Investigations will fully operate the Export Enforcement Coordination Center (E2C2), established in FY 2012, as the primary focus for law enforcement agencies to coordinate and enhance export investigations, serve as a conduit to the intelligence community (IC) and licensing agencies, coordinate national outreach efforts, and establish integrated government-wide statistical tracking and targeting capabilities to support export enforcement.

Domestic Investigations will also continue efforts at the Child Exploitation Investigations Center and will serve as a central coordination point within HSI for federal, state, local, tribal, and foreign law enforcement agencies dedicated to combating the sexual exploitation of children.

Domestic Investigations will further promote and institutionalize the Extraterritorial Criminal Travel Strike Force initiative, as well as develop a plan to establish Trade Transparency Units in the Americas, Europe, Africa and Asia, which will enhance the original trade transparency concept from a bilateral to a multilateral approach. Domestic Investigations will also reinforce the use of “Knowingly Hire” and “Continue to Employ” laws against businesses that hire or continue to employ workers identified as unauthorized aliens and promote a culture of compliance through IMAGE.

<i>Enforcement Information Sharing (EIS)</i>	EIS is an umbrella program that supports the common goal of providing sophisticated bi-directional information sharing capabilities to the law enforcement community and DHS partners. EIS enhanced the information sharing web service and identified new external partners to further close the sharing capability gap so information can easily be shared across Federal, State, Local, and tribal law enforcement entities. EIS creates a centralized access point for ICE and other DHS task forces, agents, and analysts to conduct	

	investigations and identify non-obvious relationships among over 290 million records from 8 DHS data sources as well as access to over 14,000 law enforcement partners across the United States. EIS is currently in the Operations and Maintenance (O&M) phase.	
FY 2012 Activity Funding \$19,308 <i>SEVP</i>	FY 2013 Annualized CR Activity Funding \$31,647 <i>SEVP</i>	FY 2014 Activity Request \$39,840 <i>SEVP</i>
<i>Student & Exchange Visitor Information System (SEVIS I and II) (P)</i>	The Student and Exchange Visitor Program (SEVP) is a unit within ICE's Homeland Security Investigations (HSI) Office. The OCIO SDD FPS/SEVP IT Systems Branch provides IT services to HSI SEVP through current operations and maintenance of the Student and Exchange Visitor Information System (SEVIS). SEVIS is a web-based system that is used to collect, maintain, and provide current information on nonimmigrant foreign students, exchange visitors, and their dependents while in the United States. In cooperation with the DHS Acquisition Review Board (ARB), ICE will restructure and refocus SEVIS improvement and future modernization efforts to close vulnerabilities and identify and prioritize long-term systems operations and development needs and options.	
FY 2012 Activity Funding Total: \$17,493 \$3,183: HSI \$14,310: Automation Modernization	FY 2013 Annualized CR Activity Funding Total: \$15,318 \$8,808: HSI \$6,510: Automation Modernization	FY 2014 Activity Request Total: \$39,956 \$16,956: HSI \$23,000: Automation Modernization
<i>Law Enforcement Systems Modernization</i>	The ICE TECS Case Management Modernization (CM-M) program will deliver the primary tool for ICE's special agents including the ability to open/modify cases, view case dashboards, run case queries and enable internal auditing, as well as create Significant Case Reports and Electronic Surveillance Reports (ELSUR). More than 6,800 ICE special agents work on investigating a wide range of domestic and international activities arising from the illegal movement of people and goods into, within and out of the United States, grouped into multiple case management areas. The ICE TECS CM-M program will focus on implementing case management functionality in phases. Phase 1 will consist of Core Case Management functionality and discontinuing the use of the legacy TECS mainframe by the end of FY15. Phase 2 will consist of comprehensive case management. TECS supports the following Law Enforcement mission areas by: Combating illicit trade, illicit travel, and illicit financial activity Disseminating unclassified intelligence information across DHS and the Intelligence Community; Sharing law enforcement information with federal, state, local, tribal and international law enforcement agencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$7.2 million Adjustment to Base decrease from FY 2012 and a net \$7.2 million programmatic decrease. The Adjustment to Base net decrease includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. Programmatic changes include a plan to reduce ICE’s international footprint, a \$1.5 million increase for commercial trade fraud and a \$1.5 million increase for human trafficking investigations. These changes are described in more detail in the programmatic change section.

As part of ICE’s ongoing efforts to identify savings, OIA will reduce non-mission critical spending by \$5 million through efficiencies in the areas of servicewide reductions, service contracts, and travel, training, fleet, PCS, and TDY. An additional \$2.7 million and 15 FTE will be reduced through attrition of non-mission critical staff, with only targeted hiring of the most critical positions.

Justification

Salaries (\$46.5 million)

In FY 2014, HSI OIA will maintain a staffing level of 243 FTE, 199 of who are posted abroad in 48 countries.

QHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

1 Prevent Terrorism and Enhance Security

2 Protect the Borders Against Illicit Trade, Travel and Finance Target Drug Trafficking

Expenses (\$54 million)

In FY 2014, HSI OIA will fund general expenses to support ICE's international investigations and activities.

Description

The ICE Office of International Affairs conducts proactive international investigations overseas involving individuals and organizations responsible for the illegal movement of people, goods, and technology. OIA works with foreign counterparts to identify and combat transnational criminal organizations before they can adversely impact the United States. Special agents investigate human trafficking, child sexual exploitation, counter-proliferation, illegal arms trafficking, smuggling and immigration violations, intellectual property rights violations, commercial fraud, money laundering, bulk cash smuggling, and drug trafficking.

Operation Firewall is a bilateral joint task force between Attaché Mexico City special agents and the Government of Mexico to combat cross-border illicit currency flow and has led to over \$3.5 million in Mexican and Venezuelan seizures and over 71 arrests.

OIA Attaché offices around the world conduct law enforcement operations and provide investigative support to domestic offices in combating transnational crime. They support other U.S. government components and initiatives, refer requests from host country law enforcement agencies to appropriate U.S. agencies, and serve as advisor to U.S. missions. OIA provides training and conducts outreach to foreign officials and coordinates with foreign

counterparts to share information under negotiated bilateral agreements and mutual legal assistance treaties. OIA conducts and coordinates training for law enforcement officials through International Law Enforcement Academies (ILEAs). These offices are staffed by ICE agents, deportation liaison officers, and Foreign Service nationals who serve to enhance the investigative and administrative ability of our overseas offices with their bicultural and bilingual skills.

Through the use of dedicated Assistant Attachés for Removals (AARs) deployed at critical locations abroad, HSI OIA coordinates the return of removable aliens with host governments and facilitates transits and country clearances. In collaboration with ICE Enforcement and Removal Operations (ERO), AARs coordinate with host-country governments to return aliens who have final orders of removal. This coordination accelerates the removal process and reduces detention costs by reducing the number of detention days and daily bed expenses incurred before removal. The Department of State (DOS) benefits from HSI OIA support at U.S. embassies through assistance in sensitive removal discussions with receiving and transit countries. ICE and DOS engage with foreign governments to reinforce their commitment under international law to accept the return of their citizens, even as the number of returned criminals increases. HSI OIA works through problematic repatriation and removals by providing support for country clearances and then coordinating removals with the flight operations unit.

HSI OIA also furthers law enforcement coordination through the development of international agreements. HSI OIA coordinates international information sharing through the negotiation of Customs Mutual Assistance Agreements, mutual legal assistance treaties and other agreements as needed in cooperation with other U.S. agency partners. HSI OIA works with DOS and ERO to

negotiate and maintain removal agreements with foreign countries, and serves as a primary point of contact for all repatriation issues.

ICE implemented the Illicit Pathways Attack Strategy (IPAS) to combat transnational organized crime (TOC). IPAS extends operations beyond U.S. borders to stop the trade of illicit goods and people before they reach our shores, and dismantles and disrupts the networks and pathways used by TOCs

OIA is a key component of ICE's Illicit Pathways Attack Strategy (IPAS) to target, identify, and dismantle illicit networks and pathways utilized by transnational organized crime.

for weapons smuggling, money laundering, intellectual property theft, export of protected technology, and human trafficking and smuggling. IPAS targets the linked networks and pathways used by TOCs to move illicit goods, people and money across international borders by strengthening interagency cooperation with key law enforcement agencies and international partners such as CBP, the Department of Justice (DOJ), the Department of

Defense (DOD), the DOS, and Interpol as well as other international law enforcement. IPAS targets the infrastructure and profits generated by criminal organizations by attacking the pathways used for bulk cash smuggling and trade-based money laundering derived from highly sophisticated transnational criminal activities.

Through Transnational Criminal Investigative Units (TCIU) in host countries, IPAS builds international consensus, multilateral cooperation and partnerships to defeat organized crime. ICE coordinates the activities of the TCIUs in collaboration with foreign investigative counterparts, to deter, disrupt and dismantle transnational criminal organizations and individuals perpetrating a wide range of crimes including: human trafficking and smuggling, child labor and sexual exploitation, illegal arms trafficking, proliferation of sensitive technology, intellectual property rights violations, commercial fraud, money laundering, bulk cash smuggling, and narcotics trafficking.

Transnational Criminal Investigative Units (TCIUs) are special host country investigative units that assist ICE with investigations in source and transit countries. TCIUs are multi-disciplined units comprised of foreign prosecutors and law enforcement, customs, immigration, and intelligence officials who are "vetted to ensure that shared information and operational activities are not compromised.

HSI currently oversees 11 TCIUs in 10 foreign countries. The majority of these units are located in Mexico, Central America, and South America.

HSI OIA is continuing to pursue collaborative international strategies to:

- Establish and strengthen information sharing with receiving countries to provide ample lead time to prepare a re-orientation;
- Identify third-party international and non-governmental organizations to help in the transition of criminal aliens returning to their country of origin through ICE Attachés;
- Participate in multilateral forums with partner countries to discuss alien removal issues (e.g., Four Country Conference, Regional Conference on Migration, Shared Border Accord Coordinating Committee, and others);
- Provide additional training for ICE representatives overseas to increase the number of subject matter experts to deal with complex removal issues worldwide; and
- Expand the use of the Electronic Travel Document (eTD) system to reduce travel document issuance times, thereby reducing the average length of stay and bed costs.

FY 2014 Planned Activities

In FY 2014, HSI OIA will continue to explore methods to improve efficiency by reviewing current processes and procedures as well as potential for cost savings. The \$3.0 million enhancement request will fund transnational commercial trade fraud and human trafficking investigations conducted by TCIUs.

HSI OIA's investigative resources at the Southwest Border will continue to address violence along the U.S./Mexico border and focus on cross-border threats in the region, including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, and transnational criminal gangs.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$2.3 million Adjustment to Base decrease from FY 2012, which includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies.

As part of ICE’s ongoing efforts to identify savings, VSP will reduce non-mission critical spending by \$2.0 million through efficiencies in the areas of servicewide reductions, service contracts, travel, training, fleet, PCS, and TDY. An additional \$800,000 and 4 FTE will be reduced through attrition of non-mission critical staff, with only targeted hiring of the most critical positions.

Justification

Salaries (\$14.9 million)

In FY 2014, VSP will maintain a staffing level of 61 FTE.

Expenses (\$16.7 million)

In FY 2014, VSP will spend \$16.7 million on general expenses to support ICE’s Visa Security Program at headquarters and 20 overseas posts, including one new post opened in FY 2013.

Description

The VSP represents ICE's front line in protecting the United States against terrorists and criminal organizations by preventing foreign nationals, who pose as a threat to national security, from entering into or residing within the United States. The VSP will continue to identify and close vulnerabilities in our immigration and customs processes to prevent exploitation by those who present serious threats to national security. In addition, the VSP will prioritize the continued modernization of the IT capability for screening visa applications and expansion of VSP coverage at overseas high-risk visa adjudication posts.

HSI Special Agents assigned to the VSP program work closely with the DOS and take a hands-on approach in conducting visa security activities at 20 overseas posts. These activities include, but are not limited to, examining visa applications for fraud; initiating investigations; coordinating with law enforcement partners; and providing law enforcement training and advice to U.S. consular officials.

Many visa security screening activities involve face-to-face interaction and on-the-ground follow-up which can only be conducted overseas. HSI agents assigned to the VSP program follow up on investigative leads by coordinating with foreign government law enforcement agencies to verify a visa applicant's true country of origin; identify any criminal arrests, convictions, or potential affiliations with terrorist or criminal organizations; confirm any derogatory information found during data screening; and substantiate recommendations to deny visas to high risk individuals or "clear" eligible applicants incorrectly associated with such derogatory information.

The VSP seeks to identify terrorist or criminal threats by conducting targeted, in-depth vetting of individuals who apply for U.S. visas overseas. The Security Advisory Opinion Unit (SAOU) of the VSP participates in the interagency checks of visa applicants by conducting checks of derogatory information on visa applicants and liaising with other participating agencies to coordinate a unified visa determination. The VSP and SAOU foster coordinated decision-making and provide classified research assistance across both DHS and DOS to utilize law enforcement expertise and analysis in order to maximize the efficiency of the visa process.

In addition to determining whether a given applicant is eligible for a visa, vetting by ICE special agents generates additional law enforcement value, including:

- *Creation of watch-list records;*
- *Identification of new terrorist tactics or fraud schemes;*
- *Generation of intelligence products;*
- *Revocation of fraudulent petitions; and*
- *Initiation of investigations leading to arrest, seizure, prosecution.*

ICE's presence overseas via the VSP is vital to protecting the United States and its resources from harm and exploitation. ICE maintains interactive relationships with foreign law enforcement counterparts to combat and disrupt the efforts of transnational criminal organizations before they adversely affect the United States. ICE agents interview applicants on site to review identity and application documents for authenticity.

ICE has developed a list of high-risk visa-issuing locations collaboratively with State to guide future deployments and expansions of VSP personnel postings. Deployment schedules are dependent on DOS approval and other factors such as scheduling site visits to plan and coordinate facilities build out of communications; securing government housing or DOS-approved leased housing; procuring and deploying armored vehicles and other specialized equipment; recruiting and staffing ICE positions

including foreign nationals; coordinating specialized training; identifying educational requirements for dependents of ICE agents; and scheduling PCS deployment of staff and families from the United States. VSP posts become fully operational when all infrastructure/IT systems are in place and all staff are deployed overseas.

FY 2014 Planned Activities

VSP will continue to use IT solutions to increase ICE’s efficiency in screening, vetting, and recording visa applications. ICE aims to increase screening capabilities by enhancing the existing PATRIOT technology to cover all visa issuing posts worldwide. PATRIOT is a collaborative screening technology/procedure developed in partnership with CBP, DOS, and the National Counterterrorism Center. This modernization effort will enable all HSI Attaché offices to perform visa security operations.

The VSP is establishing IT connectivity with CBP and DOS to automate links between DHS and DOS systems. This interface would allow for visa applications to be screened through the CBP’s Automated Targeting System-Passenger (ATS-P) resulting in 100 percent visa screening.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$6.1 million Adjustment to Base decrease from FY 2012 which includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies.

As part of ICE’s ongoing efforts to identify savings, Intelligence will reduce non-mission critical spending by \$3.5 million through efficiencies in the areas of servicewide reductions, service contracts, and travel, training, fleet, PCS, and TDY. An additional \$3.3 million and 18 FTE will be reduced through the attrition of non-mission critical staff, with only targeted hiring of the most critical positions.

QHSR Alignment

1.1 Prevent Terrorists Attacks

ICE Strategic Plan Alignment

1.2 Remove Individuals Posing a Security Threat

Justification

Salaries (\$52.1 million)

In FY 2014, HSI Intelligence will have a staffing level of 368 FTE.

Expenses (\$23.3 million)

In FY 2014, HSI Intelligence will fund general expenses to support intelligence activities and lead ICE emergency preparedness and response efforts.

Description

The Office of Intelligence develops, processes, analyzes, and disseminates relevant and timely information and intelligence needed to support executive management and investigative units. Information is gathered to identify threats, patterns, trends, methods, and organizations related to transnational crimes. This information supports law enforcement efforts and investigations across ICE, DHS and many levels of government.

HSI Intelligence establishes and disseminates guidance, analytic tools, intelligence training standards; coordinates with DHS, the U.S. intelligence community, and U.S. and foreign law enforcement intelligence partners; produces strategic intelligence assessments in support of agency and department decision makers; and manages the Joint Intelligence Operations Center (JIOC) to provide 24x7 situational awareness for ICE. HSI Intelligence also manages the ICE National Emergency Management Division, leads all ICE emergency planning and response efforts, and operates the Classified Connectivity Program Management Office (CCPMO) to deploy classified data connectivity throughout ICE.

The primary tool used by HSI Intelligence to collect information and conduct analysis is the Intelligence Fusion System (IFS). IFS is a comprehensive analytical and investigative tool to access and analyze large volumes of data from sources such as the Enforcement Apprehension Booking Module (EABM), US-VISIT Automated Biometric Identification System (IDENT), portions of TECS, Student Exchange Visitor Information System (SEVIS), Intelligence Reporting System (IRS), Significant Event Notification (SEN) system, and digitized content obtained from Intelligence Document Exploitation (IDocX). The IFS database includes indexed names, subject records, and investigative and intelligence reports, as well as global intelligence information on topics that include smuggling, terrorism and transnational trends.

HSI Intelligence responds to needs based on formal and ad hoc requests by investigative units and other intelligence customers within ICE and DHS, and from the intelligence and law enforcement communities, and in support of the following programmatic areas:

- Southwest Border, where HSI Intelligence provides a wide spectrum of intelligence support to enforcement entities on the Southwest Border, including state, tribal, local, and other federal law enforcement and Intelligence Community (IC) partners. These efforts support ICE's surge in law enforcement personnel and activity to deal with increased Southwest Border violence and are managed by the Southwest Border Intelligence Coordination Section of HSI Intelligence.

- Human Smuggling and Public Safety, focuses on human smuggling and trafficking in persons, immigration benefit fraud, and threats to public safety emanating from transnational street gangs and other criminal aliens.
- Contraband Smuggling, provides intelligence to assist in the disruption of activities related to international trafficking of narcotics and other prohibited goods.
- Illicit Finance and Trade Fraud, involving illicit movements of money or financial instruments, and other commerce-related crime issues such as international trade violations, protection of intellectual property rights, and public health threats that cross our borders.
- Counter-Proliferation Intelligence, focusing on the identification and disruption of individuals and organizations involved in the unauthorized movement and procurement of critical technology, dual-use goods, chemical, biological, radiological, nuclear/conventional weapons, and unauthorized U.S. exports to prohibited countries.

The Human Smuggling and Public Safety Unit within the Office of Intelligence engages in multi-agency partnerships including government entities such as the DOJ, Central Intelligence Agency (CIA), and National Security Agency (NSA) to identify and repair international travel vulnerabilities exploited by criminal travel networks.

HSI Intelligence performs its mission through the following functional areas:

- Intelligence Collection and Operations Division identifies and addresses information gaps and collection challenges, influences intelligence community collection priorities and resources, and facilitates the rapid and responsible sharing of time-sensitive information. This division manages the ICE JIOC, a 24x7 situational awareness center, and the ICE Reports Officer program that identifies and shares law enforcement information of intelligence value with partner agencies in the U.S. and select foreign location.
- Analysis Division uses all source information to conduct complex analysis on information that potentially affects ICE operations and DHS components, as well as our federal, state, local, tribal and international law enforcement partners. The division develops strategic level intelligence assessments to support ICE-wide decision making. Although focused on the ICE

mission, these assessments are of interest to the broader law enforcement and intelligence communities and are routinely shared with these partners.

- Intelligence Mission Management Division coordinates HSI Intelligence’s programmatic planning efforts and engagement with ICE field offices, the DHS Intelligence Enterprise, and other key partners. The division manages the HSI Intelligence production and dissemination process, proactively coordinates with HSI SAC Intelligence Program offices, and manages ICE’s secure data connectivity program.

- The National Emergency Management Division leads all ICE emergency planning and response efforts. The division coordinates with 27 ICE program offices to plan for possible incidents, train, and conduct exercises. The division is responsible for ensuring that the ICE Alternate Operating Facility is always prepared to support a contingency.
- Illicit Pathways Attack Strategy (IPAS) on Western Hemisphere human smuggling, ICE has created an IPAS Intelligence Unit within the HSTC to enhance intelligence and information sharing across agencies and with key international partners. The unit supports investigations focused on high risk transnational criminal networks and pathways used by smuggling and trafficking organizations. See <http://www.ice.gov/ipas/> for more information.
- Human Smuggling and Trafficking Center (HSTC) supports greater integration and overall effectiveness in the U.S. government's efforts to combat human smuggling and trafficking in persons, and clandestine terrorist travel. The HSTC brings together federal agency subject matter experts from policy, law enforcement, intelligence, and diplomatic arenas to work together and leverage expertise and authorities to address these global threats.

FY 2014 Planned Activities

In FY 2014, the HSI Intelligence will support the increase in focus by Domestic Investigations on Commercial Trade Fraud investigations, and will continue to support the Administration's strategy to combat Transnational Criminal Organizations at the Human Smuggling and Trafficking Center. The Office will focus on enhancing analytic techniques, dissemination capabilities, product quality, and training provided to ICE intelligence analysts. Finally, other key activities will include developing and satisfying strategic, operational, and tactical collection strategies aimed at gathering intelligence that satisfies national requirements, maintaining global situational awareness to receive, coordinate, and disseminate classified and unclassified information, and facilitating the exchange of law enforcement and national intelligence, and participating in any National Level Exercise for emergency preparedness.

Total Change 2012 to 2014	(114)	(502)	(205,743)

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$1,844.8 million, 5,089 positions, and 4,471 FTE for the Custody Operations program within ERO to fund 31,800 detention beds and related operations.

Funding includes a net \$104.4 million Adjustment to Base decrease and a net \$101.3 million programmatic decrease. The Adjustment to Base net decrease includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. Programmatic changes include decreased detention bed funding to support 31,800 beds instead of 34,000, reductions to adjust funding for the 287(g) program to align with CAP’s management of the program in FY 2014, and a transfer of \$36.4 million and 238 FTE from Secure Communities to Custody Operations due to the completion of nationwide interoperability deployment. These changes are described in more detail in the programmatic change section.

As part of ICE’s ongoing efforts to identify savings, Custody Operations will reduce non-mission critical spending by \$57.7 million through efficiencies in the areas of servicewide reductions, service contracts, travel, training, fleet, PCS, and TDY. \$58.9 million and 326 FTE will be reduced through non-

OHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Associated HPPG Measures

Average length of stay in detention of all convicted criminal aliens prior to removal from the United States.

Estimated average bed cost per day.

Associated GPRA Measures

Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection.

mission critical staffing reductions achieved through attrition, and by only allowing targeted hiring of the most critical positions.

Justification

Salaries (\$606.3 million)

Custody Operations will have a staffing level of 4,471 FTE in FY 2014.

Expenses (\$1,238.5 million)

In FY 2014, ICE will maintain 31,800 detention beds at an average rate of \$119.00/day and an average length of stay (ALOS) of 34.5 days for criminal aliens. Of the 31,800 beds, 29,314 beds are funded through the Custody Operations PPA and 2,486 beds are paid for from fee sources (Breached Bond Detention Fund and Immigration Inspection User Fees).

The requested level of 31,800 detention beds allows ICE to ensure the most cost-effective use of Federal dollars by focusing the more-costly detention capabilities on priority and mandatory detainees, including individuals who pose a danger to national security or a risk to public safety, with particular emphasis on violent criminals, felons, and repeat offenders. This strategy allows ICE to place low-risk, non-mandatory detainees in lower cost alternatives to detention programs, such as electronic monitoring and intensive supervision.

Description

ERO provides policy guidance for and oversight of the administrative custody of a highly diverse alien detainee population. ERO manages these detention operations as efficiently and effectively as possible to provide for the safety, security, and appropriate care of aliens in its custody.

Bed Space Management

ERO acquires and manages detention capacity in three facility types:

- ***Inter-Governmental Service Agreements (IGSAs)***. ICE obtains detention bed space through inter-governmental service agreements with state and local governments and through an agreement with the Federal Bureau of Prisons. Approximately 70 percent of ICE's detained population is housed at IGSA facilities with an average daily population of 23,907 for FY 2012. There are approximately 244 IGSAs in 50 states as of February 2013. Detention bed space at most non-dedicated IGSA facilities is not

Florence, AZ Service Processing Center

guaranteed. Their bed space availability is generally based on state and local county populations and, as their local populations fluctuate, so do the beds available for ICE.

- ***Service Processing Centers (SPCs)***. ICE owns and operates six secure detention facilities, called Service Processing Centers, located in Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Los Fresnos, Texas; and Miami, Florida. The SPCs are dedicated facilities housing roughly 11 percent of the detained population with an average daily population of 3,734 for FY 2012. Using SPCs provides ICE with complete control over who is accepted into the facility and bed space availability is not dependent on a third party. Unlike IGSA facilities where the provision of administrative space is not standard, SPCs serve additional functions beyond that of detention and provide office, courtroom, and processing space.
- ***Contract Detention Facilities (CDFs)***. ICE utilizes seven contract detention facilities to house approximately 17 percent of ICE's detained population with an average daily population of 5,885 for FY 2012. These facilities are located in Aurora, Colorado; Broward County, Florida; Elizabeth, NJ; Houston, TX; Pearsall, Texas; San Diego, California; and Tacoma, Washington. While not owned by ICE, CDFs are operated solely by private industry vendors for ICE purposes, and like SPCs, offer ICE substantial control over bed space. Under one current initiative, to the maximum extent possible, ICE is identifying and prioritizing the use of detention facilities with tiered rate structure per diems that offer cost reductions as the level of detained aliens increase. Going forward, ICE plans to negotiate tiered rate terms with private contractors in locations that are geographically and operationally feasible according to ICE detention requirements.

FY 2005 – FY 2012 figures represent the actual average daily population maintained by ICE during the fiscal year. FY2013 represents the number of beds funded under the annualized FY 2013 Continuing Appropriations Act (P.L. 112-175). FY 2014 is the number of beds funded under the President’s Budget.

Detention Bed Costs

The cost of detaining an alien for a single day varies by region and facility type. The bed cost has several components, including all expenses incurred for direct detention bed acquisition, detention guard services, meals provided to detainees, welfare items, detainee health care and indirect costs such as overhead costs and facility maintenance.

The most significant detention cost driver is the *Average Length of Stay (ALOS)* for an alien before his or her final removal. ALOS is computed from the length of detention for aliens in ICE custody, to include the adjudication process and any appearance before EOIR, leading to a final order. Based on FY 2012 data, criminal aliens take 11 days longer to process than non-criminal aliens.

The criminal alien Average Length of Stay was 31.9 days for FY 2012 compared to 34.7 days in FY 2011.

ICE continuously works with EOIR to expedite the legal review with full regard for due process while targeting a reduction in the ALOS. ICE is exploring the possibility of a DHS and DOJ cross-agency “performance partnership” to test specific initiatives that will promote efficiencies in the immigration court process and significantly reduce ALOS and alien processing expenses. Currently, in certain localities, ICE and EOIR have developed pilot projects to establish formal expedited dockets, specifically for ATD cases. Additionally, ICE and EOIR are piloting a “Smart Prosecution” Program where merits cases on a non-detained docket set out five to six weeks are reviewed and, generally, ICE is able to narrow the contested issues of those cases to where the courts are able to handle them on an

expedited basis. ICE also meets with EOIR regularly to discuss the suitability and effectiveness of the individual initiatives for broader implementation.

Average Length of Stay: FY 2009 – FY 2012

Fiscal Year	ALOS		
	Criminal	Non-Criminal	Total
2009	41.0	25.8	31.3
2010	36.6	25.9	31.5
2011	34.7	22.7	29.2
2012	31.9	20.5	26.6

Healthcare

Primary healthcare for detainees is managed by the ICE Health Service Corps (IHSC) within ERO through comprehensive health screening and the provision and oversight of direct patient care services to the detainee population. IHSC is working on several initiatives focused on improving health care services provided to detainees while enhancing health care operational capabilities and strengthening accountability and decision making processes based on credible data.

- **Field Medical Coordinators.** In FY 2012, IHSC implemented a Field Medical Coordinator (FMC) initiative to better manage and oversee health care provided to detainees in non-IHSC staffed facilities. IHSC will supplement staff at the 24 ICE Field Offices with a qualified FMC that will provide consultation advice to ICE Field Office Directors on medical issues within their Area of Responsibility (AOR). During FY 2012, IHSC developed guidance as to how the coordination of medical oversight beyond that of IHSC-staffed facilities is to take place. FMC’s have been assigned to all field offices.
- **Mental Health.** In FY 2012, IHSC initiated development of the first transitional mental health unit at the Krome, FL SPC. The unit will address the mental health needs of detainees not requiring a full hospitalization, but who have medical conditions significant enough to avoid housing in the general population with other detainees. The unit is expected to be ready for operation by the end of the third quarter of FY 2013.
- **Electronic Health Records.** ICE has been developing a comprehensive health records system (eHR) to improve the delivery and recording of care to detainees and to enhance communication among facilities. Benefits of eHR include:
 - Rapid access to patient records without having to request them from previous institutions;
 - Access to more complete medical records that are sometimes not provided in transfer;
 - Eliminates unnecessary testing;
 - Complete patient record availability to multiple providers who can access the record simultaneously;

- Quick identification of possible adverse outcomes due to known allergies and alerts to prevent drug-to-drug interaction; and
- Real time access to medical personnel when the detainee is transferred to another facility.

ICE awarded a vendor contract in September 2012 to begin development of the electronic health records system. The development phase is expected to be completed within 12 months with initial operating capabilities at headquarters and two initial clinic sites by summer 2013.

Detention Standards Compliance Oversight

Through a robust inspections program, ICE ensures detention facilities used to detain aliens in immigration proceedings or awaiting removal to their countries do so in accordance with ICE national detention standards. National standards are tailored to meet the unique needs of ICE's detainee population, with a focus on quality medical care, access to counsel, visitation, religious practices, language translation and interpretation, and other detainee services.

In 2010, in response to an ICE initiative on Immigration Detention Reform, ERO established an on-site Detention Compliance Oversight Program (also known as the Office of Detention Oversight, ODO) that complements the inspections program. This on-site program consists of 40 Detention Service Managers (DSMs) who are posted at key ICE detention facilities to provide "daily review" of facility compliance to ICE's standards and resolve facility issues and concerns. In many cases, problems and issues are remedied "on the spot" by DSMs. In other instances, the DSMs collaborate with the local field office staff to generate and implement remedial plans. In addition, the DSMs also ensure corrective actions are taken to address deficiencies identified by ODO and other oversight entities, such as the Office for Civil Rights and Civil Liberties. These on-site managers are vital in contributing to a reduction in detainee grievances, improved standards compliance, and an increase in the overall final ratings. As of the close of FY 2012, there were 51 total facilities under the purview of the program comprising over 80 percent of ICE's average daily detention population.

Ninety-seven percent of ICE detention facilities received an inspection rating of acceptable or greater during the annual review. Facilities found not to be in compliance with the standards were afforded an opportunity to correct the identified deficiencies. When deficiencies are not correct, ICE removes all detainees under its custody from a facility and refrains from utilizing the facility until such time that it is brought into compliance with ICE detention standards.

Detention Reforms

Detention reform is an ongoing initiative to tailor the conditions of immigration detention to its unique purpose. The present immigration detention system grew at an unprecedented rate over the past 15 years. Many of these facility beds are jails designed for penal - not civil - detention. ICE has a series of comprehensive detention reforms underway designed to ensure that detention conditions are safe, secure, and humane including:

- **Revised Detention Standards.** In February 2012, ICE released its newest national detention standards, known as the 2011 Performance-Based National Detention Standards (PBNDS)

2011). The revised standards improve medical and mental health services, increase access to legal services and religious opportunities, improve communication with detainees with limited English proficiency, and improve the process for reporting and responding to complaints, and increase visitation. Implementation of PBNDS 2011 will be a multiyear process involving contract modifications with priority being given to those facilities housing the largest population of ICE detainees.

- **Development of Risk Classification Assessment.** ICE is moving towards nationwide deployment of a new automated Risk Classification Assessment (RCA) that will improve transparency and uniformity in detention custody and classification decisions, aid in identifying vulnerable populations, and promote the prioritization of detention resources. The RCA contains objective criteria incorporating factors reflecting the agency’s civil enforcement priorities and any special vulnerabilities that may impact custody and classification determinations to guide the decision-making of ICE officers and their supervisors regarding whether an alien should be detained or released, and, if detained, the alien’s appropriate custody classification level.
- **Development of New Detention Facilities.** In March 2012, ICE opened the Karnes County Civil Detention Center in Texas, the first facility designed and built based on ICE’s civil detention reform principles. The facility features innovative and cost-effective designs and new approaches to construction materials, staffing, and operations, plus greater freedom of movement, contact visitation, and medical and mental health services. New facilities have also been completed in the Los Angeles and Newark field offices’ Areas of Responsibility (AOR) to offer improved conditions of confinement for low-risk detainees. Those facilities are Adelanto for Los Angeles and Delaney Hall for Newark. In addition, the Essex facility in the Newark AOR was also expanded.
- **Reduction in Detainee Transfers.** ICE has made great strides in reducing long distance transfers of detainees by increasing detention capacity where it is most needed. This ensures that detainees can remain close to their families and attorneys, and also prevents disruptions to ongoing immigration proceedings, which has the effect of lengthening an alien’s detention. In January 2012, ICE issued a Transfer Directive that builds on the successful reduction of long-distance transfers, by ensuring that when transfers are necessary, they are prioritized to minimize the long-distance transfers of detainees with family members, local attorneys, or pending immigration proceedings in the area where they are detained.

New Enforcement and Oversight Activities

Prosecutorial Discretion Authority

“Prosecutorial Discretion” allows ICE to ensure that its immigration enforcement resources are focused on the removal of those aliens who constitute our highest priorities, specifically individuals who pose a threat to public safety such as criminal aliens and national security threats, as well as repeat immigration law violators and recent border entrants. Allowing immigration and Federal judges to more swiftly adjudicate high priority cases frees up resources that DHS and DOJ can dedicate to further enhance the identification and removal of those individuals who pose a threat to public safety.

In part, the process allows ICE to identify and accelerate the removal of high priority aliens from the United States.

Within ERO, prosecutorial discretion may be exercised when deciding whether to: issue a detainer; initiate removal proceedings; focus enforcement resources on particular violations or conduct; question, or arrest a particular person; detain or release someone on bond, supervision, or personal recognizance; settle or dismiss a removal case; stay a final order of removal; and/or execute a removal order. Examples of the exercise of prosecutorial discretion in the immigration context include a grant of deferred action; a decision to terminate or administratively close removal proceedings; a stay of removal; or a decision not to issue a charging document in the first place.

On June 15, 2012, DHS Secretary Napolitano issued a memorandum laying out five criteria on the exercise of “prosecutorial discretion with respect to individuals who came to the United States as children.” Since implementing this policy, ICE has reviewed over 1,900 pending and new cases to determine who may qualify for deferred action under this memorandum.

Prior to the June 2012 memo, in June 2011, based on a memorandum issued by ICE Assistant Secretary Morton, ICE initiated its own review of the existing 300,000 case backlog with EOIR. As a part of this review ICE found approximately 20,000 cases, primarily on the non-detained docket that did not meet priorities. By administratively closing these cases and freeing up the docket space for higher priority aliens, ICE estimates cost efficiencies of almost \$8.0 million in non-detained case processing requirements.

Creation of Public Advocate for Immigration Enforcement and Detention

In February 2012, ICE created the position of Public Advocate, which incurred no new net costs. The Public Advocate reports directly to ICE’s Executive Associate Director of ERO and works to promote greater community interaction and understanding regarding immigration enforcement policies, programs and procedures. The Public Advocate has four primary responsibilities:

- *Assisting* individuals and community stakeholders in addressing and resolving complaints and concerns in accordance with agency policies and operations, particularly concerns related to ICE enforcement actions involving U.S. citizens;
- *Informing* stakeholders on immigration enforcement policies, programs, and initiatives to ensure an accurate understanding of ICE’s mission and core values;
- *Engaging* stakeholders and building partnerships to facilitate communication, fostering collaboration, and soliciting input on immigration enforcement initiatives and operations; and
- *Advising* ICE leadership on stakeholder findings, concerns, recommendations, and priorities as they relate to improving immigration enforcement efforts and activities.

Regular communication between ICE and community stakeholders ensures that accurate information on ERO practices, policies, and procedures is relayed in an effective and efficient manner.

For community outreach to be effective there must be engagement and coordination at both the national and local level. To support this, there are 24 Public Advocate field liaisons, which correspond to ICE ERO field offices that maintain full national coverage. These dedicated liaisons are in the best

position to directly resolve issues and concerns regarding ERO practices, policies, and procedures on a local level.

FY 2014 Planned Accomplishments

- Maintain an average daily population of 31,800 illegal aliens in detention facilities.
- Achieve an estimated average bed cost of \$119.00 per day.
- Achieve a 95% compliance rate with the national detention standards by receiving an inspection rating of acceptable or greater on last inspection.
- Have initial eHR capability at all IHSC-staffed facilities by summer 2014.

Total Change 2012 to 2014	(40)	(78)	(28,826)

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$29.1 million Adjustment to Base decrease from FY 2012 which includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. This decrease also includes a \$15 million reduction that was part of the FY 2013 rightsizing of the ERO programs where funding was shifted to adequately and accurately fund positions where they belonged. A programmatic increase of \$250,000 will fund additional fugitive operations.

As part of ICE’s ongoing efforts to identify savings, Fugitive Operations will reduce non-mission critical spending by \$23.5 million through efficiencies in the areas of service wide reductions, service contracts, and travel, training, fleet, PCS, and TDY. \$7.2 million and 40 non-mission critical FTE will be reduced through staffing reductions achieved through attrition, and by only allowing targeted hiring of the most critical positions.

OHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Justification

Salaries (\$100.4 million)

NFOP will have a staffing level of 660 FTE in FY 2014.

Expenses (\$25.3 million)

NFOP will fund the Fugitive Operation Support Center (FOSC), which analyzes the outstanding cases of U.S. fugitive aliens and the at-large criminal alien population as recorded in the Enforce Alien Removal Module (EARM) in order to assist NFOP in locating aliens or determine that a case should be closed.

A fugitive is defined as any alien who has failed to leave the U.S. following the issuance of a final order of removal, deportation or exclusion, or has failed to report to ICE after receiving notice to do so.

Description

The NFOP identifies, locates, and arrests fugitive aliens, aliens that have been previously removed from the United States, removable aliens who have been convicted of crimes, as well as aliens who enter the United States illegally or otherwise defy the integrity of our immigration laws and border control efforts or otherwise present a public safety threat. NFOP teams plan and conduct complex investigations on fugitive cases, giving priority to fugitive criminal aliens and cases that pose a threat to public safety.

The NFOP utilizes the same methods and techniques to locate and arrest these priority targets as with the location and arrest of immigration fugitives. These cases are prioritized based on criminality and threat to public safety.

Fugitive Operations Teams (FOTs)

Each of the 24 ICE Enforcement and Removal Operations (ERO) field offices has at least one operational Fugitive Operation Team (FOT). In total, ERO has 129 FOTs, that are operational and conducting enforcement activities across the United States. Enforcement activity involves analysis and cross-referencing of records; surveillance; investigative interviews; liaising with federal, state and local public safety agencies as well as foreign government representatives; administration of subpoenas; and execution of both administrative and criminal warrants to make arrests.

The NFOP was launched in 2003 with eight FOTs nationwide. Today, ICE has 129 FOTs deployed nationwide.

Actions to remove fugitives include: physical arrests; detainers placed on individuals located in a federal, state or local facility; docket management including case category changes that result in a fugitive being removed from the backlog; and case closures.

Operations Return to Sender, Secure Streets and Cross Check are the primary enforcement operations utilized by the FOTs. These operations along with other specialized initiatives such as the Sex Offender Alien Removal (SOAR) operations, the Criminal Alien Removal Initiative, the Joint Effort

initiative, and INTERPOL's 'Far Away' program have allowed the NFOP to attain the highest criminal arrest percentage since the inception of the program. In FY 2012, FOT's achieved a 65 percent criminal arrest rate, the highest since the inception of the program.

ERO St. Paul - CARI Arrest - On June 14, 2012, ERO St. Paul arrested Chanh Inthavong, a citizen of Laos, and lawful permanent resident, who has convictions for Manslaughter, Criminal Sexual Conduct, Offering a Forged Check, and Domestic Assault.

- *Criminal Alien Removal Initiative (CARI):* CARI is a long-term endeavor to focus the investigative targeting efforts of ERO FOTs on locating and arresting serious criminal aliens (Secure Communities Level 1 and 2) in order to increase criminal removals from the United States.

- *Operation Return to Sender* is an initiative that applies an organized and methodical approach to the identification, location, and arrest of fugitives. The operation combines Fugitive Operations resources with other federal, state and local law enforcement entities. In FY 2012, in line with ICE priorities, FOT's shifted focus from Return to Sender operations to Operation Cross Check and the CARI. Despite this shift, FOTs still arrested 1,727 aliens under Operation Return to Sender.

- *Operation Secure Streets* is an initiative to locate and arrest aliens who have been convicted of violations involving operating a motor vehicle while under the influence. FOTs arrested 249 aliens under Operation Secure Streets in FY 2012.

- *Operation Cross Check:* Operation Cross Check serves as the operational umbrella for all other focused enforcement efforts that target other specific alien populations, such as at-large criminal aliens. The nature of an Operation Cross Check effort may be predicated on national events or situations unique to a particular AOR, requests by ICE counterparts or other agencies, or directives from an ERO component.

- *Joint Effort:* The Joint Effort initiative combines the resources and expertise of ICE ERO with local law enforcement agencies to help make communities safer. The purpose of this initiative is to arrest fugitive aliens, including criminal aliens, and previously removed aliens. Working in a support role to local law enforcement, ERO responds to situations where there is believed to be a criminal and immigration nexus, and determines the proper course of action. FOT members are encouraged to interact with other law enforcement agencies and task forces to foster cooperative relationships and contribute to the enhancement of ERO's mission, such as the building of partnerships through this initiative.

- *Operation SOAR:* This is a coordinated foreign-born sex offender enforcement operation that builds on ICE's ongoing efforts to target the worst criminal aliens

Noriega Rios, (Mexico) – On June 27, 2012, ICE Los Angeles Fugitive Operations (FAR Unit), in conjunction with members of the U.S. Marshals Service, arrested Noriega Rios at her residence in El Monte, California for immigration violations. Noriega Rios is charged in Mexico with ongoing involvement in organized crime and drug trafficking. Noriega Rios' previous removal order was reinstated and she was removed to Mexico on June 29, 2012.

and remove them from local communities. In FY 2012, FOTs arrested 1,095 aliens who had committed a sex offense.

- *FAR Away*: NFOP established a permanent liaison with INTERPOL at the national level to develop investigative leads and provide support to the FOTs in the location and arrest of foreign fugitive, or Fugitive Aliens Removal (FAR) cases—foreign nationals who are wanted for crimes committed abroad and are now at-large in communities in the United States. In FY 2012, NFOP surpassed its goal to increase arrests of foreign fugitive/FAR cases nationwide, with 155 arrests. NFOP continues to cooperate with the global law enforcement community through INTERPOL to foster information exchange and facilitate public safety across international boundaries.

FOT cases may also be developed from various sources, including the ICE TIPLINE, Interpol, the FOOSC, USCIS referrals, other DHS components, Probation and Parole, and other law enforcement agencies. FOT members attend specialized training that includes ERO policy and guidance, immigration law, arrest techniques, and program-specific training to enable them to conduct operations specific to Fugitive Operations, including high-profile escapes, high-risk entries, and service of criminal warrants, and the location and arrest of foreign fugitives wanted abroad and found at-large in the United States.

Fugitive Operations Support Center (FOOSC) and Fugitive Backlog

Through the use of technology and partnerships with law enforcement agencies, the FOOSC focuses on analyzing the nature and characteristics of the U.S. fugitive alien population. FOOSC addresses long-established interoperability problems associated with the many DHS databases containing alien information. FOOSC uses IT solutions to address these issues by electronically comparing fugitive data in the EARM against other DHS and non-DHS databases. FOOSC identifies fugitives that have adjusted to a legal status, have departed the United States, are incarcerated, or who may have violent criminal records previously unknown to the field officer.

The success of FOOSC's integrated efforts within the NFOP is reflected in the number of fugitives removed from the backlog of nationwide fugitive alien cases in the United States. As of February 28, 2013, the backlog was reduced by over 5,426 fugitives from the same time in FY 2012. In contrast, from September 2003 to September 2006 – before the growth of the NFOP and FOOSC – the fugitive backlog grew an average of 5,682 fugitives per month, or 68,184 per year.

Of the fugitives on the backlog, 8,791 were Secure Communities (SC) Level 1, 11,955 were SC Level 2, and 9,338 were SC Level 3. Reduction is accomplished by arresting fugitives and by reconciling fugitive alien records. Reconciliation involves the elimination of cases relating to fugitives based on evidence that the subject alien left the country, successfully adjusted status, died, or was discovered to be incarcerated and is therefore no longer a fugitive. New cases are continuously added to the backlog when final orders of removal are received, but the alien fails to depart the United States. Much of the credit for the reduction in the fugitive backlog can be attributed to the expansion of NFOP and the establishment of the FOOSC.

Fugitive Backlog by Fiscal Year

October 1, 2006	632,726
October 1, 2007	594,756
October 1, 2008	557,761
October 1, 2009	534,497
October 1, 2010	506,332
October 1, 2011	479,773
October 1, 2012	469,157

Planned Activities

ICE will continue to conduct targeted enforcement operations to reduce the fugitive alien backlog and arrest at-large convicted criminal aliens. ICE will target at-large criminal aliens convicted of crimes, criminal fugitive aliens, aliens previously removed from the United States, and aliens found to be a threat to community safety, such as members of transnational street gangs, child sex offenders, and aliens with prior convictions for violent crimes. NFOP plans to conduct national and regional Cross Check and Return to Sender Operations, SOAR and other targeted enforcement operations in line with ICE priorities.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$6.8 million Adjustment to Base increase from FY 2012 and a net \$88.3 million programmatic increase. The Adjustment to Base net increase includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies.

This budget also includes a realignment of \$13.9 million in funding and 41 positions for the 287(g) program into CAP in order to align with CAP's management of the program in FY 2014. Additionally, the FY 2014 budget realigns \$74.3 million and 405 FTE from Secure Communities to CAP due to the completion of nationwide IDENT/ IAFIS interoperability deployment. Both program changes are described in more detail in the programmatic change section.

As part of ICE's ongoing efforts to identify savings, CAP will reduce \$5.7 million in non-mission critical spending through efficiencies in the areas of servicewide reductions, service contracts, travel, training, fleet, PCS, and TDY. \$13.0 million and 74 FTE in non-mission critical staff reductions will be achieved through attrition, and by only allowing targeted hiring of the most critical positions.

OHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Associated HPPG/GPRA Measure

Number of convicted criminal aliens removed per fiscal year.

Justification

Salaries (\$190.2 million)

CAP will have a staffing level of 1,748 FTE in FY 2014.

Expenses (\$101.5 million)

In FY 2014, CAP will fund \$101.5 million in general expenses to support priority goals.

FAQ: What is the difference between CAP and Secure Communities (SC)?

CAP is responsible for the identification, arrest, and processing for removal of aliens that are found incarcerated in Federal, state, and local facilities and at-large in the community. SC is a federal information sharing initiative between DHS and DOJ through which fingerprint biometrics are matched against immigration databases when an alien is booked into a jail after having been charged with a crime by a law enforcement agency. The SC information sharing initiative assists in making the identification of criminal aliens in federal, state, and local facilities more efficient and effective. Individuals identified through SC are typically processed by CAP officers. The full deployment of SC interoperability throughout the United States was completed during the first quarter of FY 2013, transfer of responsibility for SC's day-to-day oversight, such as outreach and modernization efforts, will shift from SC to CAP in FY 2014.

Description

The mission of the CAP is to provide ICE-wide direction and support in the biometric and biographic identification, arrest and removal of those aliens who are incarcerated within federal, state, and local prisons and jails, as well as at-large criminal aliens. It is incumbent upon ICE to ensure that all efforts

are made to investigate, arrest, and remove individuals from the United States by processing the alien expeditiously and securing a final order of removal for an incarcerated alien before the alien is released to ICE custody. The identification and processing of incarcerated criminal aliens, before release from jails and prisons, decreases or eliminates the time spent in ICE custody and reduces the overall cost to the Federal Government. Integral to the effective execution of this program is the prosecution of criminal offenders identified by ERO officers during the course of their

duties. ERO, in conjunction with the United States Attorney's Office, actively pursues criminal prosecutions upon the discovery of offenses of the nation's criminal code and immigration laws.

Risk-Based Approach

CAP uses a risk-based approach that places priority on at-large criminal aliens determined to pose a threat to the community. CAP screens 100 percent of all intakes at the more than 4,300 Federal, state and local prisons and jails. CAP works to ensure that ICE enforcement priorities are followed and that detainers are issued for cases involving felony convictions or felony charges; three or more prior misdemeanor convictions; misdemeanors involving violence, sexual abuse or other serious conduct; or cases that pose a significant risk to national security, border security, or public safety.

CAP Personnel

CAP officers screen biometric and biographic leads received from SC Interoperability and other law enforcement agencies of prison and jail populations to identify aliens that are to be interviewed for prioritization and removal processing, as well as investigate at-large criminal aliens who circumvented the interview and screening process. When an alien is identified and found to be amenable to removal through either a screening or an interview, a detainer is lodged if such action is in accordance with agency priorities and guidelines. Subsequently, in appropriate cases, proceedings will begin to remove the alien from the United States.

There are more than 1,200 CAP Officers that monitor over 4,300 facilities and respond to more than 1.25 million biographic and biometric immigration alien queries forwarded by the LESC.

FY 2007 - FY 2012 CAP Arrest Statistics

Initiatives

- **Automated Biometric Identification System (IDENT)/Integrated Automated Fingerprint Identification System (IAFIS) interoperability**

IDENT/ IAFIS is a biometric screening process that is consistent and efficient in the identification of criminal and other priority aliens. ICE leveraged an already-existing Federal information-sharing partnership between US-VISIT and the FBI that helps to identify criminal aliens at arrest or book-in without imposing new or additional workload on state and local law enforcement agencies. It has been fully deployed in all state and local jurisdictions, as well as Federal agencies, to include the DOD. Full deployment of IDENT/IAFIS interoperability has led to an increase in the number of criminal and other priority aliens identified and arrested.

When state and local law enforcement arrest and book someone into a jail facility for a violation of a state criminal offense, they will generally fingerprint the person. The fingerprints are electronically submitted to the state's fingerprint database, and are then forwarded to the FBI. Provided that the person had been previously encountered and fingerprinted by an immigration official, a "match" will register at which time ICE is notified and an ICE officer determines the person's immigration and criminal status to establish the appropriate

immigration enforcement action, if any. If the person has not previously been fingerprinted by an immigration official, there will be “no match.” In all cases, an ICE or 287(g) jail enforcement officer (JEO) will need to interview the individual to determine the appropriate enforcement action

- **Joint Criminal Alien Removal Taskforce (JCART)**

JCART identifies, investigates, and arrests at large criminal aliens with, but not limited to, convictions for drug trafficking offenses, crimes of violence and sex offenses. JCART will also identify and target aliens involved in human trafficking, smuggling, and Transnational Organized Crime (TOC) for increased information collection. JCART partners with ICE’s HSI, and other agencies such as Probation and Parole Offices, the United States Marshals Service, CBP, the Bureau of Prisons (BOP), and at the request of local law enforcement agencies (LEA), to conduct special operations.

In FY 2012, the JCART program encountered 948 aliens resulting in more than 550 arrests, and 250 detainees lodged. Currently, JCART is active in the Los Angeles and New York Field Offices.

- **Law Enforcement Area Response (LEAR)**

LEAR focuses on responding to state and local law enforcement agencies that identified aliens that are enforcement priorities for ICE. LEAR staff responds to LEA requests and ICE officers determine nationality, immigration status, and removability. Immigration detainees are placed on individuals that ICE officers determine removable and are enforcement priorities. In FY 2012, the LEAR program made more than 2,943 arrests, encountered 4,201 aliens and lodged 1,572 detainees.

- **Law Enforcement Support Center (LESC)**

The LESL operates 24 hours a day/seven days a week to provide timely and accurate information to LEAs on the identity and immigration status of individuals who have been arrested or who are under investigation for criminal activity. LESL technicians have ready access to a wide range of databases and intelligence resources.

The LESL, located in Williston, Vermont, operates a communications center that provides National Crime Information Center confirmations within 10 minutes to law enforcement agencies 24 hours a day, 7 days a week.

In addition, the LESL analyzes and disseminates information received from the public about suspicious or criminal activity. Information obtained from the public via ICE's toll-free tip hotline is analyzed by the professional law enforcement staff at the LESL and quickly forwarded to ICE field units for investigation or other action, if law enforcement professionals determine that enforcement action is appropriate.

- **Rapid REPAT**

The Rapid REPAT program offers selected criminal aliens incarcerated in U.S. prisons and jails the opportunity to accept early release in exchange for voluntarily returning to their country of origin. Aliens who have been convicted of non-violent offenses may receive early conditional release if they have a final order of removal and agree not to return to the United States. Eligible aliens must agree to waive appeal rights associated with their state convictions. If aliens re-enter the country following removal under the Rapid REPAT program, state statutes may provide for revocation of parole and incarceration for the remainder of the alien's original sentence. Additionally, aliens illegally re-entering may face additional federal charges and penalties. Rapid REPAT also helps participating states reduce the costs associated with detention.

- **Violent Criminal Alien Section (VCAS)**

VCAS screens recidivist criminal aliens encountered through ERO's enforcement efforts and local law enforcement to seek criminal prosecution of criminal aliens to mitigate the risk of future recidivism and to enhance the integrity of the U.S. immigration system. Integral to success in this effort is the collaboration with United States Attorney's Offices to prosecute the charged criminal offenders. In FY 2012, VCAS secured 8,761 indictments and 9,103 convictions.

FY 2014 Planned Activities

ERO will continue to focus CAP resources on the enhancement of public safety through outreach, partnership, and coordinated operations. CAP plans to initiate "CAP Surges" and "Threats Against Community" operations to further identify, arrest and initiate removal proceedings against incarcerated priority aliens, as well as actively investigate and arrest at-large criminal aliens that pose a risk to public safety and national security.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$2.8 million Adjustment to Base decrease from FY 2012, which includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. The FY 2014 budget includes \$2.9 million to increase full-service capacity to accommodate aliens who otherwise would have been detained due to the reduction in detention beds. This increase is described in more detail in the programmatic change section.

As part of ICE’s ongoing efforts to identify savings, ATD will reduce non-mission critical spending by \$4.3 million through efficiencies in the areas of servicewide reductions, travel, training, fleet, PCS, and TDY. \$2.5 million and 13 non-mission critical FTE will be reduced through staffing reductions achieved through attrition, and by only allowing targeted hiring of the most critical positions.

QHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Justification

Salaries (\$19.5 million)

ATD will have a staffing level of 173 FTE in FY 2014.

Expenses (\$52.9 million)

In FY 2014, ATD will spend \$52.9 million on contractual support and equipment for the Full-Service and Technology-Only programs.

Description

ATD is a flight-risk mitigation tool that uses technology and case management to increase an alien’s compliance with release conditions, and to facilitate alien compliance with court hearings and final orders of removal while allowing aliens to remain in their communities. The ATD program consists of two components: the Full-Service component and the Technology-Only component. All participants in the ATD program are at least 18 years of age.

ATD Participant Levels

Fiscal Year	FY 2009	FY 2010	FY 2011	FY 2012
Average Daily Participant Level	17,586	16,532	17,957	23,034

ATD Participation Determination

The ATD program provides an enhanced monitoring option for those aliens for whom ICE or an immigration judge has determined that detention is neither mandated nor appropriate. ATD is employed where it has also been determined after an individualized case review that the alien may need a higher level of supervision than allowed for by having the less restrictive release conditions associated with a bond, Order of Release on Recognizance, or an Order of Supervision alone. When determining eligibility for ATD enrollment and what component and technology is most appropriate, the ATD officer or agent will consider a number of factors that include, but are not limited to:

- Stage in the removal process;
- Assets/property;
- Community and family ties;
- Legal representation;
- Criminal history;
- Compliance history; and,
- Humanitarian concerns.

Currently, the cost of placing a participant in an ATD program component can range from \$0.17 to \$17.78 per alien per day, depending on the type of service required and the technology used. The average cost per participant in FY 2012 was \$5.94.

Full-Service (FS) Program

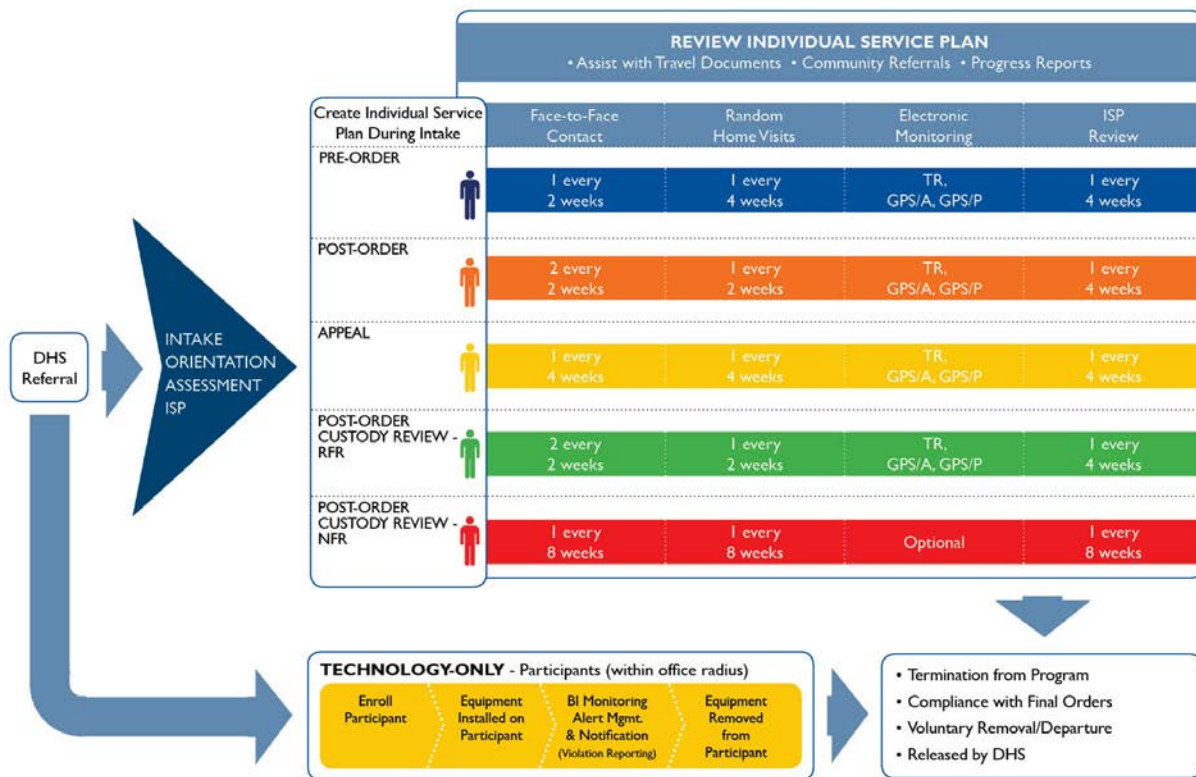

In the FS program, contractors monitor participants using a combination of case management and technological monitoring. FS is more supervision intensive, and thus more costly, than other forms of ATD, so it is generally used until a pattern of compliance is established, the participant has been determined to be non-compliant in the TO component, or the participant is preparing to depart the United States. Regardless of the assigned component, a participant may be assigned to one of two forms of technological monitoring: the use of a global positioning system unit or enrollment in

telephonic reporting voice verification program. For all participants that are assigned to the FS program, the contractor case specialist will perform duties that include but are not limited to:

- Scheduled office visits;
- Unannounced home visits;
- EOIR case tracking through proceedings;
- Technology assignment at ERO discretion;
- Identification and resolution of all electronic monitoring alerts and violations;
- Community service referrals (e.g. medical, legal, translations services, etc.); and,
- Updates provided to ERO.

FS programs are currently available in approximately 40 locations nationwide for aliens residing within a 50 to 85 mile radius of an ICE office.

The FS program features five stages of supervision for program participants, which are based upon their current stage in immigration court proceedings. Depending on the stage of supervision that the participant is assigned, the contractor will conduct varying levels of scheduled office visits and home visits.

In an effort to more accurately align with ERO’s mission to enforce removal orders, in FY 2012, ATD’s performance measures were adjusted: final hearing appearance rates and average cost per participant are no longer the primary focus. Instead, the ATD program focuses on the number of removals.

Technology-Only (TO) Program

TO services are available at all 24 field offices and ERO sub-office locations that have a trained ATD officer or agent. With no predetermined enrollment limitations by location, TO can be used when FS is not available or if FS is not necessary for the program participant. In the TO program, ICE officers provide the case management services to participants that are typically handled by the contractor case specialist in the FS component. Of those offices that maintain an active TO component, the average caseload per office is 170 participants.

The principal difference between the FS and TO programs is the contractor case specialist. ICE determines which program to use in a given case based on flight risk, likelihood of imminent removal, and prior compliance history, among other factors.

FY 2014 Planned Activities

ICE plans to focus resources on those individuals who present the highest risk of flight, including criminal aliens who are ordered released by an immigration judge and those who fall into ICE's other priority categories of fugitives and recent border entrants. In FY 2012, just under half of ATD's active participants (10,990) did not fall into priority categories. In FY 2014, ICE will support an average daily population of 22,905 ATD participants annually, which will cover anticipated criminal and other priority populations, supporting the Department's continued focus on greater use of prosecutorial discretion to ensure resources are focused on those who present the highest risk of flight and are priorities for enforcement/ removal. The FY 2014 participant level will also include aliens not subject to mandatory detention in order to focus detention space and funding on criminal and priority aliens, while providing supervision of non-mandatory aliens through the lower-cost ATD program.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$20.6 million Adjustment to Base decrease from FY 2012 which includes changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies.

As part of ICE’s ongoing efforts to identify savings, TRP will reduce non-mission critical spending by \$17.0 million through efficiencies in the areas of servicewide reductions, service contracts, and travel, training, fleet, PCS, and TDY. \$3.7 million and 19 non-mission critical FTE will be reduced through staffing reductions achieved through attrition, and by only allowing targeted hiring of the most critical positions.

QHSR Alignment

3.2 Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.5 Achieve Efficiency in the Removal Process

Justification

Salaries (\$5.2 million)

TRP will have a staffing level of 40 FTE in FY 2014.

Expenses (\$250.8 million)

TRP will coordinate the removal of over an estimated 227,000 convicted criminal aliens primarily through contractual arrangements with commercial and charter air carriers managed by the ICE Air Operations Division.

Description

TRP coordinates the safe and secure transportation of aliens in ICE custody and their removal from the United States. In collaboration with the ICE OIA and the DOS, ERO plans, defines and projects requirements; establishes memoranda of understanding (MOU) and repatriation agreements; and executes removal operations. TRP carries out its responsibilities through the Travel Document Unit (TDU) and the ICE Air Operations (IAO) Unit.

Travel Document Unit (TDU)

TDU supports field offices, ICE Attachés, and foreign embassies and consulates for travel document and removal related issues to ensure the safe and orderly removal of aliens from the United States. TDU also has oversight of the electronic Travel Documents (eTD) and conducts liaison with governmental and non-governmental organizations, over 200 embassies and consulates within the United States, foreign governments and law enforcement organizations worldwide.

ICE Air Operations (IAO)

ICE Air Operations (IAO) manages all aspects of flight operations for removals to include scheduling flights, forecasting operational needs, assisting with the coordination between foreign governments and embassies. The staff assigned to ICE Air oversee aviation safety, standardization, and training. IAO provides services to all ERO field offices conducting regular flight operations from hubs in Arizona, Florida, Louisiana, and Texas.

IAO conducts increasing number of transports and removals, including but not limited to:

- Chartered flights to countries with a high volume of removals or regularly scheduled commercial flights;
- Special charters to accommodate aliens with medical conditions or other high-profile removals; and
- Domestic commercial flights to facilitate the transfer, staging and removal of aliens via land ports of entry or for flights abroad.

Since 2006, ICE has transported or removed hundreds of thousands of aliens using air charter services. ICE procures the majority of its charter flight services from vendors through the General Services Administration (GSA) Schedule. This innovative arrangement provides ICE cost effective and highly flexible flight services. As a result, ICE can adjust rapidly to changing requirements such as dates, times, and operating locations.

In FY 2012, ICE's negotiating resulted in several new air charter contracts with a "price per flight hour", which resulted in price decreases for three of four contracts. These decreases were achieved by sharing fuel price escalation risk with the vendor. This sharing arrangement allows reimbursement beyond an average fuel price of \$5 per gallon versus allowing the vendor to assume total risk, which

would be reflected in higher contract prices for fuel increases that may not be realized. The contract in Miami did not experience a price decrease due to fewer flight hours than in previous years..

Staging Location	FY 2010 Cost Per Flight Hour	FY 2011 Cost Per Flight Hour	FY 2012 Cost Per Flight Hour
San Antonio	\$6,997	\$7,857	\$7,747
Alexandria	\$7,477	\$8,377	\$8,167
Mesa	\$6,787	\$7,997	\$7,887
Miami	\$6,807	\$7,327	\$7,897
AVERAGE	\$7,017	\$7,890	\$7,925

IAO also manages commercial airline removals, both escorted and unescorted. IAO accomplishes this through the management of assigned contract personnel and the oversight of multiple contract service providers. These services include requesting country clearances through both the Secure Message and Routing Terminal cabling system and the Department of State’s electronic Country Clearance system.

Removals and Returns by Type			
	Criminal*	Non-Criminal	Total
FY2008	114,415	254,806	369,221
FY2009	136,126	253,708	389,834
FY2010	195,772	197,090	392,862
FY2011	216,698	180,208	396,906
FY2012	225,390	184,459	409,849

*Level 1 Criminals: FY2010 64,466; FY2011 75,086; FY2012 77,954 (data as of 9/30/12 as provided by LESA/STU)

FY 2014 Planned Activities

- Coordinate the removal of over an estimated 227,000 convicted criminal aliens.
- Continue to utilize and refine the TRP removal strategy to maximize cost savings and to achieve removal goals.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding includes a net \$58.0 million Adjustment to Base decrease from FY 2012 and a net \$110.7 million programmatic decrease primarily resulting from a PPA realignment of legacy Comprehensive Identification and Removal of Criminal Aliens (CIRCA) functions related to the Secure Communities (SC) program, to Custody Operations and CAP. The Adjustment to Base net decrease includes a \$40.8 million reduction to terminate costs associated with nationwide deployment (equipment and services), as well as changes for pay inflation, GSA rent, attrition of non-mission critical FTE, and administrative efficiencies. The programmatic decrease, described in more detail in the programmatic change section, realigns \$110.7 million from CIRCA to Custody Operations and CAP due to the completion of nationwide SC interoperability deployment.

As part of ICE’s ongoing efforts to identify savings, CIRCA will reduce non-mission critical spending by \$24.3 million through efficiencies in the areas of service wide reductions, service contracts, and travel, training, fleet, PCS, and TDY. \$7.7 million and 43 non-mission critical FTE will be reduced through staffing reductions achieved through attrition, and only allowing targeted hiring of the most critical positions.

Justification

Salaries (\$7.2 million)

CIRCA will have a staffing level of 48 FTE in FY 2014.

Expenses (\$13.1 million)

In FY 2014, CIRCA will fund general expenses and leverage its analytic capabilities and systems for enforcement and removal issues.

Description

In 2008, Congress provided funding to ICE to “improve and modernize efforts to identify aliens convicted of a crime, sentenced to imprisonment, and who may be deportable, and remove them from the United States once they are judged deportable.” From FY 2008-2013, ICE conducted a phased deployment of an automated information sharing tool to enable the identification of criminal aliens, and other priorities for enforcement, through fingerprint-based biometric identification technology. In FY 2013, day-to-day management of interoperability was transferred from CIRCA to CAP. Since its inception, CIRCA has led ICE’s efforts in the development, implementation, and integration of advanced analytics and systems integration, optimizing ICE’s immigration enforcement efforts. CIRCA is ERO’s primary source for operational analyses, strategic planning, and change management efforts to maximize its effectiveness over multi-year timeframes. CIRCA leverages its analytic capabilities and systems by coordinating strategic business and operational planning for ERO and providing strategic planning, performance measurement and goal setting, data driven operational analyses, computer-based simulation modeling, and statistical studies. Additionally, CIRCA provides ICE and ERO components with business best practices, technological enhancements, data quality assurance, data sharing capabilities, and operational efficiency in the pursuit of criminal aliens.

CIRCA also oversees ERO’s IT strategy, including the Modernization of Alien Criminal Response Management (ACRIME) and Automated Threat Prioritization and has begun disposition of the legacy ACRIME system. These efforts will align with the DHS and ICE strategic plans, the National Security Strategy, and Quadrennial Homeland Security Review. They will also provide business process improvements, technological enhancements, increased data quality and/or greater internal or external data sharing, and operational efficiencies in the pursuit of criminal aliens.

FY 2014 Planned Activities

In FY 2014, ERO will reach out to all Federal agencies and law enforcement partners that use IDENT/IAFIS interoperability. CIRCA, alongside the DHS Office for Civil Rights and Civil Liberties will proactively ensure that IDENT/IAFIS interoperability is not utilized for improper policing tactics (i.e., racial profiling), by actively overseeing its use through statistical analysis, regular training and communicating with law enforcement agencies.

Additionally, CIRCA will continue to provide operational risk assessments, portfolio and investment strategies, decision-making tools, and workforce planning to ERO headquarters and field offices. The assessments strategies and tools will inform future performance goals, operational requirements, risk planning, and resource allocation.

Procurement Activities

FY 2012 Activity Funding (thousands)	FY 2013 Annualized CR Activity Funding (thousands)	FY 2014 Activity Request (thousands)
FY 2012 Activity Funding 15,135 <i>ERO</i>	FY 2013 Activity Funding 12,723 <i>ERO</i>	FY 2014 Activity Request 9,198 <i>5,198: ERO</i> <i>4,000: Automation Modernization</i>
<i>Criminal Alien Identification Initiatives (CAII) (P)</i>	CAII provides IT tools for ICE’s Secure Communities program to identify potentially removable aliens, particularly those with criminal convictions, arrested by federal, state or local law enforcement. CAII’s main system is the Alien Criminal Response Information Management (ACRIME) system. ACRIME is used by Law Enforcement Specialists (LESs) in ICE’s Law Enforcement Support Center to process queries received from ICE Agents and other law enforcement agencies to determine a subject’s criminal and immigration status. During the status determination process, LESs search multiple DHS, FBI and other systems to gather the subject’s criminal and immigration history. Specialists also use ACRIME to perform background checks on foreign born persons seeking to purchase or obtain firearms, and to process immigration status queries for federal employment investigations. The projects in the CAII investment are modernizing and adding additional functionality to the ACRIME system.

Program Increase							-	-	5,600
Total Request	-	-	-	-	-	-	-	-	5,600

Description of Item

In recent years, Intellectual Property (IP) crimes have grown more widespread, partially due to the increased use of modern communications technology that makes it easier to defraud victims on a global scale. The HSI-led Intellectual Property Rights (IPR) Coordination Center investigates IP theft to target predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the health and safety of the American people at risk. The IPR Center is responsible for the intake, vetting, and de-confliction of investigative leads; coordinating investigative overlap with partner agencies; and proactively targeting the sale and distribution of counterfeit, substandard, and tainted products via the Internet.

ICE requests \$5.6 million for non-personnel costs to support intellectual property rights and commercial trade fraud investigations for the following:

Domestic Investigations

- \$1.5 million for investigative support and equipment. These funds will support an expansion of the modular commercial fraud training, undercover equipment, equipment for use in joint ICE and CBP investigations, translation and transcription of court ordered wiretaps, and Title III support.

- \$1.9 million for travel in support of current and future investigations, including joint investigations with CBP.
- \$700,000 for equipment, supplies, and state and local outreach at the IPR Center.

International Investigations

- \$1.5 million for the establishment of Transnational Criminal Investigative Unit (TCIU) members specifically to pursue transnational investigations of commercial trade fraud. This includes training, costs associated with vetting and outfitting of foreign law enforcement officers assigned to TCIUs, and costs associated with the operational commitments of these personnel in support of HSI missions.

Justification

A country's success in today's global economy depends largely on its ability to create and protect intellectual property. This success is threatened in the United States, where over 27 million jobs and 34.8 percent of the U.S. gross domestic product (GDP) are considered IP-intensive.³ The number of IP infringement investigations reported on U.S. goods has increased dramatically in recent years from 17 cases in 2002 to 69 cases in 2011.⁴ To combat this rising trend of IP crime, the IPR Center has aggressively pursued enforcement actions, resulting in a 66 percent increase in the number of opened cases, and a 116 percent increase in the number of arrests for IP crime between 2009 and 2011. Yet, as IP criminals become more innovative in their attempts to defraud consumers and businesses and adapt to law enforcement efforts, IP crime continues to rise.

ICE is the only federal agency that investigates predatory and unfair trade practices under Title 19 of the U.S. Code. The IPR Center serves as the ICE/HSI Headquarters component for IPR and other commercial fraud investigations. By combining these programs at the IPR Center, ICE/HSI can apply a comprehensive approach to address vulnerabilities in the import system. Programmatic areas of responsibility include health and safety crimes; in-bond diversion; tobacco smuggling; forced child labor; textiles; anti-dumping; and trade agreement enforcement.

The IPR Center brings together 21 key partners—including INTERPOL, Europol, and the governments of Canada and Mexico—into a task force setting. Through this task force structure, the IPR Center efficiently and effectively leverages the resources, skills, and authorities of each participating partner to provide a comprehensive response to IP theft. IPR Center personnel also frequently participate in capacity building programs sponsored by the U.S. Department of State, U.S. Patent and Trademark Office (Global Intellectual Property Academy), U.S. Department of Justice, INTERPOL, and the World Customs Organization as IP enforcement and commercial fraud subject matter experts.

³ Intellectual Property and the U.S. Economy: Industries in Focus (March 2012), available at http://www.uspto.gov/news/publications/IP_Report_March_2012.pdf

⁴ As measured by the number of Section 337 cases opened by the U.S. International Trade Commission. Report available at http://www.usitc.gov/intellectual_property/documents/cy_337_institutions.pdf.

TCIUs, or “vetted units” are an important tool for building law enforcement capacity as they operate beyond U.S. borders, attacking Transnational Criminal Organizations (TCOs) along the crime continuum. TCIUs are comprised of host country law enforcement officers operating under direct U.S. government oversight who maintain a degree of institutional separation from the other security forces in the country and undergo a rigorous background check, including polygraph examinations. Through the support of TCIUs, HSI Attachés create trustworthy foreign partners with which the U.S. government can share operational intelligence and material assistance with a greatly reduced risk of corruption. TCIU programs must include recurring polygraph examinations by U.S. personnel and U.S. government advisors providing oversight of the program.

TCIUs allow HSI to identify and break down TCOs operating within the United States. As such, TCIUs act as a force multiplier by providing support to HSI special agents stationed overseas who do not possess law enforcement authorities abroad. The costs to establish and maintain a TCIU is approximately \$13,600 per TCIU member. Currently, Mexico fields the largest TCIU with 100 foreign personnel, followed by Colombia (72), and Ecuador (42).

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funds will directly support QHSR Goal 2.2: Safeguard Lawful Trade and Travel by ensuring security and resilience of global movement systems and QHSR Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations. Increasing the resources available to the TCIU program will allow ICE and its foreign law enforcement partners to expand current investigative efforts into commercial trade fraud.

With this request, ICE will pursue the following strategies:

- 1) Continue to respond to predatory trade practices through operations including Operation Guardian, Operation Apothecary, Operation Stamp Out, and Operation Chain Reaction.
- 2) Continue the IPR Center’s outreach efforts both nationally and internationally.
- 3) Develop multilateral international operations to target the unauthorized shipment of counterfeit pharmaceutical products by engaging international customs organizations and law enforcement authorities.
- 4) Increase collaboration with CBP to coordinate ongoing commercial fraud enforcement operations with shared objectives.
- 5) Collaborate with CBP to implement a joint commercial fraud enforcement strategy, incorporating recommendations from the joint CBP and HSI Commercial Fraud Working Group.
- 6) Prioritize investigations to those involving illicit trade of dangerous goods that could be harmful to the public, including counterfeit pharmaceuticals and tainted products.

Program Increase							-	-	8,800
Total Request	-	-	-	-	-	-	-	-	8,800

Description of Item

ICE requests \$8.8 million in non-personnel costs to support human trafficking investigations. Resources will be used to identify and rescue victims of trafficking as follows:

Domestic Investigations

- \$3.3 million for human trafficking investigations through the Extraterritorial Criminal Travel (ECT) Strike Force Initiative. These funds will be used for equipment for undercover operations, Title III support, translation and transcription of raw electronic intercept data, training, and travel to conduct witness interviews and trafficking victim determination.
- \$4.0 million for human trafficking investigations through Anti-Trafficking Coordination Teams (ACTeam). The requested funds will be used for Title III support, equipment for undercover operations, translation and transcription of raw electronic intercept data, travel to interview identified trafficking victims, training, and continued outreach through the ICE Hidden in Plain Sight and DHS Blue Campaign initiatives.

International Investigations

- \$1.5 million for establishment of TCIU members specifically to pursue transnational investigations of human trafficking. This includes training, costs associated with vetting and outfitting of foreign law enforcement officers assigned to TCIUs, and costs associated with the operational commitments of these personnel in support of HSI missions.

Justification

In 2006, ICE and the DOJ launched the ECT Strike Force initiative. ICE also co-chairs the National Security Council Interagency Working Group on the top smuggling threats to the United States. Both of these initiatives are based on several U.S. Government strategic reports, including the *9-11 Commission Report on Terrorist Travel* and the *National Strategy to Combat Terrorist Travel*.

The ECT Strike Force aims to systematically disrupt and dismantle the international and domestic operations of criminal travel networks, identify and seize assets and illicit proceeds and eliminate identified systemic vulnerabilities that are exploited by criminal elements to undermine immigration and border controls, through proactive transnational investigations. The ECT Strike Force seeks to enhance existing capabilities by promoting the expertise of DOJ trial attorneys and HSI special agents to develop international undercover operations targeting sophisticated travel networks.

In 2011, ICE, DOJ, and the Department of Labor initiated (ACTeam to streamline federal criminal investigations and prosecutions of human trafficking offenses. Each ACTeam is comprised of federal prosecutors and federal agents from multiple law enforcement agencies. The ACTeams protect the rights of human trafficking victims during federal criminal human trafficking investigations, bring traffickers to justice, and dismantle human trafficking networks.

In March 2012, President Obama directed his Cabinet to redouble the Administration's efforts to eliminate human trafficking, which afflicts more than 20 million people around the world, including in communities here at home. The President's Interagency Task Force to Monitor and Combat Human Trafficking in Persons will develop the first-ever federal strategic action plan to strengthen services for trafficking victims. In a related effort, ICE will participate in the interagency Human Smuggling and Trafficking Center (HSTC), which will develop its first-ever domestic human trafficking assessment to track trends within the United States, enabling both law enforcement and service providers to deploy resources more effectively. These efforts will be assisted by ICE, which is increasing its focus on human trafficking internationally and domestically.

TCIUs, or "vetted units" are an important tool for building law enforcement capacity as they operate beyond U.S. borders, attacking Transnational Criminal Organizations (TCOs) along the crime continuum. TCIUs are comprised of host country law enforcement officers operating under direct U.S. government oversight who maintain a degree of institutional separation from the other security forces in the country and undergo a rigorous background check, including polygraph examinations. Through the support of TCIUs, HSI Attachés create trustworthy foreign partners with which the U.S. government can share operational intelligence and material assistance with a greatly reduced risk of corruption. TCIU programs must include recurring polygraph examinations by U.S. personnel and U.S. government advisors providing oversight of the program.

TCIUs allow HSI to identify and break down TCOs operating within the United States. As such, TCIUs act as a force multiplier by providing support to HSI special agents stationed overseas who do not possess law enforcement authorities abroad. The costs to establish and maintain a

TCIU is approximately \$13,600 per TCIU member. Currently, Mexico fields the largest TCIU with 100 foreign personnel, followed by Colombia (72), and Ecuador (42).

Impact on Performance (Relationship of Increase to Strategic Goals)

This request directly supports QHSR Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations by investigating organizations involved in cross-border human smuggling and trafficking. Increasing the resources available to the TCIU program will allow ICE and its foreign law enforcement partners to expand current investigative efforts into human trafficking.

Total Request	-	-	-	-	-	-	73	36	10,000

Description of Item

The \$10 million request will provide for 73 attorney positions that will use prosecutorial discretion to help prioritize the immigration court docket and reduce the backlog of criminal alien prosecutions that may result from the full interoperability deployment of Secure Communities (SC). The request will also support ICE enforcement activities as the Office of the Principal Legal Advisor (OPLA) provides a broader range of legal services on topics for local Enforcement and Removal Operations (ERO) and Homeland Security Investigation (HSI) clients.

Justification

The OPLA OCC represents the U.S. Government in immigration proceedings before the Executive Office for Immigration Review (EOIR). The OCC handle approximately 300,000 immigration-related cases pending before EOIR annually. These cases include contested removals, custody determinations, and applications for protection or relief from removal.

Secure Communities Interoperability Deployment:

The full deployment of SC interoperability is expected to lead to additional identifications of aliens whose cases would be reviewed for possible prosecutorial discretion prior to possible removal. These additional identifications may create a backlog of cases if the requested resources are not provided for case reviews. The backlog created by the increased case load could result in a secondary effect of increasing average detention times.

Prosecutorial Discretion:

To help avoid additional immigration court backlogs, OPLA is enhancing its review of new cases to ensure that EOIR and OPLA resources are focused on priority matters. OPLA began this process in November 2011, screening incoming cases to prioritize the docket and dedicate greater resources to the removal of criminal aliens, public safety threats and other priority removals. Based on these reviews, ICE attorneys decide whether proceedings before EOIR should commence or whether OPLA and EOIR resources could be better allocated pursuing other cases. The volume and thoroughness of the prosecutorial discretion review continues to be an important tool to eliminating the immigration court backlogs.

Impact on Performance (Relationship of Increase to Strategic Goals)

OPLA promotes QHSR Mission3 “Enforcing and Administering Our Immigration Laws” as well as ICE’s FY 2010 – FY 2014 Strategic Plan Objective 3 “Protect the Borders through Smart and Tough Interior Immigration Enforcement” by prioritizing the removal of convicted criminal aliens who undermine public security and reduce the quality of life in our communities. Enforcement of our Nation’s immigration laws is of the highest priority for OPLA as efforts focus on protecting the communities that it serves through the SC program.

The addition of 73 attorneys will allow OPLA to continue to provide necessary prosecutorial discretion reviews pursuant to ICE policy and will be applied to offset the impact of any increased workload associated with full SC deployment.

Program Decrease							(83)	(83)	(44,000)
Total Request	-	-	68,321	-	-	68,321	63	63	24,321

Description of Item

This budget reduces the 287(g) program by \$44 million, resulting in the elimination of the inefficient task force officer (TFO) model. Certain staffing and general expenses are being reduced as ICE moves toward a focus on jail-model agreements. The combination of jail model/jail enforcement officer (JEO) agreements and the full deployment of Secure Communities will provide consistent, efficient and cost effective screening to identify and remove criminal and other priority aliens.

Justification

The reduction will be realized through the termination of 20 TFO MOAs. ICE has made the decision to allow all existing task force agreements to expire because of their low removal performance, as compared to other enforcement programs including Secure Communities.

FY 2012 287(g) and SC Costs for Removals

	287(g) - Task Force	287(g) - Jail Model	SC
Full Year Cost*	\$12,984,309	\$15,715,835	\$45,676,125
Aliens Removed	396	12,733	30,425
Cost per Removal	\$32,789	\$1,234	\$1,501

* Beds, Transport, LESC and Personnel were excluded in comparison due to overlapping support.

Further reductions will be taken to eliminate support from acquisitions, investigations, and outreach related to TFO MOAs. Personnel currently supporting the 287(g) program and the general expenses for these employees will be reduced through attrition or absorbed into the base of the employee’s parent organization.

Savings from Personnel Reduction: (\$12.028 million) (83 FTEs)

- Office of Acquisition (\$0.768 million) (5 FTEs)
- Office of the State, Local, and Tribal Coordination (\$0.450 million) (3 FTEs)
- Office of Professional Responsibility (\$2.220 million) (14 FTEs)
- Office of the Principal Legal Advisor (\$0.337 million) (2 FTEs)
- Domestic Investigations (\$3.887 million) (33 FTEs)
- Custody Operations (\$4.366 million) (26 FTEs)

Savings from General Expenses: (\$31.972 million)

- Office of the Chief Information Officer: (\$7.176 million) for travel and the installation of IT equipment and maintenance services
- Office of the Chief Financial Officer: (\$0.261 million) for administrative costs
- Office of the State, Local, and Tribal Coordination: (\$1.685 million) for travel and costs associated with outreach and communications
- Office of Professional Responsibility: (\$1.638 million) for travel for compliance reviews
- Custody Operations: (\$10.626 million) for detention bed contracts
- Domestic Investigations: (\$7.646 million) for travel, vehicles and equipment, service-wide costs, and other administrative costs
- 287(g) Program Management Office: (\$2.940 million) for training, travel, PCS and other administrative costs

Realignment Justification

While the overall management of the program will remain in the Office of Enforcement and Removal Operations (ERO), the budget realigns programmatic oversight of the 287(g) Program to the Criminal Alien Program (CAP) PPA. As a result, the funding distribution below shows a decrease to existing PPAs and an increase to the CAP PPA.

PPA	FY 2012 Appropriated Totals	FY 2014 Request
Office of the Assistant Secretary (OAS)	\$ 9,858,000	\$ 900,000
Office of the Chief Financial Officer (OCFO)	\$ 261,000	\$ -
Office of Acquisition (OAQ)	\$ 768,000	\$ -
Office of Professional Responsibility (OPR)	\$ 5,842,000	\$ 1,983,535
Office of the Principal Legal Advisor (OPLA)	\$ 638,000	\$ 300,779
Office of the Chief Information Officer (OCIO)	\$ 3,670,000	\$ 3,994,210
Homeland Security Investigations (HSI)	\$ 29,085,000	\$ -
Enforcement and Removal Operations (ERO) - Custody	\$ 18,199,000	\$ 3,207,348
287g Program Management Office (PMO) - Criminal Alien Program	\$ -	\$ 13,935,128
Total	\$ 68,321,000	\$24,321,000

ICE will use the remaining funds to support the 39 JEO county jails in the identification and processing of criminal aliens that meet ICE's immigration enforcement priorities.

After the reduction and realignment, final funding and position distribution of the 287(g) program will be as follows:

Personnel Costs: \$9.547million – 63 FTE

- Office of the Principal Legal Advisor – \$0.301 million (2 FTE)
- 287(g) PMO, Criminal Alien Program – \$6.461 million (41 FTE)
- Office of the Chief Information Officer – \$0.602 million (4 FTE)
- Office of Professional Responsibility – \$1.483 million (11 FTE)
- Office of State, Local, and Tribal Coordination – \$0.700 million (5 FTE)

Non-Personnel Costs: \$14.774 million

- 287(g) PMO, Criminal Alien Program - \$7.474 million. These funds will be used for general expenses associated with travel, training and other administrative costs.
- Office of the Chief Information Officer – \$3.392 million. The OCIO will use these funds to decommission and remove all automated IT infrastructure from the 20 TFO site locations, and to support the sustained 39 MOA locations.
- Office of Professional Responsibility - \$0.501 million. These funds will support the compliance review process.
- Custody Operations - \$3.207 million to support detention beds
- Office of State, Local, and Tribal Coordination - \$0.200 million. For travel and costs associated with outreach and communications.

Impact on Performance

Through this reduction, ICE will streamline and focus on the continued support of the 39 JEO MOAs. At this funding level, financial resources will support programmatic oversight, compliance reviews, and IT support, as well as Enforcement and Removal Operation detention beds in locations where JEO activities are contributing to ICE's mission. The combination of JEO MOAs and Secure Communities

will provide consistent, efficient and cost effective screening to identify and remove criminal and other priority aliens.

Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: Reduction to 31,800 Detention Beds
PPA: DRO - Custody Operations
DRO - Alternatives to Detention
DRO - Fugitive Operations
Program Decrease: Positions 0, FTE 0, Dollars \$(119,561)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,514,020
Program Decrease							-	-	(119,561)
Total Request	-	-	1,456,825	-	-	1,514,020	-	-	1,394,459

Description of Item

The FY 2014 budget request includes a net reduction of \$119.56 million, which correlates to a \$122.7 million decrease to Custody Operations resulting from both the reduction of 2,200 detention beds from the FY 2012 level of 34,000 and a reduction in the budgeted cost of detention from prior estimates of \$122 per day to the FY 2014 estimate of \$119 per day. The request also includes increases of \$2.9 million to the Alternatives to Detention program, and an increase of \$.250 million to the Fugitive Operations program. These increases are directly related to the reduction in beds. ICE’s budget supports the funding for 31,800 beds at a revised rate of \$119 per day.

The requested level of 31,800 detention beds allows ICE to ensure the most cost-effective use of Federal dollars by focusing the more-costly detention capabilities on priority and mandatory detainees, including individuals who pose a danger to national security or a risk to public safety, with particular emphasis on violent criminals, felons, and repeat offenders. This strategy allows ICE to place low-risk, non-mandatory detainees in lower cost alternatives to detention programs, such as electronic monitoring and intensive supervision.

Due to ICE’s efforts to become more efficient in its detention and removal practices, the FY 2014 budget request reflects an average bed rate that has been reduced from previous estimates. These efforts include:

- Maximizing the use of contracts with guaranteed minimums, which provide reduced or free beds after occupying the maximum number of beds on the contract;

- Working to expand Video Conferencing capacity to eight locations in order to improve the efficiency of dockets and reduce the average length of stay; and
- Developing several pilot programs designed to expedite the processing of non-contested removal cases.

ERO adjustments include an increase of \$2.9 million for the ATD program and an increase of \$0.25 million for the Fugitive Operations program. With 31,800 detention beds, ICE expects to be able to detain criminal aliens and other aliens identified as an Administration priority (e.g., recent border crossers, immigration fugitives, and immigration recidivists). Aliens that previously would have been detained that are not subject to mandatory detention or do not fall into a priority category will be placed in the ATD full service (FS) program. The additional funding for ATD will fund increased participant capacity by 882 individuals.

To highlight how the 2014 budget request's funding of 31,800 beds with higher ATD FS participation would have provided savings if it had been notionally applied in FY 2012 (the last full year for which ICE has detention data), please see the chart below.

Notional Costs and Savings of 34,000 Beds vs. 31,800 Beds Using 2012 Data

Scenario		Total Notional Costs (ATD + Detention)	Subtotal ATD (FS) Cost: \$8.50/day	Subtotal Detained (all) Cost: \$119/day	Non-Mandatory & Non-Priority Detained (lower-risk)	Mandatory & Priority Detained (higher-risk)
					Cost: \$119/day	Cost: \$119/day
34,000 Beds	Avg. Daily Individuals by Program	46,513	12,253	34,260	2,056	32,204
	2012 Costs	\$1,526M	\$38M	\$1,488M	\$89M	\$1,399M
31,800 Beds	Avg. Daily Individuals by Program	46,513	14,713	31,800	-	31,800
	2012 Costs	\$1,427M	\$46M	\$1,381M	-	\$1,381M
Difference in Cost		(\$99M)	\$8M	(\$107M)	(\$89M)	(\$18M)

Notes: In FY 2012 Non-Mandatory & Non Priority lower risk detainee made 2,056 of the 34,260 ADP. These savings calculations assume ATD flight risk is mitigated and the transferred aliens are kept on the detained docket.

Justification

The reduction of \$119.56 million in FY 2014 is based on funding 31,800 beds at a rate of \$119 per day. The reduction in beds has been made in coordination with expansion of the ATD program. The ATD program uses technology such as ankle bracelets and intensive supervision to track lower-risk aliens who have been accused of immigration violations. ICE will continue to pursue a risk-based

strategy that focuses its use of detention beds on those individuals who have criminal convictions or fall under other priority categories. Recognizing that not all aliens apprehended by ICE require a detention bed, the Administration believes that cost-effective alternatives to detention, such as electronic monitoring and supervision, should be utilized in appropriate cases. Consistent with its stated enforcement priorities and recent policy guidance, ICE will continue to detain aliens that fall into ICE's civil enforcement priorities or are subject to mandatory detention by statute, while shifting lower-risk aliens into the ATD program.

Impact on Performance

ICE prioritizes its resources by focusing on those aliens who pose the greatest risk to public safety and national security. ICE will detain all aliens that fall into ICE's civil enforcement priorities or are subject to mandatory detention by statute, while shifting lower-risk aliens into the ATD program. This will continue to support the efforts to increase the number of criminal aliens who are removed from the United States.

U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: International Footprint Reduction
PPA: International Investigations
Program Decrease: Positions (23), FTE (23), Dollars \$(10,180)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							305	266	107,724
Program Decrease							(23)	(23)	(10,180)
Total Request	320	281	114,928	320	281	114,928	282	243	97,544

Description of Item

The budget reduces the ICE international footprint by \$10.180 million, resulting in the closure of one office and staffing reductions at 20 other offices around the world. Staffing reductions may be commenced as necessary in FY 2013 in order to fully realize the \$10.180 reduction.

Office Closures:

- Copenhagen, Denmark (personnel are being reassigned elsewhere)

Other Personnel Cuts:

- Bangkok, Thailand (1)
- Manila, Philippines (1)
- New Delhi, India (1)
- Brasilia, Brazil (1)
- Panama City, Panama (1)
- The Hague, Netherlands (1)
- Lyon/Interpol, France (1)
- Mexico City, Mexico (2)
- Ciudad Juarez, Mexico (1)
- Monterrey, Mexico (1)

- Nogales, Mexico (1)
- Nuevo Laredo, Mexico (2)
- Tijuana, Mexico (1)
- Dubai, United Arab Emirates (2)
- Vancouver, Canada (1)
- Montreal, Canada (1)
- London, United Kingdom (1)
- Rome, Italy (1)
- Frankfurt, Germany (1)
- Paris, France (1)

Justification

OIA utilized a risk-based methodology to identify opportunities to right-size staffing levels in overseas offices. These reductions will not prevent the affected offices from maintaining the current level of investigative effort and will ensure sustainable staffing levels that correspond to the needs of each post.

In addition to the reduction of positions overseas, this plan suspends OIA Mission Support hiring and lengthens overseas tours.

Impact on Performance

This reduction reflects 23 positions out of 199 deployed overseas. ICE is employing a risk-based methodology to minimize operational impacts.

Program Decrease							-	-	(5,000)
Total Request	1,213	1,297	221,040	1,272	1,447	215,935	1,199	1,374	207,374

Description of Item

The budget includes a \$5.0 million reduction to OPLA that will be achieved through a combination of reductions in OPLA student program participants and targeted reductions in general expenditures to include travel, PCS, wireless, and case management costs.

Justification

OPLA will rely on savings in service-wide contracts, a reduction in student hiring, and further reductions in operating costs. Specific reductions include:

- Service-wide - \$1.807 million. These pass through costs include OPLA’s proportional cost of shared services such as IT support, security, facility leases, etc., and results from efficiencies gained from consolidation or cancellation of non-critical services.
- General Counsel Electronic Management System (GEMS) - \$965 thousand. OPLA will replace GEMS with a new case management system that will not only enable OPLA to eliminate the costs of operating the antiquated GEMS system, but also improve litigation management by providing more accurate and timely information, and allow OPLA to streamline staff support as the need for additional case management support will be reduced.
- Student Program - \$1.268 million. OPLA will reduce its student cadre and redistribute workload (such as filing, scanning, copying legal documents, sorting mail, tracking case files) to available legal and mission support staff.

- Honor Graduate IAA - \$200 thousand. OPLA will minimize its participation in this program.
- Travel - \$300 thousand. OPLA will reduce HQ details and leverage VTC capabilities to reduce travel costs.
- Wireless - \$160 thousand. OPLA will review usage and access requirements to ensure that only those that have a critical need maintain wireless access (air cards, BlackBerry, etc.).

In summary:

Item	Object Class	Amount (in thousands)
Service-wide	multiple	1,807
GEMS	25	965
Student Program	11 and 12	1,268
Honor Graduate IAA	25	200
Travel	21	300
Permanent Change of Station	21	300
Wireless	23	160
TOTAL		5,000

Impact on Performance

OPLA's reductions were developed to minimize operational impacts to ensure that OPLA maintains its immigration court workload and continues to provide operational support to ICE programs.

Program Increase							-	-	-
Total Request	-	-	-	-	-	-	782	626	189,064

Description of Item

Full deployment of interoperability throughout the United States and transfer of full responsibility for its day-to-day management from CIRCA to CAP will be completed in FY 2013. This realignment will ensure that ICE priorities are met regardless of method of encounter. This shift in management responsibility will not affect the operation of the program for state or local law enforcement agencies. Effective FY 2014, ICE proposes to reorganize CIRCA by reprogramming \$74.325 million to the Criminal Alien Program PPA for 405 FTE and support costs related to increased enforcement actions and capacity necessitated by CIRCA identifications, and \$36.369 million to the Custody Operations PPA for 238 FTE and support costs related to detention of aliens identified by CIRCA. CIRCA will retain a \$20.728 million budget of two-year funding to enable ICE to leverage its analytic capabilities and systems for enforcement and removal issues.

Justification

Since its inception in FY 2008, CIRCA has supported ICE’s goal of smart immigration enforcement through analytics, coordination and the automated information sharing interoperability tool. Full deployment of IDENT/IAFIS interoperability throughout the United States and the transfer of full responsibility for its day-to-day management to CAP will be completed in FY 2013.

CIRCA will retain a \$20.728 million budget of two-year funding to continue its strategy, business transformation, and analytical roles by maturing and leveraging its analytic capabilities and systems.

CIRCA will also oversee ERO's IT strategy, including ERO IT projects such as the Modernized Alien Criminal Response Management (ACRIME) and Automated Threat Prioritization (ATP).

Key activities include:

- Providing project management and a framework for maintaining and identifying new transformation solutions and business analysis support for ERO units. This includes business process improvement, technological enhancements, increased data quality and greater internal or external data sharing, and identifying operational efficiencies in the pursuit of criminal aliens;
- Improving public safety by transforming the way criminal aliens are identified and removed from the United States by coordinating strategic, business and operational planning for ERO and ICE;
- Providing strategic planning, performance measurement and goal setting, data driven operational analyses, computer-based simulation modeling, and statistical studies working, where appropriate, with CRCL;
- Managing the continual improvement and data integrity controls over data residing in the Law Enforcement Systems and Analysis (LESA) office and systems; and
- Coordinating and providing overall project management of LESA projects and systems.

Impact on Performance

This program change will strengthen the performance posture of CAP and Detention Management. Likewise, the remaining CIRCA funding will provide added value by concentrating on its strategy, business transformation, and analytical roles, and by maturing and leveraging its analytic capabilities and systems.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to conduct investigations of criminal violations of Federal law relating to border security, customs and trade, immigration and naturalization, intellectual property rights, and travel and transportation, including overseas vetted units operations; and purchase and lease of up to 3,790 (2,350 for replacement only) police-type vehicles; [\$5,296,692,000]\$4,956,822,000; of which not to exceed \$10,000,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$12,750 shall be for official reception and representation expenses; of which not to exceed \$2,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$305,000 shall be for promotion of public awareness of the child pornography tip line and activities to counter child exploitation; of which not less than \$5,400,000 shall be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled aliens unlawfully present in the United States: *Provided*, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: *Provided further*, That of the total amount provided, \$15,770,000 shall be for activities to enforce laws against forced child labor, of which not to exceed \$6,000,000 shall remain available until expended: *Provided further*, That of the total amount available, not less than \$1,600,000,000 shall be available to identify aliens convicted of a crime who may be deportable, and to remove them from the United States once they are judged deportable[, of which \$138,713,000 shall remain available until September 30, 2014: *Provided further*, That the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 45 days after the end of each quarter of the fiscal year, on progress in implementing the preceding proviso and the funds obligated during that quarter to make such progress]: *Provided further*, That the Secretary of Homeland Security shall prioritize the identification and removal of aliens convicted of a crime by the severity of that crime: *Provided further*, That of the total amount provided, not less than [\$2,666,192,000]\$2,590,713,000 is for enforcement and removal operations, including transportation of unaccompanied minor aliens: *Provided further*, That of the total amount provided, \$10,300,000 shall remain available until September 30, [2014]2015, for the Visa Security Program: *Provided further*, That not less than \$10,000,000 shall be available for investigation of intellectual property rights violations, including the National Intellectual Property Rights Coordination Center: *Provided further*, That none of the funds provided under this heading may be used to continue a delegation of law enforcement authority authorized under section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) if the Department of Homeland Security Inspector General determines that the terms of the agreement governing the delegation of authority have been violated: *Provided further*, That

none of the funds provided under this heading may be used to continue any contract for the provision of detention services if the two most recent overall performance evaluations received by the contracted facility are less than ["adequate"] "adequate" or the equivalent median score in any subsequent performance evaluation system: *Provided further*, That pursuant to section 503 of this Act, the Secretary may propose to reprogram funds necessary to ensure the detention of aliens prioritized for removal: [*Provided further*, That of the total amount provided, up to \$5,000,000 may be transferred to the Department of Justice, Executive Office for Immigration Review, to increase the efficiency of the immigration court process:] *Provided further*, That nothing under this heading shall prevent U.S. Immigration and Customs Enforcement from exercising those authorities provided under immigration laws (as defined in section 101(a)(17) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(17))) during priority operations pertaining to aliens convicted of a crime.

Language Provision	Explanation
¹ [\$5,296,692,000]\$4,956,822,000;	Dollar change only. No substantial change proposed.
² [\$2,666,192,000]\$2,590,713,000	Dollar change only. No substantial change proposed.
³ ... [2014] 2015 ...	Fiscal year change only. No substantial change proposed.
⁴ ["adequate"] "adequate"	No Change
⁵ [<i>Provided further</i> , That of the total amount provided, up to \$5,000,000 may be transferred to the Department of Justice, Executive Office for Immigration Review, to increase the efficiency of the immigration court process:]	This flexibility was requested as part of the prior budget request as ICE was requesting money specifically for this purpose. This is no longer the case and thus unnecessary.
[, of which \$138,713,000 shall remain available until September 30, 2014: <i>Provided further</i> , That the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 45 days after the end of each quarter of the fiscal year, on progress in implementing the preceding proviso and the funds obligated during that quarter to make such progress]	CIRCA two-year funding for Secure Communities (SC) is no longer being requested. Also, with SC deployment activities completed, reporting on deployment status will no longer be necessary.

Personnel Compensation and Benefits, Service, and Other Costs Mission Statement

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), Chief Financial Officer (OCFO), and Acquisition Management (OAQ). The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	121,354	121,354	98,714	(22,640)
11.3 Other than full-time permanent	2,882	2,882	1,613	(1,269)
11.5 Other personnel compensation	8,554	8,554	7,213	(1,341)
12.1 Benefits	32,426	32,426	26,504	(5,922)
Total, Salaries & Benefits	165,216	165,216	134,044	(31,172)

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$5,129	\$5,129	\$4,567	-\$562

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$334	\$334	\$312	-\$22

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$14,102	\$14,129	\$15,004	\$902

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$249	\$249	\$218	-\$31

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$2,256	\$2,256	\$2,130	-\$126

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$19,176	\$20,549	\$12,305	-\$6,871

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$15,364	\$15,364	\$11,136	-\$4,228

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$1,573	\$1,573	\$1,507	-\$66

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$3,264	\$3,264	\$7,370	\$4,106

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$1,370	\$1,397	\$966	-\$404

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Headquarters Managed IT Investment Mission Statement

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their mission. The OCIO is committed to providing excellent and efficient service to our customers in order to fulfill their IT needs. In order to meet these goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, as well as provide IT solutions throughout ICE.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	44,857	41,733	38,456	-6,401
11.3 Other than full-time permanent	116	453	431	315
11.5 Other personnel compensation	606	536	534	-72
12.1 Benefits	12,895	11,951	10,007	-2,888
Total, Salaries & Benefits	58,474	54,673	49,428	-9,046

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

Legal Proceedings Mission Statement

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the U. S. in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

International Investigations Mission Statement

Office of International Investigations includes offices in 48 countries. International Investigations represents the international assets of all ICE programs and collaborates with USCIS, CBP, and other DHS components. OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity.

Summary Justification and Explanation of Changes

Visa Security Program Mission Statement

The Visa Security Program (VSP) represents ICE's front line in protecting the United States against terrorist and criminal organizations. VSP enhances the security of visa issuance at high-risk overseas posts by deploying trained special agents to identify and investigate potential terrorist and criminal threats before they reach the United States and interdicting those who would exploit the legal visa process.

Summary Justification and Explanation of Changes

DRO - Custody Operations Mission Statement

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and Enforcement and Removal Operations must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	342,984	344,317	331,253	-11,731
11.3 Other than full-time permanent	2,003	2,638	2,055	52
11.5 Other personnel compensation	101,830	106,362	97,791	-4,039
11.8 Special Service Pay	915	-	807	-108
12.1 Benefits	180,640	184,323	174,365	-6,275
Total, Salaries & Benefits	628,372	637,640	606,271	-22,101

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

DRO - Fugitive Operations Mission Statement

The Fugitive Operations program locates and apprehends fugitive aliens in the United States. It strives to identify or apprehend all fugitives, creating a deterrent to potential absconders and increasing the integrity of the immigration enforcement process.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

DRO - Criminal Alien Program Mission Statement

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers, interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	81,376	98,744	74,145	-7,231
11.3 Other than full-time permanent	274	-	396	122
11.5 Other personnel compensation	23,150	10,608	46,287	23,137

DRO - Alternatives to Detention Mission Statement

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Comprehensive Identification and Removal of Criminal Aliens Mission Statement

Secure Communities, also known as Comprehensive Identification and Remove Criminal Aliens (SC/CIRCA), is a comprehensive plan to improve community safety by transforming the way the Federal Government cooperates with state and local law enforcement agencies to identify, detain, and remove all criminal aliens held in custody.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	53,246	51,243	3,877	-49,369
11.3 Other than full-time permanent	237	244	17	-220
11.5 Other personnel compensation	17,861	17,397	1,277	-16,584
12.1 Benefits	29,355	26,211	2,077	-27,278
Total, Salaries & Benefits	100,699	95,095	7,248	-93,451

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$8,132	\$100	\$100	-\$8,032

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$10,854	\$10,701	\$2,088	-\$8,766

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$4,057	\$4,000	\$200	-\$3,857

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$1	\$1	0	-\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$27,290	\$12,000	\$6,500	-\$20,790

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$15,480	\$4,170	\$4,000	-\$11,480

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$5,340	\$2,236	0	-\$5,340

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$9,694	-	-	-\$9,694

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$2,933	\$198	\$198	-\$2,735

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$4,329	-	-	-\$4,329

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	\$255	\$254	0	-\$255

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

The U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account supports TECS under the Law Enforcement Systems Modernization (LESM), Criminal Alien Investigation Initiatives (CAII) under the Alien Criminal Response Information Management (ACRIME) modernization project, Efficiencies in Modernization Investments (EMI), and Electronic Health Records (eHR) modernization.

The Automation Modernization account allows ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. These initiatives strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

B. Budget Activities:

TECS Case Management Modernization (CM-M)

This system will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, and Infrastructure Acquisition and Deployment. TECS modernization is a joint U.S. Customs and Border Protection and ICE initiative.

Criminal Alien Investigation Initiatives (CAII)

Automation funds will modernize and expand the existing functionality provided by the legacy CAII system. CAII is used by Law Enforcement Specialists to process queries received from ICE officers and agents and other law enforcement agencies to determine a subject's criminal and immigration status, and to maintain ICE-issued warrants and lookouts within the FBI's National Crime Information Center system.

Efficiencies in Modernization Investments

The EMI initiative (previously part of Federal Financial Management System (FFMS)) supports the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative

will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management.

Electronic Health Records Modernization

The eHR initiative will provide enhanced medical documentation quality across all detention facilities; faster dissemination and improved exchange of detainee health information; and improved data quality and access to support trend analysis, as well as the identification of national and global public health threats.

C. Budget Request Summary:

ICE requests \$34,900,000 to continue the modernization of its information technology and systems infrastructure for the following program initiatives:

TECS Case Management Modernization (CM-M).....\$23M (0 FTE)

This request will fund TECS Modernization, a joint CBP and ICE initiative supporting investigative information sharing that is scheduled for completion in FY 2015.

Criminal Alien Investigation Initiatives (CAII).....\$4M (0 FTE)

This request will modernize and expand the existing functionality provided by the legacy Alien Criminal Response Information Management system. CAII is used by Law Enforcement Specialists to process queries received from ICE officers and agents and other law enforcement agencies to determine a subject’s criminal and immigration status, and to maintain ICE-issued warrants and lookouts within the FBI’s National Crime Information Center system.

Efficiencies in Modernization Investments (EMI)\$4.4M (0 FTE)

The EMI initiative supports financial systems consolidation as part of the overall DHS effort to migrate to Shared Service Providers.

Electronic Health Records Modernization (eHR).....\$3.5M (0 FTE)

The eHR initiative will provide enhanced medical documentation quality across all detention facilities.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

Automation Modernization
Program Performance Justification**
(Dollars in Thousands)

PPA: Automation Modernization

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	21,710
2014 Adjustments-to-Base	-	-	(21,710)
2014 Current Services	-	-	-
2014 Program Change	-	-	34,900
2014 Total Request	-	-	34,900
Total Change 2012 to 2014	-	-	13,190

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$34.90 million for Automation Modernization to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations..

This request reflects a change of \$13.2 million from the FY 2012 Revised Enacted amount, including a \$21.7 million reduction for the termination of one-time costs, and a program change increase of \$34.9 million. The Automation Modernization initiatives strengthen law enforcement information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, enhance financial management and audit practices across ICE, and improve case management capability.

Program Description

In FY 2014, ICE will fund four Automation Modernization initiatives.

<i>QHSR Alignment</i>
1.1 <i>Prevent Terrorist Attacks</i>
3.1 <i>Strengthen and Effectively Administer the Immigration System</i>
3.2 <i>Prevent Unlawful Immigration</i>
<i>Maturing and Strengthening the Homeland Security Enterprise</i>

TECS Case Management Modernization

This initiative will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, and Infrastructure Acquisition and Deployment. TECS modernization is necessary because U.S. Customs and Border Protection (CBP) will decommission the legacy TECS platform by FY 2015 and ICE must be ready to migrate to the modernized system to avoid an annual \$28 million legacy TECS O&M cost.

Electronic Health Records

The ICE Health Services Corps (IHSC) oversees all matters related to detainee healthcare. The eHR initiative will support IHSC's goal to enhance detainee health care by automating medical documents and improving accuracy and timeliness in the exchange of detainee health information. The eHR system is comprised of a certified product that has been through rigorous independent testing by the Office of the National Coordinator for Health Information Technology, which requires the vendor to maintain certified functionality during system integration through continuous testing.

Efficiencies in Modernization Investments (EMI)

The EMI goal is to allow ICE to better manage its resources, provide enterprise-level information more quickly to better support critical decision making, reduce costs by eliminating redundant or non-conforming systems, and promote good business practices through standardization of processes and data where possible. This allows leadership, decision-makers, and their stakeholders to better leverage DHS information assets to improve fact-based management of the Department's fiscal resources.

Criminal Alien Investigation Initiatives (CAII)

This initiative will allow ICE to modernize the aging legacy application that currently supports ICE's Law Enforcement Support Center (LESC). This functionality is used by law enforcement support to process queries received from ICE officers and agents and other law enforcement agencies to determine a subject's criminal and immigration status, and to maintain ICE-issued warrants and lookouts within the FBI's National Crime Information Center (NCIC) system. In addition, the modernized system will introduce new functionality that replaces manual processes currently used at the LESL to search other DHS and FBI systems, as well as provide a significant increase in data and automation to ICE Field Agents, removing the time required for them to independently verify status determinations provided by the LESL.

FY 2014 Planned Activities

TECS Case Management Modernization

The ICE Law Enforcement Systems Modernization program will complete deployment of Core Case Management functionality to include the ability to open/modify cases, view case dashboards, run case

queries and enable internal auditing, as well as create Significant Case Reports and Electronic Surveillance Reports (ELSUR). These improvements will allow ICE to become independent of the legacy TECS mainframe and allow the new Case Management system, Patriot, to become the System of Record for ICE case data. It will also allow the program to meet its Acquisition Program Baseline milestones.

Electronic Health Records

In FY 2014, ICE will complete the next phase of the eHR solution – a Clinical Decision Support (CDS) capability. This will extend the base eHR system solution to support more-effective risk management, increased standardization of care, and enhanced quality of care. Further, the decision support tools will include reports, queries, alerts, and workflow necessary to achieve these goals, and will include support for additional medical terminologies; ability to generate custom reports (at facility and Headquarters levels); individual, facility, and organization level dashboards; additional workflows/protocols; ability to define system, patient, provider, and protocol based alerts configurable at facility and Headquarters levels; support for mental health and tele-health detainee services; and additional interfaces to additional providers.

Efficiencies in Modernization Investments

ICE is currently in the process of evaluating a move of the financial systems operations from an in-house system to a Shared Service Provider (SSP) environment in order to realize long term savings on systems operations and maintenance costs. To support this evaluation, in FY 2014, ICE will implement process improvements and efficiencies in the current environment to take advantage of e-government initiatives and better align operations with the end-to-end business processes. ICE will also work on data analysis tasks to improve the quality and access to our financial data. These efforts will assist ICE in preparing for a target solution and gain better understanding and access to our financial data for reporting and analysis.

Criminal Alien Investigation Initiatives (CAII)

ICE will continue to deploy upgraded and new functionality that has been incrementally deployed throughout FY 2012 and FY 2013. In FY 2014, an integrated telecommunications system for the LESC's Communications Center that links telephone systems and CAII together to provide seamless interaction for live queries received from ICE Agents will be deployed. New Warrant and Lookout request entry screens that allow ICE Agents to request Warrants and/or Lookouts be entered into the NCIC system will be deployed. And finally, full search capability will be provided to ICE officers and agents so they can search DHS and FBI systems from a single integrated screen, instead of manually logging in and searching each of the systems independently, as well as a mechanism for ICE staff to conduct a history search of all queries previously issued for a particular suspect.

Procurement Activity

FY 2012 Activity Funding (thousands)	FY 2013 Annualized CR Activity Funding (thousands)	FY 2014 Activity Request (thousands)
FY 2012 Activity Funding \$3,020: Total \$520: ERO \$2,500: Automation Modernization	FY 2013 Annualized CR Activity Funding \$4,947: Total \$1,447: ERO \$3,500: Automation Modernization	FY 2014 Activity Request \$10,565: Total \$7,065: ERO \$3,500: Automation Modernization
Electronic Health Record (eHR) Modernization	The objective of the electronic Health Records (eHR) System is to replace multiple systems and manual processes and develop a centralized electronic Health Records system that supports comprehensive medical services management for Immigration and Customs Enforcement (ICE) detainees. The eHR System will enable full lifecycle oversight and management of detainee healthcare. The centralized eHR will streamline the care provided to detainees, automate medical documentation reducing staff paper workloads, enhance medical management and oversight, enhance the standardization of care provided to detainees, reduce risk and legal liability of the overall system, and improve the accuracy and timeliness of Enforcement and Removal Operations (ERO), ICE Health Service Corps (IHSC) metrics.	
FY 2012 Activity Funding \$17,493: Total \$3,183: HSI \$14,310: Automation Modernization	FY 2013 Annualized CR Activity Funding \$15,318: Total \$8,808: HSI \$6,510: Automation Modernization	FY 2014 Activity Request \$39,956 \$16,956: HSI \$23,000: Automation Modernization
TECS Case Management Modernization	The ICE TECS Case Management Modernization (CM-M) program will deliver the primary tool for ICE's special agents. More than 6,800 ICE special agents work on investigating a wide range of domestic and international activities arising from the illegal movement of people and goods into, within and out of the United States, grouped into multiple case management areas. The ICE TECS CM-M program will focus on implementing case management functionality in phases. Phase 1 will consist of Core Case Management functionality and discontinuing the use of the legacy TECS mainframe by the end of FY15. Phase 2 will consist of comprehensive case management. TECS supports the following Law Enforcement mission areas by: Combating illicit trade, illicit travel, and illicit financial activity Disseminating unclassified intelligence information across DHS and the Intelligence Community; Sharing law enforcement information with federal, state, local, tribal and international law enforcement agencies.	
FY 2012 Activity Funding \$15,135: ERO	FY 2013 Annualized CR Activity Funding \$12,723: ERO	FY 2014 Activity Request \$9,198: Total \$5,198: ERO \$4,000: Automation Modernization
Criminal Alien Investigation	CAII provides IT tools for ICE's Secure Communities program to identify	

Initiatives (CAII)	potentially removable aliens, particularly those with criminal convictions, arrested by federal, state or local law enforcement. CAII's main system is the Alien Criminal Response Information Management (CAII) system. CAII is used by Law Enforcement Specialists (LESs) in ICE's Law Enforcement Support Center to process queries received from ICE Agents and other law enforcement agencies to determine a subject's criminal and immigration status. During the status determination process, LESs search multiple DHS, FBI and other systems to gather the subject's criminal and immigration history. Specialists also use CAII to perform background checks on foreign born persons seeking to purchase or obtain firearms, and to process immigration status queries for federal employment investigations. The projects in the CAII investment are modernizing and adding additional functionality to the CAII system.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: TECS Case Management Modernization
PPA:
Program Increase: Positions 0, FTE 0, Dollars \$23,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	23,000
Total Request	-	-	14,310	-	-	6,510	-	-	23,000

Description of Item

The ICE TECS Case Management Modernization (CM-M) effort supports the investigative functions of ICE. Approximately 6,500 ICE Special Agents use the system to support ICE investigations. This modernization effort will allow ICE to meet its mission and avoid incurring additional future costs when CBP transitions off the TECS mainframe and begins using its modernized screening system.

Justification

The TECS Modernization program is composed of two separate, but related, modernization efforts managed by ICE and CBP. The TECS modernization effort will update a 30-year-old costly and difficult to sustain mainframe legacy system, giving ICE improved capabilities for case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, information sharing of subject record data and statistical/performance reporting.

By completing the initial core functions of the ICE portion of the TECS system, ICE will avoid an annual \$28 million legacy TECS O&M cost. Additionally, ICE expects that Agents will spend considerably less time accessing and inputting data using the revised platform, rendering more time for investigations.

Impact on Performance

The modernized TECS system will strengthen and unify DHS Operations and Management by increasing interoperability and improving operations, resource utilization and management decision making. The ICE portion of this effort, under the ICE TECS Modernization Program, will be a new Core Case Management System named “Patriot” that replaces ICE’s use of legacy TECS.

TECS Modernization functional improvements will include:

- Enhanced information sharing and access with other law enforcement agencies (Federal, tribal, state and local);
- Improved search capabilities through structured and unstructured queries;
- Data quality and integration through auto population of data between systems and removing duplicate data entry;
- Case management functionality by visually linking subjects and personalizing user homepage for quick access to desired information;
- Improved delivery of intelligence-driven and other situational data to the front line;
- Automated support for investigative, law enforcement, and intelligence reporting and dissemination of unclassified information; and
- Update user interface to streamline processes and simplify user interactions.

Additional technical improvements will include:

- Interoperability with other systems, including TECS Portal, Enterprise Acquisition Gateway for Leading Edge Solutions (EAGLE), Arrival Departure Information System (ADIS), Financial Crimes Enforcement Network (FinCEN), Authoritative ICE Data Warehouse (AIDW), CAII and external systems;
- Alignment to DHS/ICE architecture standards for long-term sustainability;
- Reduced support costs and flexibility to quickly meet evolving mission needs; and,
- Provide an environment with limited outages.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Criminal Alien Investigation Initiatives (CAII)
PPA:
Program Increase: Positions 0, FTE 0, Dollars \$4,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	4,000
Total Request	-	-	-	-	-	-	-	-	4,000

Description of Item

ICE has been working to modernize and expand the existing functionality provided by the legacy Alien Criminal Response Information Management (CAII) system that supports ICE’s Law Enforcement Support Center (LESC). CAII is used by Law Enforcement Specialists (LESs) to process queries received from ICE officers and agents and other law enforcement agencies to determine a subject’s criminal and immigration status, and to maintain ICE-issued warrants and lookouts within the FBI’s National Crime Information Center (NCIC) system.

The modernized CAII is an enterprise-based system that provides functionality not just to the LESL, but to ICE staff operating around the globe. It introduces new functionality that replaces manual processes currently used at the LESL to search other DHS and FBI systems, as well as provides a significant increase in data and automation to ICE Field Agents, reducing the time required for agents to independently verify status determinations provided by the LESL.

Justification

The modernization project will replace the legacy CAII system through a series of releases. ICE will continue to incrementally deploy upgraded and new functionality throughout FY 2013.

In FY 2014, an integrated telecommunications system for the LESL’s Communications Center that links the LESL’s telephone systems and CAII together to provide seamless interaction for live queries received from ICE officers and agents will be deployed. New entry screens that allow ICE Agents to request Warrants and/or Lookouts to be entered into the NCIC system will be deployed to replace paper-based processes that are currently used. Finally, full search capability will be provided to ICE

officers and agents enabling them to search DHS and FBI systems from a single integrated screen, as opposed to manually logging in and searching each of the systems independently, as well as a mechanism for ICE staff to conduct a history search of all queries previously issued for a particular suspect.

Impact on Performance

CAII modernization supports DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, and ICE Strategic Plan Objective 1.2: Removal of Individuals Posing a Security Threat, by providing solutions that assist the key customers, stakeholders and beneficiaries, including the LESC, ICE officers and agents, and other Federal, State, Local and Tribal law enforcement agents and officers. The increase in funding will ensure that required functionality is delivered.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Efficiencies in Modernization Investments
PPA:
Program Increase: Positions 0, FTE 0, Dollars \$4,400

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	4,400
Total Request	-	-	-	-	-	-	-	-	4,400

Description of Item

The Efficiencies in Modernization Investments program supports financial systems consolidation as part of the overall DHS effort to migrate to Shared Service Providers (SSP). Through this effort, ICE will spend:

- \$1M for Program Office Contract Support and, \$.5M for Acquisition Development and Evaluation Support to evaluate and define an acquisition strategy to meet the comprehensive capabilities for ICE and ICE Customers to migrate to a SSP solution. Migrating to a SSP solution will leverage existing government infrastructure and resources and assist in standardizing financial management practices government-wide.
- \$.5M to assist the Department to migrate to a potential shared service solution for small customers as directed. This includes vendor support to extract data and provide analysis for data migration. The implementation of certified, technologically advanced and reliable financial systems will contribute to DHS’s mission, strategic goals, and objectives.
- \$.5M to analyze Financial Data for compliance, data conversion, and archiving.
- \$1M to cleanse and archive data as well as conduct data analysis tasks to standardize and “clean” data to prepare for data conversion or migration to another solution. The data validation, preparation, and conversion activities will be critical to ensure financial data is reliable and audit-ready. This activity is critical to help DHS obtain and sustain a Clean Audit Opinion.

To develop a data warehouse to include improved reporting and decision support information for all government users as well as maintain a repository of historical financial transaction data, ICE will spend:

- \$.5M to define and develop data warehouse requirements and document data model.
- \$.2M Evaluate technical solutions in conjunction with shared service provider considerations.
- \$.2M Develop approach after analysis of source data and reconciliation requirements.

Justification

The Consolidated Solution Approach goal is to allow DHS to better manage its resources, provide enterprise-level information more quickly to better support critical decision making, reduce costs by eliminating redundant or non-conforming systems, and promote good business practices through standardization of processes and data where possible. This allows leadership, decision-makers, and their stakeholders to better-leverage DHS information assets to improve fact-based management of the Department's fiscal resources.

Impact on Performance

The modernization of the ICE financial system directly supports Goal 4 of the ICE Strategic Plan: Constructing an Efficient, Effective Agency. ICE is currently evaluating a move of the financial systems operations from an in-house proprietary system to a SSP environment in order to realize long-term savings on systems operations and maintenance costs and improved systems capabilities. To support this evaluation, ICE will prepare acquisition plans as well as investigate and implement process improvements and efficiencies in the current environment to better align operations with the end-to-end business processes. ICE will also work on data analysis tasks to improve the quality and access to our financial data to include the analysis required to implement a data warehouse solution. These efforts will assist ICE in preparing for a target solution and gain better understanding and access to our financial data for reporting and analysis.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Electronic Health Records Modernization
PPA:
Program Increase: Positions 0, FTE 0, Dollars \$3,500

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	3,500
Total Request	-	-	2,500	-	-	3,500	-	-	3,500

Description of Item

The objective of the Electronic Health Records (eHR) modernization effort is to replace multiple systems and manual processes with a centralized eHR system that supports comprehensive medical services management for ICE detainees. The eHR system will enable full life cycle oversight and management of detainee healthcare. The centralized eHR system will:

- streamline the care provided to detainees;
- automate medical documentation;
- enhance Immigration Health Services Corps medical management and oversight;
- enhance the standardization of care provided to detainees;
- reduce risk and liability of the overall system; and
- improve the accuracy and timeliness of Enforcement and Removal Operations (ERO) and IHSC metrics.

Clinical Decision Support (CDS) – funding will support implementation of CDS capabilities that will extend the base eHR system solution to support more effective risk management, increased standardization of care, and enhanced quality of care.

Justification

Medical encounters with detainees are recorded in paper-based systems and disparate IT applications throughout the ICE environment. The requested funds to implement CDS capabilities will reduce

costs and create efficiencies by providing timely treatment information that will guide medical and/or custody-related decisions, reporting of medical summaries, alerts, special needs of detainees, and medical history. Additionally the system will assist in creating a uniform and standard healthcare delivery method, including standard oversight and monitoring tools necessary to evaluate clinic operations.

The CDS tool will create:

- Reports, queries, alerts, and workflow necessary to achieve these goals, and will include support for additional medical terminologies;
- The ability to generate custom reports at both the facility and headquarters levels;
- Individual-, facility-, and organization-level dashboards;
- Additional workflows/protocols;
- The ability to define system-, patient-, provider-, and protocol-based alerts configurable at the facility and headquarters levels;
- Support for mental health and tele-health detainee services; and
- Interfaces to additional providers.

Impact on Performance The eHR program supports DHS QHSR Objectives 3.1 – Strengthen and Effectively Administer the Immigration System by ensuring compliance with and consistently implementing ICE policy in the field, providing safe detention conditions, addressing detainee healthcare delivery gaps, ensuring interoperability with other health reporting systems, eliminating duplication of services, and enhancing reporting capabilities.

V. Exhibits and Other Supporting Material
A. Justification of Proposed Legislative Language

For expenses of immigration and customs enforcement automated systems, [\$30,500,000] \$34,900,000, to remain available until September 30, [2017]2018.

Language Provision	Explanation

Automation Modernization Mission Statement

In FY 2013, ICE has included three information technology (IT) transformational initiatives in the Automation Modernization program: ICE Law Enforcement Systems Modernization - TECS Modernization, Detention and Removal Operations Modernization, and Electronic Health Records. The Automation Modernization program will allow ICE to improve information sharing across the DHS and ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$22	\$22	\$530	\$508

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. There is an increase in FY 2014 of \$508,000 to support Automation Modernization efforts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$13	\$13	\$21	\$8

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones. There is an increase in FY 2014 of \$8,000 to support Automation Modernization efforts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$2,680	\$2,700	\$12,602	\$9,922

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government. There is an increase in FY 2014 of \$9,922,000 to support Automation Modernization efforts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$3	\$3	\$4	\$1

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is an increase in FY 2014 of \$1,000 to support Automation Modernization efforts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$27	\$27	\$43	\$16

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is an increase in FY 2014 of \$16,000 to support Automation Modernization efforts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$18,965	\$9,017	\$21,700	\$2,735

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is an increase in FY 2014 of \$2,735,000 to support Automation Modernization efforts.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Construction

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

Immigration and Customs Enforcement (ICE) maintains 18 ICE-owned and directly leased facilities and provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Enforcement and Removal Operations (ERO) and other ICE programs and Department of Homeland Security (DHS) tenants. The construction account funds are available until expended.

B. Budget Activities:

With the Construction account, ICE has the authority to plan, design, and construct housing and processing, medical, administrative, and support facilities to support the detention of aliens, as well as perform repair and alteration of existing structures.

C. Budget Request Summary:

ICE requests \$5 million to fund critical repairs and maintenance. Critical projects include: items that pose a health or safety issue, items such as adding additional space in processing, medical, administrative, and support facilities, and capital and non-capital improvement projects to replace critical systems that are approaching their maximum life expectancy.

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Construction
Program Performance Justification**
(Dollars in Thousands)

PPA: Construction

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	-
2014 Current Services	-	-	-
2014 Program Change	-	-	5,000
2014 Total Request	-	-	5,000
Total Change 2012 to 2014	-	-	5,000

CURRENT SERVICES PROGRAM DESCRIPTION:

Construction resources are authorized for necessary expenses to plan, construct, renovate, equip, maintain, and repair ICE-owned facilities necessary for the administration and enforcement of the laws relating to customs and immigration. These ICE-owned facilities support the detention of aliens including general housing, medical screening, processing, administrative support and legal proceedings. These facilities accommodate approximately 3,700 ICE detainees, approximately 11 percent of the total population. In addition, ICE-owned facilities are utilized to support ICE field operations such as investigations, legal and administrative support functions. This includes Homeland Security Investigations (HSI), the Office of the Principal Legal Advisor (OPLA), the Office of Professional Responsibility (OPR), the National Firearms Tactical Training Unit (NFTTU), and others.

The ICE-owned portfolio consists of approximately 1.5 million square feet of space at eighteen (18) sites.

ERO, as the primary tenant, operates Service Processing Centers (SPCs) and related mission operations at six of the ICE-owned sites. The active SPC locations are: Batavia, NY; El Centro, CA; El Paso, TX; Florence, AZ; Miami, FL; and Los Fresnos, TX.

Other ICE-owned facilities include space for Border Enforcement Security Task Forces (BESTs), Criminal Alien Program (CAP) teams, the NFTTU, and tactical communications and other office space at these locations for ICE programs: Aguadilla, PR, San Pedro, CA, Altoona, PA, Broadview, IL, Calipatria, CA, Fishkill, NY, Guam, Honolulu, HI, Huntsville, TX, Oakdale, LA, St. Thomas, US Virgin Islands, and St. Croix, US Virgin Islands.

ICE Construction Program funds are multi-year, non-expiring funds. ICE annually reviews prior year spending to recover and redirect funds to accomplish critical repair and maintenance projects. Critical projects include the repair, replacement, or alteration of facilities to address health and safety as well as mission critical operational issues. Additionally, capital improvement projects are needed to replace critical systems that are approaching or have exceeded their maximum life expectancy (deferred maintenance). This includes updating mechanical systems and other important infrastructure necessary to maintain ICE operations.

In FY 2014, ICE will use any available carry-forward funds and \$5 million in new funding to perform the most critical repairs and alterations to maintain ICE-owned facilities to prevent building structures and systems from becoming severely defective and eventually costing substantially more to repair. As discussed below, ICE has identified the current most critical projects that will be prioritized and completed in FY 2014; this could change based on any health, life, or safety issues that may arise.

Plan/Milestones/Schedule

Facility	Work Description	Project Type	Amount
All Sites	Operations and Maintenance (O&M) Service Contract to provide the necessary structural maintenance and scheduled preventive maintenance to mechanical systems.	O&M	\$2,500,000
Batavia	Replace HVAC building B001.1. Recommended replacement frequency is 10 years. Current system is over 20 years old.	Critical Deferred Maintenance	\$1,000,000
El Centro	Replace 6 gate motors that have exceeded life expectancy, which currently negatively impact operations security and safety.	Critical Deferred Maintenance	\$285,000
El Paso	Replace damaged condensing coils on 34 HVAC units. Malfunction of HVAC could negatively impact facility operations, mission requirements, and health and safety.	Critical Deferred Maintenance	\$100,000
Florence	Repair window seals in the Administrative Building to control pests and conserve energy. Support HVAC performance and energy conservation.	Sustainability; Critical Deferred Maintenance	\$5,000
	Apply seal coat to pavement to prevent deterioration of the roads. Repairs and re-surface requirements should be on a 10 year. cycle. This allows continuing with the repairs schedule.	Critical Deferred Maintenance	\$7,500
	Remove and replace existing foam and coating roof system. Repairs are necessary to prevent major repairs and roof replacements at a higher cost.	Critical Deferred Maintenance	\$70,000
	Replace detention locks at Foxtrot building to have uniform locking system for additional detainee safety. Supports Detainees operations and Staff Safety.	Operational Security	\$24,000
	Replace 3 existing HVAC units at the Foxtrot Building. Recommended replacement cycle is 10 years. More efficient and energy star units will be installed.	Critical Deferred Maintenance	\$90,000
Honolulu	Procure new generator for power back up system. Backup power will support Detention and Investigations operations during emergencies or natural disaster situations at this site.	Operational Security	\$500,000

Description of Item

The ICE Construction Program supports ERO, HSI, OPLA, OPR, and the NFFTU. The program provides funds to build, maintain, and repair ICE-owned operational facilities, such as medical screening, processing, administrative, housing, and support facilities, needed to support the detention and processing of aliens.

The ICE-owned portfolio consists of approximately 1.5 million square feet of space at 18 sites. ERO, as the primary tenant, operates SPCs and related mission operations at six ICE-owned sites. These facilities accommodate approximately 3,700, or 11 percent, of ICE detainees. The other 12 owned locations are used to house and support ICE field operations such as the BESTs, CAP, and other investigations, legal, and administrative staff.

ICE requests \$5 million to provide for critical maintenance and repairs at these facilities.

Justification

ICE Construction Program funds are multi-year, non-expiring funds. ICE has diligently reviewed prior fiscal year spending to recover and redirect funds to accomplish most critical repairs for the last 3 years.

Critical projects include the repair, replacement, or alteration of facilities to address health and safety as well as mission-critical operational issues. Additionally, capital improvement projects are needed to replace critical systems that are approaching or have exceeded their maximum life expectancy (deferred maintenance). This includes updating mechanical systems and other important infrastructure necessary to maintain ICE operations.

ICE requests \$5 million to address the most critical maintenance and repair projects that pose a threat to the life and safety of detainees and ICE employees at ICE-owned facilities.

The request will provide for the following projects, which could change based on any health, life, or safety issues that may arise:

Facility	Work Description	Project Type	Amount
All Sites	Operations and Maintenance (O&M) Service Contract to provide the necessary structural maintenance and scheduled preventive maintenance to mechanical systems.	O&M	\$2,500,000
Batavia	Replace HVAC building B001.1. Recommended replacement frequency is 10 years. Current system is over 20 years old.	Critical Deferred Maintenance	\$1,000,000
El Centro	Replace 6 gate motors that have exceeded life expectancy, which currently negatively impact operations security and safety.	Critical Deferred Maintenance	\$285,000
El Paso	Replace damaged condensing coils on 34 HVAC units. Malfunction of HVAC could negatively impact facility operations, mission requirements, and health and safety.	Critical Deferred Maintenance	\$100,000
Florence	Repair window seals in the Administration Building to control pests and conserve energy. Support HVAC performance and energy conservation.	Sustainability; Critical Deferred Maintenance	\$5,000
	Apply seal coat to pavement to prevent deterioration of the roads. Repairs and re-surface requirements should be on a 10 year. cycle. This allows continuing with the repairs schedule.	Critical Deferred Maintenance	\$7,500
	Remove and replace existing foam and coating roof system. Repairs are necessary to prevent major repairs and roof replacements at a higher cost.	Critical Deferred Maintenance	\$70,000
	Replace detention locks at Foxtrot building to have uniform locking system for additional detainee safety. Supports Detainees operations and Staff Safety.	Operational Security	\$24,000
	Replace 3 existing HVAC units at the Foxtrot Building. Recommended replacement cycle is 10 years. More efficient and energy star units will be installed.	Critical Deferred Maintenance	\$90,000
Honolulu	Procure new generator for power back up system. Backup power will support Detention and Investigations operations during emergencies or natural disaster situations at this site.	Operational Security	\$500,000
Port Isabel	Renovate exterior of building dorms A, B, & C. Complete deferred scheduled preventive maintenance to avoid major	Critical Deferred Maintenance	\$75,000

	replacements at higher cost in the out years.		
San Pedro	Repair roadways and parking surfaces. Repairs and re-surface requirements should be a 10 year cycle.	Critical Deferred Maintenance	\$100,000
	Replace gate systems. Gates have been repaired on numerous occasions in the last few years. These require replacement to assure the operations safety and security of the site.	Operational Security	\$200,000
Other	Miscellaneous owned facility repairs to be included from the condition assessment report.		\$43,500
		Total	\$5,000,000

Impact on Performance (Relationship of Increase to Strategic Goals)

At the requested \$5 million funding level, ICE will remediate the most egregious issues listed above. ICE will work to identify recoveries of prior year funds to put toward remaining critical repair and maintenance projects.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, \$5,000,000, to remain available until expended.

Explanation of Changes:

G. Capital Investment and Construction Initiative Listing

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country.

The ICE Construction Program provides construction, maintenance, sustainment, and expansion of housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

Facility Repair & Alterations

1. Project Description, Justification, and Scope

Repair and alteration projects are continually identified at existing ICE-owned facilities. These projects are not capital construction projects, but maintenance, repair, and alteration projects necessary to maintain government-owned facilities and ensure they comply with safety and health code requirements in support to ICE tenant activities.

2. Significant Changes

In FY 2014, the Construction account will be used for deferred maintenance, emergency repairs and alterations, and approved capital improvements. Only critical repairs will be funded.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Student Exchange and Visitor Program

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Student Exchange and Visitor Program's (SEVP's) mission is to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool to assist in keeping our Nation safe while facilitating the participation of students and exchange visitors in the academic programs in the United States.

B. Budget Activities:

SEVP administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP also provides outreach and training for SEVIS users. SEVIS is used by the ICE, Homeland Security Investigations (HSI) Counter Terrorism and Criminal Enforcement Unit (CTCEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CTCEU identifies and investigates schools and exchange visitor programs that are not in compliance with regulatory requirements and crimes and fraud perpetrated by criminals and potential terrorists attempting to gain access to the U.S. through exploitation of SEVP non-immigrant visa status.

C. Budget Request Summary:

Immigration and Customs Enforcement (ICE) requests \$145,000,000, 387 positions and 355 FTE for SEVP in FY 2014. The requested funds will provide the resources needed to fund base requirements for salaries and benefits and operational expenses. A portion of SEVP collections will be used to develop and implement a plan to close remaining national security vulnerabilities and add necessary functionality to maintain SEVIS operations through an extended lifecycle. ICE will work closely with the Office of Program Accountability and Risk Management (PARM) and the Office of Chief Information Officer (OCIO) to coordinate approval of efforts to identify, plan, and coordinate all necessary system improvement, modernization, development, and procurement efforts.

Program Performance Justification**
(Dollars in Thousands)

PPA: Student Exchange and Visitor Program

	Perm. Pos	FTE	Amount
2012 Revised Enacted	387	289	120,000
2014 Adjustments-to-Base	-	66	25,000
2014 Current Services	387	355	145,000
2014 Total Request	387	355	145,000
Total Change 2013 to 2014	-	66	25,000

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$145 million, 387 positions, and 355 FTE to support current services for the Student Exchange and Visitor Program (SEVP). This includes an Adjustment to Base increase of \$25 million from the FY 2012 enacted amount. It also includes an increase of 66 FTEs. The FTE increase will enable SEVP to respond to GAO recommendations and will help support modernization improvements to the Student Exchange and Visitor Information System (SEVIS) to close remaining national security vulnerabilities. The increase in budget authority will fund the increase in FTEs, support SEVIS modernization efforts, and also help provide for non-FTE-related costs to improve records management and digitize school certification records, facilitate outreach support and training to academic institutions for recertification and compliance, increase monitoring of state accreditation status of SEVP-certified schools, increase coordination of school recertification and investigative procedures, improve risk assessments derived from investigations and lead generation identifying potential criminal and fraud activity. ICE does not plan to increase the fees for students, visitors, or schools in FY 2014. The additional \$25 million is available from prior year balances and increased collections.

QHSR Alignment

3.2
Prevent Unlawful Immigration

ICE Strategic Plan Alignment

3.4
Protect the Integrity of the Immigration System

Justification

Funding of \$90.4 million will be provided for SEVP Operations, including \$18.6 million for salaries, and \$71.8 million for expenses.

Funding of \$54.6 million will be provided for the HSI CTCEU, including \$34.6 million for salaries and \$20.0 million for expenses.

Description

The Student and Exchange Visitor Program (SEVP) enhances national security by managing the collection, maintenance, and use of information regarding F and M visa nonimmigrant foreign students and J visa exchange visitors. SEVP certifies schools to enroll F and M visa students. The Department of State designates exchange visitor programs. SEVP facilitates F and M visa student participation in academic and vocational programs in the United States while ensuring that school certification is not used to permit aliens to illegally enter and reside in the United States. SEVP does withdraw a school's permission and ability to bring any additional international students into the United States when necessary. Some are withdrawn because they have closed, gone out of business, or voluntarily asked to be withdrawn from SEVP certification. Others are withdrawn by SEVP for failure to comply with policies, regulations, and/or statutes. When SEVP withdraws a school that has international students currently attending, limited access is granted to SEVIS for a specified period of time to properly process the students to another SEVP approved academic institution or process them for return to their home country. SEVP information, combined with information from law enforcement data systems, is fundamental to identify and investigate immigration benefit fraud perpetrated by individuals and schools or programs attempting to exploit or harm the United States and its people.

As of the end of 2012, U.S. Immigration and Customs Enforcement (ICE) recertified 2,171 schools and withdrew certification for 1,154 schools. There are 2,011 schools that are currently in the process for recertification and 4,482 schools that are pending notification for recertification.

Student and Exchange Visitor Program (SEVP) Highlights

School Recertification Program

The Enhanced Border Security and Visa Entry Reform Act of 2002 mandated that the Department of Homeland Security (DHS) conduct recertification of certified schools every two years. SEVP reviews previously certified schools and adjudicates the recertification to affirm compliance with recordkeeping, retention, and reporting regulations and requirements. The focus of recertification is past performance coupled with a review to ensure that the school maintains its basic eligibility for initial certification. The process may include an on-site review. As of March 26, 2013 9,726 schools are currently certified by SEVP.

Field Representatives

SEVP has developed a Field Representative initiative to recruit and develop a highly trained nationwide cadre of Field Representatives to coordinate the operation of the SEVIS system and the deployment of improvements to SEVIS. The Field Representatives will provide comprehensive training to ensure stakeholder understanding, acceptance, and compliance with immigration laws, regulations and SEVP policies and procedures, as well as the stakeholder benefits of SEVIS and potential SEVIS improvements. They will receive a full regimen of training in all aspects of SEVP to provide full-service to stakeholders regarding the application of immigration law with respect to SEVP and SEVIS deployment. The Field Representatives will be located in ICE Special Agent-In-Charge offices across the United States to ensure proximity and availability to stakeholders including over

10,000 SEVP certified schools. The Field Representative initiative will help SEVP establish a more proactive relationship with stakeholders that will foster communication, optimal compliance with immigration laws and regulations, and greater data integrity in SEVIS.

ICE Counterterrorism and Criminal Exploitation Unit

SEVP plays a key role in the efforts of ICE to prevent terrorists and other criminals from exploiting our nation's immigration and visitor system. The CTCEU is part of ICE's Homeland Security Investigations program. CTCEU uses SEVIS data to identify F and M students and J exchange visitors who fail to enroll in school or their program, maintain their status or otherwise violate the terms of their visa status. CTCEU analyzes and refers school fraud criminal investigation leads to the respective ICE field office. It implements and manages an Agent/SEVIS School Outreach Program that educates others about potential SEVP exploitation. During FY 2012, HSI Special Agents initiated 910 outreach presentations to SEVP approved academic institutions nationwide. The program also improves communication between designated school officials and HSI field agents and provides subject matter expertise to partnering agencies when exploitation is suspected. For FY2012, CTCEU analyzed 406,041 SEVIS leads, reviewed 558 SEVP approved academic institutions for possible identification of fraud anomalies, referred 25 SEVIS-approved academic schools and 30 flight schools to HSI field offices for criminal investigation, and responded to 61 requests for analysis to support major criminal school fraud cases.

Student and Exchange Visitor Information System (SEVIS)

SEVP administers SEVIS, which allows ICE to collect, maintain and provide information on foreign students, exchange visitors and their dependents on F, M, and J visas while studying in the United States. SEVIS also maintains information on the schools and program sponsors authorized to use SEVIS and provide certificates of eligibility to F and M students and J exchange visitors. SEVIS assists in the identification of those who are not in compliance with the rules governing their class of admission or immigration law or who may be a threat to national security.

SEVIS is a web-based system that provides real-time, up-to-date information on nonimmigrants in F, M, and J visa classes of admission. The system can be accessed at any time, making it an effective law enforcement tool used by other agencies within DHS and the Departments of State (DOS) and Justice. SEVIS is used by the ICE CTCEU to identify F and M students and J visa exchange visitors who fail to enroll or otherwise fail to maintain their immigration status. SEVP and CTCEU also use SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements. Information maintained in SEVIS is instrumental in supporting ICE's role in conducting immigration fraud and human smuggling investigations that identify and prosecute criminal organizations involved in the transporting and harboring of illegal aliens into the United States. In prior years, SEVP has implemented several updates to SEVIS, adding functionality and improving performance.

In cooperation with the DHS Acquisition Review Board (ARB) and in accordance with the February 14, 2013 Acquisition Decision Memo, ICE is assessing how we can address the remaining national vulnerabilities in SEVIS. The assessment solely addresses vulnerabilities and stability requirements of SEVIS. ICE will restructure and refocus SEVIS improvement and modernization efforts. The first

priority is to improve the existing SEVIS capability to eliminate remaining vulnerabilities. This will include developing a project plan employing a modular/agile approach to update SEVIS, close vulnerabilities, stabilize operation, add necessary functionality, and maintain operation of SEVIS for an extended life cycle. Once SEVIS vulnerabilities are closed, there may be additional analysis and consideration to determine whether to pursue a future modernized replacement system with expanded capabilities.

SEVP Fees

All SEVP operations, including services provided by other ICE offices, are paid for by fees collected from students, exchange visitors and schools. No appropriated funds are used to support SEVP. All prospective students and exchange visitors are required to pay an SEVP processing fee using the Form I-901 prior to seeking a visa at consulates and embassies overseas. Current fees are \$200 for F and M visa holders and \$180 or \$35 for J visa exchange visitors, depending on the purpose of their visit. This fee, in addition to the fees collected from schools seeking certification to host F and M students, provides the full funding for SEVP, including CTCEU agents that support enforcement of SEVP policies and regulations.

Statutory and regulatory guidance requires SEVP to review its fee structure every two years to ensure that the costs of the services that are provided are fully captured by fees assessed on those receiving the services. The latest fee study was completed in the 2nd Quarter of FY 2012. The study concluded that no immediate fee increase will be required for FY 2013- FY 2014.

In addition, ICE requests \$25 million in additional budget authority to expend prior year carryover balances. These funds were collected but not spent due to delays in planned acquisitions and associated recruitment of field representatives and school recertification analysts.

FY 2014 Planned Activities

ICE will use the funds to refocus the approach to SEVIS modernization efforts to close vulnerabilities and identify and prioritize long-term systems operations and development needs and options; recruit 4 analysts to strengthen the school recertification processes; recruit 62 field representatives to improve customer assistance to students and academic institutions seeking recertification and to establish a culture of compliance within the SEVP user community; provide field training for academic institutions subject to recertification and as well as the deployment of SEVIS improvements; support the Academic Engagement Initiative to encourage the “best and brightest” foreign students to study in the United States; implement Program Wide Digitization Initiative to accelerate the digitization of paper based school certification case files.

Funds will also be used to complete the implementation of all Government Accountability Office (GAO) report recommendations to Assess Risks and Strengthen Oversight Functions:

- Develop and implement processes to identify and assess risks using information identified in CTCEU and field office investigations to evaluate non-compliance and fraud patterns and trends for use in recertification reviews

- Implement risk-based analysis for allocation of SEVP resources to determine appropriate position deployment for recertification and compliance efforts. Recruitment will begin in FY 2013
- Implement procedures to ensure mandatory verification of schools that use letters in-lieu of accreditation for all school certifications
- Implement procedures to identify and address missing and incomplete case files and obtain documentation for school certification case files missing evidence, and taking necessary compliance actions
- Implement procedures to monitor state accreditation status of all SEVP-certified schools and conduct frequent validation of status to ensure compliance with certification requirements
- Establish target timeframes to notify SEVP-certified flight schools that lack Federal Aviation Administration (FAA) certification that they need to obtain FAA certification and establish procedures to identify SEVP-certified flight schools that lose their FAA certification
- Revise standard operating procedures to improve and coordinate information sharing during investigations and school recertification actions
- Establish criteria for referring potential criminal or fraud activity and leads for investigation

Procurement Activities

FY 2012 Activity Funding 19,308 <i>HSI</i>	FY 2013 Activity Funding 31,647 <i>HSI</i>	FY 2014 Activity Request 39,840 <i>HSI</i>
<i>Student & Exchange Visitor Information System (SEVIS) (P)</i>	The Student and Exchange Visitor Program (SEVP) is a unit within ICE's Homeland Security Investigations (HSI) Office. The OCIO SDD FPS/SEVP IT Systems Branch provides IT services to HSI SEVP through current operations and maintenance of the Student and Exchange Visitor Information System (SEVIS). SEVIS is a web-based system that collects, maintains, and provides current information on nonimmigrant foreign students, exchange visitors, and their dependents while in the United States. The SEVP IT Systems Branch manages the acquisition activities surrounding SEVIS modernization and development efforts.

Student Exchange and Visitor Program Mission Statement

The Student and Exchange Visitor Program (SEVP) administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	20,831	29,185	32,614	11,783
11.3 Other than full-time permanent	80	-	-	-80
11.5 Other personnel compensation	3,598	7,746	5,882	2,284
12.1 Benefits	9,851	11,585	14,719	4,868
Total, Salaries & Benefits	34,360	48,516	53,215	18,855

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$446	\$1,327	\$2,727	\$2,281

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$25	\$65	\$65	\$40

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$6,520	\$6,520	\$6,817	\$297

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$777	\$1,210	\$1,210	\$433

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$21,514	\$29,096	\$44,378	\$22,864

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$23,950	\$6,328	\$7,377	\$-16,573

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$4,032	\$4,733	\$6,396	\$2,364

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$67	-	-	-\$67

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$24,534	\$17,265	\$17,265	-\$7,269

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$874	\$1,986	\$1,986	\$1,112

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$2,895	\$3,564	\$3,564	\$669

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
91.0 Unvouchered	\$6	-	-	-\$6

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement to informants, which are not subject to detailed vouchering or reporting.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Breached Bond Detention Fund**

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8 million in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of \$8 million are deposited as offsetting collections into this fund.

B. Budget Activities:

Amounts deposited into the Breached Bond Detention Fund can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in their obligations, and for expenses associated with the detention of criminal and illegal aliens. Funds remain available until expended.

C. Budget Request Summary:

For FY 2014, ICE requests \$65,000,000 for new collections and corresponding spending authority. ICE uses this money as part of its overall detention budget, and in FY 2014, \$55 million of this funding will allow ICE to fund an estimated 1,266 detention beds and related costs such as healthcare and compliance oversight.

(Dollars in Thousands)

PPA: Breached Bond Detention Fund

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	75,000
2014 Adjustments-to-Base	-	-	(10,000)
2014 Current Services	-	-	65,000
2014 Total Request	-	-	65,000
Total Change 2012 to 2014	-	-	(10,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Breached Bond Detention Fund is authorized by Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund.

The first \$8,000,000 in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of the first \$8,000,000 are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, are available for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of aliens.

At the end of FY 2012, ICE had almost 145,000 bonds for illegal aliens outstanding worth \$825 million. Throughout FY 2012 approximately 8,300 were breached. This resulted in collections of \$48 million.

In FY 2014, ICE will use \$55,000,000 of these resources to fund 1,266 detention beds, using a projected \$119.00 average daily rate of detention, which includes related costs such as healthcare. The remaining resources will be used to support the Bond Management Unit (BMU), administration of the Breached Bond program, and other allowable costs. The BMU supports field operations by providing guidance related to immigration bond management, and ensures field compliance with bond laws,

regulations, policies, and procedures through training, site visits, and technical oversight. The BMU also coordinates with other ICE programs to facilitate the timely resolution of bond litigation issues as well as financial reporting to ICE leadership.

Breached Bond Detention Fund Mission Statement

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$5,203	\$2,959	\$2,500	-\$2,703

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. There is a decrease in FY 2014 of \$2,703,000 due to a reduction in anticipated collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$10	-	-	-\$10

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. There is a decrease in FY 2014 of \$10,000 due to a reduction in anticipated collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$155	-	-	-\$155

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government. There is a decrease in FY 2014 of \$155,000 due to a reduction in anticipated collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$387	\$2,500	\$2,500	\$2,113

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is an increase in FY 2014 of \$2,113,000 for contract service requirements.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$67,553	\$70,000	\$60,000	-\$7,553

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account. There is a decrease in FY 2014 of \$7,553,000 due to a reduction in anticipated collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$198	-	-	-\$198

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is a decrease in FY 2014 of \$198,000 due to a reduction in anticipated collections.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$1,494	-	-	-\$1,494

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is a decrease in FY 2014 of \$1,494,000 due to a reduction in anticipated collections.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Immigration Inspection User Fees**

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Immigration and Customs Enforcement (ICE) Immigration Inspection User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C. 1103, 1356, Section 286, the Immigration and Nationality Act. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. Funds in the Immigration Inspection User Fee account remain available until expended.

B. Budget Activities:

The Immigration Inspection User Fee will fund 1,220 detention beds in Fiscal Year (FY) 2014.

C. Budget Request Summary:

ICE requests \$135,000,000 in spending authority for FY 2014. The requested funds will finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

(Dollars in Thousands)

PPA: Immigration Inspection User Fees

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	116,869
2014 Adjustments-to-Base	-	-	18,131
2014 Current Services	-	-	135,000
2014 Total Request	-	-	135,000
Total Change 2013 to 2014	-	-	18,131

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2014, ICE requests \$135 million budget authority and no positions or FTE for Immigration Inspection User activities. This reflects a total adjustment to base increase of \$18.1 million which includes \$3.1 million growth in fee collections based on increased passenger volume and \$15 million in planned obligations of prior year collections.

Planned spending of prior year obligations is based on the Immigration and Nationality Act, §286, which allows for reimbursement of costs related to the expansion, operation, and maintenance of information technology systems for non-immigrant control. The carryover funding will be used for three Information Technology purposes:

- Fund IT sustainment costs for users supporting the non-immigrant enforcement lifecycle,
- Enhance enterprise case management system for the Office of the Principal Legal Advisor (OPLA) which will integrate OPLA, ERO and EOIR data, and
- Create an ICE and Customs Enforcement enterprise-wide data array warehouse linking data for all actors in the immigration enforcement process to provide event-driven business capabilities.

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove

passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass:

- expanding, operating, and maintaining information systems for non-immigrant control;
- detecting fraudulent documents used by passengers traveling to the United States;
- investigating crimes relating to admissibility and establishing the government's legal position regarding all detentions;
- representing the government in all legal proceedings involving immigration and admissibility;
- transporting detained aliens who arrive at air and sea ports-of-entry to immigration legal proceedings;
- providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry;
- providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and
- program oversight and management.

Fee collections are increasing over prior years due to the gradual increase in tourist and business travel. The adjustment to base increase of \$3.1 million provides ICE additional budget authority to use this funding.

In FY 2014, ICE will use \$53,000,000 of these resources to fund 1,220 detention beds and related expenses such as healthcare. The remainder of the funds will be split between other expenses such as investigations, legal proceedings, intelligence gathering, alien transportation, and systems for non-immigrant control.

ICE requests \$15 million in additional budget authority for the one-time use of unexpended prior year balances as carryover funding. In FY 2014, ICE will use up to \$15 million in carryover funding to expand, operate, and maintain information technology systems for non-immigrant control as provided for in the Immigration and Nationality Act, §286. Specifically, ICE will use this carryover funding to sustain its IT infrastructure, the backbone of all non-immigrant control systems. In addition, ICE will continue to expand efforts to improve systems dedicated to non-immigrant control and management. ICE will build a new data warehouse that will capture event-driven investigative and enforcement data that will link and integrate data from existing non-immigrant control systems. This data array warehouse will provide ICE with an event-driven business intelligence capability, which it currently lacks. Such a system will also provide improved analytic capabilities to enable efficient responses to congressional and administration data requests. ICE will also enhance and expand efforts to improve data analysis by building OPLA IT capabilities. Currently, OPLA systems handle rudimentary case management functions, that cannot easily be linked to other ICE IT systems to perform powerful analysis, reporting, and coordination of the many types of cases managed by OPLA attorneys. By enhancing its legal IT systems, ICE will be better able to manage its non-immigrant proceedings and better target its legal resources on those areas that can provide the greatest return.

Immigration Inspection User Fees Mission Statement

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$540	\$540	\$673	\$133

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. There is an increase in FY 2014 of \$133,000 due to anticipated collections and usage of carryover balances.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$643	\$643	\$654	\$11

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones. There is an increase in FY 2014 of \$11,000 due to anticipated collections and usage of carryover balances.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$189	\$189	\$6,239	\$6,050

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government. There is an increase in FY 2014 of \$6,050,000 due to anticipated collections and usage of carryover balances.

A. Component Overview

Immigration and Customs Enforcement (ICE) is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Enforcement and Removal Operations (ERO): This program enforces the Nation's immigration laws by identifying and apprehending removable aliens, detaining these individuals when necessary, and removing them from the United States. To protect public safety and national security, ICE prioritizes the removal of individuals who pose a danger to national security or a risk to public safety, including aliens convicted of crimes, with particular emphasis on violent criminals, felons, and repeat offenders.

Homeland Security Investigations (HSI): This program conducts criminal investigations to protect the United States against terrorist and other criminal organizations that threaten public safety and national security; combats transnational criminal enterprises that seek to exploit America's legitimate trade, travel, and financial systems; and upholds and enforces America's customs and immigration laws at and beyond our Nation's borders.

Automation Modernization: This program includes several information technology (IT) transformational initiatives: TECS Modernization, Detention and Removal Operations IT Modernization (DROM), and Electronic Health Records (e HR). The Automation Modernization program will: improve information sharing within the Department of Homeland Security (DHS) and across ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

Management and Administration: The Office of Management and Administration (M&A) directs, plans, and coordinates key mission support and business functions of U.S. Immigration and Customs Enforcement. The executive associate director for M&A has direct supervision of the chiefs of finance, information technology, procurement, human capital; officers of privacy, freedom of information act; as well as the offices of firearms, policy, training, chief diversity, and equal opportunity. Additionally, the Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission.

Construction: This program provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Enforcement and Removal Operations activities. The Construction account funds are available until expended.

FY 2014 Budget Request

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the Immigration and Customs Enforcement programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Enforcement and Removal Operations (ERO)	0%	0%	100%		0%		
Homeland Security Investigations (HSI)	10%	60%	22%	4%	0%	2%	2%
Automation Modernization	19%	37%	44%				
Management and Administration	0%	7%	42%	0%	1%		50%
Construction			100%				

Mission 1: Preventing Terrorism and Enhancing Security

Resources Requested

Immigration and Customs Enforcement resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

Immigration and Customs Enforcement - Strategic Context

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Enforcement and Removal Operations (ERO)	30	0	30	0	27	0
Homeland Security Investigations (HSI)	219,333	1,000	220,686	1,000	201,633	952
Automation Modernization	3,578	0	1,628	0	5,750	0
Management and Administration	728	10	1,096	10	654	10
Total	223,668*	1,010	223,440*	1,010	208,064*	962

*Totals account for rounding.

Performance Measures

ICE contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Mission 2: Securing and Managing Our Borders

Resources Requested

Immigration and Customs Enforcement resources supporting *Securing and Managing Our Borders* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Enforcement and Removal Operations (ERO)	531	1	534	1	477	0
Homeland Security Investigations (HSI)	1,417,922	5,279	1,314,242	5,509	1,223,186	5,255
Automation Modernization	7,155	0	3,255	0	11,500	0
Management and Administration	38,931	51	38,833	51	37,854	49
Total	1,464,539*	5,330	1,356,863*	5,560	1,273,017*	5,305

*Totals account for rounding.

Performance Measures

For *Securing and Managing Our Borders*, strategic performance measures are presented. Strategic Performance Plan Measures represent measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures.

Strategic Performance Plan Measures

Measure: Percent of transnational gang investigations resulting in the disruption or dismantlement of high-threat transnational criminal gangs						
Description: This measure reports on the percent of transnational gang investigations resulting in the disruption or dismantlement of high-threat transnational criminal gangs. "Transnational gang" is defined as members within a transnational criminal organization linked to gang activity as defined by the Racketeering Influenced Corrupt Organization (RICO) and/or the Violent Crime in Aid of Racketeering (VICAR) statutes. "Disruption" is defined as impeding the normal and effective operation of the targeted organization. "Dismantlement" is defined as destroying the organization's leadership, financial base and network to the degree that the organization is incapable of operating and/or reconstituting itself. To impact the result of this measure ICE has developed and implemented anti-gang initiatives focused on violent criminal activities and on crimes with a nexus to the border.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	15%	16%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of transnational drug investigations resulting in the disruption or dismantlement of high-threat transnational drug trafficking organizations or individuals						
Description: This measure will report on the percent of transnational drug investigations resulting in the disruption or dismantlement of high-threat transnational drug trafficking organizations/individuals. "Transnational drug trafficking organization" is defined by the U.S. Department of Justice (DOJ) as those organizations on approved Consolidated Priority Organizational Target (CPOT) or Regional Priority Organizational Target (RPOT) lists or those who are earning, laundering, or moving more than \$10 million a year in drug proceeds. "Disruption" is defined as impeding the normal and effective operation of the targeted organization. "Dismantlement" is defined as destroying the organization's leadership, financial base and network to the degree that the organization is incapable of operating and/or reconstituting itself. To impact the result of this measure, ICE established international partnerships to link global customs and law enforcement agencies.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	11%	12%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of transnational child exploitation or sex trafficking investigations resulting in the disruption or dismantlement of high-threat child exploitation or sex trafficking organizations or individuals						
Description: This measure reports the percent of transnational child exploitation or child sex						

trafficking investigations resulting in the disruption or dismantlement of high-threat criminal organizations/individuals. "Child exploitation" is defined as manufacturing and distributing sexual or perverted acts or images of children under the age of 18. "Disruption" is defined as impeding the normal and effective operation of the targeted organization. "Dismantlement" is defined as destroying the organization's leadership, financial base and network to the degree that the organization is incapable of operating and/or reconstituting itself. ICE has established a Child Exploitation Investigations Center (CEIC) to serve as a central coordination point for state, local, and tribal offices, the National Center for Missing and Exploited Children, and other federal law enforcement agencies, as well as international law enforcement agencies dedicated to combating the sexual exploitation of children.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	20%	21%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Mission 3: Enforcing and Administering Our Immigration Laws

Resources Requested

Immigration and Customs Enforcement resources supporting *Enforcing and Administering Our Immigration Laws* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Enforcement and Removal Operations (ERO)	3,055,940	7,802	3,065,120	7,523	2,745,295	7,138
Homeland Security Investigations (HSI)	472,508	2,029	463,108	2,031	446,971	2,016
Automation Modernization	10,978	0	6,828	0	13,650	0
Management and Administration	354,308	3,090	402,023	3,262	226,660	3,055
Construction	0	0	0	0	5,000	0
Total	3,893,734*	12,921	3,937,078*	12,816	3,437,531*	12,209

*Totals account for rounding.

Performance Measures

For *Enforcing and Administering Our Immigration Laws*, two types of performance measures are presented. Strategic Performance Plan Measures represent Immigration and Customs Enforcement’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Average length of stay in detention of all convicted criminal aliens prior to removal from the United States (in days)						
Description: This measure provides an indicator of efficiencies achieved in working to drive down the average length of stay for convicted criminals in ICE's detention facilities. Decreases in the average length of stay can significantly reduce the overall costs associated with maintaining an alien population prior to removal.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=38	<=35.0	<=35.0	<=34.5
Result:	N/A	N/A	34.7	31.9	N/A	N/A

Measure: Number of convicted criminal aliens removed per fiscal year						
Description: This measure includes removals from the U.S. under any types of removal order as well as voluntary returns of immigration violators to their country of origin. This measure reflects the full impact of program activities to ensure that criminal aliens identified in the country, that are amenable to removal do not remain in the U.S. (statistical tracking note: Measure equals the case status with a departure date within the fiscal year, filtered by criminality and exiting ERO Criminal Alien Program codes.)						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	180,000	220,350	224,000	227,360
Result:	N/A	N/A	216,698	225,390	N/A	N/A

Measure: Number of employers audited, sanctioned, or arrested for violating immigration-related employment laws or otherwise brought into compliance with those laws						
Description: This measure is a cumulative result of enforcement-related actions against employers that hire illegal labor. Enforcement-related actions include criminal arrests, audits, and final orders of fines of employers related to worksite enforcement. This measure demonstrates the impact of worksite enforcement operations to ensure that employers do not violate immigration-related employment laws.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	1,800	1,854
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Immigration and Customs Enforcement - Strategic Context

Measure: Percent of aliens arrested or charged who will be electronically screened through Secure Communities						
Description: Biometric information sharing between the Department of Justice fingerprint database (IAFIS) and the DHS immigration database (IDENT) allows a single query by a participating local law enforcement agency to check both systems and confirm the identification and immigration status of a subject. This measure gauges the percent of all aliens arrested in the United States that are screened through Secured Communities.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	80%	96%	100%	100%
Result:	N/A	N/A	75.57%	97.96%	N/A	N/A

Measure: Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection						
Description: This measure gauges the percent of detention facilities that have received an overall rating of acceptable or above within the Enforcement and Removal Operations (ERO) National Detention Standards Program. The National Detention Standards were originally issued in September 2000 to facilitate consistent conditions of confinement, access to legal representation, and safe and secure operations across the immigration detention system. The standards have been updated into a performance based format known as the Performance Based National Detention Standards. Through a robust inspections program, the program ensures facilities utilized to detain aliens in immigration proceedings or awaiting removal to their countries do so in accordance with the Performance Based National Detention Standards.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	90%	94%	100%	100%
Result:	N/A	N/A	95%	97%	N/A	N/A

Management Measures

Measure: Average daily population of illegal aliens maintained in detention facilities						
Description: Average Daily Population (ADP) - Midnight count man-days is based on Midnight Count. A MANDAY is based on whether a subject is in an ERO detention facility for the midnight count. For every subject in a facility for the midnight count corresponds to one MANDAY. The ADP is the number of mandays for a given time period, divided by the number of days in that time period. MIRP and ORR facilities are not included. Average daily population is congressionally mandated at 34,000 in FY 2013.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	33,588	34,000	34,000	31,800
Result:	N/A	N/A	33,330	34,260	N/A	N/A

Measure: Estimated average bed cost per day						
Description: All costs associated with directly or indirectly supporting the maintenance of detention beds. These include bed and detention guard contracts; contracts for detainee provisions, healthcare, building maintenance, etc. These costs also include headquarters support						

Immigration and Customs Enforcement - Strategic Context

and oversight for detention operations.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=\$119.50	<=\$122.00	<=\$122.00	<=\$119.00
Result:	N/A	N/A	\$112.83	\$118.14	N/A	N/A

Measure: Number of aliens removed convicted of the most serious crimes (level 1 offenders)						
Description: This measure indicates the number of aliens who have been convicted of the most serious crimes, known as level 1 offenders, that have been removed from the United States.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	63,000	80,050	85,000	86,000
Result:	N/A	N/A	75,086	77,954	N/A	N/A

Mission 4: Safeguarding and Securing Cyberspace

Resources Requested

Immigration and Customs Enforcement resources supporting *Safeguarding and Securing Cyberspace* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Homeland Security Investigations (HSI)	91,250	403	90,108	403	80,289	386
Automation Modernization	0	0	0	0	0	0

Performance Measures

ICE contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Maturing and Strengthening the Homeland Security Enterprise

One of the Department's objectives is to improve DHS's organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters components, enhanced programmatic alignment to the homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

Resources Requested

Immigration and Customs Enforcement resources supporting *Maturing and Strengthening the Homeland Security Enterprise* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Aviation Security

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Aviation and Transportation Security Act (ATSA), P.L. 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the Nation's transportation systems to ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols.

B. Budget Activities:

Screening Operations

Screening Operations includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the Transportation Security Officer (TSO) workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment, to include Advanced Imaging Technology (AIT), Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD) machines.

Aviation Direction and Enforcement

Aviation Direction and Enforcement includes activities that ensure TSA continues to build a strong security regulation and enforcement presence on-site at the Nation's commercial airports. Funding requested supports air cargo and airport/airline regulation compliance through scheduled and risk based special inspections, international programs, quality assurance programs, and airport management administrative support staff.

Terrorism in the aviation domain is an enduring and highly adaptive threat. Terrorists study our vulnerabilities to learn how to exploit our procedural and technological security gaps to increase the lethality and political impact of their attacks. Aviation continues to be a target of coordinated terrorist activity and despite all efforts and advances in intelligence, technology, and screening processes, the threat to the U.S. transportation sector remains high. Examples include the 2010 attempted bombing of a cargo jet using a bomb disguised as an ink jet cartridge, the 2009 attempted attack of Northwest Airlines Flight 253 from Amsterdam to Detroit on Christmas Day, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from multiple foreign airports in December 2003.

Since its inception, TSA has significantly reduced terrorist threats through a multi-layered, risk-based, intelligence-driven approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology. TSA's risk-based, intelligence-driven screening approach is based on the following premises:

- These efforts will enhance security at the Nation's airports;
- The majority of airline passengers are low risk;
- By having passengers voluntarily provide more information about themselves, TSA can better segment the population in terms of risk;
- Behavior detection and interviewing techniques should be strengthened in the screening process;
- TSA must continue its efforts to optimize screening processes and use of technology to gain system-wide efficiencies; and,
- TSA must better calibrate operational responses to specific threat information.

TSA continues to explore new procedures and technologies to learn more about the individuals who fly and tailor security accordingly while balancing five overarching objectives:

The vision of risk based security is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to focus its resources and

improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence driven screening procedures and enhancing the use of technology.

TSA's risk-based security approach reflects a variety of diverse initiatives and efforts. One of the most visible, TSA Pre✓™, places more focus on pre-screening individuals who volunteer to participate in order to expedite the travel experience. First implemented as a proof of concept in October 2011, TSA Pre✓™ has since expanded nationwide as a pre-screening initiative that makes risk assessments on passengers who voluntarily participate prior to their arrival at the airport checkpoint. Participants include U.S. citizens who are members of existing Customs and Border Protection (CBP) Trusted Traveler programs as well as eligible airline frequent travelers. If TSA determines a passenger is eligible for expedited screening, information is embedded in the barcode of the passenger's boarding pass. TSA reads the barcode at designated checkpoints and the passenger may be referred to a lane where they will undergo expedited screening. TSA Pre✓™ expedited screening procedures include options such as no longer removing shoes, leaving laptops in the bag, leaving on light jackets/outerwear and belts, and leaving compliant liquids/aerosols/gels in the carry-on bag.

In calendar year 2012, TSA achieved the goal of expanding TSA Pre✓™ to 35 airports. By December 2012, approximately 8 percent of individuals processed at our checkpoints each day received expedited screening through either TSA Pre✓™, Known Crew Member, military personnel, and age-based screening protocols. TSA's priority for 2013 is to build upon this success with a goal of achieving a three-fold increase in the percentage of individuals provided expedited screening by the end of calendar year 2013. TSA has a variety of endeavors planned for 2013 to promote risk-based security objectives, the focus of which includes the following initiatives:

- Implementing Managed Inclusion at airports with Passenger Screening Canine (PSC) teams. Managed Inclusion enables passengers to qualify for expedited screening in a TSA Pre✓™ lane which uses canines to select travelers not already part of a trusted traveler program. Behavior Detection Officers (BDOs) are participating in this process to ensure that passengers exhibiting behavioral indicators (that may indicate high-risk) are sent to standard screening and excluded from the Pre✓™ lane.
- Expanding air carrier participation in TSA Pre✓™ and provide transportability of TSA Pre✓™ eligibility across all participating carriers.
- Providing TSA Pre✓™ enrollment opportunity for DHS and other cleared Federal Government personnel.
- Extending expedited screening benefits to eligible travelers on outbound international flights.

Airports Currently Offering TSA Pre✓™	
Baltimore/Washington International Thurgood Marshall (BWI)	Logan International Airport (BOS)
Charlotte Douglas International Airport (CLT)	Los Angeles International Airport (LAX)
Chicago O'Hare International Airport (ORD)	Luis Muñoz Marín International Airport (SJU)

Total Airports Currently Operating with TSA Pre✓™: 35	

Airport security checkpoints are only one part of a multi-layered system for aviation security. Other parts, both seen and unseen by the public, include intelligence gathering and analysis, BDOs, explosives detection canine teams, Federal Air Marshals, and closed-circuit television monitoring. In order to retain a certain element of randomness to prevent terrorists from gaming the system, TSA always incorporates random and unpredictable security measures throughout the airport and no individual will be guaranteed expedited screening. Expanding expedited screening and aligning our technology and risk-based security programs improves the travel experience for trusted travelers and is fundamental to TSA's evolution to a high performing counterterrorism organization.

C. Budget Request Summary:

The Transportation Security Administration requests 56,600 positions, 52,484 FTE, and \$4,968,036,000 in gross discretionary appropriated funding for the Aviation Security appropriation in FY 2014. This appropriation also includes an additional \$250 million in mandatory fee collections (0 FTP/FTE) for a total budget authority of \$5,218,036. The total adjustment-to-base includes an

increase of 100 positions, 2,322 FTE, and \$39,568,000 in appropriated funding, and a decrease of 2,249 positions, 1,605 FTE and \$325,060,000 in program changes including:

- Reduction of \$27,600,000 for screening technology maintenance;
- Reduction of \$116,815,000 for explosive detection systems (EDS) procurement and installation;
- Reduction of \$43,921,000 for checkpoint support;
- Reduction of \$2,071,000 for the Aviation Appropriations applicable portion of the Federal Air Marshal Service (FAMS) Reduction;
- Reduction of \$88,100,000 to cease TSA exit lane staffing;
- Reduction of \$11,278,000 to reduce staffing of Visible Intermodal Prevention and Response (VIPR) teams;
- Reduction of \$6,000,000 for Screening Training and Other;
- Reduction of \$5,292,000 for Airport Management; and
- Reduction of \$23,983,000 for the Federal Flight Deck Officer Program.

Included in the total ATBs referenced above, is a transfer of 20 FTP/19 FTE and \$31.2 million from the FAMS appropriation as part of the headquarters restructuring to consolidate like functions.

The FY 2014 Net Discretionary Request of \$2,722,139,000 includes offsetting discretionary fees totaling \$2,245,897,000.

D: Efficiencies

TSA's budget includes projected efficiencies expected in specific object classes totaling \$112.5 million from FY 2010 through FY 2014 as described below.

Mission Support Personnel Reduction Efficiencies **\$14.950 million**

TSA expects to achieve savings in personnel from centralization of like functions (i.e., IT, acquisition, real estate, etc.) and has realigned staff in FY 2012 to more efficiently perform these functions. TSA also expects to achieve efficiencies from reducing overtime costs.

Printing & Reproduction Efficiencies **\$0.203 million**

TSA anticipates savings from utilizing electronic media and placing more documents on the Internet/Intranet to save printing and reproduction costs. Staff will also utilize electronic media to conduct briefings which will reduce printing costs.

Supplies & Materials Efficiencies **\$11.830 million**

TSA anticipates savings associated with use of electronic media, which will significantly reduce the need for paper, toner, binders, folders, etc. to print materials for briefings. Additionally, TSA will limit the publication and printing of hard copy documents and prescribe that information should be provided in an electronic form, whenever applicable.

Travel Efficiencies

\$11.647 million

TSA will reduce all non-essential travel by 50 percent across all programs as applicable. To ensure efficient travel spending, TSA will employ strategic alternatives to Government travel, including local or technological alternatives, such as teleconferencing and video conferencing. Additionally, TSA will make all appropriate efforts to conduct business and host or sponsor conferences in space controlled by the Federal Government, wherever practicable and cost effective.

Transportation of Things Efficiencies

\$0.330 million

TSA plans to seek ways to reduce postal and freight charges by pursuing more cost efficient transport of equipment.

Advisory & Assistance Contracts Efficiencies

\$40.811 million

As part of a DHS-wide effort, TSA will reduce the number of advisory and assistance contracts.

Promotional Items Efficiencies

\$0.007 million

TSA will seek ways to increase efficiencies for signage at airports and printed materials for employees, where they are not cost-effective. In addition, TSA will limit the purchase of promotional items (e.g., plaques, clothing, and commemorative items).

Other Services Efficiencies

\$32.814 million

In addition to the above efficiencies, TSA will also implement other enterprise-wide efficiencies and management adjustments to achieve savings from reductions in non-advisory contractual services.

¹ FY 2012 Revised Enacted includes actual FTE and fee collection.

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Screener Partnership Program
Program Performance Justification
(Dollars in Thousands)**

PPA: Screener Partnership Program

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	171,193
FY 2014 Adjustments-to-Base	-	-	(18,003)
FY2014 Current Services	-	-	153,190
2014 Program Change	-	-	-
2014 Total Request	-	-	153,190
Total Change 2012 to 2014	-	-	(18,003)

TSA requests \$153.2 million for the Screening Partnership Program. The adjustments-to-base (ATBs) include: \$10.0 million increase for contracts/program expansion, \$27.0 million decrease for reprogrammings and transfers, and \$1.0 million decrease for efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Screening Partnership Program (SPP) was established under Section 108 of ATSA to permit an airport operator to request screening services through a private screening company. Private screening contractors are to perform equal to or better than Federal screening operations under Federal oversight following the same operating procedures, which are continuously updated to ensure both Federal and private screening airports are able to mitigate any new threats which have been identified.

SPP grew out of a two-year pilot program with five airports. Since the conclusion of the pilot program in 2004, all U.S. airports with a Federal screening presence have been eligible to apply to SPP. There are currently 16 airports participating in the program.

The original five pilot airports, which still participate in SPP are:

- San Francisco International Airport;
- Kansas City International Airport;
- Greater Rochester International Airport;
- Jackson Hole Airport; and,
- Tupelo Regional Airport.

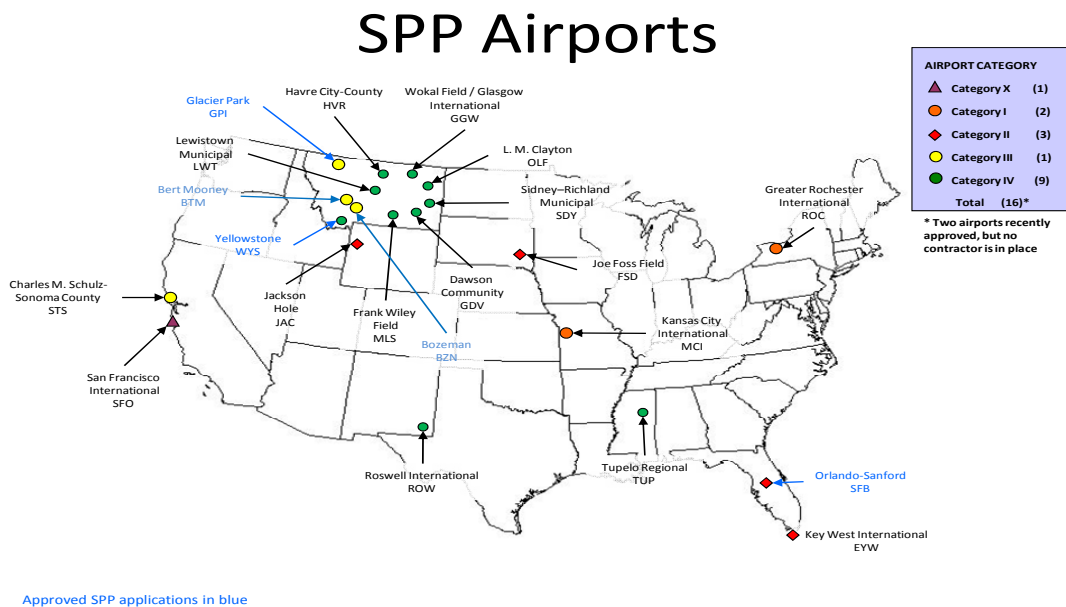

As of today, 11 additional airports are participating in SPP, for a total of 16. These are:

- Sioux Falls Regional Airport;
- Key West International Airport;
- Charles M. Schulz-Sonoma County Airport;
- Roswell Industrial Air Center; and
- Seven airports in Montana: Frank Wiley Field; Sidney Richland Regional; Dawson Community Airport; L.M. Clayton Airport; Wokal Field; Havre City County Airport; and Lewistown Municipal Airport.

On February 14, 2012, the President signed the FAA Modernization and Reform Act of 2012, which asserts TSA shall approve an airport’s application to participate in SPP if approval will not compromise security, detrimentally affect cost efficiency, or detrimentally affect screening effectiveness of passengers or property. Since this Act was passed, TSA has received applications from 7 airports with the following status as of February 2013:

- West Yellowstone (WYS); Glacier Park (GPI); Bert Mooney/Butte (BTM); and Bozeman (BZN) received approved applications and proposals are currently being evaluated.
- Orlando-Sanford (SFB) – approved application, awaiting the issuance of a RFP;
- Sarasota-Bradenton International (SRQ) – received application, pending decision;
- Sacramento International (SMF) – approved application, but airport subsequently withdrew the application prior to the issuance of a request for proposal.

The following map lists the current and potential SPP Airports:

PROCUREMENT ACTIVITIES:

<p>FY 2012 Activity Funding (\$thousands) <i>\$ 172,210</i> (includes funding from multiple PPAs)</p>	<p>FY 2013 Activity Funding (\$thousands) <i>\$146,092</i> (includes funding from multiple PPAs)</p>	<p>FY 2014 Activity Request (\$thousands) <i>\$154,300</i>(includes funding from multiple PPAs)</p>
<p>Screening Partnership Program</p>	<ul style="list-style-type: none"> • Description: <ul style="list-style-type: none"> ○ The Screening Partnership Program procures screening services from qualified private companies at TSA airports. Mandated by ATSA, the program provides airports with a process to "opt-out" and request TSA to use private screening companies instead of federal screeners. The Program provides business infrastructure capable of acquiring, deploying and supporting the management of private screening resources at airports. Private screeners must pass TSA training, maintain TSA certification and follow all TSA Standard Operating Procedures. Private screening performance must "meet or exceed" Federal levels. SPP addresses a capability gap by providing airports with a process to "opt-out" and request TSA to use private screening companies instead of federal screeners. SPP procures services for 16 current airports (units) and is in the process of adding 6 additional airports. • Needs Statement: <ul style="list-style-type: none"> ○ Beginning in November 2004, ATSA required TSA to allow airport operators to apply to TSA to have passenger and baggage security screening operations performed by qualified private screening contractors, under Federal oversight. • Program Goal: <ul style="list-style-type: none"> ○ Comply with 49 USC 44920 requirements to establish and maintain an “opt-out” program that allows a private screening company to provide screening at an airport if the level of screening services and protection provided at the airport under the contract will be equal to or greater than the level that would be provided at the airport by Federal Government personnel. ○ Provide contract administration support to airports participating in SPP. ○ Provide application evaluation, planning, acquisition and transition support to participating airports and applicants. 	

	<ul style="list-style-type: none"> • Performance Measures: <ul style="list-style-type: none"> ○ Program contractors must comply with 49 USC 44920 and provide efficient, effective security screening while meeting the requirements of the security screening Standard Operating Procedures. Participating airports’ TSA staff evaluate contractor performance using performance standards outlined in Quality Assurance and Surveillance Plans (QASPs) developed specifically for each contract and which reflect current TSA performance metrics. ○ The QASP uses the following to measure screener performance: <ul style="list-style-type: none"> ▪ Throughput Image Project (TIP) Scores ▪ Screener recertification Pass rate ▪ Current management performance objectives • Justification for Actions: <ul style="list-style-type: none"> ○ SPP is a unique approach to providing security screening services for air passengers and baggage. SPP was established to permit an airport operator to request screening services through a private screening company. Private screening operations under Federal oversight following the same operating procedures to deter and disrupt terrorist operations.

PPA: Screener - PC & B

	Perm. Pos	FTE	Amount
2012 Revised Enacted	52,877	46,721	3,017,594
2014 Adjustments-to-Base	-	1,635	101,394
2014 Current Services	52,877	48,356	3,118,988
2014 Program Change	(2,125)	(1,487)	(85,462)
2014 Total Request	50,752	46,869	3,033,526
Total Change 2012 to 2014	(2,125)	148	15,932

TSA requests \$3.0 billion for Screener PC&B. The adjustments-to-base (ATBs) include: an increase of \$22.7 million for pay COLA; an increase of 474 FTE and \$31.2 million to annualize second year costs associated with FY 2012 program increases. The ATBs also include: an increase of 637 FTE and \$40.1 million for annualizations of other prior year increases; an increase of 524 FTE to adjust for Actual FTE; \$8.2 million for reprogrammings and transfers and a decrease of \$0.771million for efficiencies. In addition, the request includes a decrease of 2,125 FTP/1,487 FTE and \$85.5 million to cease TSA staffing at airport exit lanes.

CURRENT SERVICES PROGRAM DESCRIPTION:

Passenger and baggage screening protects commercial air travelers by detecting and removing dangerous or deadly objects that individuals attempt to smuggle onto aircraft on their person and in carry-on or checked baggage. TSA’s screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. After passenger check-in, TSOs use various types of electronic detection and imaging machines, including Advanced Imaging Technology (AIT), Explosives Trace Detection (ETD) equipment, X-ray machines, Walk-Through Metal Detectors (WTMD), and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew, and airport employees. This is in conjunction with the use of behavior recognition techniques and the validation of travel documents.

TSA began deploying state-of-the-art AITs in 2007. This technology can detect a wide range of threats to transportation security in a matter of seconds to protect passengers and crews. Imaging technology is an integral part of TSA's effort to continually look for new technologies that help ensure travel remains safe and secure by staying ahead of evolving threats. AIT screening is safe for all passengers, and the technology meets national health and safety standards. TSA has implemented strict measures to protect passenger privacy, which is ensured through the anonymity of the image. Additionally, AIT screening is optional for all passengers; however, if a passenger opts out, they will be subject to comparable screening.

TSA is undertaking efforts to focus its resources and improve the passenger experience at security checkpoints by applying new intelligence-driven, risk-based screening procedures and enhancing its use of technology. This approach is based on the following premises:

- The majority of airline passengers are low risk;
- By having passengers voluntarily provide more information about themselves, TSA can better segment the population in terms of risk;
- Behavior detection and interviewing techniques should be strengthened in the screening process;
- TSA must accelerate its efforts to optimize screening processes and use of technology to gain system-wide efficiencies; and,
- Increase security by focusing on unknowns; expedite known and trusted travelers.

TSA has developed conceptual screening processes consistent with this approach that the agency began testing the following processes at airports in August 2011:

- TSA Pre ✓™ Expedited Screening
- Screening for Active Duty U.S. Service Members
- Screening for Passengers 12 and Under
- Screening for Passengers 75 and Older
- Managed Inclusion

TSO Workforce

ATSA established the employment standards for security screening personnel. Security screening personnel - both private and Federal - are required to be U.S. citizens; pass a background investigation; and have a high school diploma, a general equivalency diploma, or sufficient experience. Newly hired officers must undergo extensive training and be certified to screen passengers and baggage through the use of detection equipment. The screening workforce is subject to ongoing training and testing requirements. Failure to pass any phase of training or a certification examination is grounds for employment termination.

TSOs are just one of the layers of security needed to thwart the threats to the aviation system. TSA has added more specialized security positions with different skill sets, such as Travel Document Checkers (TDCs) and Behavior Detection Officers (BDOs) to enhance the level of security and to move security beyond the checkpoint environment. TSA has seen the benefits of these new positions in providing a career path for TSOs, which has had a direct impact on reducing attrition and enabling TSA to retain a more tenured TSO workforce.

The TSO budgeted FTE levels are broken down as follows:

TSO Budgeted FTE by Job Title ¹

Job Title	Band	FY 2012 Revised Enacted FTE	FY 2013 Annualized CR FTE	FY 2014 Request FTE
TSO	D,E	31,533	31,533	31,064
Lead /Master	F	6,615	6,615	6,615
Supervisory/Expert TSO	G	4,850	4,850	4,850
BDOs	F,G,H,I	3,059	3,059	3,131
Managers	H, I	1,188	1,188	1,209
TOTAL		47,245	47,245	46,869

1/ The TSO workforce is composed of approximately 14,000 part time TSOs and 37,000 full time TSOs.

Job Descriptions:

- Transportation Security Officers (TSO) – Front-line workforce performing checkpoint security, document checking, airport employee screening and unpredictable security measures.
- Lead TSO (LTSO)/Master TSO – Provides intermediary leadership at the checkpoint. Master TSOs can also perform training duties and operate in airport coordination centers.
- Supervisory TSO (STSO)/Expert TSO – Supervises checkpoint operations. Expert TSOs can also perform training duties and operate in airport coordination centers.
- Behavior Detection Officers (BDO) – Perform Screening Passengers by Observation Technique (SPOT) duties.
- Transportation Security Managers – Perform overall oversight duties of security operations.

TSO FTE Allocated to Security Duties

Job Duty	FY 2012 Revised Enacted FTE	FY 2013 Annualized CR FTE	FY 2014 Request FTE
TDC	2,001	2,001	2,001
Playbook	1,654	1,654	1,654
BDOs	3,059	3,059	3,131
Checkpoint/Other	40,531	40,531	40,083
TOTAL	47,245	47,245	46,869

TSA has installed labor-saving technology in many airports around the country. Most notably, in-line checked baggage systems have reduced the staffing required for baggage checks and have reduced costly workplace injuries. These efficiencies have allowed TSA to invest in other effective security measures, such as TDCs, Playbook, BDOs, and Transportation Security Specialists – Explosives (TSS-Es). Please see the table below for a cumulative list of reinvested resources.

Estimated Cost Avoidance from In-Line Savings		
	FTE	Dollars ¹
Cumulative through FY 2012	2,888	\$176,935,154

1/Estimated FTE avoidances multiplied by the weighted average of TSOs, Lead, and Supervisory TSO Salaries.

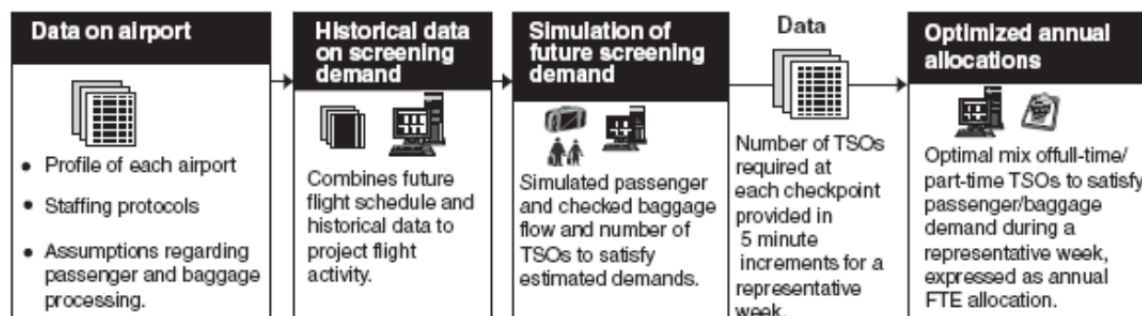

Within-Base Growth of Security Programs			
	Total Budgeted FTE	Self Funded FTE	% of FTE Self Funded
Travel Document Checker	2,001	1,086	54%
Target Random Security Plays	1,654	904	55%
Behavior Detection Officers	3,131	2,326	74%
TSS-Es (<i>funded in Airport Management PPA</i>)	406	297	73%
TOTAL	7,192	4,613	64%

Workforce Initiatives

TSA determines and allocates FTE to the airports through the Staffing Allocation Model (SAM). This is a robust process run by each airport scheduling operations officer which utilize:

- Official Airline Guide flight data representing airport specific flight activity;
- Airport specific facility layout and equipment configuration details;
- Input of program offices and risk analysis;
- A discrete event simulation model to project staffing requirements; and
- An airline industry accepted scheduling application to apply workforce scheduling requirements.

Annual TSO Allocation Process

Source: GAO analysis of TSA Staffing Allocation Model.

This model is constantly refined to effectively allocate and manage the TSO workforce. Through the SAM process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, increased use of part-time and split shift employees, technology improvements, and improved management practices. These gains have led to the expansion of security initiatives, largely accomplished within existing resources, which have significantly strengthened air transportation security. The workforce initiatives include:

Travel Document Checker (TDC) Program - The TDC Program is an added layer of security at all 448 Federalized airports, including Screening Partnership Program (SPP) airports, to verify an individual's identity and their travel documents before allowing entry into the security screening checkpoint to access the sterile area or board an aircraft. TDC-qualified TSOs are positioned in front of the checkpoint and use black lights and magnifying loupes to validate boarding passes and authenticate various forms of acceptable photo ID presented by passengers, airport / airline personnel, and law enforcement officers. TDCs also make a visual comparison of the individual with the ID photograph, and ensure the boarding pass presented was issued to that individual, for that day's travel and from the correct airport. Any suspect or questionable ID issues are relayed to the STSO for resolution and to contact the Identity Verification Coordination Center to verify the individual's identity to continue.

Screening of Passengers by Observation Techniques (SPOT) – This essential behavior recognition and analysis program adds an important layer of security in all areas of an airport. It provides a non-intrusive means of identifying potentially high-risk individuals who exhibit behaviors that deviate from an established environmental baseline (indicative of stress, fear and deception), which could possibly reflect intentions of terrorism. SPOT looks at involuntary physical and physiological reactions. A recent study sponsored by the DHS Science & Technology Directorate and conducted by the American Institutes for Research examined the SPOT indicators' effectiveness compared against a strict random protocol. The study confirmed that SPOT was significantly more effective at identifying persons of interest than random selection. This study is the most significant effort undertaken on the validation of a large scale behavior-based security program to date. Further research is planned to extend these findings and to expand upon this layer to increase coverage by exploring alternative concepts. This behavior-focused layer has become even more critical as TSA moves forward on rolling out Risk Based Security (RBS) initiatives. BDOs are located in the following category of airports:

Category	# of Airports with BDOs	# of BDOs Allocated
Cat X	28	1,716
Cat I	57	989
Cat II	84	398
Cat III	7	28
Total	176	3,131

Visible Intermodal Prevention and Response (VIPR) teams – These teams may consist of TSOs, BDOs, Transportation Security Inspectors, TSS-Es and Federal Air Marshals. Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in all modes of the transportation sector, including aviation, mass-transit and maritime. Continually strengthening of stakeholder relationships and increasing reliance on risk-based decision making has expanded the reach and capability of TSA’s VIPR teams.

Playbook – Playbook is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts. It’s supported through local decision-making between the Airport Operator and the Federal Security Director (FSD). Playbook involves working collaboratively with stakeholders and coordinating the assets of TSA, local law enforcement, and other DHS agencies to improve an airport’s overall security posture.

The Aviation Screening Assessment Program (ASAP) – This program measures TSO screening performance using realistic and standardized assessment scenarios. The primary purpose of ASAP is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test results provide critical data to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. There are two, six-month test cycles per year.

Career Progression Program

TSA continues its focus on career progression for TSOs. As the TSA mission has evolved, TSA created higher-level positions for TSOs such as BDOs. TSA’s adoption of RBS will further evolve the skill sets of TSOs.

TSA provides career-advancement tools and resources in its online system called Security Officer Advancement Resources. These resources include a career toolbox, training opportunities, and detailed overviews of what makes a TSO competitive for positions within TSA and across DHS. TSA supplements this service with career coaching and the Career Resident Program. The Career Resident Program is an entry level, full-time, career development program designed to capitalize on the technical expertise and agency knowledge resident in the field and to create a mechanism for TSOs and field personnel selection for career opportunities other than the current TSO/LTSO/STSO career path. In addition, TSA has partnered with community colleges to provide TSOs and uniformed officers the opportunity to work toward a TSA Homeland Security Certificate and/or an associates’ degree in Homeland Security or related field.

The career progression structure allows TSA to distinguish and retain the more experienced and top performing TSOs. Test results show a positive correlation between longevity and performance,

including detection ability, screening efficiency, and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

In 2012, TSA continued to achieve near record low attrition rates, continuing the progression to a more experienced workforce. The chart below indicates the historical trend of decreasing attrition rates.

Historical Attrition Rates:

Attrition Type	Work Schedule	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
Voluntary	Full-Time ONLY	10.8%	5.3%	4.2%	4.5%	4.0%
Voluntary	Part-Time ONLY	31.8%	15.5%	12.9%	15.1%	13.2%
Voluntary	TOTAL	15.8%	7.7%	6.2%	7.2%	6.6%

Workers' Compensation

TSA continues to aggressively reduce U.S. Department of Labor Office of Workers' Compensation Program costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. TSA's Office of Occupational Safety, Health and Environment (OSHE) provides field support to the Nation's airports to develop their safety programs. OSHE provides, through the Online Learning Center, 11 safety courses aimed at injury prevention. The national nurse case management program has successfully assisted TSOs in returning to employment in a shorter time. The Periodic Roll Initiative, established in April 2007 is a joint effort with the Nurse Case Management team where all of the long-term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible.

The President's Safety, Health, and Return to Employment Initiative requires Federal agencies to reduce the Total Case Rate and Lost Time Case Rate by three percent each fiscal year. As noted in the chart below, TSA has exceeded its goal of reducing the number of TSO injuries and illnesses, and in FY 2014, TSA will seek to continue the trend of reducing numbers of TSO injuries and illnesses. In addition, TSA's Workers' Compensation has decreased by over \$15 million from FY 2006 to FY 2012.

TSO Injury Rate

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	Percent Change FY 2005 - FY 2012 (2nd Q)
Total Case Rate (TCR)	29.06	16.46	13.93	10.15	7.55	7.16	5.50	5.45	-81.25%
Lost Time Case Rate (LTCR)	12.89	8.94	7.19	5.14	3.53	3.37	2.76	2.6	-79.83%

Collective Bargaining

In 2010, the Federal Labor Relations Authority (FLRA) issued a decision directing an election regarding exclusive representation of TSA bargaining unit employees. TSA bargaining unit employees are full-time and part-time non-supervisory personnel performing screening functions (TSOs and LTSOs, Master and Expert TSOs, including BDOs, Security Training Instructors (STIs), and Equipment Maintenance Technicians). On February 4, 2011, the TSA Administrator, in accordance with his statutory authority to establish the terms and conditions of employment for TSOs, issued a Determination providing a framework for TSOs to vote on whether they wanted exclusive representation for limited collective bargaining on non-security employment issues. In June 2011, the FLRA certified the American Federation of Government Employees (AFGE) as the exclusive representative of the TSA bargaining unit.

Thereafter, TSA and AFGE engaged in limited collective bargaining on the 11 issues subject to collective bargaining as set forth in the Determination:

1. Performance Management process
2. Awards and Recognition process
3. Attendance Management process
4. Shift and Annual Leave Bid process
5. Shift Trade policy
6. Transfer policy
7. Process for work status change from full time to part time and vice versa
8. Uniforms and uniform allowances
9. Selection process for special assignments
10. Parking subsidies
11. Facilities and services within the control of TSA management

On August 2, 2012, TSA announced that it reached its first collective bargaining agreement with AFGE. The agreement affects approximately 44,000 TSA employees and was ratified by bargaining unit employees on November 9, 2012.

Changes from current policy include:

- Implementation of a new performance management system called the Transportation Officer Performance System (TOPS). TOPS does not include the annual proficiency review as part of the pay-for-performance program. The annual proficiency review was not negotiable and will continue to exist independently in compliance with ATSA.
- The shift bidding process based on seniority and required annually.
- The annual uniform allowance and the uniform allotment for TSOs will increase.
- TSOs will have more flexibility in uniform selections, including shorts in hot weather.

Dispute Resolution

- Consistent with the TSA Administrator's February 4, 2011 Determination, TSA is developing a Unitary Dispute Resolution System that is a fair, transparent, and efficient system for resolving workplace issues. Interest-based and rights-based processes will be available for resolving disciplinary actions, workplace disputes, adverse actions, alleged violations of the collective

bargaining agreement and other allegations as set forth in the Determination. These processes will include external third party review for resolution of adverse action appeals and disciplinary action and workplace issue grievances filed by bargaining unit employees in accordance with a Memorandum of Agreement between TSA and AFGE.

PPA: Screening Training and Other

	Perm. Pos	FTE	Amount
2012 Revised Enacted	48	56	244,601
2014 Adjustments-to-Base	40	28	(9,906)
2014 Current Services	88	84	234,695
2014 Program Change	-	-	(7,759)
2014 Total Request	88	84	226,936
Total Change 2012 to 2014	40	28	(17,665)

TSA requests \$226.9 million for Screener Training and Other. The adjustments-to-base (ATBs) include: 24 FTP/23 FTE for Balanced Workforce Strategy Follow-On from contract conversions; a net increase of 16 FTP/15 FTE and \$10.6 million from transfers between the Aviation Security appropriation and the Transportation Security Support and the Transportation Threat Assessment and Credentialing appropriations, of which \$10 million will support collective bargaining costs, such as uniform allowance increases. The ATBs also include: an increase of \$0.079 million for pay COLA; an increase of \$6 million realigned from Aviation Regulation to support collective bargaining; a decrease of \$4.0 million for annualizations associated with FY 2012 program increases; a decrease of \$8.0 million to non-recur second year costs associated with staffing Advanced Imaging Technology equipment; a decrease of 1 FTE and \$14.3 million for efficiencies, a decrease of 9 FTE to adjust for Actual FTE, an increase of \$5.2 million for realignments and transfers and \$5.5 million decrease from recurring unobligated balances in the PPA. In addition, the request includes a \$1.8 million program decrease to cease TSA staffing airport exit lanes and \$6.0 million program decrease for other priorities.

CURRENT SERVICES PROGRAM DESCRIPTION:

This activity provides the resources to support new and recurring training requirements for the Transportation Security Officer (TSO) workforce, as well as other direct costs associated with screening operations.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Transportation Security Officer Training	\$120.3	\$92.2
Screeners Consumables, Uniforms, and Other	\$ 87.4	\$100.7
National Deployment Office (NDO)	\$ 24.9	\$22.0
Environmental Management Program	\$ 12.0	\$12.0
Total	\$244.6	\$226.9

Transportation Security Officer Training: \$92.2 million: Given the ever changing threats that face the aviation domain, screener training is constantly evolving. TSO training is comprised of a compendium of courses that includes basic training for initial hires, on-the-job training, lead and supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA Online Learning Center (OLC).

TSA uses a measurement and evaluation process to ensure training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure a high level of instructional quality is maintained.

Training under this PPA includes:

- **New Hire Training Program (NHTP):** The bulk of the security training funding provides for classroom instruction on checkpoint procedures and strategy, to include the tenants of engagement and tactical communications, as well as on-the-job training and certification required by ATSA. NHTP provides web-based training, a minimum of 40 hours of instructor-led training, supported by hands-on equipment-specific labs at the home/hub airport. The checked baggage screening procedures course modules include on-screen alarm resolution protocol training for new hires at those airports equipped with Explosives Detection Systems (EDS), and that training is specific to the equipment in place at their duty location. TSA designs, develops and delivers training in support of all screening technologies, to include Advanced Imaging Technology (AIT) for screening persons and Advanced X-Ray Technology (AT) for screening checkpoint carry-on items, into the mainstream passenger screening process.

Metric	Min. Hrs	Evaluation Components
Checkpoint TSO-one ETD		
Phase I Web-based Training	8.00	Job Knowledge Checks
Phase II Instructor-led Training	47.50	Job Knowledge Tests/Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	75.00	Image Mastery Test
Total Hours	130.50	Certified Checkpoint TSO
Checked Baggage EDS/OSARP ^{1/}		
Phase I Instructor-led Training	59.50	Job Knowledge Tests and Practical Demonstrations
Phase II On-the-Job Training	83.00	Practical Demonstration Test Image Test-Operator Qualification test
Total Hours	142.50	Certified Checked Baggage EDS/OSARP TSO
Dual Function Officer (DFO) ETD only		
Phase I Web-based Training	8.00	Job Knowledge Checks
Phase II Instructor-led Training	63.50	Job Knowledge Tests/Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	110.00	Image Mastery Test Practical Demonstration Test
Total Hours	181.50	Certified DFO TSO
Dual Function Officer (DFO) with EDS/OSARP Certification		
Phase I Web-based Training	8.00	Job Knowledge Checks
Phase II Instructor-led Training	86.00	Job Knowledge Tests/Job Knowledge Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	128.00	Operator Qualification Test/Checked Baggage Practical Demonstration TEST/Image Mastery Test
Total Hours	222.00	

^{1/} OSARP = On-Screen Alarm Resolution Protocol

- **Recurrent In-Service Training:** All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, in-service training courses are designed to keep the workforce up-to-date with procedural changes; use of new/updated technologies introduced into the screening operations; support tools and equipment used by the TSOs in the performance of their duties; building new capabilities; enhancing skills; and identifying new threat items. This training is planned and communicated through an annual National Training Plan (NTP).
- **Essentials of Leading Screening Operations Course:** This is a course being developed for Lead TSOs that will be delivered at the Federal Law Enforcement Training Center (FLETC) in Glynco, GA by TSA Academy staff members. The technical and leadership competence of LTSOs is a critical component of workforce effectiveness and retention. TSA is developing and will begin delivery of a one-week course to include sessions focused on the technical and operational responsibilities of the LTSOs. This course is being designed to provide tools needed to allow LTSOs to successfully support the TSO workforce and STSOs in the execution and management of the daily operations and challenges faced at checkpoint and/or checked baggage screening locations. TSA also conducts other task specific courses to provide ongoing skills enhancement and technical expertise training to their LTSOs at their home airports. Delivery is scheduled to begin in FY 2014.
- **Essentials of Supervising Screening Operations (ESSO) Course:** This course is delivered at the FLETC by members of the TSA Academy and FLETC. This course achieves two important goals: 1) to professionalize our Agency's approach to training delivery; and 2) to provide front line supervisors with core knowledge and critical job skills that enable them to contribute to our success in critical areas such as employee integrity, responsibility and performance. The training is delivered over two weeks and focuses on the legal authorities governing our search processes; risk based approach to security and security measures which are based on analysis of intelligence, threat and capabilities; and the mission, vision and core values of the TSA. Three days of this course focus on leadership through understanding behavioral diversity (using the DISC Model), which gives STSOs an individual understanding of their specific communications and leadership style, along with understanding of they can use that to become more effective leaders. The training emphasizes effective communications, coaching and mentoring, but also technical requirements of the STSO position including interactive team projects and culminates with a Capstone exercise.
- **Leadership Training:** This training supports the requirements of 5 CFR 412.202 Systematic Training and Development of Supervisors, Manager, and Executives. Leadership training programs have been developed and are deployed for different levels of TSOs. All leadership training programs cover topic areas such as communications skills, managing employee performance, coaching and mentoring, and team building. Examples of such programs are:
 - The Real Time Leadership Skills program - a new course of study designed for approximately 8,000 team leads that include LTSOs, Expert BDOs, and STIs; and
 - Foundations of Leadership program - basic leadership training for the 5,000 STSOs.

Additional initiatives are underway to provide additional training in basic employee relations, supervisory responsibilities in managing safety, and diversity training.

- **Expanding Skills and Critical Thinking Training:** This strategy focuses on the interaction and communication between TSAs workforce and the public. Every TSO working at the checkpoint receives training that consolidates the latest methods for explosives detection, as well as the human factors that can affect security. These training events will help TSOs become more analytical and less “check-list oriented.” In FY 2011/2012, TSA designed and delivered a tactical communications course for its officers and managers to help them work through difficult interactions that might occur so that they can effectively complete the screening process. In FY 2012, TSA designed, and delivered Behavior Awareness Training, which is another capabilities enhancement course that will continue to build upon the principles of critical thinking and effective communications. This course was designed to help officers understand how to use their operational experience and situational awareness to be able to articulate and react to anomalous behavior. In FY 2013, TSA designed and is in the process of delivering the next phase of developmental training, initially focusing on resolution of anomalies identified during AIT screening. This course will help officers understand how “Investigative Skepticism” can contribute to effectively clearing an anomaly identified during secondary searches. This training will be expanded to all checkpoint officers involved in secondary searches and will be completed in FY 2013. Planning is underway to identify the skills enhancement course that will be delivered in 2014.
- **Travel Document Checker (TDC) Training:** This curriculum provides training for all TSOs and other TSA personnel assigned to conduct checks of travel documents and verify identification for individuals seeking access through a screening checkpoint. The curriculum includes training on Standard Operating Procedures, detecting fraudulent documents, utilizing document checking technology, and recognizing acceptable forms of identification. The training will continue to be updated as needed.
- **Transportation Security Managers (TSM) Technical Training Course:** The technical and leadership competence of TSMs is critical to TSA objectives that serve to protect the traveling public by preventing and/or deterring any deadly or dangerous objects from being transported onto aircraft. TSA developed and deployed an initial course to strengthen TSMs’ technical and managerial skills and provide tools needed to successfully manage the daily operations. During FY 2013, TSA will design and develop a follow on course for TSMs, to support consistency in learning objectives met during the newly deployed STSO training, and soon to be deployed LTSO training. The TSM is a critical member of the front line leadership team, and building a professional and cohesive leadership team for the TSO workforce is essential to the professional development of the workforce and TSA’s continuing efforts to adopt security procedures and policies to support its Risk Based Security platform. This training will continue to build on the effectiveness of the TSM and their ability to respond to and assess the potential impact of all unresolved issues at the checkpoint and in checked baggage screening locations.
- **Behavior Detection Officer Training:** This curriculum provides training in behavior observation and analysis at the checkpoint for the purpose of identifying passengers exhibiting behaviors indicative of hostile intent. This program, known as Screening Passengers by

Observation Techniques, is performed by BDOs at all major airports. The curriculum for this program will continue to be upgraded and updated annually to include additional techniques and/or information related to the field of behavior detection.

Transportation Security Specialist-Explosives (TSS-E) Training: TSS-Es require specialized training in improvised explosives, physical security, and in all modes of transportation. These in-house explosives experts provide rapid response advanced alarm resolution to checkpoints to ensure lanes are not closed due to non-threat anomalies. They also provide on-site explosives and improvised explosives device (IED) familiarization training to TSOs to enhance their IED and IED components recognition skills. TSS-Es are multimodal assets that train and advise Federal, State, and local government responders and provide training and explosives vulnerability assessment assistance to industry.

- **Security Training Instructor (STI):** This training supports the permanent TSA in-house instructor certification program. TSA provides annual skills enhancement training to the STI workforce to ensure they are able to effectively deliver technical training. With the movement towards more interactive facilitated training in support of adult learning, TSA continues to develop training that supports the development of the STIs so they are better prepared to deliver and interact with class participants.
- **Training Aids/Training Tools:** Due to the ever changing threat from terrorism and the terrorist adaptation to security and screening procedures, TSA is constantly developing and updating training curriculum and training aids. As new threats emerge, some of the existing training, and the training aids and tool sets have to be quickly upgraded. TSA employs a variety of automated training and testing tools to enhance TSO skills, including simulated computer based image interpretation practice sessions, and simulated weapons and IED kits designed to support local testing and hands-on familiarization. TSA also develops “Threat in the Spotlight” training documents for TSOs and their supervisors, which describes and shows actual pictures and x-ray images of threats found by TSOs at airports or from other intelligence resources.
- **Emerging Technology Training:** This training supports the operational evaluation and deployment of emerging screening technologies for passengers, as well as carry-on and checked baggage. Working with the equipment manufacturers, TSA designs and develops a comprehensive training course for each technology that will support operational tests and evaluations of emerging technologies. TSA finalizes the training materials needed for those emerging technologies that are determined to be operationally effective and efficient for wide scale deployment. The training must not only cover the technical aspects of operator interface and screening capabilities associated with the equipment, but also the Standard Operating Procedures, screening policies and alarm identification and resolution to ensure TSOs are knowledgeable, skilled, and prepared to operate the specific technologies and apply the appropriate screening procedures.
- **Training Evaluation:** TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. TSA training effectiveness is assessed using three levels of measuring trainee reaction, learning, behavior, and results. TSA also

conducts assessments to ensure that a high level of instructional quality is maintained. TSA continually strives to improve their methodology for evaluating training to ensure it meets current industry standards.

- Level 1 Evaluation (trainee reaction): Completed at the end of every training program. All Level 1 evaluation data is scanned into a central database, and results are reviewed to determine if course content or delivery should be modified.
- Level 2 Evaluation (learning): Fulfilled via a test or demonstration at the completion of a training program. The OLC is the repository for these results. Scores achieved indicate level of learning achieved.
- Level 3 Evaluation (transfer/behavior): Level 3 evaluation are scheduled and completed for the Basic/Initial training courses. Analysis of the data collected through this effort helps to determine if training is resulting in a transfer of skills and/or knowledge. A Level 3 evaluation is conducted after the training participant has had at least 6 months on-the-job for the position for which he or she was trained. The Level 3 includes an inquiry sent to participants and their supervisors. Additional Level 3 evaluations are conducted as determined appropriate.

Associates Program:

TSA's Associates Program provides additional skills to the workforce and provides cutting-edge professional training and development that is critical for TSOs to fully accomplish the TSA mission and fulfill its vision. It also provides for career development and supports overall retention efforts. This program was first piloted in FY 2010, and is currently represented at 80 airports, partnering with 67 colleges and 2,800 TSOs are participating.

Enhanced Security Training:

TSA plans to change the delivery of up to 1,000 of the current leadership, technical, and ancillary training courses to TSOs and managers. This training will be centrally delivered in comparison to the distributed locations approach currently undertaken. Among other benefits, the consolidation of training will improve training quality, timeliness, consistency, uniformity, and standardization.

Annual Proficiency Reviews:

All TSOs, LTSOs, STIs, BDOs and STSOs must participate in an Annual Proficiency Review (APR) to ensure that they meet all of the qualifications and performance standards required to perform their screening duties as required by ATSA. The APR includes Technical Proficiency assessments that focus on image recognition, proper screening techniques, job knowledge, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:

- Measuring Image Proficiency – One Image Mastery Assessment per year administered using the X-ray simulation;
- Measuring Practical Skills – A series of Practical Skills Evaluations, including the detection of prohibited items, of all TSOs every year;

- Measuring On-Screen Alarm Resolution Protocol (OSARP) Proficiency – One OSARP assessment per year administered using the Employee Assessment Management System (EAMS) software; and
- Measuring Job Knowledge – One Standard Operating Procedures Assessment per year administered using EAMS.

Screening Consumables, Uniforms, and Other: \$100.7 million: Consumable supplies are critical materials used by TSOs to ensure effective screening of passengers, carry-on, and checked baggage. These consumable supplies include disposable gloves, sample swabs/wands, reactant materials, and baggage inserts, which both notify passengers that their bag has been inspected and provide contact information in the event of a problem. In addition, TSA provides uniforms to new hires, as well as provides replacement uniforms to all TSOs through the annual allowance program. With the recent ratification of the collective bargaining agreement, TSA will provide an annual replacement allotment valued at \$129, increase the uniform allowance from \$232 to \$317 and provide TSOs with more uniform options.

National Deployment Office (NDO): \$22.0 million: The NDO provides additional TSOs, BDOs and other operations personnel to FSDs for screening support during crisis response and recovery operations, seasonal demands, special security events, risk mitigation or other activities that require higher-than-normal security related staffing levels, while protecting the Nation's transportation system. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of these limited security personnel resources. For various types of disaster response operations, the NDO is responsible for deploying 14 Transportation Security Advance Teams, which include 210 personnel, and 43 Transportation Security Support Teams, which include 925 personnel.

Environmental Management Program: \$12.0 million: This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as to remove and dispose of hazardous and voluntarily abandoned property. TSA's national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and local environmental regulations and laws.

Checkpoint Support
Program Performance Justification**
(Dollars in Thousands)

PPA: Checkpoint Support

	Perm. Pos	FTE	Amount
2012 Revised Enacted	54	51	204,768
2014 Adjustments-to-Base	6	6	(57,470)
2014 Current Services	60	57	147,298
2014 Program Change	-	-	(43,921)
2014 Total Request	60	57	103,377
Total Change 2012 to 2014	6	6	(101,391)

TSA requests \$103.4 million for Checkpoint Support. The adjustments-to-base (ATBs) include: 6 FTP/6 FTE for Balanced Workforce Strategy Follow-On from contract conversions; a decrease of \$0.235 million from transfers from the Aviation Security appropriation to the Transportation Security Support appropriation. It also includes a transfer of \$0.001 million from DHS’s Chief Administrative Officer for working capital fund to pay for shuttle services. The ATBs also include: an increase of \$0.068 million for pay COLA; a decrease of \$0.481 million realigned to Airport Management; an increase of 1 FTE to adjust for Actual FTE; a decrease of 1 FTE and \$17.4 million for efficiencies; and a decrease of \$39.4 million for non-recurring funds for Advanced Imaging Technology units from FY 2012. In addition, the request includes a \$43.9 million program decrease.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA’s Current Services:

(dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Checkpoint Technology	\$198.8	\$98.4
Advanced Surveillance Program	6.0	5.0
Total	\$204.8	\$103.4

The TSA's checkpoint support program provides the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening capabilities. This includes technologies, checkpoint reconfigurations, closed circuit television (CCTV) surveillance equipment, and the operational integration of systems at approximately 2,200 passenger checkpoint lanes in our Nation's airports. TSA developed a strategic plan to enhance screening through improved checkpoint technology that will refine passenger security for aviation. This initiative extends beyond the airport checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. The focus is on a layered security and risk-based screening approach, including improved explosives detection and enhanced hostile intent detection.

Current technologies that have been deployed include Enhanced Walk-through Metal Detectors (WTMD) that screen persons for metallic weapons such as guns or knives; Explosives Trace Detection (ETD) units which are used to test for explosive residue on selected carry-on items that allow for increased security and an added layer of random screening within the sterile area; Bottled Liquids Scanners (BLS) which screen bottles to determine if they contain explosives or benign liquids; Chemical Analysis Devices (CAD) which are small devices used to identify suspect substances; Advanced Technology (AT-2) systems which are X-ray systems with advanced visual detection capabilities that use multi-view capabilities or automated explosives detection capabilities; and Advanced Imaging Technology (AIT). Additionally, the following technologies are to begin deployment in FY 2014: Credential Authentication Technology (CAT) which digitally validates the ID used by the traveling public; and Portable Explosives Trace Detectors (pETD) which are smaller mobile systems used to test for explosive residue. Development is underway for Automated Wait Times (AWT) systems.

AIT screening is safe for all passengers. AIT millimeter wave technology uses non-ionizing radio frequency energy in the millimeter wave spectrum to generate a three-dimensional computer image of the body based on the energy reflected from the body. AIT backscatter technology uses a narrow, low-intensity X-ray beam scanned over the surface of the body at a high speed that is converted into a computer image of the body. TSA continues to disseminate information about the safety of AIT screening to mitigate public concern about radiation exposure and privacy protections. TSA has utilized Inter-Agency Agreements with the National Institute of Standards and Technology (NIST) and the U.S. Food and Drug Administration (FDA) to further validate the third party radiation studies that all vendors must submit prior to testing. The systems emitting ionizing radiation, such as those using backscatter X-ray, are tested at NIST, and systems emitting non-ionizing radiation, such as those using millimeter wave, are tested by the FDA. In addition, the systems are checked against administrative and radiation dose requirements of the American National Standards Institute/Health Physics Society (ANSI/HPS) Standard N43.17-2009, "Radiation Safety for Personnel Security Screening Systems Using X-ray or Gamma Radiation." All system surveys to date have been found to be well below the radiation dose limits of the ANSI/HPS N43.17-2009 standard.

In FY 2011 and FY 2012, TSA installed new software on TSA's millimeter wave AIT machines. These upgrades are designed to enhance privacy by eliminating passenger-specific images. TSA worked with the Department of Homeland Security (DHS) Science and Technology Directorate (S&T) and private industry to develop the new Automated Target Recognition (ATR) software, which auto-detects items that could pose a potential threat using a generic outline of a person for all passengers. By eliminating the image of an actual passenger and replacing it with a generic outline of a person,

passengers are able to view the same outline that the TSO sees. In addition to further enhancing privacy protections, this new software will increase the efficiency of the screening process through a faster resolution time and therefore expand the throughput capability of AIT. ATR is a requirement for all future AIT procurements. The Federal Aviation Administration and Reform Act of 2012 mandated that TSA use AIT equipped with ATR for screening passengers. TSA is in the process of removing all non-ATR units from the field to comply with the Act, and by June 1, 2013, all of the current AIT fleet will be equipped with ATR software.

Checkpoint Technology: \$98.4 million: This request includes funding to test, procure, and install new screening equipment to further extend explosives and prohibited item detection at airport checkpoints and to update existing equipment with such enhancements as AT-2 tier upgrades. Funds will also be used for program, engineering, technical support and travel, original equipment manufacturer training, warehousing, consumables, and refurbishing equipment, to provide functionality and performance enhancements, as well as for life-cycle replacements for units reaching the end of their useful life.

TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational Test and Evaluation (OT&E) in support of regulatory and policy decisions;
- OT&E as part of the acquisition process for items procured by TSA, including Early Utility Assessments, Initial OT&E, and follow-on OT&E over the project lifecycle;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development, process optimization and improvement, and workforce / vector characterizations; and
- T&E capabilities development to improve the quality and utility of evaluation products.

The following chart depicts TSA’s checkpoint equipment purchase status relative to the Full Operational Capability (FOC):

Technology	FOC	Purchases to Date	Planned Purchases with Prior Year Funds	Planned Purchases with FY 2013 Funds	After FY 2013 Purchases	Planned Purchases with FY 2014 Funds	After FY 2014 Purchases	PURCHASE TOTAL
Advanced Imaging Technology ^{1/}	TBD	1,000	0	0	TBD	0	TBD	1,000
NextGen Explosives Trace Detector ^{2/}	2,043	1,395	0	648	100%	0	100%	2,043
Portable Explosives Trace Detector ^{3/}	375	0	0	125	33%	250	100%	375
Advanced Technology	2,325	1647	553	0	95%	0	95%	2,200
Credential Authentication Technology ^{4/}	1,400	9	0	496	36%	0	36%	505
Bottled Liquids Scanner ^{5/}	1,690	1,300	390	0	100%	0	100%	1,690
Chemical Analysis Device	255	255	0	0	100%	0	100%	255

1/ The FOC for AITs is dependent upon Risk-Based Security pilots that are currently underway and will be impacted by initiatives such as TSA Pre✓™ programs which are impacted by the degree of passenger voluntary enrollment and participation. TSA will present new requirements in DHS Acquisition Review and brief Congress as progress continues. Purchases to Date include 251 Rapiscan units which TSA is currently removing from the field to comply with the Federal Aviation Administration and Reform Act of 2012 mandate that AITs must have ATR installed.

2/ FOC for NextGen ETD has been adjusted from 1,690 to 2,043 based on collocation strategy decision

3/ FOC for Portable ETD has been adjusted from 811 to 375 as a result of changes to the Concept of Operations.

4/ FOC for CAT was adjusted from 2,325 to 1,400 as a result of changes to the Concept of Operations and allocation model.

5/ FOC for BLS has been increased from 1,300 to 1,690 to better align with TSA's lane distribution strategy

Checkpoint Technology Average Costs per Unit

Technology	Average Costs
Advanced Imaging Technology	\$130,000 (Est)
NextGen Explosives Trace Detector	\$45,000
Portable Explosives Trace Detector	\$48,000 (Est)
Advanced Technology	\$135,000
Credential Authentication Technology	\$25,000 (Est)
Bottled Liquids Scanner	\$35,000
Chemical Analysis Device	\$50,000

TSA will make every opportunity to obtain cost savings throughout the procurement and deployment of checkpoint technology. TSA will try to leverage quantity discounts offered by industry to reduce the per unit cost and utilize available qualified product lists to conduct competitive procurements. TSA will closely coordinate with airports to ensure product delivery orders can be managed to reduce warehouse inventories and associated shipping and/or storage costs.

Advanced Surveillance Program: \$5.0 million: The Advanced Surveillance Program (ASP) provides additional security capabilities, such as CCTV surveillance equipment, as part of TSA’s layered approach. This is accomplished by partnering with transportation authorities to expand their existing surveillance systems. In doing so, the Federal Government gains the ability to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the “best practices” of the security industry worldwide. They provide threat identification, situational awareness, deterrence, and loss prevention, investigative and legal activities along with standard management functions within the checkpoint areas to include exit lanes, sterile areas, and queue lanes. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control for first responders in the event of an incident or threat. The EDS Procurement and Installation PPA includes funding to support ASP in baggage handling areas.

	Projects Completed with Prior Year Funds	Projects to be Completed with FY 2014 Funds
Advanced Surveillance Program Projects	79	2

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands) \$251,740 (\$190,510 from Checkpoint Support PPA, \$61,230 from Screening Technology Maintenance PPA)	FY 2013 Activity Funding (\$thousands) \$274,182 (\$191,763 from Checkpoint Support PPA, \$82,419 from Screening Technology Maintenance PPA)	FY 2014 Activity Request (\$thousands) \$165,678 (\$92,787 from Checkpoint Support PPA, \$72,891 from Screening Technology Maintenance PPA)
Passenger Screening Program	PSP identifies, tests, procures, deploys, and sustains equipment that detects threats concealed on people and in their carry-on items as they enter the airport terminal sterile area through the passenger screening checkpoints. The envisioned security system is an optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities. Currently, PSP is composed three capability areas: People Screening, Carry-on Baggage Screening, and Layered Security. While increasing screening effectiveness through this layered approach, PSP also balances other operational considerations such as maximizing checkpoint efficiency; mitigating privacy and dignity concerns; maintaining operational affordability; and addressing deployment, maintenance, and other life cycle issues. PSP is now evaluating the next generation of detection systems that address opportunities to strengthen current screening capabilities.	

	<ul style="list-style-type: none"> • PSP addresses a capability gap by creating a security system that is an optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities. Currently, PSP is composed three capability areas: People Screening, Carry-on Baggage Screening, and Layered Security. In FY13 the program plans to undergo Phase III and Phase IV incremental testing. Performance Measures <ul style="list-style-type: none"> ○ Percent of Airports with Bottled Liquids Scanner Coverage ○ Percent of Checkpoint Lanes with Advanced Technology Coverage ○ Operational Availability for Carry-on Baggage Screening Equipment ○ Average Rating of Customer Satisfaction ○ Percent of Checkpoint Lanes with Advanced Imaging Technology Coverage • PSP provides the resources required to deploy and maintain passenger screening and carry-on baggage screening equipment and processes at approximately 2,225 passenger checkpoint lanes at airports nationwide, in order to minimize the risk of injury or death of people, or damage of property due to acts of terrorism.

Transportation Security Administration
Aviation Security:
EDS Procurement and Installation
Program Performance Justification**
(Dollars in Thousands)

PPA: EDS Procurement and Installation

	Perm. Pos	FTE	Amount
2012 Revised Enacted	120	107	222,310
2014 Adjustments-to-Base	4	9	(21,508)
2014 Current Services	124	116	200,802
2014 Program Change	-	-	(116,815)
2014 Total Request	124	116	83,987
Total Change 2012 to 2014	4	9	(138,323)

TSA requests \$84.0 million for EDS Procurement and Installation. The adjustments-to-base (ATBs) include: a non-recur of the \$0.428 million transfer to U.S. Secret Service; 4 FTP/ 4 FTE for Balanced Workforce Strategy Follow-On from contract conversions; a decrease of \$0.063 million for transfers from the Aviation Security appropriation to the Transportation Security Support appropriation; and a transfer of \$0.001 million from DHS's Chief Administrative Officer for working capital fund to pay for shuttle services. The ATBs also include: an increase of \$0.142 million for pay COLA; an increase of 7 FTE to adjust for Actual FTE; and a decrease of 2 FTE and \$22.0 million for efficiencies. In addition, the request includes a \$116.8 million program decrease.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA's Current Services:
(dollars in millions)

	Funding Source	FY 2012 Revised Enacted	FY 2014
Purchase of Checked Baggage Equipment		200.6	117.0
	<i>ASCF</i>	<i>146.2</i>	<i>117.0</i>
	<i>Discretionary</i>	<i>54.4</i>	<i>0.0</i>
Installation		266.7	213.0
	<i>ASCF</i>	<i>103.8</i>	<i>133.0</i>
	<i>Discretionary</i>	<i>162.9</i>	<i>80.0</i>
Advanced Surveillance Program (ASP)	<i>Discretionary</i>	5.0	4.0
Total ^{1/}		\$472.3	\$334.0

^{1/} Includes mandatory funding of \$250 million from the Aviation Security Capital Fund (ASCF).

The FY 2014 request will be used to test, evaluate, procure, and deploy electronic baggage screening technology systems. TSA’s Electronic Baggage Screen Program (EBSP) is responsible for ensuring that 100 percent of all checked baggage is screened with Explosives Detection Systems (EDS) or a suitable alternative. The two primary technologies acquired and deployed are EDS and Explosives Trace Detection (ETD) devices. TSA’s activities related to purchasing and installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) operational testing and evaluation (OT&E), 2) equipment purchase, 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) equipment installation, integration, and multiplexing, 8) independent verification and validation testing, and 9) program support.

In 2006, TSA developed a Strategic Plan for achieving risk-based, optimal screening solutions. Implementation of these optimal solutions has resulted in decreased life cycle costs for the EBSP. TSA’s progress towards completing airports of highest priority as identified in TSA’s risk-based EBSP Integrated Deployment Model is shown below.

Program progress relative to EDS/ETD deployment and facility modifications
Projections through FY 2014^{1/}

	Total Number of TSA Airports ^{2/}	Entire Airport Completed	Some Screening Areas with Completed Systems	Total Number of Airports with Some Completed Systems	Percentage of Airports with Some Completed Systems
CAT X	28	19	8	27	96%
CAT I	57	40	7	47	82%
CAT II	79	79	0	79	100%
CAT III	128	124	1	125	98%
Total	292	262	16	278	95%

^{1/} As of February 15, 2013; subject to change based on enacted funding levels.

^{1/} Projects planned to be completed with funds enacted through FY 2014

^{1/} Assumes continued legislative approval to allow the Aviation Security Capital Fund to be used for procurement and installation of equipment.

^{2/} Based on TSA Threat Category listing as of February 12, 2013.

Prioritization

TSA historically focused on completing the highest priority systems at Airport Security Threat Category (CAT) X – III airports with risk being a major factor in determining the priorities. As shown in the chart above, considerable progress has been made towards this goal.

As of January 2013, TSA had over 1,900 EDS units deployed at airports nationwide. A large portion of the EDS and ETD fleet was deployed in 2002 and 2003 to meet the requirements of the Aviation and Transportation Security Act of 2001 (PL 107-71). Many EDS and ETDs are reaching the end of

their useful lives of approximately seven to ten years. In FY 2012, EBSP shifted its planning and programming focus to make recapitalization a priority. Equipment is prioritized for replacement based on age, maintenance history, and operational performance. This change in emphasis reduced TSA's focus on funding major facility modification projects and increased the funding requirements for the purchase and installation of new equipment to replace the aging fleet. As a result, TSA requested legislative changes to restrictions on the use of funding received from the Aviation Security Capital Fund (ASCF), which previously restricted the use of funds to facility modifications at airports. Upon legislative approval in FY 2012, TSA began using ASCF funds for the procurement and installation of EDS equipment required for its recapitalization effort in addition to facility modifications. TSA requested the legislative change in the FY 2013 budget request and continues this request in FY 2014.

Recapitalization and Optimization

Recapitalization addresses the programmatic and project-specific elements requisite for EDS and ETD life cycle replacement. Recapitalization efforts focus on a like-for-like replacement of existing equipment with minimal additional modifications. Optimization refers to efforts that also include significant system changes designed to enhance safety and security, improve performance, increase efficiency, reduce operating costs, and address personnel considerations associated with in-line EDS.

To address the significant need to recapitalize the existing EDS and ETD fleet, TSA has developed a formal recapitalization plan. The recapitalization plan:

- Identifies and defines the processes needed for implementing a successful recapitalization and optimization effort;
- Defines information needs and sources to support the plan, and technical decisions for prioritization, scheduling, resource planning, and execution;
- Ensures process consistency across all projects; and
- Defines and prioritizes a list of eligible recapitalization and optimization projects.

Technology

EDS equipment can exist in two configurations: stand alone or in-line. Stand-alone systems are currently located in airport lobbies and "behind the scenes" in baggage handling areas. In-line configurations integrate the EDS equipment into the baggage handling system. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for Transportation Security Officers (TSOs) can improve with in-line systems as alarms can be resolved in quieter, dedicated spaces that are properly designed for the alarm resolution function.

Continuous improvements are required to enhance threat detection, increase equipment reliability, reduce downtime, extend service life, and eliminate TSO safety hazards in order for TSA to substantially improve the effectiveness and efficiency of the deployed screening equipment.

In FY 2010, TSA began a competitive procurement effort for EDS that involves rigorous processes for establishing requirements, testing the products, evaluating the tests, and weighing the value of available options to determine which combination of factors provide the best solution. TSA is using the competitive procurement effort as the primary tool for driving the technological changes necessary

to achieve improved security and increased performance at a lower life cycle cost. TSA initiated an incremental development strategy for systems to allow for the purchase and deployment of EDS with highest threat detection and other technical capabilities available. The strategy provides new and existing vendors with an open opportunity to submit equipment for certification and testing.

EDS technologies are classified as follows:

- High-speed (HSEDS): Throughput > 900 bags per hour (bph)
- Medium-speed (MSEDS): 400 < Throughput ≤ 900 bph
- Reduced-size (RSEDS): 100 < Throughput ≤ 400 bph

ETDs are used both as primary and secondary screening methods (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the EBSP program. ETDs are designed to detect explosives residue left on an item. There are approximately 45 CAT III airports at which over 75 percent of checked bags are screened primarily by ETDs. TSA is currently exploring the use of alternative qualified Transportation Security Equipment, such as Bottled Liquids Scanners, for checked baggage alarm resolution.

Purchase of Checked Baggage Equipment: \$117.0 million: The FY 2014 request includes funding to support the purchase of 136 EDS for deployment in our Nation’s airports. The procurement will consist of RSEDS and MSEDS. Purchases in FY 2014 are planned to support projects where prior year funding completed facility modifications and to purchase units to replace aging equipment in the field. TSA will continue implementation of its Incremental Development Strategy to allow vendors to refine their automatic detection algorithms so that increasingly effective equipment types can become certified and qualified for purchase by TSA. In this way, TSA provides opportunities for near term deployment of screening equipment utilizing enhanced screening detection standards and at the same time provides future procurement windows to increase both efficiency and effectiveness standards as new threats emerge. Efforts will continue toward reducing purchase costs through competitive procurements in addition to the implementation of contracts for EDS and ancillary equipment that incorporate direct shipping to airports instead of warehouses. TSA will also continue to pursue potential equipment upgrades capable of extending the life of existing equipment as part of its effort to contain procurement costs.

The following table provides a breakout of planned technology purchases:

(dollars in millions)

Equipment Type	FY 2013			FY 2014		
	Planned Purchases	Cost/ Unit	Projected Costs	Planned Purchases	Cost/ Unit	Projected Costs
Reduced-Size EDS	27	\$0.5	\$13.5	66	\$0.5	\$33.0
Medium Speed EDS	71	\$1.2	\$85.2	70	\$1.2	\$84.0
Total	98		\$98.7	136		\$117.0

Installation: \$213.0 million: The FY 2014 request includes funding for installation. Installation funding supports the multi-year Letter of Intent and Other Transaction Agreement project requirements and the installation of electronic baggage screening equipment in the Nation’s airports. In addition to equipment installation, integration, and multiplexing, installation activities include independent verification and validation testing, site survey and design, facility modification, site preparation, warehousing and shipping, OT&E, and program support. TSA will continue efforts to reduce and avoid program support costs via improvements to data and document management and processing systems.

Installation funding is also used to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations in the field under a variety of environmental conditions. In particular, this includes:

- OT&E as part of the acquisition process for items procured by TSA;
- OT&E in support of regulatory and policy decisions in areas such as air cargo and surface transportation;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization; and
- T&E capabilities development to improve the quality and utility of evaluation products.

Advanced Surveillance Program: \$4.0 million: The Advanced Surveillance Program (ASP) provides additional security capabilities, such as CCTV surveillance equipment, as part of TSA’s layered approach. This is accomplished by partnering with transportation authorities to expand their existing surveillance systems. In doing so, the Federal Government gains the ability to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the “best practices” of the security industry worldwide. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions within the checked baggage areas. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control as well as first responders in the event of an incident or threat. The Checkpoint Support PPA includes funding to support ASP within the checkpoint areas to include exit lanes, sterile areas, and queue lanes.

	Projects Completed with Prior Year Funds	Projects to be Completed with FY 2014 Funds
Advanced Surveillance Program Projects	79	2

PROCUREMENT ACTIVITIES:

<p>FY 2012 Activity Funding (\$thousands) \$698,903 (\$189,768 from EDS Purchase & Install PPA, \$259,135 from Screening Technology Maintenance PPA, \$250,000 from the Aviation Security Capital Fund PPA)</p>	<p>FY 2013 Activity Funding (\$thousands) \$685,957 (\$196,050 from EDS Purchase & Install PPA, \$239,907 from Screening Technology Maintenance PPA, \$250,000 from the Aviation Security Capital Fund PPA)</p>	<p>FY 2014 Activity Request (\$thousands) \$531,588 (\$55,970 from EDS Purchase & Install PPA, \$225,618 from Screening Technology Maintenance PPA, \$250,000 from the Aviation Security Capital Fund PPA)</p>
<p>Electronic Baggage Screening Program</p>	<p>The EBSP identifies, tests, procures, deploys, installs, sustains, and recapitalizes Transportation Security Equipment (TSE) across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging Explosives Detection System (EDS) and Explosive Trace Detection (ETD) units; and using competitive procurement contracts for new and viable technologies. Key components include the deployment of new TSE to respond to emerging threats, and the recapitalization of deployed TSE.</p> <ul style="list-style-type: none"> • EBSP addresses a capability gap by screening 100 percent of checked baggage. EBSP deploys approximately 2,000 EDS units and 5,000 ETD units in 450 airports. Performance Measures <ul style="list-style-type: none"> ○ Maintain 100 Percent Screening Capability of Checked Baggage ○ Cost per Checked Bag Screened ○ Average Rating of Customer Satisfaction ○ Operational Availability of Baggage Screening Equipment ○ Percent of Checked Bags Screened by EDS Equipment • The EBSP implements a national checked-baggage screening system to protect against criminal and terrorist threats, while minimizing transportation industry and traveling public burdens.

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Screening Technology Maintenance
Program Performance Justification**
(Dollars in Thousands)

PPA: Screening Technology Maintenance

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	320,365
2014 Adjustments-to-Base	-	-	5,744
2014 Current Services	-	-	326,109
2014 Program Change	-	-	(27,600)
2014 Total Request	-	-	298,509
Total Change 2012 to 2014	-	-	(21,856)

TSA requests \$298.5 million for Screening Technology Maintenance. The adjustments-to-base include: an increase of \$17.1 million to support screening technologies that are no longer under original manufacturer warranty beginning in FY 2014; and a decrease of \$11.3 million for efficiencies. In addition, the request includes a \$27.6 million program decrease.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA’s Current Services:

(dollars in millions)

	FY2012 Revised Enacted	FY 2014
Checked Baggage Equipment Maintenance	\$257.4	\$224.6
Checkpoint Equipment Maintenance	59.4	71.9
Disposal ^{1/}	3.6	2.0
Total	\$320.4	\$298.5

^{1/} Disposal amount is allocated evenly between Checked Baggage and Checkpoint Equipment.

Funding in this PPA supports the maintenance and disposal of Transportation Security Equipment (TSE) in the Nation’s airports. Maintenance is essential to preserve the operational capability of security technology equipment. During the warranty period, the Original Equipment Manufacturer (OEM) is responsible for all preventive and corrective maintenance actions as specified in each

technology acquisition contract. The OEM warranty period for major TSE begins when the equipment passes a Site Acceptance Test (SAT). Once warranties expire (normally after 24 months), all TSA checkpoint and checked baggage screening equipment is under a maintenance contract throughout its life cycle. Most maintenance is performed by contractor Field Service Technicians working for the OEMs or a third party Maintenance Service Provider. Preventive maintenance is performed according to the manufacturer's recommended schedule (e.g., monthly, annually, etc.). Corrective maintenance support is provided 24 hours a day, 7 days a week, to perform unplanned corrective repairs in the field. Maintenance contracts include labor costs for all preventive and corrective maintenance, as well as material costs for repair parts or consumables (e.g., Explosives Trace Detection (ETD) unit swabs).

In FY 2014, the funding in this PPA will support maintenance services, through firm fixed price contracts, for approximately 14,000 pieces of security equipment that have come out of OEM warranty. The reduction in the FY 2014 request is due in part to the successful effort to obtain two-year warranties for all screening equipment procured in FY 2012 and beyond.

Checked Baggage Equipment Maintenance: \$224.6 million: This request includes funding for preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems. These costs include labor; repair parts; packaging and transportation of repair parts; initial consumables for ETDs; tools, test equipment and calibration; maintenance training; and related logistics, data management, safety, occupational health, and environmental management functions.

Below are detailed projected maintenance costs for checked baggage screening equipment. Because the warranty period begins after successful SAT and because units are fielded throughout the year, the number of units in and out of warranty varies throughout the fiscal year. The FY 2014 requirement represents the projected maintenance cost for those units no longer under warranty, not the unit cost for the total number of fielded units.

Equipment ^{1/}	FY 2014 Fielded Quantity	Average Number of Units Out of Warranty	Average Number of Units in Warranty	FY 2014 Requirement
Explosives Detection System (EDS)				
CTX-5500	144	144	0	\$13,816,252
CTX-9000	219	219	0	\$32,179,581

Disposal				\$1,000,000

^{1/}The make/model of the equipment is subject to change based on actual acquisitions.

Checkpoint Equipment Maintenance: \$71.9 million: This request includes funding for the preventive and corrective maintenance activities required to maintain the operation of deployed passenger screening security equipment. These costs include labor; repair parts; packaging and transportation of repair parts; initial consumables for ETDs; tools, test equipment and calibration; and maintenance training.

Below are detailed projected maintenance costs for passenger screening systems. Because the warranty period begins after successful SAT and because units are fielded throughout the year, the number of units in and out of warranty varies throughout the fiscal year. The FY 2014 requirement represents the projected maintenance cost for those units no longer under warranty, not the unit cost for the total number of fielded units.

Equipment ^{1/}	FY 2014 Fielded Quantity	Average Number of Units Out of Warranty	Average Number of Units in Warranty	FY 2014 Requirement

Total Checkpoint Maintenance Requirement				\$71,891,205
Disposal				\$1,000,000

^{1/}The make/model of the equipment is subject to change based on actual acquisitions.

^{2/}FOC for AIT may change based on airport pilots underway which could lead to a system-wide evaluation. TSA will present new requirements in the DHS Acquisition Review and brief Congress as progress continues. The fielded quantity does not include the 251 Rapiscan AIT units, which TSA is currently removing from the field to comply with the Federal Aviation Administration and Reform Act of 2012 mandate that AITs must have Automated Target Recognition capability installed.

^{3/}Development is underway for AWT systems.

Disposal: \$2.0 million: This request includes funding for the disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g., higher screening throughput), technological advancements (e.g., improved detection capability), or supportability problems (e.g., frequent failures) dictate the need for replacement. Sometimes equipment is redeployed to satisfy screening requirements at other airports or loaned to partner nations based on requirements from the TSA Office of Global Strategies. Upon request, security equipment that is not redeployed is offered to other DHS and Federal agencies, or returned to manufacturers for credit on future procurements. Otherwise, surplus equipment is provided to the Defense Logistics Agency (DLA) Disposition Services for salvage and destruction. This budget includes funding to remove Sensitive Security Information and hazardous material from disposal equipment and for DLA disposal services.

PROCUREMENT ACTIVITIES:

<p align="center">FY 2012 Activity Funding (\$thousands) \$251,740 (\$190,510 from Checkpoint Support PPA, \$61,230 from Screening Technology Maintenance PPA)</p>	<p align="center">FY 2013 Activity Funding (\$thousands) \$274,182 (\$191,763 from Checkpoint Support PPA, \$82,419 from Screening Technology Maintenance PPA)</p>	<p align="center">FY 2014 Activity Request (\$thousands) \$165,678 (\$92,787 from Checkpoint Support PPA, \$72,891 from Screening Technology Maintenance PPA)</p>
<p>Passenger Screening Program</p>	<p>The Passenger Screening Program requests \$165.7 million in funding in FY 2014. This request includes \$92.8 million in the Checkpoint Support PPA and an associated \$72.9 million in the Screening Technology Maintenance PPA. Please see the EDS Purchase & Install PPA for a full description of the Procurement Activity.</p>	

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Aviation Regulation and Other Enforcement
Program Performance Justification**
(Dollars in Thousands)

PPA: Aviation Regulation and Other Enforcement

	Perm. Pos	FTE	Amount
2012 Revised Enacted	1,726	1,273	357,109
2014 Adjustments-to-Base	2	384	8,819
2014 Current Services	1,728	1,657	365,928
2014 Program Change	(82)	(79)	(11,278)
2014 Total Request	1,646	1,578	354,650
Total Change 2012 to 2014	(80)	305	(2,459)

TSA requests \$354.6 million for Aviation Regulation and Other Enforcement. The adjustments-to-base (ATBs) include: 6 FTP/6 FTE for Balanced Workforce Strategy Follow-On from contract conversions; a transfer of \$0.010 million from the Aviation Security appropriation to the Transportation Security Support appropriation; an increase of \$1.4 million for pay COLA; a decrease of 4 FTP/4 FTE and \$6.6 million from realignments, of which \$6.0 million will support collective bargaining. The ATBs also include: an increase of 174 FTE and \$31.9 million to annualize FY 2012 second year costs associated with VIPR, Canines, and international staff, an increase of 209 FTE to adjust for Actual FTE, \$12.9 million for repogramming and transfers; a decrease of 1 FTE and \$30.8 million for efficiencies. In addition, the request includes a decrease of 82 FTP/79 FTE and \$11.3 million for VIPR staffing reductions.

CURRENT SERVICES PROGRAM DESCRIPTION:

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and response to security incidents. It also provides an international component to foster consistency in worldwide security requirements.

The following table provides the components of this PPA:

(dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Domestic Regulatory Inspection	\$79.9	\$79.6
International Inspection and Enforcement	\$16.1	\$16.0
International Operations	\$70.1	\$59.7
Airport Law Enforcement & Assessments	\$81.4	\$69.8
National Canine Program (NCP)	\$77.7	\$88.7
General and Commercial Aviation	\$12.7	\$12.0
Visible Intermodal Prevention and Response (VIPR)	\$19.2	\$28.8
Total	\$357.1	\$354.6

Domestic Regulatory Inspection and Enforcement: \$79.6 million

The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of the 448 U.S. airports and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 Indirect Air Carriers (IACs) operating in the United States.

Over the past few years, TSA’s inspector community has made significant efforts to ensure that various airport inspections are scheduled in a way that balances/maximizes oversight while identifying possible efficiencies in scheduling. Analysis of inspection data as well as risk scores are used to drive and prioritize inspection activity and take into account various factors, including the latest intelligence information.

The following chart provides historical and current information on the total number of Transportation Security Inspector (TSI) positions. This PPA includes 865 TSI-Aviation Domestic Inspectors, of which 166 are Canine Handlers; 64 TSI-Aviation International Inspectors; and 15 TSI International Repair Station Inspectors.

	FY 2012	FY 2013	FY 2014
Aviation Regulation	974	974	944
Aviation Regulation - Domestic Inspectors/Security Specialists	654	654	654
Aviation Regulation - Domestic Canine Inspectors	166	166	166
Aviation Regulation - Domestic VIPR Inspectors ¹	75	75	45
Aviation Regulation - International Inspectors/Security Specialists	64	64	64
Aviation Regulation - International Repair Station Inspectors/Security Specialists	15	15	15
Air Cargo	681	681	681
Air Cargo - Domestic Inspectors/Security Specialists	500	500	500
Air Cargo - Domestic Canine Inspectors	120	120	120

Air Cargo - International Inspectors/Security Specialists ²	61	61	61
Surface	379	379	300
Surface - Domestic Inspectors/Security Specialists ³	225	225	225
Surface - VIPR Inspectors ¹	154	154	75
Total TSA Inspectors/Security Specialists	2034	2034	1925

1/ FY14 budget submission includes a program decrease reducing the amount of TSI-A in Aviation VIPR by 30 and TSI-S on Surface VIPR by 79.

2/ Includes an additional 38 International inspectors from FY 2012 Appropriation and 11 International inspectors from internal shifts within TSA.

3/ Technical correction to represent domestic field inspectors only (vice field and headquarters) which is commensurate to how the TSI in Aviation Regulation and Air Cargo is reported.

Aviation TSIs (TSI-As) have an essential role in executing local annual inspection plans based on the national inspection plan. As part of their inspection responsibilities, TSI-As review records and files pertaining to criminal history records checks performed pursuant to Federal law. The inspectors also review records and files to ensure compliance of indirect air carriers; private passenger and/or cargo charters; and airmen and aircrew with security requirements. In addition to inspections, TSI-As also perform testing to determine compliance with transportation security regulations. The TSI-As investigate incidents related to violations of TSA regulations, security directives, and approved security programs. Inspectors deliver technical briefings and provide assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

In FY 2012, TSA completed over 7,949 airport inspections, 15,833 aircraft operator inspections and 3,338 foreign air carrier inspections. To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among other important security measures through visual and hands-on inspection. Based on these assessments inspectors will recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft.

Beginning in FY 2013, the regulatory inspection and enforcement program began conducting two types of comprehensive inspections - “targeted comprehensives” will be conducted annually and “comprehensives” will be conducted bi-annually of all airports, aircraft operators, flight schools, repair stations, and foreign air carriers at domestic airports; conduct bi-monthly multi-week airport and flight school strikes, issue quarterly special emphasis inspections that focus on threat, risk, and previous year compliance; and support VIPR, and Playbook activities. “Targeted” comprehensive inspections are focused inspections relying largely on operational performance for determining compliance, i.e. testing. This captures the risk-based security model and will be conducted annually. “Comprehensive” inspections consist of the previously described “targeted” inspection and in addition

bring into play the support element of security requirements, i.e. records, signage, etc. This further extends the risk-based security model and will be conducted bi-annually.

International Programs (including International Inspection and Operations): \$75.7 million:

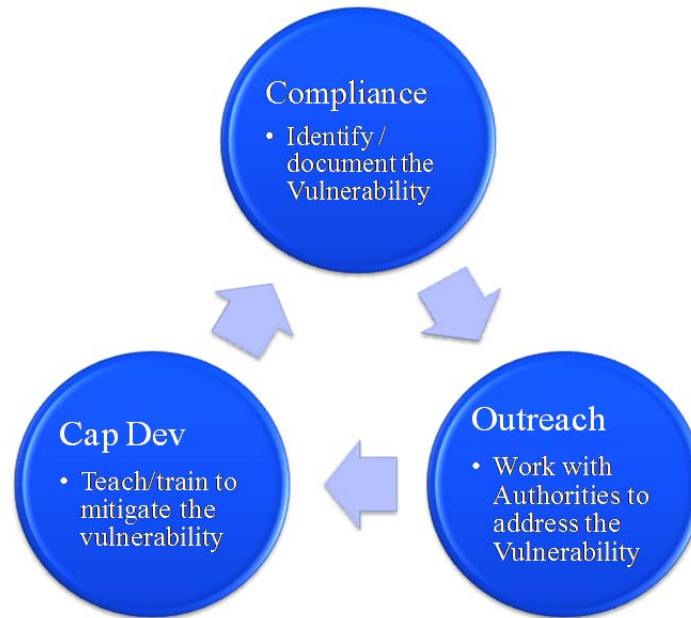

TSA's Office of Global Strategies (OGS) promotes alignment and consistency between the security requirements of the U.S. and foreign governments and is responsible for all facets of the agency's activities at foreign locations. The program's statutory and regulatory responsibilities focus on identifying and mitigating security risks to transportation modes used extensively by U.S. citizens and foreign governments. When a new threat or vulnerability emerges, TSA must coordinate with both foreign governments and industry the implementation of appropriate responses to mitigate the likelihood of a successful attack. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [i.e., International Civil Aviation Organization (ICAO), the Group of Eight (G8) Transportation Security Subgroup, and the European Civil Aviation Conference (ECAC)].

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- Liaison activity and representation with over 100 foreign governments, on-site liaison activity and representation in 26 foreign countries;
- Evaluation and documentation of vulnerabilities at nearly 300 last point of departure airports and nearly 900 air carrier stations located in foreign countries around the world;
- Liaison activity and representation with approximately 230 foreign air carriers;
- Active leadership within the regional and international community that comprises the world's transportation security expertise engaged in policy development; and
- Capacity building program for nations needing assistance in order to meet international standards.

TSA seeks to work proactively with foreign partners and overseas transportation operations affecting the United States by identifying risk through compliance, mitigating risk through outreach/engagement and capacity development, and responding to incidents as they occur.

IDENTIFICATION OF RISK

As threats and risks evolve, mitigation efforts will continue to be re-evaluated. As identified in the Transportation Sector Security Risk Assessment, international aviation represents the highest risk category. As a result, outreach and engagement with foreign partners, industry, and within the interagency is necessary to support threat mitigation to ensure policies are understood and implemented. As the threats evolve and shift international locations, TSA must be proactive in evaluating and shifting staff and resources to ensure that mission coverage is located where needed. This right-sizing ensures that the right people are in the right place at the right time. Each region presents its own challenges, but also its own best practices and lessons learned that, when combined, enhance TSA's ability to affect change globally.

Transportation Security Administration Representatives (TSARs)

TSARs serve as on-site coordinators for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs also serve as principal advisors on transportation security affairs to U.S. Ambassadors and other embassy officials. TSARs handle all modes of transportation and are responsible for ensuring the National Civil Aviation Security Programs meet international standards for aviation security. TSARs also facilitate the TSA compliance effort by planning and coordinating airport assessments.

TSA developed, distributed, and analyzed a comprehensive staffing scorecard to determine the number of countries that should be assigned to each TSAR. The scorecard accounts for the number of Last Point of Departure (LPD) airports in a given country, the vulnerabilities at those airports, the number of carriers and weekly flights from the airports, threat level in the country, the level of cooperation between the host government and the United States, the amount of assistance needed (and likelihood of sustainment of any help provided), and the level of priority of the country for TSA and the U.S. Government. The resulting data enables TSA to determine the appropriate distribution of countries to each TSAR to ensure an equivalent workload is maintained across the workforce.

TSARs			
Location	Number	Location	Number

Total 29			

All locations are subject to space availability at Embassies and country approval

Pre-Clearances

At 14 airports (eight in Canada, two in the Bahamas, one in Bermuda, one in Aruba, and two in Ireland), U.S. Customs and Border Protection (CBP) officers pre-clear passengers and baggage for entry into the United States. Inspection procedures, which are commensurate with U.S. port of entry screening, involve immigrations, customs, and agriculture screening. Pre-cleared international flights arrive at a U.S. domestic gate and passengers deplane directly into the sterile area at more than 65 U.S. airports without having another U.S. government inspection. Upon arrival at the U.S. domestic terminal facility, the traveler may either connect to a U.S. domestic flight or they may leave the airport. In order to permit these passengers to bypass TSA screening, TSA must ensure that the screening measures applied to passengers and their carry-on baggage at the pre-clearance foreign airport is equivalent to those measures performed at domestic U.S. airports. Determination of comparability entails extensive negotiation with the host government and frequent observations of operations.

Capacity Development

TSA's Capacity Development works to raise the baseline of transportation security and address the needs of partner nations to build sustainable aviation security practices through capacity development. An important part of this effort is aviation security training which is in response to needs identified by a number of entities (Department of Homeland Security, Anti-Terrorism Assistance Program, Department of State (DOS), Department of Transportation, and the Organization of American States (OAS)/Inter-American Committee Against Terrorism). In addition to assisting these entities, TSA provides sponsored civil aviation training resulting from foreign airport assessments or at the request of civil aviation authorities of foreign governments as conveyed through TSARs abroad.

TSA training is available to both government and non-governmental entities responsible for performing or overseeing security measures. The following represents a myriad of opportunities that can be provided:

- Auditor/Inspector Techniques;
- Cargo Security Management;
- Essential Instructor Skills Workshop;
- Excellence in Screening Techniques;
- Incident Management and Response;
- Instructional Design and Instructor Skills; and
- Preventive Security Measures.

Aviation security training is conducted on-site in the requesting country, at an international airport or alternate training venue. TSA solicits the assistance of men and women across the agency that have a desire to serve as instructors and provide their subject matter experience to provide assistance to nations in need.

Aviation Security Sustainable International Standards Team (ASSIST)

In addition to conducting aviation security training courses in support of TSA initiatives the ICAO, the OAS, the DOS, and TSA developed and fielded its own capability for providing focused and comprehensive support to willing partner countries with the goal of appreciably enhancing their aviation security programs. ASSIST deploys single and multifaceted teams of subject matter experts to provide in-depth training and technical assistance that help willing aviation security officials develop and sustain suitable aviation security institutions and procedures that meet all international standards and recommended practices. ASSIST focuses geographically on Africa, the Latin America/Caribbean area, and the Asia-Pacific region in light of the exponential growth in traffic from these regions to the United States, as well as concerns about the security of transiting U.S. passengers and cargo.

Cargo Security

Air cargo security, especially those measures applied to goods carried on passenger aircraft, remains important to DHS. TSA continues several efforts to ensure that cargo destined for the United States is subjected to the required level of screening. These efforts include:

- Convening the International Cargo Workgroup and focusing on the full spectrum of cargo security issues such as determining acceptance of other countries' cargo programs, identifying best practices for dissemination to other cargo experts, and incorporating all-cargo operations into the Compliance Work Plan;
- Revising the comprehensive Risk Methodology that aligns with the process used for passenger airports;
- Ensuring that the FY 2013 Work Plan reflects a comprehensive review of all airports and carriers involved in transporting cargo directly to the United States;
- Implementing the airport assessment methodology for those airports providing only cargo operations/service to the United States;
- Beginning compliance/verification procedures for new ICAO standards pertaining to Supply Chain Security; and

- Conducting visits to all airports and air carrier stations involved in transporting cargo on passenger aircraft to the United States.

Transportation Security Specialists (TSS)

TSA identifies vulnerabilities at foreign locations through two primary means - assessments of foreign airports and inspections of air carriers that fly from those airports.

Under 49 United States Code (U.S.C.) 44907, TSA is charged with assessing all foreign airports with flights to the United States and those from which U.S. air carriers operate (regardless of the destination). TSA has a cadre of Security Specialists who visit the nearly 300 airports at one- to three-year intervals. Frequency of the visits is based on risk computations of current threat, documented vulnerabilities, and flight data. During the assessments, TSA evaluates the security posture of the airport in accordance with security standards established by the ICAO. The observations focus on screening (passengers, accessible property, and checked bags), access control (e.g., fence integrity, badge display and control, vehicle access), aircraft security (e.g., ensuring the aircraft was guarded against any unauthorized access), cargo, catering, and quality control (e.g., ensuring that screeners were properly trained).

Annual visits are conducted to ensure that all U.S. air carriers operate in compliance with TSA regulations identified in the Aircraft Operator Standard Security Program (AOSSP) and supporting Security Directives (SDs). TSA also inspects foreign air carriers that fly to the United States from each airport that they operate to ensure compliance with the Model Security Program and supporting Emergency Amendments (EAs). At airports where the vulnerability shortfalls have been documented as particularly egregious, these inspections occur semi-annually.

TSA has a spectrum of responses available to mitigate issues identified during these visits. Options range from providing on-the-spot correction recommendations, to conducting formal training, to recommending enacting a Public Notice that the airport does not implement adequate security measures, to suspending service. These last two responses are usually only considered when all other attempts have failed in assisting the airport or host government to improve security. Interim measures may also include issuance of site-specific SDs and EAs (that require additional measures by the regulated air carriers) or repeated visits by Security Specialists to evaluate progress.

The TSS and support staff will enable TSA to continue airport assessments, air carrier inspections, and in the very near future, foreign repair stations audits. In FY 2012, TSA increased the Cargo TSS by 48 (37 from the FY 2012 appropriation and 11 that TSA shifted internally to the Global Cargo Program from Office of Security Program Industry and Engagement) as part of the effort to increase the emphasis on international air cargo inspection. Reference the Air Cargo PPA for funding information.

TSS	
Location	Number
Miami	29
Frankfurt	28
Dallas	23
Los Angeles	10
Singapore	10
*Dulles (AME Region)	10
Honolulu (AP Region)	8
Cargo HQ	15
HQ	5
TOTAL	138

*AME ROC location currently at Dulles until a location in region is determined

Due to space restraints at Embassies, TSA distributed the TSS as depicted in the chart above. The five headquarters staff are made up of TSS Desk Officers.

Foreign Repair Station Inspection Program

TSA is required under Vision 100 (49 U.S.C. 44924) to establish security regulations for foreign and domestic aircraft repair stations and to conduct audits of foreign repair stations. The Aviation Repair Station Security Notice of Proposed Rule Making (NPRM), TSA-2004-1713 RIN 1652-AA38, proposes security requirements for repair stations that are certificated by the Federal Aviation Administration (FAA) and codifies TSA's inspection authority.

This program serves to ensure the security of maintenance, overhaul, repair and assembly work conducted on air carrier aircraft and components at foreign and domestic repair stations. This will be achieved through specific inspection activities including security reviews and audits, vulnerability assessments and surveys. Implementation of the Vision 100 legislation for repair stations will allow FAA to certify new repair stations regulated under 14 CFR part 145.

TSA issued a NPRM for aircraft repair station security that clarifies the agency's inspection authority and imposes security requirements for both domestic and foreign repair stations, notably pertaining to control access for aircraft and aircraft components. Efforts include, but are not limited to, conducting voluntary reviews for security enhancement of the 717 non-US based foreign repair stations.

The Repair Station Inspection program uses a risk-based methodology to schedule foreign airport assessments and foreign air carrier inspections. Currently, all air carriers at foreign airports are inspected annually.

This program engages industry through a voluntary audit program which involves a three-tier approach for conducting audits: 1) scheduling visits using the risk-based prioritization in conjunction with TSA Foreign Airport Assessment Program; 2) outreach to U.S. air carriers to capture the foreign repair stations they contract; and 3) contacting corporations with multi-station ownership for information on their foreign repair stations.

Global Policy and Engagement [Global Policy and Programs]

TSA’s Global Policy and Engagement (GPE) guide TSA’s development of policy, including cargo policy, affecting international operations and stakeholders. This includes planning international projects and diplomatic approaches, strategic planning, cargo related outreach, and ensuring consistent messaging to international industry members concerning policy and change. TSA also assigns a point of contact to the ICAO to work collaboratively towards the development of global aviation security standards. GPE continues to perform the ICAO policy development and implementation responsibilities that had been conducted by International Operations Division.

International Industry Representatives

International Industry Representatives (IIRs) serve as TSA's principal representative to the international aviation industry. The role of the IIR has become increasingly involved as more stringent rules, requirements, and procedures have been imposed on foreign air carriers with scheduled or public charter operations to and from the United States from foreign locations. The IIRs provide oversight and guidance to each foreign air carrier and are responsible for ensuring air carriers understand and comply with U.S. regulations and TSA-accepted security programs and initiatives.

In FY 2013, there are five headquarters personnel that support the twelve IIR staff in the field. They serve as the headquarters communication and coordination link for the field when resolving highly sensitive security issues associated with international incidents, and develop and analyze the risk assessments and metrics. They communicate intelligence information, assist in the preparation and distribution of DHS/TSA policies and plans for threats to worldwide transportation security systems, and assist IIRs with technical direction for both foreign air and cargo carriers. As the table below indicates, IIRs are placed globally to assist TSA outreach efforts in locations with foreign partners. The IIR locations are determined by regional need, country approval and embassy space.

IIRs	
Location	Number
Abu Dhabi UAE	1
Asia Pacific Islands (Hawaii)	1
Beijing China	1
Caribbean/Central America (Miami)	2
Frankfort Germany	3
Mexico City Mexico	1
Ottawa Canada	1
Singapore Singapore	1
Warsaw Poland	1
HQ (support)	5
Total	17

The number of active foreign air carriers fluctuates per year as new carriers either begin or cease operations to the United States. By the close of FY 2012, there were 216 TSA-regulated passenger and all-cargo carriers.

Airport Law Enforcement & Assessments: \$69.8 million

Law Enforcement Officer (LEO) Reimbursement Program: In accordance with the Aviation and Transportation Security Act (ATSA), TSA established Other Transaction Agreements (OTA) with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports throughout the United States for post 9/11 law enforcement hours. They ensure that a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints.

In FY 2012, TSA funded 326 cooperative agreements that included the following LEO patrol and response hours:

Airport Category	Hours
I	551,442
II	429,046
III	338,242
IV	236,257
X	824,599
Total	2,379,586

In FY 2013 and FY 2014, TSA will continue to improve program efficiencies and maximize the use of available program funds by reviewing participants’ actual annual expenditures and adjusting award levels accordingly. The review process will include site visits to a select number of airports during the course of the fiscal year to ensure operational and fiscal compliance.

Assistant Federal Security Directors for Law Enforcement (AFSD-LEs):

In addition to these agreements, AFSD-LEs further coordinate and support TSA’s security efforts with local law enforcement. AFSD-LEs partner with law enforcement officials from other Federal, State, and local agencies to address significant issues, share intelligence and ensure the safety of airports. AFSD-LEs are assigned to a hub airport, but most are also responsible for spoke airports in their district.

In FY 2012, TSA received an additional 22 AFSD-LEs, bringing the total number of positions to 104 covering 275 airports. These strategically placed positions provide an additional layer of support to airports. They also help to mitigate response times for investigations and to ease congestion at the checkpoint.

Security Assessments

Joint Vulnerability Assessments (JVA) are a joint effort undertaken by TSA and FBI with the purpose of assessing current and potential threats to commercial air transportation facilities within the United States. The process is a direct result of the increasing threats to aviation, which prompted Congress to pass Section 310 of the Federal Aviation Reauthorization Act of 1966. Section 310 requires the FAA and the FBI to conduct joint threat and vulnerability assessments of security at U.S. airports. This responsibility was transferred to TSA under ATSA.

Man-Portable Air Defense System (MANPADS) Vulnerability Assessments (MVAs) are designed to enhance security of air transportation by minimizing the potential for missile or stand-off weapons attack against aircraft. The program is designed to deter, detect, and mitigate the MANPADS threat.

Multiple Disciplinary Vulnerability Assessment (MDVA) is a vulnerability assessment initiative that capitalizes on a multi-layered approach to gather and analyze information identified as vulnerabilities from personnel, physical and information systems within the inner-security environment of an airport. The MDVA will identify and mitigate insider threats.

TSA also conducts international MANPADS Assist Visits (MAV) to partner with international allies on joint international assessments that are appropriate and mutually beneficial to the U.S. Government and the host nation. These visits are similar to the domestic MANPADS Vulnerability Assessments and are conducted at foreign airports at the host country's request to help identify and define potential launch locations in areas surrounding the airport by using known terrorist methodology and weapon employment tactics and capabilities.

National Canine Program (NCP): \$88.7 million

TSA's NCP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-sabotage program. Fostering partnerships throughout the Federal Government, State and local law enforcement, and the international community is a key element of TSA's mission.

The operation of TSA Passenger Screening Canine (PSC) teams in the airport passenger environment is an effective and efficient way to screen the general public in mass numbers. The PSC detection methodology relies on the canine's ability to process air currents and detect, carried or body worn explosives whether someone is moving or still. The canine handler is trained to read the canine's behavioral changes to identify the source of an explosives odor without knowledge of the targeted subject and follow the vapor wake to the explosive source.

Through OTAs and reimbursable (formerly cooperative) agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs. In FY 2013, TSA will train the remaining 25 teams received in FY 2011 as well as the 20 additional PSC teams received in FY 2012. TSA will also initiate PSC training methodology for state and local law enforcement teams.

Explosives Detection Canine Team Assignments

Type	Function	FY 2013		FY 2014	
		Teams	Locations	Teams	Locations
State and Local Law Enforcement Teams (Legacy)	Aviation & Air Cargo ¹	491	79	491	79
	Multi-Modal	27	8	27	8

Total All Explosives Detection Canine Teams		921	156	921	156

1/ 75 percent of funding is from Aviation Regulation and 25 percent of funding is from Air Cargo.

General and Commercial Aviation - \$12.0 million

TSA coordinates aviation security efforts with airlines, airports, and within the general aviation community.

Commercial Airlines

The Commercial Airlines program is responsible for 69 U.S. certificated aircraft operators. This activity includes the TSA/Aircraft Operator Corporate liaison function, development of new aviation security policy, and management of existing policy for necessary modification or elimination based on the evolving threat against full program commercial airlines. Assigned to multiple commercial airlines, Principal Security Specialists (PSSs) act as the TSA representative to provide the industry with supporting interpretations, clarifications, and assessments of the regulations. TSA monitors the specific operator's compliance level and takes action when a trend is identified. PSSs are subject matter experts on their assigned carriers, including approvers of carrier's security training programs provided to the flight deck and cabin crew, and ground security coordinators. Additionally, TSA provides vital subject matter expertise for critical incident management during times of national emergencies and conduct outreach to airlines when developing aviation security measures to mitigate threats.

Commercial Airports

TSA builds relationships with the commercial airport industry and oversees the development of policies and programs to enhance security at the Nation's commercial airports. This office tasked the Homeland Security Study Analysis Institute (HSSAI) with developing a framework to assist commercial airport operators with resource allocation decisions, allowing TSA and the FSDs to understand factors that airport operators consider in making decisions regarding security resources in a fiscally constrained environment, and to inform airport operators of the various costs and benefits of innovative security measures in use at a range of commercial airports. TSA also continues to promote airports' biometrically enabled interoperable solutions based upon federal standards to include PIV-I, for non-federal issuers of credentials and FIPS-201.

General Aviation (GA)

TSA coordinates aviation security efforts with airlines, airports, and within the general aviation community. GA includes corporate operators, recreational and private aircraft, and charter operations; private and public use of general aviation airports, airmen, and airspace. TSA works collaboratively with industry and government stakeholders to develop innovative methods to enhance security and to develop, disseminate, and consistently apply a framework of appropriate and feasible security standards. TSA uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

Visible Intermodal Prevention and Response (VIPR) - \$28.8 million

The objective of VIPR deployments is to augment stakeholder capabilities that disrupt and deter potential terrorist activity. To achieve this end, TSA utilizes risk-based, random deployments that are unpredictably executed in timing, location, and types of activities. VIPR operations teams consist of TSA personnel that may include TSIs, TSOs, FAMs, BDOs, TSS-Es, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team members provide a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities bolster the system’s efforts to prevent an adversary from orienting on and breaching a pattern in security activities.

During FY 2013, the VIPR Program will continue to leverage its resource levels and stakeholder relationships to conduct more extensive operations at high risk locations. TSA anticipates the number of operations will remain constant for FY 2014.

	Multi-Modal Teams	Surface Appropriation Teams	Aviation Operations	Surface Operations	Total Operations
FY 2012 Actual	22	15	3,977	8,868	12,845
FY 2013 Planned	22	15	3,800	8,800	12,600
FY 2014 Planned	22	15	3,800	8,800	12,600

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands) <i>\$113,781 (includes funding from multiple PPAs)</i>	FY 2013 Activity Funding (\$thousands) <i>\$126,640 (includes funding from multiple PPAs)</i>	FY 2014 Activity Request (\$thousands) <i>\$124,178 (includes funding from multiple PPAs)</i>

Aviation Security:
Airport Management and Support
Program Performance Justification**
(Dollars in Thousands)

PPA: Airport Management and Support

	Perm. Pos	FTE	Amount
2012 Revised Enacted	3,081	2,796	569,473
2014 Adjustments-to-Base	47	214	29,640
2014 Current Services	3,128	3,010	599,113
2014 Program Change	(1)	(1)	(8,242)
2014 Total Request	3,127	3,009	590,871
Total Change 2012 to 2014	46	213	21,398

TSA requests \$590.9 million for Airport Management and Support. The adjustments-to-base (ATBs) include: an increase of \$2.6 million for pay COLA; 1 FTP/1 FTE for Balanced Workforce Strategy Follow-On from contract conversions, an increase of 42 FTP/40 FTE and \$31.3 million from transfers to the Aviation Security appropriation from the Transportation Security Support, Surface Transportation Security and the Federal Air Marshal Service (FAMS) appropriations; an increase of 4 FTP/4 FTE and \$1.3 million from realignments; and a transfer of \$0.024 million from DHS's Chief Administrative Officer for working capital fund to pay for mail facilities. The ATBs also include: an increase of 18 FTE and \$2.4 million for annualizations associated with FY 2012 program increases; 29 FTE and \$4.5 million from second year costs associated with AITs; an increase of 178 FTE to adjust for Actual FTE, \$0.753 million for reprogrammings and transfers; and a decrease 56 FTE and \$13.1 million for management adjustments. In addition, the request includes a decrease of 1 FTP/1 FTE and \$8.2 million to cease TSA airport exit lanes staffing, FAMS reduction, and reduction for other departmental priorities.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.
(dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Federal Security Directors (FSD) Staff and Headquarters	\$353.0	\$352.8
Transportation Security Operations Center (TSOC)	\$22.3	\$22.0
Airport Parking, Fleet Services, and Transit Benefits	\$27.2	\$26.8
Airport Rent and Furniture	\$166.9	\$189.2
Total	\$569.4	\$590.8

Federal Security Directors (FSD) Staff and Headquarters: \$352.8 million: This funding supports the salaries and benefits of FSDs and their staff, as well as travel, training, and contract requirements support. There are currently 120 FSD positions located throughout the Nation’s airports. The current list of airports by category is as follows:

Airports by Category	
CAT X	28
CAT I	57
CAT II	79
CAT III	128
CAT IV	156
Total	448

In addition, this funding provides for headquarters positions that direct the policy, analysis, and administration of aviation screening. Location /assigned duties of the FSDs and staff are as follows:

FSDs and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for seven spoke airports (Bedford-Hanscom, Barnstable, Martha’s Vineyard, Nantucket, Provincetown, Westover and Worcester airports).

FSDs and staff travel frequently between the hubs and spoke airports. Funding for airport management and staff provides the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

FSDs and staff develop operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA adapts to a dynamic and changing environment with industry accepted scheduling and modeling programs. These applications allow TSA to efficiently determine and schedule the TSO workforce at the Nation’s diverse airports. By accurately predicting, executing, and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

This activity also includes funding for Transportation Security Specialist – Explosives (TSS-Es). The TSS-E program strengthens the security of the Nation’s transportation systems by providing frequent interaction and formal training to TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. TSS-Es are highly skilled individuals who have undergone training in the render safe of improvised explosive devices and explosive ordinance. This program provides preventative measures against IEDs while reducing costly airport delays and closures. The TSS-E Program currently operates at the Nation’s largest 120 airports.

TSS-Es are assigned to select FSDs to provide subject matter expertise to TSA and its stakeholders on explosive threats to the Nation’s infrastructure. Although TSS-Es are assigned to selected FSD staffs

they have regional responsibilities making them available to all FSDs within their region to assist in multi-modal explosives security issues. TSS-Es conduct explosives vulnerability assessments in all transportation modes, participate in aviation related Joint Vulnerability Assessments and Man-Portable Air Defense (MANPAD) Vulnerability Assessments. They assist in the development of mitigation plans, conduct tailored explosives recognition and response training, and develop exercises for all transportation modes. TSS-Es also provide transportation specific expertise to the FBI Explosives Unit and the National Transportation Safety Board during investigations where explosives are suspected or confirmed.

Transportation Security Operations Center (TSOC): \$22.0 million: The TSOC is located at TSA's Freedom Center in Northern Virginia. The TSOC provides 24/7/365 coordination, communications, collaboration of intelligence and domain awareness for all DHS transportation-related security activities worldwide. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of action in the prevention of, and response to, terrorist-related incidents across transportation modes. The TSOC is co-located and closely aligned with TSA's Continuity of Operations and Emergency Preparedness activities. The TSOC contains an operational pod for the National Capital Region Coordination Center, a multi-agency collaborative effort to oversee the security of the National Capital Region, on the TSOC Watch Floor to enhance the National Capital Region security with seven federal partners and three departments and also contains the security related functions of the TSA Contact Center (TCC). The TSOC absorbed the security related functions of the TCC. The TSOC TCC vets reported security-related threats received via phone and email from the general public. In addition, the TSOC contracted the development and delivery of enterprise-wide training to prepare those involved with critical incident management with the ability to understand and carry out their roles and responsibilities.

In FY 2012, the Program accomplished the absorption of the Airspace Authorization Unit from the Office of Security Operations (OSO). The Airspace Authorization Unit, through the augmentation of temporary duty (TDY) personnel, provides remote operations to support the Airspace Security Operations Command Center (ASOCC) during designated DHS, National Special Security Event(s) (NSSE) such as the Democratic and Republican National Conventions and other events as needed.

The TSOC program also initiated the Command Duty Officer Pod (CDO POD) analysis section. Once complete the CDO POD will better meet the current and future watch operations and increasing responsibilities. The CDO POD supports an increasing number of National Special Security Events (NSSE) and Security Event Assessment Rating (SEAR) events each year and the number of incidents has increased from year to year.

This standup effort will be completed in two phases. Phase one will document the top down Mission and Operational Architecture of the CDO POD and develop a Design Intent Document to redesign the POD and supporting systems. Phase one began in FY 2012 and is scheduled to be completed in FY 2013. Phase two includes delivering a turnkey solution based on the outcome and TSA approval of the conceptual designs. This phase will begin in FY 2013 and continue throughout FY 2014.

Airport Parking, Fleet Services, and Transit Benefits: \$26.8 million: This program currently provides parking at 31 participating airports for field staff. In addition, TSA provides transit benefits for more than 11,000 field office employees and provides fleet services for 3,500 vehicles.

Airport Rent and Furniture: \$189.2million: In support of its field operations, TSA leases over 3.5 million square feet of space with more than 700 leases at TSA's 448 airports in addition to off-airport locations. On-airport space is used for mission-critical direct TSO support, such as break rooms, lockers, emergency coordination rooms and training facilities. These airport leases are typically short-term, requiring frequent re-negotiation. The annual rent is set by the local airport authority based on formulas to recapture operating costs, capital improvements, and major repairs. Annual increases are generally far greater than the change in the Consumer Price Index or any other general economic measure. Airport rent is far more expensive and far less predictable than general office space in other commercial buildings. TSA also manages a Checkpoint License program under which airports are reimbursed for the cost of providing electrical service to the TSA equipment and operations at the checkpoint, as well as providing janitorial and trash removal service to the TSA checkpoints.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands) \$4,690	FY 2013 Activity Funding (\$thousands) \$7,890	FY 2014 Activity Request (\$thousands) \$7,894
<p>Performance Management Information System</p>	<ul style="list-style-type: none"> • Description: <ul style="list-style-type: none"> ○ The Performance Management Information System (PMIS) is the designated TSA performance management system and provides the following capabilities: 1) Tools for the federalization of airports to collect and report measures as required by the Aviation and Transportation Security Act (ATSA) (P.L. 107-71); 2) Analytical expertise to TSA organizations in the measurement of unit performance and improvement; and 3) A repository for reporting congressionally mandated wait time data by airport and by checkpoint on a daily basis. • Needs Statement: <ul style="list-style-type: none"> ○ Transportation Security Administration (TSA) has the need for a performance measurement data collection and reporting capability. This capability will provide timely performance information on security activities in the field and supports our airport Federal Security Directors (FSDs) as they manage their operations. Screener supervisors and Federal Security Directors are expected to be able to provide daily performance data. FSDs, Headquarters staff and TSA Executives will monitor operational data as reported through this capability. It embodies the performance-based management culture that is critical to meeting our mission with the full confidence of the Congress, the Administration and the American public. This capability will capture and generate reports of critical performance data to inform TSA operations and enable public performance reporting. It provides timely performance data to help ensure that TSA meets Federal executive branch and Congressional mandates. • Program Goal: <ul style="list-style-type: none"> ○ PMIS supports DHS Strategic Goal #1: Protect our Nation from Dangerous People. Deter, detect, and mitigate threats to our Homeland. PMIS supports Objective 1.3 Strengthen Screening of Travelers and Workers. We will improve the security and mobility of travelers. ○ The PMIS program provides TSA field and HQ management with a variety of performance data, which when associated with budget information, will allow TSA to monitor and make adjustments to improve 	

	<p>efficiency.</p> <ul style="list-style-type: none"> • Performance Measures <ul style="list-style-type: none"> ○ Percentage of federalized airports reporting using PMIS ○ Percent of PMIS Calls returned within 24 hrs ○ Percent of Ad hoc reporting completed within 48 hours ○ Percent of available measures reported in the Performance and Information Management System (PIMS) Business Intelligence Tool as determined by TSA Program Offices and Stakeholders ○ Time (in hours) required to consolidate performance measures from PMIS data into PIMS ○ Percent errors in collected performance measures. ○ Percent of PIMS Business Intelligence Tool Uptime ○ Percent of PMIS Data Entry Capability Uptime • Justification for Actions: <ul style="list-style-type: none"> ○ PMIS is a tool through which TSA captures and analyzes daily operational information to achieve performance goals. PMIS is designed to measure and closely monitor performance at individual airports, as well as TSA Headquarters. This mission critical system provides TSA the information necessary to effectively manage aviation security operations, meet reporting requirements and support strategic planning. With over 25,000 active PMIS users in all 50 states and the territories, PMIS supports its large user base through data capture and consolidation, quality assurance, reporting and support capabilities to enhance security and prevent terrorism.

Aviation Security:
FFDO and Flight Crew Training
Program Performance Justification
(Dollars in Thousands)**

PPA: FFDO and Flight Crew Training

	Perm. Pos	FTE	Amount
2012 Revised Enacted	44	40	25,461
2014 Adjustments-to-Base	(3)	(2)	(1,478)
2014 Current Services	41	38	23,983
2014 Program Change	(41)	(38)	(23,983)
2014 Total Request	-	-	-
Total Change 2012 to 2014	(44)	(40)	(25,461)

TSA does not request funding for the Federal Flight Deck Officer (FFDO) Program and Crew Member Self Defense (CMSD) training in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TSA FY 2014 Budget contains no funding for the FFDO and Flight Crew Training PPA. TSA is proposing that the current FFDO and CMSD programs be continued, but funded by the airlines through a reimbursable agreement with the Federal Law Enforcement Training Center (FLETC) with training to be provided at FLETC sites.

Resource support for enabling the program is better provided by airlines desiring this capability on their flights, allowing TSA to direct limited appropriated funding to risk-based programs.

Within base resources, TSA will continue to provide program oversight through monitoring and tracking firearms and firearm requalifications, monitoring schedule changes of daily missions, and resolving incidents.

The FFDO program was created by the Arming Pilots Against Terrorism Act of 2003 (APATA – P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft.

The CMSD Program was established via the Vision 100 – Century of Aviation Reauthorization Act (FAA Reauthorization Act) in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

2014 Total Request	803	771	122,990
Total Change 2012 to 2014	4	48	2,336

TSA requests \$123.0 million for Air Cargo. The adjustments-to-base (ATBs) include; an increase of 4 FTP/4 FTE and \$0.592 million from reprogrammings/realignments; an increase of \$0.658 million for pay COLA; an increase of 18 FTE and \$2.5 million for annualizations associated with FY 2012 increases and an increase of 26 FTE to adjust for Actual FTE; and a decrease of \$1.5 million for efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Aviation and Transportation Security Act of 2001 charges TSA with the implementation of statutory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Air Cargo Policy Programs	\$19.1	\$15.3
Air Cargo Screening Technologies	\$12.5	\$11.4
Air Cargo Inspectors	\$58.9	\$66.5
Canine Program (Air Cargo)	\$30.2	\$29.8
Total	\$120.7	\$123.0

Air Cargo Policy Programs: \$15.3 million

The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of approximately 450 domestic airports, approximately 200 air carriers, and approximately 4,100 indirect air carriers and shippers. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) required TSA to implement a system to ensure that 100 percent of all cargo on passenger aircraft is screened at a level commensurate with checked baggage. To meet this requirement, TSA employed two phases for screening air cargo: one phase for cargo departing U.S. airports, and the other phase for international inbound cargo.

As of August 1, 2010, 100 percent of all cargo transported on a passenger aircraft departing U.S. airports are required to be screened. As of December 3, 2012, TSA required 100 percent screening of international inbound air cargo on passenger aircraft using a risk based approach to screening. Requirements incorporate the Trusted Shipper concept, which was originally set forth in the May 2011 Security Directives (SD) and Emergency Amendments (EA) issued in response to the attempt to conceal explosives in an all-cargo aircraft bound for the United States from Yemen. Screening totals reported by air carriers for December 2012 indicate that the 100 percent inbound mandate has been attained, and there have been no reported issues or challenges associated with meeting this requirement. Achieving 100 percent screening of all inbound air cargo carried on passenger aircraft fulfills a requirement of the 9/11 Act and further strengthens global supply chain security. In addition, TSA has implemented the Trusted Shipper concept for all-cargo carriers, and requires them to screen 100 percent of all elevated risk cargo to the same standards as those required for passenger carriers.

TSA continues to regulate approximately 1,140 Certified Cargo Screening Facilities (CCSFs) in the Certified Cargo Screening Program (CCSP). TSA developed the CCSP to support the requirement for industry to screen 100 percent of air cargo transported on passenger aircraft from U.S. airports. As of December 2012, CCSP facilities screened more than 60 percent of the cargo uplifted in the U.S. on passenger aircraft. CCSP allows screening of cargo at points throughout the supply chain by an approved CCSF prior to the arrival of the cargo at airport. Under the CCSP, TSA certifies cargo screening facilities located throughout the United States to screen cargo prior to providing it to airlines for shipment on passenger flights. Participation in the program is voluntary and enables vetted, validated, and certified supply chain facilities to comply with the 100 percent screening requirement. TSA conducts comprehensive re-certifications for each CCSF every three years.

In support of systems for the enhanced screening of international air cargo, TSA and the U.S. Customs and Border Protection (CBP) continue to implement the Air Cargo Advance Screening (ACAS) pilot to collect data, refine targeting procedures, and establish appropriate communication systems to test pre-departure advanced information collection, threshold targeting, and TSA-required screening and response procedures at non-U.S. locations. As of January 2013, there were 71 entities participating in the ACAS pilot, with over 60 million shipments successfully processed. TSA and CBP have encouraged participation by all segments of industry to ensure that various industry operational models

are evaluated and factored into the development of requirements for technology and policy. TSA and CBP continue to refine technical, procedural, and policy requirements for the use of ACAS and continue to work toward transitioning the pilot to a mandatory program through rulemaking once sufficient information has been collected and analyzed to ensure the operational feasibility of ACAS as a mandatory program. ACAS will provide a vehicle for targeting, but it will not replace the TSA physical screening requirements of the 9/11 Act for passenger aircraft.

TSA is working toward the development of a strategy to address industry's request for a program for the use of Third Party Explosive Detection Canines (EDC) to screen air cargo. In FY 2011, TSA implemented a pilot to determine the feasibility of using third-party EDC teams to screen cargo before transport on aircraft departing U.S. airports. The pilot ran from January through August 2011 at a limited number of CCSF locations. The primary objectives of the pilot were to: (1) evaluate whether industry canine teams could meet TSA standards for canine screening of air cargo; (2) establish and assess TSA processes for program implementation; and (3) determine TSA resource requirements. TSA continues to facilitate training on TSA security requirements for certified cargo screening facility Indirect Air Carriers (IAC), shippers, and independent screening facilities. Beginning in the fourth quarter of FY 2012 and throughout FY 2013 TSA conducted extensive outreach to encourage industry to use of TSA-developed training on facility security control, chain of custody procedures, identification of improvised explosive devices (IED), physical search procedures, security of unit load device (ULD) pallets/containers, security of cargo configured on skids, facility coordinator responsibilities, and CCSF employee qualifications.

Air Cargo Screening Technologies: \$11.4 million

The FY 2014 request supports the qualification and evaluation of existing and emerging air cargo screening technologies and procedures to determine suitability, effectiveness, and feasibility for use in air cargo and mail screening environments. Cargo and mail screening face unique challenges due to a wide variance in commodities, volume, throughput, and facility characteristics for each screening entity. No single technology is appropriate for every screening scenario. TSA has authorized a suite of technologies and associated screening protocols from which screening entities may choose on the basis of their unique requirements and commodities.

The below technologies are currently being used by industry and TSA to screen air cargo on passenger and all cargo aircrafts unless otherwise noted.¹

- Explosives Trace Detection (ETD) units
- Non Computer Tomography (CT) X-Ray (small, medium, and large aperture) systems
- Advanced Technology (AT) X-Ray (small, medium, and large aperture) systems
- Explosives Detection Systems (EDS)
- Electronic Metal Detection (EMD) units
- Carbon Dioxide (CO₂) monitors

¹ Certain screening equipment purchased by industry before February 2009, and not currently on the *TSA Air Cargo Screening Technology List*, has been approved by TSA on a case-by-case basis until designated expiration dates.

TSA publishes authorized screening equipment on the TSA Air Cargo Screening Technology List (ACSTL) on a secure website accessible by the regulated parties, which industry references when making their procurement decisions. TSA does not procure or deploy equipment for the air cargo industry. Instead, industry is required to purchase, use, and maintain systems authorized by TSA and listed on the ACSTL.

The current TSA ACSTL contains 112 pieces of cargo screening equipment. TSA has qualified 22 large aperture X-Ray technologies for screening skid-level configurations. The following chart depicts the equipment on the TSA Air Cargo Screening Technology List:

Technology Type	TSA Air Cargo Screening Technology List for Passenger and All Cargo Aircraft - Version 8.4 ^{1/}											
	Qualified ^{2/}			Approved ^{3/}			Grandfathered ^{4/}			In Lab Testing		
X-Ray	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>
		26	31	22	1	0	0	0	0	0	1	1
ETD	2			1			5			2		
EMD	0	0	0	3	2	1	1	0	0	1	1	0
EDS	0	15	0	0	0	0	0	0	0	0	0	0
CO ₂ Monitor		2										

^{1/}Technology list as of 01/31/13

^{2/}Qualified technology specifies equipment, by technology, which has undergone a formal TSA sponsored test process and is deemed qualified for screening operations. All parties should purchase equipment from the qualified section of the ACSTL.

^{3/}Approved technology specifies equipment, by technology, which has been conditionally approved for screening operations and is currently undergoing or scheduled for qualification test activities. This equipment has up to 36 months from the date when it was added to the approved technology section to successfully pass TSA's qualification test. If it is unable to pass qualification activities within the prescribed 36 months, it will be removed from the approved technology section at the prescribed expiration date. Due to this fact, regulated parties who procure equipment from the approved technology section do so at their own risk.

^{4/}Grandfathered technology specifies equipment, by technology, which has been granted an exception that aligns the technology with specific rules or parameters beyond those levied on approved or qualified technology. Regulated parties should not purchase devices from this section; rather, they should reference the qualified or approved sections for their procurement needs. Most devices have an expiration date, after which these devices can no longer be used.

TSA continues to evaluate the operational efficacy of these technologies to accommodate the cargo screening volumes currently required to support the 100-percent screening mandate. TSA is also evaluating other technologies for air cargo screening, including vapor detection systems, mass spectroscopy, and acoustic-based technologies. Outcomes of DHS and TSA field testing and evaluation and the IAC CCSP requirements may result in modifications or additions to this list. TSA has also issued screening protocols for use of these technologies. The protocols detail screening methodologies for each technology type and provide guidance on which technologies can be used for specific commodity classes.

In addition to the testing and evaluation of screening technologies, TSA also evaluates and develops standards and specifications for qualifying supply chain integrity technologies (SCIT). These technologies ensure security of screened cargo from point of shipping until loading aboard passenger aircraft. With air cargo screening and other security measures moving further back in the supply chain,

the SCIT program affords continued security and protection after the initial screening while ensuring the free flow of commerce as air cargo shipments transition through supply chain nodes.

Air Cargo Inspectors: \$66.5 million

Domestic Cargo Inspections

TSA Transportation Security Inspectors-Cargo (TSI-Cs) perform compliance inspections, including special emphasis inspections, focused inspections, air cargo surges (weeklong compliance enforcement surges focused on IACs, air carriers, and CCSFs within a single metropolitan area), investigations and tests of air carriers and IACs. TSA TSI-Cs also perform educational outreach to assist air carriers and IACs in complying with air cargo security mandates. TSI-Cs are located at 121 airports with high cargo volumes in the United States.

Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

Inspectors also provide TSA with the operational support for the ACAS Program, located at the National Targeting Center.

TSA provides compliance oversight of 225 domestic aircraft operators and foreign air carriers as well as 4,100 IACs. Each year, TSA inspectors carry out planned and random inspections targeting these foreign and domestic air carriers and IACs. In addition, inspectors conduct monthly cargo surges at airports and IAC facilities with a risk-based approach to scheduling that address specific identified vulnerabilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

The FY 2013 Compliance Work Plan (CWP) outlines goals for inspecting regulated entities based upon risk at the station level, in addition to the minimum entity inspection requirements. TSA calculates risk scores for airlines (which include both passenger and all-cargo), IACs, and CCSFs. Security Index scores will be utilized in FY 2013 to focus Inspector time during all field activities, including cargo surges, Special Emphasis Inspections (SEIs) and testing. At a high-level, TSI-Cs conduct inspections based on following risk schema:

- Previous inspection and test results;
- Previous investigation/non-compliance history;
- Operation volumes; and
- Intelligence and other special considerations.

International Cargo Inspections

In addition to domestic inspections, TSA has implemented a strategy for 100 percent screening for international inbound cargo. In compliance with the requirement to screen 100 percent of international bound cargo, TSA utilizes international inspectors to verify compliance with cargo screening procedures at foreign airports around the world during air carrier inspections. TSA developed a process for the National Cargo Security Program (NCSP) recognition and will assess and declare that other nation’s cargo security programs are security-comparable to ours. TSA piloted the NCSP process through re-assessment of four legacy recognized programs.

In FY 2013, TSA plans to annualize the 39 positions received in FY 2012 for Air Cargo Security Enhancements. In the fourth quarter of FY 2012, TSA also shifted twelve (12) Air Cargo positions to the International Cargo Inspections Division. With the increase in the international inspector workforce and more efficient reporting tools, TSA will conduct more cargo assessments and inspections, including all-cargo airport assessments and upstream cargo inspections. All TSS are cross-trained to perform cargo inspections and general inspections for time and expense efficiencies depending where they are located globally.

Canine Program (Air Cargo): \$29.8 million

Canines provide a valuable tool to assist in the screening of air cargo. In the air cargo environment, TSA currently employs two types of canine teams to screen cargo destined for transport on passenger aircraft: teams led by state/local law enforcement officers (LEOs) and proprietary (Federal) teams led by TSA cargo inspectors. TSA funds a total of 921 canine teams (491 local LEO-led canine teams at 79 airport locations and 120 authorized Federal-led canine teams, dedicated to the Cargo environment) that are allocated to 15 airports throughout the United States. The 491 local LEO-led canine teams spend approximately 25 percent of their time in the air cargo environment and associated facilities providing law enforcement presence and screening air cargo. The 120 TSA proprietary teams that are primarily dedicated to screening air cargo at high-volume air cargo facilities, enhance air cargo security and support the 100-percent screening congressional mandate. Although screening by aircraft operators and the CCSP were the primary means to achieve 100-percent air cargo screening, these teams are an important addition to the program.

Explosives Detection Canine Team Assignments

Type	Function	FY 2013		FY 2014	
		Teams	Locations	Teams	Locations

PROCUREMENT ACTIVITIES:

<p align="center">FY 2012 Activity Funding (\$thousands) \$22,323</p>	<p align="center">FY 2013 Activity Funding (\$thousands) \$21,369</p>	<p align="center">FY 2014 Activity Request (\$thousands) \$21,373</p>
<p>Air Cargo Security Portfolio</p>	<ul style="list-style-type: none"> • The Aviation and Transportation Security Act of 2001 charges TSA with the implementation of statutory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air. The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of approximately 450 domestic airports, approximately 200 air carriers, and approximately 4,100 indirect air carriers and shippers. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction. Air Cargo Security consists of three operational systems, Indirect Air Carrier Management System (IACMS), Known Shipper Management System (KSMS), and Freight Assessment System (FAS), and one planned system, Vulnerability Assessment System (VAS), all of which enable TSA to deliver its mission. The mission need for the Air Cargo Security Portfolio is to develop and manage the IT systems that are essential to preventing terrorists from using the air cargo supply chain to facilitate an attack. The goal of the Air Cargo Security Portfolio is to prevent terrorists from using the air cargo supply chain to facilitate an attack. This includes preventing an explosive device from being transported via air cargo and preventing a stow-away from using an aircraft as a weapon. Each IT system, KSMS, IACMS, Freight Assessment System/Cargo Reporting Tool (FAS/CRT), and the VAS, within the Air Cargo Security Portfolio plays an essential role in accomplishing this goal. • Performance Measures <ul style="list-style-type: none"> ○ Maintain operational availability percentage (excluding maintenance windows) of KSMS per KSMS Functional Requirements Document (FRD). ○ Maintain operational availability percentage (excluding 	

	<p>maintenance windows) of IACMS per IACMS FRD.</p> <ul style="list-style-type: none">○ Decrease the median time (in seconds) to adjudicate a shipper through Single Shipper in KSMS – from the time when a user submits a shipper record to the time when the system displays the shipper record status to the user.○ Maintain operational availability percentage (excluding maintenance windows) of FAS per FAS FRD.○ Maintain the percentage of IAC renewal applications that are processed in 30 calendar days or fewer - This is measured from the time when an applicant submits a request to renew their IAC certification to the time at which the certification is renewed. (excluding denied and abandoned renewals).○ Decrease the median time (in calendar days) to process a shipper appeal in KSMS – from the time when a user submits an appeal to the time when the appeal result is returned to the user.● The Air Cargo Security investment consists of three operational systems and one system in development. These systems enable TSA to regulate activities of Air Carriers and Indirect Air Carriers, regulate and approve companies to conduct screening operations, determine identity, validity and risk of companies shipping goods on passenger aircraft.

2014 Current Services	-	-	(1,703,560)
2014 Program Change	-	-	(122,337)
2014 Total Request	-	-	(1,825,897)
Total Change 2012 to 2014	-	-	(203,338)

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA proposes restructuring the September 11th Security Fee (Passenger Fee) in FY 2014 to achieve total collections of \$2.3 billion. Total collections include both the Aviation Security Capital Fund (ASCF) and the additional revenue generated by the fee restructuring. The additional revenue generated by the restructuring is estimated to be \$322.3 million and will both increase the offset to the discretionary costs of aviation security and provide mandatory savings to be deposited in the general fund for the purposes of debt reduction. The increase offset to the discretionary aviation security costs would be by \$122.3 million and the mandatory savings would be \$200 million. Revenue estimates, assume the restructured Passenger Fee would be implemented for the final three months of FY 2014.

The proposal would replace the current “per-enplanement” fee structure with a “per one-way trip” fee structure so that passengers pay the fee only once per one-way trip. The proposal also removes the current statutory fee limit and replaces it with a statutory fee minimum of \$5.00 per one-way trip in 2014 with annual incremental increases of 50 cents from 2015 to 2019 resulting in a fee of \$7.50 in 2019 and thereafter. The proposed fee would increase collections by an estimated \$25.9 billion over 10 years. Of this amount, \$7.9 billion would be applied to increase offsets to discretionary costs of aviation security and the remaining \$18 billion would be treated as mandatory savings and deposited in the general fund for debt reduction. In 2024 and beyond, all additional fee revenue from the restructuring would be applied as discretionary offsets. The restructuring would allow TSA the financial flexibility to meet its increasing aviation security costs and better aligns the costs of passenger security operations to the direct beneficiaries of this unique security service.

2014 Total Request	-	-	420,000
Total Change 2012 to 2014	-	-	34,769

CURRENT SERVICES PROGRAM DESCRIPTION:

Beginning in February 2002, the Aviation Security Infrastructure Fee (Air Carrier Fee) was imposed on the basis of an air carrier's calendar year 2000 passenger and property screening costs. In its 2005 report on the Air Carrier Fee, the Government Accountability Office (GAO) determined that the air industry as a whole should be paying annual fees of \$425 to \$471 million compared with the \$315 million they had been paying. TSA reviewed and validated the methodology utilized in the GAO report to determine industry-wide cost of passenger and property screening. Utilizing the mid-point of the cost range the annual industry-wide fee basis was determined to be \$448 million. In June 2010, the U.S. Court of Appeals required TSA to decrease the industry-wide limit of the fee to remove the cost of screening non-passengers from the basis. TSA determined that the revised industry-wide fee limit to be \$420 million.

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							56,093	51,450	3,952,796
Program Decrease							(2,125)	(1,487)	(88,100)
Total Request	56,006	49,573	3,831,668	56,006	50,266	3,869,330	53,968	49,963	3,864,696

Description of Item

The FY 2014 Request includes a reduction of \$88.1 million as a result of transitioning access control at exit lanes from TSA to the airport operator. Exit lanes are those locations where the public (generally passengers departing the airport) may exit the sterile area into the public area. The Aviation and Transportation Security Act does not assign responsibility for control of exit lanes to TSA, as this is not a screening function.

Justification

Controlling exit lanes is an access control measure designed to prevent unauthorized persons from entering the sterile area without submitting to screening. Since its inception, at some airports where exit lanes are co-located with the security checkpoint, TSA has provided Transportation Security Officers to monitor the exit lanes while the passenger screening checkpoint is in operation. However, staffing exit lanes is not a screening function, but rather falls under the purview of access control, which is the responsibility of the airport operator. Monitoring exit lanes is neither considered a screening function, nor a Federal responsibility.

TSA proposes transferring the responsibility for exit lane staffing to local airport authorities to allow TSA to focus its resources on screening functions and risk-based security measures.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA will work with airports over the next 9 months to address implementation of exit lane staffing and how it will meet its responsibility, under the airport's Airport Security Program. Exit lane security procedures, like perimeter security procedures, will then be inspected for compliance by TSA as part of its regulatory inspection program. By industry fulfilling their responsibility for access control, there would not be an adverse security impact. This aligns with TSA risk-based security initiatives by focusing resources on high-risk and unknown passengers, while expediting known or trusted travelers through risk-based, intelligence driven screening procedures.

(Dollars in Thousands)

Program Decrease 2: Reduce VIPR Teams
PPA: Aviation Regulation and Other Enforcement
Program Decrease: Positions (82), FTE (79), Dollars \$(11,278)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,728	1,657	365,928
Program Decrease							(82)	(79)	(11,278)
Total Request	1,726	1,273	357,109	1,726	1,482	372,248	1,646	1,578	354,650

Description of Item

TSA will maintain the current number of VIPR Teams, but requests a total decrease of 186 FTP/179 FTE and \$25 million as a reduction to the VIPR program. This request includes an \$11.3 million reduction (79 FTE) in the Aviation Regulation and Other Enforcement PPA and an associated \$13.7 million reduction (100 FTE) to the Surface Transportation Security Inspectors and Canines PPA within the Surface Transportation Security Appropriation. The FY 2014 funding levels support the core components of a VIPR team, but slightly reduce the number of Federal Air Marshals (FAMs), Behavior Detection Officers (BDOs), and Inspectors participating on the 37 dedicated teams.

Justification

TSA received funding for VIPR teams in FY 2008, FY 2010, and FY 2012 for a total of 37 VIPR teams. TSA's FY 2012 VIPR teams staffing allocation reduced the role of inspectors and emphasized the visible deterrence component of the mission. TSA has taken a broad look at the staffing and resource requirements for the VIPR program and can reduce the funding while still providing risk-based, periodic random deployments that are unpredictably executed in terms of timing, location, and types of activities. All VIPR teams will have the same staffing allocation as the teams provided in FY 2012. The total number of VIPR teams will not change.

The mission of the VIPR program is to deter and prevent terrorism. This is achieved by conducting VIPR operations that promote confidence in and protection of all modes of the Nation's transportation systems. TSA personnel participating in VIPR operations include FAMs, Transportation Security Officers, BDOs, Transportation Security Inspectors, Transportation Security Specialists – Explosives, and Explosive Detection Canine Teams. These TSA personnel coordinate with other Federal, State,

and local transportation security personnel and law enforcement officers to augment existing terrorism risk mitigation measures on a random and unpredictable basis.

VIPR teams can be deployed for normal transportation mode activities, during periods of heightened threat or at special events that require additional security. VIPR teams provide deterrent and detection capabilities while introducing an element of surprise to disrupt potential terrorist activities.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA will continue to maintain VIPR operations in the areas of highest risk. In FY 2013, TSA anticipates sustaining the current operational tempo while increasing the focus on higher-risk transportation locations. TSA anticipates the number of operations for the 37 teams will remain constant for FY 2014.

	Multi-Modal Teams	Surface Appropriation Teams	Aviation Operations	Surface Operations	Total Operations
FY 2012 Actual	22	15	3,977	8,868	12,845
FY 2013 Planned	22	15	3,800	8,800	12,600
FY 2014 Planned	22	15	3,800	8,800	12,600

Total Request	120	107	222,310	120	114	224,101	124	116	83,987

Description of Item

The FY 2014 Request includes a \$116.8 million reduction to the EDS Procurement and Installation PPA.

Justification

TSA plans to reduce \$116.8 million from the EDS Procurement and Installation PPA in FY 2014 in order to support DHS -wide high priority needs.

Impact on Performance (Relationship of Increase to Strategic Goals)

This reduction will not impact current levels of checked baggage screening or aviation security. TSA will have sufficient funds to maintain checked baggage screening as a result of the FY 2012 legislative change that allows the Aviation Security Capital Fund to be used for the procurement and installation of EDS equipment. Large prior year carryover balances in the ASCF will be used for recapitalization of equipment that has reached the end of its useful life and for design and construction of airport baggage screening projects.

Program Decrease							-	-	(27,600)
Total Request	-	-	320,365	-	-	322,326	-	-	298,509

Description of Item

The FY 2014 Request includes a \$27.6 million reduction to the Screening Technology Maintenance PPA.

Justification

TSA proposes to reduce \$27.6 million from the Screening Technology Maintenance PPA in FY 2014. With the extension of all new Transportation Security Equipment maintenance warranties from 12 to 24 months on new technology procurements, TSA is able to achieve savings in maintenance costs. The FY 2014 budget request provides sufficient maintenance support for technologies that will come out of warranty beginning in FY 2014.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2014 request level will adequately fund the maintenance of all deployed screening equipment. This proposed reduction will not impact the current levels of security and will allow TSA to more efficiently manage its screening technology maintenance.

Program Decrease							-	-	(43,921)
Total Request	54	51	204,768	54	52	206,021	60	57	103,377

Description of Item

The FY 2014 Request reflects a \$43.9 million reduction to the Checkpoint Support PPA.

Justification

TSA proposes to reduce \$43.9 million from the Checkpoint Support PPA in FY 2014. The FY 2014 current services level will adequately fund the purchase and installation of equipment needed for passenger screening and carry-on baggage screening equipment.

Impact on Performance (Relationship of Increase to Strategic Goals)

For FY 2014, TSA has analyzed and reprioritized technology purchases, as part of risk-based security, to enhance checkpoint passenger and baggage screening. At the requested level, TSA expects to be at or near Full Operational Capability for most of the checkpoint screening technology after FY 2012 and FY 2013 purchases. Funds included in this request are directed towards Portable Explosives Trace Detection technology and the development of next generation checkpoint screening solutions.

Total Request	3,081	2,796	569,473	3,081	2,974	573,716	3,127	3,009	597,042

Description of Item

The primary focus of the Federal Air Marshal Service (FAMS) is to detect, deter, and defeat terrorist or other criminal or hostile acts targeting U.S. air carriers, airports, passengers, and crew. The FY 2014 request proposes a total program decrease of \$56.8 million, of which \$2.1 million is in the Aviation Security appropriation, \$51.4 million is in the FAMS appropriation, and \$3.3 million is in the Transportation Security Support appropriation. The Aviation Security decrease of \$2.1 million represents program support costs associated with the proposal to consolidate FAMS back office functions.

Justification

TSA believes this reduction will not adversely impact aviation security as this proposal will allow TSA to direct limited appropriated funding to risk-based programs and focus resources on high-risk and unknown passengers. FAMS will continue coverage of high priority flights and utilize intelligence and Secure Flight data for mission scheduling. The reduction of \$2.1 million reflects ongoing efficiencies and program changes that leverage the Nation's other transportation security systems. The total requested funding level preserves the FAMS's capability to continue coverage of high priority flights.

Impact on Performance (Relationship of Increase to Strategic Goals)

The proposed reduction will not have an impact on the services provided by the program. The total requested funding level preserves the FAMS's capability to continue coverage of high priority flights.

Total Request	48	56	244,601	48	47	251,325	88	84	228,695

Description of Item

The FY 2014 Request reflects a \$6.0 million reduction to the Screener Training and Other PPA.

Justification

TSA proposes to reduce \$6.0 million from the Screener Training and Other PPA in FY 2014. The FY 2014 current services level will adequately fund screener training, consumables and uniforms, National Deployment Office, and future Environmental Program obligations. These savings can be achieved from the proposal to transition exit lane staffing airports and reducing contract costs for consumables.

Impact on Performance (Relationship of Increase to Strategic Goals)

For FY 2014, TSA will re-evaluate costs for providing training, purchasing consumables, and other expenses to meet the requested level. The proposed reduction will not have an impact on the services provided by the program.

Description of Item

The FY 2014 Request reflects a \$5.3 million reduction to the Airport Management PPA.

Justification

TSA proposes to reduce \$5.3 million from the Airport Management PPA in FY 2014. The FY 2014 current services level will adequately fund FSD and Staff, Transportation Security and Operations Center (TSOC), rent, and transit.

Impact on Performance (Relationship of Increase to Strategic Goals)

For FY 2014, TSA has re-evaluated costs for providing administrative support services, TSOC, rent, and transit to meet the requested level. The proposed reduction will not have an impact on the services provided by the program.

Program Decrease							(41)	(38)	(23,983)
Total Request	44	40	25,461	44	42	25,617	-	-	-

Description of Item

The FY 2014 request proposes that the Federal Flight Deck Officer and Crew Member Self Defense programs be funded by the airlines through reimbursable agreements with the Federal Law Enforcement Training Center (FLETC). Training will be provided at FLETC’s sites.

Justification

TSA believes that resource support for enabling the program is better provided by airlines desiring this capability on their flights, allowing TSA to direct limited appropriated funding to risk-based programs.

Within base resources, TSA will continue to provide program oversight through monitoring and tracking firearms and firearm requalifications, monitoring schedule changes of daily missions, and resolving incidents.

Impact on Performance (Relationship of Increase to Strategic Goals)

This proposed change in program administration will not impact the current levels of aviation security, as the training will continue to be available and TSA will continue to prioritize and implement risk-based layers of security.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$5,098,639,000]\$4,968,036,000¹, to remain available until September 30, [2014]2015², of which not to exceed \$8,500 shall be for official reception and representation expenses: Provided, That of the total amount made available under this heading, not to exceed [\$4,022,439,000]\$3,899,525,000³ shall be for screening operations, of which [\$426,349,000]\$382,496,000⁴ shall be available for explosives detection systems; [\$120,239,000]\$103,377,000⁵ shall be for checkpoint support; and not to exceed [\$1,076,200,000]\$1,068,511,000⁶ shall be for aviation security direction and enforcement: Provided further, That of the amount made available in the preceding proviso for explosives detection systems, [\$117,349,000]\$83,987,000⁷ shall be available for the purchase and installation of these systems: Provided further, That any award to deploy explosives detection systems shall be based on risk, the airport's current reliance on other screening solutions, lobby congestion resulting in increased security concerns, high injury rates, airport readiness, and increased cost effectiveness: Provided further, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: Provided further, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2013]2014⁸ so as to result in a final fiscal year appropriation from the general fund estimated at not more than [\$2,889,463,000]\$2,722,139,000⁹: Provided further, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year [2014]2015¹⁰: Provided further, That notwithstanding section 44923 of title 49, United States Code, for fiscal year [2013]2014¹¹, any funds in the Aviation Security Capital Fund established by section 44923(h) of title 49, United States Code, may be used for the procurement and installation of explosives detection systems or for the issuance of other transaction agreements for the purpose of funding projects described in section 44923(a): Provided further, That Members of the United States House of Representatives and United States Senate, including the leadership; the heads of Federal agencies and commissions, including the Secretary, Deputy Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General, Deputy Attorney General, Assistant Attorneys General, and the United States Attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget, shall not be exempt from Federal passenger and baggage screening.

INITIATIVE #1

TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)

1. Project Description, Justification and Scope

The Transportation Security Administration's (TSA) Electronic Baggage Screening Program (EBSP) provides the technology to enable prevention of catastrophic loss from terrorist or criminal activity through deterrence, detection, mitigation, and prevention of explosives or other prohibited and dangerous items in checked baggage on commercial aircraft. EBSP is responsible for full life cycle management of screening equipment utilized for screening checked baggage for concealed explosives. The primary detection technologies, or Transportation Security Equipment (TSE), used by EBSP are Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD). EBSP is part of the TSA vision of layered security.

EBSP was established to meet the congressional mandate for 100 percent screening of aviation-checked baggage in the National Airspace System for explosives by electronic or other approved means. This mandate was established in the 2001 Aviation and Transportation Security Act (P.L. 107-71). TSA's mission is to protect the Nation's transportation systems to ensure freedom of movement for people and commerce. The EBSP ensures that the TSA mission is achieved through a risk-based prioritized requirements methodology and through development, testing, procurement, deployment, and lifecycle management of checked baggage TSE screening technologies. By utilizing screening activities that minimize the risk of personal injury or death, or damage or loss of property due to acts of terrorism or criminal activity directed at aviation transportation, the program directly supports TSA's goals of protecting the transportation system from dangerous people and items that threaten its security, managing risks to critical transportation infrastructure, and strengthening the TSA's operations and management. Key objectives of the program include: increasing threat detection capability, improving checked baggage screening efficiency, replacing aging EDS and ETD units, and utilizing competitive procurement contracts for new and viable technologies. The primary beneficiaries of the EBSP are the traveling public; the TSA Office of Security Operations, whose staff manages the daily operations of deployed TSE; commercial airlines; and airport authorities. EBSP is currently dependent on the Department of Homeland Security Science and Technology Directorate's Transportation Security Laboratory for certification of the screening equipment and research and development of emerging screening technologies. The TSA Security Technology Integrated Program (STIP) is being executed to enable remote maintenance and monitoring of the deployed screening equipment, as well as enabling a dynamic risk-based security capability through remote upgrades and toggling of threat detection algorithms.

The EBSP also funds efforts studying the integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. EBSP conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA, and
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization.

2. Significant Changes

TSA's FY 2014 request is \$531.6 million for EBSP.

TSA's successful focus on meeting the 100 percent screening mandate led to an uneven age distribution in the current TSE fleet. The EBSP plans to replace EDS and ETD units based on prioritization criteria to efficiently maintain the 100 percent screening mandate while working toward achieving steady-state equipment replacement. It is also pursuing efficiencies aimed at maximizing equipment utilization and extending equipment life.

3. Project Schedule

Projects	Fiscal Quarter and Year		Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)

**5. Cost Estimate Detail and Changes
(Dollars in Thousands)**

Description of Milestone	Initial Total Cost (\$000)	Planned Total Cost (\$000)	Actual Total Cost (\$000)	Explanation of Difference Between Current and Previous Estimate
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt, system deployment, & O&M, per deployment plan. Maintained equipment	4,723,501	4,723,501	4,624,101	Airport scheduling delays slowed deployment of equipment.
(FY08) Perform program management, system deployment, O&M, tech management, and maintenance utilizing strategic plan	758,487	758,487	747,906	Airport scheduling delays slowed deployment of equipment.
(FY09) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,482,823	1,482,823	1,401,779	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.

(FY10) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,260,174	1,260,174	1,315,637	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY11) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan and for recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	742,770	742,770	525,688	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY12) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	699,903	699,903	336,209	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award
(FY13) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	685,957	685,957	10,551	
(FY14) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	531,588	531,588	0	

*FY02 – FY14 excludes STIP and ASP

*FY11 – FY14 excludes Surface and Cargo

*Maintenance amounts include costs for equipment disposal

6. Method of Performance

EBSP is currently in a mixed acquisition life cycle phase, focusing predominately on the produce/deploy/support phase of the acquisition process. The EBSP expenditure plan is submitted to Congress annually.

An Integrated Master Schedule (IMS) was recently developed and implemented for the EDS Competitive Procurement project. A comprehensive IMS that covers all projects within EBSP is under development and will be complete in Q4 FY 2013. Additionally, progress against major project milestones in the Acquisition Program Baseline is reported to DHS on a regular basis.

Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide
- Percent of checked baggage screened with EDS that maximize security, effectiveness, and efficiency
- Cost per bag screened
- Operational availability of baggage screening equipment
- Customer satisfaction

7. Related Annual Funding Requirements (Dollars in Thousands)

	FY 2014	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2013	FY 2014
EDS/ETD Purchase & Install	446,050	305,970
Screening Technology Maintenance	239,907	225,618
Total	685,957	531,588

*FY02 – FY14 excludes STIP and ASP

*FY11 – FY14 excludes Surface and Cargo

*Screening Technology Maintenance includes Disposal costs

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (P.L. 107-71) which requires 100% screening of checked baggage by EDS or an equivalent standard.

INITIATIVE #2

TSA – PASSENGER SCREENING PROGRAM (PSP)

1. Project Description, Justification and Scope

The Passenger Screening Program (PSP) serves as the TSA's Program Management Office responsible for aviation checkpoint security equipment for the Nation's airports. PSP's mission is to provide technologies that assist Transportation Security Officers in denying entry to potential threats directed against the air transportation network. PSP's mission aligns to TSA's mission of protecting the Nation's transportation systems to ensure the freedom of movement for people and commerce and the DHS mission of Preventing Terrorism and Enhancing Security, by embodying two associated goals into program operations: Preventing Terrorist Attacks and Managing Risks to Critical Infrastructure. PSP protects the travelling public and adapts to evolving security conditions by identifying and evaluating risks to passenger screening checkpoints and mitigating threats to infrastructure including terminals, aircraft, and checkpoints. PSP consists of three security technology portfolios: people screening technologies, carry-on screening technologies, and layered security technologies. Each portfolio consists of subordinate security technology projects that focus on specific threat mitigation systems. PSP-managed technologies screen over two million passengers and their carry-on items for weapons, explosives, and prohibited items at approximately 450 Federalized airports nationwide each day. Program objectives include increasing detection, limiting false alarms, enhancing efficiency, consolidating equipment footprint, and centralizing results monitoring to support checkpoint staffing reductions. To realize these goals, PSP is moving from independently-functioning technologies to optimized, integrated technologies that are easier to upgrade via software upgrades. The system-of-systems security architecture will enable TSA to address both known vulnerabilities and emerging threats in the most comprehensive manner possible. PSP balances its duties with considerations such as passenger privacy, dignity, safety, and health, while maintaining affordability, deployment, maintenance, and other life cycle issues. Accomplishments include the replacement of legacy systems with Advanced Imaging Technology (AIT) units and Advanced Technology (AT) X-ray systems, expanded use of Explosives Trace Detection (ETD) units, and the deployment of emerging technologies such as Advanced Technology-2 (AT-2) X-ray systems, Bottled Liquids Scanners (BLS), Chemical Analysis Devices (CAD), and AIT with Automated Target Recognition (ATR).

2. Significant Changes

TSA's FY 2014 request includes \$165.7 million for PSP. This request includes funding to purchase Portable Explosives Trace Detectors and to develop next generation checkpoint screening solutions.

3. Project Schedule

Projects	Fiscal Quarter and Year		Estimated Completion Cost (\$000)	Total Project Cost (\$000)

**5. Cost Estimate Detail and Changes
(Dollars in Thousands)**

Description of Milestone	Planned Total Cost	Actual Total Cost	Explanation of Difference
Procurement and Deployment (FY06)	94,148	82,732	Program received quantity discount and awards lower than estimate
Procurement and Deployment (FY11)	300,791	257,321	Funds were reallocated between programs and activities
Operations and Support (Maintenance) (FY11)	76,000	72,528	Less deployments; funds reallocated to other maintenance requirements
Procurement and Deployment (FY12)	166,971	10,249	Funds still planned for obligation

* Only significant differences are listed

**Excludes STIP and ASP

6. Method of Performance

Expenditures are approved based on an overall PSP expenditure plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- Percent of Airports with BLS Coverage
- Percent of Checkpoint Lanes with AT Coverage
- Operational Availability for Carry-on Baggage Screening Equipment
- Percent of Checkpoint Lanes with AIT Coverage

**7. Related Annual Funding Requirements
(Dollars in Thousands)**

	FY 2014	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2013	FY 2014
Checkpoint Support*	191,763	92,787
Screening Technology Maintenance**	82,419	72,891
Total	274,182	165,678

*Excludes STIP and ASP

**Screening Technology Maintenance includes equipment disposal costs

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation Transportation and Security Act of 2001 (P.L. 107-71), which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

Screener Partnership Program Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at a higher performance levels as federal TSOs.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$171,062	\$144,942	\$153,057	(\$18,005)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$95	\$96	\$96	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. FY 2014 increase represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$0	\$1	\$1	\$1

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

12.1 Benefits	1,258	1,293	2,210	952
Total, Salaries & Benefits	6,071	6,108	10,441	4,370

Salaries and Benefits include costs for 84 FTEs. The FY 2014 increase represents the transfer of FTE and funds from other PPAs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$39,044	\$40,245	\$35,531	(\$3,513)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$357	\$40	\$35	(\$322)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	0	\$327	\$289	\$289

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$127	\$131	\$116	(\$11)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$132	\$136	\$120	(\$12)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$245	\$252	\$222	(\$23)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$29,376	\$30,184	\$26,649	(\$2,727)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$88,128	\$90,551	\$79,945	(\$8,183)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$9,792	\$10,061	\$8,883	(\$909)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$9,792	\$10,061	\$8,883	(\$909)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$17	\$17	\$15	(\$2)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$39	\$40	\$35	(\$4)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$51,898	\$53,324	\$47,078	(\$4,820)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$8,813	\$9,055	\$7,994	(\$819)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land and Structures	\$0	\$3	\$3	\$3

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2014 request reflects the costs associated with program changes and correlating FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	\$770	\$790	\$697	(\$73)

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

Checkpoint Support Mission Statement

The Checkpoint Support PPA provides the resources required to deploy passenger screening, carry-on baggage screening and electronic surveillance equipment. This equipment is a vital component of TSA's efforts to secure our nation's air transportation.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	6,568	6,608	7,020	452
11.5 Other personnel compensation/Overtime (FEPA)	4	4	4	-
11.7 Military personnel/Awards	80	80	85	5
12.1 Benefits	1,748	1,759	1,867	119
Total, Salaries & Benefits	8,400	8,451	8,976	576

Salaries and Benefits include personnel and compensation costs for 57 FTEs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$700	\$700	\$635	(\$65)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a \$65,000 decrease for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$1,177	\$1,177	\$1,229	\$52

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2014 request reflects funding for warehouse rent.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$49,246	\$50,448	\$74,182	\$24,936

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request reflects a net increase in support services due to the development of next generation checkpoint technology solutions.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$4,000	\$4,000	\$3,750	(\$250)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects a decrease of \$250,000 and includes funds that will be used to fund Other Transaction Agreements (OTAs).

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$227	\$227	\$293	\$66

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$283	\$283	\$169	(\$114)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2014 request reflects a decrease of \$114,000 for warehouse operations and facilities for security equipment.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$752	\$752	0	(\$752)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. TSA does not request this funding in FY 2014.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$139,973	\$139,973	\$14,133	(\$125,840)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes a decrease of \$125,840,000 for Transportation Security Equipment.

EDS Procurement and Installation Mission Statement

EDS Procurement and Installation funds the purchase, deployment, and installation of electronic baggage screening equipment in the Nation's airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of the air transportation system.

Summary Justification and Explanation of Changes

Object Classes	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	12,025	12,098	12,223	198
11.7 Military personnel/Awards	925	931	941	16
12.1 Benefits	5,550	5,584	5,642	92
Total, Salaries & Benefits	18,500	18,613	18,806	306

Salaries and Benefits includes personnel and compensation costs for 116 FTEs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$600	\$600	\$531	(\$69)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a \$69,000 decrease for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$101,576	\$121,046	\$57,907	(\$43,669)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes a portion of installation efforts being funded from the Aviation Security Capital Fund (ASCF). The FY 2014 request reflects a decrease of \$43,669,000 related to efficiencies, as well as the program reduction.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$110	\$92	\$92	(\$18)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects a decrease of \$18,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$5,475	\$5,001	\$5,002	(\$473)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes a transfer of \$1,000 from DHS OCAO for WCF shuttle services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$94,400	\$77,100	0	(\$94,400)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request reflects a decrease in this activity as the Aviation Security Capital Fund will fund equipment purchases and installations in addition to facility modifications as stated in the FY 2012 enacted Appropriations Bill.

Screening Technology Maintenance Mission Statement

Screening Technology Maintenance funds the maintenance of passenger and baggage screening equipment in the Nation's airports. This funding is essential to ensure that all security screening equipment is operationally ready and supportable over its anticipated lifetime.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$70	\$70	\$64	(\$6)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a \$6,000 decrease for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$3,850	\$3,850	\$1,792	(\$2,058)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request reflects a \$2,058,000 decrease for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$10	\$10	\$3	(\$7)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects a \$7,000 decrease for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$316,434	\$318,395	\$296,649	(\$19,785)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request includes a decrease in maintenance contracts for checked baggage screening equipment and checkpoint screening equipment due to maintenance contract efficiencies.

Aviation Regulation and Other Enforcement Mission Statement

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	133,604	137,705	155,564	21,960
11.3 Other than full-time permanent	130	136	154	24

13.0 Unemployment Compensation	121	126	142	21
Total, Salaries & Benefits	195,217	196,412	221,885	26,668

Salaries and Benefits include costs for 1,578 FTEs. The FY 2014 request reflects increases from annualizations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$14,599	\$15,092	\$11,395	(\$3,204)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$203	\$211	\$159	(\$44)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$507	\$528	\$399	(\$108)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$169	\$176	\$133	(\$36)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$1,303	\$1,358	\$1,025	(\$278)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$58	\$60	\$45	(\$13)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$7,239	\$7,546	\$5,698	(\$1,541)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$17,183	\$20,122	\$15,193	(\$1,990)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$21,606	\$22,127	\$16,707	(\$4,899)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$5	\$5	\$4	(\$1)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$43	\$45	\$34	(\$9)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$290	\$302	\$228	(\$62)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$7,360	\$7,546	\$5,698	(\$1,662)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$9,652	\$10,061	\$7,596	(\$2,056)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. FY 2014 decrease represents realignment of funds and efficiencies realized.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
41.0 Grants/Subsidies/Contributions	\$81,575	\$90,551	\$68,371	(\$13,204)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporation, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2014 request is a decrease of \$13,204,000 associated with adjustments to the base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	\$100	\$106	\$80	(\$20)

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2014 request includes a \$20,000 management adjustment.

Airport Management and Support Mission Statement

Airport Management and Support provides funding for each Federal Security Director and staff at each hub airport along with the headquarters personnel who direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front-line operations of our TSOs.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request reflects the costs associated with program changes and correlating FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$15,635	\$10,061	\$10,574	(\$5,061)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2014 request reflects the costs associated with program changes and correlating FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$3,745	\$3,773	\$3,966	\$221

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request reflects the costs associated with program changes and correlating FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$150	\$151	\$159	\$9

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$10,062	\$8,552	\$8,988	(\$1,074)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes adjustments to base, transfers, realignments and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$15,230	\$33,194	\$34,888	\$19,658

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request includes adjustments to base, transfers, realignments and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$7,515	\$8,552	\$8,988	\$1,473

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$3,995	\$4,024	\$4,229	\$234

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$25	\$25	\$26	\$1

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$499	\$503	\$529	\$30

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$10,985	\$12,073	\$12,689	\$1,704

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes adjustments to base, transfers, realignments and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$13,083	\$13,180	\$13,853	\$770

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request reflects the costs associated with program changes and correlating FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	0	\$10,061	\$10,574	\$10,574

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2014 request reflects the costs associated with program changes and correlating FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	0	\$45	\$47	\$47

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

FFDO and Flight Crew Training Mission Statement

TSA has provided the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircrafts against acts of criminal violence or air piracy. The FY 2014 Budget contains no funding for the FFDO and Flight Crew Training programs.

Summary Justification and Explanation of Changes

Object Classes	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	3,835	3,858	-	(3,835)
11.3 Other than full-time permanent	12	12	-	(12)
11.5 Other personnel compensation	594	598	-	(594)
12.1 Benefits	1,618	1,628	-	(1,618)
Total, Salaries & Benefits	6,059	6,096	-	(6,059)

The FY 2014 Salaries and Benefits request includes a decrease of \$6,059,000 due to a program reduction.

Air Cargo Mission Statement

The Air Cargo program operates through compliance activities, regulatory efforts, outreach initiatives, and technology implementation. TSA uses a threat-based risk management approach based on two threats: 1) introduction of an explosive device on a passenger aircraft, and 2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Aviation Security Capital Funds Fees Mission Statement

The Aviation Security Capital Fund was extended by the 9/11 Bill and is authorized through 2028. The Aviation Security Capital Fund supports the installation of optimal screening systems at airports and, with the enactment of the FY 2012 Appropriations Bill, funds equipment purchases and installation.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$103,796	\$189,700	\$133,000	\$29,204

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. As provided in the FY 2012 Appropriations Bill, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funding in Advisory and Assistance Services is used to fund equipment installation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$146,204	\$60,300	\$117,000	(\$29,204)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. As provided in the FY 2012 Appropriations Bill, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funds are requested in FY 2014 for equipment purchase.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce - both contracted and Federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

TRANSPORTATION SECURITY ADMINISTRATION requests \$0 and 40 FTE for the FY 2014 DHS Balanced Workforce Strategy.

DHS Balanced Workforce Strategy Follow-On

- The FY 2014 DHS Balanced Workforce includes 41 FTP, 40 FTE and \$0 for various Aviation programs:
 - TSA does not have plans for the conversion of contracts in FY 2014.
 - TSA does not need funds for Annualization of FY 2013 DHS Balanced Workforce
 - TSA’s FY 2014 budget request reflects an additional 41 FTP/40 FTE that resulted from contract conversions completed in FY 2011 and FY 2012. These positions were annualized in FY 2012 and FY 2013 and full costs were included in the FY 2014 current services.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Surface Transportation Security

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

Mission Statement

The Transportation Security Administration (TSA) is mandated to protect the surface transportation system and to ensure the freedom of movement and the security of people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities coordinated by TSA to optimize resources in a risk-based approach to security. In addition to sector and modal planning and coordination, TSA provides operational deterrence support through surface security inspectors, canine teams, and Visible Intermodal Prevention and Response (VIPR) teams. TSA also provides other protective resources such as: training, personnel funding; screening and detection programs; voluntary guidelines and best practices; regulations; security and process standards; vulnerability and risk assessment teams; and subject matter expertise to the Federal Emergency Management Agency (FEMA) for surface transportation security grant programs. TSA's surface transportation responsibilities also include coordination of the government and industry activities to identify and address unacceptable risk associated with all hazards affecting the Postal and Shipping Sector.

Various statutes and executive directives require that transportation risk reduction activities be determined and implemented collaboratively in accordance with strategic plans developed with security partners. These combined efforts play an essential role in DHS's mission to prevent terrorist acts within the United States, to reduce vulnerability to terrorism, to minimize the damage from potential attacks and disasters, and to improve system resilience after an incident. The surface domain includes:

- 1) Approximately 751 million passengers traveling on commercial buses each year and over 9 billion passenger trips on publicly operated mass transit per year.
- 2) Over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of interstate highway and 114,700 miles of National Highway System roads); 582,000 highway bridges each over 20 feet of span; 366 highway tunnels each over 100 meters in length, and over 2.5 million miles of pipeline.
- 3) Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- 4) The Marine Transportation System consisting of waterways, ports, and their connections, as well as commercial and recreational vessels, vehicles, and system users, such as importers and exporters. This system is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals, and is the primary transportation mode providing connectivity between the United States and global economies; 99 percent of overseas trade by volume enters or leaves the United States by ship.

The threat to surface transportation security has been growing over the past decade. Surface transportation remains an attractive target both globally (witness the bombings in Madrid in 2004; London in 2005; Mumbai, India in 2006; and Moscow in both 2004 and 2010) and within the United States. For example: in 2007 four individuals planned to attack pipelines at the John F. Kennedy Airport; in 2008 there was a threat to New York City commuter rail; in 2009, a potential terrorist planned to bomb the New York City subway; in 2010, an individual left a car with gas, propane, fertilizer, and firecrackers at Times Square in New York City; and another potential terrorist was arrested in a sting operation in October 2010 for plotting against the Washington Metropolitan Area Transit Authority. To counter the dynamic, yet enduring nature of the threat to surface transportation, TSA, its government partners, and industry owners and operators have committed to improve the security and resilience of the transportation system.

TSA plays a pivotal role in strengthening Surface Transportation Security. The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) requires TSA to take specific measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training, and conducting exercise activities to reinforce those security plans. Additionally, the Administration's 2010 Surface Transportation Priority Security Assessment designates TSA as the lead agency for implementing 17 of the report's 20 recommendations, and requires TSA to support the lead agency for two additional recommendations. The Surface Transportation Security budget request for FY 2014 reflects TSA's continuing efforts to improve surface transportation security pursuant to these requirements.

B. Budget Activities:

This appropriation includes two major programs, Surface Transportation Security Staffing and Operations, and Surface Transportation Security Inspectors and Canines.

Surface Transportation Security Staffing and Operations - Provides funding for the coordination among all surface security stakeholders of processes and programs to: (1) identify and remediate unacceptable risks to critical infrastructure from all types of hazards; and (2) develop a regulatory framework and the administrative policy for national security strategies, plans, and programs that identify innovative solutions and best practices.

Surface Transportation Security Inspectors and Canines - Employs a cadre of inspectors and canine teams to assess compliance, national program delivery, and provide outreach on security assets in the surface transportation system. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security. These inspectors and canine teams are an integral part of TSA's VIPR program.

C. Budget Request Summary:

The Transportation Security Administration requests 701 positions, 668 FTE, and \$109,331,000 for FY 2014. The total adjustment-to-base includes a decrease of 2 positions, increase of 78 FTE to adjust for actual personnel on board, and a decrease of \$11,695,000. The request also includes a program

decrease of 104 positions, 100 FTE and \$13,722,000 for a reduction to VIPR team staffing from FY 2014 current services.

D: Efficiencies

TSA's budget includes projected efficiencies totaling \$12.033 million expected in specific object classes from FY 2010 through FY 2014 as described below.

Mission Support Personnel Reduction Efficiencies **\$1.072 million**

TSA expects to achieve savings in personnel from centralization of like functions (i.e., IT, acquisition, real estate, etc.) following the realignment of staff in FY 2012 to more efficiently perform these functions. TSA also expects to achieve efficiencies from reducing overtime costs.

Printing & Reproduction Efficiencies **\$0.005 million**

TSA anticipates savings from utilizing electronic media and placing more documents on the Internet/Intranet to save printing and reproduction costs. Staff will also utilize electronic media to conduct briefings which will reduce printing costs.

Supplies & Materials Efficiencies **\$0.227 million**

TSA anticipates savings associated with use of electronic media, which will significantly reduce the need for paper, toner, binders, folders, etc. to print materials for briefings. Additionally, TSA will limit the publication and printing of hard copy documents and prescribe that information should be provided in an electronic form, whenever applicable.

Travel Efficiencies **\$0.019 million**

TSA will reduce all non-essential travel by 50 percent across all programs as applicable. To ensure efficient travel spending, TSA will employ strategic alternatives to Government travel, including local or technological alternatives, such as teleconferencing and video conferencing. Additionally, TSA will make all appropriate efforts to conduct business and host or sponsor conferences in space controlled by the Federal Government, wherever practicable and cost effective.

Transportation of Things Efficiencies **\$0.004 million**

TSA plans to seek ways to reduce postal and freight charges by pursuing more cost efficient transport of equipment.

Advisory & Assistance Contracts Efficiencies **\$2.025 million**

As part of a DHS-wide effort, TSA will reduce the number of advisory and assistance contracts.

Other Services Efficiencies

\$8.681 million

In addition to the above efficiencies, TSA will also implement other enterprise-wide efficiencies and management adjustments to achieve savings from reductions in non-advisory contractual services.

¹The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L. 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and the FY 2014 Request.

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security:
Staffing and operations
Program Performance Justification
(Dollars in Thousands)**

PPA: Staffing and operations

	Perm. Pos	FTE	Amount
2012 Revised Enacted	158	135	38,514
2014 Adjustments-to-Base	(1)	12	(3,081)
2014 Current Services	157	147	35,433
2014 Total Request	157	147	35,433
Total Change 2012 to 2014	(1)	12	(3,081)

TSA requests \$35.4 million for Staffing and Operations. The adjustments-to-base (ATBs) include: a decrease of 1 FTP/1 FTE and \$0.170 million for transfers between the Surface Transportation Security appropriation and the Transportation Security Support appropriation. The ATBs also include: an increase of \$0.171 million for pay COLA, an increase of 18 FTE to adjust for Actual FTE and a decrease of 5 FTE and \$3.1 million for efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA, in accordance with the Aviation and Transportation Security Act (ATSA), is responsible for assessing security threats, vulnerabilities, and consequences in all surface transportation modes. Further, TSA is charged with identifying needed security enhancements for surface transportation and related infrastructure, as well as developing security plans, and issuing and enforcing regulations to improve modal security. Homeland Security Presidential Directive (HSPD) 7 and Presidential Policy Directive (PPD) 8 expand TSA’s security responsibilities to include coordination of preparedness, response, and recovery activities for all hazards threatening the critical infrastructure and systems that comprise the Transportation Systems Sector.

The key strategic plans and requirements documents driving TSA’s security efforts are the Executive Order to Strengthen Surface Transportation, the Intelligence Reform and Terrorism Prevention Act (IRTPA) of 2004, the National Infrastructure Protection Plan, the 9/11 Commission Act of 2007, and the DHS Strategic Plan. The following activities are supported by Staffing and Operations:

Staffing and Operations FY 2014 Request

(dollars in thousands)

	FY 2012 Revised Enacted	FY 2014 Request
Multi-modal Activities (including Maritime, Postal & Shipping)	\$12.0	\$11.5
Mass Transit Activities (Including Passenger, Rail & Bus)	\$6.9	\$5.7
Freight Rail Activities	\$5.7	\$4.8
Pipeline Activities	\$4.8	\$4.4
Highway and Motor Carrier Activities	\$9.1	\$9.0
Total	\$38.5	\$35.4

Multi-modal Activities (including Maritime, Postal & Shipping) \$11.5 million

National Transportation Strategies, Plans and Reports: TSA develops multiple strategies and plans for the protection of transportation assets, such as the Transportation Systems Sector-Specific Plan, strategic modal security plans as required by the IRTPA of 2004, and national strategies for public transportation, railroads, and a pipeline system recovery plan as required by the 9/11 Act. The legislation requires that strategies, plans and associated reports are developed in collaboration with Federal, State, local, tribal, and territorial governments, owners and operators of transportation infrastructure, private sector stakeholders, and non-profit employee representative organizations. TSA strives to minimize the overlap in planning requirements and to provide a unified process for its stakeholders.

9/11 Regulations: In response to the 9/11 Act, TSA is issuing a regulation mandating that freight rail employers and passenger rail carriers, and over-the-road-bus (OTRB) operators develop comprehensive security plans and conduct vulnerability assessments. TSA is preparing multiple rulemakings to cover each of these modes of surface transportation. The regulation identifier numbers are 1652-AA56 and 1652-AA60 respectively. Following a risk-based approach, these rules will cover the same population of entities covered by the Security Training Programs for Surface Mode Employees Notice of Proposed Rulemaking (NPRM).

The 9/11 Act also requires employees across the surface transportation and aviation modes to complete Security Threat Assessments (STAs). The Office of Security Policy and Industry Engagement is preparing a rulemaking to consolidate, coordinate, and harmonize background checks for employees across these different modes of transportation. TSA will work with other agencies that conduct background checks to avoid redundancies.

Surface Transportation Security Priority Assessment: TSA is responsible for implementing and managing 17 of the Surface Transportation Security Priority Assessment Report's 20 recommendations, and also supports the lead agency for an additional two recommendations. The implementation costs for many of these recommendations are reflected in other TSA program budget justifications (i.e., credentialing and security threat assessment,). However, TSA is required to

establish a single data repository for all Federally-obtained security risk-related information on transportation systems and assets. This will require TSA to inventory, store, maintain, and make available surface transportation risk assessment information to transportation security industry partners. TSA developed a database taxonomy that supports the storage and maintenance of all Federally-obtained transportation security risk-related information. In FY 2011 and 2012, TSA developed the Objectively Measured Risk Reduction (OMRR) dashboard tool and incorporated it into the Mission Risk Knowledge Center (MRK-Center). The tool contains performance metrics of risk mitigation activities across all modes of transportation except maritime. In FY 2012, TSA expanded the user interface, the volume of information, and the search capacity of data within the MRK-Center.

Intermodal Security Training Exercise Program (I-STEP): TSA's I-STEP supports DHS FY 2014 – 2018 Integrated Planning Guidance and TSA Strategies and Goals to enhance the protection of all modes of transportation through objectively measured risk reduction. I-STEP exercises and training are an important part of the building and sustaining security preparedness cycle to protect American people, enhance national resilience, and identify capability gaps and needed resources. Further, TSA's I-STEP meets the requirements of the 9/11 Act by creating a security training and exercise program in the mass transit, freight rail, and OTRB sectors. I-STEP additionally supports all modes of transportation with clear and consistent performance measures to conduct security exercises. I-STEP provides programmatic support to the Surface Division's modal managers that includes the development of training and security awareness material, strategic planning, transportation risk management analysis, stakeholder outreach and modal/multi-modal security program planning.

Transportation security exercises provide opportunities to demonstrate, evaluate, and improve the combined capability and interoperability of surface transportation system partners to perform missions and tasks to achieve successful outcomes and identify security best practices and lessons-learned. To enable stakeholders, I-STEP has also developed a comprehensive training matrix to serve as a resource for TSA security partners in government and industry. Additionally, TSA and the U.S. Coast Guard collaborated on multi-port, intermodal exercises on a regional level in the maritime sector. TSA has expanded the exercise planning capacity by introducing an on-line exercise planning and information management system (*EXIS*) capable of supporting all modes in the transportation system. This system specifically assists stakeholders in planning and conducting their own exercises and increasing preparedness in addition to those exercises conducted through I-STEP.

In FY 2014, the I-STEP program will focus on assisting partners to develop risk-reducing security policies, plans, and programs to enable the transportation system sector to achieve its mission to continuously improve the risk posture of transportation systems serving the Nation. I-STEP will assist TSA in achieving its goal to become a high-performing counterterrorism organization providing the most effective security in the most efficient way by working in partnership with transportation modal managers and private sector security partners in providing a variety of products and services to enhance security capabilities, build partnerships, and gain insights in transportation security.

Intermodal Visual Enhancement Workshop (I-VIEW): TSA will employ photographic and video images to record high-risk transportation infrastructure and systems. I-VIEW provides very detailed domain awareness of a facility or asset by creating a virtual reality of the transportation system by giving the user detailed views, information, and associated documents. I-VIEW will aid agencies with a prevention, response, investigatory capability or responsibility. I-VIEW will assist public and private

transportation agencies in preventing, mitigating, responding to, and recovering from terrorist incidents. In FY 2012, TSA met its goal of completing I-VIEWS in over 30 transportation facilities, including work in Indianapolis (supporting the 2012 Super Bowl) and Chicago (supporting the 2012 NATO Summit). FY 2013 includes enhanced activities within the I-VIEW program to include the start of integrating the project within the MRK-Center.

Mission Risk Knowledge Center (MRK-Center): MRK-Center is a tool which enables senior field and headquarters leaders to select countermeasures to prevent, deter, and respond to a security incident. It enables Office of Security Operations (OSO), Office of Intelligence and Analysis (OIA), Office of Law Enforcement/Federal Air Marshal Service (OLE/FAMS), and the Office of Security Policy and Industry Engagement (OSPIE) to share risk-related information across the agency, ensuring that all Offices make decisions based on consistent data. This portal serves as an integrated repository for this risk-related information, and includes a risk analysis database that will allow for the manipulation and analysis of the critical information. In FY 2013, TSA will commence a national roll-out of the MRK-Center so that TSA field and headquarters leadership will be able to enhance their usage of this information.

Stakeholder Collaboration: TSA interfaces with government and private sector stakeholders in multiple modes concerning strategies, plans, reports, best practices, standards, regulations, protection programming and performance measurement. Collaboration activities also include formal information and intelligence sharing processes; training, exercise, and outreach initiatives; and other outreach efforts on matters impacting the Transportation System Sector. For example, TSA provides security awareness information to operators as part of the HAZMAT Motor Carrier Security Action Item Training Program, to the school transportation industry as part of the School Transportation Security Awareness Program, and to the motor coach industry through Operation Security Transport. In addition, TSA holds an annual cyber security summit addressing cyber security in the transportation modes. Campaigns being conducted with mass transit and passenger rail include Transit Watch, First Observer, and “If You See Something, Say Something,” a campaign being conducted cooperatively with DHS and Amtrak, which emphasizes the importance of vigilance, timely reporting of security concerns, and fostering public awareness and education.

Mass Transit Activities (Including, Passenger Rail, and Bus): \$5.7 million

Stakeholder Collaboration: The vast majority of mass transit and passenger rail systems in the United States are owned and operated by units or agencies of local government. This fact distinguishes mass transit and passenger rail from other modes of transportation and sets special conditions on the Federal Government’s interactions with mass transit and passenger rail operators. TSA’s work to enhance and sustain the security of the rail mode focuses on creating lines of communication among transit agencies, collecting and disseminating best practices and threat information, identifying common vulnerabilities, and sharing proven and emerging countermeasures to mitigate those vulnerabilities. TSA works closely with the transit and passenger rail operators to engage in practical and coordinated planning to meet security contingencies, to set grant funding priorities, and to assist agencies in implementing plans and documenting their strengths, and identify and address opportunities for security enhancements.

CyberSecurity: Securing the transportation cyber environment requires effective collaboration among various security stakeholders and partners. While cybersecurity risks cannot be completely eliminated, government and private sector organizations can work together to mitigate cyber security risk through maintaining and enhancing continuous awareness, and promoting voluntary, collaborative, and sustainable community action. Critical cyber systems in the mode have been identified, and government partners and industry stakeholders continue to collaborate to identify vulnerabilities and develop tools to improve the mode's preparedness posture.

Standards Development: TSA has continued engagement with the American Public Transportation Association (APTA), to develop a set of recommended public transportation security standards. This effort, led by APTA's Security Standards Policy and Planning Committee, has also included security professionals from the industry, business partner representatives, and the Federal Government. The goal of these consensus-based standards is to enhance security in transit systems.

Infrastructure Protection: TSA, in coordination with the National Protection and Program Directorate and industry, has identified the Nation's most critical mass transit and passenger rail infrastructure, and is focused on identifying vulnerabilities and facilitating the mitigation of these vulnerabilities. Mass Transit and Passenger Rail critical infrastructure consists of transit and rail underwater tunnels, high volume, multi-modal transit and rail stations, bridges, and other identified structures. TSA is working closely with these stakeholders to guide them in developing remediation plans to harden this infrastructure.

Assessments: TSA's Base Assessment Security Enhancements (BASE) program is a thorough security and risk assessment of mass transit and passenger rail systems nationally, performed by Surface Transportation Security Inspectors (STSIIs). The assessments are conducted on a voluntary basis and with emphasis on the 100 largest systems based on passenger volume, which collectively accounts for over 80 percent of all users of public transportation.

The process is built around 17 Security and Emergency Management Action Items developed in a joint effort between TSA, the Federal Transit Administration (FTA) and transit officials through the Mass Transit and Passenger Rail Security Coordinating Council (SCC). Assessment results enable TSA to establish a security profile and baseline posture for transit or passenger rail security programs, track improvements or diminutions from the baseline, and determine future program decisions and needs. They inform risk mitigation priority development and determine allocations of financial resource allocations, particularly the transit security grants. Since the program inception, over 120 mass transit and passenger rail agencies have undertaken the BASE assessment, which is conducted on a periodically recurring basis. If reassessments are included, the total number increases to 230 BASE assessments. Of these assessments, 126 have been completed on the largest 55 systems while 104 have been completed on smaller agencies. The national average overall score improvement for those high-risk transit systems that received more than one BASE is 19 percent.

TSA created a BASE advisory panel comprised of mass transit SMEs, APTA, FTA and transit agencies to adjust the BASE tool by adding and/or modifying topics, and removing redundant or outdated questions. TSA requested the SCC to conduct outreach to transit systems for feedback on the BASE program, specifically as it relates to the 17 Security Action Items currently used as the foundation for the assessments. The panel used the feedback to help determine the modifications and

adjustments that need to be made to the BASE. A smaller working group was developed to execute the advisory panel recommendations.

Freight Rail Activities: \$4.8 million

Infrastructure Criticality Tool: TSA has refined and enhanced the critical infrastructure risk assessment tool. This tool is designed to measure the criticality and vulnerability of freight rail bridges and tunnels in the United States and serves as the factual and analytical baseline from which to develop and propose security enhancements and mitigation strategies for critical railroad infrastructure.

Critical Infrastructure Assessments: Utilizing a standard methodology and in collaboration with the infrastructure owners, TSA conducts assessments of potentially critical bridges and tunnels. These assessments inform the owners of identified vulnerabilities and recommendations for vulnerability mitigation. The assessments also provide a means to rank these bridges and tunnels in terms of overall relative risk. As of December 2012, 10 railroad infrastructures have been assessed. Since the initiation of this program in 2009, a total of 268 critical railroad infrastructures have been assessed. In FY 2014, TSA will reassess railroad bridges and tunnels to determine the risk reduction attained after vulnerability mitigation measures were employed.

Toxic Inhalation Hazard (TIH) Transportation Risk Reduction: TSA, in cooperation with industry stakeholders, established the TIH risk reduction program to objectively measure the security risk associated with the rail transportation of TIH materials through High Threat Urban Areas (HTUA). The program's objective is to reduce the dwell time of rail cars carrying TIH materials, and implement positive security measures by rail carriers. An estimated risk reduction of 98 percent was achieved in FY 2012 when compared against the original baseline. TSA is working with rail carrier through various avenues to install electronic tracking devices on rail cars transporting rail security-sensitive materials (RSSM). This technology provides TSA with domain awareness of RSSM shipments and optimizes the time spent on TIH risk surveys, as the data acquired from the tracking devices provides more detailed information on the location and movement of RSSM rail cars than was previously available.

Rail Transportation Security Compliance: On November 26, 2008, TSA issued a final rule on rail transportation security covering freight railroad carriers, shippers of RSSM, and receivers of RSSM located within an HTUA. The Rail Transportation Security Rule establishes procedures for the secure transfer of custody between railroads and at points of origin and delivery in HTUAs. The rule also requires the appointment of Rail Security Coordinators, the reporting of location and shipping information of RSSM rail cars, and the reporting of significant security concerns to TSA. TSA's surface inspector workforce monitors compliance with the provisions of the regulation. The Freight Rail program office supports the inspection force with training and enforcement guidance.

Railroad Self Assessment of Vulnerability (RSAV) tool: In accordance with Section 1512 of the "9/11 Act," TSA developed the RSAV as a mechanism that railroads can use to evaluate the criticality and vulnerability of an identified set of railroad assets. The RSAV will be made available to railroads as a means to comply with a proposed regulation requiring certain railroads to conduct vulnerability assessments and develop security plans.

Tank Car Vulnerability: To better understand and quantify the vulnerability of rail tank cars carrying TIH materials, TSA, DHS S&T Transportation Security Lab (TSL) and the Federal Bureau of Investigation (FBI) funded supplemental testing of the potential impact of a .50-caliber armor piercing bullet; an explosively formed projectile; an improvised explosive device (IED); a vehicle borne improvised explosive device; and a pipe bomb on the TIH material rail tank car. The testing, focused on the tank jacket and tank shell, and was conducted by the Naval Surface Warfare Center Carderock Division at the U.S. Army Aberdeen Proving Ground. A private sector company donated two TIH rail tank cars for use in this testing. TSA is currently building upon the lessons learned from the first tests through an Interagency Agreement with the U.S. Army Aberdeen Test Center to test and evaluate the effects of ballistic and IED threats to the tank car head shields. In 2014, TSA will address a remaining gap by studying the vulnerability of the protective housing and the product valves inside the housing at the top of railcar.

Ammonium Nitrate Testing: In 2010-2011, TSA funded through the Technical Support Working Group (TSWG) a detailed review and evaluation of the state of scientific knowledge surrounding the detonability of pure ammonium nitrate (AN), both fertilizer and technical grade. This study also focused on assessing the security vulnerabilities and potential threat of AN being shipped in railcars based on data validated by a panel of technical experts including, FBI, Bureau of Alcohol, Tobacco, Firearms and Explosives, DHS S&T, U.S. Coast Guard, The Fertilizer Institute, and Institute of Makers of Explosives. This study was followed by a TSWG funded AN detonability test in the fall of 2011 in New Mexico which showed that AN (with no fuel added) could sustain a detonation (i.e., act like a high explosive) under certain circumstances. As additional testing is needed to provide a more detailed understanding as to the conditions and type of explosives need to detonate an AN hopper rail car, TSA will continue to work with Federal partners and industry stakeholders to evaluate the risk associated with the bulk transportation of AN to determine appropriate security and operational standards.

TIH car location and predictive tool: The Secure TIH Automated Response System (STARS) was developed to provide timely updates on all RSSM shipments, including TIH. The RSSM railcars are depicted at their most recent reported location in order to assist inspection and survey scheduling. STARS operates 24/7 365 days a year ingesting geo location updates which are transmitted by GPS enabled TIH railcars with a one to six hour frequency. The GPS messages are assimilated with Car Location Messages and mapped to enable a visual depiction of railcar locations. STARS data layers enable facility location identification and calculates a Population Proximity Factor value based on population within a one mile radius of each TIH railcar. STARS enables inspectors to accurately predict the optimum time and day to schedule survey and inspections by including a time based 30 day rolling facility matrix that documents by day and by hour the number of TIH railcars at over 250 railroad locations within HTUAs and is capable of being expanded to include additional locations. A pilot program is currently underway and 75 TSA employees are authorized for access. The process is currently being expanded to enable access by 322 TSA employees, primarily in the Office of Security Operations organization. TSA will continue to operationalize this concept in order to improve the efficiency of TSA's inspection force and enhance its ability to assess risk in the rail transportation of security-sensitive materials.

Pipeline Activities: \$4.4 million

Critical Facility Security Review (CFSR): TSA intends to continue its assessment program for critical pipeline facilities. Utilizing the criteria contained in the TSA Pipeline Security Guidelines, pipeline operators have updated their listings of facilities essential to system operations. Under the CFSR Program, TSA will evaluate the physical security of 90 – 100 of these pipeline facilities annually.

Corporate Security Review (CSR): On an annual basis, TSA conducts 12 – 15 CSRs of the top 100 natural gas and hazardous liquid transmission pipelines and natural gas distribution systems within the United States. This allows the program to revisit a company within the top 100 systems approximately every four years to assess the current status of the company's security efforts and gauge progress from previous reviews.

Stakeholder Collaboration: The Pipeline Security Branch has established a highly effective working relationship with its industry and government partners through the Pipeline Sector and Government Coordinating Councils. TSA is also an active participant in the Energy Sector Oil and Natural Gas Coordinating Council. To provide pipeline industry personnel with additional insight into TSA's current activities and policies, the Pipeline Branch conducts monthly stakeholder conference calls. The Pipeline Security Branch has developed three security related CD/DVD training programs for use by pipeline operators: Pipeline Security Awareness, Pipelines: Countering IEDs, and Protecting Pipeline Infrastructure: The Law Enforcement Role. Also, to enhance the preparedness of pipeline companies, TSA has conducted at least two Intermodal Security Training and Exercise Programs with operator security personnel annually.

Highway and Motor Carrier Activities: \$9.0 million

Highway Infrastructure Assessments: TSA developed a comprehensive significant infrastructure (bridges and tunnels) vulnerability assessment program to identify and rank critical assets, identify vulnerabilities, and quantify costs for hardening structures and replacing each structure. In FY 2014, TSA plans to complete aggregate reports on both bridge and tunnel assessments that will include best practices and risk mitigating action items. In addition to the bridge assessment methodology developed in cooperation with the U.S. Department of Transportation and U.S. Army Corps of Engineers, a detailed structural tunnel methodology and assessment tool was developed and will be finalized in FY 2014 with additional structure assessments. Six to ten additional structural assessments will be completed in FY 2014 to determine outcome metrics on current security efforts, and update systems data for use in the infrastructure tool methodologies and aggregate reports.

Highway Baseline Assessment for Security Enhancements (BASE) Assessment Program: Highway BASE is a comprehensive assessment of highway and motor carrier assets. The BASE assessment is comprised of security and response assessment areas based on Corporate Security Reviews protocol items and the security action items that were developed by TSA and issued to the highway HAZMAT transportation industry in 2008. The program is targeting assets compiled by risk-based data from private and public sources. The results of the assessment program will drive annual updates to modally focused, risk-based, security action item lists; for use in resource allocation in the Highway and Motor Carrier mode; for continued risk focused deployment of TSA's Visible Intermodal

Prevention and Response (VIPR) programs in the highway mode; and for maintaining updated tools for use by industry in the modal tool boxes.

Stakeholder Collaboration: TSA coordinates closely with industry stakeholders through the Critical Infrastructure Partnership Advisory Council meetings that are held quarterly as well as with teleconferences held with each of the four highway modal industry groups of trucking, motor coach, school bus, and infrastructure. Additional areas of stakeholder collaboration include the modal training program development, the planning and execution of modally-focused security exercise programs through TSA's I-STEP office, and in TSA's VIPR team operations deployment.

Technology Pilots: TSA will expand the current proposed vehicle rental vetting proof-of-concept to pilot phase with establishment of systems requirements and operational and security analysis of operator rental transaction records. Additionally, TSA will continue to work with surface transportation industry and vendors to provide innovative technologies and security solutions to the surface transport venues.

Grant Oversight and Management Activities:

The National Preparedness Grant Program (NPGP) is designed to develop, sustain, and leverage core capabilities across the country in support of national preparedness. NPGP will prioritize the development and sustainment of core capabilities as outlined in the National Preparedness Goal (NPG). Particular emphasis will be placed on building and sustaining capabilities that address high consequence events that pose the greatest risk to the security and resilience of the United States and can be utilized to address multiple threats and hazards. TSA will provide subject matter expertise for passenger rail and mass transit security programs in support of NPGP. TSA activities in support of NPGP include: determining grant funding priorities and allocation methodologies; issuing guidance; and evaluating and recommending individual projects within NPGP in the areas of intercity bus, freight rail, mass transit, ferry, and passenger rail systems. Grantees will map their proposed NPGP investments to one or more specific core capabilities to create a clear linkage between the proposed investment and how it will build and sustain core capabilities necessary to strengthen the Nation's preparedness. NPGP-funded projects must be based on the capability gaps identified in the state Threat and Hazard Identification and Risk Assessment (THIRA) and the jurisdiction's strategic planning process.

SURFACE TRANSPORTATION INITIATIVE MATRIX

	TVC	Baseline Standards	Assessments	Close Gaps
Freight Rail	<p>For the freight rail mode, the overarching strategic security goal is to reduce the risk associated with the transportation of potentially dangerous cargoes by rail, and to increase the resiliency of the railroad network. The primary strategic objectives to achieve this goal are: (1) reduce the vulnerability of cargo, (2) reduce the vulnerability of the network, and (3) reduce the consequences of attack.</p> <p>TSA will through onsite, fact based, analytical assessments, identify those assets that are critical to the resiliency of the national freight rail network and then collaboratively develop with the industry a strategy to measurably increase the resiliency of the network.</p>	<p>TSA is on target to achieve its annual goal of reducing the remaining risk associated with Toxic Inhalation Hazard dwell time in High Threat Urban Areas (HTUA) an additional 10% by the end of FY 2012 when compared to the original baseline year. Compared to the base year, a total reduction of 98% has been realized YTD.</p>	<p>Assessed 118 potentially critical railroad assets. Since the initiation of this program, a total of 268 railroad bridges and tunnels have been assessed. An additional 138 railroad locations are projected to be assessed in FY 2013.</p>	<p>In FY 2014, The Freight Rail Branch will reassess railroad bridges and tunnels to determine the reduction in risk attained after vulnerability mitigation measures were employed.</p>
Mass Transit	<p>The Mass Transit & Passenger Rail Branch strategy consists of the following three objectives: 1) Increase visible deterrence through the deployment of canine teams, passenger screening teams and anti-terrorism teams. 2) Increase infrastructure resiliency by protecting the most critical tunnels, stations and bridges. 3) Fully engage the public and transit operators in the counterterrorism mission.</p> <p>These objectives are achieved through the Baseline Assessment for Security Enhancement Program (BASE), identification of our critical assets; and development of communication architecture to allow for efficient and effective communication to our security partners.</p>	<p>Our BASE program is a thorough security assessment of mass transit and passenger rail systems nationally. The assessments are conducted on a voluntary basis and with emphasis on the 100 largest systems based on passenger volume. The 17 Security and Emergency Management Action Items were developed by TSA, FTA and transit officials engaged through the Mass Transit SCC. Assessment results help establish a baseline which identifies security priorities for transit and passenger rail security programs.</p> <p>Cyber security is incorporated into the existing BASE program as an action item for the FY13.</p>	<p>48 security assessments were completed in FY12. 82 security assessments are projected to be completed in FY13 and 42 security assessments are projected to be completed in FY14.</p> <p>In coordination with DHS and industry, TSA identified the top 67 mass transit and passenger rail assets. These assets were selected using criteria such as asset type, passenger flow, iconic value, etc. Understanding what physical security measures are in place at these assets and developing plans to close security gaps is a major priority going forward.</p> <p>Created a secondary Top Transit Asset List to include assets that did not fall into the initial list, but were still deemed critical by TSA.</p>	<p>Augment security in mass transit and passenger rail through risk-based Visible Intermodal Prevention and Response (VIPR). January 2012- December 2012 there were more than 7,100 mass transit specific VIPR operations. It is anticipated that this operational tempo will be sustained in FY13 and FY14. Assure preparedness through multifaceted information sharing networks to disseminate timely, accurate intelligence and security advisories and alerts while also conducting multiple regional I-STEP exercises.</p>
Highway	<p>TSA is completing assessments on the trucking (non-HAZMAT), motor coach, and school bus modes through the use of the BASE Assessment Program and the analysis of the aggregate results of these assessments.</p> <p>TSA is also completing structural security assessments of up to 60 significant highway infrastructures with full analysis and aggregate reporting for specific bridge and tunnel types.</p>	<p>TSA is focusing on continued development and maintenance of Baseline Standards in all 4 Highway Motor Carrier (HMC) sub-areas through the HMC BASE Assessment Program (Baseline Assessment and Security Enhancement).</p> <p>TSA has developed Security Action Items (SAI) that are intended to provide affected highway industries with baseline security foundations that can act as guidance and practical security risk reduction activities.</p>	<p>Additionally, since 2010, TSA HMC has completed vulnerability assessments on 48 critical infrastructures (highway bridges and tunnels) including risk-based component level analysis of security mitigation strategies. 5 to 10 additional structures are planned to be completed in FY-2013/14. The infrastructure assessments also capture cost data to replace the existing structure and costs to implement the recommended security mitigation strategies.</p>	<p>TSA HMC is currently encouraging stakeholders to implement Security Action Items (SAI's). TSA is also encouraging stakeholders to have front-line employees complete voluntary security training either internally or using the TSA supplied First Observer® training program.</p> <p>TSA continues to coordinate HMC risk based VIPR and ISTEP security exercises with industry stakeholders and distributing modal counterterrorism guides and other HMC security materials. TSA also continues to vet applications for commercial driver license HAZMAT.</p>

SURFACE TRANSPORTATION INITIATIVE MATRIX

	TVC	Baseline Standards	Assessments	Close Gaps
Pipeline	<p>TSA annually identifies and ranks the nation's highest risk pipeline systems based on analysis of total equivalent energy transported, system vulnerability and threat. TSA's risk reduction programs are guided by this ranking.</p>	<p>TSA issued the Pipeline Security Guidelines in April 2011.</p> <p>In September 2011 TSA updated and distributed its pipeline security "smart practices" document, incorporating recent observations from its Corporate Security Review (CSR) and Critical Facility Inspection (CFI) programs.</p>	<p>TSA has conducted a total of 142 pipeline CSRs. 16 CSRs were accomplished in FY 2012. TSA will conduct 12-15 CSRs annually in FY 2013 and FY 2014.</p> <p>In FY 2011 TSA completed 65 critical facility inspections. In FY 2012 TSA collected pipeline operators' updated listings of critical facilities based on the revised criteria contained in the Pipeline Security Guidelines. Additional facility inspection reviews have been initiated with annual goals in FY 2013 and 2014 of 90 to 100 assessments facility inspections.</p>	<p>Initiated the Cybersecurity Assessment and Risk Management Approach (CARMA) program within the pipeline industry. This effort provides a roadmap for sector cyber risk management activities and complements asset and facility-based security assessments by providing strategic cyber risk context to vulnerability and site assessments</p> <p>Conducted the eighth annual International Pipeline Security Forum in conjunction with Canadian government counterparts to raise industry security awareness and discuss best practices.</p> <p>TSA conducted nine ISTEP exercises for six pipeline companies in FY 2012. Our annual goal for both FY 2013 and FY 2014 is to conduct two annual pipeline ISTEP exercises per year.</p>
Cross Modal	<p>All port facilities and vessel operators have conducted self-assessments per USCG regulatory requirements. USCG has also conducted risk assessments of all ports – including those with passenger vessel operations.</p> <p>USCG's database, Maritime Security Risk Assessment Model, assessments have identified high risk ferry systems. TSA has entered into a sharing agreement with USCG for risk assessment information.</p> <p>TSA continues to develop the Mission Risk Knowledge Center (MRK-C) to provide an interactive online central repository for system, modal and sector-level risk assessments.</p> <p>TSA is seeking to use exercise results to benchmark assessments and supplement data for risk prioritization to inform resource allocation, Security Grants, standards development and DHS R&D funds.</p>	<p>Office of Security Policy and Industry Engagement (OSPIE) provides federal leadership as the Transportation Systems Sector-Specific Agency (SSA) to protect critical transportation infrastructure and enhance system resilience as directed by DHS and the President.</p> <p>OSPIE prepares the Transportation Sector Specific Plan implementing risk management and R&D processes and programs for addressing risk and improving resilience across the transportation sector.</p> <p>OSPIE resources and maintains processes for engagement of other government entities and industry owners and operators in sector-wide protection and resilience policy-making, planning, programming, and performance measures as required by legislation and executive directives.</p> <p>OSPIE produces, in collaboration with stakeholders, the Annual Progress Report which incorporates multiple reports to congress describing progress reducing risks to the nation's transportation systems and services including those required by the Aviation Transportation Security Act, the Intelligence Reform and Terrorism Prevention Act, the 9/11 Act, and the critical infrastructure presidential directive.</p> <p>The Cross Modal Division provides economic analysis for regulatory standards development in all modes of transportation. Standards for training, security planning and vulnerability assessments for surface modes are currently being developed.</p> <p>Maritime standards are developed by USCG. OSPIE contributes to these standards with resources and expertise. USCG security regulations require security assessments, designated security officers, and mandated screening of passenger vessels.</p>	<p>Technology pilots test and evaluate screening technologies and procedures at the nation's high volume ferry operations and cruise terminals. Upon request TSA resources support high-volume ferry systems with on-site assessments of security practices and procedures.</p> <p>TSA is utilizing a proven risk assessment model to evaluate current U.S. Postal Service aviation security program in selected locations.</p> <p>IAW 9/11 Act, the Intermodal Security Training and Exercise Program (I-STEP) provides exercise processes and technologies for application in various modes of transportation.</p> <p>The Intermodal Virtual Imaging Enhancement Workshop (I-VIEW) is a computerized visual mapping tool which provides security officials and first responders with virtual situational awareness of the layout of transportation facilities.</p> <p>The MRK-C will act as a central repository for risk information, allowing users to search data, read reports and conduct analyses to make informative decisions.</p>	<p>Continue to develop security training and informational materials:</p> <ul style="list-style-type: none"> - Deliver 20,000 Intermodal training DVDs through FY 2013. - Complete 1 training product and/or with 7 training products and 7 by the end of FY 2013 <p>Conduct 15-20 ISTEP exercises in FY 14 with at least 130 exercises completed through FY14.</p> <p>Complete and deliver 15 IVIEW projects in various transportation modes and train first responder communities in use of this product in FY 2014.</p>

Transportation Security Administration
Surface Transportation Security:
Rail Security Inspectors and Canines
Program Performance Justification**
(Dollars in Thousands)

PPA: Rail Security Inspectors and Canines

	Perm. Pos	FTE	Amount
2012 Revised Enacted	649	555	96,234
2014 Adjustments-to-Base	(1)	66	(8,614)
2014 Current Services	648	621	87,620
2014 Program Change	(104)	(100)	(13,722)
2014 Total Request	544	521	73,898
Total Change 2012 to 2014	(105)	(34)	(22,336)

TSA requests \$73.9 million for Surface Transportation Security Inspectors and Canines. The adjustments-to-base (ATBs) include: a decrease of 1 FTP/1 FTE and \$0.205 million in transfers between the Surface Transportation Security appropriation and Aviation Security and Transportation Security Support appropriations; an increase of \$542,000 for pay COLA; an increase of 67 FTE to adjust for Actual FTE; and a decrease of \$8.9 million for efficiencies. In addition, the request includes a program decrease of 104 FTP/100 FTE and \$13.7 million for a reduction to staffing of the Visible Intermodal Prevention and Response (VIPR) teams.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Surface Transportation Security Inspector and Canine PPA provides resources for the Surface Compliance program; Surface VIPR program; and the surface transportation security part of the National Canine Program (NCP).

The following table provides the components and associated funding levels of this PPA.

(dollars in millions)

	FY 2012 Revised Enacted	FY 2014 Request
Surface Compliance Branch	\$33.9	\$33.2
Visible Intermodal Prevention and Response (VIPR)	\$55.5	\$34.0
National Canine Program (NCP)	\$6.8	\$6.7
Total	\$96.2	\$73.9

Surface Compliance Branch (SCB): \$33.2 million

The SCB is a unique and critically important Federal inspection program with responsibilities in United States surface transportation security. With emphasis on freight railroads; mass transit; passenger rail; highway motor carriers; and to a limited extent, pipelines; the SCB has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

The following chart provides historical and current information on the total number of Surface, Aviation, and Cargo Transportation Security Inspectors (TSIs) positions across TSA. Not all of these positions are currently filled.

	FY 2012	FY 2013	FY 2014
Aviation Regulation	974	974	944
Aviation Regulation - Domestic Inspectors/Security Specialists	654	654	654
Aviation Regulation - Domestic Canine Inspectors	166	166	166
Aviation Regulation - Domestic VIPR Inspectors ¹	75	75	45
Aviation Regulation - International Inspectors/Security Specialists	64	64	64
Aviation Regulation - International Repair Station Inspectors/Security Specialists	15	15	15
Air Cargo	681	681	681
Air Cargo - Domestic Inspectors/Security Specialists	500	500	500
Air Cargo - Domestic Canine Inspectors	120	120	120
Air Cargo - International Inspectors/Security Specialists ²	61	61	61
Surface	379	379	300
Surface - Domestic Inspectors/Security Specialists ³	225	225	225
Surface - VIPR Inspectors ¹	154	154	75
Total TSA Inspectors/Security Specialists	2034	2034	1925

1/ FY 2014 budget submission includes a program decrease reducing the amount of TSI-A in Aviation VIPR by 30 and TSI-S of Surface VIPR by 79.

2/ Includes an additional 38 International inspectors from FY 2012 Appropriation and 11 International inspectors from internal shifts within TSA.

3/ Technical correction to represent domestic field inspectors only (vice field and headquarters) which is commensurate to how the TSI in Aviation Regulation and Air Cargo is reported.

Transportation Security Inspectors - Surface (TSI-Ss) are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 61 High Threat Urban Areas (HTUAs), as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to Toxic Inhalation Hazard (TIH) shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. TSI-S personnel conduct regulatory inspections; provide stakeholder liaison functions; situational awareness of security conditions; and during surface transportation incidents, convey valuable first-hand information to Federal Security Directors (FSDs); security, policy, and intelligence offices; and TSA leadership. To ensure inspectors operate safely and appropriately in the surface transportation environment, training for TSIs-Surface is provided at a specialized Pueblo, CO facility. Training is key to ensuring that TSA has a technically

proficient and agile workforce. All courses include both classroom instruction and on-site practical application exercises.

The legislation underlying 49 CFR parts 1520 and 1580, provides TSA's TSI-Ss with regulatory authority to ensure a secure chain of custody of security-sensitive material rail cars occurs between rail carriers and shippers/receivers at points of origin, delivery, and interchange. TSA's TSI-Ss observe the handling and placement of security-sensitive material rail cars and verify the paperwork at the covered facilities to ensure compliance, including reporting requirements for incidents, potential threats, and significant security concerns, and location tracking requirements. It also requires the designation of a Rail Security Coordinator by freight and passenger railroad carriers, rail transit systems, and certain hazardous materials facilities.

Responsibilities of the TSI-Ss include:

- Conducting regulatory inspections;
- Conducting threat and vulnerability inspections, reviews, and assessments that are used to determine the capability of a potentially targeted transportation system/asset to reduce the risk from a specified threat;
- Conducting Risk Reduction Survey assessments for railcars carrying TIH materials and shippers;
- Serving as panel members on the Transportation Security Grant Program (TSGP) to review project proposals, assess grant applications, and assist in developing a process for awarding grants;
- Responding to surface transportation security incidents (i.e., train derailments, possible improvised explosive devices, major truck accidents, etc.) to gather real-time, on-scene information which are provided to FSDs and TSA senior leadership;
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event; and
- Planning, participating in, and dedicating personnel to TSA VIPR deployments.

The SCB conducts various types of threat and vulnerability assessments, inspections, and reviews, which include:

Freight Rail Corridor Assessments (FRCAs): TSA conducts FRCAs, which focus on assessing the vulnerabilities of high-population areas where TIH materials are moved by rail in significant quantities. The FRCAs provide site-specific mitigation strategies and lessons learned, and support the development of Security Action Items (SAIs). On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA and take approximately four to six weeks to complete, depending on the HTUA and complexity of the railroad operations within the corridor.

Station Criticality Assessments (SCA) also known as Station Profiles: TSI-Ss conduct SCAs, which are in-depth assessments of critical infrastructure facilities and transit stations. SCAs gained importance after the terrorist attacks in the mass transit mode in Mumbai, Madrid, London, and Moscow. These assessments which mitigate that type of threat provide detailed information on a variety of station-related intelligence, such as the locations of exits, telephones, Closed Circuit

Television (CCTV), electrical power, station managers, etc. This information has been extremely useful in VIPR planning, and is also relevant for first responders, intelligence planners and security personnel. The assessments for a majority of stations across the Nation have been completed and are in the process of being continually updated as security enhancements are added to stations.

Baseline Assessment for Security Enhancement (BASE) Reviews: BASE reviews are comprehensive mass transit assessments that require a significant amount of time and stakeholder coordination. Since these are voluntary on the part of the stakeholder, assessments must be coordinated with the stakeholder's availability and schedule. The Surface Transportation Security Inspection Program (STSIP) has continued to focus these reviews on high-risk transit agencies that have a 60,000 average weekday ridership. TSI-S personnel conduct follow-up visits to address the performance weaknesses identified and use the Performance Improvement Action Plan tool to monitor transit agency efforts to remove security vulnerabilities. TSI-S personnel evaluate and prioritize these improvement needed to make public transportation systems, facilities, and passengers more secure. TSI-S personnel work closely with transit agencies to offer additional tools and TSA programs to help bolster the low scoring sections found in the BASE.

Mass Transit System Criticality Tool (MTSCT): This is a tool designed to measure the criticality of transit assets in relation to a number of predetermined factors. TSI-S personnel work closely with transit agencies to identify key system assets and obtain asset consequence and vulnerabilities details.

Mass Transit System Risk Assessments (MTSRA): Assessments scheduled at the program office level and coordinated through local TSI-S field offices require close supervision and program office oversight by subject matter experts. These Risk Assessments, conducted by TSI-S and Surface Regional Security Inspector (RSI-S) personnel are voluntary and required transit agency cooperation. The MTSRA tool was developed in response to the 9/11 Act, Section 1405.A.3.A (Security Assessments and Plans), and evaluates 10 specific assets within a mass transit system: passenger stations, tunnels, bridges, power stations, signals, track, facilities, yards, communication facilities, and vehicles. The tool includes a risk score based on threat (T), vulnerability (V), and consequence (C), with the vulnerability score divided among 18 different asset categories and contains over 1,500 vulnerability questions per category. Agency participants receive an executive summary report which outlines their T/V/C scores and will be used to meet the requirements of the upcoming Notice of Proposed Rule-Makings (NPRMs). The report also provides a prioritized list of security vulnerabilities to assist in decision-making.

Risk Mitigation Activities in Surface Transportation (RMAST): Developed in 2012, the RMAST program consists of a national strategy for performing non-law enforcement, high visibility activities and performing risk mitigation on a random and unpredictable basis. The RMAST program is risk-based, intelligence driven and includes processes and procedures to mitigate current threats and vulnerabilities identified through the various assessment programs.

The RMAST program improves overall security on the Nation's highest risk transportation venues and infrastructures and reduces the need for stakeholders to stretch their limited resources for hardening security at some of their most critical and high risk locations. TSA's RMAST program offers additional "eyes and ears" to identify the most serious vulnerabilities and to ensure that TSI resources

are deployed to the most critical and high risk venues. This program will strengthen TSA’s partnership and commitment to surface transportation stakeholders.

Additionally, in accordance with the rail and mass transit regulation under 49 CFR 1580, TSI-Ss conduct compliance inspections throughout the freight rail and mass transit domain. Previously, TSA, in conjunction with the private sector, had developed a list of 24 Security Action Items (SAIs) and three Supplemental Security Action Items (SSAIs) which identified best practices that freight railroads and their employees should implement to reduce the risk associated with the transportation of TIH materials by rail. These assessments led to the development of a TIH Risk Reduction Project. Implemented in 2007, and extended through 2015, the project focuses on objectively measuring the risk reduction associated with the rail transportation of TIH materials by rail, through 46 HTUAs.

Visible Intermodal Prevention and Response (VIPR): \$34.0 million

The objective of VIPR deployments in all surface transportation modes, with a focus on mass transit and passenger rail systems, is to augment stakeholder capabilities in detecting and deterring potential terrorist activity. To achieve this, TSA utilizes random deployments that are unpredictably executed in timing, location, and activity type. VIPR operations teams may include TSIs, Transportation Security Officers, Federal Air Marshals, Behavior Detection Officers, Transportation Security Specialists-Explosives, Explosives Detection Canine teams, and Federal, State, and local law enforcement officers. Uniformed VIPR team members provide a visible and official security presence that support efforts to prevent an adversary from identifying and breaching a pattern in security activities. The total number of VIPR deployments across surface transportation modes increased to approximately 160 to 180 per week in FY 2012. In FY 2013, TSA anticipates sustaining the current operational tempo while increasing the focus on higher-risk transportation locations. TSA anticipates the number of operations will remain constant for FY 2014.

	Multi-Modal Teams	Surface Appropriation Teams	Aviation Operations	Surface Operations	Total Operations
FY 2012 Actual	22	15	3,977	8,868	12,845
FY 2013 Planned	22	15	3,800	8,800	12,600
FY 2014 Planned	22	15	3,800	8,800	12,600

National Canine Program (NCP): \$6.7 million

TSA’s NCP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and a State or local law enforcement handler. The NCP, in partnership with State and local law enforcement agencies, provides effective, low-cost security measures within the mass transit/commuter rail, and maritime (ferry system) sector.

Through Other Transaction Agreements (OTAs), TSA provides funding for training, certification, and maintenance of the capable explosive detection canines, training for the handlers, and partial reimbursement of handlers’ salaries and other costs. Local law enforcement agencies deploy these

canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

Explosives Detection Canine Team Assignments

Type	Function	FY 2012/2013		FY 2014	
		Teams	Locations	Teams	Locations
State and Local Law Enforcement Teams (Legacy)	Aviation & Air Cargo ¹	491	79	491	79
	Multi-Modal	27	8	27	8
	Surface	117	18	117	18
Total State and Local Law Enforcement Teams		635	105	635	105
Federal Teams (Proprietary)	Multi-Modal	46	11	46	11
	Passenger Screening	120	25	120	25
	Air Cargo	120	15	120	15

Total Request	649	555	96,234	649	622	96,823	544	521	73,898

Description of Item

TSA will maintain the current number of VIPR Teams, but requests a total decrease of 186 FTP/ 179 FTE and \$25 million as a reduction to the VIPR program. This request includes a \$13.7 million reduction to the Security Inspectors and Canines PPA and an associated \$11.3 million reduction in the Aviation Regulation and Other Enforcement PPA within the Aviation Security Appropriation. The FY 2014 funding levels support the core components of a VIPR team, but slightly reduce the number of Federal Air Marshals (FAMs), Behavior Detection Officers (BDOs), and Inspectors participating on the 37 dedicated teams.

Justification

TSA received funding for VIPR teams in FY 2008, FY 2010, and FY 2012 for a total of 37 VIPR teams. TSA's FY 2012 VIPR teams staffing allocation reduced the role of inspectors and emphasizes the visible deterrence component of the mission. TSA has taken a broad look at the staffing and resource requirements for the VIPR program and can reduce the funding while still providing risk-based, periodic random deployments that are unpredictably executed in terms of timing, location, and types of activities. All VIPR teams will have the same staffing allocation as the teams provided in FY 2012. The total number of VIPR teams will not change.

The mission of the VIPR program is to deter and prevent terrorism. This is achieved by conducting VIPR operations that promote confidence in and protection of all modes of the Nation's transportation systems. TSA personnel participating in VIPR operations include FAMs, Transportation Security

Officers, BDOs, Transportation Security Inspectors, Transportation Security Specialists – Explosives, and Explosive Detection Canine Teams. These TSA personnel coordinate with other Federal, State, and local transportation security personnel and law enforcement officers to augment existing terrorism risk mitigation measures on a random and unpredictable basis.

VIPR teams can be deployed for normal transportation mode activities, during periods of heightened threat or at special events that require additional security. VIPR teams provide deterrent and detection capabilities while introducing an element of surprise to disrupt potential terrorist activities.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA will continue to maintain VIPR operations in the areas of highest risk. In FY 2013, TSA anticipates sustaining the current operational tempo while increasing the focus on higher-risk transportation locations. TSA anticipates the number of operations for the 37 teams will remain constant in FY 2014.

	Multi-Modal Teams	Surface Appropriation Teams	Aviation Operations	Surface Operations	Total Operations
FY 2012 Actual	22	15	3,977	8,868	12,845
FY 2013 Planned	22	15	3,800	8,800	12,600
FY 2014 Planned	22	15	3,800	8,800	12,600

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to surface transportation security activities, [\$124,276,000] \$109,331,000¹, to remain available until September 30, [2014] 2015².

Language Provision	Explanation
¹ ...[\$124,276,000] <u>\$109,331,000</u> ...	Dollar change only. No substantial change proposed.
² ... [2014] <u>2015</u> ...	Fiscal year change only. No substantial change proposed.

Staffing and operations Mission Statement

Surface Transportation Security Staffing and Operations is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Staffing and Operations office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	16,786	16,889	16,221	(565)
12.1 Benefits	6,212	6,250	6,003	(209)
Total, Salaries & Benefits	22,998	23,139	22,224	(774)

The FY 2014 Salaries and Benefits request includes an increase of \$171,000 for pay COLA, a decrease of \$170,000 for a transfer to the Transportation Security Support Appropriation, and a decrease of \$775,000 for adjustments-to-base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$1,654	\$1,664	\$1,403	(\$251)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease of \$251,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$127	\$128	\$108	(\$19)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services, and rentals, and utility services. PDA and cell phone air time are major items being charged to this object class. The FY 2014 request reflects a decrease of \$19,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$31	\$31	\$26	(\$5)

Printing includes all costs for printing and reproduction obtained from private sector or other federal entities. The FY 2014 request reflects a decrease of \$5,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$13,157	\$13,238	\$11,208	(\$1,949)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail, Highway and Motor Carrier and Postal and Shipping. The FY 2014 request reflects a decrease of \$1,949,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$142	\$143	\$120	(\$22)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2014 request reflects a decrease of \$22,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$405	\$407	\$344	(\$61)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials. The FY 2014 request reflects a decrease of \$61,000 for efficiencies.

The funds will be used to support partnership activities with other government agencies. The FY 2014 request reflects a decrease of \$143,000 for adjustments to the base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$980	\$986	\$102	(\$878)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request reflects a decrease of \$878,000 for adjustments to the base and the VIPR program decrease.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$232	\$233	\$24	(\$208)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request reflects a decrease of \$208,000 for adjustments to the base and the VIPR program decrease.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
41.0 Grants/Subsidies/Contributions	6,780	6,822	6,698	(\$82)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, locals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2014 request is a decrease of \$82,000 associated with adjustments to the base.

I. Changes In Full Time Employment

	FY 2012	FY 2013	FY 2014

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Transportation Threat Assessment & Credentialing

I. Appropriation Overview

A. Mission Statement for Transportation Threat Assessment & Credentialing:

To reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation's transportation system.

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Safe Explosives Act (P.L. 107-296),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295),
- Security and Accountability For Every Port Act of 2006 (P.L. 109-347),
- Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (P.L. 109-59),
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176),
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

The National Strategy for Homeland Security and these laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD-11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures”.

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated and integrated threat assessment environment. Implementation of HSPD-11 must facilitate the efficient movement of people, cargo and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

TSA supports this directive by vetting passengers and transportation workers through programs within the Transportation Threat Assessment and Credentialing (TTAC) appropriation. These programs include: Secure Flight, Aviation Workers, Flight Crew Vetting, DCA General Aviation, Indirect Air

Carriers, Certified Cargo Shippers, Large Aircraft Operators, Transportation Worker Identification Credential (TWIC), Hazardous Materials Endorsement Threat Assessment Program (HTAP) and Alien Flight Student Program (AFSP).

All programs that comprise this appropriation are designed to enhance security for many components of the transportation sector (air, land, sea); and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

As transportation risks change, TSA's vetting programs evolve and transform to more efficiently and effectively screen individuals to mitigate risk and prevent terrorist actions on the transportation systems. TSA perpetually vets over 14.8 million records per day. On a weekly basis TSA:

- Pre-screens an average of 14 million air passengers; criminal, and immigration security threat assessment results; and
- Responds to over 1,000 redress requests.

B. Budget Activities:

Secure Flight

Under the Secure Flight Final Rule (Federal Register, Vol. 73, No. 209), the Secure Flight program assumes responsibility of airline passenger watch list matching from the airline industry into one program managed and operated by the Federal Government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of a U.S. airport, the Secure Flight program uses an automated process to match Secure Flight Passenger Data against records contained in portions of the Terrorist Screening Database (TSDB).

Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. On June 22, 2010, Secure Flight met its goal of conducting watch list matching for all domestic aircraft operator flights within, into and out of the United States, as well as international point-to-point flights between two foreign cities. On November 23, 2010, Secure Flight completed deployment to all covered foreign air carriers flying into and out of the United States. Secure Flight expects all overflights (flights that fly over the United States, but do not land) will be covered by the end of calendar year 2012. Beginning in FY 2012 Secure Flight, in support of TSA's risk-based, intelligence-driven approach to aviation security, began the TSA Risk-Based Security (RBS) initiative, TSA Pre✓™. TSA Pre✓™ enhances aviation security by placing more focus on potentially high-risk passengers, while improving the traveling experience of individuals who pose a low-risk to aviation security. Secure Flight pre-screens more than 2 million passenger enplanements daily.

Other Vetting

This activity incorporates personnel and operational costs of vetting operations that are not a part of any of the programs described above, as well as vetting and credentialing related administrative costs and TSA's efforts to modernize its vetting infrastructure. Other Vetting initiatives include:

- Crew Vetting Program for crewmembers flying into, over, and out of the United States;
- Aviation Workers Program;

- Other Aviation Vetting Programs, including DCA Access Standard Security Program (DASSP), Private Charter Standard Security Program (PCSSP), 12/5 Standard Security Program (12/5), Maryland Three Program and Airspace Waivers;
- FAA/Airmen Certificate Vetting;
- Consolidated Screening Gateway and Transportation Vetting System platforms, and
- Technology Infrastructure Modernization (TIM), which will provide a single, uniform vetting system.

Transportation Worker Identification Credential

The TWIC allows identity verification through the use of biometric technology and is capable of working as an integral part of access control systems deployed by the maritime transportation sector. The TWIC Final Rule was issued on January 25, 2007. The enrollment of workers, including longshoremen, truckers, port employees, and U.S. merchant mariners began in October 2007. As of January 2013, TSA had enrolled more than 2.3 million workers. Funds for the program come entirely from fee revenue.

The TWIC reader pilot, mandated by the SAFE Port Act of 2006, concluded on May 31, 2011. The Secretary delivered the final reader pilot report to Congress on February 27, 2012. The pilot included several extensive laboratory reader tests including an evaluation of the ability of readers to withstand the harsh environment of many maritime facilities. Field tests were conducted at ports, individual facilities and vessel operations to assess reader function and to determine the impact on business and operations of using readers for biometric verification of identity using the TWIC. The U.S. Coast Guard, which sponsors the anticipated TWIC reader rule, participated with TSA in the pilot.

Hazardous Materials Endorsement Threat Assessment Program

The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment (STA) on anyone applying to obtain, renew or transfer a Hazardous Materials Endorsement (HME) on their state-issued Commercial Drivers License (CDL). The TSA security threat assessment includes a fingerprint-based Criminal History Records Check (CHRC), a legal status check, and checks for ties to terrorism. The program also fulfills statutory requirements under the Safe Explosives Act (P.L. 107-296) regarding transportation security issues of persons engaged in any aspect of the safe transportation of explosive materials. Operational since January 31, 2005, the program has enrolled more than 2.2 million drivers and is entirely funded by fee revenue.

Other Vetting Fees

The following fee programs provide revenue to fund a Security Threat Assessment and a fingerprint-based FBI CHRC:

- General Aviation at Ronald Reagan National Airport; and,
- Air Cargo (includes Indirect Air Cargo and Certified Cargo Screening Program).

The following programs provide fee revenue for a fingerprint-based FBI CHRC only:

- Commercial Aviation and Airport Fee (previously Secure Identification Display Area and

- Sterile Area Workers); and, Other Security Threat Assessments to include PCSSP; 12/5; Maryland Three Program; and Sensitive Security Information (SSI). Large Aircraft Security Program (LASP) and SSI were previously separate PPAs.

Alien Flight Student Program

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), AFSP reviews and assesses biographic and biometric information of non-U.S. citizens applying for training at FAA certified flight schools. These persons are subject to an STA consisting of a CHRC through the FBI, a Treasury Enforcement Communication System (TECS) check through U.S. Customs and Border Patrol (CBP) for immigration status, and a Terrorist Screening Database (TSDB) check. Since its transfer to TSA from the FBI in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500. The program has processed more than 377,000 training applications.

C. Budget Request Summary:

For FY 2014, the Transportation Security Administration requests a total budget authority for the Transportation Threat and Credentialing mandatory and discretionary appropriations of 488 positions, 455 FTE and \$246,617,000. This request consists of 433 positions, 403 FTE, and \$180,617,000 in appropriated funding; and 49 positions, 46 FTE, and \$61,000,000 in discretionary fee collections. Also included in this appropriation are 6 positions, 6 FTE and \$5,000,000 in mandatory fee collections. The total adjustments-to-base include an increase of 51 FTE to adjust from FY 2012 actuals to enacted levels, and a decrease of 26 positions and \$17,054,000 in appropriated funding since FY 2012 enacted levels; an increase of 4 positions, 2 FTE and \$10,223,000 in discretionary fee estimates compared to FY 2012 actual collections.

D: Efficiencies

TSA’s budget includes \$11.4 million in projected efficiencies expected in specific object classes from FY 2012 through FY 2014 as described below.

Mission Support Personnel Reduction Efficiencies \$0.141 million

TSA expects to achieve savings in personnel from centralization of like functions (i.e., IT, acquisition, real estate, etc.) and has realigned staff in FY 2012 to more efficiently perform these functions. TSA also expects to achieve efficiencies from reducing overtime costs.

Supplies & Materials Efficiencies \$0.653 million

TSA anticipates savings associated with use of electronic media, which will significantly reduce the need for paper, toner, binders, folders, etc. to print materials for briefings. Additionally, TSA will limit the publication and printing of hard copy documents and prescribe that information should be provided in an electronic form, whenever applicable,

Travel Efficiencies**\$0.018 million**

TSA will reduce all non-essential travel by 50 % across all programs as applicable. To ensure efficient travel spending, TSA will employ strategic alternatives to Government travel, including local or technological alternatives, such as teleconferencing and video conferencing. Additionally, TSA will make all appropriate efforts to conduct business and host or sponsor conferences in space controlled by the Federal Government, wherever practicable and cost effective.

Transportation of Things Efficiencies**\$0.037 million**

TSA plans to seek ways to reduce postal and freight charges by pursuing more cost efficient transport of equipment.

Advisory & Assistance Contracts Efficiencies**\$8.667 million**

As part of a DHS-wide effort, TSA will reduce the number of advisory and assistance contracts.

Other Services Efficiencies**\$1.910 million**

In addition to the above efficiencies, TSA will also implement other enterprise-wide efficiencies and management adjustments to achieve savings.

III. Current Services Program Description by PPA

Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Secure Flight
Program Performance Justification
 (Dollars in Thousands)

PPA: Secure Flight

	Perm. Pos	FTE	Amount
2012 Revised Enacted	332	239	92,414
2014 Adjustments-to-Base	(24)	47	1,067
2014 Current Services	308	286	93,481
2014 Program Change	-	-	12,717
2014 Total Request	308	286	106,198
Total Change 2012 to 2014	(24)	47	13,784

TSA requests \$106.2 million for Secure Flight. The adjustments-to-base (ATBs) include: a decrease of 24 FTP/23 FTE and \$2.5 million for a transfer to the Transportation Security Support appropriation; an increase of \$0.279 million for pay COLA; an increase of \$10 million realigned from the Other Vetting PPA to support Risk Based Security (RBS); an increase of 75 FTE to adjust from FY 2012 actuals reported above to enacted levels; a decrease of \$3 million for a RBS non-recur; and a decrease of 5 FTE and \$3.6 million for efficiencies. In addition, the request includes a \$12.7 million program increase for the Large Aircraft and Charter Screening Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

Secure Flight's mission is to strengthen the security of commercial air travel into, out of, within, and over the United States through the use of improved and expanded watch list matching using risk-based security measures. The program's goals are to:

- Prevent individuals on the No Fly List from boarding an aircraft;
- Identify individuals on the Selectee List for enhanced screening;
- Support TSA's RBS mission by identifying high-risk passengers for appropriate security measures/actions and identifying low-risk passengers for expedited screening;
- Minimize misidentification of individuals as potential threats to aviation security; and
- Protect passengers' personal information from unauthorized use and disclosure.

The Secure Flight program enhances the Nation's transportation system by operating a risk-based, intelligence-driven watch list matching capability for 700 million passengers each year across 231 aircraft operators. Secure Flight delivers a matching capability that uses the government watch list in order to effectively identify individuals who may pose a threat to aviation or national security. As a result, these individuals receive enhanced screening and/or are prohibited from boarding an aircraft. Secure Flight matches passenger information against records within the Terrorist Screening Database (TSDB) containing full name and date of birth (including the No Fly and Selectee List). In addition, Secure Flight includes a matching function for the Centers for Disease Control and Prevention's Do Not Board List, which contains a list of individuals with communicable diseases who meet specific criteria and pose a significant health risk to other passengers. These individuals are restricted from boarding commercial aircraft departing from and/or arriving in the United States.

Covered aircraft operators must collect and transmit full Secure Flight Passenger Data (SFPD) for watch list matching, including the passengers' full name, date of birth, and gender as they appear on the government-issued identification the passenger plans to use when traveling, as well as passport number (if available), Redress Number (if available), and Known Traveler Number (if available). By receiving SFPD as early as 72 hours prior to scheduled flight departure, the program provides earlier insight to watch list matches, an interactive capability for perpetual watch list matching, earlier notification to appropriate law enforcement (as necessary), and integration of the DHS Redress process to help prevent future delays for misidentified passengers. As a result, more than 99 percent of passengers who provide full SFPD are cleared by Secure Flight in advance of airport arrival and do not experience delays in obtaining boarding passes.

On November 23, 2010, Secure Flight completed deployment to all covered U.S. aircraft operators and foreign air carriers flying into, out of, and within the United States a full month ahead of schedule. In 2011, Secure Flight completed a pilot program for conducting watch list matching for overflights. Overflights are those flights that overfly, but do not land in, the continental United States (i.e., the lower 48 contiguous states, excluding Alaska and Hawaii). This includes flights that travel through the airspace overlying the territorial waters between the U.S. coast of the lower 48 states and 12 nautical miles from the continental U.S. coast (excluding Canada-to-Canada and Mexico-to-Mexico flights). As of October 24, 2012, Secure Flight conducts watch list matching for 100 percent of all foreign air carriers currently operating covered flights overflying the United States.

The following chart on the following page depicts the Secure Flight scope on covered flights.

Secure Flight Covered Flights

In support of TSA’s risk-based, intelligence-driven approach to aviation security, Secure Flight enables the TSA RBS strategy through TSA Pre✓™. This initiative enhances aviation security by placing more focus on potentially high-risk passengers, while improving the traveling experience of individuals who pose a low-risk to aviation security. Eligible passengers voluntarily provide additional information prior to traveling, which allows TSA to conduct more robust passenger pre-screening and better segment the passenger population according to risk. In FY 2012, Congress appropriated \$10 million to TSA to implement RBS.

Alaska Airlines, American Airlines, Delta, United Airlines and US Airways currently participate in TSA Pre✓™. Additionally, TSA Pre✓™ is currently available at 34 airports.

For FY 2014, TSA requests \$12.7 million for Secure Flight to perform watch list matching for passengers prior to boarding large general aviation aircraft. The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA) requires TSA to establish a process to conduct watch list matching for operators of aircraft weighing more than 12,500 pounds to be used in charter air transportation or lessors of aircraft weighing more than 12,500 pounds flying into, out of, or within the United States. TSA is promulgating a rule for general aviation large aircraft (regulation identifier number 1652-AA53) that will include provisions for this watch list matching as well as general aviation operators over 30,000 pounds. . Under the rule, general aviation operators 12,500 pounds or greater, which transport passengers or cargo for compensation/hire will submit passenger information to Secure Flight for watch list matching. Additionally, Secure Flight will conduct watch list matching for unknown passengers on general aviation operators over 30,000 pounds that do not transport passengers or cargo for compensation/hire. Collectively, these additional populations represent approximately 2,000 general aviation operators. As a result, an estimated 11 million additional SFPD sets will be submitted

by these operators per year. The FY 2014 funding request will continue the modifications to the Secure Flight system, processes, and procedures to support vetting these populations.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands) \$113,474* (includes funding from multiple PPAs)	FY 2013 Activity Funding (\$thousands) \$110,997* (includes funding from multiple PPAs)	FY 2014 Activity Request (\$thousands) \$117,436* (includes funding from multiple PPAs)
Secure Flight	<p>SF strengthens security by operating a threat-based, watch list matching capability to identify potential matches, enhancing the security of domestic and international commercial air travel. SF's goals are to: 1) Identify known and suspected terrorists who appear on the No Fly or Selectee Lists and attempt to board a domestic or international flight or gain access to the sterile area within a domestic airport; 2) Prevent individuals on the No Fly List from boarding an aircraft, and subject individuals on the Selectee List to enhanced screening to determine if they are permitted to board an aircraft; and 3) Ensure freedom of movement for people and commerce while protecting privacy. SF provides earlier insight into potential matches to the watch lists, an interactive capability for recurring watch list matching, a consistent approach to identify matches, and integrates the DHS redress results into the watch list matching process to help prevent future delays of misidentified passengers.</p> <p>The following performance measures will be used to track performance against TSA's mission and goals:</p> <p>Percentage of Aircraft Operators on-boarded with Secure Flight.</p> <p>Percentage of Redressed passengers (that have been successfully redressed by DHS TRIP) that are automatically recognized and cleared by the SF system.</p> <p>Percentage of records purged in accordance with NARA schedule retention guidelines.</p> <p>Service availability of the Secure Flight system (within SF bounds).</p> <p>Secure Flight's mission is to enhance the security of domestic and international commercial air travel in the United States through the use of improved watch list matching by identifying known and suspected terrorists, preventing individuals on the No Fly List from boarding an aircraft, and providing enhanced screening of individuals on the Selectee List to determine if they are permitted to board an aircraft, in order to deter and disrupt terrorist activities.</p> <p>*FY 2012 and FY 2013 amounts include funding for RBS, which is in the Other Vetting PPA.</p>

Transportation Threat Assessment & Credentialing:
Other Vetting/Screening Administration and Operations
Program Performance Justification**
(Dollars in Thousands)

PPA: Other Vetting/Screening Administration and Operations

	Perm. Pos	FTE	Amount
2012 Revised Enacted	127	113	71,540
2014 Adjustments-to-Base	(2)	4	(18,121)
2014 Current Services	125	117	53,419
2014 Program Change	-	-	21,000
2014 Total Request	125	117	74,419
Total Change 2012 to 2014	(2)	4	2,879

TSA requests \$74.4 million for this activity. The adjustments-to-base (ATBs) include a net decrease of 2 FTP/2 FTE and \$0.445 million for transfers to the Aviation Security and Transportation Security Support appropriations; an increase of 8 FTE to adjust from FY 2012 actuals to enacted levels; an increase of \$0.132 million for Pay COLA, a decrease of \$10 million for a one-time realignment to Risk-Based Security; and a decrease of 2 FTE and \$7.8 million for efficiencies. TSA requests a total net program increase of \$21 million for the Technology Infrastructure Modernization (TIM) program. TSA estimates initial operating capability (IOC) in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA will provide funding for the administrative and operational needs of the following activities:

	FY 2012	FY 2014
Aviation Workers	\$ 5.5	\$ 4.6
Crew Vetting Program	4.1	2.9
Other Aviation Vetting Programs	0.4	0.3
Administration and Operations	23.7	17.9
Technology Infrastructure Modernization (TIM)	27.8	48.7
Total	\$ 61.5	\$ 74.4

*For comparison purposes, the FY 2012 amount in the above chart does not include the RBS funding of \$10 million, which is being realigned to Secure Flight in FY 2014.

The numerous small vetting programs included in the Other Vetting PPA are in operations and maintenance mode and will continue to vet the various populations each fiscal year.

Since inception of each of these programs, over 126 million names have been vetted:

Total Names Vetted Since Program Inception (as of December 30, 2012)	
Program	Population Vetted
12/5 Standard Security Program	112,989
Airspace waivers	799,814
Crew Vetting*	117,240,923
DCA Access Program	64,786
Maryland Three	5,989
Private Charter	3,653
Aviation Workers & SIDA Badges	8,179,279
Total	126,407,433

*Air crews are vetted prior to each flight.

Aviation Workers (AW) Program (including SIDA and other badge holders) (\$4.6M): The AW Program includes those individuals who apply for, or are issued personnel identification media at U.S. federalized domestic airports. Prior to receiving any identification media, aviation workers must undergo a successful name-based Security Threat Assessment (STA), and if applicable, a fingerprint-based Federal Bureau of Investigations (FBI) Criminal History Records Check (CHRC). The Aviation Channeling Service Provider (ACSP) Request for Proposal was released in November 2010, which offers airport stakeholders a choice in selecting an aviation worker enrollment provider. Implementation of ACSP also provides TSA a system of record capability for these aviation related applicants. The program reviews approximately 450,000 aviation workers annually.

Crew Vetting Program (CVP) (\$2.9M): CVP screens flight crewmembers on flights into, out of or over the continental United States prior to an airport's release of an aircraft for takeoff. Flight crewmembers undergo a name-based STA to determine if they have a terrorist nexus and, if so, TSA would notify the air carrier that the individual cannot have access to United States airspace. The program reviews approximately 14 million flight crewmembers annually.

Other Aviation Vetting Programs (\$0.3M): Other Aviation Vetting Programs includes DCA Access Standard Security Program (DASSP); Private Charter Standard Security Program (PCSSP); 12/5; Maryland Three Airports Program, and Airspace Waivers Program. These programs all require a name-based STA. Some also require a fingerprint based CHRC. Since inception, TSA has vetted approximately 987,231 records for the Other Aviation Vetting Programs.

Administration and Operations (A&O) (\$17.9M): This account includes the general administrative expenses for the TTAC appropriation to include the common biometric identity initiative (formerly

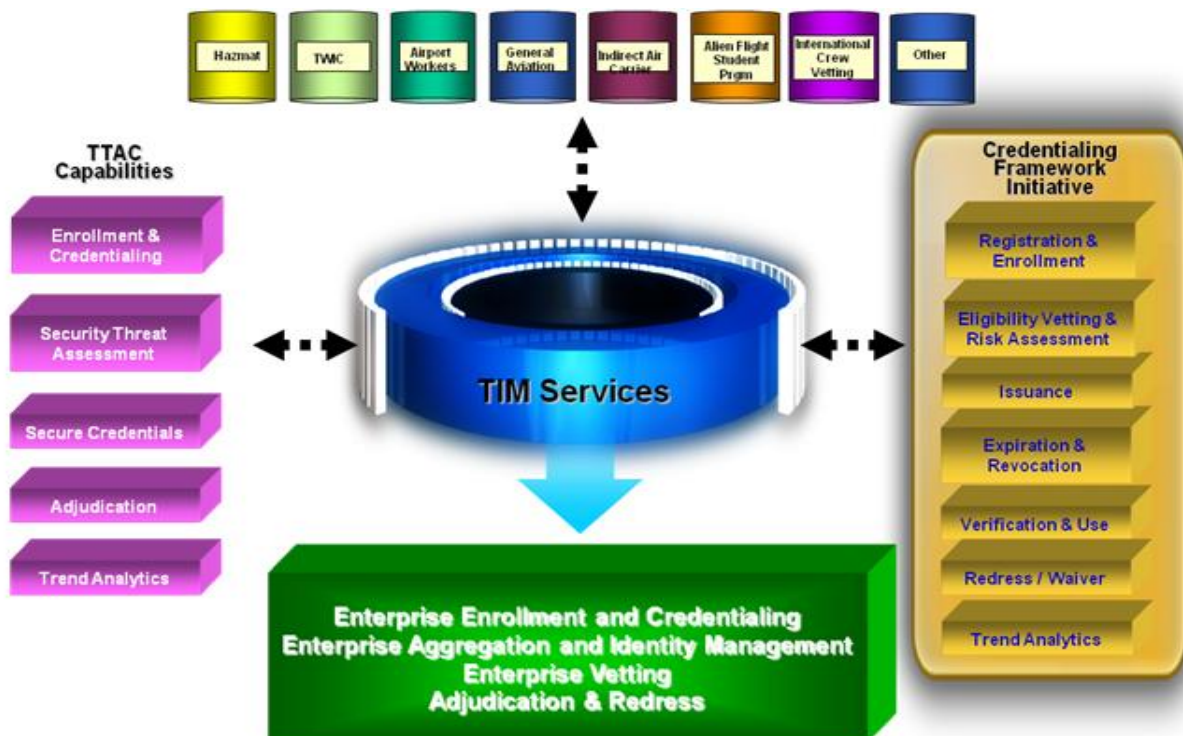

under the Aviation Credential Interoperability Solution sub-group). It also includes all payroll costs for the Other Vetting PPA, except for TIM, which is funded within the TIM managing unit.

The Other Vetting PPA also provides funding for crew members, general aviation flight crews, and FAA airman certificate holders who use the Transportation Vetting System (TVS), which conducts name-based biographic data matching (vetting) on individuals with access to transportation related infrastructure to ensure they do not pose a threat to transportation or national security. These populations will move from the TVS to the TIM program once TIM reaches Full Operating Capability (FOC).

Technology Infrastructure Modernization (TIM) (\$48.7M): The modernization initiative in concert with a universal fee will address and eliminate subsequent IT investments, redundant business practices and processes to achieve significant economies of scale and other benefits associated with a unifying business integration effort.

As the following diagram shows, once fully developed, TIM will:

- Combine functions and processes into a single, uniform, person centric approach with common security requirements, methods, and information; and
- Enable policy, business, systems and data integration and drive the development of person-centric information architecture in accordance with the DHS Credentialing Framework Initiative.

In turn, this will:

- Reduce the cost, risk, and time associated with implementing new business capabilities and new populations, while improving the robust nature of the architecture and on-going operations and maintenance services; and
- Eliminate redundant background checks (allowing interoperability) by working in tandem with TSA's Universal Rule initiative.
Allow TSA to collect additional fees by vetting populations the current systems cannot handle.

TIM will also provide the following new mission capabilities that will be available to support emerging vetting and credentialing population requirements:

- Partner Portal Services- a web portal for applicants to provide the required bio-graphic and biometric information in order to directly process enrollment requests and share status information;
- 3rd Party/External System Interface Management Services – a system-to-system interface with the US-VISIT Automated Biometric Fingerprint Identification System (IDENT);
- Integrated Customer Relationship Management Services – enables improved security threat assessment workflow and more responsive customer service;
- Enterprise Service Management – supports the transformation of the new and legacy system components, reusing existing infrastructure elements to the extent possible, to establish enterprise level services. TSA will standardize the system(s) across screening and credentialing programs into a single, holistic set of Service Oriented Architecture (SOA) based capabilities to meet current mission demands and to expand future mission needs. The SOA that TIM is developing will allow for sharing of infrastructure services as well as mission services across the DHS enterprise; and
- Enterprise Performance Reporting Management Service -provides monitoring and performance management capability to support end-to-end applicant processing.

An Analysis of Alternatives was completed in March 2011 to consider various approaches for building the system. TSA selected the most viable option and updated the life cycle cost estimates (LCCE) to reflect lower cost estimates and 10 years of cost beyond FOC, which is scheduled for 2nd Quarter FY 2016; the previous LCCE only went two years beyond FOC. TIM is considered a significant DHS IT program with a forecast LCCE of \$631.2 million through 2025 to be funded through fees and appropriations. The TIM design and development contract was awarded in August 2012 with the first Task Order to achieve IOC within an 18 month period of performance (2nd quarter FY 2014). The Maritime population, served via the TWIC program, will migrate to TIM first. Additional populations will migrate to TIM within 24 months after IOC and the program will achieve FOC in the 2nd Qtr FY 2016.

In concurrence with this modernization effort, TSA is working toward the implementation of a common universal fee structure that will capitalize on the capabilities of an improved vetting infrastructure. The new Standardized Vetting, Adjudication and Redress Rule (SVAR) framework (formerly called the Universal Rule) will establish comparable security threat assessment services for vetting activities with a common fee structure. The fee will vary across populations depending on security threat assessment requirements. Program transition to the SVAR will begin with a focus on

new applicants and continue based on an implementation schedule. It is anticipated that new fees will be collected for the maritime population at the TIM IOC.

The modernized platform could be utilized prior to the rule’s effective date, to process threat assessments for previously established vetting programs that utilize the existing fee structures outlined in original rulemakings. However, this rulemaking effort requires the modernized capabilities of TIM to be 100 percent functional or the rule’s effective date will be delayed as well as security vetting for newly regulated populations, such as freight rail and mass transit populations will be delayed.

TSA’s vetting modernization is being coordinated with the Department’s other ongoing information technology modernization efforts and will interact with numerous other systems such as: Treasury Enforcement Communication System, U.S. Citizens and Immigration’s Systematic Alien Verification for Entitlements, U.S. VISIT’s Automated Biometric Fingerprint Identification System, and the FBI’s Criminal Justice Information System.

TIM Vetting Population Sizes (FY 2014 - FY 2018)	
Alien Flight Students	92,000
Aviation & Airports	5,681,000
Cargo	673,000
FAA Certificate Holders	1,863,000
Freight Railroads	201,000
Highways	1,512,000
Maritime	1,926,000
Public Transportation Agencies & Passenger Railroads	345,000
Sensitive Security Information	1,000

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
\$27,800	\$27,800	\$48,713
Technology Infrastructure Modernization	The Technology Infrastructure Modernization (TIM) Program will reduce the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a person-centric system; this will eliminate exploitable gaps, improve enrollment and threat assessment methodologies, and enable TSA to vet and provide credentials to more transportation populations. The TIM System will provide an integrated, end-to-end solution to manage identities, credentials, and assessment results for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM will provide a service oriented architecture framework, mission services, and service capabilities. The IOC is anticipated in	

March 2014 with FOC anticipated in March 2016. TIM will have 1) data center cloud services for the development, test, preproduction, and production environments, and 2) possible SOA business services from DHS components.

As a development program, TIM has no performance measures, but does have five major program milestones, to ensure the program stays on target. These milestones consist of the initial operating capability, transition of the Maritime populations to the TIM system, transition of the Surface populations to the TIM system, transition of the Aviation populations to the TIM system, and full operating capability of the TIM system.

The purpose of this program is to deliver a unified and scalable enterprise architecture to improve vetting and credentialing services to current and future TSA screening populations. The program will reduce the cost, risk, and time associated with implementing new business capabilities, on-boarding new populations, eliminate redundant background checks by working in tandem with TSA's Standardized Vetting, Adjudication and Redress Rule initiative, providing for quicker and more accurate security threat assessments to deter and disrupt terrorist activity.

Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Transportation Worker Identification Credential (TWIC) - offsetting fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Transportation Worker Identification Credential (TWIC) - offsetting fee

	Perm. Pos	FTE	Amount
2012 Revised Enacted	21	22	32,163
2014 Adjustments-to-Base	-	(1)	4,537
2014 Current Services	21	21	36,700
2014 Total Request	21	21	36,700
Total Change 2012 to 2014	-	(1)	4,537

The Transportation Security Administration estimates fee collections of \$36.7 million for the TWIC Program. FY 2012 Revised Enacted amounts reflect actual FTE and collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels that are regulated under the Maritime Transportation Security Act of 2002 (MTSA). The program provides a common, consistent biometric credential at over 2,700 facilities and on over 12,000 vessels. When fully implemented by the U.S. Coast Guard (USCG) after the promulgation of the TWIC reader rule, the program will require biometric verification of identity by facility and vessel operators as required by the rule. Prior to issuing a TWIC the program ensures the identity of each TWIC holder has been verified; a satisfactory security background check has been completed on that identity; and each credential issued is positively linked to the rightful holder through the use of biometric technology.

TWIC's personal identity verification standards and credential issuance closely align with those of Homeland Security Presidential Directive - 12 and its implementing standard, Federal Information Processing Standard 201-1. The program specifically follows biometric standards of the American National Standards Institute for its pattern-based fingerprint format operational biometric, and was the first to adopt common biometric standards in the Federal Government. TSA also works with the National Institute of Standards and Technology to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. In addition, TSA and USCG continue to work closely with the maritime, smart card, and reader industries and the TWIC Stakeholder Communications Committee.

The TWIC Program has established applicant fees to sufficiently recover the cost of providing this security service. The standard TWIC Fee is \$129.75 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that previously completed a comparable security threat assessment (STA). The card replacement fee is \$60.00. The final rule includes the ability to provide a discount for Free and Secure Trade (FAST) card holders, documented merchant mariners, and truckers with Hazardous Materials Endorsement (HME). In FY 2012, TWIC holders applying for a HME are able to pay a reduced fee in states that have elected to offer comparability between the HME and TWIC security threat assessments. This fulfills statutory requirements under the "Implementing Recommendations of the 9/11 Commission Act of 2007" (P. L. 110-53).

The credential is valid for five years. Starting August 31, 2012, the TWIC program began issuing Extended Expiration Date (EED) TWICs for eligible individuals. The EED TWICs will extend the STA and associated expiration date for three years at a cost of \$60.00 per TWIC. To be eligible to obtain an EED card a TWIC holder must be a U.S. citizen and have a valid card (i.e., not revoked) that expires on or before December 31, 2014. To obtain an EED card, eligible individuals must contact the TWIC Help Desk to initiate the process. Obtaining an EED card will only require one trip to an enrollment center of eligible TWIC holder's choosing to pick-up and activate the card. TWIC holders not wishing to use the EED card option, or those who are not eligible for the EED card option, may renew their expiring TWICs by completing a standard enrollment and paying the standard enrollment fee of \$129.75 to obtain a five-year TWIC.

The TWIC program will be transitioning from its existing enrollment contract, which only provides TWIC services, to a universal enrollment services (UES) contract, which will expand to include both TWIC and HME enrollment services. With the UES system, the existing enrollment centers will support both populations. As a result, the existing TWIC enrollment center footprint will expand its presence into every state.

In December 2012, the Coast Guard and Maritime Transportation Act 2012 was enacted, requiring that within 270 days the Secretary reform the TWIC enrollment and issuance process to require no more than one visit. TSA will implement OneVisit in 3 phases, with the first phase anticipated the 3rd quarter in FY 2013. Nationwide implementation will occur by the 3rd quarter of FY 2014, via TSA Technology Infrastructure Modernization (TIM) program with fully-automated card activation and mailing.

The following chart shows enrollment activity since the start of the TWIC program. The increase in applicants every five years is attributed to the five-year TWIC renewal cycle; however, that pattern should flatten as a result of the normal turnover of workers in the maritime industry. In FY 2012, TSA processed 308,193 TWIC applicants, 2,321 EED requests and has enrolled over 2.3 million workers as of January 2012.

In FY 2008, Congress provided \$8.1 million in two-year appropriated funding for TSA to implement an access control technology pilot to test biometric technologies within the TWIC program. The pilot concluded on May 31, 2011 having conducted various laboratory tests of readers and field tests at ports, facilities and vessel operations in the following locations: New York/New Jersey; Annapolis, MD; New Orleans, LA; Vicksburg, MS; Brownsville, TX; and, Los Angeles and Long Beach, CA. The final report was delivered to Congress on February 27, 2012.

Prior to promulgating the TWIC reader rule, to fully leverage the security benefit of the TWIC, the USCG has authorized the use of TWIC readers in place of the current requirement to visually inspect the card prior to allowing access to secure areas. Additionally, the USCG is currently verifying compliance with the TWIC requirements through electronic validation during vessel and facility compliance exams and/or security spot checks. Through the use of approximately 250 handheld readers for TWIC verification, the USCG is maximizing the use of the security features of the credential.

In FY 2013, the TIM program will begin building the framework to transition TWIC to the TIM system in FY 2014. The fee structure will fall under the Standardized Vetting Adjudication and Redress Rule framework upon publication of the rule.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands) \$29,032	FY 2013 Activity Funding (\$thousands) \$43,717	FY 2014 Activity Request (\$thousands) \$34,170
<p>Transportation Worker Identification Credential</p>	<p>The Transportation Worker Identification Credential (TWIC) program is mandated by the Maritime Transportation Security Act (MTSA) of 2002, which requires the Secretary to issue a “biometric transportation security card” to those requiring unescorted access to MTSA-regulated facilities after determining the individual does not pose a security risk. The SAFE Port Act of 2006 further requires program timelines and conducting an extensive pilot to evaluate TWIC reader performance and impacts on maritime business operations. The program began issuing credentials in October 2007, with a national compliance date of April 15, 2009; it is entirely funded through applicant fees. The beneficiaries of TWIC are: facility employees; longshoremen; U.S. mariners; long-haul and drayage truck drivers; and those needing unescorted access to secure areas of MTSA-regulated facilities. TWIC establishes a system-wide common secure biometric credential to help maritime operators in access control decisions.</p> <p>The following performance measures will be used to track performance against TSA's mission and goals:</p> <p>Customer Satisfaction: Increase the percentage of average customer satisfaction with the overall enrollment process. Number of customer surveys received that indicate the customer is satisfied with the overall process divided by the total number of customer surveys received. Customer Satisfaction is measured as the percent of customers per month who report they are Satisfied, Mostly Satisfied or Very Satisfied with their overall experience at the enrollment center.</p> <p>Enrollment Wait Time (EWT - 90th Percentile): Decrease the maximum wait time achieved for 90% of enrollees at established enrollment centers. TWIC EWT is the maximum amount of time an applicant, showing up at an established enrollment center, waits at the center prior to the start of processing by the Trusted Agent (TA).</p> <p>Average Enrollment Wait Time (EWT): Decrease the average enrollment wait time at established enrollment centers. TWIC EWT is the average amount of time an applicant, showing up at an established enrollment center, waits at the center prior to the start of processing by the Trusted Agent (TA).</p> <p>Fingerprints Rejected: Decrease the percentage of fingerprints rejected by FBI due to poor quality / erroneous processing.</p>	

	<p>Enrollment Center Availability: Maintain the percentage of enrollment centers open and operational.</p> <p>Enrollment Help Desk Response Time: Decrease the average period of time from when the caller's (Applicant's) call was picked up by the Customer Relationship Management (CRM) system to the time the caller made contact with the Help Desk Agent to report the issue (Time on hold, or "wait time" once the call was received by the Help Desk Hotline).</p> <p>The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA), (P.L. 107-295). The program ensures that the identity of each TWIC holder has been verified, that a satisfactory security background check has been completed on that identity, and that each credential issued is positively linked to the rightful holder through the use of biometric technology.</p>

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Hazardous Materials Endorsement Threat Assessment Program
Program Performance Justification**
(Dollars in Thousands)

PPA: Hazardous Materials Endorsement Threat Assessment Program

	Perm. Pos	FTE	Amount
2012 Revised Enacted	17	20	11,101
2014 Adjustments-to-Base		(3)	899
2014 Current Services	17	17	12,000
2014 Total Request	17	17	12,000
Total Change 2012 to 2014	-	(3)	899

The Transportation Security Administration estimates FY 2014 fee collections of \$12.0 million in the Hazardous Materials Endorsement Threat Assessment Program (HTAP). FY 2012 Revised Enacted amounts reflect actual FTE and collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HTAP was established to fulfill the statutory requirements of both the USA PATRIOT (P.L. 107-56) and Safe Explosives Acts (P.L. 107-296) to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

The program is funded through fee revenue that consists of three elements:

- 1) The cost for collecting and processing fingerprint and application information. This amount varies based on the state the applicant applies for an HME. For applicants applying in a state, which utilizes a TSA-contracted agent, this fee is \$38;
- 2) The \$14.50 fee the Federal Bureau of Investigation (FBI) charges to run fingerprint-based criminal history records checks; and
- 3) A Transportation Security Administration (TSA) program \$34 fee to cover costs to administer the program, including conducting the Security Threat Assessments (STAs).

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the STA process. Currently, 11 states collect the required biographic information and biometric data through their individually established and maintained programs while 39 states and the District of Columbia have elected to utilize the TSA-contracted agent. Additionally,

drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has a robust redress process, including appeals, waivers, and Administrative Law Judge review. The program conducted threat assessments on 293,921 applicants during FY 2012, a continued increase from the program's inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. HTAP has processed over 2.2 million applications since January 2005. Beginning in FY 2012, TWIC holders applying for a HME STA are able to pay a reduced fee in states that have elected to offer comparability between the TWIC and HME security threat assessment. This fulfills statutory requirements under the "Implementing Recommendations of the 9/11 Commission Act of 2007" (P. L. 110-53).

The HTAP will transition to the TIM system after initial operating capability and to the Standardized Vetting Adjudication and Redress Rule (SVAR) fee framework when the SVAR is published.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands) \$8,515	FY 2013 Activity Funding (\$thousands) \$9,040	FY 2014 Activity Request (\$thousands) \$9,910
<p>Hazardous Materials Endorsement Threat Assessment Program</p>	<p>Hazardous Materials Endorsement Threat Assessment Program (HTAP) meets the USA PATRIOT Act, which prohibits states from issuing a license to an individual who transports hazardous materials (Hazmat) in commerce without determining if the person is a security risk. The Act requires checks be conducted against criminal history, immigration, & international databases. HTAP meets this mandate by conducting an security threat assessment (STA) on drivers applying to obtain, renew, or transfer a hazardous materials endorsement (HME) on state-issued Commercial Driver's License. HTAP leverages existing criminal history, legal status & intelligence data to perform an STA on commercial truck drivers who transport Hazmat to determine the threat status to transportation security. STAs utilize national data sources and consistent vetting standards which are universally applied to applicants seeking an HME. HTAP is a key component of the DHS/TSA layered management approach to transportation security.</p> <p>The following performance measures will be used to track performance against TSA's mission and goals:</p> <p>Appeal processing time: Days to complete an appeal, expressed as average of all appeal processing time. Calculated as average number of days elapsed from system receipt until appeal completed.</p> <p>Cost per applicant to perform Security Threat Assessment remains within acceptable levels to support program operations and IT investments. Calculate obligations, expenses, commitments necessary for sustainment to set acceptable fee level.</p>	

Application Processing Time: Percent of number of applications completed in 30 Days is expressed as calculation of System Date application completed Minus System Date Applications Received = Number of Days Processing Time. $\text{Sum of Applications with Processing Time} = < 30 \text{ days} / \text{Sum of All Applications Completed} * 100$.

Reject Rate: Percent of unacceptable fingerprints submitted per month, expressed as a proportion of fingerprints that are contractually obligated to be acceptable per month. Calculated as: $\text{Total Fingerprints submitted to FBI per month} / \text{number of reject error messages for poor quality per month} * 100$

Operational Availability: Percent HAZPRINTS System is available per month, expressed as a proportion of hours the system is contractually obligated to be available per month. Calculated as: $\text{Available Hours per Month} / \text{Obligated Hours per Month} * 100$.

Waiver Processing Time: Days to complete a waiver, expressed as average of all waiver processing time. Calculated as average number of days elapsed from system receipt until waiver completed.

Quality Assurance: Number of quality assurance/second tier review completed expressed in reference to a predetermined acceptable number of second tier reviews. Calculated as: $\text{Total number of cases with "green" status per month} / 3\%$

Number of people applying for a Hazmat Security Threat Assessment to decrease vulnerabilities of the transportation system. Calculated as number of complete application received.

Enrollment Availability: Percent System is Available per month, expressed as a proportion of hours the system is contractually obligated to be available per month. Calculated as: $\text{Available Hours per Month} / \text{Obligated Hours per month} * 100$

State Portal Availability: Percent State Portal is available per month, expressed as a proportion of hours the state portal is contractually obligated to be available per month. Calculated as: $\text{Available Hours per Month} / \text{Obligated Hours per month} * 100$

The HTAP is a key component of the DHS/TSA layered approach to transportation security. The program was established to fulfill the statutory requirements of both the USA PATRIOT and Safe Explosives Acts to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
General Aviation-Offsetting Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: General Aviation-Offsetting Fee

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	320
2014 Adjustments-to-Base	-	-	30
2014 Current Services	-	-	350
2014 Total Request	-	-	350
Total Change 2012 to 2014	-	-	30

The Transportation Security Administration (TSA) estimates \$350,000 in FY 2014 fee collection authority to support General Aviation security threat assessment (STA) vetting and program management activities. FY 2012 Revised Enacted amounts reflect actual collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

This offsetting collection supports General Aviation flights into Ronald Reagan National Airport (DCA) as provided by the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). The DCA Access Standard Security Program (DASSP) conducts name-based STAs for all flight crewmembers and passengers including security coordinators and armed security officers on non-commercial aircraft (non-cargo) flying into or out of DCA from one of the 28 domestic gateway airports. TSA levies a \$15 fee for each person onboard the flight, a \$490 fee for training of armed security officers, and a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. TSA vetted over 17,675 General Aviation - DCA passenger and crew in FY 2012 and has vetted over 64,786 General Aviation – DCA passengers and crew in the DASSP since inception in October 2005. This program will transition to the TIM system after initial operating capability and to the Standardized Vetting Adjudication and Redress Rule (SVAR) fee framework when the SVAR is published.

**Department of Homeland Security

Transportation Threat Assessment & Credentialing:
Air Cargo - Fee
Program Performance Justification
(Dollars in Thousands)**

PPA: Air Cargo - Fee

	Perm. Pos	FTE	Amount
2012 Revised Enacted	9	-	1,164
2014 Adjustments-to-Base	2	8	4,236
2014 Current Services	11	8	5,400
2014 Total Request	11	8	5,400
Total Change 2012 to 2014	2	8	4,236

In FY 2013 and beyond, the Air Cargo - Fee includes the Indirect Air Cargo (IAC) and Certified Cargo Screening Program (CCSP) fees. Both are included in the FY 2012 enacted number for display purposes. Transportation Security Administration (TSA) estimates \$5.4 million in FY 2014 fee collection authority to support the Air Cargo (AC) program, which includes IAC and CCSP. FY 2012 Revised Enacted amounts reflect actual FTE and collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The AC program provides for fee collections supporting security threat assessments (STA) of air cargo workers in the air cargo supply chain, including individuals authorized to screen cargo at designated cargo screening facilities. In FY 2014, TSA will charge a \$41 per assessment fee to offset costs for conducting the STA and program management costs. The fee cost and population estimates analysis conducted in support of the Air Cargo Screening Final Rule, which was published in August 2011. The final fee structure was published in May 2012, with a \$41 fee effective June 22, 2012. Prior to June 22, 2012, this program was funded through the Aviation Security Appropriation and there were no STA fees for applicants; but, is now entirely funded through fees.

The total FY 2014 fee collections are estimated to be \$5.4 million. In FY 2012, TSA processed over 136,000 IAC applicants and more than 6,300 CCSP applicants. Since inception, TSA has vetted over 585,175 IAC applicants and 38,350 CCSP applicants. The FY 2014 collection estimate is based on 131,000 applicants at a fee of \$41. This program will transition to the TIM system and the Standardized Vetting Adjudication and Redress Rule (SVAR) fee framework when the system is completed and the SVAR is published.

Total Change 2012 to 2014	-	-	500

The Commercial Aviation and Airport Fee program was previously known as the Secure Identification Display Area (SIDA) Fee. The Transportation Security Administration estimates \$6.5 million in FY 2014 fee collection authority to support the SIDA and Aviation Workers (AW) airport employee checks through the Commercial Aviation and Airport Fee program. FY 2012 Revised Enacted amounts reflect actual FTE and collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Commercial Aviation and Airport Fee program, previously named the SIDA PPA, includes those individuals who apply for, or are issued, personnel identification media at U.S. domestic airports (e.g., airport facilities workers, retail employees, airline employees, taxi drivers, parking attendants, etc.). Prior to receiving any identification media, aviation workers must undergo a successful name-based security threat assessment (STA), which is currently funded through the Other Vetting PPA. This population will eventually be covered under the Standardized Vetting, Adjudication and Redress Rule (formerly known as the Universal Rule). Depending on the access level granted to the airport worker, the individual may also be required to have a fingerprint based Federal Bureau of Investigation Criminal History Record Check (CHRC), which is the fee reflected in the chart above. Total current badged Aviation Worker population is currently 2.2 million with approximately 450,000 new applicants per year. The FY 2014 estimate is based on approximately 448,000 new applicants with a CHRC fee of \$14.50 per applicant.

In FY 2012 the Aviation Channeling Services Provider initiative expanded to provide airports and aircraft operators a choice from among three TSA Designated Aviation Channelers (DACs). Additionally, the program also process STAs for the general aviation population.

Total Change 2012 to 2014	-	-	21

In FY 2013 and beyond, Other Security Threat Assessments (OSTA) fees include the Large Aircraft Security Program (LASP) and Sensitive Security Information (SSI) fees. For display purposes OSTA includes these fees. The Transportation Security Administration estimates \$50,000 in FY 2014 fee collection authority to support OSTA. FY 2012 Revised Enacted amounts reflect actual collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The OSTA fees fund the 12/5, Private Charter Standard Security Program (PCSSP), Maryland-Three (MD-3), Airspace Waivers (ASW), LASP and SSI. The fees collected by these programs support the costs for a fingerprint based FBI criminal history records check (CHRC). Populations under these programs also undergo a name-based security threat assessment (STA), which is currently funded through the Other Vetting PPA. These populations will eventually be covered under the Standardized Vetting, Adjudication and Redress Rule (formerly known as the Universal Rule).

The 12/5 program conducts an FBI CHRC for flight crewmembers operating (e.g., cockpit crew, airline personnel authorized in the cockpit, cargo carrier employees) aircraft with a maximum certificated takeoff weight of 12,500 pounds or more. Annual population for the 12/5 program is approximately 2,500 applicants. Each program conducts STAs for regulated parties.

The PCSSP program is for private charter flight crewmembers operating aircraft with a maximum certificated takeoff weight of 45,000kg (100,309 pounds) or more, or a passenger-seating configuration of 61 or more, or whose passengers are enplaned from or deplaned into a sterile area. PCSSP does not include government charters.

The MD-3 program applies to pilots who operate aircraft and apply for privileges to fly to or from the three General Aviation airports in the Washington, D.C. restricted flight zones (Potomac Airport,

Washington Executive/Hyde Field, and College Park Airport).

The ASW program, in conjunction with the Federal Aviation Administration, conducts FBI CHRCs for domestic and international flight crew members and passengers for access to: certain operational areas of Ronald Reagan Washington National Airport, access to restricted Washington, D.C. flight restricted zones, major sporting events, Disney theme parks, flight training, and special events.

The LASP program will provide for the fee collections to fund FBI CHRCs for the large aircraft security program. Vetting costs are currently supported by the Transportation Security Network Management General Aviation (GA). Fee collection will begin after the Notice of Proposed Rulemaking (NPRM) is approved and with the SVAR.

The original LASP NPRM included language to require all U.S. operators of aircraft over 12,500 maximum gross take-off weight (MTOW) to adopt and implement a TSA-approved security program. Subsequent to industry feedback and comments, TSA drafted a Supplemental Notice of Proposed Rulemaking (SNPRM) which is currently under review by Department of Homeland Security. The SNPRM modifies the MTOW threshold from 12,500 pounds to 30,000 pounds. Operators having an MTOW over 30,000 pounds will be required to adopt a TSA approved security program and the GA 30 Security Program, which will be similar to the current process for U.S. air carriers and commercial operators. The SNPRM also proposes that GA operators transporting persons or cargo for compensation/hire in an aircraft with an MTOW over 12,500 pounds adopt a 12/5 Security Program and a Private Charter/Compensation or Hire Security Program, as necessary, which will have specific requirements and checks for each population as determined by TSA. TSA will begin collecting a fee with the implementation of the Standardized Vetting and Adjudication Rule and the General Aviation Security Program SNPRM.

TSA is collecting the SSI fee to fund the FBI CHRC for those individuals who require access to SSI. The FY 2014 estimate is based on approximately 3,400 applicants with the FBI CHRC requirement at a fee of \$14.50.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Alien Flight School - mandatory fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Alien Flight School - mandatory fee

	Perm. Pos	FTE	Amount
2012 Revised Enacted	6	5	4,890
2014 Adjustments-to-Base	-	1	110
2014 Current Services	6	6	5,000
2014 Total Request	6	6	5,000
Total Change 2012 to 2014	-	1	110

The Transportation Security Administration estimates \$5.0 million in fee collection for the Alien Flight Student Program (AFSP). FY 2012 Revised Enacted amounts reflect actual FTE and collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

AFSP conducts terrorist, immigration and criminal-background checks on all foreign students applying for flight training in the United States or abroad at Federal Aviation Administration (FAA) certified flight training locations. Applicants are subject to a security threat assessment (STA) in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). AFSP applicants identified as a “threat to aviation or national security under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who pose a security threat. Prior to the September 11, 2001 attacks, there were no systematic security checks performed on non-U.S. citizens applying for FAA certified flight training in the United States or abroad.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function for screening AFSP applicants from the Attorney General to the Secretary of the Department of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the authority to establish a fee to offset costs of vetting AFSP applicants.

AFSP currently collects a fee of \$127.25 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$14.50 for a Federal Bureau of Investigation (FBI) Criminal History Record Check (CHRC). On May 13, 2009, AFSP also began collecting a fee

of \$70 per recurrent applicant. Fees collected for AFSP support the enrollment, vetting and adjudication of flight training applicants and program management support. AFSP applicants, who require training for a new skill set, will also be required to undergo a fingerprint based FBI CHRC. Operational since 2004, AFSP has processed more than 377,000 applications, including over 47,000 flight training fee applications in FY 2012. AFSP is entirely funded by fee revenue. This program will transition to the TIM system and the Standardized Vetting Adjudication and Redress Rule (SVAR) fee framework when the system is completed and the SVAR is published.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Large Aircraft & Charter Screening Program
PPA: Secure Flight
Program Increase: Positions 0, FTE 0, Dollars \$12,717

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							308	286	93,481
Program Increase							-	-	12,717
Total Request	332	239	92,414	332	314	92,980	308	286	106,198

Description of Item

The total cost of the Secure Flight/Large Aircraft & Charter Screening Program request is \$12.7 million. This request is consistent with the FY 2013 President's Request.

The 2004 Intelligence Reform and Terrorism Prevention Act (IRTPA) mandates that DHS make advanced passenger prescreening available to charter and lessors of aircraft greater than 12,500 pounds that fly into, out of, or within the United States. TSA is also promulgating the General Aviation Security Rule supporting these provisions of IRTPA as well as additional regulations for aircraft over 30,000 pounds. The rule is anticipated to be published in the first quarter of FY 2014.

Justification

Vetting passengers on large general aviation aircraft against the No-fly and Selectee lists adds a significant layer of security to stop terrorists from exploiting the general aviation system.

The additional Secure Flight watch list matching requirements necessitate increased IT systems capability. The requested funding increase will allow TSA to purchase the hardware and software necessary to meet these critical Secure Flight system watch list matching requirements for an anticipated 11 million additional passengers per year who will be covered adding a significant layer to TSA's aviation security operations. Expanding watch list matching to these new populations will

mitigate the risk to aviation passenger safety, by enabling TSA to better identify individuals who may present a threat to passenger air travel.

General Aviation aircraft over 12,500 pounds, which transport people or cargo for compensation/hire will be required to submit passenger data to Secure Flight for watch list matching. For general aviation aircraft over 30,000 pounds that transport people or cargo not for compensation/hire, Secure Flight will perform prescreening of passengers that are unknown to a Validated General Aviation Pilot (VGAP). For example, personal or corporate owned aircraft over 30,000 pounds that transport passengers will be subject to these requirements. Under the proposed rule, VGAP will be a voluntary program for general aviation pilots. These pilots will be subject to enhanced security review by TSA, which will allow the pilot to board passengers known to the pilot without watch list matching for those passengers. If the pilot is not a VGAP, Secure Flight will be required to watch list match all passengers.

This funding will also allow TSA to discontinue distributing the Watch List to the general aviation operators, greatly reducing the potential for unauthorized use and distribution.

Impact on Performance (Relationship of Increase to Strategic Goals)

This request will support TSA in meeting the IRTPA mandate, implement the General Aviation Security Rulemaking provisions, which require passenger watch list matching on large general aviation aircraft, and achieve 100 percent performance of vetting all air carrier passengers.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Technology Infrastructure Modernization
PPA: Other Vetting/Screening Administration and Operations
Program Increase: Positions 0, FTE 0, Dollars \$30,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							125	117	53,419
Program Increase							-	-	30,000
Total Request	127	113	71,540	127	121	71,978	125	117	83,419

Description of Item

The Technology Infrastructure Modernization (TIM) program requires a base restoration of \$30 million in FY 2014. This request is consistent with the FY 2013 President's Request.

Justification

The FY 2012 Enacted Budget reduced funding for the TIM program by \$30 million due to necessary revisions to the TIM development and implementation schedule. Consequently, this decrease in current services funding continued in FY 2013 and FY 2014. The program is currently on track to achieve planned milestones. With the award of the development contract in August 2012, the program will need the \$30 million reinstated to the program's base in order to complete the development and implementation of the TIM program. The modernization initiative addresses and eliminates subsequent IT investments, redundant business practices and processes to achieve significant economies of scale and other benefits associated with a unifying business integration effort.

Impact on Performance (Relationship of Increase to Strategic Goals)

If funding is not received, the TIM program will be delayed, and TSA will have to continue to use the eight individual stove-pipe systems to process enrollment, vetting, adjudication and redress functions. Delaying the TIM program will also delay the use of the Standardized Vetting, Adjudication and Redress Rule (SVAR), formerly known as the Universal Fee Rule, which is being developed to establish comparable security threat assessment service costs for vetting activities with a common fee structure. The use of the rulemaking requires the TIM to be 100 percent functional prior to implementation of the SVAR, expected to be published in FY 2016. As a result, cost avoidance in the TTAC appropriation would be delayed, since programs, such as Aviation Workers, would not be able to begin charging user-fees until SVAR is established.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Technology Infrastructure Modernization (TIM) Non-Recur
PPA: Other Vetting/Screening Administration and Operations
Program Decrease: Positions 0, FTE 0, Dollars \$(9,000)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							125	117	53,419
Program Decrease							-	-	(9,000)
Total Request	127	113	71,540	127	121	71,978	125	117	44,419

Description of Item

TSA will decrease the base budget of the Technology Infrastructure Modernization (TIM) program by \$9 million in FY 2014.

Justification

In FY 2014, the TIM program is scheduled to achieve Initial Operating Capability (IOC), with the transition of the Maritime population to the TIM system. The achievement of the IOC milestone in the TIM build process enables the TIM Program to decrease the budget by \$9 million. The modernization initiative, in concert with a universal fee effort, addresses and eliminates subsequent IT investments, redundant business practices and processes to achieve significant economies of scale, and other benefits associated with a unifying business integration effort.

Impact on Performance (Relationship of Increase to Strategic Goals)

With the award of the development contract in August 2012, and the requested reinstatement of the \$30 million to TIM in FY 2013, the TIM program will achieve IOC in FY 2014. Decreasing funding by \$9 million in FY 2014 will have no impact on strategic goals. The TIM efforts will remain on track to be 100 percent functional prior to implementation of the Standardized Vetting, Adjudication and Redress Services (formerly known as the Universal Rule).

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration for the development and implementation of [screening programs of the Office of Transportation Threat Assessment and Credentialing] *vetting and credentialing activities*¹, [\$192,631,000]~~\$180,617,000~~², to remain available until September 30, [2014]~~2015~~³. Secure Flight Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	30,853	29,610	28,211	(2,642)
11.5 Other personnel compensation	600	1,247	925	325
11.7 Military personnel/Awards	300	309	315	15
12.1 Benefits	7,946	8,776	7,325	(621)
Total, Salaries & Benefits	\$39,699	\$39,942	\$36,776	(\$2,923)

The FY 2014 request reflects the Salary and Benefits for 286 FTE. It includes a decrease of 24 FTP/23 FTE and \$2.5 million for a transfer to the Transportation Security Support appropriation; an increase of \$279 thousand for Pay COLA, and an increase of 33 FTE for the balanced workforce conversion.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$175	\$200	\$165	(\$10)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes travel needs for the Secure Flight Program, a decrease from FY 2012 of \$10 thousand.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$5	\$7	\$5	-

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2014 request reflects transportation needs for the Secure Flight Program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$4,000	\$4,966	\$4,000	-

Rent includes all payments to a GSA managed source for rental space, land, and structures. The FY 2014 request reflects the needs for the Secure Flight Program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$500	\$100	\$500	-

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the Secure Flight platform.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	-	\$1	-	-

Printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$29,500	\$20,798	\$29,745	\$245

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations. The FY 2014 request reflects the needs for the Secure Flight Program, including Risk Based Screening and the implementation of the Large Aircraft & Private Charter Passenger Screening Program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$1,895	\$9	\$5	(\$1,890)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. The FY 2014 request reflects the needs for the Secure Flight Program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	-	\$30	-	-

Purchases from government accounts includes purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$3,500	\$1,067	\$3,500	-

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$1,000	\$3	\$5,300	\$4,300

Provides for the operation and maintenance of equipment used to support the Secure Flight program. The FY 2014 request reflects Risk Based Screening and the implementation of the Large Aircraft & Private Charter Passenger Screening Program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$200	\$78	\$190	(\$10)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$11,940	\$25,779	\$26,012	\$14,072

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2014 request reflects Risk Based Security and the implementation of the Large Aircraft & Private Charter Passenger Screening Program.

Other Vetting/Screening Administration and Operations Mission Statement

The mission of Other Vetting is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	13,219	13,270	12,656	(563)
11.3 Other than full-time permanent	-	100	100	100
11.5 Other personnel compensation	665	625	574	(91)
11.7 Military personnel/Awards	225	225	225	-
12.1 Benefits	3,948	3,948	3,855	(93)
Total, Salaries & Benefits	\$18,057	\$18,168	\$17,410	(\$647)

The FY 2014 request reflects the Salary and Benefits for 117 FTE. It includes a net decrease of 2 FTP/2 FTE and \$445 thousand for transfers to the Aviation Security and Transportation Security Support appropriations; an increase of \$132 thousand for Pay COLA, and an increase of 4 FTE from FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$235	\$235	\$189	(\$46)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes travel needs for the Other Vetting Programs, a decrease from FY 2012 of \$46 thousand.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$28,800	\$29,045	\$32,310	\$3,510

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in systems operations. These contracts will support TIM, SIDA, 12/5 Charter Pilots, MD-3 Airports and the Temporary Flight Restriction programs. The increase more appropriately aligns the cost of other contractual services for the TIM infrastructure project.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$120	\$120	\$100	(\$20)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$12,448	\$12,530	\$12,530	\$82

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request reflects equipment needs.

Transportation Worker Identification Credential (TWIC) - offsetting fee Mission Statement

The mission of the TWIC Program is to establish an integrated, credential-based, identity verification program through the use of biometric technology to grant workers unescorted access to secure areas within the nation's transportation system

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	2,232	2,232	2,207	(25)
11.5 Other personnel compensation	3	3	28	25
11.7 Military personnel/Awards	20	20	-	(20)
12.1 Benefits	560	560	580	20
Total, Salaries & Benefits	\$2,815	\$2,815	\$2,815	-

The FY 2014 request reflects the Salary and Benefits for 21 FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$40	\$150	\$100	\$60

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with maritime port operators and other TWIC program stakeholders. The increase is to more appropriately align the estimates with the actual cost of travel.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$100	\$200	\$200	\$100

Transportation of things includes all costs of the care of such things while in process of being transported and other services incidental to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$16,000	\$20,834	\$10,560	(\$5,440)

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the TWIC program. The decrease is to more appropriately align the estimates with the actual cost of Advisory & Assistance Services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$5,000	\$7,500	\$7,500	\$2,500

Purchases from government accounts includes purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 increase is to more appropriately align the estimates with actual costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$3,000	\$7,775	\$7,500	\$4,500

Supports the operation and maintenance of information technology systems used for the TWIC program. The FY 2014 request reflects a better alignment in O&M costs. The increase is to more appropriately align the estimates with the actual cost of Operation and Maintenance of Equipment.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$5,196	\$8,013	\$8,013	\$2,817

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request reflects equipment needs.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Transportation Security Support

I. Appropriation Overview

A. Mission Statement for Transportation Security Support:

The Transportation Security Administration (TSA) is an agency of more than 55,000 FTE with approximately \$7.4 billion in budget authority, regulatory and law enforcement authorities, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in the Washington, D.C. metropolitan area and five Mission Support Centers (MSCs).

B. Budget Activities:

Intelligence -- The Office of Intelligence and Analysis (OIA) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. TSA-OIA also conducts strategic operational and tactical risk-based security planning.

HQ Administration -- Headquarters (HQ) Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthy work environment for employees.

Human Capital Services -- Human Capital Services (HCS) includes all services that support the recruitment, assessment, servicing, payroll, and career development of TSA's employees at headquarters, field offices, airports, and other locations.

Information Technology -- Information Technology (IT) provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support headquarters and field corporate applications.

C. Budget Request Summary:

The Transportation Security Administration requests 2,157 positions, 2,001 FTE, and \$997,789,000 in appropriated funding for Transportation Security Support in FY 2014. The total adjustments-to-base (ATB) include an increase of 179 FTP, 365 FTE to adjust for Actuals, and reduction of \$30,824,000. Included in the total ATBs is a transfer of 51 FTP/49 FTE and \$45.9 million from the FAMS appropriation as part of the headquarters restructuring to consolidate like functions. These realignments only impact the FAMS support functions and not the front-line operational FAMS. This request also includes a program decrease of 5 FTP, 5 FTE, and \$3,313,000 for the Federal Air Marshals program reduction.

D: Efficiencies

TSA's budget includes a projected \$52.6 million in efficiencies expected in specific object classes from FY 2010 through FY 2014 as described below.

Mission Support Personnel Reduction Efficiencies **\$8.413 million**

TSA expects to achieve savings in personnel from centralization of like functions (i.e., IT, acquisition, real estate, etc.) and has realigned staff to in FY 2012 to more efficiently and perform these functions. TSA also expects to achieve efficiencies from reducing overtime costs.

Printing & Reproduction Efficiencies **\$0.014 million**

TSA anticipates savings from utilizing electronic media and placing more documents on the Internet/Intranet to save printing and reproduction costs. Staff will also utilize electronic media to conduct briefings which will reduce printing costs.

Supplies & Materials Efficiencies **\$0.540 million**

TSA anticipates savings associated with use of electronic media, which will significantly reduce the need for paper, toner, binders, folders, etc. to print materials for briefings. Additionally, TSA will limit the publication and printing of hard copy documents and prescribe that information should be provided in an electronic form, whenever applicable.

Travel Efficiencies **\$2.474 million**

TSA will reduce all non-essential travel by 50 percent across all programs as applicable. To ensure efficient travel spending, TSA will employ strategic alternatives to Government travel, including local or technological alternatives, such as teleconferencing and video conferencing. Additionally, TSA will make all appropriate efforts to conduct business and host or sponsor conferences in space controlled by the Federal Government, wherever practicable and cost effective.

Transportation of Things Efficiencies **\$0.082 million**

TSA plans to seek ways to reduce postal and freight charges by pursuing more cost efficient transport of equipment.

Advisory & Assistance Contracts Efficiencies **\$15.625 million**

As part of a DHS-wide effort, TSA will reduce the number of advisory and assistance contracts.

Other Efficiencies **\$25.461 million**

In addition to the above efficiencies, TSA will also implement other efficiencies and management adjustments to achieve savings from reductions in non-advisory contractual services.

2014 Total Request	266	246	44,809
Total Change 2012 to 2014	24	53	1,817

TSA requests \$44.8 million for Intelligence. The adjustments-to-base (ATBs) include: an increase of 24 FTP/23 FTE and \$2.5 million transfer from the Transportation Threat Assessment & Credentialing (TTAC) appropriation; an increase of \$248,000 for pay COLA, an increase of 35 FTE to adjust for Actual FTE and a decrease of 3 FTE for budget reductions, and a decrease of 2 FTE and \$719,000 for efficiencies, which includes \$174,000 as part of the headquarters restructuring to consolidate like functions.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Intelligence and Analysis (OIA) provides TSA with the capability to review, synthesize, and analyze transportation specific intelligence in addition to providing comprehensive and cogent analytic products. It is the only Federal intelligence entity focused solely on the transportation sector. OIA coordinates closely and shares information with the Department of Homeland Security Office of Intelligence & Analysis, the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office assigns Field Intelligence Officers (FIOs) at key transportation nodes and places liaison officers at key IC and law enforcement agencies.

OIA is critical to TSA's overall risk-based security strategy and the intelligence products generated provide the threat framework utilized to prioritize security resources. These products are regularly used by TSA senior leadership, the Federal Security Directors, the Federal Air Marshal Service, and the transportation industry to guide decisions. OIA operates and maintains 24/7 intelligence capabilities at TSA Headquarters and the TSA Freedom Center to disseminate warnings and notifications of credible and immediate threats. OIA also assists in coordinating domestic and

international civil aviation and other modal security intelligence activities with other government agencies.

To perform its mission, OIA provides and maintains Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, state and local law enforcement, field sites, and industry partners. TSA Intelligence Managed Network (TINMAN) supports the Headquarters, Annapolis Junction, and Colorado Springs Operation Center locations. The TSA Remote Access to Classified Enclaves (TRACE) solution provides secure access to classified and unclassified threat information in a timely manner to remote locations. The Crisis Management System is a classified voice, video, and data system that is maintained and certified by Defense Information Systems Agency (DISA) and utilized for classified connectivity to the Intelligence community during national crisis' and special events.

2014 Program Change	(2)	(2)	(222)
2014 Total Request	1,306	1,207	284,942
Total Change 2012 to 2014	50	160	(7,392)

TSA requests \$284.9 million for Headquarters Administration. The adjustments-to-base (ATBs) include: an increase of 53 FTP/52 FTE for Balanced Workforce Strategy Follow-On from contract conversions, a net reduction of 8 FTP/7 FTE and a net increase of \$4.1 million for transfers between Transportation Security Support appropriation and the Aviation Security, Surface Transportation Security, Transportation Threat Assessment and Credentialing, and Federal Air Marshal Service appropriations; an increase of 7 FTP/ 7 FTE and \$1.3 million for reprogrammings. The ATBs also include an increase of \$1.3 million for FY 2014 pay COLA; an increase of 125 FTE to adjust for Actual FTE and an increase of 7 FTE and \$50,000 for annualization of FY 2012 program increases; a decrease of 10 FTE and \$9.5 million for efficiencies; a decrease of \$2.6 million to annualize second year funding of support costs associated with staffing of initial 1,000 Advanced Imaging Technology Equipment; and a decrease of 12 FTE for adjustments. In addition, the request includes a decrease of 2 FTP/2 FTE and \$222,000 for the FAMS budget reduction.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components that make up this PPA.

(Dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Personnel	\$148.0	\$170.9
Leadership	4.5	3.4
Internal Management & Controls (IM&C)	80.0	56.6
Workforce Support	17.0	16.4
Facilities Management and Physical Security	42.8	37.6
Total	\$292.3	\$284.9

Headquarters (HQ) Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations.

Personnel: \$170.9 million in personnel costs are included in this PPA for the Offices of the Assistant Secretary and Deputy Assistant Secretary, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Professional Responsibility, Inspection, Chief Counsel, Finance and Administration (Chief Financial Officer (CFO) and Chief Administrative Officer (CAO)), Legislative Affairs, Acquisition, Civil Rights and Liberties, Ombudsman, and Traveler Engagement (CRLOTE), Security, Training and Workforce Engagement (TWE), and Strategic Communications and Public Affairs. The increase in personnel cost is a result of contract conversions and the TSA Headquarters Restructure which consolidated Headquarter functions that were previously in FAMS such as procurement, information technology services, communications, and equal employment opportunity investigations.

Leadership: \$3.4 million in operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners. Executive leadership offices include the Office of the Administrator, Deputy Administrator, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Legislative Affairs, and Strategic Communications and Public Affairs.

Internal Management and Controls (IM&C): \$56.6 million in operating expenses support the day-to-day management of a \$7.4 billion budget and over 55,000 FTE. Offices overseeing internal management and controls include: Professional Responsibility, Inspection, Acquisition, CFO, CAO, Chief Counsel, and Security. The Department of Homeland Security Working Capital Fund is funded under the IM&C which funds DHS-wide and government-wide activities such as Internal Control Audit, Flexible Spending Plan, HSPD-12, and Consolidated Subscription Services.

Workforce Support: \$16.4 million in operating expenses to ensure that the more than 55,000 FTE have an excellent working climate and a safe and healthful environment while performing TSA's mission through the following programs: injury prevention, accident investigation and reporting, investigation of safety and health complaints, radiation safety, and health facilities. In addition, these programs ensure fair and lawful treatment of employees and the public.

Facilities Management and Physical Security: \$37.6 million is needed for operating expenses managed by the CAO for facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the Mission Support Centers (MSCs). The Franconia Warehouse is used to stage TSA equipment prior to deployment, to store special purpose consumables, and to serve as temporary storage of property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across transportation modes.

PROGRAM OFFICES

Acquisition -- Executes contracts and other agreements for the supplies and services needed by TSA to accomplish its mission. This office provides subject matter expertise in the areas of acquisition, field office acquisition guidance, grants management, requirements development, and program management.

Chief Administrative Officer -- Develops and implements administrative services programs, policies, and functions to include the Occupational Safety Health and Environment (OSHE), Property Management, Field Real Estate Services, Building Management Services, and Information Management Programs. These programs provide the following services:

- OSHE ensures TSA is in compliance with Federal regulations, DHS policy, and TSA policy and guidance in the areas of safety, health, and environmental services;
- Property Management provides accountability of all personal property owned by TSA, manages the fleet and transportation program, transit benefits, and HQ parking;
- Field Real Estate Services provides facilities services for field workspace locations by managing office and airport space allocations, lease acquisitions, design, construction and renovation of leased space, and furniture acquisition;
- Building Management Services provide HQ building management and facilities support in the DC Metro region; and
- Information Management Programs manage official TSA Forms, the directives management coordination and internal communication process, and the records management scheduling and storage activities, including the vital records coordination with emergency preparedness officials.

Chief Counsel – Delivers legal services to all mission areas, components, and staff, covering all substantive legal areas applicable to TSA. These include a comprehensive and inclusive array of services from legal and policy development, ethics, negotiating and drafting international agreements, drafting and reviewing legislation, Congressional testimony, and regulations and rulemaking.

Chief Financial Officer – Obtains the necessary resources to support TSA's critical mission and ensures these resources are used efficiently by providing effective financial systems and robust internal funds controls. Provides planning guidance to align the TSA budget with DHS goals and objectives and provides performance guidance and assistance to ensure goals and objectives are executed.

Inspection – Ensures the integrity, efficiency, and effectiveness of TSA's workforce, operations, and programs through objective audits, covert testing, inspections, and criminal investigations.

Security – Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, and effectively determining the employment suitability of all TSA personnel, including contractors. Conducts assessments and reviews of TSA records to identify Sensitive Security Information (SSI) and, if necessary, redact SSI from those records relating to litigation, Freedom of Information Act, and other agency requests.

Civil Rights & Liberties, Ombudsman, and Traveler Engagement – Includes the following divisions:

- Civil Rights Division provides Equal Employment Opportunity (EEO) services including education, traditional counseling, mediation, and formal complaint investigation and assures compliance of TSA programs and activities under applicable civil rights laws, statues, Executive Orders and policies;
- Diversity and Inclusion Division identifies strategies and practices to promote a diverse and inclusive workforce and environment for all TSA employees and implements the Diversity and Inclusion Strategic Plan in conjunction with the activities of the Diversity Advisory Council;
- Disability and Multicultural Division assures compliance and performs outreach to ensure that TSA’s security screening policies, procedures and practices do not discriminate against travelers on the basis of disability, race, ethnicity, national origin, religion, or gender;
- Ombudsman Division provides neutral and confidential problem resolution services for TSA employees and the traveling public;
- Traveler Engagement Division includes the following offices:
 - TSA Contact Center is the central point of contact for the public obtain information on security procedures, file complaints, report lost, stolen or damaged items, and get information on programs and policies.
 - Freedom of Information Act (FOIA) responds to FOIA and Privacy Act requests and appeals from the public, Congress, and other government agencies.
 - Transportation Security Redress manages the DHS Traveler Redress Inquiry Program and provides a single portal for travelers seeking redress for adverse screening experiences and resolve Watch List misidentification issues; and
 - Privacy Office ensures that privacy awareness and compliance requirements are infused in all TSA programs, policies and procedures, particularly those associated with Risk Based Security and Secure Flight.

Strategic Communications and Public Affairs (OSCPA) – Oversees the communications, media relations, public liaison, speechwriting, and all Web communication initiatives including the TSA Blog and social media activities. Audiences include the public, the media, Congress, TSA employees, internal stakeholders, and foreign partners. OSCPAs aims to increase public understanding of security procedures and agency policies and to prepare the public to navigate security.

Office of Legislative Affairs (OLA) – Serves as TSA’s primary interface with Congress. OLA develops and advances TSA’s legislative agenda and priorities on Capitol Hill and prepares agency officials for appearances before Congress. In addition, OLA develops and implements a comprehensive, proactive legislative strategy to inform Congress of TSA’s activities through briefings, meetings, tours, and responses to Congressional inquiries.

Office of Professional Responsibility – Ensures fair and consistent disciplinary practice TSA-wide. This includes reviewing and adjudicating allegations of misconduct for senior level and law enforcement employees, tracking and oversight of misconduct cases, and adjudicating appeals of adverse actions issued against Transportation Security Officers.

Training and Workforce Engagement – Oversees the development and delivery of all workforce engagement, training, learning, and employee formal development programs, along with the training programs for industry and international partners to support successful execution of TSA’s mission.

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Human Capital Services
Program Performance Justification**
(Dollars in Thousands)

PPA: Human Capital Services

	Perm. Pos	FTE	Amount
2012 Revised Enacted	259	215	249,400
2014 Adjustments-to-Base	6	31	(36,846)
2014 Current Services	265	246	212,554
2014 Total Request	265	246	212,554
Total Change 2012 to 2014	6	31	(36,846)

TSA requests \$212.6 million for Human Capital Services. The request includes adjustments-to-base (ATBs) as follows: an increase of 19 FTP/19 FTE and for Balance Workforce Strategy Follow-on contract conversions, a net reduction of \$9.9 million for transfers between the Transportation Security Support and Aviation Security appropriations; and a reduction of 13 FTP/ 13 FTE and \$2.4 million for reprogrammings. ATBs also include: an increase of \$283,000 for FY 2014 pay COLA, an increase of 28 FTE to adjust for Actual FTE and a reduction of \$6.0 million for annualization of FY 2012 program increases; a decrease of \$10.5 million to annualize second year funding of support costs associated with staffing of initial 1,000 Advanced Imaging Technology equipment; a decrease of 2 FTE for adjustments; and a decrease of 1 FTE and \$7 million for efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components that make up this PPA.

	(Dollars in Millions)	
	FY 2012 Revised Enacted	FY 2014
Personnel	\$36.0	\$37.7
HR Access -- Recruitment, Assessment, and Personnel Administration	163.1	133.2
Other Human Capital Services	37.6	33.1
Leadership Training and Development	12.7	8.6
Total	\$249.4	\$212.6

Human Capital Services (HCS) maintains oversight of all Human Resources (HR) contractual activities, develops policies, guidance, and programs that are used to identify and promote the best and most efficient HR practices, thereby allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

The Office of Training and Workforce Engagement (TWE) is the business leader for learning, employee development, and workforce engagement for TSA. It ensures alignment of agency training and workforce engagement initiatives with security capability and program changes required to execute the agency's counterterrorism mission across all transportation modes

Personnel: \$37.7 million in personnel costs are included in this PPA to support all HR and training and development activities.

HR Access – Recruitment, Assessment, and Personnel Administration: The request includes \$133.2 million to provide HR Services to the workforce located in nearly 450 airports in all 50 States, the District of Columbia, and U.S. Territories. Services provided by HRAccess include recruitment and hiring, personnel transactions, benefits processing, payroll processing, workforce planning, position management/position classification and help desk. HRAccess aligns with the Enterprise Architecture of DHS and leverages available e-systems that create efficient services and processes. As a result, TSA benefits from improved customer service both through feedback and stakeholder communications, innovative approaches utilizing automated solutions and Federal best practice applications, and improved efficiency through system/process integration resulting in reduced overhead.

Other Human Capital Services: \$33.1 million is requested for employee relations, collective bargaining, program management support of Human Capital systems, strategic Human Capital planning, reasonable accommodation, management of the Worker's Compensation program, Medical Evaluation Program, and mandatory programs. Mandatory programs include drug and alcohol testing and Unemployment Compensation.

Following the Federal Labor Relations Authority's (FLRA) decision that directed union representation for Transportation Security Officers (TSOs), TSA issued a Determination to allow election for union representation if conducted in a manner consistent with TSA's security mission. In June 2011, The American Federation of Government Employees (AFGE) was certified by the FLRA as the exclusive representative of the bargaining unit. During FY 2012, TSA implemented interim guidance to assist with the transition to the collective bargaining environment and in August reached an agreement with AFGE over the non-security employment issues allowed in the Determination. The agreement will require ratification by the bargaining unit employees in order to be binding. TSA is also finalizing a Unitary Dispute Resolution System which will address grievances, workplace issues, alleged violations of the Collective Bargaining Agreement, and disciplinary actions.

The Workers' Compensation Program Office oversees the TSA Workers' Compensation Federal Employees Compensation Act program and the TSA Nurse Case Management Program. The Program office established the Periodic Roll Initiative (PRI) in April 2007. The initiative is a joint effort with the Nurse Case Management team in which all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible. To ensure injured workers receive expedited medical care, TSA uses a diagnostic testing network to schedule and

provide Magnetic Resonance Imaging (MRI) and Computed Tomography (CT) scans for employees with work-related injuries. Diagnostic testing services expedites the scheduling of MRI and CT Scans at a reduced cost. This service schedules appointments with local radiology and diagnostic imaging centers at the earliest possible date, providing the employee's physician with an image and image study within 24 hours of testing. This enables the physician to provide accurate and timely diagnosis for quality medical care and treatment which often result in an expedited return to work for the injured employee and offers to the best chance for a successful recovery from the work related injury.

The Medical Evaluation Program ensures that TSOs are physically fit to continue to perform the mission critical duties of their position. Currently TSOs are medically evaluated during the hiring process. This program will require TSOs to be medically evaluated, on a recurring basis. TSA will develop medical qualification standards for incumbent TSOs that will parallel the standards utilized to screen applicants for TSO positions. The Aviation and Transportation Security Act mandates annual proficiency review of TSOs to ensure they continue to meet all qualifications and standards required to perform screening duties. TSA requires applicants for TSO positions to demonstrate that they are medically/physically qualified.

Leadership Training and Development: \$8.6 million is requested for training and development of Headquarters and Field staff. TWE works closely with TSA leadership to develop and administer programs to prepare for future leadership needs and fulfill the succession planning mandated by the Office of Personnel Management (OPM) and DHS. The program will identify the most critical current and future senior leadership requirements, prepare a pipeline of talented and motivated leaders at all levels, and identify the best external sources of recruitment when internal sources are insufficient to meet critical needs.

Succession Planning provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. The program has launched five programs targeting different pools of applicants for critical positions: Senior Leadership Development Program (SLDP) 4 (the most recent SLDP), and the Senior Executive Service Candidate Development Program (CDP). The CDP is a formal program operating under OPM and DHS rules to develop candidates who will seek certification from an OPM-sponsored Qualifications Review Board. Upon completion of the requirements and once certified, the employee will be eligible for non-competitive selection to executive positions.

The professional development program provides mission-related training that is either beneficial for an employee in his/her current position or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity. The Career Resident Program is a formal career development program designed to attract exceptional candidates with diverse backgrounds into targeted entry level positions.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ thousands)	FY 2013 Activity Funding (\$ thousands)	FY 2014 Activity Request (\$ thousands)
145,718	\$125,940	\$125,836
<i>HRAccess</i>	<p>The HRAccess program benefits both the mission delivery & management support areas by providing human capital services to the approx. 65,000 TSA employees at HQ & Field. HRAccess provides recruitment & hiring, personnel & payroll processing, benefits processing, workforce planning, position classification/management, Help Desk, & Integrated Data Warehouse (IDW).</p> <p>FY 2012 accomplishments: begun implementation of the Table of Organization related to TSA transformation initiative; completed the annual PASS Performance bonus processing for 45,000 TSOs.</p> <p>FY 2013 planned accomplishments: increase the usage of IDW across multiple offices in TSA to provide real time data reporting capability; implement the unitary dispute resolution system in the case management system.</p> <p>In FY 2014, OHC will review the service levels being delivered, methodologies, & tools being employed by the HRAccess vendor to identify further improvement opportunities.</p>	

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Information Technology
Program Performance Justification**
(Dollars in Thousands)

PPA: Information Technology

	Perm. Pos	FTE	Amount
2012 Revised Enacted	226	186	447,200
2014 Adjustments-to-Base	97	119	11,375
2014 Current Services	323	305	458,575
2014 Program Change	(3)	(3)	(3,091)
2014 Total Request	320	302	455,484
Total Change 2012 to 2014	94	116	8,284

TSA requests \$455.5 million for Information Technology. The adjustments-to-base (ATBs) include: 63 FTP/61 FTE for Balanced Workforce Strategy Follow-On from contract conversions; a net increase of 27 FTP/26 FTE and \$42.3 million from transfers between the Transportation Security Support appropriation and the Aviation Security and Federal Air Marshals appropriations as part of the headquarters restructuring to consolidate like functions, and an increase of 7 FTP/7 FTE and \$963,000 for reprogrammings/realignments. The ATBs also include: an increase of 30 FTE to adjust for actual FTE; an increase of \$357,000 for FY 2014 pay COLA; a decrease of \$145,000 for annualizations associated with FY 2012 program increases; a decrease of \$294,000 to annualize second year costs associated with staffing of the initial 1,000 Advanced Imaging Technology equipment; a decrease of 3 FTE for budget reductions, and a decrease of 2 FTE and \$31.8 million for efficiencies. In addition, the request includes a program decrease of 3 FTP/3 FTE and \$3.1 million for FAMS budget reduction.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA's Current Services.

(dollars in millions)

	FY 2012 Revised Enacted	FY 2014
Core Information Technology Program	\$385.9	\$377.2
Financial Management Systems	\$18.7	\$18.7
Working Capital Fund	\$42.6	\$59.6
Total	\$447.2	\$455.5

Core Information Technology (IT) Program: A total of \$377.2 million and 320 FTP/302 FTE supports the core IT and telecommunications infrastructure for all TSA enterprise-wide IT services that assist in accomplishing TSA’s mission. The core enterprise IT infrastructure supports the technology assets of Headquarters, field locations, and TSA Freedom Center personnel. The personnel equipment requires a large wide area network to support the information needs of the TSA user base. TSA provides support for the large distributed user base through robust IT engineering efforts, infrastructure operations, and enterprise application services. Resources are allocated for ongoing operations and maintenance for the TSA data centers, operation centers, failover resources, applications, operating platform management, database management, application systems, system performance monitoring, and configuration management. Support includes:

- National Help Desk support, which includes software, licensing and software distribution support;
- Headquarters and field IT support;
- Security Incident Response;
- Checked baggage and passenger screening data;
- Equipment maintenance and legacy systems support;
- Wireless infrastructure support and maintenance; and
- Technical architecture compliance and enterprise architecture-related support.

The growing needs of the TSA communication security (COMSEC) user base requires TSA to continually enhance secure communications to stakeholders and help desk capability. ♦♦♦
TSA’s cyber security efforts involve the continued modernization of secure communication units as well as infrastructure protection, which includes but is not limited to:

- Firewalls;
- Intrusion detection and prevention;
- Antivirus;
- Content monitoring; and
- Managed Security Services.

TSA also coordinates with DHS IT security organizations including physical, facility, personnel, industrial, and information assurance to perform security programs.

Financial Management Systems: This activity funds \$18.7 million of interagency agreements with the U.S. Coast Guard for the use of their financial management system.

Working Capital Fund (WCF): This activity funds \$59.6 million of advance payments and reimbursements to DHS for the costs of the WCF related to DHS-wide and Government-wide operational and information management support functions. The FY 2014 budget request reflects increases to the costs of the following WCF activities: DHS Infrastructure Transformation Program and Enterprise Licenses Agreements.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ thousands)	FY 2013 Activity Funding (\$ thousands)	FY 2014 Activity Request (\$ thousands)
\$224,785	\$229,786	\$231,975

<p>ITIP</p>	<ul style="list-style-type: none"> • The TSA IT Infrastructure Program (ITIP) is the continued Agency investment to provide the comprehensive IT support for TSA. The IT Infrastructure is defined as all of the elements employed in the delivery of IT services to users, including the computing, network and telecommunications hardware, software, database management, operating systems software, middleware, help desk, Operations Centers people, documentation and video, that is required to protect the nation’s transportation systems while ensuring the freedom of movement for people and commerce. The mission needs of the ITIP Program are to support the mitigation of threats, as well as provide modern IT services to support TSA in execution of its overall counterterrorism mission. The consolidated IT infrastructure supports the TSA and DHS goals and business objectives: awareness, prevention, protection, response, recovery, service and organizational excellence. • Measures used to track performance against the organization's mission and goals include: <ul style="list-style-type: none"> ○ Contractor workforce completing the required Federal IT Security laws and regulations mandated training. ○ Monthly Average Speed to Answer for phone-based level 1 help desk support. ○ Monthly percent of time met repair/restore service target for all high-availability WAN/LAN routers. ○ Monthly average uptime availability of all active exchange clusters.
--------------------	--

	<ul style="list-style-type: none"> ○ Microsoft Exchange Availability ○ Help desk call abandonment rate percentage ○ Percentage of computers with latest virus protection software ○ End user repair/return to service of system components such as screen, desktop computer, etc <ul style="list-style-type: none"> • This activity provides comprehensive technical infrastructure support for TSA. This investment addresses IT equipment and service needs across various government and industry contracts attempting to technically support and expand the IT capabilities of the agency's international workforce to enhance transportation security operational effectiveness and improve TSA business performance in furtherance of the mission to deter and disrupt terrorist operations, control access to CBEN, protect critical transportation infrastructure, and safeguard lawful trade and travel.

Description of Item

The FY 2014 request proposes to decrease funding for the Federal Air Marshal Service (FAMS) by a total of \$56.8 million. This budget reduction to FAMS will also result in a decrease to those programs that support the FAMS. Therefore, the FY 2014 request proposes a program decrease in the Transportation Security Support Appropriation of \$3.3 million – \$222,000 from the Headquarters Administration PPA and \$3.1 million from the Information Technology PPA.

Justification

The \$3.3 million reduction reflects programmatic reductions as well as ongoing efforts to achieve efficiencies in the program management.

Impact on Performance (Relationship of Increase to Strategic Goals)

The proposed budget reduction will not have an impact on the services provided by the support programs.

Intelligence Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. The TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	22,978	22,978	24,600	1,622
11.3 Other than full-time permanent	86	86	86	-
11.5 Other personnel compensation	1,083	1,020	1,165	82
11.6 Pay Diff (Sun/Night)	-	-	-	-
11.7 Military personnel/Awards	-	200	200	200
12.1 Benefits	6,421	6,421	6,870	449
Total, Salaries & Benefits	30,568	30,755	32,921	2,353

The FY 2014 request reflects the Salary and Benefits for 246 FTE. The increase is 24 FTP/23 FTE and \$2.5 million transfer from the Transportation Threat Assessment & Credentialing (TTAC) appropriation; an increase of 35 FTE to adjust for Actual FTE; an increase of \$248,000 for pay COLA, a decrease of 3 FTE for adjustments, and a decrease of 2 FTE and \$271,000 for management efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$801	\$801	\$640	-\$161

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease in travel in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	0	\$4,000	\$77	\$77

The increase is to better align to actuals.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$10,924	\$6,993	\$10,505	-\$419

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included in this category is contractual services for intelligence support. The FY 2014 request better reflects actual costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$170	\$170	\$162	-\$8

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request reflects a decrease in purchases from government accounts in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$288	\$288	\$274	-\$14

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$233	\$233	\$222	-\$11

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

Headquarters Administration Mission Statement

TSA Headquarters Administration include such critical functions Assistant Secretary and Deputy Assistant Secretary, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Professional Responsibility, Inspection, Chief Counsel, Chief Financial Officer, Chief Administrative Officer, Legislative Affairs, Acquisition, Civil Rights and Liberties, Ombudsman, and Traveler Engagement, Security, Training and Workforce Engagement, and Strategic Communications and Public Affairs.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	117,980	118,702	124,505	6,525
11.3 Other than full-time permanent	2,071	2,084	2,178	107
11.5 Other personnel compensation	6,227	6,265	6,548	321
12.1 Benefits	35,689	35,907	37,693	2,004
Total, Salaries & Benefits	161,967	162,958	170,924	8,957

Salaries and benefits are for 1,207 FTE. The FY 2014 request includes FTE for DHS Balanced Workforce Strategy Follow-On realignments, and transfers.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$6,178	\$6,216	\$3,403	-\$2,775

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease in travel due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$319	\$321	\$279	-\$40

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 reflects an administrative savings initiative.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$427	\$430	\$373	-\$54

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request reflects a decrease in communication, utilities, and misc charges due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$162	\$163	\$21	-\$141

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 request reflects a decrease in printing due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$12,848	\$12,927	\$10,237	-\$2,611

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2014 request reflects a decrease in advisory and assistance services due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$51,612	\$51,927	\$42,777	-\$8,835

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2014 request reflects a decrease in other services due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$16,498	\$16,599	\$16,429	-\$69

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request reflects a decrease in purchases from government accounts due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$6,662	\$6,703	\$5,926	-\$736

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$27	\$27	\$23	-\$4

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$978	\$984	\$955	-\$23

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request includes a conversion of contracts to FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$1,875	\$1,886	\$1,039	-\$836

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2014 request reflects a decrease in supplies and materials due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$1,950	\$1,962	\$1,905	-\$45

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	\$1,399	\$1,408	\$1,223	-\$176

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	\$28	\$28	\$24	-\$4

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

Human Capital Services Mission Statement

Human Capital Services include all the activities that support the recruitment, assessment, servicing, and payroll of TSA's Transportation Security Officers and other workforce at headquarters, field locations, and airports, and personnel policies, programs and systems and training and development activities.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	22,915	23,055	23,529	614
11.3 Other than full-time permanent	456	459	466	10
11.5 Other personnel compensation	761	766	778	17
12.1 Benefits	5,933	5,969	6,092	159
13.0 Unemployment Compensation	6,685	6,726	6,832	147
Total, Salaries & Benefits	36,750	36,975	37,697	947

Salaries and benefits are for 246 FTE. The FY 2014 request includes contract conversions and realignments.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$2,825	\$2,842	\$2,222	-\$603

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease in travel due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$66	\$66	\$24	-\$42

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 reflects an administrative savings initiative.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$334	\$336	\$284	-\$50

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$16	\$16	\$13	-\$3

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request reflects a slight decrease in communication, utilities, and misc charges due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$66	\$66	\$24	-\$42

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 request reflects a decrease in printing due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$124,146	\$124,907	\$101,088	-\$23,058

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2014 request reflects a decrease in advisory and assistance services due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$59,212	\$59,574	\$48,988	-\$10,224

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	----------------------------	--------------------------	--------------------	------------------------------

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2014 request reflects a decrease in other services due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$25,479	\$25,635	\$21,890	-\$3,589

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request reflects a decrease in purchases from government accounts due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$14	\$14	\$11	-\$3

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$288	\$290	\$136	-\$152

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2014 request reflects a decrease in supplies and materials due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$204	\$205	\$177	-\$27

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

Information Technology Mission Statement

Information Technology provides and maintains the IT network and infrastructure services and support for all of TSA. TSA continues to enhance the effectiveness of its entire workforce through its IT core support.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	25,971	26,130	36,088	10,117
11.5 Other personnel compensation	1,140	1,147	1,585	445
11.6 Pay Diff (Sun/Night)	1	1	1	-
12.1 Benefits	6,834	6,876	9,496	2,662
Total, Salaries & Benefits	33,946	34,154	47,170	13,224

Salaries and Benefits represent costs for 302 FTE. The FY 2014 request includes conversions of contracts to government FTEs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$302	\$304	\$298	-\$4

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease in travel in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$1,037	\$1,043	\$1,023	-\$14

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$46,435	\$46,719	\$45,880	-\$555

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request reflects a decrease in communications, utilities, and misc. charges in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$216,782	\$218,109	\$214,191	-\$2,591

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request reflects a net decrease in advisory and assistance services to account for reductions taken for Enterprise-Wide efficiencies and Administrative/Professional Support and Management efficiencies, offset by the transfer from the FAMS appropriation to the Support appropriation

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$20,900	\$21,028	\$20,650	-\$250

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request includes a PPA reduction and non-recurring funds. The FY 2014 request reflects a decrease in other services in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$68,209	\$68,626	\$67,394	-\$815

Purchases from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes funding for the Working Capital Fund, and also reflects a decrease in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$352	\$354	\$348	-\$4

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$26,350	\$26,511	\$26,035	-\$315

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account. The FY 2014 request includes a decrease in the operation & maintenance of equipment in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$581	\$585	\$574	-\$7

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Some software purchases and computer supplies are included in this object class.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$32,226	\$32,423	\$31,841	-\$385

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes a decrease in equipment in accordance with Enterprise-Wide efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	\$41	\$42	\$41	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes a decrease in equipment in accordance with Enterprise-Wide efficiencies.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce -- both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

The Transportation Security Administration requests 132 FTE for the FY 2014 DHS Balanced Workforce Strategy.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Federal Air Marshals

I. Appropriation Overview

A. Mission Statement for Federal Air Marshal Service:

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals (FAMs) in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, and crew.

B. Budget Activities:

Management and Administration (M&A)

The FAMS's mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS' M&A programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include the FAMS's participation in Joint Terrorism Task Force (JTTF) activities, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, information technology, logistics, and related services.

Travel and Training (T&T)

In order to maintain optimum readiness and to perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. FAMs must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this PPA funds FAMS's mission travel, which is an integral component of the international and domestic flight coverage activities that are core to the FAMS mission.

C. Budget Request Summary:

The Transportation Security Administration (TSA) requests \$826,522,000 for the Federal Air Marshals Appropriation. The adjustments-to-base total a decrease of \$88,155,000. The request also includes a program decrease of \$51,438,000 for a FAMS Program Reduction. In Fiscal Year 2012, TSA initiated a major restructuring of Headquarters Offices with a goal of enhancing support for critical field operations through efficiencies gained by the merger of some key functions. This recent restructuring reflects the determination of TSA leadership to identify potential synergies within the existing organizational structure and to effect changes that will maximize the opportunities for optimal mission execution and support. Many of the functions

that were performed separately within the FAMS organization have been integrated into those functions performed on an organizational basis as a whole.

TSA's FY 2014 budget reflects this permanent realignment/integration of \$77.1 million from FAMS appropriation to other support functions within the Aviation Security and Transportation Security Support appropriations. These realignments only impact the FAMS support functions and not the front-line operations FAMS.

Headquarters Restructuring of FAMS Support Offices

D: Efficiencies

TSA's budget includes \$16.447 million in projected efficiencies expected in specific object classes from FY 2010 through FY 2014 as described below.

Mission Support Personnel Reduction Efficiencies **\$9.055 million**

TSA expects to achieve savings in personnel from centralization of like functions (i.e., IT, acquisition, real estate, etc.) and has realigned staff in FY 2012 to more efficiently perform these functions. TSA also expects to achieve efficiencies from reducing overtime costs.

Printing & Reproduction Efficiencies **\$0.003 million**

TSA anticipates saving from utilizing electronic media and placing more documents on the Internet/Intranet to save printing and reproduction costs. Staff will also utilize electronic media to conduct briefings which will reduce printing costs.

Supplies & Materials Efficiencies **\$0.806 million**

TSA anticipates savings associated with use of electronic media, which will significantly reduce the need for paper, toner, binders, folders, etc. to print materials for briefings. Additionally, TSA will limit the publication and printing of hard copy documents and prescribe that information should be provided in an electronic form, whenever applicable.

Travel Efficiencies **\$0.605 million**

TSA will reduce all non-essential travel by 50 percent across all programs as applicable. To ensure efficient travel spending, TSA will employ strategic alternatives to Government travel, including local or technological alternatives, such as teleconferencing and video conferencing. Additionally, TSA will make all appropriate efforts to conduct business and host or sponsor conferences in space controlled by the Federal Government, wherever practicable and cost effective.

Transportation of Things Efficiencies **\$0.039 million**

TSA plans to seek ways to reduce postal and freight charges by pursuing more cost efficient transport of equipment.

Advisory & Assistance Contracts Efficiencies **\$5.505 million**

As part of a DHS-wide effort, TSA will reduce the number of advisory and assistance contracts.

Other Services Efficiencies **\$0.434 million**

In addition to the above efficiencies, TSA will also implement other enterprise-wide efficiencies and management adjustments to achieve savings from reductions in non-advisory contractual services.

¹The numbers displayed in the FY 2013 base column are the annualized short-term continuing resolution amounts from P.L. 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Federal Air Marshals:
Management and Administration
Program Performance Justification
(Dollars in Thousands)**

PPA: Management and Administration

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	-	-	841,863
2014 Adjustments-to-Base	-	-	(79,444)
2014 Current Services	-	-	762,419
2014 Program Change	-	-	(47,750)
2014 Total Request	-	-	714,669
Total Change 2012 to 2014	-	-	(127,194)

TSA requests \$714.7 million for Management and Administration. The adjustments-to-base (ATBs) include: a decrease of \$76.7 million million to reflect the permanent realignment/integration of support function from the FAMS appropriation to other support functions within the Aviation Security and Transportation Security Support appropriations. These realignments only impact the FAMS support functions and not the front-line operations FAMS. ; The ATBs also include: an increase of \$5.4 million for pay COLA; and a decrease of \$8.8 million for efficiencies. In addition, the request includes a \$47.8 million program decrease for a FAMS budget reduction.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Management & Administration (M&A) PPA funds the FAMS’s payroll costs and supports all operational and infrastructure requirements with the exception of training and travel expenses. The vast majority of this PPA funds the salaries for FAMS and the civilian workforce to provide the vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities.

The remaining balance of M&A’s funding supports the continuing development and maintenance of the Service’s infrastructure, internal business processes, and systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed below, M&A provides funding for workforce management activities; and maintenance of facilities in the Washington, D.C. area, Atlantic City, NJ, 22 field and 4 Resident Agent in Charge offices across

the country; program infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security.

The following table provides the components and associated funding levels in this PPA.
(dollars in millions)

	FY 2012 Revised Enacted	FY 2014 Request
Payroll, Compensation and Benefits	\$731.5	\$681.1
General Expenses	110.4	33.6
Total	\$841.9	\$714.7

Key programs of the M&A PPA include:

Joint Terrorism Task Force (JTTF): The FAMS is a full participant in the JTTF, a nation-wide counter-terrorism enforcement program managed by the Federal Bureau of Investigation (FBI). The JTTF targets terrorism-related criminal threats against the United States and its interests. Since 2002, the FAMS has been an active full-time partner in the JTTF. The FAMS’s personnel are assigned to partner with other task force member agencies to provide support during investigations of aviation and other transportation-related threats. The working relationships between the FAMS and other task force participants enable real-time information sharing. Further, it enhances both short-term decision making during immediate critical threats and long-term strategic decision making during the evolution of ongoing threats, such as the 2010 printer cartridge bomb plot.

Visible Intermodal Prevention and Response (VIPR): Deployments are conducted in all modes of transportation to detect, deter, defeat, and disrupt potential terrorist activity. VIPR operations consist of teams of TSA personnel including FAMS, Transportation Security Inspectors, Transportation Security Officers, Behavior Detection Officers, Explosive Detection Canine Teams, Transportation Security Specialists - Explosives, and Federal, State, and local law enforcement officers. The teams are tailored to each transportation mode, integrating the specific needs of each transportation partner at the venue level. In addition, these deployments incorporate elements of randomness and are unpredictable in frequency, location, and duration. VIPR operations are planned and implemented through a risk-based deployment methodology that utilizes existing national and local intelligence, data analysis, and security assessments. These resources are used to enhance TSA’s overall ability to act as a visible deterrent across multiple transportation sectors, to screen passengers, and to identify suspicious behavior.

In FY 2012, TSA underwent a Restructuring Effort across the agency. The FY 2014 Request includes transfer of personnel and funding to other offices with similar functions within TSA. In the FAMS appropriation specifically, resources moved to the following offices: the Office of Public Affairs, the Office of Civil Rights & Liberties, Ombudsman, and Travel Engagement, the Office of Legislative Affairs, the Chief Administrative Officer, the Office of Acquisitions, and the Office of Information Technology.

**Department of Homeland Security
Transportation Security Administration
Federal Air Marshals:
Travel and Training
Program Performance Justification
(Dollars in Thousands)**

PPA: Travel and Training

2014 Adjustments-to-Base	-	-	(8,711)
2014 Current Services	-	-	115,541
2014 Program Change	-	-	(3,688)
2014 Total Request	-	-	111,853
Total Change 2012 to 2014	-	-	(12,399)

TSA requests \$111.9 million for Travel and Training. The adjustments-to-base (ATBs) include: a decrease of \$430,000 for transfers between the Federal Air Marshals appropriation and the Aviation Security and Transportation Security Support appropriations. The ATBs also include: a decrease of \$7.6 million for efficiencies. In addition, the request includes a \$3.7 million program decrease for a FAMS budget reduction.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Travel and Training (T&T) PPA supports the FAMS’s core requirements for travel, travel-associated costs, and training.

	FY 2012 Revised Enacted	FY 2014 Request
Travel	\$116.1	\$105.1
Training	8.2	6.8
Total	\$124.3	\$111.9

Travel - \$105.1 M: This portion funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat, vulnerability, and consequence. Each year, the FAMS continues to provide priority flight coverage operations in accordance with their Concept of Operations.

Training - \$6.8 M: Through its training programs, the TSA Office of Training and Workforce Engagement /Law Enforcement and Industry Training Division (TWE/LEITD) provides effective learning environments and opportunities to the TSA Office of Law Enforcement/Federal Air Marshal Service (OLE/FAMS) by utilizing current and relevant curricula and training methodologies to enable and challenge FAMS, and other transportation security professionals, to perform their duties and responsibilities in a highly effective and efficient manner.

Upon entry into the FAM Training Program, FAM trainees undergo an intensive 16.5-week training program conducted at the Federal Law Enforcement Training Center (FLETC) in Artesia, NM and at the FAMS Training Center (FAMSTC) in Atlantic City, NJ. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City-based classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, FAMS undergo recurrent, in-service training to maintain the necessary skill base and firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any Federal agency (85 percent or 255/300).

Additional training offered by TWE/LEITD includes a robust FAMS Field Office Recurrent Training Program, which requires all mission status FAMS to complete 160 hours of recurrent training a year. The training is designed to maintain and enhance perishable tactical skills critical to the success of the FAMS mission. The OTWE/LEITD is also responsible for providing instructor development courses for instructors placed at field offices as well as those assigned to various training centers. This is accomplished through a series of train-the-trainer courses offered at the FAMSTC that focus on supporting the FAMS mission.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Federal Air Marshals:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: FAMS Reduction
 PPA: Management and Administration
 Travel and Training
 Program Decrease: Positions 0, FTE 0, Dollars \$(51,438)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2014		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	877,960
Program Decrease							-	-	(51,438)
Total Request	-	-	966,115	-	-	972,028	-	-	826,522

Description of Item

The primary focus of the Federal Air Marshal Service (FAMS) is to detect, deter, and defeat terrorist or other criminal or hostile acts targeting U.S. air carriers, airports, passengers, and crew. The FY 2014 request proposes a total program decrease of \$56.8 million, of which \$51.4 million is in the FAMS appropriation, \$2.1 million in the Aviation appropriation, and \$3.3 million is in the Transportation Security Support appropriation. The FAMS decrease of \$51.4 million consists of a decrease of \$47.7 million in the Management and Administration PPA and \$3.7 million in the Travel and Training PPA.

Justification

TSA believes this reduction will not adversely impact aviation security as this proposal will allow TSA to direct limited appropriated funding to risk-based programs and focus resources on high-risk and unknown passengers. FAMS will continue coverage of high priority flight and utilize intelligence and Secure Flight data for mission scheduling. The reduction of \$51.4 million reflects ongoing efficiencies and program changes that leverage the Nation's other transportation security systems. The requested funding level preserves the FAMS's capability to continue coverage of high priority flights.

The FAMS will implement this program decrease by reducing operational and infrastructure activities such as mission travel, training, logistics, personnel security, and supplies. FAMS will also reduce personnel costs through attrition.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funded level preserves the FAMS's capability to continue coverage of high priority flights.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the of the [Federal Air Marshals]*Transportation Security Administration for federal air marshal activities*¹, [\$929,610,000] *\$826,522,000*². (*Department of Homeland Security Appropriations Act, 2012.*)

Language Provision	Explanation
¹ ...[Federal Air Marshals] <u><i>Transportation Security Administration for federal air marshal activities</i></u> ...	Language change to bring FAMS legislative language in line with other TSA appropriations. No substantial change proposed.
² ...[\$929,610,000] <u><i>\$826,522,000</i></u> ...	Dollar change only. No substantial change proposed.

Management and Administration Mission Statement

The Management and Administration (M&A) PPA funds the FAMS' staffing/payroll requirements, which include: salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements including the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods, utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	397,792	400,227	370,363	(27,429)
11.3 Other than full-time permanent	13,808	13,893	12,856	(952)
11.5 Other personnel compensation	114,333	115,033	106,450	(7,883)
11.8 Special Service Pay	687	691	640	(47)
12.1 Benefits	204,898	206,151	190,770	(14,128)
Total, Salaries & Benefits	731,518	735,995	681,079	(50,439)

The FY 2014 Salaries and Benefits request includes a pay COLA adjustment of \$5,415,000 and a decrease of \$55,854,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$2,441	\$2,456	\$739	(\$1,702)

Travel includes all costs associated with the lease/purchase, maintenance and fuel requirements for vehicles. The FY 2014 request includes a decrease of \$1,702,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$280	\$283	\$85	(\$195)

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2014 request includes a decrease of \$195,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$3,656	\$3,678	\$1,107	(\$2,549)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes a decrease of \$2,549,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$15,626	\$15,722	\$4,729	(\$10,897)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2014 request includes a decrease of \$10,897,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$15,303	\$15,397	\$4,632	(\$10,671)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	----------------------------	--------------------------	--------------------	------------------------------

equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electricity, water usage, etc. The FY 2014 request includes a decrease of \$10,671,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$10	\$10	\$3	(\$7)

The FY 2014 request includes a decrease of \$7,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$14,192	\$14,279	\$4,295	(\$9,897)

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2014 request includes a decrease of \$9,897,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$23,655	\$24,440	\$7,351	(\$16,304)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2014 request includes a decrease of \$16,304,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$11,655	\$11,726	\$3,528	(\$8,127)

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2014 request includes a decrease of \$8,127,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$3,208	\$3,228	\$971	(\$2,237)

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with either the private sector or another Federal Government account. The FAMS uses this object class series for custodial services and facility build out/enhancements of current leases. The FY 2014 request includes a decrease of \$2,237,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$1,909	\$1,921	\$578	(\$1,331)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	----------------------------	--------------------------	--------------------	------------------------------

The FY 2014 request includes a decrease of \$1,331,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$5,838	\$5,874	\$1,767	(\$4,071)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2014 request includes a decrease of \$4,071,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$2,931	\$2,949	\$887	(\$2,044)

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2014 request includes a decrease of \$2,044,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$9,640	\$9,697	\$2,918	(\$6,722)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2014 request includes a decrease of \$6,722,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	\$1	\$1	0	(\$1)

The FY 2014 request includes a decrease of \$1,000 for transfers, adjustments to the base, and program changes.

Travel and Training Mission Statement

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The travel portion of the PPA supports the FAMS requirements for mission travel (per diem and lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes. T&T also supports the FAMS comprehensive training requirements to include TP I (Basic Law Enforcement Training) and TP II (FAMS specific training) for new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional and training gear, equipment and clothing. The T&T PPA also supports the required professional training for other professional development and career training as required.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$116,097	\$116,808	\$105,050	(\$11,047)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance, and site visits. The FY 2014 request includes a decrease of \$11,047,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$1,150	\$1,157	\$1,041	(\$109)

The FY 2014 request includes a decrease of \$109,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$3,075	\$2,453	\$2,206	(\$869)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC training costs, hotel lodging contracts for TP II training and field recurring range fees for Federal Air Marshals' quarterly requalification. The FY 2014 request includes a decrease of \$869,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$1,295	\$1,303	\$1,172	(\$123)

The FY 2014 request includes a decrease of \$123,000 for transfers, adjustments to the base, and program changes.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$2,635	\$2,651	\$2,384	(\$251)

The FY 2014 request includes a decrease of \$251,000 for transfers, adjustments to the base, and program changes.

A. Component Overview

The Transportation Security Administration is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Intermodal Screening Operations: This program focuses its resources to improve passenger experience at security checkpoints by applying new intelligence-driven, risk-based screening procedures and enhancing use of technology. By placing more emphasis on pre-screening individuals and optimizing screening processes and the use of technology, TSA can focus its efforts on passengers who are more likely to pose a risk to transportation, enhancing the travel experience for known and trusted travelers going through expedited screening. TSA also supports the installation of electronic baggage screening equipment in our Nation's airports to ensure 100% screening of checked baggage, including Explosives Trace Detection devices and Explosive Detection System equipment. Other activities captured in this program area are air cargo screening, federal and proprietary canine deployments, and vetting airline passengers and transportation employees.

Intermodal Assessments and Enforcement: This program encompasses TSA's security reviews, assessment and enforcement activities in the various modes of transportation. Activities captured in this program area include: Intelligence and Analysis, Visible Intermodal Prevention and Response teams, domestic and international inspectors, and reviews and assessments.

In Flight Security: This program encompasses TSA's in-flight security activities in the aviation domain. Activities captured in this program area includes: Federal Air Marshals' international and domestic flight coverage, deputizing airline pilots, and training crew members in self-defense.

Management and Administration: This program encompasses TSA's business support activities which directly support its operational mission. Activities captured in this program area include: headquarters administration, human capital resources, and information technology.

FY 2014 Budget Request

The table below shows Transportation Security Administration’s FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Intermodal Screening Operations	51,004	\$ 5,116,497
Intermodal Assessments and Enforcement	2,844	\$ 515,898
In Flight Security	26	\$ 851,159
Management and Administration	1,734	\$ 914,741
Total Budget Request (mandatory and discretionary)	55,608	\$ 7,398,295

B. Component Contributions to Achieving QHSR Missions

The table below shows the alignment of the Transportation Security Administration programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening DHS
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Intermodal Screening Operations	100 %						
Intermodal Assessments and Enforcement	83%	17 %					
In Flight Security	100 %						
Management and Administration	99 %	1 %					

Mission 1: Preventing Terrorism and Enhancing Security

Resources Requested

Transportation Security Administration resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

\$ in thousands

Programs	FY 2012 Request		FY 2013 Request		FY 2014 Request	
	\$	FTE	\$	FTE	\$	FTE
Intermodal Screening Operations	\$ 5,337,279	50,381	\$ 5,395,533	51,327	\$ 5,116,497	51,004
Intermodal Assessments and Enforcement	\$ 456,783	2,425	\$ 460,306	2,567	\$ 429,990	2,562

Total**	\$ 7,753,995	54,288	\$ 7,824,533	55,565	\$ 7,303,240	55,309

* The FTE captured for In Flight Security does not include FAMS FTEs, which is Sensitive Secure Information and can be provided separately.

**Totals account for rounding

Performance Measures

For *Preventing Terrorism and Enhancing Security*, two types of performance measures may be presented. Strategic Performance Plan Measures represent measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Management Measures may be displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Average number of days for DHS Traveler Redress Inquiry Program (TRIP) redress requests to be closed						
Description: DHS TRIP is a single point of contact for individuals who have inquiries or seek resolution regarding difficulties they experienced during their travel screening at transportation hubs or crossing U.S. borders. DHS TRIP is part of an effort by the Departments of State and Homeland Security to welcome legitimate travelers while securing our country from those who want to do us harm. This measure describes the average number of days for the processing of traveler redress requests, excluding the time DHS waits for the traveler to submit all required documents.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<100	<97	<93	<91
Result:	N/A	N/A	99	93	N/A	N/A

Transportation Security Administration - Strategic Context

Measure: Percent of air cargo screened on commercial passenger flights originating from the United States and territories						
Description: This measure captures the percent of air cargo screened on commercial passenger flights originating from the United States and territories. Screening methods approved in the Certified Cargo Screening Program include: physical search (includes opening boxes, removing and opening all inner cartons), X-ray, explosives trace detection, explosives detection system, canine teams, and the use of other approved detection equipment. The air cargo screening strategy uses a multi-layered, risk-based approach to securing air cargo by permitting indirect air carriers, shippers, and other entities further up the supply chain to screen cargo closer to its point of origin through the Certified Cargo Screening Program and allow air carriers to accept pre-screened certified cargo.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	100%	100%	100%	100%	100%
Result:	N/A	100%	100%	100%	N/A	N/A

Measure: Percent of air carriers operating from domestic airports in compliance with leading security indicators						
Description: This measure identifies air carrier compliance for U.S. flagged aircraft operating domestically with leading security indicators. These critical indicators are derived from security laws, rules, regulations, and standards. A leading security indicator is a key indicator that may be predictive of the overall security posture of an air carrier. Identifying compliance with the key indicators assesses air carrier's vulnerabilities and is part of an overall risk reduction process. Measuring compliance with standards is a strong indicator of system security.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	97%	98%	100%	100%	100%	100%
Result:	98%	98%	99.2%	98.1%	N/A	N/A

Measure: Percent of domestic air enplanements vetted against the terrorist watch list through Secure Flight						
Description: The Secure Flight program compares domestic passenger information to the No Fly and Selectee List components of the Terrorist Screening Database (TSDB), which contains the Government's consolidated terrorist watch list, maintained by the Terrorist Screening Center. The No Fly and Selectee Lists are based on all the records in the TSDB, and represent the subset of names who meet the criteria of the No Fly and Selectee designations. Secure Flight will also match data against additional subsets of the TSDB as determined by Department and Agency leadership. This is a unified approach to watch list matching for covered passenger flights, to avoid unnecessary duplication of watch list matching efforts and resources and reduce the burden on aircraft operators.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

Transportation Security Administration - Strategic Context

Measure: Percent of inbound air cargo screened on international passenger flights originating from outside the United States and Territories

Description: This measure captures the amount of inbound air cargo screened from last point of departure countries on commercial passenger flights originating from outside the United States and Territories. Screening is defined as a physical examination or non-intrusive methods of assessing whether cargo poses a threat to transportation security. Methods of screening include x-ray systems, explosives detection systems, explosives trace detection, explosives detection canine teams certified by the Transportation Security Administration, or a physical search together with manifest verification, or additional methods approved by the TSA Administrator, pursuant to Section 1602 of Public Law 110-53, Implementing Recommendations of the 9/11 Commission Act of 2007.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	85%	100%	100%
Result:	N/A	N/A	N/A	93%	N/A	N/A

Measure: Percent of international air enplanements vetted against the terrorist watch list through Secure Flight

Description: The Secure Flight program compares international passenger information to the No Fly and Selectee List components of the Terrorist Screening Database (TSDB), which contains the Government's consolidated terrorist watch list, maintained by the Terrorist Screening Center. The No Fly and Selectee Lists are based on all the records in the TSDB, and represent the subset of names who meet the criteria of the No Fly and Selectee designations. Secure Flight will also match data against additional subsets of the TSDB as determined by Department and Agency leadership. This is a unified approach to watch list matching for covered passenger flights, to avoid unnecessary duplication of watch list matching efforts and resources and reduce the burden on aircraft operators.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

Measure: Percent of overall compliance of domestic airports with established aviation security indicators

Description: This measure provides the percent of domestic airports assessed that comply with established security standards and practices related to aviation security. Security indicators are key indicators that may be predictive of the overall security posture of an airport. Identifying compliance with the key indicators assesses airport vulnerabilities and is part of an overall risk reduction process. Measuring compliance with standards is a strong indicator of system security.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	96%	100%	100%	100%	100%
Result:	N/A	96%	95.9%	95.0%	N/A	N/A

Measure: Percent of overall level of implementation of industry agreed upon Security and Emergency Management action items by mass transit and passenger rail agencies

Description: This measure provides the rate of implementation by mass transit, light and passenger rail, bus, and other commuter transportation agencies with established security standards and practices related to six critical Security Action Items (SAIs). These six SAIs are key indicators of the overall security posture of a mass transit and passenger rail transportation system. Measuring implementation of these six SAIs assesses transit vulnerabilities and is part of an overall risk reduction process.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Result:	23%	23%	28%	39%	N/A	N/A

Management Measures

Measure: Level of baggage security screening assessment results						
Description: This measure appraises the percent of the time Transportation Security Officers (TSOs) correctly detect threat items concealed in baggage using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are Classified and are not releasable to the public at this time for security reasons.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	Classified	Classified	Classified	Classified	Classified	Classified
Result:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Level of passenger security screening assessment results						
Description: This measure appraises the percent of the time Transportation Security Officers (TSOs) correctly detect threat items concealed in baggage using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are classified and are not releasable to the public at this time for security reasons.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	Classified	Classified	Classified	Classified	Classified	Classified
Result:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Number of annual Visible Intermodal Prevention and Response (VIPR) operations to deter potential terrorist actions and enhance security at surface and aviation transportation facilities						
Description: This measure captures the number of Visible Intermodal Prevention and Response (VIPR) team operations conducted within the United States and its territories in all transportation modes. VIPR operations are defined as the deployment of any combination of TSA assets (personnel and/or equipment) for the purpose of enhancing the security of any mode of transportation (aviation, mass transit, highway, maritime, freight rail, and pipeline) with any of TSA's security and law enforcement stakeholders which may include federal, state, or local authorities.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	4,200	7,850	12,600	12,600
Result:	N/A	N/A	6,492	8,868	N/A	N/A

Measure: Number of high risk corporate Pipeline systems on which security reviews will be conducted annually						
Description: Pipeline Corporate Security Reviews (PCSRs) assess and elevate the security posture of the pipeline transportation mode. The objectives of an onsite security review are to develop firsthand knowledge of security planning and execution at the corporations operating the critical pipeline systems, establish communication with key pipeline security personnel, and identify and share smart practices. As industry wide security gaps are identified through the PCSR process, the TSA pipeline security division develops programs to address gaps throughout the pipeline industry. Each pipeline corporation is assessed/reassessed every 4-5 years.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	12	16	16	15	15	15
Result:	15	11	16	16	N/A	N/A

Transportation Security Administration - Strategic Context

Measure: Percent of checked baggage screened with Explosive Detection Systems (EDS)						
Description: Explosive Detection Systems are installed at airports to detect threats concealed within checked baggage. NexGen EDS provide auto-detect capabilities of prohibited items while increasing the rate and screening capacity of airports. This measure tracks the percent of checked baggage screened by EDS equipment, and provides an indicator of the deployment and utilization of stand-alone and in-line NexGen EDS.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	94%	91%	90%	90%
Result:	N/A	N/A	90%	90%	N/A	N/A

Measure: Percent of customers satisfied with the intelligence products provided						
Description: This measure shows the overall level of customer satisfaction with intelligence products produced and disseminated by the program. TSA customers who access intelligence products via the Transportation Security Administration's (TSA) Online Learning Center (TSA field and headquarters employees) receive these products and return the questionnaires. Because the majority of TSA personnel are field employees, the majority of returned surveys are from the field. TSAs Intelligence products are also shared with the Intelligence Community, as applicable.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	80%	80%	82%	84%	88%
Result:	80%	80%	87%	87%	N/A	N/A

Measure: Percent of Federal Flight Deck Officers who attend required bi-annual re-qualification firearm certification training to improve the protection of aircraft cockpits						
Description: This measure gauges the total percentage of Federal Flight Deck Officers (FFDOs) who attended required bi - annual re - qualification firearm certification training.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	94%	94.5%	95%	95.5%	96.0%	96.5%
Result:	95%	90%	89%	84.0%	N/A	N/A

Measure: Percent of Indirect Air Carriers found to be compliant with TSA standard security programs						
Description: This measure gauges the percent of Indirect Air Carriers that have at least one finding during inspection calculated against the total number of inspections conducted. An Indirect Air Carrier (IAC) is defined as any person, organization, or business within the United States national air system that does not possess a Federal Aviation Administration issued air carrier operation certificate, yet employs the services of licensed air carriers to move cargo from one destination to another. Air carriers leasing and selling space on their aircrafts provide these services to companies for the purpose of shipping items. Examples of an IAC could be a charter vendor, the postal service, or freight forwarder. Standard Security Programs provide detailed guidance to these regulated parties on how to implement regulatory requirements. Continuing education, outreach efforts, and targeting additional resources on IACs identified as noncompliant, will increase the rate of IACs in compliance.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	82%	84%	86.0%	88.0%	90.0%
Result:	N/A	97.7%	97.3%	88.7%	N/A	N/A

Measure: Percent of international flight crews, aviation workers, hazardous material drivers, transportation workers requiring unescorted access to secure areas of MTSA-regulated facilities and vessels, all mariners holding Coast Guard-issued credentials, and non						
Description: This measure indicates the percent of international flight crews, aviation workers, hazardous material drivers, transportation workers requiring unescorted access to secure areas of MTSA-regulated facilities and vessels, and all mariners holding Coast Guard-issued credentials, and non - U.S.						

Transportation Security Administration - Strategic Context

citizens receiving flight instruction at Federal Aviation Administration certified flight schools in the U.S. and abroad receiving a Security Threat Assessment. Vetting is a process in which individuals are cleared as able to access the transportation system and are therefore not considered a threat. Thorough vetting will decrease vulnerabilities of sensitive transportation systems by limiting access of potentially dangerous individuals who are identified by TTAC vetting and credentialing programs.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

Measure: Percent reduction in risk from toxic inhalation hazard bulk cargoes in rail transportation (relative to FY 2009 baseline)						
Description: The Toxic Inhalation Hazard (TIH) Risk Reduction Program strives to reduce the risk posed by TIH materials, the most toxic chemicals transported by rail in the U.S., including chlorine and anhydrous ammonia. Through a partnership with American and Canadian railroads, Transportation Security Administration (TSA) gathers railcar movement data, focusing on the time a loaded rail car is unattended in a DHS-designated High Threat Urban Area (HTUA). This period of time is referred to as "dwell time". The program uses a risk calculation comprised of four elements: 1) the amount of "dwell time" in hours; 2) the specific HTUA; 3) the Population Proximity Factor (PPF); and 4) whether the car is attended or unattended. The level of risk will be compared to a baseline risk level, which is calculated from a baseline year of 2009.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	82.50%	83.37%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Mission 2: Securing and Managing Our Borders

Resources Requested

Transportation Security Administration resources supporting *Securing and Managing Our Borders* are provided in the table below.

\$ in thousands

Programs	FY 2012 Request		FY 2013 Request		FY 2014 Request	
	\$	FTE	\$	FTE	\$	FTE
Intermodal Assessments and Enforcement	\$ 92,013	194	\$ 92,139	254	\$ 85,908	282
Management and Administration	\$ 9,931	15	\$ 9,958	16	\$ 9,147	17
Total*	\$ 101,944	209	\$ 102,097	270	\$ 95,055	299

*Totals account for rounding

Performance Measures

For *Securing and Managing Our Borders*, two types of performance measures may be presented. Strategic Performance Plan Measures represent measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Management Measures may be displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Percent of foreign airports that serve as last points of departure and air carriers involved in international operations to the United States advised of necessary actions to mitigate identified vulnerabilities in order to ensure compliance with critical security measures.						
Description: This index combines: (1) percent of foreign airports serving as Last Point of Departure (LPD) to the U.S. notified of critical vulnerabilities and accompanying recommendations, and (2) percent of foreign air carriers operating flights from these foreign airports and U.S. air carriers operating from any foreign airport regardless of destination notified of violations of critical regulations and accompanying recommendations/follow-up action. TSA evaluates/documents security at foreign airports with service to U.S., airports from which U.S. air carriers operate, and other sites on a 5-point scale against critical International Civil Aviation Organization (ICAO) aviation and airport security standards. TSA assess compliance with these standards and provides feedback to the host governments for awareness and recommended follow-up action. Identifying and notifying air carriers of non-compliance with critical regulations mitigates air carrier vulnerabilities and reduces risk.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	100%	100%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Management Measures

Measure: Average number of international inspections conducted annually per inspector						
Description: International compliance with security requirements is measured through number of airport assessments and air carrier inspections for all regions and offices performed by field and headquarters inspectors. Increase number of inspections performed by each inspector from an average of six to nine per year.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	13.0	14	15.0	16.0	17.0
Result:	N/A	13.0	34.4	26.8	N/A	N/A

Measure: Percent of countries with direct flights to the U.S. who are provided aviation security assistance						
Description: The measure reports the amount of interaction the United States has with countries providing Last-Point-of-Departure (LPD) service to the U.S. An LPD country is a country with at least one port providing direct traffic to a specific destination - usually a foreign airport with direct passenger and/or cargo flights to a U.S. destination airport. The U.S. interacts with countries providing LPD service with the goal to share aviation security policy and practices at either the national or airport level.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	100%	100%	100%	100%	100%	100%
Result:	99%	100%	100%	100%	N/A	N/A

Transportation Security Administration - Strategic Context

Measure: Percent of Federal Air Marshal Service (FAMS) coverage targets met for each individual category of identified risk						
Description: This measure reflects the performance levels of Office of Law Enforcement, Federal Air Marshal Service (OLE/FAMS) coverage of targeted critical flights based upon impact (geographical location), vulnerability (aircraft destructive potential), threats, and intelligence relative to the availability of resources. Coverage is provided by specially trained armed law enforcement officers referred to as FAMS. These FAMS are deployed to fly missions on commercial U.S. aircraft for both domestic and international flights that have been identified as Targeted Critical Flights under 10 individual risk categories that are found in the OLE/FAMS Concept of Operations. Coverage is provided using a risk - based management approach for mission planning.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	100%	100%	100%	100%	100%	100%
Result:	109.2%	99%	97.4%	97.2%	N/A	N/A

U. S. Coast Guard

Operating Expenses

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The Operating Expenses (OE) appropriation funds the Coast Guard's role as the principal Federal agency providing maritime safety, security, and stewardship to the Nation.

B. Budget Activities:

The OE appropriation funds the annualization of prior-year funding, economic adjustments, and operating and maintenance funding for new and existing Coast Guard Programs, Projects and Activities (PPA). The OE request supports all 11 statutory Coast Guard missions in support of the Coast Guard's six DHS FYHSP Programs.

C. Budget Request Summary:

The Coast Guard requests 47,972 positions, 48,414 FTE, and \$6.7 billion for FY 2014.

The Coast Guard's OE request includes \$192.0 million in new funding for the annualization of prior year funding and the FY 2013 military pay raise; and provides for the FY 2014 pay increase for military (1.0 percent) and civilian (1.0 percent) personnel; military allowances; and the operation, maintenance, and crewing of systems, vessels, aircraft and shore facilities delivered via the Coast Guard's acquisition programs (e.g., National Security Cutter (NSC), shore facilities, Response Boat-Medium (RB-M), Interagency Operations Centers (IOC), Rescue 21 (R21), Fast Response Cutter (FRC), HC-144A Maritime Patrol Aircraft (MPA), and Manned Covert Surveillance Aircraft (MCSA)).

The FY 2014 budget meets today's needs and challenges, while simultaneously preparing for new and exigent demands. Through a comprehensive internal review of doctrine, policy, operations and mission support structure, the Coast Guard has focused OE resources where they are most needed. The OE adjustments-to-base include decreases of \$218.8 million to focus resources toward higher priorities, including recapitalizing aging assets. Decreases include vessel decommissionings; fixed wing aircraft retirements; consolidating Air Facilities; targeted reductions to marine safety and intelligence programs and training; enterprise-wide efficiencies; programmatic reductions; the termination of one-time costs; and annualization of prior year management efficiencies.

Program changes include \$29.5 million for Financial Systems Modernization for Coast Guard and its customers.

Base adjustment increases include:

- Annualization of FY 2013 Funding – \$19.7 million

- Mandatory Personnel Entitlements – \$9.0
- GSA Rent and Security – \$1.5 million
- Operating and Maintenance funds for new assets, including follow-on costs related to Shore Facilities, RB-M, IOC, R21, and Surface and Air Asset Follow-on – \$69.9 million

Base adjustment decreases include:

- Termination of One-Time FY 2013 Costs – (\$29.0 million)
- Prior Year Management Annualizations – (\$45.6 million)
- Asset Decommissionings and Retirements – (\$37.2 million)
- Management Efficiencies – (\$52.7 million)
- Programmatic Reductions – (\$54.2 million)

Base Re-allocations (non-adds) include:

- Deployable Specialized Forces – [\$55.6 million]
- Military FTP and FTE Transfer to Civilian – [\$8.3 million]
- PPA Funding Technical Transfers – [\$67.8 million]

D. Efficiencies:

Anticipated efficiencies in the following Object Classes will help Coast Guard preserve the most critical front-line operations, depot level maintenance activities, fleet and air asset recapitalization, and higher priority Service requirements:

Personnel Efficiencies

\$75.8 million

Military Pay and Allowances (\$51.0 million) – Includes savings commensurate with reduction in personnel and based on improved estimation of actual requirements for military personnel basic allowance for housing, military salaries (including flight pay, basic allowance for subsistence, and extra pay based on conditions of the environment), special personal services payments.

Civilian Pay (\$24.8 million) – Includes savings commensurate with reduction in personnel and based on improved estimation of actual requirements for salaries and benefits.

The Coast Guard conducted an analysis of its staffing across the entire mission support organization to develop these efficiencies. Position reductions are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Enterprise Wide Support Personnel
- Front Line Mission Support Staffing
- Prior Year Management Annualizations
- Telecommunication and Information Systems Command (TISCOM) In sourcing
- Defense Messaging System
- Consolidate Atlantic and Pacific Communications Area Master Stations
- Officer Accession and Leadership Training

- HU-25 Decommissionings
- Enterprise-Wide Efficiencies
- Programmatic Reductions

Travel

\$51.9 million

Travel Savings (\$51.9 million): These travel savings include reductions to travel and transportation costs of Government employees and other persons, while in an authorized travel status, that are to be paid by the Government either directly or by reimbursing the traveler. In part, the savings reflect implementation of new travel policies in support of the Administration's Campaign to Cut Waste. Reductions are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Enterprise Wide Support Personnel
- Front Line Mission Support Staffing
- Prior Year Management Annualizations
- Telecommunication and Information Systems Command (TISCOM) In sourcing
- Defense Messaging System
- Consolidate Atlantic and Pacific Communications Area Master Stations
- Advance Technical Training School Program
- Officer Accession and Leadership Training
- Non-Operational Travel
- HU-25 Decommissionings
- Enterprise-Wide Efficiencies
- Prior Year Management Annualizations
- Programmatic Reductions

Transportation of Things

\$0.2 million

Transportation Savings (\$0.2 million): The transportation savings are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Enterprise Wide Support Personnel
- Front Line Mission Support Staffing
- Prior Year Management Annualizations
- Telecommunication and Information Systems Command (TISCOM) In sourcing
- Officer Accession and Leadership Training
- Enterprise-Wide Efficiencies
- Programmatic Reductions

Communications, Utilities, and Miscellaneous Charges **\$13.9 million**

Communications, Utilities, and Misc Charges Savings (\$13.9 million): The communications and utilities savings are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Enterprise Wide Support Personnel
- Front Line Mission Support Staffing
- Prior Year Management Annualizations
- Telecommunication and Information Systems Command (TISCOM) In sourcing
- Defense Messaging System
- Consolidate Atlantic and Pacific Communications Area Master Stations
- Officer Accession and Leadership Training
- Reduction of Smartphone Devices and Service Contracts
- HU-25 Decommissionings
- Enterprise-Wide Efficiencies
- Prior Year Management Annualizations
- Programmatic Reductions¹

Rental Payments to GSA/Others **\$1.2 million**

Rental Payments to GSA/Others (\$1.2 million): The rental payments savings are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Prior Year Management Annualizations
- GSA Footprint
- Enterprise-Wide Efficiencies

Other Services (Advisory & Assistance Contracts, etc.) **\$59.4 million**

Other Services (Advisory & Assistance Contracts, etc.) (\$59.4 million): The support service savings are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Enterprise Wide Support Personnel
- Front Line Mission Support Staffing
- Prior Year Management Annualizations
- Telecommunication and Information Systems Command (TISCOM) In sourcing
- Defense Messaging System
- Consolidate Atlantic and Pacific Communications Area Master Stations

- Advance Technical Training School Program
- Education Benefits
- Officer Accession and Leadership Training
- Divest Coast Guard Housing
- HU-25 Decommissionings
- Enterprise-Wide Efficiencies
- Prior Year Management Annualizations
- Programmatic Reductions¹

Supplies & Materials

\$5.4 million

Supplies & Materials (\$5.4 million): The supplies and materials savings are associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Enterprise Wide Support Personnel
- Front Line Mission Support Staffing
- Prior Year Management Annualizations
- Telecommunication and Information Systems Command (TISCOM) In sourcing
- Defense Messaging System
- Consolidate Atlantic and Pacific Communications Area Master Stations
- Officer Accession and Leadership Training
- Government Vehicle Fleet Mix
- HU-25 Decommissionings
- Enterprise-Wide Efficiencies
- Prior Year Management Annualizations
- Programmatic Reductions¹

Additional information on these initiatives is included in OE Section III, Current Services Program Description by PPA.

Equipment

\$2.1 million

Equipment (\$2.1 million): The equipment savings associated with the following initiatives or categories (more fully described in Section III, Current Services Program Description by PPA):

- Prior Year Management Annualizations
- HU-25 Decommissionings¹
- Enterprise-Wide Efficiencies¹
- Programmatic Reductions¹

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Coast Guard
Operating Expenses
Program Performance Justification
(Dollars in thousands)

PPA I: MILITARY PAY AND ALLOWANCES

	Perm		
	Pos	FTE	Amount
2012 Revised Enacted	41,543	41,554	3,386,820
2014 Adjustments-to-Base	(1,477)	(722)	38,486
2014 Current Services	40,066	40,832	3,425,306
2014 Program Change	0	0	0
2014 Request	40,066	40,832	3,425,306
Total Change 2012-2014	(1,477)	(722)	38,486

The Coast Guard requests \$3.4 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of the Federal Insurance Contribution Act (FICA), Social Security credits, child care benefits for Coast Guard families, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location—in the United States (INCONUS) or out of the country (OCONUS), which includes Alaska and Hawaii— medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. Includes a 1.0 percent pay increase for military personnel.

The Coast Guard was founded as a military, multi-mission, maritime service. Active duty military personnel ensure the Service remains agile, adaptable, and ready to serve the Nation's domestic and international maritime interests across a range of dynamic operational environments. As members of one of the Nation's five Armed Forces and the only military service within the Department of Homeland Security, Coast Guard military personnel conduct missions that protect the public, the environment, and U.S. economic interests in the Nation's inland waters, ports and waterways, coastal regions, and on international waters.

PPA II: CIVILIAN PAY AND BENEFITS

	Perm Pos	FTE	Amount
2012 Revised Enacted	8,101	7,336	780,552
2014 Adjustments-to-Base	(195)	246	3,545
2014 Current Services	7,906	7,582	784,097
2014 Program Change	0	0	0
2014 Request	7,906	7,582	784,097
Total Change 2012-2014	(195)	246	3,545

The Coast Guard requests \$784.1 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and “Non-Ceiling” (NC) employees (e.g., cooperative education students, student aides, summer interns, and Federal junior fellows). These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location—INCONUS or OCONUS (which includes Alaska and Hawaii). Includes a 1.0 percent pay increase for civilian personnel.

Civilian personnel are an integral part of the Coast Guard and vital to execution of its statutory missions. The Coast Guard continues to complement its military workforce by recruiting diverse, well-educated, and dedicated civilians needed to meet current and future demands.

2014 Request	181,617
Total Change 2012-2014	(31,115)

The Coast Guard requests \$181.6 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The training and recruiting PPA provides funding for the Coast Guard’s professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy and Leadership Development Center.

Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. Training is provided by the Coast Guard, commercial providers, DoD, and other agencies. Training and education are usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

PPA IV: OPERATING FUNDS AND UNIT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
2012 Revised Enacted	1,108,172
2014 Adjustments-to-Base	(76,153)
2014 Current Services	1,032,019
2014 Program Change	29,548
2014 Request	1,061,567
Total Change 2012-2014	(46,605)

The Coast Guard requests \$1.0 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard’s Headquarters and Atlantic Area or Pacific Area Commanders. These include Base Support Units (BSUs); National Security Cutters (WMSL), High and Medium Endurance Cutters (WHECs/WMECs); Sectors; Patrol Boats; Multi-mission Boat Stations; Air Stations; Communication Stations; Deployable Specialized Forces (DSF); support commands; and Area Offices as applicable for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. This request funds unit level maintenance of cutters, boats, aircraft, electronics systems, mechanical systems, and electrical equipment; service-life replacement and emergent purchase of boats; procurement of supplies and materials utilized for unit “housekeeping” and administration, spare parts, liquid fuel, and energy; and other materials consumed that contribute directly to mission effectiveness.

PPA V: CENTRALLY MANAGED ACCOUNTS

	Perm Pos	FTE	Amount
2012 Revised Enacted	336,161
2014 Adjustments-to-Base	(17,305)
2014 Current Services	318,856
2014 Program Change	0
2014 Request	318,856
Total Change 2012-2014	(17,305)

The Coast Guard requests \$318.9 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requested amounts fund centrally managed accounts that provide service to the entire Coast Guard. Significant centrally managed accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGOne), satellite and data communications, General Services Administration (GSA) rent, postal expenses, ammunition replenishment, and the DHS Working Capital Fund.

PPA VI: DEPOT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
2012 Revised Enacted	930,817
2014 Adjustments-to-Base	53,123
2014 Current Services	983,940
2014 Program Change	0
2014 Request	983,940
Total Change 2012-2014	53,123

The Coast Guard requests \$983.9 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request provides service-wide funding for the Coast Guard’s depot level operating expense funded maintenance for the Service’s shore facilities, electronics, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using a blend of organic maintenance and repair infrastructure and contracted depot level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine organizational-level and depot level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

This funding is vital to ongoing sustainment and support of in-service Coast Guard aircraft; Command, Control, Communications, Computers and Information Technology (C4IT) systems; shore facilities; and vessels.

PROCUREMENT ACTIVITIES:(\$ thousands)

FY 2012 Activity Funding \$25,000	FY 2013 Activity Funding \$25,000	FY 2014 Activity Request \$25,000
<i>Infrastructure-CGOne</i>	<p>In its effort to transform the IT Infrastructure to meet the requirements of department wide information sharing, the Department of Homeland Security (DHS) has implemented the Infrastructure Transformation Program (ITP). The ITP calls for the department to consolidate its Sensitive but Unclassified (SBU) networks into one department-wide network backbone. The ITP's goal is to consolidate the department's 16 component-level data centers into two department-wide data centers to provide the required availability and survivability, and to consolidate component SBU networks into a single network, called "OneNet." The consolidation must also ensure continued connectivity with the DOD's computer networks Non-Classified Internet Protocol (IP) Router Network (NIPRNET). The Customs and Border Protection (CBP) agency has the responsibility for DHS' OneNet network infrastructure under the ITP plan. The Coast Guard is transitioning from its enterprise WAN called the Coast Guard Data Network (Plus) to OneNet.</p> <p>CGOne addresses a capability gap by consolidating its Sensitive but Unclassified (SBU) networks into one department-wide network backbone. CGOne will incrementally deliver this to all 16 component level data center units.</p>	
FY 2012 Activity Funding \$64,609	FY 2013 Activity Funding \$64,609	FY 2014 Activity Request \$64,617
<i>Infrastructure-SWIRS</i>	<p>SWIRS supports and maintains the Standard Workstation, which is a combination of desktop/laptop hardware and a specific collection of software (the "standard image"). The Standard Workstation is the primary end - user computing platform for accessing almost all Coast Guard and other unclassified applications. The intent of this investment is to keep the end - user technology current by recapitalizing workstations on a regular basis. SWIRS also maintains file, print, and application servers and recapitalizes them on a regular schedule. Finally, this investment funds configuration management, contractor help desk support, and maintenance of workstation/server software. Beneficiaries are Coast Guard personnel and contractors. The OneNet (also referred to as CGOne) investment is critical to SWIRS. The user information is updated, E - mail operates and updates to our image happen across the network.</p> <p>SWIRS addresses a capability gap by keeping the end - user technology current by recapitalizing workstations on a regular basis. SWIRS will incrementally deliver this capability throughout its lifecycle.</p>	

FY 2012 Activity Funding \$44,378	FY 2013 Activity Funding \$44,824	FY 2014 Activity Request \$40,374
<i>USCG-Core Accounting System (CAS)</i>	<p>The Core Accounting System (CAS) suite is the primary accounting system for USCG, Transportation Security Agency (TSA), and Domestic Nuclear Detection Office (DNDO) which hosts a suite of applications at USCG Finance Center in Chesapeake, VA. The CAS suite includes the Oracle Federal Financials (OFF) (a COTS product that includes Accounts Receivable, Assets, Projects, Inventory, Accounts Payable, Purchasing, and General Ledger), Sunflower (property management system used by TSA); Finance and Procurement Desktop (FPD) (enterprise-wide accounting and procurement system assigned to assist in funds and procurement management), Workflow Imaging Network System (WINS) (imaging and document processing system), and Contract Information Management System (CIMS) (contracts management). The Core Accounting System (CAS) suite is an enterprise accounting, procurement, assets and management decision support system. This investment supports all the critical operational activities of 3 major components with in DHS by recording and accounting for transactions.</p> <p>CAS addresses a capability gap by providing the primary accounting system for USCG, TSA, and DNDO. The CAS suite services over 2,400 units and commands across USCG, TSA and DNDO.</p>	
FY 2012 Activity Funding \$4,968	FY 2013 Activity Funding \$4,968	FY 2014 Activity Request \$5,220
<i>Vessel Logistics System (VLS)</i>	<p>VLS consists of Fleet Logistics System (FLS), Configuration Management Plus (CMPlus), Naval and Electronics Supply Support System (NESSS), and Automated Requisition Management Systems (ARMS). Two other non-logistics systems, which are closely tied to VLS and provide procurement and financial management support, are Finance and Procurement Desktop (FPD) and Contract Information Management System (CIMS). Vessel logistics supports over 240 cutters and over 1000 standard boats. Per ALCOAST 620/05 the Coast Guard is transforming/aligning our business processes for logistics. Logistics will use a single set of business processes modeled after the Aviation BPM. Resources not aligned will be refocused and redirected to support the logistics transformation. VLS will be replaced by the new Single Logistics Information Management System in a phased approach.</p>	

Transfers to and from Other Accounts

DHS Working Capital Fund\$78

PPA Breakdown - DHS Working Capital Fund		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	78
		78

FY 2014 Line Items	Recurring Amount (\$000)
OCFO for Financial Audit Clearinghouse (FAC) Database	2
USM OCAO for Shared Services	76
Total	78

OCFO for Financial Audit Clearinghouse (FAC) Database

This transfer is for projected decreased costs for the DHS Financial Audit Clearinghouse Database.

USM OCAO for Shared Services

This transfer is for projected decreased costs for DHS Shared Services funded by the DHS WCF.

DHS Management for St. Elizabeths Security(\$2,800)

PPA Breakdown - DHS Management for St. Elizabeths Security		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	(2,800)
		(2,800)

This request supports the transfer of \$2.8 million from the Coast Guard to the DHS Departmental Management and Operations for campus security responsibilities. In FY 2014, the Office of Security Operations will assume responsibility for necessary campus security costs for St. Elizabeths. A portion of the President’s FY 2013 budget supported the Coast Guard’s requirements for campus security at the St. Elizabeths location.

Transfer Follow-On\$0

PPA Breakdown - Transfer Follow-On		Total (\$000)
PPA I: Military Personnel (11 FTP, 11 FTE)		
	Military Pay and Allowances	1,066
	Military Health Care	109

Mandatory Personnel Entitlements

Annualization of FY 2013 Military Pay Raise.....\$9,014

PPA Breakdown - Annualization of FY 2013 Military Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	9,014
		9,014

Provides one quarter of funding to annualize the anticipated FY 2013 military (1.7 percent) pay raise.

FY 2014 Military Pay Raise\$15,563

PPA Breakdown - FY 2014 Military Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances (Basic Allowance for Housing)	15,525
	Permanent Change of Station	38
		15,563

Provides three quarters of funding for the FY 2014 military (1.0 percent) pay raise.

FY 2014 Civilian Pay Raise.....\$5,837

PPA Breakdown - FY 2014 Civilian Pay Raise		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	5,837
		5,837

Provides three quarters of funding for the FY 2014 civilian (1.0 percent) pay raise.

FY 2014 Military Allowances.....\$13,528

PPA Breakdown - FY 2014 Military Allowances		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	11,450
	Military Health Care	12,400
	Permanent Change of Station	(10,322)
		13,528

Provides funding to maintain current services and ensure parity of military pay, allowances, and health care with DoD. This request includes additional funding for Basic Allowance for Housing

(BAH) changes scheduled to take effect on January 1, 2014, and increased health care costs for military members, dependants, and eligible beneficiaries. Health care costs are forecasted using actuarial projections and include funding for Coast Guard clinics, TRICARE, pharmaceuticals, use of DoD military treatment facilities and Public Health Service physicians serving at Coast Guard medical facilities.

GSA Rent and Security\$1,501

PPA Breakdown - GSA Rent and Security		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	1,501
		1,501

Funds security cost increases at General Services Administration (GSA) buildings occupied by Coast Guard or under Coast Guard control. These costs are demand accounts paid to the Federal Protective Service (FPS) via GSA billing to provide the critical security needs of Coast Guard personnel and material. The increase of \$1.5 million above base resources will enable the Coast Guard to continue to receive necessary security services at GSA-leased buildings occupied by Coast Guard personnel.

Operating and Maintenance Funds for New Assets

Shore Facility Follow-On\$2,760

PPA Breakdown - Shore Facility Follow-On		Total (\$000)
PPA II: Civilian Personnel (2 FTP, 1 FTE)		
	Civilian Pay and Allowances	85
PPA III: Training and Recruiting		
	Training and Education	1
	Recruiting and Training Centers	4
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	87
	7th District	248
	8th District	120
	Headquarters Directorates	205
	Headquarters Units	367
PPA V: Centrally Managed Accounts		
	Central Accounts	2
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	1,641
		2,760

Fulfills funding needs associated with operation and maintenance of recapitalized shore facilities scheduled for completion prior to FY 2014. Funding is required for energy, utility services, grounds maintenance, routine repairs, and housekeeping. Funding also supports depot level non-recurring maintenance and repairs (e.g., system component renewals, preventive maintenance, emergency response repairs, scheduled inspections, etc.) anticipated throughout the life of the facilities.

The funding provides the resources required to maintain and operate new assets/improvements acquired through the execution of the following AC&I facility projects:

- Sector Houston-Galveston Industrial Boat Maintenance Facility
- CGC Juniper Newport RI Pier Recapitalization
- Base Elizabeth City, Recapitalization of Thrun Hall Barracks
- Station Montauk Housing Acquisition
- Sector Key West FRC Homeport Improvements
- Sector San Juan FRC Homeport Improvements
- Base Miami FRC Vessel Support Facility
- Training Center Yorktown Hull Maintenance & Electrical Training Facility
- Training Center Petaluma Waste Water Treatment Facility

This funding is critical to adequately maintain new or improved facilities.

Response Boat - Medium (RB-M) Follow-On\$3,125

PPA Breakdown - Response Boat - Medium (RB-M) Follow-On		Total (\$000)
PPA I: Military Personnel (15 FTP, 8 FTE)		
	Military Pay and Allowances	484
	Military Health Care	74
	Permanent Change of Station	143
PPA III: Training and Recruiting		
	Training and Education	263
	Recruiting and Training Centers	152
PPA IV: Operating Funds and Unit Level Maintenance		
	5th District	4
	7th District	10
	8th District	4
	11th District	10
	13th District	10
	14th District	10
	Headquarters Directorates	1,166
	Headquarters Units	40
	Other Activities	2
PPA V: Centrally Managed Accounts		
	Central Accounts	59
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	354
	Civil/Ocean Engineering and Shore Facility Maintenance	260
	Vessel Maintenance	80
		3,125

Provides follow-on funding for operation, maintenance, and support of 30 RB-Ms. The increased operating costs of the new RB-Ms are driven primarily by the capability enhancements (e.g. speed, endurance and sensors) that are required to successfully execute current missions. This follow-on request is consistent with prior-year funding requests to support newly delivered RB-Ms. This request also provides funding and personnel for maintenance support requirements, as well as instructors for Training Center Yorktown to support RB-M fleet training requirements.

Rescue 21 (R21) Follow-On.....\$4,095

PPA Breakdown - Rescue 21 (R21) Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Units	3,033
PPA V: Centrally Managed Accounts		
	Central Accounts	479
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	583
		4,095

Provides follow-on funding to support R21, the Coast Guard’s primary tool to support command, control, and communications in the inland and coastal zones. R21 is a key enabler for effective emergency response in the maritime domain. R21 follow-on funding supports operations and maintenance of R21 equipment, circuit connectivity, property and power, training, and technology refreshment.

The FY 2014 request provides funding for maintenance of Coast Guard-owned towers, Western Rivers communications sites, and encrypted communications with Over the Air Re-Key (OTAR).

Fast Response Cutter (FRC) Follow-On.....\$12,904

PPA Breakdown - Fast Response Cutter (FRC) Follow-On		Total (\$000)
PPA I: Military Personnel (106 FTP, 53 FTE)		
	Military Pay and Allowances	3,438
	Military Health Care	520

	Central Accounts	1,217
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	524
	Vessel Maintenance	2,104
		12,904

Fast Response Cutter (FRC) Follow-On O&M for Hulls 10-12

Provides operation and maintenance funding for the Key West-based FRC hulls 10-12, scheduled for delivery in 2014. The FRC is the replacement cutter for the aging 110' Island Class patrol boats and is larger and more capable than the 110-foot patrol boat with advanced electronics and enhanced capabilities.

Fast Response Cutter (FRC) Crews for Hulls 11-14

Provides personnel to operate and maintain hulls 11-12 homeported in Key West, FL and the first two San Juan, PR-based FRC hulls. Advanced arrival of the crews is critical to ensure appropriate training and readiness prior to vessel delivery.

National Security Cutter (NSC) Follow-On\$19,838

PPA Breakdown - National Security Cutter (NSC) Follow-On		Total (\$000)
PPA I: Military Personnel (146 FTP, 106 FTE)		
	Military Pay and Allowances	7,193
	Military Health Care	1,046
	Permanent Change of Station	1,247

PPA IV: Operating Funds and Unit Level Maintenance		
	Pacific Area	1,964
	Headquarters Directorates	2,683
	Headquarters Units	160
	Other Activities	20
PPA V: Centrally Managed Accounts		
	Central Accounts	1,135
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	1,895
	Vessel Maintenance	1,863
		19,838

WMSL Follow-On O&M for NSC 4

Provides operations and maintenance funding for NSC 4 scheduled for delivery in Q4 FY 2014 and homeported in Charleston, SC. The Legend Class Cutters are replacing the legacy High Endurance Cutters.

WMSL Crews Echo and Foxtrot for NSCs 4 and 5

This initiative provides personnel to operate NSCs 4-5. Crews must complete critical pipeline and pre-acceptance training 1 year in advance of delivery in order to be ready for sea trials and other post-delivery work that requires a fully trained crew. Since delivery of BERTHOLF (NSC-1), the Coast Guard has reduced the pipeline and pre-delivery training timeline for the first phase of a NSC crew from 2 years to 1 year prior to vessel delivery.

Maritime Patrol Aircraft (MPA) Follow-On.....\$13,880

PPA Breakdown - Maritime Patrol Aircraft (MPA) Follow-On		Total (\$000)
PPA I: Military Personnel (31 FTP, 31 FTE)		
	Military Pay and Allowances	2,322
	Military Health Care	302
	Permanent Change of Station	302
PPA III: Training and Recruiting		
	Training and Education	2,158
	Recruiting and Training Centers	83
PPA IV: Operating Funds and Unit Level Maintenance		
	8th District	491
	Headquarters Directorates	1,331
	Headquarters Units	763
	Other Activities	6
PPA V: Centrally Managed Accounts		
	Central Accounts	111
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	6,011
		13,880

HC-144A Aircraft Follow-on

Provides funding for the operation and maintenance of Maritime Patrol Aircraft (HC-144A) 16 and 17, and funding for personnel to operate and support the 17th aircraft. These aircraft and personnel will be assigned to Air Station Corpus Christi, TX

HC-144A Aircraft Mission System Pallet (MSP) Follow-on

Provides funding for the maintenance and upgrades of the first 17 HC-144A aircraft Mission System Pallets (MSPs). The MSP is the sensor package installed on each operational HC-144A aircraft.

Manned Covert Surveillance Aircraft (MCSA) Follow-On.....\$2,495

PPA Breakdown - Manned Covert Surveillance Aircraft (MCSA) Follow-On		Total (\$000)
PPA I: Military Personnel (12 FTP, 3 FTE)		
	Military Pay and Allowances	268
	Military Health Care	30
	Permanent Change of Station	132
PPA III: Training and Recruiting		
	Training and Education	1,413
	Recruiting and Training Centers	4
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	126
	Headquarters Directorates	40
	Headquarters Units	9
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	31
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	441
		2,495

Provides funding for the operation, maintenance, and personnel for the first MCSA, which is planned to operate out of Miami, FL. The MCSA, scheduled to arrive at Air Station Miami in September 2014, will provide an additional 1,000 hours of maritime surveillance to the Coast Guard's Seventh District and JIATF-S operating areas.

Coast Guard Air Station Corpus Christi Transition.....\$5,607

PPA Breakdown - Coast Guard Air Station Corpus Christi Transition		Total (\$000)
PPA I: Military Personnel (21 FTP, 11 FTE)		
	Military Pay and Allowances	645
	Military Health Care	104
	Permanent Change of Station	156
PPA III: Training and Recruiting		
	Training and Education	56
	Recruiting and Training Centers	22
PPA IV: Operating Funds and Unit Level Maintenance		
	8th District	1,951
	9th District	116
	Headquarters Directorates	50
	Headquarters Units	19
	Other Activities	2
PPA V: Centrally Managed Accounts		
	Central Accounts	31
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	1,658
	Electronics Maintenance	797
		5,607

Provides funding for the transition from operating HU-25 aircraft to operation of HC-144A aircraft at Air Station Corpus Christi. The change from a medium low-wing fanjet aircraft (HU-25) to a high-wing turboprop patrol and transport aircraft (HC-144A) requires additional support including cargo weighing and loading equipment, lavatory service vehicles, larger aircraft checkstands, propeller dollies and engine stands, and larger aircraft tow tractors, consistent with the Life Cycle Cost Estimate.

DHS Headquarters Consolidation Follow-On\$5,150

PPA Breakdown - DHS Headquarters Consolidation Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(874)
PPA V: Centrally Managed Accounts		
	Central Accounts	6,024
		5,150

Provides resources to fund increased and annualized recurring operation and maintenance costs associated with the relocation of Coast Guard Headquarters to the new facility at the St. Elizabeths Campus in Washington, DC. The expected increase in lease payments and annualized

costs for security and shuttle services are above the costs associated with the current location of Coast Guard Headquarters at Buzzard's Point, Washington D.C.

Base Re-Allocations (Non-Add)

Deployable Specialized Forces[\$55,637]

PPA Breakdown - Deployable Specialized Forces		Total (\$000)
PPA I: Military Personnel (-157 FTP, -157 FTE)		
	Military Pay and Allowances	(14,413)
	Military Health Care	(1,555)
	Permanent Change of Station	(732)
PPA II: Civilian Personnel (-17 FTP, -17 FTE)		
	Civilian Pay and Allowances	(2,094)
PPA III: Training and Recruiting		
	Training and Education	(406)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(3,736)

PPA V: Centrally Managed Accounts		
	Central Accounts	42
		55,637

This initiative implements an on-budget, resource-neutral change to Coast Guard Deployable Specialized Forces (DSF). This proposal will disestablish the Coast Guard’s Deployable Operations Group (DOG) and will integrate command and control for all DSF at the Atlantic and Pacific Areas in FY 2014, thereby shifting training oversight to Force Readiness Command

(FORCECOM) and programmatic oversight to Coast Guard Headquarters. This initiative will also reapportion capabilities and personnel to better address proficiency requirements by making the existing training facility at Special Missions Training Center (SMTC) in Camp LeJeune, NC the Coast Guard’s center of excellence for tactical operations. The actions to return DSF to Area Control and to centralize the DSF training enterprise do not require additional resources in FY14 and will not create any new out year funding needs.

To most effectively realign DSF Command and Control and to make improvements to the DSF training system, the Coast Guard will implement several policy changes and personnel moves beginning in FY 2014. Specifically, the Coast Guard will transfer full time positions (FTP) and funding from the DOG to each of the Area and Headquarters staffs, and FORCECOM. This initiative will also disestablish the DOG. The Coast Guard will centralize tactical operator training by transferring positions and funding from the DOG and from MSSTs throughout the Coast Guard enterprise to SMTC.

Military FTP and FTE Transfer to Civilian.....[\$8,262]

PPA Breakdown - Military FTP and FTE Transfer to Civilian		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	(6,869)
	Military Health Care	(901)
	Permanent Change of Station	(340)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	8,262
PPA III: Training and Recruiting		
	Training and Education	(152)
		0

Transfers 91 military FTP/FTE to civilian FTP/FTE. These conversions are consistent with GAO recommendations to change military positions funded in PPA I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Benefits).

PPA Funding Technical Transfers [\$67,817]

PPA Breakdown - PPA Funding Technical Transfers		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	6,526
	Military Health Care	(397)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	1,002

Correction to Prior Year Functional Transfer	[1,480]

This request implements recurring technical base adjustments to reallocate funding to the appropriate PPA for compliance with Coast Guard financial policy and proper alignment to the modernized operations and support organizations of the Coast Guard. All requested adjustments retain the original intent and purpose of the funding appropriated; however, the PPA required to properly execute these items has been determined to differ from that to which the funding was originally requested and appropriated. Additional detail on select base adjustments provided below.

Rescue 21 System Support: Rescue 21 is the Coast Guard's advanced command, control, and direction-finding communications system. While transitioning from acquisition to sustainment from 2004 – 2012, the Coast Guard was appropriated funds in PPAs IV (Operating Funds and Unit Level Maintenance), V (Centrally Managed Accounts), and VI (Depot Level Maintenance) for follow-on support of the system. Coast Guard policy now specifies that the proper account for funds execution for Command, Control, Communications and IT systems, as well as replacement, installation, major maintenance, and system of support of such systems, is PPA VI. This request places all funding for the maintenance and support of Rescue 21 in PPA VI.

VTS Sustainment Funding: The Ports and Waterways Safety System (PAWSS) was a major acquisition project that built Vessel Traffic Services (VTS) where necessary and replaced legacy VTS systems. PAWSS follow-on funding included support funding originally appropriated in PPA IV (Operating Funds and Unit Level Maintenance). Coast Guard policy now specifies that

the proper account for funds execution for Command, Control, Communications and IT systems, as well as replacement, installation, major maintenance, and system of support of such systems, is PPA VI. This request moves the VTS support funding from PPA IV to PPA VI for execution.

Child Care Parity: In FY 2012, funding was appropriated for Child Care Subsidies to help the Coast Guard Child Development Services achieve parity with the Department of Defense. This funding was appropriated to PPA IV. However, by Coast Guard policy, PPA I contains the appropriate accounts for execution of Military Pay and Benefits funding. This request moves funding from PPA IV to PPA I for Child Care Subsidy benefits.

Decreases

Termination of One Time Costs (\$29,049)

PPA Breakdown - Termination of One-Time Costs		Total (\$000)
PPA I: Military Personnel		
	Permanent Change of Station	(8,466)

	Central Accounts	(494)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	1,376
	Vessel Maintenance	(1,650)
		(14,195)

The Coast Guard will decommission two legacy High Endurance Cutters (WHECs) being replaced by more capable National Security Cutters.

Cutter Shoreside Support Personnel Reduction(\$809)

PPA Breakdown - Cutter Shoreside Support Personnel Reduction		Total (\$000)
PPA I: Military Personnel (-19 FTP, -10 FTE)		
	Military Pay and Allowances	(714)
	Military Health Care	(94)
	Permanent Change of Station	110
PPA III: Training and Recruiting		
	Training and Education	(19)
	Recruiting and Training Centers	(18)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(9)
	Headquarters Directorates	(7)
	Headquarters Units	(24)
	Other Activities	(2)
PPA V: Centrally Managed Accounts		
	Central Accounts	(32)
		(809)

Coast Guard will eliminate WHEC Maintenance Augmentation Team (MAT) and Surface Forces Logistics Center (SFLC) billets associated with the decommissioning of two WHECs (described above). These billets are specifically associated with WHEC depot-level maintenance. The billets associated with depot-level maintenance for the National Security Cutters replacing WHECs are established and funded separately as those assets come online.

Eight HU-25 Aircraft.....(\$9,371)

PPA Breakdown - Eight HU-25 Aircraft		Total (\$000)
PPA I: Military Personnel (-71 FTP, -36 FTE)		
	Military Pay and Allowances	(2,558)
	Military Health Care	(352)
	Permanent Change of Station	381
PPA III: Training and Recruiting		
	Training and Education	(361)
	Recruiting and Training Centers	(43)
PPA IV: Operating Funds and Unit Level Maintenance		
	8th District	(243)
	Headquarters Directorates	(1,173)
	Headquarters Units	(426)
	Other Activities	(7)
PPA V: Centrally Managed Accounts		
	Central Accounts	(86)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(4,503)
		(9,371)

Decommissions the eight remaining HU-25 aircraft in the Coast Guard’s inventory. These eight aircraft are assigned as follows:

- Air Station Corpus Christi, TX (3)
- Aviation Logistics Center, Elizabeth City, NC (3)
- Aviation Training Center, Mobile, AL (2)

HC-144A aircraft are replacing the HU-25s.

Two HC-130 Aircraft.....(\$7,722)

PPA Breakdown - Two HC-130 Aircraft		Total (\$000)
PPA I: Military Personnel (-58 FTP, -29 FTE)		
	Military Pay and Allowances	(1,982)
	Military Health Care	(287)
	Permanent Change of Station	302
PPA III: Training and Recruiting		
	Training and Education	(107)
	Recruiting and Training Centers	(42)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	(110)
	11th District	(110)
	Headquarters Directorates	(2,023)
	Other Activities	(6)
PPA V: Centrally Managed Accounts		
	Central Accounts	(60)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(3,297)
		(7,722)

Eliminates funding and billets associated with the retirement of two HC-130H aircraft, currently assigned to Air Station Clearwater, FL and Air Station Sacramento, CA. This brings the total fleet to 22 operational aircraft, including a mix of HC-130H and newer HC-130J aircraft. With the average age of 28 years, the HC-130H fleet has become increasingly difficult to maintain and sustain operationally. Coast Guard will remove two of the oldest HC-130H airframes that are in the worst condition. The loss of these airframes will be mitigated by the delivery of new HC-130J airframes.

Air Facilities Charleston, SC and Newport, OR(\$5,081)

PPA Breakdown - Air Facilities Charleston, SC and Newport, OR		Total (\$000)
PPA I: Military Personnel (-55 FTP, -28 FTE)		
	Military Pay and Allowances	(2,040)
	Military Health Care	(272)
	Permanent Change of Station	294
PPA III: Training and Recruiting		
	Training and Education	(192)
	Recruiting and Training Centers	(35)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	104
	13th District	105
	Headquarters Directorates	(593)
	Other Activities	(6)
PPA V: Centrally Managed Accounts		
	Central Accounts	(66)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(2,380)
		(5,081)

Coast Guard will consolidate Air Facilities (AIRFACs) by closing seasonal AIRFACs at Charleston, SC, and Newport, OR, and removing their four HH-65 helicopters from service. The operational activities at these AIRFACs will be reintegrated into each of their parent units, Air Station Savannah, GA, and Air Station North Bend. Search and Rescue response times within the AIRFAC Areas of Responsibility (AORs) will remain within minimum national standards when executed from the parent Air Stations.

Management Efficiencies.....(\$52,725)

PPA Breakdown – Management Efficiencies		Total (\$000)
PPA I: Military Personnel (-45 FTP, -24 FTE)		
	Military Pay and Allowances	(1,495)
	Military Health Care	(649)
	Permanent Change of Station	1,321
PPA II: Civilian Personnel (-56 FTP, -29 FTE)		
	Civilian Pay and Allowances	(8,334)
PPA III: Training and Recruiting		
	Training and Education	(120)
	Recruiting and Training Centers	(869)

	Central Accounts	(8,921)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(1,440)
	Electronics Maintenance	(1,982)
	Civil/Ocean Engineering and Shore Facility Maintenance	(903)
	Vessel Maintenance	(2,246)
		(52,725)

Management Efficiencies	FTP	FTE	Amount (\$000)
Enterprise-wide Support Personnel	(58)	(30)	(2,235)
Front-line Mission Support Staffing	(99)	(51)	(5,042)
Telecommunications and Information Systems Command (TISCOM) In-sourcing	81	41	(2,560)
Defense Messaging System	(16)	(8)	(994)
Consolidate Atlantic and Pacific Command Areas Master Stations	(9)	(5)	(509)
Smartphone Devices & Service Contracts	0	0	(3,300)
Government Vehicle Fleet Mix	0	0	(800)
Travel and Administrative Oversight	0	0	(25,724)
GSA Leased Footprint	0	0	(800)
Divest Coast Guard Housing	0	0	(750)
Civilian Personnel Account Management	0	0	(6,000)
Coast Guard Base Review	0	0	(4,011)
Total	(101)	(53)	(52,725)

Enterprise-wide Support Personnel: Reduces mission support billets at locations throughout the Coast Guard commensurate with workforce reductions proposed in this and prior year budgets. These support billets include administrative, medical, and procurement staff positions.

Front-line Mission Support Staffing: Reduces support billets at Sectors where both Sectors and Bases are geographically collocated; where Coast Guard's organization-wide staffing evaluation identified potential savings; and where positions are expected to incur the least impact on front-line operations.

Telecommunications and Information Systems Command (TISCOM) In-sourcing: Replaces 73 contractor positions with 81 military billets at the Telecommunication and Information Systems Command (TISCOM) resulting in recurring savings. The positions provided through this in-sourcing request will be used to staff the 24x7 watch positions at TISCOM's Enterprise Management Facility (EMF) and Coast Guard Computer Incident Response Team (CGCIRT). In addition to reducing costs, this initiative provides critical opportunities for the Coast Guard's Information Systems Technician (IT) rating to enhance their technical skills through hands on experience with Coast Guard systems, software, and networks.

Defense Messaging System: The Department of Defense revised its approach to organizational messaging; as a result, the Coast Guard is no longer required to fully implement the initially envisioned requirements for management of DMS. The Coast Guard will still maintain required capabilities within the system, providing support to Coast Guard users. The consolidation will result in the reduction of 17 positions from Communication Area Master Station (CAMS) Atlantic and Pacific.

Consolidate Atlantic and Pacific Command Areas Master Stations: Reduces 9 positions within the Coast Guard communications stations program. The Coast Guard's overarching communication system includes Master Stations Atlantic and Pacific, Communications Stations, and individual units. The Service's communication system remains highly capable and savings can be realized as a result of investment in modern equipment and increased use of commercial

satellite systems. Moreover, as Coast Guard assets have transitioned to satellite communications capabilities, personnel intensive high frequency communications equipment have been scaled back accordingly.

Smartphone Devices & Service Contracts: Reduces the total number of wireless email devices issued to Coast Guard personnel by approximately 2,000. A change to internal policy will generally limit the use of smartphones to senior personnel in the Coast Guard. Issuance of a wireless device will be determined by employing needs-based issuance criteria.

Government Vehicle Fleet Mix: This change will shift the Coast Guard's leased government vehicle fleet to more fuel efficient and smaller vehicles where operationally feasible. The Coast Guard will also reduce the size of its vehicle fleet by 5 percent, but continue vehicle support for critical mission support activities.

Travel and Administrative Oversight: Mitigates unnecessary costs for travel related to professional development, unit level training, off-site meetings, conferences, attending industry sponsored activities, external engagements, unit/site visits, and international engagements. Furthermore, the Coast Guard will optimize funding for office supplies, communication services, units and grounds maintenance, and printing/duplication projects while maintaining a similar standard of service. This initiative builds upon prior-year initiatives.

GSA Leased Footprint: Reduces the Coast Guard's GSA leased footprint within the National Capital Region (NCR) by consolidating several leases and ensuring the new leased footprint aligns with the Coast Guard's current space standards. Multiple Coast Guard commands with responsibilities and lines of business that are facilitated by not transitioning to the St. Elizabeths facility will be consolidated into a leased space in Arlington, VA. Collectively, these efforts will reduce the overall space requirements within the NCR for the Coast Guard.

Divest Coast Guard Housing: Reduces maintenance costs by eliminating 300 housing units identified as excess by the Coast Guard's National Housing Assessment. This initiative achieves savings by maintaining these units in a nonoperational status (reducing operating and maintenance requirements) until the units can be divested, leveraging the recent authorities provided in the 2010 Coast Guard Authorization Act. The Coast Guard owns and maintains approximately 4,000 family housing units, many of which are not fully occupied because of rental market conditions and an extensive backlog of maintenance work affecting habitability. In order to achieve recurring savings for FY 2014 and beyond, the excess housing units will be secured and readied for disposition during FY 2013.

Civilian Personnel Pay Account Management: Reduces excess discretionary funding for summer and entry-level temporary hires, permanent change of station (PCS) authorizations, premium pay, awards and recruitment and retention incentives, without eliminating those initiatives.

Coast Guard Base Review: Drawing from an in-depth review of Coast Guard program base budgets, this reduction eliminates funding for lower priority activities to fund the most critical Service needs. The Coast Guard will make targeted reductions to base funding for the lowest

priority activities in the areas of: Administration, Supplies, Contracted Support, Studies and Outreach, and Maintenance of Facilities and Equipment.

Programmatic Reductions

Coast Guard Headquarters Staffing(\$6,719)

PPA Breakdown - Coast Guard Headquarters Staffing		Total (\$000)
PPA I: Military Personnel (-36 FTP, -18 FTE)		
	Military Pay and Allowances	(1,943)
	Military Health Care	(178)
	Permanent Change of Station	272
PPA II: Civilian Personnel (-72 FTP, -36 FTE)		
	Civilian Pay and Allowances	(4,369)
PPA III: Training and Recruiting		
	Training and Education	(77)
	Recruiting and Training Centers	(20)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(223)
	Other Activities	(4)
PPA V: Centrally Managed Accounts		
	Central Accounts	(177)
		(6,719)

Reduces Headquarters personnel by 5 percent in FY 2014, and 15 percent below FY 2012 levels by extending the scope of the current Coast Guard National Capital Civilian Hiring Freeze and continuing to use normal workforce attrition tools for the military workforce. Specifically, in FY 2014 the Coast Guard will reduce 100 headquarters staff positions.

Intelligence Program(\$1,457)

PPA Breakdown - Intelligence Program		Total (\$000)
PPA I: Military Personnel (-11 FTP, -6 FTE)		
	Military Pay and Allowances	(415)
	Military Health Care	(55)
	Permanent Change of Station	66
PPA II: Civilian Personnel (-15 FTP, -8 FTE)		
	Civilian Pay and Allowances	(933)
PPA III: Training and Recruiting		
	Training and Education	(15)
	Recruiting and Training Centers	(7)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(18)
	Pacific Area	(4)
	Headquarters Directorates	(13)
	Headquarters Units	(18)
	Other Activities	(1)
PPA V: Centrally Managed Accounts		
	Central Accounts	(44)
		(1,457)

Scales intelligence activities across the Coast Guard through a 26 position reduction that consolidates analysts at the Maritime Intelligence Fusion Centers (MIFC) and Intelligence Coordination Center (ICC), transfers IT positions from Coast Guard Headquarters to the ICC, consolidates Area and District Intelligence staff functions and eliminates the 24/7 call-in watch at the El Paso Intelligence Center (EPIC).

Drug and Alcohol Program Inspector.....(\$312)

PPA Breakdown - Drug and Alcohol Program Inspectors		Total (\$000)
PPA I: Military Personnel (-6 FTP, -3 FTE)		
	Military Pay and Allowances	(262)
	Military Health Care	(30)
	Permanent Change of Station	36

	1st District	(4)
	5th District	(3)
	7th District	(6)
	8th District	(10)
	9th District	(3)
	11th District	(6)
	Other Activities	(1)
PPA V: Centrally Managed Accounts		
	Central Accounts	(10)
		(312)

Reduces the District Drug and Alcohol Program Inspectors (DAPI) by 6 positions. As part of this reduction, the oversight of third party agents, including agents that service smaller companies and uninspected passenger vessels, will be reduced. Coast Guard Marine Inspectors and Investigators are provided with sufficient training to carry out routine DAPI functions as they relate to marine employers. Additionally, the Coast Guard will leverage the Coast Guard Auxiliary to stress alcohol and drug-free operating expectations while conducting outreach activities with new operators.

International Port Security Program.....(\$454)

PPA Breakdown - International Port Security Program		Total (\$000)
PPA I: Military Personnel (-6 FTP, -3 FTE)		
	Military Pay and Allowances	(368)
	Military Health Care	(30)
	Permanent Change of Station	75

	Other Activities	(1)
PPA V: Centrally Managed Accounts		
	Central Accounts	(25)
		(454)

Reduces the International Port Security (IPS) Program by 6 positions and the inspection periodicity of some foreign ports. Currently, foreign ports are inspected every two years. In FY 2012, the IPS program assessed the effectiveness of 175 port facilities in 55 countries. One additional country was found to not have adequate anti-terrorism measures in place in their ports; currently there are fifteen countries with conditions of entry in place. A memorandum of understanding with the European Commission on the mutual recognition of the Coast Guard's port facility security inspection processes was signed on September 27, 2012. With signing of this MOU, the Coast Guard will be able to reassign some of the billets at Activities Europe that have been assessing the European Union's twenty seven member states to Africa, where many of the developing countries are struggling to have effective anti-terrorism measures in their ports. The Coast Guard is also examining the expansion of its list of minimal engagement countries. Currently, these are Tier III (low risk) countries that have no more than four ships calling at U.S. ports per year on a three year rolling average. The Coast Guard will assess these countries on a less frequent basis because of lower risk of introducing terrorism to the U.S. or international maritime transportation system.

Port State Control Examinations(\$1,662)

PPA Breakdown - Port State Control Examinations		Total (\$000)
PPA I: Military Personnel (-40 FTP, -20 FTE)		
	Military Pay and Allowances	(1,353)

	Central Accounts	(50)
		(1,662)

Reduces Port State Control (PSC) Program personnel by limiting examination activities aboard some foreign flagged vessels assessed as lower risk for safety, environmental, or security concerns. The PSC Program currently conducts annual exams on foreign flagged vessels that enter the U.S. in an effort to reduce substandard foreign vessels operating in the U.S. and worldwide. The Coast Guard will reduce the examination workload aboard the lowest risk foreign flagged vessels.

Auxiliary Program Management.....(\$396)

PPA Breakdown - Auxiliary Program Management		Total (\$000)
PPA I: Military Personnel (-7 FTP, -4 FTE)		
	Military Pay and Allowances	(303)
	Military Health Care	(35)

PPA V: Centrally Managed Accounts		
	Central Accounts	(15)
		(396)

Reduces the oversight and support billets for the Coast Guard’s Auxiliary program. These personnel manage administrative requirements for the Auxiliary, as well as the legal, regulatory, and outreach efforts that come with the oversight of federally-sponsored volunteers. District Auxiliary Program Managers and Auxiliary leadership will work together to identify and pursue mitigation strategies to preserve the most critical support and services to the Auxiliary workforce.

Coast Guard Training(\$43,199)

PPA Breakdown - Coast Guard Training		Total (\$000)
PPA I: Military Personnel (-242 FTP, -146 FTE)		
	Military Pay and Allowances	(6,731)
	Military Health Care	(1,446)
	Permanent Change of Station	799
PPA II: Civilian Personnel (-13 FTP, -7 FTE)		
	Civilian Pay and Allowances	(751)

	Headquarters Directorates	(275)
	Other Activities	(2)
PPA V: Centrally Managed Accounts		
	Central Accounts	(288)
		(43,199)

This reduction will focus on Leadership, Public Affairs, Health and Safety, Legal, Finance and Procurement, and Engineering and Maintenance curricula, while maintaining training capacity for higher-priority skill sets. Decreasing reliance on contracted training support allows the Coast Guard to retain critical competencies within the Active Duty, Reserve, and Civilian workforce. The training system will group A- and C-schools into centers of expertise, to maximize efficient use of competencies and experience currently held organically in the Service. Training offered through distance learning (web-based) courses will increase to realize savings associated with a reduction in resident training programs. On-the-job training will continue to be a valuable source of knowledge transfer within the workforce.

This initiative will also reduce educational benefit funding by \$10.4 million. The Coast Guard currently provides educational benefits in the form of tuition assistance to uniformed personnel (active duty and reserves), civilian employees, and commissioned Public Health Service officers who are serving in the Coast Guard to fund off-duty courses related to Coast Guard missions or Coast Guard members' professional development. Educational benefits are utilized by 80 percent of the enlisted corps, 15 percent of the officer corps, and 6 percent of civilian personnel. This initiative restricts educational benefits to enlisted members pursuing an initial undergraduate degree, and reduces the annual cap available for individual members.

Reduces accessions, support staff and operational and maintenance funds at the Coast Guard Academy (CGA), Leadership Development Center (LDC), and Officer Candidate School (OCS) commensurate with out-year accession projections as a result of an anticipated reduction in the size of the active duty military workforce and current retention levels. In recent years, CGA,

LDC and OCS student throughput maintained record high levels. Recent CGA cadet accession levels have been approximately 250 personnel per year but are projected to be reduced to 180 per year for incoming classes. Similarly, OCS throughput has been reduced to less than 100 candidates per year, approximately 50 less candidates per year based on historic averages. This initiative reduces each CGA class by approximately 12 - 13 cadets for year groups 2015-2018.

This initiative also proposes the elimination of 33 support staff personnel, which include command staff, facilities maintenance, finance, admissions and other personnel. In total, this represents an approximate 10 percent reduction in support staff personnel, and will be executed with prudence to avoid adverse impacts on CGA Academic Accreditation.

Description of Item

This program provides funding to support the Financial Management Service Improvement Initiative (FMSII) for Coast Guard and its customers. This initiative will plan, prepare, configure, test, and migrate the Coast Guard's financial management system (FMS) including the financial, contract, and asset accountability management systems to a shared service provider (SSP). The SSP will host the FMS hardware and software.

Justification

The legacy Core Accounting System (CAS) suite suffers from poorly documented customization, and is resource-intensive and non-compliant with the Federal Financial Management Improvement Act (FFMIA) of 1996. The CAS suite does not meet Statement on Standards for Attestation Engagements (SSAE) 16 Internal Controls Over Financial Reporting (ICOFR) requirements. The FMSII supports the DHS Chief Financial Officer's strategic goals to provide efficient financial management services and operations and to strengthen DHS's financial management systems. The FMSII also supports the DHS Chief Procurement Officers strategic initiative to improve federal procurement data quality and to maintain procurement systems performance. Modernization of the USCG's legacy financial systems is a critical near-term priority.

Impact on Performance

The FMSII will improve data integrity and improve and standardize business processes and financial operations. FMSII will also facilitate remediation of financial reporting material weaknesses, reduce financial transactional burden to operational units, and measurably contribute to the Department's goal of obtaining an unqualified audit opinion.

V. Exhibits and Other Supporting Materials
A. Justification of Proposed Legislative Language

Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Operating Expenses
Appropriation Language

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and repairs and service-life replacements, not to exceed a total of \$31,000,000; purchase or lease of boats necessary for overseas deployments and activities; minor shore construction projects not exceeding \$1,000,000 in total cost on any asset; payments pursuant to section 156 of Public Law 9709377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [\$6,791,178,000] \$6,755,383,000,¹ of which \$340,000,000 shall be for defense-related activities; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); and of which not to exceed \$17,000 shall be for official reception and representation expenses: *Provided*, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from owners of yachts and credited to this appropriation: *Provided further, That, without regard to the limitation as to time and condition of section 503(d), after June 30, up to \$25,000,000 may be reprogrammed within this appropriation in accordance with subsections (a) and (b) of section 503.*²

Explanation for Proposed Change:

Language Provision	Explanation
¹ ...[\$6,791,178,000] <u>\$6,755,383,000</u> ...	Dollar change only. No substantial change proposed.
² ... <i>Provided further, That, without regard to the limitation as to time and condition of section 503(d), after June 30, up to \$25,000,000 may be reprogrammed within this appropriation in accordance with subsections (a) and (b) of section 503</i>	The current reprogramming threshold of \$5,000,000 is 0.08% of Operating Expenses and was established when the total appropriation amount was approximately half of the current request. Minor variances in cost projections, such as estimates for the price of fuel, between budget formulation and execution may easily exceed the current threshold. The proposed change to reprogramming authority makes the threshold less than 0.4% of the request and applies only to reprogramming within the Operating Expenses appropriation.

PPA I Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate military personnel as they serve the Nation across all of the Coast Guard's eleven statutory missions in support of the Coast Guard's six FYHSP Programs.

Summary Justification and Explanation of Changes

Salaries and Benefits

	FY 2012	FY 2013	FY 2014	FY 2012 to
	<u>Revised Enacted</u>	<u>Annualized CR</u>	<u>Request</u>	<u>FY 2014 Change</u>
	\$ 2,916,934	\$ 2,875,758	\$ 2,811,006	\$ (105,928)

Salaries and benefits provide funds for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2014 request reflects funding for the proposed pay raise (1.0 percent), medical benefits, and other mandatory personnel entitlements. Personnel increases include personnel to operate new systems and assets, including the National Security Cutter (NSC), Fast Response Cutter (FRC), HC-144A, Response Boat-Medium (RB-M), and Manned Covert Surveillance Aircraft (MCSA), and Deployable Specialized Forces (DSF) realignment. Personnel reductions include two High Endurance Cutters, retirement of eight HU-25 and two HC-130 aircraft, closure of two air facilities, and programmatic reductions, including marine safety, intelligence and training. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

21.0 Travel

	FY 2012	FY 2013	FY 2014	FY 2012 to
	<u>Revised Enacted</u>	<u>Annualized CR</u>	<u>Request</u>	<u>FY 2014 Change</u>
	\$ 81,021	\$ 84,692	\$ 74,992	\$ (6,029)

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. Funding also supports the shipment of military members' household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2014 request reflects decreases in funding allotted for PCS travel costs, including costs associated with decommissionings or delivery of new assets, or reductions that are part of enterprise-wide efficiencies. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

22.0 Transportation of things

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 60,885	\$ 63,935	\$ 52,224	\$ (8,661)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military members' household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2014 request includes funding for PCS travel costs, including PCS costs for the crews associated with delivery of new assets, including the National Security Cutter (NSC), Fast Response Cutter (FRC), HC-144A, Manned Covert Surveillance Aircraft (MCSA), and reductions that are part of enterprise-wide efficiencies. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

23.2 Other rent

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 1,253	\$ 4,884	\$ 4,687	\$ 3,434

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.2 Other services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 14,892	\$ 47,207	\$ 53,911	\$ 39,019

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives

25.3 Purchases of goods & svcs. from gov't accounts

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 31,317	\$ 32,324	\$ 32,895	\$ 1,578

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The increase is partly due to the adjustment for Public Health Service (PHS) costs.

25.6 Medical care

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 320,512	\$ 311,299	\$ 343,620	\$ 23,108

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The request includes actuary-forecasted cost increases associated with the existing workforce, and changes in FTE through FY 2014 adjustments to base. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

26.0 Supplies and materials

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 44,554	\$ 47,423	\$ 50,402	\$ 5,848

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

42.0 Insurance claims and indemnity

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 447	\$ 1,569	\$ 1,569	\$ 1,122

Insurance claims and indemnities cover benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

Full Time Equivalent		7,336	7,526	7,582	246

PPA II Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns and Federal junior fellows) and civilian employees not otherwise covered by other PPAs.

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 778,157	\$ 776,793	\$ 780,338	\$ 2,181

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2014 request includes funding for a pay raise (1.0 percent) and civilian personnel increases associated with the addition of personnel to support new systems and assets including the NSC, FRC, the HC-144A and the cutter asset training system, and implementation of Deployable Specialized Forces (DSF) realignment. Personnel reductions include intelligence, training and other programmatic reductions. This request also includes medical benefits, and other mandatory personnel entitlements. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

21.0 Travel

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 300	\$ 400	\$ 400	\$ 100

Requested funds cover the travel costs of Coast Guard civilian employees, while in an authorized travel status, either directly or by reimbursing the traveler. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

22.0 Transportation of things

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 2,095	\$ 1,429	\$ 1,429	\$ (666)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of civilian personnel's household goods in conjunction with the acceptance of a new position. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.2 Other services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ -	\$ 1,930	\$ 1,930	\$ 1,930

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

PPA III Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. "Formal training and education" is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks.

Summary Justification and Explanation of Changes

21.0 Travel

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 42,956	\$ 51,199	\$ 52,807	\$ 9,851

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The travel request for FY 2014 includes funding derived from additional operational training requirements resulting from additional personnel to operate and maintain National Response Cutters, Fast Response Cutters, Response Boats-Medium, HC-144A and Manned Covert Surveillance aircraft, and Deployable Specialized Forces. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

22.0 Transportation of things

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 846	\$ 335	\$ 335	\$ (511)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

23.2 Other rent

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 4,682	\$ 5,158	\$ 5,158	\$ 476

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

23.3 Communication, utilities, and misc charges

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 9,267	\$ 8,858	\$ 8,698	\$ (569)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

24.0 Printing and reproduction

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 688	\$ 1,502	\$ 1,387	\$ 699

Includes printing and reproduction costs. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.1 Advisory and assistance services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 13,358	\$ 14,997	\$ 6,517	\$ (6,841)

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.2 Other services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 90,759	\$ 95,500	\$ 68,090	\$ (22,669)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.4 Operation & maintenance of facilities

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 12,844	\$ 7,850	\$ 4,184	\$ (8,660)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.7 Operation and maintenance of equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 2,593	\$ 419	\$ 545	\$ (2,048)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft, C4IRS) and supporting systems. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

26.0 Supplies and materials

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 39,385	\$ 33,046	\$ 28,302	\$ (11,083)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

31.0 Equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 4,567	\$ 5,175	\$ 5,594	\$ 1,027

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for Training Center classrooms. The FY 2014 request is for operating surface asset and Deployable Specialized Forces training systems. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

PPA IV Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders, operational units as well as headquarters units. These include National Security Cutters (NSCs), High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs), various support units, and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, equipment, parts, and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

Summary Justification and Explanation of Changes

21.0 Travel

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 164,006	\$ 154,495	\$ 112,345	\$ (51,661)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014.

22.0 Transportation of things

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 6,208	\$ 3,043	\$ 3,034	\$ (3,174)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014.

23.2 Other rent

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 21,945	\$ 20,166	\$ 20,579	\$ (1,366)

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

23.3 Communication, utilities, and misc charges

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 76,985	\$ 120,053	\$ 69,545	\$ (7,440)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft; utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements; and postal costs. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

24.0 Printing and reproduction

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 2,190	\$ 2,402	\$ 2,302	\$ 112

Includes printing and reproduction costs. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.1 Advisory and assistance services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 39,334	\$ 56,375	\$ 16,674	\$ (22,660)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014.

25.2 Other services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 293,965	\$ 313,015	\$ 320,941	\$ 26,976

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.3 Purchases of goods & svcs. from gov't accounts

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 4,730	\$ 13,211	\$ 7,521	\$ 2,791

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2014 request reflects annualization of prior year funding and surface and air asset follow-on costs.

25.4 Operation & maintenance of facilities

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 85,263	\$ 24,404	\$ 21,536	\$ (63,727)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.6 Medical care

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 4,692	\$ 1,264	\$ 1,264	\$ (3,428)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.7 Operation and maintenance of equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 24,028	\$ 34,525	\$ 29,488	\$ 5,460

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2014 request reflects the net result of annualization of prior year funding and follow-on funding for newly commissioned assets, including a National Security Cutter, Fast Response Cutters, and Maritime Patrol Aircraft.

25.8 Subsistence and support of persons

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 32,342	\$ 1,091	\$ 1,091	\$ (31,251)

Subsistence and support of persons include contractual services with the public or another Federal Government account for the board, lodging, and care of persons. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

26.0 Supplies and materials

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 420,620	\$ 473,818	\$ 427,975	\$ 7,355

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2014 request reflects the net change in the annualization of prior year initiatives, decommissioning of two High Endurance Cutters, retirement of eight HU-25 aircraft, and enterprise-wide efficiencies.

31.0 Equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 30,387	\$ 30,273	\$ 26,744	\$ (3,643)

This object class covers the purchase of capitalized and non-capitalized assets. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

42.0 Insurance claims and indemnity

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 720	\$ 528	\$ 528	\$ (192)

Insurance claims and indemnities cover benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

PPA V Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request includes critical support elements for Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc) and operational gear (ammunition) are all part of those critical support requirements.

Summary Justification and Explanation of Changes

23.1 GSA rent

	FY 2012		FY 2013		FY 2014		FY 2012 to
	Revised Enacted		Annualized CR		Request		FY 2014 Change
	\$ 91,664		\$ 93,387		\$ 105,971		\$ 14,307

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2014 increase reflects increased costs associated with the Coast Guard's move to the DHS consolidated headquarters at St. Elizabeths.

23.3 Communication, utilities, and misc charges

	FY 2012		FY 2013		FY 2014		FY 2012 to
	Revised Enacted		Annualized CR		Request		FY 2014 Change
	\$ 71,400		\$ 59,806		\$ 68,766		\$ (2,634)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014.

25.1 Advisory and assistance services

	FY 2012		FY 2013		FY 2014		FY 2012 to
	Revised Enacted		Annualized CR		Request		FY 2014 Change
	\$ 10,007		\$ 9,479		\$ 4,863		\$ (5,144)

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2014 request reflects Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

25.2 Other services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 123,609	\$ 126,641	\$ 90,056	\$ (33,553)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2014 request reflects the net result of decommissioning two High Endurance Cutters, retirement of eight HU-25 aircraft, enterprise-wide efficiencies, surface and air asset follow-on, and technical adjustments to contract funding.

25.3 Purchases of goods & svcs. from gov't accounts

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ -	\$ -	\$ 332	\$ 332

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.4 Operation & maintenance of facilities

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 1,844	\$ -	\$ -	\$ (1,844)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2014 request reflects a decrease in some centralized costs as a result of the Coast Guard's move to St. Elizabeths.

25.7 Operation and maintenance of equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 8,343	\$ 10,253	\$ 9,840	\$ 1,497

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2014 request reflects the net result of decommissioning of two High Endurance Cutters, retirement of eight HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs for new assets.

26.0 Supplies and materials

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 8,925	\$ 11,405	\$ 11,405	\$ 2,480

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

31.0 Equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 27,857	\$ 26,557	\$ 27,623	\$ (234)

This object class covers the purchase of capitalized and non-capitalized assets. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

PPA VI Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft, electronics systems, shore facilities and vessels not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft, and aircraft equipment.

Summary Justification and Explanation of Changes

21.0 Travel

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 15,634	\$ 17,608	\$ 13,749	\$ (1,885)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2014 request reflects travel funding requirements including implementation of new travel policies in support of the Administration's Campaign to Cut Waste.

22.0 Transportation of things

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ -	\$ -	\$ 235	\$ 235

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

23.3 Communication, utilities, and misc charges

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 4,254	\$ 3,098	\$ 3,244	\$ (1,010)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.1 Advisory and assistance services

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 105,586	\$ 45,447	\$ 39,123	\$ (66,463)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.2 Other services

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 338,072	\$ 258,900	\$ 291,230	\$ (46,842)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.3 Purchases of goods & svcs. from gov't accounts

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 726	\$ -	\$ 940	\$ 214

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.4 Operation & maintenance of facilities

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 107,482	\$ 79,014	\$ 77,983	\$ (29,499)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

25.7 Operation and maintenance of equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 169,013	\$ 331,764	\$ 317,831	\$ 148,818

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats and aircraft) and supporting systems. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

25.8 Subsistence and support of persons

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 85	\$ -	\$ -	\$ (85)

Subsistence and support of persons include contractual services with the public or another Federal Government account for the board, lodging, and care of persons. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

26.0 Supplies and materials

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 177,417	\$ 206,109	\$ 186,934	\$ 9,517

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The change is largely an artifact of the display which includes OCO obligations for FY 2012, but not FY 2014 and an adjustment for FY 2013 initiatives.

31.0 Equipment

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 46,838	\$ 43,321	\$ 44,654	\$ (2,184)

This object class covers the purchase of capitalized and non-capitalized assets. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

32.0 Land and structures

FY 2012	FY 2013	FY 2014	FY 2012 to
Revised Enacted	Annualized CR	Request	FY 2014 Change
\$ 22,771	\$ 10,608	\$ 7,905	\$ (14,866)

The FY 2014 request reflects surface asset follow-on costs. The change is largely an artifact of the display which includes an adjustment for FY 2013 initiatives.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have been prioritized based on risk into a Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2015 budget.

Coast Guard requests (\$2.560M) and 41 FTE for the FY 2014 DHS Balanced Workforce Strategy.

Position Type	FY 2012 Revised Enacted		FY 2013 Annualized CR		FY 2014 Annualization		FY 2014 Follow On		FY 2014 Increase From FY 2012	
	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos	FTE	Pos.	FTE

Telecommunication/IT Specialists	-	-	-	-	-	-	-	-	81	41
Intelligence	4	4	-	-	-	-	-	-	-	-
Total	-	-	33	33	-	-	-	-	81	41

FY 2014 DHS Balanced Workforce Strategy

In FY 2014, the Coast Guard proposes converting a technical services contract costing approximately \$9.5 million to governmental service using 81 full-time military positions costing approximately \$7.2 million. This conversion will achieve a total saving of approximately \$2.6 million in operating expenses. Implementation of this contract conversion will have a minimal overlap period (1-2 weeks), and all contractor functions will be transferred to the new federal employees.

Annualization and Follow-On of FY 2013 Annualized CR DHS Balanced Workforce Strategy

Consistent with the Department of Homeland Security's (DHS) Balanced Workforce Strategy (BWS) requirements, the Coast Guard continues to conduct a phased review of all of its professional services contracts to determine if any of the work performed must or should be performed by government employees. The Coast Guard did not convert any Tier 1 contracts in FY 2013.

Physicians' Comparability Allowance (PCA) Worksheet

Department of Homeland Security: U. S. Coast Guard

Table 1

		PY 2012 (Actual)	CY 2013 (Estimates)	BY 2014 (Estimates)
1) Number of Physicians Receiving PCAs		3	5	5
2) Number of Physicians with One-Year PCA Agreements		0	0	0
3) Number of Physicians with Multi-Year PCA Agreements		3	5	5
4) Average Annual PCA Physician Pay (without PCA payment)		\$153,015	\$160,665	\$168,699
5) Average Annual PCA Payment		\$30,000	\$30,000	\$30,000
6) Number of Physicians Receiving PCAs by Category (non-add)	Category I Clinical Position	0	1	1
	Category II Research Position	0	0	0
	Category III Occupational Health	3	4	4
	Category IV-A Disability Evaluation	0	0	0
	Category IV-B Health and Medical Admin	0	0	0

- 7) If applicable, list and explain the necessity of any additional physician categories designated by your agency (for categories other than I through IV-B). Provide the number of PCA agreements per additional category for the PY, CY and BY.

N/A

- 8) Provide the maximum annual PCA amount paid to each category of physician in your agency and explain the reasoning for these amounts by category.

During FY12, \$90,000 in PCA was paid to three Coast Guard physicians in Category III at the National Maritime Center (NMC). These physicians ensure medical compliance of licensed merchant mariners.

- 9) Explain the recruitment and retention problem(s) for each category of physician in your agency (this should demonstrate that a current need continues to persist).

NMC is situated in the National Capital Region commuting area with four private hospitals, a major VA Regional Medical Center, as well as two additional local VA facilities and is therefore subject to a significant level of competition in the hiring of physicians. In addition, the VA is authorized by P.L. 108-445 (Current pay set Federal Register: August 7, 2009 (Volume 74, Number 151) DOCID: fr07au09-126 FR Doc E9-18998) to pay market level physician salaries that the Coast Guard cannot compete with as evidenced by the declination of several candidates for physician positions. For example, an entry level physician at VA is now paid approximately \$190,000 while the best the Coast Guard can offer at the GS-14 level is \$166,771 annually without recurring retention bonuses throughout the entirety of the physician's Coast Guard career. Therefore recruiting an experienced physician with a limited specialty such as occupational medicine is made that much more difficult by the higher salary paid by the VA under current law. The local VA Center regularly has approximately 10 vacancies announced at salary ranges from \$97,000 to \$295,000 per year. Until implementing PCA NMC experienced three long term vacancies of category III physicians with few qualified candidates, one applicant presented a revoked medical license and numerous qualified applicants declined based on salary or retirement benefit considerations.

10) Explain the degree to which recruitment and retention problems were alleviated in your agency through the use of PCAs in the prior fiscal year.

NMC used a combination of Recruitment incentives – Superior Qualifications Appointments combined with recruitment and retention bonuses – in addition to PCA to approach parity with VA physicians in NCR. Use of PCA with recruitment and retention bonuses resulted in recruiting two of three long-standing (2 year) vacancies.

11) Provide any additional information that may be useful in planning PCA staffing levels and amounts in your agency.

**U. S. COAST GUARD
ENVIRONMENTAL COMPLIANCE AND RESTORATION**

I. Appropriation Overview

A. Mission Statement for Environmental Compliance and Restoration:

The Environmental Compliance and Restoration (EC&R) appropriation provides funding for environmental cleanup, sustainment, and restoration of current and former contaminated Coast Guard facilities, and engineering remedies on Coast Guard assets for the purpose of obtaining or restoring compliance with environmental laws and preventing contamination and environmental damage. The program directly supports the Coast Guard's Maritime Environmental Protection Operational Response.

EC&R funding ensures the Coast Guard maintains its responsibilities associated with environmental stewardship. The Coast Guard complies with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act, Resource Conservation and Recovery Act (RCRA) and other applicable Federal or State laws to clean up contamination at current and former Coast Guard properties.

B. Budget Activities:

EC&R activities include site investigation and remediation activities at shore facilities, including Coast Guard property slated for divestiture or transfer.

C. Budget Request Summary:

The FY 2014 Request for Coast Guard provides 25 positions, 24 FTE, and \$13,187,000. The total adjustment-to-base is a decrease of \$313,000 relative to FY 2012. This request provides for environmental remediation and restoration of Coast Guard facilities, including site assessment, remediation, and long term monitoring and management activities at Coast Guard facilities.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Coast Guard
Environmental Compliance and Restoration
Program Performance Justification
(Dollars in Thousands)

PPA I: ENVIRONMENTAL COMPLIANCE AND RESTORATION

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	25	23	13,500
2014 Adjustments-to-Base	...	1	(313)
2014 Current Services	25	24	13,187
2014 Program Change
2014 Total Request	25	24	13,187
Total Change 2012 to 2014	...	1	(313)

The Coast Guard requests 25 positions, 24 FTE, and \$13.187 million in FY 2014 Request.

CURRENT SERVICES PROGRAM DESCRIPTION:

The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at current and former Coast Guard facilities. It involves the identification, investigation, and cleanup of contamination from hazardous substances and pollutants; and engineering fixes (i.e., physical changes) to Coast Guard systems, buildings, structures and assets in order to bring Coast Guard facilities into compliance with environmental laws.

Funding requested is planned to be allocated by EC&R activity as follows:

1. LORAN A and C Environmental Investigations/Remediation	\$4.485 million
2. Real Property Divestiture/Transfers – Site Investigation/Remediation	\$1.134 million
3. Long Term Environmental Monitoring	\$0.660 million
4. Site Investigation/Remediation Activities	\$3.864 million
5. Salaries and Expenses	\$3.044 million

Depending on project complexity and conditions identified during routine monitoring or detailed site surveys, project sites may undergo monitoring, remediation, and restoration in a phased approach, requiring a funding distribution across multiple years. The table below provides a detailed listing of each planned FY 2014 EC&R project based on current information and prioritization of work. The list may be adjusted as new information is discovered based upon the completion of assessments and project risk priority.

Project Title	Location	Estimated Cost (\$K)
Research and Development on vessel National Uniform Discharge Systems	Not applicable; collaboration with DOD/USN	\$100
Investigations/Remediation to support National Aids to Navigation (AtoN) Battery Program	Various	\$200
Investigations/Remediation for LORAN-C Closures	Various	\$3,000
Investigations/Remediation for Real Property Divestiture or Transfer	Various	\$1,000
Ongoing Remediation at Former Fuel Farm Discharge/Spill	Base Elizabeth City, NC	\$75
Ongoing Remediation at Electroplating Shop (B79) Release Site	Base Elizabeth City, NC	\$25
Ongoing Remediation at Building 75 Discharge/Spill Site	Base Elizabeth City, NC	\$50
Ongoing Remediation at Stripping Shop Building 77 Release Site	Base Elizabeth City, NC	\$50
Ongoing Remediation at North Beach Disposal Area	Base Elizabeth City, NC	\$75
Ongoing Remediation for Asbestos Removal	Air Station Traverse City, MI	\$20
Ongoing Remediation at Pesticide Release Solid Waste Management Unit (SWMU) 33 Site	Base Elizabeth City, NC	\$30
Ongoing Remediation at Landfill/Burn Area (SWMU)15 Site	Base Elizabeth City, NC	\$30
Ongoing Remediation at Fuel Pipeline Discharge/Spill Site	Base Elizabeth City, NC	\$50
Ongoing Remediation at Seaplane Pipeline Release Site	Base Elizabeth City, NC	\$30
Ongoing Remediation at Former Naval Dispensary and Barracks Release Site (FNDBRS) Discharge/Spill Site	Base Elizabeth City, NC	\$25
Long Term Monitoring at Site 1 - Coast Guard Landfill	Base Kodiak, AK	\$85
Ongoing Remediation at Site 3 – Laundry	Base Kodiak, AK	\$390
Long Term Monitoring at Site 6 – Fuel Tanks	Base Kodiak, AK	\$75
Long Term Monitoring at Site 6B - Nyman Fuel Farm	Base Kodiak, AK	\$85

Project Title	Location	Estimated Cost (\$K)
Long Term Monitoring at Site 7A - Barrel Storage No. 1 location	Base Kodiak, AK	\$150
Long Term Monitoring at Site 9 – Aviation Fuel Site	Base Kodiak, AK	\$75
Long Term Monitoring at Site 10/11– Air Station Paint Storage	Base Kodiak, AK	\$65
Ongoing Remediation at Site 23 – Old Power Plant	Base Kodiak, AK	\$300
Investigations to support Permit/Formally Utilized Defense Sites (FUDS) Work	Base Kodiak, AK	\$75
Implementation & Long-term Monitoring at Industrial Supply Depot (ISD) Buoy Depot S. Weymouth Land Use Control	ISD Buoy Depot South Weymouth, MA	\$50
Long Term Monitoring & Reporting, Sites 7 & 9	CG Yard, Baltimore, MD	\$75
Soil & Groundwater Contamination Remediation, Former CG Base St. Louis	St. Louis, MO	\$60
Soil & Groundwater Contamination Remediation, Station Pascagoula	Pascagoula, MS	\$30
Guard Island Site Remediation	Sitka, AK	\$220
Cape Disappointment Dead Man’s Cover Phase I Investigation	Ilwaco, WA	\$30
Menagerie Island Lighthouse – Site Restoration	Menageries Island, MI	\$350
Supplemental Landfill Cleanup – Former LORAN-C Station Kure	Kure Island, HI	\$610
LORAN-C Station Nantucket – Phase II Site Remediation	Nantucket, MA	\$25
Drum & CERCLA Site Investigation – LORAN Station Carolina Beach	Carolina Beach, NC	\$850
CERCLA Cleanup –Property Divestiture LORSTA Passage Island Light	Isle Royale, MI	\$350
Ground Water Contamination Station Sabine, Sector Galveston	Galveston, TX	\$120
Underground Storage Tank (UST) Leak Hydrocarbon Contamination Cleanup, Station Fort Pierce	Fort Pierce, FL	\$95
Soil Remediation – Station Simons, Sector Charleston	Charleston, SC	\$200
UST Soil Remediation – Station Marquette	Marquette, MI	\$784
Site Assessment-Anclote Key	St. Petersburg, FL	\$100

Project Title	Location	Estimated Cost (\$K)
Site Investigation – Baudette Housing Divestiture	Baudette, MN	\$100
Site Investigation/Soil Remediation – Sturgeon Bay Housing Divestiture	Sturgeon Bay, WI	\$34

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Environmental Compliance and Restoration
Appropriation Language**

For necessary expenses to carry out the environmental compliance and restoration functions of the Coast Guard under chapter 19 of title 14, United States Code, [\$13,500,000]\$13,187,000,¹ to remain available until September 30, [2017]2018.²

Explanation for Proposed Change:

Language Provision	Explanation
¹ ...[\$13,500,000] <u>\$13,187,000</u> ...	Dollar change only. No substantial change proposed.
² ...[2017] <u>2018</u> ...	Fiscal year change only. No substantial change proposed.

PPA Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at shore facilities slated for property divestiture or transfer actions.

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 3,020	\$ 3,021	\$ 3,044	\$ 689

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. This includes costs for 24 FTE. The FY 2014 request includes an increase of \$23,000,000 for the annualization of FY 2014 military pay raise and the 1.0 percent increase in military and 1.0 percent increase in civilian pay in FY 2014.

Travel

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 136	\$ 212	\$ 132	\$ (4)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects anticipated project travel needs.

Transportation of things

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Base	Request	Change
\$ 8	\$ 13	\$ 8	\$ -

Transportation of things, the care of such things while in process of being transported, and other services incident to the transportation of things.

Printing

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 1	\$ 2	\$ 1	\$ -

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. Funding in FY 2014 reflects the anticipated need.

Advisory and assistance services

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 983	\$ 1,532	\$ 951	\$ (32)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

Other services

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 9,288	\$ 14,484	\$ 8,989	\$ (299)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. This request reflects consideration of prior-year unobligated balances.

Supplies and Materials

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 64	\$ 100	\$ 62	\$ (2)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2014 request reflects the anticipated need for supplies and material cost.

U. S. COAST GUARD RESERVE TRAINING

I. Appropriation Overview

A. Mission Statement for Reserve Training:

As the principal Federal agency charged with maritime safety, security and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external maritime risks and threats. The Coast Guard Reserve may be called upon to provide units and personnel to augment active Coast Guard forces during times of crisis, domestically or worldwide.

B. Budget Activities:

The Reserve Training appropriation facilitates training, operation, and administration of the Coast Guard Reserve Program. Coast Guard Reserve Forces provide qualified and trained personnel for active duty in the event of conflict, national emergency, or natural and man-made disasters. Reservists maintain their readiness through mobilization exercises and duty alongside regular Coast Guard members during routine and emergency operations. Reservists will continue to serve as a cost-effective surge force to enhance the Nation's resilience to disasters.

C. Budget Request Summary:

The Coast Guard requests 416 positions, 416 FTE, and \$109,543,000 for the FY 2014 Request. This request provides necessary resources for the training, operation, and administration of the Coast Guard Reserve Program, including training, equipping, and ensuring the readiness of a 7,050 member Coast Guard Reserve workforce.

2014 Adjustments-to-Base	1	14	1,765
2014 Current Services	534	534	136,043
2014 Program Change	(118)	(118)	(26,500)
2014 Total Request	416	416	109,543
Total Change 2012 to 2014	(117)	(104)	(24,735)

The Coast Guard requests 416 positions, 416 FTE, and \$109.543 million for the FY 2014 Request.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Coast Guard Reserve is the Coast Guard's surge capacity military workforce and provides a cost-effective and versatile surge capacity to respond to major contingencies, such as natural and man-made disasters, maritime homeland security, national security, and other events.

The Coast Guard Reserve is a cornerstone of service readiness for contingency response. Most recently, the Coast Guard Reserve was an invaluable contributor during the Coast Guard's response to the 2011 Western Rivers floods. Coast Guard reservists also augment active duty forces through Inactive Duty Training and Active Duty Training periods. This request for funding ensures these Reservists are fully trained and ready to perform vital missions when called upon to do so.

This request sustains 416 Full Time Support (FTS) military and civilian positions. This staff develops training policy and doctrine and manages all recruiting, formal training, personnel, and resource program oversight.

IV. Program Justification of Changes

**Department of Homeland Security
U. S. Coast Guard
Reserve Training
Justification of Program Changes**
(Dollars in Thousands)

Program Increase: Reserve Training

PPA: Applies to all PPAs

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Base			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase/decrease	-	-	-	-	-	-	(118)	(118)	(26,500)
Total Request	536	536	\$134,278	536	536	\$135,100	416	416	\$109,543

Description of Item

This initiative decreases requested resources by \$26.5 million, commensurate with the proposed adjustment in Reserve workforce levels (-118 FTP, -118 FTE, and the transfer of 1,050 Selected Reserve (SELRES) members to the Inactive Ready Reserve).

Justification

The initiative redirects \$26.5M to sustain higher priority frontline operations. The Reserve workforce will remain a critically important component of the Service’s force structure and will continue to have the requisite force strength to surge in response to national disasters and contingencies (i.e., earthquakes, terrorist and pollution incidents, flooding, and hurricanes).

Impact on Performance

The 2014 request for the Reserve Training appropriation will maintain training standards for the Reserve workforce and ensure readiness to provide surge capability as needed. The resource reduction is commensurate with the transfer of 1,050 Ready Reservists to the Inactive Ready Reserve. Additionally, the new provision that extends the period of availability for carryover resources will ensure activated reservists do not have to forego training opportunities due to extended call-ups.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Reserve Training
Appropriation Language**

For necessary expenses of the Coast Guard Reserve, as authorized by law; operations and maintenance of the Coast Guard reserve program; personnel and training costs; and equipment and services; [\$132,554,000] *\$109,543,000,¹ of which \$5,000,000 shall remain available until September 30, 2015.*²

Explanation for Proposed Change:

Language Provision	Explanation
¹ ...[\$132,554,000] <u><i>\$109,543,000</i></u> ...	Dollar change only. No substantial change proposed.
² . <u><i>... to remain available until September 30, 2015....</i></u>	Provides two-year authority for a small portion of the appropriation. The extended period of availability will provide contingency funds in the event a large number of Coast Guard Reserve personnel are called to active duty and are not able to perform regular scheduled training drills or meet quotas at Technical Schools.

PPA Mission Statement

This PPA request funds expenses for compensation of active duty military service member and civilian personnel who support the Reserve Training program, and the 8,100 Coast Guard Reservists who are currently part of the Selective Reserve. This category also includes pay, allowances, employer's share of FICA, Social Security credits, operations, maintenances and other administrative expenses.

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 105,244	\$ 106,252	\$ 88,769	\$ (17,483)

Salaries and Benefits provide funds for compensation directly related to duties performed by active duty military and civilian personnel. The FY 2014 request also reflects funding for the proposed pay raise (1.0 percent military and 1.0 percent civilian) plus the proposed workforce adjustment.

Travel

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 11,221	\$ 11,150	\$ 8,592	\$ (2,629)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2014 request reflects savings in travel funding as a result of the proposed workforce adjustment.

Transportation of things

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 1,421	\$ 1,412	\$ 1,086	\$ (326)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Communication, utilities, and misc charges

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 563	\$ 560	\$ 430	\$ (130)

Communication, utilities, and misc charges are payment for information technology, utilities and miscellaneous changes. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Other services

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 3,169	\$ 3,148	\$ 1,987	\$ (1,161)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Medical care

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 2,966	\$ 2,948	\$ 1,069	\$ (1,879)

Payments to private sector contractors as well as Federal agency contractors for medical care. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Subsistence and support of persons

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 1,943	\$ 1,930	\$ 1,478	\$ (465)

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Supplies and material

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 7,511	\$ 7,463	\$ 5,948	\$ (1,563)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Equipment

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 234	\$ 232	\$ 179	\$ (53)

This object class covers the purchase of capitalized (depreciated) assets and non-capitalized assets. The FY 2014 request reflects the decreased need associated with the proposed workforce adjustment.

Land and structures

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 5	\$ 5	\$ 5	\$ -

Purchase and improvement (additions, alterations, and modifications) of land and structures. No change for FY 2014 Request.

**U. S. COAST GUARD
ACQUISITION, CONSTRUCTION AND IMPROVEMENTS**

I. Appropriation Overview

A. Mission Statement for Acquisition, Construction and Improvements:

Acquisition, Construction and Improvement (AC&I) provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities and military housing, aids to navigation (ATON) systems and facilities, and command, control, communications and computer systems and related equipment. Funds appropriated for AC&I are managed by Coast Guard acquisition project managers who oversee these projects and apply best practices, in accordance with the Coast Guard's Major Systems Acquisition Manual (MSAM) and applicable Department of Homeland Security (DHS) management directives, to optimize the return on recapitalization investments.

B. Budget Activities:

The AC&I appropriation funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, shore facilities and other items such as command, control, communications and computer equipment. Through processes documented in the MSAM, acquisition managers are required to follow a continuum of activities ranging from pre-acquisition concept development to deployment and sustainment. Activities and documentation produced throughout the acquisition lifecycle inform budget requests and budget-related project activities.

C. Budget Request Summary:

In FY 2014, the Coast Guard requests 835 positions, 818 FTE, and \$951,116,000 and proposes to cancel \$42 million from prior year unobligated balances. Following is the funding requested for each sub-appropriation:

- Vessels - \$743,000,000
- Aircraft - \$28,000,000
- Other - \$59,930,000
- Shore and ATON - \$5,000,000
- Personnel and Management - \$115,186,000

III. Current Services Program Description by SUBAPPROPRIATION

Department of Homeland Security
U. S. Coast Guard
Acquisition, Construction and Improvements
Program Performance Justification

(Dollars in thousands)

SUBAPPROPRIATION: VESSELS

	Perm Pos	FTE	Amount
2012 Revised Enacted	642,000
2014 Adjustments-to-Base
2014 Current Services	642,000
2014 Program Change	101,000
2014 Total Request	743,000
Total Change 2012 to 2014	101,000

The Coast Guard requests \$743.000 million in FY 2014 Request.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Surface Assets

The vessel subappropriation provides funding to recapitalize and/or improve the Coast Guard's fleet of boats and cutters. With many of the Coast Guard's cutters operating beyond their planned service life, these recapitalization and sustainment projects are critical to ensuring the continued mission effectiveness and readiness of the Coast Guard's surface fleet. FY 2014 funding continues initial work towards acquisition of a new Polar Icebreaker; supports the Survey and Design of Vessels and Boats; and continues the National Security Cutter (NSC), Offshore Patrol Cutter (OPC), Fast Response Cutter (FRC), Cutter Boats, and In-Service Vessel Sustainment (ISVS) projects. The Coast Guard's fleet of boats and cutters supported within this program collectively perform all eleven statutory Coast Guard missions in the offshore, coastal and inland operating areas.

The Coast Guard's future fleet of NSCs, OPCs and FRCs will replace the current fleet of High and Medium Endurance Cutters and Island-Class Patrol Boats. These cutters will provide endurance, speed, sea-keeping, surveillance, and persistent presence in the offshore area of responsibility (AOR).

In FY 2014, the Coast Guard continues survey and design work, initiated in FY 2013, for the 47-foot Motor Lifeboat (MLB) sustainment project. These boats are the backbone of the Coast Guard's heavy weather and surf rescue stations.

SUBAPPROPRIATION: AIRCRAFT

	Perm		
	Pos	FTE	Amount
2012 Revised Enacted	353,400
2014 Adjustments-to-Base
2014 Current Services	353,400
2014 Program Change	(325,400)
2014 Total Request	28,000
Total Change 2012 to 2014	(325,400)

The Coast Guard requests \$28.000 million in FY 2014 Request.

SUBAPPROPRIATION DESCRIPTION:**Primary operational resource supported: Aviation Assets**

The aircraft subappropriation provides funding for recapitalization and sustainment of the Coast Guard's fleet of aircraft. It is comprised of fixed-wing aircraft sustainment and acquisitions, and rotary wing aircraft sustainment projects.

The Coast Guard's fleet of fixed and rotary wing aircraft supported within this program collectively performs all Coast Guard missions in the Offshore, Coastal and Inland AORs. The land-based fixed-wing aircraft include the C-130, HU-25 and C-144A aircraft. The C-144A is replacing the HU-25 as the Coast Guard's primary medium-range fixed-wing aircraft. The Coast Guard's fleet of existing HC-130Hs and newer HC-130Js provide Long Range Surveillance (LRS) fixed-wing capability. Each of these fixed-wing aircraft enables the Coast Guard to conduct airborne surveillance, detection, classification and identification of vessels and other aircraft. The LRS program continues efforts to extend the operating life and enhance the capability of the HC-130H fleet by replacing Center Wing Boxes (CWBs), a life-limiting structural component, and updating avionics.

The Coast Guard's fleet of rotary wing aircraft includes the H-60 and H-65 helicopters. The H-60 is a medium-range recovery helicopter, and the H-65 is a short-range recovery helicopter. Both aircraft are deployed from land-based air stations; the H-65 is also deployed routinely aboard the Coast Guard's fleet of NSCs, WHECs, WAGBs, and WMECs.

SUBAPPROPRIATION: OTHER

	Perm		
	Pos	FTE	Amount
2012 Revised Enacted	161,140
2014 Adjustments-to-Base
2014 Current Services	161,140
2014 Program Change	(101,210)
2014 Total Request	59,930
Total Change 2012 to 2014	(101,210)

The Coast Guard requests \$59.930 million in FY 2014 Request.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Command, Control, Communications, Computers and Information Technology (C4IT), Acquisition Management

The “Other” subappropriation procures hardware and software, including initial acquisition, development or construction or improvement of any system, software or equipment costing over \$1.0 million per usable segment or item, or \$10.0 million total project cost. In FY 2014, funding will support continued progress on build-out of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems, CG-Logistics Information Management System (CG-LIMS), and Nationwide Automatic Identification System (NAIS). This subappropriation also provides funding for Systems Engineering and Integration (SEI) and Program Oversight and Management (PO&M).

The C4ISR project provides standardized capability to major cutters and aircraft, facilitating interoperability and information sharing. NAIS provides the ability to identify and classify vessels operating within the coastal and inland regions to support maritime domain awareness activities. The CG-LIMS project is replacing redundant and obsolete logistics systems with one single integrated IT system capable of providing enhanced configuration management, supply support, and improved financial accountability. SEI and PO&M ensure effective systems integration and provide oversight for execution of the Coast Guard’s acquisition programs, respectively.

SUBAPPROPRIATION: SHORE AND AIDS TO NAVIGATION (ATON)

	Perm Pos	FTE	Amount
2012 Revised Enacted	200,692
2014 Adjustments-to-Base
2014 Current Services	200,692
2014 Program Change	(195,692)
2014 Total Request	5,000
Total Change 2012 to 2014	(195,692)

The Coast Guard requests \$5.000 million in FY 2014 Request.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Shore Units, Military Housing and Aids-to-Navigation (ATON)

The AC&I shore facilities and ATON subappropriation provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard’s shore facilities, military housing, ATON and related equipment. Shore facilities are critical to supporting all Coast Guard operations and addressing the shoreside needs of the Service's operational communities. This funding also provides infrastructure upgrades prior to arrival of new surface and air assets.

SUBAPPROPRIATION: PERSONNEL AND MANAGEMENT

	Perm		
	Pos	FTE	Amount
2012 Revised Enacted	891	762	110,192

2014 Total Request	835	818	115,186
Total Change 2012 to 2014	4,994

The Coast Guard requests \$115.186 million in FY 2014.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Personnel to support program management of all acquisitions.

The Personnel and Management subappropriation provides personnel compensation, benefits, and related costs associated with project management, financial management, support services, training, and workforce certification. Coast Guard acquisition programs rely on an appropriate level of government acquisition professionals with the competencies and capacity to manage acquisitions in accordance with CG and DHS policies, while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security U. S. Coast Guard

Justification of Proposed Changes in Acquisition, Construction, and Improvements Appropriation Language

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment; as authorized by law; [\$1,217,309,000]**\$951,116,000**¹ of which \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which [\$879,500,000]**\$743,000,000**² shall be available until September 30, [2017]**2018**,³ to acquire, effect major repairs to, renovate, or improve vessels, small boats, and related equipment; of which [\$74,500,000]**\$28,000,000**⁴ shall be available until September 30, [2017]**2018**,⁵ to acquire, effect major repairs to, renovate, or improve aircraft or increase aviation capability; of which [\$76,500,000]**\$59,930,000**⁶ shall be available until September 30, [2017]**2018**,⁷ for other acquisition programs; of which [\$69,411,000]**\$5,000,000**⁸ shall be available until September 30, [2017]**2018**,⁹ for shore facilities and aids to navigation, including waterfront facilities at Navy installations used by the Coast Guard; of which [\$117,398,000]**\$115,186,000**¹⁰ shall be available for personnel compensation and benefits and related costs[: Provided, That, of the unobligated balances available under this heading for the Integrated Deepwater Systems program (surface ships) by Public Law 111-83, \$25,000,000 are hereby permanently cancelled].

Note: The FY 2014 Budget includes the following General Provision related to this account:

(a) Of the unobligated balances available under the heading Coast Guard, Acquisition, Construction, and Improvements by Public Law 111-83, the following funds are hereby permanently cancelled, from the following programs, projects, or activities in the specified amounts: (1) Integrated Deepwater Systems program (surface ships), \$9,000,000; (2) Integrated Deepwater Systems program (other), \$4,000,000; and (3) High Endurance Cutter Sustainment by Public Law 111-83, \$1,500,000.

(b) Of the unobligated balances available under the heading Coast Guard, Acquisition, Construction, and Improvements by Public Law 112-10, the following funds are hereby permanently cancelled, from the following programs, projects, and activities in the specified amounts: (1) Integrated Deepwater Systems program (surface), \$7,000,000; and (2) Integrated Deepwater Systems program (other), \$2,000,000.

(c) Of the unobligated balances available under the heading Coast Guard, Acquisition, Construction, and Improvements by Public Law 112-74, the following funds are hereby permanently cancelled, from the following programs, projects, and activities in the specified amounts: (1) Shore and Aton (Major Shore, MASI), \$8,500,000; (2) Aircraft (HH-60 Sustainment), \$2,000,000; (3) Vessels (Fast Response Cutter), \$7,000,000; and (4) Other (Systems Engineering & Integration), \$1,000,000.

Explanation of Changes:

¹The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year.

²The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

Survey and Design - Vessels and Boats

\$1,000

Project Description, Justification and Scope

This request funds survey and design work in direct support of the In-Service Vessel Sustainment (ISVS) project. Preliminary survey and design work is essential to properly plan and scope sustainment availabilities, such as Mission Effectiveness Projects (MEP) and Service Life Extension Projects (SLEP). This request will provide funding to support multi-year engineering survey and design efforts in support of projects including the 47-foot Motor Life Boat (MLB) and the CGC EAGLE (WIX 327).

The 117 47-foot MLBs serve as the Coast Guard's primary shore-based heavy weather Search and Rescue response asset and must operate safely and effectively in heavy weather and surf. As a ready response resource, an extremely high state of equipment readiness and operational availability must be maintained. Engineering evaluations indicate vital systems including the hull structure, engines, steering system, tow reel assembly and crew shock-mitigating seating are in need of replacement to prevent loss of operational readiness and to stabilize maintenance costs.

CGC EAGLE's SLEP will be broken into four segments to allow the cutter to meet training commitments. The first phase of CGC EAGLE's SLEP will be completed in FY 2014 via the In-Service Vessel Sustainment (ISVS) project. The funding in this request will support design efforts for subsequent SLEP phases. Systems targeted for recapitalization include the gyrocompass, anchor windlass, main engine, waste water treatment systems, reverse osmosis system, berthing area habitability, and masts.

As in-service vessels continue to age, this program is required to conduct detailed hull condition surveys, along with engineering design work that will be used to plan the projects. Examples of the work to be performed under this project include: detailed assessment of the material condition of the current fleet's hull, mechanical and electrical systems and subsystems, and study and analysis of engineering systems to evaluate suitability for use in sustainment projects.

Early planning, requirements development, and cost estimating in support of acquisition and sustainment projects are critical to proper planning and acquisition oversight to make the best use of limited resources while minimizing impact to the operational fleet.

In-Service Vessel Sustainment (ISVS)

\$21,000

Project Description, Justification and Scope

The In-Service Vessel Sustainment (ISVS) program is designed to perform life cycle event vessel repair availabilities, such as Mission Effectiveness Projects (MEP), Mid-Life Availabilities and Service Life Extension Projects (SLEP), on the Coast Guard's existing fleet of vessels.

FY 2014 funding will be used to continue SLEP efforts on the 140-foot ice breaking tugs (WTGB), begin the Mid-Life Availability line on the 225-foot ocean going buoy tender (WLB) fleet, and the first of four phases of the CGC EAGLE SLEP.

This program will ensure in-service vessels meet or exceed their design service life through the recapitalization of hull, mechanical, electrical (HM&E) and electronic systems that have been identified as the highest contributors to maintenance costs and decreasing operational availability.

140-foot Ice Breaking Tugs (WTGBs): The lead ship in this class was placed in service in 1978, and has been in continuous service for 32 years. This is the first sustainment program that has been performed on this fleet. Specific system upgrades and improvements to be addressed include: propulsion plant, heating, ventilation, and air conditioning (HVAC) systems, installation of an engine room fire suppression system, boat launching davit replacement, Oily Water Separator (OWS) replacement, exhaust configuration modifications, and crew habitability improvements to meet current standards.

225-foot Ocean Going Buoy Tenders (WLBs): This class was placed in service in 1996 and was designed to meet a 30-year service life. Achieving that 30-year service life is predicated on performing a mid-life availability to address obsolescence of select engineering systems. The WLB Mid Life availability program is intended to include a stability assessment, electrical load analysis, updates to the machinery control system, propeller, HVAC systems, an overhaul of the buoy tending crane and other auxiliary systems, topside preservation, deck equipment, and weight handling gear as well as crew habitability updates.

CGC EAGLE (WIX-327): CGC EAGLE, which has been in service since 1936, ended her last significant modernization overhaul period in 1983. Recent engineering surveys indicate EAGLE requires a SLEP to ensure continued safe and reliable operation. EAGLE's SLEP will be divided into four segments to allow the cutter to meet annual operational commitments. Systems targeted for recapitalization include the gyrocompass, anchor windlass, main engine, wastewater treatment systems, reverse osmosis system, berthing area habitability, and masts.

FY 2012 Key Events:

- Engineering efforts initiated for the SLEP of the 140-foot WTGBs.

FY 2013 Planned Key Events:

- Continue engineering development and material orders for the SLEP of the 140-foot WTGBs.

FY 2014 Planned Key Events:

- Begin production work on the first 140-foot WTGB and first phase of SLEP on EAGLE.

U. S. Coast Guard - FY 2014 Congressional Justification

In-Service Vessel Sustainment (ISVS) **\$21,000**

- Perform condition assessments on the second and third WTGBs in preparation for SLEP induction.
- Begin engineering work and materials ordering for the first 225-foot WLB and second 140-foot WTGB.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

National Security Cutter (NSC)

\$616,000

Project Description, Justification and Scope

This request provides \$616 million for Segment 2 of Long Lead Time Materials (LLTM), production and Post Delivery Activities (PDA) for the seventh NSC.

These Legend Class Cutters are replacing the legacy High Endurance Cutters (HEC), built between 1967 and 1972. Compared to HECs, the NSCs provide increased endurance, intelligence, and maritime domain awareness capability in the offshore environment. The NSC, along with the Offshore Patrol Cutter (OPC), will comprise the Coast Guard's offshore response capability for the next 40 years, and is an essential element of DHS's layered security strategy. The NSC missions are primarily focused on drug interdiction, fisheries enforcement and defense readiness. Acquisition of NSC-7 will improve long-term capacity and capability in the execution of long range Coast Guard missions in the Arctic, Caribbean, and Pacific. The NSC also meets modern environmental requirements that were not in place when the HECs were designed.

Once each NSC is completely outfitted it will have the capability to:

- Provide anti-terrorism/force protection;
- Carry and deploy aircraft and unmanned aerial vehicles (UAV);
- Carry and deploy multiple small boats (e.g., Cutter Boat Over the Horizon (CB-OTH) and Cutter Boat Long Range Interceptor (CB-LRI));
- Conduct boat and flight operations safely and efficiently in up to Sea State 5 (wave heights of 8-13 feet);
- Support intelligence operations through greatly improved intelligence gathering and Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) capabilities, including use of a Sensitive Compartmented Information Facility (SCIF), all of which enhance the NSC's self-defense capabilities and facilitate seamless operations with networked DHS, DoD, and national assets;
- Maintain presence and support operations in Chemical, Biological, or Radiological contaminated environments for up to 36 hours;
- Operate with U.S. Navy Battle Groups with a maximum sustained speed of 28 knots.

FY 2012 Key Events:

- Commissioned NSC-3.
- Keel laid on NSC-4.
- Final Acceptance of NSC-3.
- Awarded Segment 1 LLTM contract for NSC-6.

FY 2013 Planned Key Events:

- Award Segment 2 LLTM for NSC-6.
- Christening – Launch of NSC-4.
- Keel laying of NSC-5.
- Award Production contract for NSC-6.
- Award Segment 1 LLTM contract for NSC-7.

U. S. Coast Guard - FY 2014 Congressional Justification

National Security Cutter (NSC)

\$616,000

FY 2014 Planned Key Events:

- Christening – Launch of NSC-5.
- “Start Fabrication” (Formal recognition of first 100 tons constructed) of NSC-6.
- Award Segment 2 LLTM and Production contract for NSC-7.
- Deliver NSC-4.

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Offshore Patrol Cutter (OPC)

\$25,000

Project Description, Justification and Scope

This funding will continue pre-acquisition design work for the Offshore Patrol Cutter (OPC) class, intended to replace the Coast Guard's fleet of Medium Endurance Cutters (MEC). The acquisition strategy for this program awards Preliminary & Contract Designs (P&CDs) to three competing contractors. From the P&CD efforts, one design will be chosen for Detailed Design development and ship construction. FY 2014 funding will complete P&CD evaluations and support down-selection to a single offeror for the Detailed Design and Construction contract award. The funding will also provide support for the OPC Project Office, the OPC Ship Design Team, the Technical Authorities to continue C4ISR production, complete various requirements evaluations, life-cycle cost estimating, and logistics and training studies.

The OPC will replace the aging 270-foot and 210-foot MECs. Together, the OPCs and NSCs will recapitalize the Coast Guard's major cutter fleet. The OPC will possess the endurance, sea-keeping, and persistent presence to complete missions at the outer extent of the Exclusive Economic Zone (EEZ) and coastal approaches and will be designed to conduct assigned missions through a full-spectrum of climate and environmental conditions including the ability to launch and recover boats and aircraft in up to Sea State 5.

FY 2012 Key Events:

- Released draft Request for Proposal (RFP) and reviewed industry feedback.
- Released final RFP.

FY 2013 Planned Key Events:

- Award three P&CD contracts.

FY 2014 Planned Key Events:

- Evaluate P&CD contract deliverables.

Fast Response Cutter (FRC)

\$75,000

Project Description, Justification and Scope

This request provides funds for production of two FRCs, associated contract line items, and project management costs. The planned fleet of FRCs is replacing 110-foot patrol boats and will similarly operate in the coastal zone. Examples of missions that FRCs will complete include SAR, Migrant Interdiction, Drug Interdiction and Ports Waterways and Coastal Security.

In addition, FRCs will provide enhanced capabilities over the 110-foot patrol boats including improved C4ISR capability and interoperability; stern launch and recovery (up through sea state 4) of a 40 knot, Over-the-Horizon, 7m cutter boat; a remote operated, gyro stabilized MK38 Mod 2, 25mm main gun; improved sea keeping; and enhanced crew habitability.

Other capabilities include:

- The ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, administrative processing, and retention onboard.
- The ability to patrol areas where suspected illegal migrant, drug, or fisheries activities may occur, and dispatch boarding teams to suspect vessels and subsequently escort them to their final disposition.
- The ability to search for, locate and recover distressed mariners; provide medical assistance or evacuation, and provide safe transport. It will also provide the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels.

FY 2012 Key Events:

- Delivered of FRCs #2-3.

FY 2013 Planned Key Events:

- Delivery of FRCs #4-7.
- Conducted Initial Operational Test and Evaluation (IOT&E).

FY 2014 Planned Key Events:

- Deliver FRCs #8-11.
- Prepare RFP for re-competition of the FRC production contract using RDLP deliverables.

Cutter Boats

\$3,000

Project Description, Justification and Scope

This request continues funding for production of multi-mission cutter boats that will be fielded on the National Security Cutter. This request funds production of one Cutter Boat Long Range Interceptor II (CB-LRI-II), and two CB-OTH-IVs, along with project and technical support.

The CB-LRI-II is a 35-foot cutter boat. The CB-LRI-II will provide enhanced capabilities compared to legacy cutter boats, such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter. The CB-OTH-IV is a 26-foot cutter boat that also provides enhanced capabilities compared to legacy cutter boats. The CB-OTH-IV operates beyond sight of the parent cutter (over the horizon) to deploy boarding parties, pursue and interdict TOI, and perform SAR operations. The CB-OTH-IV is both stern launch/recovery, and side-davit launch/recovery, capable.

FY 2012 Key Events:

- Tested CB-OTH-IV #1 (includes “Boat Off” competition hulls).
- Ordered CB-OTH-IV #2-7.
- Evaluated CB-LRI-II Proposals, Awarded 1st CB-LRI-II.

FY 2013 Planned Key Events:

- Deliver CB-OTH-IV #2-5.
- Order CB-OTH IV #8-9.
- Deliver and Test CB-LRI-II #1.
- Order CB-LRI-II #2-3.
- Deliver CB-LRI-II #2.

FY 2014 Planned Key Events:

- Deliver CB-OTH-IV #6-9.
- Order CB-OTH-IV #10-11.
- Deliver CB-LRI-II #3-5.
- Order CB-LRI-II #4-6.

Polar Icebreaker

\$2,000

Project Description, Justification and Scope

This funding will continue survey and design activities for a new Coast Guard polar icebreaker, intended to provide continued U.S. Arctic icebreaking capability following the projected end of service life of CGC POLAR STAR on or about 2022. This effort will build upon requirements analyses undertaken within the past several years, including the High-Latitude Mission Analysis Report, and the Polar Icebreaker Business Case Analysis.

This funding will be used to continue development of programmatic planning documents required under the USCG Major Systems Acquisition Manual, including an Analysis of Alternatives, a Life Cycle Cost Estimate, modeling simulation and testing (as required) to build a modern polar icebreaker. Together with funding provided in 2013, Coast Guard will complete the Mission Needs Statement, the Concept of Operations, and the Preliminary Operational Requirements Document. These efforts will lead to development of a formal icebreaker acquisition project, with the award for construction anticipated within the next four years.

FY 2013 Planned Key Events:

- Mission Need Statement Approval.
- Concept of Operations Approval.

FY 2014 Planned Key Events:

- Draft Capability Development Plan.
- Develop Initial Acquisition Strategy.
- Develop Operations Requirements Document.
- Initial Alternatives Analysis.

HH-65 Conversion and Sustainment Project

\$12,000

Project Description, Justification and Scope

This funding continues modernization and sustainment of the Coast Guard's fleet of 99³ H-65 helicopters, converting them to MH-65 Short Range Recovery (SRR) helicopters. The modernization effort includes reliability & sustainability improvements, where obsolete components are replaced with modernized sub-systems, including an integrated cockpit and sensor suite. The H-65 Conversion and Sustainment Project is comprised of six Discrete Segments (DS). Each of the six discrete segments consists of upgrades and modernization of aging components and sub-systems necessary to sustain readiness, stabilize maintenance costs, and comply with Federal Aviation Administration safety requirements. DS1 Re-Engine, DS2 National Capital Region Air Defense (NCRAD), and DS3 Airborne Use of Force (AUF) were fully funded through prior year funding. DS4 Obsolete Component Modernization and DS6 (Automatic Flight Control System (AFCS) / Avionics) were started with prior year funding and will be continued with funds requested in FY 2014.

FY 2012 Key Events:

- Continued DS4 Full Rate Production.
- Continued cockpit modernization upgrades (AFCS/Avionics) (DS 6)
- Achieved Full Operational Capability and transition to sustainment for DS 3

FY 2013 Planned Key Events:

- Continue DS4 Full Rate Production.
- Continue DS6 (AFCS/Avionics) cockpit modernization design and integration.
- DS 3 AUF Transition to Sustainment.
- Build Technology Demonstrator.

FY 2014 Planned Key Events:

- Continue DS4 Full Rate Production.
- Continue DS6 (AFCS/Avionics) cockpit modernization design and integration.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Long Range Surveillance (LRS) Aircraft

\$16,000

Project Description, Justification and Scope

The Long Range Surveillance (LRS) project is a combination of HC-130H sustainment and HC-130J acquisition. This request funds up to four additional Avionics 1 Upgrade (A1U) installations on HC-130H aircraft. This work enhances the capability of the HC-130H fleet by replacing aging/obsolete equipment, and updating avionics to comply with Communications Navigation Surveillance/Air Traffic Management (CNS/ATM) requirements.

The HC-130 Long Range Surveillance (LRS) fleet is a major contributor to overall performance of the Coast Guard's statutory missions with specific contributions to Maritime Law Enforcement, Maritime Response, Defense Operations, and Marine Transportation System Management.

With its sensor systems, the HC-130 LRS is a very capable maritime patrol aircraft, equipped with a powerful surface search radar that can detect surface targets from over 50 miles away. Once closer to a target, the sensor operator uses the Forward-Looking Infrared Radar (FLIR) and Electro Optical (EO) sensor to classify and identify the target, even in night or low-light conditions. A flight-management system that includes an automatic-pilot and precise GPS navigation equipment allows the pilot to concentrate on mission management. The HC-130 LRS performs surveillance missions and provides the critical means to detect, classify and identify targets. This information is shared with "end game" capabilities to interdict drugs or migrants, protect living marine resources, and enforce economic, safety and security zones. The LRS can perform aerial delivery of Search and Rescue equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. The asset delivers maritime domain awareness essential to achieving mission success.

FY12 Key Events:

- Completed prototype Center Wing Box installation complete at Warner Robbins AFB.
- Completed HC-130H Avionics 1 prototype.
- Awarded production of C-130J Aircraft #7-9.

FY 2013 Planned Accomplishments:

- Complete second HC-130H Center Wing Box installation.
- Award contract for missionization of HC-130J Aircraft #9 (planned delivery in FY16).
- Complete A1U Validation/Verification aircraft.

FY 2014 Planned Accomplishments:

- Complete up to four A1U installations on HC-130H aircraft.

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Program Oversight and Management

\$10,000

Project Description, Justification and Scope

This request provides funding for Program Oversight and Management (PO&M). PO&M funding supports activities associated with the transition of the Coast Guard's assets from acquisition to operations, including delivery, provision of logistics, training and other services necessary to ensure seamless integration into the operational fleet.

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. PO&M provides the Coast Guard with the capability to protect the government's interests during the acquisition and ensure contractors and suppliers deliver required products and services and meet prescribed contract terms and conditions. The Coast Guard accomplishes this management through staff located at the Program Management Office and at other contractor/government sites. Personnel working on acquisition projects include a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs. The Coast Guard uses these personnel to help ensure prime contractors and other government agencies (OGAs) satisfactorily perform functions consistent with existing policies, processes, and approved project plans. These activities include managing:

- Major milestone events and reviews (e.g., Preliminary Design Review, Production Readiness Review, etc.) associated with each project as it progresses through concept & technology development, system development and demonstration, production and deployment, and the operations and support phases.
- Cross-program documentation and analysis.
- Use of unique talents and professional expertise for Technical Evaluation Teams (TETs); ship design teams; and development of mandatory Acquisition documentation.
- Performance monitoring through the use of a variety of tools such as:
 - Earned Value Management System (EVMS), which permits detailed monitoring of cost and schedule performance;
 - Periodic reports, which provide a quarterly review of program cost, schedule, and performance criteria;
 - Acquisition Performance Management System (APMS) which provides web-based reporting on all aspects of program performance on a near real-time basis, depending upon the particular metric. This includes performance reports to Internal and External oversight and various other reports for Program Management such as obligation plans, expenditure report, funds status, etc.
 - Transition of new assets to operations and sustainment after completion of operational testing, with staff serving as a liaison between the prime contractor's production of an asset and its turnover to the operational user and the Coast Guard support community.

PO&M funding also supports operational testing and evaluation (OT&E) done with the U.S. Navy's Commander Operational Test and Evaluation Forces (COMPOPTTEVFOR). While Developmental Test and Evaluation (DT&E) is the responsibility of the prime contractor, OT&E is performed by the Coast Guard, where acquired assets are tested to ensure they meet the user's requirements.

Program Oversight and Management

\$10,000

FY 2014 Activities Supported by Program Oversight and Management (PO&M)

Procurement	Justification
Senior Oversight	Computer support, project management site visits, management support priorities and supplies.
Contract Operations	Contracting Officer (KO) contract specialist support for Major System Acquisition projects, Defense Contract Management Agency (DCMA)/ Defense Contract Audit Agency (DCAA) support services.
Acquisition Workforce Management	Program training, strategic & tactical human capital support, Sustainment/Acquisition-Composite Model (SACOM) support for staff levels, program management & acquisition support.
Acquisition Support	Program management, systems engineering, and acquisition management support.
Strategic Planning & Communication	Strategic planning support, as required by the CG and Department of Homeland Security (DHS), communication management support, external coordination support, required reports and responses.
Testing and Evaluation	Execution of Surface, Aviation, Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR), and Logistics development and testing programs.
Resource Management	Acquisition Performance Management System (APMS) support and software upgrade support, (SAS) renewal, capitalization & audit remediation support, internal controls support, and Life Cycle Cost Estimating (LCCE) support.
Acquisition Programs Oversight	Naval Sea Systems Command (NAVSEA) programmatic support, Naval Surface Warfare Center (NSWC) / NAVSEA direct-site support, program management support, and site visits.
Acquisition Programs – Aviation	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; and site visits.
Acquisition Programs – Surface	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; logistics support, and site visits.
Acquisition Programs – C4ISR	Program management support for program status control reporting, emerging issue resolution, cross domain issues, technical expertise; Integrated Product Team (IPT) support; and Major System Acquisition project coordinator at Space and Naval Warfare Systems Command (SPAWAR); and site visits.
Acquisition Programs Logistics	Program management support for surface & air assets, technical documentation, and performance management, and site visits.

System Engineering and Integration (SEI)**\$204****Project Description, Justification and Scope**

This request funds System Engineering design and Integration (SEI) across the Coast Guard's major recapitalization projects.

SEI manages document integration and contract deliverables across the Coast Guard's multiple acquisitions such as NSC, OPC, FRC, RB-M, C130J, C-144, as well as C4ISR. SEI also has the responsibility for the overall technical configuration development processes. SEI evaluations are performed across systems, subsystems, and component levels to analyze products and capabilities for interoperability, integration, modularity, and system commonality. These assessments culminate in the ability to determine and document predicted total system performance for numerous configurations and scenarios.

Rather than each acquisition program having asset-specific documentation processes, system databases and decision criteria, SEI identifies commonalities for requirements and systems, and then facilitates the interface between asset acquisition programs to encourage cost-effective integration of these commonalities. This allows all stakeholders access to appropriate documents as each program, technical authority, and contractor works through engineering processes and provides better decisions from a holistic perspective to deliver required capabilities as efficiently as possible. SEI emphasizes an integrated view of the project, yielding recognition of corresponding upgrades needed across other platforms and programs. SEI's purpose is to identify gaps, duplication, and/or redundancies and eliminate or economize, as appropriate.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Project Description, Justification and Scope

This request includes funding for the design and development of Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance (C4ISR) integrated hardware and software systems on National Security Cutter (NSC), Offshore Patrol Cutter (OPC), Long Range Surveillance (LRS) aircraft, and Medium Range Surveillance (MRS) aircraft. These assets are using interoperable C4ISR system designs to optimize lifecycle costs and operational effectiveness. The C4ISR project also provides Information Assurance (IA) support for the Fast Response Cutter (FRC).

The requested funds in FY 2014 will be used for the following activities:

NSC Fleet Segment 2 Development. Pre-stage and field Segment 2 on the next in-service NSC (delivered with Segment 1). Conduct testing of C4ISR Segment 2 on NSC 2. Assist NSC projects with achievement of ATO, conduct TEMPEST inspections, and implement engineering changes on the NSC.

OPC C4ISR Technical Assistance. Leverage SEAWATCH on OPC by providing technical adjustments for inserting software and/or hardware, such as different radars, radios, etc. The C4ISR project provides technical assistance for the OPC project by leading the tailoring of C4ISR systems onboard the OPC. The OPC project will manage the contractor as its C4ISR system is assembled and installed onboard the vessel while the C4ISR project (a) coordinates (working with contractors, C3CEN, OPC project, and the sponsor) to ensure the system meets the OPC ORD requirements, and (b) plans the tailoring activities and core SEAWATCH software updates to ensure the ship builder has the design, specs, and software to build out the system).

Aviation Electronics. Develop a common aviation electronic software design for Coast Guard fixed wing aviation assets including the design, development, and testing. In addition, information technology systems and infrastructure readiness analysis will be performed. The C4ISR project coordinates between the aviation projects, the contractors, the Coast Guard's acceptance lab, and the receiving units to ensure C4ISR systems on the aircraft have passed TEMPEST testing (information assurance needed for Authority To Operate). Once completed, the C4ISR project works with the Designated Approval Agency (DAA) to ensure all ATO issues have been mitigated so the asset will receive ATO.

New Asset Certification Support/Information Assurance. Provide Information Assurance (IA), TEMPEST inspections, and Certification and Accreditation (C&A) to newly acquired surface and aviation assets. Achieve and maintain ATO of Classified, as well as Sensitive But Unclassified, information systems connecting to a network through the DAA.

Labs. Continue operating C4ISR development labs and government test and integration labs that provide product suitability validation and proper network integration and readiness for platform acceptance and installation on surface and aviation assets.

Diminishing Manufacturing Source (DMS) Replacement. Provide necessary solutions for DMS for the test and integration labs and for hardware/software upgrades on aviation assets.

Logistics Management. Provide logistics support, which funds logistics analysis, development, and products to ensure operational capability and readiness of the C4ISR systems and interfaces, and their integration with USCG assets. Includes system technical and training documentation,

C4ISR

\$35,226

training center upgrades, and initial sparing analysis needed to transition C4ISR system baseline releases to asset managers for platform installation, testing, and deployment.

Engineering Change Proposals/Updates, for configuration management. Provide input into Engineering Change Proposals (ECPs) related to software and hardware updates affecting new assets.

Execution Management. Project execution support services for planning, development, and IA, TEMPEST, inspections, and C&A support services for newly-acquired assets and new development.

FY 2012 Key Events:

Aviation assets

- Coordinated and planned for ATO and TEMPEST inspections on aviation assets.

Surface assets

- Coordinated and planned for OPC C4ISR.
- Completed development of Segment 2 Software.
- Began KU Band SATCOM installation on in-service cutters.
- Assisted NSC and FRC projects in obtaining ATO on FRCs and future NSCs.
- Began assembly and integration of Segment 2 Suite for CG Systems Acceptance and Integration Lab.

Labs

- Continued work at Developmental and Verification Labs.
- Began lab testing of Segment 2 system for NSCs.

FY 2013 Planned Key Events:

Aviation assets

- Coordinate and plan for ATO and TEMPEST inspections.
- Perform hardware /software design to mitigate obsolescence issues.

Surface assets

- Install Segment 2 prototype on NSC-2.
- Continue KU Band SATCOM installation on in-service cutters.
- Continue other surface asset work/assistance planning for OPC C4ISR .
- Assist FRC and NSC projects with achievement of ATO, conduct TEMPEST inspections, and implement engineering changes on the NSC.

Labs

- Continue work at Developmental and Verification Labs to facilitate fielding of Segment 2 on NSCs and DMS solution development for aviation assets.

FY 2014 Planned Key Events:

Aviation assets

- Mitigate Aviation Electronic DMS issues by performing design analyses and trade studies on hardware and software replacements for diminishing manufacturing sources.
- Coordinate and plan for obtaining ATO and TEMPEST inspections.
- Perform hardware /software design to mitigate obsolescence issues on HC-130Js and HC-144A pallets.

C4ISR**\$35,226***Surface assets*

- Complete testing of C4ISR Segment 2 on NSC 2.
- Continue KU Band SATCOM installation on in-service cutters.
- Continue other surface asset work/assistance planning for OPC C4ISR (SEAWATCH).
- Assist FRC and NSC projects with achievement of ATO, conduct TEMPEST inspections, and implement engineering changes on the NSC.

Labs

- Continue work at Developmental and Verification Labs to facilitate fielding of Segment 2 on NSCs and DMS solution development for aviation assets.

FUNDING HISTORY

FY	\$000	Major Activity Funded by Appropriation
2002-2007	\$ 399,767	NSC, MPA/MSP Segment 1; Shore Facilities/Cutter Segment 5
2008	\$ 89,630	NSC, MPA/MSP Segments 1 and 2; Shore Facilities/Cutter Segment 5
2009	\$ 91,200	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC support
2010	\$ 37,100	NSC, MPA/MSP Segment 2; FRC support
2011	\$ 33,333	NSC, MPA/MSP Segment 2; FRC IA support
2012	\$ 40,214	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC, OPC IA support
2013	\$ 40,500	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC, OPC IA support
<i>Total</i>	<i>\$731,744</i>	<i>Funding received for FY 2002 through FY 2013</i>

Segment 1 developed a closed and complex C4ISR baseline for NSCs, HC-144As, and HC-130Js. Developed through the Integrated Coast Guard Systems (ICGS) contractor, this system is proprietary and does not allow the Coast Guard the ability to manage additional development outside of the prime contractor, nor does it provide an affordable means for software sustainment. Segment 1 is fully fielded.

Segment 2 began the transition of the proprietary system developed in Segment 1 towards an open architecture owned and controlled by the Coast Guard. It separated the Segment 1 design into modular, scalable functional components with clear interfaces allowing the Coast Guard to manage changes and sustain the system separate from the prime contractor. Segment 2 establishes a common baseline across the NSC, C-144, and C-130J assets and integrated the Special Compartmented Information Facility (SCIF) into the NSC.

Segment 5 (Upgrades to existing assets) - *In-Service Cutters*: 210ft and 270ft Medium Endurance Cutter (MEC); 378ft High Endurance Cutter (HEC); *Shore Facilities*: CAMS (Communications Area Master Stations); Training Center Petaluma; COMMSTAs (Communication Stations); Command Centers.

Available Funding Spend Plan (Projected obligations by year appropriated)

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

CG-LIMS**\$1,500****Project Description, Justification and Scope**

CG-LIMS directly supports the Coast Guard Modernization goal of a single, unified logistics system that improves mission-readiness, operational effectiveness and decision-making by enabling decision support at the enterprise and tactical level.

CG-LIMS enables product line management by providing total asset visibility throughout the enterprise. It will be the tool through which all maintenance is managed, and by which the enterprise supply chain is driven. All technical information relating to Coast Guard assets, including technical publications and manuals, drawings, maintenance procedures, and maintenance data will be organized and managed in the system. The components of configuration management, maintenance management, supply chain management, and technical information management will be tightly integrated and configured to allow efficient execution of a standardized business process.

CG-LIMS is planned for phased implementation by segments. Segment 1 will provide configuration and maintenance management functionality and asynchronous operations for mobile assets. Segment 2 will provide supply chain management functionality. As part of Segment 2, portions of the Aviation Maintenance Management Information System (AMMIS) legacy system will be migrated into CG-LIMS, allowing for AMMIS to be removed from service. Segment 3 will provide technical information management functionality.

This request supports the development and delivery for Segment 1 of the Coast Guard Logistics Information Management System (CG-LIMS). This funding will continue CG-LIMS configuration and phased deployment to Coast Guard operational assets and support facilities. Specifically, the funding continues to support configuration and testing of the Technical Information Management functionality and the implementation of CG-LIMS to the HC-144 Maritime Patrol Aircraft.

FUNDING HISTORY

CG-LIMS

\$1,500

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Nationwide Automatic Identification System (NAIS)

\$13,000

Project Description, Justification and Scope

NAIS is a data collection, processing, and distribution system being implemented in accordance with the Maritime Transportation Security Act. The project provides the necessary capability to ensure the effective exchange of information between AIS-equipped vessels, aircraft, aids to navigation, and shore stations within all major U.S. ports, waterways, and coastal zones. The data collected by NAIS can be shared with other pertinent stakeholders and decision makers in support of maritime security at critical ports. NAIS correlates Advanced Notice of Arrival data with AIS data to identify higher interest vessels.

The FY 2014 request will finish funding needs for the NAIS acquisition project. It will replace existing interim capability in 58 ports with the permanent solution design and technology via the core system upgrade. To the extent feasible, NAIS equipment is being co-located with Rescue 21 (R21) infrastructure.

FY 2012 Key Events:

- Started surveys on R21 sites within six Sectors (San Francisco, LA/LB, San Diego, Miami, Key West, and Puget Sound) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these Sectors.
- Accepted the first eight ports in the first three Sectors (Mobile, Hampton Roads, and Delaware Bay).

FY 2013 Planned Key Events:

- Obtain ATO (Authority to Operate) in the first eight ports; conduct OT&E (operational testing and evaluation). Upon successful OT&E report from the sponsor, declare IOC (initial operating capability) in those first three Sectors.
- Complete site surveys of R21 sites within nine sectors (New York, Long Island, Baltimore, San Francisco, LA/LB, San Diego, Miami, Key West and Puget Sound) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these sectors.
- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for nine Sectors (New York, Long Island, Baltimore, San Francisco, LA/LB, San Diego, Miami, Key West and Puget Sound).
- Install equipment at 12 Sectors (New Orleans, Houston/Galveston, New York, Long Island, Corpus Christi, Baltimore, San Francisco, LA/LB, San Diego, Miami, Key West and Puget Sound) that will upgrade another 25 of the 58 ports with the permanent system.

FY 2014 Planned Key Events

- Complete site surveys of R21 sites within ten Sectors (Columbia River, Charleston, North Carolina, Jacksonville, St. Petersburg, Boston, SE New England, Northern New England, Honolulu, and Guam) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these sectors.
- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for 20 Sectors (Columbia River, Charleston, North Carolina, Jacksonville, St. Petersburg, Boston, SE New England, Northern New England, Honolulu, Guam, San Juan, Sault Ste Marie,

Nationwide Automatic Identification System (NAIS)

\$13,000

Detroit, Buffalo, Lake Michigan, Ohio Valley, Lower Mississippi, Upper Mississippi, Juneau, Anchorage)

- Install equipment at ten Sectors (Columbia River, Charleston, North Carolina, Jacksonville, St. Petersburg, Boston, SE New England, Northern New England, Honolulu, Guam) that will upgrade another 12 of the 58 ports with the permanent system.

Base Miami Beach Pier & Wharf - Phase I

\$1,800

Project Description, Justification and Scope

This funding will be used towards restoring the functionality of Base Miami Beach's waterfront facilities by strengthening the existing pier structure. Recent inspections identified severely degraded and failing conditions of the waterfront's bulkhead due to corrosion of the sheet-pile and scouring of bottom sand. Current conditions have mandated load restrictions that have limited the access to the waterfront and eliminated the ability to utilize machinery on the wharf.

Base Miami Beach is currently supporting three 110-ft Patrol Boats, two 87-ft Coastal Patrol Boats, two 154-ft Fast Response Cutters (FRCs), and a construction tender, along with personnel from Sector Miami, Base Miami Beach, and Station Miami Beach. Base Miami Beach is scheduled to homeport a total of six 154-ft FRCs. A failure in the bulkhead would impact Coast Guard operations with the loss of vessel berthing, and would continue inward encroachment of the loading restrictions on base facilities.

Project requirements include the rehabilitation of the waterfront bulkhead and associated structures and systems along with the restoring the capability to support heavy machinery. This funding will be used to address the most pressing issues as informed by engineering testing and analysis and subsequent preliminary design.

Shore Infrastructure Survey and Design

\$100

Project Description, Justification and Scope

The Coast Guard's FY 2014 Shore Survey and Design (S&D) budget request includes survey and design funding essential to future year Acquisition, Construction, and Improvement (AC&I) shore projects.

Funding will support planning and engineering studies, master plans, project development and design, appraisals, real property requirements, and other architectural/engineering efforts. Completing proper planning and design helps to ensure AC&I projects are properly assessed, planned, and prioritized prior to seeking project appropriations. The projects supported by this request contribute to the long-range plans and support of operational units.

Shore AC&I Waterways ATON Infrastructure

\$100

Project Description, Justification and Scope

This request provides funding to establish, maintain, and improve transportation safety on Federal waterways through construction and improvements to buoys and structures which assist in navigation. Waterways infrastructure projects address requirements related to U.S. Army Corps of Engineers (USACE) activity and repair/replace aging/damaged aids to navigation.

Scheduled projects for the requested funds include survey and design of Phase I of the relocation of the Delaware River ranges resulting from the USACE Delaware River Main Stem and Channel Deepening projects. The USACE project will provide for more efficient transportation of containerized, dry bulk and liquid bulk cargo to and from the Delaware River ports and will include dredging and alterations to existing channels to ensure safer navigation. Collectively, the Ports of Philadelphia, South Jersey and Wilmington, DE combine to be the largest general cargo port complex in the nation. The project complexity requires it to be broken into four phases.

Minor AC&I Shore Construction Projects **\$3,000**

Project Description, Justification and Scope

This request provides funds to complete minor AC&I shore facility construction projects. These projects are typically less complex and require less advance planning than major shore projects. Funds will be used to complete minor projects that have cost estimates which exceed the construction authority provided in the Operating Expense appropriation. For example, this may include:

- Emergency repair projects which have cost estimates that are greater than 50% of the plant replacement value;
- Minor facility improvements, which cost more than one million dollars, that are needed to adapt to changing/increased missions.

This project will comply with the National Environmental Policy Act (NEPA).

AC&I Core**\$439****Project Description, Justification and Scope**

This funding cover costs associated with project shared service and training activities for major acquisition projects. The primary initiatives include Acquisition Project Office shared services support, contractor support services, records storage and training. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act and OMB Circular A-76.

Direct Personnel Costs

\$114,747

Project Description, Justification and Scope

This request funds the salaries, compensation and support costs (including annual pay raise and COLA) for personnel who manage, execute and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program. The requested funding level will support a total of 818 FTE. These personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, on budget and in compliance with performance requirements.

Summary Justification and Explanation of Changes

Travel

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 5,550	\$ 6,160	\$ 5,369	\$ (181)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the Survey and Design, National Security Cutter, Offshore Patrol Cutter, Cutter Boats, In-Service Vessel Sustainment and Polar Icebreaker. Funding in FY 2014 reflects the anticipated need.

Transportation of things

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 983	\$ 1,326	\$ 1,208	\$ 225

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. Funding in FY 2014 reflects the anticipated need.

Other rent

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 299	\$ 442	\$ 403	\$ 104

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2014 reflects the anticipated need.

Communication, utilities, and misc charges

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 837	\$ 1,005	\$ 672	\$ (165)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and cutters, utility costs, including shore facility utilities, cutter and boat fuel requirements, and postal costs. Funding in FY 2014 reflects the anticipated need.

Printing and reproduction

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 23	\$ -	\$ -	\$ (23)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. Funding in FY 2014 reflects the anticipated need.

Advisory and assistance services

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 60,055	\$ 72,181	\$ 66,581	\$ 6,526

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2014 reflects the anticipated need.

Other services

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 124,182	\$ 149,353	\$ 135,630	\$ 11,448

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2014 reflects the anticipated need.

Research and Development

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 7	\$ -	\$ -	(7)

Contracts for the conduct of basic and applied research and development. Funding in FY 2014 reflects the anticipated need.

Subsistence and support of persons

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 1,696	\$ 2,299	\$ 2,094	\$ 398

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. Funding in FY 2014 reflects the anticipated need.

Supplies and materials

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 30,706	\$ 37,213	\$ 33,559	\$ 2,853

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2014 reflects the anticipated need.

Equipment

	FY 2012 Revised Enacted		FY 2013 Annualized CR		FY 2014 Request		FY 2012 to FY 2014 Change
	\$ 343,684	\$	505,963	\$	436,692	\$	93,008

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2014 reflects the anticipated need.

Land and structures

	FY 2012 Revised Enacted		FY 2013 Annualized CR		FY 2014 Request		FY 2012 to FY 2014 Change
	\$ 73,977	\$	108,271	\$	167,793	\$	93,816

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2014 reflects the anticipated need.
