Summary Justification and Explanation of Changes

Travel

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 1,393	\$ 523	\$ 400	\$ (993)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2014 reflects the anticipated need.

Transportation of things

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 247	\$ 113	\$ 90	\$ (157)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding in FY 2014 reflects the anticipated need.

Other rent

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 75	\$ 38	\$ 30	\$ (45)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2014 reflects the anticipated need.

Communication, utilities, and misc charges

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 210	\$ 85	\$ 50	\$ (160)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Funding in FY 2014 reflects the anticipated need.

Printing and reproduction

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 6	\$ -	\$ -	\$ (6)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. Funding in FY 2014 reflects the anticipated need.

Advisory and assistance services

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
\$	15,074	\$	6,122	\$	4,961	\$	(10,113)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2014 reflects the anticipated need.

Other services

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
\$	31,169	\$	12,668	\$	10,106	\$	(21,063)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2014 reflects the anticipated need.

Research and development

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
\$	2	\$	-	\$	-	\$	(2)

Contracts for the conduct of basic and applied research and development. Funding in FY 2014 reflects the anticipated need.

Subsistence and support of persons

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
\$	426	\$	195	\$	156	\$	(270)

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. Funding in FY 2014 reflects the anticipated need.

Supplies and materials

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
\$	7,707	\$	3,156	\$	2,501	\$	(5,206)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2014 reflects the anticipated need.

Equipment

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
\$	86,264	\$	42,916	\$	32,540	\$	(53,724)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2014 reflects the anticipated need.

Land and structures

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
	\$ 18,568	\$	9,184	\$	12,503	\$	(6,065)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2014 reflects the anticipated need.

Summary Justification and Explanation of Changes

Travel

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 1,696	\$ 1,045	\$ 1,579	\$ (117)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2014 reflects the anticipated need.

Transportation of things

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 300	\$ 225	\$ 355	\$ 55

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. Funding in FY 2014 reflects the anticipated need.

Other rent

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 91	\$ 75	\$ 119	\$ 28

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2014 reflects the anticipated need.

Communication, utilities, and misc charges

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 256	\$ 171	\$ 198	\$ (58)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Funding in FY 2014 reflects the anticipated need.

Printing and reproduction

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 7	\$ -	\$ -	\$ (7)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. Funding in FY 2014 reflects the anticipated need.

Advisory and assistance services

FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
\$ 18,347	\$ 12,245	\$ 19,583	\$ 1,236

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2014 reflects the anticipated need.

Other services

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 37,939	\$ 25,337	\$ 39,891	\$ 1,952

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Appendix

Response Boat – Medium

Project Description, Justification and Scope

The Response Boat - Medium (RB-M) project was established in October 2001 to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with standardized assets more capable of meeting the Coast Guard’s multi-mission operational requirements. The legacy 41-foot UTB is a key asset for Coast Guard operations within coastal zones. Although designed specifically for Search and Rescue (SAR) missions, the 41-foot UTBs have been employed as multi-mission assets. Since the 41-foot UTB was built, Coast Guard mission requirements, particularly in terms of maritime security have changed markedly. The RB-M offers a number of improvements over the existing fleet of 41-foot UTBs and other boats in performance, human system interface and operational availability. Several program requirements and extensive field commander input supported a need for an RB-M that is substantially faster (e.g., 40+ knots vs. 26 knots) than the 41-foot UTB to support homeland security operations and improve multi-mission performance effectiveness.

FY 2012 Key Events:

- Ordered 40 RB-Ms, for a cumulative 166 RB-Ms on order at the end of FY 2012.
- Received 34 RB-Ms, for a cumulative total of 103 RB-Ms delivered by the end of FY 2012.

FY 2013 Planned Key Events:

- Receive 33 RB-Ms, for a cumulative total of 136 RB-Ms delivered by the end of FY 2013.

FY 2014 Planned Key Events:

- Receive 30 RB-Ms, for a cumulative total of 166 RB-Ms delivered by the end of FY 2014.

Available Funding Spend Plan (Projected obligations by year appropriated)

Fiscal Year	Cost Category	FY 2010	FY 2011	FY 2012	Totals (\$000s)
2014	Initial Spares			\$3,800	\$3,800
	Program Management	\$740		\$1,542	\$2,282
2015	Engineering Change Orders		\$2,050	\$3,544	\$5,594
	Program Management			\$5,433	\$5,433

Medium Endurance Cutter Sustainment

Project Description, Justification and Scope

The Coast Guard will complete the Mission Effectiveness Project (MEP) on the 270' WMECs in FY 2014 using funds appropriated through FY 2013. This work includes replacement of major equipment that is the primary source of degraded operational readiness, such as the main propulsion control and monitoring system, small boat davits, oily water separators, air conditioning, refrigeration, and evaporators. The majority of this work will be performed at the Coast Guard YARD in Curtis Bay, MD. Some work items will be completed via road show installations following the yard availability.

The MEP project is a bridging strategy for the WMEC fleet until it is replaced by the OPC fleet. Post-MEP, WMECs have an average equipment reliability rate (in terms of decreased number of major casualties) that is nearly double that of pre-MEP WMECs.

FY 2012 Key Events

- Delivered 270-foot WMEC MEP Vessel – LEGARE.
- Delivered 270-foot WMEC MEP Vessel – THETIS.
- Delivered 270-foot WMEC MEP Vessel – BEAR.
- Delivered 270-foot WMEC MEP Vessel – ESCANABA .

FY 2013 Planned Key Events:

- Deliver 270-foot WMEC MEP Vessel – TAHOMA.
- Deliver 270-foot WMEC MEP Vessel – HARRIET LANE.
- Deliver 270-foot WMEC MEP Vessel – SPENCER.

FY 2014 Planned Key Events:

- Deliver 270-foot WMEC MEP Vessel – CAMPBELL.
- Deliver 270-foot WMEC MEP Vessel – SENECA.
- Deliver 270-foot WMEC MEP Vessel – FORWARD.
- Deliver 270-foot WMEC MEP Vessel – MOHAWK

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2014:

Maritime Patrol Aircraft (MPA)

Project Description, Justification and Scope

The HC-144A will assume Coast Guard medium range maritime patrol and transport requirements, replacing the HU-25 and some HC-130s. The Ocean Sentry has the capability to perform aerial delivery of search and rescue equipment such as rafts, pumps, and flares, and it can serve as an On-Scene Command platform for a variety of Homeland Security missions. The sensor suite includes a multi-mode surface and air search radar, Electro-Optical, Infra-Red (EO/IR) system, and Automated Identification System (AIS) which all contribute to delivery of maritime domain awareness essential to achieving mission success.

The HC-144As modern C4ISR suite, modular cabin, miserly fuel consumption rate, and short field takeoff and landing capability make it uniquely suited for USCG missions.

FY 2012 Key Events:

- Awarded Production Contract for MPA #16 – 17.
- Delivered MPA #13 – 14.
- Awarded Production Contract 5 MSPs (#13 – 17), with options for an additional 3 MSPs.

FY 2013 Planned Key Events:

- Awarded Production Contract for MPA #18.
- Delivered MPA #15.
- Contract Production of MSP #13 – #17
- Flight Simulator Delivery

FY 2014 Planned Key Events:

- Deliver MPA #16 – 17.
- Deliver logistics for aircraft through #18.
- Deliver MSPs #13 – 17.
- Flight Simulator Delivery to Aviation Training Center Mobile, AL.

Communications: Wulfsberg RT-5000 (Prescott, AZ).

H-60 Conversion and Sustainment

Project Description, Justification and Scope

Prior year funding continues to modernize the Coast Guard’s fleet of 42 H-60 Jayhawk, Medium Range Recovery (MRR) helicopters as these helicopters rotate through Programmed Depot Maintenance at the CG Aviation Logistics Center (ALC). The H-60 Conversion Project is broken into discrete segments consisting of upgrades that modernize and standardize aging components and sub-systems to stabilize maintenance costs and operational reliability. Prior year appropriations continue implementation of the Sustainment efforts: Avionics Upgrade (DS1), Electro-Optical Infrared (EO/IR) Sensor System (ESS) Upgrades (DS2). The Avionics Upgrade (DS1) replaces obsolete MH-60J avionics with modernized equipment and aligns configuration with the DoD Common Avionics Architecture System. Upgrades include Multi-Functional Display screens, a radar altimeter with verbal low altitude alarm and Traffic Collision Avoidance System to enhance safety during night hovering and increase pilots’ situational awareness overall. The ESS segment (DS2) replaces the obsolete Forward Looking Infra-Red (FLIR) sensor with an enhanced EO/IR sensor common to all Coast Guard helicopter platforms. In addition, the funding allows for necessary Service Life Extension Program work items, including electrical re-wiring and dynamic component replacement.

Prior Year Key Events:

- Achieved H-60T EO/IR (DS2) Initial Operating Capability 2011

FY 2013 Planned Key Events:

- Complete H-60T Avionics Upgrades (DS1) and EO/IR Sensor System Upgrades (DS2) on eight airframes.

FY 2014 Planned Key Events:

- Deliver Avionics Upgrades (DS1), H-60T EO/IR Sensor System Upgrades (DS2), and Service Life Extension Program work items on an additional eight aircraft.

Rescue 21

Project Description, Justification and Scope

The unobligated prior year funds bring 14 Sectors to Final Acceptance, in addition to deployment in the two Alaska Sectors and the three Western Rivers Sectors.

The Rescue 21 project is replacing the U.S. Coast Guard’s legacy National Distress and Response System (NDRS) equipment, which improves communications, command and control capabilities in the U.S. coastal zone. The basic NDRS components include radios, transceivers, towers for antennas, and an interconnecting network. It is the foundation for coastal SAR (search and rescue), and is a critical enabler of efficient and effective command and control for all missions in coastal zones. As of May 2012, Rescue 21 is standing watch and saving lives along approximately 41,871 miles of U.S. coastline.

FY 2012 Key Events:

- Deployed the Great Lakes (Sector Lake Michigan) and the OCONUS Islands (Sectors San Juan, PR; Honolulu, HI; and Guam), for a cumulative addition of 3,190 coastline coverage miles.

FY 2013 Key Events:

- Continue the Full Rate Production contract with General Dynamics C4 Systems (GDC4S) to get 14 Sectors to Final Acceptance, in addition to deployment in the two Alaska sectors and the three Western Rivers sectors.
- Deliver consoles to Alaska sectors and begin deploying the three new remote sites.

In both the Western Rivers and Alaska regions the components include: operator consoles, with remote radio control, upgraded radios with encrypted digital capability, Digital Selective Calling (DSC) system and additional sites to cover critical coverage gaps in each region.

FY 2014 Key Events:

- Complete General Dynamics C4 Systems (GDC4S) Deployment – Full Rate Production (FRP) of gap filler remote sites to resolve remaining coverage gaps and achieve final acceptance in all coastal zone sectors.
- Achieve conditional Acceptance in three Western River Sectors (Ohio Valley, Lower Mississippi River and Upper Mississippi River).

Interagency Operations Centers (IOC)

Project Description, Justification and Scope

The unobligated balance finishes the IOC project with the release of WatchKeeper access to the remaining 15 IOC locations.

FY 2012 Key Events:

- Completed Programmatic Environmental Assessment.
- Released WatchKeeper access to 8 (New Orleans, San Francisco, Honolulu, Ohio Valley, Los Angeles/Long Beach, Tampa Bay/St Petersburg, Delaware Bay/Philadelphia, and Baltimore for 20 of 35) IOC locations, establishing a national standard for information management, joint planning, and interagency operations.

FY 2013 Key Events:

- Release WatchKeeper access to IOC locations that currently have technology demonstrator and continue release to seven (North Carolina/Wilmington, Columbia River/Portland, Houston-Galveston, Corpus Christi, Mobile, Buffalo, and Lake Michigan) IOC locations.

FY 2014 planned Key Events:

- Release WatchKeeper access to eight (Sault Ste Marie, Northern New England, Guam, Lower Mississippi River, Upper Mississippi River, Southeastern New England, Juneau, Anchorage, and Valdez) IOC locations.

**U. S. COAST GUARD
ALTERATION OF BRIDGES**

I. Appropriation Overview

A. Mission Statement for Alteration of Bridges:

Alteration of unreasonably obstructive bridges supports navigational safety and freedom of mobility to facilitate commerce, emergency response and U.S. Government operations by providing sufficient clearances for the type of vessels that transit beneath bridges. Alterations also deter waterway and highway/railway closures due to accidents.

B. Budget Activities:

Funding for Alteration of Bridges supports the Coast Guard's Aids to Navigation mission.

C. Budget Request Summary:

The Coast Guard is not requesting funding for Alteration of Bridges in FY 2014.

**U. S. COAST GUARD
RESEARCH, DEVELOPMENT, TEST, AND EVALUATION**

I. Appropriation Overview

A. Mission Statement for Research, Development, Test and Evaluation:

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other Federal and private research organizations. The purpose of the Research and Development (R&D) Program is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. RDT&E funding also supports risk-reduction expertise and services in the pre-acquisition process of major and non-major acquisition projects.

B. Budget Activities:

The RDT&E activities sustain program infrastructure and core capabilities, knowledge, skills, experience, and facilities to give the Coast Guard a strong evidence-based foundation for operational and capital investments decision-making. Activities include formulation and oversight of cooperative agreements with relevant professionals in the public and private sectors, such as University Affiliated Research Centers (UARC) and Federally Funded Research & Development Centers (FFRDC). These agreements promote collaboration and leverage expertise and the development of techniques, methods, hardware, and systems that directly contribute to increasing productivity and effectiveness of the Coast Guard's missions.

C. Budget Request Summary:

The Coast Guard requests 101 positions, 101 FTE and \$19,856,000 for the FY 2014 Request. This request provides necessary resources to develop technologies and systems that improve operational presence and response, as well as perform technology assessments to inform the early stages of the acquisition process.

The Coast Guard requests 101 positions, 101 FTE and \$19.856 million for the FY 2014 Request.

CURRENT SERVICES PROGRAM DESCRIPTION:

The RDT&E Appropriation funds foundational work in support of acquisition, operations, regulatory, and support initiatives undertaken by Coast Guard.

Funding for the RDT&E Program is grouped into two categories: Coast Guard Mission Research and Operations & Maintenance (O&M). Mission Research focuses on Acquisition Program support and operational improvements O&M funds salaries for in-house scientists, engineers, and operations analysts, facility rent, utilities and contractor costs.

With FY 2014 funding, the Coast Guard RDT&E Program will bring the Center for Coast Guard Modeling and Simulation (M&S) to full operational capability. In addition, the Coast Guard will continue Unmanned Aircraft Systems (UAS) testing, as well as conduct R&D in the following areas: command center operations and intelligence; prevention and mitigation of oil spills; prevention of aquatic invasive species introduction; sensor optimization, automation, and visualization; exploration of key energy conservation/green technologies; and exploration of concepts and technologies supporting operations in the Arctic regions. Specifically, with FY 2014 funding the Coast Guard RDT&E program plans to focus on the following projects:

Evidence-Based Decision-Making

- Modeling & Simulation (M&S). To provide a sound basis for investment decisions, the R&D Program will improve the Coast Guard's in-house analysis capability by adopting new M&S tools that incorporate previously unexplored techniques and abilities.

The critical tools the Coast Guard needs for M&S capabilities to address mission-level and fleet-level tactics, recapitalization decisions, and emergent issues to support Coast Guard Arctic capabilities will be updated and validated.

The Coast Guard will add ports and waterways not previously modeled to the Port Resilience Operational/Tactical Enforcement to Combat Terrorism (PROTECT) model and complete model validation.

Acquisition Program Support

- Unmanned Aerial Systems (UAS). The Coast Guard will conduct UAS testing onboard a National Security Cutter.
- Asset Environmental Impacts. The Coast Guard will continue analysis of modern “green” technologies, and continue to build knowledge and experience.
- Strategic Analysis. As part of pre-acquisition analysis, conduct Coast Guard strategic needs assessments to identify key areas for research and technology maturation.

Operational Program Support

- Oil Spill Detection and Response. The Coast Guard will continue to identify technologies most effective in preventing, managing, and mitigating maritime environmental response incidents involving oil spills that could potentially threaten sensitive maritime and coastal environments.

The Coast Guard will focus on reducing the costs and risks associated with acquiring, implementing, and operating new spill response capabilities. Particular research areas include: (a) continued development of spill response capabilities in the Arctic and extreme cold regions, (b) continued development of submerged (deepwater) spill response capabilities, and (c) command and control systems associated with major spill response.

- Sensor Optimization, Automation, and Visualization. The Coast Guard will optimize and automate sensor performance of new generation aviation, surface, and shore-based systems. The RDT&E Program will incorporate optimal sensor performance settings and search patterns into improved operational tactics, techniques, and procedures. Additionally, the Coast Guard will provide an updated analysis of detection and search methodology for incorporation into the overall sensor optimization concept and validate all models, including validation of sensor performance prediction and area search performance metric estimation using available test data.
- Intelligence. The Coast Guard will conduct pre-acquisition work to improve intelligence capabilities, while reducing long-term costs and risks. The RDT&E Program will improve the effectiveness of collecting intelligence information and data, and analyze, evaluate, and interpret the available information into actionable intelligence to enhance maritime domain awareness.

The Coast Guard will continue collaborative work in support of DHS S&T on advanced test beds (i.e., Coastal Surveillance System) to improve Interagency Operations Centers (IOC) data management, sensor management, and port partner integration.

- Alternative Energy/Environmental Analysis. Focusing on R&D that advances and supports deployment of clean-energy technologies, the Coast Guard will continue testing vessels with alternate fuels in FY 2014. The carbon footprint measurement method developed in FY 2012 will be used to evaluate the effectiveness of the alternative fuel and associated vessel modifications.
- Arctic Operations. The RDT&E Program will continue to focus on three research areas that have unique characteristics in the Arctic region: (1) communications, (2) sensor capabilities, and (3) ship/small boat capabilities. The Coast Guard will continue collaborative work with the DHS Office of University Programs to coordinate research to develop stopgap mitigation strategies for Arctic capabilities.

Regulatory Program Support

- Ballast Water Treatment (BWT) Systems. The Coast Guard RDT&E Program will develop and analyze shipboard testing protocols to verify BWT system capabilities based on the results of the FY 2013 market research assessment, to ensure compliance with BWT standards.

Great Lakes Restoration Initiative (GLRI)

- Oil in Ice. The Coast Guard will continue collaboration with the EPA, specifically the development of equipment and techniques that can be used successfully to detect, track, and recover oil in ice-filled waters. The Program will complete applied research and methodology testing, with follow-on efforts that will include full-scale exercises.
- Invasive Species. The Coast Guard will continue coordination with the EPA, U.S. Fish and Wildlife Service, and MARAD to further the development of ballast water treatment systems suitable for fresh water ecosystems by supporting the use of laboratory and shipboard testing, verification of treatment technologies, and coordination with the maritime industry.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Research, Development, Test and Evaluation
Appropriation Language**

For necessary expenses for applied scientific research, development, test, and evaluation; and for maintenance, rehabilitation, lease, and operation of facilities and equipment; as authorized by law; [\$19,728,000,]\$19,856,000,¹ to remain available until September 30, [2017]2018,² of which \$500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)): Provided, That there may be credited to and used for the purposes of this appropriation funds received from State and local governments, other public authorities, private sources, and foreign countries for expenses incurred for research, development, testing, and evaluation.

Explanation for Proposed Change:

Language Provision	Explanation
¹ ...[\$19,728,000,] <u>\$19,856,000</u> ...	Dollar change only. No substantial change proposed.
²[2017] <u>2018</u> ...	Fiscal year change only. No substantial change proposed.

¹The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year.

²The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

PPA Mission Statement

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other Federal and private research organizations. The purpose of the Research and Development (R&D) Program is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. RDT&E funding also supports risk-reduction expertise and services in the pre-acquisition process of major and non-major acquisition projects.

Summary Justification and Explanation of Changes

Salaries and Benefits

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 11,654	\$ 11,682	\$ 11,776	\$ 122

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. The FY 2014 request includes costs for 101 FTE and an increase of \$94,000 for a 1.0 percent proposed pay raise for military and civilian personnel.

Travel

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 869	\$ 1,397	\$ 436	\$ (433)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2014 request reflects travel funding requirements including implementation of new travel policies in support of the Administration's Campaign to Cut Waste.

Transportation of things

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 48	\$ 78	\$ 24	\$ (24)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request reflects anticipated needs.

Other Rent

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 23	\$ 36	\$ 11	\$ (12)

Payments to a non-Federal source for rental space, land, and structures. The FY 2014 request reflects anticipated needs.

Communication, utilities, and misc charges

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 127	\$ 205	\$ 64	\$ (63)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request reflects anticipated needs.

Advisory and Assistance

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 10,713	\$ 17,215	\$ 5,369	\$ (5,344)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request reflects anticipated needs and reflects the Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

Other services

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 1,159	\$ 1,863	\$ 580	\$ (579)

Other services include contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects anticipated needs.

Research and development

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 2,897	\$ 4,654	\$ 1,451	\$ (1,446)

The FY 2014 request reflects anticipated needs for the planned projects described in Section III.

Subsistence and support of persons

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 92	\$ 148	\$ 46	\$ (46)

Contractual services with the public or another Federal Government account for the board, lodging and care of persons. The FY 2014 request reflects anticipated needs.

Supplies and materials

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 84	\$ 135	\$ 42	\$ (42)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2014 request reflects anticipated needs.

Equipment

2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 113	\$ 181	\$ 57	\$ (56)

This object class covers the purchase of R&D materials for technology demonstrations, testing and evaluations and their progress. The FY 2014 request reflects anticipated needs.

U. S. COAST GUARD
MEDICARE-ELIGIBLE RETIREE HEALTH CARE FUND CONTRIBUTION

I. Appropriation Overview

A. Mission Statement for the Health Care Fund Contribution:

The Medicare-Eligible Retiree Health Care Fund Contribution (MERHCF) funds accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense (DoD) Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees currently serving on active duty in the Coast Guard, as well as retiree dependents and their potential survivors. The authority for the Coast Guard to make this payment on an annual basis was provided in P.L. 108-375, the 2005 Defense Appropriations Act. While this expenditure requires no annual appropriations action by Congress, it is scored as discretionary spending.

B. Budget Activities:

There are no budget activities directly related to providing this benefit to active duty personnel and their dependents.

C. Budget Request Summary:

The Coast Guard estimates that its contribution will be \$186,602,000 for FY 2014. The total adjustment-to-base is a decrease of \$75,269,000, which includes \$60,970,000 adjustments for FY 2013 Initiatives, and \$14,299,000 for DoD TRICARE Cost Savings projected to result from 2014 TRICARE proposals. This request will be paid to the DoD Medicare-Eligible Retiree Health Care Fund to support the benefits outlined above. The Coast Guard's annual budget estimate for Medicare-Eligible Retiree Health Care Fund Contribution is calculated by multiplying the projected end strength (FTE) by DoD actuary projected cost rates.

**U. S. COAST GUARD
RETIRED PAY**

I. Appropriation Overview

A. Mission Statement for Retired Pay:

The Retired Pay (RP) appropriation provides payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and other retired personnel entitlements identified under prior-year National Defense Authorization Acts. This includes payment for medical care of retired personnel and their dependents.

B. Budget Activities:

There are no budget activities directly related to providing this benefit to retired military personnel and their dependents.

C. Budget Request Summary:

The Coast Guard requests \$1,452,150,000 for the FY 2014 Request. The total adjustment-to-base includes an increase of \$11,993,000. This request support the benefits outlined above and remain available until expended. The Retired Pay appropriation is scored as a mandatory appropriation.

PPA Mission Statement

Retired Pay will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payments for career status bonuses, concurrent receipts and combat related special compensation identified under prior-year National Defense Authorization Acts.

Summary Justification and Explanation of Changes

Salaries and Benefits

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
	\$ 1,208,770		\$ 1,267,000		\$ 1,287,517		\$ 78,747

Accounts for cost-of-living adjustments for all retirement and most survivor annuities, including benefits authorized by prior-year National Defense Authorization Acts. The FY 2014 request increase reflects actuarial cost projections and prior-year unobligated balances.

Medical care

	FY 2012		FY 2013		FY 2014		FY 2012 to FY 2014
	Revised Enacted		Annualized CR		Request		Change
	\$ 231,387		\$ 173,157		\$ 164,633		\$ (66,754)

Decrease is based on the projections for retiree medical benefits. Once a member becomes eligible for Medicare, the Medicare-Eligible Retiree Health Care Fund (HFC) is responsible for these benefits.

U. S. COAST GUARD BOAT SAFETY

I. Appropriation Overview

A. Mission Statement for Boat Safety:

The Boat Safety (BS) program applies preventive means and strategies to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Maritime Prevention Program by promoting safe and enjoyable use of public U.S. waterways.

B. Budget Activities:

Boat Safety activities include: overseeing manufacturer compliance with Coast Guard regulations; grant making to states and national non-profit boating safety organizations; conducting surveys to measure recreational boating activity; continuing the "Boat Responsibly" national outreach and awareness initiative; promulgating safety regulations; and measuring life jacket wear rates, including the effectiveness of voluntary and mandatory efforts to increase life jacket usage.

C. Budget Request Summary:

The Coast Guard request assumes 10 positions, 10 FTE and \$109,464,110 to carry out the program in FY 2014. The total adjustments-to-base includes an increase of \$10.000 thousand for civilian pay raise and a decrease of \$3.745 million due to estimated reductions in Trust Fund Receipts.

In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund. Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2014 funding will be a percentage of FY 2013 trust fund receipts). These amounts are available until expended, but are limited in purpose and amount in accordance with existing statute.

	Perm Pos	FTE	Amount
2012 Revised Enacted	113,199
2014 Adjustments-to-Base	(3,735)
2014 Current Services	109,464
2014 Program Change
2014 Total Request	109,464
Total Change 2012 to 2014	(3,735)

The Coast Guard request assumes 10 positions, 10 FTE, and \$109.464 million to carry out the program in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

This account provides grants for the development and implementation of a coordinated national recreational boating safety program. Boating safety statistics reflect the success in meeting the program's objectives. Pursuant to the Safe, Accountable, Flexible, Efficient Transportation Equity Act-A Legacy for Users (SAFETEA-LU, P.L. 109-59), the Boat Safety program receives 18.5 percent of the funds collected in the Sport Fish Restoration and Boating Trust Fund.

The FY 2014 budget reflects the anticipated level of funding that would be available from the trust fund for boating safety. This is based on current estimates of FY 2013 trust fund receipts from the Office of Tax Analysis at the Department of the Treasury (adjusted to reflect amendments of current law enacted in P.L. 109-59). The estimated total distribution from the trust fund for boating safety in FY 2014 is \$109.464 million. Of that amount, \$5.500 million is available for use by the Coast Guard to coordinate and execute new and enhanced National RBS Program activities. The balance is authorized for the State RBS Federal Financial Assistance Program established by 46 U.S.C. 13101, et seq., minus not more than five percent for national boating safety activities of national non-profit public service organizations, and not more than two percent for Coast Guard expenses to administer State RBS programs.

PPA Mission Statement

The Boat Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Marine Safety mission by promoting safe and enjoyable use of public U.S. waterways. In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National RBS Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2014 funding will be a percentage of FY 2013 trust fund receipts).

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 1,346	\$ 1,346	\$ 1,356	\$ 10

Salaries and Benefits provides compensation directly related to Coast Guard civilian personnel duties. The FY 2014 request includes costs for 10 FTE and an increase of \$10,000 for a 1.0 percent proposed pay raise for civilians.

Travel

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 101	\$ 117	\$ 97	\$ (4)

Transportation funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2014 request reflects anticipated needs.

Other Services

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 6,152	\$ 10,421	\$ 6,115	\$ (37)

Other services include reported contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects anticipated needs for transportation of things related to revenues from trust fund receipts. Non-Federal services for boating safety activities will be decreased across all States.

Grants, Subsidies and Contributions

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 98,475	\$ 119,687	\$ 101,885	\$ 3,410

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts. The FY 2014 request reflects anticipated needs to non-federal sources.

Insurance claims and indemnity

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Base	Request	Change
\$ 7,114	\$ -	\$ -	\$ (7,114)

This object class covers benefit payment from the social insurance and Federal retirement trust funds and payment for losses and claims including those under the Equal Access to Justice Act.

**U. S. COAST GUARD
MARITIME OIL SPILL PROGRAM**

I. Appropriation Overview

A. Mission Statement for Maritime Oil Spill Program:

The Maritime Oil Spill Program operates under the authority of Title I of the Oil Pollution Act of 1990 (OPA), as amended, which provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for Federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. The Maritime Oil Spill Program directly supports the Coast Guard's Marine Environmental Protection mission and Maritime Response Program.

B. Budget Activities:

In Section Seven of Executive Order 12777, the President delegated management responsibility of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.

The NPFC:

- provides funding for Federal removal actions in response to a discharge or a substantial threat of discharge of oil to navigable waters of the United States;
- compensates claimants for OPA removal costs or damages;
- provides funding to natural resource trustees for Natural Resource Damage Assessments (NRDA); and
- administers the OSLTF.

C. Budget Request Summary:

The Coast Guard estimates that expenditures from this account will total \$238,600,000 in FY 2014. These estimated expenditures consist of a \$50,000,000 transfer for immediate Federal oil spill response, an estimated \$600,000 payment to the Prince William Sound Oil Spill Recovery Institute, and an estimated \$188,000,000 to compensate claimants for uncompensated OPA removal costs and damages including natural resources damages.

III. Current Services Program Description by PPA

**Department of Homeland Security
U. S. Coast Guard
Maritime Oil Spill Program
Program Performance Justification
(Dollars in Thousands)**

PPA I: MARITIME OIL SPILL PROGRAM

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	213,423
2014 Adjustments-to-Base			25,177
2014 Current Services	238,600
2014 Program Change
2014 Total Request	238,600
Total Change 2012 to 2014	25,177

The Coast Guard estimates \$238.600 million to carry out the program in FY 2014.

- Increase of \$25.177 million reflects the anticipated lower response and claims costs following the Deepwater Horizon incident that occurred in 2010.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Maritime Oil Spill Program uses the OSLTF to pay response costs incurred by the Coast Guard and other Federal agencies, adjudicate claims, and provide funding to support the Oil Spill Recovery Institute located in Prince William Sound, Alaska. NPFC's administrative costs are funded within the Coast Guard's Operating Expenses appropriation.

OPA section 5006(b) directs the NPFC to make annual payments to the Prince William Sound Oil Spill Recovery Institute for the interest on a portion of the OSLTF balance.

PPA Mission Statement

The Maritime Oil Spill Program fund will provide a source of funds for removal costs and damages resulting from oil spills, or the substantial threat of a spill, into navigable waters of the U.S. In accordance with the provisions of the Oil Pollution Act of 1990, the President may make available up to \$50.0 million annually from the Fund for oil spill removal activities. The Fund also pays all eligible claims for removal costs and damages resulting from oil spills.

Summary Justification and Explanation of Changes

MISCELLANEOUS FUNDS**

I. Miscellaneous Funds Overview

General Gift Fund

A. Mission Statement for General Gift Fund

The Coast Guard General Gift Fund is authorized under 10 U.S.C. § 2601 provisions for such funds within the Department of Defense and the Coast Guard. The General Gift Fund is a vehicle that authorizes the Commandant of the Coast Guard to accept gifts and donations for the benefit of museums, chapels, and other organizations under the jurisdiction of the Coast Guard. The Coast Guard is also authorized to accept gifts to be used for the benefit of service members who are wounded, injured or taken ill while in the line of duty, as well as for those members' dependents and survivors.

B. Budget Activities:

The General Gift Fund indirectly supports Coast Guard activities.

C. Budget Bequest Summary:

The Coast Guard estimates \$80,000 in bequests from various sources to the General Gift Fund in FY 2014.

**U. S. COAST GUARD
MISCELLANEOUS FUNDS**

Yard Fund Overview

A. Mission Statement for Yard Fund

The Coast Guard Yard, which is located in Curtis Bay, Maryland, provides mission-essential logistics and engineering support (e.g., cutter drydocking, maintenance and repair). The Yard Fund is a revolving account supported by the Coast Guard's Operating Expenses and Acquisition, Construction & Improvements appropriations to pay for personnel and materials required for Coast Guard projects and work orders completed by the Coast Guard Yard.

B. Budget Activities:

Yard Fund activities include logistics and engineering support for Coast Guard vessels. These activities indirectly support Coast Guard missions.

C. Budget Request Summary:

Not Applicable.

**U. S. COAST GUARD
MISCELLANEOUS FUNDS**

Supply Fund Overview

A. Mission Statement for Supply Fund

The Supply Fund, in accordance with 14 U.S.C. § 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from the sale of goods.

B. Budget Activities:

Supply Fund activities include funding the procurement of uniforms, commissioning provisions, stores, materials, and fuel. These activities indirectly support Coast Guard missions.

C. Budget Request Summary:

Not Applicable.

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and cutters, utility costs, including shore facility utilities, cutter and boat fuel requirements, and postal costs. The estimate of reimbursables in FY 2014 reflects the anticipated need.

Printing

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 7	\$ 36	\$ 26	\$ 19

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. The FY 2014 estimate of reimburseables reflects the anticipated need.

Other services

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	Request	Change
\$ 10,006	\$ 49,095	\$ 35,190	\$ 25,184

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. the FY 2014 estimate of reimbursables reflects consideration of prior-year unobligated balances.

Supplies and Materials

FY 2012	FY 2013	FY 2014	FY 2012 to FY 2014
Revised Enacted	Annualized CR	125	Change
\$ 16,605	\$ 81,474	\$ 58,398	\$ 41,793

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2014 estimate of reimbursables reflects the anticipated need for supplies and material cost.

A. Component Overview

The Coast Guard is the principal Federal agency responsible for maritime safety, security, and stewardship in U.S. ports and inland waterways, along the coasts, and on the high seas. Since 1790, the Coast Guard has safeguarded our Nation's maritime interests and natural resources on our rivers, ports and harbors, offshore, and in certain regions around the world. The Coast Guard's unique authorities, versatile assets, and highly proficient workforce enable the Service to respond to all threats and hazards in a manner that provides exceptional value and service to the Nation. The Coast Guard serves as a highly skilled member of the nation's Armed Forces, always ready to:

***Protect those on the sea:** leading responses to man-made and natural disasters and threats, ensuring a safe and secure maritime transportation system, preventing potentially devastating maritime incidents, and rescuing those in distress.*

***Protect the Nation from threats delivered by sea:** enforcing laws and treaties, securing our ocean resources, and ensuring the integrity of our maritime domain from illegal activity and potential acts of terrorism.*

***Protect the sea itself:** regulating hazardous cargo transportation, holding responsible parties accountable for environmental damage and cleanup, and protecting living marine and natural resources.*

Coast Guard missions remain more relevant than ever and, in the years since the September 11th terrorist attacks, the Coast Guard has renewed its focus and resolve to safeguard the United States as part of the Department of Homeland Security (DHS). Today, the breadth of Coast Guard missions and capabilities is crucial to protecting the homeland and preserving America's national interests.

As the Nation faces challenging economic times, it must not be forgotten that America is a maritime nation. Jobs and foreign trade rely upon our Nation's ports, and inland waterways, including the Great Lakes. But, these approaches from the sea can be used by criminals, domestic or transnational, who seek to do us harm. In the offshore transit zones, Coast Guard works with its federal, international, and state partners to address transnational crime, drug and human trafficking, and piracy. In the nation's port areas, the Coast Guard leads coordination efforts to mitigate maritime threats to the safe and secure flow of people and goods. Our natural resources are also at risk from illegal harvesting of fish stocks and other living marine resources in the U.S. Exclusive Economic Zone (EEZ). In the future, greater access to the Arctic has the potential to increase opportunities for commercial shipping activity, tourism, and energy exploration. The Coast Guard's FY 2014 budget request allocates resources to the highest priority initiatives to counter today's threats, and keep the maritime domain safe and secure for the future.

The Coast Guard's layered maritime security strategy focuses on three regions; high seas, littorals, and inland waters. This strategy allows Coast Guard to execute its eleven statutory missions using our assets and authorities most effectively throughout the maritime continuum. Coast Guard statutory missions support the strategic missions, goals, and objectives of six DHS programs:

The **Maritime Security Operations** program encompasses activities conducted to detect, deter, prevent, and disrupt terrorist attacks, and other criminal acts in the U.S. maritime domain. These operations include the execution of antiterrorism, response and recovery operations, and related

preparedness activities such as the establishment and oversight of a maritime security regime and maritime domain awareness. The following statutory mission contributes to the Coast Guard's Maritime Security Operations program: Ports, Waterways, and Coastal Security (PWCS).

The **Maritime Law Enforcement** program preserves America's jurisdictional rights within our maritime borders and suppresses violations of U.S. Federal law on, under and over the seas. The Coast Guard is the lead Federal maritime law enforcement agency for enforcing national and international law on the high seas, outer continental shelf, and inward from the U.S. Exclusive Economic Zone (EEZ) to inland navigable waters, including the Great Lakes. The following statutory missions contribute to the Coast Guard's Maritime Law Enforcement program: Drug Interdiction; Migrant Interdiction; Living Marine Resources; and Other Law Enforcement.

The **Maritime Prevention** program mitigates the risk of human casualties and property losses, minimizes security risks, and protects the marine environment. The following statutory missions contribute to the Coast Guard's Maritime Prevention program: Ports, Waterways, and Coastal Security (PWCS); Marine Safety; and Marine Environmental Protection.

The **Maritime Response** program mitigates the consequences of marine casualties and disastrous events. The Coast Guard minimizes loss of life, injury, and property loss by searching for and rescuing persons in distress in the maritime environment. Coast Guard preparedness efforts ensure incident response and recovery resources are fully ready and capable to minimize impact of disasters to people, the environment and the economy. The following statutory missions contribute to the Coast Guard's Maritime Response program: Search and Rescue and Marine Environmental Protection.

The **Defense Operations** program provides unique authorities and capabilities to support the National Military Strategy. The program portfolio comprises eight activities including: Maritime Interdiction Operations; Combating Maritime Terrorism; Port Operations Security and Defense (to include maintaining a Title 10 Reserve force and providing Aids to Navigation support for battle-space preparation); Military Environmental Response Operations; Coastal Sea Control Operations (including providing DoD the only assured surface access in ice-covered and ice-diminished waters); Maritime Operational Threat Response (MOTR); Rotary Wing Air Intercept Operations; and Support for Theater Security Cooperation Initiatives. The following statutory mission contributes to the Coast Guard's Defense Operations program: Defense Readiness.

The **Marine Transportation System Management** (MTS) program promotes a safe, secure, efficient and environmentally sound waterways system. The Coast Guard minimizes disruptions to maritime commerce by regulating safe navigation and by providing waterways restoration capabilities after extreme weather events, marine accidents, or terrorist incidents. The Coast Guard works in concert with other Federal agencies, state and local governments, marine industries, maritime associations, and the international community to optimize balanced use of the Nation's marine transportation system. The following statutory missions contribute to the Coast Guard's Marine Transportation System Management program: Aids to Navigation and Ice Operations.

The **Cross-Cutting Capital Investments and Maintenance** program derives from the Acquisition Construction and Improvements (AC&I) and Operating Expenses (OE) sections of the CJ. AC&I funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. This program is intended to align with the resource

levels contained in the DHS Future Years Homeland Security Program (FYHSP) which capture total AC&I budget authority and the portion of O&M for investments not captured as Mission Support.

The **Mission Support** program is a portfolio of output-oriented mission support programs. These programs support the needs of the operational forces of the Coast Guard and the maritime community and address crosscutting areas such as research and development, policy and regulatory guidance, asset management, and capabilities. This program includes several information technology (IT) transformational initiatives (excluding acquisition projects) that are designed to improve information sharing within the Coast Guard, strengthen information availability, improve vessel tracking, provide a fully secure IT environment, and enhance financial management and audit practices.

The **Management & Administration** program captures activities that provide enterprise leadership, executive support, management and business administration services, human resources management, finance and accounting, and training and recruiting.

FY 2014 Budget Request

The Coast Guard's FY 2014 Budget allocates available resources to address today's greatest maritime safety and security needs, while making the necessary investment in new cutters and boats, and sustainment of aircraft, systems, and infrastructure necessary to ensure the viability of the Coast Guard well into the future. The Coast Guard's approach in the FY 2014 budget was to assess operational risk (both in the near and long-term), and strategically allocate resources to best mitigate these risks. The Coast Guard must continue to strike a balance between investment in current operations and continued recapitalization. This balanced approach is absolutely critical to ensure the Service's continued ability to carry out its missions safely and effectively both now and into the future.

The Coast Guard's FY 2014 strategic and budget priorities are to:

1. Build Essential Coast Guard Capability for the Nation;
2. Strengthen Resource and Operational Stewardship; and
3. Sustain the Most Critical Front-Line Operations

Build Essential Coast Guard Capability for the Nation

The condition and serviceability of the Coast Guard's in-service surface fleet, the aging of both fixed and rotary air assets, and the projected timelines to replace these assets require the Coast Guard to continue investment in surface and air recapitalization and sustainment programs to maintain the capability necessary to operate in areas strategically important to our Nation.

To mitigate the current and emerging offshore threats and strengthen DHS' layered security approach in the outer regions, the FY 2014 budget provides for the acquisition of the seventh National Security Cutter (NSC) and two Fast Response Cutters (FRCs), and continues pre-acquisition activities for the Offshore Patrol Cutter and Polar Icebreaker. These assets will provide critical capabilities to support operations in the offshore regions and the Arctic for the next 40 years. The budget also continues sustainment and conversion work on fixed wing and rotary wing aircraft,

recapitalization of cutter boats, and investment in Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems.

Strengthen Resource and Operational Stewardship

The FY 2014 budget decommissions two High Endurance Cutters (WHECs) that are being replaced by more capable National Security Cutters. The Coast Guard will also consolidate regional assets where overlapping capabilities exist by closing Air Facilities in Newport, OR and Charleston, SC. The 2014 budget ensures that our resources are aligned to our Nation's highest priorities in a manner that balances key investments for the future with sustaining essential investment in today's missions and capabilities that provide the highest return on investment.

Sustain the Most Critical Front-Line Operations

The FY 2014 budget sustains the most critical frontline operations, including maintaining search and rescue coverage, protecting critical infrastructure and key resources, supporting safe navigation, safeguarding natural resources, protecting the environment, detecting and interdicting drugs and individuals attempting to enter the United States illegally, and supporting the Nation's foreign policy objectives.

FYHSP Programs

The table below shows the Coast Guard's FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Maritime Security Operations	4,804	\$425,314
Maritime Law Enforcement	11,184	\$870,473
Maritime Prevention	9,611	\$709,243
Maritime Response	6,350	\$504,768
Defense Operations	3,708	\$335,009
Maritime Transportation System Management	7,812	\$599,105
Cross-Cutting Capital Investments and Sustainment*	818	\$2,001,635
Mission Support	2,706	\$1,682,708
Management & Administration	2776	\$865,432
Total Discretionary Budget Request	49,773	\$7,993,687
Mandatory Appropriations (total)	10	\$1,800,693
Total Budget Authority	49,783	\$9,794,380

* This differs from the Acquisition Construction and Improvements section of the CJ and is intended to align with the resource levels contained in the Future Years Homeland Security Program (FYHSP) which captures total budget authority and O&M for investments not captured as Mission Support.

B. Component Contributions to Achieving DHS Missions

The table below shows the alignment of the Coast Guard programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					Providing Essential Support to National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Maritime Security Operations	100%	-	-	-	-	-	-
Maritime Law Enforcement	-	85%	-	-	-	15%	-
Maritime Prevention	8%	58%	-	-	-	34%	-
Maritime Response	-	-	-	-	18%	82%	-
Defense Operations	15%	-	-	-	-	85%	-
Maritime Transportation System Management	-	-	-	-	-	100%	-
Cross-Cutting Capital Investments and Sustainment	10%	40%	-	-	5%	45%	-
Mission Support	10%	40%	-	-	3%	47%	-
Management & Administration	10%	40%	-	-	3%	47%	-

Mission 1: Preventing Terrorism and Enhancing Security

Major Coast Guard activities that support Preventing Terrorism and Enhancing Security fall under the Maritime Security Operations, Maritime Prevention, and Defense Operations Programs.

The Coast Guard, through its **Maritime Security Operations**, is the key maritime element of DHS’s *Preventing Terrorism and Enhancing Security* mission. In the ports and on the waterways, the Coast Guard works to mitigate the risk of terrorist or other security threats. The vulnerabilities of critical infrastructure and key resources located on or near the water are mitigated through such activities as random patrols, enforcing security zones and conducting security escorts of certain vessels (e.g. vessels containing hazardous cargo) in key U.S. ports and waterways. Conducting anti-terrorism patrols deters and disrupts the use of the waterways for transport of individuals with criminal intent and dangerous or illicit cargo.

The Coast Guard, through certain activities within its **Maritime Prevention** program, protects critical infrastructure and key resources by identifying high risk vessels to board and inspect. The Coast Guard regularly inspects port facilities for compliance with security regulations. These activities enhance the security of the marine transportation system at its core, while balancing the needs and flow of commerce. When necessary, rules and regulatory standards are developed to enhance maritime security.

The Coast Guard possesses both unique civil and military authorities applicable in the maritime domain. With a fully integrated approach to national and homeland security set forth in the *2010*

United States Coast Guard - Strategic Context

National Security Strategy, the Coast Guard is the leader in the interagency coordination of maritime activities through its **Defense Operations** program. The Coast Guard enhances security in the homeland with its Rotary Wing Air Intercept (RWAI) capability for the National Capital Region (NCR) and other National Special Security Events. In addition, the Coast Guard trains and establishes relationships with our global maritime partners, which strengthens homeland security.

Resources Requested

Coast Guard resources supporting Preventing Terrorism and Enhancing Security are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Maritime Security Operations	\$450,544	4,819	\$464,583	4,819	\$425,314	4,808
Maritime Prevention	\$78,701	998	\$79,621	998	\$66,859	877
Defense Operations	\$58,919	637	\$58,919	637	\$50,781	561
Cross-Cutting Capital Investments and Sustainment	\$375,001	76	\$241,671	79	\$209,446	82
Mission Support	\$186,961	283	\$186,965	285	\$168,271	271
Management & Administration	\$231,677	304	\$233,695	304	\$231,766	278
Total	\$1,381,803*	7,117	\$1,265,453*	7,122	\$1,152,437	6,876*

*Totals account for rounding.

Performance Measures

For *Preventing Terrorism and Enhancing Security*, U.S. Coast Guard contributes to this mission, but does not have its own strategic-level performance measures in this area. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Management Measures

Measure: Percent reduction of all maritime security risk subject to U.S. Coast Guard influence						
Description: This is a risk-based outcome measure that begins with an assessment (by maritime security subject matter experts) of sixteen high-consequence maritime terrorist attack scenarios. Threat, vulnerability, and consequence levels are estimated for each scenario, which generates a proxy (index) value of "raw risk" that exists in the maritime domain. Next, U.S. Coast Guard interventions (security and response operations, regime and awareness activities) for the fiscal year are scored against the scenarios with regard to the decreases in threat, vulnerability and consequence that each has been estimated to have afforded. (The analysis then focuses on those areas within the U.S. Coast Guard's roles and strategic mandates.) The resulting measure is a proxy measure of performance. Targets for FY11-FY16 have increased relative to FY 2010 due to a revised methodology that took effect in FY11.						
Fiscal	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

United States Coast Guard - Strategic Context

Year:						
Target:	21%	28%	44%	44%	36%	37%
Result:	31%	28%	44%	36%	N/A	N/A

Measure: Percent reduction of maritime security risk resulting from U.S. Coast Guard consequence management						
Description: This measure indicates the estimated % of terrorist-related maritime risk reduction due to consequence mgmt, as a % of the risk that USCG has the ability to impact. This is a risk-based measure that involves the scoring (by maritime security subject matter experts) of sixteen high-consequence maritime terrorist attack scenarios with respect to threat, vulnerability, & consequence. Aggregation of maritime security risk scenarios generates an index of "raw risk" that exists in the maritime domain. USCG layered interventions (both operational & regulatory-based) employed throughout the FY are scored against the attack scenarios with regard to the % consequence after a modeled attack has occurred. The resultant measure shows the reduction in "raw risk" from USCG consequence mitigation efforts alone. Targets for FY11-16 have increased relative to FY 2010 due to a revised methodology that took effect in FY11.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	6%	5%	3%	3%	4%	4%
Result:	9%	3%	4%	2%	N/A	N/A

Measure: Percent reduction of maritime security risk resulting from U.S. Coast Guard efforts to prevent a terrorist entering the U.S. via maritime means						
Description: This measure is an estimate of the percent of terrorist-related maritime risk reduction of the illegal entry of a terrorist(s) through the maritime domain (as a percent of the risk that the USCG has the ability to impact). This is a risk-based measure that involves the scoring (by maritime security subject matter experts) with respect to threat, vulnerability and consequence of the illegal entry of a terrorist(s) into the U.S. with intent and capability to carry out terror attacks within the United States where vessels en route from foreign countries are used as a means of conveyance. Such scoring generates an index of "raw risk" that exists in the maritime domain. Next, USCG incremental interventions (awareness, operational and regulatory-based) that have taken place throughout the fiscal year are scored with regard to the effectiveness each has been estimated to have afforded. Targets for FY11-16 have increased due to a revised methodology that took effect in FY11.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	21%	29%	52%	52%	34%	35%
Result:	42%	42%	43%	34%	N/A	N/A

Measure: Percent reduction of maritime security risk resulting from U.S. Coast Guard efforts to prevent a weapon of mass destruction from entering the United States via maritime means						
Description: This measure is an estimate of the percent of terrorist-related maritime risk reduction of the illegal entry of a Weapon of Mass Destruction (WMD)/materials into the U.S. through the maritime domain (as a percent of the risk that the USCG has the ability to impact). This is a risk-based measure that involves the scoring (by maritime security subject matter experts) with respect to threat, vulnerability and consequence of the illegal entry of a WMD/materials into the United States to support ongoing terrorist operations where vessels en						

route from foreign countries are used as a means of conveyance. Scoring generates an index of "raw risk" that exists in the maritime domain. USCG incremental interventions (awareness, operational and regulatory-based) that have taken place throughout the fiscal year are scored with regard to the effectiveness that each has been estimated to have afforded. Targets for FY11-16 have increased relative to FY 2010 due to a revised methodology that took effect in FY11.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	3%	12%	29%	29%	24%	25%
Result:	17%	17%	28%	24%	N/A	N/A

Mission 2: Securing and Managing Our Borders

The major Coast Guard programs that support *Securing and Managing our Borders* are Maritime Law Enforcement and Maritime Prevention.

The Coast Guard is the principal Federal maritime law enforcement agency that directly supports *Securing and Managing Our Borders* in the inland waterways, ports, littorals and on the high seas. The **Maritime Law Enforcement** program leverages Coast Guard civil authorities to prevent the illegal use of U.S. maritime approaches and waterways. The Coast Guard uses cutters, boats, aircraft and sensors to enforce drug, migrant, and anti-smuggling laws in the maritime domain.

The Coast Guard, through its **Maritime Prevention** program, secures key transportation nodes through security/background checks to ensure unauthorized and illicit individuals do not gain access to or disrupt key transportation and commerce nodes. In addition, potential risks to our borders are mitigated through the screening of all crew, passengers, and cargo of vessels over 300 gross tons prior to arrival in the U.S. waters.

Resources Requested

Coast Guard resources supporting *Securing and Managing our Borders* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Maritime Law Enforcement	\$724,278	9,261	\$743,828	9,526	\$740,470	9,739
Maritime Prevention	\$484,046	6,605	\$485,543	6,605	\$476,137	6,529
Cross-Cutting Capital Investments and Sustainment	\$771,137	305	\$900,092	314	\$792,321	327
Mission Support	\$747,843	1,132	\$747,858	1,142	\$673,083	1,082
Management & Administration	\$926,706	1,214	\$934,778	1,215	\$927,064	1,110
Total	\$3,654,010	18,518*	\$3,812,100*	18,802	3,609,075	18,788*

*Totals account for rounding.

Performance Measures

For *Securing and Managing Our Borders*, two types of performance measures are presented. Strategic Performance Plan Measures represent the U.S. Coast Guard’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Security compliance rate for high risk maritime facilities						
Description: This measure is a leading indicator of maritime facility security and resiliency in our nation’s ports. Compliance of high risk (Maritime Transportation Security Act (MTSA)) facilities is determined based on whether a major problem is found during an inspection, requiring a notice of violation or civil penalty. MTSA facilities are a high risk subset of the entire national waterfront facility population given the nature of their activities and/or the products they handle; which pose a greater risk for significant loss of life, environmental damage, or economic disruption if attacked. Examining the rate of compliance at high risk facilities provides insight into resiliency in that MTSA facilities are not only required to maintain proper access safeguards, but also exercise approved plans/procedures to prevent and react to security emergencies; and are therefore better suited to resist, adapt, and recover to adversity or disruption.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	99.9%	98.7%	N/A	N/A

Management Measures

Measure: Annual MTSA Facility compliance rate with Transportation Worker Identification Credential (TWIC) regulations						
Description: This measure reports the percent of Maritime Transportation Security Act (MTSA) regulated facilities that are found to be in compliance with the Transportation Worker Identification Card (TWIC) regulations during CG inspections. The Security and Accountability for Every (SAFE) Port Act of 2006 requires the Coast Guard to conduct at least two MTSA security inspections on regulated facilities each year; one announced and one unannounced. CG Inspectors randomly sample different areas of a facility (admin staff, security staff, dock workers, etc.) to check for TWIC compliance by ensuring workers have a valid and current TWIC card. Some infractions can be corrected on the spot, e.g., a trucker forgot his TWIC in his truck cab. Depending on the number and severity of TWIC infractions, the inspector/Capt of the Port may find the facility not in compliance. Statistical guidelines have been developed based on the size of the facility to aid inspectors, and to ensure random sampling.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	80%	85%	99%	99%	99%
Result:	N/A	100%	99%	99%	N/A	N/A

Measure: Number of undocumented migrants who attempt to enter the U.S. via maritime routes that are interdicted						
Description: This measure is the total number of all undocumented migrants who are attempting to enter the U.S. by maritime means and who are interdicted by the U.S. Coast Guard and other law enforcement agencies. The other agencies include Customs and Border Protection, and foreign entities partnering with the U.S. Coast Guard for migrant interdiction operations.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<8,351	<8,609	<6,100	<6,300
Result:	N/A	N/A	3,477	4,086	N/A	N/A

Measure: Removal rate for cocaine from non-commercial vessels in maritime transit zone						
Description: Percent of Cocaine removed (seized by the U.S. Coast Guard or disrupted (jettisoned, scuttled or destroyed) as a result of U.S. Coast Guard law enforcement action) in relationship to the estimated Non-Commercial Maritime Movement of cocaine.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	15.7%	18.5%	15.5%	16.5%	14.1%	13.9%
Result:	15%	13.5%	11.6%	13.4%	N/A	N/A

Mission 5: Ensuring Resilience to Disasters

The Coast Guard supports *Ensuring Resilience to Disasters* through multi-mission asset capability and the ability to surge resources as needed for response to an incident of national significance. In this role, the most significant program is Maritime Response.

Through its Reserve Forces and by maintaining a readiness posture and establishing presence in our ports and waterways, littorals, and on the high seas, the Coast Guard is the leading Federal responder for disaster on the water. The Coast Guard’s **Maritime Response** program supports *resilience to disasters* through risk assessments, all-hazards plan development, training, exercises, and daily operations. The Coast Guard stands ready to respond to and aid in mass recovery operations from man-made incidents or natural disasters impacting national and key international maritime communities. The Coast Guard continuously improves its capabilities in emergency management and seamlessly integrates into the National Incident Management System (NIMS) through the entire emergency management cycle.

Resources Requested

Coast Guard resources supporting *Ensuring Resilience to Disasters* are provided in the table below.
\$ in thousands

Program	FY 20112		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Maritime Response	\$137,618	1,385	\$137,618	1,385	\$130,326	1,405

*Totals account for rounding.

Performance Measures

U.S. Coast Guard contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Providing Essential Support to National and Economic Security

Major Coast Guard programs that are *Providing Essential Support to National and Economic Security* include Maritime Law Enforcement, Maritime Prevention, Maritime Response, Defense Operations, and Marine Transportation System Management.

The Coast Guard directly contributes to *Providing Essential Support to National and Economic Security* as the primary Federal maritime law enforcement agency. Specifically, the **Maritime Law Enforcement** program leverages Coast Guard civil authority to enforce laws and prevent illegal use of U.S. maritime approaches and waterways. In these areas, the Coast Guard enforces protection laws. Cutters, boats, and aircraft patrol the Exclusive Economic Zone (EEZ) to prevent illegal foreign fishing and ensure domestic compliance. Marine protection and fisheries laws are enforced through surveillance, boarding and inspecting of vessels, people, and cargo.

The Coast Guard's **Maritime Prevention** program contributes to *Providing Essential Support to National and Economic Security* through development, implementation and enforcement of regulatory actions. The Coast Guard develops and enforces marine safety and security standards, performs recreational boating safety inspections and licenses U.S. mariners. Broader objectives are met through the inspection of waterfront facilities and cargo containers to ensure risks to life, property and the environment are reduced. Additionally, Coast Guard investigators document and evaluate marine casualties and security and environmental incidents to make recommendations for implementing new standards that further protect the marine environment and ensure the safe operation of the MTS.

The Coast Guard contributes to *Providing Essential Support to National and Economic Security* through the **Maritime Response** program. Trained personnel, capable air and surface assets, and command and control elements provide expertise and flexibility in responding to environmental and marine pollution incidents both in the U.S. and abroad. In addition, the Coast Guard maintains a 24-hour watch for security incidents and distress calls both in U.S. waters and on the high seas to safeguard life in the maritime environment

The Coast Guard via its **Defense Operations** program provides unique authorities and capabilities to *Providing Essential Support to National and Economic Security*. Specific activities include port security for military cargo and support to DoD for defense operations. The Coast Guard maintains a level of readiness and training that allows for the immediate integration with DoD forces for peacetime operations or during times of war. This readiness and training supports U.S. national

interests abroad, as well as facilitating DoD support to DHS for the integration of Homeland Defense and Homeland Security.

The Coast Guard contributes to *Providing Essential Support to National and Economic Security* through the **Marine Transportation System (MTS) Management** program. By maintaining navigational aids and disseminating information to mariners on potential closures and waterway closures, providing vessel traffic services, breaking ice, and enforcing safety standards, the Coast Guard assures safe and secure flow of people and goods in the nation’s maritime regions.

Resources Requested

Coast Guard resources supporting *Providing Essential Support to National and Economic Security* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Maritime Law Enforcement	\$103,760	1,345	\$110,760	1,445	\$130,003	1,445

Management & Administration	\$1,088,880	1,427	\$1,098,365	1,428	\$1,089,301	1,305
Total	\$5,225,385	23,953	\$5,332,659	24,075	\$4,692,1295	22,525

Performance Measures

For *Providing Essential Support to National and Economic Security*, two types of performance measures are presented. Strategic Performance Plan Measures gauge achievement in this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Availability of maritime navigation aids
Description: This measure indicates the hours that short-range federal Aids to Navigation are available. The aid availability rate is based on an international measurement standard established by the International Association of Marine Aids to Navigation and Lighthouse Authorities

United States Coast Guard - Strategic Context

(IALA) (Recommendation O-130) in December 2004. A short-range Aid to Navigation is counted as not being available from the initial time a discrepancy is reported until the time the discrepancy is corrected.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	97.5%	97.5%	97.5%	97.5%	97.5%	97.5%
Result:	98%	98.5%	98.5%	98.3%	N/A	N/A

Measure: Fishing regulation compliance rate

Description: The U.S. Coast Guard uses the percentage of fishing vessels observed at sea complying with domestic regulations as a measure of the Coast Guard's activities and their impact on the health and well-being of U.S. fisheries and marine protected species. This specific measure reflects the percent of boardings at sea by the U.S. Coast Guard during which no significant violations of domestic fisheries regulations are detected.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	97%	97%	96%	96.0%	96.0%	96.5%
Result:	96.7%	97.2%	97.4%	98.3%	N/A	N/A

Measure: Five-year average number of commercial and recreational boating deaths and injuries

Description: This measure reports the sum of the five-year average numbers of reportable commercial mariner, commercial passenger, and recreational boating deaths and injuries. It is an indicator of the long-term trend of the Maritime Prevention Program's impact on marine safety. 45 CFR 4.05-1 requires the owner, agent, master, operator, or person in charge to notify the U.S. Coast Guard of any loss of life or injury that requires professional medical treatment beyond first aid. 33 CFR 173.55 requires the operator of a vessel that is used for recreational purposes or is required to be numbered, to file a Boating Accident Report when a person dies; or is injured and requires medical treatment beyond first aid; or disappears from the vessel under circumstances that indicate death or injury as a result of an occurrence that involves the vessel or its equipment.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=4,813	<=4,642	<=4,546	<=4,503
Result:	N/A	N/A	4,567	4,469	N/A	N/A

Measure: Number of detected incursions of foreign fishing vessels violating U.S. waters

Description: This measure is the number of detected illegal fishing incursions into the U.S. Exclusive Economic Zone (EEZ). Incursions detected by both the U.S. Coast Guard and other sources are included when the reports are judged by operational commanders as being of sufficient validity to order resources to respond.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<195	<190	<180	<140	<140	<148
Result:	112	82	122	160	N/A	N/A

Measure: Percent of people in imminent danger saved in the maritime environment

Description: This is a measure of the percent of people who were in imminent danger on the

United States Coast Guard - Strategic Context

oceans and other waterways and whose lives were saved by U.S Coast Guard. The number of lives lost before and after the U.S Coast Guard is notified and the number of persons missing at the end of search operations are factored into this percentage. Several factors hinder successful response including untimely distress notification to the U.S Coast Guard, incorrect distress site location reporting, severe weather conditions at the distress site, and distance to the scene.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	76%	76%	100%	100%	100%	100%
Result:	77.3%	74.4%	77.3%	77.3%	N/A	N/A

Management Measures

Measure: Average number of chemical discharge incidents in the maritime environment

Description: This measure is an indicator of the U.S. Coast Guard Program's impact on the long-term trend of chemical discharge incidents. It is a moving average of U.S. Coast Guard investigated chemical discharge incidents into navigable waters of the United States for the past 60 months, divided by the 5-year average annual foreign and domestic short tons (100 million) of Chemical and Chemical Products shipped in U.S. waters.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	<=22.8	<=22	<=18.4	<=16	<=15.9
Result:	N/A	16.9	15.0	14.2	N/A	N/A

Measure: Average number of navigational accidents

Description: This measure evaluates the long-term trend of U.S. Coast Guard Waterways Management Program in preventing collisions, allisions (vessels striking fixed objects), and groundings.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	<=1,858	<=1,963	<=1,939	<=2,012	<=2,043
Result:	N/A	1,878	1,945	1,932	N/A	N/A

Measure: Average number of oil spills in the maritime environment

Description: This measure is an indicator of the U.S. Coast Guard Prevention Program's impact on the long-term trend of significant oil spills. It is a moving average of U.S. Coast Guard investigated oil spills greater than 100 gallons discharged into navigable waters of the United States for the past 60 months, divided by the 5-year average annual foreign and domestic short tons (100 million) of Oil and Oil Products shipped in U.S. waters.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=13	<=12.1	<=11.6	<=11.4	<=11.4	<=11.3
Result:	11.8	11.4	10.2	10.5	N/A	N/A

Measure: Five-year average number of commercial mariner deaths and injuries

Description: This measure reports the number of commercial mariner deaths and injuries for the past 60 months and is an indicator of the long-term performance trend of the Coast Guard's Prevention Program impact on commercial mariner fatalities and injuries.

United States Coast Guard - Strategic Context

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=529	<=520	<=475	<=455	<=453	<=452
Result:	475	454	431	426	N/A	N/A

Measure: Five-year average number of commercial passenger deaths and injuries						
Description: This measure reports the number of commercial passenger deaths and injuries for the past 60 months and is an indicator of the long-term performance trend of the Coast Guard's Prevention Program impact on commercial passenger fatalities and injuries.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=251	<=248	<=223	<=215	<=254	<=254
Result:	228	238	232	256	N/A	N/A

Measure: Five-year average number of recreational boating deaths and injuries						
Description: This measure reports the number of recreational boating fatalities and injuries for the past 60 months and is an indicator of the long-term performance trend of the Coast Guard's Prevention Program impact on recreational boating fatalities and injuries.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=4,248	<=4,184	<=4,115	<=3,972	<=3,880	<=3,797
Result:	4,038	3,959	3,904	3,791	N/A	N/A

Measure: Number of days critical waterways are closed to commerce due to ice						
Description: This measure is an indicator of U.S. Coast Guard Icebreaking impact on preventing disruptions to maritime commerce due to ice. This measure tallies the annual number of days critical Great Lakes waterways are closed. A closure is a period of 24 or more hours during which a waterway is closed by a Vessel Traffic Service or a Captain of the Port or is blocked by a beset vessel. Closure day targets were negotiated with Great Lakes Marine Transportation System stakeholders and are relative to winter severity. An average winter would include 2 closure days while a severe winter would include 8. The determination of Great Lakes winter severity is based on assessments of the North American Ice Service which is comprised of the U.S. National Ice Center, the Canadian Ice Service, and the International Ice Patrol.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	2	2	2	2	2	2
Result:	0	6	0	0	N/A	N/A

Measure: Percent of time rescue assets are on-scene within 2 hours						
Description: United States Codes and Code of Federal Regulations establish authority to operate rescue facilities and units, but do not prescribe specific response time standards – Coast Guard policy sets the 2 hour response standard. Time on scene is calculated from the earliest time a Search and Rescue Unit (SRU) is requested to proceed until the earliest time of arrival on scene of an SRU. This includes readiness time, the 30 minutes of preparation time, that provides for underway preps (i.e. engine warm-ups, underway checklist, risk management evaluation, and mission planning) and the transit time, the 90 minutes from underway to on scene based on						

moderate environmental conditions which allow for operation of the SRUs at their top cruise speeds. To calculate the response times used in the measure, the Coast Guard uses the following equation: Time On Scene = First Sortie On Scene Time minus First Resource Requested Time. The Coast Guard established the 2-hour On Scene Standard in the 1970's and conducted a full review of the standard in 1992. The standard is based on survival expectations in the average weighted water temperatures. The weighting factors into the varying number of incidents occurring regionally.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	85%	85%	100%	100%	100%	100%
Result:	N/A	93.3%	93.1%	93.5%	N/A	N/A

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Secret Service Operating Expenses

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The United States Secret Service has statutory authority to carry out two primary missions: protection of the nation's leaders and investigation of financial and electronic crimes. The Secret Service protects and investigates threats against the President and Vice President, their families, former Presidents and their spouses, visiting heads of state or government, presidential and vice presidential candidates/nominees; and other individuals as directed by the President; protects the White House Complex, Vice President's Residence, foreign missions, and other buildings within Washington, D.C.; and manages the security at designated National Special Security Events. The Secret Service also investigates violations of laws relating to counterfeiting of obligations and securities of the United States; financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, mortgage fraud, and computer fraud; and computer-based attacks on financial, banking, telecommunications, and other critical infrastructure.

B. Budget Activities:

The Secret Service's Operating Expenses appropriation provides for the annualization of prior-year funding, fiscal adjustments, and budget activity related to Secret Service programs, projects and activities (PPA).

C. Budget Request Summary:

The Secret Service requests 6,686 positions, 6,705 FTE, and \$1,494,614,000 for FY 2014. The request includes a total of \$21,811,000 in program increases as well as program decreases of \$21,775,000 and (79) FTE. This level of funding includes the following program changes:

- White House Complex Security Posture Enhancements - \$14,200,000
- Cyber Security Presidential Protection Measures - \$7,611,000
- Attrition of FTE – (\$12,866,000) (76 FTE)
- Operational Mission Support (OMS) – (\$8,909,000)(3 FTE)

Adjustments to the base increases, totaling \$12,659,000, include the following:

- FY 2014 pay inflation - \$11,078,000
- 3rd year funding for positions hired for the OMS program - \$1,561,000
- 3rd year funding for acquisition workforce positions hired - \$20,000

Adjustments to base decreases, totaling \$105,222,000, include the following:

- National Special Security Events – (\$12,907,000)
- Forensic support and a grant to the National Center for Missing and Exploited Children – (\$7,518,000) (8 FTE)
- Presidential candidate nominee protection – (\$55,994,000) (172 FTE)
- International Field Office savings – (\$2,000,000) (2 FTE)
- Protection – Scheduled Overtime and Contractual Services (\$3,614,000)
- Reduction of Authorized Ceiling (\$0) (38 FTP)
- Non-recur of FY2012 Reprogramming action (\$23,189,000)

Additional adjustments to base decreases, totaling \$34,100,000, for the following DHS-wide efficiencies include:

- Office of Federal Procurement Policy directed purchasing savings - (\$3,488,000)
- DHS Strategic Sourcing Initiatives - (\$3,431,000)
- Permanent change of station travel - (\$4,332,000)
- General temporary duty travel - (\$14,666,000)
- Vehicle fleet inventory - (\$128,000)
- Overtime - (\$5,510,000)
- IT Infrastructure - (\$2,400,000)
- Headquarters administrative efficiency across DHS - (\$145,000)

An additional adjustment to the base decrease is to transfer funds from the Headquarters, Management, and Administration PPA to the Acquisition, Construction, and Improvements account:

- Information Integration and Technology Transformation (IITT), formerly known as Information Integration and Transformation– (\$42,824,000)

D: Efficiencies **\$34.100 million**

Mission Support and Personnel Efficiencies **\$9.842 million**

Permanent Change of Station (PCS) costs (\$4.332 million) – The Secret Service will extend agent reassignments by deferring 40 to 75 PCS moves.

Overtime (\$5.510 million) – The Secret Service continues to review overtime policy in order to identify cost effective practices. The Secret Service will reduce overtime where possible while minimizing the impact to the protective and investigative missions.

Travel Efficiencies **\$14.666 million**

TDY and travel (\$14.666 million) – All travel is reduced through the efforts of the newly established Logistics Resource Center by synchronizing Secret Service-wide requirements in order to achieve the most cost effective rates and by reviewing policies and practices to garner additional savings.

Advisory & Assistance Contracts Efficiencies

\$7.064 million

OFPP directed purchasing savings (\$3.488 million) – The review and analysis of all available procurement vehicles will continue in order to leverage purchasing power and achieve cost savings throughout the year.

DHS strategic sourcing initiatives (\$3.431 million) – The review and analysis of all available procurement vehicles will continue in order to leverage purchasing power and achieve cost savings.

HQ admin efficiency across DHS (\$0.145 million) – The review of all contractual services will continue and non-mission contractual services are reduced where practical.

Equipment Efficiencies

\$2.528 million

Vehicle fleet inventory (\$0.128 million) – The vehicle fleet inventory replacement schedule will be extended from the desired industry standard of five years/60,000 miles to eight years/unlimited miles.

IT Infrastructure (\$2.400 million) – The Secret Service continues to assess its strategic operational needs to refresh and upgrade existing IT and Communication systems. In order to ensure funding for high-priority IT investments, the Secret Service will extend the usage of non-critical IT and communication systems.

2014 Total Request	3,565	3,522	822,591
Total Change 2012 to 2014	(98)	(141)	(31,461)

The United States Secret Service requests 3,565 positions, 3,522 FTE, and \$822.6 million in FY 2014 for the Protection of persons and facilities PPA.

- Increase of \$6.4 million for 2014 pay raise
- Increase \$1.6 million to annualize third-year Operational Mission Support positions
- Increase of \$7.6 million to support the Cyber Security Presidential Protection Measures program
- Increase of \$14.2 million for costs associated with the White House Complex / First Family Footprint Enhancement
- Decrease of \$20.2 million for efficiencies
- Decrease of \$6.9 million for attrition (43 FTEs)
- Decrease of \$8.9 million associated with the Operational Mission Support program (3 FTEs)
- Decrease of \$3.6 million for scheduled overtime and contractual services
- Reallocation (95 FTE) to right-size the Headquarters, management and administration PPA
- Decrease of \$21.6 million and (119 FTEs) for Non-recur of FY 2012 Reprogramming action

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service provides for the physical safety of the President, Vice President, their families, and other individuals as designated by 18 U.S.C. § 3056. The Secret Service also secures designated facilities (18 U.S.C. § 3056A), and certain major events. This program is comprised of three distinct activity areas: (1) Protection of persons, (2) Protection of facilities, and (3) Protection of events.

Protection of Persons

The Secret Service is world-renowned for the physical protection it provides to the nation's highest elected leaders and other government officials. Under the direction of the Secretary of Homeland Security, the Secret Service is authorized (18 U.S.C. § 3056) to protect, in part, the following people:

- The President, the Vice President (or other individuals next in order of succession to the Office of the President), the President-elect and Vice President-elect;
- The immediate families of the above individuals;
- Former Vice Presidents, their spouses and their children who are under 16 years of age, for a period of not more than six months after the date the former Vice President leaves office;
- Visiting heads of foreign states or governments and their accompanying spouses;
- Other distinguished foreign visitors to the United States and official representatives of the United States performing special missions abroad.

Permanent protectees, such as the President and Vice President, have details of special agents permanently assigned to them. Other protectees, such as visiting heads of state or government and their accompanying spouses, are staffed with special agents on temporary assignment from Secret Service investigative field offices or headquarters.

For protective visits, teams of Secret Service personnel travel from five days to several weeks in advance to conduct site surveys, which assess the venue to be visited, personnel and equipment requirements as well as the location of area hospitals and evacuation routes in the event of an emergency. Before a protectee arrives in any city, state, or country, the lead advance special agent and their team, in conjunction with the local Secret Service investigative office, will coordinate with all of the local, state and federal law enforcement and public safety representatives participating in the visit. Intelligence information is discussed and shared, and emergency contingency plans are established. Prior to the arrival of the protectee, all aspects of the security plan are implemented to ensure a safe environment.

The assistance of partners in the military, as well as Federal, State and local law enforcement, and public safety organizations is a vital part of the entire security operation. During protective visits, Secret Service and local law enforcement personnel will primarily focus their security efforts on the middle and outer perimeter of the secure site. Special agents permanently assigned to a detail will focus on the inner security perimeter, working in close proximity to the protectee. A Secret Service command post acts as the communication center for protective activities, monitors emergencies, and shares all critical information with law enforcement agencies participating with the protective visit. After the visit, special agents will conduct an after action review of the protective visit, record unusual incidents and suggest improvements for the future.

In FY 2012, Secret Service protective details, investigative field office personnel, and headquarters personnel achieved 100 percent incident-free protection during 6,398 domestic travel stops and 400 international travel stops, an overall increase of 13 percent in protective travel stops over FY 2011.

Selected Protectees - Number of Travel Stops*					
	FY 2008	FY 2009	FY2010	FY 2011	FY 2012
President	323	352	364	336	466
First Lady	222	176	195	240	324
POTUS Family	243	161	141	147	126
Vice President	284	405	395	336	442
Second Lady	144	192	201	201	232
VPOTUS Family	214	117	226	269	283
Formers**	1,416	1,545	1,673	1,469	1,304
Total	2,846	2,948	3,195	2,998	3,177

*Does not include foreign dignitaries, Off the Record trips or in-towns, not requiring a 7-day advance.

** Formers includes: Former Presidents, Vice Presidents, First Lady, and Second Lady

In today's threat environment, the Secret Service is committed to using its resources to provide the most effective protection possible and, in doing so, seeks to integrate technology and highly trained personnel within its protective mission.

Using advanced protective countermeasures, the Secret Service executes security operations that deter, minimize and decisively respond to threats. The protective environment is enhanced by specialized resources within the Secret Service including the Airspace Security Branch, Counter Sniper Team, Emergency Response Team, Counter Surveillance Unit, Hazardous Agent Mitigation and Medical Emergency Response Team, Canine Unit, Magnetometer Operations Unit, and the Critical Systems Protection (CSP) program, which recognizes the interaction between physical and cyber environments, providing a holistic picture of potential impacts on physical security as the result of a cyber intrusion. CSP includes the systematic audit and technical assessment of various critical infrastructures that support 100% of all POTUS and VPOTUS venues.

Operational Mission Support

The Secret Service's Operational Mission Support program supports advanced protective countermeasure projects for high-priority hazardous materials detection systems, audio countermeasures, physical security enhancements at the White House Complex and other permanent protective sites, temporary Presidential sites, and cyber-protection activities to address known and evolving threats directed toward the agency's protective interests.

The Secret Service plans, designs, develops, installs, and maintains intrusion detection equipment, camera and lighting, and fire and life-safety systems at all protected sites. In addition, the Secret Service developed a comprehensive program to mitigate threats associated with explosives, chemical, biological, and radiological hazards.

One example of this program's early success is the establishment of a Temporary Visitor Entrance Building (TVEB) at the White House Complex, which opened in January 2012. The Secret Service worked closely with the White House Military Office, the National Park Service, the National Capital Planning Commission, and other stakeholders on the design and construction of the facility. The TVEB provides the Secret Service with enhanced explosive detection screening capabilities for the nearly 500,000 people who visit the White House for public tours and other events each year.

Additional information on this program is included in the Classified Annex of this budget.

Other White House Security Enhancements

In response to the November 2011 shooting incident, the Secret Service installed a variety of natural and man-made barriers on the White House Complex during FY 2012. In addition, the agency increased deployment of tactical and other specialty teams around the White House Complex and the First Family.

Additional information on these enhancements is included in the Classified Annex of this budget.

Protection of Facilities

Subject to the supervision of the Secretary of Homeland Security, the Secret Service is authorized (18 U.S.C. § 3056A) to protect, in part, the following facilities:

- The White House;
- Any building in which Presidential offices are located;
- The Treasury Building and grounds;
- The Vice President's residence and grounds; and
- 542 foreign diplomatic missions located in the Washington, D.C. metropolitan area.

Protection of these facilities is carried out in large part by the men and women of the Secret Service's Uniformed Division. These officers process thousands of staff members, other workers, tourists, members of the press and appointments into the White House Complex on a daily basis. Officers assigned to the White House Complex and Vice President's residence provide protection through the effective use of fixed posts, foot beats, bicycle patrols, roving vehicular patrols and cameras.

Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise on a twenty-four hour basis in and around the White House Complex. The White House Vehicle Inspection Team and the Counter Surveillance Unit augment the Uniformed Division's work in securing the White House Complex and other protected sites.

The Special Operations Section of the Uniformed Division is an additional unit responsible for protective activities associated with tours of the White House Mansion and special events such as the Easter Egg Roll, Presidential Receptions and Inaugural events. During FY 2012, the most notable White House events included the South Korea State Visit, with an arrival ceremony of approximately 6,500 guests and a State Dinner of 220 guests; Garden Tours with approximately 18,000 guests; the United Kingdom State Visit, with an arrival ceremony of approximately 6,500 guests and a State Dinner of 380 guests; the annual White House Easter Egg Roll with approximately 35,000 guests; the Congressional Picnic, which included approximately 1,700 guests – of which 300 were member of

Congress; the annual Independence Day Event with approximately 4,500 guests; and the Trick-or-Treat Halloween Event with approximately 3,600 invited school children and family members.

Uniformed Division officers assigned to protect foreign diplomatic missions in the Washington, D.C. metropolitan area perform their duties by patrolling the embassy district in marked police vehicles, motorcycles, bicycles and on foot. These officers also handle demonstrations at diplomatic locations, assist in motorcade movements, operate fixed protective posts, investigate and process crime scenes, and consult with diplomatic officials regarding security matters related to their embassies, chanceries and personnel.

Whether it is a permanent protective site, such as the White House Complex and the Vice President's residence, or temporary protective site, such as Presidential town hall meetings at local colleges or universities, magnetometer and portable X-ray coverage is a cornerstone of most security plans. The Uniformed Division is responsible for the deterrence and detection of all items that may be deemed a threat. It fulfills this responsibility through the use of walk-through metal detectors, handheld metal detectors, portable X-ray machines, physical searches of hand carried items, and explosive detection canines. From FY 2008 to FY 2012, Uniformed Division officers screened approximately 16 million people in support of the Secret Service protection mission.

Uniformed Division Magnetometer Unit Screenings	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	Total
Number of guests screened in support of protected sites	3,321,375	3,963,327	931,939	854,382	2,115,262	11,186,285

Protection of Events

In addition to the protection of persons and facilities, this PPA funds Secret Service protective responsibilities associated with events with large protectee attendance that are not designated as National Special Security Events. In years past, these events included meetings of the International Monetary Fund and World Bank; and meetings of the United Nations General Assembly (UNGA). The UNGA is one of the most significant annual protective events, requiring the agency to provide simultaneous protection of numerous heads of state or government, as well as the President, Vice President, and other Secret Service protectees that may be in attendance.

Fiscal Year	Event	Head-of-Government/ Head of State	Spouses
2012	UNGA 67	160	50
2011	UNGA 66	132	55
2010	UNGA 65	125	52
2009	UNGA 64	191	62
2008	UNGA 63	116	61

The above requested amount provides funding for operational security which directly supports the 2010 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events.

Funding this activity supports the accomplishment of the following Secret Service's strategic performance measure:

- Percent total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities
- Percent of instances protectees arrive and depart safely (Foreign Dignitaries)
- Percent of instances protectees arrive and depart safely (domestic protectees)
- Percent of protective travel instances that fall within estimated costs

PPA: National Special Security Event Fund

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	17,407
2014 Adjustments-to-Base	-	-	(12,907)
2014 Current Services	-	-	4,500
2014 Total Request	-	-	4,500
Total Change 2012 to 2014	-	-	(12,907)

The United States Secret Service requests 0 positions, 0 FTE, and \$4.5 million in FY 2014 for the National Special Security Event (NSSE) PPA. Included in this request is a decrease of \$12.9 million for National Special Security Events of non-recurred costs.

Justification for no-year funding

The incidence of NSSEs is occasionally unpredictable; some NSSEs are known years in advance while others are designated with only weeks or even days notice. To support Secret Service responsibilities associated with these events, the 2014 Budget specifically requests no-year funding for NSSEs to establish a base level of funding for unanticipated events. These events are unpredictable and limiting availability of funding will require the Service to either lapse or reprogram for other purposes in years when the full level of NSSE funding is not required. The goal is not for the Service to obligate funding quickly, but rather only as required by NSSEs as they occur.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service is the lead federal agency for the planning, coordination, and implementation of operational security plans at high-profile events designated by the Secretary of Homeland Security as National Special Security Events (NSSEs). These events represent some of the most complex and logistically complicated protective operations undertaken by the Secret Service, often requiring up to one year of planning. The support of multiple federal departments and coordination with numerous state and local law enforcement and public safety jurisdictions is essential to the success of these events. The Secret Service deploys personnel and resources from throughout the United States to support NSSE security operations.

Once an event is designated an NSSE, the Secret Service begins the collaborative process of developing a security plan that will create a safe and secure environment for Secret Service protectees, other dignitaries, event participants, and the general public, while safeguarding people's lawful freedoms of speech, assembly, and petition of the government. A central component of this collaboration is the establishment of an Executive Steering Committee (ESC) and as many as 24 subcommittees comprised of command level representatives from the Secret Service, the Federal Bureau of Investigation, the Federal Emergency Management Agency, other Federal agency partners, and state and local law enforcement and public safety counterparts representing the areas impacted by the events.

The ESC oversees the development and implementation of the security plan and resolves any concerns that are raised by the various subcommittees. Subcommittees are staffed by interagency subject matter experts and are charged with developing specific aspects of the security plan including, but not limited to: tactical training and field exercises; credentialing; airspace security; and venue security. To further enhance interagency collaboration, the Secret Service establishes a Multi-Agency Communications Center (MACC) at all NSSEs to give participating law enforcement and public safety agencies the ability to monitor and coordinate security from a central location.

The identification of vulnerabilities associated with a cyber attack during an NSSE is a critical part of the operational security plan. The Secret Service's Critical Systems Protection (CSP) program, which recognizes the interaction between physical and cyber environments, provides a holistic picture of potential impacts on physical security as the result of a cyber intrusion. This program, which is led by the Office of Investigations, includes the systematic audit and technical assessment of various critical infrastructures that support protective sites, events, and venues. These assessments identify which computer networks, process-control systems, or remotely controlled devices could, if compromised, impact an operational security plan. The CSP program has improved the Secret Service's ability to better secure protective venues to include those associated with designated NSSEs.

Excluding quadrennial campaign-related NSSEs, such as the party nominating conventions and presidential inaugurations, and annual State of the Union Addresses, the Secret Service has planned, coordinated, and implemented operational security plans for 17 NSSEs over the past 14 years. An average of 1.2 NSSEs per year since 1998. Based on the average cost of an NSSE, the \$4.5 million included in the FY 2014 budget request for NSSEs is intended to support the operational security costs associated with one unanticipated event, or the start-up costs required to support multiple events.

In FY 2012, the Secret Service successfully secured five NSSEs: the 2011 Asia Pacific Economic Cooperation Summit, the 2012 State of the Union Address (budgeted under Protection of persons and facilities), the North Atlantic Treaty Organization Summit, the Republican National Convention (budgeted under Presidential candidate nominee protection), and the Democratic National Convention (budgeted under Presidential candidate nominee protection). Two of these, the APEC and NATO summits, were funded through the NSSE PPA.

Asia Pacific Economic Cooperation (APEC) Summit November 2011

The United States hosted the 2011 APEC Summit in Honolulu, Hawaii, from November 12-13, 2011. This summit was attended by 21 world leaders. The event presented unique security challenges as it was the first such summit to be hosted by the U.S. outside of the continental United States. The Secret Service chaired a 26-member executive steering committee with oversight of 22 subcommittees, and

led more than 400 operational security planning participants representing more than 30 local, state, military and federal law enforcement and public safety agencies.

**State of the Union Address
January 2012**

The Secret Service coordinated the development of comprehensive security plans to protect those in attendance, including the majority of the nation's leadership from the executive, legislative and judicial branches of government, as well as the President and Mrs. Obama, Vice President and Dr. Biden, and designated administration officials.

**North Atlantic Treaty Organization (NATO) Summit
May 2012**

The United States hosted the 2012 NATO Summit in Chicago, Illinois, from May 20-21, 2012. The 2012 NATO Summit was attended by 40 world leaders. The Secret Service chaired an 11-member executive steering committee with oversight of 25 subcommittees.

The above requested amount provides funding for operational security which directly supports the 2010 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events.

Funding for this activity support the accomplishment of the following Secret Service strategic performance measures:

- Percent total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities
- Percent of National Special Security Events that were successfully completed

Department of Homeland Security

2014 Total Request	532	526	67,782
Total Change 2012 to 2014		(6)	(343)

The United States Secret Service requests 532 positions, 526 FTE and \$67.8 million in FY 2014 for the Protective intelligence activities PPA.

- Increase of \$617,000 for the 2014 pay raise
- Decrease of \$960,000 for attrition of (6 FTEs)

CURRENT SERVICES PROGRAM DESCRIPTION:

Under the statutory authorities described in 18 U.S.C. § 3056, the Secret Service maintains a robust protective intelligence program to ensure the safety of Secret Service protectees, protected facilities, or protected events.

The Secret Service’s protective intelligence program is conducted in collaboration with the intelligence community; Federal, State, and local law enforcement; the Department of Defense; and concerned citizens. The ultimate goal of the protective intelligence program is the identification and mitigation of threats toward Secret Service protectees, protected facilities, or protected events.

The Secret Service devotes headquarters and field office personnel to execute the protective intelligence mission. These personnel are responsible for conducting, guiding, and providing oversight for all protective intelligence investigations and advances. The Protective Intelligence and Assessment Division (PID) specifically designates special agents and intelligence research specialists to analyze, evaluate, disseminate, and manage information about individuals, groups, and activities that pose potential risks to Secret Service interests. PID personnel provide threat assessments, briefings, and other information pertinent to protective intelligence activities. Responsibilities also include training, and behavioral research to internal and external components on the prevention of targeted violence and identification of attack related behaviors.

To support protective intelligence operations of the Secret Service, PID engages in the following activities:

- Reviews hundreds of thousands of cables received daily from the intelligence community each year for information affecting Secret Service protectees, protected facilities, or protected events while maintaining an elaborate detailee system with law enforcement and the intelligence community to gain direct background information and, when necessary, operational assistance in resolving threats. During protective advances, an intelligence component is established both locally and in headquarters.
- Maintains a 24-hour Operations Center to process, evaluate, and refer for investigation/resolution (to Secret Service field offices) threat information relating to our Secret Service protectees, protected facilities, or protected events received from all sources. All relevant classified and unclassified information is then disseminated to appropriate Secret Service internal operational components through an elaborate system of human and electronic communication methods.
- Conducts threat assessments regarding the potential exposure to danger for those individuals, venues, and infrastructures protected by the Secret Service. These assessments offer a description of the current threat environment. Threat assessments review elements intrinsic and extrinsic to the protected individual, recent intelligence, and situational developments. The PID has established assessment methodology on both the attack and target side of the protective equation.
- Provides consultation, training, and behavioral research to internal and external components on the prevention of targeted violence and identification of attack related behaviors through the National Threat Assessment Center. Assists Secret Service special agents in evaluating the risk an individual may pose to Secret Service protectees, protected facilities, or protected events.
- Provides training on the evaluation of terrorist groups, techniques, and practices to internal and external public and private entities through the Critical Protective Analysis Group.

In support of these activities, from 2007 to 2012, Secret Service personnel assigned to headquarters and various field offices provided protective intelligence functions for 33,237 domestic and international travel stops (an average of over 6,647 per year). During this same time frame, PID prepared 4,680 threat assessments and opened 22,043 protective intelligence investigations (an average of 4,409 per year).

The requested amount funds protective intelligence activities in a strategic context which specifically addresses the missions and goals set forth by the 2010 DHS QHSR Objective 1.3.4, Protect Government Leaders, Facilities, and Special Events.

Funding this activity supports the accomplishment of the following Secret Service strategic performance measures:

- Number of Information Sharing Events with the Law Enforcement and Intelligence Community (new for FY2013)

Department of Homeland Security
U.S. Secret Service

Total Change 2012 to 2014	(172)	(172)	(80,384)

The United States Secret Service requests no funding in FY 2014 for the Presidential candidate nominee protection PPA.

- Decrease of \$56.0 million (2 FTEs) to non-recur costs for the 2012 Presidential Campaign
- Decrease of \$22.0 million (153 FTEs) to shift existing base labor resources back to the Domestic Field Operations PPA.
- Decrease of \$2.4 million to shift existing base labor resources back to the Electronic Crimes Special Agent Program /Electronic Crime Task Forces PPA (17 FTEs)

CURRENT SERVICES PROGRAM DESCRIPTION:

As authorized in 18 U.S.C § 3056 the Secret Service protects major presidential candidates and vice presidential candidates, and spouses of eligible candidates within 120 days of the general presidential election.

The Secretary of the Department of Homeland Security (DHS) determines who qualifies as a major presidential or vice presidential candidate in consultation with a Congressional Advisory Committee comprised of the Speaker of the House of Representatives, the minority leader of the House of Representatives, the majority and minority leaders of the Senate, and one additional member selected by the other members of the committee. Secret Service protective details are formally activated once a candidate: 1) meets the requirements for major candidate status, 2) requests protection, and 3) receives authorization from the DHS Secretary. The advisory committee may authorize protection, based on the threat environment, to all candidates once they officially announce their candidacy and meet the criteria making them creditable candidates.

Historically, as the general election approaches, the Secret Service experiences a marked increase in protective stops related to presidential candidate activities. In support of the active campaign cycle, Secret Service field office personnel are a critical and integral source of the required staffing necessary to conduct protective advances, undertake protective liaison activities with Federal, State, and local partners, as well as provide personnel to staff the candidate protective details.

Campaign Protective Activity	2012 Presidential Campaign	
	2012	2013
Fiscal Year		
Number of Travel Stops (1)		
Candidate/Nominee Stops	686	444
Security Advance Stops	624	405
Number of Protectees (2)		
Total President and Vice President Candidate/Nominees	5	2
Total Spouses and Adult Children	2	2
Number of Protection Days		
Total Number of Protection Days	438	117
Average Cost Per Day (3)		
Average Cost Per Day (3)	\$51,605	\$55,598

(1) Travel stops include Candidate/Nominee stops and security advance stops. Does not include stops by the incumbent.

(2) Protectees include the Presidential and Vice Presidential Candidate/Nominees, spouses and adult children.

(3) The average cost per day for FY 2012 and FY 2013 are subject to change as additional data is received and processed for 2012 Campaign events and the 2013 Presidential Inauguration.

For the 2012 Presidential Campaign, the Secret Service provided candidate protection for four major Presidential candidates: Romney, Gingrich, Santorum, and Cain. The Secret Service also provided protection for Mrs. Romney, Republican Vice Presidential candidate Paul Ryan and Mrs. Ryan, and the children of the candidates. Additionally, as with the 2008 Presidential Campaign, the Secret Service provided candidate protection during both domestic and international travel, to include the visit of Governor Romney to the United Kingdom, Israel, and Poland during July 2012. In addition, there was 100% magnetometer inspection at all venues during the 2012 Presidential Campaign.

Funding to cover protective workload and travel cost associated with the campaign schedule of President Obama and Vice President Biden is included within the Protection of Persons and Facilities PPA.

Republican National Convention August 2012

The 2012 Republican National Convention (RNC) was hosted by the cities of St Petersburg and Tampa, Florida from August 26-30, 2012. A “Welcome Event” for approximately 15,000 delegates, media, and guests was hosted by the 2012 Tampa Bay Host Committee on August 26, 2012 at Tropicana Field in St. Petersburg. The nominating convention and associated RNC business sessions took place in the Tampa Bay Times Forum in Tampa on August 28-30, 2012. In addition to securing the venues, organizers dealt with Tropical Storm Isaac, which forced the rescheduling of convention events originally scheduled to take place on the August 27. The Secret Service was responsible for the development and execution of a security plan designed to ensure the safety and security of three NSSE

designated venues, 34 delegate hotels, 2,286 delegates and 2,125 alternate delegates, as well as approximately 50,000 accredited representatives of the media. More than 75 federal, state, local, tribal and private sector partners worked for at least 15 months to develop and implement the comprehensive security plan.

Democratic National Convention September 2012

The 2012 Democratic National Convention (DNC) was held in Charlotte, North Carolina, from September 4-6, 2012 at the Time Warner Cable Arena. Approximately 6,000 delegates and alternates, 15,000 accredited media and nearly 20,000 guests and VIPs received credentials to participate in DNC related activities. Over the three-day period, an estimated total of more than 83,000 delegates, media and guests/VIPS attended the events at TWCA. In addition, President Obama, Vice President Joseph Biden, and their families attended, along with former President Clinton, eight cabinet members, the prime ministers of Zimbabwe and Macedonia, 17 governors, and representatives from the diplomatic corps.

Funding associated with this PPA directly supports the 2010 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events. The funding specifically permits the Secret Service to provide or acquire the security measures needed to protect designated campaign sites, candidates and their families.

Funding this activity supports the accomplishment of the following Secret Service strategic performance measures:

- Percent total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities
- Percent of instances protectees arrive and depart safely (campaign protectees)
- Percent of protective travel instances that fall within estimated costs

**Department of Homeland Security

White House mail screening
Program Performance Justification**
(Dollars in Thousands)

PPA: White House mail screening

	Perm. Pos	FTE	Amount
2012 Revised Enacted	7	7	18,472
2014 Adjustments-to-Base	-	-	15
2014 Current Services	7	7	18,487
2014 Total Request	7	7	18,487
Total Change 2012 to 2014	-	-	15

The United States Secret Service requests 7 positions, 7 FTE and \$18.5 million in FY 2014 for the White House mail screening PPA. Included in this request is an increase of \$15,000 for the FY 2014 pay raise.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service provided management and oversight of the mail screening security program responsible for screening all incoming mail, parcels, and gifts destined for the White House Complex (WHC). The goal of this program is to detect any chemical, biological, radiological, nuclear and explosive (CBRNE) hazards at a remote location in order to contain, mitigate, and investigate any vulnerability posed by these threats. The screening of all items going to the WHC is deemed a security function and, due to the recipients, items are screened at a high threat level. This program previously functioned at a repurposed military warehouse located in Edgewood, Maryland.

In 2010, the Secret Service assumed permanent and sole responsibility of its own newly-constructed mail screening facility in Washington, D.C. The Secret Service's White House Mail Screening Facility (WHMSF) receives all delivered mail and other items destined for the WHC for screening. Upon receipt, security personnel and technical specialists utilize strict protocols to sample the mail for contamination by targeted threat agents and monitor the environment for potentially hazardous substances. Any items determined to contain possible contaminants are quarantined and subjected to further analysis, and appropriate mitigation procedures are implemented. Once screened items are identified as negative for hazards, they are released back to the WHC for administrative mail processing and distribution.

Establishment of the new WHMSF allowed the Secret Service to consolidate operational elements under one roof and within an existing Secret Service secured perimeter. The WHMSF houses a processing area containing fume hoods, a chemical and biological laboratory, a forensics laboratory,

laundry room, warehouse, and management offices, each of which were located in separate buildings prior to construction. The WHMSF also allows the Secret Service to assume effective and full control of the critical aspects of the mail screening process. The Secret Service WHMSF:

- manages chemical, biological, and radiological detection equipment,
- maintains daily oversight of chemical and biological laboratory analysis and assay development efforts,
- ensures specialized equipment is maintained to established standards,
- enforces access control of personnel entry and exit into the facility via an elaborate card reader and camera system,
- maintains chain-of-custody for evidentiary purposes,
- oversees incident response training; monitors consumable use, and
- audits all operational aspects of the screening operation.

The WHMSF is a one-of-a-kind facility in its entirety, which contains the following features unique to the facility and mail screening operation:

- personnel fully open and inspect each item received,
- operational lanes are separated and isolated to provide operational redundancy,
- critical equipment function in tandem to maintain system integrity,
- mail screening rooms are segregated to facilitate quarantine and remediation in the event a contaminate is released,
- potentially contaminated waste water is captured for testing and treatment prior to discharge into the sanitary system, and
- an uninterrupted power supply to maintain life safety.

CBRNE protection features of the WHMSF include biological sample collectors, chemical agent air monitors, reinforced walls and relief panels for explosive blast mitigation, and radiation detectors. Epoxy painted walls and sealed openings are countermeasures to prevent contamination migration and assist with decontamination while an in-house laboratory provides the Secret Service with an enhanced level of daily oversight for analytical functions. Redundant instrumentation and equipment is maintained to ensure continuity of operation and valuable experiments; standards and samples are stored under secure temperature-monitored conditions. The in-house laboratory allows the Secret Service to be fully responsible for quality assurance.

Current initiatives at the WHMSF include seeking site-specific International Organization for Standardization (ISO) 17025, which covers standard testing, nonstandard testing and lab-developed testing methods, and Chemical Agent Standard Analytical Reference Manual (CASARM) accreditation for the laboratory. The WHMSF continues to build on its quality management documentation and standards with an early FY 2014 target for accreditation.

The Secret Service works with Federal partners to acquire the materials necessary to develop biological detection experiments. Specifically, the WHMSF is currently working with Edgewood Chemical Biological Center (ECBC), DHS Joint Program Executive Office (JPEO) for Chemical Biological Defense and the Naval Surface Warfare Center (NSWC) to develop and validate the aforementioned experiments. The Secret Service is also working with the DHS S&T to implement public health actionable experiments and to prepare for the next generation of analytical technology.

Through this partnership, the WHMSF laboratory plans to expand its portfolio of optimized and validated biological experiments to allow for the detection of three new biological threats. Specifically, the Luminex analytical technology platform has been developed, tested, and validated by DHS S&T. The WHMSF plans to implement this technology and incorporate these experiments in FY 2013.

From FY 2007 to FY 2012, the WHMSF has screened approximately 9.94 million pieces of mail and other items for CBRNE hazards, with over a three hundred percent increase in the amount of mail during the 2009 Presidential Transition.

The volume of mail is unpredictable due to the day-to-day political climate of the country. As mail flow and technology advances change, the WHMSF must adjust to meet the Secret Service protective mission.

The above requested amount provides operational funding for the WHMSF. This program is aligned with the missions and goals set forth by the 2010 DHS QHSR Objective 1.3.4, Protect government leaders, facilities and special events.

Funding this activity supports the following Secret Service strategic and management performance measures:

- Percent total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities

2014 Total Request	1,482	1,559	259,465
Total Change 2012 to 2014	13	90	20,719

The United States Secret Service requests 1,482 positions, 1,559 FTE and \$259.5 million in FY 2014 for the Domestic field operations PPA.

- Increase of \$2.2 million for 2014 pay raise
- Increase of \$22.0 million to shift existing base labor resources from the Presidential candidate nominee protection PPA (155 FTEs)
- Increase of \$848,000 to shift existing base resources from the Forensic Support and Grants to Missing and Exploited Children PPA (12 FTEs)
- Decrease 38 positions (20 FTE) reflecting a reduction to the authorized position ceiling associated with unfunded FTE.
- Decrease of \$2.7 million for attrition of FTE (17 FTEs)
- Reallocation of (38 FTEs) to right-size the Domestic field operations PPA
- Reallocation of 2 positions (2 FTEs) to right-size the International field operations PPA
- Decrease of \$1.6 million for Non-recur of FY 2012 Reprogramming action

CURRENT SERVICES PROGRAM DESCRIPTION:

Since 1865, the Secret Service’s investigative responsibilities provided under 18 U.S.C. § 3056 have been modified to adapt to the evolving threats to our financial critical infrastructure. Specifically, over the last two decades, the Secret Service has been authorized to investigate emerging crimes in the areas of access device fraud (18 U.S.C. § 1029), identity theft (18 U.S.C. § 1028), computer fraud (18 U.S.C. § 1030), and bank fraud (18 U.S.C. § 1344).

The Secret Service currently operates 141 domestic field offices primarily focused on the investigative mission, while remaining a key component to the protective mission. The budget request for Secret

Service Domestic Field Operations is reflective of the resources needed to support both protective operations and the investigative mission. Field offices are an integral part of protecting the President, Vice President, and other protectees; critical infrastructure; and events of national significance. At the same time, they are the frontline in the pursuit of domestic and international targets threatening the U.S. financial infrastructure. The budget is strategically aligned with the goals and objectives set forth in the Department of Homeland Security's (DHS's) 2010 Quadrennial Homeland Security Review (QHSR), with funding specifically targeted to preventing terrorism and enhancing security; protecting critical infrastructure; protecting government leaders, facilities, and special events; safeguarding and securing cyber space; and preventing cyber crime and other malicious uses of cyber space.

The Secret Service raises awareness of issues related to counterfeit, financial fraud, and electronic crimes, both in the law enforcement community and among the public at large. The Secret Service has worked to educate consumers and provide training to law enforcement personnel through a variety of programs and initiatives. Special agents from local field offices routinely provide community outreach seminars and public awareness training on the subjects of counterfeit currency, financial fraud, identity theft, and cyber crime. Special agents often address these topics when speaking to school groups, civic organizations, and private industry. In addition, the Secret Service provides training in the form of continuing education to state and local law enforcement. This training includes formal and informal classes, which occur at field office sponsored seminars, police academies, and other various settings.

The Secret Service, in concert with its established partners – public and private, domestic and international, law enforcement and civilian – will continue to play a critical role in preventing, detecting, investigating and mitigating the effects of increasingly complex financial and electronic crimes. The Secret Service will continue to rely on its most valuable asset, its specially-trained, dedicated personnel in the field, to investigate these crimes, develop strong cases for prosecution, bringing offenders to justice, to safeguard our nation's financial infrastructure and payment systems, and the protection of our nation's leaders.

The following charts provide detailed statistics regarding arrests and cases closed by Secret Service domestic field offices:

Arrests made by domestic field offices

Category	FY2008	FY2009	FY2010	FY2011	FY2012

Counterfeit Investigations

The Secret Service has a long history of protecting the integrity of U.S. currency. The agency's approach to protecting U.S. currency includes coordinating investigations and intelligence gathering in order to suppress and disrupt the counterfeiting of U.S. obligations worldwide. In FY 2012, counterfeit investigations yielded over 2,260 arrests through our domestic field offices and the suppression of over 250 counterfeit manufacturing plants domestically.

The Secret Service continues to adapt to the trends in counterfeiting, currently influenced by computer-based technologies. The wide spread availability of high quality scanning and printing devices for home use have provided more individuals the opportunity to manufacture a passable counterfeit note with relative ease. In FY 2012, digitally processed counterfeit notes accounted for 57 percent of the total domestic passing activity of counterfeit currency.

Financial Crimes Task Forces

The Secret Service has established unique and vital partnerships with state, local, and other Federal law enforcement agencies through years of collaboration on our investigative and protective endeavors. These partnerships enabled the Secret Service to establish a national network of Financial Crimes Task Forces (FCTFs) to combine the resources of the private sector and other law enforcement agencies in an organized effort to combat threats to our financial payment systems and critical infrastructures. The Secret Service currently maintains 41 FCTFs located in metropolitan regions across the country. FCTFs often operate in conjunction with Secret Service Electronic Crimes Task Forces and are frequently co-located and managed, to leverage the overall expertise and experience of task force members.

Criminal groups involved in financial crimes routinely operate outside traditional jurisdictional boundaries. By working closely with other Federal, state, and local law enforcement representatives, as well as foreign law enforcement, the Secret Service is able to provide a comprehensive network of information sharing, resource sharing, and technical expertise that bridges jurisdictional boundaries.

Mortgage Fraud Investigations

The Fraud Enforcement and Recovery Act (FERA) of 2009 (P.L. 111-21) enhanced and strengthened the federal government’s ability to investigate and prosecute mortgage and corporate fraud, including the Secret Service’s role in the investigation of these crimes within federal assistance programs and financial institutions. FERA also authorized additional funding for the Secret Service for investigations involving Federal assistance programs and financial institutions. The Secret Service currently participates in 35 mortgage fraud task forces around the country. The following chart provides data regarding prevention of potential and actual loss to the American public:

Mortgage Fraud

FY	Closed	Potential Loss	Actual Loss	Total Arrests
FY2012	86	\$307,832,388	\$103,350,844	146
FY2011	87	\$181,148,468	\$105,875,320	150

* Data reflect entries in Master Central Index (MCI) as of 3 January 2013.

** Data do not include In-Custody Response (ICR) cases or arrests or Administratively Closed Cases (ACI).

*** Loss amounts reflect cases closed during that time period with a primary case type of 813330,813331 or 813332.

The above requested amount provides funding for Secret Service domestic field operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Mission 4: Safeguarding and Securing Cyber Space, Objective 1.3.2 Protect Critical Infrastructure, Objective 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Funding this activity supports the accomplishment of the following Secret Service strategic and management performance measures:

- Percent of currency identified as counterfeit
- Financial crimes loss prevented through a criminal investigation (in billions) (non-Cyber)
- Amount of dollar loss prevented by Secret Service cyber investigations (in millions) (new for FY2013)
- Number of financial accounts recovered (in millions) (new for FY2013)
- Terabytes of data forensically analyzed and protected from future malicious use (new for FY2013)
- Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas (new for FY2013)
- Number of hours of training provided to law enforcement individuals in cyber crime and cyber forensics both domestically and overseas (new for FY2013)

The Executive Branch has identified cyber security as one of the most serious economic and national security challenges we face as a nation. The Secret Service is committed to identifying and

dismantling cybercriminals as mentioned in the White House Transnational Organized Crime Strategy in 2011. The Secret Service objective is securing the National Protection Framework as stated in the Blueprint for a Secure Cyber Future Strategy of 2011. The Secret Service can only effectively implement these DHS strategies by increasing the number of trained special agents. As the cyber criminal and infrastructure become more complex and multifaceted, the Secret Service needs additional assets to deter and dismantle the evolving cyber criminal. Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

The United States Secret Service requests 65 positions, 65 FTE and \$30.9 million in FY 2014 for the International field office administration and operations PPA.

- Increase of \$147,000 for the 2014 pay raise
- Decrease of \$2.0 million to non-recur funding for the International field office administration and operations PPA and (2 FTEs)
- Reallocation of 2 positions (2 FTEs) to right-size the International field operations PPA
- Decrease of \$160,000 for attrition of (1 FTE)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service operates 24 international offices in support of both the protective and investigative missions. The effective relationships that the Secret Service has developed with our international partners are attributed to our long-standing commitment to work with the host nation in a cooperative environment whether during a protective visit in their country or over the course of an investigative case. This environment fosters relationships built on trust and mutual respect, and results in the sharing of information and best practices.

In support of the Secret Service’s protection mission, the agency’s international offices conducted nearly 400 protective security advances to numerous countries visited by Secret Service protectees in FY 2012. Special agents assigned to these offices orchestrate the visits of the President, Vice President, Former Presidents and other protectees on overseas travel. This involves collaboration

between respective U.S. embassies, Regional Security Officers, and various foreign national entities. The entire security plan is facilitated through the partnerships that are developed between Secret Service international offices and the host government. In this regard, the success of the Secret Service's protective mission is enhanced by the strategic placement of international offices throughout the world.

Summary of Protective Foreign Travel Stops by Protectee (FY 2008-2012)

Protectee	FY2008	FY2009	FY2010	FY2011	FY2012	Total
President	32	31	14	18	9	104
First Lady	39	21	6	19	1	86
POTUS Family	21	17	4	22	1	65
Vice President	16	22	24	19	12	93
Second Lady	14	10	15	12	0	51

Formers*	94	116	194	116	144	664
Total¹	227	226	310	237	186	1,186

*Formers include Presidents, Vice Presidents, First and Second Lady

In FY 2012, Secret Service international offices assisted their law enforcement counterparts in securing the arrest of more than 990 criminal suspects implicated in counterfeiting, financial crimes, and cybercrime cases, including: the seizure of over \$56 million in counterfeit U.S. currency preventing its introduction into worldwide circulation; and providing assistance in financial crime investigations that identified approximately \$319 million in actual loss.

International Arrests				
Fiscal Year	Counterfeit	Cyber	Other Financial Crime	Total
FY 2008	222	120	317	659
FY 2009	358	348	356	1,062
FY 2010	280	330	191	801
FY 2011	303	306	356	965
FY 2012	260	452	273	985

Cyber Crime

Through its international offices, the Secret Service continues to enhance national security through multi-lateral investigations that mitigate and prevent the damages inflicted by cyber criminals on our nation's financial institutions. Currently, Secret Service personnel assigned in Europe participate in three Cyber Crime Working Groups (the Baltics, The Netherlands, and Ukraine), two Electronic Crimes Task Forces (ECTFs) (London, England and Rome, Italy), as well as the European

¹ Statistics reflect official FY 2012 data.

Commission on Cyber Crime (EC3), located in The Hague. These groups serve as partners in the international law enforcement community to exchange criminal intelligence regarding organized criminal groups targeting the American public, private entities, or financial infrastructure.

As part of the Secret Service's international ECTF program, the Secret Service partnered with law enforcement representatives from Belgium, Germany, France, Spain, Norway, Moldova, and Russia to identify areas of mutual investigative interests to combat cybercrime targeting the interconnected financial systems. These international Secret Service activities have ensured that criminal organizations engaged in sophisticated and complex cybercrime are aggressively investigated and disrupted, and their leaders arrested, indicted, and prosecuted.

Counterfeit Investigations

The Secret Service remains committed to suppressing the counterfeiting of U.S. currency around the world. The threat of counterfeit currency to the financial system of the United States from criminal groups abroad has grown over recent years. Advances in technology, as well as "Official Dollarization," or the adoption of the U.S. dollar by a country as its legal tender, have intensified the threat. There are currently 15 dollarized countries and six countries which operate semi-official dollarized economies. In these countries, the U.S. dollar is legal tender and is preferred to the domestic currency for paying wages, taxes, and everyday expenses. In response to the threat, the Secret Service has focused on strategic international investigations targeting counterfeiters and their distribution networks.

Project South America is the combined oversight of Secret Service vetted anti-counterfeit efforts in both Colombia and Peru. The specific goal of Project South America is to continue to provide the necessary training, strategy development, and infrastructure improvement to our foreign law enforcement partners to reduce the production, sale, and distribution of counterfeit U.S. currency within Colombia and Peru and to other countries. Since 1986, the Secret Service has recovered over \$630 million in South American-produced counterfeit U.S. currency passed and seized globally.

Since its inception as Project Colombia in May 2001, law enforcement has made 763 arrests in country, conducted 120 plant suppressions and seized approximately \$291 million of counterfeit notes in the country of Colombia, resulting in a 95 percent reduction in Colombian counterfeit currency passed in the United States. In FY 2012, Project Colombia partners seized approximately \$27.3 million in counterfeit U.S. currency, arrested 52 suspects and suppressed more than nine counterfeit printing plants.

With the success of the Secret Service anti-counterfeiting enforcement in Colombia, counterfeiters and international organized crime began moving their operations to Peru. The Peruvian note family has expanded dramatically with a total recorded activity reaching nearly \$30 million in FY 2011 and more than \$23 million in FY 2012 (worldwide). Since 2003, the Secret Service has tracked more than \$131 million in Peruvian-produced counterfeit. In response, the Secret Service formed the Peruvian Counterfeit Task Force (PCTF), a collaborative effort between the Secret Service and Peruvian law enforcement. In July 2012, the Secret Service opened the Lima, Peru Resident Office. In FY 2012, the PCTF successfully seized approximately \$4.8 million in counterfeit U.S. currency, assisted with the arrests of 19 Peruvian nationals and suppressed one significant counterfeit plant operation.

Personnel Recovery and Other Training

Prior to placing special agents in one of our international offices, the Secret Service trains agents on the risks associated with the environment they are entering. This specialized training is primarily conducted through the Drug Enforcement Administration's (DEA) Personnel Recovery Program, where 22 employees have received training since 2010. The course special agents and supervisors that are either assigned to international or domestic offices with foreign countries under their jurisdiction, to be prepared for any security incident, including but not limited to: kidnappings; terrorist attacks; natural disasters; or aircraft or motor vehicle accident, either with or without a protectee.

The Secret Service also maintains a robust relationship with the International Law Enforcement Academies (ILEAs), with locations in Budapest, Hungary; Bangkok, Thailand; San Salvador, El Salvador; Gaborone, Botswana; and a Regional Training Center in Lima, Peru. The Secret Service's works with ILEAs provide a critical opportunity to forge new relationships with international law enforcement partners and to share expertise in areas of protection, and criminal investigations in counterfeit currency, credit card fraud and cybercrimes.

The requested funding supports Secret Service international field operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Objective 1.3.2 Protect Critical Infrastructure; Mission 4: Safeguarding and Securing Cyber Space, Objective 4.1.3, Prevent Cyber Crime and other Malicious Uses of Cyber space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Funding this activity supports the accomplishment of the following Secret Service strategic performance measures:

- Percent of currency identified as counterfeit
- Financial crimes loss prevented through a criminal investigation (in billions) (non-Cyber)
- Amount of dollar loss prevented by Secret Service cyber investigations (in millions) (new for FY2013)
- Number of financial accounts recovered (in millions) (new for FY2013)
- Terabytes of data forensically analyzed and protected from future malicious use (new for FY2013)
- Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas (new for FY2013)
- Number of hours of training provided to law enforcement individuals in cyber crime and cyber forensics both domestically and overseas (new for FY2013)

2014 Program Change	-	(3)	(480)
2014 Total Request	308	305	56,968
Total Change 2012 to 2014	10	7	2,455

The United States Secret Service requests 308 positions, 305 FTEs and \$56.9 million in FY 2014 for the Electronic crimes special agent program and electronic crimes task forces PPA.

- Increase of \$496,000 for the 2014 pay raise
- Increase of \$2.4 million to shift existing base labor resources from the Presidential candidate nominee protection PPA and 17 positions (17 FTEs)
- Decrease of \$480,000 for attrition of (3 FTEs)
- Reallocation of 7 positions (7 FTEs) to right-size the Headquarters, Management, and Administration PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service is recognized for its investigative expertise and for its effective and innovative approach to the detection, investigation and prevention of financial crimes. As payment methods have changed over the years – from coin and paper currency, to checks, credit cards, and now, online transactions – the Secret Service has developed a multifaceted approach to aggressively combat cyber crimes. Criminal trends show an increased use of phishing emails, account takeovers, malicious software, hacking attacks and network intrusions resulting in significant data breaches. These crimes are increasingly transnational in nature and are intertwined with the illicit use of computers. In FY 2012, Secret Service cyber crime investigations prevented \$1.2 billion in potential losses and resulted in 1,383 arrests, an increase of 12.44 percent over the previous fiscal year.

The Secret Service is committed to safeguarding the nation’s financial payments systems. As a leader in cyber crime investigations, the Secret Service has arrested some of the world’s most wanted cybercriminals responsible for billions in losses to American taxpayers. Responding to the increase in cyber crime and the growing level of sophistication these criminals employ requires significant

resources and greater collaboration among law enforcement and its public and private sector partners. Accordingly, the Secret Service continues to dedicate significant resources to improving investigative techniques, remaining innovative in its approach, and providing training for its law enforcement partners.

Electronic Crimes Special Agent Program

A central component of the Secret Service's cyber crime investigative efforts is the Electronic Crimes Special Agent Program (ECSAP). This program is comprised of 174 Active Computer Forensic Examiners (ECSAP-CF), and 114 Active Network Intrusion Investigators (ECSAP-NITRO). ECSAP agents are computer investigative specialists and among the most highly-trained experts in law enforcement, qualified to conduct examinations on all types of electronic evidence. They not only serve in an investigative capacity, they also help protect components of our critical infrastructure by providing substantive insight regarding vulnerabilities that can be exploited by criminal elements.

ECSAP training is divided into three levels. The basic level provides special agents with hands-on experience with computer hardware, operating systems, cell phones, PDAs, GPSs, networking fundamentals, email investigations, legal issues, and search and seizure. Since 2008, this level of training is now part of the Secret Service's core curriculum for all newly hired special agents. The next level provides special agents with the necessary skills and equipment that will allow them to respond to and investigate network intrusions. At this level, special agents receive hands-on experience with computer hardware, device imaging solutions, forensic analysis tools, legal issues and report generation for law enforcement officers performing as cyber incident responders and digital evidence examiners. After the highest level of training, special agents are able to investigate and forensically obtain legally admissible digital evidence to be utilized in the prosecution of electronic crimes cases, as well as criminally-focused protective intelligence cases.

In FY 2012, ECSAP-trained special agents processed 1,106.4 terabytes (equivalent to over 200,000 DVDs) of digital evidence. As the Secret Service has established itself as a leader in cyber crime investigations, the nationwide demand among our local law enforcement and private sector partners for investigative or prevention-based assistance from our ECSAP-trained special agents has grown significantly.

Electronic Crimes Task Forces

The Secret Service currently operates 31 Electronic Crimes Task Forces (ECTFs), including two international task forces in Rome, Italy and London, England. The ECTF model is unique in that it brings together not only federal, state, and local law enforcement, but also prosecutors, private industry, and academia. Information about vulnerabilities, emerging technologies and preventative measures is openly shared within a trusted environment. The common purpose is the prevention, detection, mitigation, and aggressive investigation of cyber attacks on our nation's financial and critical infrastructures.

Today, membership in our ECTFs includes: 4,093 private sector partners; 2,495 international, federal, state and local law enforcement partners; and 366 academic partners. All ECTF partners benefit from the resources, information, expertise and advanced research provided by our international network of members while focusing on issues with significant regional impact.

The requested funding provides for Secret Service ECSAP and ECTFs in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Objective 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space.

- Amount of dollar loss prevented by Secret Service cyber investigations (in millions) (new for FY2013)
- Number of financial accounts recovered (in millions) (new for FY2013)
- Terabytes of data forensically analyzed and protected from future malicious use (new for FY2013)
- Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas (new for FY2013)
- Number of hours of training provided to law enforcement individuals in cyber crime and cyber forensics both domestically and overseas (new for FY2013)

Cell Phone Forensic Facility

The Secret Service has an established partnership with the Tulsa Digital Forensic Laboratory Center of Information Security, to create and co-locating the Cell Phone Forensic Facility at the University of Tulsa. The facility enables training, forensic examinations, and research on mobile devices. The ongoing research into these new devices, operating systems, and mobile device technologies provides valuable tools in the Secret Service's fights against cyber crime. Furthermore, the facility expands the capabilities of law enforcement to pursue a broader range of digital forensics. Since 2008, over 5,000 mobile device forensic examinations have been conducted.

The United States Secret Service requests 447 positions, 444 FTEs and \$177.3 million in FY 2014 for the Headquarters, management and administration PPA.

- Increase of \$718,000 for the 2014 pay raise
- Increase of \$20,000 to annualize third year acquisition workforce
- Reallocate 140 positions (140 FTEs) to right size the Headquarters, management and administration PPA
- Decrease of \$13.9 million and 20 positions (20 FTEs) in efficiencies
- Decrease of \$1.1 million for attrition of (3 FTEs)

CURRENT SERVICES PROGRAM DESCRIPTION:

This program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, relocation and travel services, acquisition and contracting, human capital, and workforce planning. This program also provides management and program analysis support to all operational and administrative programs, including functional responsibility statements, manages the strategic planning process, ensures that Secret Service offices and programs comply with policies and regulations while operational mission areas continue to function efficiently and effectively; provides information technology governance, investment planning and strategy, legal advice and counsel, and manages government and public affairs. These functions assist the Service's leadership in formulating the strategic vision and direction.

The **Director's Office** leads more than 6,600 employees in the mission of the Secret Service which is to safeguard the nation's financial infrastructure and payment systems to preserve the integrity of the economy, and to protect national leaders, visiting heads of state and government, designated sites and National Special Security Events.

Attorneys within the **Office of Chief Counsel** answer questions regarding Secret Service criminal investigations, handle Federal Tort Claims Act and other administrative claims, and provide advice on ethics, Freedom of Information Act / Privacy Act matters, adverse actions, security clearance determinations, asset forfeiture, garnishments, appropriations, procurement, legislation and policy matters.

The **Office of Government and Public Affairs** is comprised of four divisions that interface with external partners: the Liaison Division, the Congressional Affairs Program, the Public Affairs Program and the Office of Homeland Security.

The **Office of Professional Responsibility** ensures that Secret Service offices and programs comply with Secret Service policies and Federal regulations, and helps operational mission areas continue to function efficiently and effectively.

Through sound management practices, **Human Capital Management** recruits, develops, and retains a diverse and well-qualified workforce necessary for meeting the challenges of the 21st Century.

The **Office of the Chief Information Officer** plays a critical leadership role in driving reforms to: control Information Technology (IT) system development risks and ensure positive mission outcomes; best manage technology strategy, investment planning and spending; and succeed in achieving real, measurable positive outcomes in agency performance.

The **Office of the Chief Financial Officer** creates an environment in which the Service leadership has accurate and useful financial information to make and implement sound programmatic decisions in support of the agency's protective and investigative responsibilities. Additionally, OCFO provides superior business services, budgeting, financial statement preparation, and, timely, automated financial information to all internal and external stakeholders.

Secret Service **Acquisition and Contracting** staff oversee non-major and major acquisition and investment governance, establishment of acquisition policies and an acquisition professional training and certification processes.

The **Administrative Operations** Division (AOD) plans, develops, and administers policies and procedures related to facility and property management, as well as performs associated activities for a variety of real and personal property management areas to support Secret Service Headquarters, domestic and international field offices.

The **Program Management** activity supports accomplishment of Secret Service core missions through informed analysis, consultation, and decision support. Using performance data and statistical systems, this activity analyzes and reports on data from twelve databases to inform organizational change and inform decision making.

The above requested amount provides funding for Secret Service headquarters operations that support the full range of U.S. Secret Service Government Performance Report Act (GPRA) and Secret Service QHSR mission areas.

PROCUREMENT ACTIVITIES:

- Increase of \$434,000 for the 2014 pay raise
- Decrease of \$480,000 for attrition of (3 FTEs)

CURRENT SERVICES PROGRAM DESCRIPTION:

The James J. Rowley Training Center (RTC) serves as the primary training academy for the Secret Service. RTC is a federally accredited academic institution, meeting the standards established by the Federal Law Enforcement Training Accreditation (FLETA) Board. The Instructional Development Program, Special Agent Basic Training Course, Uniformed Division Officer Basic Training Course, and Firearms Instructor Training Course are also fully accredited by FLETA. The academy and these programs continue to meet reaccreditation standards.

An elite core curriculum provided by RTC instructors for newly hired special agents, Uniformed Division officers, special officers and physical security specialists includes training in investigative and protective methodologies, firearms marksmanship, control tactics, emergency vehicle operation, emergency medicine and physical fitness techniques, financial and cybercrime detection and investigation, physical/site/event protection and water survival training.

Additionally, as Secret Service employees progress through their career, RTC provides

specialized/advanced training in order to continue to meet the emerging needs of the agency as it relates to the protective and investigative missions (e.g., financial crimes, protective intelligence, etc). This “in-service” curriculum consists of, but is not limited to, comprehensive training in specialized operational and protective tactics, financial crime, cyber-based investigations, and employee and managerial development.

*James J. Rowley Training
Center*

- *Federally–Accredited Academic Institution*
- *Meets Standards Established by the Federal Law Enforcement Training Accreditation (FLETA) Board*
- *493-Acre Facility*
- *Provides Federal, State, and Local Law Enforcement Partners with Collaborative Training Related to Secret Service*

From FY 2009 to FY 2012, RTC personnel conducted 29 Special Agent Training Courses (totaling 722 Special Agent trainees), 36 Uniformed Division Training Courses (totaling 616 Officer trainees). During FY 2012, the RTC conducted 329 specialized/in-service training courses totaling 11,354 personnel. Further, in 2012, RTC trained over 2,747 inter and intra-agency and international law enforcement counterparts as a means of enhancing and improving Secret Service partnerships.

The Secret Service Training Mission

The focus of the Service Service’s training mission is to identify real world job tasks on a continual basis and provide new employees with vital and pertinent expertise to include changing trends. In addition to the RTC’s 329 training courses taught in FY 2012 (covering all basic,

advanced and specialized in-service courses), they also achieved 8,645 employee weapons re-qualifications (at the RTC) and 86,607 online training completions to Secret Service employees across the globe (for both required and in-service skill-building curricula).

Rowley Training Center

FY 2009-2012		Conducted 29 Special Agent Training Courses totaling 722 Special Agent Trainees
		Conducted 36 Uniformed Division Training Courses, totaling 615 Officer Trainees
		Conducted 2,274 specialized skills courses, totaling 73,249 students

This funding specifically enables the Secret Service to provide essential operations and training curricula. The above requested amount provides funding for Secret Service training operations that support the full range of U.S. Secret Service Government Performance Report Act (GPRA) and Secret Service QHSR mission areas.

Operating Expenses
Information Integration & Technology Transformation
Program Performance Justification
(Dollars in Thousands)

PPA: Information Integration & Technology Transformation

	Perm. Pos	FTE	Amount
2012 Revised Enacted	10	10	43,843
2014 Adjustments-to-Base	-	-	(42,814)
2014 Current Services	10	10	1,029
2014 Total Request	10	10	1,029
Total Change 2012 to 2014	-	-	(42,814)

The United States Secret Service requests 10 positions, 10 FTE and \$1.0 million in FY 2014 for the Information Integration and Technology Transformation (IITT) PPA.

- Increase of \$10,000 for the 2014 pay raise
- Transfer out of \$42.8 million to the Acquisition, Construction, and Improvements (AC&I) account

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service's IITT program was initiated to modernize its enterprise-wide IT environment focusing on four capability areas:

1. Enabling (e.g., infrastructure, architecture);
2. Communications (e.g., WHCA Interoperability, worldwide tactical communications, classified messaging);
3. Control (e.g., Security); and
4. Mission Support (applications supporting mission operations).

Requested funding supports the positions hired for IITT. A non-pay transfer of \$42.8 million to the Acquisition, Construction, and Improvement (AC&I) account leaves the remaining funding to cover the core staff responsible for the management of the Information Integration and Technology Transformation (IITT) program, with a special emphasis on managing the Information Technology (IT) Infrastructure Modernization, Database Architecture, Cyber Security, and Information Assurance

projects (Enabling Capabilities). IITT program management activities require permanent personnel resources to:

- Deliver improved IT and communications capabilities to Secret Service field offices, special agents, and Uniformed Division officers in direct support of the dual mission;
- Oversee the design and implementation of the Secret Service's modernized network architecture;
- Conduct technical reviews on requirements, design, test, and production readiness for emerging IITT projects;
- Prepare acquisition documentation required by the Office of Management and Budget and the Department of Homeland Security (DHS) management directives;
- Conduct Risk Working Group meetings to analyze, control and manage program risk information and mitigate impacts to cost, schedule and performance;
- Achieve planned Acquisition Decision Events critical to program success;
- Conduct Executive Steering Group meetings between DHS leadership and the Secret Service's Component Acquisition Executive and Chief Information Officer;
- Complete Program or Project Management Reviews with DHS and Secret Service leadership; and
- Prepare procurement documents for required software, hardware, IT licenses, and IT services.

Due to the sensitivity of the information exchanged on Secret Service IT systems, the management of the IITT program, as well as day-to-day IT infrastructure support of the protection and investigative missions, must be performed by Secret Service personnel. Ensuring success requires a core program staff with experience in implementing acquisition policies and procedures directed by DHS in Management Directive 102-01, which establishes consolidated acquisition management policy, standards and practices across all DHS components and offices. These resources are essential to comply with DHS Acquisition Policy, Federal Acquisition Regulations, and Congressional mandates, such as the Clinger-Cohen Act, concerning the development and acquisition of IT systems.

This funding specifically enables the Secret Service to provide essential information technology. This program is aligned with the Secret Service missions and goals set forth by the 2010 DHS QHSR. Funding for this activity supports the accomplishment associated with the full range of Secret Service strategic and management performance measures.

Program Increase							-	-	14,200
Total Request	-	-	-	-	-	-	-	-	14,200

Description of Item

The Secret Service constantly monitors its operational security posture and adjusts to world events and emerging threats identified through protective intelligence. Protective intelligence work and associated investments in physical security ensures that Secret Service protectees remain safe.

The funding associated with this program enhancement supports overtime expenses resulting from increased Special Agent and Uniformed Division workloads, and increased expenses to support magnetometer screenings.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative directly supports the QHSR Mission Objective 1.3.4 “protect government leaders, facilities, and special events.” Specifically, this initiative supports the strategic performance measure: *Percent of total U.S. Secret Service protection activities that are incident-free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

See Classified Appendix – “White House Complex Security Posture Enhancements” for additional information.

Current Services Level							-	-	-
Program Increase							-	-	7,611
Total Request	-	-	-	-	-	-	-	-	7,611

Description of Item

This request provides funding for Cyber Security Presidential Protection Measures, which would enable the Secret Service to utilize its cybercrime investigative skills in its protective mission. It provides the Secret Service the ability to safeguard protective venues, National Special Security Events (NSSEs) and Critical Infrastructure/Key Resources (CI/KR) from cyber attacks. The program utilizes existing FTEs currently employed by the Secret Service and cross-trains them to conduct cyber advances at protective venues and CI/KR during Presidential movements and National events.

Specifically, funding will allow the Secret Service to leverage its investigative expertise and capabilities to potentially mitigate and investigate the increasing number of network-based threats directed towards our protectees. This program also directly supports the Comprehensive National Cybersecurity Initiative, which calls for the assessment and mitigation of cybersecurity threats and the protection of critical systems governing energy deliver, information technology, and other process control systems.

Justification

The following paragraphs describe the protection-related cyber security items needed to meet existing and emerging threats:

- ***Mobile Wireless Tracking - \$1,705,000***

To locate threat actors quickly, the Secret Service uses mobile wireless tracking technology to locate individuals of interest through their cellular telephones and mobile broadband devices. Man portable versions of this technology could be deployed to support the monitoring of the area immediately surrounding a protectee to alert the protective detail when a known threat enters a designated perimeter. This capability is different than the current capabilities the Service has which are mobile but not man portable. In densely populated areas, this technology would serve as a force multiplier because it would allow agents to follow a signal into buildings and floors. In addition to known threats, mobile wireless tracking technology could be used to survey and compare the digital environment each time a protectee changes location. Cross referencing from one location to the next would provide the Secret Service the added capability of identifying previously unknown threats based upon repetitive patterns of movement.

The emergence of new technologies, including 4G Long Term Evolution (LTE), pose a serious threat to the ability of the Secret Service to continue leveraging mobile wireless tracking technology in support of the mission. As the pervasive technology deployed by mobile service providers begins to transition, it is essential to upgrade tracking equipment to maintain compatibility. The requested funding provides the equipment needed to provide the man portable capabilities for 20 established Wireless Tracking Teams.

- ***Threat Management - \$1,183,000***

The Secret Service currently lacks the ability to conduct rapid, automated searches for information or perform visualization of information due to the presence of multiple, disparate databases. This funding request would consolidate several different databases the Service uses under both its protective and investigative functions.

- ***Cyber Intelligence Section (CIS) – \$1,015,000***

As will be detailed later in this document, the Secret Service Cyber Intelligence Section has developed the capability to aggregate and report information collected from various sources to support Secret Service protective intelligence investigations. CIS monitors developing trends in cyber based protective threats to enhance the Services ability to prevent and mitigate attacks against our protectees. As cyber based threats against our protectees have greatly increased, the Service requires an enhanced intelligence capability in this area. The requested funding would provide these capabilities within our intelligence operations through leveraging specialized contractor support.

- ***Technology Transition Costs for EINSTEIN - \$709,000***

Several years ago, the Service initiated a program to analyze and monitor Internet or network system threats directed towards venues at National Special Security Events (NSSEs) as well as venues visited by the President. The initiative has been very successful and is continuing to evolve. As part of phase II, the requested funding would allow the Secret Service to leverage the capabilities of National Protection and Programs Directorate's (NPPD) Einstein technology and cover costs associated with adapting the technology for Secret Service use.

- ***IP Intercept - \$700,000***

Once a threat is identified through Einstein technology, the internet protocol traffic would be monitored and IP intercepts would be used to reconstruct the network data. Investigators would review and analyze the data to determine the intentions of the attacker. The requested funding would allow the Service to expand the amount of data it can collect and analyze.

- ***Computer Emergency Response Team-Software Engineering Institute Liaison Program (CLP) – \$491,000***

As will be detailed in a following section, the Secret Service has maintained a long-term relationship with the Computer Emergency Response Team at Carnegie-Mellon.

The requested funds would support the Secret Service’s access to a Virtual Training Environment (VTE), which is a web-based application that provides distance learning in an anytime, anywhere setting. Program content consists of a wide variety of technology-focused courses, presentations, demonstrations, tutorials, and hands-on ‘virtual’ labs. Access to this system would provide the Service with a cost efficient way of providing training to protective intelligence personnel in the field regarding emerging trends and tactics of cyber based threats.

In addition, the funding would provide the Secret Service with access to CERT SEI’s Read the Web Project, which uses machine learning to seek out unstructured data associated with sets of words or phrases and derive structured relationships from all publicly available data on the Internet. Access to this technology will allow the Secret Service to identify if multiple threats are coming from the same threat actor. With such knowledge, the Service will be better positioned to efficiently deploy its protective intelligence investigative resources so that multiple investigations are being conducted on the same threat actor.

- ***Electronic Crimes Special Agent Program (ECSAP) – Network Intrusion Training - \$1,808,000***

To leverage the capabilities identified above, Secret Service personnel would require additional ECSAP Network Intrusion Responder (ECSAP-NI) training, known as Level II in ECSAP. This specialized training and equipment provides special agents the ability to respond to and investigate network intrusions. The Level II trained agents will be able to identify critical artifacts that will allow effective investigation of data breaches, malicious hacking, unauthorized access, and various other related electronic crimes. The requested funding provides training for 128 special agents.

Impact on Performance (Relationship of Increase to Strategic Goals)

This program directly supports QHSR Mission Objective 1.3.4 “protect government leaders, facilities, and special events” and QHSR Mission Area 4 “safeguarding and securing cyberspace.” Funding allows the Secret Service to obtain training and technology needed to mitigate internet based threats to our protectees. Operational decisions would be made and actions would then be executed to mitigate the threat and to ensure the safety of the President and other protectees.

Specifically, this initiative supports the strategic performance measure: *Percent of total U.S. Secret Service protection activities that are incident-free for protection of national leaders, foreign*

dignitaries, designated protectees and others during travel or at protected facilities. This measure gauges the percent of instances where incident free protection is provided to leaders, dignitaries, and persons (protectees, staff/employees, guests, and the public) during travel and inside the White House Complex or the Vice President's Residence. Fully funding this program will ensure the success of the protective mission by allowing the Secret Service to fully analyze and mitigate incoming internet threats directed toward the President or other Secret Service protectees.

See Classified Appendix – “Cyber Security Presidential Protection Measures (CSPPM)” for additional Information.

Program Decrease							(76)	(76)	(12,866)
Total Request	-	-	-	-	-	-	(76)	(76)	(12,866)

Description of Item

In order to ensure funding for other priorities across the Secret Service enterprise, the Service proposes a decrease of 76 FTEs achieved through attrition and hiring limitations. The Secret Service has established optimal field office staffing that achieves a balanced workload between investigative and protective workload (an optimal mix between investigations and protection workload at approximately 60% investigations to 40% protection in non-campaign). Analysis of Uniformed Division manpower requirements assess supply (available officers) and demand (fixed and variable post hours required). This establishes appropriate staffing levels for securing fixed posts around the White House, the Vice President’s Residence, and Foreign Missions, in addition to providing coverage for magnetometer, counter sniper and canine travel duties.

The following is the Secret Service’s historical and anticipated rates of attrition:

	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013*
SA	4.3%	3.6%	3.5%	3.4%	2.8%	3.1%
UD	10.2%	7.3%	9.3%	5.0%	3.9%	3.8%
UD Churn**	13.0%	10.5%	12.3%	7.4%	4.2%	4.4%
APT	8.7%	5.9%	6.1%	5.8%	6.3%	6.9%
USSS	6.7%	5.0%	5.4%	4.4%	4.0%	4.3%

** UD Churn includes separations from UD and internal transfers/conversions to other Secret Service positions

Justification

The proposed FTE lapse would occur across the ranks of the Secret Service. The Service has complemented natural attrition (current attrition levels of 270 per year - about 4% Service-wide) with deliberate hiring plans. These hiring plans include minimal law enforcement (special agent and uniformed officer) hiring and limited administrative, professional and technical (APT) hiring. Law enforcement hiring includes one (24) personnel class for both special agents and uniformed officers. The APT hiring is focused solely on mission-critical positions. Limited hiring combined with natural attrition will result in overall personnel reduction and lapse of 76 FTE. For FY 2014, the hiring priority will be for law enforcement positions.

Since the beginning of FY 2012, no Special Agents have been hired, while 21 Uniformed Division (UD) Officers and 57 administrative, professional and technical support positions have been hired for a total of 78 individuals. The Secret Service relies primarily upon scheduled overtime to offset the reduced staffing levels.

The following table displays the estimated FTE reduction by job series:

	FTE
SA	18
UD	18
APT	40
Total	76

Impact on Performance

The United States Secret Service is uniquely mandated by Title 18 USC 3065 to perform a dual-mission of investigating cyber, financial, and infrastructure crimes and physical protection of select high-profile government persons and facilities and National Special Security Events. Because of the nature of protective and investigative responsibilities, most of the performance impact of the proposed reduction will be on the Service’s investigative mission.

These missions directly support DHS QHSR Objective 1.3.4 (“Protect government leaders, facilities, and special events”), Objective 4.1.3 (“Prevent cyber crime and other malicious uses of cyberspace”) and Objective 1.3.2 “Protect critical infrastructure”). The synergy of these missions is necessary in order to support the fluctuating and often unpredictable nature of physical protection and requires a delicate balancing act for the program managers to ensure that the mission-critical areas have the correct number of FTE available at the appropriate times.

Protection of Persons and Facilities

Protection of persons and facilities is the top priority of the Secret Service. To continue to meet the performance target of 100 percent incident-free protection of persons inside the White House Complex and Vice President’s Residence, program managers will re-assess protective methodologies and assignments. A recent example of methodology review occurred when several special agents permanently assigned to the James J. Rowley Training Center were re-assigned to augment staffing at the White House Complex in order to staff the increased protective requirements.

APT employees research, develop, and deploy technical security countermeasures for protected venues. The Secret Service will ensure that these functions continue to provide secure IT infrastructure, video and audio surveillance and several classified countermeasures to ensure the safety and security of protectees while they are travelling.

Protective Intelligence Activities

Protective Intelligence is a critical function that enables the success of physical protection operations.

Investigations and Field Operations

APT personnel perform vital functions to enable the success of Investigations and Field Operations, including criminal research, forensics, processing evidence and office administration. In addition, APT personnel play a significant role in supporting protective operations. The support provided in the protection mission is time sensitive and critical to providing 100 percent incident-free protection.

In the protective mission, a reduction to the domestic field translates into fewer special agents available to conduct protective intelligence investigations, and fewer special agents available for protection assignments. A reduction may also require additional travel for district special agents to support the mission.

During the past four years (FY 2008 – 2011), a field special agent has averaged 1,296 hours of investigative work and 871 hours of protection per year. Because the protection responsibilities will continue to exist, the reduction in special agent staffing will largely affect agents assigned to the investigative mission. In a normal post-campaign year, Secret Service labor resources would be reallocated from campaign protective activities back to core investigative responsibilities—thereby increasing the Service’s investigative capacity. However, the proposed staffing reduction would offset part of that post-campaign capacity increase. Using the Service’s Investigative Impact tool, the

anticipated 0.8% reduction in investigative field agent time is estimated to reduce investigative capacity by 1.2%.

Administrative Support Functions

[Please add text outlining the impact of reduced staff assigned to non-protective/investigative responsibilities]

Description of Item

Operational Mission Support (OMS) supports advanced protective countermeasures to address known and evolving threats. Funding provides refresh and update/upgrade and sustainment to these countermeasures in order to ensure a safe environment for the President, Vice President, and other Secret Service protectees. The FY 2014 President’s Budget request for OMS funds is \$59.9 million, which includes \$9.9 million of base funding.

Impact on Performance

FY 2014 Operational Mission Support funding sustains programs designed to counter emerging explosive, chemical, biological, radiological, and cyber threats and to address physical security enhancements at the White House Complex, Vice President’s Residence and temporary sites visited by the President and Vice President. OMS capabilities include detection systems, audio countermeasures, physical protective structures, cyber protection, development of the next generation presidential limousine, protective systems and weapons testing, and personnel hired to support these initiatives.

See classified appendix: “Protection of Persons and Facilities” for additional information and details.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Secret Service
Justification of Proposed Changes in Operating Expenses
Appropriation Language**

Operating Expenses

For necessary expenses of the United States Secret Service, including purchase of not to exceed 652 vehicles for police-type use for replacement only; hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees in cases in which a protective assignment on the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty; conduct of and participation in firearms matches; presentation of awards; travel of United States Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act ; research and development; grants to conduct behavioral research in support of protective research and operations; [and] payment in advance for commercial accommodations as may be necessary to perform protective functions; **\$1,494,614,000** [\$1,544,113,000]², of which not to exceed \$21,250 shall be for official reception and representation expenses; of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations: Provided, That \$18,000,000 for protective travel shall remain available until September 30, **2015**[2014]³: Provided further, That \$4,500,000 for National Special Security Events shall remain available until **expended**[September 30,2014]: Provided further, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities, as defined in section 105 of title 5, United States Code, for personnel receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year: Provided further, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes: Provided further, That none of the funds made available to the United States Secret Service by this Act or by previous appropriations Acts may be made available for the protection of the head of a Federal agency other than the Secretary of Homeland Security: Provided further, That the Director of the United States Secret Service may enter into an agreement to provide such protection on a fully reimbursable basis: Provided further, That none of the funds made available to the United States Secret Service by this Act or by previous appropriations Acts may be obligated for the purpose of opening a new permanent domestic or overseas office or location unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such obligation. Note.--A full-year 2013 appropriation for this account was not enacted at the time the budget was prepared;

therefore, this account is operating under a continuing resolution (P.L. 112-175). The amounts included for 2013 reflect the annualized level provided by the continuing resolution.

Explanation of Changes

Language Provision	Explanation
² ...\$1,494,614,000 [\$1,544,113,000]...	Dollar change only. No substantial change proposed.

Authorization Cites

The Secret Service is established in 18 U.S.C. 3056 and 3 H.S.C. 202. 18 U.S.C. 1029 and 1030 specifically authorize the Service to investigate offenses under those sections.

Protection of persons and facilities Mission Statement

Protection of Persons and Facilities - Ensure the safety and security of national leaders, visiting heads of state and government and other designated protectees. Safeguard the White House Complex, the Vice President's residence, foreign missions in the Washington, DC area and other high profile sites. Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes our nation's leaders, other high profile persons and designated sites. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing complexity and technological sophistication of the threat environment.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	374,171	398,467	393,281	19,110
11.3 Other than full-time permanent	2,145	2,145	1,140	-1,005
11.5 Other personnel compensation	116,466	107,867	113,374	-3,092
12.1 Benefits	171,951	171,180	183,920	11,969
Total, Salaries & Benefits	664,733	679,659	691,715	26,982

Salaries and benefits includes funding to cover costs for Protection of Persons and Facilities

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$65,494	\$61,755	\$45,030	-\$20,464

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental expenses in accordance with federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$1,980	\$1,680	694	-\$1,286

Transportation of things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$30,942	\$31,151	\$31,163	\$221

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent-related services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$14,211	\$14,211	\$12,211	-\$2,000

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$40,204	\$22,748	\$23,804	-\$16,400

Other services include contractual services from federal and non-federal sources.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$7,279	\$6,343	\$5,378	-\$1,901

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$24,996	\$15,791	\$11,424	-\$13,572

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	\$4,003	\$4,003	\$955	-\$3,048

Land and structures includes the costs of land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract.

National Special Security Event Fund Mission Statement

National Special Security Events - Effectively lead and manage the planning, coordination and implementation of operational security plans at designated NSSEs. Ensure the physical protection of the President, the public, and other Secret Service protectees who participate in NSSEs. NSSE resources directly support the DHS strategic goal to protect critical infrastructure, which includes events of symbolic importance to American citizens. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever these specially designated events take place. The requested amount ensures NSSE security measures continue to evolve at an appropriate pace to meet the challenges of an increasingly complex threat environment.

Protective intelligence activities Mission Statement

Protective Intelligence Activities - Ensure protective intelligence processes, policies and systems provide quality information and services to securely and efficiently support the protective mission by investigating subjects (individuals or groups) and activities that pose threats to protectees and protected events. Protective intelligence activities resources directly support the DHS strategic goal to protect critical infrastructure, which includes proactively leveraging advances in the behavioral and technological sciences in order to minimize the risk of harm to persons, property and events under Secret Service protection. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasing complexity and technological sophistication of the threat environment.

Domestic field operations Mission Statement

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering. Domestic field office resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems within our borders. The requested amount funds field offices nationwide in a strategic context that includes advances in photographic and printing device technologies and the spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies increases, field resources must continue to demonstrate agility in combating criminal efforts.

International field office administration and operations Mission Statement

International Field Office Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational financial crimes. International field office administration and operations resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems from threats originating abroad. The requested amount funds field offices in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet, other consumer-friendly technologies and dollarization (when a developing county replaces its national currency with the U.S. dollar). These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, field resources must continue to demonstrate agility in combating criminal efforts.

Electronic crimes special agent program and electronic crimes task forces Mission Statement

Electronic Crimes Special Agent Program (ECSAP) - Develop and deploy personnel trained specifically to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment, to investigate complex electronic crimes and develop strong cases for prosecution.

Electronic Crimes Task Forces (ECTFs) - Form and expand partnerships to reinforce strategic alliances among law enforcement, academia and private industry to prevent, detect, investigate and mitigate the effects of electronic crimes on our nation's financial infrastructure. ECSAP and ECTF resources directly support the DHS strategic goal to protect critical infrastructure, which includes reducing losses resulting from electronic crimes perpetrated against our nation's financial infrastructure. The ECSAP and ECTFs combat those who seek to defraud U.S. financial institutions, private industry or individuals through electronic or digital means. The requested amount funds the ECSAP and ECTF entities in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, the ECSAP and ECTF ensure the Service remains on the cutting edge of electronic crime investigations, and that it maintains liaisons with critical partners and stakeholders.

Headquarters, management and administration Mission Statement

Headquarters, Management and Administration - Support and sustain operational success through progressive planning and performance in the areas of organizational effectiveness, professional responsibility, stewardship of resources, and communication. Headquarters, management and administration resources support the DHS strategic goal to protect critical infrastructure by enhancing the Service's administrative, professional, and technical infrastructure as well as the management systems and processes. In a strategic context of heightened threat, the Service must ensure that its business processes promote and strengthen the investigative and protective missions.

Rowley training center Mission Statement

Rowley Training Center - Strengthen the agency's ability to develop and retain a highly specialized and dedicated workforce to fulfill mission-critical requirements. Rowley Training Center resources support the DHS strategic goal to protect critical infrastructure by ensuring the Secret Service workforce is continuously prepared to meet the challenges of the investigative and protective missions. The requested amount will ensure that the Service's most important resource - its employees - have the knowledge and skills and abilities to execute the investigative and protective missions. In a strategic context of threat, the Service must ensure that its workforce planning and development practices outpace the threat environment.

Information Integration & Technology Transformation Mission Statement

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. The Secret Service generated a classified mission needs statement for Information Integration and Transformation that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	802	1,070	807	5
11.5 Other personnel compensation	69	69	71	2
12.1 Benefits	148	148	151	3
Total, Salaries & Benefits	1,019	1,287	1,029	10

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$20	\$20	0	-\$20

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$29,804	\$29,804	0	-\$29,804

Other services include contractual services from federal and non-federal sources.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$13,000	\$13,000	0	-\$13,000

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Secret Service Acquisition, Construction, and Improvements

I. Appropriation Overview

A. Mission Statement for Acquisition, Construction, and Improvements:

The Acquisition, Construction, and Improvements (ACI) account contains funding for the support and maintenance of the James J. Rowley Training Center (JJRTC) and for Information Integration and Technology Transformation project execution.

The JJRTC is the primary training center for the United States Secret Service. The overall support and maintenance provided through ACI funding is critical to the agency's missions – protection and criminal investigations. ACI funding provides critical support for JJRTC infrastructure, life cycle maintenance of structures and systems; as well as sustainment of existing facilities and program support assets. The JJRTC is utilized by special agents, uniformed officers, and support personnel.

JJRTC is comprised of 493 square acres of land, six miles of roadways, and 36 buildings featuring multiple classrooms, firearms ranges, physical fitness facilities, tactical villages, and a protective operations driving pad. This infrastructure provides quality training to new recruits and current employees. Additionally, JJRTC facilities are utilized to provide our Federal, State, and local law enforcement partners with collaborative training related to the Secret Service missions.

Information Integration and Technology Transformation (IITT), formerly known as Information Integration and Transformation (IIT), includes IT modernization and related investments. The IITT program resulted from the recognition that the previously existing Secret Service Information Technology infrastructure did not adequately address the requirements of our protective and investigative missions.

The IITT program was initiated to modernize the Secret Service enterprise-wide IT environment focusing on four capability areas: Enabling (e.g., infrastructure, architecture); Communications (e.g., WHCS Interoperability, worldwide tactical communications, classified messaging); Control (e.g., Security); and Mission Support (applications supporting mission operations).

The IITT program is being implemented in compliance with DHS Management Directive 102-01 which establishes consolidated acquisition management policy, standards and practices across all Components and DHS Department Offices. Initial funding appropriated for IITT was used for the stabilization program in FY 2010-11; installation of the stabilizing equipment will complete in 2nd quarter FY 2013.

FY 2013 appropriations and FY 2014 requested funding will be used to sustain the improvements made through the Stabilization phase, modernize our networks, database, and security architecture, refactor (rewrite) applications currently resident on the legacy mainframe for migration to the upgraded network, and develop/upgrade projects such as Database Architecture, Cyber Security, Cross Domain and Multi-Level Security, Threat Management, and Combined Operations Logistics Database 2 (COLD2).

B. Budget Activities:

James J. Rowley Training Center

The protection and criminal investigation training required to meet the needs of the Service's dual mission is provided at the James J. Rowley Training Center.

Information Integration and Technology Transformation

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. The Secret Service Information Integration and Technology Transformation program addresses existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities.

C. Budget Request Summary:

The United States Secret Service requests \$51,775,000 for FY 2014. This level of funding includes the following:

- The adjustment to the base includes a transfer in of \$42,824,000 for Information Integration and Technology Transformation from the Headquarters, Management and Administration PPA (Operating and Expenses) for non-personnel costs associated with project execution.
- A program increase of \$3,571,000 for Information Integration and Technology Transformation, to redesign and deploy a new database infrastructure, upgrade Information Technology and communication systems, and improve cyber security at the Secret Service.

2014 Adjustments-to-Base	-	-	-
2014 Current Services	-	-	5,380
2014 Total Request	-	-	5,380
Total Change 2012 to 2014	-	-	-

The United States Secret Service requests 0 positions, 0 FTE, and \$5.4 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding covers the cost of maintenance and improvement contracts associated with upkeep of the James J. Rowley Training Center. This facility provides the protection and criminal investigation training required to meet the needs of the Service’s dual mission.

The above requested amount provides funding for Secret Service operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Objective 1.3.2 Protect Critical Infrastructure, Objective 1.3.4, protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Objective 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Funding for this activity supports the complete range of Secret Service strategic and management Government Performance and Results Act (GPRA) measures:

Department of Homeland Security
U.S. Secret Service
Acquisition, Construction, and Improvements
Information Integration & Technology Transformation
Program Performance Justification
(Dollars in Thousands)

PPA: Information Integration & Technology Transformation

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	-
2014 Adjustments-to-Base	-	-	42,824
2014 Current Services	-	-	42,824
2014 Program Change	-	-	3,571
2014 Total Request	-	-	46,395
Total Change 2012 to 2014	-	-	46,395

The United States Secret Service requests \$46.4 million for this activity. Included in this request is a transfer of \$42.8 million from the Headquarters, Management and Administration PPA (Operating and Expenses) and a program increase of \$3.5 million for Information Integration and Technology Transformation (IITT).

CURRENT SERVICES PROGRAM DESCRIPTION:

The IITT program was established because the Secret Service’s Information Technology infrastructure did not adequately serve the requirements of protective and investigative missions. Additionally, in 2008 the National Security Agency identified critical IT infrastructure, architecture and application vulnerabilities which required mitigation.

The Secret Service’s IITT program was initiated to modernize its enterprise-wide IT environment focusing on four capability areas:

1. Enabling (e.g., infrastructure, architecture);
2. Communications (e.g., WHCA Interoperability, worldwide tactical communications, classified messaging);
3. Control (e.g., Security); and
4. Mission Support (applications supporting mission operations).

The IITT program is being developed in full compliance with DHS Management Directive 102-01 which establishes consolidated acquisition management policy, standards and practices across all

Components and Department of Homeland Security (DHS) Department Offices. Initial funding appropriated for IITT was used for the stabilization program in FY 2010-11 and installation of the stabilizing equipment will be completed in 2nd quarter of FY2013. The modernization effort commenced in FY 2012 with the award of two modernization contracts, one for the major IT Modernization effort and the other for the Combined Operations Logistics Database 2 (COLD2) development (each further described below); however, execution delays have occurred as a result of a contract protest on IT Modernization.

Requested funding in FY 2014 will enable the Secret Service's IT networks, data systems, applications, and system security to fully support present operational requirements. Modernization will be accomplished by means of an extensive redesign of the current infrastructure and the careful selection and integration of interoperable capabilities to support critical mission needs. Specifically the following activities are planned:

- Enabling Capabilities
 - Achieve Initial Operating Capability (IOC) for IT Modernization, including Cyber Security elements, and deployment of critical mission applications during FY 2014
 - Enhance cyber security protection and operate more modern software and technologies such as McAfee system detection that provides alerts when rogue devices are connected to the network
 - Continue with acquisition of additional Storage Area Network discs and servers to reduce IT sustainment costs associated with dated mainframe technologies and legacy software applications
 - Commence refactoring (re-writing) 21 legacy applications which reside on the mainframe and move the first group of applications to the modernized network infrastructure.
- Mission Support Capabilities
 - The COLD2 Project in FY 2014 will complete the deployment of Increments 2 and 3
 - Increment 2 provides for the integration of legacy systems such as manpower reporting, passport holders, etc.
 - Increment 3 will complete the identification of final functional requirements associated with event planning, cost, and manpower reporting
- Control Capabilities
 - Cross Domain (CD) provides advance security measures to electronically control, send, receive and track access to Secret Service intelligence data across disparate systems and classifications. CD strategy utilizes DHS Enterprise Services, in coordination with Customs & Border Protection
 - With Multi-Level Security (MLS), the Secret Service will be the first DHS Component authorized to consolidate multiple desktop computers to access separate security domains into one single thin client desktop (e.g., Top Secret and Secret on the same workstation)
- Communications Capabilities
 - The White House Communications Agency (WHCA) Interoperability project brought parity between Secret Service and WHCA by correcting gaps in mission critical communication capabilities.

- With FY 2014 Communications funding, the Service will continue to provide operational and maintenance support for all Secure Voice phones, Secret and Top Secret messaging systems, Radio-over-IP (RoIP) infrastructure, Voice-over-IP (VoIP) phone systems, Tri-Band and Classified radios for Special Operations teams, Video teleconferencing infrastructure, and BlackBerry enterprise services

The following table provides a detailed breakdown of IITT funding request by project and capability area:

Funding FY 2012 to FY 2014	FY 2012	Enacted FY 2013	FY 2014 Current Services	FY 2014 Program Increase	Total FY 2014
Enabling Capabilities	\$27,503,000	\$35,302,783	\$31,302,605	\$3,571,000	\$34,873,605

Cross Domain and Multi Level Security	\$0	\$2,437,717	\$1,834,695	\$0	\$1,834,695
<i>Sustainment/Stabilization</i>					
Cross Domain and Multi Level Security	\$0	\$0	\$0	\$0	\$0
Mission Support Capabilities	\$10,400,000	\$8,450,000	\$5,487,500	\$0	\$5,487,500
Threat Management	\$1,200,000	\$1,250,000	\$1,287,500	\$0	\$1,287,500
COLD2	\$9,200,000	\$7,200,000	\$4,200,000	\$0	\$4,200,000
<i>Sustainment/Stabilization</i>					
Threat Management	\$0	\$0	\$0	\$0	\$0
COLD2	\$0	\$0	\$0	\$0	\$0
Communications Capabilities	\$4,921,000	\$6,129,500	\$4,199,200	\$0	\$4,199,200
WHCA Interoperability	\$4,921,000	\$6,129,500	\$0	\$0	\$0
<i>Sustainment/Stabilization</i>					
WHCA Interoperability / Upgrades	\$0	\$0	\$4,199,200	\$0	\$4,199,200
Total IITT ACI	\$42,824,000	\$52,320,000	\$42,824,000	\$3,571,000	\$46,395,000
Salaries & Expenses	\$1,019,000	\$1,137,000	\$1,030,000	\$0	\$1,030,000

In FY 2012, IITT became a mixed life-cycle investment program and, as such, IITT investments now include both development/modernization/enhancement (DME) and steady state components (as defined in OMB Circular No. A-11). Investments for sustainment of new development under IITT will be part of the IITT requests until development is complete and Full Operational Capability (FOC) is achieved.

The Stabilization effort within IITT has been underway for some time now and is now complete with a number of notable accomplishments. These accomplishments include improving the security and reliability of the IT infrastructure by replacing critical network hardware in time the 2012 Presidential Campaign and National Special Security Events (NSSEs), upgrading storage discs and servers, and ensuring that backup systems allow for the recovery of critical application data in the event of a catastrophic failure of the network

Continued funding will support the transition away from the USSS legacy mainframe. Funding will be used for the acquisition of additional Storage Area Network (SAN) discs and servers. SAN equipment will allow the 21 legacy applications currently on the mainframe to be re-written in a modern computer language to support data sharing and is critical to testing the reliability and integrity of data translation during re-factoring activities. Sustainment costs of the existing Secret Service mainframe is over \$3.5 million per year.

These are occurring in concert with upgrades required to maintain the integrity of the system, including upgrades to remote access capabilities to support expansion and additional concurrent use of the Secret Service Virtual Private Network (VPN) in alignment with continuity of operations requirements. The VPN had formerly been limited to 500 simultaneous users. The Secret Service will also upgrade the network with new mission support capabilities including the Intrusion Prevention System (IPS) and network monitoring.

The Enabling Capabilities (EC) portion of IITT will redesign the network architecture and network security components to allow a modernized structure for Secret Service mission applications. The IT Infrastructure provides the enabling foundation for all mission-critical IT systems, supports secure sharing of information with the organization, and provides direct access to external critical law enforcement systems. This also includes retiring components to better address the needs of the Service. For example, the “Bookstore” Data Center was closed and the Secret Service completed planning and equipment installation associated with migrating to an alternate Data Center at a new location.

Furthermore, the Service, through IITT, has completed an analysis of all legacy Secret Service applications, assigning mission criticality to each so as to provide a critical starting point in making decisions for Data Center hosting.

The amount requested above will support Secret Service operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Objective 1.3.2 Protect Critical Infrastructure, Objective 1.3.4, protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Objective 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Funding for this activity supports the complete range of Secret Service strategic and management Government Performance and Results Act (GPRA) measures.

PROCUREMENT ACTIVITIES:

Total Request	-	-	-	-	-	-	-	-	46,395

Description:

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. The dated infrastructure lacks the ability to support newer technologies, share common DHS enterprise services, or migrate to approved data centers. The IITT modernization program’s approved plan is to redesign the network architecture and network security components to allow a modernized structure for Secret Service mission applications. IITT provides the enabling foundation for all mission-critical IT systems, supports secure sharing of information with the organization, and provides direct access to external critical law enforcement systems. Modernization will be implemented by contracting with industry specialists for an extensive re-architecting of the current infrastructure and the careful selection and integration of interoperable capabilities to support critical mission needs.

Justification

In September 2012, the contract to commence design and develop the new modernized network and infrastructure was protested. Restructuring the contract solicitation and releasing a new request for proposals from the contractors has resulted in a delay in commencement of the Phase II Design and Development effort to FY 2014. Phase II funding remains in the IITT budget under prior multi-year appropriations. The FY 2014 funding increase will enable an acceleration of contract scope in the design and development phase performed by the winning contractor, in an attempt to make up lost schedule caused by the contract protest. This will position the IT Modernization program to reach Initial Operational Capability (IOC) by FY 2015, and maintain the many important gains achieved through IT Stabilization.

Impact on Performance (Relationship of Increase to Strategic Goals):

This cross-cutting initiative supports and enables all facets of the integrated protective and investigative mission. As a result, this initiative impacts QHSR Mission Objectives 1.3.2, 1.3.4, and 4.1.3. Physical protection requires increasingly complex technological countermeasures in order to counter evolving threats and provide situational awareness. Financial crimes and counterfeiting increasingly contain an electronic and/or cyber component. Specifically, this initiative supports the strategic performance measures: *Percent total protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities, Financial crimes loss prevented through a criminal investigation (non-cyber), Amount of dollar loss prevented by Secret Service cyber investigations, and Percent of currency identified as counterfeit.*

The increased funding for this activity supports the Secret Service goals related to the QHSR Mission Objectives cited above which includes protection of National leaders, foreign dignitaries, designated protectees, and others during travel or at protected facilities as well as National Special Security Events. By funding this increase, the Secret Service will have the resources necessary to accomplish these mission requirements in a more efficient, effective, and timely manner.

Information Integration & Technology Transformation Mission Statement

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. Secret Service generated a classified Mission Needs Statement (MNS) for Information Integration and Transformation (IIT) that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities. At present, the Secret Service IT networks, data systems, applications, and system security do not fully meet basic operational requirements.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	0	0	\$20	\$20

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	0	0	\$33,375	\$33,375

Other services include contractual services with Federal and non-federal sources.

A. Component Overview

The United States Secret Service is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Protection: This program protects the President and Vice President and their families, former Presidents and their spouses, and other designated individuals, including candidate nominees; secures the White House Complex, Vice President's Residence, and other designated places; designs, coordinates, and implements operational security plans for designated National Special Security Events; and administers the mail screening security program responsible for examining all incoming mail, parcels, and gifts destined for the White House Complex. The program temporarily assigns personnel from Secret Service domestic and foreign field offices to protective assignments. Additionally, program managers coordinate with the military and federal, state, county, local, and international law enforcement organizations to ensure mission success. The program operates 24 hours a day, 365 days a year.

Protective Intelligence: The Protective Intelligence program is critical in securing the safety of the President, Vice President, other designated protectees, visiting world leaders, foreign missions, Campaign Protection Programs, and National Special Security Events (NSSE). The program investigates, evaluates, disseminates, and maintains information concerning known, potential, or perceived threats to protectees and NSSEs. The program pursues investigative leads and conducts intelligence activities in advance of protectee travel and NSSEs. The program is staffed by special agents, protective intelligence research specialists, threat assessment specialists, and support personnel. Special agents in Secret Service field offices in the U.S. and abroad conduct protective intelligence investigations. Personnel liaise with the intelligence community and other law enforcement organizations to ensure the success of the protective mission.

Criminal Investigations: The Criminal Investigations program exists to reduce losses due to counterfeit currency, other financial crimes, electronic crimes, and identity theft crimes that fall under the jurisdiction of the Secret Service and threaten the integrity of our currency and the reliability of financial payment systems worldwide. The program accomplishes its objectives by conducting counterfeit currency and financial fraud investigations on a global basis, establishing Electronic Crimes Task Forces; maintaining a robust Electronic Crimes Special Agent Program; and pursuing criminal violations involving the unlawful use and/or exploitation of a computer network. Investigations are conducted by special agents in Secret Service field offices located throughout the United States and abroad. This program also provides forensic and related support of investigations involving missing and exploited children.

Rowley Training Center: This program encompasses personnel at the Secret Service's James J. Rowley Training Center, including instructors, tactical and weapons systems specialists, curricula design staff, computer and web-based faculty/technicians, executive training advisors, administrative support, and maintenance staff. The Service has a separate appropriation, the Acquisition, Construction, & Improvements account, which is used to maintain the facility.

Information Integration and Technology Transformation (IITT): The Secret Service relies heavily on information technology (IT) infrastructure and communications systems to achieve its mission. The Service has identified existing deficiencies and disparities in the Secret Service IT

infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities. The IITT MNS indicates the need for a comprehensive modernization of the Secret Service IT infrastructure and communications systems to close the identified technology gaps. The scope of the IITT program consists of Enabling, Communications, and Control capabilities, as well as cross-cutting Mission Support capabilities.

Management and Administration: This program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, relocation and travel services, acquisition and contracting, human capital, and workforce planning. This program also provides management and program analysis support to all operational and administrative programs, including functional responsibility statements, manages the strategic planning process, ensures that Secret Service offices and programs comply with policies and regulations while operational mission areas continue to function efficiently and effectively; provides information technology governance, investment planning and strategy, legal advice and counsel, and manages government and public affairs. These functions assist the Service’s leadership in formulating the strategic vision and direction.

FY 2014 Budget Request

The table below shows United States Secret Service FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Protection	3,529	\$1,024,306
Protective Intelligence	526	\$81,065

Performance Measures

For *Preventing Terrorism and Enhancing Security*, two types of performance measures are presented. Strategic Performance Plan Measures represent USSS’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Financial crimes loss prevented through a criminal investigation (in billions)						
Description: An estimate of the direct dollar loss to the public that was prevented due to Secret Service intervention or interruption of a criminal venture through a criminal investigation. This estimate is based on the likely amount of financial crime that would have occurred had the offender not been identified nor the criminal enterprise disrupted, and reflects the Secret Service's efforts to reduce financial losses to the public attributable to financial crimes.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	\$1.8	\$1.9	\$1.9	\$1.40	\$1.80	\$1.90
Result:	\$1.28	\$6.56	\$4.846	\$2.75	N/A	N/A

Measure: Percent of currency identified as counterfeit						
Description: The dollar value of counterfeit notes passed on the public reported as a percent of dollars of genuine currency. This measure is calculated by dividing the dollar value of counterfeit notes passed by the dollar value of genuine currency in circulation. This measure is an indicator of the proportion of counterfeit currency relative to the amount of genuine U.S. Currency in circulation, and reflects our efforts to reduce financial losses to the public attributable to counterfeit currency.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<0.0098%	<0.0096%	<0.0099%	<0.0098%	<0.009%	<0.0088%
Result:	0.0081%	0.0087%	0.0078%	0.0085%	N/A	N/A

Measure: Percent of National Special Security Events that were successfully completed						
Description: This measure is a percentage of the total number of National Special Security Events (NSSEs) completed in a Fiscal Year that were successful. A successfully completed NSSE is one where once the event has commenced, a security incident(s) inside the Secret Service - protected venue did not preclude the event's agenda from proceeding to its scheduled conclusion.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	100%	100%	100%	100%	100%
Result:	N/A	100%	100%	100%	N/A	N/A

Measure: Percent of total U.S. Secret Service protection activities that are incident-free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities						
Description: This measure gauges the percent of instances where incident free protection is provided to leaders, dignitaries, and persons (protectees, staff/employees, guests, and the public) during travel and inside the White House Complex or the Vice President's Residence.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

Management Measures

Measure: Number of information sharing events with the law enforcement and intelligence community						
Description: This measure gauges the number of information sharing events with both internal entities and external partner agencies as an assessment of the effectiveness of information dissemination. Information sharing events include: National Threat Assessment Center briefings, Targeted Violence Information Sharing System (TAVISS) briefings, agency alerts, specialty desk briefings and other training, spot reports, suspicious activity reporting, advisories, permanent protectee threat assessments, major events assessments, and certain other assessment products. Sharing information about threats, hazards, and protective actions will allow for the internal and external coordination needed to prevent successful attacks.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	1,000	1,000
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of instances protectees arrive and depart safely (campaign protectees)						
Description: This measure represents the percent of travel stops where the protectee safely arrives and departs. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest-quality protection the Secret Service demands for all protectees.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	100%	100%	100%	100%	100%	
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of instances protectees arrive and depart safely (domestic protectees)						
Description: The percent of travel stops where our Nation's leaders and other protectees arrive and depart safely. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest-quality protection the Secret Service demands for all protectees.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	100%	100%	100%	100%	100%	100%
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of instances protectees arrive and depart safely (Foreign Dignitaries)						
Description: The percent of travel stops where visiting world leader protectees safely arrive and depart. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest-quality protection the Secret Service demands for all protectees.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	100%	100%	100%	100%	100%	100%
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of protective travel instances that fall within estimated costs						
Description: The measure identifies the variance between the initial request for protective resources and the final approved resources. Program managers perform an internal quality assurance assessment on the initial resource request received from the Secret Service advance team. During this assessment, quality assurance decisions are made on how to best deploy protective resources without compromising safety and security. Resource allocation decisions are then determined and approved. Through the quality assurance process the Secret Service is proactive in the stewardship of resources (cost savings) provided through taxpayer dollars.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Result:	N/A	N/A	N/A	N/A	N/A	N/A

Mission 4: Safeguarding and Securing Cyberspace

Resources Requested

United States Secret Service resources supporting *Safeguarding and Securing Cyberspace* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Criminal Investigations	32,409	175	33,408	175	32,811	174
Information Integration and Technology Transformation	2,192	1	2,206	1	2,371	1
Management and Administration	9,579	17	9,582	16	8,864	22
Total	44,181	192*	45,196	191*	44,046	197

*Totals account for rounding

Performance Measures

For *Safeguarding and Securing Cyberspace*, two types of performance measures are presented. Strategic Performance Plan Measures represent USSS’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Amount of dollar loss prevented by Secret Service cyber investigations (in millions)
Description: This measure is an estimate of the direct dollar loss to the public prevented due to cyber investigations by Secret Service. The dollar loss prevented is based on the estimated amount of cyber losses that would have occurred had the offender not been identified nor the criminal enterprise interrupted. The measure reflects the Secret Service’s efforts to reduce cyber

related financial losses to the public.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	\$800	\$900
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Number of financial accounts recovered (in millions)						
Description: This measure represents the number of financial accounts recovered during cyber investigations. Financial accounts include bank accounts, credit card accounts, PayPal and other online money transfer accounts.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	2.0	2.1
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas						
Description: This measure represents the number of individuals trained in cyber crime and cyber forensics by the Secret Service. This specialized technical training occurs both domestically and overseas in an effort to strengthen our ability to fight cyber crime.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	1,000	1,000
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Terabytes of data forensically analyzed by Secret Service and partners trained at the National Computer Forensic Institute.						
Description: This measure represents the amount of data, in terabytes, seized and forensically analyzed through Secret Service investigations and those conducted by partners trained at the National Computer Forensic Institute (NCFI). The training of these law enforcement partners substantially enhances law enforcement efforts to suppress the continually evolving and increasing number of cyber and electronic crime cases affecting communities nationwide.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	1,600	1,800
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Management Measures

Measure: Number of hours of cyber crime training provided to law enforcement both domestically and overseas						
Description: This measure represents the number of cyber crime training hours provided by the Secret Service. This specialized technical training occurs both domestically and overseas in an effort to strengthen our ability to fight cyber crime.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Target:	N/A	N/A	N/A	N/A	38,000	40,000
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Providing Essential Support to National and Economic Security

Resources Requested

USSS resources supporting *Providing Essential Support to National and Economic Security* are provided in the table below. The funding request for forensic support and grant to missing and exploited children is being consolidated within the Department of Justice’s Office of Justice Programs in order to improve efficacy and better focus critical resources on Secret Service core mission programs. Grant funding support for NCMEC will continue and be added to funds currently requested within the Department of Justice’s Office of Justice Programs. The Secret Service will continue forensic and investigative support for missing and exploited children cases within the Service’s Criminal Investigations program.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Criminal Investigations	8,366	20	8,417	20	0	0
Total	8,366	20	8,417	20	0	0

Performance Measures

For *Providing Essential Support to National and Economic Security*, two types of performance measures are presented. Strategic Performance Plan Measures represent USSS’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures.

Strategic Performance Plan Measures

Measure: Percent of National Center for Missing and Exploited Children (NCMEC) examinations requested that are conducted						
Description: This measure represents the percentage of Secret Service computer and polygraph forensic exams conducted in support of any investigation involving missing or exploited children in relation to the number of computer and polygraph forensic exams requested.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

iii. Status of Congressionally Requested Studies, Reports, and Evaluations

**Department of Homeland Security
National Protection and Programs Directorate**

Fiscal Year	Due Date(s)	Reference/Citation	Requirement	Status
2011	10/4/2011	P.L. 109-295, 6 U.S.C. § 573	National Emergency Communications Plan Progress Report: Not later than one year after October 4, 2006, and biennially thereafter, the Secretary, acting through the Director for Emergency Communications, shall submit to Congress a report on the progress of the Department in achieving the goals of, and carrying out its responsibilities under, this subchapter, including— (1) a description of the findings of the most recent baseline assessment conducted under subsection (a); (2) a determination of the degree to which interoperable emergency communications capabilities have been attained to date and the gaps that remain for interoperability to be achieved; (3) an evaluation of the ability to continue to communicate and to provide and maintain interoperable emergency communications by emergency managers, emergency response providers, and relevant government officials in the event of— (A) natural disasters, acts of terrorism, or other man-made disasters, including Incidents of National Significance declared by the Secretary under the National Response Plan; and (B) a catastrophic loss of local and regional communications services; (4) a list of best practices relating to the ability to continue to communicate and to provide and maintain interoperable emergency communications in the event of natural disasters, acts of terrorism, or other man-made disasters; and (A) an evaluation of the feasibility and desirability of the Department developing, on its own or in conjunction with the Department of Defense, a mobile communications capability, modeled on the Army Signal Corps, that could be deployed to support emergency communications at the site of natural disasters, acts of terrorism, or other man-made disasters.	With DHS CFO
2011	10/4/2011	P.L. 109-295, 6 U.S.C. § 576	ECPC Strategic Assessment: The Emergency Communications Preparedness Center shall ... prepare and submit to Congress, on an annual basis, a strategic assessment regarding the coordination efforts of Federal departments and agencies to advance: (A) the ability of emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism and other man-made disasters; and (B) interoperable emergency communications; (3) consider, in preparing the strategic assessment under paragraph (2), the goals stated in the National Emergency Communications Plan under section 1802	With DHS CFO
2012	2/6/2012	Senate Report 112-74 p. 113	FPS Strategic Human Capital Plan: Further, a new provision is included requiring that FPS submit a strategic human capital plan that aligns fee collections to personnel requirements based on a current threat assessment with the fiscal year 2013 budget submission. In addition, the Committee directs GAO to report to the Committee within 60 days after the receipt of the plan on its validity.	Interim report submitted 10/22/2012; final report with program office.
2012	2/21/2012	Senate Report 112-74 p. 108-109	IP Information Sharing: The Committee directs NPPD to provide a report to the Committee no later than 60 days after the date of enactment of this act on the results from a thorough review of all efforts related to coordinating and executing plans; implementing performance metrics; sustaining systemic communication; executing Sector Specific Agency functions; and providing education, training and outreach. Further, the Committee directs GAO to review the results of the NPPD report and related efforts of the streamlining process no later than 60 days after receiving the report to determine the extent to which they were designed to ensure mission clarity; useful and actionable work products; efficacy of planning and information sharing; and that cost savings are achieved where possible.	With DHS Front Office

Fiscal Year	Due Date(s)	Reference/Citation	Requirement	Status
2012	5/1/2012	Senate Report 112-74 p. 15	National Guard Cybersecurity Team: The Deputy Secretary, jointly with the Deputy Secretary of Defense, to submit a report to the Appropriations Committee no later than May 1, 2012, evaluating the costs and benefits of establishing a National Guard cybersecurity team and/or an equivalent civilian team that could be deployed to help prevent or recover from a cybersecurity attack. The report should include an outline of the recommended command hierarchy, including responsibility for deploying teams; describe organizational responsibilities for providing guidance and training; and discuss how critical relationships will be established across the various agencies with cybersecurity responsibilities.	Coordinating with DOD
2012	6/23/2012	Senate Report 111-222 p. 101	Emergency Communications : Progress made since 9/11: OEC is to report to the Committee no later than 6 months after the date of enactment of this act on the progress made since September 11, 2001, to improve emergency communications and detail what challenges lie ahead. Particular focus should be placed on the adoption of broadband technologies and the key issues and barriers still facing the emergency response agencies on this issue. The report is to include any needed update to the National Emergency Communications Plan to reflect the emergence of broadband technologies for public safety and this update shall be developed in cooperation with State, local, and tribal governments, relevant Federal agencies, emergency response providers, and the private sector. Further, the report shall include a plan to develop and disseminate training and best practices on governance, standard operating procedures, equipment purchases, and related issues for broadband technologies; and to deliver technical assistance to public safety agencies on broadband technologies.	With DHS CFO
2012	6/23/2012	P.L. 109-295, 6 U.S.C. § 573	ECPC Baseline Assessment Update: Not later than 1 year after the date of enactment of this section and not less than every 5 years thereafter, the Secretary, acting through the Director for Emergency Communications, shall conduct an assessment of Federal, State, local, and tribal governments that—(1) defines the range of capabilities needed by emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man-made disasters; (2) defines the range of interoperable emergency communications capabilities needed for specific events; (3) assesses the current available capabilities to meet such communications needs; (4) identifies the gap between such current capabilities and defined requirements; and (5) includes a national interoperable emergency communications inventory to be completed by the Secretary of Homeland Security, the Secretary of Commerce, and the Chairman of the Federal Communications Commission that—(A) identifies for each Federal department and agency—(i) the channels and frequencies used; (ii) the nomenclature used to refer to each channel or frequency used; and (iii) the types of communications systems and equipment used; and (B) identifies the interoperable emergency communications systems in use by public safety agencies in the United States.	With DHS CFO
2012	9/30/2012	Senate Report 112-74 p. 11 House Rept 112-331 p. 947	Second FY12 CFATS Update: The Deputy Secretary is directed to continue quarterly reporting to the Committee on these matters. The reports shall include an update on: the development of a more comprehensive picture of security issues at the Nation's chemical facilities; whether regulatory gaps exist that may pose an unacceptable security risk; and the identification and elimination of redundancies between current regulatory regimes. In addition, the quarterly updates shall include information on the Department's continuing efforts to determine whether and how to require MTSA-covered facilities that possess CFATS chemicals of interest to complete and submit CFATS Top-Screens. Finally, the report shall provide updates regarding the efforts with other Federal entities, such as the Federal Bureau of Investigation and the Transportation Security Administration, including specific milestones and agreements that will be reached to further coordinate chemical security efforts. The Deputy Secretary is directed to submit reports on chemical security efforts to the Committees on Appropriations as directed in the Senate report. However, the reports shall be submitted on a semi-annual basis instead of quarterly with the first report due no later than March 30, 2012.	With DHS CFO
2013	3/30/2013	Senate Report 112-74 p. 11 House Rept 112-331 p. 947	First FY13 CFATS Update: The Deputy Secretary is directed to continue quarterly reporting to the Committee on these matters. The reports shall include an update on: the development of a more comprehensive picture of security issues at the Nation's chemical facilities; whether regulatory gaps exist that may pose an unacceptable security risk; and the identification and elimination of redundancies between current regulatory regimes. In addition, the quarterly updates shall include information on the Department's continuing efforts to determine whether and how to require MTSA-covered facilities that possess CFATS chemicals of interest to complete and submit CFATS Top-Screens. Finally, the report shall provide updates regarding the efforts with other Federal entities, such as the Federal Bureau of Investigation and the Transportation Security Administration, including specific milestones and agreements that will be reached to further coordinate chemical security efforts. The Deputy Secretary is directed to submit reports on chemical security efforts to the Committees on Appropriations as directed in the Senate report. However, the reports shall be submitted on a semi-annual basis instead of quarterly with the first report due no later than March 30, 2012.	NPPD review

BUDGET REQUEST AND SUPPORTING INFORMATION

National Protection & Programs Directorate Management and Administration

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Department of Homeland Security (DHS) National Protection and Programs Directorate (NPPD) Management and Administration (M&A) appropriation provides Directorate leadership and management, coordination of Directorate activities with DHS Headquarters and Components, and program oversight and mission support services. NPPD M&A leads and coordinates Directorate activities to reduce the risk to the Nation's critical physical and cyber infrastructure.

B. Budget Activities:

Directorate Administration provides management and oversight of NPPD's programs. This consists of the Office of the Under Secretary, which includes the Under Secretary and the Deputy Under Secretaries; the Office of the Chief of Staff, which includes the Chief of Staff, the Executive Secretariat, Public Affairs, Legislative Affairs, and NPPD Transition; Office of the Director of Management, which includes the Director of Management, Budget, Finance, and Acquisitions, Administrative Services, Human Resources Management, and Information Technology; the Office of Strategy and Policy, which includes Strategy and Policy and International Affairs; the Office of Privacy/Civil Rights and Civil Liberties; and the Office of Security and Investigations.

Pursuant to the FY 2012 Appropriations Bill, the M&A appropriation also includes the Office of the Assistant Secretary for Cybersecurity and Communications (CS&C) and Office of the Assistant Secretary for Infrastructure Protection. These offices provide the full range of business support services to ensure that programs operate effectively, as well as oversight responsibility to direct program policy and strategy, prioritize and determine resource allocation across programs, and oversee effective program execution.

C. Budget Request Summary:

NPPD requests 379 positions, 322 FTE, and \$64.725 million for FY 2014. This includes adjustments to base that net to an additional 44 positions and 45 FTE, and a decrease of \$2.049 million from FY 2012. This also includes a program change for 115 positions, 58 FTE, and \$15.420 million to provide business and mission support to the increasing mission and footprint of NPPD.

D. Efficiencies:

Advisory & Assistance Services Efficiencies

\$0.894 million

Assistant Secretary Contract Reductions – This efficiency will be achieved by reducing contracts for business support services at the Office of the Assistant Secretary for Infrastructure Protection and the Office of the Assistant Secretary for Cybersecurity and Communications. These services will be provided by the Office of the Under Secretary through the additional capability provided by the program increase to strengthen NPPD’s core management functions and oversight capabilities.

Travel Efficiencies

\$0.085 million

Travel Reduction – This efficiency will be achieved by reducing travel conducted by employees of the Office of the Under Secretary.

¹ The numbers displayed in the FY 2013 column are the annualized short-term continuing resolution amounts from P.L 112-175. The discrepancy from the FY 2013 numbers in MAX is due to scheduling. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.

III. Current Services Program Description by PPA

Department of Homeland Security
National Protection & Programs Directorate
Management and Administration
Directorate Administration
Program Performance Justification
 (Dollars in Thousands)

PPA: Directorate Administration

	Perm. Pos	FTE	Amount
2012 Revised Enacted	204	203	46,454
2014 Adjustments-to-Base	60	61	2,851
2014 Current Services	264	264	49,305
2014 Program Change	115	58	15,420
2014 Total Request	379	322	64,725
Total Change 2012 to 2014	175	119	18,271

The National Protection and Programs Directorate (NPPD) requests \$64.725 million and 379 positions/ 322 FTE for Directorate Administration. The request includes the following adjustments to the base:

- Increase of \$4.657 million and 4 FTP/4 FTE as a transfer to centralize Infrastructure Protection business support functions
- Increase of \$0.041 million for the shared services administrative funding transfer from DHS CAO
- Increase of 1 FTE for the annualization of prior year/part year funding
- Increase of \$0.202 million for the FY 2014 pay raise
- Increase of 56 FTP/56 FTE and a decrease of \$1.070 million for Balanced Workforce contractor conversions
- Decrease of \$0.979 million for efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

NPPD Directorate Administration consists of several offices and functions that provide management and oversight of NPPD’s programs. In FY 2013, funding to support two activities was transferred into Directorate Administration. The transfer to centralize Infrastructure Protection business support functions allows for the central management of IP’s business support contracts. Previously, these contracts were funded through several projects in the Infrastructure Protection and Information Security (IPIS) appropriation. In addition, funding was transferred from DHS headquarters to Directorate Administration to support shared services activities that will now be funded through the Working Capital Fund.

A detailed list showing personnel and funding by office is provided in the table below. For comparison purposes, the table provides the personnel and funding associated with FY 2014 current services and the FY 2014 request. A description of each office and function is described following the table.

Note: The totals in this table account for rounding.

Office of the Under Secretary

The Office of the Under Secretary (OUS) provides Directorate leadership and management and coordinates activities throughout the Directorate. The office includes the Under Secretary and the Deputy Under Secretaries. OUS continuously reviews program activities and performance, and works to ensure that they are executed effectively and efficiently. OUS also provides a range of mission support services.

Office of the Chief of Staff

The Office of the Chief of Staff consists of the following: the Chief of Staff, the Executive Secretariat, Public Affairs, Legislative Affairs, and NPPD Transition. This office is ultimately responsible for managing the internal and external communication for NPPD and coordination of cross-component initiatives. Additional details regarding each function are outlined below.

Executive Secretariat

The Executive Secretariat is responsible for managing external communications for NPPD. It provides NPPD and DHS with an efficient and collegial process for document management, including tracking, monitoring, and editing all formal documents and taskers sent to/from NPPD. The Executive Secretariat is comprised of the following functions: Freedom of Information Act (FOIA), Records Management, Audit Liaison, Business Continuity and Emergency Preparedness, and the Executive Briefing Team.

- *FOIA* - Works in concert with the Departmental FOIA office, providing requestors with timely, comprehensive access to NPPD documents while safeguarding sensitive information in accordance with Federal laws and regulations.
- *Records Management* - Provides leadership and direction for the NPPD records management program. Develops an overall records management strategy producing the policy, procedures, and guidance necessary to implement that program, develops policies and guidance on the application of technology to records management, and coordinates the program within and outside NPPD overall.
- *Audit Liaison* - Serves as a liaison among external Departmental offices, the Government Accountability Office (GAO), Office of the Inspector General (OIG) and NPPD offices for all audit activities undertaken by either GAO or OIG. Activities include working with NPPD components and GAO or OIG to facilitate entrance/exit conferences, fieldwork, release of draft and final reports, and recommendation follow-up and closure.
- *Business Continuity and Emergency Preparedness* - Develops and manages the continuity of operations of NPPD for a variety of emergency situations.
- *Executive Briefing Team* - Delivers integrated daily briefings for NPPD leadership and DHS Daily Component Highlights.

Public Affairs

Public Affairs (PA) is the nexus for all NPPD communications, outreach, and awareness. PA promotes the coordination and unification of messaging that increases visibility and awareness of NPPD missions in synchronization with DHS Headquarters PA and other DHS components to promote infrastructure, cyberspace, and Federal building protection efforts.

NPPD PA ensures coordination among Directorate subcomponents on outreach, public affairs strategies, and provides communications support to leaders to ensure that all of the key efforts in infrastructure protection are included in proper context in the DHS narrative on resilience and preparedness. Effective communications is vital to infrastructure protection since the Nation relies so heavily upon private sector leaders to voluntarily strengthen community resilience.

PA leads the Directorate's public affairs function, managing external communications -- specifically media relations and web content. PA also provides Directorate news, program updates, and Department initiatives for all employees through the *Vision* weekly newsletter and the Intranet.

Legislative Affairs

Though presently partially supported by DHS Headquarters, NPPD Legislative Affairs develops legislative action plans to ensure congressional awareness of the full breadth of activities underway within the NPPD mission area. Legislative Affairs responds to known congressional priorities and areas of interest with responsive engagements.

NPPD Transition

NPPD Transition leads the effort to evaluate the necessary resources to ensure NPPD's mission success, to include better aligning cybersecurity and physical infrastructure protection and resilience efforts, achieving synergies and efficiencies, and better integrating operational and mission support functions. In FY 2014, NPPD will continue to focus on seeking efficient and effective mission operation support services.

Office of the Director of Management

In FY 2012, NPPD created a new Director of Management position designed to enhance the Directorate's business lines of service by streamlining, integrating, and improving the various functions that support NPPD employees and the mission. The newly created Office of the Director of Management consists of the following: Director of Management, Budget, Finance, and Acquisitions, Administrative Services, Human Resources Management, and Information Technology. Details regarding each function are outlined below.

Budget, Finance, and Acquisitions (BFA)

BFA supports the NPPD mission by conducting financial management, oversight, and developing and enforcing fiscal services. BFA consists of the following activities and elements:

- *Requirements and Capabilities Planning* – Reviews program capabilities and requirements against NPPD leadership objectives to ensure the Directorate is pursuing the most critical capabilities to achieve its mission, and developing those capabilities in the most effective and efficient manner. This function drives resource allocation in a strategic manner across the Directorate.
- *Budget Formulation* – Guides programs in the development of resource requests, develops program funding levels based on NPPD Leadership direction (the output of Requirements and Capabilities Planning) and cost analysis, and builds and justifies funding requests to resource mission needs.
- *Budget Execution* – Responsible for the workflow and funds control process to ensure that resources are available when needed, do not exceed authorized levels, and are used in accordance with law and congressional intent.
- *Performance Management* – Constitutes the Performance Improvement Officer function, and includes managing internal and external performance management requirements; and the collection, analysis, monitoring, and reporting of performance data.
- *Financial Operations* – Responsible for the overall accounting operations of NPPD and ensuring that the Directorate meets financial execution and accounting requirements in support of DHS's centralized financial management program. Functions include commitment/obligations input and tracking, travel and purchase card processing, status of funds monitoring, and payroll reconciliation.

- *Financial Systems Reporting* – Responsible for the preparation and submission of financial reports to DHS and to the Immigration and Customs Enforcement (ICE) Chief Financial Officer (CFO). Works closely with the ICE CFO to monitor and reconcile Treasury Information Executive Repository reports and to provide analysis to validate accuracy of data. Responsible for the development and monitoring of NPPD internal control programs.
- *Internal Controls* - Responsible for developing and implementing NPPD’s internal controls program. Working in conjunction with the DHS financial management staff, the internal controls office manages the annual audit of financial statements, coordinates testing and corrective actions to improve improper payments, and coordinates the review of internal controls as required by OMB Circular A-123.
- *Acquisition Management and Oversight* – Reviews and monitors NPPD’s acquisition programs, ensures compliance with Federal and DHS acquisition regulations, and ensures effective and efficient acquisition of material solutions. With the creation of a new Director of Management position, NPPD has been able to transfer oversight of Acquisition and Procurement Operations from the NPPD Director of Budget, Finance, and Acquisitions to the Director of Management.
- *Procurement Operations* – Reviews and tracks NPPD contracts and other purchases and establishes and manages procurement procedures across NPPD. This office also represents NPPD procurement interests to the DHS Office of the Chief Procurement Officer.
- *Regulatory and Economic Analysis* – Ensures that NPPD guidance and regulatory actions consider alternatives and impacts. Ensures that regulatory analyses are completed following the requirements of statute, executive order, and the Office of Management and Budget (OMB) policy. Provides leadership with economic impact analysis related to NPPD programs and activities.

Administrative Services

Administrative Services provides operational services for facilities maintenance and leasing, personal property management, fleet management, environmental planning and execution, logistics management, and management for various NPPD-wide administrative functions. Responsibilities include the following activities and elements:

- *Facilities* – Ensures that existing facilities are available and ready for NPPD personnel and missions by providing operations and maintenance support. Support ranges from providing heating/ventilation/air conditioning preventative and emergency maintenance to working with GSA to ensure that NPPD properties are safe, secure, and operational. Other responsibilities include furniture procurement and maintenance.
- *Real Property Management* – Responsible for ensuring that the Directorates future facility needs are planned, developed, and executed to provide continuing support for NPPD personnel and missions. Support is provided in the form of leasing, planning, fit out construction, and space alterations to support higher security levels. Manages, tracks, and disposes of more than the 600 leases that NPPD holds.
- *Environmental Management* – Ensures that NPPD facilities and missions operate in the most sustainable manner practical, establishing environmental and sustainability plans, energy management systems, historic preservation, and environmental protection. Ensures that all NPPD activities are executed in compliance with environmental laws and statutes.

- *Personal Property* – Manages and records Directorate property, ensures that accountable and sensitive assets are accounted for, tracked, and disposed of in accordance with Federal rules and DHS directives.
- *Fleet* – Ensures that the Directorate has access to vehicles appropriate with mission requirements and that those vehicles are adequately outfitted to execute missions. Responsible for reporting, ordering, and disposal of vehicles and developing policies and procedures.
- *Administrative Support* – Ensures that administrative support needs for the Directorate are obtained and managed in the most efficient manner to support NPPD personnel and missions. Services include mail management, sedan services, parking, and transit benefits disbursement and tracking.

Human Resources Management

Human Resources Management (HRM) is responsible for classifying positions, recruiting, determining pay and compensation, and hiring and onboarding new personnel. In addition, the office provides guidance to and processes actions for all NPPD managers and employees in the areas of performance management, awards, payroll, and benefits, as well as in employee and labor relations. HRM also includes:

- *Professional Development and Training* – Assesses, designs, develops, implements, and evaluates training designed to address needed workforce skills, competencies, and certifications, so that NPPD employees are provided with training and professional development/educational programs that enhance and support their positions.
- *Employee and Labor Relations* - Leads, assists, and represents management in its efforts to address employee conduct, performance, and labor-management relations matters in a manner that promotes the development and retention of a high-performing workforce.

Information Technology

Information Technology (IT) actively participates in strategic planning by ensuring systems and processes are integrated and consistent with the DHS Chief Information Officer Strategic Plan and overarching Departmental goals and objectives. In addition, IT evaluates new technology and advises NPPD leadership as to how IT solutions might offer opportunities and options to support the successful implementation of policy decisions and organizational goals and objectives. IT approves, oversees, and monitors IT investment requests for NPPD subcomponents programs. IT provides governance and oversight over DHS enterprise architecture processes and objectives, and IT security policies. Finally, IT and staff serve as the NPPD representatives on various Departmental planning, oversight, leadership, and council committees sponsored by the DHS Chief Information Office.

Office of Strategy and Policy

The Office of Strategy and Policy (OSP) manages formal policy coordination within NPPD. As the principal catalyst for NPPD strategy and policy development, OSP ensures strategic coherence, promotes independent thinking and innovation, provides objective analysis and net assessment, and integrates program planning, performance, and accountability for the cyber and physical infrastructure resilience mission space. OSP represents NPPD on interagency and Departmental working groups that address crosscutting and integrated strategic objectives, policies, plans, and procedures that convey a

consistent and coherent vision, strategy, and perspective. OSP also conducts analyses to identify gaps in policy and initiates policy planning and formulation to fill these gaps.

Within OSP, NPPD is developing and executing a Directorate-wide international affairs prioritization and strategic planning process. The international staff is instituting mechanisms to ensure sub-component coordination and collaboration of their international affairs programs.

Office of Privacy/Civil Rights and Civil Liberties

The Office of Privacy is responsible for developing internal policies to protect personal privacy, promoting awareness of and compliance with privacy requirements, and ensuring that NPPD technology systems have appropriate privacy protections in place. In FY 2014, NPPD is requesting to add the civil rights and civil liberties (CRCL) function to the Office of Privacy portfolio, renaming it the Office of Privacy/Civil Rights and Civil Liberties. The budget request will be used to integrate full individual privacy and civil liberty protections into the management of a safe, secure, and resilient infrastructure.

Office of Security and Investigations

The Office of Security and Investigations (OSI) provides a safe and secure work environment and promotes organizational excellence, integrity, and accountability to NPPD stakeholders through its program areas of Internal Affairs and Program Review and Evaluation. OSI is currently staffed by reimbursable agreements for Federal Protective Service (FPS) investigators.

- Internal Affairs - Investigates and coordinates administrative and criminal allegations of employee misconduct in conjunction with the DHS Office of Inspector General, NPPD Employee and Labor Relations, Office of General Counsel, and component management, as appropriate.
- Program Review and Evaluation - Plans, coordinates, and provides headquarters-level oversight of program evaluations to measure operations against best practices and objective criteria to determine if the programs and operations are effective and efficient, achieve the desired results, and/or operate in accordance with laws and regulations. Also manages the NPPD Self-Inspection Program.

Office of the Assistant Secretary for Infrastructure Protection

The Office of the Assistant Secretary for Infrastructure Protection (OASIP) represents a centralized locus for Infrastructure Protection (IP) mission support, including IP document and information management, human resources, budgeting, acquisition/procurement, security, facilities, planning, performance management, resource execution, policy, and legislative affairs. OASIP provides oversight while coordinating with external organizations—both national and international—to address the implications of the critical infrastructure global risk environment, in order to develop and implement specific strategic guidance and policies for U.S. and international critical infrastructure protection and resilience.

OASIP establishes and oversees management controls and a comprehensive governance structure to improve the planning, execution, and reporting activities performed within IP to manage major initiatives, drive mission accomplishments, and allocate resources that are consistent with approved

organizational goals. OASIP has established feedback loops—such as the Critical Infrastructure Risk Management Enhancement Initiative—that adjust IP efforts and resources to where they are needed most.

Office of the Assistant Secretary for CS&C

The Office of the Assistant Secretary for CS&C manages cyber and communications policy initiatives and mission activities collaborations occurring across the United States Government. This staffing serves as a critical link to external stakeholders, OMB, and Congress. The requested salaries and support allow centralized resource allocation and outreach efforts with intergovernmental, international, private sector, and other stakeholders, in addition to providing staffing and oversight of the following functional areas: Strategic Planning and Policy, Mission Integration, External Affairs, Human Capital, Budget and Finance, Acquisitions and Procurement, Continuity of Government, and Facility Planning. The Office of the Assistant Secretary also establishes and oversees management controls and a comprehensive governance structure to improve the planning, execution, and reporting activities performed within CS&C to manage major initiatives, drive mission accomplishments, and allocate resources that are consistent with approved organizational goals.

Total Request	204	203	46,454	204	203	46,640	379	322	64,725

Description of Item and Justification

This request would provide an additional 115 positions/58 FTE and \$15.420 million to strengthen NPPD's core management functions and oversight capabilities. This increase would provide NPPD with an adequate mission support capacity to keep pace with the growth of its programs. The associated dollars are broken out as follows:

Offices in Management & Administration (Dollars in Thousands)	FY 2014 Program Change				
	FTP	FTE	S&B	Program	Total
Directorate Administration	115	58	6,587	8,833	15,420
Chief of Staff	8	4	358	266	624
Public Affairs	8	4	358	266	624
Director of Management	92	46	5,282	8,067	13,349
Budget, Finance, and Acquisitions	19	10	1,157	634	1,791
Administrative Services	25	13	1,400	833	2,233
Facilities Costs	0	0	0	5,000	5,000
Human Resources Management	23	11	1,225	767	1,991
Information Technology	25	12	1,500	833	2,334
Privacy/Civil Rights and Civil Liberties	15	8	947	500	1,447
TOTAL	115	58	6,587	8,833	15,420

Note: All program funding are, with the exception of facilities costs, for mandatory personnel-related costs (i.e. working capital fund, recruitment costs) that are derived from the OMB-approved modular cost table.

The overall mission of NPPD is to lead the national effort to protect and enhance the resilience of the Nation's physical and cyber infrastructure.

NPPD's current workforce consists of about 3,300 authorized Federal positions and 15,000 contractors. This workforce, of which more than 14,000 are outside of the National Capital Region (NCR), assesses the security and resilience of Federal, chemical, and other private sector facilities; provides law enforcement and security services to over 9,000 Federal facilities; and works to enhance the resilience of and protect the Nation's cyber and critical infrastructure. NPPD has a national footprint with offices in 236 U.S. cities. NPPD's cybersecurity and infrastructure protection programs interact daily with, and provide advice and support to, other Federal agencies, as well as State, local, tribal, territorial, international, and private sector partners.

As of 2008, NPPD's operational and mission support responsibilities were carried out with a budget of \$902 million, and a headquarters budget of only \$37.9 million or 4.2%. Today, through continual growth in cybersecurity and the addition of FPS, NPPD's total budget has grown by 175 percent to \$2.5 billion. At the same time, NPPD's current headquarters budget is \$46.5 million or 1.8%. The growth in the Management & Administration budget from \$37.9 to \$46.5 million is due entirely to the inclusion of the Offices of the Assistant Secretaries of CS&C and IP in 2012—offices that were previously funded in the IPIS appropriation. NPPD's headquarters has not kept pace with the growth of its mission operations and is struggling to provide adequate service and oversight in critical functions such as budgeting, financial management, procurement, human resources, etc. This lack of capacity in business operations undermines NPPD's ability to support critical infrastructure protection, cybersecurity, and Federal facility protection missions.

This program change is critical to NPPD's mission success and will raise the M&A overhead to 2.6% of the total NPPD budget authority. NPPD's request will support the overall development, establishment and integration of enhanced and expanded functionalities, which will be completed over the course of several years.

NPPD has targeted this increase in areas that perform essential management functions in order to provide for the increasing operational mission and national footprint of NPPD. This request will stabilize the most critical of these foundational functions in FY 2014:

- **Public Affairs** (\$0.624 million, 8 positions) – The additional resources would support:
 - Development of a consistent public affairs policy
 - Ensure coordination across NPPD subcomponents
 - Implement and ensure strategic representation across the following functions: internal communications, media relations, strategic communications, and stakeholder outreach
- **Budget, Finance, and Acquisitions** (\$1.791 million, 19 positions) – The additional resources would support budget formulation, execution, performance, financial reporting, and procurement planning functions. The increase is requested to support increased budget and financial management responsibilities for the Directorate:

- NPPD is requesting 3 positions to support financial systems transformation and develop business intelligence tools to increase efficiency, data reliability, and transparency. These resources will perform requirements development, systems implementation, and lifecycle management of the financial, procurement, asset, fleet, travel, and other feeder systems that impact the financial statements and reporting. These tools can also be leveraged for financial reporting and also analytical purposes.
- NPPD is also requesting 3 additional positions for audit and internal controls requirements. These positions would support NPPD's responsibilities under OMB Circular A-123, the Improper Payments Elimination and Recovery Act of 2010, and the DHS financial statement audit. In order to meet OMB Circular A-123 requirements, NPPD must perform tests of design and operating effectiveness around its business processes by documenting business process narratives, flow charts, and control evaluation matrices, and testing the key controls for operating effectiveness. NPPD also tests and reviews more than 400 transactions of commercial disbursements between February and April, as well as associated documentation for open obligation and unfilled customer order balances and responds to a high volume of auditor inquiries between April and November. In the past, this function has been performed by contractors, but Federal employees are more appropriate and sustainable in these positions as they are required to review proprietary information and provide internal controls and process re-engineering guidance across the organization to maintain accountability and compliance with laws and regulations.
- 4 additional positions would be focused on increasing oversight for purchase card transactions and assuming the added workload of oversight and management of the FPS purchase card program from ICE. These positions would also support increased reporting requirements for open government financial reporting requirements. An additional accounting position will address a concern identified on the NPPD assurance statement to provide support and analysis to ICE, or financial systems service provider, on the development of journal voucher entries and other financial reporting concerns. Finally, these positions would establish a function to document and oversee NPPD procedures required by the DHS Financial Management Policy Manual, including oversight of conference-related expenses, official reception and representation funds, waiver requests, and other financial management functions within the Department.
- The final 9 positions would allow NPPD budget and planning capabilities need to keep pace with the increasing scope of the programs located across NPPD. These positions would provide increased support for budget execution functions, specifically financial plan oversight, monitoring, and reporting. This will support NPPD in its efforts to remove a reportable condition from its audit. In addition, these positions would increase NPPD's capability to perform budget planning and program analysis to better inform resource allocation decisions across the five-year Future Years Homeland Security Program (FYHSP). NPPD would also dedicate staff to improve its performance measure development and reporting processes and increase the number of budget analysts managing cybersecurity budget requests and associated support.

- **Administrative Services** (\$2.233 million, 25 positions) – The additional resources would support the following activities for NPPD’s growing workforce:
 - **Facility Management:** Development of more than 200 reimbursable work authorizations to transfer funding for various building services; provide facility planning; develop scope, acquire and track funding for, and monitor work for preventive and emergency maintenance contacts; manage and maintain seating charts to control space and its use
 - **Construction Management:** Develop, procure funding for, and manage construction and large-scale renovation efforts
 - **Personal Property Management:** Ensure that all accountable and sensitive assets are accounted for, tracked, and disposed of in accordance with statutes, directives, and regulations

- **Facilities Costs** (\$5.000 million) – The additional resources would fund the facilities costs related to housing the new employees with existing Office of the Under Secretary employees. This would include funding the design and build out to ensure the facilities are adequate for all employees, as well as purchasing office equipment and other related costs.

- **Human Resources Management** (\$1.991 million, 23 positions) – The additional resources would support staffing and recruitment, position classification, payroll processing, workers compensation, medical requirements oversight, labor and employee relations, leadership development, and training administration and oversight. The additional support is necessary as a result of the delegation of human capital authority and responsibility from the Under Secretary for Management to the Under Secretary for NPPD, the need for more effective reporting capability, increasing assumption of professional development and training responsibility, increased leadership training requirements, and the need to provide more effective field support.

More specifically, the 23 additional positions would be used enable the number of human capital staff to catch up with the growth in total staff across NPPD. Since FY 2008, NPPD has grown from 483 to 3,066 Federal FTE. This includes critical areas such as cybersecurity and the Federal Protective Service. The additional human capital positions will provide a more manageable employee servicing ratio and assist in providing the full range of human capital services to the NPPD’s programs. The resources will be targeted at the most critical human capital functions. Almost a third of the new positions will be focused on enhancing personnel/payroll processing and supporting recruitment and hiring. This will allow NPPD to increase its ability to bring new employees onboard faster, meet hiring goals, and decrease the percentage of vacant positions. NPPD will also substantially increase its training and development function, in order to provide support for additional leadership development and training, increase instructional system design capability and e-learning programs, and provide competency development and training needs analysis. The remaining resources will reduce processing timelines for retirement estimates; service employee and labor relations actions/cases and other employee benefits actions; and increase NPPD’s capability to analyze its workforce and strategically plan.

- **Information Technology** (\$2.334 million, 25 positions) – The additional resources would support the following functions to accommodate NPPD’s growth:
 - Deliver IT solutions that support mission and business effectiveness, focusing on IT governance, commodity IT service delivery, program management, and information security
 - Implement capital planning and IT investment processes that link to budget formulation and execution
 - Optimize the IT business model that supports DHS IT Infrastructure Strategy and conduct program reviews and recommend and direct IT program improvements

- **Privacy/CRCL** (\$1.447 million, 15 positions) – The additional resources would accommodate the growing organization by:
 - Establishing a centralized civil rights and civil liberties function within NPPD to support NPPD’s mission and allow for streamlined processing of equal opportunity and reasonable accommodation requests
 - Ensuring resources to effectively mitigate privacy risks while maintaining transparency, mission support, and effective business operations
 - Allowing for the development and implementation of policies and standard operating procedures consistent with DHS policies and fair information practice principles to ensure privacy is implemented consistently across NPPD programs
 - Integrating privacy into information sharing efforts to ensure protection of personally identifiable information or information protected by the Privacy Act
 - Working with subcomponents to develop sustainable privacy and CRCL compliance processes, streamlined support to NPPD mission areas, and providing support to all NPPD subcomponents throughout the full compliance lifecycle
 - Increasing awareness in privacy and CRCL issues by developing and conducting training to Headquarter and field personnel
 - Ensuring compliance with DHS incident-handling guidelines and assisting with investigating and mitigating incidents to reduce privacy risks, and informing NPPD leadership of incident activities that may have significant impacts among NPPD stakeholders
 - Providing subject matter expertise and advice to NPPD leadership and program leads on emerging privacy issues

Impact on Performance

The additional resources are required to allow NPPD to oversee and support its programs properly. The additional funding will enable NPPD to:

Public Affairs – Coordinate NPPD strategic cybersecurity communications; management of media relations for cybersecurity, infrastructure protection, and FPS; and coordination across NPPD for internal communications, media relations, strategic communications, and stakeholder outreach. Expected impacts are as follows:

- Serve as coordinator of implementation efforts for the DHS Strategic Communications Plan for Cybersecurity, newly developed and approved in FY 2012 to inform and frame the

Department's cybersecurity communications plans and outreach on programs, issues, events, and responses to queries.

- Expand public affairs capabilities in the areas of media relations, website management, multimedia, graphic design, external affairs, and internal communications to reflect the Directorate's increased operational mission profile and associated public affairs requirements.
- Develop an in-house capability to develop and launch multimedia products to support internal employee communications and materials for external stakeholders.
- Improve private sector and stakeholder relations through timely and accurate external products, including guidance documents and fact sheets through improved product review processes.
- Improve support of reactive and proactive media engagement within NPPD subcomponents, develop a media relations strategy that promotes NPPD's mission, ensure crisis communication training and preparation for senior leaders, and deliver accurate and meaningful messaging that captures program goals and responsibilities.
- Develop and execute an internal communications plan to ensure cohesive Directorate-wide communications directed at employees. This plan would be a new approach versus the current reactive communications process that would increase both the quality and quantity of internal employee communications by adding creative content focused on employee resources and tools aimed at improving morale and leadership.
- Deploy the use of social media tools to communicate with internal and external audiences. This strategy will allow improved communications to the diverse Directorate workforce -- many of whom are in the field and do not regularly utilize traditional email and intranet sites for information.
- Realize efficiencies related to travel for public speaking engagements through improved NPPD speaker's bureau.

Budget, Finance, and Acquisitions –With the growth of the NPPD budget, the transition of FPS into NPPD, and the proliferation of budgetary and financial reporting requirements that have accompanied the growth of NPPD, this funding will ensure that NPPD has budget and financial analysts to manage resources appropriately and that all reporting requirement will be carried out thoroughly and in a timely manner. Expected impacts are as follows:

- Establish a financial systems capability to support system transformation and business intelligence tool development to increase data reliability and accuracy. This would automate the status of funds, account reconciliations, and payroll projections.
- Increase audit and internal controls staffing to meet the requirements of the Improper Payments Elimination and Recovery Act of 2010, DHS financial audit and entity level control reviews.
- Assume FPS purchase card management from ICE and perform oversight and audits of the NPPD purchase card program.
- Ensure procurements and financial transactions for the \$2.5 billion in annual funds are processed in a timely manner and in accordance with the DHS established standards, to include funding allotments, funds approval, obligations, and invoice and IPAC payments.
- Establish a program planning and evaluation function to perform budgetary planning and program capability analysis across the FYHSP. This will enable leadership to make more informed resource allocation decisions in a constrained budget environment.
- Dedicate staff to the development and tracking of performance metrics to meet Government Performance and Results Act (GPRA) requirements.

- Meet reporting requirements for USA spending, efficiency efforts, and other open government initiatives.
- Perform budget execution functions, specifically financial plan oversight and monitoring as well as payroll tracking and analysis to ensure NPPD meets 99 percent obligation rates.
- Meet reporting and briefing requirements or other data requests from the appropriations committees and other oversight bodies.
- Enable NPPD to provide accurate and timely financial reporting, facilitating clean audit opinions, addressing systems security issues, and remediating financial control and financial system weaknesses.

Administrative Services – Provide facilities, property, fleet, asset, environmental, and administrative management, commensurate with increased staffing. Expected impacts are as follows:

- Reduce the average facility down time (i.e., failure of heating/ventilation/air conditioning, elevators, water, etc.) per incident from an average of 6 days down to 3 days outside of the NCR.
- Reduce the average furniture order and delivery time from between 6 and 12 months down to 5 months.
- Reduce the average time, from 15 months down to 12 months, to effectively and efficiently execute more than 200 lease renewals and construction projects annually.
- Increase the facilities management support for approximately 50 of the more than 350 occupied sites, which are located across the Nation. Current personnel can only support 11 sites at current staffing levels.
- Manage 8 direct leases that neither DHS Headquarters nor NPPD currently have the capacity to renew.
- Increase the ability to accurately and comprehensively account for, track, and/or dispose all property and assets in accordance with relevant statutes, directives, and regulations.-
- Increase the Directorate’s ability to fully comply with environmental requirements and documentation in accordance with the National Environmental Policy Act (NEPA) and other relevant laws, regulations, and Executive Orders.
- Increase the percentage of completed NEPA assessments on eligible projects from 5 percent to 75 percent.
- Strengthen fleet management by submitting required reports on time and reducing the current validation and vehicle reorder time from 3 months to 2 months. On average, 233 of NPPD’s 1,400 vehicle fleet require renewal each year.

Information Technology – Deliver IT solutions that support mission and business effectiveness, focusing on IT governance, commodity IT service delivery, program management, and information security. This funding will allow NPPD to plan for, acquire, and maintain management information systems with the right hardware, software, processes, security, and governance to support the growth of NPPD’s mission and workforce. Expected impacts are as follows:

- Implement an Independent Verification & Validation (IV&V) program as required by DHS 4300A Sensitive Systems Handbook.
- Decrease required Federal Information System Management Act (FISMA) documentation review processing time from 45 days to 30 days.

- Increase IT security document validation from 2 systems per day to 4 systems per day.
- Decrease IT security incident ticket response time - from 2 days to 1 day.
- Improve the overall Paperwork Reduction Act (PRA) review period by 25 percent.
- Improve Information Technology Acquisition Review (ITAR) processing time. Increased resources will improve program planning and improve oversight of NPPD information technology spending.
- Improve the System Engineering Life Cycle (SELC) document review process, including NPPD approval for each of the 11 SELC gates by 50 percent.
- Optimize the NPPD Change Control process through implementation of detailed review and validation for change control requests. Additional resources will enable a more thorough identification of technical risks and appropriate mitigation responses.
- Ensure the development and implementation of NPPD classified systems is adequately supported through by supporting the DHS Classified Infrastructure Control Board. Without this support, destabilizing changes could be made to NPPD's classified operational systems.
- Ensure NPPD compliance with mandated data center consolidation and migration efforts.
- Close productivity gaps by establishing and supporting IT managed services governance processes focused on supporting stakeholder mission requirements, improving return on investment, eliminating waste and duplication and improving overall effectiveness of IT solutions.

Human Resource Management – Ensure adequate staffing for a full-service human capital office that develops HR management strategies to accommodate NPPD's large, diverse, and growing workforce. This funding will allow NPPD to acquire and maintain sufficient staff to formulate HR standard operating procedures and regulatory guidance; manage organization and position structures; manage personnel performance, compensation, and benefits; and support the implementation of new policies and processes, as led by the DHS CyberSkills Management Support Initiative, for the strategic management of the cyber workforce. Expected impacts are as follows:

- Decrease the vacancy rate from 13 percent to 8 percent
- Reduce recruitment processing time by 19 days (from 98 to 80 days)
- Reduce processing time for position classification requests by from 15 to 12 business days
- Increase ability to do proactive recruitment of new employees for key areas
- Reduce processing time for new employees by from 4 days to within 24 hours
- Increase capacity to monitor human capital-related metrics
- Enhance labor relations support for recently unionized workforce
- Deliver eLearning and instructional design capability to support field staff
- Implement competency modeling for Infrastructure Protection and Cyber Security and Communications
- Increase supervisory and leadership training to address deficiencies identified in Employee Viewpoint Survey results
- Reduce processing time for retirement estimates by 20 percent

Privacy/Civil Rights and Civil Liberties – Serve NPPD’s growing workforce with a fully standardized and integrated Office of Privacy and Civil Rights and Civil Liberties. This funding will enable NPPD to provide consistency and tailored services in these areas to its subcomponents.

Expected impacts are as follows:

- Provide full transparency to the public of how NPPD manages and respects privacy to increase public trust and encourage participation in programs involving members of the public.
- Achieve 100 percent privacy compliance through the establishment of a sustainable compliance lifecycle process to support assessments of privacy-sensitive activities across all NPPD mission areas.
- Establish a robust compliance and auditing capability to provide continuous monitoring of privacy controls. Compliance gaps will be identified and addressed in order to achieve 100 percent privacy compliance for each NPPD subcomponent.
- Ensure policies exist to cover new initiatives or activities that are privacy-sensitive, such as cybersecurity, social media or information sharing. Development of such policies and procedures serves to increase efficiency and to manage privacy risks.
- Develop role-based compliance training in order to execute more efficiently, reducing the time required to develop privacy compliance documentation.
- Maintain an inventory to manage Directorate information sharing agreements and to ensure new information sharing agreements with federal, international, and state and local partners contain the necessary provisions to protect privacy.
- Develop and implement sustainable, general and role based privacy and CRCL training to deploy to NPPD field forces.
- Enforce compliance with DHS incident-handling guidelines and assist with investigating and mitigating incidents to reduce privacy risks.
- Establish a new, centralized CRCL function within NPPD to support NPPD’s capabilities as an operational departmental component of DHS. This new function will:
 - Establish a new centralized Equal Employment Opportunity and Diversity function within NPPD
 - Integrate and align CRCL policy objectives across NPPD subcomponents
 - Facilitate reasonable accommodation activities and comply with applicable laws, regulations, and departmental policies and procedures.
 - Develop a mechanism for handling CRCL complaints and redress requests.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For salaries and expenses of the Office of the Under Secretary and the offices of the Assistant Secretaries¹ for the National Protection and Programs Directorate, support for operations, and information technology, [\$50,321,000] \$64,725,000: Provided, That not to exceed \$4,250 shall be for official reception and representation expenses.

Change	Explanation
¹ ... <u>and the offices of the Assistant Secretaries</u> ...	Changed to reflect the inclusion of the Office of the Assistant Secretary of IP and CS&C in the M&A appropriation.
² ... [\$50,321,000] <u>\$64,725,000</u> ...	Dollar change only. No substantial change proposed.

Directorate Administration Mission Statement

The National Protection and Programs Directorate (NPPD) Directorate Administration includes the Office of the Under Secretary, which consists of: Office of the Chief of Staff; Office of the Director of Management; Office of Strategy and Policy; Office of Privacy/Civil Rights and Civil Liberties; Office of Security and Investigations; Office of the Assistant Secretary for CS&C; and the Office of the Assistant Secretary for IP.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	20,131	20,256	33,902	13,771
11.3 Other than full-time permanent	403	405	678	275
11.5 Other personnel compensation	671	675	1,131	460
12.1 Benefits	5,637	5,671	9,493	3,856
Total, Salaries & Benefits	26,842	27,007	45,204	18,362

The FY 2014 Request includes \$45,204k for salaries and benefits for 322 FTE. This includes a program increase of \$6,587k and 58 FTE as part of the program change to strengthen core management functions. This also includes an increase of \$8,706k and 56 FTE for Balanced Workforce conversions, an increase of \$555k and 4 FTE to consolidate IP business support, and an increase of \$202k for the FY 2014 pay raise. The Request also includes an increase of \$2,312k to fully fund salaries.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$550	\$1,024	\$285	-\$265

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 Request includes decreases of \$180k to fully fund salaries and \$85k as part of the FY 2014 travel reduction.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$2,080	\$2,080	\$2,273	\$193

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. The FY 2014 Request includes an increase of \$193k as part of the program change to strengthen core management functions.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$17	\$17	\$90	\$73

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 Request includes a decrease of \$4k that was reallocated to fully fund salaries and an increase of \$77k as part of the program change to strengthen core management functions.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$10,256	\$9,801	\$2,002	-\$8,254

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2014 Request includes an increase of \$2,402k to consolidate IP business support. It also includes decreases of \$9,331k for Balanced Workforce conversions, \$431k to fully fund salaries, and \$894k in contract reductions.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$344	\$344	\$587	\$243

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 Request includes an increase of \$347k as part of the program change to strengthen core management functions. It also includes a decrease of \$104k that was reallocated to fully fund salaries.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$4,320	\$4,320	\$12,790	\$8,470

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 Request includes increases of \$8,100k as part of the program change to strengthen core management functions, \$1,700k to centralize IP business support, and \$35k as part of the transfer from DHS CAO. It also includes decreases of \$445k for Balanced Workforce conversions and \$920k that was reallocated to fully fund salaries.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$1,028	\$1,028	\$432	-\$596

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 Request includes a decrease of \$596k that was reallocated to fully fund salaries.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$345	\$348	\$313	-\$32

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 Request includes increases of \$39k as part of the program change to strengthen core management functions and \$6k that was transferred from DHS CAO. It also includes decreases of \$77k to fully fund salaries.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$301	\$301	\$378	\$77

Equipment includes all costs for the purchase of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 Request includes an increase of \$77k as part of the program change to strengthen core management functions.

Risk Management & Analysis Mission Statement

Risk Management and Analysis (RMA) mature and strengthen the Homeland Security Enterprise by leading the Department's efforts to establish a common framework addressing the overall management and analysis of homeland security risk. RMA also leads and executes the Risk Assessment Process for Informed Decision-making, a strategic, all-hazard risk assessment. In addition, RMA provides tools, training, technical assistance, and accountability frameworks to enhance the risk management capabilities throughout the Department and its stakeholders.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	2,242	3,200	-	(2,242)
11.3 Other than full-time permanent	45	64	-	(45)
11.5 Other personnel compensation	75	107	-	(75)
12.1 Benefits	628	896	-	(628)
Total, Salaries & Benefits	2,990	4,267	-	(2,990)

There is no FY14 Request for salaries and benefits in this program. Funding to support the RMA program was transferred in FY 2012 to the DHS Office of Policy.

I. Changes In Full Time Employment

	FY 2012	FY 2013	FY 2014
BASE: Year End Actual from Prior Year	184	219	242

K. DHS Balanced Workforce Strategy

In order to establish a high-performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience, and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment, the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

NPPD requests \$10.871 million in M&A salaries and benefits dollars and an offset of \$11.941 million in program/contract dollars for 56 FTP/56 FTE as part of the FY 2013 and FY 2014 DHS Balanced Workforce Strategy.

FY 2014 DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding needed to hire Federal employees:
 - o \$2.396 million for 16 FTP/16 FTE.
- Amount of program/contract funding that will be terminated:
 - o \$3.466 million program/contract cost. There is a projected \$1.070 million cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.
- Implementation timeline:
 - o NPPD's FY 2014 Balanced Workforce Strategy will be implemented in FY 2014.
 - o Contractor functions will be reduced and positions will be converted in accordance with the Department's Balanced Workforce Initiative with a particular focus on contractors who are performing "nearly government inherent" responsibilities.
 - o Contractor reductions will be absorbed by the existing Federal Government employees and new FTE converted positions.

FY 2013 Annualized CR DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding needed to hire Federal employees:
 - o \$8.475 million for 40 FTP/40 FTE.

- Amount of program/contract funding that will be terminated:
 - o \$8.475 million program/contract cost. There is no projected cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.

- Implementation timeline:
 - o NPPD's FY 2013 Balanced Workforce Strategy will be implemented in FY 2013 and FY 2014, due to the FY 2013 Continuing Resolution.
 - o Contractor functions will be reduced and positions will be converted in accordance with the Department's Balanced Workforce Initiative with a particular focus on contractors who are performing "nearly government inherent" responsibilities.
 - o Contractor reductions will be absorbed by the existing Federal Government employees and new FTE converted positions.

BUDGET REQUEST AND SUPPORTING INFORMATION

National Protection & Programs Directorate Infrastructure Protection and Information Security

I. Appropriation Overview

A. Mission Statement for Infrastructure Protection and Information Security:

Infrastructure Protection and Information Security (IPIS) seeks to understand and manage risk from natural disasters, terrorist attacks, or other disasters to the Nation's critical infrastructure and key resources (CIKR).

Infrastructure Protection (IP) programs accomplish the IPIS mission by assisting security partners with identifying and mitigating vulnerabilities; increasing preparedness for facilities, systems, and surrounding communities; and assessing the impact of risk mitigation efforts.

IPIS also seeks to create a safe and secure cyber environment and promote cybersecurity knowledge and innovation by: enabling Federal departments and agencies to address cybersecurity challenges; partnering with the private sector, military, and intelligence communities to mitigate vulnerabilities and threats to information technology assets; and facilitating collaboration and partnerships on cyber issues with public and private sector partners.

Finally, IPIS is responsible for maintaining effective telecommunications for government users in national emergencies and for establishing policies and promoting solutions for interoperable communications at the Federal, State, and local levels.

B. Budget Activities:

Infrastructure Protection

Infrastructure Analysis and Planning – Infrastructure Analysis and Planning includes projects and activities that support the identification, prioritization, and protection of the Nation's CIKR, as well as the assessment of CIKR vulnerabilities, consequences, and risks. These activities provide a comprehensive inventory of the Nation's CIKR assets. The program collects vulnerability assessments and consequence information required to produce comprehensive asset and system risk assessments. These CIKR protection assessments enable the analysis of interdependencies and cascading effects. The program provides strategic coordination, capabilities analysis, and information sharing to public and private stakeholders, including local law enforcement agencies, to combat the improvised explosive device threat to the Homeland.

Sector Management and Governance – Sector Management and Governance projects and activities increase the ability of all levels of government and private sector partners to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. They support public awareness efforts, facilitate the sharing of CIKR protection-related best

practices and lessons learned, and enable infrastructure protection planning, readiness, and incident management. Sector Management and Governance is responsible for executing the National Infrastructure Protection Plan (NIPP) and coordinating the efforts of the 18 sectors to implement and execute their sector-specific plans.

Regional Field Operations – Regional Field Operations funds program areas, voluntary projects, and activities that enable security partners to: identify and mitigate vulnerabilities; implement protective measures and report on risk mitigation activities; and increase preparedness and resilience for facilities, systems, and surrounding communities. These activities foster information sharing and coordination between individual sector governance structures and facilitate the development of critical infrastructure partner governance and coordination structures.

Infrastructure Security Compliance – This funding supports regulatory activities that coordinate and manage of the Department’s regulatory authority over high-risk chemical facilities and ammonium nitrate.

Cybersecurity and Communications

Cybersecurity – Cybersecurity programs work collaboratively with public, private, and international entities to secure cyberspace and America’s cyber assets. Cybersecurity programs are comprised of the following PPAs:

Cybersecurity Coordination – The Cybersecurity Coordination program integrates information from the six federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the federal centers, an information system for online collaboration, and information technology (IT) support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the National Cybersecurity and Communications Integration Center (NCCIC) environment.

United States Computer Emergency Readiness Team (US-CERT) Operations – As the cybersecurity operational arm of Cybersecurity and Communications, US-CERT leads and coordinates efforts to improve the Nation’s cybersecurity posture, to promote cyber information sharing, and to manage cyber risks to the Nation. As part of that mission, US-CERT analyzes and mitigates cyber threats and vulnerabilities; disseminates cyber threat warning information; coordinates with partners and customers to achieve shared cyber situational awareness of the Nation’s cyber critical infrastructure; provides response and recovery support for national assets; and advises on national-level cybersecurity policy and guidance. US-CERT encompasses the activities that provide immediate customer support and incident response, including 24-hour support in the NCCIC.

Federal Network Security – Federal Network Security manages activities designed to enable Departments and agencies to secure their systems and networks. It provides a single, accountable focal point for achieving cyber infrastructure security and compliance throughout the Federal enterprise.

Network Security Deployment – Network Security Deployment manages the National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN. NCPS is an integrated intrusion detection, analytics, information sharing, and intrusion prevention system utilizing hardware, software, and other components to support DHS responsibilities within the Comprehensive National Cybersecurity Initiative (CNCI) mission.

Global Cybersecurity Management – Global Cyber Security Management provides and facilitates access to training and education for cybersecurity professionals. This includes developing a common approach for Federal cyber education and development and ensuring that education and training keeps pace with technological changes. Global Cybersecurity Management also supports academic centers to invigorate the pipeline of talented cybersecurity professionals available for current and future employment. Finally, the program works to manage risks from the global information and communications technology supply chain through awareness, policies, and standards and practices.

Critical Infrastructure Cyber Protection & Awareness – Critical Infrastructure Cyber Protection and Awareness collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber CIKR and promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues.

Business Operations – Business Operations ensures that NCSA has access to the appropriate resources to fulfill its mission. The program does so by resource and financial management, human capital activities, facilities management, performance management, policy development and implementation, information and personnel security, and strategic planning. The Business Operations program works to ensure these activities are integrated to sustain overall cybersecurity strategies, mission operational support, and short/long-term planning.

Communications – Communications programs provide mission-critical national security and emergency preparedness (NS/EP) telecommunications for Federal, State and local governments, and private industry. They also support and promote the ability of emergency responders and government officials to continue communicating in the event of natural disasters, acts of terrorism, or other man-made disasters, working to ensure, accelerate, and attain interoperable and operable emergency communications nationwide. Communications programs are comprised of the following PPAs:

Office of Emergency Communications (OEC) – OEC drives the development of emergency communications capabilities (operability, interoperability, and continuous communications) at all levels of government and across all public safety disciplines. To do so, OEC identifies and assesses interoperable emergency communications capabilities and drives Federal grants to meet emergency responder requirements and needs. OEC also engages with State, local, and tribal stakeholders to deliver targeted technical assistance and gather stakeholder input on policies, guidance, and initiatives. Additionally, OEC drives Federal emergency communications efficiencies through strategic planning, aligning grants, developing common investment and infrastructure planning approaches, representing Federal users on national-level policy and standards issues, and coordinates between domestic and international stakeholders along the borders.

Priority Telecommunications Services (PTS) – The PTS PPA leverages the Nation’s public telephone networks, including cellular systems, to enable voice communications for response and recovery coordination efforts and ensuring that essential government functions and operations are maintained during a disaster. PTS accomplishes this by maintaining services that provide NS/EP voice telecommunications for the government and its industry organizations during times when networks are congested or degraded. These services are the Government Emergency Telecommunications Service (GETS), the Wireless Priority Service (WPS), and the Special Routing Arrangement Service (SRAS).

Next Generation Network (NGN) – NGN will leverage Internet Protocol infrastructures to provide government and its industry organizations with NS/EP telecommunications during an emergency. It will supplement PTS services as commercial telecommunications carriers transition from circuit-switched infrastructures to Internet Protocol infrastructures. The NGN-Priority Services (PS) Program Office works with major carriers as they make the transition to deploy features enabling National Security/Emergency Preparedness priority service. Over the long term, the NGN-PS will deliver priority voice, video, and data communication services.

Programs to Study & Enhance Telecommunications (PSET) – PSET conducts technical studies and analyses for identifying and improving approaches to assist Federal entities in fulfilling NS/EP telecommunications objectives. PSET models and analyzes priority communications capabilities, assists the State Department in recommending national and international telecommunications standards for networks supporting NS/EP goals, and maintains and supports the implementation of policy to address minimum communication capabilities requirements for departments and agencies to continue operations during emergency or crisis situations.

Critical Infrastructure Protection Programs – The Critical Infrastructure Protection Program supports operations to assist in the initiation, coordination, restoration, and reconstitution of NS/EP telecommunications. This includes the operation, maintenance, and supporting activities of the National Coordinating Center for Telecommunications, a joint industry-government body to coordinate the response to NS/EP telecommunications incidents. Additionally, the program conducts analyses of telecommunications

capabilities in the aftermath of a disaster, training, and exercises to prepare to respond to disasters and other crises, and a regulatory, administrative, and operational system to authorize and provide priority treatment of NS/EP services after a disaster.

C. Budget Request Summary:

NPPD requests 1,444 FTP/1,373 FTE and \$1,201.994 million for FY 2014. The request includes the following program changes:

- **Information Sharing and Analytics.....\$43.9M (6 FTE)**
This program change provides an increase to plan and develop advanced information sharing capabilities and to procure additional commercial information sources on cyber threats to support the NCPS. The resources will allow DHS to plan and design a foundational set of information and collaboration tools that focus on the most pressing cybersecurity operational needs and improve the Department’s interaction and collaboration with key constituencies.

- **Control Systems Security.....\$5.1M (3 FTE)**
This program change will enhance the Department’s capability to assist control systems asset owners and operators in the areas of incident response, training, and additional tool development. The additional funding will increase the overall effectiveness of the Control Systems Security Program through additional assessments, on-site responses, increased malware analysis capacity, additional tool development, and advanced training opportunities.

- **Cybersecurity Operational and Strategic Analysis.....\$12.6M (10 FTE)**
This program change will enable the NCCIC to provide enhanced Operational and threat analysis through 14x5 operational and analytic support to respond to high-priority threats. The program change will also support enhancing Cybersecurity and Communications (CS&C)’s strategic cyber-threat analysis capabilities in the information and analyses realms to contribute to reducing malicious actors exploiting vulnerabilities.

- **Cyber International Engagement.....\$0.5M (2 FTE)**
This program change will support helping nations build their own capacity to address cybersecurity issues and expand and regularize U.S. cybersecurity initiatives. This includes identifying and/or creating opportunities to promote/conduct capacity building, training, and technical assistance; establishing/enhancing training programs and developing training materials. DHS seeks to build capacity in its competency areas, such as national capabilities for incident management, including computer security incident response teams; public/private partnerships; control systems security, and promoting awareness.

- **Intrusion Prevention.....\$134.8M (25 FTE)**
This program change provides an increase to support active network defense capabilities preventing or limiting malicious activities from penetrating federal networks and systems. The increase will allow Network Security Deployment to reach an accelerated E3A intrusion prevention Full Operational Capability (FOC) in FY 2015.

- **Infrastructure Protection Tools.....\$1.3M (0 FTE)**
 This program change will enable DHS to strategically consolidate a number of infrastructure protection tools in order to gain efficiencies and curtail duplicative efforts. The program change will allow DHS to expand the capabilities of the system supporting its tools and incorporate a building assessment tool into a single assessment methodology. The cost of the expansion is partially offset by the elimination of several standalone tools.
- **Multi-State Information Sharing and Analysis Center\$12.9M (0 FTE)**
 The FY 2014 President’s Budget provides an increase to support the Multi-State Information Sharing and Analysis Center (MS-ISAC). MS-ISAC a central point of coordination with NPPD and provides the opportunity to analyze information and correlation across its State, local, tribal, and territorial members, which then can be aggregated efficiently and shared with US-CERT, the NCCIC, and their public and private sector partners without requiring Federal personnel resources. MS-ISAC will use a consolidation of services for 50 States and 6 U.S. territories, to include hosting a 24x7x365 cybersecurity operations center, developing and rapidly distributing cybersecurity advisories and bulletins, and directly responding to and assisting MS-ISAC members with response to cyber incidents.
- **US-CERT Operations\$16.9M (23 FTE)**
 This program change will provide support to US-CERT Operations in order to keep pace with NCPS E3A deployment and continuous monitoring initiatives. Additionally, US-CERT will deploy staff to DHS’s site at Corry Station in Pensacola, Florida, in order to meet critical continuity of operations objectives, facilitate continued defense of the Federal networks, provide expanded capability to do malware analysis, and support cross-sector information sharing in the event of a major disaster impacting US-CERT’s operations based in the Washington, D.C. area.
- **Continuous Monitoring & Diagnostics\$165.9M (0 FTE)**
 This program change will provides hardware, software, and services, enabling continuous diagnostics, in support of the Administration’s Continuous Monitoring initiative, to strengthen the operational security posture of federal civilian networks. This includes directly supporting Federal Executive Branch civilian departments and agencies in implementing capabilities that will improve their cybersecurity posture in accordance with the Federal Information Security Management Act (FISMA), enabling improved continuous monitoring at departments and agencies, and supporting other critical and high priority cybersecurity capabilities to thwart advanced persistent threats in a dynamic threat environment.
- **Critical Infrastructure Cyber Protection and Awareness.....(\$1.0M) (0 FTE)**
 This program change will reduce the number of evaluations conducted by the Cyber Security Evaluation Program (CSEP). The change will also reduce the number of exercises conducted by the Cyber Exercise Program (CEP). This program was reduced in

order to provide additional funding for higher priority cybersecurity programs.

- **Cybersecurity Facilities(\$5.5M) (0 FTE)**
This reduction will postpone facility plans that address real estate requirements, security, and critical infrastructure issues. This was reduced in order to provide additional funding for higher priority cybersecurity programs.
- **Infrastructure Protection Outreach and Engagement.....(\$1.0M) (0 FTE)**
This program change represents a decrease to the Critical Information Partnerships and Information Sharing Project in outreach and stakeholder engagement activities to ensure the highest priority capabilities are fully funded to achieve core missions. DHS is currently working to strategically consolidate its stakeholder engagement efforts to gain efficiencies and curtail duplicative efforts by consolidating contract functions needed to support outreach efforts.
- **Defer Investment in Critical Infrastructure Technology and Analysis (CITA) Tools.....(\$2.6M) (0 FTE)**
This program change represents a reduction in non-personnel mission support funds to ensure the highest priority capabilities are fully funded to achieve core missions. The CITA project’s development of a services-based architecture to facilitate interoperability and information sharing will be delayed without compromising the project’s primary mission.
- **Incident Planning and Exercises (IPE).....(\$7.8M) (0 FTE)**
This program change eliminates IPE as a discrete project in order to provide additional funding for higher priority efforts and transfers the Federal staff to other IP projects where the activities performed under IPE will continue to operate.
- **National Initiative for Cybersecurity Education.....(\$4.8M) (0 FTE)**
This program change will reduce support to three National Initiative for Cybersecurity Education (NICE) efforts: the National Institute for Cybersecurity Studies (NICS); the Cybersecurity Training and Career Roadmap; and the Individual Competency & Tracking System. These efforts are intended to lead and coordinate efforts to improve the Nation’s cybersecurity education posture to ensure a robust, competent cybersecurity workforce. The reduction would also delay efforts to provide cybersecurity education to 1.7 million high school students. This program change makes resources available for other cybersecurity priorities.
- **Next Generation Networks.....(\$5.3M) (0 FTE)**
This program change reflects a reduction to NGN-PS. This program funds the planning and acquisition of technology to replace Priority Telecommunications Services voice services from circuit-based technology to internet protocol (IP)-based technology. The reduction will have a limited impact on the transition from circuit-based to IP-based technology. This program was reduced in order to provide additional funding for higher priority cybersecurity programs.

- Protective Security Advisors.....(\$0.3M) (0 FTE)**
 This program change will reduce geospatial analyst contract support to the Protective Security Advisors program. The Protective Security Advisor (PSA) project will still meet the most critical (Level 1 and Level 2) owners’ and operators’ requirements to receive recurring and ad hoc Geospatial Information System (GIS) materials, compile various types of geospatial information into map and data products, and analyze geospatial data from accumulated sources to respond to diverse questions in support of National Special Security Events (NSSEs) and other events, incidents, and vulnerability reduction/resilience.
- Sector Specific Agency (SSA) Management.....(\$2.0M) (0 FTE)**
 This program change will be applied to work with the Chemical, Commercial Facilities, Critical Manufacturing, Dams, Nuclear, and Emergency Services sectors, and the Interagency Security Committee. IP will reduce costs by shifting training to more inexpensive forums.
- Contract Reductions to Maintain Staffing Levels.....(\$13.9M) (0 FTE)**
 This program change decreases contract funding across the IPIS appropriation in order to maintain current staffing levels. Contract reductions will occur in infrastructure protection and communications programs.
- Unfilled Positions Reductions.....(\$0.5M) (5 FTE)**
 This program change represents a reduction in salary and benefit funds to ensure the highest priority capabilities are fully funded to achieve core missions. Position reductions will be taken in the Cybersecurity Evaluations program and the Business Operations program.

D. Efficiencies

Travel Efficiencies

\$6.260 million

- Travel Reduction (\$4.936 million) – This will be achieved by reducing travel that is not mission critical/essential.
- TDY Travel Reduction (\$1.324 million) – This will be achieved by reducing the number of temporary duty assignments.

Advisory and Assistance Services Efficiencies

\$14.772 million

- Office of Federal Procurement Policy (OFPP) (\$9.212 million) – This will be achieved by reducing the number of advisory and assistance services contracts as part of the OFPP-directed reduction.
- Contract Reductions (\$5.560 million) – This efficiency will be achieved by eliminating and/or reducing non-critical advisory and assistance services contracts.

Other Services Efficiencies

\$0.134 million

- Contract Reductions (\$0.134 million) – This efficiency will be achieved by eliminating and/or reducing non-critical services contracts.

Purchase from Government Accounts Efficiencies

\$2.790 million

- Spending for National Labs (\$1.493 million) – This savings will be achieved by reducing the number of and amount on contracts with national laboratories and Federally Funded Research and Development Centers as part of the OFPP-directed reduction.
- Purchase Reductions (\$1.297 million) – This efficiency will be achieved by eliminating and/or reducing non-critical purchases from other government accounts.

Operation and Maintenance of Equipment Efficiencies

\$2.000 million

- OFPP (\$1.000 million) – This efficiency will be achieved due to the reduction in cost for operations and maintenance as part of the OFPP-directed reduction.
- Contract Reductions (\$1.000 million) – This savings will be achieved by reducing spending on operations and maintenance for non-critical infrastructure protection tools.

III. Current Services Program Description by PPA

Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Infrastructure Analysis and Planning
Program Performance Justification
 (Dollars in Thousands)

PPA: Infrastructure Analysis and Planning

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	93	93	70,518
2014 Adjustments-to-Base	(4)	(8)	(3,433)
2014 Current Services	89	85	67,085
2014 Program Change	-	-	(9,110)
2014 Total Request	89	85	57,975
Total Change 2012 to 2014	(4)	(8)	(12,543)

DHS requests \$57.975 million for Infrastructure Analysis and Planning, including 89 FTP/85 FTE. This is a decrease of \$12.543 million and 4 FTP/8 FTE from FY 2012 and includes the following adjustments to base:

- Decrease of \$1.623 million and 4 FTP/4 FTE to centralize IP business support functions
- Decrease of \$0.277 million and 2 FTP/2 FTE for additional resources for the National Infrastructure Coordination Center
- Decrease of \$1.386 million and 10 FTP/10 FTE for the consolidation of exercise, training, and evaluation activities
- Increase of \$2.500 million from the Office of Cybersecurity & Communications for integrating cybersecurity and infrastructure analysis
- Increase of \$0.005 million for the shared services administrative funding transfer from DHS CAO
- Increase of \$0.088 million for the 2014 pay raise
- Increase of 12 FTP/12 FTE for Balanced Workforce conversions
- Decrease of 4 FTE due to FY 2012 attrition
- Decrease of \$2.740 million in efficiencies

Infrastructure Analysis and Planning facilitates the identification, prioritization, protection, and resilience of the Nation’s Critical Infrastructure, as well as the assessment of critical infrastructure risk. These projects provide a comprehensive inventory of the Nation’s Critical Infrastructure assets and collect vulnerability assessments and consequence information required to produce comprehensive asset and system risk assessments. These Critical Infrastructure protection assessments enable the analysis of interdependencies and cascading effects and increases partners’ understanding of risks, potential protective measures, and best practices. DHS is focused on improving the quality of risk information and providing a better understanding of interdependencies and dependencies which were areas for improvement identified in the 2011 National Annual Report.

Bombing Prevention (BP)

The BP Project leads and coordinates DHS efforts to enhance the Nation’s counter-improvised explosive device (C-IED) capabilities and reduce the threat of explosive attacks against critical

infrastructure. BP leads the Department's efforts to implement the National C-IED Strategy and coordinate national C-IED efforts.

The BP project enhances C-IED capabilities across the Nation through the following activities:

- Coordination of National and Intergovernmental Bombing Prevention Efforts: BP aligns DHS and national efforts through centralized and effective coordination of ongoing programs with national policy goals and recommends strategic adjustments based on understanding of global IED threats. Coordination and integration of national bombing prevention capabilities and programs is critical to effectively and efficiently reduce the risk of explosive attacks to critical infrastructure and the Nation. At the interagency level, BP leads DHS efforts in the development of the national policy for Countering Improvised Explosive Devices and serves as the Deputy Director of the Joint Program Office (JPO) for Countering IEDs, which coordinates the implementation of the national C-IED policy across DHS, the Department of Justice, the Department of Defense (DOD), the Department of State (DOS), and the Intelligence Community. At the Department level, BP chairs the DHS IED Working Group, which coordinates implementation of the national C-IED strategy among DHS Components with bombing prevention equities. At the State, local, tribal, and territorial (SLTT) level, the Project enhances bombing prevention capabilities by closing existing gaps in a jurisdiction's IED security architecture through assessments and subsequent activities targeted to developing robust Multi-Jurisdiction IED Security Plans (MJIEDSP). These efforts result in MJIEDSP vulnerability reduction and capability enhancements that optimize resources and mitigate the risk of IED attacks within a complex, multi-jurisdiction area. MJIEDSP is also a key component in the development of IED-relevant national prevention and protection plans within the National Planning System.
- Bombing Prevention Requirements, Capabilities, and Gap Analysis: BP systematically identifies and assesses the Nation's capabilities to counter IED threats and drive capability improvement through enhanced strategy, investment, and planning-based resource optimization. The National Capabilities Analysis Database (NCAD) is the single, authoritative data source on C-IED capabilities and readiness throughout the United States, with data collected from assessments of unit-level bomb squads, SWAT teams, explosives detection canine units, and public safety dive teams. NCAD information supports national-level preparedness policy and grant guidance, as well as state and local planning and resourcing efforts.
- Information Sharing and Bombing Prevention Awareness: BP increases stakeholder knowledge of IED threats, incidents, and their implications, along with C-IED principles, policies, and programs that increase capability and capacity to conduct critical functions of the C-IED strategy. BP provides numerous resources:
 - the Bomb-Making Materials Awareness Program (BMAP), developed in partnership with the FBI to educate law enforcement and private-sector suppliers on home-made explosives, suspicious purchasing behavior, and reporting suspicious activity;
 - specialized, SME-led IED Awareness & Risk Mitigation Training, which includes a series of courses designed for bomb technicians, law enforcement, first responders, and

- private sector security partners to enhance awareness of IED and strategies for detecting and mitigating vulnerabilities to explosive attacks;
- *TRIPwire*, DHS's secure, online network that combines expert analyses and reports with relevant documents, images, and videos to enhance awareness of terrorist IED tactics, techniques, and procedures to inform the law enforcement and bomb squad communities; and
- *TRIPwire* Community Gateway, which provides bombing prevention guidance specifically tailored for the private sector and the public.

Incident Planning and Exercises (IPE)

The IPE Project supports critical infrastructure partners through the writing, testing, and exercising of DHS incident management plans, policies, and procedures in accordance with the National Incident Management System (NIMS) and the Homeland Security Exercise and Evaluation Program (HSEEP). It also implements practices and accountability measures so that the mission of NPPD/IP can continue during incidents that affect the National Capital Region (NCR).

- Develop IP-wide Incident Management Plans and Standard Operating Procedures: This initiative forms the basis of the Contingency Planning Program. Established plans and procedures are necessary for an organization to have mature and repeatable processes that improve over time. The initiative directly supports cross-divisional coordination and collaboration with Federal Emergency Management Agency (FEMA) and other critical infrastructure partners. This initiative includes developing and maintaining DHS's incident management plans, supporting the development of national interagency plans, and improving internal DHS incident management processes.
- Coordinate the IP Exercise Program: This initiative includes DHS-sponsored exercises with critical infrastructure stakeholders across the homeland security enterprise via sector-specific and regionally focused exercises, as well as DHS's effective integration into the National Exercise Program's (NEP's) 2-year progressive exercise cycle, scheduled to formally begin in January 2013. It also supports Presidential Policy Directive (PPD)-8 and the Secretary's vision of an effective exercise program as "the cornerstone of our Nation's collective preparedness and resilience."
- Conduct After-Action Reviews of Exercises: This initiative aligns with the NEP Base Plan and HSEEP guidance for evaluation of exercises and real-world events. Utilizing the HSEEP-compliant Corrective Action Program System (CAPS), IPE ensures that issues identified in After-Action Reviews for exercises and real-world events are properly documented and that corrective actions are implemented when appropriate. This initiative is in direct alignment with higher level guidance, such as the NIMS Preparedness Cycle and HSEEP.
- Promote resilience and preparedness for continuity of essential missions: This initiative ensures DHS compliance with Homeland Security Presidential Directive (HSPD)-8 and Federal Continuity Directive requirements through Continuity of Operations and Business Continuity and Emergency Preparedness programs. Under this initiative, DHS also maintains continuity facilities and capabilities so that DHS's ability to carry out essential missions is not degraded in

the event of an incident disrupting operations in the NCR.

- Support Incident Management Activities: Under this initiative, DHS ensures that personnel are properly trained and equipped for staffing IP incident management positions in the IP Critical Infrastructure Crisis Action Team (CI-CAT), the DHS Operations Coordination and Planning Crisis Action Team (OPS-CAT), and FEMA's National Response Coordination Center. Providing NPPD/IP support to these incident management entities supports NPPD/IP's capability to execute operational activities in response to incidents and ensures coordination on issues impacting our Nation's critical infrastructure.

Infrastructure Sector Analysis (ISA)

The ISA Project provides strategic, operational, and tactical products and services to DHS and its partners. The ISA Project combines NPPD's risk analysis, including the expertise of Homeland Infrastructure Threat and Risk Analysis Center (HITRAC) in critical infrastructure analysis and prioritization, and the advanced modeling, simulation, and analysis work of the National Infrastructure Simulation and Analysis Center (NISAC). The proposal to consolidate an integrated analysis capability for analyzing risks to cyber and physical critical infrastructure and leveraging HITRAC/NISAC, is described further in NPPD Budget Addendum on creating the NPPD Office of Cyber and Infrastructure Analysis under a the new PPA. This section describes the ISA Project under existing authorities, and is an essential element of the implementation of the Presidential Policy Directive on Critical Infrastructure Security and Resilience (PPD-21) and the Executive Order on "Improving Critical Infrastructure Cybersecurity." The ISA Project includes an increase of \$2.5 million from CS&C for integrating cybersecurity and infrastructure analysis described under the Operational Analysis functional area.

ISA supports all of NPPD by analyzing threats, vulnerabilities, consequences, dependencies, interdependencies, and cascading effects from incidents to critical infrastructure. The successful execution of this helps NPPD and other leaders better understand potential impacts and inform risk decisions to improve security and resilience of the Nation's critical infrastructure.

Specifically, the ISA Project conducts operational and strategic analysis on incidents, threats, and emerging risks. ISA collates, assesses, and integrates vulnerability and consequence information with threat streams and hazard information to:

- Aid in prioritizing assets and managing risk to critical infrastructure;
- Anticipate interdependencies and cascading effects;
- Support the recommendation of security and resilience measures for critical infrastructure prior to, during, and after an event or incident; and
- Support incident management and restoration efforts related to critical infrastructure.

ISA supports DHS's ability to maintain and share a real-time situational awareness capability for critical infrastructure and support both NPPD operational centers, the National Infrastructure Coordinating Center (NICC) and the National Cybersecurity and Communications Integration Center (NCCIC), with real-time operational consequence analysis that includes actionable information about imminent threats, significant trends, and awareness of incidents that may affect critical infrastructure.

ISA provides infrastructure analytic products to DHS and its public-private sector partners. Current product lines include standardized risk assessment methodologies and tailored products for use by critical infrastructure owners and operators, and Federal, State, Local, Tribal, and Territorial government partners. These products identify and provide risk management options regarding vulnerabilities, consequences, and threats to critical infrastructure from both man-made and natural disasters and incidents.

ISA includes four primary capability areas: Prioritization, Operational Analysis, Modeling and Simulation, and Strategic Analysis. These capabilities are derived from mission needs and operational requirements. Each capability works in concert to provide models, products, and decision support analysis for a variety of NPPD, DHS, and external partners.

- Prioritization enables cross-functional national-level understanding of what systems and assets constitute critical infrastructure across 16 sectors. The three National Critical Infrastructure Prioritization Program (NCIPP) steady-state lists are the Level 1 and Level 2 lists for domestic assets and the Critical Foreign Dependencies Initiative for international assets. The ISA Project develops Infrastructure of Concern (IOC) lists during an incident or crisis action. The IOC lists are tailored to a location and potential critical infrastructure impacts (e.g., physical and economic) specific to a particular incident. The lists help in the prioritization of Federal, State, and local response and recovery activities as they relate to critical infrastructure.
- Operational Analysis identifies and characterizes potential impacts to specific critical infrastructure sectors as well as cross-sector consequences within an affected region or as impacted by a particular threat. In addition, the Operational Analysis function plans, prepares for, and manages crisis action activities by coordinating with partners, developing Standard Operating Procedures, conducting exercises, and managing the development of decision support products for DHS leadership and public-private sector critical infrastructure partners. The Operational Analysis responds during a threat or incident, identifying appropriate staffing, planning for shifts and rotations, managing Requests for Information and Assistance, and training and deploying liaisons to FEMA and other organizations as the situation warrants. The Operational Analysis function includes the Integrated Analysis Cell, which per PPD-21 will support the NICC and NCCIC by collating, assessing, and integrating vulnerability and consequence information with threat streams and hazard information to aid in prioritizing assets and managing risks to critical infrastructure, anticipate interdependencies and cascading impacts, recommend security and resilience measures for critical infrastructure prior to, during, and after an event or incident, and support incident management and restoration efforts related to critical infrastructure.
- Modeling and Simulation (M&S) builds and leverages unique capabilities of critical infrastructure modeling, simulation and analysis resources and capabilities of the NISAC to understand the impact and cascading effects of infrastructure failures and disruptions. M&S ensures that all analytical products are authoritative, valid, and standardized by developing and promulgating analytic tools, methodologies, and capabilities through the NISAC. NISAC conducts modeling, simulation and analysis for steady-state products, including in-depth

studies on critical infrastructure dependencies and interdependencies, and provides crisis action support for quick-turn analysis.

- Strategic Analysis assesses the likelihood and consequence of emerging and future risks to depict a holistic risk horizon for critical infrastructure across sectors and regions. This analysis identifies and provides risk management and mitigation options regarding vulnerabilities, consequences, and threats to critical infrastructure. For example, a National Risk Estimate would provide focused analysis of current and emerging critical infrastructure risks from a specific threat or event across a three to five year timeframe.

Infrastructure Sector Analysis is also receiving a transfer from US-CERT for integrating cybersecurity and infrastructure analysis. This funding will be used to support DHS's ability to maintain and share a real-time situational awareness capability for critical infrastructure and support both NPPD operational centers, the NICC and the NCCIC, with real-time operational consequence analysis that includes actionable information about imminent threats, significant trends, and awareness of incidents that may affect critical infrastructure. The funding will allow DHS to provide integrated cyber and physical infrastructure analytic products to DHS and its public-private sector partners.

Vulnerability Assessments (VA)

The VA project, in coordination with other projects across the Office of Infrastructure Protection, provides national leadership with the capability to identify infrastructure vulnerabilities and enhance security and resilience by developing and deploying a scalable assessment methodology, and tracking protective measures of other Federal, SLTT, and private-sector security partners. The VA project supports implementation of the NIPP by identifying vulnerabilities, supporting collaborative security planning, and recommending protective measures and risk mitigation strategies. These vulnerability assessments provide the foundation for DHS and critical infrastructure stakeholders' risk-informed implementation of protective programs designed to prevent, deter, and mitigate risk to infrastructure while enabling timely, efficient response and restoration in an all-hazards post-event situation.

The VA project includes the following efforts:

- Assess Critical Infrastructure Vulnerabilities: The VA project assesses the vulnerability of the Nation's critical infrastructure, with a focus on Level 1 and Level 2 critical infrastructure, through assessments such as Site Assistance Visits (SAVs) and new nuclear reactor security consultations. SAVs are voluntary, non-regulatory vulnerability assessments conducted onsite to enhance the protection of critical infrastructure assets and systems by identifying vulnerabilities and resilience gaps, while also providing options for consideration to mitigate identified gaps and vulnerabilities. DHS conducts site assistance visits in coordination with critical infrastructure owners and operators and other federal and SLTT government entities. In FY 2014, DHS plans to help SLTT and private sector partners identify and mitigate vulnerabilities, implement protective measures, strengthen resilience, and increase preparedness for facilities, systems, and surrounding communities by conducting approximately 180 voluntary vulnerability assessments. The VA project, in cooperation with the Nuclear Regulatory Commission (NRC), also analyzes potential vulnerabilities of proposed sites for new commercial nuclear reactors, as required under Section 657 of the Energy Policy

Act of 2005.

- Infrastructure Protection Reports Series: The VA Project provides Infrastructure Protection Reports Series (IPRS), a comprehensive series of reports that contains targeted information for stakeholders of critical infrastructure from all 16 sectors. With a focus on infrastructure characteristics and common vulnerabilities, potential indicators of terrorist activity, potential threats, and associated protective measures, the IPRS is available to vetted private sector critical infrastructure owners and operators with a clear need to know through the Homeland Security Information Network-Critical Sectors (HSIN-CS) (<https://cs.hsin.gov/>) online secure portal as well as to NPPD/IP's government partners through the IP Gateway.
- Assess Critical Infrastructure Resilience: The VA project's Regional Resiliency Assessment Program (RRAP) provides a regional analysis of the Nation's critical infrastructure within a geographical area. The RRAP is a cooperative, IP-led assessment of specific critical assets and a regional analysis of the surrounding infrastructure. In FY 2014, DHS will conduct ten tentatively planned RRAPs. The RRAP evaluates critical infrastructure on a regional level to examine vulnerabilities, threats, and potential consequences from an all-hazards perspective to identify dependencies, interdependencies, cascading effects, resilience characteristics, and gaps. Each RRAP lasts approximately 1 year and involves the close coordination and participation of Federal, SLTT, and private-sector partners. Critical infrastructure listed on the Level 1 and Level 2 lists is being analyzed to identify clusters that will benefit from a comprehensive regional assessment. While the PSA project leads the outreach and field activities of the RRAP, the VA project provides the majority of the support and analysis. The VA project also develops and oversees the production of the Resiliency Assessment, which is the RRAP deliverable to the State.
- Assess Critical Infrastructure Supporting Special Events: The VA project uses existing capabilities to assess critical infrastructure that supports NSSEs and Special Event Activity Rating (SEAR) events. These capabilities include Computer Based Assessment Tool (CBAT) imagery captures and SAVs. The CBAT system captures 360-degree spherical color video of facilities, routes, and other specific areas of interest and combines it with technical site-assessment data, structural schematics, and other relevant site data to create an interactive visual guide of any location. The VA project jointly conducts the CBAT with Federal and SLTT officials, along with critical infrastructure owners and operators, in support of vulnerability assessments, special events, and contingency operations.

Total Change 2012 to 2014	31	34	(13,742)

DHS requests \$60.477 million for Sector Management and Governance, including 201 FTP/174 FTE. This is a decrease of \$13.742 million and an increase of 31 FTP/34 FTE from FY 2012 and includes the following adjustments to base:

- Decrease of \$0.393 million to centralize IP business support functions
- Decrease of \$3.572 million and 3 FTP/3 FTE to consolidate geospatial analyst activities into the PSA Project
- Increase of \$3.963 million and 27 FTP/27 FTE for the consolidation of exercise, training, and evaluation activities
- Increase of \$0.013 million for the shared services administrative funding transfer from DHS CAO
- Increase of \$0.142 million for pay raise
- Increase of 3 FTE for filling FY 2012 vacancies
- Decrease of \$0.630 million and increase of 7 FTP/7 FTE for Balanced Workforce conversions
- Decrease of \$2.897 million in efficiencies

Sector Management and Governance increases the ability of all levels of government and private sector critical infrastructure partners to assess risks, coordinate programs and processes, and execute risk management programs and activities. These projects support the framework that governs the Nation’s approach to critical infrastructure protection and resilience providing cross-sector preparedness, public education, and academic engagement to support NIPP implementation. Sector Management and Governance also provides a strategic and coordinated approach for enterprise critical infrastructure data management and IT development and employs a governance structure that enables the secure sharing of critical infrastructure data and analysis with our partners.

Critical Infrastructure Technology and Architecture (CITA)

DS’s mission requires the use of information technology to collect, store, protect, and manage data concerning the Nation’s critical infrastructure. The CITA project provides a strategic and coordinated approach for enterprise data management and IT development at DHS and employs a governance structure that enables the secure sharing of DHS data and analysis with our partners to enhance their understanding of the Nation’s critical infrastructure. CITA centralizes technical services and data management activities within IP and implements the governance necessary to ensure interoperability and consistency with established DHS Enterprise Architecture standards.

The CITA project includes the following activities:

- Enterprise Architecture Governance: The Enterprise Architecture Governance initiative provides a framework to ensure that IT investments and projects across the IP enterprise are delivering desired outcomes and that IT investments align closely with business goals and

processes.

- Infrastructure Data Management: The Infrastructure Data Management initiative provides infrastructure data collection, management, storage, and protection to increase the usability and availability of infrastructure data for DHS and partners' mission needs.
- IT Systems Development: The Systems Development initiative provides consistency in the development of technical solutions that meet end user's requirements for IP's regulatory IT. The initiative limits duplication of effort in order to meet IP's mission in a cost effective and efficient manner. The System Development Section is primarily responsible for the build phase of a project, which includes Technical Project Management, Requirements Analysis, Systems Development, Testing and Integration, and Systems Documentation. Technical Project Management has the responsibility for the planning and execution of the technical activities during the development of technical solutions. Requirements Analysis encompasses the tasks that determine the needs or conditions to be met by the system. Systems Development includes the design and construction of the complete technical solution, both software and the underlying physical infrastructure. Systems Documentation includes the development of documented artifacts supporting the system, including training and user's manuals.
- IT Logistics Support: The Logistics Support initiative is responsible for the implementation, operation, and maintenance phases of a project, which includes Lifecycle Logistics and Customer Care support. Lifecycle Logistics is the planning, development, implementation, and management of a comprehensive, affordable, and effective systems support strategy. Customer Care is end-user support in regards to system specific training, system monitoring, and system health support.
- Information Security Office: The Information Security Office provides a single point for review, guidance, and approval for certification and accreditation of IP's regulatory and non-regulatory IT systems and applications to comply with Federal security standards.
- Project Management: The Project Management initiative provides strategic and capital investment planning; budget planning and execution; contract management and oversight; life cycle cost estimation; stakeholder relationship and communication management; development, implementation, and oversight of the project management strategy; oversight of performance management; and ensured compliance with Acquisition Directive 102-1 (Acquisition Project Management) through the execution of standard project management principles to control project cost, scope, schedule and performance.

Facilities

Facilities includes costs for all IP office spaces, such as IP's General Services Administration (GSA) rent and non-GSA facility items such as Heating, Ventilation, and Air Condition services, Federal Protective Service (FPS) guard services, building escort services, furniture, building renovations, Continuity of Operations (COOP) facility costs, utilities, building overtime engineering services, parking, and miscellaneous repairs. Facilities also develops and maintains IP facilities policies and processes that ensure appropriate and equitable work environment in order to effectively and

efficiently execute IP's mission. The Facilities project is responsible for the coordination of office moves and provides facilities planning, space management, and fleet oversight.

National Infrastructure Protection Plan (NIPP) Management

The NIPP Management project supports the framework that governs the Nation's approach to critical infrastructure protection and resilience. The project oversees NIPP implementation processes by reporting progress and measuring effectiveness across the SSAs, SLTT partners, and private-sector critical infrastructure owners and operators, as well as across NPPD/IP programs and activities.

The NIPP Management project actively engages critical infrastructure partners in making risk-informed decisions and achieving protection and resilience outcomes in accordance with the NIPP. Through the Critical Infrastructure Risk Management Enhancement Initiative (CIRMEI), the project has developed—and continues to refine—clear outcomes and metrics that inform resource allocation for DHS, the 16 critical sectors, and SLTT entities. In this way, CIRMEI drives an enhanced process for measuring progress and assessing the state of critical infrastructure protection and resilience efforts across the country through improved reporting and action-oriented planning to inform programmatic and resource-allocation decisions.

The NIPP Management project includes the following activities:

- Critical Infrastructure Protection and Resilience Policy Planning and Implementation: Provides critical infrastructure risk management planning, NIPP implementation support, and sector engagement and coordination capabilities and guidance to the 16 sectors, SLTT partners, and owners and operators.
- Critical Infrastructure Risk Management Reporting and Metrics: Provides critical infrastructure measurement and analysis support as well as national-level reporting requirements support to partners.
- Stakeholder Preparedness, Education, and Academic Engagement: Provides a framework for education and training to support implementation of the NIPP; includes development and delivery of cross-sector, Web-based and in-person preparedness and educational programs and supporting materials for critical infrastructure protection and resilience.
- Interagency Security Committee (ISC) Program Management Office (PMO): Has the responsibility for executing the ISC mandate to issue and monitor the implementation of standards to enhance the security of nonmilitary buildings and facilities in the United States occupied by federal employees and other personnel.

Sector-Specific Agency (SSA) Management

The SSA Management Project executes the DHS mission to lead the unified public-private sector effort to coordinate, develop, and implement comprehensive protection and resilience strategies for six critical infrastructure sectors (Chemical; Commercial Facilities; Critical Manufacturing; Dams; Emergency Services; and Nuclear Reactors, Materials, and Waste) and provides communication, coordination, and collaboration support for the 12 sectors whose programs are managed by other Federal agencies.

SSA Management executes this capability through strong partnerships with the private sector, academia, and all levels of government. The SSA Management Project executes its mission through five primary program areas: effective planning and project integration, education and training, information sharing and communication, exercises and incident management, and assessment and mitigation.

SSA Management includes the following activities:

- Planning and Project Integration: Effective planning and project integration enables the SSA Management Project to build and sustain partnerships both internal and external to DHS; to synchronize and communicate common objectives, responsibilities, and initiatives across the six NPPD/IP SSAs and the ISC PMO; to readily share relevant cross-sector information; and to better understand the security needs and requirements of sector partners.
- Education and Training: These activities help raise the security bar of critical infrastructure sectors and provide easy-to-use, accessible tools that enable sector partners to share best security practices across the entire range of critical infrastructure protection and resilience activities.
- Information Sharing and Communication: The foundation of effective critical infrastructure protection and resilience planning and program implementation is robust public-private partnership and information sharing. SSA Management has established strong partnerships with government and public-private-sector partners to ensure development of holistic and inclusive critical infrastructure security strategies that reflect sector needs and priorities.
- Exercises and Incident Management: The SSA Management Project works with DHS Components and sector partners to develop and participate in sector-specific, as well as national-level, cross-sector exercises. These initiatives assist the private sector in readiness by providing important avenues to test their state of preparedness, resilience, information-sharing processes, and best-practices sharing.
- Assessment and Mitigation: The SSA Management Project identifies sector-specific risks, and develops protective strategies to reduce those risks. This includes the development and implementation of sector risk self-assessment tools and security standards. In addition, thru the ISC, security standards and guidance for mitigation of risks associated with non-DOD and DOS federal facilities are developed.

The SSA Management Project prepares the IP-led sectors for responding to or recovering from all-hazards events. The private sector relies on the knowledge, skills, abilities, and tools provided through the SSA Management Project to enable it to be more prepared and more resilient. SSA Management measures its success by the number of partners trained, the number of partners who request products and tools, and the feedback received from partners on SSA Management-developed products and services.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<i>IP Gateway/Linking Encrypted Network System (LENS)</i>	The IP Gateway, formerly the LENS, is a secure portal and the infrastructure on which various NPPD/IP applications are hosted. The IP Gateway infrastructure facilitates interoperability and data sharing between the applications and their associated databases, and makes NPPD/IP IT more efficient by sharing bandwidth, hardware and software for all of the applications on it. It will facilitate ease of use by replacing multiple sign ons for users with single sign-on.	
0*	\$10,805	\$12,184

*Funding for IP Gateway/LENS was tracked as part of a consolidated CITA investment in FY 2012. Funding was not separately tracked for this project in that fiscal year.

Regional Field Operations builds a regional capacity across the sectors to secure critical infrastructure through the deploying of NPPD/IP products and services for the SLTT governments and the private sector partners. These Projects support the regional implementation of Infrastructure Analysis and Planning and Sector Management and Governance Projects, provide effective legal and policy-compliant structures and procedures for engagement within and among critical infrastructure public-private partnerships, and create a unifying information-sharing environment for the critical infrastructure community, from the national to the local level.

Critical Infrastructure Partnerships and Information Sharing

The Critical Infrastructure Partnerships and Information Sharing Project enhances critical infrastructure protection and resilience by building and sustaining a comprehensive network of stakeholder engagement structures and processes, through which critical infrastructure stakeholders coordinate and communicate within their communities and across sectors and geographic jurisdictions. The project provides effective legal and policy-compliant structure and procedures for engagement within and among critical infrastructure public-private partnerships and a unifying information-sharing environment for the stakeholder community, from the national to the local level.

The Critical Infrastructure Partnerships and Information Sharing Project support more than 120 sector partnership councils and working groups. Implementation and operations of the Critical Infrastructure Information Sharing Environment includes more than 40 stakeholder portals on the HSIN-CS, incorporating more than 12,000 information products. The project also includes the Private Sector Security Clearance Program coordination and compliance activities with the national Information Sharing Environment framework.

The Critical Infrastructure Partnerships and Information Sharing project includes the following activities:

- Critical Infrastructure Stakeholder Engagement Capabilities: Provides partnership council and regional forum operational support that includes logistical coordination and communication and the oversight of the regulatory and policy compliance framework under which these mechanisms must operate. This initiative also provides necessary analytical support to collect information on requirements; develop studies, reports, and action roadmaps; mediate and facilitate issue resolution; and provide an additional means of meaningful feedback to the Federal government on the efficacy of the partnership and progress in its role in achieving the critical infrastructure protection and resilience mission. Such support is particularly essential for the effective functioning of the National Infrastructure Advisory Council (NIAC) and the SLTT Government Coordinating Council.
- Critical Infrastructure Information Sharing: Implementation and operation of the Critical Infrastructure Information Sharing Environment, which includes the Critical Sector component of the Homeland Security Information Network, made available to all critical infrastructure owners and operators to access DHS sensitive information or by cyber and physical threats, vulnerabilities, and protective measures; policy development and planning elements of the Private Sector Clearance Program, which supports classified information sharing for both physical and cyber security activities, and information-sharing policy compliance with the requirements of the national Information Sharing Environment. In FY 2014, DHS will achieve outreach to 55,000 new critical infrastructure stakeholders, inclusive of all delivery mechanisms within the Critical Infrastructure Information Sharing Environment.
- Infrastructure Coordination, Analysis, and Integration: The Infrastructure Liaisons provide sector coordination, expertise, coordination with, partnership relationship management, and

mission integration with the Government Coordinating Councils, Sector Coordinating Councils and SSAs for the sectors external to DHS.

National Infrastructure Coordinating Center (NICC)

The NICC is the information and coordination hub of a national network dedicated to protecting critical infrastructure essential to the Nation's security, health and safety, and economic vitality. The NICC project consolidates, from a national perspective, reports regarding significant primary, secondary, and cascading impacts caused by operational degradation at critical infrastructure by maintaining a constant level of operational awareness of the Nation's critical infrastructure through ongoing contact with SSAs, other IP entities, and critical infrastructure private sector partners to include; Sector Coordinating Councils, Government Coordinating Councils, and private sector Information Sharing and Analysis Centers. The project also provides the structures necessary to maintain effective steady-state monitoring and incident-management information sharing for conditions and events that threaten the Nation's critical infrastructure. As the 24/7/365 operational component of IP and as the critical infrastructure functional element of the DHS National Operations Center (NOC), the NICC provides situational awareness and monitoring of incidents affecting critical infrastructure nationwide. This steady-state monitoring, alerting, and response planning enables a rapid transition to incident management in a crisis. The NICC is responsible for vetting, creating, disseminating, and tracking request for information (RFIs) and requests for action from internal and external critical infrastructure partners, enabling partners to address the most demanding restoration priorities and make the most informed decisions throughout a crisis.

The operational elements of the NICC project include:

- Maintaining and Sharing Critical Infrastructure Situational Awareness: As the critical infrastructure-focused element of the NOC, the NICC plays an integral role in the restoration of critical infrastructure after a catastrophic event, acting as the primary information hub for partners at the federal and SLTT levels of government. The NICC also acts as a crucial information resource for critical infrastructure owners and operators. During steady state, the NICC's key value to partners is its ability to rapidly assess an incident and quickly determine if a particular occurrence warrants further action by the critical infrastructure community. By maintaining a comprehensive information portal—HSIN-CS which ensures vetted critical infrastructure stakeholders have access to the most current and relevant reporting and products regarding an incident/event. This initiative supports a necessary need to exchange information with respect to National Coordinator Outcome Statement number seven.
- Operational Readiness, Training, and Exercises: This initiative supports all NICC activities related to maintaining and enhancing the readiness and preparedness posture of the NICC and DHS's incident response capabilities by maintaining and enhancing the NICC Watch and Warning, Critical Infrastructure Crisis Action Team (CI-CAT), and NPPD/IP's incident management responsibilities enabling risk-based decisions and recommendations to manage impacts to the Nation, by identifying and prioritizing critical infrastructure issues during incident response. It also supports PPD-8 and the Secretary's vision of an effective exercise program. Activities supported under this initiative include DHS-sponsored exercises with

partners across the homeland security enterprise via sector-specific and regionally focused exercises

- Operational Coordination: The NICC leverages the SSA Management partnerships to enhance operational information-sharing capabilities among federal, SLTT, and private-sector partners.

Protective Security Advisors (PSAs)

The PSA project's overarching mission is to proactively engage with SLTT government mission partners and members of the private sector stakeholder community to protect the Nation's critical infrastructure. PSAs are strategically deployed across the United States and provide the SLTT and private sector stakeholders with steady-state DHS risk-mitigation efforts and support response to all hazard incidents through field level coordination and information sharing as well as expertise on reconstituting critical infrastructure and surge capabilities to more effectively support threat-driven actions. They serve as onsite DHS critical infrastructure and vulnerability assessment specialists, while giving a local perspective to—and supporting the development of—the national risk picture by identifying, assessing, monitoring, and minimizing the risk to critical infrastructure at the State, local, and regional levels.

The PSA project includes the following activities:

- Security Surveys and Assessments: PSAs are responsible for planning, coordinating and leading critical infrastructure security survey and assessment activities in their respective districts. These include conducting Enhanced Critical Infrastructure Protection (ECIP) security surveys that employ the Infrastructure Survey Tool to generate Protective Measure Indices (PMI) that can be used to compare and contrast security preparedness aspects of similar facilities; working with the Vulnerability Assessment (VA) Project to coordinate SAVs, RRAP, and CBAT imagery captures. ECIP survey data and metrics support the findings and metrics of the National Annual Report (NAR), which contributes to the larger critical infrastructure Risk Management Enhancement Initiative (CIRMEI) to identify risks to the Nation's critical infrastructure.
- Outreach Activities: In support of the NIPP management framework, PSAs forge strong relationships with Federal, SLTT government mission partners and private sector stakeholders to enhance public/private collaborative efforts to protect critical infrastructure. The PSA project also provides support to projects and programs across DHS, such as cyber assessments from the Office of CS&C, training and products from the BP project, self assessments from the Sector Specific Agency Executive Management Office, the Private Sector Security Clearance Program, the Critical Infrastructure Information Sharing Environment through the HSIN-CS delivery to critical infrastructure owners/operators, in addition to many other tools and capabilities to critical infrastructure owners/operators and SLTT mission partners.
- Support to NSSEs and SEAR Events: PSAs provide support to officials responsible for planning and leading NSSEs and SEAR events. This includes providing expert knowledge of local critical infrastructure, participating in planning committees and exercises, conducting security surveys and assessments of event venues and supporting infrastructure, and

coordinating the development and delivery of geospatial products. DHS maintains authority and responsibility for the Geospatial Support Team.

- Incident Response: PSAs deploy, in response to natural or man-made incidents, to State and local Emergency Operations Centers (EOCs), and when appropriate, FEMA Regional Response Coordination Centers (RRCCs). PSAs provide situational awareness and facilitate information exchange to and from the field. During major incidents, and when designated by the Assistant Secretary of the Office of Infrastructure Protection, PSAs perform duties as Infrastructure Liaisons at Joint Field Offices (JFOs) or Unified Area Coordination Groups.
- Coordinate and Support Improvised Explosive Device Awareness and Risk Mitigation Training: PSAs work in conjunction with the BP Project to deliver IED preparedness strategies. PSAs collaborate with the BP Project to provide training products and services to SLTT partners to deter, detect, prevent, protect against, and respond to IED threats.

The ISC project has made the Nation safer by fostering infrastructure security planning that meets risk-based performance standards for high-risk chemical facilities, through the Chemical Facility Anti-Terrorism Standards (CFATS) regulatory program. In addition, the ISC project manages the proposed Ammonium Nitrate Security Program, which creates a proposed framework that would “regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.”

As directed by law, the Infrastructure Security Compliance project develops regulations, monitors regulatory compliance, conducts inspections, and performs outreach and communications activities. The two primary initiatives are the CFATS program and the Ammonium Nitrate Security Program.

The Infrastructure Security Compliance project was established in response to Section 550 of the FY 2007 Department of Homeland Security Appropriations Act which directed the Department to develop and adopt within six months a regulatory framework to address the security of chemical facilities that the Department determines pose high levels of risk. Specifically, Section 550(a) of the Act authorized the Department to adopt regulatory requirements for high-risk chemical facilities, to complete Security Vulnerability Assessments, develop Site Security Plans (SSPs), and implement protective measures necessary to meet risk-based performance standards established by the Department.

Consequently, the Department published an Interim Final Rule, known as CFATS, on April 9, 2007. Section 550, however, expressly exempts from the regulation certain facilities that are regulated under other federal statutes, specifically those regulated by the United States Coast Guard (USCG) pursuant to the Maritime Transportation Security Act (MTSA), drinking water and wastewater treatment facilities as defined by Section 1401 of the Safe Water Drinking Act and Section 212 of the Federal Water Pollution Control Act, facilities owned or operated by the Departments of Defense or Energy, and facilities subject to security regulation by the NRC.

The CFATS rule establishes enforceable risk-based performance standards (RBPS) for the security of our Nation’s chemical facilities. High-risk facilities have the flexibility to develop appropriate site-specific security measures that will effectively address risk by meeting these standards through SSPs or, if the facility so chooses, through Alternative Security Programs (ASPs). Infrastructure Security Compliance Division (ISCD) will analyze all final high-risk facility SSPs and ASPs to ensure they meet the applicable RBPS and will approve those that do. If necessary, ISCD will work with a facility to revise and resubmit an acceptable plan and can disapprove security plans if an acceptable plan is not submitted.

Implementation of the CFATS regulation requires the Department to identify which facilities it considers high-risk. ISCD developed the Chemical Security Assessment Tool (CSAT) to help the Department identify potentially high-risk facilities and to provide capabilities facilities can use to conduct SVAs and to develop SSPs. CSAT is a suite of online applications designed to facilitate compliance with the program; it includes user registration, the Top-Screen, an SVA tool, and an SSP template. CSAT is a secure system that can be accessed only by Chemical-terrorism Vulnerability Information (CVI) authorized users.

The Department continues to move forward with the Ammonium Nitrate Security Program's rulemaking process and expects to develop a final rule within a timeframe that ensures that DHS can consider and respond appropriately to issues and concerns raised during the public comment period and that enables DHS to comply with applicable federal rulemaking requirements and procedures. As the rulemaking process continues, the Department will properly plan and develop the information technology systems that will be necessary to support the proposed Ammonium Nitrate Security Program:

The Infrastructure Security Compliance project includes:

- Legislation Policy, Business Process Analysis & Development, and Regulation Communications: This initiative provides support for assessment of issues that affect CFATS implementation, communications, and new policy development, as well as the development of new regulations affecting the sale and transfer of ammonium nitrate. It also supports development of the information technology systems to meet the statutory and regulatory requirements of CFATS and the proposed Ammonium Nitrate Security Program. The initiative seeks to ensure that the public, federal and SLTT governments, private sector, and the regulated community are aware of the potential security risks associated with high-risk chemical facilities and ammonium nitrate, of their potential roles and mitigation measures regarding high-risk chemical facilities and ammonium nitrate, of CFATS regulatory requirements, and of proposed Ammonium Nitrate Security Program regulatory requirements. The initiative covers the on-boarding and training of staff in CFATS and proposed Ammonium Nitrate Security Program regulations, as well as inspection requirements.
- CFATS Regulation Compliance Determination: This initiative covers the review of facility documents to determine whether they fulfill regulatory requirements; the conduct of compliance assistance visits, authorization inspections and enforcement proceedings; and reporting on compliance, inspection, and enforcement progress. In FY 2014, DHS will complete authorization inspections at all remaining Tier 2 facilities with authorized or conditionally-authorized SSPs (orASPs), initiate authorization inspections of Tier 3 facilities with authorized or conditionally-authorized SSPs(orASPs), and initiate compliance inspections at Tier 1 facilities to ensure that they are fully complying with their approved SSPs.
- CFATS Technical Engineering: This initiative includes the development of methodologies for assessing risks, as well as identifying and evaluating security measures for categories of high-risk facilities using risk-based performance standards. This includes the CSAT, which will help the Department identify potentially high-risk facilities and to provide capabilities facilities can use to conduct SVAs and to develop SSPs. CSAT is a suite of online applications designed to facilitate compliance with the program; it includes user registration, the Top-Screen, an SVA tool, and an SSP template. CSAT is a secure system that can be accessed only by Chemical-terrorism Vulnerability Information (CVI) authorized users.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<i>Chemical Security Assessment Tool</i>	The Infrastructure Security Compliance Project has been implemented in response to Public Law 109-295, that provides DHS with the authority to regulate chemical facilities that present a high level of security risk. This investment provides for developing the Chemical Security Assessment Tool and the Chemical Security Management System collectively tagged “CSAT suite” (CSATs). It will include future development efforts addressing requirements resulting from: new regulation affecting the sale/purchase of Ammonium Nitrate, future Chemical Anti-terrorism Standards legislative changes, processes reengineering initiatives, and system migration to a DHS Data Center. This investment fills the gap of non-existing capabilities by providing for: the electronic submission of extensive facility data, controlled use of such data, inspection related and correspondence materials, and workflow processes.

2014 Total Request	14	14	4,338
Total Change 2012 to 2014	-	2	(142)

DHS requests \$4.338 million for Cybersecurity Coordination, including 14 FTP/14 FTE. This is a decrease of \$0.142 million and 2 FTE from FY 2012 and includes the following adjustments to base:

- Increase of \$0.001 million for the shared services administrative funding transfer from DHS CAO
- Increase of \$0.018 million for the 2014 pay raise
- Increase of 2 FTE for filling FY 2012 vacancies
- Decrease of \$0.181 million in efficiencies
- Increase of \$0.020 million due to the removal of one-time, non-recurring transfers

CURRENT SERVICES PROGRAM DESCRIPTION:

\$K	FY 2012 Rev EN			FY 2013 Ann CR			FY 2014 PBR		
	FTP	FTE	Total	FTP	FTE	Total	FTP	FTE	Total
Cybersecurity Coordination	14	12	4,480	14	14	4,500	14	14	4,338

Cybersecurity Coordination			2,020			2,040			1,860

The Cybersecurity Coordination program integrates information from the six federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities facilitating integration and other actions at the federal centers, an information system for online collaboration, and IT support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the National Cybersecurity and Communications Integration Center (NCCIC) environment.

Operational Analysis

FY 2014 Funding: \$3,338,000

The FY 2014 current services funding level will enable operational and threat analysis support on a 14x5 basis. The NCCIC will leverage US-CERT capabilities, the Industrial Control Systems Cyber Emergency Response Team (ICS-CERT), and the National Coordination Center (NCC), in the areas of cyber analytics; cybersecurity and communications infrastructure; indications and warnings; on-site fly away vulnerability assessments; collaboration and coordination; and cyber and communications incident response, to provide cohesive cyber incident response capabilities. The integrated capabilities will support Federal Government and private sector senior leadership with a fused operational picture combining intelligence and operations information into actionable products.

Strategic Threat Analysis

FY 2014 Funding: \$1,000,000

At the FY 2014 current services funding level, the NCCIC will continue limited strategic cyber-threat analysis on a 14x5 support basis, to reduce malicious actors exploiting vulnerabilities. Threat management decisions must incorporate cyber threats based on technological as well as non-technological factors, and consider varying levels of security required by different activities. NPPD will address this gap in strategic cybersecurity analytic capabilities through integrated NCCIC, US-CERT, Cybersecurity Evaluations, and Supply Chain Risk Management activities.

Total Change 2012 to 2014	60	100	23,520

DHS requests \$102.636 million for the US-CERT, including 225 FTP/218 FTE. This is an increase of \$23.520 million and 60 FTP/100 FTE from FY 2012 and includes the following adjustments to base:

- Decrease of \$2.500 million for the transfer to the Office of Infrastructure Protection for integrating cybersecurity and infrastructure analysis
- Increase of \$0.011 million for the shared services administrative funding transfer from DHS CAO
- Increase of \$0.150 million for the 2014 pay raise
- Increase of 32 FTE for filling FY 2012 vacancies
- Increase of 15 FTE for the annualization of prior year positions
- Decrease of \$1.600 million and increase of 20 FTP/20 FTE for the Balanced Workforce Initiative
- Decrease of \$2.025 million in efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

\$K	FY 2012 Rev EN			FY 2013 Ann CR			FY 2014 PBR		
	FTP	FTE	Total	FTP	FTE	Total	FTP	FTE	Total
US-CERT Operations	165	118	79,116	165	150	79,116	225	218	102,636
US-CERT Salaries & Benefits	165	118	20,056	165	150	20,056	225	218	29,449
Coordination & Integration			21,658			21,658			24,874
Operations			25,836			25,836			38,365
Technology & Readiness Planning			11,566			11,566			9,948

The US-CERT Operations is the operational arm of the NCSA. Its primary functions include analyzing and reducing cyber threats and vulnerabilities, disseminating cyber threat warning information to public and private sector partners, coordinating with government and industry partners to achieve shared cyber situational awareness of the Nation's cyber critical infrastructure, providing response and recovery support for national assets, and advising senior leadership on national-level cybersecurity policy and guidance.

US-CERT Operations improves national efforts to address threats and incidents affecting the Nation's critical information technology (IT) assets and cyber infrastructure and serves as a key component of the National Cyber Incident Response Plan (NCIRP). US-CERT Operations leads cross-sector efforts to improve the Nation's cybersecurity posture, coordinates cyber information sharing, and manages cyber risks to the Nation while protecting constitutional liberties. US-CERT Operations' mission space includes federal civilian agencies; the intelligence community; State, local and tribal governments; private sector partners; critical infrastructure owners and operators; international partners, as well as the public.

US-CERT Operations activities provide immediate customer support and incident response, including 24x7x365 support to the NCCIC, which has connectivity to all major federal cyber operations centers, industry, international, and communications partners. Its analysts examine raw and summarized data from a wide variety of information sources to make determinations about potential attacks detected by the NCPS. US-CERT Operations also maintains a 24x7 operations center that provides situational awareness and risk mitigation information and support to the Federal Government customers and the public.

US-CERT Operations is comprised of the following three activities:

- **Operations**: Identifies, triages, and analyzes cyber activity to rapidly develop and disseminate mitigation and risk management strategies. It also ensures DHS representation during operational planning and the planning and implementation of technology development programs. Operations consist of the three areas: Incident Management, Detection and Analysis, and Digital Analytics.
- **Coordination and Integration**: Builds and manages trusted relationships to share information and coordinate with constituents to facilitate shared situational awareness and better protect assets against cyber threats.
- **Technology and Readiness Planning**: Develops plans, processes, and technology requirements to advance US-CERT Operations towards its strategic vision and ensure US-CERT matures in a coordinated and strategic fashion in response to a dynamic operational environment. It also manages and coordinates organizational resources critical to increasing US-CERT Operations' mission responsibilities

In FY 2014, US-CERT will leverage automated information delivery of feedback information (i.e. EINSTEIN 3 Accelerated data (E³A)). This data, when used in conjunction with current EINSTEIN 1, and EINSTEIN 2 data, will enable US-CERT to identify, triage, and analyze cyber activity, and rapidly develop and disseminate mitigation and risk management strategies. Analysts' workload will increase

in FY 2014, as E³A provides more information for the analysts to process. Within FY 2014 current service funding levels, annualization of positions will serve to partially ensure that US-CERT's analytical information is shared promptly across the Federal Government.

In FY 2014, US-CERT Operations' priorities will be:

1. Add new/unique Government protection capabilities to augment managed security services for all departments and agencies.
2. Maintain current protection measures.
3. Leverage automated delivery of E³A data augmented.
4. Leverage classified Intrusion Detection System (IDS) signatures/indicators to detect malicious network activity.
5. Support additional operational requirements, data, and volume sources from the Continuous Diagnostic and Mitigation, Enhanced Cybersecurity Services (ECS), and Cybersecurity Information Sharing and Collaboration (CISCP) programs.

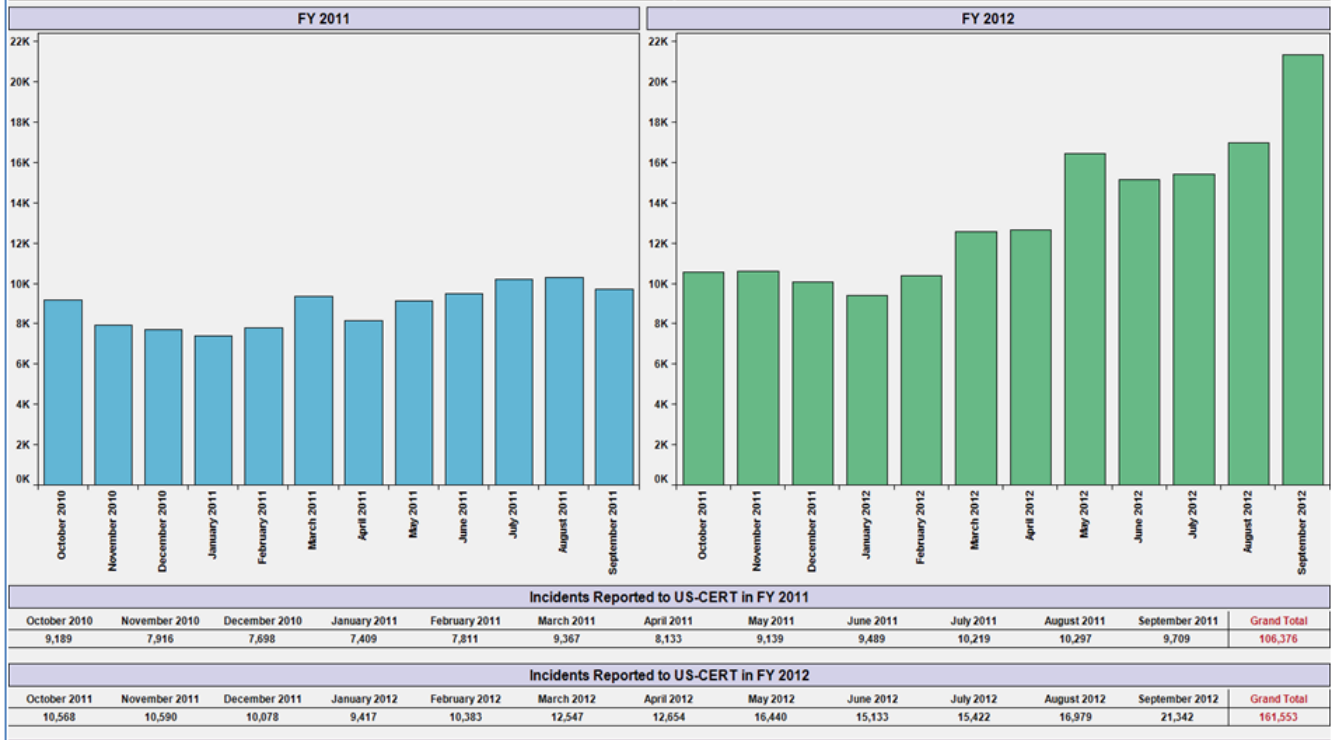

US-CERT will incorporate countermeasure data into US-CERT analysis only when; 1) the data is relevant to a specific cyber threat; and 2) an IDS signature/indicator signals that the information is a match to a known or suspected cyber threat.

US-CERT will also transfer funds to the Office of Infrastructure Protection for integrating cybersecurity and infrastructure analysis. This funding will be used to support DHS's ability to maintain and share a real-time situational awareness capability for critical infrastructure and support both NPPD operational centers, the NICC and the NCCIC, with real-time operational consequence analysis that includes actionable information about imminent threats, significant trends, and awareness of incidents that may affect critical infrastructure. The funding will allow DHS to provide integrated cyber and physical infrastructure analytic products to DHS and its public-private sector partners.

Incident Patterns:

The chart below illustrates incidents reported to US-CERT from FY 2011 to FY 2012. In FY 2011, US-CERT received a total of 106,376 reports. Approximately 43,000 of those were Federal incidents and approximately 55,000 were reported phishing incidents. In FY 2012, US-CERT received over 161,000 incidents. That is a 52% increase from last fiscal year.

Total Incidents Reported to US-CERT

Federal Network Security (FNS) serves as the single, accountable focal point for achieving cyber infrastructure security and compliance throughout the federal enterprise. Overall, the activities within FNS will work collaboratively to more effectively execute its mission in two key areas:

1. On-site Agency compliance assessments to improve FNS' analytical and reporting capabilities, which will also allow FNS to address the increased implementation of Continuous Monitoring and Diagnostics capabilities within departments and agencies.
2. Obtaining the quantity and quality of data necessary to definitively understand agency critical needs for Continuous Monitoring and Diagnostics, and address organizational threats, vulnerabilities, and risks, thereby allowing DHS and its partner agencies to make deliberative and measurable improvements in securing agency networks and the federal enterprise. The above are crucial activities to FNS ensuring and measuring compliance with the Federal Information Security Management Act (FISMA) and guidance outlined in Office of Management and Budget (OMB) M-10-15 and M-10-28.

Cybersecurity Performance Management (CPM): Provides operational support to federal departments and agencies in securing federal information systems, consistent with the implementation of OMB M-10-15, M-10-28, and subsequent memoranda and directives relative to evolving federal cybersecurity requirements.

CPM executes DHS FISMA responsibilities by drafting the annual FISMA report to congress for OMB review, conducting Chief Information Officer/Chief Information Security Officer (CIO/CISO) interviews with agencies, and developing updated quarterly and annual FISMA metrics, including the Office of the Inspector General's (OIG) measures. Further, CPM assesses the effectiveness of federal civilian agency's security programs and tracking the civilian Federal Executive Branch's progress affecting improvement against the enterprise cybersecurity baseline established in FY 2011. CPM also addresses any identified solution gaps to provide federal agencies clear guidance for migrating existing infrastructure and implementing new capabilities in a manner consistent with the overall federal security strategy.

CPM provides analysis of government-wide agency program reviews, which consist of an analysis of federal department and agency's information security profiles. These provide insight into the posture and maturity of federal department and agency's information security programs.

CPM measures an agency's security capability through metrics it collects via CyberScope from the each agency's CIO and OIG. Annually, CPM reviews, refines, and, if necessary, creates new security metrics measuring performance and identifying cyber risks across the Federal enterprise. CPM provides input to agency-specific and enterprise-wide cybersecurity posture assessments from data analysis of quarterly and annual FISMA reports; automated data feeds such as, Cybersecurity Compliance Validations; OIG US-CERT data agency-submitted action plans; Trusted Internet Connections (TIC) Plan of Action and Milestones; and agency CIO FISMA interviews.

CPM conducts CyberStat reviews, at the direction of the Executive Office of the President's National Security Staff and OMB; by coordinating high-level meetings with agencies selected from the 24 Chief Financial Officers (CFO) Act agencies, to address negative high risk FISMA results. These meetings

provide the agencies information and assistance enabling them to take remedial action and improve their security posture. For agencies not receiving a CyberStat Review, CPM is responsible for conducting FISMA interviews with the agency CIOs, CISOs. These reviews focus on threats and security issues specific to the respective agency and on fostering a partnership for improving the Federal security posture. The discussions center on unique security challenges to the agency's mission priorities based on risks, needs, and capabilities.

CPM will utilize the requested FY 2014 funding to further the following key initiatives:

- Compile input for the annual FISMA report to Congress to serve as the initial drafts of agencies' OMB congressional reports. The FISMA report captures the current state of the cybersecurity posture of the federal civilian agencies, as well as cybersecurity progress made during the previous fiscal year.
- Conduct recurring, quarterly and annual department and agency analysis and comparing year-over-year performance results to the baseline. This shows authorizing officials more complete, reliable and trustworthy information; thus facilitating more informed security authorization decisions.
- Continue developing and enhancing the Federal Cybersecurity Maturity Roadmap (FCMR) for departments and agencies, based on existing regulations, standards, and best security practices. This further enhances FISMA implementation through a risk-based approach coupled with a means of measuring the integrity of department and agencies' information security programs.
- Conduct and coordinate annual CyberStat reviews and agency CIO/CISO interviews to assist federal civilian agencies in implementing key strategic enterprise cybersecurity capabilities.
- Continue to refine and develop CyberScope FISMA metrics collected from each agency's CIO and OIG to measure performance and identify cyber risks across the Federal enterprise.

Cybersecurity Assurance Program (CAP): Addresses DHS's responsibilities to certify and enforce Federal and civilian agency implementation of network and security operational standards and best practices, ensure agencies comply with federal standards and policies, and assess the state of operational readiness and cybersecurity risk for unclassified networks and systems across Federal Executive Branch civilian agencies.

CAP engages with departments and agencies to improve their cybersecurity posture by assessing capabilities; identifying vulnerabilities; evaluating risks; and providing prioritized guidance optimizing remediation activities to close capability gaps, limit exposure, reduce exploitation, and increase the speed and effectiveness of cyber-attack responses.

CAP engages in three crucial activities providing access to specialized skills and services; promoting a healthy, secure and resilient IT infrastructure across the Federal government; measuring mandatory

cybersecurity capabilities implementation; and providing an enterprise view of the Federal government's cybersecurity posture.

- **Cybersecurity Capability Validation (“CCV”)** assessments are conducted to assess and validate each agencies' implementation of technical (tools and technologies) and operational (people, processes, security program maturity) cybersecurity capabilities required by Federal laws, policies, and initiatives. CCV assessments incorporate document reviews, staff interviews, operational observations, and direct testing (when possible) to provide an objective, repeatable, and consistent methodology ensuring fairness, and facilitating government-wide trending and analysis.
- **Risk and Vulnerability Assessments (“RVA”)** combine national threat and vulnerability information with data collected through on-site assessment activities to provide agency specific risk analysis reports with actionable remediation recommendations prioritized by risk. Service capabilities include network (wired and wireless) mapping and system characterization; vulnerability scanning and validation; threat identification and evaluation; social engineering; application, database, and operating system configuration review; and incident response testing.
- **Cyber Hygiene** activities assess Internet accessible federal unclassified civilian systems for known vulnerabilities and configuration errors on a recurring basis. CAP works with impacted agencies to mitigate risks prior to their exploitation as potential issues are identified.

CAP is the only centralized federal civilian program proactively engaging with agencies to provide information and services helping them prepare for and prevent cyber incidents, mitigating risks, and continuously improving their cybersecurity capabilities. CAP's services and activities improve the cybersecurity posture of the Federal Government, reduce risk, and achieve significant government-wide cost avoidance through enhanced prevention and decreased incident recovery expenditures. Analysis of the data collected through CAP activities aids policymakers and federal departments and agencies in developing sound security and risk mitigation strategies.

CAP will utilize the requested FY 2014 funding to conduct between 26 – 30 CCV assessments, and 26 – 30 RVA of selected civilian departments and agencies. Additionally, CAP will provide stakeholders with prioritized access to agency assessments from the CFO Act, and Trusted Internet Connection Access Provider (TICAP) agencies impacted by cyber incidents requiring post-incident strategic remediation support. Stakeholders include individual agencies and departments receiving a distinct report detailing their findings and recommendations, as well as policy makers and the cyber community having access to aggregated reports not attributable to any agency.

CAP will also conduct recurring, Cyber Hygiene vulnerability scans, and configuration reviews of Internet accessible federal systems on a monthly basis. CAP will communicate findings to affected departments and agencies; working with them to mitigate publicly exploitable vulnerabilities. Affected departments and agencies will receive a distinct report detailing their findings and recommendations. In addition, policy makers include those in the commercial cyber community having access to aggregated reports not attributable to any department and agency.

CAP will produce annual enterprise-level reports and white papers detailing the Federal Government's cybersecurity posture, information security trends and challenges, and remediation suggestions for short and long term mitigation activities, based on NCSD-wide data sets (i.e., US-CERT incident data, NCPS data, FNS assessment data, and agency FISMA submissions). CAP will provide these enterprise-level reports and white papers to stakeholders, including policy makers and the cyber community members such as: State and local governments, the Intelligence Community, the Department of Defense, software/hardware vendors, and academic institutions.

Network and Infrastructure Security (N&IS): Lead the Comprehensive National Cybersecurity Initiative (CNCI)/TIC Initiative with OMB. It will optimize network security capabilities into a common solution for the federal information enterprise and facilitate reducing and consolidating external connections, including Internet points of presence, through approved access points.

Reducing and consolidating external access points affords a number of benefits to the Federal government, particularly when coupled with risk mitigation and added security measures. Among the benefits are identifiable locations for EINSTEIN 2 intrusion detection system sensor deployments, as well as a series of critical security capabilities that agencies must establish for TIC-compliance.

While OMB maintains oversight of the TIC Initiative, implementation will rely on the technical expertise of N&IS, who will synchronize the efforts of all participating Federal partners. N&IS will also monitor and oversee Federal partners' TICAP transition, managing their baseline information systems security capabilities required under the TIC Initiative.

N&IS will provide individualized cybersecurity support to micro-agencies (i.e., agencies with less than 125 staff). Micro-agencies often lack the full-time IT security staff and expertise requisite to completing strategic cybersecurity initiatives on their own. A shared cadre of specialists will work with the smallest agencies on strategic cybersecurity initiatives. Support will include assistance developing appropriate policies; preparing technical solutions satisfying mandates or directives; validating solutions meet specific agency mission requirements; and coordinating with budget planners for each organization. Micro-agency support will not include day-to-day IT operations.

N&IS will utilize focused, short (3 – 6 month) inter-agency teams to develop government-wide reference architectures for individual cybersecurity initiatives, track agency TIC progress, coordinate inter-agency agreements for TIC services with GSA, and stand up a small cadre of cybersecurity experts to work collaboratively with small and micro-agencies.

N&IS will also track performance against the following series of measures and deliverable milestones:

- Approving of TIC Reference Architecture v2.0, communicating with federal civilian agencies and implementing new capabilities;
- Tracking TIC performance of agencies;
- Preparing 4 reference architectures;
- Ensuring TICAP agencies' technical compliance with TIC critical capabilities;
- Ensuring TICAP agencies' connection/traffic consolidation; and
- Seek service agencies' connection/traffic consolidation.

Network & Infrastructure Security will utilize the requested FY 2014 funding to advance the following key initiatives:

1. Developing three technical reference architectures – a cross-agency effort to develop practical, implementable, schematic designs for common information security functions. By sharing best agency designs and lessons learned across the Federal executive branch, agencies can reduce costs and improve their cybersecurity by not re-inventing technical reference architectures.
2. Identifying common cybersecurity requirements across agencies, enabling DHS to help save agencies money conducting and sharing market research in areas identified as critical by agency CISOs. N&IS will also produce cybersecurity market research white papers (i.e. data protection, data loss prevention).
3. Providing a small cadre of cybersecurity specialists dedicated to assisting small and micro-agencies, allowing DHS to improve its mission by helping small and micro-agencies respond to government-wide cybersecurity policies and directives. N&IS will also develop small and micro-agency specific cybersecurity strategies and implementation guidance.

Requirements and Acquisition Support (RAS): Supervises the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all agencies. RAS works to assess and prioritize common cybersecurity needs and solutions; promote actionable cybersecurity policies, initiatives, standards, and guidelines; enable implementing cybersecurity risk mitigation strategies; and measure agency strategies and compliance implementation.

More specifically, RAS delivers strategic sourcing solutions enabling government-wide cost savings for IT security products and services. It also oversees and monitors the Information Systems Security Line of Business (ISSLOB) Shared Service Center (SSC) performance, manages the daily operations of the ISSLOB Program Management Office (PMO), and collaborates with other national cybersecurity and FNS programs to assess and maintain the Federal government's strategic cybersecurity plan.

As the PMO for the ISSLOB, RAS identifies information systems security solutions that reduce costs through shared services; eliminate duplication; and increase specialized expertise, freeing up resources for mission-specific requirements and other tailored security requirements. RAS initiates strategic sourcing efforts for investments in security solutions, commoditized technologies, and processes, through cross-agency collaboration.

RAS also monitors federal cybersecurity policies implemented by federal partners, providing coordination, guidance, and progression tracking, creating an environment of improved protection for federal information systems from unauthorized access, use, disclosure, disruption, modification, or destruction. RAS will also build and provide Federal departments and agencies access to five FNS risk management training modules housed in a FNS risk management resource library or website.

Additionally, RAS sponsors strategic sourcing and requirement development activities to identify and pursue strategic information security product and service acquisitions. Further, RAS supervises updating and maintaining the federal knowledge repository of information security technologies, tools, and services established in FY 2011. It also maintains and updates the Federal Cyber Resiliency Model and assessment methodology and supporting tools, while developing performance metrics for cybersecurity risk management.

RAS will utilize the requested FY 2014 funds to achieve \$15 million in annual cost savings Government-wide by using ISSLOB Blanket Purchase Agreements (BPAs) or SSCs. The ISSLOB BPAs are an efficient way of providing security solutions using specific tools and services. The main beneficiaries of such savings are federal, state, local, and tribal entities. These cost savings are achieved through the reduced acquisition cycle and ability to further negotiate pre-existing GSA schedule prices. The solutions are then vetted based on requirements gathered across the Government to meet the needs of end-users, who facilitate two ISSLOB BPAs or SSCs within FY 2014.

Network Security Deployment (NSD) will use the FY 2014 full funding request to sustain currently deployed capabilities and expand intrusion prevention, and information sharing and analytics capabilities of the NCPS. Expanding upon NCPS's existing capabilities is a critical element in the shift from a passive to active role in cyber defense and the delivery of enterprise cybersecurity services to decision-makers across cybersecurity communities.

CS&C is responsible for enhancing the protection of federal civilian departments' and agencies' information technology (IT) infrastructure from cyber threats. To achieve this mission, NSD develops, deploys, and sustains the NCPS, operationally known as EINSTEIN. NCPS is an integrated system delivering intrusion detection, analytics, intrusion prevention, and information sharing capabilities to public and private stakeholder groups across the Homeland Security Enterprise.

In 2009, NSD began deploying EINSTEIN 2, which passively collects network flow traffic to and from participating federal executive agencies' networks, and provides intrusion detection that alerts when pre-defined specific cyber threats are detected. EINSTEIN 2's network intrusion detection capability uses signatures¹ derived from numerous sources such as commercial or public computer security information, incidents reported to US-CERT, information from federal partners, and independent US-CERT in-depth analysis.

NCPS's analytic capabilities capture, organize, and analyze data collected from EINSTEIN sensors and other data feeds. These capabilities enable US-CERT to fuse information, correlate malicious network activities across participating Federal Executive Branch agencies to achieve situational awareness of high profile cyber threats. US-CERT shares situational awareness about current and potential cybersecurity threats and vulnerabilities with Federal, State, and local governments and agencies; private sector partners and infrastructure owners and operators; and the public.

Keeping pace with the ever-changing nature of cyber threats poses technological as well as financial challenges. To address these challenges, NSD seeks to ensure currently deployed NCPS technology remains relevant and reliable, while developing valuable new services for a broad cybersecurity community. The FY 2014 NSD funding request reflects this strategy by focusing on four key program elements:

1. Sustaining deployed capabilities;
2. Expanding active defense;
3. Providing enterprise services;
4. Adopting tactical engineering and acquisition approaches.

Sustaining Deployed Capabilities

In FY 2014, NSD will sustain the operational elements of NCPS, including detection, analytics, and significant core infrastructure. NSD delivers EINSTEIN 2 services directly to federal department and agencies through TICAPs or through ISPs at Managed Trusted Internet Protocol Service (MTIPS) locations. As of February 2013, NSD has deployed 83 data collectors and 68 EINSTEIN 2 sensors across 17 Federal departments and agencies and 4 MTIPS providers.

¹Signatures are specific machine readable patterns of network traffic that affect the integrity, confidentiality, or availability of computer networks, systems, and information. For example, a specific signature might identify a known computer virus that is designed to delete files from a computer without authorization.

EINSTEIN sensors and NCPS are supported by extensive IT and capital infrastructure. The Mission Operating Environment (MOE) is a dedicated IT network environment that hosts NCPS intrusion detection, intrusion prevention, analysis, and information sharing capabilities. The MOE serves as the foundational infrastructure for the NCPS, including those exclusive communications tools and operating system used by US-CERT to conduct its daily operations.²

All data collected from the EINSTEIN sensors is stored and accessed on this dedicated network, which does not directly connect to any DHS networks, to protect the Department from harm resulting from potentially malicious data. The MOE allows NSD and US-CERT analysts to securely access, share, and analyze NCPS data. EINSTEIN sensors and the MOE are administered at the 50,000 square foot NCPS Operations and Service Center facility. This facility houses a majority of NCPS's operations support. NSD also maintains a significant communications infrastructure that connects the NCPS Operations Center with DHS Data Centers and headquarters' facilities in the Washington, D.C. area.

NSD maintains NCPS to meet an operational system availability of 99.5 percent. Achieving this standard requires significant operations support; maintenance of hardware and software and technical refresh of both primary and redundant system locations.

- *Operations.* The mission critical nature of the NCPS requires system and network administrators to be available 24x7x365. Help Desk professionals are located on-site at the NCPS Operations and Service Center and perform hourly physical system checks and visual inspections, taking users' calls, isolating problems using standard troubleshooting procedures, opening trouble tickets, and forwarding trouble tickets to system administrators that administer fielded equipment on-site and remotely.
- *Hardware and Software Maintenance.* As NCPS hardware fails it is replaced with spares or through vendor warranty agreements. Replacement components are shipped as soon as possible to reduce potential system downtime.³ Some software for deployed systems, such as antivirus products, is purchased on the software support model with an annual renewal.
- *Technology Refresh.* Current network hardware is on a three-year refresh cycle, based on industry best practices. System overhaul, upgrade, or migration is considered to address the pace of innovation, technology advancement, and IT obsolescence- particularly in the area of cybersecurity.
- *Redundancy.* NSD utilizes the two DHS Data Centers to provide redundancy for NCPS's critical systems. Deployment to both Data Centers provides complete failover capability, which allows continued operations in the event of a system or catastrophic failure at one data center, or while a data center site is undergoing a technology refresh.

Expanding Active Defense

Currently deployed EINSTEIN 2 technology is passive – it monitors federal network traffic and allows DHS to analyze Federal Executive Branch traffic and detect malicious traffic. In 2010, NSD began planning for an intrusion prevention capability complementary to EINSTEIN 2. The FY 2013 request

² As the system developer and operator, NSD also uses the MOE to provide user support to US-CERT and to deploy and maintain NCPS capabilities.

³ The NCPS Program Office provides maintenance and supply chain services directly to the Data Centers.

supports deployment of an initial operational capability known as E³A; the FY 2014 request expands this capability. With the adoptions of E³A, DHS will assume an active role in defending .gov network traffic and significantly reduce the threat vectors available to malicious actors seeking to harm federal networks.

Once fully deployed, E³A will leverage the latest available information from commercial and government sources to apply in-line protection measures to a wide set of federal network traffic protocols. When a signature alerts on a known or suspected cyber threat, E³A will act on that threat to stop malicious traffic and prevent harm to the intended targets.

Providing Enterprise Services

DHS is in a unique position to coordinate an aggregated, national-level cyber situational awareness view to a broad set of cybersecurity stakeholders. Today, the NCPS consists of technological solutions for incident detection and collecting and analyzing information largely driven by the needs of US-CERT. In addition, the NCPS capacity to share US-CERT analysis with decision makers and stakeholders is limited and highly manual. Going forward, NSD will focus on working with Federal partners to enhance and expand cybersecurity enterprise services, access to information, and analytic capabilities to a broader set of stakeholders, including constituencies within the federal government, State and local authorities, and the private sector. The goal of this system will be to “connect the dots” in identifying cybersecurity threats by making relevant pieces of information easily accessible to those who need it, regardless of where they are in the government: within the constraints of policy and law.

In FY 2014, NSD will expand its development of secure mechanisms for the cyber community. These mechanisms will provide DHS with cyber-related data from the community, and community members will receive back trusted high-confidence information to enhance their own operational and decision processes.

Tactical Engineering and Acquisition Approaches

NSD employs technical and acquisition approaches to improve the efficiency and effectiveness of NCPS.

- *Enterprise Architecture Principals.* NSD’s IT enterprise architecture principles establish a common vision for the NCPS enterprise architecture while ensuring tactical decisions are made without compromising overall program mission and objectives. These principals focus on designing a more service-oriented architecture that allows for greater flexibility in developing and integrating new components while improving system security.
- *Managed Services.* In FY 2011, NSD began evaluating whether acquiring managed security services could reduce the costs of developing and delivering cybersecurity services. This analysis concluded that managed security services offer an efficient and effective approach for delivering certain intrusion prevention services by leveraging services ISPs already provide to private sector customers. The FY 2014 full funding request reflects a managed service acquisition approach for delivering intrusion prevention security. As NSD develops new capabilities, it will evaluate whether managed services is a technologically and financially preferred acquisition approach.

NSD is comprised of the following six activities:

Intrusion Prevention: The FY 2014 full funding request supports the continued expansion of NCPS's active defense capabilities for all federal network traffic. With FY 2013 funding, NSD will begin deploying an intrusion prevention capability for all federal network traffic protocols. The FY 2014 current services funding will partially sustain this prevention capability including operations and maintenance of all traffic aggregation facilities and fees for one ISP, including the following services: Domain Name System (DNS), email traffic protocols, and intrusion prevention.

Information Sharing: Access to DHS threat analysis and increased collaboration opportunities will help members of the cybersecurity community prevent incidents and reduce response time when incidents occur. The FY 2014 full funding request will support information sharing efforts aimed at protecting federal and private sector critical infrastructure. This request includes DHS' voluntary Enhanced Cybersecurity Services (ECS), which will allow DHS to share information with owners and operators of critical infrastructure to enhance the protection of private sector critical infrastructure. NSD will also begin to deploy advanced tools and technologies to expand the broader cybersecurity community's access to DHS threat information and analysis.

With FY 2013 funding, NSD is planning and designing a foundational set of information and collaboration tools focused on DHS' most pressing operational needs. This effort will produce a roadmap for incrementally deploying information sharing tools tailored to a broad set of cybersecurity customers across multiple security levels. These tools will include portals, identity credentialing and access management, document/content management, synchronous and asynchronous collaboration, automated data exchange, content discovery, and an operating environment infrastructure. FY 2014 funding supports completing the design of the initial increment of the information sharing and collaboration capability.

FY 2014 funding will also sustain applications currently used by US-CERT Operations' to develop its common operating picture and threat landscape of the Federal Executive Branch civilian network. Information Sharing sustainment costs include operations services, hardware and software maintenance, and technical refresh of equipment.

Analytics: FY 2014 will fund sustainment of NCPS's advanced analytic tool suite, including deployment of redundancy for the Security Incident and Event Management (SIEM) solution. The SIEM, which organizes threat data to support threat analysis, became operational in FY 2012. In FY 2014, NSD will fund deployment of SIEM at the DHS Data Centers to improve system availability and reduce vulnerability to system failure.

NSD will also sustain existing NCPS analytic tools that capture, organize, and analyze data collected and produced by the NCPS to improve the understanding of current or emerging cyber threats. These tools include Packet Capture (PCAP) which allows US-CERT analysts to see "inside" the packet and inspect the payload to analyze a specific cyber threat and the Digital Media Analysis Environment (Forensics) and Advanced Malware Analysis Center (AMAC) which provide mechanisms to collect and contain information on cyber threats in a highly secure environment for evaluation by expert analysts. Analytics sustainment costs include operations services, analytics hardware and software maintenance, equipment technical refresh, and data center facility costs. The FY 2014 full funding

request supports the incorporation of more extensive commercial threat feed information into NCPS analytics.

Intrusion Detection: FY 2014 funding will sustain EINSTEIN 1 and 2 technologies and provide for EINSTEIN 2 expansion to departments and agencies signing new Memoranda of Agreements (MOAs) for detection services. Intrusion Detection sustainment and expansion costs include new sensor hardware and software; operations services; maintaining 83 deployed flow collectors and intrusion detection sensors; technical refresh of equipment; and data center facility costs.

Core Infrastructure: FY 2014 funding will sustain existing classified and unclassified MOE at the DHS Data Centers and ISP traffic aggregation locations, the NCPS Development and Test Environment, and communications infrastructure, including operations services, hardware and software maintenance, equipment technical refresh, data center facility costs, and communications circuit leases. NSD will also fund utilities, telephones, and maintenance services for the NCPS Operations and Services Center.

Program Planning and Operations: Program Planning and Operations consists of mission support services and common operating costs.

- *Program Management, Planning, & Systems Engineering:* The FY 2014 request includes funding for NSD-level strategic and technical planning and assessments; system-level planning, architecture, and engineering; procurement support and contracts oversight; cost estimating and financial management; front office support for information management, executive secretariat, and personnel management; federal travel; and training.
- *Mission Support Services:* FY 2014 costs associated with NSD’s contribution to enterprise-level IT, Human Capital, and support services, including those provided through the DHS Working Capital Fund.

Software Assurance			1,614			1,690			1,680
Supply Chain Risk Management			4,129			4,171			4,145

The FY 2014 Global Cybersecurity Management (GCSM) request facilitates development and promulgation of sound cybersecurity practices and strategies for protecting the Nation's CIKR. This includes further development and implementation of the initiative to provide cybersecurity education to the Nation; vulnerability analysis, software threat and risk assessments for the Information and

Communications Technology (ICT) supply chain; and engagement and collaboration with stakeholders to ensure alignment with CS&C/DHS cybersecurity-interests.

Cybersecurity Education Office: Cybersecurity Education leads the national effort for cybersecurity formal education, workforce planning, training, and professional development, enabling our Nation to protect against and respond to threats to the Homeland. It assists in implementing the NICE by leading and coordinating efforts to improve the Nation's cybersecurity education posture and ensure a robust, competent cybersecurity workforce.

FY 2014 funding will further advance Cybersecurity Education's current efforts, all of which support NICE. It will continue supporting rolling out the National Cybersecurity Workforce Framework, Federal and non-Federal cybersecurity workforces, and promoting cyber competitions and professionalization. Cybersecurity Education will continue the Scholarship for Service (SFS) and National Centers of Academic Excellence (CAE), enhancing the pipeline of well-trained information security professionals. It also will expand their Integrated Cybersecurity Education Communities (ICEC) project, strengthening cybersecurity at the high school level, on track to affect 1.7 million students over the next ten years.

Training availability for Federal employees will increase in FY 2014 as Cybersecurity Education continues managing its successful training programs - the Federal Virtual Training Environment (FedVTE) and the Federal Cybersecurity Training Events (FedCTE) program. These programs expect to deliver role-based cybersecurity training to 60,000 personnel in FY 2013, and 70,000 in FY 2014. The funding request also enables development and implementation of Cybersecurity Education's top priority, the National Institute for Cybersecurity Studies (NICS) Portal. The NICS Portal will provide nationwide access to cybersecurity education, training, and professional development resources. NICS provides an online resource to enhance the nation's ability to secure cyberspace and is critical to the success of related efforts.

Research and Standards Integration (RSI): RSI advances the future state of cybersecurity through efforts in both Research and Development (R&D) and standards activities. RSI serves as CS&C's technology transition facilitator, accelerating the integration of technologies from cutting-edge research into CS&C systems and programs. This encompasses promoting the development of needed new technologies and transitioning them to operational programs. RSI also promotes the advancement of cybersecurity standards and advocates the adoption of relevant standards into CS&C's operational systems and programs. On national and international levels, RSI influences cybersecurity standards and frameworks promoting interoperability and automation supporting CS&C's mission.

The FY 2014 funding will continue R&D efforts in CS&C's identification, collaboration and integration of new, innovative technologies to further CS&C operational systems and programs. RSI will identify and propose three technologies for transition into the CS&C operating environment. Additionally, RSI will initiate a full technology transition for one of these proposals and manage its progress through the transition lifecycle, made of four phases: 1. Proposal, 2. Planning, 3. Execution, 4. Closeout.

The FY 2014 funding request will further advance RSI's ability to promote advancement and adoption of ICT and cybersecurity standards. RSI will emphasize cooperative partnerships and information

sharing between Departments and Agencies, the private sector, and standards organizations on national and international levels. Further, RSI will identify and communicate emergent needs for enhancements to existing standards or the development of additional standards, based on identified gaps with respect to DHS interests.

FY 2014 funding enables expanded leadership in four standards committees across three standards developing organizations; and exerts influence in developing at least five standards critical to the CS&C mission in the areas of incident information sharing/exchange and security automation, identity and access management, privacy, and cloud computing security. These FY 2014 activities ensure the development and dissemination of standards and frameworks align with national interests to enhance cybersecurity postures of networks, software, and other cyber domains.

Software Assurance (SwA): SwA improves software security by collaboratively advancing standards-based technologies, tools, processes, and practices in both the public and private sectors. SwA works to reduce software vulnerabilities, minimize exploitation, automate sharing, and address improving capabilities to routinely develop and deploy resilient and trustworthy software products, thus foster more resiliencies within the Nation's critical infrastructure.

The FY 2014 request funds SwA's continuing joint efforts with standards organizations and Departments/Agencies in establishing standards and certification mechanisms from which tools verify software is free of security vulnerabilities. This work supplements efforts to establish the enabling mechanisms (standards, processes, and technologies) for a SwA infrastructure capable of sharing test information, integrated tools and certified software information.

SwA promotes a collaborative partnership and information sharing with private industry, academia, Federal agencies, and international entities, for improving software development and acquisition processes through various engagement opportunities and publishing best practices and methodologies. The FY 2014 funding will advance security automation standards and community standards and sharing information adoption relevant to software analysis, and continue supporting the SwA Community of Practice infrastructure, thus enhancing communications in support of stakeholder needs for software assurance best practices in developing, acquiring, and post-release support.

Supply Chain Risk Management (SCRM): SCRM helps protect the Federal civilian government ICT supply chain. To execute this mission, SCRM works to support three mission critical objectives:

- ICT Supply Chain Risk Model Development and Analysis
- Supply Chain Incident Response and Analysis
- Community of Practice Engagement (e.g., Standards and Best Practices)

The FY 2014 funding continues advancing SCRM's ability to protect the Federal civilian ICT supply chain and critical infrastructure. SCRM will address increasingly advanced supply chain threats by conducting projects that utilize a comprehensive set of technical risk assessment capabilities, including: Destructive and non-destructive analysis; code review and assessment; development of attack graphs, vulnerability assessments, and mitigation recommendations. These projects provide specifics into potential threats and vulnerabilities of ICT equipment acquired by Federal civilian Departments and Agencies. The project findings inform SCRM acquisition language, standards and

best practices, and the development of an ICT supply chain risk model for telecommunications sector transactions that could impact the security of the U.S. Government. Risk model development requires: Surveying various sectors' risk management and assessment techniques, determining the appropriate model to capture the risk to national security of a transaction, and finally testing and validating the risk scoring algorithm to ensure quality control and reliability of the model. The risk model will evolve into an automated tool initially for DHS-wide use, and eventually other Federal civilian Departments and Agencies.

In FY 2014, SCRM will continue efforts with US-CERT integrating analysis and response capabilities for supply chain incidents into their existing missions. This includes creating a scalable and repeatable framework that will enable US-CERT and the NCCIC to manage more incidents with the same resource level. Near-term, these efforts will improve ease of response (e.g., requiring less training) and quickness of response (e.g., due to the automated connections between observables and attack patterns). Long-term, efforts will improve the ability to fully express, and therefore automatically share and process, information about security incidents and activities.

FY 2014 funding advances standards and best practices within the Supply Chain Community of Practice (SCCP). SCRM is developing a Supply Chain Exploitation Frame of Reference (SCEFOR), defining government categories of SCRM-related concerns and establishing common language and assumptions around SCRM issues. The SCEFOR will standardize common areas of supply chain concern across the Federal civilian Government, facilitating understanding across the public-private sectors and streamlining future efforts to focus on the most pressing concerns. As part of the SCCP objectives, SCRM will continue collaboration with the DHS CIO inserting SCRM requirements into the DHS information technology acquisition process, increasing mission and system owners' accountability for SCRM, and will support the creation of National Institute of Science and Technology (NIST) guidance.

DHS requests \$73.043 million for Critical Infrastructure Cyber Protection and Awareness, including 51 FTP/49 FTE. This is an increase of \$14.476 million and 14 FTP/14 FTE from FY 2012 and includes the following adjustments to base:

- Increase of \$0.002 million for the shared services administrative funding transfer from DHS OCRSO
- Increase of \$0.030 million for the 2014 pay raise
- Increase of 9 FTE for annualization of prior year positions
- Decrease of \$0.640 million and increase of 8 FTP/8 FTE for the Balanced Workforce Initiative
- Decrease of 7 FTE due to FY 2012 attrition
- Decrease of \$3.755 million in efficiencies
- Increase of \$1.703 million for the removal of one-time, non-recurring transfers

CURRENT SERVICES PROGRAM DESCRIPTION:

America's national security and economic prosperity are increasingly dependent upon the cybersecurity of critical infrastructure. With today's physical and cyber infrastructure growing more inextricably linked, critical infrastructure and emergency response functions are inseparable from the information technology systems that support them. The government's role in this effort is to share information and encourage enhanced security and resilience, while identifying and addressing gaps not filled by the market-place. In February 2013, the President issued Executive Order 13636 on Improving Critical Infrastructure Cybersecurity as well as Presidential Policy Directive 21 on Critical Infrastructure Security and Resilience, which will strengthen the security and resilience of critical infrastructure through an updated and overarching national framework that acknowledges the increased role of cybersecurity in securing physical assets.

Executive Order 13636 expands the voluntary DHS Enhanced Cybersecurity Service program, which promotes cyber threat information sharing between government and the private sector. This engagement helps critical infrastructure entities protect themselves against cyber threats to the systems upon which so many Americans rely. The CICPA PPA manages the Program Management Office for the Enhanced Cybersecurity Services program, including engagement and validation with Commercial Service Providers (CSPs) and critical infrastructure partners, coordination with interagency data providers, and research into development of new countermeasures. CICPA coordinates closely with the NCCIC technical staffs who develop, vet and transmit the indicators to the providers and with the Network Security Deployment team that reviews and accredits the CSPs. In FY14, CICPA will develop a program to support the Voluntary Framework implementation for CIKR.

In FY 2014 Critical Infrastructure Cyber Protection and Awareness (CICPA) will collaborate with public and private sectors to assess and mitigate risk to the Nation’s cyber CIKR, and promote cybersecurity awareness, maintain relationships with Governmental cybersecurity professionals to share information regarding cybersecurity initiatives, and develop partnerships promoting cybersecurity collaboration.

§K	FY 2012 Rev EN			FY 2013 Ann CR			FY 2014 PBR

MS-ISAC Support									12,891
Outreach & Awareness			7,173			7,246			5,074

Control Systems Security Program (CSSP): The CSSP will utilize its FY 2014 funding to reduce cyber risk to industrial control systems integrated in the Nation’s CIKR. Specifically, CSSP will dedicate the majority of its funding to the ICS-CERT, including malware analysis, vulnerability handling, incident response, a projected 75 voluntary cybersecurity assessments, production of alerts, advisories and other informational products and other operational duties. These activities will ensure CSSP continues to be the premier government organization and clearinghouse dedicated to the cybersecurity of industrial control systems in our Nation’s critical infrastructure. CSSP will also dedicate funding to cybersecurity training courses for industrial control systems (32 courses and over 2,000 attendees), revise and update the Cyber Security Evaluation Tool, a self-assessment tool provided freely to critical infrastructure partners and support ICS cybersecurity standards development. CSSP will continue to work actively with law enforcement and the intelligence community to provide timely and actionable information with all CIKR stakeholders. Additionally, CSSP will continue to grow and use the Industrial Control Systems Joint Working Group (ICSJWG) public-private partnership to collaborate with private sector asset owners and control systems vendors while jointly addressing emerging cybersecurity issues.

Critical Infrastructure Protection – Cyber Security (CIP-CS): The FY 2014 request includes funding for CIP-CS to continue leading national planning efforts to prioritize and protect cyber

elements of U.S. Critical Infrastructure (CI) sectors, and address requirements driven by HSPD-7, and the NIPP, by supporting, promoting, and developing sector-wide cybersecurity risk management strategies. CIP-CS has visibility and access to partner cyber activities, performs national-level prioritization of cyber critical infrastructure and sector-wide capabilities and functions, performs sector-wide cybersecurity risk prioritization, and supports formal risk management evaluations supporting partner cyber risk decisions and cyber capabilities prioritization. CIP-CS will use the funding to manage and strengthen cyber CI partnerships with public and private entities, mature national cyber resiliency efforts, and implement cybersecurity strategies that build assurance and resilience into CI across the cyber sector community. This funding also will enable CIP-CS to integrate information from internal and external cyber capabilities and address National-level risk. Further, CIP-CS will collaborate and provide assistance to internal and external partners, including the Nationwide Public Safety Broadband Network cyber risk assessment planning efforts, and SLTT entities, to develop, communicate, and utilize planning frameworks and supporting capabilities to implement functions-based risk management approaches.

Cyber Exercises Program (CEP): The CEP plans, coordinates and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for DHS, Federal, State, local, regional, international, and private sector partners. The FY 2014 request includes funding to further support two premiere cyber exercises, the Cyber Storm Exercise Series (the fifth iteration, “Cyber Storm V”) and the National Level Exercise (NLE) effort. Cyber Storm and NLE both enable CEP to bring together its broad spectrum of partners and resources to bolster the Nation’s readiness and preparation for a significant cyber incident. Other CEP activities, such as numerous exercises with other Federal, State, local, regional, international, and private sector partners, will be planned and executed as a way to further develop and grow CEP’s ability to positively impact its diverse partnerships – these relationships are instrumental in strengthening national defenses to a cyber-attack.

Cybersecurity Evaluations Program (CSEP): CSEP conducts voluntary cybersecurity assessments across all 16 CIKR Sectors and SLTT Governments and provides regionally placed support through its Cyber Security Advisor initiative. Cybersecurity Advisors are the principle field liaisons and provide a Federal resource to regions, communities, and businesses. Their primary goal is to assist in protecting cyber components within the Nation’s CIKR by acting as individual representatives of the Department, forming personal, on-the-ground connections with CIKR owners and operators. The FY 2014 request will facilitate 75 Cyber Resilience Reviews (CRRs), deploy two additional regional Cyber Security Advisors, and provide cyber expertise to the RRAP and other joint operational activities within NPPD.

Outreach and Awareness: The FY 2014 request includes funding to support Outreach and Awareness, which coordinates domestic and international engagement and outreach by promoting cybersecurity awareness among and within the general public and key stakeholder communities. Outreach and Awareness will support key outreach events as well as ongoing CS&C speaking and media engagements. Funding will also support the planning, coordination, and execution of various Outreach and Awareness activities, including National Cybersecurity Awareness Programs (such as National Cyber Security Awareness Month and the Stop.Think.Connect.TM Campaign); research and participation in large scale outreach opportunities; material development; digital outreach; and new partner engagement. FY 2014 funding will allow Outreach and Awareness to continue building international partnerships through various international forums, bilateral and multilateral venues, representing DHS programs and

advancing U.S. cybersecurity objectives. Such participation promotes information sharing and collaboration, cooperation, and planning to achieve cybersecurity goals. Finally, Outreach and Awareness will utilize FY 2014 funding to further publicize the Enhanced Cybersecurity Services (ECS) program, a voluntary information sharing program aimed at protecting Federal and private sector critical infrastructure. Outreach and Awareness' stakeholder engagement, coordination and management activities enable a streamlined public-private partnership, thus providing valued cybersecurity service to the private sector and Federal entities.

Business Operations			895			1,049			451
Facilities			6,040			6,101			652

The FY 2014 Business Operations will support Cybersecurity and Communications leadership by establishing policies and direction to sustain overall cybersecurity strategy and planning through effective integration of resource and financial management, human capital, facilities, performance management, policy development and implementation, information and personnel security, and strategic planning. Business Operations also oversees the implementation of national cybersecurity

policies and ensures that appropriate resources are available to support its mission and specialized information technology systems.

Business Operations is comprised of two areas:

- Business Operations, which provides oversight to financial management, human capital, information and personnel security, performance management, policy development, and strategic planning capabilities. Financial Management provides accounting and reporting activities and oversees the management of appropriated funding and expenditures, and prepares budgetary reports required by OMB and Congress. Human Capital manages staffing plans and processes, develops and institutes training and mentoring programs for current employees, provides personal development incentives to improve employee morale, and refines and supplements the existing workforce training programs. Human Capital also manages full-scale accelerated, promotional cybersecurity fellowship and internship programs. Information and Personnel Security establishes IT architecture enhancements, integrates system modifications to provide redundant capabilities, and provides collective resources necessary to support contingency of operations planning and sustainment. Performance Management manages process improvements to reduce response timelines for internal business processes and external informational inquiries. Policy Development and Implementation manages information and system security controls, oversight, and accreditation programs and processes. Strategic Planning supports standard budgeting, acquisition collaboration tools, operating policies and procedures to streamline budgeting, execution activities, and strategies throughout the Division.
- Facilities, which coordinates the development of comprehensive facility plans that address real estate requirements, security, and critical infrastructure issues. Facilities also manage real estate, IT, and supporting resources.

Technical Assistance & Grants			8,857			8,857			6,182

In FY 2014, the Office of Emergency Communications (OEC) will support and promote continuing communications for emergency responders and government officials in the event of natural disasters, acts of terrorism, or other man-made disasters, and work to ensure, accelerate, and attain interoperable

and operable emergency communications nationwide. OEC serves as the coordination point for interoperable communications policies and holds key responsibilities, such as its leadership role in developing and implementing the National Emergency Communications Plan (NECP).

Emergency communications encompasses operability, interoperability, and continuity of communications across a full range of current and future voice, data, and video information exchange capabilities. OEC is committed to ensuring emergency response personnel government-wide and across all disciplines can communicate as needed, on demand, and as authorized. To achieve this vision, OEC developed six key strategic goals to improve emergency communications and support the DHS goals.

Goal 1: Fostering coordination between federal, state, local, tribal, and private sector emergency communications stakeholders.

Goal 2: Improving emergency communications capabilities through targeted interaction with federal, state, local, and tribal agencies.

Goal 3: Targeting federal grants to the most critical emergency communications needs of states and localities in alignment with the NECP.

Goal 4: Developing policies and plans guiding, promoting, and enhancing efforts to improve emergency communications nationwide.

Goal 5: Developing innovative methods to address emergency communications gaps.

Goal 6: Creating a unified OEC headquarters and regional staff committed to ensuring programmatic success.

Interoperability Support: Provides administration and support of Critical Infrastructure Outreach, NECP, federal grants, and emergency responder training programs, Project 25 (P25) support, developing support. Title XVIII of the Homeland Security Act directs OEC to coordinate with federal, state, local, and tribal representatives in developing national policy and planning priorities targeting emergency communications gaps and vulnerabilities, and assesses progress regularly in strategically targeting resources and ensuring program effectiveness.

Requested FY 2014 funding will support increasing stakeholder input through various outreach mechanisms (e.g., SAFECOM, Emergency Communications Preparedness Center) to shape and inform policy and planning activities. OEC also collects data from these stakeholders toward measuring progress and identifying areas for follow-up improvement support.

OEC will provide approximately 150 requested technical assistance engagements to states, territories, and localities in supporting implementing statewide communication interoperability plans (Statewide Plans), including planning for deploying the Nationwide Public Safety Broadband Network (NPSBN), targeting those jurisdictions with the lowest capability and highest risk.

In FY 2014, OEC will execute approximately 10 technical assistance engagements for tribal governments based upon tribal NECP Goal 2 capabilities data submitted to DHS in 2013. Through the collection of this data and through engagements, OEC will implement recommendations and initiatives to the NECP.

SAFECOM: An advisory group of public safety and intergovernmental associations plus at large emergency responders, assists DHS with developing guidance, policies, and products related to emergency communications. SAFECOM activities engage stakeholders at State, local, and tribal governments, across all disciplines, in addressing and improving interoperable emergency communications by sharing lessons learned, best practices, and priorities with DHS and among themselves. Through SAFECOM, products are developed to educate policymakers and the emergency communications community across all disciplines, and provide recommendations on OEC services.

FY 2014 funding will allow OEC to continue in-depth stakeholder engagements through recurring in-person and virtual meetings. State, local, and tribal stakeholders are engaged through the SAFECOM Executive Committee and the Emergency Response Council. In coordination with the SAFECOM community, FY 2014 funding will support developing 10 quality products to educate policy makers and the emergency response community on stakeholder-identified lessons learned and best practices, plus other key priorities.

Stakeholder engagements and partnerships will inform stakeholders of DHS policies and activities, as well as providing the venue to receive feedback and guidance.

Outreach and Coordination: Supports convening and engaging stakeholders at all levels– Federal, State, tribal, and local – and the private sector, to address and improve interoperable emergency communications. Through this program, OEC informs stakeholders DHS policies and activities, and provides the venue for receiving feedback and guidance on improving emergency communications capabilities. This includes policy development, investment planning, and direct assistance, such as facilitating collaborating, information sharing, identifying interoperability gaps, and standardization.

The requested FY 2014 funding will enable OEC to conduct stakeholder engagements through in-person and virtual meetings. The funding will continue supporting workshops and webinars to approximately 25 – 30 States and territories. The goal of these workshops and webinars is to overhaul Statewide Plans, which set strategic planning priorities across each State and focus on improving public safety emergency communications. These updated Statewide Plans will address activities across all lanes of the Interoperability Continuum plus various technologies, such as land mobile radio, wireless broadband, satellite, amateur radio, etc. The funding will also allow OEC to continue in-depth stakeholder engagements with the National Council of Statewide Interoperability Coordinators (NCSWIC) through recurring in-person and virtual meetings, coordinated with SAFECOM as appropriate. In coordination with the NCSWIC and SAFECOM community, FY 2014 funding will support developing 10 quality products to educate policy makers and the emergency response community on stakeholder-identified lessons learned and best practices, plus other key priorities.

The funding will also continue supporting the 10 Regional Coordinators (RC) within the 10 Federal Emergency Management Agency regions, who work with stakeholders at all levels building and improving emergency communications capabilities. RCs travel for face-to-face meetings with stakeholders in their assigned regions to foster relationship building, identifying and correcting emergency communications interoperability issues, and supporting future capabilities development. These efforts result in continuing reinforcement of emergency communications interoperability activities, as well as improving first responder preparedness and emergency communication capabilities.

The requested FY 2014 funding will allow OEC to continue and expand upon Federal and international stakeholder engagements through in-person and virtual meetings, and development of tools and products of working and focus groups. OEC will provide focus for inter-governmental (Emergency Communications Preparedness Center) coordination efforts and intra-Departmental (OneDHS Emergency Communications Committee) activities, to improve emergency communications capabilities and coordination government-wide.

Emergency Communications Preparedness Center (ECPC) activities will coordinate and lead the Federal stakeholder community's involvement in deploying the NPSBN. The ECPC will continue to develop products, such as recommendations for long-term Federal participation in network governance to support FirstNet's NPSBN planning, coordinate activities focused on common Federal broadband R&D priorities, and incorporate broadband requirements and expenditures proposed by FirstNet and other authorities into the annual update of the ECPC's Federal grants recommendation document. Through the (OneDHS EC Committee) efforts, OEC will manage completion of the DHS tactical communications segment architecture transition plan, leading DHS Components to the target architecture developed previously. The resulting plan will determine department-wide efficiencies in business processes and resource investments.

The funding will also provide focus for border region efforts supporting the Southwest Border Communications Working Group (SWBCWG) the Canada-United States (CANUS) Communications Interoperability Working Group (CIWG) as part of the Beyond-the-Border initiative, as well as participation in the High-Level-Consultative-Commission (HLCC) as a member of the United States (U.S.) delegation in discussions with Mexico on border-region communications issues.

The SWBCWG will continue building upon the increasing coordination and alignment of Federal, State and local activities in the border regions, resulting in increased opportunities for infrastructure and asset sharing, along with developing plans and procedures that will increase the responsiveness and capabilities of participating organizations. Support for the CIWG will enable developing protocols for cross-border information sharing to enhance situational awareness, inform emergency management planning and improve emergency response between U.S. and Canadian Federal organizations, operationally and technologically.

The HLCC efforts will support the overall U.S. position in negotiations with Mexican officials on spectrum resource availability in the southwest. Successful coordination of departmental requirements is essential to ensuring contiguous radio frequency spectrum availability for DHS component organizations.

Furthermore, OEC is assisting the Executive Office of the President (EOP) Office of Science and Technology Policy (OSTP) in meeting the requirements as outlined in Executive Order (EO) 13616, "Accelerating Broadband Infrastructure Deployment", which charges the Broadband Deployment of Federal Property Working Group with ensuring a coordinated and consistent approach in implementing streamlined agency procedures, requirements and policies related to wired and wireless broadband infrastructure deployment on Federal lands, buildings, Rights of Way, Federally assisted highways and Tribal lands. Successful execution of this EO will assist in the deployment of the NPSBN.

Technical Assistance (TA) and Grants: Consists of activities providing support to State, local, and tribal governments to mitigate emergency communications gaps identified by national or statewide strategic planning through on-site and virtual technical assistance and NECP Goal 2 efforts. OEC collaborates and coordinates grant policy across the numerous federal grant programs that support interoperable emergency communications.

The requested FY 2014 funding will provide direct assistance to stakeholders via in-person TA engagement workshops, webinars, on-line tools, and guidance documents to develop and ensure common grant policy and guidance dissemination. The FY 2014 funding will also facilitate executing approximately 150 TA engagements for State, local, regional, and tribal governments, and support implementing Statewide Plans, including development planning for the NPSBN – targeting those jurisdictions with the lowest capability and highest risk.

This funding will also allow 20 TA engagements to tribal nations based upon tribal NECP Goal 2 capabilities data submitted to DHS in 2013. Additionally, this funding will allow ECPC's Grants Focus Group to release the 4th version of the *ECPC Recommendations to Federal Agencies: Financial Assistance for Emergency Communications*, as well as release the *Fiscal Year 2014 SAFECOM Guidance on Emergency Communications Grants*. This document is updated annually to provide guidance for State, local, tribal, and territorial grantees on eligible activities and equipment standards applicable to Federal grants funding emergency communications projects. Through this funding OEC will meet its statutory requirements under Title 18 to provide technical assistance to State, territorial, tribal, and local governments to improve interoperable communications.

Business Support: Consists of mission-support functions including budget and finance, executive secretariat, human capital, training and development, and other administrative functions. In addition, Business Support includes OEC's external affairs functions. The external affairs team is responsible for strategic communications; legislative affairs; public affairs and media relations; external speaking engagements and conferences; internal communications; developing publications and educational materials; and supporting stakeholder outreach.

In FY 2014, OEC will develop and roll out a competency model targeting employee training to enhance staff ability to achieve the OEC mission, as well as improve mission alignment by defining workforce competencies and aligning resources to workforce needs. The requested FY 2014 funding will allow the external affairs team to continue and further develop its stakeholder support through strategic communications related to enhancing day-to-day communications capabilities and the ongoing planning involving the NPSBN.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<p><i>SAFECOM</i></p>	<p>SAFECOM serves as DHS’ program to coordinate standards, policies, procedures and research to improve response through more effective and efficient interoperable communications nationwide. SAFECOM is coordinated with the input of the public safety community to drive the strategy for the improvement of public safety interoperable communications. The SAFECOM Executive Committee and Emergency Response Council have been instrumental in the creation of key documents such as the interoperability Continuum, the Statement of Requirements (SoR), the Statewide Communication Interoperability Plan (SCIP) Methodology, and the NECP to assist emergency responders nationwide in improving communications and interoperability. Consistent with public safety user requirements, the SAFECOM Program addresses capability gaps by identifying and promulgating interoperability solutions that provide the vital links between local and State systems and Federal Government networks. For example, the Department of Homeland Security Office of Emergency Communications, in coordination with the Office for Interoperability and Compatibility, develops the annual SAFECOM Guidance on Emergency Communications Grants. The guidance provides recommendations to grantees seeking funding for interoperable emergency communications projects, including allowable costs, items to consider when funding emergency communications projects, grants management best practices for emergency communications grants, and information on standards that ensure greater interoperability. The guidance is intended to ensure that Federally-funded investments are compatible and support national goals and objectives for improving interoperability nationwide.</p> <p>SAFECOM addresses a capability gap by identifying and promulgating interoperability solutions that provide the vital links between local and State systems and Federal Government networks. SAFECOM will incrementally deliver this services system throughout its lifecycle.</p>

EO 13618 assigns DHS the responsibility for providing NS/EP communications, including: communications that support Continuity of Government; Federal, State, local, territorial, and tribal emergency preparedness and response communications under all circumstances, including conditions of crisis or emergency.

The PTS leverages the Nation’s public telephone networks, including cellular systems, to enable voice communications for response and recovery coordination efforts and ensuring that essential government functions and operations are maintained during a disaster. PTS accomplishes this by maintaining priority services that provide NS/EP voice telecommunications for the government and its industry organizations during times when networks are congested or degraded. PTS significantly enhances call completion capabilities for national leadership, other NS/EP users, and first responders. DHS will continue providing and sustaining the PTS services, i.e., Government Emergency Telecommunications Service, Wireless Priority Service, and the Special Routing Arrangement Service under EO 13618.

Priority Telecommunications Services provides the availability of NS/EP communications during efforts to prevent, respond to, and recover from threatened and actual terrorist attacks, major disasters, and other emergencies, even when conventional communications services are congested or degraded.

Government Emergency Telecommunications Service (GETS): Provides priority communications on commercial landline communications networks, supporting the President, federal, state, local, tribal, and other authorized users during times of commercial telephone network congestion caused during natural or man-made disasters. In FY 2014, GETS will continue providing priority services covering the United States and its territories, and traverse three major long distance communications carriers and most of the local exchange carriers (LECS). GETS will continue to interoperate with the Defense Switched Network (DSN), GSA’s Networx, and the Diplomatic Telecommunications Service (DTS). This architecture provides a greater than 90 percent call completion rate for GETS.

Wireless Priority Service (WPS): Enhances NS/EP user’s ability to complete wireless calls during a crisis. WPS provides nationwide wireless subscriber coverage for the President, federal, state, local and tribal users during commercial cellular telephone network congestion which may be caused during times of natural or man-made disasters. These services coordinate response and recovery efforts while also facilitating COOPs and Continuity of Government (COG).

In FY 2014, WPS will provide service covering 97 percent of the population of the U.S. and some of its territories through nationwide and regional wireless providers. WPS will also complete deployment

of the WPS Enhanced Overload Performance priority signaling capability and finish implementing a readiness testing capability for all nationwide WPS service providers.

Special Routing Arrangement Service (SRAS): This program provides non-traceable, priority communication service over commercial wireless and wireline telecommunications networks for a special user community. SRAS operates under all conditions, including natural and man-made disasters, cyber-attacks, and threatened and actual terrorist attacks, major disasters, and other emergencies, even when conventional communications services are congested or degraded.

In FY 2014, SRAS will continue to provide this priority service for special users.

Government Industry Planning & Management (GIP&M): Executes the following priorities:

- Managing the President’s National Security Telecommunications Advisory Committee (NSTAC) under EO 12382
- The NS/EP Communications Executive Subcommittee (EXCOMM) under EO 13618
- Managing the Communications Sector and its activities under HSPD-7

GIP&M manages relationships with key Government and industry representatives across the communications sector and other critical infrastructure sectors, to assure information sharing among stakeholders and planning for all hazards responses to disruptions of communications infrastructure and services.

The President’s NSTAC was established under EO 12382, to advise the President on NS/EP telecommunications policy. The NSTAC is comprised of up to 30 presidentially-appointed, executive-level industry leaders representing various elements of the telecommunications industry. The NSTAC meets quarterly with the EOP and DHS leadership to prioritize NS/EP communications matters and identify specific topics of study. GIP&M provides the EOP with analysis for NSTAC membership, updates NSTAC authorities such as its charter and bylaws, and ensures that the NSTAC remains compliant with the Federal Advisory Committee Act.

In FY 2014, GIP&M will support one – two subcommittees, resulting in final reports to the President.

The NS/EP EXCOMM, created in 2012 by EO 13618, co-chaired by DHS and Department of Defense, serves as a government forum to address all NS/EP communications matters. The JPO, housed within GIP&M, is responsible for providing full-time, expert, and administrative support for the Executive Committee.

In FY 2014, the JPO will continue coordinating programs supporting NS/EP missions, priorities, goals, and policy; and, when directed by the Executive Committee, convene governmental and nongovernmental groups, coordinate activities, and development of policies for senior official review and approval. The JPO intends supporting four EXCOMM meetings in FY 2014, and assisting the EXCOMM in developing quarterly updates to the Assistant to the President, Homeland Security and Counterterrorism; and Director of the Office of Science and Technology Policy.

DHS serves as the SSA for the communications sector in accordance with HSPD-7 – Critical Infrastructure Identification, Prioritization, and Protection. GIP&M supports the Communications Government Coordinating Council (GCC) and the Communications Sector Coordinating Council (SCC). GIP&M is also responsible for the Communications Sector Specific Plan (CSSP) detailing the application of the NIPP risk management framework to the unique characteristics, risk landscape of the communications sector.

In FY 2014, GIP&M intends supporting four joint GCC/SCC meetings and one annual quad meeting with IT and communications sectors’ stakeholders. GIP&M will also update the CSSP and the Sector Annual Report as well as the National Sector Risk Assessment for the communications sector.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<i>NS/EP Priority Telecommunications Services</i>	PTS is a White House-directed national-level NS/EP Telecommunications program that leverages the commercially owned Public Switched Network (PSN) to provide specially designed telecommunications services for the NS/EP user community during natural or man-made disasters when conventional communications services are ineffective. Specifically, PTS enhances the ability of NS/EP users to complete calls during a crisis or emergency through a degraded PSN using any of the following three PTS components:GETS;WPS;SRAS, a classified service for special users.

EO 13618 assigns DHS the responsibility for satisfying priority communications requirements using commercial, government, and privately-owned communications resources, when appropriate.

This PPA encompasses the NGN- PS program. NGN-PS facilitates the continuation of priority services currently provided by the PTS PPA, as commercial carriers replace their current circuit-switched technology with IP-based packet switching. To continue to provide authorized users with the ability to communicate during crises, DHS must ensure the new network infrastructures are also capable of satisfying priority telecommunications requirements as the commercial carriers evolve to their next-generation networks.

The first NGN-PS program objective addresses the transition of legacy, priority voice capabilities in the commercial carriers’ long distance core networks. The acquisition strategy selected will achieve cost-effective priority services by continuing to leverage the highly survivable, commercially-owned public telecommunications network assets. When deployed, NGN technologies will provide the Government with priority communications capabilities over robust and diverse nationwide communications networks at a fraction of the cost required to build and maintain a government-owned system.

Effective communications capabilities are essential during an emergency or crisis to mitigate damage to critical infrastructures, save lives, maintain a strong national defense posture, mitigate damage to the national economy, and maintain public confidence. When commercial communications services are congested or degraded, including natural or man-made emergencies, the NGN-PS program will provide authorized personnel with IP-based voice communications for response and recovery efforts. It will ensure essential government functions and operations such as Continuity of Operations and Continuity of Government. The program uses commercial networks, as they are more cost effective than private networks and provide ubiquity of service.

In FY 2014, the NGN-PS program will continue evolving outdated PTS program circuit-based priority features and functions, and phasing in IP/packet-based priority features. This will enable DHS to leverage highly survivable commercially owned public switched network assets. NGN-PS will complete deployment of priority voice features in Sprint’s core long distance network, providing the initial operational capability for the NGN core.

PROCUREMENT ACTIVITIES:

Next Generation Network (NGN) Priority Services Program responds to Executive Order 13618, which directs the Secretary of DHS to “oversee the development, testing, implementation, and sustainment of NS/EP communications, including: communications that support Continuity of Government; Federal, State, local, territorial, and tribal emergency preparedness and response communications...” Legacy PTS provides priority over commercial service provider (SP) networks.

SPs are replacing their aging circuit-switched networks with packet-switched networks creating the operational gap met by NGN. NGN addresses a capability gap by providing highly survivable, commercial telecomm assets to provide the Government with priority communications capabilities over robust and diverse nationwide networks. NGN is a multi-phase/multi-increment tech insertion.

Modeling, Analysis & Technical Assessments			6,152			6,175			5,048
National Security/Emergency Preparedness Standards			2,107			2,107			2,109

The PSET PPA has a large role in EO 13618 by supporting the development of studies, standards, and assessments of communications infrastructures in support of National Security Emergency Communications. The PSET PPA encompasses programs supporting each of the other PPAs, by developing tools used by Critical Infrastructure Protection (CIP) and ensuring cost effective modeling and analysis of advanced telecommunications network technology for PTS and NGN.

PSET includes the following four activities:

Modeling, Analysis, and Technical Assessment (MATA): Predicts and mitigates the effect of communications failures on the national leadership’s ability to communicate during times of crisis. MATA provides specialized modeling and analyses of current and future protocols, algorithms, network designs, and capabilities affecting priority service communications in legacy and NGNs. DHS uses the modeling team’s analysis tools to provide critical infrastructure and key resource risk assessments for the communications sector during the response to a man-made or natural disaster, as well as assisting in restoration and recovery efforts. MATA also provides technical assistance to the DHS Office of Policy for the Committee on Foreign Investment in the United States (CFIUS) and Team Telecom in support of the Federal Communications Commission (FCC).

In FY 2014, MATA will develop end-to-end integrated data priority services testing and prototyping capabilities, using a mixture of modeling, simulation and actual test beds for various NGN technologies. The requested FY 2014 funding will allow MATA to complete 75 percent of AT&T, 65 percent of Sprint, and 45 percent of Verizon core networks models to support NGN Voice Priority Services. MATA will also gain Internet Engineering Steering Group approval for designated email to receive priority treatment during server/network congestions.

National Security and Emergency Preparedness (NS/EP) Standards: Provides leadership and representation in international and national standards bodies to advance U.S. interests. The program authors, defends, and advances contributions to technical standards in support of NCS and national goals. NS/EP focuses on a suite of standards regarding IP-based networks, the latest technology. These standards are critical to the success of the NGN-PS program’s ability to ensure the continuity of priority communication for national, state, and local leadership during times of NSSE.

In FY 2014, the standards team will attend over 20 standards engagements within five national and international standards bodies worldwide where they will track over two hundred contributions

traversing the approval processes of the different bodies. They will also work with the commercial industry and collaborate on new communications standards in the WiFi, Satellite, and IP arenas.

Commercial Network Survivability/Advanced Technology: EO 13618 directs DHS to be a forward-looking group, assessing new and advanced technologies, for the communications arena. This activity provides vulnerability assessments of new communications technologies and evaluates their impacts on commercial and government infrastructures. Efforts also include identifying and assessing satellite communications systems' vulnerabilities; and coordinating with commercial vendors in conducting DHS-wide studies to determine and ensure sufficient satellite capabilities to prevent, protect, respond to and recover from acts of terrorism and natural disasters.

In FY 2014, the team will review over four-hundred CFIUS cases, in addition to researching future technologies and evaluating their applicability for future National Security and Emergency Communications.

Classified Program: Justification for this program will be made available under a separate cover.

Training & Exercises			691			691			595

Critical Infrastructure Protection (CIP) addresses EO 13618, specifically by receiving, integrating, and disseminating NS/EP communications information to the Federal Government and SLTT governments, as appropriate, to establish situational awareness, priority setting recommendations, and a common operating picture for NS/EP communications information as required by Sec 5.2.(d) of the EO.

CIP also facilitates leveraging this situational awareness and common operational picture by each of the other PPAs. CIP ensures the continued availability of NS/EP telecommunications services under all circumstances, including crisis or emergency, attack, recovery, and reconstitution. CIP performs analyses on the communication infrastructure; ensures continuity planning and operational support are in place; conducts Title Globe continuity communications testing and certification training for communications emergency response personnel; and produces operational procedures, policies, and support tools. CIP is comprised of the following activities:

National Coordinating Center (NCC) Operations: NCC is a joint industry-government body providing a response mechanism to NS/EP telecommunications incidents. The NCC is collocated with the NCCIC and provides 24x7, real-time situational awareness during the initiation, coordination, restoration, and reconstitution of NS/EP telecommunications services or facilities under all conditions. The NCC is the primary mechanism within DHS for executing Emergency Support Function (ESF) #2 (Communications) under the National Response Framework (NRF) during an incident.

The NCC also administers the SHARED RESOURCES (SHARES) high-frequency (HF) radio program, which is a network of approximately 1,500 high-frequency radio stations forming a nationwide emergency message-handling network.

The requested FY 2014 funding will allow the NCC to continue 24x7 watch operations and improve real-time situational awareness reporting for NS/EP communications for federal departments and agencies, and maintain baseline operational readiness to respond to events. Per DHS responsibilities under National Security Presidential Directive (NSPD) 39, the NCC will continue to support coordination between operations center responsible for radiated frequency interference events that impact government and private sector communications systems. Further, these funds will facilitate NCC IT system readiness (NCCLAN, station logs, tools) at 99 percent - available to support 24x7 operations. Additionally, it will support information sharing such as the weekly NCC government and industry meetings to ensure coordination and understanding of emergency communications. The

funding will also support weekly SHARES Federal-State-Local-Volunteer operable/interoperable HF communications capability testing to ensure readiness.

Operations, Plans, and Policy: Provides telecommunication analyses during both emergency preparation and actual disaster response operations, and is responsible for assessing the national continuity communications system.

In FY 2014, Operations, Plans and Policy will co-lead and enhance ESF #2 response and restoration efforts when activated, to support regional and state communications events. Additionally, the program will improve agency readiness and provide reporting to the EOP, for Category II – IV departments and agencies' compliance with NCS Directive 3-10.

Training and Exercises (T&E): Maintains a cadre of more than 100 emergency response personnel prepared to respond across the spectrum of crises and emergencies. In response to the recommendations of the *Hurricane Katrina After Action Report*, DHS is enhancing its readiness for emergency response operations with an increased tempo of training and exercises for multiagency personnel with ESF #2 collateral duties.

In FY 2014, T&E will host 10 training webinars, an annual training event in which the focus will remain on training personnel in post-disaster infrastructure restoration, and two regional training events. T&E will also conduct one major ESF #2 exercise involving the entire ESF #2 community (FEMA, FCC, NTIA, Industry, and State Emergency Managers) and at least five National Team exercises involving the NCCIC/NCC and the NRCC teams. T&E will also participate in the planning, control and execution of the NCCIC's participation in the annual Eagle Horizon Continuity of Operations (OOP) national exercise and DHS National Level Exercise events.

National Security Information Exchanges (NSIE): Supports the Government NSIE, which represents federal departments and agencies having responsibilities related to the public network and also departments and agencies that are major telecommunications users. The President's NSTAC NSIE provides a trusted environment in which industry and government representatives exchange threat and vulnerabilities information to reduce risk in the public network.

In FY 2014, NSIE will increase industry information sharing partner membership, and increase the Government NSIE membership by 10 percent. NSIE will also complete and provide an assessment informing the NSRA cyber working group of the threat and vulnerability data.

Telecommunications Service Priority (TSP): Established by an FCC Report and Order 88-341 in 1988, TSP is the regulatory, administrative, and operational system authorizing and providing priority treatment of NS/EP telecommunications services. The TSP program provides NS/EP users with priority restoration and provisioning of telecommunications services vital to maintaining readiness or response to an incident. Telecommunications service vendors may become overwhelmed with requests for new telecommunications services and requirements to restore existing telecommunications services due to any number of natural or man-made disasters. The TSP program provides service vendors with an FCC mandate for prioritizing service requests by identifying those services critical to NS/EP.

In FY 2014, TSP will maintain the database of critical circuits requiring priority treatment, monitoring over 272,000 TSP assignments and over 1,400 organizations (Federal, state, local governments; and private industry) that participate in the program. To ensure restoration activities remain mission critical, TSP will revalidate a third of user organizations to ensure restoration priorities and the NS/EP mission remain valid. Additionally, TSP will reconcile 75 percent of the previous year's vendor-supplied confirmation data to maintain accuracy of restoration data and priorities.

IV. Program Justification Changes

National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Information Sharing & Analytics
PPA: Network Security Deployment
Program Increase: Positions 9, FTE 6, Dollars \$43,904

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22	22	54,800
Program Increase							9	6	43,904
Total Request	18	18	31,576	22	20	41,797	31	28	98,704

Description of Item

For FY 2014, NPPD requests 9 positions/6 FTE and an increase of \$43.904 million to support DHS' mission to safeguard and secure cyberspace and to enable the cybersecurity community to address cybersecurity challenges. The complexity of threats demands a strategy and platform for automating the sharing of information and analytics between cybersecurity partners. The enhancement funds will be used to plan and develop advanced information sharing capabilities and to procure additional commercial information sources on cyber threats.

Justification

DHS will lead the effort to establish an information sharing system that connects all agencies in the Federal Government and lays the foundation for extension to public and private partners. The goal of this system will be to "connect the dots" in identifying cybersecurity threats by making relevant pieces of information easily accessible to those who need it, regardless of where they are in the government, within the constraints of policy and law.

This initiative will foster a whole of government approach and electronically and in real time connect the following entities: the seven cybersecurity centers to enhance situational awareness; the DHS deployed EINSTEIN Information Sharing and Analytics government-wide system; and, the FBI's Binary Analysis Characterization and Storage System (BACSS). These currently disparate efforts will be synchronized to develop a comprehensive coordinated cybersecurity information sharing system capable of leveraging ongoing activities and best practices of the Program Manager for the Information

Sharing Environment's (PM-ISE) including its work with fusion centers and privacy guidelines. The Information Security Architecture (ISA) will serve as the foundation for cybersecurity information sharing requirements across the government. DHS will work with the relevant Agencies, the PM-ISE and NIST to develop machine readable interoperable technical standards that will allow for automated information sharing.

These enhancement funds will be used to plan and develop advanced information sharing capabilities and to procure additional commercial information sources on cyber threats.

This enhancement fully funds:

- Acquisition and deployment of a foundational set of information and collaboration tools that focus on the most pressing operational needs of DHS and its interaction with key constituencies. The foundational information sharing tools will establish data sharing interfaces and provide actionable information by deploying an information sharing rules engine and establishing PIV credentials for DHS and Departments and agencies (\$15.745 million).
- Support the Enhanced Cybersecurity Services (ECS) program by conducting security risk assessments for eight new Commercial Services Providers (CSPs), bringing the total number of approved CSPs to thirteen from 5 in FY 2013. Network Security Deployment (NSD) security assessments are required in order to approve the sharing of classified indicators with CSPs including assisting CSPs with security requirements, reviewing CSP security submission, providing onsite technical assistance to CSPs, assessing CSP security findings, and developing and tracking mitigation actions (\$7.749 million).
- Acquisition and integration of additional private sector threat information that, in combination with NCPS-collected data, enhances DHS' understanding of cyber-threats and mitigations. The combination of commercial and government provided information creates an aggregated, comprehensive view of cyber activity for cybersecurity partners that could not be achieved by individual entities (\$17.380 million).
- 9 additional Federal personnel to oversee delivery expansion of information sharing, analytics, and EINSTEIN 2 intrusion detection capabilities (\$0.902 million).
- Increases to common operating costs resulting from new capability development (\$2.128 million).

Impact on Performance (Relationship of Increase to Strategic Goals)

Enhanced information sharing tools will replace current, largely independent and unclassified information sharing capabilities such as: the US-CERT public web site, the US-CERT secure portal, and an instant messaging capability all hosted by various commercial providers, as well as miscellaneous threat feed services currently available through web browsing.

Machine to machine automated data exchange is a more efficient and effective mechanism for distributing critical cyber information and advanced cyber analytics than the current highly manual processes. With requested enhancement funds, DHS will deploy secure information sharing mechanisms that expand access to threat information to a broader, more diverse set of cybersecurity stakeholders across multiple security levels. Capabilities, such as portals and collaboration tools,

enable timely sharing of threat information and analysis—including US-CERT analysis of EINSTEIN 2 and E³A data— to help prevent incidents and reduce response time when incidents occur.

With this enhancement, NSD will:

- Complete initial development and deployment activities to establish a common unclassified infrastructure framework that integrates a range of cyber mission information sharing applications;
- Plan and design an additional set of cyber mission information sharing applications; and
- Procure additional threat feeds for US-CERT analysts and expand threat feed aggregation tool set.

Currently, the U.S. Government appropriately shares classified information with eligible U.S. private sector partners via the ECS program. ECS enhances the protection of Critical Infrastructure (CI) and other private sector networks from unauthorized access, exploitation, data loss and manipulation, and exfiltration by threat actors that could cause significant national-level impact. ECS is intended to augment, not replace, existing security services operated by or available to CI companies and does not involve government monitoring of private networks or communications. ECS will provide a coordinated, comprehensive information sharing capability that utilizes information gathered from across the U.S. Government to enhance the protection of participating critical infrastructure entities. ECS will also support the voluntary sharing of limited aggregated, statistical information – specifically related to the benefit of the information shared with CSPs.

Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Control Systems Security
PPA: Critical Infrastructure Cyber Protection and Awareness
Program Increase: Positions 5, FTE 3, Dollars \$5,073

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							12	12	28,321
Program Increase							5	3	5,073
Total Request	12	12	27,728	12	9	28,927	17	15	33,394

Description of Item

For FY 2014, NPPD requests 5 positions/ 3 FTE and an increase of \$5.073 million for Critical Infrastructure Cyber Protection and Awareness’ Control Systems Security Program (CSSP). The CSSP experienced a 600 percent increase in vulnerability handling activities from FY 2010 to FY 2011 and a 40 percent increase in cyber incident response activities from FY 2011 to FY 2012; the program expects this to continue to increase as more control system vulnerabilities are exploited. To keep pace with demand, CSSP is requesting additional resources to assist asset owners and operators in the areas of incident response, training, and additional tool development. The resources will be utilized by CSSP to increase the overall effectiveness of the program through additional assessments, on-site responses, increased malware analysis capacity, additional tool development, and advanced training opportunities.

Justification

Additional resources of \$1.522 million will be used to provide more effective and timely responses to stakeholders in the areas of vulnerability handling and cyber incident response specifically for Industrial Control Systems (ICS) emergencies.

Additional resources of \$1.522 million will be used to provide advanced proprietary tools for use in the ICS-CERT Advanced Analytical Lab and on incident response “fly away” missions to detect and analyze malware and other advanced persistent threats.

Additional resources of \$1.015 million will be used to provide additional advanced training courses on topics including proper monitoring and logging in the case of an intrusion or exploitation of systems. This training will be collaborative with the Federal Bureau of Investigation (FBI), since the two agencies often respond jointly to cyber incidents that require cyber forensics.

Additional resources of \$1.014 million will provide for revisions to the Cyber Security Evaluation Tool (CSET), which will allow new functionality and new standards for the self-assessment tool. This increase will also support up to 112 assessments per year and provide more in-depth architectural reviews, which are being requested by CIKR stakeholders.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional resources address the increasing demands faced by CSSP from ICS owners and operators and other CIKR partners. The expected increase in performance is significant and specifically includes:

- Assessments: Up to 50 percent increase in performance.
- On-Site Responses: Up to 100 percent increase in performance.
- Malware Analysis: Multiple labs and tool development.
- CSET Development: Up to 200 percent increase in performance.
- Advanced Training Opportunities: Up to 150 percent increase in performance.

The additional resources allow CSSP to keep pace with the projected demand growth for services offered.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: Cybersecurity Operational & Strategic Analysis
PPA: US Computer Emergency Readiness Team
Program Increase: Positions 17, FTE 10, Dollars \$12,609

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							185	185	73,152
Program Increase							17	10	12,609
Total Request	165	118	79,116	165	150	79,116	202	195	85,761

Description of Item

For FY 2014, NPPD requests 17 positions/10 FTE and an increase of \$12.609 million for the Office of Cybersecurity and Communications' (CS&C) operational and strategic threat analysis capabilities which will provide a more robust cybersecurity risk and threat analysis capabilities and additional resources supporting strategic cybersecurity threat analysis across multiple activities.

Justification

Operational Analysis - \$4.754 million

This program change will bolster US-CERT's day to day analytical capabilities in defending Federal networks through enhanced operational and threat analysis enhancing the NCCIC's 14x5 operational and analytic support to respond to cyber threats. US-CERT will support the NCCIC to fuse daily reporting from the six Federal Cyber Centers, Federal Departments and Agencies, Sector Specific Agencies, Information Sharing and Analysis Centers (ISACs), and key private sector partners.

Funding will additionally facilitate expansion to a 24x7 watch operations, virtually doubling the services of US-CERT and the National Cybersecurity & Communications Integration Center (NCCIC), which serves as the single point of integration for all information from Federal departments and agencies, SLTT governments and the private sector related to situational awareness, vulnerabilities, intrusions, incidents, and mitigation activities.

These funds also will enable the acquisition and development of software and tools necessary to maintain the national Common Operations Picture (COP).

In FY 2014, efficiencies in the areas of cyber analytics, cybersecurity and communications infrastructure, indications and warnings, on-site fly away vulnerability assessments, collaboration and coordination, and cyber and communications incident response will be leveraged to support Federal government and private sector senior leadership with a fused operational picture combining intelligence and operations information into actionable products distributed in a timely manner.

Strategic Threat Analysis - \$7.855 million

The program change will support infrastructure protection in its strategic analysis related to refining and improving the list of critical infrastructure developed in 2013, cross-sector dependencies, and understanding risks and consequences associated with those systems and assets. These funds will provide the capability to better understand individual and systemic risks better and to identify the national and economic security consequences of disruption of in critical infrastructure systems and assets.

This funding will specifically focus on developing products detailing regional, sector and localized cyber and physical threat impacts supporting critical infrastructure risk assessment and prioritization management activities across the 16 CIKR sectors, delivering support to Federal, State, local and private sector partners within a given region through the Cyber Security Advisors (CSAs) activity.

Impact on Performance (Relationship of Increase to Strategic Goals)

The request will allow CS&C to fulfill objectives set forth in DHS's Blueprint for a Secure Cyber Future achieving the following planned accomplishments:

- Providing operations and analytic support resulting in an increased ability to respond to senior leadership requests for information on high-priority events.
- Operations and maintenance (O&M) of the 24x7 watch floor.
- Developing and maintaining the national COP, including software tools.
- Analyzing the long-range trends and patterns of malicious cyber activity.
- Supporting US-CERT risk assessment and prioritization management activities across the 16 CIKR sectors.
- Delivering support to Federal, State, local and private sector partners within a given region through the CSAs activity. This funding will specifically focus on developing products detailing regional, sector and localized cyber and physical threat impacts.
- Support additional operational requirements, data, and volume sources from the Continuous Diagnostic and Mitigation, Enhanced Cybersecurity Services, and CISCP programs.

Program Increase 4: Cyber International Engagement
PPA: Critical Infrastructure Cyber Protection and Awareness
Program Increase: Positions 2, FTE 2, Dollars \$500

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4	4	847
Program Increase							2	2	500
Total Request	2	2	1,793	2	2	1,793	6	6	1,347

Description of Item

For FY 2014, NPPD requests 2 positions / 2 FTE and an increase of \$0.500 million Critical Infrastructure Cyber Protection and Awareness' International Affairs Program. The International Affairs Program is the focal point for the coordination of DHS' international cybersecurity and communications efforts. These additional resources will be utilized for engagement activities related to coordination of international cybersecurity priorities in support of the Department of State.

Justification

CS&C's International Affairs cultivates and maintains relationships with foreign governments, both bilaterally and multilaterally, to strengthen and formalize operational collaboration, build capacity in key areas, coordinate strategic policy issues, and address issues of mutual concern. Relationships are matured and sustained through ongoing informal collaboration, mutual participation in multilateral venues, and formal agreements.

Resources will be allocated to support assisting nations build their own capacity to address cybersecurity issues and expand and regularize U.S. cybersecurity initiatives. This includes identifying and/or creating opportunities to promote/conduct capacity building, training, and technical assistance; establishing/enhancing training programs and developing training materials. DHS seeks to build capacity in its competency areas, such as national capabilities for incident management, including computer security incident response teams; public/private partnerships; control systems security, and promoting awareness.

DHS also leads engagement on behalf of the U.S. Government in multiple fora. Additional resources will enable the International Affairs Program to maintain support of bilateral and multilateral/regional

engagements. International Affairs actively participates in a number of international forums that address cybersecurity issues, including the Asia Pacific Economic Cooperation (APEC), Organization of American States (OAS), International Telecommunication Union (ITU), the Organization of Economic Cooperation and Development (OECD) which are coordinated by the Department of State. DHS also leads engagement on behalf of the U.S. Government in some form such as the Meridian Process.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional two FTEs will increase personnel dedicated to carry out the full range of priorities outlined in the *U.S. International Strategy for Cyberspace*, including international cybersecurity policy development, diplomatic engagement and representation, strategic planning, operational coordination, and capacity building. The additional FTEs will support bilateral engagement to advance cybersecurity cooperation as well as participation in multilateral and regional organizations that are addressing cybersecurity issues, often coordinated by the Department of State.

The growing number of cyber vulnerabilities and incidents in the U.S. and across the world enhances the need for international engagement and collaboration. As demonstrated in recent events, the mitigation of cyber incidents relied on coordination with international partners and participation at the World Conference on International Telecommunications (WCIT), the first of several international events where similar issues will be addressed. Increased international affairs support is imperative to support the growing threat environment.

Program Increase 5: Intrusion Prevention
PPA: Network Security Deployment
Program Increase: Positions 29, FTE 25, Dollars \$134,849

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Base			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							15	15	62,107
Program Increase							29	25	134,849
Total Request	3	3	109,468	15	9	166,624	44	40	196,956

Description of Item

For FY 2014, NPPD requests an increase of 29 positions/25 FTE and \$134.849 million for Intrusion Prevention, which provides active network defense capabilities preventing or limiting malicious activities from penetrating federal networks and systems. Currently, DHS is transitioning Intrusion Prevention capabilities from the existing government furnished equipment-based model to a model leveraging commercially-provided technologies through Managed Security Services (MSS). This program increase will allow NSD to reach an accelerated E³A intrusion prevention Full Operational Capability (FOC) in FY 2015.

Justification

In FY 2012, NSD began to acquire intrusion prevention security services through five participating Internet Service Providers (ISPs). This program increase will enable NSD to fully implement Increment 1 and initiate Increment 2 of the E³A Project and achieve FOC in FY 2015. Increment 1 will enable protection measures from Domain Name System (DNS) and email threats, for up to two million Federal IT seats across all Federal departments and agencies, including real-time feedback from ISPs integrated into US-CERT Operations. This program increase will allow ISPs to move from out-of-line to in-line prevention services that cover email and DNS federal network traffic protocols. These resources will fully fund the following E³A activities:

- Acquisition of failover capability, ensuring redundancy of the E³A intrusion prevention capability and automated reporting mechanisms. Automated reporting will establish a real-time machine-readable connection between on intrusion prevention event-handling. With automated feedback, DHS will be able to more easily and efficiently integrate intrusion prevention feedback into the mission operating environment used by analysts for real-time cyber event coordination (\$31.315 million).

- Funds to enhance and sustain Intrusion Prevention Security Services (\$69.339 million).
- Integration of classified and unclassified analytics environments (\$8.852 million);
- Deployment of classified Mission Operating Environment enhancements to support classified analytics and traffic aggregation redundancy (\$9.461 million).
- Additional 29 positions/25 FTE who will oversee the delivery of intrusion prevention capabilities (\$3.469 million).
- Increase common operating costs associated with expanded prevention services (\$12.413 million).

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funds will support FOC deployment of the intrusion prevention E³A capability in FY 2015, including fully funding fees for Intrusion Prevention Managed Security Services, automated feedback between the service provider and DHS analysts to enable real-time cyber event coordination and redundancy.

(Dollars in Thousands)

Program Increase 6: Infrastructure Protection Tools
PPA: Regional Field Operations
Sector Management and Governance
Program Increase: Positions 0, FTE 0, Dollars \$1,280

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							48	48	23,217
Program Increase							-	-	1,280
Total Request	47	47	31,340	47	47	31,340	48	48	24,497

Description of Item

For FY 2014, NPPD requests an increase of \$1.280 million to support DHS efforts through the Office of Infrastructure Protection (IP) to identify and analyze threats to and vulnerabilities of critical infrastructure including through assessment tools that it provides to critical infrastructure partners. DHS is currently working to strategically consolidate the tools in order to gain efficiencies and curtail duplicative efforts. This will be accomplished by integrating the unique requirements from the suite of current assessment tools into the single assessment methodology. SSAs will have the option to independently continue with the development and implementation of tools that address their organizational requirements or utilize DHS provided tools.

Justification

In order to support the consolidation of the tools into one methodology, DHS is requesting resources to enhance the IT infrastructure supporting its tools and incorporate additional requirements and Interagency Security Standards into the one methodology.

1. Expand the Infrastructure Information Collection System (IICS) \$4.1M: DHS will expand current IICS capabilities to support other Federal, State, local, and private sector partners in fulfilling the infrastructure protection mission. DHS will do so by procuring the hardware required to expand the system for up to five thousand users, provide associated Help Desk and customer support for the increase in users, and provide web-based training that is needed to facilitate this significant expansion.

2. Integrate Interagency Security Committee Standards into Assessment Methodology \$3.7M: DHS is sponsoring an effort to collocate and establish interoperability for risk assessment methodologies across all critical infrastructure sectors. DHS will develop the Building Assessment Tool in collaboration with the Interagency Security Committee (ISC), the Federal Protective Service (FPS), General Services Administration (GSA), and other key stakeholders. This tool will incorporate the ISC standards using one-assessment methodology. The follow-on Facility Security Assessment (FSA) tool will build on the efforts begun with the Modified Infrastructure Survey Tool (MIST) for use by the FPS. This effort will ensure consistent and standard facility security assessment of Federal facilities in accordance with ISC standards and ensure the data set is compatible with critical infrastructure assessment data. This effort will deliver an application and reporting capability using a common set of questions, methodology, standardized dashboards and taxonomy based on requirements developed during MIST deployment and the need for an ISC standards compliant assessment tool.

The following tools will be eliminated and transitioned to a single base methodology:

1. Automated Critical Asset Management System (ACAMS) Transition to a Single Methodology, (\$4.5M): DHS will cease all currently planned development and integration activities for the ACAMS IT application as DHS transitions to a single vulnerability assessment methodology, tool, and systems supporting the identification of vulnerabilities, the collection of consequence information, risk management and planning, incident response and tracking, and special events planning and support. The mission partners currently using ACAMS will be transitioned to the IP Gateway and integrated into using the same tools, programs, and data that is currently supporting the Federal staff in IP. DHS will also eliminate a redundant disaster recovery capability for the IP Gateway at a DHS-approved Data Center.
2. Food and Agriculture Sector Criticality Assessment Tool (FASCAT), (\$0.4M): The FASCAT tool is the Food & Agriculture Sector's primary tool for engaging states and industry in information sharing processes within Homeland Security Information Network-Food and Agriculture (HSIN-FA) and FoodSHIELD/CoreSHIELD that were built around critical infrastructure assessments. The requirement and cost for maintaining FASCAT will be reviewed by the Sector-Specific Agencies (e.g. USDA-Food Safety Inspection Service and the Food and Drug Administration) to evaluate whether to maintain FASCAT.
3. Transition of Self Assessment Tools, (\$1.6M): DHS will cease the development of self-assessment tools uniquely developed for individual sectors, sub-sectors, and segments within the sectors. Specifically this reduction will eliminate self-assessment tools that have been developed for the IP internal sectors, including the Risk Self-Assessment Tool (RSAT) for stadiums and arenas; RSAT for convention, lodging, racetrack, and parks; Dams Sector Assessment Tool (DSAT); Voluntary Chemical Assessment Tool (VCAT); and others into a single assessment methodology to maximize data usage and integration across IP to support assessing the risk, dependencies and interdependencies of critical infrastructure.

Although there is a net increase of \$1 million in FY 2014 for the assessment tools, DHS expects to gain efficiencies within the portfolio of tools after the Building Assessment Tool reaches FOC.

Impact on Performance (Relationship of Increase to Strategic Goals)

Expanding the IICS will directly support information sharing and exchange with SLTT stakeholders and help inform their critical infrastructure protection and resilience efforts. The expanded IICS tool will support up to 5,000 users, an increase of 4,000 users.

The Building Assessment Tool will ensure consistent assessment of security posture and level of protection required across the Government Facilities Sector and allow for NPPD partners to make defensible recommendations for security and protection enhancements based on common datasets that allow for the optimal improvement given a specific level of investment.

In the case of FAS-CAT, RSAT, DSAT, and VCAT these self assessment tools will no longer be available for use by DHS and our mission partners in FY 2014. Unique requirements currently existing within these self assessment tools that support the IP mission will be reviewed and evaluated for consideration and inclusion into the single strategic integrated approach. The ACAMS tool will be eliminated and no longer available to support the state and local critical infrastructure mission partners beginning in FY 2014.

Justification of Program Changes**

(Dollars in Thousands)

Program Increase 7: Multi-State Information Sharing & Analysis Center
PPA: Critical Infrastructure Cyber Protection and Awareness
Program Increase: Positions 0, FTE 0, Dollars \$12,891

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,200
Program Increase							-	-	12,891
Total Request	-	-	8,150	-	-	8,150	-	-	16,091

Description of Item

For FY 2014 NPPD requests an increase of \$12.891 million for support to the MS-ISAC, a collaborative SLTT government-focused cybersecurity organization that significantly enhances SLTT governments’ ability to prevent, protect against, respond to, and recover from cyber-attacks and compromises. DHS has a need for the MS-ISAC to expand its SLTT network security by including all 50 states and 6 US Territories in its managed security services (MSS) program. Additional resources to expand current MS-ISAC efforts promulgate a more robust and inclusive cybersecurity information sharing community, raising the Nation’s level of cybersecurity readiness and response.

Justification

The MS-ISAC provides a centralized forum for information sharing between the Federal Government and SLTT governments through a number of crucial services. The MS-ISAC provides the opportunity to analyze information and correlation across its SLTT members, which then can be aggregated efficiently and shared with US-CERT, NCCIC, and their public and private sector partners without requiring Federal personnel resources. It uses a consolidation of services, including hosting a 24x7 cybersecurity operations center, developing and rapidly distributing cybersecurity advisories and bulletins, and directly responding to and assisting MS-ISAC members with response to cyber incidents.

In FY 2010, DHS began expanding its network intrusion detection and prevention, monitoring, and vulnerability scanning services across SLTT governments. The MSS model was developed, providing firewall monitoring and netflow analysis services to participating SLTTs in addition to base services. The MSS model enhances cyber situational awareness of our Nation’s SLTT government network

environments and provides DHS with real-time risk information supporting national cybersecurity situational awareness.

The large and diverse representative sample of SLTT government network activity will paint a picture of the current attack targets within SLTT government cyber infrastructures and inform the development and maintenance of an SLTT government-focused attack/compromise trend model. The MS-ISAC review and analysis of the network traffic will directly aid the SLTT governments as their networks will be the ones subject to immediate attack or infiltration. The diverse array of networks helps rapidly assimilate cyber attack data with potentially national consequences.

Expansion of the MSS model relies on a cost sharing initiative with the SLTTs. For the period of FY 2014-2016, DHS will implement a progressive cost sharing program for participation in the MS-ISAC. Participating SLTT governments will contribute 20% in 2014, 25% in 2015 and if necessary, 40% in 2016. This phased approach prevents disruptions of critical services already in place. By FY 2017, SLTT network owners will have had sufficient time to integrate this service and will then become responsible for the total cost of securing their networks to MSS through a short-term subsidy. This approach will not only strengthen SLTT network defenses, but also provide the Federal Government with situational awareness of State and local networks.

Impact on Performance (Relationship of Increase to Strategic Goals)

Additional funding for MS-ISAC will allow MSS expansion to reach all 50 States and 6 U.S. territories. Additionally, it will ensure that the data, tools, and diagnostics used for SLTT government networks are conducted similarly to what is deployed for Federal networks. US-CERT and the NCCIC will directly benefit from the centralized SLTT government information sharing mechanism. A more comprehensive threat picture enhances the Nation's readiness and response capabilities, protecting against threats that could cause significant harm to the Nation.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 8: US-CERT Operations
PPA: US Computer Emergency Readiness Team
Program Increase: Positions 23, FTE 23, Dollars \$16,875

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							185	185	73,152
Program Increase							23	23	16,875
Total Request	165	118	79,116	165	150	79,116	208	208	90,027

Description of Item

For FY 2014, NPPD requests 23 positions/23 FTE and an increase of \$16.875 million for US-CERT Operations, which leads and coordinates efforts to improve the Nation’s cybersecurity posture, promote cyber information sharing, and manage the cyber risks posed to the Nation. As part of that mission, US-CERT Operations analyzes and reduces cyber threats and vulnerabilities; disseminates cyber threat warning information; coordinates with partners and customers to achieve shared cyber situational awareness of the Nation’s cyber critical infrastructure; provides response and recovery support for National assets; and advises on national-level cybersecurity policy and guidance. This request would allow US-CERT Operations to increase its analytic staff and support.

Justification

US-CERT Operations will increase its analytic capability, allowing it to fully utilize NCPS Block 3.0 and NCPS Block 2.2. US-CERT will continue to staff DHS’s site at Corry Station in Pensacola, Florida in order to support additional data and volume sources from the Continuous Monitoring and Diagnostics (CMD), ECS, and CISCIP programs.

The increasing volume and sophistication of cyber exploits, as illustrated by the 52% increase of incidents reported to US-CERT from FY 2011 to FY 2012, increases the need for secure implementation of technology, coordinated incident response, and rapid recovery of critical functions. Moreover, with the implementation of NCPS Block 3.0, the volume of intrusion and malware information will increase significantly, and US-CERT’s analytic capacity must increase commensurately to ensure that new threats are identified and that signatures are added to NCPS. The increased analytic capability will help generate, implement, and monitor an array of countermeasures used by Block 3.0.

The DHS site at Corry Station will use a configuration largely mirroring the capabilities of the main facility in the DC Metro area. The Corry Station installation is designed as a fully functional US-CERT facility with all network connectivity and resources that are available at the Glebe Road facility. The facility will be a fully operational 24x7 site, co-located on a DOD installation in a DOD structure currently conducting cybersecurity analyst training, with unclassified and classified space.

The facility is specifically designed to accommodate US-CERT analytical staff, malware lab capabilities, software and hardware testing labs, video conferencing ability, 24x7 help desk support, security operations center and network operations center support personnel. These capabilities and personnel will be co-located with the NCCIC and NSD 24x7 network administration support personnel, and the National Coordinating Center radio room and space.

Adding DHS staff at Corry Station will meet critical continuity of operations objectives, facilitate continued monitoring and protection of Federal networks, provide expanded capability to analyze malware, and support cross-sector information sharing in the event of a major disaster affecting US-CERT's operations based in the Washington, D.C. area.

Impact on Performance (Relationship of Increase to Strategic Goals)

As US-CERT's protection and response responsibilities continue to grow, it must address the increasingly complex requirements necessary to build and enable the capabilities to respond, mitigate, and prevent malicious cyber activities.

US-CERT's situational awareness across the cyber landscape must increase in response to evolving threats and vulnerabilities. With its current capabilities, US-CERT monitors a small proportion of the network traffic within the Federal Executive Branch and has limited visibility on the cyber health of the critical infrastructure. NCPS's enhancements and the integration of those technological enhancements into a coherent and integrated cybersecurity operation are vital to handling the increasingly large volume of network traffic US-CERT will be required to monitor and analyze.

US-CERT must increase its number of analysts in order to process all the critical network traffic and to expand its incident response and technical support requirements. In addition, US-CERT's increased automated analytic capability will allow its analysts to process more security data and incident alerts than at present, enhance training and professional development of its analytic workforce and expand its technical mentoring program, and increase the Federal presence on US-CERT's 24x7 operations floor by 23 FTP.

The increase also would allow US-CERT to provide support for partners and information sharing, including MS-ISAC, and for the support of additional data and volume sources from the Continuous Monitoring and Diagnostics, ECS, and CISCP programs.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 9: Continuous Monitoring & Diagnostics
PPA: Federal Network Security
Program Increase: Positions 0, FTE 0, Dollars \$165,946

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							15	15	2,115
Program Decrease									165,946
Total Request	-	-	3,150	-	-	183,000	15	15	168,061

Description of Item

For FY 2014, NPPD requests an increase of \$165.946 million for Federal Network Security (FNS) and Federal agencies significantly improving the Federal cybersecurity posture through its Continuous Monitoring and Diagnostics (CMD) program.

CMD provides hardware, software, and services, enabling continuous diagnostics in support of mitigation activities designed to strengthen the operational security posture of federal civilian networks.

The funding will directly support Federal Executive Branch civilian departments and agencies in implementing capabilities that will improve their cybersecurity posture in accordance with the Federal Information Security Management Act (FISMA), enable improved continuous monitoring at departments and agencies, and support other critical and high priority cybersecurity capabilities to thwart advanced persistent threats in a dynamic threat environment. As the EINSTEIN program deploys initial intrusion prevention operating capability, it is equally important for departments and agencies know what is happening on their own networks and ensure that information provided to DHS enables a robust defense of Federal civilian networks from continuously evolving cyber threats.

Justification

Available to all federal civilian agencies, the CMD program involves the procurement, operations, and maintenance of monitoring equipment, diagnostic sensors and tools, and dashboards to provide situational awareness on agency and federal network levels. With CMD, agencies can identify which network security issues to address first, and empower technical managers to prioritize and mitigate

risks. DHS will receive aggregate information from each agency to provide network security situational awareness at the federal level on network security.

The CMD program expects to influence the way network Certification and Accreditation activities are undertaken. DHS anticipates CMD will remove the need for episodic certifications by providing ongoing authorization via a continuous solution.

- The continued cooperation between DHS and other agencies also correlates to the GPRA Modernization Act, which requires a move from the production of static, printed agency performance plans and reports to more dynamic, accessible, and useful online performance information. Moving from thousands of pages of printed documents to a more central, consolidated program list will make it easier for Congress and the public to understand what DHS and other Federal agencies do, and how they are performing from a cybersecurity perspective. Automated data feeds fit perfectly into this model and allow for increased cost and timesaving measures.
- The formalization of DHS’s current role in managing cybersecurity for the Federal Government’s civilian computers and networks fully integrates performance improvement officers with FNS leadership and technical experts. This is critical for effective risk management and mitigation, while mapping future requirements for a more secure cyber environment across the Federal Government.

Continuous Monitoring and Diagnostics FY 2012 - 2014 Obligation and Expenditure Plan			
FNS PPA	FY 2012 Total	FY 2013 Total	FY 2014 Total
Continuous Monitoring and Diagnostics (CMD)	\$ 3,150,000	\$ 183,000,000	\$ 168,061,000
Sensor Licensing (Seat Cost) Hardware & Software	\$ 1,446,666	\$ 65,014,000	\$ 75,750,000
Licensing	\$ -	\$ 65,014,000	\$ 75,750,000
Tool Installation & Sensor Feeds to DHS	\$ 846,667	\$ 50,361,000	\$ 73,821,000
Sensor Installation for DHS Summary Analysis	\$ -	\$ 14,070,000	\$ 16,394,000

Contract for Assessor Toolkits to Use Automated C&A	\$ -	\$ 5,000,000	\$ 1,250,000
EINSTEIN, US-CERT CM Data Integration	\$ 80,000	\$ 4,000,000	\$ 3,000,000
Salaries & Benefits	\$ -	\$ -	\$ 2,115,000
FTP/FTE	0/0	0/0	15/15
TOTAL CMD Budget	\$ 3,150,000	\$ 183,000,000	\$ 168,061,000

Impact on Performance

Agency-level efforts will vary based on the maturity of their continuous monitoring and diagnostics program. More mature agencies with existing continuous monitoring and diagnostics capabilities, particularly in the hardware and software asset management and configuration management services, may continue using those sensors or request deployment of CMD-procured tools. Other agencies may leverage existing sensors and dashboards, but must interface with federal-level oversight at DHS. Still others may utilize continuous-monitoring-as-a-service contractor to provide overall integration and continuous monitoring and diagnostics services.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**

(Dollars in Thousands)

Program Decrease 1: Critical Infrastructure Cyber Protection & Awareness
PPA: Critical Infrastructure Cyber Protection and Awareness
Program Decrease: Positions 0, FTE 0, Dollars \$(950)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Decrease							-	-	(950)
Total Request	15	12	17,116	15	12	17,438	18	18	14,953

Description of Item

This program change represents a \$0.950 million decrease to two Critical Infrastructure Cyber Protection & Awareness programs: CSEP, \$0.200 million decrease; and Cyber Exercise Program (CEP), \$0.750 million decrease.

CSEP conducts voluntary cyber security assessments across all 16 CIKR sectors, within SLTT governments. Through its Cyber Resilience Review (CRR), CSEP affords CIKR sector participants a portfolio of assessment tools, techniques, and analytics, ranging from those that can be self-applied to ones requiring expert facilitation or mentoring outreach. The CRR’s key goal is to ensure core process-based capabilities exist and are measureable and meaningful predictors of an organization’s ability to manage cyber risk to critical infrastructure. This is achieved through assessing how organizations manage the cyber security of significant information services and assets (information, technology, resources, and personnel).

CEP plans, coordinates, and conducts cyber-focused exercises, preparing and enhancing incident operational capabilities for DHS and its Federal, State, local, regional, international, and private sector partners. Working collaboratively with stakeholders, it develops, designs, and executes cyber exercises ranging from policy process exercises facilitating cybersecurity operations, to network simulations testing command and control procedures, response mechanisms, and cross-sector coordination.

Justification

CSEP will be reduced by \$0.200 million and CEP will be reduced by \$0.750 million to support higher priority cybersecurity and communications initiatives in FY 2014.

Impact on Performance

The reduced funding will affect CSEP's ability to field improved tools, techniques, and methods for cybersecurity evaluations. It will be unable to develop enhancements and revisions to the Cyber Resilience Review and provide improvements to its data analysis, including the development of resilience indices to compare and contrast entities maturity indicator levels.

CSEP estimates a reduction of approximately 20 facilitated cybersecurity evaluations delivered to CIKR owners/operators and SLTT agencies. CSEP would also need to deny an equal number of voluntary requests from our CIKR and SLTT partners to evaluate cybersecurity management capabilities and provide targeted options for consideration.

The reduced funding will affect CEP's ability to deliver its Continuity Exercise activities in their entirety; this is approximately 20 exercises. Additionally, CEP will no longer be involved in the FEMA-led Resilient Accord programs and regional offerings and, more importantly, the inclusion of any cyber exercise expertise from our organization in the numerous continuity exercises that will be held around the country at the regional level. This will negatively affect the ability of FEMA continuity planning personnel to incorporate cybersecurity concerns in their continuity exercises and plans.

Program Decrease							-	-	(5,449)
Total Request	-	-	6,101	-	-	6,101	-	-	652

Description of Item

This program change represents a \$5.449 million decrease to the National Cyber Security Division and will reduce physical upgrades and maintenance on its cybersecurity facilities.

Justification

The funding made available by this decrease will serve to support key cybersecurity and communications priorities in FY 2014.

Impact on Performance

This reduction will impact our ability to adequately address critical seating shortfalls in conjunction with completing the CONOPS for the Federal Cyber Campus.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 3: Infrastructure Protection Outreach & Engagement
PPA: Regional Field Operations
Program Decrease: Positions 0, FTE 0, Dollars \$(1,000)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							11	10	14,260
Program Decrease							-	-	(1,000)
Total Request	26	25	18,527	26	25	18,527	11	10	13,260

Description of Item

This program change represents a \$1.000 million decrease to the Critical Information (CI) Partnerships and Information Sharing Project in outreach and stakeholder engagement activities to ensure the highest priority capabilities are fully funded to achieve core missions.

DHS is currently working to strategically consolidate its stakeholder engagement efforts to gain efficiencies and curtail duplicative efforts by consolidating contract functions needed to support:

- The development of NIPP-related awareness activities, training materials, and workshops, that aids DHS outreach and engagements with critical infrastructure stakeholders within the State, local, tribal, territorial and private sector professionals responsible for CI protection and related homeland security, physical, cyber, and emergency management functions.
- The development and maintenance of the CIKR ISE for designated 18 industry sectors, selected federal agencies and State and local fusion centers who participate in the CIKR ISE, deployed primarily on HSIN-CS. HSIN-CS is the primary outreach mechanism for information sharing among the sector partners.

Justification

The development of NIPP related outreach and awareness activities, training materials, and workshops will gain efficiencies under a new contract that consolidates the functions needed to support the active and aggressive partnership outreach and engagement work. The development and maintenance of HSIN-CS for the 16 CI sectors, selected federal agencies and State and local fusion centers is expected

to gain efficiencies under a re-compete contract which will have consolidated task orders and contract capabilities when it is awarded.

Impact on Performance

A decrease will affect critical infrastructure partner's awareness of and participation in HSIN-CS by the partners who rely on the information sharing capability of HSIN-CS. HSIN-CS enhances protection and resiliency of the Nation's CI in the event of a terrorist attack, natural disaster, or other emergency. The consolidation of task orders and contract capabilities of the CIKR ISE contract will extend the time it takes for content management updates for the 16 Sectors and will impede depth and timeliness of information received by the sector partners.

National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**

(Dollars in Thousands)

Program Decrease 4: Defer Investments in CITA
PPA: Sector Management and Governance
Program Decrease: Positions 0, FTE 0, Dollars \$(2,573)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							67	64	26,896
Program Decrease							-	-	(2,573)
Total Request	70	67	30,487	70	67	30,487	67	64	24,323

Description of Item

This program change represents a \$2.573 million reduction in non-personnel mission support funds to ensure the highest priority capabilities are fully funded to achieve core missions. The CITA project’s development of a services-based architecture to facilitate interoperability and information sharing would be delayed without compromising the project’s primary mission. Additionally, in-person training for CI protection planning and Protected Critical Infrastructure Information (PCII) understanding and awareness would be reduced or shifted to a distance education vehicle without a substantial impact on the quality of the training.

Justification

This reduction will be taken from lower priority IT initiatives. The impact will move development to future budget years. Savings will be applied to higher priority missions.

Impact on Performance

The reduction in development and training costs would enable CITA to deliver products and services to internal and external partners without a substantial impact on training or system development. Development efforts for capability enhancements would be reduced while in-person training for CI protection planning and PCII understanding and awareness would shift to distance learning vehicles.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 5: Incident Planning & Exercises
PPA: Infrastructure Analysis and Planning
Program Decrease: Positions 0, FTE 0, Dollars \$(7,814)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	7,814
Program Decrease							-	-	(7,814)
Total Request	16	16	10,006	16	16	10,006	-	-	-

Description of Item

No funding is requested for the Incident Planning project in order to fund higher priority efforts. The personnel in billets associated with the Incident Planning and Exercises (IPE) project will be transferred to other Infrastructure Protection (IP) programs.

Justification

The budget eliminates the IPE program as a discrete project in order to provide additional funding for priority efforts and transfers the Federal staff to other IP projects where the activities performed under IPE will continue to operate. The reduction will eliminate contract support for this effort, but the IP operations will not be affected by this change.

Impact on Performance

This reduction is expected to have a limited impact on IP and its stakeholders. Federal FTEs and salary and benefit dollars will be transferred to other IP projects where the activities performed under IPE will continue to operate.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 6: National Initiative for Cybersecurity Education
PPA: Global Cybersecurity Management
Program Decrease: Positions 0, FTE 0, Dollars \$(4,794)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							8	8	14,798
Program Decrease							-	-	(4,794)
Total Request	8	8	14,387	8	7	14,876	8	8	10,004

Description of Item

This program change represents a \$4.794 million decrease to Cybersecurity Education, which assists in implementing the NICE by leading and coordinating efforts to improve the Nation’s cybersecurity education posture and ensure a robust, competent cybersecurity workforce. It also focuses on relationship building among public and private cybersecurity institutions with regard to education and workforce development, including developing, implementing, and promoting nationwide standards ensuring consistent competency levels.

Cybersecurity Education will reduce support to three of NICE’s efforts: the National Institute for Cybersecurity Studies (NICS); the Cybersecurity Training and Career Roadmap; and the Individual Competency & Tracking System.

NICS is a web-based application designed to make cybersecurity education and training more accessible and enhance cybersecurity awareness, formal education and training, and career pursuit. The Cybersecurity Training and Career Roadmap tracks cyber-specific knowledge, skills, and abilities to relevant education and training opportunities. The Individual Competency and Tracking System will define the Federal Government’s cybersecurity workforce through personnel inventories.

Justification

The funding made available by this reduction will serve to support higher-priority cybersecurity efforts, including intrusion prevention, information sharing, and cybersecurity operations and analysis.

Impact on Performance

This program reduction will defer the full assessment of the national cybersecurity workforce by four years. The initial features of the NICS portal, including the ability to disseminate the specialty area framework that describes to the national audience, will not be available until FY 2017.

This program reduction also inhibits expansion of the Integrated Cybersecurity Education Communities (ICEC) project, strengthening cybersecurity at the high school level, thus expanding the pipeline of cybersecurity professionals entering the workforce. Tasked to affect 1.7 million students in ten years, the funding reduction in FY 2014 presents a three year delay in affecting 1.7 million students. Finally, the reduction in funding will inhibit the technical assistance provisioning of development of federal and non-federal cybersecurity workforce programs through the further expansion of training programs, talent management tools, and professional development programs to enable the retention of our most critical skilled cybersecurity professionals.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 7: Next Generation Networks
PPA: Next Generation Networks
Program Decrease: Positions 0, FTE 0, Dollars \$(5,253)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							12	12	26,521
Program Decrease							-	-	(5,253)
Total Request	2	1	24,366	2	1	25,253	12	12	21,268

Description of Item

This program change represents a \$5.253 million decrease to the Next Generation Networks (NGN) Priority Services program. The goal of Priority Services program is to ensure NS/EP telecommunications during an emergency as commercial telecommunications carriers modernize their networks. NS/EP communications currently are provided through PTS services. However, commercial telecommunications networks are modernizing from the circuit-switched infrastructure upon which PTS services are based. The NGN program is working with major commercial telecommunications carriers as they make the transition to IP-based infrastructures to deploy features enabling NS/EP priority service. The NGN Priority Services program will ultimately deliver priority voice, video, and data communication services.

In FY 2014, the NGN Priority Services program is continuing implementation of NS/EP priority voice service capabilities for the core in AT&T, Verizon, and Sprint networks as the carriers upgrade to IP-based infrastructures. In addition, the program will conduct planning that will support providing priority voice services for wireless users.

Justification

The funding made available by this reduction will serve to support key cybersecurity and communications priorities in FY 2014.

Impact on Performance

The implementation of NGN Priority Services capability for the core networks will be delayed by one year due to current contracts being re-competed for the GETS service. These contracts provide the

vehicle to perform the NGN core development. NGN was originally schedule to reach full operational capability in the core landline networks by FY 2018; instead FOC is now expected late 2020 or 2021.

Without this capability, the current PTS Priority services, to include GETS, and SRAS will start to degrade as long distance carriers fully transition to IP-based packet switching, and the circuit switched networks, which GETS currently resides, are phased out.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**

(Dollars in Thousands)

Program Decrease 8: Protective Security Advisors
PPA: Regional Field Operations
Program Decrease: Positions 0, FTE 0, Dollars \$(346)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							120	108	28,624
Program Decrease							-	-	(346)
Total Request	117	105	25,499	117	105	25,499	120	108	28,278

Description of Item

This program change represents a \$0.346 million decrease to the PSA Project which provides comprehensive critical infrastructure protection capacity. PSAs are deployed to support IP risk-reduction efforts and support response to all hazardous incidents, providing expertise on reconstituting critical infrastructure and surge capabilities to more effectively support threat-driven actions. They serve as the Department’s onsite critical infrastructure and vulnerability assessment specialists, while giving a local perspective to—and supporting the development of—the national risk picture by identifying, assessing, monitoring, and minimizing the risk to critical infrastructure at the State, local, and regional levels.

PSAs conduct Enhanced Critical Infrastructure Protection security surveys at critical infrastructure facilities to assess overall security postures and track the implementation of new or improved protective measures. They inform and educate facility owners and operators on the criticality of the facilities and related threats from terrorism, while forging strong relationships among Level 1 and Level 2 facility owners and operators, all levels of government, and local law enforcement. They provide infrastructure security and resiliency expertise to government officials and their private sector counterparts who are responsible for security at mass gatherings, NSSEs, and high-level special events.

Justification

This reduction will be applied to lower priority geospatial analyst contract support. The program will reduce the number of geospatial analyst contractors by two, whose workload will be absorbed by the remaining Federal staff and contract support in order to fund higher priority capabilities.

Impact on Performance

Funding made available through this reduction will serve to increase performance in key Departmental priorities. The PSA project will still meet the most critical (Level 1 and Level 2) owners' and operators' requirements to receive recurring and ad hoc GIS materials, compile various types of geospatial information into map and data products, and analyze geospatial data from accumulated sources to respond to diverse questions in support of NSSEs and other events, incidents, and vulnerability reduction/resilience.

Program Decrease							-	-	(2,000)
Total Request	76	55	22,732	76	55	22,732	114	93	23,542

Description of Item

This project change represents a \$2.0 million reduction to the overall Sector Specific Agency Management Project to ensure the highest priority capabilities are fully funded.

Justification

This reduction will be taken from a lower priority initiative that comprise work with the Chemical, Commercial Facilities, Critical Manufacturing, Dams, Nuclear, and Emergency Services sectors, and the Interagency Security Committee. For example, training will shift from in-person training to less expensive distance-learning vehicles where appropriate, while more partner meetings will be held via videoconferencing and lower priority initiatives will be cancelled.

Impact on Performance

Funding made available through this reduction will serve to increase performance in other Departmental priorities. Lower priority initiatives will be cancelled and efficiencies will be realized through the use of distance learning vehicles for training and the use of videoconferencing for partner meetings.

Program Decrease							-	-	(13,932)
Total Request	-	-	297,259	-	-	293,852	-	-	256,549

Description of Item

This program change represents a reduction in contract funding across the IPIS appropriation by \$13.932 million in order to maintain current staffing levels.

\$K	Contract Reductions to Maintain Staffing Levels		
	FTP	FTE	Total
Infrastructure Analysis & Planning			(1,296)
Sector Management & Governance			(3,780)
Regional Field Operations			(1,620)
Infrastructure Security Compliance			(4,104)
Office of Emergency Communications			(648)
Priority Telecommunications Services			(648)
Next Generation Networks			(108)
Programs to Study & Enhance Telecommunications			(540)
Critical Infrastructure Protection Programs			(1,188)
Total, Contract Reductions	0	0	(13,932)

NPPD will reduce contract support that assists with identifying and mitigating vulnerabilities; increasing preparedness for facilities, systems, and surrounding communities; and assessing the impact of risk mitigation efforts. NPPD will also reduce contract support that assists in maintaining effective telecommunications for Federal Government users in national emergencies and for establishing policies and promoting solutions for interoperable communications at the Federal, State, and local levels.

Justification

Current staffing levels across the IPIS appropriation is critical in order to provide Federal FTP support to infrastructure across the country in coordination with SLTT officials and private-sector decision makers, while protecting chemical facilities and supporting the responsibilities specified in Executive Order 13618.

The contract dollars supporting IPIS are not as critical as maintaining the current staffing level of Federal personnel. Specifically, the Federal FTP will:

- Identify, prioritize, and protect the Nation's CIKR, as well as assess CIKR vulnerabilities, consequences, and risks
- Provide all levels of government and private sector partners with the ability to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities
- Execute the NIPP and coordinate the efforts of the 16 CIKR sectors to implement and execute their sector-specific plans.
- Drive compliance with risk-based performance standards for high-risk chemical facilities, through the CFATS regulatory program and manage the proposed Ammonium Nitrate Security Program
- Conduct Continuity of Government testing, training, and implementation activities, as directed under NSPD-51 and HSPD-20(National Continuity Policy)
- Maintain operation of the joint industry-government center
- Further develop an Advanced Technology group to develop, maintain and evolve a Continuity of Communications Architecture that meets NS/EP requirements
- Further support the One DHS Committee on Emergency Communications and leverage that group to develop and validate unified DHS positions for the NS/EP Executive Committee
- Continue to successfully maintain cyber assurance within communications networks, as we transition from circuit-switched technology to IP-based packet-switched technology

Impact on Performance

Contracts will be reduced across communications and infrastructure protection projects. Efforts in these areas will be only minimally impacted by the reductions. Critical mission functions are performed by Federal staff.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**

(Dollars in Thousands)

Program Decrease 11: Unfilled Positions Reduction
 PPA: Critical Infrastructure Cyber Protection and Awareness
 Business Operations
 Program Decrease: Positions (5), FTE (5), Dollars \$(540)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							78	78	10,046
Program Decrease							(5)	(5)	(540)
Total Request	70	62	8,401	70	62	8,401	73	73	9,506

Description of Item

This program change represents a reduction of 5 FTP/5 FTE and \$0.540 million in salaries and benefits across the Infrastructure Protection and Information Security appropriation by eliminating select unfilled positions.

\$K	Unfilled Position Reductions		
	FTP	FTE	Total
Critical Infrastructure Cyber Protection & Awareness	(1)	(1)	(108)
Business Operations	(4)	(4)	(432)
Total, Unfilled Position Reductions	(5)	(5)	(540)

Positions will be reduced in the Critical Infrastructure Cyber Protection and Awareness (CICPA) and the Business Operations PPAs.

Business Operations supports Cybersecurity and Communications leadership by establishing policies and direction to sustain overall cybersecurity strategy and planning through effective integration of resource and financial management, human capital, facilities, performance management, policy development and implementation, information and personnel security, and strategic planning. Business Operations also oversees the implementation of national cybersecurity policies and ensures that appropriate resources are available to support its mission and specialized information technology systems. Four positions will be eliminated.

Of the five positions being eliminated, one will be eliminated from CSEP. CSEP conducts voluntary cybersecurity assessments across all 16 CIKR Sectors and SLTT Governments and provides regionally placed support through its Cyber Security Advisor initiative. Cybersecurity Advisors are the principle field liaisons and provide a Federal resource to regions, communities, and businesses. Their primary goal is to assist in protecting cyber components within the Nation's CIKR by acting as individual representatives of the Department, forming personal, on-the-ground connections with CIKR owners and operators.

Justification

This program change represents a reduction in salary and benefit funds to ensure the highest priority capabilities are fully funded to achieve core missions.

Impact on Performance

The Cybersecurity Evaluations Program and Business Operations reductions in positions will not compromise the projects' primary missions.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for infrastructure protection and information security programs and activities, as authorized by title II of the Homeland Security Act of 2002 (6 U.S.C. 121 et seq.), [\$1,166,633,000] \$1,201,994,000,¹ of which [\$402,000,000, to remain available until September 30, 2014] \$365,144,000 shall remain available until September 30, 2015:³ [be available for Network Security Deployment and strengthening cybersecurity of federal executive branch civilian agencies: Provided, That, notwithstanding section 503 of this Act or section 1532 of title 31, United States Code, funds made available for the purpose of strengthening cybersecurity of federal executive branch civilian agencies may be transferred within the Department or to other Federal agencies for the same purpose as determined by the Secretary: Provided further, That no transfer described in the previous proviso shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.] Provided, That \$168,061,000 shall be used to deploy on Federal systems technology for improvement of the agency information security policies, practices, and systems covered by 44 U.S.C. 3543(a): Provided further, That funds provided under this heading shall be used to assist and support Government-wide and agency-specific efforts to provide adequate, risk-based, and cost-effective cybersecurity measures that address escalating and rapidly evolving threats to information security, including the acquisition and operation of a continuous monitoring and diagnostics program that includes equipment, software, and services supplied by the Department of Homeland Security.⁴

Change	Explanation
¹ ... [\$1,166,633,000] <u>\$1,201,994,000</u> ...	Dollar change only. No substantial change proposed.

Infrastructure Analysis and Planning Mission Statement

Infrastructure Analysis and Planning facilitates the identification, prioritization, protection, and resilience of the Nation's Critical Infrastructure, as well as the assessment of critical infrastructure risk. These projects provide a comprehensive inventory of the Nation's Critical Infrastructure assets and collect vulnerability assessments and consequence information required to produce comprehensive asset and system risk assessments. These Critical Infrastructure protection assessments enable the analysis of interdependencies and cascading effects and increases partners' understanding of risks, potential protective measures, and best practices. Department of Homeland Security (DHS) is focused on improving the quality of risk information and providing a better understanding of interdependencies and dependencies which were areas for improvement identified in the 2011 National Annual Report.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	8,714	8,714	8,413	(301)
11.3 Other than full-time permanent	175	175	168	(7)
11.5 Other personnel compensation	290	290	280	(10)
12.1 Benefits	2,440	2,440	2,356	(84)
Total, Salaries & Benefits	11,619	11,619	11,217	(402)

The FY 2014 Request includes \$11,217k for salaries and benefits for 85 FTE. The change includes an increase of 12 FTP/12 FTE and \$1,728k for Balanced Workforce Initiative. This also includes a decrease of 16 FTP/16 FTE and \$2,218k for FY 2013 Transfer, and an increase of \$88k for FY 2014 pay raise.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$921	\$921	\$661	-\$260

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 Request includes a decrease of \$260k of which \$200k is applicable to travel reduction and \$60k is applicable to Incident Planning & Exercises.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$20	\$20	0	-\$20

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 Request includes a decrease of \$20k for Incident Planning & Exercises.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$22,187	\$22,187	\$14,830	-\$7,357

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2014 Request includes a decrease of \$7,357k. This includes a \$1,728k decrease to Balanced Workforce, \$1,068k decrease to FY 2013 Transfer, \$250k decrease to Unfilled Positions Reduction, \$6,811k decrease to FY 2013 Incident Planning & Exercises, and a \$2,500k increase to FY 2014 Transfer.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$14,086	\$14,086	\$12,075	-\$2,011

Purchase from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 Request includes a decrease of \$2,011k. This includes a \$769k decrease to FY 2013 OFPP Savings, \$767k decrease to FY 2013 Carryover Reductions, \$4k decrease to FY 2014 Adjustment, \$396k decrease to Unfilled Positions Reduction, \$80k decrease to FY 2013 Incident Planning & Exercises, and a \$5k increase to CAO Transfer.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$21,440	\$21,440	\$18,996	-\$2,444

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contact with the private sector or another Federal Government account. The FY 2014 Request includes a decrease of \$2,444k. This includes a \$1,000k decrease to FY 2013 Carryover Reductions, \$650k decrease to Unfilled Positions Reduction, and \$794k decrease to FY 2013 Incident Planning & Exercises.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$107	\$107	\$58	-\$49

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 Request includes a decrease of \$49k for FY 2013 Incident Planning & Exercises.

Sector Management and Governance Mission Statement

Sector Management and Governance increases the ability of all levels of government and private sector Critical Infrastructure (CI) partners to assess risks, coordinate programs and processes, and execute risk management programs and activities. These projects support the framework that governs the Nation's approach to critical infrastructure protection and resilience providing cross-sector preparedness, public education, and academic engagement to support NIPP implementation. Sector Management and Governance also provides a strategic and coordinated approach for enterprise CI data management and IT development and employs a governance structure that enables the secure sharing of CI data and analysis with our partners.

Summary Justification and Explanation of Changes

Object Classes	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	14,228	14,228	17,524	3,296

Regional Field Operations Mission Statement

Regional Field Operations builds a regional capacity across the sectors to secure critical infrastructure through the deploying of NPPD/IP products and services for the SLTT governments and the private sector partners. These Projects support the regional implementation of Infrastructure Analysis and Planning and Sector Management and Governance Projects, provide effective legal and policy-compliant structures and procedures for engagement within and among critical infrastructure public-private partnerships, and create a unifying information-sharing environment for the critical infrastructure community, from the national to the local level.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	15,716	15,716	14,844	(872)
11.3 Other than full-time permanent	314	314	297	(17)
11.5 Other personnel compensation	524	524	495	(29)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	15,716	15,716	14,844	(872)
12.1 Benefits	4,401	4,401	4,156	(245)
Total, Salaries & Benefits	20,955	20,955	19,792	(1,163)

The FY 2014 Request includes \$19,792k for salaries and benefits for 142 FTE. The change includes a decrease of 12 FTP/12 FTE and \$1,603k for FY 2013 Transfer. This also includes an increase of 2 FTP/2 FTE and \$282k for Balanced Workforce Initiative, and an increase of \$158k for pay raise.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$1,221	\$1,221	\$939	-\$282

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 Request includes a decrease of \$282k for travel reduction.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA Rent	\$230	\$0	\$0	-\$230

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. The FY 2014 Request includes a decrease of \$230k for GSA rent reduction.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$24,000	\$24,230	\$22,153	-\$1,847

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2014 Request includes a decrease of \$1,847k.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$16	\$16	\$15	-\$1

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 Request includes a decrease of \$1k.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$3,200	\$3,200	\$3,209	\$9

Purchase from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 Request includes an increase of \$9k for CAO Transfer.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$100	\$100	\$2,955	\$2,855

Equipment includes all costs for the purchase of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 Request includes an increase of \$2,855k for Infrastructure Protection Tools.

Infrastructure Security Compliance Mission Statement

The Infrastructure Security Compliance (ISC) project has made the Nation safer by ensuring infrastructure security planning that meets risk-based performance standards for high-risk chemical facilities, through the Chemical Facility Anti-Terrorism Standards (CFATS) regulatory program. In addition, the ISC project manages the proposed Ammonium Nitrate Security Program, which creates a proposed framework that would regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.?

Cybersecurity Coordination Mission Statement

The Cybersecurity Coordination program integrates information from the six Federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the Federal centers, an information system for online collaboration, and information technology support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the National Cybersecurity and Communications Integration Center (NCCIC) environment.

Network Security Deployment Mission Statement

Network Security Deployment is responsible for the development, acquisition, deployment, operations, and maintenance of the National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN. NCPS is an integrated system of intrusion detection, analytics, intrusion prevention, and information sharing capabilities that are used to defend Federal civilian departments and agencies information technology infrastructure from cyber threats.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	7,370	8,171	12,290	4,920
11.3 Other than full-time permanent	147	163	246	99
11.5 Other personnel compensation	246	272	410	164
12.1 Benefits	2,064	2,288	3,441	1,377
Total, Salaries & Benefits	9,827	10,894	16,387	6,560

The FY 2014 Request includes \$16,387k for salaries and benefits for 119 FTE. The change includes an increase of 53 FTP/55 FTE and \$6,560k to support EINSTEIN and intrusion prevention and information sharing initiatives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$444	\$412	\$221	-\$223

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 Request includes a decrease of \$223k for travel efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$958	\$958	\$1,959	\$1,001

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. The FY 2014 Request includes an increase of \$1,001k for rent redistribution.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$24,294	\$44,326	\$47,016	\$22,722

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2014 Request includes an increase of \$22,722k for intrusion prevention and information sharing initiatives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$64,043	\$124,043	\$144,648	\$80,605

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 Request includes an increase of \$80,605k for intrusion prevention and information sharing initiatives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$37,404	\$47,404	\$52,404	\$15,000

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 Request includes an increase of \$15,000k for intrusion prevention and information sharing initiatives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$2,673	\$3,606	\$3,606	933

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
contract with the private sector or another Federal account. The FY 2014 Request includes an increase of \$933k for the operations and maintenance of cybersecurity facilities.				

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$84,089	\$89,089	\$112,668	\$28,579

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 Request includes an increase of \$28,579k for EINSTEIN-related initiatives.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$4,457	\$6,457	\$26,721	\$22,264

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 Request includes an increase of \$22,264k for EINSTEIN-related initiatives.

Global Cybersecurity Management Mission Statement

Global Cyber Security Management develops and promulgates sound practices for software developers, information technology security professionals, and other CIKR stakeholders. It also addresses the need to build a skilled cyber workforce for today and tomorrow and provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	2,034	2,034	2,049	15

Priority Telecommunications Services Mission Statement

Priority Telecommunications Service is specially designed telecommunications services to support the national security and emergency preparedness user community during natural or man-made disasters when conventional communications services are ineffective. In addition to enhancing critical infrastructure protection, these telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, to assist with continuity activities.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	3,940	3,940	5,706	1,766
11.3 Other than full-time permanent	79	79	114	35
11.5 Other personnel compensation	131	131	190	59
12.1 Benefits	1,103	1,103	1,597	494
Total, Salaries & Benefits	5,253	5,253	7,607	2,354

The FY 2014 Request includes \$7,607k for salaries and benefits for 59 FTE. The change includes transfers of 9 FTP/9 FTE and \$914k for proper staff alignment. This also includes an increase of 10 FTP/10 FTE and \$1,400k for the DHS Balanced Workforce Initiative and an increase of \$40k for the pay increase.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$214	\$234	\$83	-\$131

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 Request includes a decrease of \$131k for travel efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$23,373	\$19,057	\$14,192	-\$9,181

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2014 Request includes a decrease of \$9,181k for efficiencies, savings, and the removal of a one-time, non-recurring transfer.

Programs to Study & Enhance Telecommunications Mission Statement

The Programs to Study and Enhance Telecommunications develops models and conducts technical analyses of public communications infrastructures and equipment, and identifies vulnerabilities in new communications technologies due to the Telecommunication Electromagnetic Disruptive Effects. It also works with the international communications industry standards organizations to ensure that evolving commercial standards address the technical requirements of national security and emergency communications.

Summary Justification and Explanation of Changes

K. DHS Balanced Workforce Strategy

In order to establish a high-performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience, and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment, the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

NPPD requests \$14.262 million in IPIS salaries and benefits dollars and an offset of \$20.445 million in program/contract dollars for 117 FTP/117 FTE as part of the FY 2013 and FY 2014 DHS Balanced Workforce Strategy.

FY 2014 DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding needed to hire Federal employees:
 - o \$8.319 million for 59 FTP/59 FTE.
- Amount of program/contract funding that will be terminated:
 - o \$13.374 million program/contract cost. There is a projected \$5.055 million cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.
- Implementation timeline:
 - o NPPD's FY 2014 Balanced Workforce Strategy will be implemented in FY 2014.

- Contractor functions will be reduced and positions will be converted in accordance with the Department’s Balanced Workforce Initiative with a particular focus on contractors who are performing “nearly government inherent” responsibilities.
- Contractor reductions will be absorbed by the existing Federal Government employees and new FTE converted positions.

FY 2013 DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding needed to hire Federal employees:
 - \$5.943 million for 58 FTP/58 FTE.
- Amount of program/contract funding that will be terminated:
 - \$10.033 million program/contract cost. There is a projected \$1.128 million cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.
- Implementation timeline:
 - NPPD’s FY 2013 Balanced Workforce Strategy will be implemented in FY 2013 and FY 2014, due to the FY 2013 Continuing Resolution.
 - Contractor functions will be reduced and positions will be converted in accordance with the Department’s Balanced Workforce Initiative with a particular focus on contractors who are performing “nearly government inherent” responsibilities.
 - Contractor reductions will be absorbed by the existing Federal Government employees and new FTE converted positions.

Annualization of FY 2012 Revised Enacted DHS Balanced Workforce Strategy

- Annualization of 25 FTE will be funded using existing salaries and benefits resources.

FY 2012 DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding needed to hire Federal employees:
 - \$21.000 million for 143 FTP/171 FTE.
- Amount of program/contract funding that will be terminated:

- \$31.165 million program/contract cost. There is a projected \$10.165 million cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.
- Implementation timeline:
 - NPPD's FY 2012 Balanced Workforce Strategy will be implemented in FY 2012 into FY 2013, due to the FY 2012 Continuing Resolution.
 - Contractor functions will be reduced and positions will be converted in accordance with the Department's Balanced Workforce Initiative with a particular focus on contractors who are performing "nearly government inherent" responsibilities.
 - Contractor reductions will be absorbed by the existing Federal Government employees and new FTE converted positions.

Section 2.3: Federal Network Resilience Division	11
Section 2.4: Office of Emergency Communications Division.....	14
Section 2.5: Stakeholder Engagement and Cyber Infrastructure Resilience Division.....	17
Section 2.6: Assistant Secretary for Cybersecurity & Communications	19
Section 3: Office of Cyber and Infrastructure Analysis.....	27
Section 3.1: Purpose.....	27
Section 3.2: Revised Current Services Section.....	30

Section 1: Overview

The National Protection and Programs Directorate is submitting this addendum to support the functional realignment of its budget structure. This includes changes to the budget structure of the Office of Cybersecurity and Communications (CS&C), as well as the creation of a PPA for a new Office of Cyber and Infrastructure Analysis (OCIA).

Approval of the revised CS&C budget structure provides a more accurate representation of recent organizational changes. Executive Order (E.O.) 13618 signed by President Barack Obama, directs the following:

1. Establishment of the National Security and Emergency Preparedness (NS/EP) Communications Executive Committee, or ExCOM, to focus on advising the President on best practices in NS/EP communications matters;
2. Creation of the ExCOM Joint Program Office (JPO) to support the ExCOM's activities on a full-time and professional level and coordinate NS/EP programs, priorities, goals, and policies; and
3. Mandated a realignment of the National Communications System (NCS) within CS&C.

E.O. 13618 provided the opportunity to re-examine CS&C's organizational structure, solicit the input of CS&C stakeholders, and make informed organizational changes. The re-organization and requested Program, Project and Activity (PPA) structure elicits stronger partnerships and advanced, agile operations in an evolving mission space, narrowing exploitable gaps by bringing more operational communications and cybersecurity programs within a single point of coordination. As a result, CS&C becomes more efficient and effective in enhancing the security, resiliency, and reliability of the Nation's cyber and communications infrastructure.

CS&C proposes a new budget structure that reduces the number of PPAs from 12 to 9 and closely aligns PPAs with the new organizational structure. It is important to note the requested budget structure changes do not in any way cause changes to the Fiscal Year (FY) 2014 plans and milestones, or program changes. Rather, the PPA restructuring request will:

- Align resources with specific divisions and their programs/projects;
- Link strategy with resources;
- Maximize program transparency for all stakeholders;
- Enhance budgetary planning and control;
- Promote performance reporting and evaluation;
- Facilitate management oversight; and
- Ensure alignment between major investments and budgetary resources.

Presidential Policy Directive on Critical Infrastructure Security and Resilience (PPD-21) signed by President Barack Obama, directs the implementation of an integrated analysis function for critical infrastructure that will support NPPD Operational elements with strategic and operational analysis on incidents, threats, and emerging risks. This capability will reside in OCIA. The

creation of dedicated funding for the OCIA would allow for an integrated physical and cyber security threat, vulnerability, and consequence analytical capability in one office supporting all of NPPD, and that reports directly to the Under Secretary. Note that the requested budget structure modifications do not in any way alter FY 2014 plans and milestones or program changes. Rather, the PPA restructuring request more accurately represents how the programs execute missions and support functions.

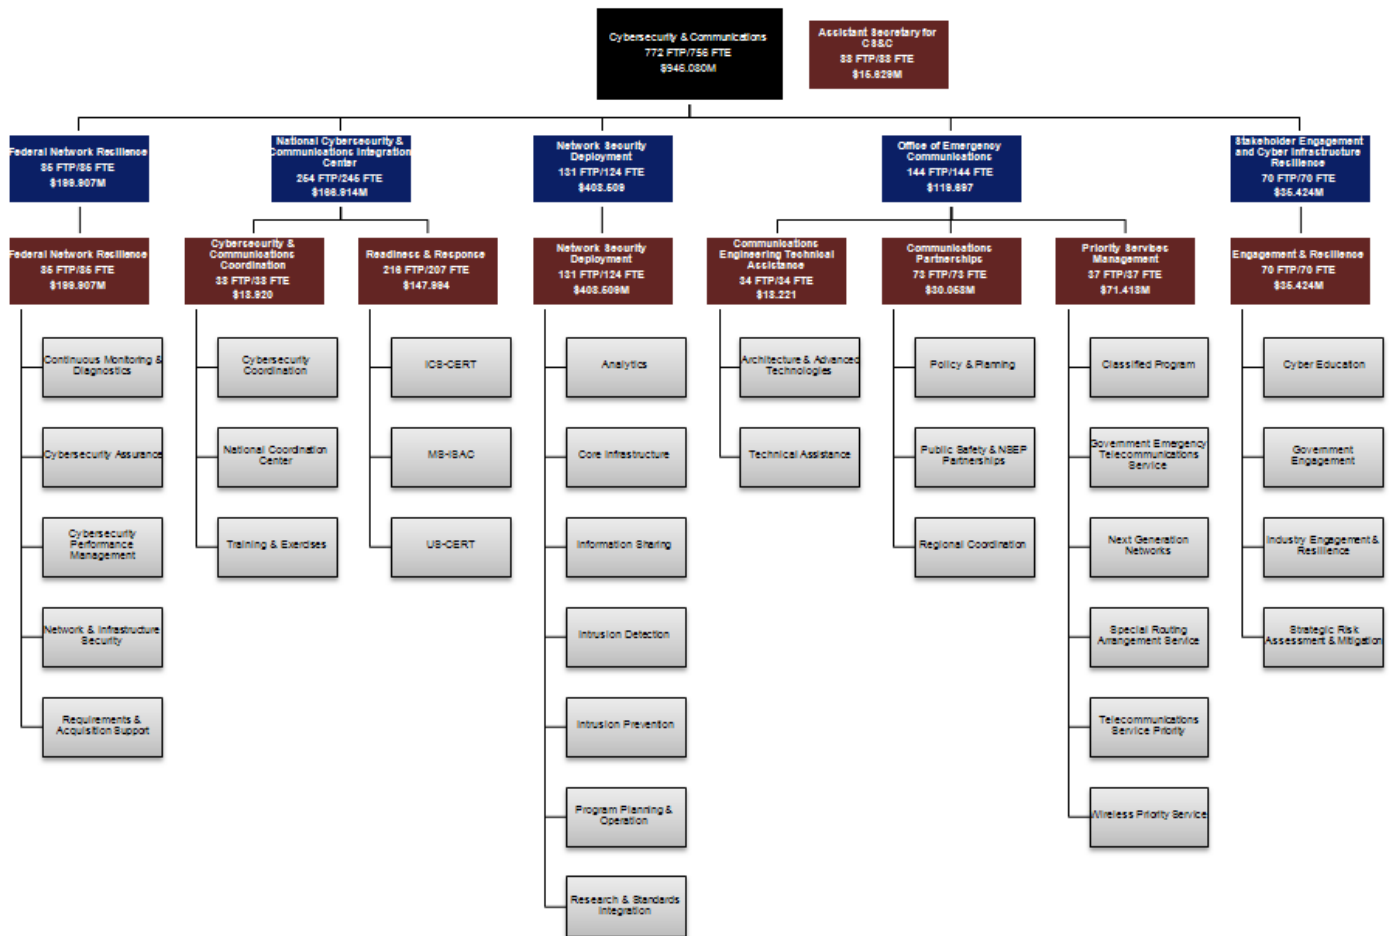

The addendum is submitted to:

1. Ensure proper alignment of projects and activities with DHS and NPPD strategic goals
2. Align the budget and programmatic structure more closely with organizational structures
3. Increase transparency and accountability for mission execution and performance through the alignment of projects and PPAs

The table and organizational chart below presents the FY 2014 budget in the structure requested in this addendum.

Section 2: Cybersecurity & Communications

PPA/Project	FY 2014 President's Budget Request

Section 2.1: National Cybersecurity and Communications Integration Center Division

This Budget Addendum describes the National Cybersecurity and Communications Integration Center (NCCIC) Division and establishes a separate Program, Project, and Activity (PPA) for 1) Cybersecurity & Communications Coordination, and 2) Readiness & Response. CS&C's cyber and communications incident response, shared situational awareness and interagency coordination efforts have been too compartmentalized. Consolidation of these operational activities under one division is necessary to improve unity of effort, specifically enhancing collaboration and information sharing among CS&C and its partners to meet the changing threat landscape. The request is a realignment of 254 FTP/245 FTE positions and \$164.445 million to create two new PPAs:

- Cybersecurity & Communications Coordination – CS&C requests a realignment of 38 positions/38 FTE and \$18.920 million from: 1) Critical Infrastructure Cyber Protection & Awareness Cyber Exercises; 2) Critical Infrastructure Protection Programs National Coordination Center Operations and Training & Exercises; and 3) Cybersecurity Coordination activities. These funds will establish the Cybersecurity & Communications Coordination PPA and support the National Integrated Cybersecurity and Communications Operations Center, which provides 24x7 cyber and communications related cross-domain situational awareness and strategic analysis.
- Readiness & Response – CS&C requests a realignment of 216 positions /207 FTE and \$145.525 million from: 1) Critical Infrastructure Cyber Protection & Awareness Control Systems Security; Critical Infrastructure Cyber Protection & Awareness Multi-State information Sharing & Analysis Center (MS-ISAC); and U.S. Computer Emergency Readiness Team (US-CERT) Coordination & Integration, Operations, and Technology & Readiness activities. These funds will establish the Readiness & Response PPA and enable immediate response to cyber incidents; technical assistance to information system operators; and timely notifications regarding current and potential security threats and vulnerabilities.

PPA: Cybersecurity & Communications Coordination

Cybersecurity & Communications Coordination supports operation of a 24x7 National Integrated Cybersecurity and Communications Operations Center that includes legacy NCCIC and the National Coordinating Center (NCC) for Telecommunications. This operations center provides cross-domain situational awareness and strategic analysis of threats and incidents affecting the Nation's critical information technology and cyber infrastructure. This function also includes critical infrastructure training and cyber exercises.

Cybersecurity & Communications Coordination is comprised of three projects:

- **Cyber & Communications Integration:** The Cyber & Communications Integration program integrates information from the six Federal cybersecurity centers to provide a

fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the Federal centers, an information system for online collaboration, and information technology (IT) support and enterprise capability for the centers. Cybersecurity and Communications Integration also supports an increased number of private sector partners present in the NCCIC environment.

- **National Coordinating Center (NCC) for Telecommunications:** The NCC program leads and coordinates the initiation, restoration, and reconstitution of the NS/EP telecommunications services or facilities under all conditions, crises, or emergencies. NCC maintains 24x7 operations and readiness to ensure timely crisis response. NCC leverages partnerships within government and with industry and international partners to obtain situational awareness and determine priorities for protection and response. NCC operations and functions are fully integrated into the NCCIC operational capability.
- **Training & Exercises:** The Training and Exercise program plans, coordinates, and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners, thus ensuring a cadre of emergency response personnel are prepared to respond across the spectrum of crises and emergencies. These personnel are organized in accordance with the Emergency Support Function #2 Annex of the National Response Framework and are tasked to coordinate the restoration and provisioning of national security and emergency preparedness communications during an incident or disaster.

PPA: Readiness & Response

Readiness & Response provides immediate response to cyber incidents; timely notifications regarding current and potential security threats and vulnerabilities; and technical assistance to information system operators.

Readiness & Response is comprised of three projects:

- **United States Computer Emergency Readiness Team (US-CERT):** US-CERT provides response support and defense against cyber attacks for the Federal Executive Branch (.gov) and information sharing and collaboration among State, local, tribal and territorial (SLTT) governments, industry, and international partners. US-CERT interacts with Federal agencies, industry, the research community, SLTT governments, and other entities to disseminate reasoned and actionable cybersecurity information to the public. US-CERT also provides a way for citizens, businesses, and 34 other institutions to communicate and coordinate directly with the U.S. Government about cybersecurity.
- **Industrial Control Systems Cyber Emergency Response Team (ICS-CERT):** ICS-CERT provides focused operational capabilities for defending control system environments against emerging cyber threats. ICS-CERT provides efficient coordination of control systems-related security incidents and information sharing with Federal, SLTT

agencies and organizations; the Intelligence Community (IC); private sector constituents, including vendors, owners, and operators; and international and private sector CERTs. ICS-CERT leads this effort by responding to and analyzing control systems-related incidents, conducting vulnerability and malware analysis, providing onsite support for forensic investigations, and providing situational awareness in the form of actionable intelligence and reports.

- **State, Local, Tribal, Territorial (SLTT) Engagement:** SLTT Engagement focuses on the MS-ISAC which provides a centralized forum for information sharing between the Federal Government and SLTT government bodies through a number of crucial services, while providing opportunities to analyze and correlate information among SLTT members, which then can be efficiently aggregated and shared with US-CERT, NCCIC, and their public and private sector partners without requiring Federal personnel resources. The MS-ISAC's mission, providing a common mechanism for raising the level of cybersecurity readiness and response in all SLTT governments, is a proven operation for protecting and defending the nation's interests against threats from cyberspace.

Section 2.2: Network Security Deployment Division

This Budget Addendum describes the Network Security Deployment (NSD) Division and maintains the PPA for Network Security Deployment unchanged. The realignment eliminates an organizational layer and enhances the Assistant Secretary's span of control which will improve leadership's ability to coordinate initiatives across NSD's portfolio. In addition, the realignment consolidates CS&C enterprise-wide research, development and standards efforts among CS&C components.

The request is a realignment of 131 FTP/124 FTE positions and \$408.509 million from the current Network Security Deployment PPA and Global Cybersecurity Management's Research and Standards Integration program.

PPA: Network Security Deployment

Network Security Deployment designs, develops, acquires, deploys, sustains, and provides solutions for the National Cybersecurity Protection System (NCPS), to include intrusion prevention and detection and information sharing. NSD supports the research, development, deployment, and integration of technological capabilities across all CS&C components to enhance the protection of Federal civilian departments and agencies from advanced cyber threats. NSD will also consolidate CS&C enterprise-wide research, development and standards efforts currently dispersed among CS&C components.

Network Security Deployment is comprised of seven projects:

- **Intrusion Prevention:** Intrusion Prevention includes elements of NSD's EINSTEIN 3 Accelerated (E³A) effort. E³A improves the protection of Federal civilian departments and agencies by providing active network defense capabilities and the ability to prevent and limit malicious activities from penetrating Federal networks and systems. With this capability, CS&C will be able to automatically detect and appropriately respond to cyber threats.
- **Information Sharing:** Information Sharing capabilities enhance NCPS's ability to share information securely with multiple stakeholders, including a wide range of security operations and information-sharing centers across federal, state, local, tribal, private, and international boundaries. Effectively exchanging information with these stakeholders will help prevent cybersecurity incidents from occurring by improving access to threat information and analytic products, reducing incident response time through improved coordination and collaboration, and improving efficiencies through more automated information exchange.
- **Analytics:** NCPS's analytic capabilities capture, organize and analyze data collected from EINSTEIN sensors and other data feeds. These capabilities enable CS&C cybersecurity analysts to fuse information and correlate malicious network activity across participating Federal executive branch agencies and achieve situational awareness of high profile cyber threats.

- **Intrusion Detection:** Intrusion Detection capabilities include the elements of the intrusion detection system known as EINSTEIN 2. This capability provides CS&C’s cybersecurity analysts with improved understanding of the network environment and with increased ability to address network weaknesses and vulnerabilities.
- **Core Infrastructure:** Core Infrastructure is made up of the IT systems and facilities that enable the delivery of NCPS capabilities. The NCPS core infrastructure includes all classifications levels of the mission operating environment that US-CERT Operations analysts use to access the information generated from NCPS operational systems, communications infrastructure that links NCPS facilities, and the NCPS core data center and facility.
- **Program Planning and Operations:** Program Planning and Operations consists of mission support services and common operating costs.
- **Research and Standards Integration (RSI):** RSI advances the future state of cybersecurity through efforts in both Research and Development (R&D) and standards activities. RSI serves as CS&C’s technology transition facilitator, accelerating the integration of technologies from cutting-edge research into CS&C systems and programs. This encompasses both promoting the development of new technologies and transitioning them to operational programs. RSI also promotes the advancement of cybersecurity standards and advocates the adoption of relevant standards into CS&C’s operational systems and programs. On national and international levels, RSI influences cybersecurity standards and frameworks promoting interoperability and automation supporting CS&C’s mission.

Section 2.3: Federal Network Resilience Division

This Budget Addendum describes the Federal Network Resilience (FNR) Division which maintains the PPA for Federal Network Security unchanged. Although there is no change to the PPA other than renaming “Federal Network Security” to “Federal Network Resilience,” the CS&C functional realignment eliminates an organizational layer and enhances the Assistant Secretary’s span of control which will improve leadership’s ability to coordinate initiatives across FNR’s portfolio. CS&C requests a name change of this PPA from Federal Network Security to Federal Network Resilience to better align to its capabilities of strengthening the security posture of Federal networks.

The request is a realignment of 85 FTP/85 FTE positions and \$199.907 million from the Federal Network Security PPA and Business Operations PPA.

PPA: Federal Network Resilience

The Federal Network Resilience (FNR) division collaborates across the United States Government to strengthen the security posture of Federal networks. FNR will:

- Coordinate with Federal civilian partners and stakeholders to develop and deploy cybersecurity capabilities and standards;
- Identify barriers to better cybersecurity practices within Federal Civilian networks; and
- Use automation/tools/audits/tests to ensure best practices within Federal Civilian networks, including agency assessments.

Federal Network Resilience is comprised of the following five projects:

- **Cybersecurity Performance Management (CPM):** CPM provides operational support to Federal departments and agencies in securing Federal information systems consistent with the implementation of Office of Management & Budget (OMB) Memorandum M-10-15, *Reporting Instructions for the Federal Information Security Management Act (FISMA) and Agency Privacy Management*; OMB Memorandum M-10-28; and subsequent memoranda and directives related to evolving federal cybersecurity requirements. CPM executes DHS FISMA responsibilities by drafting the annual FISMA report to Congress for OMB review, conducting Chief Information Office (CIO)/Chief Information Security Officer (CISO) interviews with agencies, and developing updated quarterly and annual FISMA metrics (to include the Inspector General measures). CPM is charged with assessing the effectiveness of Federal civilian agency security programs and tracking the civilian Federal Executive Branch’s progress affecting improvement against the enterprise cybersecurity baseline established in FY 2011. CPM also addresses any identified solution gaps to provide federal agencies clear guidance for the migration of existing infrastructure and the implementation of new capabilities in a manner consistent with the overall federal security strategy.

- **Cybersecurity Assurance Program (CAP):** Cybersecurity Assurance addresses DHS’s responsibilities to certify and enforce federal and civilian agency implementation of network and security operational standards and best practices, to ensure that agencies comply with federal standards and policies, and to assess the state of operational readiness and cybersecurity risk for unclassified networks and systems across Federal Executive Branch civilian agencies. The Cybersecurity Assurance Program performs assessments that provide agencies with access to specialized skills and services that promote a healthy IT infrastructure across the Nation’s computer networks and systems. CAP also provides Program Management and Program Office operations support services common across all FNR capability areas. These services include DHS-required earned value management; tracking cost and schedule actuals against estimates, contracts oversight, financial planning, lifecycle cost estimating, strategic and technical planning and assessment functions, and FNR Front Office support services. These activities ensure that all of FNR’s capabilities are coordinated and delivered effectively and efficiently while continuing to evolve to meet dynamic cyber threats. Planning activities also include executing the cybersecurity policy and planning requirements as assigned to DHS in OMB Memorandum M-10-28, *Clarifying Cybersecurity Responsibilities and Activities of the Executive Office of the President* and DHS and in direct support of the DHS QHSR and the *Blueprint for a Secure Cyber Future*.
- **Network and Infrastructure Security (N&IS):** Network & Infrastructure Security leads the CNCI Trusted Internet Connection (TIC) Initiative with OMB. It optimizes network security capabilities into a common solution for the Federal information enterprise and facilitates the reduction and consolidation of external connections, including Internet points of presence, through approved access points. Reducing and consolidating external access points affords a number of benefits to the Federal government, particularly coupled with risk mitigation and added security measures. Benefits include identifiable locations for EINSTEIN 2 intrusion detection system sensor deployments, as well as a series of critical security capabilities that agencies must establish in order to be TIC-compliant. While the Office of Management and Budget maintains oversight of the TIC Initiative, implementation relies on the technical expertise of N&IS, which synchronizes the efforts of all participating Federal partners. It also monitors and oversees Federal partners’ Trusted Internet Connection Access Provider (TICAP) transition, consequently managing their baseline information systems security capabilities required under the TIC Initiative.
- **Requirements and Acquisition Support (RAS):** Requirements and Acquisition Support supervises the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all agencies. RAS assesses and prioritizes common cybersecurity needs and solutions; promotes actionable cybersecurity policies, initiatives, standards, and guidelines; enables effective cybersecurity risk mitigation strategies implementation; and measures agency implementation of strategies and compliance. More specifically, RAS delivers strategic sourcing solutions enabling government-wide cost savings for IT security products and services. It also oversees and monitors Information Systems Security Line of Business (ISSLOB) Shared Service Center performance, manages the daily operations of the

ISSLOB Program Management Office, and collaborates with other National Cyber Security Federal Network Resilience programs to assess and maintain the Federal Government's strategic cybersecurity plan.

- **Continuous Monitoring and Diagnostics (CMD):** Provides hardware, software, and services, enabling continuous monitoring and diagnostics in support of mitigation activities designed to strengthen the operational security posture of federal civilian networks. The CMD program involves the procurement, operations, and maintenance of monitoring equipment, diagnostic sensors and tools, and dashboards to provide situational awareness on agency and federal levels. With CMD, agencies can identify which network security issues to address first, and empower technical managers to prioritize and mitigate risks. DHS will receive aggregate information from each agency to provide network security situational awareness at the federal level on network security. Agency-level efforts will vary on the basis of the maturity of their continuous monitoring and diagnostics program. More mature agencies with existing continuous monitoring and diagnostics capabilities, particularly in the hardware and software asset management and configuration management services, may continue using those sensors or request deployment of CMD-procured tools. Other agencies may leverage existing sensors and dashboards, but must interface with the federal-level oversight at DHS. Still others may utilize continuous-monitoring-as-a-service contractor to provide overall integration and continuous monitoring and diagnostics services. Additionally, the CMD program is designed to enable agencies to more readily identify which network security issues to address first, thus enhancing the overall security posture of agency networks. The CMD program is expected to influence the way network Certification and Accreditation activities are undertaken. DHS anticipates CMD will remove the need for episodic certifications by providing ongoing authorization via a continuous solution.

Section 2.4: Office of Emergency Communications Division

This Budget Addendum describes the Office of Emergency Communications (OEC) Division which is formed by deactivating the National Communications System (NCS) organization and merging it with the Office of Emergency Communications. The OEC will unify and lead nationwide efforts to improve National Security/Emergency Preparedness (NS/EP) and emergency communications capabilities across all levels of government, and provides the technical staff to execute DHS's responsibilities as defined by E.O. 13618. This division incorporates functions from the decommissioned NCS and the legacy OEC.

The request is a realignment of 144 FTP/144 FTE positions and \$119.697 million to create three new PPAs:

- Communications Engineering Technical Assistance – CS&C requests a realignment of 34 positions/34 FTE and \$18.221 million to establish the Communications Engineering Technical Assistance PPA. These funds will provide technical support to the Executive Committee to develop and maintain plans adequate to provide for the security and protection of NS/EP communications.
- Communications Partnerships – CS&C requests a realignment of 73 positions /73 and \$30.058 million to establish the Communications Partnerships PPA. These funds will provide direct support to SLTT emergency responders and government officials through the development and delivery of training, tools, and onsite assistance to advance public safety interoperable communications capabilities.
- Priority Services Management – CS&C requests a realignment of 37 positions/37 and \$71.418 million to establish the Priority Services Management PPA. These funds will support the development, testing, implementation, and sustainment of NS/EP communications, including: communications that support Continuity of Government; Federal and SLTT emergency preparedness and response communications; non-military executive branch communications systems; critical infrastructure protection networks; and non-military communications networks, particularly with respect to prioritization and restoration.

PPA: Communications Engineering Technical Assistance

Communications Engineering Technical Assistance provides technical and training support to the Executive Committee to develop and maintain plans to ensure the security and protection of NS/EP communications.

Communications Engineering Technical Assistance is comprised of two projects:

- **Architecture and Advanced Technologies:** Architecture and Advanced Technologies provides vulnerability assessments of new communications technologies and evaluates their impacts on the commercial and government infrastructures. Efforts also include identification and assessment of satellite communications systems vulnerabilities, and

coordination with commercial vendors in conducting DHS-wide studies to determine and ensure sufficient satellite capabilities to prevent, protect, respond to and recover from acts of terrorism and natural disasters.

- **Technical Assistance:** Technical Assistance develops and delivers training, tools, and onsite assistance to SLTT agencies in order to advance implementation of the National Emergency Communications Plan (NECP) and public safety interoperable emergency communications capabilities.

PPA: Communications Partnerships

Communications Partnerships provides direct support to SLTT emergency responders and government officials through the development and delivery of training, tools, and onsite assistance to advance public safety interoperable communications capabilities. These efforts enhance partnerships and promote collaboration with emergency responders.

Communications Partnerships is comprised of three projects.

- **Policy & Planning:** Policy & Planning convenes and engages stakeholders at all levels—Federal and SLTT – and the private sector, to address and improve interoperable emergency communications.
- **Public Safety & NS/EP Partnerships:** Public Safety & NS/EP Partnerships engages stakeholders at all levels, Federal, SLTT and the private sector, to address and improve emergency communications.
- **Regional Coordination:** Regional Coordination Program strengthens emergency communications capabilities across Federal and SLTT governments at the regional level through trusted relationships, collaboration, and knowledge sharing.

PPA: Priority Services Management

Priority Services Management supports development, testing, implementation and sustainment of NS/EP communications, including communications that support Continuity of Government; Federal and State, local, tribal and territorial (SLTT) emergency preparedness and response Communications; non-military executive branch communications networks and systems; and critical infrastructure protection networks.

Priority Services Management is comprised of six projects:

Government Emergency Telecommunications Service (GETS): GETS provides priority communications on commercial landline communications networks to support the President, Federal and SLTT agencies, and other authorized users during National Special Security Events

(NSSE). NSSEs can include threatened and actual terrorist attacks, major disasters, and other emergencies. Capability is delivered via commercial networks using a calling card.

Next Generation Networks (NGN): NGN ensures the Federal Government keeps pace with the communications industry. NGN works with major commercial telecommunications carriers as they make the transition to Internet Protocol (IP)-based infrastructures to deploy features enabling (NS/EP) priority service.

Special Routing Arrangement Service (SRAS): SRAS provides non-traceable, priority communication service over commercial wireless and wireline telecommunications networks for a special user community. This service supports National Special Security Events directed by the Secretary, Continuity of Operations (COOP) and Continuity of Government (COG) activities. This program is required to operate under all conditions, including natural and man-made disasters, cyber attacks, and threatened and actual terrorist attacks, major disasters, and other emergencies, even when conventional communications services are congested or degraded.

Telecommunications Service Priority (TSP): TSP is the regulatory, administrative, and operational system authorizing and providing priority treatment of NS/EP telecommunications services. The TSP program provides NS/EP users with priority restoration and provisioning of telecommunications services vital to maintaining readiness or response to an incident.

Wireless Priority Service (WPS): WPS enhances the ability of NS/EP users to complete calls during a crisis. WPS provides nationwide wireless subscriber coverage for the President, Federal, and SLTT users during National Special Security Events (NSSE) and crisis situations. These services coordinate response and recovery efforts while also facilitating COOP and COG activities. Callers access the system by dialing an access number and using ordinary cellular devices over public cellular wireless networks.

Classified Program: Justification for this program will be made available under separate cover.

Section 2.5: Stakeholder Engagement and Cyber Infrastructure Resilience Division

This Budget Addendum describes the Stakeholder Engagement and Cyber Infrastructure Resilience (SE/CIR) Division which realigns functional activities across five PPAs. SE/CIR will serve as the Executive Secretariat for the Joint Program Office for the NS/EP Communications Executive Committee. SE/CIR will streamline coordination and engagement among critical infrastructure owners/operators, Federal interagency partners, and State, local, tribal and territorial (SLTT) government agencies, academia and the private sector to promote and enhance the security and resilience of the Nation's critical cyber and communications infrastructure. SE/CIR consolidates stakeholder engagement functions across CS&C into a single component responsible for public and private partnerships leading to the development of strategic risk assessments and the delivery of key mitigation capabilities to owners and operators of the Nation's critical cyber and NS/EP communications infrastructure.

The request is a realignment of 70 FTP/70 FTE positions and \$37.893 million to create a new PPA:

- Engagement & Resilience– CS&C requests a realignment of 70 positions/70 FTE and \$37.893 million to establish the Engagement & Resilience PPA. These funds will enhance lines of communication and engagement among critical infrastructure owners/operators, Federal interagency partners, SLTT government agencies for cyber and communications security and resilience.

PPA: Engagement & Resilience

Engagement and Resilience serves as the Department's primary point of engagement and coordination for communications and cybersecurity initiatives for government and industry partners, promoting and enhancing the security and resilience of the Nation's critical cyber and communications infrastructure.

Engagement & Resilience PPA is comprised of four projects:

- **Cyber Education:** Cyber Education brings together outreach activities, to include Stop-Think-Connect and National Cybersecurity Awareness Month, and education and workforce development activities such as the National Initiative for Cybersecurity Education (NICE).
- **Government Engagement:** Government Engagement program leads a consolidated, coordinated, professional cyber and communications engagement strategy with Federal and SLTT partners.
- **Industry Engagement & Resilience:** Industry Engagement program leads a consolidated, coordinated, professional engagement strategy with our Nation's critical infrastructure owners and operators.

- **Strategic Risk Assessment & Mitigation:** Strategic Risk Assessment and Mitigation program leads strategic risk assessment and mitigation projects that reduce risk to the Nation’s critical cyber infrastructure. Key projects include the Cyber Resilience Review, Software Assurance, Supply Chain Risk Management and sector wide risk assessment methodologies (e.g., Cybersecurity Assessment and Risk Management Approach).

Section 2.6: Assistant Secretary for Cybersecurity & Communications – Directorate and Administration PPA, Management & Administration Appropriation

This Budget Addendum describes the Office of the Assistant Secretary for Cybersecurity and Communications which realigns functional activities across CS&C to centralize program management, business operations, and overall strategic and policy development capabilities. The realignment will consolidate: 1) Business, Finance and Acquisition; 2) Enterprise Performance Management; 3) International Affairs; 4) External Affairs; 5) Human Capital; 6) Information Management; and 7) CS&C Continuity of Operations/Continuity of Government (COOP/COG) functions to improve operational efficiency and eliminate unnecessary duplication of effort.

The request is a realignment of 88 FTP/88 FTE positions and \$15.629 million to create a new project in the Directorate Administration PPA:

- Assistant Secretary for CS&C – CS&C requests a realignment of 88 positions/88 FTE and \$15.629 million. In addition to realigning resources within the Assistant Secretary for CS&C, this request includes the realignment of resources from the NPPD IPIS Appropriation.

PPA: Assistant Secretary for CS&C

Assistant Secretary for Cybersecurity and Communications (CS&C) manages cyber and communications policy initiatives, mission activities, and collaborations across the United States Government. The Office of the Assistant Secretary provides overall strategic/policy oversight while coordinating with national and international stakeholders to enhance the security, resilience, and reliability of the Nation's cyber and communications infrastructure. This office also supports program management and business operations and consolidates all common support services to provide more agile and transparent enterprise-wide resourcing and program execution.

Section 2.7: Detailed Crosswalk Tables

The below tables serve to crosswalk the approved PPA structure into the structure outlined in this budget addendum.

Crosswalk 1: Old PPAs to New PPAs

Please note that funding under the “Assistant Secretary for CS&C” division/PPA will be part of the M&A appropriation; all other PPAs will be part of the IPIS appropriation.

Old Division / Old PPA / New PPA	FY 2013 CR Annualized					FY 2014 President's Budget Request				
	FTP	FTE	S&B	Program	Total	FTP	FTE	S&B	Program	Total
National Cyber Security Division	432	395	\$53,359	\$671,817	\$725,176	552	536	\$71,910	\$738,499	\$810,409

Crosswalk 2: Old Projects to New Projects

Please note that funding under the “Assistant Secretary for CS&C” division/PPA will be part of the M&A appropriation; all other PPAs will be part of the IPIS appropriation. Additionally, please note that while each PPA will have a separate project line for salaries and benefits, for display purposes, the salaries and benefits have been rolled into the PPA’s other projects.

Crosswalk 4: New Projects to Old Projects

Please note that funding under the "Assistant Secretary for CS&C" division/PPA will be part of the M&A appropriation; all other PPAs will be part of the IPIS appropriation. Additionally, please note that while each PPA will have a separate project line for salaries and benefits, for display purposes, the salaries and benefits have been rolled into the PPA's other projects.

Section 3: Office of Cyber and Infrastructure Analysis

Section 3.1: Purpose

This Budget Addendum describes the need for a consolidated and integrated cyber and physical infrastructure analysis capability, called the Office of Cyber and Infrastructure Analysis (OCIA), within NPPD. This capability is an essential element of the Presidential Policy Directive on Critical Infrastructure Security and Resilience (PPD-21).

This request supports the Federal Government's national policy to take proactive steps to manage risk, strengthen security, and improve the resilience of the Nation's critical infrastructure against all hazards that could have a debilitating impact on national security, economic stability, public health, and safety. As the Nation faces a continued and growing cyber threat, understanding the potential consequences of a cyber attack upon critical infrastructure is an imperative for national security. Per PPD-21, this integrated analytical function will support the NCCIC and the National Infrastructure Coordinating Center (NICC), as well as the rest of NPPD and its stakeholders and interagency partners.

Cyber and physical critical infrastructure are inextricably linked. DHS needs a centralized and integrated analytic effort to (1) fully understand the cyber landscape vulnerabilities, consequences, dependencies, interdependencies, and cascading effects, and (2) inform decision making across the full spectrum of threats to the critical infrastructure.

This effort builds on NPPD's analytical base, and specifically supports the third strategic imperative in PPD-21 that directs implementation of an integrated analysis function for critical infrastructure that includes operational and strategic analysis on incidents, threats, and emerging risks. The integrated analysis capability will collate, assess, and integrate vulnerability and consequence information with threat and hazard information to:

- Aid in understanding and prioritizing assets and managing risk to critical infrastructure;
- Anticipate interdependencies and cascading effects;
- Support the recommendation of security and resilience measures for critical infrastructure prior to, during, and after an event or incident; and
- Support incident management and restoration efforts related to critical infrastructure.

This element will support DHS's ability to maintain and share a near real-time situational awareness capability for critical infrastructure and support NPPD operational centers with near real-time integrated analysis of vulnerability and consequence during steady state operations and incidents, incidents that may affect critical infrastructure.

To achieve this, OCIA will build expertise in consequence analysis of cyber incidents on affected critical infrastructure by leveraging CS&C as well as expanded cyber training of existing personnel and hiring of cyber subject matter experts. This will allow OCIA to provide in-depth analytical support on priority critical infrastructure sectors to assess consequences from a cyber attack.

This approach is reinforced in Executive Order 13636 titled “Improving Critical Infrastructure Cybersecurity” that calls for identification and prioritization of cyber assets and systems where a cybersecurity incident could reasonably result in catastrophic regional or national effects on public health or safety, economic security, or national security. OCIA will support the ongoing implementation of this effort within NPPD.

Recent events and exercises, including Hurricane Sandy and the 2012 National Level Exercise, have demonstrated the need for an increased understanding of critical infrastructure dependencies and interdependencies in order to better assess risk and consequences at a national level. Such analysis will allow the Federal Government and its partners to more effectively prioritize efforts, allocate resources, and support public and private sector partners.

OCIA will provide NPPD and its partners in the public and private sector with comprehensive cyber and physical infrastructure risk analysis. This analytic support will help them make informed decisions regarding prevention, protection, mitigation, response, and recovery actions to improve the overall security and resilience of the Nation’s critical infrastructure. OCIA will serve as a decision support function for all NPPD elements by providing integrated risk analysis, modeling, and simulation. OCIA activities will be consistent with and in support of ongoing whole-of-government approach to cyber and physical infrastructure security and resilience efforts.

This Budget Addendum consolidates cyber and physical infrastructure analysis functions in NPPD and realigns resources to establish a separate Program, Project, and Activity (PPA) for OCIA. OCIA would report directly to the Under Secretary for NPPD. OCIA would fully leverage the expertise and experience of the Office of Infrastructure Protection (IP) Homeland Infrastructure Threat and Risk Analysis Center (HITRAC) in critical infrastructure analysis and prioritization. HITRAC also manages the advanced modeling, simulation, and analysis work of the National Infrastructure Simulation and Analysis Center (NISAC), which combines the modeling capabilities of Sandia National Laboratories and Los Alamos National Laboratory.

PPA/Project	FY 2014 President's Budget Request				
	FTP	FTE	S&B	Program	Total
Infrastructure Protection & Information Security	58	57	\$6,657	\$20,625	\$27,282
PPA: Cyber & Infrastructure Analysis	58	57	\$6,657	\$20,625	\$27,282
C&IA Salaries & Benefits	58	57	\$6,657		\$6,657
Cyber & Infrastructure Analysis				\$20,625	\$20,625

This request is a budget-neutral realignment of \$26.618 million and 54 FTP/53 FTE positions from the Infrastructure Analysis and Planning PPA in the IPIS appropriation and \$0.664 million and 4 FTP/4 FTE the Management and Administration appropriation. A new Cyber and Infrastructure Analysis PPA will be created outside of the Office of Infrastructure Protection in the IPIS appropriation with \$27.282 million and 58 FTP/57 FTE, while \$31.357 million and 35 FTP/32 FTE would remain in the Infrastructure Analysis and Planning PPA.

Old PPA / New PPA	FY 2013 CR Annualized					FY 2014 President's Budget Request

Section 3.2: Revised Current Services Section

PPA: Office of Cyber and Infrastructure Analysis

	Perm. Pos	FTE	Amount
2012 Adjusted Enacted	42	41	\$25,693
2013 Base	42	41	\$25,693
2014 Adjustments-to-Base	16	16	\$2,345
2014 Current Services	58	57	\$28,038
2014 Program Change	0	0	(\$756)
2014 Total Request	58	57	\$27,282
Total Change 2013 to 2014	16	16	\$1,589

Note: Funding for the Infrastructure Sector Analysis project in the Infrastructure Analysis and Planning PPA was used for the FY 2012 and FY 2013 funding data. This funding would be transferred in full to the Office of Cyber and Infrastructure Analysis.

DHS requests \$27.282 million for the Office of Cyber and Infrastructure Analysis, including 58 FTP/57 FTE. This includes the following adjustments to base:

- Increase of \$2.500 million from CS&C for integrating cybersecurity and infrastructure analysis
- Increase of \$0.664 million and 4 FTP/4 FTE from IP to provide standalone business support to integrate cybersecurity and infrastructure analysis
- Increase of \$0.032 million for the FY 2014 pay increase
- Increase of 12 FTP/12 FTE for FY 2013 Balanced Workforce conversions
- Decrease of \$0.851 for efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION

\$K	FY 2012 Revised Enacted					FY 2013 Annualized CR					FY 2014 President's Budget

OCIA analyzes risk by assessing specific threats, vulnerabilities, consequences, dependencies, interdependencies, and cascading effects from physical or cyber incidents to critical infrastructure. The successful execution of this mission supports NPPD and other leaders to better understand potential impacts and inform decisions to improve security and resilience of the Nation's critical infrastructure.

Specifically, OCIA is an essential element of the third strategic imperative in PPD-21, which calls for an integrated analysis function for critical infrastructure that includes operational and strategic analysis on incidents, threats, and emerging risks. OCIA collates, assesses, and integrates vulnerability and consequence information with threat streams and hazard information to:

- Aid in prioritizing assets and managing risk to critical infrastructure;
- Anticipate interdependencies and cascading effects;
- Support the recommendation of security and resilience measures for critical infrastructure prior to, during, and after an event or incident; and
- Support incident management and restoration efforts related to critical infrastructure.

OCIA supports DHS's ability to maintain and share a real-time situational awareness capability for critical infrastructure and support NPPD operational centers with real-time operational consequence analysis that includes actionable information about imminent threats, significant trends, and awareness of incidents that may affect critical infrastructure.

OCIA provides integrated cyber and physical infrastructure analytic products to DHS and its public-private sector partners. Current product lines include standardized risk assessment methodologies and tailored products for use by critical infrastructure owners and operators, and Federal, State, Local, Tribal, and Territorial government partners. These products identify and provide risk management options regarding vulnerabilities, consequences, and threats to critical infrastructure from all.

OCIA also includes efforts to conduct strategic, operational, and tactical risk analysis, which is used to guide risk management activities and inform the prioritization of critical infrastructure. OCIA leverages working relationships with the DHS Office of Intelligence and Analysis (I&A), the broader Intelligence Community (IC), and other Federal and critical infrastructure partners to further the critical infrastructure security and resilience mission.

The OCIA mission includes four primary capability areas: Prioritization, Operational Analysis, Modeling and Simulation, and Strategic Analysis. These capabilities are derived from mission needs and operational requirements. Each capability works in concert to provide models, products, and decision support analysis for a variety of NPPD, DHS, and external partners.

- Prioritization is an important part of OCIA's capabilities. OCIA's integrated cyber and infrastructure capability will enable cross-functional national-level understanding of what systems and assets constitute critical infrastructure across 16 sectors. OCIA will expand its prioritization capability to better include IT/communications systems and improve understanding of cross-sector dependencies on cyber systems. This effort will be part of a coordinated NPPD-wide initiative conducted in close coordination with public and private sector partners. The prioritization initiative supports steady-state and incident management decision making by providing prioritized lists of critical infrastructure.

The three National Critical Infrastructure Prioritization Program (NCIPP) steady-state lists are the Level 1 and Level 2 lists for domestic assets and the Critical Foreign Dependencies Initiative for international assets. OCIA will continue to develop Infrastructure of Concern (IOC) lists in advance of or during an incident. The IOC lists are tailored to a location and potential critical infrastructure impacts (e.g., physical and economic) specific to a particular incident. The lists help in the prioritization of Federal, State, and local response and recovery activities as they relate to critical infrastructure. In FY 2014, OCIA will further integrate cyber into the critical infrastructure prioritization

analysis as directed in Executive Order 13636. This includes coordinating across DHS and with public-private sector partners to determine criteria and priorities based on national or regional consequences. In addition, OCIA plans to establish a more automated process to develop IOC lists quickly during incidents.

- Operational Analysis identifies and characterizes potential impacts to specific critical infrastructure sectors as well as cross-sector consequences within an affected region or as impacted by a particular threat. In addition, the Operational Analysis function plans, prepares for, and manages OCIA crisis action activities by coordinating with partners, developing Standard Operating Procedures, participating in exercises, and managing the development of decision support products for DHS leadership and public-private sector critical infrastructure partners. The Operational Analysis incident management role includes surging during a threat or incident, identifying appropriate staffing, planning for shifts and rotations, managing Requests for Information and Assistance, and training and deploying OCIA liaisons to FEMA and other organizations as the situation warrants. The Operational Analysis function produces and promulgates regular products and reports, provides risk briefings, and directs and coordinates the activities of the Infrastructure Analysis Cell to provide near real time integrated analysis to NPPD operational centers. OCIA will release all-hazard, risk-based products to partners, including regional critical infrastructure analysts and State urban area fusion centers. OCIA also will increase by 25 percent the number of products that integrate cyber, industrial control systems, and communications dependencies into their output.

A key capability in the Operational Analysis function, the Integrated Analysis Cell, will be implemented in FY 2014. Per PPD-21, the Integrated Analysis Cell will support the NICC and NCCIC by collating, assessing, and integrating vulnerability and consequence information with threat streams and hazard information to aid in prioritizing assets and managing risks to critical infrastructure, anticipate interdependencies and cascading impacts, recommend security and resilience measures for critical infrastructure prior to, during, and after an event or incident, and support incident management and restoration efforts related to critical infrastructure. This situational awareness function includes the provision of actionable information about significant trends and incidents that may affect critical infrastructure. During an imminent threat or incident, OCIA's Operational Analysis function will increase the number of analysts and surge staff support as needed to leverage the full spectrum of OCIA capabilities.

The Integrated Analysis Cell will include intelligence liaison support required to assess potential threats affecting particular infrastructure assets, sectors, or regions. This will be accomplished through existing relationships with I&A. The Integrated Analysis Cell will reach back as needed to other OCIA functions to acquire the full suite of OCIA Modeling, Simulation, and Analysis capabilities.

- Modeling and Simulation (M&S) builds and leverages unique capabilities of critical infrastructure modeling, simulation and analysis resources and capabilities of the NISAC to understand the impact and cascading effects of infrastructure failures and disruptions. NISAC conducts modeling, simulation and analysis to support planning and risk

management, including in-depth studies on critical infrastructure dependencies and interdependencies, and provides crisis action support for quick-turn analysis. In addition, OCIA will build a Cyber Modeling, Simulation & Analysis capability that will leverage the unique capabilities of the national laboratories, and other relevant Federally-Funded Research and Development Centers to model the implications of evolving and increasingly sophisticated cyber threats, the infrastructure vulnerabilities exploited by those threats, and the cascading effects upon dependent and interdependent infrastructure resulting from the compromise of information and communication technology vulnerabilities. Resident M&S analysts also will review assessments of model results and derive key findings for adoption to various analytic products.

- Strategic Analysis assesses the likelihood and consequence of emerging and future risks to depict a holistic risk horizon for critical infrastructure across sectors and regions. This analysis identifies and provides risk management and mitigation options regarding vulnerabilities, consequences, and threats to critical infrastructure. A National Risk Estimate, an example of a major study under the Strategic Analysis portfolio, provides a focused analysis of current and emerging critical infrastructure risks from a specific threat or event across a three to five year timeframe.

BUDGET REQUEST AND SUPPORTING INFORMATION

National Protection & Programs Directorate Federal Protective Service

I. Appropriation Overview

A. Mission Statement:

The Federal Protective Service (FPS) protects Federal facilities and those who occupy them by conducting law enforcement and protective security services, and leveraging access to the intelligence and information resources from a network of Federal, state, local, tribal, territorial, and private sector partners. From the protective security and law enforcement personnel to those who support the operations of the Service, FPS approaches its mission as one team. Every day FPS protects the homeland by managing risk and ensuring continuity for one of the most crucial elements of our national critical infrastructure—our Nation’s Federal facilities.

FPS has four strategic goals:

- Protect Federal facilities, their occupants, and visitors while facilitating the conduct of government business
- Inform and enhance operations through engagement with stakeholders and the interagency community
- Sustain a valued, highly-skilled, and agile law enforcement, security, and mission support workforce
- Support operations with risk-based and accountability-focused management and oversight

FPS employs a base workforce of 1,371 Federal employees, including 1,007 law enforcement personnel, to accomplish its mission. FPS delivers security services through approximately 13,000 contracted Protective Security Officers (PSOs), depending on customer requirements, and technical countermeasure services to more than 9,600 General Services Administration (GSA)-owned, leased, or operated facilities located in 11 regions across the country. These services provide a comprehensive risk-based approach to facility protection that allows FPS to prioritize its operations to prevent, detect, assess, respond to, and disrupt criminal and other incidents that endanger the Federal community.

FPS ensures that security measure activities, including oversight of contracted operations, are performed in accordance with the standards and criteria established by the Interagency Security Committee (ISC). This requires business and mission support activities to field a trained force of officers, procure equipment and services for the Federal community, and ensure the collection of basic security, building-specific security, and reimbursable agency-specific security revenues.

B. Budget Activities:

FPS is a full-cost recovery operation which means all expenses incurred must be funded by offsetting collections. For FPS, the revenues to fund its operations come from a basic security charge and an

administrative fee associated with providing building-specific and reimbursable agency-specific security services. Revenues collected from the basic security charge and the administrative fee fund the salaries and expenses for the base workforce (1,371 personnel) and base operating costs of FPS.

The following is a brief description of the revenue sources that fund FPS law enforcement, security management, and support activities:

Basic Security Charge: A 74-cent per square foot charge is assessed by FPS for all GSA-controlled space. The total square footage in GSA inventory varies from month to month - due primarily to changes in building and tenant occupancy - but averages approximately 367 million rentable square feet. At this rate, the revenue collected averages \$271.54 million annually and provides operating funding for statutory and regulatory service requirements that include activities associated with law enforcement, threat management and information sharing, protective and criminal investigations, risk management, and oversight and administration of the contracted PSOs and technical security countermeasure programs, as well as MegaCenter alarm monitoring and dispatch operations, training, and equipment.

Building-Specific Security Revenue and Administrative Fee: Building-specific security revenue is used to implement and maintain security countermeasure requirements specifically fashioned for a facility or in accordance with ISC standards. Charges are assessed to Federal agency customers for building-specific security services that include the acquisition, oversight and administration of PSOs, security equipment installation, operations, maintenance and repair, consultation on security fixtures, and contractor background suitability determinations. In addition, a six percent administrative fee is applied to the costs for building-specific security to fund FPS for direct and indirect costs associated with providing building-specific security. Revenue collected from the administrative fee is combined with the revenue from the basic security charge to fund FPS operating resource requirements.

Reimbursable Agency-Specific Security Revenue and Administrative Fee: Reimbursable agency-specific security revenue is funding via a reimbursable agreement between FPS and another Federal agency for the occupants of federally-owned or leased facilities requiring the same services provided as part of building-specific security but provided to an individual customer. In addition, a six percent administrative fee is applied to the cost for reimbursable agency-specific security to fund FPS for direct and indirect costs associated with providing the security services. Revenue collected from the administrative fee is combined with the revenue from the basic security charge to fund FPS operating resource requirements. Reimbursable agency-specific agreements are also referred to as Security Work Authorizations (SWAs) and may include other traditional, reimbursable activity, such as the use of FPS firing ranges and FEMA mission assignments.

C. Budget Request Summary:

For fiscal year (FY) 2014, FPS projects the availability of \$1,301,824,000 in total new collection authority. Within this collection authority, FPS estimates that up to \$971,966,000 will be collected as pass-through revenue for security countermeasures, to include the contracting of PSOs. Of the remaining collection authority, FPS projects new base operating funding to equal \$324,465,000. The

revenue from the administrative fee is included in base operating funding to cover the direct and indirect operating costs to FPS associated with providing building-specific and reimbursable agency-specific security. The current \$0.74 per square foot charge for basic security and six percent administrative fee for building-specific and reimbursable agency-specific will remain the same in FY 2014. Additionally, FPS will continue to support 1,371 full-time equivalents (FTEs) of which 1,007 are designated as law enforcement.

D. Budget Request Details:

Base Operating Funding

Revenue from the basic security charge provides base funding of resource requirements for FPS activities such as law enforcement, investigations, information and intelligence sharing, security assessments, crime prevention and awareness training, program administration of countermeasure programs, MegaCenter alarm monitoring and dispatch operations, capital investments for operations and business management tools, and mission support and oversight activities.

In addition to the revenue collected from the 74-cent per square foot basic security charge, FPS is authorized to use revenue collected from the administrative fee associated with providing building-specific and reimbursable agency-specific security services. The table below displays base operating funding levels for FY 2012, FY 2013, and FY 2014. Though prior-year carryover and recoveries are excluded from the table, FPS has had to rely on this available funding to cover annual shortfalls in base operating requirements.

Base Operating Funding Sources (Dollars in Thousands)	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request
Basic Security	\$271,540	\$271,540	\$271,540
Building-Specific Security — Admin. Fee	\$27,753	\$28,308	\$28,308
Reimbursable Agency-Specific Security — Admin. Fee	\$24,134	\$24,617	\$24,617
Total Base Operating Funds	\$323,427	\$324,465	\$324,465

No new initiatives are funded with this request.

FPS is actively engaged in the development of an Activity Based Costing Model to improve its internal financial management and to more clearly identify the costs to protect Federal facilities and their occupants. The modeling effort is planned to deliver transparent costs and logical fee structure alternatives to recover FPS costs while delivering a strong management tool that enables operational decisions and tradeoffs involving risk associated with the cost and performance of the impacted activities. FPS also intends to identify and capture the cost of business delivery investment requirements as well as detailing an appropriately sized operating reserve.

FPS is on track to deliver the first iteration of the next generation cost model in the spring of 2013 followed by the fee structure alternatives analysis in the summer of 2013. The results of the cost model will be utilized to develop and support future budget submissions by the Department.

Below describes the major expense categories for base operating funds.

Personnel Compensation & Benefits

In FY 2014, FPS is committed to maintaining a workforce of 1,371 personnel, of which not less than 1,007 are law enforcement officers (LEOs). Personnel compensation and benefits in FY 2014 include all salaries and benefits, career ladder promotions, within grade promotions, awards, and overtime. FPS is responsible for deploying its LEOs to Federal facilities adjacent to or in the vicinity of national security events, consistent with risk assessments and intelligence coordinated with other Federal, State, and local law enforcement organizations. FPS LEOs have responsibility for the security of Federal facilities during these events which typically demand long hours and overtime pay.

Working Capital Fund (WCF)

FPS provides funding to the DHS WCF - a managed account from which a full range of administrative support services such as finance, budget, accounting, information technology and personnel administration are provided to all DHS components, including FPS. The DHS WCF determines a component's funding requirement employing algorithms to assess charges. For FY 2014, DHS WCF support services include activities managed by the Management Directorate's Office of the Chief Administrative Officer for mail services, printing, and employee transit subsidy support. Additionally, the FY 2014 WCF assessment assumes that FPS will begin paying for information technology support and services through the WCF, instead of paying for those services through ICE.

Rent

FPS maintains a law enforcement and security presence in all 50 states and the U.S. Territories of Guam and Puerto Rico. FPS occupies approximately 975,000 square feet of operational and support space obtained through GSA.

Fleet

FPS maintains a fleet of around 1,200 vehicles to ensure that FPS officers are in a position to respond and protect the people and buildings under its protection. The vast majority of the FPS fleet is leased through GSA. Vehicle leasing has been an effective alternative to vehicle purchasing for FPS. Leasing charges include maintenance and fuel costs, and ensures that vehicles are routinely replaced at the expiration of the lease period as well as normalizes the cost over a 3 year or 7 year period.

DHS Service Level Agreements (SLAs)

FPS participates in cooperative service level agreements (SLAs) with other DHS components to receive support and services from those offices with specialized staff and skills. FPS achieves economies and efficiencies by avoiding the need to duplicate support that is available from these specialized service providers. In FY 2014, FPS will have service level agreements with: Office of General Counsel for legal services, Office for Civil Rights and Civil Liberties for Equal Employment

Opportunity support, and the DHS Office of Security for conducting background investigations of FPS employees.

Department of Labor Workers Compensation Payments

The Department of Labor, Office of Workers' Compensation Programs (OWCP) pays for costs associated with FPS work-related injuries and illnesses in real time (during the year in which they are incurred). However, FPS is required to reimburse OWCP for those payments. Reimbursements are due to OWCP in FY 2014 for payments made between July 1, 2012 and June 30, 2013.

ICE/DHS Information Technology Support

The transfer of FPS from ICE to NPPD involves the transition of information technology support and services from ICE to the DHS Network. In FY 2014, FPS will continue to pay for information technology support through ICE and DHS.

Activity Based Costing (ABC) Model

FPS has completed all planning and development work for the implementation of an ABC model in FY 2013. In FY 2014, FPS will be capturing costs to the activity drivers that FPS must perform to deliver law enforcement and security services, the result of identifying the costs and related fees for providing law enforcement operations and risk-based security services at Federal facilities. FPS stakeholders then will have greater transparency into the costs of FPS activities and the level of services provided. FY 2014 costs to sustain the model will enable FPS to refine the model with more detailed data in a live data environment.

Law Enforcement Operations

FPS law enforcement operations encompass all aspects and resources required to deliver law enforcement and security services. FPS Law Enforcement personnel perform facility security assessments in accordance with ISC standards, oversight and inspection of the approximately 13,000 PSOs contracted by FPS at 5,600 posts in 2,400 buildings across the United States and its territories. FPS Law Enforcement personnel also respond to over 45,000 incidents per year at Federal facilities and perform a visible deterrence through mobile patrol and response activities. FPS also has law enforcement personnel assigned to analyze criminal intelligence, investigate threats made against Federal Officials, and investigate incidents occurring in Federal facilities. Training, firearms, ammunition, and uniforms all support the ability of FPS law enforcement personnel to deploy each day to protect Federal facilities.

MegaCenter and Radio Communications

As the provider of law enforcement and security services to approximately 9,600 Federal facilities, FPS personnel are required to respond to a variety of incidents 24 hours a day, some of which entail responding to criminal activity in progress, and others to protect life and property. To provide around the clock capabilities to take calls for assistance, dispatch personnel, and ensure the appropriate response to incidents, FPS has four MegaCenters strategically located throughout the country in

Denver, Colorado; Suitland, Maryland; Battlecreek, Michigan; and Philadelphia, Pennsylvania. They provide a vital communications link between FPS law enforcement personnel, PSOs manning posts at or patrolling in Federal facilities, other Federal, State and local law enforcement entities, and facilitate the swift and efficient flow of information across the nation and territories. FPS MegaCenters also monitor multiple types of alarm systems, closed circuit television, and wireless dispatch communications within Federal facilities throughout the Nation. The related alarm-monitoring function for GSA and other federally-owned and leased facilities, includes approximately 8,800 alarms, provides a dedicated capability to ensure prompt dispatch of law enforcement and emergency first responders to situations at those facilities nationwide. FPS MegaCenters are structured to allow for failover to a sister site in the event of a partial or catastrophic failure at one center without disruption to alarm and communication services. FPS MegaCenters are in operation 24 hours a day, 7 days a week.

Business and Mission Support

FPS business and mission support activities include headquarters leadership, management and operations; field operations oversight; training; resource management to include budget, finance, and revenue management; administrative services; contracting and procurement; human capital coordination; program management; and acquisition program and information technology system planning and oversight.

Automated Tool Enhancement

In FY 2012, FPS delivered and began utilizing the Modified Infrastructure Survey Tool (MIST) for the completion and report generation of FSAs. Minimal additional enhancements will occur in FY 2013. FPS also entered into an agreement with DHS Science and Technology in FY 2013 to prototype a Post Tracking System automating what is now a manual process of ensuring that the contracted PSOs are working at a post as scheduled and billed and possesses the required training and certifications. In FY 2014, FPS will operate and maintain MIST and prepare for a pilot of the Post Tracking System to include training to officers as required for the use of these systems.

III. Current Services Program Description by PPA

**Department of Homeland Security
National Protection & Programs Directorate
Federal Protective Service
Basic Security
Program Performance Justification
(Dollars in Thousands)**

PPA: Basic Security

	Perm. Pos	FTE	Amount
2012 Revised Enacted	1,371	1,197	271,540
2014 Current Services	1,371	1,371	271,540
2014 Total Request	1,371	1,371	271,540
Total Change 2012 to 2014	-	174	-

FPS collects a basic security charge of 74-cents-per-square-foot for GSA-controlled space. The total square footage inventory varies from month to month but averages 367 million square feet. Based on this inventory, FPS anticipates collecting \$271,540,000 in FY 2014. With a combination of current year collections and prior-year carryover/recoveries, FPS will be able to maintain 1,371 FTE. The request includes \$1.300 million for the 2014 pay raise.

CURRENT SERVICES PROGRAM DESCRIPTION:

The FPS basic security charge provides operating funding for statutory and regulatory service requirements that include activities associated with law enforcement, threat management and information sharing, protective and criminal investigations, risk management, and oversight and administration of the contracted PSOs and technical security countermeasure programs, as well as MegaCenter alarm monitoring and dispatch operations, training, and equipment.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
FPS Radio Communications Program (RCP) / TacCom Equipment and Support	The FPS Radio Communications Program (RCP) provides centralized dispatch capabilities, with land mobile radio communication, for the security of Federal facilities nationwide. Four RCP MegaCenters, located across the country, provide these critical dispatch capabilities. Communication between the officers and their respective MegaCenters via radio is vital to providing effective protection of employees and visitors in Federal facilities nationwide. Radio communication is also imperative for maintaining continuity of operations and officer safety.	
\$7,497	\$10,508	\$7,524

**Department of Homeland Security
National Protection & Programs Directorate
Federal Protective Service
Building Specific Security
Program Performance Justification**
(Dollars in Thousands)

PPA: Building Specific Security

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	501,039
2014 Adjustments-to-Base	-	-	8,017
2014 Current Services	-	-	509,056
2014 Total Request	-	-	509,056
Total Change 2012 to 2014	-	-	8,017

For FY 2014, FPS requests \$509,056,000 in offsetting collection authority for ongoing building-specific security requirements. The request includes a six percent administrative fee, estimated to generate \$28,308,000 in revenue. The administrative fee revenue is combined with the basic security charge to provide FPS annual base operating revenue. Any carryover funds associated with this PPA may be used to fund operating or other expenses related to the protection of Federal facilities.

Additionally, when comparing FY 2012 to FY 2014, an \$8,017,000 increase is included as a technical adjustment to increase offsetting collections authority. The increase addresses contract security cost escalation related to increased requests for service, labor rate adjustments that were either projected or exceeded, and collective bargaining-related cost increases.

CURRENT SERVICES PROGRAM DESCRIPTION:

Building-specific security services are provided in accordance with security countermeasure requirements generated through a facility security assessment or a customer request specific to a particular building. These costs are funded by the tenants in a building based on the percentage of square footage that they occupy. An annual cost estimate for the security services is prepared by building and the costs recovered in monthly increments through the DHS Monthly Security Bill process. The charge includes an administrative fee to fund FPS administrative and overhead costs.

The table below breaks down the available building-specific security resources into major expense categories and an explanation of the items included in those categories is provided below the table.

Program/Project Activity (PPA) (Dollars in Thousands)	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request
Building-Specific Security			
<i>Countermeasures</i>	\$462,544	\$471,795	\$471,795
<i>Administrative Fee</i>	\$27,753	\$28,308	\$28,308
<i>Available Authority For New Customer Requirements</i>	\$10,134	\$8,447	\$8,447
<i>Administrative Fee Associated with New Requirements</i>	\$608	\$507	\$507
Total Revenue Collection Authority	\$501,039	\$509,056	\$509,056

Building-specific security will fund the following:

Protective Security Officers (PSOs)

Contract PSO services are a key component of the execution of FPS' protective security mission. Individual risk assessments combined with the needs of each facility drive the placement of PSO-staffed security posts at different facilities. These posts are charged with minimizing specific vulnerabilities to identified credible threats. The functions PSOs provide include:

- Access Control: ensuring access to secured areas in accordance to access control procedures;
- Control Center Operations: integrating multiple countermeasures through monitoring of security equipment and facilitating communication with other posts or law enforcement as necessary;
- Patrol and Response: patrolling and monitoring the facility for safety, security, and enforcement purposes;
- Screening: identifying and interdicting unlawful, dangerous, or prohibited items to ensure they do not enter a secured area; and
- Visitor Processing: identifying and documenting visiting individuals.

Technical Countermeasures

Technical security countermeasures allow FPS to provide an integrated and cost effective level of protection. They include x-ray machines, magnetometers, alarm systems, and camera systems. The FPS national countermeasures program includes design, implementation, and oversight as well as collaborative efforts with Federal partners, such as DHS's Science and Technology Directorate, and Transportation Security Administration (TSA).

Administrative Fee

Administrative fee activities are designed to be administrative support functions or requirements that inherently benefit customers, but may or may not be transparent. Currently, administrative fee funding cannot be directly correlated to costs and FPS relies on total operating revenue to provide these

services. However, work is ongoing to gain a better understanding of the administrative costs that FPS incurs with the security countermeasure agreements. By FY 2014, FPS should better understand the activities that should be funded solely by the six percent administrative fee. In the interim, the administrative fee revenue is combined with the basic security charge to provide FPS annual base operating revenue. This is expected to sustain current revenue and service levels.

Available Authority for New Customer Requirements

At the beginning of each fiscal year, FPS requests authority to collect revenue sufficient to accommodate changing customer requirements. For example, new customer security requirements can be accommodated during the fiscal year for customer relocation to an expanded facility or to implement countermeasures at a higher facility security level building. When these situations occur, FPS has the available funding authority to provide new security without potential procedural delays necessitated by having to request additional offsetting collection authority.

Administrative Fee Associated with New Requirements

FPS expects to collect additional administrative fee revenue if requested authority for new customer requirements is granted and new building-specific security revenues are realized.

**Department of Homeland Security
National Protection & Programs Directorate
Federal Protective Service
Reimbursable Agency Specific Security
Program Performance Justification**
(Dollars in Thousands)

PPA: Reimbursable Agency Specific Security

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	513,020
2014 Adjustments-to-Base	-	-	8,208
2014 Current Services	-	-	521,228
2014 Total Request	-	-	521,228
Total Change 2012 to 2014	-	-	8,208

For FY 2014, FPS requests \$521,228,000 in offsetting collection authority for ongoing reimbursable agency-specific security operations. The request includes a six percent administrative fee, estimated to generate \$24,617,000 in revenue. The administrative fee revenue is combined with the basic security charge to provide FPS annual base operating revenue. Any agreements that include requirements for FPS personnel will incur payroll expenses within this PPA. Any carryover funds associated with this PPA may be used to fund operating or other expenses related to the protection of Federal facilities.

Additionally, when comparing FY 2012 to FY 2014, an \$8,208,000 increase is included as a technical adjustment to increase offsetting collections authority. The increase addresses increased tenant-specific requirements and contract security cost escalation related to increased requests for service, wage rate increases, and collective bargaining-related cost increases.

CURRENT SERVICES PROGRAM DESCRIPTION:

Reimbursable agency-specific security, also called Security Work Authorizations (SWAs), is negotiated via a reimbursable agreement between FPS and another Federal agency to provide for the same services performed as part of building-specific (PSO and Technical Countermeasures) but are configured to meet the security needs of an individual customer agency rather than for an entire facility. Reimbursements consist of the direct cost of the security services requested, plus an administrative fee to cover the overhead and administrative costs to FPS to deliver the requested services.

The table below breaks down the available reimbursable agency-specific security resources into major expense categories and an explanation of the items included in those categories is provided below the table.

Program/Project Activity (PPA) (Dollars in Thousands)	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request
Reimbursable Agency-Specific Security			
<i>Countermeasures</i>	\$402,234	\$410,279	\$410,279
<i>Administrative Fee</i>	\$24,134	\$24,617	\$24,617
<i>Available Authority For New Customer Requirements</i>	\$81,747	\$81,446	\$81,446
<i>Administrative Fee Associated with New Requirements</i>	\$4,905	\$4,886	\$4,886
Total Revenue Collection Authority	\$513,020	\$521,228	\$521,228

Reimbursable agency-specific security will fund the following:

Protective Security Officers (PSOs)

Contract PSO services are a key component of the execution of FPS' protective security mission. Individual risk assessments drive the placement of PSO-staffed security posts at different facilities. These posts are charged with minimizing specific vulnerabilities to identified credible threats. The functions PSOs provide include:

- Access Control: ensuring access to secured areas in accordance to access control procedures;
- Control Center Operations: integrating multiple countermeasures through monitoring of security equipment and facilitating communication with other posts or law enforcement as necessary;
- Patrol and Response: patrolling and monitoring the facility for safety, security, and enforcement purposes;
- Screening: identifying and interdicting unlawful, dangerous, or prohibited items to ensure they do not enter a secured area; and
- Visitor Processing: identifying and documenting visiting individuals.

Technical Countermeasures

Technical security countermeasures allow FPS to provide an integrated and cost effective level of protection. They include x-ray machines, magnetometers, alarm systems, and camera systems. The FPS national countermeasures program includes design, implementation, and oversight as well as collaborative efforts with Federal partners, such as DHS's Science and Technology Directorate, and TSA.

Administrative Fee

Administrative fee activities are designed to be administrative support functions or requirements that inherently benefit customers, but may or may not be transparent. Currently, administrative fee funding cannot be directly correlated to costs and FPS relies on total operating revenue to provide these services. However, work is ongoing to gain a better understanding of the administrative costs that FPS incurs with the security countermeasure agreements. By FY 2014, FPS should better understand the activities that should be funded solely by the six percent administrative fee. In the interim, the administrative fee revenue is combined with the basic security charge to provide FPS annual base operating revenue. This is expected to sustain current revenue and service levels.

Available Authority for New Customer Requirements

At the beginning of each fiscal year, FPS requests authority to collect revenue sufficient to accommodate changing customer requirements. For example, with approved authority, new customer security requirements can be accommodated during the fiscal year due to temporary higher facility security levels based on current intelligence or a potential for increased risk at a specific location or geographic area. This authority is also utilized to provide temporary additional security for FEMA disaster relief deployments, which can be substantial depending on the number of natural and weather-related disasters FEMA must respond to in any given year. When these situations occur, FPS has the available funding authority to provide new security without potential procedural delays necessitated by having to request additional offsetting collection authority.

Administrative Fee Associated with New Requirements

FPS expects to collect additional administrative fee revenue if requested authority for new customer requirements is granted and new reimbursable agency-specific security revenues are realized.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
Protective Security Officer (Contract Guard) Services	<p>As part of DHS’ responsibilities under 40 USC §1315, the FPS Protective Security Officer (PSO) Program protects personnel and property at federally owned and leased locations throughout the United States and its territories. With oversight and direction from the FPS PSO Program, the PSO service contractors must provide essential security services, such as: screening occupants and visitors to prevent introduction of weapons and explosives, access control; employee and visitor identification checks; monitoring security equipment; and roving patrols of the interior and exterior of Federal facilities; all of which are designed for specific buildings to address risks, threats, and vulnerabilities that have been identified during risk assessment surveys. PSO services are anticipated to be a means of risk/threat reduction into the foreseeable future.</p> <p>Note that PSOs are included in the building specific security and reimbursable agency specific security PPA.</p>

Basic Security Mission Statement

Basic security services include law enforcement services on federally controlled property, preliminary investigations of incidents, and capture and arrest of suspects. This security also includes the 24-hour security alarm monitoring, nationwide dispatch services, facility security assessments, and assistance to Facility Security Committees. Carryover and recoveries in this PPA may be used to fund operating or other expenses related to the protection of Federal facilities.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	112,445	118,583	122,594	10,149
11.3 Other than full-time permanent	757	798	825	68
11.5 Other personnel compensation	14,032	14,798	15,298	1,266
12.1 Benefits	37,088	39,113	40,436	3,348
Total, Salaries & Benefits	164,322	173,292	179,153	14,831

Salaries and Benefits includes costs for 1,371 FTE. The FY 2014 request includes funding for career ladder promotions, within grade promotions, and the proposed one percent pay inflation in 2014.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$5,923	\$6,148	\$6,148	\$225

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes an increase of \$225,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$14,082	\$14,307	\$14,307	\$225

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request includes an increase of \$225,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$28,411	\$28,866	\$29,328	\$917

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. The FY 2014 request includes an increase of \$917,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$7,600	\$7,722	\$7,846	\$246

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request includes an increase of \$246,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$23,527	\$39,504	\$41,695	\$18,168

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. Such contractual services include support for MegaCenter operations, Activity-Based Costing development, other IT costs, etc.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$3,657	\$5,410	\$5,498	\$1,841

Purchase from Government Accounts includes costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2014 request includes an increase of \$1,841,000 for inflation and costs associated with additional personnel.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$17,925	\$22,073	\$23,716	\$5,791

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Costs include items such as Working Capital Fund (WCF), FPS IT transition costs, ICE/DHS IT support, etc. The FY 2014 request includes an increase of \$5,791,000 for inflation and higher WCF charges.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$1,954	\$1,985	\$1,985	\$31

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes an increase of \$31,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$3,257	\$3,309	\$3,309	\$52

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes an increase of \$52,000 for inflation.

Building Specific Security Mission Statement

Building-specific security is based on countermeasure requirements specific to a particular building based on a FPS vulnerability assessment. The two components are the contract Protective Security Officers (PSOs) and technical countermeasures. The PSO services includes access control, control center operations, patrol and response, screening, and visitor processing. Technical countermeasures include the purchase, installation, and maintenance of security equipment, such as cameras, alarms, magnetometers, and x-ray machines. FPS acquires countermeasures for our customers based on their needs, as identified through security assessments and other risk mitigation strategies, and manages to a standard replacement schedule. Carryover and recoveries in this PPA may be used to fund operating or other expenses related to the protection of Federal facilities.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$140	\$142	\$142	\$2

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request includes an increase of \$2,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$3,470	\$3,609	\$3,667	\$197

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request includes an increase of \$197,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$490,747	\$501,431	\$516,528	\$25,781

Reimbursable Agency Specific Security Mission Statement

Reimbursable agency-specific security, or Security Work Authorizations (SWAs) - FPS enters into SWAs with customer agencies to procure countermeasures beyond those included within basic security and building-specific security. The requirement for these security services are determined by the operational security and risk mitigation needs of the customer agencies. Carryover and recoveries in this PPA may be used to fund operating or other expenses related to the protection of Federal facilities.

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request includes an increase of \$4,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$140	\$142	\$144	\$4

Advisory and assistance services include services acquired by contract from non-federal sources (that is private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the federal government. The FY 2014 request includes an increase of \$4,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$504,935	\$531,439	\$537,888	\$32,953

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The contract Protective Security Officers and technical countermeasures are coded to this object class.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$6,468	\$6,571	\$6,676	\$208

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request includes an increase of \$208,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.8 Subsistence & support of persons	\$181	\$184	\$184	\$3

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons, including prisoners. The FY 2014 request includes an increase of \$3,000 for inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$885	\$899	\$913	\$28

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes an increase of \$28,000 for inflation.

I. Changes In Full Time Employment

	FY 2012	FY 2013	FY 2014

A. Component Overview

The National Protection and Programs Directorate (NPPD) is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Infrastructure Protection:

Infrastructure protection works to improve the protection of the Nation's high risk and most valued critical infrastructure and key resources by characterizing and prioritizing assets, modeling and planning protective actions, and building partnerships.

Cybersecurity and Communications:

The Cybersecurity and Communications program works to: Improve the security of cyberspace and America's cyber assets in the United States and to improve the security and reliability of America's telecommunications assets by working collaboratively with public, private, and international entities. The program also works to advance Federal, State, Local, and Tribal Government interoperable emergency communications capabilities by facilitating the identification of capability needs, the adoptions of solutions, and the verification (through realistic exercises) that capabilities effectively addressed the needs.

US-VISIT:

The United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program satisfies legislative and Department of Homeland Security (DHS) mandates and contributes to DHS immigration and border management goals in order to provide United States citizens and foreign visitors with a safer and more facilitative border security and immigration process. US-VISIT is a key component of a multilayered, multiagency defense that is integral to domestic and, increasingly, international security.

The mission of US-VISIT is to provide biometric identification through the collection, maintenance, and sharing of biometric and selected biographic data to authorized DHS, Federal, state, tribal, and local law enforcement agencies, and internationally through data-sharing agreements with strategic foreign partners in support of the DHS mission.

Federal Protective Service:

The Federal Protective Service (FPS) program is the Federal law enforcement authority responsible for the protection of the buildings, grounds, and property that are owned, occupied, or secured by the Federal government. FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure, and available as a vital part of everyday American life.

Risk Management and Analysis:

Risk Management and Analysis (RMA) Matures and Strengthens the Homeland Security Enterprise by leading the Department’s efforts to establish a common framework addressing the overall management and analysis of homeland security risk.

Management and Administration:

The Office of the Under Secretary provides Directorate leadership and management; coordinates Directorate activities throughout the Department; and serves as an advocate for protection across all governmental sectors, protection stakeholders, and citizens. The Office of the Under Secretary consists of the Under Secretary, Deputy Under Secretary, Chief Operating Officer, Chief of Staff, Director of Management as well as legal and administrative support.

FY 2014 Budget Request

The table below shows NPPD’s FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Infrastructure Protection	643	\$260,950
Cybersecurity and Communications	730	\$941,044
US-VISIT	0	\$0 ¹
Federal Protective Services	1,371	\$1,301,824
Risk Management and Analysis	0	\$0
Management and Administration	322	\$64,725
Total Budget Request	3,066	\$2,568,543

¹ In the FY 2014 President’s Budget, US-VISIT is reported entirely under U.S. Customs and Border Protection (CBP) and Immigration and Customs Enforcement (ICE).

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the NPPD programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Infrastructure Protection	100%						
Cybersecurity and Communications	3%			83%	14%		
US-VISIT							
Federal Protective Services	100%						
Risk Management and Analysis							
Management and Administration	67%			27%	6%		

Mission 1: Preventing Terrorism and Enhancing Security

Resources Requested

NPPD resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Infrastructure Protection	\$295,452	626	\$295,452	626	\$260,950	643
Cybersecurity and Communications	\$25,699	9	\$26,677	9	\$30,294	14
Federal Protective	\$1,285,599	1,371	\$1,301,824	1,371	\$1,301,824	1,371

National Protection and Programs Directorate - Strategic Context

Services						
Management and Administration	\$30,106	132	\$27,214	118	\$43,622	207
Total	\$1,636,856	2,138	\$1,651,167	2,124	\$1,636,690	2,235

Performance Measures

For *Preventing Terrorism and Enhancing Security*, two types of performance measures are presented. Strategic Performance Plan Measures represent NPPD's measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Percent of facilities that have implemented at least one security enhancement that raises the facility's protective measure index score after receiving an Infrastructure Protection vulnerability assessment or survey						
Description: This measure will show the percent of facilities that have enhanced their security after receiving an Infrastructure Protection vulnerability assessment or survey. Only enhancements, changes or additional protective measures that count towards this measure are ones that result in an increase to the facility's Protective Measures Index (PMI); a set of rigorous criteria that the impact of security and protective measures. Infrastructure Protection recommendations are represented by security gaps or weaknesses identified by low PMI scores in a security assessment. Improvements done "soon after" the recommendations mean that they have occurred within 180 days of a survey or 365 days after a vulnerability assessment.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	15%	50%	65%	70%
Result:	N/A	N/A	61%	70%	N/A	N/A

Measure: Percent of high risk facilities that receive a facility security assessment in compliance with the Interagency Security Committee (ISC) schedule						
Description: This measure reports the percentage of high risk (Facility Security Level 3 & 4) facilities that receive a facility security assessment (FSA) in compliance with the ISC schedule. An FSA is a standardized comprehensive risk assessment that examines credible threats to Federal buildings and the vulnerabilities and consequences associated with those threats. Credible threats include crime activity or potential acts of terrorism. Each facility is assessed against a baseline level of protection and countermeasures are recommended to mitigate the gap identified to the baseline or other credible threats and vulnerabilities unique to a facility.						

National Protection and Programs Directorate - Strategic Context

Requirements for the frequency of Federal building security assessments are driven by the ISC standards with high risk facility assessments occurring on a three year cycle.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	63%	100%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of owner/operators of critical infrastructure and key resources who report that the products provided by Infrastructure Protection enhance their understanding of the greatest risks to their infrastructure

Description: This measure will show the percent of Level 1 and Level 2 critical infrastructure and key resources owner/operators (e.g., state, local, private) who indicate, via a customer survey administered by Infrastructure Protection (IP), that the products that IP provided them contributed to and/or resulted in their understanding of the greatest risks (prioritized in terms of threat, vulnerability, consequence) posed to their infrastructure.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	80%	85%
Result:	N/A	N/A	N/A	58%	N/A	N/A

Measure: Percent of performance standards implemented by the highest risk chemical facilities and verified by DHS

Description: This measure reports the percent of applicable risk based performance standards (RBPS) that are approved and implemented within site security plans (SSPs) or alternative security programs (ASPs) for Tier 1 and Tier 2 facilities that are compliant with the Chemical Facility Anti-terrorism Standards (CFATS) regulation. Following submission of a proposed SSP/ASP by a covered facility, the CFATS regulatory authority will conduct an “authorization inspection” of the covered facility to verify that the SSP/ASP is compliant with the CFATS regulation. For this measure, SSPs/ASPs determined to meet the RBPS requirements with current and planned measures will be approved. Upon approval of its SSP/ASP, the covered facility is required to fully implement the existing measures that are described in the SSP/ASP.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	57%	97%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of tenants satisfied with the level of security provided at federal facilities

Description: This measure assesses the effectiveness of security services provided by the Federal Protective Service (FPS) to the Government Services Agency (GSA) tenants through the use of a formal customer satisfaction survey. FPS uses the feedback from this survey to identify opportunities for improvement in the security services provided to its customers.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
---------------------	---------	---------	---------	---------	---------	---------

National Protection and Programs Directorate - Strategic Context

Target:	80%	81%	82%	83%	84%	85%
Result:	N/A	81.3%	77.8%	78%	N/A	N/A

Management Measures

Measure: Percent of contract security force evaluations conducted at high-risk facilities resulting in no countermeasure-related deficiencies						
Description: This performance measure provides the percentage of Facility Security Level IV facilities* identified with no countermeasure-related deficiencies during contract security force evaluations conducted during each fiscal year quarter. Countermeasure-related deficiencies are the total of covert security testing (investigative operation used to identify deficiencies in security countermeasures, training, procedures, and technology) deficiencies and countermeasure (access control, alarms, barriers, communications, guard force, screening, and surveillance) deficiencies identified during post inspections. *Level IV is defined based as high risk based on the Interagency Security Committee Standards as having over 450 federal employees; high volume of public contact; more than 150,000 square feet of space; tenant agencies that may include high-risk law enforcement and intelligence agencies, courts, judicial offices, and highly sensitive government records.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	90%	98%	98%
Result:	N/A	N/A	N/A	98%	N/A	N/A

Measure: Percent of required post inspections completed for federal facilities						
Description: This measure will report the percent achievement by Federal Protective service (FPS) in completing Protective Security Officer (PSO) post inspections. The number of post inspections conducted per year are set annually per directives guiding protective security force performance monitoring. FPS sets policy to ensure that countermeasures are effectively functioning as designed and that the contracted service is in compliance with contract requirements. FPS post inspections review compliance in the operation of the post including identification of the individual on duty, post desk book, cleanliness and orderly operation of the post, PSO knowledge of the post orders, and PSO performance of duties in accordance with the post orders (to include professionalism, proper certifications and licenses). When technical countermeasures are deployed at a post, the effectiveness of that countermeasure is also assessed. Post inspection frequency is tied to the facility security level, the						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	100%	100%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Mission 2: Securing and Managing Our Borders

Resources Requested

NPPD resources supporting *Securing and Managing Our Borders* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
US-VISIT	\$181,441	250	\$184,081	250	\$0	0
Management and Administration	\$3,400	15	\$3,085	13	\$0	0
Total	\$184,841	264	\$187,166	263	\$0	\$0

Performance Measures

For *Securing and Managing Our Borders*, Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Management Measures

Measure: Average biometric watch list search times for queries from ports of entry (in seconds)						
Description: This measure reports the average response time of biometric watchlist queries processed through the Automated Biometric Identification System (IDENT) system in response to queries from ports of entry (POE) where fingerprints are captured. The target is less than 10 seconds to provide critical watchlist and identity screening information to inspectors in a timely manner to facilitate traveler processing.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<10	<10	<10	<10	<10	<10
Result:	8.71	6.01	8.59	10.11	N/A	N/A

Mission 3: Enforcing and Administering Our Immigration Laws

Resources Requested

NPPD resources supporting *Enforcing and Administering Our Immigration Laws* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
US-VISIT	\$120,961	166	\$122,721	166	\$0	0
Management and Administration	\$2,266	10	\$2,057	9	\$0	0
Total	\$123,227	176	\$124,777	175	\$0	\$0

Performance Measures

For *Enforcing and Administering Our Immigration Laws*, Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Management Measures

Measure: Accuracy of lead referrals to Immigration and Customs Enforcement regarding non-immigrant travelers who appear to have illegally overstayed their visas						
Description: An in-country overstay is a non-immigrant foreign traveler whose authorized period of admission granted at arrival in the United States expired without a subsequent departure, arrival, or status update. An individual is considered an overstay if the subject has not departed the United States within 7 days after the terms of their admission. This measure gauges the accuracy of the program in identifying individuals who may have overstayed their authorized period of admission. The program uses an algorithm run in the Arrival and Departure Information System and manual vetting records to identify these individuals. Records identified as likely overstays are sent to government quality control review prior to forwarding to U.S. Immigration and Customs Enforcement Compliance Enforcement Unit for further investigation. A lower trend indicates an increasing error in credible leads identified and forwarded to government for secondary review prior to sending the leads for further investigation.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	98%	98%	98%	98%	98%
Result:	N/A	98.5%	99.43%	99%	N/A	N/A

Measure: Average biometric watch list search times for queries from U.S. consulates (in minutes)	
Description: This measure is used to determine the average amount of time required to complete an automated search processed through the United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Automated Biometric Identification System (IDENT) system in response to queries from consular offices worldwide where fingerprints are captured as part of	

the BioVisa form process. The service level agreement with the Department of State is less than 15 minutes to provide critical identity and watch list information in a timely manner to not impede traveler processing. In light of past performance, the program has set a target of processing BioVisa searches within 5 minutes.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<5	<5	<5	<5	<5	<5
Result:	2.57	3.13	1.85	0.91	N/A	N/A

Measure: Percent of daily travelers referred to additional screening due to false fingerprint matches

Description: US-VISIT will measure the percent of travelers whose biometric information are queried through US-VISIT's biometric matching systems and are referred to secondary screening because of false matches. This will include travelers whose information was incorrectly matched to somebody on a watchlist ("watchlist false accepts") and travelers whose fingerprints were incorrectly matched to other peoples' fingerprints ("finger print 1-1 mismatches"). This information is collected daily by US-VISIT based on screenings conducted at ports of entry by Customs and Border Protection.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	<=0.33%	<=0.32%	<=0.31%
Result:	N/A	N/A	N/A	0.26%	N/A	N/A

Mission 4: Safeguarding and Securing Cyberspace

Resources Requested

NPPD resources supporting *Safeguarding and Securing Cyberspace* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Cybersecurity and Communications	\$414,916	349	\$698,499	386	\$780,115	522
Management and Administration	\$7,774	34	\$11,705	51	\$17,348	94
Total	\$422,690	383	\$710,204	437	\$797,463	616

Performance Measures

For *Safeguarding and Securing Cyberspace*, two types of performance measures are presented. Strategic Performance Plan Measures represent NPPD’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Number of cybersecurity vulnerability and resiliency assessments and self-assessments facilitated by DHS						
Description: This measure assesses the extent to which DHS is providing onsite cybersecurity vulnerability and resiliency assessments (either onsite or self-assessment) to owners and operators of critical infrastructure across the private sector and State and local government stakeholder communities. This measure is based upon the number of site assessments conducted and the number of tools disseminated for use in self-assessments. Conducting these assessments is critical because critical infrastructure owners and operators have primary responsibility for the security of their information technology systems.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	7,075	7,580
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of cybersecurity mitigation strategies provided by DHS for unique vulnerabilities that are timely and actionable						
Description: The DHS National Cyber Security Division will follow up with cyber customers, to whom mitigation strategies were provided, in order to determine the timeliness and effectiveness of those strategies. A customer survey will be used to acquire data on areas such as timeliness, clarity, effectiveness, and sufficiency of mitigation strategies. This measures a program that is early stages of implementation.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	50%	60%	70%
Result:	N/A	N/A	N/A	58%	N/A	N/A

Measure: Percent of incidents detected by the U.S. Computer Emergency Readiness Team for which targeted agencies are notified within 30 minutes						
Description: The United States Computer Emergency Readiness Team (US-CERT) detects						

malicious cyber activity targeting Federal agencies. This measure assesses the percent of incidents directed at Federal agencies and detected by the US-CERT for which agencies are informed of this malicious activity within 30 minutes. This measure demonstrates the US-CERT's ability to share situational awareness of malicious activity with its Federal agency stakeholders through the EINSTEIN intrusion detection systems and other tools.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	86%	87%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of organizations that have implemented at least one cybersecurity enhancement after receiving a cybersecurity vulnerability assessment or survey						
Description: This measure addresses the extent to which critical infrastructure owners and operators use the results of cybersecurity vulnerability and resiliency assessments to improve their cybersecurity posture. This measure demonstrates the percent of assessed asset owners and operators that are not only developing a better understanding of their cybersecurity posture, but also implementing at least one cybersecurity enhancement to improve that posture.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	50%	55%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of traffic monitored for cyber intrusions at civilian Federal Executive Branch agencies						
Description: This measure assesses DHS's scope of coverage for malicious activity across those non-DOD Chief Financial Officers (CFO) Act and Trusted Internet Connection Access Provider (TICAP) Federal Executive Branch civilian agency networks. Federal Executive branch network monitoring uses EINSTEIN 2 intrusion detection system sensors, which are deployed to Trusted Internet Connections locations at agencies or Internet Service Providers. These sensors capture network flow information and provide alerts when signatures, indicative of malicious activity, are triggered by inbound or outbound traffic. The Federal government's situational awareness of malicious activity across its systems will increase as more networks are monitored and the methodology will require data normalization to account for the addition of large numbers of networks.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	55.0%	70%	75%
Result:	N/A	N/A	N/A	73.0%	N/A	N/A

Management Measures

Measure: Average amount of time required for initial response to a request for assistance from public and private sector partners to prevent or respond to major cyber incidents (in minutes)						
Description: This measure assesses the average amount of time it takes DHS to initially respond to a request for technical assistance from a public (.gov) or private (.com) sector partner in order to prevent or respond to a major cyber incident.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<120	<90	<60	<30
Result:	N/A	N/A	138	14.10	N/A	N/A

Measure: Percent of unique high alert level events detected by the National Cyber Protection System, also known as EINSTEIN, validated as legitimate incidents						
Description: This measure reflects improvements in efficiency of the United States - Computer Emergency Response Team (US-CERT) through more effective resourcing to analyzing legitimate, high-alert level cyber incidents. A high-alert level cyber incident poses a potentially severe impact to the security or operations of a Department or Agency's network, or to the integrity of its proprietary information. The National Cyber Protection System (NCPS) reduces the number of false positives through improved signature development and enhanced automated detection capabilities. This measure tracks improvements in signature methodology by focusing on unique high-level events and provides a key indicator for the overall accuracy of the NCPS in detecting malicious activity in the .gov domain. The percent of legitimate incidents detected will increase as the signatures used for detection of malicious activity are improved with technology, tuning, and information sharing activities.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	50%	55%	60%	65%	70%
Result:	N/A	77%	93%	97%	N/A	N/A

Measure: Percent of unique incidents that have been prevented from causing further harm to Federal stakeholders' systems and networks						
Description: This will measure the percentage of high vulnerability incidents that have been prevented from causing further harm to Federal systems and networks due to National Cyber Security Division (NCSA) activities. The data underpinning this measure will be collected from surveys that returned by supported Federal departments and agencies. In FY 2013, the data will be collected from responses to surveys attached to NCSA products that are voluntarily submitted by stakeholders, as well as responses to CyberScope questions submitted by Federal agencies. These responses will identify the number of unique high vulnerability cybersecurity incidents that produce or attempt to produce harm in client cyber systems and those that are stopped from producing harm. This methodology may be updated to include automated data, including data from EINSTEIN Block 3.0.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

National Protection and Programs Directorate - Strategic Context

Mission 5: Ensuring Resilience to Disasters

Resources Requested

NPPD resources supporting *Ensuring Resilience to Disasters* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Cybersecurity and Communications	\$152,176	167	\$149,615	167	\$130,635	194
Management and Administration	\$2,851	12	\$2,507	11	\$3,754	21
Total	\$155,027	179	\$152,122	178	\$134,389	215

Performance Measures

For *Ensuring Resilience to Disasters*, Strategic Performance Plan Measures represent NPPD's measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures.

Strategic Performance Plan Measures

Measure: Percent of calls made by National Security/Emergency Preparedness users during emergency situations that DHS ensured were connected						
Description: This measure gauges the Government Emergency Telecommunications Service (GETS) call completion rate. The GETS call completion rate is the percent of calls that a National Security/Emergency Preparedness (NS/EP) user completes via public telephone network, landline, or wireless, to communicate with the intended user/location/system/etc, under all-hazard scenarios. Hazard scenarios include terrorist attacks or natural disasters such as a hurricane or an earthquake.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	90%	90.0%	100%	100%

Result:	N/A	N/A	97.8%	99.4%	N/A	N/A
----------------	-----	-----	-------	-------	-----	-----

Measure: Percent of urban area interoperable communications capabilities that are rated at the most advanced levels

Description: This measure reports the percent of four capabilities targeted by the Office of Emergency Communications (OEC) in the 60 urban area security initiative (UASI) regions as of 2008 that are rated as “established” or “advanced.” The ratings are based on the SAFECOM Interoperability Continuum, which provides a maturity model for jurisdictions to track progress in strengthening interoperable communications. Per the National Emergency Communications Plan, OEC has prioritized four capabilities that are necessary to ensure interoperable communications in an area: governance, standard operating procedures, usage, and training and exercises. Through statewide interoperability coordinators, urban areas assess their capabilities based on clearly defined criteria from the continuum.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	50%	55%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Maturing and Strengthening the Homeland Security Enterprise

One of the Department’s objectives is to improve DHS’s organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters NPPDs, enhanced programmatic alignment to the homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

Resources Requested

NPPD resources supporting *Maturing and Strengthening the Homeland Security Enterprise* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Risk Management and Analysis	\$2,990	16	\$4,267	39	\$0	0
Management and Administration	\$56	0	\$72	0	\$0	0

BUDGET REQUEST AND SUPPORTING INFORMATION

Office of Health Affairs

I. Appropriation Overview

A. Mission Statement for Office of Health Affairs:

The Office of Health Affairs (OHA) provides health and medical expertise in support of the DHS mission to prepare for, respond to, and recover from all hazards impacting the Nation's health security. OHA's responsibilities include: serving as the principal advisor to the Secretary and the Federal Emergency Management Administration (FEMA) Administrator on medical and public health issues including those related to food, agricultural, and animal health; managing and coordinating certain biological and chemical defense activities; providing medical and scientific expertise to support DHS preparedness and response efforts; and leading the Department's workforce health and medical oversight activities. OHA also supports FEMA by serving as the primary DHS point of contact for State and local governments on medical and public health issues.

OHA has four strategic goals that support the DHS missions of preventing terrorism and enhancing security and ensuring resilience to disasters:

- 1) Provide expert health and medical advice to DHS leadership
- 2) Build national resilience against health incidents
- 3) Enhance national and DHS medical first responder capabilities
- 4) Protect the DHS workforce against health threats

B. Budget Activities:

The OHA budget is divided into five program, project, and activity (PPA) areas:

BioWatch Program:

The BioWatch Program manages an early warning system designed to rapidly detect aerosolized biological threat agents that could be used in an intentional wide-area release causing harm to the population. This program deploys collection devices and analytical capability in more than 30 high-risk metropolitan areas, called BioWatch jurisdictions, throughout the Nation. The BioWatch Program provides public health officials with a warning of a potentially hazardous biological agent release before exposed individuals would typically develop symptoms of illness. This "detect-to-treat" approach provides public health officials with an opportunity to respond aggressively to help mitigate the potentially catastrophic impact on the population of a biological agent release.

Chemical Defense Program (CDP):

CDP provides Federal, State, and local entities with the knowledge and tools to build and sustain a viable framework for preparedness and response to high consequence chemical events. The CDP activities support the goals of improvement of detection and communication technology and the development of national best practices guidance documents.

CDP efforts are directed toward integrating risk assessments and detection capabilities into community preparedness, developing response protocols, and defining best practices.

National Biosurveillance Integration Center (NBIC):

NBIC has the key responsibility to integrate, analyze, and share the Nation's biosurveillance information from across Federal, State, and local entities and the private sector. NBIC contributes to early warning and shared situational awareness of potential biological events to better inform decision-makers and improve the efficiency and efficacy of any necessary response and recovery efforts. NBIC analysts work with interagency partners to determine if bio-events have reached reporting thresholds and write reports in collaboration with NBIS partners. The reports are posted to Homeland Security Information Network (HSIN) portals and to the biosurveillance layer of the DHS Common Operating Picture (COP), providing senior decision-makers and partner agencies a consistent, integrated picture of biosurveillance situational awareness for DHS and its partners.

Planning and Coordination (P&C):

P&C is comprised of programs that primarily support Mission 5 of the DHS Strategic Plan: (Ensuring Resilience to Disasters), as well as and Maturing and Strengthening the Homeland Security Enterprise. The PPA is currently organized into four programs: Planning and Exercise Support; Food, Agriculture, Veterinary Defense (FAVD); State and Local Initiatives (SLI); and Workforce Health and Medical Support (WHMS) (composed of the following initiatives: Occupational Health, Medical Liaisons, Medical First Responder Coordination, and Medical Quality Management). These programs support this mission through a variety of activities directed both externally to Federal, State, and local stakeholders and internally within the Department.

Initiatives within the P&C PPA build resilience by providing appropriate information, resources and guidance to help State and local communities as well as the DHS workforce to bolster efforts to prepare for and respond to catastrophic health threats. For example, the *DHSTogether* and Medical Countermeasures (MCM) programs provide resiliency to the DHS workforce by providing health and wellness resources. Other initiatives include the development of medical guidance for DHS personnel, the provision of standards and guidelines to DHS medical care providers, and the oversight of DHS quality improvement and medical training.

In addition, through these initiatives, OHA provides health and medical expertise to national preparedness and contingency planning activities, and supports exercises designed to

improve preparedness and response to catastrophic incidents across the health security spectrum.

Salaries and Expenses (S&E):

The S&E PPA funds the salaries and benefits for all full-time equivalents (FTE) within OHA and the activities of the Office of the Assistant Secretary (OAS). OAS supports OHA's mission by providing executive direction and leadership to all divisions and branches and ensures that OHA's critical mission can be accomplished efficiently and effectively through policy coordination, communications, external relations, strategic planning, and correspondence management. OAS also provides for the management of all relevant business operations including financial management, program analysis, facilities maintenance and planning, continuity of operations planning, human capital management, and information technology support.

In addition, S&E funds OHA's share of the DHS Working Capital Fund (WCF), office supplies, training for the entire organization, travel for senior management, and various other shared services.

C. Budget Request Summary:

OHA requests \$131.797 million, 106 full-time positions (FTP) and 99 full-time equivalents (FTE). Requested funding includes over \$7 million in savings from efficiencies, redirected to increase high priority programs including BioWatch current operations, NBIC, and the MCM program.

D. Efficiencies

Mission Support and Personnel Efficiencies **-\$0.373 million**

Personnel efficiency (-\$0.343 million) – This reflects the elimination of 2 FTE in mission support personnel due to attrition.

Headquarters administrative efficiency (-\$0.030 million) – This efficiency reflects a reduction in administrative services required.

Travel and Transportation of Things Efficiencies **-\$0.255 million**

Travel (-\$0.212 million) – OHA is reducing costs for general temporary duty (TDY) assignments and travel (\$0.204 million) as well as long-term TDY more than 30 days (\$0.008 million).

Transportation of things (-\$0.043 million) – OHA is reducing costs associated with Permanent Change of Station.

Advisory and Assistance Contracts/Strategic Sourcing Efficiencies **-\$6.867 million**

OHA-wide mission support (-\$1.705 million) – OHA will leverage department-wide support contracts, rebaseline staffing, and reduce assessed WCF fees.

Office of Federal Procurement Policy (OFPP) Directed Purchasing Savings (-\$0.926 million) – BioWatch anticipates savings from the OFPP initiative. These savings also include the DHS Strategic Sourcing Initiative.

OFPP Directed Purchasing Savings (-\$0.273 million) – P&C activities will achieve savings from the OFPP initiative.

Contract reviews and internal spend plan reviews (-\$3.889 million) – BioWatch, NBIC, and P&C activities will achieve savings by re-scoping contracts and scrutinizing the execution of funding.

Equipment (-\$0.074 million) – Through participation in the DHS Strategic Sourcing Initiative, OHA anticipates savings when acquiring equipment for BioWatch operations.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

III. Current Services Program Description by PPA

**Department of Homeland Security
Office of Health Affairs
BioWatch
Program Performance Justification
(Dollars in Thousands)**

PPA: BioWatch

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	111,764
2014 Adjustments-to-Base	-	-	(21,155)
2014 Current Services	-	-	90,609
2014 Program Change	-	-	-
2014 Total Request	-	-	90,609
Total Change 2012 to 2014	-	-	(21,155)

OHA requests \$90.609 million in FY 2014 for the BioWatch Program.

Adjustments-to-Base include:

- Decrease of \$4.774 million for Management Efficiencies including:
 - \$0.926 million for Office of Federal Procurement Policy (OFPP) Directed Purchasing Savings and DHS Strategic Sourcing Initiative
 - \$0.074 million for DHS Strategic Sourcing Initiative
 - \$3.774 million to be achieved through contract reviews and internal spend plan reviews
- Decrease of \$24.000 million for non-recurring costs for the Gen-3 system
- Increase of \$2.400 million to account for funds contributed to Department-wide U.S. Secret Service reprogramming
- Increase of \$5.219 million to hire six additional Public Health Service Officers (PHSOs), fully implement the Quality Assurance Plan (QAP), fund operational cost increases associated with cooperative agreements, and support collaborative efforts with the Department of Defense (DOD)

The requested funding for BioWatch will enable the continuation of current operations in all jurisdictions in which the BioWatch Program is presently deployed and operating.

CURRENT SERVICES PROGRAM DESCRIPTION:

The current BioWatch system (Gen-2) is the only Federally managed, locally operated, nationwide biosurveillance system designed to detect the intentional wide-area release of select aerosolized biological agents. The program operates in more than 30 BioWatch jurisdictions across the country. BioWatch protects millions of people by focusing on the early detection of a biological attack which is critical to the successful treatment of affected populations. The BioWatch program also provides public health decision-makers the time-sensitive and necessary information to respond, mitigate, and recover from a bioterrorist event. While OHA oversees, coordinates, and provides technical support to the BioWatch Program at the Federal level, State and local public health authorities manage the day-to-day program. These State and local stakeholders use the information generated by the detection system as an important tool in deciding whether a biological event of public health significance has occurred.

Current BioWatch detection capabilities (Gen-2) consist of outdoor and a few indoor aerosol collectors whose filters are manually retrieved for transport to a laboratory for subsequent analysis.

Department of Homeland Security
Office of Health Affairs
National Biosurveillance Integration Center
Program Performance Justification
(Dollars in Thousands)

PPA: National Biosurveillance Integration Center

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	12,823
2014 Adjustments-to-Base	-	-	(4,823)
2014 Current Services	-	-	8,000
2014 Program Change	-	-	-
2014 Total Request	-	-	8,000
Total Change 2012 to 2014	-	-	(4,823)

OHA requests \$8.000 million for the National Biosurveillance Integration Center (NBIC) in FY 2014, which will fund technical support services, information technology operations and improvements, biosurveillance acquisitions, and support coordination efforts with Federal, State, local tribal, and territorial governments.

Adjustments-to-Base include:

- Decrease of \$5.000 million for nonrecurring costs of the National Collaborative for Bio-Preparedness
- Decrease of \$0.013 million for Management Efficiencies to be achieved through contract reviews and internal spend plan reviews
- Decrease of \$0.810 million to account for funds transfer from Salaries and Expenses and from Planning and Coordination for software and hardware upgrades to enhance biosurveillance capabilities in FY 2012
- Increase of \$1.000 million to operationalize outcomes stemming from the NBIC innovation projects conducted in FY 2012 and FY 2013

CURRENT SERVICES PROGRAM DESCRIPTION:

NBIC has the key responsibility to integrate, analyze, and share the Nation’s biosurveillance information from across Federal, State, and local governments and the private sector. NBIC enables early warning and shared situational awareness of biological events so that critical decisions directing response and recovery efforts are well-informed and ultimately save lives. NBIC serves the National

Biosurveillance Integration System (NBIS), an interagency community providing national biosurveillance and situational awareness. NBIS members include the Departments of Health and Human Services, Defense, State, Interior, Agriculture, Commerce, Energy, Homeland Security, Justice, and Veterans Affairs; the Environmental Protection; the United States Postal Service; and the intelligence community.

NBIC acquires, integrates, analyzes, and disseminates information pertaining to emerging biological events and their impact on U.S. interests. This allows NBIC to provide indications, warnings and situational awareness resulting in enhanced recognition, reduced response time, and effective response by NBIS members.

An important component of NBIS is the ability to have an “NBIS Protocol,” a short-notice teleconference held with all Federal partners to share information on potentially significant biological events of national concern (e.g., notice is typically 1 hour). Use of this protocol ensures that event information and developments are known to all, are consistent, and are the most up-to-date. This forum enables information sharing early in a biological event’s discovery and development that in turn allows for better decision making and a coordinated, streamlined response. By bringing together the whole of the Federal biosurveillance enterprise within two hours, the protocol enhances the goal of timely and integrated national biosurveillance.

As the managing partner of NBIS, NBIC organizes data and information from multiple sources.

NBIC analysts use the Biosurveillance Common Operating Network (BCON) IT system to continuously monitor open source and select government sources of information on human, animal, plant, food, and environment domains for indications of biological events of national concern. A version of the BCON system, BCON-X has been made available outside the DHS firewall as a resource for biosurveillance analysts in other federal agencies.

NBIC analysts then work with interagency partners to determine which bio-events have reached reporting thresholds and write reports in collaboration with NBIS partners. The reports are posted to Homeland Security Information Network (HSIN) portals and to the biosurveillance layer of the DHS Common Operating Picture (COP). Federal level reports are posted on the NBIC HSIN portal. State and local level reports are posted to the Minerva and Health Security Intelligence Enterprise HSIN portals, as well as to the DHS COP. NBIC reports are therefore available to more than 15,000 users, many of whom work in the 72 fusion centers across the Nation. Primary beneficiaries include NBIC stakeholders and DHS senior decision-makers.

OHA has developed an integrated strategic plan for the NBIC in collaboration with the NBIS member agencies. The strategic plan is the culmination of a year-long engagement effort to establish a common understanding and concurrence on the role of the Center in monitoring, reporting, and supporting decision making on biological incidents of national significance. NBIC continues its focus on innovative information sharing, analysis, and depiction.

The strategic plan is focused on leveraging proven expertise in data integration and biosurveillance analytics while retaining DHS management. The core mission of collecting and sharing information across domains on incidents of potential national significance continues, but this emergent strategy

hinges upon piloting promising proof-of-concept demonstrations, learning from them, and reinforcing their success.

An important piece of the strategic plan are the innovation projects which, awarded on a competitive basis, will allow NBIC to build upon existing and proven constructs to weave together and integrate the Nation's biosurveillance system. An increase of \$1.000 million will support operationalization of outcomes (discoveries, tools, and methodologies) stemming from the NBIC innovation projects conducted in FY 2012 and FY 2013. Operationalization of the project outcomes that incorporate new and innovative data for biosurveillance is a central component of the NBIC Strategic Plan. These project outcomes will be evaluated and validated for operational adoption by NBIC and incorporated as appropriate, providing NBIC and its partners with additional capabilities and resources. With funding to operationalize the innovation project outcomes, NBIC will be able to provide the Department and its partners with new early event data (such as social media, poison control center EMS, and 911 data) that has never been used for biosurveillance.

NBIC funding will be used to monitor potential biological events 24 hours a day, 7 days a week, by ingesting and integrating information from more than 24,000 open sources and applying critical analysis to that information. Working with our interagency partners, this integration enables early warning and shared situational awareness of biological events so that critical decisions regarding response and recovery efforts are well-informed and ultimately save lives. Recognizing that biosurveillance is still an unsolved problem with opportunities for capability improvement, NBIC is also funding several innovation projects to evaluate opportunities to identify and use novel data sets and information, advanced analytic approaches and tools, and improved methods of collaborating with new and existing partners. These projects seek to serve not only NBIC's ability to accomplish its mission, but also the ability of these projects to serve the needs of the interagency biosurveillance community.

PROCUREMENT ACTIVITIES:

Biosurveillance Common Operation Network (BCON)

BCON serves as the platform for information exchange between senior leaders and partner agencies and facilitates the early recognition of biological events, including natural disease outbreaks, accidental or intentional use of biological agents, and emergent biohazards. BCON provides situational awareness through the acquisition, integration, analysis and dissemination of information from existing human disease, food agriculture, water, meteorological, and environmental surveillance systems and relevant threat and intelligence information. This investment is in sustainment phase.

2014 Adjustments-to-Base	-	-	(4,615)
2014 Current Services	-	-	824
2014 Program Change	-	-	-
2014 Total Request	-	-	824
Total Change 2012 to 2014	-	-	(4,615)

OHA requests \$0.824 million in FY 2014 for the Chemical Defense Program (CDP). CDP provides health and medical expertise related to chemical preparedness, detection, response, and resilience to provide a comprehensive approach to protection from a chemical attack.

Adjustments-to-Base include:

- Decrease of \$3.000 million for nonrecurring costs
- Decrease of \$1.615 million reflecting a rescoping of CDP, which would reduce technical assistance to communities while maintaining a subject matter expertise network to provide technical advice

CURRENT SERVICES PROGRAM DESCRIPTION:

CDP provides subject matter expertise on medical toxicology, industrial hygiene, and responder workforce protection related to chemical threats. CDP efforts are directed toward integrating risk assessments and detection capabilities into community preparedness, developing response protocols, and defining best practices in order to comprehensively address gaps in chemical defense preparedness. In addition, CDP assesses the capabilities of commercially available detection equipment to guide communities toward acquiring the most effective and readily available technologies to protect against significant chemical threats at high-risk sites.

CDP will finalize lessons learned and best practices captured during demonstration projects to serve as guidance for other communities to design chemical detection and defense frameworks tailored to their individual requirements and resource availability. The incorporation of lessons learned, with

coordination among DHS Components and other Federal agencies, is a critical element to the design of the chemical defense framework.

PPA: Planning and Coordination

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	5,852
2014 Adjustments-to-Base	-	-	(2,757)
2014 Current Services	-	-	3,095
2014 Program Change	-	-	1,900
2014 Total Request	-	-	4,995
Total Change 2012 to 2014	-	-	(857)

OHA requests \$4.995 million in FY 2014 for Planning and Coordination (P&C). The funding requested in FY 2014 will support a suite of activities that bolster health security preparedness and resilience, both with DHS and throughout the Nation. This includes providing medical and health subject matter expertise to DHS preparedness and planning activities, supporting response to national disasters, integrating state and local public health within the national network of State and local fusion centers, and leading DHS workforce health and medical support efforts.

Adjustments-to-Base include:

- Decrease of \$0.375 million for Management Efficiencies to include:
 - \$0.273 million through OFPP Directed Purchasing Savings
 - \$0.102 million to be achieved through contract reviews and internal spend plan reviews
- Increase of \$0.310 million to account for funds transfer in to NBIC for software and hardware upgrades to enhance biosurveillance capabilities in FY 2012

CURRENT SERVICES PROGRAM DESCRIPTION:

P&C is comprised of initiatives that primarily support QHSR Mission 5: Ensuring Resilience to Disasters, as well as Maturing and Strengthening the Homeland Security Enterprise. Major programs include: Planning and Exercise Support; FAVD; State and Local Initiatives; and Workforce Health and Medical Support (WHMS).

OHA will achieve an OFPP Directed Purchasing Savings of \$0.273 million in the Planning and Exercise Support Branch (PESB). OHA will reduce contractor support within this Branch to achieve this efficiency.

Planning and Exercise Support

PESB provides health security-focused planning and exercise support, and medical subject matter expertise to the Federal interagency, the Department, and State and local entities. The Branch provides the interface between OHA and DHS component contingency and operational planning cells and supports the development of Federal plans and policies related to natural and man-made events having catastrophic consequences on human, agricultural, and animal health. In addition to planning and policy development, PESB integrates personnel with health and medical expertise to responses to national disasters in support of interagency communications, situational awareness, and effective operational planning at FEMA and with the DHS Office of Operations Coordination and Planning. PESB works with the FEMA National Exercise Division and others to develop, conduct, influence, and participate in a broad range of exercises, workshops, seminars, and facilitated discussions that advance national preparedness and response capability for threats having catastrophic health consequences, with a focus on chemical, biological, radiological and nuclear (CBRN) events.

Food, Agriculture, and Veterinary Defense

The FAVD Branch is responsible for oversight and management of the Department's implementation of Homeland Security Presidential Directive-9 (HSPD-9): Defense of United States Agriculture and Food. FAVD works to ensure adequate response capability at the State, local, tribal and territorial levels for incidents occurring within the Food and Agriculture Sector, whether intentional or naturally occurring. Additionally, FAVD provides subject-matter advice and expertise to DHS leadership on food defense, agricultural security, and veterinary defense.

State and Local Initiatives

The SLI builds national resilience against health incidents through preparedness enhancement and capabilities development, and executes the Chief Medical Officer's statutory responsibility to be the primary DHS point of contact with State and local stakeholders on medical and health issues. SLI provides support to State and local public health and homeland security partners to build and improve their capability to prepare for and respond to health incidents. Key activities include improving and facilitating sharing of public health threat information by inclusion of State and local public health professionals within the national network of State and local fusion centers; providing technical assistance to fusion centers for development of public health capabilities; sponsoring State and local health officials' security clearances, which is critical for the sharing of classified CBRN and health threat information; providing support and medical and health subject matter expertise to DHS Office of Intelligence and Analysis to inform intelligence information by key disciplines; and accessing, analyzing, and promoting appropriate sharing of intelligence community health threat and risk information and products.

Workforce Health and Medical Support

WHMS is comprised of four branches that lead the Department's workforce health and medical oversight activities:

- The Medical First Responder Coordination Branch provides medical guidance, standards, policy, and outreach to medical first responder stakeholders, both internal to and external to the Department. Within this branch resides the DHS Emergency Medical Services (EMS) System and Program.
- The Occupational Health Branch mitigates the adverse health impacts of work-related risks for the DHS workforce through medical guidance, programs, standards, and policy. Within this branch reside the Medical Countermeasures (MCM) and DHS *Together* resiliency programs.
- The Medical Quality Management Branch advises, consults with, and assists DHS Components on issues related to the improvement of the quality, safety, efficiency, and effectiveness of health care for all stakeholders.
- The Medical Liaisons Branch provides subject matter expertise and medical guidance to the DHS Operational Components on issues related to planning, policy, response, and workforce health protection.

Medical First Responder Coordination (MFRC)

This Branch serves as the primary DHS point of contact to the external and internal medical first responder communities and facilitates communication across the Department related to EMS. MFRC EMS activities include facilitating the integration of the EMS community into Federal, State, local, territorial, and tribal disaster preparedness and policy activities; leveraging established collaborative working relationships with national associations to enhance efficiency; providing standards and promoting consistency in EMS practices amongst DHS EMS providers consistent with national and state requirements for delivery of EMS services; developing strategies for coordination of Department-wide EMS services to add efficiencies in training, oversight, and operating procedures, such as a Department-wide electronic patient care reporting system and online continuing education for DHS EMS personnel; and through the engagement of the EMS community as a partner in the national network of fusion centers.

DHS has thousands of medical personnel who provide care for wide-ranging and often, remotely deployed personnel, from border agents in the Southwest desert, to DHS aviation personnel engaged in counternarcotics and smuggling operations. OHA helps to ensure that responders are able to support the Department's missions while minimizing health threats and work-related disability by developing health-related guidance and policies and assisting the Department in its health screening programs.

Occupational Health

OHA occupational health activities focus on mitigation of adverse health impacts of work-related risks to the DHS workforce by developing strategy, policy, requirements, and metrics for the medical aspects of a Department-wide occupational health and safety program. This is done in partnership with the Office of the Chief Human Capital Officer (OCHCO) Safety and Health.

OHA provides health and medical consultation resources to DHS Components 24 hours a day, 7 days a week. OHA consultation services ensure regulatory compliance and consistency with industry best practices in support of various Component missions with regard to medical, health, and safety considerations. The initiative also assists OCHCO in developing physical evaluation programs (pre-placement, fitness-for-duty, return-to-work, etc.) and performing post-incident analyses. The Occupational Health branch also maintains two important programs. OHA's MCM program ensures that the mission-essential functions of the Department continue following an anthrax attack or pandemic influenza outbreak to ensure continuity of operations and national resilience. *DHSTogether* is a DHS-wide workforce resiliency program promoting employee wellness and stress management.

Medical Quality Management

The initiative ensures medical quality assurance by supporting the "One DHS" concept by developing protocols, quality assurance standards, credentialing standards and validation processes; providing quality assurance and medical advice; advising FEMA on safety and environmental health housing issues; and creating a medical oversight framework.

OHA Medical Liaisons

The initiative provides medical and public health subject matter experts directly to DHS Components. Medical Liaisons provide the Components with advice in planning, response, and workforce protection policy. They act as an extension of OHA and the Chief Medical Officer, so that component medical issues can be identified rapidly in order to be resolved quickly and avoid costly operational impacts. In addition, the Medical Liaisons Officers identify gaps in standards, policy, or guidance within the components and serve to inform the Chief Medical Officer of those gaps. This helps to identify common medical themes that need to be prioritized across the Department in order to better effect medical policies that will have significant change. This aids in decreasing workers' compensation costs, decreasing liability, and improving quality by implementation of clinical practice guidelines. In addition, the Medical Liaisons Branch supports the traveler health program, medical first responder programs, and FEMA search and rescue programs in DHS in order to assure timely and valuable medical expertise, as an extension of the Chief Medical Officer.

PPA: Salaries and Expenses

	Perm. Pos	FTE	Amount
2012 Revised Enacted	83	83	29,171
2014 Adjustments-to-Base	23	16	(1,802)
2014 Current Services	106	99	27,369
2014 Program Change	-	-	-
2014 Total Request	106	99	27,369
Total Change 2012 to 2014	23	16	(1,802)

A request for S&E of \$27.369 million in FY 2014 will fund 106 FTP and 99 FTE.

Adjustments-to-Base include:

- Increase of \$0.040 million for transfer from USM OCAO for WCF.
- Increase of \$0.001 million for transfer from OCFO for Financial Audit Clearinghouse Database for WCF
- Increase of \$0.108 million for 1.0 percent pay inflation
- Increase of 18 FTE to account for FY 2013 hiring to fill fully-funded vacancies
- Decrease of 0.118 million for General Services Administration (GSA) rent
- Decrease of \$2.333 million for efficiencies listed below:
 - \$0.343 million for 2 mission support FTE positions
 - \$0.043 million for Permanent Change of Station costs
 - \$0.204 million for general TDY assignment and travel
 - \$0.008 million for long-term TDY of more than 30 days
 - \$0.030 million for HQ administrative efficiency across DHS
 - \$1.705 million for scaling down of officewide mission support contracts, staffing rebaseline, and reduction in assessed WCF fees
- Increase of \$0.500 million to account for funds transfer to NBIC for software and hardware upgrades to enhance biosurveillance capabilities in FY 2012

CURRENT SERVICES PROGRAM DESCRIPTION:

The S&E PPA funds the salaries and benefits for all FTE within OHA and the activities of the OAS. The Assistant Secretary and Chief Medical Officer (CMO) leads a team of doctors, veterinarians, nurses, scientists, public health professionals, and other public servants whose expertise and skills contribute to achieving the Office's mission. OAS provides executive direction and leadership to all divisions and branches and ensures that OHA's critical mission can be accomplished efficiently and effectively. OAS includes both the Immediate Office of the Assistant Secretary and CMO and the Office of the Chief of Staff.

The Immediate Office of the Assistant Secretary and CMO consists of the Assistant Secretary/CMO, the Principal Deputy Assistant Secretary and Deputy CMO, Medical Advisors, a Futures Advisor, and a Biodefense Advisor. These individuals advise the Assistant Secretary/CMO on specific, highly complex, strategic medical and public health issues and policies.

The Principal Deputy Assistant Secretary/Deputy CMO leads the management operations activities of OHA, including finance, acquisition, human capital, information technology, emergency preparedness, continuity of operations, and facilities/property services.

The Office of the Chief of Staff consists of the Chief of Staff and leads OHA's policy, public affairs, external relations, and executive secretariat functions.

In addition, S&E funds OHA's share of the DHS WCF, office supplies, training for the entire organization, professional development certification, continuing medical education, travel for senior management, and other shared services.

Total Request	-	-	-	-	-	-	-	-	1,900

Description of Item

The Department has a responsibility to provide MCM directly to its mission essential personnel to ensure continuity of operations. In recognizing the risks and the need to protect the DHS workforce, OHA has developed an MCM strategy that will mitigate the impact to employees and ensure national resilience. Executive Order (E.O.) 13527, “Establishing Federal Capability for the Timely Provision of Medical Countermeasures Following a Biological Attack,” Section 4, specifically mandates Federal agencies establish mechanisms for the MCM Program to ensure that the mission-essential functions of the executive branch continue following an attack, including DHS.

Justification

The FY 2014 funding request will allow OHA to fulfill its responsibility of executing this critical mission. In addition to training, program support, and planning activities, this funding provides antivirals and antibiotics to cover the DHS workforce, those in care and custody, as well as critical contractors. Specifically, the FY 2014 request allows the MCM program to:

- Maintain DHS antibiotic stockpile at 325,000 courses by rotating/replenishing expiring drugs
- Maintain DHS antiviral stockpile at 254,000 courses by rotating/replenishing expiring drugs
- Pre-position antibiotics at 450 DHS Component locations (an increase of 200 locations from FY 2012)
- Purchase an additional stockpile of potassium iodide (KI) in amount of 20,000 courses

- Distribute resources in support of Component point-of-dispensing (POD) operations including POD Kits (supplies) and training DVDs
- Support National Special Security Events with MCM surge kits and personnel

Impact on Performance (Relationship of Increase to Strategic Goals)

Mission & Strategic Goals: Mission 5: Ensuring Resilience to Disasters

- Goal 5.2: Enhance Preparedness
- Goal 5.3: Ensure Effective Emergency Response
- Goal 5.4: Rapidly Recover

The MCM Program supports DHS' goals of enhancing preparedness, ensuring effective emergency response, and rapidly recovering by ensuring Federal capability following a biological attack.

Salaries and Expenses Mission Statement

The Salaries and Expenses PPA funds the salaries and benefits for all full-time equivalents (FTE) within OHA and the activities of the Office of the Assistant Secretary (OAS). OAS supports OHA's mission by providing executive direction and leadership to all divisions and branches and ensures that OHA's critical mission can be accomplished efficiently and effectively through policy coordination, communications, external relations, strategic planning, and correspondence management. OAS also provides for the management of all relevant business operations including financial management, program analysis, facilities maintenance and planning, continuity of operations planning, human capital management, and information technology support. In addition, S&E funds OHA's share of the DHS Working Capital Fund, office supplies, training for the entire organization, travel for senior management, and various other shared services.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	11,415	11,915	11,680	265
11.8 Special Service Pay	187	187	800	613
12.1 Benefits	2,602	2,602	3,517	915
Total, Salaries & Benefits	14,204	14,704	15,997	1,793

Salaries and Benefits includes costs for 99 FTEs, as well as legal services from the Office of General Counsel and liaisons from the Public Health Service detailed to OHA.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$185	\$100	\$50	-\$135

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects travel funding requirements including implementation of new travel policies in support of the Administration's Campaign to Cut Waste.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$2,268	\$3,046	\$2,928	\$660

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$98	\$98	\$70	-\$28

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal agencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$1,146	\$1,231	\$494	-\$652

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government and reflects the Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$11,036	\$10,322	\$7,675	-\$3,361

The FY 2014 request funding level reflects changes to Interagency Agreements for contractual services for the purchase of goods and services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$134	\$134	\$55	-\$79

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. This request funds OHA equipment requirements.

Planning and Coordination Mission Statement

The Planning and Coordination PPA (P&C) is comprised of programs that primarily support Mission 5 of the Future Years Homeland Security Program (Ensuring Resilience to Disasters), as well as and Maturing and Strengthening the Homeland Security Enterprise. The PPA is currently organized into four programs: Planning and Exercise Support; Food, Agriculture, Veterinary Defense (FAVD); State and Local Initiatives (SLI); and Workforce Health and Medical Support (WHMS) (composed of the following initiatives: Occupational Health, Medical Liaisons, Medical First Responder Coordination, and Medical Quality Management). These programs support this mission through a variety of activities directed both externally to Federal, State, and local stakeholders and internally within the Department.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.8 Special Service Pay	459	459	1,045	586
Total, Salaries & Benefits	459	459	1,045	586

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$345	\$174	\$174	-\$171

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects travel funding requirements including implementation of new travel policies in support of the Administration's Campaign to Cut Waste.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$4,012	\$4,221	\$1,278	-\$2,734

Contractor support includes proprietary software for the electronic patient care record system, implemented across DHS for EMS providers; SME and FFRDC support for key projects. It also includes access to proprietary international travel advisory assistance online for DHS travelers. The request also reflects the Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$1,036	\$1,345	\$1,198	\$162

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request funding level reflects contracts for IT hosting and Sharepoint services for ePCR and Credentialing database development, operation and maintenance. It also includes medical countermeasures support services, including shipping, storage, inventory management, labeling, recovery and destruction and kitting. The Occupational Health portion includes DHSTogether phase 1 & 2 projects with CBP, FLETC, USUHS and others.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	0	0	\$1,300	\$1,300

OHA purchases and stockpiles Medical Countermeasures for the entire department, including antibiotics for Anthrax preparedness, and antivirals for Pandemic preparedness. Additionally, in FY14, OHA may determine the need for more specialty MCM stockpile, such as Potassium Iodide (KI) for nuclear exposure. Included in equipment are the Point of Dispensing (POD) kits prepared for sending out to the DHS POD locations, which are supplies and materials sourced for the Components. Classification in FY 14 reflects an adjustment from prior years.

BioWatch Mission Statement

The BioWatch Program manages an early warning system designed to rapidly detect aerosolized biological threat agents that could be used in an intentional wide-area release causing harm to the population. This Program deploys collection devices and analytical capability in more than 30 high-risk metropolitan areas, called BioWatch jurisdictions, throughout the Nation. The BioWatch program provides public health officials with a warning of a potentially hazardous biological agent release before exposed individuals would typically develop symptoms of illness. This “detect-to-treat” approach provides public health officials with an opportunity to respond aggressively to help mitigate the potentially catastrophic impact on the population of a biological agent release. The program is pursuing autonomous biodetection technologies with the goal of decreasing the time to notification of a biological event.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.8 Special Service Pay	1,107	1,926	1,977	870
Total, Salaries & Benefits	1,107	1,926	1,977	870

Salaries and Benefits include all costs associated with assigned Public Health Service Officers (PHSO) and detailees to support the deployment of autonomous detectors in all current BioWatch jurisdictions. The FY 2014 request funding level reflects changes in Salaries and Benefits associated with personnel involved with carrying out PPA mission responsibilities.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$119	\$120	\$148	\$29

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request funding level reflects a change in travel associated with current BioWatch operations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$38,189	\$43,929	\$36,305	-\$1,884

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request funding level reflects a commitment by OHA to engage industry experts in advisory and assistance services associated with Developmental Test and Evaluation (DT&E); Operational Test and Evaluation (OT&E); Test and Evaluation Support; the BioWatch National Workshop; Jurisdictional Training; Laboratory Operation and Support; Quality Assurance Support; and Program Management. The request also reflects the Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$25,848	\$18,317	\$8,774	-\$17,074

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request funding level reflects changes to some Interagency agreements for: Assays; the development of Autonomous Detectors; Guidance; Site Modeling; Engineering/Data Analysis; Developmental Test and Evaluation (DT&E); Operational Test and Evaluation (OT&E); Field Operation and Support; Public Health and Preparedness Support; Logistics Support; and Special Events Support.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$13,985	\$14,755	\$15,305	\$1,320

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request funding level reflects the purchases for supplies and materials associated with reagents and other supplies related to Lab and Logistics Support.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$8,320	\$5,414	0	-\$8,320

Equipment includes all costs for the purchases of property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request funding level reflects changes associated with the revised Gen-3 project schedule and associated Information Management Systems, Low Rate Initial Production (LRIP); Systems Integration Laboratory; and Engineering Data.

National Biosurveillance Integration Center Mission Statement

The National Biosurveillance Integration Center (NBIC) has the key responsibility to integrate, analyze, and share the nation's biosurveillance information from across federal, state, and local entities and the private sector. NBIC contributes to early warning and shared situational awareness of potential biological events to better inform decision-makers and improve the efficiency and efficacy of any necessary response and recovery efforts.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.8 Special Service Pay	645	654	654	9
Total, Salaries & Benefits	645	654	654	9

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$60	\$60	\$40	-\$20

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 requested funding level reflects changes in travel associated with personnel involved with collaboration between with federal and state partners. This decrease is a result of our strong commitment to reduce government spending on travel costs. To achieve the same results, we will use Video TeleConferencing (VTC) whenever possible in lieu of travel.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$12,064	\$11,318	\$6,251	-\$5,813

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 requested funding level reflects a change in commitment by OHA to revisit the NBIC focus and a review of costs associated with the National Collaborative for Bio-Preparedness (NCB-P) project. The request also reflects the Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$54	\$55	\$555	\$501

Purchases of Goods and Services from Government Accounts include rental payments to agencies other than GSA, interagency agreements for contractual services (including the Economy Act) for the purchase of goods and services, except as described below, and expenditure transfers between Federal accounts. The FY 2014 requested funding level reflects a change by NBIC to provide continued funding for the Food Biosurveillance pilot project with the Centers for Disease Control and Prevention (CDC), National Center for Environmental Health (NCEH). This funding will continue to advance and operationalize the enhanced coding structure within the National Poison Data System to be provided to the CDC and NBIC. The funding for the Food Biosurveillance pilot project will be recurring costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	0	0	\$500	\$500

Operation and Maintenance of Equipment includes storage and maintenance; operation and maintenance of information technology systems. The FY 2014 requested funding level reflects a change by NBIC to provide continued funding to operationalize the Social Media Analysis (SMA) toolkit pilot project. The funding for the pilot project will be recurring costs.

Chemical Defense Program Mission Statement

The Chemical Defense Program (CDP) provides Federal, State, and local entities with the knowledge and tools to build and sustain a viable framework for preparedness and response to high consequence chemical events. The CDP activities support the goals of improvement of detection and communication technology and the development of national best practices guidance documents. CDP efforts are directed towards integrating risk assessments and detection capabilities into community preparedness, developing response protocols, and defining best practices.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.8 Special Service Pay	237	237	161	(76)
Total, Salaries & Benefits	237	237	161	(76)

The FY 2014 request reflects a reduction of \$76,000 to reflect not hiring an additional PHSO and no IPA.

A. Component Overview

The Office of Health Affairs is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Health Threats Resilience: Health Threats Resilience (HTR) coordinates efforts dedicated to national resilience against health incidents and supports an end-to-end approach to biological and chemical defense. HTR manages BioWatch, an early warning system to rapidly detect dangerous pathogens in the air, and the National Biosurveillance Integration Center, which enables the early warning and shared situational awareness of biological events so that critical decisions directing response and recovery efforts are well-informed and ultimately save lives. HTR provides health and medical expertise related to chemical preparedness, detection, and response; and provides expertise to federal planning and policy development. HTR also coordinates DHS programs related to the security of our nation's food, agriculture, and animal health; and ensures resiliency by providing technical assistance to help state and local communities bolster efforts to prepare for and respond to catastrophic health threats.

Workforce Health and Medical Support: Workforce Health and Medical Support (WHMS) leads the Department's workforce health and medical oversight activities. WHMS ensures medical first responder coordination by providing support to DHS personnel who perform operational medical services. WHMS supports the "One DHS" concept through the following initiatives: Developing cross-DHS emergency medical services (EMS) protocols, quality assurance standards, credentialing standards, and validation processes; providing quality assurance and medical advice; advising Federal Emergency Management Agency (FEMA) on safety and environmental health housing issues; and creating a medical oversight framework. WHMS focuses on DHS occupational health, which involves mitigation of adverse health impacts of work-related risks for the DHS workforce by developing strategy, policy, requirements, and metrics for the medical aspects of a Department-wide occupational health and safety program.

Management and Administration: OHA is led by the Assistant Secretary for Health Affairs, who also holds the title of Chief Medical Officer for DHS, and serves as the principal health and medical advisor to the Secretary and the Administrator of Federal Emergency Management Agency (FEMA). The Deputy Chief Medical Officer/Principal Deputy Assistant Secretary for Health Affairs serves as the Chief Operating Officer.

FY 2014 Budget Request

The table below shows the Office of Health Affairs' FY 2014 Budget request by Future Years Homeland Security Program (FYHSP) program.

FYHSP Program	FY 2014 Request

Mission 1: Preventing Terrorism and Enhancing Security***Resources Requested***

The Office of Health Affairs' resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Health Threats Resilience	133,374	24	135,787	24	104,039	24
Management & Administration	14,018	40	14,251	40	10,556	38
Total	147,392	64	150,038	64	114,595	62

Performance Measures

For *Preventing Terrorism and Enhancing Security*, OHA does not have its own strategic-level performance measures in this area. Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Estimated time between an indoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result (in hours)						
Description: This performance measure calculates the time between an indoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result by the local laboratory official. The indoor detection goal for BioWatch Current Operations (Gen-2) is a maximum time to confirmed positive result (BAR declaration) of ≤ 33 hours. This time is based on an average of the daily 24-hour aerosol collection cycle at some locations and shorter aerosol collection cycles at other locations (three pickups per day) followed by up to a 12-hour transport and laboratory analysis period.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	≤ 33	≤ 33	≤ 33	≤ 33	≤ 33	≤ 33
Result:	36	30.9	30	30	N/A	N/A

Measure: Estimated time between an outdoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result (in hours)						
Description: This performance measure calculates the time between an outdoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result by the local laboratory official. The outdoor detection goal for BioWatch Current Operations (Gen-2) is a maximum time to confirmed positive result (BAR declaration) of ≤ 36 hours. This time is based on the daily 24-hour aerosol collection cycle and up to a 12-hour transport and laboratory analysis period.						

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=36	<=36	<=36	<=36	<=36	<=36
Result:	36	36.0	36	36	N/A	N/A

Measure: National Biosurveillance Integration System operational response time to incoming queries relative to biosurveillance (in hours)						
Description: Elapsed time (hours) between NBIC receiving relevant information and permission to disseminate and share information with interagency partners						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	<48.00	<24.00	<24.00
Result:	N/A	N/A	17.87	15.42	N/A	N/A

Measure: Percent of targeted urban areas that are monitored for biological threats using BioWatch technology						
Description: The current generation of BioWatch technology and supporting collection and laboratory analysis processes are deployed in more than 30 jurisdictions in accordance with the Urban Area Security Initiative (UASI). A jurisdiction is considered monitored if at least two-thirds of the BioWatch devices within the jurisdiction are operational in a 24-hour cycle.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

Mission 5: Ensuring Resilience to Disasters

Resources Requested

The Office of Health Affairs' resources supporting *Ensuring Resilience to Disasters* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Health Threats Resilience	8,758	18	9,323	18	8,218	18
Workforce Health & Medical Support	1,053	1	1,052	1	671	1

Performance Measures

The Office of Health Affairs contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Maturing and Strengthening the Homeland Security Enterprise

One of the Department’s objectives is to improve DHS’s organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters components, enhanced programmatic alignment to the homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

Resources Requested

OHA resources supporting *Maturing and Strengthening the Homeland Security Enterprise* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Workforce Health & Medical Support	5,783	13	5,831	13	4,472	13

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency Salaries and Expenses

I. Appropriation Overview

A. Mission Statement:

The FEMA Salaries and Expenses (S&E) appropriation provides core mission funding for the development and maintenance of an integrated, nationwide capability to prepare for, mitigate against, respond to, and recover from the consequences of major disasters and emergencies regardless of cause, in partnership with other Federal agencies, State, local and Tribal governments, volunteer organizations, and the private sector. The account supports core operations for all FEMA organizations, providing resources for mission activities and administrative support. S&E resources are directed to both Headquarters and regional operations.

B. Budget Activities:

Activities are organized according to the following program/project/activity (PPA) structure:

- Administrative and Regional Offices (ARO)
- Preparedness and Protection
- Response
- Recovery
- Mitigation
- Mission Support
- Centrally Managed Accounts

B.1 Administrative and Regional Offices (ARO)

ARO incorporates the essential command and control functions of the Agency. Administrative coordinates all policy, strategic planning, resources, managerial, and administrative actions to include the Federal Coordinating Officers, National Capital Region Coordination, and the Evaluations and Assessment Program. Regional Operations includes the leadership, management, and mission support functions of the 10 FEMA Regions. The Regions execute the operational direction received from Headquarters to ensure FEMA can execute its primary mission: preparedness; protection; response; recovery; and mitigation.

B.2 Preparedness and Protection

Preparedness. The preparedness mission seeks to reduce the loss of life and property and protect the Nation by planning, training, exercising, and building the emergency management profession. As manager and coordinator of the preparedness cycle, FEMA provides assistance, support, and leadership to help Federal, State, Tribal and local governments and the private sector build the operational capabilities needed to implement preparedness strategies successfully.

Protection. The protection mission seeks to protect our Nation's constitutional form of government and ensures that a system is in place to warn our citizens of impending hazards. FEMA is responsible for supporting the enhancement of protection capabilities for all hazards, which in turn helps to integrate the tools and mechanisms for capability building across mission areas; streamlines the delivery of assistance to State, Tribal and local governments, as well as nongovernmental entities; and leverages existing intergovernmental coordination infrastructures. FEMA's primary continuity business lines and associated continuity activities include: Continuity Planning; Continuity Training and Exercises; and Continuity Operations.

B.3 Response

The Response mission is to conduct emergency operations to save lives and property through positioning emergency equipment, personnel, and supplies; evacuating survivors; providing food, water, shelter, and medical care to those in need; and restoring critical public services. FEMA conducts response operations in partnership with: State, Tribal and local governments; interagency Federal partners; nongovernmental organizations; and the private sector. Response functions also in management of the Stafford Act Declarations process.

FEMA executes response operations through established incident management and incident support entities that capitalize on FEMA's nationwide organizational structure, occupying specific disaster facilities at the national Headquarters level, in the affected Regional office, and in temporary field locations established near the scene of a disaster or emergency. FEMA's response operations include logistics, search and rescue, disaster emergency communications, and planning.

B.4 Recovery

The Recovery mission seeks to support communities in rebuilding so that individuals, civic institutions, businesses, and governmental organizations can function on their own, return to normal life, and protect against future hazards.

FEMA's recovery mission is accomplished through a combination of programs and functions that provide direct and indirect support. These include recovery planning, and programs specifically designed to assist both individuals and local governments that have been affected by disasters.

B.5 Mitigation

The mitigation mission seeks to reduce or eliminate long-term risks to people and property from hazards and their effects. Mitigation benefits society by creating safer communities, enabling people

to recover more rapidly from floods and other disasters, and reducing the financial impact on Federal, State, Tribal and local governments and communities. FEMA's mitigation mission is accomplished through the following basic mitigation business lines: Risk Analysis, Risk Reduction, and Risk Insurance.

B.6 Mission Support

Mission Support provides the corporate support, tools, and resources that the agency needs to build, sustain, and improve its primary mission of preparedness, protection, response, recovery, and mitigation. Functions include information technology, human capital management, acquisition management, security, and administration which include facilities management, records management, and occupational health and safety.

B.7 Centrally Managed Accounts

Centrally managed accounts are critical bills that must be managed at the enterprise level to ensure efficient and effective cost management, which includes streamlining cost factors and prompt payment. The authority and responsibility for the individual accounts are assigned by the FEMA Office of the Chief Financial Officer (OCFO) to the individual functional proponents.

C. Budget Request Summary:

The Federal Emergency Management Agency requests 4,658 positions, 4,332 FTE and \$1,042.382 million for FY 2014. The total adjustments-to-base are increases of 169 positions, 562 FTE and \$27.754 million.

The program changes include 0 positions, 0 FTE, and \$12.5 million.

The request reflects FEMA's priority to manage resources more effectively and continue to support the Department of Homeland Security's (DHS) strategic priorities. Our focus continues to maintain and strengthen the Agency's ability to respond to disasters while reducing costs and improving the efficiency of our operations.

In order to provide streamlined accounting and increased oversight in FY 2014, the Salaries and Expenses account includes \$259.01 million in funding for management and administration of preparedness grants and operating programs that was requested as a transfer from State and Local Programs in previous years.

D: Efficiencies FY 2013

Travel

S&E (\$ 4.255 million) – FEMA has undertaken a review of all Agency travel requirements and determined that a 20 percent reduction of travel, over FY 12 levels, can be achieved during FY 2013.

Rent

S&E (\$ 8.3 million) – Decrease in rent to be achieved FEMA-wide through consolidation of facilities to reduce the overall FEMA footprint.

Communications, Utilities, and Miscellaneous Charges

S&E (\$ 6.4 million) – Decrease in IT enterprise telecom to be realized through management efficiencies.

III. Current Services Program Description by PPA

Department of Homeland Security
Federal Emergency Management Agency
Salaries and Expenses
Administrative and Regional Offices
Program Performance Justification
 (Dollars in Thousands)

PPA: Administrative and Regional Offices

	Perm. Pos	FTE	Amount
2012 Revised Enacted	1,681	1,486	250,661
2014 Adjustments-to-Base	23	73	(9,925)
2014 Current Services	1,704	1,559	240,736
2014 Total Request	1,704	1,559	240,736
Total Change 2012 to 2014	23	73	(9,925)

FEMA requests \$240.736 million, 1,704 positions and 1,559 FTE in the Administrative and Regional Offices PPA. This includes adjustment-to-base increases of 23 positions and 73 FTE, and a decrease of \$9.925 million, including:

- Increase of \$1.612 million to support FY 2014 pay raise.
- Increase of 240 FTP, 225 FTE and \$32.623 million to support realignment of management and administration costs from State and Local Programs.
- Increase of 41 FTP and 36 FTE resulting from transfer from State and Local Program.
- Decrease of 240 FTP, 245 FTE and \$32.623 million resulting from State & Local programs transfer.
- Decrease of 1 FTP, 41 FTE, and \$6.21 million from management efficiencies.
- Decrease of 23 FTP, 23 FTE, and \$10 million resulting from Evaluations and Assessments transfer to the Preparedness PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

Administrative and Regional Operations incorporates the essential command and control functions of the Agency. The following activities directly support FEMA's mission to support our citizens and first responders to ensure that as a Nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.

1) Office of the Administrator

The Administrator and the Deputy Administrator have the ultimate responsibility for providing leadership and direction that enables FEMA to accomplish the Agency's mission: to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.

Collaborating with State and local governments, and other emergency providers to build a National system of emergency management, the Administrator integrates the Agency's emergency preparedness, protection, response, recovery, and mitigation responsibilities to confront the challenges of a natural disaster, act of terrorism or other manmade disaster. The Administrator coordinates the implementation of a risk-based, all-hazards strategy.

The **Office of Senior Law Enforcement Advisor** enhances communication and coordination between FEMA and State, local, and Tribal law enforcement. The Law Enforcement Advisor is an integral part of FEMA's senior leadership team – participating in planning meetings and consequence management during a crisis.

The **DHS Center for Faith-Based and Neighborhood Partnerships** (DHS Center) builds, sustains, and improves effective partnerships between government sectors, faith-based and community organizations. Located within FEMA, the DHS Center attends to faith-based and community organization engagements and partnerships across DHS.

The **National Advisory Council (NAC)** advises the Administrator on all aspects of emergency management. The NAC incorporates State, local, and Tribal government and private sector input in the development and revision of the national preparedness goal, the national preparedness system, the National Incident Management System (NIMS), the National Response Framework, and other related plans and strategies.

The members of the NAC are appointed by the Administrator, and, to the extent practicable, represent a geographic (including urban and rural) and substantive cross section of officials, emergency managers, and emergency response providers from State, local, and Tribal governments, the private sector, and nongovernmental organizations.

The **Office of the Executive Secretariat (OES)** serves as the primary point of contact for FEMA's Office of the Administrator for coordinating departmental tasking, briefing material, and official correspondence. The OES is the central coordination point within FEMA responsible for ensuring proper and expeditious action on all tasks and correspondence addressed to and from FEMA.

A. Office of External Affairs

The mission of the Office of External Affairs (OEA) is to engage, inform, and educate all of FEMA’s stakeholders in support of the agency’s programs and initiatives to achieve its mission. OEA accomplishes its mission by coordinating and maintaining visibility of public and internal communications; advising FEMA program and support offices on decision-making regarding policies, plans, and actions that affect stakeholder, media, and Congressional audiences; and organizing outreach efforts targeted at principal stakeholders to include local, State, territorial, and Tribal governments, the private sector, national organizations and associations, and the American public.

OEA accomplishes critical aspects of FEMA’s overall strategic goals by implementing the “Whole Community” concept and striving to improve communications—along with the sharing of best practices—among all emergency management personnel. OEA also delivers the expertise necessary to effectively lead public disaster communications in a unified manner and executes a targeted National public readiness initiative to build and sustain preparedness through the Ready Campaign.

OEA provides operational services to FEMA’s mission for Intergovernmental Affairs, Strategic Communications, Public Affairs, Congressional Affairs, Private Sector Initiatives, and the Ready Campaign.

Intergovernmental Affairs (IGA) serves as FEMA’s primary National-level liaison for State, local, Tribal and territorial officials and governments and the associations that represent their interests. The division forges trusting relationships with stakeholder groups at every level in order to facilitate open and effective communication about the needs and capabilities of the communities FEMA is charged with serving. IGA identifies issues, answers questions, and offers solutions to its intergovernmental partners, and also facilitates partner participation in the FEMA policy development process. IGA works in tandem with the other elements of OEA to ensure that accurate, relevant, and clear information reaches community and elected leaders affected by disaster so that they can adequately inform constituents about Federal programs and services. IGA’s efforts speed the flow of disaster aid to victims by effectively involving local players in the response process. IGA provides State legislators with information that can help them enact appropriate disaster legislation that interacts cohesively with Federal programs and laws. Intergovernmental Affairs also coordinates with the White House and other Federal intergovernmental affairs offices to ensure the dissemination of information and policies.

The **Strategic Communications Division (SCD)** enhances agency messaging by increasing direct communication among agency programs. SCD acts as a direct liaison between program offices in order to ensure that internal and external agency communications and messaging efforts are clear, consistent, timely, and relevant.

The **Public Affairs Division (PAD)** coordinates FEMA’s public message with the goal of providing information to the American public that helps them prepare for, protect against, respond to, recover from, and mitigate disasters in their area, and also serves as the primary point of contact with the media, and is the lead for all social media channels for the Agency. The division provides consistent, clear communications to both internal and external audiences regarding FEMA’s activities, responsibilities, policies, and initiatives. Public Affairs coordinates with other Federal agencies and internal FEMA program offices to develop and execute communications strategies including: the dissemination of current policy information; the tracking and management of media contacts; and the support and maintenance of FEMA’s Web and social media strategies. PAD’s programs and activities

provide disaster survivors with timely, accurate information and also facilitate the maintaining of effective, ongoing relationships with the media in order to promote FEMA's programs and goals.

The **Congressional Affairs Division (CAD)** serves as FEMA's primary liaison to the United States Senate and House of Representatives on emergency management issues. The division works with U.S. Congressional Authorization and Appropriations committees, Members of Congress, and their professional office staff to accomplish this goal effectively. CAD responds to Congressional inquiries related to all topics ranging from government-wide policies to individual constituent casework and also provides critical updates, reports, and analysis regarding the Agency's operations, programs, and policies. CAD is responsible for notifying Congress about future agency initiatives, policies, and programs; coordinating the development of Congressional hearing testimony and briefings by FEMA senior officials; developing and implementing strategies to advance FEMA's legislative initiatives and other interests that relate to Congress; and provide technical drafting assistance to our congressional stakeholders.

The **Private Sector Initiatives Division (PSD)** is FEMA's primary non-acquisition point of coordination and dialogue between the Agency and the Nation's multitude of large and small businesses, trade associations, universities, think tanks, and their extended network of members and employees. The PSD is a driver of positive change within the Agency, delivering new, innovative ways to engage this national network of resources and individuals in emergency management at every level, such as through the 90-day private sector rotation program or the National Business Emergency Operations Center. The division researches and documents private sector best practices that contribute to the emergency management mission; advises senior leadership on ways to improve emergency response efforts through private sector involvement and engaging private sector stakeholders in more meaningful ways in everything from policy development to exercises and planning; and leverages extensive national networks to get critical information directly into the hands of people who need it.

By incorporating the private sector into emergency management through the division's programs and initiatives, FEMA accomplishes one of its core objectives of building a "Whole Community" concept and strengthens communities' abilities to respond to disaster at the local level. The division's work is high-impact and high-profile, helping to speed delivery of aid in disasters through nontraditional means of outreach and providing new tools, resources, and methods of stakeholder engagement.

The **Ready Campaign** develops and executes a national public service advertising campaign designed to educate and empower the American people to prepare for and respond to disasters affecting their families and communities. Launched in 2003, the Ready Campaign involves the public in emergency management efforts by increasing awareness regarding potential hazards, providing knowledge and tools to facilitate preparedness and response capabilities locally, and helping disaster survivors become a resource in the "Whole Community" approach to emergency management. The Ready Campaign also works closely with the Citizen Corps program, which is the local-level effort to increase the preparedness of the American public and businesses.

The Ready Campaign is more than just awareness, it is about actions individuals can take to resist, recover from or better adapt to adversity created by disruptions, emergencies or disasters. Additionally, the campaign is a resource for the emergency management community to educate neighbors and friends on how they can provide aid to one another in the first phase of a response.

B. Office of Policy and Program Analysis

The Office of Policy and Program Analysis (OPPA) fosters strategic coherence; ensures availability of critical resources through the Defense Production Act; leads Agency policy, strategy and innovation; provides objective analysis; and drives strategy, performance integration and accountability for FEMA.

The **Policy Division** develops, leads, and coordinates the Agency's policy process that supports effective and efficient delivery of Agency programs across the full spectrum of preparedness and emergency management, and represents the agency interests in departmental, national, and international policymaking. This office also supports FEMA leadership in the identification, development, and implementation of the Agency's policy priorities and represents FEMA on DHS-policy matters.

Defense Production Act Division (DPA) provides guidance and support to DHS and other Federal agencies to expedite and expand the supply of critical resources from the private sector for homeland security, emergency preparedness, response, and recovery activities, and critical infrastructure protection and restoration. DPA Division is responsible for implementing FEMA's DPA functions enabling OPPA to provide guidance and support for use of DPA authorities by FEMA and other DHS components; advises the National Security Council on issues of national security resource preparedness and on the use of DPA authorities; and provides for the central coordination of DPA plans and programs by Federal departments and agencies.

Program Analysis & Evaluation Division (PA&E) gives FEMA an independent analysis and evaluation capability that enhances decision-making, transparency, and accountability. PA&E conducts program analyses, which include analyses and evaluations of alternative plans, programs, components, and personnel levels. PA&E also helps develop strategic requirements and capabilities to include: establishing a common strategic requirements system for all of FEMA; assessing current operations capabilities; and validating and prioritizing organizational capabilities to determine risks and gaps for FEMA senior leadership. PA&E also coordinates, tracks, and analyzes Agency responses to General Accountability Office and Office of Inspector General reports and recommendations.

PA&E works closely with the OPPA performance teams who coordinate and support all Agency program and regional offices with the development and reporting of program performance measures, the formulation of the Future Years Homeland Security Program, and ensuring the requirements of the Government Performance and Results Act (GPRA) are met. Beginning in late 2011, OPPA implemented FEMASat, which is an ongoing series of data-driven reviews, to provide the opportunity for FEMA's senior leadership to evaluate performance against objectives, identify barriers to success, agree on actions to eliminate those barriers, and hold individuals accountable for implementation.

Strategic Planning & Analysis Division (SP&A) helps FEMA to make innovative and informed decisions on the Agency's short-term strategic direction and to identify future drivers or requirements affecting emergency management operations in the future. This is accomplished by leading the development and implementation of FEMA's strategic planning process, to include development of FEMA's 3-5 year Strategic Plan, and long-term driver and trend analysis in support of the Strategic Foresight Initiative, which proactively monitors changing drivers and trends in emergency management 15-20 years out. SP&A also establishes and maintains an enterprise-wide risk

framework to aid the Agency's planning, programming, and decision making efforts and ensure linkage to the DHS integrated risk management efforts. These efforts, along with providing guidance to help the Agency make innovative and informed decisions about FEMA's long-term direction and facilitating integrated strategic thinking, planning, and decision-making, enables FEMA to be in a better position to conduct its overall mission and determine future requirements.

In FY 2013, the **International Affairs Division (IAD)** will be realigned from the Office of External Affairs to the Office of Policy and Program Analysis to provide better integration regarding policy and strategic planning efforts with our international emergency management partners. IAD engages with foreign emergency management partners and multilateral organizations under the authority of existing U.S. treaties, agreements, and presidential directives. IAD facilitates information exchanges regarding technical assistance and other subject matter expertise among international emergency management stakeholders to strengthen our Nation's global capacity to respond to disasters. IAD also manages FEMA's involvement in the interagency civil emergency planning effort through the North Atlantic Treaty Organization. The division supports FEMA employees traveling internationally on official business, facilitates participation in international training and exercises, coordinates 300 to 400 foreign visit requests each year, and supports DHS in international policy work related to emergency management. IAD's programs and activities expand FEMA's body of knowledge on emergency management best practices through the exchange of information with international partners; for example, FEMA can improve its ability to handle man-made disasters by benefiting from the expertise of a country more familiar with suicide bombing attacks. The division also advises the FEMA Administrator and DHS leadership on international emergency management cooperation and strategic priorities in this field. Further, IAD acts as FEMA's main point of contact for international organizations, embassies, and consulates.

C. Office of Equal Rights

The Office of Equal Rights (OER) serves the Agency and the Nation by promoting affirmative employment, a discrimination-free workplace, and equal access to FEMA programs and benefits. The OER proactively pursues a workforce that reflects the Nation's labor force for its employees, and a workplace climate that fully embraces the core values of Accountability, Compassion, Diversity, Integrity, Partnership, Respect, and Trust. OER performs its mission by providing expert guidance and proactive support to all its customers, including State and local government officials, and the American people. The overarching goals of the office are to bring the fullest human value to the work of the Agency and to fulfill the office responsibilities' under Federal law. The office is organized into three sections: Civil Rights – manages the Federally Assisted and Federal Conducted Programs; Informal EEO Programs – manages EEO counseling, dispute resolution, and training; and, Formal EEO Programs – manages formal EEO complaint processing and investigations. OER encompasses the following activities and elements:

The **Federally Assisted and Federally Conducted Programs and Investigations** entitles any person eligible to receive disaster aid or other services from FEMA to receive those benefits without discrimination. The Civil Rights Program provides Technical Assistance and Complaints Resolution services. Technical assistance is provided through policy guidance to the agency in meeting Civil Rights mandates. In disaster operations, the staff works closely with community organizations to resolve tensions and eliminate potential complaints. The office also provides assistance to FEMA and

the National emergency management community in the effort to make publications, programs, and facilities accessible to people with disabilities. Complaints resolution is attempted for anyone who believes they have been discriminated against in the receipt of services or benefits from FEMA.

The **Equal Employment Opportunity (EEO) Program** enforces all Federal discrimination laws that cover all FEMA personnel, including DAEs and applicants for employment. Through the EEO program, OER provides a variety of services: including equal rights training for managers, supervisors, and employees; developing and maintaining an informal and formal EEO discrimination complaint process; investigating formal complaints of discrimination, increasing resolution of complaints through Alternative Dispute Resolution (ADR); proactively recruiting employees and Special Emphasis programs.

D. Office of the Chief Counsel

The Office of Chief Counsel (OCC) supports FEMA's efforts to reduce loss of life and property and protect the Nation from all hazards by providing the Agency with legal advice, counsel, risk analysis, and dispute resolution services. The OCC is comprised of nine divisions.

The **Response and Recovery Legal Division** consists of three branches: Response, Recovery, and Litigation. The Division is responsible for providing legal advice to the Response and Recovery Directorate to support FEMA's efforts to reduce loss of life and property and protect the Nation from all hazards by providing Response, Recovery, Office of Federal Coordinating Officers, and Logistics, with legal advice, counsel, risk analysis, and dispute resolution services. The Response Branch also manages CORE and Reservist field counsel cadres that deploy to disasters across the country; and the Recovery Branch manages legal teams at the Louisiana and Mississippi recovery offices.

The **Mission Support Legal Division** consists of three branches: Personnel Law; Federal Litigation and Claims; and Information Law. The Division provides legal services related to equal employment opportunity, human capital, information and privacy, property, records management, technology use, and tort claims, primarily to activities of the Mission Support Bureau and the Office of Equal Rights.

The **Federal Insurance and Mitigation Legal Division** furthers the Federal Insurance and Mitigation Administration's (FIMA) mission of reducing the loss of life and property by lessening the impact of disasters through representation in litigation for the National Flood Insurance Program (NFIP), Flood Map Modernization, Mitigation grant programs, Flood Mitigation Assistance Program, National Dam Safety Program, National Earthquake Hazards Reduction Program, National Hurricane Program Office of Environmental Planning and Historic Preservation, and for other programs and activities administered by FIMA.

The **Protection and National Preparedness Legal Division** provides counsel to further the mission of the Protection and National Preparedness Directorate (PNP) in coordinating preparedness and protection-related activities throughout the Agency. Legal counsel includes, but is not limited to, issues involving grants; planning; training; exercises; individual and community preparedness; assessments; lessons learned; and continuity and national capital region coordination. This Division

also provides legal advice to the United States Fire Administration (USFA) in furtherance of its mission to reduce loss of life and property in emergencies and disasters.

The **Regulatory Affairs Division** provides legal advice and counsel on matters relating to regulations and policy, maintaining overall responsibility for FEMA's regulatory program by providing centralized management and internal control of all FEMA regulations including regulation development, tracking, policy integration, economic analyses and publication.

The **Chief of Staff for Legal Policy Legal Division** (CSLP) provides oversight, visibility, and legal policy integration across OCC functional divisions to ensure consistency and consideration of cross-program or Agency-wide implications of complex or compound legal issues. The CSLP also supervises OCC's Regional Counsel who assist the Regional Administrators in properly carrying out their missions and functions. This Division also provides legal advice and counsel on matters relating to legislation and policy.

The **Professional Development Legal Division** is responsible for managing a professional development program for the OCC staff that includes workforce readiness through training, credentialing, and developing professional capabilities and resources aligned with OCC's operational goals at the Field, Regional, and National levels to ensure effective and consistent response to all hazards.

The **Alternative Dispute Resolution** (ADR) Office provides ADR services for FEMA under the Administrative Dispute Resolution Act of 1996. The ADR Office offers a wide range of dispute resolution processes and tools to engage Agency personnel in preventing and managing conflicts. The ADR Office customizes various ADR techniques and tools to deepen the conflict management, strategic decision-making, and collaborative problem solving skills of Agency personnel.

The **Ethics Office** is responsible for implementing the statutory and regulatory ethics requirements of the Federal Government, particularly those of DHS and FEMA. As the agency's Deputy Designated Component Ethics Official, the Chief Counsel serves as the principal ethics official for FEMA. In addition to full-time ethics staff, the Ethics Office works with the assistance of trained Adjunct Ethics Counselors and FEMA Directorate and Office Ethics Points of Contact.

E. Office of the Chief Financial Officer

The Office of the Chief Financial Officer (OCFO) provides funds control, financial information, financial operations, and financial policy support to FEMA's management and oversight organizations. The Chief Financial Officer (CFO) is the principal advisor to the Administrator, Deputy Administrator and other Agency Leadership on matters relating to FEMA's financial resources. The OCFO is comprised of seven organizational elements.

The **Financial Management Division** reconciles accounts and ensures accuracy of trial balances for the preparation of financial statements and it also manages debt collection activities. Division personnel perform the invoice approval and payment processes for all mission assignments, reimbursable activities, and other intergovernmental payments. They ensure timely and accurate recording of grant obligations and process final closeouts in the financial system, as well as

coordinating with internal and external entities to ensure compliance with DHS/FEMA policies, legislation and directives related to financial controls.

The **Budget Planning and Analysis Division** performs an ongoing role in the planning, formulation, justification, analysis, and execution of FEMA's budgets. The Budget Division has the primary responsibility for making recommendations to the Administrator and presenting FEMA's portion of the President's Budget to the Department, the Office of Management and Budget (OMB), and Congress. The Budget Division monitors the Agency's execution activities for conformance with executive and legislative intent and provides program management and oversight of current year and prior year funding.

The **Financial Systems and Management Reporting Division** provides technical support to implement and maintain the OCFO financial management systems/interfaces. The staff also furnishes accurate, relevant, and timely financial information to clients across the Agency, the Department, and Congress.

The **Risk Management and Compliance Unit** is responsible for developing and implementing the Agency's internal controls program. Working in conjunction with the DHS Financial Management staff, the FEMA Risk Management and Compliance unit manages the annual audit of financial statements, coordinates testing and corrective actions to improve improper payments, and coordinates the review of internal controls as required by OMB Circular A-123.

The **Financial Policy Unit** develops Agency-wide policies, procedures and standards for all financial management functions and promulgates these and related government-wide financial management requirements throughout the Agency. This unit is also responsible for managing and addressing specific questions related to FEMA travel policy.

The **Field-Based Financial Operations Unit** is responsible for managing and directing FEMA's field-based financial management activities including budget formulation and execution, finance and accounting operations, and risk management. This unit provides management and oversight to the field-based financial staff, including Recovery Office financial directors, Joint Field Office financial leads, and OCFO comptrollers. This team is responsible for formulating and executing operating budgets for open disasters, working closely with program management to determine multi-year financial requirements for public assistance, individual assistance, and hazard mitigation projects for open disasters.

The **Business Operations Unit** supports the day-to-day operations of the OCFO through coordination and execution of strategic planning, knowledge management, human capital management, Continuity of Operations (COOP) activities, leadership and staff development, procurement, facilities, and management of the OCFO operational budget.

2) **Regional Operations**

The Regional Operations mission cuts across all FEMA missions and disciplines. Regional Operations includes the leadership, management and mission support functions and staff of the 10 FEMA Regions, and a small headquarters coordination and liaison office. The Regions execute the operational direction received from Headquarters to ensure that FEMA can build, sustain, and improve capability to prepare for, protect against, respond to, recover from, and mitigate against all hazards.

The **Office of Regional Operations** at Headquarters is located within the Office of the

Administrator and serves as the Agency's office to facilitate coordination of policy, managerial, resource and administrative actions between headquarters and the Regional Offices. The Office of Regional Operations also works to help ensure FEMA policies, programs, administrative and management guidance are implemented in the Regions in a manner consistent with the Agency's overall goals.

The principal functions of the office are: (a) serving as liaison among the Regional Administrators and Headquarters leadership to ensure successful collaboration as one team; (b) advising Headquarters leadership on matters affecting or impacting the Regions; and (c) providing guidance to Regional Administrators on policy, programs, operations, and administrative matters.

Regional Administration

Each Regional Office – led by a Regional Administrator – reports to the FEMA Administrator and is an operational component that closely resembles the structure and scope of the Agency. The Regional Offices support the development of a Regional, all-hazards, risk-based emergency management system of preparedness, prevention, protection, response, recovery, and mitigation through close working relationships with Federal agencies, States, Tribal nations, localities, business and industry, and State and local volunteer organizations.

The Region is the principal conduit for:

- Coordinating and managing Federal support to respond and recover from disasters and emergencies.
- Impact assessments and recommendations for the issuance of disaster or emergency declarations under the Stafford Act.
- Administration of cooperative agreements, grants, and other financial assistance.
- Providing technical assistance regarding emergency and disaster prevention, protection, planning, preparedness, mitigation, response, recovery, and continuity programs.
- Promoting and managing risk analysis and risk reduction initiatives to mitigate damages and loss.
- Managing preparedness efforts through planning, training, exercises, assessments, and corrective actions.
- Intra-regional coordination among Federal agencies, State, Tribal, territory and local governments, voluntary and private organizations, advisory councils and working groups, local communities, and the public.

3) Office of Federal Disaster Coordination

The Office of Federal Disaster Coordination (OFDC) leads, trains, equips, and manages FEMA's Federal Coordinating Officers (FCO) and Federal Disaster Recovery Coordinators (FDRC). OFDC ensures their availability for rapid deployment in response to any disaster; delivers training to develop and sustain FCO and FDRC professional competencies; coordinates FCO and FDRC assignments to meet the on-scene needs of FEMA and its emergency management partners. In the event of a Presidential disaster declaration, a Federal Coordinating Officer (FCO) is designated by name in the

President's letter. OFDC ensures disaster leadership is established in a timely manner and Stafford Act provisions are in place, resulting in critical support of States and Tribes in responding to and recovering from a disaster.

4) Office of National Capital Region Coordination

The Office of National Capital Region Coordination (NCRC) enhances preparedness and promotes resiliency by enabling better communication and planning between and among Federal, State, local, regional, nonprofit and private sector stakeholders in the NCR. Established by Congress in the Homeland Security Act of 2002 (section 882), NCRC's work addresses a major gap identified on 9/11 within the National Capital Region (NCR), which is home to a large number of Federal Departments and Agencies, numerous State and local jurisdictions and our Nation's Capital, among others.

To enhance the region's emergency response capability, NCRC and its staff members currently develop, coordinate, and implement inter-agency activities and plans for the NCR by serving as a key member on committees at the Federal, State, and local levels. NCRC's efforts include chairing and/or supporting the following: Joint Federal Committee (JFC); Consequence Management Subcommittee for National Special Security Events; Senior Policy Group (SPG); the Metropolitan CIOs; and, committees sponsored by the Metropolitan Washington Council of Governments and other key stakeholders. Through these organizations, the NCRC plays a critical role in coordinating and improving workforce preparedness and integration between and among NCR jurisdictions by sharing best practices and resources as appropriate.

The NCRC also provides real time NCR-specific situational awareness and information sharing to emergency management and homeland security stakeholders in the NCR through the FEMA NCR Watch Desk reports, by maintaining the NCR portal in the Homeland Security Information Network (HSIN), and providing continuing interoperability technical support, as needed. The NCR Watch Desk is the only DHS entity within the NCR that provides real time situational awareness support to the full spectrum of emergency management and homeland security stakeholders in the NCR.

To further address the need for improved coordination and information sharing among Federal, State, and local governments within the National Capital Region, NCRC has worked with its stakeholders to identify and address the following priority areas and ultimately improve the planning and preparedness efforts within the region:

- Federal Coordination - Fosters preparedness, resilience and unity of effort among Federal Departments and Agencies by facilitating Federal interagency coordination on emergency and homeland security planning efforts within the NCR.
- Regional Governance and Integration - Ensures innovative solutions and a whole community approach to emergency management by proactively engaging, collaborating with, and providing leadership among Federal, State, and local partners within the NCR.
- Situational Awareness and Information Sharing - Provides DHS and Federal, State, and local partners with real time access to accurate information for emerging incidents, events, and training activities within the NCR.

- Regional Risk Reduction - Promotes understanding of all-hazards risks and supports regional risk analysis efforts in order to collaboratively set priorities and design solutions to ensure a strong response capability in the NCR.

Technology and Interoperability Coordination - Organizes and supports efforts to improve interoperability of information (video, voice, data) and integration for information sharing among key Federal, State, local, and regional partners in the NCR.

The Administrative and Regional Offices PPA includes \$32.623 million to support management and administration, primarily salary and benefit costs associated with 240 positions and 225 FTE, utilized in carrying out the preparedness and grants administration activities in the Regions.

**Department of Homeland Security

(Dollars in Thousands)

PPA: Preparedness and Protection

	Perm. Pos	FTE	Amount
2012 Revised Enacted	623	387	166,036
2014 Adjustments-to-Base	159	364	105,148
2014 Current Services	782	751	281,184
2014 Program Change	-	-	22,500
2014 Total Request	782	751	293,684
Total Change 2012 to 2014	159	364	127,648

FEMA requests \$293.684 million, 782 positions and 751 FTE in the Preparedness and Protection PPA. This includes adjustment-to-base increases of 159 positions, 364 FTE and \$105.148 million; and program changes of \$22.5 million.

- Increase of \$198.480 million, 654 positions and 628 FTE to support realignment of funding from State and Local Programs appropriation, management and administration funding, to the Salaries and Expenses appropriation.
- Increase of \$10 million, 23 positions and 23 FTE to support realignment of Evaluations and Assessments from the Administrative and Regional Operations PPA to the Preparedness and Protection PPA.
- Decrease of \$99.776 million, 508 FTP, and 493 FTE to support realignment of funding to the State and Local Programs appropriation.
- Decrease of \$3 million to reflect IPAWS reduction.
- Decrease of 10 FTP and 10 FTE to reflect positions determined to be ineligible for conversion through the Balanced Workforce Strategy.

CURRENT SERVICES PROGRAM DESCRIPTION:

Protection and National Preparedness (PNP) is responsible for the coordination of preparedness and protection-related activities throughout FEMA. This responsibility encompasses grants, planning,

training, exercising, individual and community preparedness, assessments, lessons learned, continuity, and National Capital Regional Coordination (NCRC).

Provides direct support to the Deputy Administrator in areas such as long-range planning, and integration of Directorate crosscutting actions. In addition, the senior staff provides management and oversight of cross-Directorate programs and initiatives and represents the Deputy Administrator in a variety of engagements and forums. Serves as the lead integrator of prevention and protection programs and policy within FEMA.

Ensures headquarters preparedness activities and initiatives are coordinated effectively and efficiently with the Regional Federal Preparedness Coordinators (FPC) and to integrate preparedness into activities in other FEMA elements. Serves as a single coordinating body for preparedness and protection efforts and works to promote a culture of preparedness across the agency. Provides support to all PNP components, the 10 FEMA Regions and other FEMA offices on preparedness issues to meet the requirements of Presidential Policy Directive-8 and works closely with FEMA's Office of Regional Operations to coordinate preparedness programs with the FEMA Regions. Serves as PNP's lead office for coordination and partnership efforts with State emergency managers and State homeland security advisors.

Grants Management

Funding made available in this PPA is utilized to provide oversight and leadership of grant-related activities across the Agency. Funding is divided into four key areas which allows for complete management and accountability of the enacted funding.

Establish Grant Guidance

- Supports the review and revision of strategic objectives and priorities
- Develops Funding Opportunity Announcement (FOA) - formally known as Grant Guidance
- Coordination of concurrence/adjudication of funding opportunity announcement packages
- Release of solicitations

Review and Award Grants

- Conduct programmatic, fiscal, and peer reviews of applications
- Assess fund availability and determine final awards
- Notify Congress of pending awards
- Create award packages and notify grantees

Manage Grant Awards

- Oversee open awards
- Review reports and audits to enforce compliance
- Process payments and perform cash analysis
- Process amendments
- Conduct Environmental Planning and Historic Preservation EHP reviews
- Provide technical and administrative assistance to grantees

Grant Close-Out

- Process appeals
- Establish disposition of funds process
- Conduct and evaluating final performance reports
- Create and reviewing close out packets
- Conduct final financial reconciliation

FEMA has dedicated its efforts to grant process improvements. FEMA established an Intra-Agency Grants Task Force to facilitate the exchange of ideas and information necessary to ensure that grants are administered consistently and effectively, to eliminate duplication of efforts, and to strengthen FEMA's pre- and post-award grant functions. FEMA has been an active participant in an initiative championed by the DHS Deputy Secretary to improve the performance of all DHS financial assistance programs in addition to the Intra-Agency Grants Task Force.

National Preparedness (NP) Program

Coordinates the doctrine and programs and contributes resources to prepare the Nation to prevent, protect, mitigate, respond to, and recover from disasters while minimizing the loss of lives, property, and infrastructure. Responsible for coordinating the Nation's readiness through its stewardship of comprehensive preparedness cycle of activity to plan, organize, equip, train, exercise, evaluate and improve capabilities.

NP provides guidance to ensure integrated preparedness and operations across all mission areas – Protection, Prevention, Mitigation, Response, and Recovery – and supports its Whole Community partners as they work to achieve the National Preparedness Goal.

NP provides a comprehensive national system that improves the Nation's capability across the Whole of Community to prepare for, prevent, protect against, respond to, recover from, and mitigate all hazards through the development, implementation, sustainment, and evolution of the National Incident Management System (NIMS), National Response Framework (NRF), and Comprehensive Planning Guide (CPG) 101 (version 2): Developing and Maintaining Emergency Operations Plan. The NIC serves as the Executive Agent and is responsible for the implementation of PPD-8: National Preparedness to include developments and implementation of the National Preparedness System to achieve the National Preparedness Goal of a secure and resilient Nation.

As a component of FEMA's National Preparedness Directorate (NPD), the NP is the program office responsible for leading the adoption, implementation, maintenance, and continuous refinement of the NIMS as well as the development and /or promotion of preparedness doctrine, policy, resource typing, credentialing, guidance, job aids, and other tools related to the NIMS, NRF, and CPG-101.

Additionally, the NP coordinates the National Credentialing and Resource Typing Programs, which includes developing and maintaining the policies, standards, and procedures to ensure that emergency response and public safety personnel are qualified, properly identified, and equipped. These programs are critical in developing and implementing the tools and guidance that are required to maximize the operational readiness of a community, and the nation as a whole, to ensure an effective and timely National Mutual Aid System.

NP also harnesses the power of every individual through whole community planning, education, training, and volunteer service to make communities safer, stronger, and better prepared to respond to the threats of terrorism, crime, public health issues, and disasters of all kinds. This mission is accomplished through a national network of State, local and Tribal Citizen Corps Councils, and partner programs such as the Community Emergency Response Teams (CERT). In FY 2013 and 2014, NP is focused on implementing the comprehensive campaign to build and sustain national preparedness as called for in PPD-8. This effort will combine social science research; tools for individuals, organizations, and communities; and media support to affect knowledge, attitudes, and behaviors about preparedness. This campaign will engage members of the public through local activities and national media outlets to expand individual and community abilities to improve their own situation in a disaster.

National Preparedness Programs include the following:

National Exercise Program (NEP)

The NEP serves as the principal mechanism for examining the preparedness and readiness of the United States across the entire homeland security and emergency management enterprise. The program designs, coordinates, conducts, and evaluates exercises that rigorously test the Nation's ability to perform missions and functions that prevent, protect against, respond to, recover from, and mitigate all hazards.

The NEP fosters meaningful and systematic interaction of public officials at every level of jurisdiction while incorporating the participation of private-sector, faith-based, and non-governmental organizations, along with the public, against a set of common objectives. Each two year cycle of the NEP is objective-driven and responsive to changes in policy and lessons learned from previous exercises and actual events.

NEP exercises employ the doctrine and methodology of the Homeland Security Exercise and Evaluation Program which provides exercise guidance and principles constituting a national standard for homeland security exercises. In addition, the National Exercise and Simulation Center, a congressionally mandated center within FEMA, provides the homeland security enterprise with access to preparedness services and technologies to meet emerging needs of its customer base and support the integration capabilities into preparedness activities.

The NEP is also a critical element of the National Preparedness System directed by Congress and Presidential Policy Directive / PPD-8 that provides a whole community approach toward exercising the core capabilities necessary for addressing the greatest risks facing our nation. In FY14, FEMA will continue to implement the reforms called for in the NEP Base Plan (published March 2011) and Implementation Plan, which promotes exercises that are more realistic, efficient, and collaborative. Additionally, FEMA will be executing the second year of the NEP exercise series which will leverage existing exercises already scheduled throughout the country, culminating in a capstone full-scale exercise. These exercises will validate objectives identified by principals from the whole community.

Training and Technical Assistance Program (TTA):

The Training and Technical Assistance (TTA) Program provides training tailored to first responders that enhances the capacity of state and local jurisdictions to prepare for, prevent, deter, respond to, and recover safely and effectively from potential manmade and natural catastrophic events, including terrorism. TTA draws upon the expertise of a diverse group of training partners to develop and deliver TTA-approved training courses. TTA has over 50 training partners that include the National Domestic Preparedness Consortium (NDPC), the Rural Domestic Preparedness Consortium (RDPC), and the Naval Postgraduate School (NPS) among others. To date, TTA training partners have delivered training to over 1.2 million first responders. TTA is also responsible for the management of two major training related databases: the First Responder Training System (FRTS) and the Registration and Evaluation System (RES). The FRTS houses the home page, training and education, and training support tools for the TTA. These training support tools include the Responder Training Development Center (RTDC) which leads course developers through all the stages of course development and provides check points for approval by program managers. TTA provides information on the effectiveness of its programs. As part of its reporting, TTA implemented a Registration and Evaluation System (RES) designed to collect data on student gains in Knowledge, Skills and Abilities (KSAs) as measured by pre- and post-tests (Level 2 Evaluation). Information is also collected on student perceptions of the training to assist course developers in understanding weaknesses in the courses or their delivery. This system supports TTA in collecting and reporting information on its programs, including numbers trained, disciplines reached, and levels of training accessed by different professional groups.

TTA provides specialized all-hazards preparedness training to State, local, and Tribal emergency responders on skills tied to national priorities, particularly those related to chemical, biological, nuclear, and radiological (CBRN) Weapons of Mass Destruction (WMD). To date, more than 730,000 students from State, local and Tribal agencies have been trained by TTA. The Chemical, Ordnance, Biological, and Radiological Training Facility (COBRATF) is the Nation's only live-agent training facility for civilian responders, providing a unique environment that enables them to train using toxic nerve agents and live biological agents in a safe and realistic training environment. Within the PNP funding provided, \$5.5 million is used to operate the Noble Training Facility (NTF), the only hospital facility in the United States dedicated solely to training hospital and healthcare professionals in disaster preparedness and response operations. The NTF addresses training gaps identified by the healthcare response community and trains healthcare professionals to meet all-hazard threats in a realistic hospital environment. In addition to developing and delivering emergency responder training at various levels for a broad range of emergency response disciplines, TTA also participates in efforts to standardize this training for State, local and Tribal responders, while maintaining training quality and gathering meaningful evaluation data for continuous program improvement and effective program management. TTA maintains a campus of 124 acres and approximately 900,000 square feet of training and support facilities.

TTA includes EMI, which is the emergency management community's flagship training institution for Federal, State, local, Tribal, volunteer, public, and private sector officials to strengthen emergency management core competencies. EMI directly supports the implementation of the National Preparedness Goal, National Incident Management System, and the National Planning Frameworks by

developing critical knowledge and skills to improve and sustain the Nation's capability to prepare for, protect against, respond to, recover from, and mitigate all hazards. EMI trains more than 2 million students annually. Training delivery systems include residential onsite training; offsite delivery in partnership with emergency management training systems, colleges, universities; and technology-based platforms to conduct individual training courses for emergency management personnel across the Nation.

As part of the National Training and Education System called for in PPD-8, EMI is also implementing the Emergency Management Professional Program which is designed to further "professionalize" the field of emergency management. This program includes an Emergency Managers Basic Academy, Specialized and Technical Training Program, Emergency Managers Executive Academy, and Emergency Managers Leader Academy.

FEMA's TTA program provides specialized expertise and services to local, state, Tribal and territorial homeland security and emergency management agencies as well as whole community partners that participate in the various grant programs. The TTA program is designed to be an agile program that addresses areas of greatest need based on risk and doctrine. It is committed to transferring and institutionalizing knowledge across the whole community and provides a menu of services that is responsive to national priorities. The services provided through this program increasingly address complex challenges requiring specialized expertise that requesting organization do not possess.

The program seeks to build and sustain capabilities by providing specific services and analytical capacities as well as preparedness guidance across two primary functional areas: (1) preparedness technical assistance activities in support of the five homeland security mission areas (prevention, protection, mitigation, response, and recovery) and (2) homeland security grants management. This two-pronged approach ensures that initiatives measurably contribute to the enhancement of State and local homeland security programs and the specific homeland security capabilities they build and manage. These services result in expanded planning nationwide for large-scale and catastrophic events, expanded fusion center capabilities, more-effective homeland security programs, improved grants management, and a transfer of knowledge and capabilities to State and local governments.

Since 2009, more than 240 TA deliveries have been made nationwide with deliveries in 2013 and 2014 expected to be comparable to or exceed 2012 levels.

Evaluations and Assessments Program (EAP)

The Evaluations and Assessments Program, managed by FEMA's National Preparedness Assessment Division (NPAD), advances all-hazards preparedness, through assessment and reporting of investments, activities, accomplishments and lessons learned. It supports the Agency's mission by measuring overall national preparedness, as well as the effectiveness of preparedness programs, including grants. The Evaluations and Assessments program includes, but is not limited to, the following activities:

- Development of the National Preparedness Report, which annually assesses preparedness across the nation.

- Collection and analysis of preparedness reports from each State, Urban Areas Security Initiative (UASI), and territory that receives Federal assistance. These annual reports are analyzed to discern trends and inform the broader assessment of national preparedness.
- The Preparedness Compliance Assessment Support Tool (PrepCAST), which allows Federal, State, local, Tribal and Territorial partners a single, online portal to assess preparedness capabilities.
- Identification, tracking, and reporting of corrective actions and lessons learned from exercises and real-world events. In FY 2013, FEMA will implement an improved Lessons Learned Information Sharing (found online at www.LLIS.gov) system to support the evolving needs of FEMA and whole community partners and to facilitate a better learning environment for the emergency management and homeland security communities.
- Developing and analyzing performance measures and metrics for PNP programs, including grants, community preparedness, and the Nation's overall preparedness. In FY 2013, NPAD is working with GPD to track metrics for State Homeland Security Grant Program (SHSGP) and UASI grantees. For example, FEMA will track that all equipment and training procured under the grants must be in support of the development or maintenance of an identified team or capability described and included in the NIMS. Grantees also will report the percentage of SHSGP and UASI-funded personnel who are engaged in the Nationwide Suspicious Activity Reporting (SAR) Initiative and who have completed DHS's NSI training. These metrics will help define the accomplishments of these grantees in order to prepare for disasters and will contribute to the National Preparedness Report.

National Continuity Programs

FEMA's National Continuity Programs Directorate (NCP) serves the public by preserving our Nation's constitutional form of government across a wide range of potential threats and emergencies. NCP serves as the President's lead agent for ensuring the first National Essential Function of the Executive Branch, ensuring the continuance of our Nation's constitutional government under all conditions. NCP performs this mission by coordinating activities across all levels of government: Federal, State, territorial, local, and Tribal. NCP is comprised of the Office of the Assistant Administrator, Continuity of Operations (COOP) Division, Readiness Division (Contingency Programs), Operations Division (COG), Integrated Public Alert Warning System (IPAWS), and the Mount Weather Emergency Operations Center (MWEEOC).

A. Continuity of Operations Division

Having a solid COOP program is the cornerstone to ensuring that government can continue to provide essential services to the public throughout a range of disasters at all levels of government. The COOP Division:

- Leads FEMA's efforts to ensure comprehensive and consistent COOP preparedness across Federal, State, territorial, Tribal and local governments
- Develops, promulgates, and delivers a variety of products tailored to the needs of these governments to ensure that governments at all levels can continue to perform their essential functions in support of the American people

- Coordinates the integration of continuity preparedness capabilities and provides consistent continuity planning guidance and assistance to continuity planners in identifying their essential functions
- Supports these planners in developing the capabilities for the continuance of those essential functions in response to all hazards for the Federal Executive Branch, States, territories, Tribal nations and local government jurisdictions

Throughout the United States, the COOP Division develops and promulgates continuity directives and guidance for the Federal Government in the form of directives and requirements, and to our non-federal partners in the form of guidance. At all levels of government it also:

- Provides continuity outreach.
- Develops, updates, and provides an extensive training and certification program.
- Develops and provides valuable continuity workshops and exercises.
- Provides continuity program assessments to the President of the United States, elected officials, and agency heads that enable them to make program improvements.
- Coordinates Federal Executive Branch efforts to develop and improve continuity capabilities throughout the interagency community, with a focus on always maintaining the ability of all Federal departments and agencies (D/A) to perform the eight National Essential Functions through the performance of their individual Mission Essential Functions and Primary Mission Essential Functions (PMEF).
- Leads the management and implementation of the FEMA HQ, FEMA Regions, and other FEMA Component Continuity Programs, ensuring FEMA's readiness to perform its essential functions during any continuity event.

B. Contingency Programs (Readiness Division)

NCP's Readiness division develops, maintains, and provides an array of continuity information technology systems and communications assets that provide the Executive Office of the President, the DHS Secretary, and the FEMA Administrator and other senior Federal leaders with a robust capability that allows them to maintain situational awareness before, during, and after a continuity event. These resources span the full spectrum of the National Security/Emergency Preparedness (NS/EP) community. The Readiness Division also:

- Plans, programs, and manages operations, maintenance, and lifecycle updates and enhancements of these assets to satisfy evolving and extremely complex objectives.
- Tracks and influences changes in intra-and interagency business rules and policies, and tracks and monitors stakeholder and security requirements to ensure interoperability and integration of all assets with which they must operate and coexist.
- Ensures that critical national security systems are available and evolve as necessary to meet continuity mission requirements.
- Maintains the continuity communications architecture for all of FEMA to include HQ and the regions, as well as the architecture for High Frequency (HF) communications with the States and territories.

This Division operates, maintains, and improves the Readiness Reporting System (RRS) and FEMA National Radio System (FNARS). RRS provides direct support to the White House for collecting and reporting the continuity readiness posture of the Executive Branch D/As. The RRS also allows D/A leadership to report on their ability to perform PMEFs within their respective agencies. Since the RRS is the only reporting tool in the Government used to report this capability during an event or every 30 days, it has become a vital component within the continuity repertoire for reliable and timely situational awareness.

FEMA NCP also fills the role of lead agent/Program Management Office (PMO) for the FNARS system. This high-frequency, automatic link establishment (HF-ALE) system serves as the primary backup communications system that allows senior leadership to collaborate across the country and with States and territories during a natural disaster or continuity event. For example, during the National Level Exercise (NLE 11), FEMA exercised this system capability in support of a massive earthquake scenario, which projected catastrophic damage and disruption to the public and private telecommunications infrastructure. During this exercise, where there was a major communications outage within the New Madrid Seismic Zone, FEMA used FNARS as the primary means of communications to receive updates from the States and FEMA regions, to communicate with FEMA Headquarters, and to facilitate command and control within the affected areas.

C. Continuity of Government (Operations Division)

The Operations Division is responsible for ensuring that the DHS Secretary and FEMA Administrator have the ability to advise the President and implement the plans and programs of the Federal Government for continuity of government. The Operations Division provides a single point-of-contact for assessing and implementing continuity plans across the Federal Executive Branch during an event that could potentially threaten the national security of the United States by threatening the Federal Executive Branch's ability to provide essential services to the public. Before, during, and after an event, this Division is responsible for:

- Analyzing the ability of Federal D/As to perform their essential functions.
- Monitoring and assessing the status and operational capabilities of individual and collective D/As.
- Developing and formulating courses of action for Secretary and Administrator consideration to restore Federal Executive Branch essential functions.
- Coordinating implementation of courses of action.
- Monitoring and tracking the implementation of chosen courses of action.
- Providing continual updates on the strategic relocation of government activities.

In FY 2011, FEMA's PNP Office established the Continuity Readiness Cell (CRC) within NCP. As part of a coordinated Federal Executive Branch effort, the CRC offers the Secretary of Homeland Security, the FEMA Administrator, and other senior leaders and decision-makers with a comprehensive repository of executive branch continuity capability information. This information includes long-term issues and readiness capabilities required to ensure the continuation of the eight National Essential Functions and Federal D/A PMEFs in an all-hazards environment. When long-term relocation of the Federal Government is required, the CRC will also provide analytical and decision support, prioritized resource allocation recommendations, and other government reconstitution-related needs.

To ensure that FEMA leadership is available and able to perform their essential functions in support of Continuity of Government and disaster response, this Division also implements and maintains the Operation Rendezvous relocation program. This program is responsible for coordinating the evacuation, relocation movement, and accountability of key leadership and staff to COOP sites utilizing the Federal (and Mutual Aid) Emergency Response Official (F/ERO) Repository system. The F/ERO Repository system aligns with the President's cyber security policy and provides the capability for public safety and security officials to validate the identities and attributes of continuity personnel for access permissions to relocation sites.

D. Integrated Public Alert & Warning System (IPAWS) Program Management Office

Executive Order (EO) 13407 established a policy requiring the United States to have an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American people. The Department of Homeland Security designated FEMA as the lead to implement the Executive Order. NCP established a program office to implement IPAWS. When IPAWS is completed it will:

- Allow the President of the United States to speak to the American people under all emergency circumstances, including conditions of war, terrorist attack, or natural disaster.
- Build and maintain an effective, reliable, integrated, flexible, and comprehensive alert and warning system.
- Enable Federal, State, territorial, Tribal and local alert and warning emergency communication officials to access multiple broadcast and other communications pathways for the purpose of creating and activating alert and warning messages related to any hazard impacting public safety and well-being.
- Reach the American public before, during, and after a disaster.
- Diversify and modernize the Emergency Alert System (EAS).
- Create an interoperability framework by establishing or adopting standards such as the Common Alerting Protocol (CAP).
- Enable alerts and warnings for those with disabilities and those without an understanding of the English language.
- Partner with NOAA to enable seamless integration of message transmission through national networks.

Two primary programs within the IPAWS Program Management Office are the Primary Entry Point (PEP) station expansion and modernization project, and the IPAWS-Open Platform for Emergency Networks (OPEN) application development project. The core of the National EAS are FEMA-connected private radio stations known as PEP Stations. These stations can provide national warning information prior to, during, and after emergencies. FEMA provides communications equipment and emergency generators that enable PEP stations to continue broadcasting warning and safety information to the public throughout an event. Building upon 34 legacy stations, the IPAWS program is establishing an additional 43 PEP stations to provide direct broadcast coverage to at least 86 percent of the American public and modernizing the legacy stations to include protection from EMP hazards and modernized fuel management and spill containment measures.

IPAWS-OPEN is a FEMA mission-critical application that provides for access and authentication of alert messages from public safety officials and integration of alert communications systems. By integrating access to EAS, Commercial Mobil Alerting System, NOAA Weather Radio system, and

Internet communications services, public safety officials at all levels can provide timely alerts to citizens in danger over multiple communications paths simultaneously and at no additional cost. A key new capability enabled by IPAWS-OPEN is the ability for local officials to send geo-targeted alerts to cellular devices using technology other than voice or SMS text channels that are likely to be congested during an emergency.

E. Mount Weather Emergency Operations Center (MWEOC)

MWEOC is a 564-acre DHS facility approximately 64 miles west of Washington, D.C. MWEOC provides the infrastructure necessary to support COOP, Incident Management, classified programs, and other all-hazards activities for multiple Federal Executive Branch D/As. For example, MWEOC hosts the DHS/FEMA HQ COOP site as well as provides space for use by several D/As for their storage, offices, and operations. MWEOC also supports a variety of disaster response and continuity missions. It is a hub for our Nation's emergency response activities. In addition, MWEOC provides operational space for and maintains the capability to coordinate, track, and synchronize the relocation of key leadership and staff from the DHS and FEMA Emergency Relocation Groups (ERG) members to perform their essential functions. ERG members serve as emergency personnel responsible to perform their Agency mission-essential functions. MWEOC's assets include:

- Offices and classified meeting space
- Dormitory and training rooms
- Cafeteria that seats more than 280 personnel
- Fully equipped fire department and emergency medical unit with an ambulance service operated and staffed by FEMA employees
- Health unit
- Federal police force providing 24/7 security
- Motor pool
- Storage facilities
- Electrical redundancy

In accordance with its Master Plan, MWEOC is in the middle of a massive infrastructure upgrade to demolish antiquated buildings and replace them with modern facilities capable of supporting 21st century technology and today's Federal D/A requirements. MWEOC has improved internal financial and acquisition processes to allow more rapid use of and accountability over larger projects while maintaining operational capabilities.

The PNP PPA includes an increase of \$210.98 million, 654 positions and 628 FTE to support realignment of funding from the State and Local Programs appropriation to the Salaries and Expenses appropriation for grants management and administration and for Preparedness activities such as the National Exercise Program (NEP), training at the Emergency Management Institute (EMI) and the Center for Domestic Preparedness (CDP), Technical Assistance (TA), Individual and Community Preparedness (ICP), the National Integration Center (NIC) and other related activities. This also includes all grants management and administration activities previously funded in the Firefighter Assistance Grants (AFG) and Emergency Management Performance Grants (EMPG) appropriations.

PROCUREMENT ACTIVITIES:

<p>Integrated Public Alert & Warning SysRisk (IPAWS)</p>	<p>The IPAWS Program develops tests, deploys, supports and maintains the systems required to fulfill the functions of Executive Order 13407. It provides stakeholder coordination, training and outreach with the federal, state, and local alert and warning community and the private sector communications industries to continue the advancement and improvement for all aspects of public alerts. The IPAWS Program develops, implements, and maintains this national public alert and warning system available to alerting authorities. IPAWS Goals are to: 1) Create and maintain an integrated interoperable environment for alert and warning; 2) Make alert and warning more effective; and 3) Strengthen the resilience of IPAWS infrastructure. The key benefits of IPAWS are that it expands and modernizes the Primary Entry Points (PEP) systems of radio stations in order to cover 90% of the American Public and IPAWS-OPEN provides alternate pathways to communicate alerts and warning to the American People.</p> <p>IPAWS addresses the capability gap by expanding and modernizing the Primary Entry Points (PEP) systems of radio stations in order to cover 90% of the American Public and IPAWS-OPEN provides alternate pathways to communicate alerts and warning to the American People. IPAWS is completing incremental construction of additional PEP stations and will achieve FOC when IPAWS-OPEN delivers in March 2013.</p>	
<p>FY 2012 Activity Funding (\$millions) \$13.286</p>	<p>FY 2013 Activity Funding (\$millions) \$11.694</p>	<p>FY 2014 Activity Request (\$millions) \$17.434</p>

PPA: Response

	Perm. Pos	FTE	Amount
2012 Revised Enacted	832	730	191,771
2014 Adjustments-to-Base	3	64	(20,106)
2014 Current Services	835	794	171,665
2014 Total Request	835	794	171,665
Total Change 2012 to 2014	3	64	(20,106)

FEMA requests \$171.665 million, 835 positions, and 794 FTE in the Response PPA. This includes adjustment-to-base increases of 64 positions and 3 FTE, and a decrease of \$20.106 million, including:

- Increase of 70 FTE from annualization of vacancies filled.
- Decrease of \$1.06 million and 7 FTE to reflect implementation of management efficiencies.
- Decrease of \$12.137 million for a one-time programmatic increase in the FY 2012 Enacted Salaries and Expenses appropriation for the US&R Response System.
- Decrease of \$6.233 million for the elimination of the Pre-positioned Equipment Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Response mission seeks to conduct emergency operations to save lives and property through positioning emergency equipment, personnel, and supplies; evacuating survivors; providing food, water, shelter, and medical care to those in need; and restoring critical public services. FEMA conducts response operations in partnership with State, Tribal and local governments; interagency Federal partners; nongovernmental organizations; and the private sector.

1) Office of Assistant Administrator for Response and Recovery

The Office of Assistant Administrator for Response and Recovery (OAARR) oversees all gubernatorial requests for emergency declarations and major disasters declared by the President in compliance with the Robert T. Stafford Disaster Relief and Emergency Assistance Act. It is comprised

of the Executive Office, Executive Communication and Coordination Group, Strategic Integration Group, Disaster Management and Support Environment, and the Declarations Unit.

The OAARR also provides strategic level coordination, resource integration leadership, and oversight to FEMA's major operational components. This includes the Office of Readiness and Assessment, the Recovery Directorate, the Response Directorate, the Logistics Management Directorate, and the OFDC.

A. Executive Office

The Executive Office is responsible for providing direct support to the Associate Administrator and Deputy Associate Administrator for Response and Recovery in a number of different areas. This support includes long range planning, administrative support, preparing reports, conducting research, and integration of subordinate element mission execution.

B. Executive Communication and Coordination Group (ECCG)

The ECCG enables and supports the execution of ORR and subordinate organization programs through the representation, development, review, communication, and coordination of policies, guidance, strategies, and programmatic activities with internal and external partners and stakeholders. ECCG coordinates the responses to and addresses a wide variety of issues and inquiries from sources internal and external to FEMA; carries out administrative, programmatic, analytical, research, guidance, policy, and outreach activities; and responds to significant and special assignments that have broad national impact. ECCG communicates and coordinates with ORR stakeholders on broad and emerging policy issues, programs, and guidance that have national scope and impact.

C. Strategic Integration Group (SIG)

The SIG conducts strategic planning, coordination, and synchronization activities with subordinate ORR organizations to ensure collaborative and aligned program operations and resource utilization that complements and supports ORR long-term goals and objectives. The SIG acts as a transformation, change, and knowledge management agent; leverages private and public sector best practices where applicable; and coordinates and ensures implementation of initiatives consistent with the vision and goals of the ORR. It reviews future budget cycles to align ORR goals, objectives, activities, accomplishments, resources, and facilitates the proper and timely funding of key response, recovery, and logistics initiatives. The SIG provides centralized capability development, coordination, and operational leadership to FEMA's geospatial information activities under the direction of the FEMA Geospatial Information Officer.

D. Declarations Unit

The Declarations Unit processes all gubernatorial requests for emergency declarations and major disasters for the President, as well as, all other related actions to include appeals, cost-share adjustments, requests to reopen an incident period or expand the incident type under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5208. It is the mission of the Declarations Unit to ensure each gubernatorial request for assistance meets the statutory and regulatory requirements and is processed as expeditiously as possible.

2) Office of Readiness and Assessment

The Office of Readiness and Assessment develops and implements the FEMA Readiness Assessment Program (F-RAP). F-RAP determines and reports an overall level of readiness by FEMA to fulfill its disaster response, recovery, and logistics missions. F-RAP focuses on three areas: validation of FEMA Unified Readiness Reporting System submissions from FEMA components, identification of the “Readiness Enablers” or elements that enable any operational unit to deliver their required functions (Doctrine, Organization, Training, Material and Equipment, Leadership, Planning, Personnel, and Facilities), and providing support to FEMA elements through Operational Analysis assistance.

The program provides recommendations to leaders about ways to improve the readiness status of their respective response and recovery elements, as well as provides a framework for collecting, analyzing, and applying operational information to improve the Agency’s ability to respond to and recover from incidents regardless of their cause. Thus, FEMA leadership is provided with an important objective evaluation of FEMA component readiness, efficiency, effectiveness, and in addition is provided fact-based information for improved decision-making and resource allocation.

3) Response Directorate

FEMA’s Response Directorate provides and coordinates the core Federal response capabilities needed to save lives, minimize suffering, and protect property in communities throughout the Nation overwhelmed by the impact of an incident, regardless of cause. Response program activities encompass the coordination of all Federal emergency management response operations, response planning, and integration of Federal, State, Tribal and local disaster programs in order to ensure efficient and effective delivery of immediate emergency assistance to individuals and communities impacted and overwhelmed by these disasters, emergencies, or acts of terrorism.

The Directorate addresses training and career development for Response staff, as well as the development of Response internal governance. The FEMA Qualifications System (FQS) is a performance-based approach to workforce qualification and certification of incident management and incident support positions activated to support disasters. This approach seeks to improve FEMA’s response and recovery services by identifying required competencies and tasks for disaster personnel and fostering knowledge and skill development within those competencies to successfully perform the tasks. The FQS is guided by operational requirements, current doctrine, and drives FEMA’s training curriculum for disaster workers at all organizational levels.

The Response Directorate encompasses the following programs:

A. Office of the Assistant Administrator

The Office of the Assistant Administrator (OAA) provides strategic and operational guidance and leadership to all stakeholders, including FEMA headquarters, regional offices, and interagency partners. It ensures that Federal emergency response systems and capabilities are properly poised to

support States and communities. Key functions include providing leadership necessary to integrate the Nation's emergency response teams, systems, and capabilities; coordinating all Federal emergency management disaster operational planning and programs; and executing the response mission through its three major program areas: operations, planning, and disaster emergency communications. The OAA includes the following program areas:

- a) The **Policy and Doctrine Office** is responsible for developing and managing operational policy and doctrine in order to ensure effective and consistent response to all-hazards. The office is responsible for the review, development, and implementation of a variety of policy, analytical, guidance, programmatic, doctrine and administrative activities on emergency management and disaster response issues that have broad national impact.
- b) The **Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE) Office** supports FEMA's all-hazards response mission through the development and maintenance of capabilities and programs that enable FEMA to respond to the consequences of a CBRNE disaster. This includes supporting the development of CBRNE policies, protocols, and procedures during both crisis and consequence management phases of a CBRNE response. The office accomplishes this mission by leveraging subject matter expertise in nuclear, radiological, chemical, and biological, and high-explosive hazards from within FEMA, the interagency, and the scientific community in support of FEMA's mission, including advising FEMA leadership during a CBRNE incident; initiating mission assignments; and activating appropriate emergency response teams for CBRNE incidents. Through the Improvised Nuclear Device Unit and the CBRNE Programs Unit, the office coordinates the Improvised Nuclear Device Response and Recovery (INDRR) Program, the Nuclear Incident Response Team (NIRT), the Domestic Emergency Support Team (DEST), and the Nuclear/Radiological Incident Prevention Program (NRIPP).
- c) The **Improvised Nuclear Device Response and Recovery (INDRR) Program** supports FEMA's role as the Departmental lead for response and recovery efforts associated with the terrorist use of an Improvised Nuclear Device (IND), which is a device designed to result in a nuclear fission reaction that would result in a complex catastrophic disaster in a major urban area that would severely challenge the Nation's ability to respond effectively in a timely manner.

The INDRR Program works to align organizational and strategic direction that affects project and program goals and objectives and ensures common understanding among all stakeholders.

- d) The **Nuclear Incident Response Team (NIRT)** is comprised of specialized teams managed day-to-day by the Department of Energy's (DOE) National Nuclear Security Administration (NNSA) and the Environmental Protection Agency (EPA). The teams are operationally controlled by DHS/FEMA when activated to provide expert technical advice and support in disaster response operations and other needs involving nuclear weapons incidents, radiological incidents, lost or stolen radioactive material incidents, and acts of nuclear terrorism. The FEMA Administrator is responsible for establishing standards and certifying when those standards have been met; conducting joint and other exercises and training and evaluating

performance; and providing funds to DOE and EPA for homeland security planning, exercises and training, and equipment.

- e) The **Domestic Emergency Support Team (DEST)** is a rapidly deployable, interagency team of experts within the Federal Government, staffed from FEMA, the Federal Bureau of Investigations (FBI), Department of Defense (DOD), Department of Energy (DOE), Health and Human Services (HHS), and the Environmental Protection Agency (EPA). The DEST provides guidance concerning Weapons of Mass Destruction (WMD) threats and actual incidents or attacks. In accordance with the Post-Katrina Emergency Management Reform Act, the FEMA Administrator has the responsibility for directing the DEST. National Security Presidential Directives-46/15 further identify the DEST as a specialized interagency team designed to provide expeditiously expert advice, guidance, and support to the FBI On-Scene Coordinator (OSC) during a WMD incident or credible threat. FEMA is statutorily responsible for directing the operations of the DEST; coordinating the interagency team for mission planning purposes; and deploying as part of the team.

Besides providing interagency crisis management assistance, the DEST provide information management support and enhanced communications to ensure the OSC maintains connectivity with national-level decision makers during an ongoing crisis. Technical expertise and equipment is also available to operate in a contaminated environment in order to conduct onsite activities like threat sampling, technical measurements, tactical intelligence collection, evidence collection, and other actions.

- f) The **Nuclear/Radiological Incident Prevention Program (NRIPP)** was established to support the National response to nuclear and radiological threats. FEMA established the NRIPP to enhance the Department's ability to coordinate technical response operations to such threats, in coordination with the FBI as the lead of domestic counterterrorism. In accordance with the Federal Improvised Nuclear Device Concepts of Operations Plan, FEMA is responsible for representing DHS and for coordinating with the FBI, DOE, and DOD, on the deployment of radiation detection capabilities to support the FBI in search activities to detect, locate, and identify illicit nuclear or radiological materials. NRIPP, in coordination with DHS components, works with the FBI to develop plans, procedures, and tools to detect and locate illicit nuclear or radiological materials and supports FBI directed search activities during threats or incidents involving such materials.

B. Incident Workforce Management Division

The **Incident Workforce Management Division (IWMD)** deploys and supports a professional disaster workforce of personnel ready for the National, all-hazard response needs of FEMA headquarters and regional leadership and assists in the deployment of responders from FEMA's full-time workforce and the DHS-supported surge capacity force when required. The IWMD includes the following program areas:

- a) The **FEMA Qualifications System (FQS) Branch** establishes the system for qualification and certification of the FEMA workforce through experience, training, and demonstrated performance. FQS ensures a qualified workforce based on performance standards, and establishes minimum, consistent, and fair qualification requirements for all workforce positions regardless of employment status. FQS also works to strengthen the training and qualification standards for all workforce positions by implementing improvements based on analysis.
- b) The **Reservist Management Branch** is responsible for the communication, coordination, and outreach of workforce procedures and program guidance to the national and regional cadre managers and liaisons on workforce deployment, readiness, and FQS. This unit guides the creation of information technology systems that support the deployment, recording, tracking, and reporting of FQS, medical assessment recording and reporting, and similar systems. Further, it is responsible for communicating, coordinating, and strengthening partnerships and working with regional operations.
- c) The **Deployment Branch** manages and administers the Automated Deployment Database (ADD) personnel deployment system for the incident workforce and the surge capacity force throughout the entire spectrum of FEMA's preparedness, response, recovery, and mitigation missions. The unit implements, manages, and improves standardized deployment processes for all-hazards response and provides personnel visibility and oversight of deployment processes including the tracking of personnel during pre-event (availability), event (deployment), and post-event (demobilization) cycles of an incident. The staff applies metrics to ensure that staffing requirements are met in the timeframe required, generates ad hoc reports to audit deployment decisions and employee deployment status, and monitors and executes the day-to-day tasks needed to maintain the accuracy and the integrity of employee records and the deployment system.

C. Operations Division

The **Operations Division** is responsible for the management and coordination of the core Federal disaster response teams, resources, and programs needed to support the regions; interagency partners; and State, Tribal and local governments, voluntary agencies, and disaster survivors impacted by a major disaster or emergency, regardless of cause. The Operations Division includes the following program areas:

- a) The **FEMA Operations Center (FOC) Branch** is the official notification point for FEMA and supports the DHS and Executive Branch departments and agencies with several classified and unclassified programs authorized by National Security Presidential Directive 51, HSPD-20, the Federal Civil Defense Act of 1950, 50 USC, Appendix 2251, and Executive Order 12656. The FOC facilitates distribution of warnings, alerts, notifications, and bulletins about events that may require a Federal response to the Federal, State, and local emergency management community using a wide variety of communications systems such as the National Warning System, the Washington Area Warning System, the National-level EAS; and the Emergency Notification System.

The FOC supports the NRCC and implements a myriad of notifications to all Federal departments and State EOCs as well as activating emergency management staff. The FOC's multifaceted communications and operations capabilities enable it to receive, generate, and disseminate critical, time-sensitive information to senior decision makers at all government levels. The FOC receives, analyzes, and disseminates all-hazards information within FEMA and DHS and to other departments and agencies, as well as to disaster response team members.

- b) The **National Watch Center (NWC) Branch** maintains a 24/7 national situational awareness of potential, developing, or ongoing situations which may require a Federal response to an incident/event. The NWC links RRCCs, State EOCs, regional DHS components, National and regional Department and agency leads for ESFs, State fusion centers, Joint Terrorism Task Forces, Department of Defense (DoD) Operations Centers, and other key Federal, State, and local operational centers. It supports the collection and distribution of pre-incident information to the DHS National Operations Center (NOC) for development of a national common operating picture. The NWC provides situational awareness and information sharing for all-hazards incidents that may require Federal response to include planning and response operations at the classified level.
- c) The **National Response Coordination Center (NRCC)** is a multi-agency center that provides overall Federal support coordination for major disasters and emergencies, including catastrophic incidents and emergency management program implementation. The NRCC activates to coordinate with the affected region(s) and provide needed resources and policy guidance to support an incident. When activated, the NRCC supports disaster response and resource planning; monitors potential or developing events, and provides situational awareness to the Administrator of FEMA and other senior leadership, the Secretary of DHS and other DHS leadership, and the White House National Security Staff (NSS) to inform decision-making. The NRCC supports regional and field component operations, and implements coordination of national-level disaster response activities and resource prioritizations and allocations.
- d) The **National Urban Search and Rescue (USAR) Response System** funds 28 Task Forces across the country to provide a coordinated, national, all-hazards response capability for locating, extricating, and stabilizing survivors of structural collapse resulting from natural and man-made causes, including those involving terrorism and hazardous materials. If a disaster event warrants national US&R support, FEMA will deploy the three closest task forces within six hours of notification, and additional teams as necessary. The role of these task forces is to support State and local emergency responders' efforts to locate victims and manage recovery operations. Each task force consists of two 31-person teams, four canines, and a comprehensive equipment cache. US&R task force members work in four areas of specialization: search, to find victims trapped after a disaster; rescue, which includes safely digging victims out of tons of collapsed concrete and metal; technical, made up of structural specialists who make rescues safe for the rescuers; and medical, which cares for the victims before and after a rescue.

Among its many activities, US&R is responsible for interaction with sponsoring agencies and operational groups; management roles, including managing cooperative agreements with the task forces, providing budget, training and exercises; and field operations roles, including cadre

management, cache management, alerts and notifications, activations and deployments, and event and after action reporting. In addition, US&R is responsible for the strategic role of ESF-9 coordination, which includes concepts such as force multipliers to augment our task forces with other search and rescue resources from the State and or local responders.

- e) The **Field Operations Support Branch (FOSB)** provides program management and support of the National and Regional IMATs. The Branch supports doctrine development and conducts internal OREs to ensure IMAT readiness. The Branch also coordinates FEMA's operational requirements for the National Airborne Operation Center and other operations.

D. Planning Division

The **Planning Division** leads the development of deliberate plans across the Federal Government for catastrophic incidents. The Division coordinates and is responsible for deliberate, adaptive, interagency analysis and plans for potential/actual incidents while directing regional planning efforts for all-hazard events; providing oversight in the development and maintenance of special programs focused on CBRNE hazards to communities throughout the Nation impacted by an incident, regardless of cause. In addition to all-hazard planning, the Division is responsible for National Special Security Events and the National Hurricane Program (NHP). Further, the Division is accountable for integrating and aligning all FEMA's response planning efforts, coordinating the efforts of the Emergency Support Leadership Group (ESFLG), and continuing to lead the agency's Whole Community, maximum of maximum efforts, as well as supporting the implementation of PPD-8. The Planning Division includes the following program areas:

- a) The **National Planning Branch** provides deliberate and adaptive interagency planning at the Federal level in preparation for special security events, and for responding to and stabilizing a catastrophic event within 72 hours.

The Branch has two sections: the *Interagency Planning Section* is responsible for leading the deliberate, comprehensive planning efforts for special security events, and incident response at the Federal level. This section coordinates the consolidation of interagency partner's roles, authorities, and actions into comprehensive plans to address special security events, and the Federal support to regional, State, Tribal and local response efforts. The *Future Planning Section* is responsible for deliberate planning for FEMA headquarters as an organization, for conducting analysis on a daily basis to maintain situational awareness and for building situational understanding, and for leading and coordinating adaptive planning at the Federal level during incident response and NRCC activation. Adaptive planning is the means by which existing plans are quickly adapted as required to better suit the specific incident.

- b) The **Regional Planning Branch** develops coordinated and integrated DHS and FEMA Federal-level catastrophic disaster response plans, using a deliberate planning process. Regional plans are linked to National all-hazards plans and are developed in partnership with States and local communities. Whole community principles are incorporated throughout the planning process and reflected in the plans. The Branch serves as the point of contact for the regions in the Response Directorate for planning. The Regional Planning staff can deploy to the regions to further develop pre-event relationships, protocols, response processes, and a mutual

understanding of other agencies roles, issues, and needs. The goal is to increase the plan-to-action ability to respond with little or no advance notice/warning to major disasters and incidents through rapid response with massive support.

- c) The **Exercise Unit** contributes to the development and execution of operational exercises by providing response-oriented consultation, advisement, and program expert knowledge, as well as by coordinating with other agencies to provide critical interaction and participation in National-Level response exercises. The type and level of support is dependent upon the needs identified for each exercise, and is closely coordinated with the National Preparedness Directorate's Homeland Security Exercise and Evaluation Program. The Exercise Unit develops the input, which will drive the revision and update of training and doctrine. A key component of the Exercise Unit's responsibility is to develop no-notice exercises, Thunderbolts, to evaluate and maintain readiness of FEMA's nationwide response assets.
- d) The **National Hurricane Program (NHP)** provides evacuation preparedness technical assistance to State, Tribal and local governments, including the preparation of hurricane evacuation studies and technical assistance in developing evacuation plans, assessing storm surge estimates, evacuation zones, evacuation clearance times, transportation capacity, and shelter capacity. The NHP also provides for post-storm assessments and other special hurricane analyses, develops hurricane evacuation studies, and maintains and annually trains more than 3,000 State and local end users in the Hurricane Evacuation decision assistance software package. The NHP helps to ensure an understanding by State and local authorities of all hurricane hazards and their communities' vulnerabilities to these hazards. The program also provides common operating software to view hurricane forecasts and hurricane evacuation study information; provides the most accurate and up-to-date storm surge data for risk assessments and operational decision-making; provides sound guidance for planning and preparedness activities at regional and national levels; and maintains currency and effectiveness of NHP products and services.

E. Disaster Emergency Communications Division

The **Disaster Emergency Communications (DEC) Division** provides and leads integrated Federal communications support to emergency responders at all levels of government. It has a leading national role in the management, oversight, and development of emergency communications capabilities and doctrine. The Division develops and implements the capability to provide tactical voice, data, and video communications services before, during, and immediately after an incident to support emergency managers at all levels of governments. The DEC Division accomplishes its mission through two highly successful core program activities: RECCWGs and MERS.

- a) The **Communications Integration Branch (CIB)** develops comprehensive and integrated Federal, regional, Tribal and State communications plans to ensure that FEMA is prepared to respond and is well integrated with emergency responders during response and recovery efforts nationwide. These planning efforts include the development of State Communication Annexes, development of regional plans, updating National-level contingency plans, and fulfilling additional requirements of these plans through the development of pre-scripted mission assignments. The CIB works to build communications policies that provide the scope and

methods for using FEMA capabilities alongside partners and customers. In addition, the CIB works with the Tactical Emergency Communications Branch (TECB) to determine how the actions of external partners might affect communications capabilities and coordinates plans with external emergency communications providers to build a comprehensive communications support structure.

Through the CIB, the DEC Division manages the RECCWG National Program Office, which assesses emergency communications capabilities within the respective FEMA regions, facilitates disaster preparedness through the promotion of multi-jurisdictional and multi-agency emergency communications networks; and ensures that activities are coordinated with all emergency communications stakeholders within the FEMA regions. The RECCWG budget aligns funding with disaster emergency communications requirements and responsibilities, to improve operational readiness, continuity of operations, and interoperability, and to ensure the effective use of all response communications assets to achieve mission success.

- b) The **Tactical Emergency Communications Branch (TECB)** significantly enhances FEMA's response coordination and execution across the full spectrum of incidents, both natural and man-made. TECB is engaging across the Federal Government, with State, Tribal and local agencies, and with other partners to help establish consistent doctrine, plans, tactics, techniques, and procedures to ensure effective communications interoperability, standards, and capabilities during Federally coordinated response operations. When disaster strikes, the TECB aggressively responds with mission critical technical support to assist deployed MERS coordinators, FEMA regional emergency communications coordinators, and Federal response teams to overcome near-term emergency communications challenges.
- c) **Mobile Emergency Response Support (MERS)** is a National asset that provides rapid deployable and self-sufficient, command, control, and disaster emergency communications capabilities, tactical operations, and logistics support for the on-scene management of disasters. It is a key FEMA disaster response asset that plays an important role supporting disaster response and recovery operations. MERS supports Federal, State, Tribal and local disaster responders in several major areas including multi-media communications, information processing, logistics, and overall disaster operations and administration. Strategically positioned in six locations across the Nation, MERS detachments can support multiple field operating sites concurrently while building out disaster infrastructure for multiple incident areas of operation.

MERS provides a cost-effective solution to the National Response Framework, Emergency Support Function #2 requirements. The detachments are available 24 hours a day to deliver FEMA disaster emergency communications and other life-saving, live-sustaining infrastructure support services. The ability to deploy mobile command center Interim Operating Facilities, Joint Field Offices, and Disaster Recovery Centers allows emergency management staff and Federal response teams to focus on immediate response and recovery activities. MERS home station operations centers and specialists support FEMA's network of operations centers, providing situational awareness and reporting down to the incident site level. Much work remains to improve disaster emergency communications interoperability with other Federal

departments and agencies and emergency responders at State, Tribal and local levels of government.

F. Business Management Division

The **Business Management Division (BMD)** coordinates the major support requirements of the Directorate. The Division is charged with making decisions about the Response Directorate's mission needs and providing support for the day-to-day mission of the Directorate. BMD accomplishes this mission through the coordinated efforts of the Contracts Management Branch, the Human Resources Management Branch, the Financial Management Branch, and the Facilities and Assets Management Branch.

4) Logistics Management Directorate

The mission of the Logistics Management Directorate (LMD) is to effectively plan, manage, and sustain national logistics response and recovery operations, in support of domestic emergencies and special events – to act as the Whole Community Logistics Coordinator and single logistics integrator for National incident support.

The Logistics Management Directorate encompasses the following programs:

A. Disaster Logistics Management - Management & Administration (M&A)

The Logistic Management provides comprehensive logistics-related coordination to achieve optimum mission requirements and capabilities. This includes the business management of the M&A, which integrates human resources management, professional training and development, financial management, and strategic management for LMD's operational missions and programs.

B. Disaster Logistics Distribution Management Operations

Logistics Distribution Management Operations manages FEMA's warehouse facilities and transportation systems used to receive, store, maintain, issue, distribute and track supplies, services, material and equipment.

C. Disaster Logistics Property Accountability, Oversight, and Coordination

Logistics Property Accountability provides industry standards (using American Society for Testing and Materials voluntary consensus standards) quality assurance, customer assistance and technical reviews of property accountability, inventory services, and oversight of disposal and donations of agency disaster-funded supplies and equipment.

D. Disaster Logistics Operations

Logistics Operations manages and executes the coordination and communication, tracking and reporting for all-hazards operations and serve as the central reporting element for the NRCC on all logistics actions and operational activities.

E. Disaster Logistics Plans and Exercises

Logistics Plans and Exercises develops and provides cohesive and synchronized logistics plans and exercises to achieve both short- and long-term readiness requirements.

PROCUREMENT ACTIVITIES:

<p>Software Application Development</p>	<p>Software Application Development includes the development and maintenance of FEMA’s critical applications that support mission needs.</p> <p>The critical applications are:</p> <p>LIMS-III: Logistics Information Management System is the Agency’s official system of record for personal property asset management.</p> <p>COMMITTS: Centralized Operations, Maintenance and Management Information Technology Services contracts support systems operations & maintenance, network operations support, hardware installation, maintenance and operations support and Help Desk support.</p> <p>SETA: Systems Engineering and Technical Assistance contracts provide a wide variety of highly specialized engineering and technical services to support FEMA IT Division.</p>	
<p>FY 2012 Activity Funding (\$millions) \$22.6</p>	<p>FY 2013 Activity Funding (\$millions) \$22.6</p>	<p>FY 2014 Activity Request (\$millions) \$22.6</p>

**Department of Homeland Security
Federal Emergency Management Agency

Recovery
Program Performance Justification**
(Dollars in Thousands)

PPA: Recovery

	Perm. Pos	FTE	Amount
2012 Revised Enacted	420	373	55,300
2014 Adjustments-to-Base	(3)	20	230
2014 Current Services	417	393	55,530
2014 Total Request	417	393	55,530
Total Change 2012 to 2014	(3)	20	230

FEMA requests \$55.53 million, 417 positions, and 393 FTE in the Recovery PPA. This includes an adjustment-to-base decrease of 3 positions and increases of 20 FTE and \$230 thousand, including:

- Increase of 22 FTE to reflect annualization of vacancies filled.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Recovery mission supports individuals and communities affected by disasters of all sizes, including catastrophic events and terrorist attacks, in their efforts to recover.

1) Recovery Directorate

The Recovery Directorate provides program oversight for disaster assistance averaging more than \$8.0 billion annually. The Recovery Directorate oversees Federal disaster assistance programs; manages resources for readiness and recovery capability development; develops recovery strategies, policies, and doctrine for delivering assistance; plans for catastrophic events and continuity of operations; delivers grant assistance for community and individual recovery; and develops and coordinates partnerships.

The Recovery Directorate is also FEMA’s agent in the implementation of the National Disaster Housing Strategy, the National Disaster Recovery Framework (NDRF), the National Catastrophic Infrastructure Recovery Plan, Emergency Support Function (ESF) #3 (Public Works and Engineering),

ESF #6 (Mass Care, 40 Emergency Assistance, Housing, and Human Services), and ESF #14 (Long-term Community Recovery).

The following Recovery Directorate programs/functions receive staffing and operating expenses support from the S&E appropriation:

A. Office of the Assistant Administrator for Recovery

The Office of the Assistant Administrator provides strategic leadership and direction to support and strengthen Recovery Directorate programs and activities through program analysis and evaluation; policy coordination and analysis; performance measurement and management; development of doctrinal guidance; information management, analysis, and reporting; and internal and external partner coordination and integration.

B. National Disaster Recovery Planning Division

The National Disaster Recovery Planning Division strengthens recovery programs and assistance by developing and coordinating national-level plans and exercises, including catastrophic, all-hazards, contingency, COOP, devolution planning; coordinating and leading ESF #14 - Long-term Community Recovery; and supporting FEMA Regional Office recovery planning activities.

The National Disaster Recovery Planning Division also is responsible for leading the development, implementation, and other activities associated with the National Disaster Recovery Framework (NDRF). The NDRF describes the concepts and principles that guide recovery efforts in response to large-scale or catastrophic disasters; identifies scalable, flexible, and adaptable coordinating structures to align key roles and responsibilities; and links local, State, Tribal and Federal governments, the private sector, and voluntary, faith-based, and community organizations that play vital roles in recovery.

C. Public Assistance (PA) Division

PA Division programs provide assistance to Tribal, State and local governments, and certain nonprofit organizations to alleviate suffering and hardship resulting from major disasters or emergencies declared by the President. The S&E appropriation funds PA full-time permanent employees, plus operating expenses for consistent implementation and management of PA programs including development and maintenance of policies and doctrine, planning, training development and delivery, technology sustainment, and outreach to improve integration and coordination. PA programs provide reimbursement for debris removal, emergency protective measures, and the repair, replacement, or restoration of disaster-damaged, publicly owned facilities and the facilities of certain private nonprofit organizations, funded by the DRF. These programs provide not less than 75-percent Federal cost-share reimbursement to States for actual costs.

D. Individual Assistance (IA) Division

IA Division ensures that disaster survivors have timely access to a full range of programs and services to maximize their recovery, through coordination among Federal, Tribal, State and local governments, voluntary agencies, and the private sector. IA programs and functions are executed under Sections 403, 408, 410, 415, 416, 425, and 426 of the Stafford Act and funded by the DRF. The S&E41 appropriation funds all IA full-time permanent employees, plus operating expenses for consistent implementation and management of IA programs including development and maintenance of policies and doctrine, planning, training development and delivery, technology sustainment, and outreach to improve integration and coordination among Federal, Tribal, State and local governments, voluntary agencies, and the private sector.

E. National Processing Service Centers (NPSC)

NPSCs are a key component of the Agency's ability to support survivors' resilience to disaster through recovery programs. The NPSCs are FEMA's full-service disaster assistance processing and solution centers responsible for: registering individuals for assistance by phone and via the Internet; verifying home and personal property losses through onsite inspections; processing applicant registrations to determine and communicate assistance eligibility; and responding to applicant questions by phone (and mail) throughout the disaster assistance process. Funding from the M&A appropriation supports approximately 300 full-time positions in the NPSCs as well as other activities, such as technology requirements needed to maintain call centers, equipment, and training.

F. Business Management Division

The Business Management Division (BMD) provides the Recovery Directorate coordination of technology solutions, contracting, facility and asset management, financial management and contract closeouts, human resources support, training, and cadre management. Activities focus on improving efficiency, building sustainable business and workforce capabilities, supporting the implementation and modernization of service delivery with cost-effective technology systems and solutions, and effecting coordination with MSB and OCFO to enable successful execution of Recovery programs and delivery of services.

PPA: Mitigation

	Perm. Pos	FTE	Amount
2012 Revised Enacted	76	62	30,649
2014 Adjustments-to-Base	-	8	(4,768)
2014 Current Services	76	70	25,881
2014 Total Request	76	70	25,881
Total Change 2012 to 2014	-	8	(4,768)

FEMA requests \$25.881 million, 76 positions, and 70 FTE in the Mitigation PPA. This includes an adjustment-to-base increase of 8 FTE and a decrease of \$4.768 million, including:

- Decrease of \$3.576 million for a one-time programmatic increase in the FY 2012 Enacted Salaries and Expenses appropriation for mitigation programs.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Federal Insurance and Mitigation Administration (FIMA) creates safer communities by reducing loss of life and property and preventing potential disaster losses. This is accomplished through three core competencies and one support activity: analyzing risk through identification and assessment; reducing risk through land use, building codes, and the Hazard Mitigation Grant Program; environmental planning and historic preservation; and the regional and disaster support activity.

These core competencies and support activity work jointly to reduce the likelihood of future losses, to enable individuals to recover more rapidly from floods and other disasters, and to minimize the financial impact of disasters on the U.S. Treasury, States, and local and Tribal communities.

1) National Dam Safety Program (NDSP)

As a critical element of the Nation’s infrastructure, dams bring water, power, flood control, recreation, economic possibilities, and many other advantages to people. Safe operations and maintenance are critical to sustaining these advantages and avoiding potential disaster. Since 1998, the recorded number

of deficient dams (those with structural or hydraulic deficiencies, leaving them susceptible to failure) has risen by 85 percent—from 1,818 to 4,095. While federally owned dams are in good condition, and there have been modest gains in repair, the number of dams identified as unsafe is increasing at a faster rate than those being repaired. The number of high-hazard potential dams (dams whose failure would cause loss of human life) is increasing dramatically. Since 1998, the number of high-hazard-potential dams has increased from 9,281 to 13,000 in 2009.

FEMA's role in addressing this problem is to aid States and communities in recognizing their risk and developing plans to mitigate that risk as the lead Federal agency for NDSP. FEMA coordinates efforts through collaborative partnerships between States, Federal agencies, and private sector and other stakeholders to secure the safety of these dams through research, training, and public awareness. The NDSP provides financial assistance to States' dam safety programs to support dam safety activities including:

- Inspecting and monitoring dams
- Training dam safety staff and inspectors
- Data analysis and research to support the improvement of State Dam Safety Programs.
- Preparation of Emergency Action Plans
- Public awareness campaigns aimed at both the public and emergency management on the risks associated with dam failure

The FY 2014 budget request includes a performance-based approach for evaluating State performance that ultimately will afford us the opportunity to allocate grant funds based on State performance versus a funds distribution based on the number of regulated dams in each State.

2) National Earthquake Hazards Reduction Program (NEHRP)

Congress established NEHRP in 1977, and authorized the member agencies to conduct research on the causes and effects of earthquakes, produce technical guidance to develop earthquake resistant design and construction standards, and develop techniques to educate the public about earthquake hazards and mitigation.

Ongoing efforts to support the creation and maintenance of disaster-resistant building codes and standards is a major focus of the NEHRP and is an important factor in reducing the losses from major U.S. earthquakes over the past 30 years.

Areas such as the New Madrid seismic zone in the central United States remain more vulnerable to extensive damage cause by earthquakes than other parts of the country, particularly the western United States. This is because western States adopted seismic building codes much earlier than those in the central United States did. Currently, Arkansas (adopted 2006); Indiana (adopted 2006), Mississippi (adopted 2003) and Tennessee (adopted 2006) have adopted statewide seismic building codes. Illinois and Missouri have not adopted statewide seismic codes, however many jurisdictions in those States have adopted them. State and local jurisdictions need to do more to improve the earthquake resistance of buildings and infrastructure in this part of the Nation.

Each year, approximately 3,000 to 4,000 earthquakes strike our Nation. FEMA, along with partners from the U.S. Geological Survey, the National Institutes of Standards and Technology and the National Science Foundation, works to help communities identify earthquake risk and develop plans for reducing those risks. Specifically, NEHRP manages initiatives that reduce the risk to life and property from earthquakes, including the following:

- Translating research into technical guidance publications and best practices on seismic safety, building design and construction, building codes and standards, and reducing economic losses
- Assisting State and local governments in building capabilities for determining potential damage and reducing the effects of earthquakes before they occur
- Working with national codes and standards organizations to develop and improve seismic building standards

3) Building Science Program

Building Science Program develops mitigation guidance that focuses on creating disaster-resilient communities. The program's mitigation activities include:

- Acting as a Technical Services Bureau for FIMA and FEMA for the development and maintenance of over 100 technical manuals regarding evaluation, design, and construction standards for multiple hazards, which are used by builders and building owners, designers, and local officials.
- Assessing structural resiliency in post-disaster environments through immediate deployment of mitigation assessment teams following disasters.
- Developing timely publications, guidance materials, tools, technical bulletins, and recovery advisories that incorporate the most up-to-date building codes, flood proofing requirements, and wind-resistant requirements for new construction or repairing existing buildings.
- Supporting the development and adoption of disaster-resistant model building codes and standards.
- Furthering development of the Risk Management Series for all-hazards mitigation.
- Providing building science technical support for NFIP and Hazard Mitigation Assistance programs.
- Providing building science technical support to public and private sector stakeholders.

4) Environmental Planning and Historic Preservation

FEMA's Office of Environmental Planning and Historic Preservation (OEHP), located within FIMA, manages FEMA's responsibilities to be stewards of the natural and cultural environment and related compliance with all environmental planning and historic preservation laws, executive orders, and regulations across all FEMA programs. OEHP helps build a unity of effort across the emergency management team as it relates to EHP issues and requirements, and specifically, the OEHP is the functional authority on environmental planning and historic preservation (EHP), and oversees the development of all EHP regulations and policy, systems, human capital (including the EHP Disaster Workforce), outreach, and performance management aspects of these requirements. OEHP's mission

is to help communities reduce the impact that disasters and emergency management decisions and operations have on the Nation's natural and cultural resources.

- OEHP also works closely with FEMA Directorates and Program Offices to provide technical assistance in integrating these stewardship responsibilities into program decision-making and implementation, and how to use the EHP process to further the Whole Community objectives of stakeholder engagement and collaboration as part of the decision-making process. The EHP Strategic Plan, FY 2009-2013, has three major goals: build sustainable capabilities; strengthen operational effectiveness; and strengthen EHP partnerships.

5) Regional and Disaster Support Branch

Regional and Disaster Support (R&DS) Branch works to define and manage FIMA's role in FEMA's response and recovery operations as well as to ensure regional integration into National programmatic issues. This responsibility requires the R&DS design consensus-based solutions to prepare the disaster workforce to consistently deliver program and technical assistance to affected local governments and disaster applicants, along with facilitating Regional input regarding crosscutting initiatives. The main goals of Regional and Disaster Support are:

- Translate Headquarters programs and initiatives into tools and resources to equip the Hazard Mitigation Disaster Workforce with standards, training, and job aides to consistently deliver hazard mitigation assistance in the disaster setting, and to further the efforts of FIMA programs.
- Build and facilitate a National network of Regional Managers to effectively integrate FIMA's performance.
- Coordinate FIMA disaster operations, National disaster policy analysis, and crosscutting program and administrative issues in support of the Regions and the Disaster Field organization.

6) FIMA Mission Support Activities

FIMA's mission support activities include management and oversight of Agency programs, business operations support, stakeholder engagement and outreach support, business process management and improvement activities, and information systems support activities.

PPA: Mission Support

	Perm. Pos	FTE	Amount
2012 Revised Enacted	857	732	190,438
2014 Adjustments-to-Base	(13)	33	(45,858)
2014 Current Services	844	765	144,580
2014 Total Request	844	765	144,580
Total Change 2012 to 2014	(13)	33	(45,858)

FEMA requests \$144.58 million, 844 positions, and 765 FTE in the Mission Support PPA. This includes adjustment-to-base decreases of 13 positions and \$45.858 million, and an increase of 33 FTE, including:

- Increase of 81 FTE to reflect other adjustments.
- Decrease of \$6.967 million and 46 FTE to reflect implementation of management efficiencies.
- Decrease of \$1.117 million to reflect efficiencies achieved on: Strategic Planning contract; environment and energy management; mail/postage operations; and SSFMD management oversight.
- Decrease of \$1.006 million to reflect FY 2012 reprogramming actions.
- Decrease of \$13.662 million for a one-time programmatic increase in the FY 2012 Enacted Salaries and Expenses appropriation for IT modernization
- Decrease of \$5.0 million for a one-time programmatic increase in the FY 2012 Enacted Salaries and Expenses appropriation for facilities repair.
- Decrease of additional \$2.54 million in the facilities repair program based on a new prioritization and ranking program.
- Decrease \$1.19 million in information/telecommunications based on consolidation, prioritization, and needs analysis.
- Decrease of \$13.41 million for software licenses and data center O&M transferred to the DHS Working Capital Fund in the Centrally Managed Accounts PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

Mission Support (MS) enables all facets of the Agency mission by providing strategic leadership to and assuring the timely, efficient, and effective delivery of administrative, property management, health and safety, human capital, Information Technology (IT), procurement, security services and business function capabilities.

The functional responsibilities of each MS Office are detailed below.

1) The Mission Support Executive Office (MS EO)

The Mission Support EO provides primary strategic oversight to and is focused on integrating activities within and seeking efficiencies among the five Mission Support component offices. Additionally, specific EO responsibilities include the functions of the Component Acquisition Executive; coordinating administrative, human capital, and acquisition needs in FEMA's 10 Regional Offices; oversight of Mission Support-wide business process improvements; coordinating cross-organization COOP planning; and managing and overseeing basic administrative functions and activities.

2) Enterprise Business Unit (EBU)

The EBU drives integration across Mission Support by providing tools to allow senior leaders to manage financial and human resources across the entire enterprise. The Unit also ensures the Mission Support budget is developed and executed, and that our human resources are organized and trained to best support Mission Support's strategic plan. EBU accomplishes this mission through the coordinated efforts of the Talent Management and Budget Branches, which provide coordination of financial management, contract closeouts, human resources support and training to enable successful execution of Mission Support's programs and services to FEMA. In addition, the EBU is responsible for supporting Mission Support strategic and operational planning activities by providing assistance to all offices within the organization for the development and implementation of program level plans that support FEMA and Mission Support strategic direction.

3) The Office of the Chief Administrative Officer (OCAO)

OCAO provides critical support to FEMA's mission through a full range of administrative and management services, including real and accountable property management; occupational safety, health and environmental programs; records management; printing and graphics support services; facilities management, both at HQ and in the Regions; fleet support and management; support to Freedom of Information Act (FOIA) requests; and privacy protection to programs, partners, and stakeholders.

Workplace Transformation: OCAO is leading the effort to transform FEMA's workplace into a highly flexible, mobile, and collaborative environment. The first phase of this transformation is focused on the National Capital Region (NCR) through investments in vital facilities, furniture and information technology improvements that will increase capacity at 500 C St. This will enable FEMA to exit two buildings achieving rent cost avoidance of over \$4 million in FY14 and \$6.5 million

annually by FY15. Several floors will be renovated and all floors will replace outmoded cubicles with state of the art open-style furniture to create an open-space collaborative workplace. Mobile work approaches such as telework and “hoteling” will increase FEMA’s flexibility and agility enabling a minimum of 20% of employees to work from out-of-office locations improving FEMA’s capability in achieving mission success as a mobile workforce. Lessons learned from this phase will be expanded throughout the NCR and to the Regions providing a foundation for culture change across the Agency.

The portfolio of OCAO includes the Support Services and Facilities Management Division (SSFMD); the Occupational Safety, Health, and Environment (OSHE) Division; and the Records Management Division.

The **Support Services and Facilities Management Division** is responsible for managing real property and accountable personal property, products, services, and solutions, to include the acquisition, leasing, repair, maintenance, and disposal of fixed and temporary facilities, and inventory management of accountable personal property. SSFMD manages space optimization planning, furniture acquisition, public benefit conveyance; facilities support services, and the transit subsidy program. In addition, the Division provides or coordinates critical mission support services, such as mail management, graphic/multimedia support, publications ordering/shipment, fleet management, and printing for both steady-state and disaster support operations.

The **Occupational Safety, Health, and Environment Division** provides leadership, oversight, guidance, and support to ensure the protection of all FEMA employees and programs nationwide, through a Whole Community readiness approach which emphasizes the protection of operations, affected communities, and responding partners to reduce injuries and minimize loss of life by supporting both steady-state and disaster response operations, including the Nuclear Incident Response Team (NIRT), the DEST, and IMATs. Divisional responsibilities are accomplished through an array of specific programs (such as maintaining readiness of the National Safety and Health Cadre), planning and preparedness exercises, training programs (such as Collateral Duty Safety Officer and Safety Manager Training), evaluations, employee wellness and medical readiness, pre- and post-deployment operations; operational assessments, and compliance verification activities (such as Management Evaluation Technical Assistance Reviews, Life Safety and Environmental Regulatory Compliance Reviews).

The **Records Management Division and Privacy Office** administer statutory programs that include Records Management, Privacy Act, FOIA, Information Quality Act, Paperwork Reduction Act (PRA), and Federal Advisory Committee Act (FACA). These programs administratively support programs such as Correspondence Management, Forms Management, Directives Management, Research Service, and the National Archives and Records Administration (NARA) Reimbursable Program. They also administer the enterprise systems for the collection, preservation, management, safeguarding of records, correspondence, and historical research material.

4) The Office of the Chief Component Human Capital Officer (OCCHCO)

OCCHCO supports FEMA’s mission by managing human capital programs and operations as well as drive the vision for the workforce of the future – a highly skilled responsive emergency management workforce that mirrors the communities it serves and is equipped with the competencies and tools

required to respond effectively. The OCCHCO goal is to provide a blueprint for the future, to ensure that the Agency hires and retains the people with the right skills to excel in meeting current and future challenges. Successful recruiting, training, career management, compensation, promotion management, performance management, and leadership all contribute toward growing a competent and diverse workforce. Through the strategic management of human capital, FEMA will:

- Conduct workforce planning, prioritize and invest in closing skill gaps, align performance with strategic goals, and fully engage its employees in strengthening the workforce.
- Systematically plan, measure, evaluate, and improve HC programs to achieve organizational results, legal and regulatory compliance, and taxpayer value.

OCCHCO programs and functions are organized across the following office, divisions and branches.

A. OCCHCO Front Office

- The Executive Services Branch provides the management of the agency's human resources program for executive and politically-appointed staff, including Presidential Appointees; Senior Executive Service; Schedule C employees; and Experts and Consultants. Oversees leadership and development programs for executives and SES CDP participants; and provides advice to FEMA's leadership on various executive programs.
- The Human Resources Information System Branch enables FEMA to improve human capital business process governance as well as consolidate and modernize enterprise human capital systems. The Technology Innovation Unit is responsible for creating an information system that integrates policies and procedures used to manage FEMA human capital as well as the processes necessary to operate its applications.
- The Career Development Branch supports individual and organizational development of professional and leader development competencies. By establishing a progressive development plan, the Branch is able to assess learning needs of employees at all levels within the organization; design, develop and implement activities, courses and programs in support of those needs; and evaluate the effectiveness of the developmental activities.

B. Workforce Effectiveness Division

The Workforce Effectiveness Division provides strategic human capital planning; develops and updates HC policies and directives (Title 5 & Stafford Act); implements Workforce and Succession Planning tools; develops the Diversity Management Action Plan in partnership with the Office of Equal Rights, to include MD-715, and Diversity Management Advisory Council Liaison; manages the Employee Viewpoint Survey and the OPM HCAAF reporting requirements.

C. Workforce Relations Division

The Workforce Relations Division designs, develops, and implements a comprehensive employee development approach to ensure employees have the right competencies and skills for current and future work assignments. The Division provides labor and employee relations expertise, support, and

program leadership in administering labor and employee relations programs such as, performance management, awards, employee discipline and adverse actions including performance-based actions.

D. Headquarters and Field Operations Divisions

The Headquarters Operations Division provides consulting and processing services of all matters relating to recruitment classification, staffing, merit promotion, and delegated examining for headquarters as well as field offices for positions at the GS-15 level and below. The Division provides operational support to managers, supervisors, and employees; conducts orientations; processes all personnel and payroll actions including employee benefits.

5) The Office of the Chief Information Officer (OCIO)

OCIO supports FEMA's mission by maintaining and enhancing the Agency's IT infrastructure, and developing and enhancing key systems to support operating programs. The requested funding supports the mission by building, sustaining and improving the capabilities that: provide operations and maintenance support for 99 applications; support increased mobility for the FEMA workforce; afford IT governance and administrative support for programs and offices; and deliver IT services (including information security, internet, telecommunications, and desk-side technical help), support, and oversight across the enterprise which includes more than 20 fixed locations, over 9,000 employees, and during an event can include up to 25,000 employees. Funding supports plans to build on the FY 2012 and FY 2013 successes of consolidating two data centers (Raleigh, North Carolina and Plano, Texas) into the DHS Enterprise Data Center in southern Virginia. Funding also supports plans to improve management effectiveness by seeking cost-effective, reliable, secure, and innovative solutions through which to continue to deliver the Agency's services to Nation's citizens and first responders. .

To continue to ensure the sustained viability and resiliency of IT capabilities, FEMA will continue to work toward the consolidation of applications at the Mount Weather facility and closure of commercial data centers that are currently hosting FEMA mission support applications. OCIO will continue to take advantage of IT services offered at the DHS-enterprise level, such as email and internet collaboration services, that will improve capabilities and reduce costs. The OCIO is comprised of five divisions.

The **Mount Weather Information Technology Support Division** provides day-to-day operation, and maintenance of the Mount Weather information technology infrastructure supporting continuity.

The **Operations Support Division** provides day-to-day operation, maintenance, control and security of the FEMA enterprise from headquarters sites thru the Regions and including the extension of the enterprise into disaster field offices and sites.

The **Systems Development and Integration Division** funding provides the establishment of leadership and support for the direction, design, development, testing and fielding of applications, systems, and infrastructure. Additionally, funding pays for the management of successful delivery of IT projects, such as efforts to improve the National Mass Evacuation Tracking System and Direct Assistance Replacement Assistance Consideration within scope, budget, and on schedule, using leading-edge technologies, and Project Management Institute best practices coupled with world-class

vendors obtained through innovative contract vehicles. The funding ensures system development efforts follow the DHS systems engineering lifecycle and FEMA guidance to ensure the sustainability of projects.

The **Architecture & Enterprise Engineering Services Division** is responsible for:

- Providing direction for the management, design, development, acquisition support, integration and implementation of FEMA's critical Information Technology infrastructure products and systems to ensure DHS and FEMA meet their strategic goals and objectives.
- Design and documentation of architectural blueprints and Information Communication Technology (ICT) infrastructure business plans.
- Analyses of business requirements for planning future business direction, and evaluating current organizational position-benchmarking/maturity assessment.
- Supporting the design and implementation of technical plans.
- Improving business processes and automation.

The **Business Management Division** provides leadership and oversight to establish and direct the underlying business processes and functions necessary to effect efficient operations throughout the OCIO and supported missions across FEMA. Funding requested by the Business Management Division is used to manage Independent Verification and Validation, Information Security, Governance and Investment Integration, and Business Operations.

6) The Office of the Chief Procurement Officer (OCPO)

OCPO provides a full range of acquisition services and business solutions to all FEMA programs, partners, and stakeholders. OCPO ensures quality contracting in a timely manner, and delivers acquisition services using the most efficient and effective means possible, by:

- Providing pre- and post-award contracting and acquisition support to our customers; which ensures stewardship of public funds by following Federal Acquisition Regulation, its supplements and the tenets of best practices in acquisition.
- Conducting acquisition oversight and monitoring of internal controls pertinent to the acquisition process to detect and prevent fraud, waste, and abuse of acquisition resources.
- Updating, maintaining, and providing access to electronic procurement systems, to ensure uniform as well as statutory and regulatory-compliant contract documents.
- Improving the delivery of sound acquisition and business solutions and increasing the number of strategic sourcing opportunities.
- Providing program management oversight and inventorying of acquisition programs, ensuring that acquisition lifecycle oversight complies with FEMA/DHS policies.
- Conducting acquisition investment reviews.

A. Acquisition Operations Division

The Acquisition Operations Division awards, modifies, and provides life-cycle oversight of acquisitions for both steady state and disaster/contingency requirements. Additionally, the Division

coordinates and collaborates closely with program customers to develop and execute acquisition solutions that fully support mission requirements.

B. Acquisition Program and Planning Division

The Acquisition Program and Planning Division educates and equips customers and stakeholders with the innovative tools, resources, and business solutions they need to make sound acquisition and business management decisions. The Division works with organizations and acquisition professionals to develop requirements and effective acquisition strategies, to include exploring opportunities for strategic sourcing; conducting acquisition portfolio reviews; providing acquisition guidance, governance and oversight of programs and the Acquisition Program Managers and Contracting Officer's Technical Representatives tiered training programs; and conducting extensive market research with industry through vendor outreach in a continuing effort to minimize contract risk and maximize the execution of FEMA's mission throughout the acquisition lifecycle.

C. Acquisition Policy and Legislation Division

The Acquisition Policy and Legislation Division informs contracting officers and contract specialists of existing acquisition policies and procedures that affect the way they do business; conducts special acquisition programs that directly support FEMA's mission; identifies and provides acquisition training opportunities to ensure currency of acquisition knowledge, skills, and abilities; provides and maintains access to electronic acquisition tools to create, maintain, and report contractual documents; and conducts acquisition oversight activities that monitor acquisition staff performance, and identify and correct internal control deficiencies.

7) The Office of the Chief Security Officer (OCSO)

OCSO provides comprehensive, value based security services, programs, and activities designed to protect FEMA personnel, facilities, information, equipment, and to mitigate the risk of loss to the Government due to fraudulent activity.

A. Business and Program Management Unit (BPMU)

The BPMU provides program management and analysis, continued process improvement, and change management support. The BPMU also creates a formal management framework to coordinate security related activities and tasks by tracking customer service and mapping out strategy for various functions in each Division. In addition, the unit coordinates and prioritizes economic, logistics, facility, and human resources to ensure successful implementation of security services throughout FEMA.

B. Policy, Training and Compliance Unit (PTCU)

PTCU is responsible for developing FEMA security-wide policies, programs, and planning to promote and ensure quality, consistency, and integration of security programs across FEMA. In addition, PTCU ensures OCSO employees understand and comply with constitutional, legal, and DHS/FEMA

policies and regulations; as well as, develop a comprehensive and ongoing security awareness program for FEMA, to include Regions involved in processing, safeguarding, and disseminating sensitive and classified information.

C. Field Operations Division (FOD)

FOD ensures security policies and procedures are uniformly applied at regional and disaster environments. FOD also ensures synchronization, coordination, and application of OCSO programs throughout regional and disaster facilities.

The **Disaster Security Operations Branch (DSOB)** is responsible for security operations at Joint Field Offices, Disaster Relief Centers, Mobile Disaster Relief Centers, Responder Support Camps, National Response Coordination Center Activations, and Special Assignment Activities. DSOB also manages and trains Security Cadre supporting disaster relief efforts.

The **Regional Security Coordination Unit (RSCU)** establishes direct and general communication with Regional Administrators for all security concerns and coordinates requests for technical and special projects. The RSCU also provides or facilitates specialized security training for Regional Security Officers on new security technical and operational processes.

D. Support Operations Division (SOD)

SOD is responsible for the Counterintelligence, Information, Industrial, Operations, and Physical Security Programs, as well as the Identity Credential, Access Management, and HSPD-12 programs, including policies and procedures.

The **Administrative & Special Security Programs Branch (ASSPB)** is responsible for overseeing Administrative and Industrial Security, Controlled Unclassified Information, Foreign Travel, Foreign Visitor, Foreign Contact, Q Clearances, North American Treaty Organization, Classification Management, and FEMA Classification Guides. ASSPB also provides security policy and oversight for protecting Counter Intelligence information; Sensitive Compartmented Information (SCI) briefings, facility policy and oversight, program personnel management, and SCI customer support.

The **Physical Security Branch** is responsible for the protection of FEMA's personnel, property, buildings, facilities, assets and resources; and the development and implementation of the Physical Security Program including implementing policies and procedures for the Homeland Security Presidential Directive 12 and Identity, Credential, and Access Management.

E. Personnel Security, Fraud and Internal Investigations Division (PFID)

PFID is responsible for reviewing allegations of employee misconduct, preventing fraudulent loss of FEMA funds, and safeguarding FEMA personnel, buildings, and facilities. PFID also provides FEMA with a trustworthy and suitable workforce and delivering integrated personnel security services in accordance with the Agency's mission.

The **Personnel Security Branch** is responsible for processing background investigations to determine suitability for Federal Service and granting security clearances for employees, disaster local hires, and contractors.

The **Internal Investigation Branch** is responsible for conducting investigations into employee misconduct, theft of Government property, conducting threat assessments against FEMA employees, investigating and collecting data on reports of suspicious activities under the DHS Suspicious Activity Reporting Program, and providing and coordinating personal protective details and escort functions and security training, and serving as FEMA's liaison to Federal, State, local, and Tribal law enforcement agencies and to the FBI Joint Terrorism Task Force.

The **Fraud Prevention & Investigation Branch** is responsible for identifying, impeding, mitigating, and preventing fraudulent losses of FEMA funds and assets through agency fraud awareness training, comprehensive research, investigation, and recoupment of funds.

PPA: Centrally Managed Accounts

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	-	-	107,273
2014 Adjustments-to-Base	-	-	3,033
2014 Current Services	-	-	110,306
2014 Total Request	-	-	110,306
Total Change 2012 to 2014	-	-	3,033

FEMA requests \$110.306 million in the Centrally Managed PPA. This includes an adjustments-to-base increase totaling \$3.033 million, including:

- Increase of \$13.41 million for software licenses and data center O&M transferred to the DHS WCF in FY 2013 from the Mission Support PPA.
- Increase of \$15.407 million for realignment of funding from State and Local Programs (SLP) to S&E appropriation.
- Decrease of \$4.7 million for one-time facilities investments required in FY 2012 to achieve a reduced FEMA footprint and rent reductions in FY 2013 and beyond.
- Decrease of \$1.5 million in Mount Weather rent to be achieved through relocation of FEMA personnel from Mount Weather to more cost-effective locations.
- Decrease of \$5.478 million to reflect technical adjustment (.612% CR).
- Decrease of \$8.3 million in rent to be achieved FEMA-wide through consolidation of facilities to reduce the overall FEMA footprint.
- Decrease of \$6.4 million in IT enterprise telecom to be realized through management efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

Centrally managed accounts are critical bills that must be managed at the enterprise level to ensure efficient and effective cost management which includes streamlining cost factors and prompt payment.

Centrally managed accounts include:

- DHS WCF
- Mount Weather WCF contributions
- Rent
- Printing
- Postage
- Mail Operations (DHS Mail Facility Ops)
- Transit Subsidy Benefits
- Federal Protective Service (FPS) Guard Services
- Building Specific Security
- Office of Personnel Management (OPM) Investigations
- Wireless and Wire line Communications
- IT Project Management
- Long Haul (data) Circuits

The Centrally Managed PPA includes \$15.407 million to support enterprise level costs incurred in the administration of the State and Local Programs' appropriation. These costs include working capital fund charges, IT support, GSA rent, etc..

<p>Infrastructure</p>	<p>Infrastructure maintains and grows the 10 FEMA business areas in an appropriate and efficient way to support the Administrators vision and mission, goals and objectives as defined in the Strategic Plan. The combined entries provide input across all IT components in support of all the program offices, the Administrators vision, the Regional components, HQ components and other agencies that subscribe to our services. These efforts include but are not limited to virtualization, mobility, response, asset management, system stability, and disaster response.</p> <p>This investment fills a capability gap by supporting all FEMA automated systems including internet, desktop, voice, wireless, satellite, identity verification, site services, network, helpdesk, and the FEMA Virtual Data Centers (VDCs). FEMA has adopted the DHS Email as a Service (EaaS) and has initiated activities for migration into an Enterprise Data Center to further support its cloud computing initiatives. Finally, FEMA will incrementally pilot Workplace as a Service (WPaaS) to meet long-term mobility needs.</p>	
<p>FY 2012 Activity Funding (\$millions) \$22.968</p>	<p>FY 2013 Activity Funding (\$millions) \$36.754</p>	<p>FY 2014 Activity Request (\$millions) \$39.450</p>

Description of Item

The Mount Weather Emergency Operations Center (MWEOC) provides the infrastructure necessary to support Continuity of Operations Plan (COOP), Incident Management, classified programs, and other all-hazards activities for multiple Federal Executive Branch agencies. MWEOC also supports a variety of disaster response and continuity missions. It is a hub for our Nation's emergency response activities.

Justification

MWEOC is in the middle of a significant infrastructure upgrade to renovate or replace antiquated buildings, truly transforming the complex into a modern facility capable of supporting the necessary technology and associated bandwidth required by today's Federal tenants. This FY 2014 initiative will specifically allow for the rebuilding and repairing of critical IT infrastructure and continued capacity enhancements for space associated with Federal COOP efforts. Master plan and additional detail can be provided in classified annex.

Impact on Performance

Impacts will be provided in classified annex.

Description of Item

The Emergency Management Institute (EMI) will direct \$2.5M in support of “*Now is the Time - The President’s plan to protect our children and our communities by reducing gun violence.*”

Justification

A key component of President Obama’s “Now is the Time” initiative is to make our schools safer with improved emergency plans. The Administration is calling on Congress to help ensure every school has a comprehensive emergency management plan so they are prepared to respond to situations like mass shootings. In addition, the Administration is proposing to help 8,000 schools put in place proven strategies to prevent violence and improve school climate by reducing bullying, drug abuse, violence, and other problem behaviors.

FY 2014 funding will be used to implement the following activities:

- Conduct approximately 75 course offerings and/or table-top exercises bringing together over 3,000 community leaders, planners, and staff from schools, institutions of higher education, and places of worship in an effort to make their communities and institutions more secure and resilient.
- Develop and deliver three offerings of the Integrated Emergency Management Course (IEMC), building from previous Joint Counter Terrorism Awareness Workshop (JCTAWS) deliveries, to over 750 participants representing state.

The growing frequency of mass casualty events in schools, institutions of higher education and places of worship requires that all levels of government and the whole community be prepared to effectively address such incidents. The training will assist schools, houses of worship and institutions of higher

education in developing and exercising effective and reliable emergency plans. The following is a breakout of the programmatic costs:

Multi-Hazard Planning Courses:

Training implementation -	\$1M
Exercise simulation equipment -	\$ 150K
Curriculum development -	\$ 600K
Development of toolkits, videos, resource library and reference materials -	\$ 500K

Integrated Emergency Management Courses:

Development of course materials	\$ 70K
Delivery/Training implementation	\$ 180K

Total: \$2.5M

Multi-Hazard Planning Courses:

- Conduct 7 offerings of **E361 Multi-Hazards Emergency Planning for Schools at EMI**.
 - Cost includes instructors, student stipends, and materials.
 - Will train 300 students in FY 2014.

Course Description: This course is tailored to the unique planning and exercise needs of school systems. The course provides school district teams with the knowledge, skills, and tools needed to review, enhance, and sustain an all-hazards district/school emergency operations plan (EOP) to increase their resiliency to all hazards.

Target Audience: School district, county, and State teams, including the following positions: First Responders (School Resource Officers or law enforcement, fire and emergency management or public health) and School District/School Officials (Superintendent or Assistant Superintendent, Public Information Officer, elected official or school board member, school security official or school safety coordinator or school safety team member, Principal or Assistant Principal, facility manager or building engineer, transportation coordinator, food service coordinator and school nurse/counselor/psychologist).

Impact: At the conclusion of this course, school district teams will be able to refine their district and school EOP, conduct an EOP exercise, develop an action plan for sustaining their EOP, and build partnerships and develop positive working relationships among disaster response and recovery organizations.

- Conduct 15 field offerings of **E362 Multi-Hazards Emergency Planning for School Train-the-Trainer (TTT)**.
 - Cost includes contract instructors, EMI staff travel, materials and shipping.Note: Stipends are not paid for TTTs delivered in the field.
 - Will train 450 students (30 students per course) in FY 2014.

Course Description: The course is designed to acquaint and prepare participants to serve as instructors and deliver the EMI field course, Multi-Hazard Emergency Planning for Schools G364. The purpose of the Train the Trainer is to develop a cadre of instructors capable of teaching the field course within their States or local region.

Target Audience: School Administrators and their staff, State and local emergency managers, and first responders.

Impact: At the conclusion of this training, individuals will have the capacity to train hundreds of other school officials providing the knowledge, skills, and tools needed to refine or develop an all-hazards school Emergency Operations Plan (EOP) and how to train and exercise on the school EOP.

- Conduct 20 field offerings **L364 Multi-Hazard Emergency Planning Course for K-12 Schools.** For those school officials who have not been reached by the Train-the-Trainer Cadre, EMI will conduct an off-site resident version of the field course, G364.
 - Cost includes contract instructors, EMI staff travel, materials and shipping.Note: Stipends are not paid for courses delivered off-site.
 - Will train 800 students (40 students per course) in FY 2014.

Course Description: A 2-day course providing schools with the knowledge, skills, and tools needed to refine or develop an all-hazards school Emergency Operations Plan (EOP) and to identify how to train and exercise the school EOP. In an optional exercise day, the course provides participants with an opportunity to conduct and design a tabletop exercise using the Homeland Security Exercise and Evaluation Program (HSEEP) guidelines.

Target Audience: Principals, assistant principals, risk managers, school board members, school safety coordinators, transportation and food service coordinators, facility managers/building engineers, nurses, counselors, public information officers, teachers and local first responders.

Impact: Through this training, K-12 school teams will receive the knowledge, skills, and tools needed to refine or develop an all-hazards school Emergency Operations Plan (EOP) and how to train and exercise on the school EOP.

- Conduct 33 offerings of **L363 Multi-Hazard Emergency Planning for Institutions of Higher Education.**
 - Cost includes contract instructors, EMI staff travel, materials and shipping. Note: student stipends are not paid for off-site deliveries.
 - Will train approximately 1,450 individuals at 50 per class.

Course Description: An exercise-based 3-day course designed to provide institutions of higher education with knowledge and planning strategies to better protect lives, property, and operations more effectively and efficiently within the context of comprehensive emergency management.

Target Audience: The primary audience for this 3-day training includes personnel from institutions of higher education who have responsibilities planning, preparing emergency plans and exercising EOPs. This includes personnel with the direct responsibility for emergency management as well as other campus personnel who may serve as members of the planning team. Secondary audiences include stakeholders from the surrounding community, administrators, and faculty.

Impact: This enhanced training program will help support institutions of higher education with understanding their campus emergency plan and how it fits into the broader community's preparedness planning as well as established relationships within the community.

Integrated Emergency Management Courses:

- FEMA delivers ~40 Integrated Emergency Management Courses (IEMCs) per year to validate participating communities' plans and procedures to deal with specific threats and hazards. FEMA proposes tailoring JCTAWS delivery to the IEMC format, and conducting ~3 field offerings.
 - Cost includes tailoring of materials based on existing JCTAWS materials, cost of facilitators, staff travel, printing, and shipping of materials.
 - Will train approximately 750 students in FY 2014.

Course Description: A JCTAWS IEMC is a 4-day exercise-based course designed to acquaint and prepare participants to understand and discuss the actions required to prevent and respond to an armed assault, multi-site event.

Target Audience: Representatives from all levels of law enforcement, emergency management, and the private sector, specifically major employers within the community, including health care, education, finance, and big venue facilities.

Impact: At the conclusion of this course, participants are better prepared to prevent and respond to these incidents and have established relationships across the whole community to ensure a coordinated and effective response.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Federal Emergency Management Agency, [\$789,172,000] **\$1,042,382,000**¹ including activities authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Cerro Grande Fire Assistance Act of 2000 (division C, title I, 114 Stat. 583), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), the Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.), sections 107 and 303 of the National Security Act of 1947 (50 U.S.C. 404, 405), Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), the National Dam Safety Program Act (33 U.S.C. 467 et. seq.), the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.), and the Post-Katrina Emergency Management Reform Act of 2006 (Public Law 109-295; 120 Stat. 1394): Provided, That not to exceed \$2,500 shall be for official reception and representation expenses: Provided further, That of the total amount made available under this heading, \$27,513,000 shall be for the Urban Search and Rescue Response System, of which no funds may be made available for administrative costs: Provided further, That, of the total amount made available under this heading, [\$22,000,000] **\$32,000,000**² shall remain available until September 30, [2014] 2015, for capital improvements and other expenses related to continuity of operations at the Mount Weather Emergency Operations Center.

Explanation of Changes:

Language Provision	Explanation

Centrally Managed Accounts Mission Statement

Centrally managed accounts are critical bills that must be managed at the enterprise level to ensure efficient and effective cost management which includes streamlining cost factors and prompt payment. The authority and responsibility for the individual accounts are assigned by the FEMA Office of the Chief Financial Officer (OCFO) to the individual functional components.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	-------------------------	-----------------------	-----------------	---------------------------

11.1 Total FTE & personnel compensation	1,927	-	-	(1,927)
11.3 Other than full-time permanent	6	-	-	(6)
11.5 Other personnel compensation	361	-	-	(361)
12.1 Benefits	2,530	3,038	4,787	2,257
Total, Salaries & Benefits	4,824	3,038	4,787	(37)

The FY 2014 Request for Salaries and Benefits includes a net decrease of \$37 thousand compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	11	-	-	(11)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	30,243	24,594	25,312	(4,931)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The increase is due to the realignment of State and Local Programs management and administration funding with the Salaries and Expenses Appropriation. The FY 2014 request is a decrease of \$4.931 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	6,310	-	-	(6,310)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2014 request is a decrease of \$6.310 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	22,858	16,081	30,104	7,246

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request is an increase of \$7.246 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	412	200	220	(192)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 request is a decrease of \$192 thousand compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	777	-	-	(777)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State, local and Tribal governments, etc.) as well as from other units within the Federal Government. The FY 2014 request is a decrease of \$777 thousand compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	18,049	32,319	10,437	(7,612)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request is a decrease of \$7.612 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	17,516	14,958	22,539	5,023

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request is an increase of \$5.023 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	89	-	1,735	1,646

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2014 request is an increase of \$1.646 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	19	-	5,934	5,915

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request is an increase of \$5.915 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	65	-	-	(65)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request is a decrease of \$65 thousand compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	3,279	10,000	-	(3,279)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request is a decrease of \$3.279 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	2,821	75,514	9,238	6,417

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	----------------------------	--------------------------	--------------------	------------------------------

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2014 request is an increase of \$6.417 million compared to FY 2012.

Preparedness and Protection Mission Statement

The Preparedness mission seeks to reduce the loss of life and property, and protect the Nation by; planning, training, exercising, and building the emergency management profession. As manager and coordinator of the preparedness cycle, FEMA provides assistance, support, and leadership to help Federal, State, Tribal and local governments and the private sector build the operational capabilities needed to successfully implement preparedness strategies. The Protection mission seeks to protect our Nation's constitutional form of government and ensures that a system is in place to warn our citizens of impending hazards. FEMA is responsible for supporting the enhancement of protection capabilities for all hazards, which in turn helps to integrate the tools and mechanisms for capability building across mission areas; streamlines the delivery of assistance to State, Tribal and local governments, as well as nongovernmental entities; and leverages existing inter-governmental coordination infrastructures. FEMA's primary continuity business lines and associated continuity activities include: Continuity Planning, Continuity Training and Exercises, and Continuity Operations.

Summary Justification and Explanation of Changes

Administrative and Regional Offices Mission Statement

Administrative and Regional Operations incorporates the essential command and control functions of the Agency. Administrative coordinates all policy, strategic planning, resources, managerial and administrative actions to include the Federal Coordinating Officers, the National Capital Region Coordination (NCRC) and the Evaluations and Assessment Program. Regional Operations includes the leadership, management, and mission support functions of the 10 FEMA Regions. The Regions execute the operational direction received from headquarters to ensure that FEMA can execute its primary mission: preparedness, protection, response, recovery and mitigation.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Response Mission Statement

The Response mission seeks to conduct emergency operations to save lives and property through positioning emergency equipment, personnel, and supplies; evacuating survivors; providing food, water, shelter, and medical care to those in need; and restoring critical public services. FEMA conducts response operations in partnership with State, Tribal and local governments; interagency Federal partners; nongovernmental organizations; and the private sector.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	65,709	73,235	73,056	7,347

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	65,709	73,235	73,056	7,347
11.3 Other than full-time permanent	313	-	-	(313)
11.5 Other personnel compensation	3,092	733	731	(2,361)
12.1 Benefits	18,737	20,872	20,821	2,084
Total, Salaries & Benefits	87,851	94,840	94,608	6,757

The FY 2014 Request for Salaries and Benefits includes costs for 794 FTE, including an efficiency reduction of 46 FTE and \$6.967 million. The FY 2014 request of \$94.608 million is an increase of \$6.757 million compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	5,634	4,890	3,668	(1,966)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a \$1.966 million reduction in travel requirements as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	70	70	46	(24)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request includes a reduction of \$24 thousand as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	431	-	-	(431)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The increase is due to the realignment of State and Local Programs management and administration funding with the Salaries and Expenses Appropriation. The FY 2014 request is a decrease of \$431 thousand compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	3	-	-	(3)

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	1,020	1,020	1,025	5

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

Mitigation Mission Statement

The Mitigation mission seeks to reduce or eliminate long-term risks to people and property from hazards and their effects. Mitigation benefits society by creating safer communities, enabling people to recover more rapidly from floods and other disasters, and reduce the financial impact on Federal, State, Tribal and local governments and communities. FEMA's mitigation mission is accomplished through the following basic mitigation business lines: Risk Analysis, Risk Reduction and Risk Insurance.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency State and Local Programs

I. Appropriation Overview

A. Mission Statement:

Through the appropriation for State and Local Programs (SLP), FEMA fulfills its role as the principal component of the Department of Homeland Security (DHS) responsible for preparing State and local governments to prevent, protect against, respond to, and recover from incidents of terrorism and other catastrophic events. The appropriation provides for grants, training, exercises, and other support to assist Federal agencies, States, territories, and tribal and local jurisdictions to prepare for terrorism and natural disasters.

B. Budget Activities:

The National Preparedness Grant Program consolidates current State and local preparedness grant programs, improves coordination among grantees, eliminates duplicative efforts and supports the sustainment and development of the core capabilities described in the National Preparedness Goal. The First Responder Assistance Program includes the Firefighter Assistance Grants (AFG); which awards grants directly to fire departments and unaffiliated EMS organizations throughout the United States to support one-year projects that improve the effectiveness and safety of the Nations first responders in homeland security, firefighting, and emergency medical services (EMS) operations. The AFG request also includes funding for the Staffing for Adequate Fire and Emergency Response (SAFER) Grants; which provide support to fire departments and unaffiliated EMS to improve the readiness and capability of local first responders during all-hazards emergencies, including firefighting and EMS operations. Also included in the First Responder Assistance Program is the Emergency Management Performance Grant which provides assistance to State and local governments in order to sustain and enhance the effectiveness of their emergency management program.

C. Budget Request Summary:

The Federal Emergency Management Agency requests \$2,123 million for the FY 2014 request, a decrease of \$162 million from the FY 2012 Revised Enacted. The total adjustment-to-base is an increase of \$58 million. The total program changes of \$220 million includes:

- Decrease funding for the management and administration of the grants (\$259,010 thousand)
- Increase of Firefighter Assistance Grants (\$28,750 thousand)

FEMA requests \$1.1 billion for the National Preparedness Grant Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

Federal investments in state, local and tribal preparedness capabilities have contributed to the development of a significant national-level capacity to prevent, protect against, respond to, and recover from disasters of all kinds. As we look ahead, to address evolving threats and make the most of limited resources, the National Preparedness Grant Program (NPGP) will focus on building and sustaining core capabilities associated with the five mission areas within the National Preparedness Goal (NPG) that are readily deployable and cross-jurisdictional, helping to elevate nationwide preparedness.

The Administration’s FY 2014 Budget re-proposes the NPGP, originally presented in the FY 2013 President’s Budget, to create a robust national preparedness capability, with some adjustments made to respond to broad stakeholder feedback solicited and received during 2012. In particular, the FY 2014 NPGP provides grantees and other stakeholders greater certainty regarding the sources and uses of available funding while maintaining the core priorities of the Administration’s FY 2013 grants vision.

Similar to the FY 2013 NPGP, the FY 2014 proposal consolidates current state and local preparedness grant programs into one overarching program (excluding Emergency Management Performance Grants and fire grants) to enable grantees to build and sustain core capabilities outlined in the NPG

collaboratively. As a single, comprehensive grant program, the NPGP eliminates the redundancies and requirements placed on both the Federal Government and the grantees resulting from the current system of multiple individual, and often disconnected, grant programs.

The FY 2014 NPGP prioritizes the development and sustainment of core capabilities as outlined in the NPG. Particular emphasis will be placed on building and sustaining capabilities that address high consequence events that pose the greatest risk to the security and resilience of the United States and can be utilized to address multiple threats and hazards. The NPGP continues to utilize a comprehensive process for assessing regional and national capability requirements through the Threat and Hazard Identification and Risk Assessment (THIRA) and capability estimation processes, in order to prioritize capability needs and invest in critical national capabilities.

The NPGP draws upon and strengthens existing grants processes, procedures and structures, emphasizing the need for greater collaboration and unity among Federal, state, local and tribal partners. This is particularly important as stakeholders work together to make smarter investment decisions, develop shared or deployable capabilities, and share resources through Emergency Management Assistance Compacts (EMAC) or other mutual aid/assistance agreements. In many ways, the NPGP structure mirrors the collaboration and decision making process that occurs during disasters, when various stakeholders and jurisdictions come together to plan, build, and execute capabilities together.

NPGP grantees will be required to align their proposed investments to core capabilities, incorporate effectiveness measures, and regularly report progress on the acquisition and development of identified capabilities. These measures will enable all levels of government to collectively demonstrate how the proposed investment will build and sustain core capabilities necessary to strengthen the Nation's preparedness.

Consolidation of Grants

Consolidation of current grant programs into a comprehensive NPGP provides state, local and tribal officials the opportunity to prioritize investments to address a variety of threats and risks in their communities, while also contributing to national preparedness capabilities. The consolidation will support the recommendations of the Redundancy Elimination and Enhanced Performance for Preparedness (REEPP) Grants Act, further the Administration's initiatives to reduce the administrative burden on State and local governments, and streamline the grant application process.

Grant Priorities

The primary purpose of FY 2014 NPGP is to build and sustain core capabilities associated with the five mission areas described in the NPG. In addition, NPGP focus areas include (1) enhancing terrorism prevention and protection, and (2) strengthening critical infrastructure security and resilience, including port and transit facilities. Funding allocations, as described in the following section, will be based on risk, population and capability requirements as determined by the regional and state THIRAs and capability estimations.

Core Capabilities: The highest priority of the NPGP is to develop and sustain the core capabilities identified in the NPG. Particular emphasis will be placed on capabilities that address high consequence events that pose the greatest risk to the security and resilience of the United States and

along its borders and can be utilized to address multiple threats and hazards. Funding will support deployable assets that can be utilized anywhere in the country via EMACs or other mutual aid/assistance agreements. In addition, funding may be used by states for the sustainment of core capabilities that may or may not be deployable, such as interoperable communications systems, mitigation-related capabilities, and fusion centers. A portion of the funding will also be placed in a competitive pool for the development of new capabilities for which a need is identified in the regional THIRA and a corresponding capability estimation and implementation strategy are provided.

Enhancing Terrorism Prevention Capabilities: NPGP will seek to prioritize programs and initiatives that directly support local efforts to understand, recognize, and prevent pre-operational activity and other crimes that are precursors or indicators of terrorist activity, in accordance with applicable privacy, civil rights, and civil liberties protections. Such priorities include: maturation and enhancement of state and major urban area fusion centers; implementation of the Nationwide Suspicious Activity Reporting (SAR) Initiative; and continued implementation of the “If You See Something, Say Something™” campaign to raise public awareness of indicators of terrorism and violent crime.

Critical Infrastructure Security and Resilience: Strengthening the security and resilience of critical infrastructure and long-term vulnerability reduction will also be supported by the NPGP, to potentially include physical security enhancements to Level 1 and 2 Critical Infrastructure/Key Resource sites in the National Critical Infrastructure Prioritization Program, transit facilities on the Top Transit Asset List, port facilities identified in Port Wide Risk Management Plans, and at risk non-profit organizations.

Allocation of Grant Funding

All NPGP awards will continue to be risk-informed. FEMA will base funding allocation decisions on risk, population and capability requirements as informed by the THIRA process and will emphasize the sustainment or building of the core capabilities identified in the National Preparedness Goal. A competitive allocation will be introduced to focus on areas of need identified in the National Preparedness Report as well as on comprehensive threat/risk assessments and gap analyses. Priorities for the competitive allocation are expected to vary by region according to the risks and hazards therein (i.e., hurricane risk for Gulf and East Coast states, flooding in the Midwest, and earthquakes and wildfires on the West Coast). State Administrative Agencies (SAAs) will each submit one coordinated statewide application, which includes investment justifications for sustainment/maintenance, as well as competitive funding, including funding for urban areas, port areas, transit agencies and non-profits, as appropriate. The sub-grantee proposals must reflect activities that are tied to the results of the state, urban area (UA) or local THIRAs, and must support a concept of building and/or sustaining national capabilities. Likewise, urban areas, port and transit authorities will be required to participate in state-generated THIRAs in FY 2014.

Competitive funding for SAA and UAs will be used to build capabilities to address the threats and hazards identified through FEMA regional THIRAs. Regional capability gaps will be published in the annual grant guidance by region, and proposals for competitive funding will be evaluated by national and regional review panels on the ability for a jurisdiction to build, maintain and sustain the capability as a nationally deployable resource that will benefit multiple jurisdictions and increase the core

capabilities for the region. The review process will be in two parts – regional review panel score and national review panel score.

Tribal nations will continue to apply directly to FEMA under a competitive process. FEMA will ensure a portion of the overall funding is dedicated to tribal nations.

Grants Governance

The FY 2014 NPGP builds upon existing state and local administrative/governing structures, strengthening coordination among grantees to ensure that preparedness grant dollars are utilized in a manner that promotes collaboration and coordination in the maintenance and sustainment of existing capabilities and the development of new capabilities as prioritized in the UA, state, and regional THIRAs and capability estimations. This collaborative process is designed to break down stovepipes between various stakeholders and give all grantees enhanced awareness of initiatives in the state and region as well as the overall strategic direction and priorities. Additional requirements and methods of increasing collaboration include:

- SAAs must be a member of the Urban Area Working Group (UAWG) and concur with the final budget proposal by the UAs in their state/territory.
- The SAA and the senior member of the Urban Area Working Group must also be members of the Regional Transit Security Working Group(s) and the Area Maritime Security Committee(s).
- Tribes must provide the regional review panels and SAAs with copies of their THIRA to ensure visibility and coordination.
- Port and transit authorities will be required to share their regional strategies (Port Wide Risk Management Plan or Regional Transit Security Strategy) with the SAA and the SAA will participate in the budget formulation process at the port and transit area level where applicable.
- SAAs and UAs will be required to coordinate with port and transit areas to ensure that statewide THIRAs consider the full scope of statewide risk and hazards, to include risks identified in the port and transit risk strategies.
- SAA and Urban Areas will need to integrate nonprofit preparedness activities with broader State and local preparedness efforts.

Peer Review

All FEMA-funded grant projects will be validated via peer review to ensure that projects support the development and sustainment of regional and national core capabilities. The peer review process will incorporate elements of the DHS/Infrastructure Protection (IP) State, Local, Tribal, and Territorial Government Coordinating Council structure and engage representatives from stakeholder agencies from the jurisdiction receiving grant funds, peers from comparable jurisdictions, Federal preparedness coordinators and analysts from multiple state and regional grant program offices, DHS Component representatives, and representatives from national associations. Grantees will be expected to justify how projects align to their THIRA. Further, grantees will articulate how these projects will, over the lifecycle of funding, sustain current capabilities and address gaps in capabilities. Proposals for the development of new assets will be evaluated to ensure that all new capabilities can be leveraged through EMAC to benefit the region as a whole in addition to the state or local jurisdiction. This approach will streamline existing application review processes into one coordinated approach, while at the same time, increasing accountability over the use of Federal grant funds. Additionally, direct

involvement by regional FEMA representatives during the review process will assist in targeting funds for regionally critical projects, and will reduce the redundancy of like assets throughout the region.

Multiyear Program Guidance

While the period of performance will remain two years, consistent with the NPGP “Vision” document for FY 2013, FEMA will issue multiyear guidelines. Multiyear grants programs will enable FEMA to focus its efforts on measuring progress towards building and sustaining the core capabilities identified in the NPG.

Monitoring and Feedback

Consistent with the recommendations made in the 2011 REEPP report, FEMA will use project-based monitoring as the principal means of measuring project progress. Project-based monitoring is a method of following projects from creation to completion, providing basic data to measure impact over time, improving accountability, and enabling FEMA to identify progress made in preparedness and determine current and future gaps. The FY 2014 NPGP will encourage the use of complete lifecycle planning of inventories and resources. This will allow grantees to plan and budget for equipment upgrades, develop and maintain skills through training and exercises, and update plans and procedures to enable delivery of core capabilities across the prevention, protection, mitigation, response, and recovery mission areas.

DHS will continue to solicit stakeholder feedback to ensure NPGP enables all levels of government to build and sustain, in a collaborative way, the core capabilities necessary to prepare for incidents that pose the greatest risk to the security of the Nation.

Stakeholder Feedback/Recommendations

In support of the Administration’s FY 2013 proposal, FEMA conducted over 70 briefings, meetings and conference presentations with diverse stakeholder groups across the country throughout FY 2012. The following major themes emerged and have been addressed in the Administration’s FY 2014 proposal:

1. Desire to retain funding for law enforcement prevention, fusion centers and Operation Stonegarden.

FY 2014 Proposal: Maintenance and sustainment of core law enforcement prevention capabilities – including fusion centers, countering violent extremism and state and local information sharing – remain key Administration priorities. In addition, eligible law enforcement activities previously funded under other grants such as Operation Stonegarden, and port/transit operations will continue to be funded based on priorities outlined in state and urban area THIRAs.

2. Desire by cities to retain the mandatory pass through of 80% of grant funding to local units of government coupled with concern voiced by states about the need for a higher percentage of the overall funding and allowable M&A to manage the proposed NPGP.

FY 2014 Proposal: Currently, port authorities, transit agencies, private sector and non-profit organizations may be classified as private organizations or State organizations which make them

ineligible as a “local” designee, even though their activities are in support of local capabilities. The Administration recommends pursuing a change to the definition of a “local unit of government” in the 9/11 Act to include all port areas, transit agencies, and non-profit organizations.

3. Concern about the two year period of performance and desire to change the time allotted to complete projects to three or four years.

FY 2014 Proposal: Given the FY 2012 drawdown initiatives and shortened period of performance in FY 2012 and proposed in FY 2013, the Administration will maintain the two-year performance period.¹

4. Concern for how the Threat and Hazard Identification and Risk Assessments (THIRA) would be used, who would be required to complete them, engagement and transparency of the THIRA process and the relationship of the THIRA to funding allocation decisions.

FY 2014 Proposal: Mandatory engagement of urban areas, port and transit authorities in SAA generated THIRAs and investment justifications will be required in FY 2014. In FY 2012, states were highly encouraged to collaborate with all levels of government when completing their THIRA. FEMA will require this collaboration in FY 2013 through grant guidance.

5. Concern for how existing governance structures such as State Senior Advisory Committees, Urban Area Working Groups, Regional Transit Security Working Groups and Area Maritime Security Committees continue to be used within the NPGP construct.

FY 2014 Proposal: Grantees will leverage existing governance structures, and enhance them where appropriate. NPGP will continue to require a State Advisory Council to oversee all grant-funded homeland security projects and programs to maximize coordination and ensure there is no unnecessary duplication of effort and resources. [See Governance Structures section above]

6. Concern that regulated port entities and transit systems would be required to apply through the SAA.

FY 2014 Proposal: Since a primary objective of the NPGP is to ensure SAAs have complete visibility on all grant funded projects within a state, the SAA will continue to be the only eligible applicant for NPGP funding in FY 2014. However, the FY 2014 NPGP will allow for transit agencies and ports areas to include their own individual applications along with the SAA application, consistent with urban area requests.

¹ Grantees may request extensions to the period of performance due to compelling legal, policy, or operational challenges. For example, extensions may be granted where adjusting the timeline for spending will constitute a verifiable legal breach of contract by the grantee with vendors or sub-recipients, where a specific statute or regulation mandates an environmental review that cannot be completed within this timeframe or where other exceptional circumstances warrant a discrete waiver.

7. Concern for how mitigation activities will be funded.

FY 2014 Proposal: The FEMA preparedness grant programs have always supported mitigation planning activities, and NPGP will continue to do so.

Proposed Changes from FY 2013 to FY 2014

- The FY 2014 NPGP provides grantees and other stakeholders greater certainty regarding the sources and uses of available funding.
- Grantees will submit one coordinated statewide application to include urban areas, ports and transit systems. Mandatory engagement and concurrence from urban areas, port and transit authorities in state-generated THIRAs and investment justifications will be required. The FY 2014 NPGP will allow for transit agencies, ports and urban areas to include their own individual applications along with the state application.
- Sustainment funding for states and urban areas will not only include threat, vulnerability, and consequence factors, but also the presence of fusion centers, border security threats, and other known Federal priorities to include all-hazards.
- States and urban areas must consider risks to ports and transit in their jurisdictions as part of their overall risk assessments.
- Competitive funding for states and urban areas will be based on regional capability gaps as identified in the FEMA regional THIRAs. Regional capability gaps will be published in the funding opportunity announcement (FOA) by FEMA region, and competitive applications will only be accepted for those regional priorities.
- Pass-through requirement: The 80 percent pass-through requirement will remain in effect. However, the Administration will pursue a change to the 9/11 Act definition of a “local unit of government” so that any port, transit, non-profit or private sector entity that is building capability in a local jurisdiction will be considered as part of the 80 percent pass-through to local units of government.

FY 2014 NPGP Funding Opportunity Announcement

SAAAs will each submit one application, which includes funding for sustainment and maintenance, as well as competitive funding. Investment justifications from urban areas, port areas, transit agencies, nonprofits, and other local jurisdictions will be provided to the SAA for inclusion in the final application. The SAA, in conjunction with the State Advisory Council, will develop a process for reviewing and evaluating investments from across the State to determine the most effective proposals. The sub-grantee proposals must reflect activities that are tied to the results of the state, UA or local THIRAs and capability estimations, and must support a concept of building and/or sustaining national capability.

NPGP will highlight the following in the FOA:

- Alignment to PPD-8 and the NPG, National Preparedness System, core capabilities and mission areas including corresponding frameworks.
- Focus on the development and sustainment of core capabilities.
- Grantees must implement programs based on the FEMA regional and state THIRAs.
- Focus on regionally and nationally deployable assets sharable through EMAC and other interstate and intrastate mutual aid agreements.

Funding availability

Maintenance and sustainment funding for SAAs, UAs, port authorities and transit agencies

Each SAA and eligible UA will receive an amount of funding to enhance terrorism prevention and protection activities and to build and sustain core capabilities.

- Funding will be decided through a modified version of Section 2007 of the 9/11 Act (6 U.S.C. 608), which would require allocations be determined by consideration of threat, vulnerability, and consequence factors, as well as the presence of fusion centers, border security threats, and other known Federal priorities to include all-hazards.
- Sustainment funding amounts for SAAs, UAs, port authorities and transit agencies will be published in the FOA. These entities will submit an investment justification (IJ) to support the implementation of that funding. The activities in the IJ must align with the state and/or UA THIRA and capability estimation.

Competitive funding for SAAs, UAs, and Tribes

Each SAA and any current or past eligible UA that has maintained its Urban Area Working Group (UAWG) can submit a competitive application (through the SAA) for additional funding to address regional priorities. The SAA will submit one application to FEMA that will cover competitive requests for the entire state and any eligible UAs. The UAWG must include port and transit membership since competitive funding for port and transit projects will be included in this proposal. Competitive funding for SAAs and UAs will be based on regional capability gaps as identified in the FEMA regional THIRAs.

Regional capability gaps will be published in the FOA (by region), and competitive applications will only be accepted for those regional priorities. The review process will be in two parts – regional review panel score and national review panel score. The scores will be based on the following:

- Does the application address one of the core capabilities identified in the National Preparedness Goal?
- Does the proposed project meet one of the National Incident Management System (NIMS) resource types?
- Does the applicant belong to or is it located in member states of EMAC (exception for tribal governments, American Samoa, and the Commonwealth of the Northern Mariana Islands)?
- Can the capability be utilized anywhere in the Nation upon request?

- Does the capability address a risk or hazard identified in either the FEMA regional or state THIRA?
- Is the capability redundant of a capability that already exists within a reasonable response time?
- Can the project be completed within 24 months?
- Has the grantee been able to expend funding in a timely fashion for past projects?

Tribal nations will continue to apply directly to FEMA under a competitive process. FEMA will ensure a portion of the overall funding is dedicated to the tribal nations. Funding will only be provided to tribal nations that are contributing to overall national preparedness through the establishment of memoranda of understanding or the protection of national critical infrastructure and that have completed their own THIRA.

PPA: First Responder Assistance Programs

	Perm. Pos	FTE	Amount
2012 Revised Enacted	97	87	1,025,000
2014 Adjustments-to-Base	-	10	60,000
2014 Current Services	97	97	1,085,000
2014 Program Change	(97)	(97)	(5,000)
2014 Total Request	-	-	1,080,000
Total Change 2012 to 2014	(97)	(97)	55,000

FEMA requests \$1.08 million for First Responder Assistance Programs in FY 2014. Funding for these programs has historically been appropriated independently from SLP, or as a program in the Education, Training, and Education PPA within SLP, with a percentage limitation on management and administration of the grants. FEMA is requesting that funding for the Firefighter Assistance Grants, Emergency Management Performance Grants and Training Partnership Grants be combined under this PPA and funding to support the management and administration of these grants be appropriated, as requested, within FEMA’s Salaries & Expenses appropriation.

CURRENT SERVICES PROGRAM DESCRIPTION:

Firefighter Assistance Grants

Assistance to Firefighter Grants (AFG)

The AFG program, in cooperation with the US Fire Administration, awards grants directly to fire departments and unaffiliated EMS organizations throughout the United States to support one-year projects that improve the effectiveness and safety of the Nation’s first responders in homeland security, firefighting, and emergency medical services (EMS) operations.

The entire AFG process is fully automated in an electronic grants system. Applicants apply online; grants are awarded electronically; grantees manage their grants (payment requests, amendments, etc.) online; and grants are monitored and closed out electronically. For FY 2014, eligible applicants will again be invited to submit an application for assistance in the following program areas most critical to enhancing the capabilities of the fire and EMS services:

- Operations and Safety programs, which include training, equipment, and personal protective equipment
- Firefighting Vehicle Acquisition program, which includes pumpers, brush trucks, tankers/ tenders, rescue vehicles, ambulances, turntable ladder trucks with quintuple capabilities (quints), aerials, foam units, and fireboats
- Wellness/fitness activities
- Increasing the number of trained, "front-line" firefighters
- Modifications to facilities
- Fire Prevention and Safety (FP&S) activities, which include awareness and education, arson prevention, code enforcement, burn prevention, and firefighter safety research and development

Funding priorities for each of the funding activities are determined by DHS/FEMA and are based on the National Preparedness Goal and on recommendations from the Nation's fire service (represented by nine major fire service organizations). The applications that most closely relate to those announced priorities are reviewed by peer panels. Peer review panels typically commence within two weeks of the end of the grant application period and take three weeks to complete. Grant awards are based primarily on the results of the peer review panels.

Under its authorizing legislation, AFG must also expend a minimum of five percent of awarded funds for fire prevention activities. The Fire Prevention and Safety (FP&S) Grants support projects that enhance the safety of the public and firefighters from fire and related hazards. The primary goal is to target high-risk populations and reduce injury and prevent death.

Staffing for Adequate Fire and Emergency Response (SAFER) Grants

SAFER grants provide support to fire departments and unaffiliated EMS to improve the readiness and capability of local first responders during all-hazards emergencies, including firefighting and EMS operations. FEMA strongly encourages applicants, to the extent practicable, to seek, recruit, and hire post-9/11 veterans to increase their ranks within their department in order to take advantage of the provisions of the VOW To Hire Heroes Act of 2011.

Emergency Management Performance Grants (EMPG) Program

EMPG is a formula-based grant program that provides assistance to State and local governments in order to sustain and enhance the effectiveness of their emergency management program. Funds are provided to all 50 States and six territories as well as to the Federated States of Micronesia and the Republic of the Marshall Islands. FEMA provides States the flexibility to allocate funds according to risk and to address the most urgent State and local needs in disaster mitigation, preparedness, response, and recovery. Working within the standard Federal Government grant administration process, EMPG works within the Federal government grant administration process to provide the support that State and local governments need to achieve measurable results in key functional areas of emergency management: laws and authorities; hazard identification and risk assessment; hazard management; resource management; planning; direction, control, and coordination; communications and warning; operations and procedures; logistics and facilities; training; exercises; public education and information; and finance and administration.

Training Partnership Grants

Funds for the Training Partnership Grants, formerly funded separately as the Continuing Training Grants (CTG) and National Domestic Preparedness Consortium (NDPC), will be awarded on a competitive basis to entities (e.g., State, local, tribal, and territorial governments; universities and higher education institutions; and nonprofits) that have demonstrable expertise and can develop/deliver training and education curricula that tie to the core capabilities in the National Preparedness Goal. The program will aim to incentivize innovation in homeland security training techniques through its competitive approach to awarding funds.

Awards to first-time grant recipients that are facility-based training and education centers will be for the development of curricula and to assist with other programmatic upstart costs as they establish a reimbursable training program or course. The grant funding for these recipients will be phased out over several years, as the grantee builds a customer base that will be expected to reimburse the grantee for the training they receive. Established grant recipients (including former recipients under the NDPC and CTG) will compete each year for funding based on the merit of their respective proposals. All grant recipients will be required to sustain the programs and courses developed utilizing funding they collect from attendees.

FEMA will employ a competitive process to build on the solid foundation that exists by developing new training venues and vehicles to educate the State and local first responder community.

IV. Program Justification Changes

**Department of Homeland Security
Federal Emergency Management Agency
State and Local Programs
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Firefighter Assistance Grants
PPA: First Responder Assistance Programs
Program Increase: Positions 0, FTE 0, Dollars \$28,750

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	641,250
Program Increase							-	-	28,750
Total Request	81	72	675,000¹	81	81	679,131	-	-	670,000

Note: The FY 2014 Current Services level does not include funding for the management and administration of the grants.

¹ The net amount available for grant awards in FY 2012 was \$641.3M. The remaining amount of \$33.8M was allocated for grants management, administration, and oversight.

Description of Item

The Firefighter Assistance Grants program provides funding directly to fire departments and nonaffiliated EMS organizations throughout the United States to support one-year projects that improve the effectiveness and safety of the Nation's first responders in homeland security, firefighting, and EMS operations. FEMA requests \$670 million be appropriated in the State and Local Programs appropriation in FY 2014 to support this collection of grant programs.

Justification

FEMA requests \$670 million for the Firefighter Assistance Grants program authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.). \$335 million will be used to carry out section 33 of that Act (15 U.S.C. 2229), which is the Assistance to Firefighters Grants, of which \$20 million will support Fire Prevention and Safety. The remaining \$335 million will be used to carry out section 34 of that Act (15 U.S.C. 2229a).

Impact to Performance

The President's Budget will allocate an additional \$28.7 million for SAFER and AFG grants.

**Department of Homeland Security
Federal Emergency Management Agency
State and Local Programs
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: Management & Administration No Longer Appropriated in SALP
 PPA: National Preparedness Grants Program
 First Responder Assistance Programs
 Education, Training and Exercises
 Program Decrease: Positions (888), FTE (861), Dollars \$(259,010)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Base			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							888	861	259,010
Program Decrease							(888)	(861)	(259,010)
Total Request	907	773	295,092	889	862	279,304	-	-	-

Note: The FY 2014 Current Services level includes funding for the management and administration of all grants within the State and Local appropriation, to include National Preparedness Grants Program, Firefighter Assistance Grants, and Emergency Management Performance Grants.

Description of Item

FEMA requests that funding for management and administration of the grants as well as funding for education, training, and exercises in support of the grants be appropriated in FEMA’s Salary & Expenses appropriation. The decrease represents the amount of M&A funding appropriated within SALP in FY 2012.

Justification

In order to provide streamlined accounting and increased oversight in FY 2014, the Salaries and Expenses account includes \$259 million in funding for management and administration of preparedness grants and operating programs that was requested as a transfer from State and Local Programs in previous years.

Impact to Performance

The consolidation of management and administration funding under FEMA’s Salary & Expenses appropriation will result in greater efficiencies, resulting better service to grantees.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For grants, contracts, cooperative agreements, and other activities, [\$2,900,212,000]\$2,123,200,000¹, shall be allocated as follows:

(1) [\$1,540,908,000] \$1,043,200,000², shall be for the National Preparedness Grant Program for the purpose of achieving the National Preparedness Goal: Provided, That grants may be awarded on a competitive basis to achieve the National Preparedness Goal through the protection of critical infrastructure and key resources, the development and sustainment of capabilities, including nationally deployable resources to prevent and protect against terrorism and to respond to, recover from, and mitigate against all hazards: Provided further, That any grant made under the National Preparedness Grant Program, to the extent possible, be based on effectiveness determinations and threat and hazard identification and risk assessments: Provided further, That grants made under the National Preparedness Grant Program may provide a minimum allocation of funding to each state and territory, including the District of Columbia;

(2) \$670,000,000, to remain available until September 30, [2014]2015³, shall be for necessary expenses for programs authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.), of which \$335,000,000 shall be available to carry out section 33 of that Act (15 U.S.C. 2229 et seq.) and of which \$335,000,000 shall be available to carry out section 34 of that Act (15 U.S.C. 2229a): Provided, That, in making such grants, the Secretary may grant waivers from the requirements in subsections (a)(1)(A), (a)(1)(B), (a)(1)(E), (c)(1), (c)(2), and (c)(4)(A) of section 34 of that Act (15 U.S.C. 2229a);

(3) \$350,000,000 shall be available for necessary expenses for emergency management performance grants, as authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 7701 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), and Reorganization Plan No. 3 of 1978 (5 U.S.C. App.);

(4) \$60,000,000 shall be for Training Partnership Grants for the purpose of achieving the National Preparedness Goal: Provided, That any grant be awarded based on the result of full and open competition[; and]

[(5) An amount not to exceed \$279,304,000 shall be transferred to the Federal Emergency Management Agency "Salaries and Expenses" account for management and administration of the grant programs, to include salaries and expenses, training, exercises, and technical assistance]:

Provided, That for grants under paragraph (1) , applications for grants shall be made available to eligible applicants not later than 60 days after the date of enactment of this Act, that eligible applicants shall submit applications not later than 80 days after the grant announcement, and the Administrator of the Federal Emergency Management Agency shall act within 65 days after the receipt of an application[: Provided further, That notwithstanding section 2008(a)(11) of the Homeland Security Act of 2002 (6 U.S.C. 609(a)(11)), or any other provision of law, a grantee may use not more than 5 percent of the amount of a grant made available under this heading for expenses directly related to administration of the grant: Provided further, That grantees shall provide reports on their use of funds, as determined necessary by the Secretary of Homeland Security: Provided further, That in fiscal year 2013: (a) the Center for Domestic Preparedness may provide training to emergency response providers from the Federal Government, foreign governments, or private entities, if the Center for Domestic

Preparedness is reimbursed for the cost of such training, and any reimbursement under this subsection shall be credited to the account from which the expenditure being reimbursed was made and shall be available, without fiscal year limitation, for the purposes for which amounts in the account may be expended; (b) the head of the Center for Domestic Preparedness shall ensure that any training provided under (a) does not interfere with the primary mission of the Center to train state and local emergency response providers; and (c) subject to (b), nothing in (a) prohibits the Center for Domestic Preparedness from providing training to employees of the Federal Emergency Management Agency in existing chemical, biological, radiological, nuclear, explosives, mass casualty, and medical surge courses pursuant to 5 U.S.C. 4103 without reimbursement for the cost of such training]⁴.

First Responder Assistance Programs Mission Statement

Funding for these programs has historically been appropriated independently from SLP, or as a program in the Management and Administration PPA within SLP, with a percentage limitation on management and administration of the grants. FEMA is requesting that funding for these grants be combined under this PPA and funding to support the management and administration of the grants be appropriated, as requested, in the Management and Administration PPA.

National Preparedness Grants Program Mission Statement

Federal investments in State, local and tribal preparedness capabilities have contributed to the development of a significant national-level capacity to prevent, protect against, respond to, and recover from catastrophic events. It is the purpose of the FY 2014 National Preparedness Grant Program (NPGP) to continue supporting the development of a robust cross-jurisdictional and readily deployable suite of State and local assets. The National Preparedness Goal recognizes that a secure and resilient Nation is one with the capabilities required, across the whole community, to prevent, protect against, mitigate, respond to, and recover from the threats and hazards that pose the greatest risk. With this in mind, the FY 2014 NPGP will work to build and sustain core capabilities in the National Preparedness Goal.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency Radiological Emergency Preparedness

I. Appropriation Overview

A. Mission Statement for Radiological Emergency Preparedness:

The Radiological Emergency Preparedness Program (REPP) ensures that the public health and safety of citizens living near commercial nuclear power plants will be adequately protected in the event of a nuclear power station incident. In addition, the program informs and educates the public about radiological emergency preparedness. REPP provides funding only for emergency preparedness activities of State and local governments that take place beyond nuclear power plant boundaries.

B. Budget Activities:

Drills and Exercises

In conjunction with State, tribal, local and industry officials, REPP conducts and evaluates exercises and drills in the communities surrounding commercial nuclear power plants. These drills and exercises ensure there is adequate off-site emergency preparedness to protect the health and safety of citizens living around commercial nuclear power plants.

Rulemaking and Policy Development

The REP program develops policy and guidance and coordinates regulatory basis of program with the Nuclear Regulatory Committee (NRC) as they relate to offsite planning and preparedness. This includes implementation of Presidential Policy Directive (PPD)-8. These changes require education of Federal, state, tribal and local stakeholders on refined or newly developed REPP guidance and how it should be incorporated into REPP plans and exercise programs.

New Reactor Licensing Process

The New Reactor Licensing Program is a joint effort between the FEMA and the NRC. Both organizations share a common objective of maximizing public health and safety through the evaluation of emergency plans and conduct a qualifying exercise prior to startup of proposed new reactor applicants. Early involvement during the process of constructing new reactors and prior to any power generation ensures that there is “reasonable assurance” that both onsite and offsite personnel can take the appropriate protective measures to protect public health and safety in the event of a nuclear accident.

Federal Radiological Preparedness Coordinating Committee (FRPCC)

The REP program also maintains the functionality of the Federal Radiological Preparedness Coordinating Committee (FRPCC) as a coordinating body for radiological preparedness across the Federal government. The FRPCC, some of whose functions are funded by REPP user fee collections, coordinates the activities of Federal agencies with responsibilities in the radiological emergency planning and preparedness process. The FRPCC serves as a radiological information clearinghouse

among Federal departments and agencies and is responsible for updating the Nuclear/Radiological Incident Annex of the National Response Framework.

Radiological Emergency Preparedness Training Curriculum

REPP developed and continues to employ a robust professional development path to assist FEMA staff and Federal, State, tribal and local emergency planning, preparedness and response personnel in their emergency preparedness planning and training. This is accomplished by maintaining a high-quality national level cadre of Federal employee instructors to deliver training courses throughout the country.

C. Budget Request Summary:

The Federal Emergency Management Agency requests 170 positions, 170 FTE, and \$39.737 million for the FY 2014 Request. The total adjustment-to-base is 13 FTE and \$2.606 million. REPP projects collections for FY 2014 will be \$41.009 million, resulting in a net budget authority of -\$1.272 million.

III. Current Services Program Description by PPA

**Department of Homeland Security
Federal Emergency Management Agency
Radiological Emergency Preparedness
Program Performance Justification**
(Dollars in Thousands)

PPA: Radiological emergency preparedness

	Perm. Pos	FTE	Amount
2012 Revised Enacted	170	157	37,131
2014 Adjustments-to-Base	-	13	2,606
2014 Current Services	170	170	39,737
2014 Program Change	-	-	(41,009)
2014 Total Request	170	170	(1,272)
Total Change 2012 to 2014	-	-	(38,403)

FEMA requests to utilize \$39.737 million in FY 2013 offsetting collections for FY 2014 operating expenses in support of REPP. This funding will support 170 positions and provide for FY 2014 program costs.

CURRENT SERVICES PROGRAM DESCRIPTION:

Drills and Exercises

In FY 2014, REPP will support and evaluate approximately 33 biennial exercises in the states and counties within the Emergency Planning Zones of NRC licensed commercial nuclear power plant facilities. REPP is developing a human capital utilization policy document that will allow REPP to leverage its Federal staff experience and decrease the reliance on contractors, thus reducing costs for this activity. Ongoing terrorism-based drills continue to increase REPP’s nuclear and radiological preparedness responsibilities.

REPP also actively supports other FEMA, DHS, Department of Defense, and Federal partners involved in improvised nuclear device (IND) and radiological dispersal device (RDD) planning and exercises, as these programs share common elements with REPP’s primary mission. REPP also applies new Homeland Security Exercise and Evaluation Program (HSEEP) technology and will continue to assist State, tribal and local governments in implementing HSEEP into their exercises and drill programs.

New Reactor Licensing Process

One new reactor application is scheduled for review in FY 2014.

Radiological Emergency Preparedness Training Curriculum

REPP will continue to refine and update its curriculum to meet the needs of its Federal, state, local and tribal partners.

Federal Radiological Preparedness Coordinating Committee (FRPCC)

FRPCC continues to develop a single Federal guidance document containing a unified message strategy and pre-scripted messages for use during nuclear power plant incidents. Incorporation of this guidance document into State, tribal and local REPP plans will occur after consideration of feedback from stakeholders.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

The aggregate charges assessed during fiscal year [2013]2014¹, as authorized in title III of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999 (42 U.S.C. 5196e), shall not be less than 100 percent of the amounts anticipated by the Department of Homeland Security necessary for its radiological emergency preparedness program for the next fiscal year: Provided, That the methodology for assessment and collection of fees shall be fair and equitable and shall reflect costs of providing such services, including administrative costs of collecting such fees: Provided further, That fees received under this heading shall be deposited in this account as offsetting collections and will become available for authorized purposes on October 1, [2013]2014², and remain available until September 30, [2015]2016³.

Explanaton of Changes

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

FEMA requests \$534,716 and 5 FTE for the FY 2014 DHS Balanced Workforce Strategy.

Position Type	FY 2012 Revised Enacted		FY 2013 Annualized CR		FY 2014 Annualization		FY 2014 Follow On		FY 2014 Increase		TOTAL FY2013 – FY2014 DHS Balanced Workforce Strategy

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**Federal Emergency Management Agency
National Pre-Disaster Mitigation Fund**

I. Appropriation Overview

A. Mission Statement for National Pre-Disaster Mitigation Fund:

The National Pre-disaster Mitigation Fund provides technical assistance and grants to State, local, and tribal governments to reduce the risks associated with disasters. Resources support the development and enhancement of hazard mitigation plans, as well as the implementation of disaster mitigation projects.

B. Budget Activities:

Pre-Disaster Mitigation (PDM) supports the Department of Homeland Security (DHS) goal to strengthen capacity at all levels of society to withstand threats and hazards. PDM accomplishes this by providing Federal funding to State, territorial, local, and tribal governments for eligible planning and project activities. PDM supports the development of hazard mitigation planning and/or project applications that implement physical measures to avoid and/or reduce damage associated with natural disasters.

C. Budget Request Summary:

The Federal Emergency Management Agency requests 3 positions, 3 FTE, and \$0 funding for the FY 2014 Request.

 (Dollars in Thousands)

PPA: National Pre-Disaster Mitigation Fund

	Perm. Pos	FTE	Amount
2012 Revised Enacted	12	12	35,500
2014 Adjustments-to-Base	-	-	6
2014 Current Services	12	12	35,506
2014 Program Change	(9)	(9)	(35,506)
2014 Total Request	3	3	-
Total Change 2012 to 2014	(9)	(9)	(35,500)

FEMA proposes to eliminate funding for the PDM program in FY 2014. FEMA will work to aggressively process grant applications funded by prior years' appropriations. There is no impact from this reduction because of the duplication with other FEMA grant programs including the Hazard Mitigation Grant Program. Through FY 2015, PDM will continue to provide technical assistance to applicants, as well as monitor and closeout open projects. PDM positions will be reduced through natural attrition and reassigned to other mitigation programs.

IV. Program Justification Changes

**Department of Homeland Security
Federal Emergency Management Agency
National Pre-Disaster Mitigation Fund
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: National Predisaster Mitigation Fund
PPA:
Program Decrease: Positions (9), FTE (9), Dollars \$(35,506)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							12	12	35,506
Program Decrease							(9)	(9)	(35,506)
Total Request	12	12	35,500	7	7	35,717	3	3	-

Description of Item

This represents a total reduction of four positions, nine FTE, and \$35.5 million.

Justification

FEMA proposes to eliminate funding for the PDM program in FY 2014. FEMA proposes to utilize congressionally directed spending funds from FYs 2008, 2009, and 2010 for new grant awards when either the applicant informs FEMA that it does not intend to use the earmark funding or when an application for the funding is not submitted to FEMA.

Impact on Performance (Relationship of Increase to Strategic Goals)

There is no impact from this reduction because of the duplication with FEMA’s Hazard Mitigation Grant Program and Flood Mitigation Assistance grant program. Further, the program’s FY 2012 unobligated balance of \$142.4 million will enable the continued issuance, oversight, and closeout of grants until funding is depleted. PDM positions will be reduced through natural attrition and reassigned to other mitigation programs.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

FEMA is not requesting funding for PDM in FY 2014. Instead, FEMA requests that the following language be included in the General Provisions to make available previously earmarked funding for new grant awards and allow prior year appropriations to be used for management and administration of the program as it sunsets:

Predisaster Hazard Mitigation - The FEMA Administrator may make grant awards at his discretion pursuant to Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133) with funds otherwise designated as congressionally directed spending and appropriated in any fiscal year under FEMA “National Predisaster Mitigation Fund”, if either: (a) the intended applicant for such earmarked funding informs FEMA in writing that no application will be submitted to use the funding; or (b) no application for such earmarked funding is submitted to FEMA within two years of the date of the respective appropriation for such funds; Provided, That amounts appropriated under “National Predisaster Mitigation Fund” in any fiscal year shall be available for necessary and reasonable costs to administer and to close out Predisaster Mitigation grants. Provided further, That the Administrator of the Federal Emergency Management Agency may transfer and merge unexpired funds previously appropriated to FEMA for the purposes of predisaster mitigation into the “National Predisaster Mitigation Fund.”

National Pre-Disaster Mitigation Fund Mission Statement

Funding requested through this account is dedicated to grants for pre-disaster mitigation. The National Pre-Disaster Mitigation (PDM) Fund was created under FEMA as the vehicle for disseminating these grants to state and local governments. Operating independently of the Disaster Relief Fund (DRF), which provides post-disaster mitigation funding, the PDM program offers an annual funding source for qualified mitigation activities that are not dependent upon a declaration of disaster activity by the President.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	1,242	664	256	(986)
11.5 Other personnel compensation	13	7	3	(10)
12.1 Benefits	455	189	73	(382)
Total, Salaries & Benefits	1,710	860	332	(1,378)

The FY 2014 request includes an increase for COLA as well as a reduction in positions and FTE to reflect the sunsetting of the program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$556	\$319	\$269	-\$287

For the FY 2014 Request, FEMA is requesting a reduction of nine positions and FTE, resulting in a decrease in travel expenses.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$130	\$123	\$123	-\$7

The FY 2014 request includes an actual decrease in rent costs.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency Emergency Food and Shelter

I. Appropriation Overview

A. Mission Statement for Emergency Food and Shelter:

The Emergency Food and Shelter (EFS) program entrusted through the McKinney-Vento Homeless Assistance Act of 1987 (P.L. 100-77), provides grants to nonprofit and governmental organizations at the local level through the National Board to supplement and expand ongoing efforts to provide shelter, food, and supportive services for hungry and homeless people across the Nation.

B. Budget Activities:

EFS funds are used to supplement food, shelter, rent, mortgage, and utility assistance programs for people with non-disaster related emergencies.

The EFS program is administered via a national board of volunteer agencies chaired by FEMA. The National Board qualifies jurisdictions for annual EFS funding awards based on criteria involving current population, unemployment, and poverty levels. Grants are awarded to nonprofit community and government organizations that are chosen by local boards in the qualifying jurisdictions.

C. Budget Request Summary:

The FEMA FY 2014 request for the EFS program is 0 positions, 0 FTE, and \$100 million. This is a decrease of \$20 million from FY 2012.

Total Change 2012 to 2014	-	-	(20,000)

FEMA requests \$100,000,000 for this activity in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

The EFS program provides grants to nonprofit and governmental organizations at the local level to supplement their programs for emergency food and shelter.

Funding for this program is distributed by the National Board, which consists of designees from six charitable organizations – American Red Cross, Catholic Charities USA, The Jewish Federations of North America, National Council of Churches of Christ in the USA, The Salvation Army, and United Way Worldwide. The National Board is chaired by FEMA.

Local jurisdictions (cities or counties) are eligible for EFS program support when they have the highest need for emergency food and shelter services as determined by unemployment and poverty rates. Funding also may be provided to jurisdictions that do not meet the initial eligibility requirements through the State Set-Aside Committee process. The National Board allocates a portion of appropriated funds to State Set-Aside Committees based upon the unemployment in those jurisdictions that did not qualify for direct funding from the National Board. The State Set-Aside Committee process allows States to address pockets of homelessness and poverty or address the immediate needs of a locality that might be going through a high economic impact event.

Total Request	-	-	120,000	-	-	120,734	-	-	100,000

Description of Item

FEMA requests \$100 million for the Emergency Food and Shelter (EFS) program in FY 2014.

Justification

The FY 2014 request for EFS reflects the continued acknowledgement of the vital contributions of EFS toward the distribution of needed funding to nonprofit and nongovernmental organizations providing services to the Nation's hungry, homeless, and people in economic crisis. This request will continue to supplement significantly the delivery of an estimated 46.5 million meals, 3.1 million nights of lodging, and support for 74,706 rent/mortgage payments and 155,567 utility bill payments across the Nation while decreasing costs through management and efficiencies.

Impact on Performance

Communities will continue to have the support they need. There will be no impact to disaster survivors. FEMA will continue to support disaster food and shelter requirements under its emergency assistance authorities in the Stafford Act.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

*To carry out an emergency food and shelter program pursuant to Title III of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11331 et seq.), [\$100,0000] **\$100,000,000**¹ to remain available until expended: Provided, that total administrative costs shall not exceed 3.5 percent of the total amount available under this heading.(Department of Homeland Security Appropriations Act, 2012.)*

Language Provision	Explanation
¹ ...[\$100,0000] <u>\$100,000,000</u> ...	No substantial change proposed.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency Disaster Relief Fund

I. Appropriation Overview

A. Mission Statement for Disaster Relief Fund:

Pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the Disaster Relief Fund (DRF) provides a no-year base against which FEMA can direct, coordinate, manage, and fund eligible response and recovery efforts associated with domestic major disasters and emergencies that overwhelm State and tribal resources. Through the DRF, FEMA can fund authorized Federal disaster support activities as well as eligible State, territorial, tribal, and local actions, such as providing emergency protection and debris removal. The DRF also funds:

- The repair and rebuilding of qualifying disaster-damaged infrastructure
- Hazard mitigation initiatives
- Financial assistance to eligible disaster survivors
- Fire Management Assistance Grants for qualifying large wildfires

B. Budget Activities:

Major disasters and emergencies may be the result of disasters of all kinds and are declared by the President, typically in response to gubernatorial requests for assistance. States request Federal assistance to supplement their available resources and to certify that a given disaster is beyond their capacity or capability to respond. The DRF also supports fire management assistance activities for the mitigation, management, and control of fires on public and private lands.

FEMA coordinates three major disaster assistance programs:

- Federal Assistance to Individuals and Households
- Public Assistance
- Hazard Mitigation assistance

Non-declaration specific readiness and support activities also are funded under the DRF. These activities provide indirect support across FEMA (and to our Federal partners) and are managed separately as Disaster Readiness and Support activities.

C. Budget Request Summary:

FEMA requests 55 temporary full-time positions, 7,134 FTE's, and \$6,220,908,000 for the Disaster Relief Fund in FY 2014. The increase in FTE is due to Hurricane Sandy relief efforts. This includes \$570,522,000 for base/non-major disaster activities, including a transfer of \$24,000,000 to DHS Office of Inspector General, and \$5,626,386,000 for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief

pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended by the Budget Control Act of 2011 (BCA).

Coupled with an estimated prior year recovery figure and carryover or reserve funds, the DRF request is projected to support estimated requirements for all past declared catastrophic events (where expected Federal obligations exceed \$500 million) and the 10-year average obligation level for non-catastrophic disaster activity (where Federal obligations were under \$500 million).

FY 2013 does not include the Sandy Supplement P.L. 113-2 of \$11.487 Billion and 2348 FTE. The total FTE for FY 2013 is 7917.

III. Current Services Program Description by PPA

**Department of Homeland Security
Federal Emergency Management Agency
Disaster Relief Fund
Program Performance Justification**
(Dollars in Thousands)

PPA: Disaster Relief Fund

	Perm. Pos	FTE	Amount
2012 Revised Enacted	45	5,569	7,076,000
Adjustments-to-Base	10	1,565	(879,092)
2014 Current Services	55	7,134	6,196,908
2014 Total Request	55	7,134	6,196,908
Total Change 2012 to 2014	10	1,565	(879,092)

Note: The 55 positions reflected above are FEMA's cadre of temporary full-time Federal Coordinating Officers (FCO) and Federal Disaster Recovery Coordinator (FDRCs). The bulk of the FTE reflected herein is made up of Disaster Reservists and Cadre of On-call Response Employees (CORE), primarily deployed for specific disasters.

FY 2013 does not include the Sandy Supplement P.L. 113-2 of \$11.487 Billion and 2348 FTE. The total FTE for FY 2013 is 7917.

FEMA requests \$6.2 billion for the DRF in FY 2014, of which \$570.5 million is for base/non-major disaster activities and \$5.626 billion is for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief pursuant to section 251(b)(2)(D) of the BBEDCA, as amended by the BCA. Coupled with an estimated prior year recovery figure and carryover or reserve funds, the DRF request is projected to support estimated requirements for all past declared catastrophic events (where expected Federal obligations exceed \$500 million) and the 10-year average obligation level for non-catastrophic disaster activity (where Federal obligations were under \$500 million).

The FY 2014 request for the DRF includes the following:

- Increase of \$8.7 million for the 2014 pay increase
- Decrease of \$867.8 million for the 10-year average adjustment obligation level for noncatastrophic disaster activity
- Transfer of \$24 million to the DHS Office of Inspector General

CURRENT SERVICES PROGRAM DESCRIPTION:

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5121-5207 (P.L. 93-288, as amended), authorizes the President to provide Federal assistance to supplement Tribes and Territories disaster response, recovery, readiness, and mitigation efforts. Under Section 504 of the Homeland Security Act, as amended, FEMA’s Administrator has been delegated the responsibility for administering the Stafford Act’s Federal assistance programs. The DRF provides funding for the following Stafford Act declarations or activities: (1) major disaster; (2) emergency; (3) fire management assistance; (4) pre-declaration surge; and (5) Disaster Readiness and Support (DRS).

By amending the BBEDCA, the BCA necessitated a new approach to accounting for disaster-related activity. Essentially, requests for DRF funding for FEMA’s Stafford Act programs and disaster support activities fall into two categories: disaster relief cap adjustment and base/non-major disasters. Funding requested under the disaster relief cap adjustment is for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended by the BCA. Funding requested under the base/non-major disasters category includes Emergencies, Pre-disaster Surge Support, Fire Management Assistance Grants and activities that are non-disaster specific, such as Disaster Readiness Support (DRS) activities (e.g., distribution centers, reservist training, etc.).

(Dollars in millions)	
DRF Need in 2014	6,221
Catastrophic	2,571
Non-catastrophic	3,950
Reserve	500
Estimated Recoveries	-800
Breakdown per BCA	6,221
Disaster Relief Cap Adjustment	5,626
Base/Non-Major Disasters	595

The FY 2014 Base/Non-Major Disasters of \$595M does not include the \$24M transfer to DHS OIG.

The funding level required for the catastrophic category (events greater than \$500 million) is based on FEMA expenditure plans for all past declared catastrophic events. The DRF 2014 request includes no funds for new catastrophic events that may occur in 2014. The non-catastrophic funding level is based on a revised approach that uses the 10-year average for non-catastrophic events. As opposed to the previous method that utilized the five-year average, this provides a more accurate projection of non-catastrophic needs since it normalizes the effects of outlier years. The request assumes that new

catastrophic events in 2014 will be funded with emergency supplemental funds as provided for in the BCA/BBEDCA.

A projected breakout of these base/non-major disaster activities in FY 2014 is listed below.

DISASTER RELIEF FUND OTHER DISASTER ACTIVITIES			
PROGRAM DESCRIPTION	FY 2012 Actuals	FY 2013 Base	FY 2014 Request
EM-EMERGENCY	254,016,438	255,571,019	278,988,928
FM-FIRE MANAGEMENT	50,772,493	38,063,709	73,356,995
SU-SURGE	34,469,016	67,315,475	97,438,478
OTHER DISASTER SUPPORT ACTIVITIES	378,817,459	339,049,798	480,192,988
TOTAL	718,075,406	700,000,000	929,977,389

The FY 2014 projected requirement of \$930 million will be funded by the FY 2014 budget request of \$571 million (excluding the DHS OIG transfer of \$24M) and pre-FY 2012 disaster recoveries.

The recoveries figure represents an estimate of the amount that FEMA will de-obligate and recover from prior disasters. FEMA has aggressively recovered funds in recent years and will continue to do so in FY 2014. In FY 2012, FEMA undertook an aggressive effort to improve the efficiency of the disaster closeout process. This effort included issuing and enforcing standard closeout policies, establishing consistent closeout practices across all regions, establishing and tracking closeout metrics, and streamlining and simplifying the closeout process. (FY 2014 FEMA estimates recoveries of \$800 million).

The FY 2013 request included a \$500 million reserve. Given the uncertainties associated with projecting disaster activity, the DRF request for FY 2014 also includes a \$500 million reserve to ensure solvency at year-end as we approach the most active portion of hurricane season.

The amount provided via the BCA disaster relief cap adjustment may only be obligated on declared major disasters. In analyzing the last 10 years of obligations for non-major disasters, FEMA determined that base/non-major disasters comprise an average of nine percent of the gross DRF requirement. Therefore, the estimated requirement for base/non-major disasters is \$595 million, or 9 percent of the gross DRF requirement (not including the reserve).

In FY 2012, the DRF provided critical resources to States, localities, and survivors. The funding enabled FEMA to lead response and recovery efforts for 46 major disaster declarations and seven emergency declarations across seven States. In addition, the DRF provided 50 fire management assistance grants for fires in 15 States. FEMA's pool of highly trained and qualified Reservists and COREs provided support needed to help survivors recover from various disasters.

Hurricane Isaac

Hurricane Isaac made landfall south and west of New Orleans as a Category 1 storm at on Aug. 28, 2012, with 80 mph maximum sustained winds and gusts extending outward from the center up to 185 miles.

In the days leading up to landfall of Hurricane Isaac, FEMA worked with the whole community to support our citizens and first responders as they prepared. It is clear the authorities given to FEMA in the wake of Hurricane Katrina contributed to increased readiness and improved response throughout the storm. By leaning forward, the Agency was able to support a prompt, coordinated response effort while effectively understanding the needs of survivors and planning for future needs.

Despite the inherent challenges of predicting hurricane landfall or anticipating the full extent of its effects, FEMA worked with state and local partners to alert, deploy, and stage resources beginning August 25, 2012, three days before Isaac made landfall. In the 72 hours prior to landfall, FEMA's Region VI Regional Response Coordination Center (RRCC) and the National Response Coordination Center (NRCC) were activated to support pre-deployment activities and situational awareness. FEMA moved caches of supplies from their distribution centers and pre-positioned over 120 truckloads of commodities carrying almost 1.73 million liters of water and 1.7 million meals, in addition to cots, tarps, blankets, generators, and other resources to support caches already staged by the state in preparation for the 2012 hurricane season. A total of 158 individuals from FEMA and other Federal agencies deployed in advance of the incident to support pending response and recovery activities.

In the aftermath of Hurricane Isaac, FEMA's mobile outreach efforts have continued to simplify the process of identifying and applying for disaster assistance through DisasterAssistance.gov, a website established in 2008 to help survivors apply for FEMA Individual Assistance and find other forms of assistance. Between August 31 and September 18, 422,160 disaster survivors visited DisasterAssistance.gov to apply for assistance, update their information, and check the status of their application online. As of September 19, Hurricane Isaac survivors had submitted over 18,700 applications for assistance through smartphones, which allow survivors to apply for assistance and track submitted applications with the added flexibility of mobile access.

As of February 28, 2013, disaster assistance has topped \$547 million, including more than \$188 million in grants from FEMA's Individual Assistance (IA) program and more than \$237 million in reimbursements to the state and local governments, educational institutions, community services and public safety organizations from FEMA's Public Assistance (PA) program. In addition, nearly \$161 million in low-interest disaster loans was provided by the U.S. Small Business Administration (SBA).

Hurricane Sandy

Prior to Hurricane Sandy making landfall, FEMA worked with its partners throughout all levels of government as well as within the private sector to assist our citizens and first responders as they prepared for the storm. As a result of these efforts, the Agency was able to support a prompt, coordinated response effort that brought to bear the full resources of federal, state and local government, in conjunction with our private sector partners. The multifaceted coordination that took place on the front end provided our team with a keen understanding of the challenges that lay ahead which allowed for planning for the recovery phase to begin before the storm even made landfall.

FEMA's regional offices have worked closely with the state, local, and tribal governments across the country—including those directly in Sandy's path—to develop catastrophic, worst-case scenario plans that are flexible and scalable for incidents of all magnitudes. FEMA's ongoing partnership with states allows coordination and collaboration with the whole community to plan and prepare for a range of disaster events.

Immediate Response Operations

On October 28, 2012, the President authorized emergency declarations for Connecticut, District of Columbia, Maryland, Massachusetts, New Jersey, and New York. The following day, the President authorized emergency declarations for Delaware, Pennsylvania, Rhode Island, and Virginia. Initially, these declarations authorized FEMA to provide direct federal assistance for emergency protective measures. The President later authorized major disaster declarations for Connecticut, Delaware, Maryland, New Hampshire, New Jersey, New York, Rhode Island, Virginia, and West Virginia. These declarations provide declared counties and states assistance with emergency work and debris removal as well as access to FEMA programs, most notably Individual Assistance, Public Assistance, and the Hazard Mitigation Grant Program, which provide assistance to individuals, local and state governments following a disaster.

By Sunday, October 28, there were 1,032 FEMA personnel deployed in anticipation of Hurricane Sandy's impacts. Approximately one week after the storm, on November 6, there were 5,384 FEMA personnel deployed in support of Sandy. On November 6, approximately two weeks after Sandy's landfall, there were 7,770 FEMA personnel deployed to more than 11 states and the District of Columbia in support of survivors. At the peak of the response efforts, more than 17,000 federal personnel, and over 11,000 National Guardsmen were on the ground assisting with response. As of February 13, 2013, nearly 4200 FEMA personnel remain in the field supporting Sandy recovery operations while working alongside our federal, state, and local partners.

Starting before the storm made landfall, FEMA and its emergency management partners facilitated the provision of shelters, Disaster Recovery Centers (DRCs), Points of Distribution (PODs), and Joint Field Offices (JFOs) in the affected areas. At peak, 716 shelters were open with a population of 26,913 in 16 states.

FEMA was appropriated \$7.1 billion for the DRF in Fiscal Year (FY) 2012—\$700 million for all activities authorized under the Stafford Act, and \$6.4 billion exclusively for major disasters. As a result of this appropriation, FEMA had more than sufficient financial resources to respond to the immediate needs and impacts of the storm along with the initial recovery efforts.

Given the scope of the damage wrought by the storm, Congress took action and passed the Disaster Relief Appropriations Act of 2013, which the President signed into law on January 29, 2013. The bill provides an additional \$11.487 billion for the DRF along with critical funding for FEMA's interagency partners who will be leading efforts to help rebuild infrastructure, modernize flood control systems and revitalize damaged housing.

Individual Assistance

The Individuals and Households program, which provides aid to homeowners and renters for housing and other needs, has seen over 170,000 disaster survivors in New York, New Jersey and Connecticut receive assistance as a result of Hurricane Sandy. Individual Assistance can include grants for temporary housing and home repairs, low-cost loans to cover uninsured property losses and other programs to help individuals and business owners recover from the effects of the disaster.

As of March 4, FEMA, along with our partners at the U.S. Small Business Administration (SBA), have approved nearly \$2 billion for Hurricane Sandy survivors in New York. FEMA has approved nearly \$919 million for individuals and households, including more than \$794 million for housing assistance and nearly \$125 million in assistance for other needs.

Across the Hudson River in New Jersey, disaster survivors from 21 counties have been awarded more than \$365 million for individuals and households including \$318 million for housing assistance and nearly \$46 million in assistance for other needs. Our partners at SBA are also working diligently to help New Jersey businesses and families get back on their feet by approving nearly \$481 million in low interest loans.

Public Assistance

Given the significant structural damage that Sandy left in its wake, debris removal, which is funded under FEMA's Public Assistance program, is a paramount factor in getting hard hit communities on the road to recovery as quickly as possible. In New York, over 1,800 requests for Public Assistance and have been submitted and nearly \$720 million has been obligated. More than 95 percent of the debris has been removed within 95 days of the storm hitting New York. That includes everything from fallen trees to vehicles, boats, drywall and furniture, washers, dryers and insulation amounting to 5.25 million cubic yards of debris.

In New Jersey, over 1700 requests for Public Assistance have been submitted and nearly \$188 million has been obligated. FEMA obligated \$29 million to the New Jersey Department of Human Services for providing temporary housing and resources for electrical crews working to restore power. Additionally, FEMA has approved 465 projects to help remove hurricane debris and restore disaster-damaged roads, bridges and other infrastructure. Among the largest grants to date was \$11.2 million to the Passaic Valley Sewerage Commission for emergency repairs to a wastewater treatment plant that serves 48 communities and treats 330 million gallons of sewage daily.

FEMA is working closely with its partners to proceed to project formulation and project worksheet preparation to address damages caused by Sandy. One of the ways in which FEMA is able to provide financial reimbursements to local governments more quickly in order to help the local communities recover is through Expedited Payments. These are commonly referred to as Expedited Project Worksheets. FEMA will obligate a portion of the federal share of the estimated cost of work under Category A (Debris Removal) and Category B (Emergency Protective Measures) as estimated during the preliminary damage assessment.

Hazard Mitigation Grant Program

In both New York and New Jersey, FEMA mitigation staff has met and continues to work closely with the State Hazard Mitigation Officers to discuss the states' Hazard Mitigation Plans, types of projects available, and how best to proceed within that framework.

FEMA recognizes that mitigation is an essential component to national preparedness and emergency management. Working closely with the whole community, before, during and, after a disaster allows states and communities to plan and invest wisely into critical projects that save not only money, but most critically, lives.

Housing

As all disasters are local, each community and state faces different challenges. The State-led Disaster Housing Task Forces in New York and New Jersey involve a collaborative approach to addressing the temporary housing and long-term needs of the disaster survivors, including the collection of available rental resources, projecting housing needs and exploring other options. Task Forces include representatives from state, local, and voluntary agencies, and federal partners including FEMA, the Department of Housing and Urban Development (HUD), the United States Army Corps of Engineers, the Small Business Administration (SBA), the Department of Veterans Affairs (VA) and the United States Department of Agriculture (USDA). The teams are working together to ensure they are making the greatest use of existing housing resources (such as apartments and rental units), enlisting voluntary agencies to make minor repairs so survivors can remain in their homes, and investigating other temporary housing options suitable for the area.

In both New York and New Jersey, FEMA has completed over 99% of all requested housing inspections. If a home cannot be repaired easily to safe and sanitary conditions, then local rental resources are the preferred first choice for housing disaster survivors as they recover. FEMA authorized funds to increase the amount of rental assistance that it may provide eligible disaster survivors in New York and New Jersey to 125 percent. This increase will be implemented when a survivor is recertified for a continued need for temporary housing assistance.

As a particularly densely populated area New York presents FEMA with many housing challenges, the Agency – along with the state, federal partners and voluntary organizations – has been working to implement housing solutions that will best serve Hurricane Sandy survivors in New York.

On November 3, 2012, FEMA activated the Transitional Shelter Assistance Program (TSA) in both New York and New Jersey. The program allows survivors to stay in area hotels while FEMA, the state and voluntary agencies assist them with their long-term housing plans. Since its activation, the TSA program assisted nearly 6,000 survivors. On March 7, 2013, FEMA extended the TSA program at the request of the State of New York for an additional 14 days. The extension was approved to help those applicants still eligible for the program to remain in hotels as FEMA and its state and local partners work to identify longer-term housing solutions.

In New Jersey, FEMA and the state temporarily sheltered more than of 5,500 individuals and families through TSA, enabling survivors to work on longer-term housing solutions. On March 5, FEMA extended the TSA program at the request of the State of New Jersey for an additional 14 days; FEMA also coordinated a housing mission that included HUD, the New Jersey Department of Community

Affairs and the U.S. Army Corps of Engineers, which used \$3.3 million to refurbish 115 housing units at Fort Monmouth.

National Disaster Recovery Framework

As we have moved into the long term recovery phase for areas affected by Hurricane Sandy, the benefits of working collaboratively under the NDRF are beginning to come to fruition. The FRDC for New York initiated a Beach Infrastructure Task Force which brings together stakeholders from the Federal, State and local level to identify key damage areas and prioritize recovery efforts. Through a Mission Assignment, the Task Force utilized the technical expertise of the U.S. Army Corps of Engineers (USACE) to complete assessment of damages for emergency shoreline repair and compile environmental data related the sand sources.

Through the use of the Mitigation Advisor, the NY FDRC convened an Advisory Base Flood Elevation/Mitigation Task Force to ensure senior management and partners at the federal, state and local level had visibility on the development and release of flood advisory data that could significantly influence rebuilding and restoration decisions. Comprised of FEMA program offices that administer Stafford Act programs, representatives across all RSFs, and FDRC staff; the Task Force is working in conjunction with state and local partners to identify and address the impacts of advisory data on insurance rates, building codes, and other intermediate and permanent efforts to recover.

In New Jersey, the FDRC has recruited and hired 10 local New Jersey Community Recovery Assistance Specialists with local community expertise to provide redevelopment and planning technical assistance in impacted communities. These personnel, who will focus solely on Sandy recovery operations in the state, come from diverse professional backgrounds including community planning, economic development, finance, transportation, architecture, civil engineering, and municipal management.

In support of local disaster leadership, the Community Planning and Capacity Building RSF worked with local philanthropic organizations to identify funding sources for long term recovery planning and capacity building culminating in an opportunity to work with the Council of New Jersey Grantmakers, who selected New Jersey Future to receive a \$150,000 MERCK Foundation grant. New Jersey Future is a citizen-based, non-profit, non-partisan group that promotes smart land use policy; they will use the funds to hire a local disaster recovery manager to support recovery in at least three New Jersey communities.

The Economic RSF in New Jersey, in partnership with the New Jersey Department of Labor and Workforce Development, developed an economic Data Sharing Task Force and established three working groups focusing on small business recovery, tourism, and marine and aquaculture industries. In coordination with the New Jersey Department of Economic Development, the Economic RSF sponsored three business forums for over 100 stakeholders to identify financial resources for small business recovery and facilitated “Access to Capital” forums throughout the State to communicate business funding and networking opportunities for struggling businesses. Participants of the forums include lending institutions, Chambers of Commerce, local economic development officials, Freeholders, Mayors, and businesses.

The below chart depicts the breakout of the estimated actuals from the Hurricane Sandy:

Hurricane Sandy FY 2013 Actuals/Estimate*					
as of February 28, 2013					
(in millions)					
Category	Actuals through February	Estimated to March	Estimated April to June	Estimated July to September	Fiscal Year 2013 Totals
Public Assistance	1,000	837	3,151	2,167	7,155
Individual Assistance	1,675	81	247	262	2,265
Mitigation	10	6	39	75	130
Administrative	560	55	100	130	845
Operations	464	-	(1)	(1)	462
Total	3,709	979	3,536	2,633	10,857

DIRECT DISASTER ACTIVITIES

Individual Assistance (IA), Public Assistance (PA), and the Hazard Mitigation Grant Program (HMGP) are FEMA's primary Direct Disaster programs. These programs are managed and administered by the Recovery and Mitigation Directorates within FEMA. These activities may fall under either the cap adjustment allowance or the base amount depending on whether they are in response to a major disaster or emergency declaration.

These programs constitute the majority of the resources provided by the Federal Government (through FEMA) to directly address the short-, medium-, and long-term impacts of a disaster on individuals and communities. Disaster assistance under the authorities of the Stafford Act can be provided to States (and further provided to local or tribal governments), the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands and Tribes.

Individual Assistance

The DRF provides funding for the following IA Programs:

Individual and Households Programs – 100 percent federally funded

- Temporary housing (rent and lodging expense): Funding is provided to rent alternate housing or a temporary housing unit when rental properties are not available.
- Repair: Funding is provided for homeowners to repair damage (to their primary residence) from the disaster that is not covered by insurance. A flood insurance purchase and maintenance requirement may be placed on the home if the home is in a Special Flood Hazard Area. Repair assistance is intended to repair the home to a safe, sanitary, and functional living condition.
- Replacement: Funds are made available to homeowners to assist with the replacement of a destroyed primary residence that is not covered by insurance. The goal is to help the homeowners with the cost of replacing their destroyed homes.
- Permanent Housing Construction: Funds are made available for the construction of a home, or FEMA will provide direct assistance with the construction. This type of assistance only occurs in insular areas or remote locations specified by FEMA, where no other type of housing assistance is possible, or where other temporary housing options are unavailable or infeasible. Construction shall follow current minimal local building codes and standards (where they exist), or minimal acceptable construction industry standards in the area. Construction will aim toward average quality, size, and capacity, taking into consideration any unique needs (such as disability requirements) of the occupant.

Other Needs Assistance (ONA)

ONA is available for necessary expenses and serious needs of survivors of the declared disaster. Assistance provided by the ONA program is cost-shared between FEMA (75 percent) and the State (25 percent).

Assistance is provided to individuals contingent on their ability or inability to secure a loan from the U.S. Small Business Administration (SBA). If SBA determines that an applicant cannot afford a loan, SBA automatically will refer the applicant to the ONA program for assistance.

ONA can be provided for disaster-related serious needs in five categories:

- Repair or Replacement of Personal Property:
 - Clothing
 - Household items (i.e., home furnishings, appliances)
 - Specialized tools or job-related protective clothing and equipment
 - Educational materials (i.e., books)
 - Cleaning supplies (i.e., wet/dry vacuum, air purifier, dehumidifier)
- Transportation: Repair or replacement of a vehicle that is deemed unusable due to disaster-related damage.
- Medical and Dental Expenses: Medical treatment or the purchase of medical equipment required due to physical injuries resulting from a disaster.
- Funeral and Burial Expenses: Funeral services, burial, or cremation and other funeral expenses related to a death caused by the disaster.
- Other Items: The State and FEMA can agree to pay for specific disaster-related costs that are not listed above. Some examples are generators, moving and storage expenses, and the cost of a National Flood Insurance Program Group Flood Insurance Certificate.

Crisis Counseling Assistance and Training Program

The Crisis Counseling Program, which is 100 percent Federally funded, supports short-term interventions with individuals and groups experiencing psychological effects resulting from large-scale disasters. These interventions involve the counseling goals of assisting disaster survivors in understanding their current situation and reactions, mitigating additional stress, assisting survivors in reviewing their options, promoting the use or developments of coping strategies, providing emotional support, and encouraging linkages with other individuals and agencies that may help survivors recover to their pre-disaster level of functioning. Supplemental funding for crisis counseling is available to State mental health authorities through two grant mechanisms: (1) the Immediate Services Program; and (2) the Regular Services Program, which provide funds for up to nine months following a major disaster declaration.

Disaster Unemployment Assistance (DUA)

The DUA program, which is 100 percent Federally funded, provides individuals who have become unemployed because of a disaster and unable to secure regular unemployment benefits with unemployment benefits and re-employment services.

Legal Services

Legal services, which is 100 percent federally funded, may be provided to low-income individuals unable to secure such services adequate to meet their needs as a consequence of a major disaster.

Disaster Case Management Program

This program, which is 100 percent federally funded, provides case management services, including financial assistance, to State or local government agencies or to qualified private organizations to provide such services to victims of major disasters to identify and address unmet needs.

Public Assistance (PA)

The PA program offers assistance to State, local, and tribal governments after a declared major disaster or emergency for eligible disaster-related damage. In addition, certain private non-profit organizations that operate facilities and provide services to the public typically provided by a government agency may receive public assistance. PA is a cost-shared (75 percent Federal, 25 percent non-Federal) grant program. However, States may request, and the President may grant, a higher Federal cost share in situations in which the disaster has had a significant economic impact on the State.

PA provides funding to grantees for the repair and restoration of damaged public and eligible private nonprofit facilities, for emergency measures taken to protect lives and property, and in support of disaster-related debris removal. When PA is authorized, such assistance may be provided under one or more of the following seven categories:

- Category A – Debris Removal
- Category B – Emergency Protective Measures
- Category C – Repair of Roads and Bridges
- Category D – Water Control Facilities
- Category E – Public Buildings
- Category F – Public Utilities
- Category G – Other Facilities

Hazard Mitigation Grant Program (HMGP)

HMGP provides State, local, and tribal governments with cost-shared grants (75 percent Federal, 25 percent non-Federal) to reduce the risk of potential damage, hardship, loss, and suffering in an area affected by a major disaster. Ultimately, HMGP reduces future need for Federal disaster assistance by reducing the impact of and increasing the resistance to natural hazards.

HMGP funding is made available to States based on 15 percent of the total Federal funds spent in the PA and IA programs (minus administrative expenses) for each major disaster costing up to \$2 billion; 10 percent for disasters between \$2 billion and \$10 billion; and 7.5 percent for major disasters between \$10 billion and not more than \$35.3 billion.

HMGP projects vary and may include retrofitting structures to resist flooding, winds, and earthquakes; elevating structures above base flood levels; property acquisition and demolition or relocation for open space; and minor flood reduction and drainage measures.

HMGP grants are required to be cost-effective. In 2005, the Multi-hazard Mitigation Council, a part of the National Institute of Building Sciences, published a report that analyzed the overall impact of FEMA's Hazard Mitigation Programs. The findings show that money spent on reducing the potential damage of natural hazards is a sound investment and is cost-effective. On average, a dollar spent on hazard mitigation activities will save the Nation approximately four dollars in future payouts for damage caused by natural hazards.

Compacts of Free Association

The DRF provides funding for disaster relief and reconstruction activities in the Federated States of Micronesia and the Republic of the Marshall Islands pursuant to the Compacts of Free Association. This funding is provided through a direct transfer of DRF funds to the United States Agency for International Development.

OTHER DISASTER ACTIVITIES

Fire Management Assistance

FEMA provides assistance for the mitigation, management, and control of any fires burning on publicly or privately owned forest or grasslands that threatens such destruction that would constitute a major disaster. Items eligible for funding under the Fire Management Assistance Grant Program include equipment and supplies, labor costs, emergency work, pre-positioning of resources, and temporary repair of damage caused by work directly related to firefighting activities associated with the declared fire.

Disaster Readiness and Support (DRS) Programs

The DRS funding was established to bolster FEMA's general steady-state effectiveness and readiness. It enables FEMA to be in a more proactive and robust advance-readiness posture to respond to large-scale, complex, presidentially declared major disasters instead of waiting for disasters to occur and reacting with more costly and less efficient response actions.

FEMA manages DRS costs throughout the year. These expenses are essential for: (1) timely disaster response; (2) responsive customer service; and (3) cost-effective program oversight and delivery.

DRS funds key activities and initiatives, such as:

- Strategic pre-positioning and management of disaster commodities
- Improved inventory of specialized assets
- Standby support to enable FEMA to increase response and recovery capacity as quickly as needed

DRS activities support FEMA's all-hazards mission. They include initiatives and resources formerly funded from the DRF's legacy disaster support activities and readiness contracts. Many of these costs are predictable on an annual basis and allow FEMA to support a cross-section of disasters utilizing an infrastructure of processing and distribution centers and information technology systems. In addition, the DRS include certain costs to help FEMA pre-position for disasters, including the establishment of large commodity and transportation service contracts that can be activated in the event of a major disaster.

These efforts (including better communications, a more effective intake process, more efficient delivery systems for disaster commodities, and improved oversight of disaster aid through our technical assistance contractors) will continue to improve the quality of FEMA support to disaster survivors.

FEMA has increased transparency and budgetary discipline of the DRS through the implementation of detailed spending plans and program reviews. As a result, FEMA is better equipped to maintain its critical disaster support activities and infrastructure; and ensure the timely delivery of disaster assistance.

Response Directorate

FEMA's Response Directorate provides and coordinates the core Federal response capabilities needed to save lives, minimize suffering, and protect property in communities throughout the Nation overwhelmed by the impact of an incident, regardless of cause. Response program activities encompass the coordination of all Federal emergency management response operations, response planning, and integration of Federal, State, tribal, and local disaster programs in order to ensure efficient and effective delivery of immediate emergency assistance to individuals and communities impacted and overwhelmed by these disasters, emergencies, or acts of terrorism. The Response Directorate encompasses the following programs:

FEMA Qualifications System (FQS) Program works to establish the system for qualification and certification of the FEMA workforce through experience, training, and demonstrated performance; ensures a qualified workforce based on performance standards; establishes minimum, consistent, and fair qualification requirements for all workforce positions regardless of employment status; and works to strengthen the training and qualification standards for all workforce positions by implementing improvements based on analysis.

FEMA Corps Program is a partnership between FEMA and the Corporation for National and Community Service (CNCS) which establishes an AmeriCorps component within FEMA of 1,600 members to support the whole community approach to disaster management operations. The partnership leverages CNCS infrastructure, training programs, community-based experience and devoted members to provide a reliable, full-time, energized and motivated staff within FEMA disaster management operations. The Program strengthens the Nation's capability to prepare for, respond to and recover from disasters, promote an ethos of community and national service by focusing on community engagement, and increase the depth, reliability, diversity and stability of the FEMA disaster workforce.

Federal Surge Capacity Force Program manages and coordinates all aspects of cadre and surge readiness and provides oversight for the surge and volunteer workforce programs that will ultimately roster more than 40,000 employees within the Department. The staff coordinates directly with Departmental headquarters and component agencies on surge capacity force selection, training, exercises and readiness, it also manages all facets of external surge capacity force training requirement validation, accountability of individual and cadre/surge readiness status.

Reservist Management Program provides the communication, coordination, and outreach of workforce procedures and program guidance to the National and regional cadre managers and liaisons on workforce deployment, readiness, and the FQS. The staff sponsors and develops routine communications via monthly conference calls, office visits, and other media and works with the FEMA Assessment Readiness Program F-RAP team to develop surveys and other tools to assess customer fulfillment and satisfaction.

National Evacuation Support provides FEMA with the ability to plan, execute, and exercise multi-modal evacuation capability in the event of catastrophic disasters. Program activities address evacuation capabilities by motor coach, rail, air, and ambulance. The program consists of an ambulance contract, which provides for the evacuation of medical/mobility challenged persons; motor

coach planning and operational support contract (National bus evacuation), which provides detailed and robust pre-event bus evacuation planning efforts in support of States; air evacuation ground support contract, which provides airfield assessments and operational planning to pre-identified airfield evacuation points; provides ground and passenger support services during a disaster; and air transportation support services contract, which provides turnkey air support in the event of a disaster (both evacuation and non-evacuation). Together, the program provides the full-spectrum (planning, readiness, execution) support to States requiring Federal assistance to evacuate all populations in threatened areas.

Mobile Communications Office Vehicles (MCOV) Program includes vehicles that are multi-purpose central office facilities activated to support FEMA response and recovery disaster missions. The thirty-nine foot long recreational vehicles have been modified and retrofitted with eight to nine work stations and satellite communications to provide voice and data connectivity into the FEMA network. During initial deployment, MCOVs are driven by Federal team requirements, to include support to Logistics Incident Support Base ISBs. Follow-on mission support is to the Recovery/IA as deployed Mobile Disaster Recovery Centers (MDRCs). MCOVs provide a seamless transition from response to recovery using reliable mobile communications platforms to provide incident response support to the public.

The **National Incident Management Assistance Teams (IMATs)** provide the initial National rapid response to major incidents, disasters, special events, and exercises. The primary mission of the National IMATs is to deploy rapidly to an incident or threatened area, state, or FEMA region to work with the affected State(s) to identify and satisfy initial requirements for Federal assistance. IMATs coordinate and integrate inter jurisdictional response in support of the affected State(s) or U.S. territory(s). Additionally, IMATs specialize in management and assistance for chemical, biological, radiological, nuclear, and explosives (CBRNE) incidents. National IMATs provide initial situational awareness for Federal decision-makers, and support the initial establishment of a unified command.

Recovery Directorate

The Recovery Directorate works to ensure that individuals and communities affected by disasters of all sizes are able to return to normal with minimal suffering and disruption of services. Program activities focus on improving efficiency and expediting delivery of disaster assistance to eligible individuals; to State, local, and tribal governments; and to eligible private nonprofit organizations. This is accomplished through a commitment to streamlined procedures to improve program policy, to minimize error, and to modernize service delivery technology.

Annual costs for the following readiness contracts, staff, and activities are funded through the DRS (actual deployment or assistance costs incurred pursuant to declarations will continue to be funded from the specific declarations):

- Contract Support
 - Individual Assistance Technical Assistance (IA-TAC)
 - Public Assistance Technical Assistance (PA-TAC)
 - Housing Inspection Services
 - Mail Operations

- Enterprise Application Development Integration and Sustainment and Recovery Management Tools
- Corporate Lodging Consultants
- Surge Staffing for Registration Intake
- Disaster Legal Services Training and Support
- National Processing Service Centers (NPSCs)
 - Readiness costs, including equipment, rent, and security, for FEMA’s three NPSCs located in Maryland, Texas, and Virginia. The NPSC facilities provide FEMA call center and benefits processing capabilities to register and process disaster survivors’ applications.
 - Developers to make continuous updates to the National Emergency Management Information System to ensure that processing complements the most up-to-date IA policies.
- Individual Assistance Readiness Support
 - Funding is utilized to support travel and equipment needed to ensure the delivery of IA programs under Emergency Support Function #6. This includes costs for all-hazard disaster planning with State, local, Regional, Federal, nongovernmental and voluntary agency partners; recovery program evaluations; travel and salaries to support Reservists engaged in readiness planning, training, and delivery, as well as program closeout.
- Interagency Agreements (IAAs)
 - Crisis Counseling Assistance and Training Program (CCATP). The Center for Mental Health Services of the U.S. Department of Health and Human Services provides critical technical support in the management of FEMA’s CCATP. FEMA annually funds three permanent full-time positions, contract support, travel, equipment supplies, and administrative costs through an IAA. When the program is activated pursuant to a disaster declaration, assistance is charged to the declaration’s costs under the DRF.
 - Disaster Unemployment Assistance (DUA). The Employment and Training Administration within the Department of Labor (DOL) administers the DUA Program on FEMA’s behalf. As such, FEMA annually funds DOL through an interagency agreement to perform this function. When the program is activated pursuant to a disaster declaration, assistance is charged to the declaration’s costs under the DRF.
- Maintain a Web-based Public Assistance Program
 - DRS funding is used to maintain a web-based capability (Emergency Management Mission Integrated Environment) for the PA Program that allows FEMA staff, PA applicants, and States to perform all PA grant management activities online and supports the use of state-of-the art technology such as wireless handheld devices used by PA staff and contractors to perform inspections on damaged facilities. The inspection information is uploaded automatically into the Web-based system, eliminating a paper-based process, improving efficiency, and attaining cost savings.

Logistics Management Directorate (LMD)

The mission of the Logistics Management Directorate (LMD) is to effectively plan, manage and sustain national logistics response and recovery operations, in support of domestic emergencies and

special events – to act as the Whole Community Logistics Coordinator and single logistics integrator for National incident support.

Disaster Logistics Distribution Management Operations (DM) manages the Agency’s warehouse facilities and transportation systems used to receive, store, maintain, issue, distribute and track supplies, services, material, and equipment.

Logistics System Office (LSO) supports FEMA’s mission of responding to all hazards expediently and efficiently by managing the nation’s end-to-end supply chain of critical disaster assets and commodities. The Logistics Supply Chain Management System (LSCMS) manages the supply chain process including – initial request for assets and commodities, orders to FEMA and partners, transportation, inventory management at FEMA locations, shipment and receipt by the States. LSCMS provides situational awareness and in-transit visibility through reporting and GIS mapping capabilities.

Disaster Logistics Operations (LO) manage and execute the coordination, communications, tracking and reporting for all hazards operations and serve as the central reporting element for the National Response Coordination Center on all logistics actions and operational activities.

Disaster Logistics Property Accountability, Oversight, and Coordination provides industry standards (using American Society for Testing and Materials voluntary consensus standards) quality assurance, customer assistance and technical reviews of property accountability, inventory services, and oversight of disposal and donations of agency disaster-funded supplies and equipment.

Office of the Federal Disaster Coordinating Officer (OFDC)

OFDC leads, trains, equips, and manages FEMA’s Federal Coordinating Officers (FCO) and Federal Disaster Recovery Coordinators (FDRC) to ensure their availability for rapid deployment in response to any disaster; to deliver training to develop and sustain FCO and FDRC professional competencies; and to coordinate FCO and FDRC assignments to meet the on-scene needs of FEMA and its emergency management partners. In the event of a Presidential disaster declaration, a Federal Coordinating Officer (FCO) is designated by name in the President’s letter.

Upon declaration of a major disaster or emergency, the FEMA Administrator appoints an FCO who is charged with initiating all actions necessary to assure that Federal assistance is provided in accordance with the declaration, applicable laws, regulations, and the FEMA-State agreement.

Mission Support Bureau (MSB)

The MSB supports all facets of the Agency’s mission by providing strategic leadership and assuring the timely, efficient, and effective delivery of administrative, property management, health and safety, human capital, Information Technology (IT), procurement, security services, and business function capabilities. This range of capabilities supports the entire enterprise of FEMA’s mission activities that range from performing Urban Search and Rescue; taking in and managing requests for IA and PA grants; and approving and paying those grants; to managing flood insurance policies for the Nation’s citizens.

Office of Chief Financial Officer (OCFO)

OCFO leads the effort to maximize the impact of financial resources and ensure accountability to support the mission of FEMA.

OCFO oversees planning and response activities of the financial management members of FEMA's emergency teams and management of the national Disaster Comptroller cadre. FEMA maintained a class of employees referred to as non-disaster specific (NDS) COREs to perform essential duties that cannot reasonably be attributed on a disaster-specific basis. .

Procurement Activities

FY 2012 Activity Funding (\$millions) \$25.336	FY 2013 Activity Funding (\$millions) \$25.336	FY 2014 Activity Request (\$millions) \$25.336
Housing Inspection Services (HIS)	<p>Housing Inspection Services (HIS) is responsible for providing inspection staff and logistics to any Presidentially declared disaster. The state of readiness is 24 hours a day, 7 days a week, 365 days a year. These contracts provide human resources to verify residential damage caused by disasters of all kinds. The cost to repair a home is recorded by an inspector in the National Emergency Management Information System (NEMIS) data base system and becomes a grant award for the survivor.</p> <p>HIS addresses the capability gap in providing inspection staff and logistics to any Presidentially declared disaster, delivering an average number of inspections of 400K units per year for FY 13 and in the out years, for cost projection purposes.</p>	
FY 2012 Activity Funding (\$millions) \$25.884	FY 2013 Activity Funding (\$millions) \$26.571	FY 2014 Activity Request (\$millions) \$26.122
Logistics Supply Chain Management (LSCMS)	<p>The Logistics Supply Chain Management System (LSCMS) Program, previously known as Total Asset Visibility (TAV), supports FEMA's mission of responding to all hazards expediently and efficiently by managing the nation's end-to-end supply chain of disaster assets and commodities. LSCMS provides systems and processes for managing the disaster supply chain including initial request for assets and commodities, orders to FEMA and partners, transportation of disaster goods, inventory management at FEMA locations, shipment, and receipt by the States. LSCMS provides situational awareness and in-transit visibility through reporting and GIS mapping capabilities showing in-transit location of disaster shipments. With FOC, LSCMS will provide automated systems and processes for management of the end-to-end supply chain, and near real-time situational awareness and management information for FEMA, DHS, and other decision makers.</p> <p>LSCMS addresses a capability gap by providing full disaster supply chain visibility to FEMA and its partners. LSCMS will be incrementally migrating to a DHS Data Center capability during the coming year.</p>	

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), [\$6,088,926,000] \$6,220,908,000¹ to remain available until expended,: Provided, That of the funds provided herein, [\$5,481,000,000] \$5,626,386,000² shall be for major disasters declared pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C.5121 et seq.): Provided further, That the amount for major disasters in the previous proviso is designated by the Congress as being for disaster relief pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: Provided further, That of which \$24,000,000 shall be transferred to the Department of Homeland Security Office of Inspector General for audits and investigations related to disasters.

Explanation of Changes:

Language Provision	Explanation
¹ ...[\$6,088,926,000] <u>\$6,220,908,000</u> ...	Dollar change only. No substantial change proposed.
² ... fund provided herein, [\$5,481,000,000] <u>\$5,626,386,000</u> ² shall be for major disasters declared ...	Dollar change only. No substantial change proposed.

Disaster Relief Fund Mission Statement

Operating Activities includes the essential functions for all of FEMA's major mission organizations and directly supports FEMA's primary mission to reduce the loss of life and property and to protect the Nation from all hazards. Operating Activities leads and supports the Nation through a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	177,868	179,937	182,825	2,888
11.3 Other than full-time permanent	156,087	156,087	158,973	2,886
11.5 Other personnel compensation	97,820	97,820	97,820	-
12.1 Benefits	90,866	92,934	95,822	2,888
13.0 Unemployment Compensation	20,790	20,790	20,790	-
Total, Salaries & Benefits	543,431	547,568	556,230	12,799

Salaries and Benefits includes costs for 7,134 FTEs. The FY 2014 request reflects a 1% pay increase of \$12,799,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$169,359	\$152,423	\$137,159	-32,200

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. There is a decrease of \$32,200,000 in FY 2014 funding level as compared to FY 2013.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA Rent	\$53,121	\$60,121	\$60,121	\$7,000

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. There is decrease of \$7,000,000 in FY 2014 funding level as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$47,703	\$47,703	\$46,703	-\$1,000

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility service.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$31,258	\$31,258	\$29,695	-\$1,563

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$480,610	\$480,610	\$262,810	-\$217,800

Other services include report contracted services with non-Federal sources that are not otherwise classified under Object Class 25. This decrease reflects the shift of disaster employee's unemployment claims to the BCA.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$629,311	\$629,311	\$464,100	-\$165,211

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$64,172	\$64,172	\$59,172	-\$5,000

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$136,132	\$136,132	\$42,132	-\$94,000

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
41.0 Grants/Subsidies/Contributions	\$4,843,144	\$6,072,784	\$5,261,027	417,883

Grants/Subsidies/Contributions includes cash payments to states, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency Flood Hazard Mapping and Risk Analysis

I. Appropriation Overview

A. Mission Statement for Flood Hazard Mapping and Risk Analysis:

The mission of the Flood Hazard Mapping and Risk Analysis fund, Risk MAP, is to deliver quality data that increases public awareness and leads to action that reduces risk to life and property through collaboration with State, Local, and Tribal entities. The Risk MAP Program drives national actions to reduce flood risk by addressing flood hazard data update needs, supporting local government hazard mitigation planning, and providing the flood risk data needed to manage the National Flood Insurance Program (NFIP) financial exposure.

B. Budget Activities:

Mapping and Risk Analysis

FEMA is charged with maintaining reliable flood hazard information to support the NFIP, where the U.S. Government has an exposure of \$1.2 trillion. The flood hazard maps determine who is required to purchase flood insurance in order to reduce taxpayer costs for flooding damage. The maps are used to price the insurance to support the financial strength of the NFIP.

These NFIP mapping efforts also provide communities and citizens with information they need to reduce the risk of loss of life and property from flooding. Funding for Risk MAP supports FEMA's efforts to address existing gaps in the flood hazard data inventory and address changes that continue to occur over time. The reliability of flood hazard analyses and maps erodes over time. Changes in the built environment, additional storm and precipitation data, and improvements in the engineering science all affect the currency of the risk analysis products. These changes can move in both directions: as the precision of maps has been refined in recent years, as many structures have been taken out of designated Special Flood Hazard Areas (SFHA) as have been newly designated inside the SFHA.

Risk Communications and Outreach

Through Risk MAP, FEMA is increasing its focus on community engagement activities as an integral part of flood risk study projects in order to increase local officials' awareness of flood risk so that they take actions to reduce the risk. The primary mechanism through which Risk MAP increases local officials' awareness is through the interactions that occur during flood map updates. Awareness tends to decrease over time when years can pass between major flood events and flood map updates. Memories fade, local staff changes, and there is a natural tendency for people to minimize risks that they live with every day. The updating process helps to ensure that the topic of flooding remains prevalent at the local level.

Actions to Reduce Risk

During the Risk MAP process, FEMA works with community officials to identify specific steps communities and individuals can take to mitigate their flood risk. By increasing local officials' awareness of risk and identifying actions to reduce that risk, Risk MAP is leveraging the NFIP map update process to drive local actions to reduce risk.

C. Budget Request Summary:

The Federal Emergency Management Agency requests 57 positions, 57 FTE, and \$84.361 million for the FY 2014 Request. The total adjustments-to-base is an increase of 20 FTE and \$.032 million. The program change includes a reduction of \$13.4, million for a shift in Agency requirements.

Total Change 2012 to 2014	-	-	(13,351)

FEMA requests \$84.4 million in FY 2014 for this activity. The requested funding will allow FEMA to continue implementing a multi-year mapping effort intended to meet the statutory requirement to review the flood hazards maps on a five-year cycle and address flood hazard data update needs over time.

TABLE 1

TOTAL	\$84,361,000	\$120,600,000	\$204,961,000
FTE	57	83	140

CURRENT SERVICES PROGRAM DESCRIPTION:

FEMA’s Risk MAP program and the National Flood Insurance Program (NFIP) that it supports are essential to managing and reducing the risk from flood. Risk MAP provides the intelligence that enables the NFIP and the communities implementing it to reduce the costs of flooding by supporting management and mitigation of flood risks.

The maps generated through the Risk MAP program identify areas most vulnerable to flooding. They alert homeowners of the inherent risk and necessity for flood insurance. They inform communities on effective floodplain management, leading to improved building practices and site development for new construction. Without updated maps, disaster survivors and their communities are more reliant on the Disaster Relief Fund's Individual Assistance program to aid their recovery.

FEMA's Risk MAP program builds state, local, and tribal resilience before, during and after major flood events like Hurricane Sandy. Prior to landfall, the Risk MAP program had been investing significantly in developing improved coastal flood hazard and risk data along the New York and New Jersey shorelines. Further, FEMA Regional offices had already begun building and supplementing state and local coastal flood risk management capabilities and strengthening relationships among those responsible for public safety along the coast. Specific partnerships in New Jersey, New York, and New York City were well established prior to landfall with the Department of Environmental Protection, Department of Environmental Conservation, and the Mayor's Office of Long Term Recovery and Sustainability.

The relationships, flood risk data, and risk management capabilities developed through Risk MAP prior to landfall had profound impact on the speed and strength of recovery from this devastating event. The ongoing Risk MAP projects show the existing flood hazard data understates the threat in many cases. Without Risk MAP, reconstruction of the hardest hit areas would have been based on the understated risk data, thus subjecting people to further harm and damage down the road and resulting in greater exposure and increased future disaster relief costs.

The necessity and impact of updated flood maps were also demonstrated explicitly during Hurricane Irene in 2012. Communities that had current flood threat data were more resilient and needed less DRF resources to recover. In Broome County, New York, a high school and hospital, which had experienced \$20 million in damages during a smaller flood in 2006, avoided the flood damage they had previously experienced during the more severe flooding caused by Irene.

Risk MAP is the principal way that FEMA equips communities with the knowledge to analyze their flood threat as the community prepares its Threat and Hazards Identification and Risk Assessment (THIRA). Risk MAP is FEMA's primary vehicle for implementing the community resilience doctrine articulated in Presidential Policy Directive-8 and the Presidentially-mandated National Mitigation Framework.

FEMA has defined measures in three key areas. These measures track progress in addressing gaps in flood hazard data, deployment of Risk MAP, increase in risk awareness of local officials, and action to reduce risk. The measures are:

- Ensure 80 percent of the Nation's flood hazard data is current – the flood hazard data are new, have been updated, or are deemed still valid through the Risk MAP review and update process during the initial implementation of Risk MAP.
- Increase the percentage of population in watersheds where Risk MAP has begun.
- Ensure 70 percent of local official flood risk awareness in Risk MAP communities.

FEMA's FY 2014 Risk MAP approach will support local risk assessment and planning activities while addressing the flood hazard data update needs. The primary focus areas are significant riverine flood hazard data update needs, mapping of areas impacted by levees and implementation of the requirements of the Biggert-Waters NFIP Reform Act of 2012. FEMA will dedicate funding to updating riverine hazard engineering analyses using a watershed approach. This also includes other non-coastal flood hazards like ponding and shallow flooding. The reliability of flood hazard analyses and maps erodes over time. Changes in the built environment, additional storm, and precipitation data, and improvements in the engineering science all affect the currency of the risk analysis products. In 2014, FEMA will continue its watershed validation strategy to identify physical, climatological, and scientific changes that impact the currency of existing flood hazard information. FEMA will document engineering gaps identified and use this data to support prioritization of flood map updates.

FEMA will initiate new Risk MAP projects in watersheds with high risk, significant flood hazard data update needs, the potential to generate community actions to reduce flood risk, and the potential for partner cost sharing. This investment will maintain the existing level of flood hazard data update needs by initiating updates for 9,000 miles of inland flooding sources, offsetting the new flood hazard data update needs expected to be identified. This will maintain the percent of flood hazard data available or in work that meets new, valid, or updated engineering standards at 61 percent. This will also increase the population in watersheds where Risk MAP has begun from 47 percent to 50 percent of the U.S. population.

When FEMA initiates a Risk MAP project in a watershed, it begins a community engagement process that continues throughout the lifecycle of the project. Through 'whole community' engagement processes, FEMA is working to:

- understand specific community needs and capabilities;
- better bundle the information and products; and
- leverage relationship owners to build a long-term relationship with key officials.

During the implementation of Risk MAP, sustainable partnerships will continue to be vital. FEMA will maintain its partnerships and seek out new collaborations to support the Risk MAP program. When targeted at known flood hazard data update needs and included in the partnership agreement, FEMA will give its highest investment priority to capable partners who provide a 25 percent cost share. FEMA typically receives these partner contributions through existing successful partnerships within the Cooperating Technical Partners (CTP) Program.

Risk MAP has completed funding all the engineering work to update the flood hazards for the populated coastline of the United States in FY 2013. This represents a significant investment, massive updates to flood hazard data in the riskiest areas of the nation, a very large number of people impacted and substantial financial impacts to many of those affected. As a result, FEMA expects there will be a need for enhanced community engagement and additional investment to defend the validity of revised coastal flood hazards as the final products are rolled out.

In addition, the passage of the Biggert-Waters NFIP Reform Act of 2012 has created several new elements to the NFIP flood hazard mapping program and a Technical Mapping Advisory Council that

will make ongoing recommendations for changes to the mapping program. As the details and scope of this new work are defined, this will affect specifics of how Risk MAP is delivered.

IV. Program Justification Changes

**Department of Homeland Security
Federal Emergency Management Agency
Flood Hazard Mapping and Risk Analysis
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease							-	-	(13,383)
Total Request	57	37	97,712	57	57	98,310	57	57	84,361

Description of Item

The FY 2014 Budget request will provide for additional Risk Mapping, Assessment and Planning (MAP) projects sufficient to increase the percentage of flood hazard data that meet new, valid, or updated engineering standards, maintain local officials' flood risk awareness, and encourage local actions to reduce risk.

Justification

Funding in FY 2014 will provide for the annualization of salaries and benefits, and support the continuation of activities as described in the Risk MAP Multi-Year Plan. FEMA staff is critical to the effectiveness of the Risk MAP outreach mission as the primary, interface with local governments.

Impact on Performance (Relationship of Increase to Strategic Goals)

This reduction in funding will be mitigated by efficient use of existing flood hazard data and close coordination with local communities.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses, including administrative costs, under section 1360 of the National Flood Insurance Act of 1968 (42 U.S.C. 4101), [\$89,361,000]\$84,361,000¹, and for sections 100215, 100216, 100226, 100230, and 100246 under Biggert-Waters Flood Insurance Reform Act of 2012, Pub. L. 112-141, 126 Stat. 917², and such additional sums as may be provided by State and local governments or other political subdivisions for cost-shared mapping activities under section 1360(f)(2) of such Act (42 U.S.C. 4101(f)(2)), to remain available until expended.

Explanation of Changes

Language Provision	Explanation
¹ ...[\$89,361,000] <u>\$84,361,000</u> ...	Dollar change only. No substantial change proposed.
² ... <u>and for sections 100215, 100216, 100226, 100230, and 100246 under Biggert-Waters Flood Insurance Reform Act of 2012, Pub. L. 112-141, 126 Stat. 917</u> ...	Updates legislation to reference Biggert-Waters Act of 2012.

Flood Hazard Mapping and Risk Analysis Mission Statement

The mission of the Flood Hazard Mapping and Risk Analysis fund (Risk MAP) is to deliver quality data that increases public awareness and leads to action that reduces risk to life and property through collaboration with State, Local, and Tribal entities. The Risk MAP Program drives national actions to reduce flood risk by addressing flood hazard data update needs, supporting local government hazard mitigation planning, and providing the flood risk data needed to manage the National Flood Insurance Program (NFIP) financial exposure.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	3,193	4,760	4,777	1,584

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency National Flood Insurance Fund National Flood Insurance Reserve Fund

I. Appropriation Overview

A. Mission Statement:

National Flood Insurance Fund

The National Flood Insurance Fund (NFIF), which was established in the Treasury by the National Flood Insurance Act of 1968 (Act), is a premium and fee-generated fund that supports the National Flood Insurance Program (NFIP). The Act, as amended, authorizes the Federal Government to provide flood insurance on a national basis.

National Flood Insurance Relief Fund

The Biggert-Waters Flood Insurance Reform Act of 2012 (BW) requires FEMA to establish an additional fund in the U.S. Treasury, National Flood Insurance Reserve Fund, to meet the future obligations of the NFIP.

B. Budget Activities:

Biggert-Waters Flood Insurance Reform Act of 2012

The Biggert-Waters Flood Insurance Reform Act of 2012 was signed into law July 6, 2012 to strengthen the NFIP and its fiscal soundness. Prior to this Act, the NFIP was, by statute and design, not actuarially sound. At the time the Act was passed, approximately 80% of the NFIP policyholders paid premiums that were actuarially sound including the expectation of catastrophic events, but 20% of the policyholders, including many of the NFIP's highest risk structures (built before the Program was enacted and the nation's flood risk was identified), paid premiums that were less than actuarially sound. This resulted in subsidized premiums. The level of the subsidy was set so that the aggregate premium of the actuarial and subsidized policyholders combined would be at least sufficient to cover a "typical" loss year referred to as the "historical average non-catastrophic loss year". The Biggert-Waters Flood Insurance Reform Act of 2012 improves fiscal soundness by phasing out subsidies and establishing a reserve fund in accordance with the milestones below.

**Implementation of Major Provisions of the
Biggert-Waters Flood Insurance Reform Act of 2012**

Date of Implementation	Who Is Affected	What Will Happen	Why Is It Changing
January 1, 2013	<ul style="list-style-type: none"> • Homeowners with subsidized insurance rates on non-primary residences • Properties receiving subsidized insurance rates are those structures built prior to the first Flood Insurance Rate Map (pre-FIRM properties) that have not been substantially damaged or improved. 	<ul style="list-style-type: none"> • 25 percent increase in premium rates each year until premiums reflect full risk rates 	<ul style="list-style-type: none"> • The Act calls for the phase-out of subsidies and discounts on flood insurance premiums • This premium increase is outlined in Section 100205 • The phase out of subsidies affecting non-primary residences was also mandated by earlier 2012 legislation, HR 5740.
October 1, 2013	<ul style="list-style-type: none"> • Owners of business properties with subsidized premiums • Owners of severe repetitive loss properties consisting of 1-4 residences with subsidized premiums 	<ul style="list-style-type: none"> • 25 percent increase in premium rates each year until premiums reflect full risk rates 	<ul style="list-style-type: none"> • The Act calls for the phase-out of subsidies and discounts on flood insurance premiums • These premium increases are outlined in Section 100205
	<ul style="list-style-type: none"> • Owners of any property that has incurred flood-related damage in which the cumulative amounts of claims payments exceeded the fair market value of such property. <p>Owners of property</p> <ul style="list-style-type: none"> • not insured as of the date of enactment of the Act; • with a lapsed NFIP policy; • That has been purchased after the date of enactment of the Act 	<ul style="list-style-type: none"> • Full-risk rates will apply to these policies 	<ul style="list-style-type: none"> • The Act calls for the phase-out of subsidies and discounts on flood insurance premiums • These premium increases are outlined in Section 100205
	<ul style="list-style-type: none"> • All policies except Preferred Risk Policies 	<ul style="list-style-type: none"> • Premiums will include a 5% reserve fund load October 1, 2013. The reserve fund load will increase 5% per year until the reserve fund target ratio contribution is achieved 	<ul style="list-style-type: none"> • The Act calls for the establishment of a reserve fund funded by increased premiums • These premium increases are outlined in section 100212

Phasing out Subsidies

The Act phases out the subsidy for structures built before their flood risk was identified on a Flood Insurance Rate Map (FIRM). These structures are referred to as pre-FIRM structures. Premiums for

pre-FIRM subsidized second homes, businesses, Severe Repetitive Loss properties, and substantially damaged or improved structures are to be increased 25% per year until the premiums are actuarially sound. Subsidies for primary residences may continue until the home is sold to a new owner or the policy is allowed to lapse. All new policies must pay full actuarial premiums.

Establishing a Reserve Fund

The Act requires establishment of an NFIP Reserve Fund that is targeted to one percent of the NFIP's total coverage amount purchased by all policyholders. The NFIP is authorized to collect and deposit 7.5% of the reserve fund target through additional premium Reserve Fund charges. The amounts in the Reserve Fund can be used for the payment of claims and claims handling expenses as well as principal and interest payments on any outstanding Treasury loans. The first Reserve Fund collections will be introduced on October 1, 2013.

Losses used for budget projections

Estimating the NFIP losses is challenging because losses vary greatly from year to year. NFIP losses during non-catastrophic years can range from a few hundred million to several billion dollars. Catastrophic events like Hurricane Katrina can result in tens of billions of dollars in losses. The NFIP has had only one catastrophic loss year prior to 2013. That year was 2005, which included losses from Hurricanes Katrina, Rita and Wilma.

To more accurately estimate the full potential loss for the NFIP, the model underlying the FY 2014 Budget estimates catastrophic NFIP losses beyond the ten-year budget window. If no catastrophic events occur during the forecast period, estimated losses may far exceed actual losses. Conversely, if one or more catastrophic events occur during the forecast period, actual losses may far exceed the estimated losses. Loss estimates in budgets prior to FY 2014 reflected only the expectation of non-catastrophic losses. Non catastrophic losses were used because they illustrate typical annual losses. However, these estimates did not acknowledge the enormous loss potential of catastrophic loss years, which were experienced during Hurricanes Katrina and Sandy.

Superstorm Sandy

Superstorm Sandy made landfall early in FY 2013 on October 29, 2012. On January 6, 2013 the NFIP's borrowing authority was increased \$9.7 billion from \$20.775 billion to \$30.475 billion. Losses for the remainder of 2013 and losses associated with Superstorm Sandy are estimated to exhaust all but \$1 billion of the NFIP's borrowing authority. The actual amount of borrowing authority remaining at the end of FY 2013 will depend upon the actual loss payouts for Superstorm Sandy and the number and size of losses associated with flooding events that occur during the remainder of FY 2013.

NFIP Program Elements

Funding for the National Flood Insurance Program is derived from offsetting collections from two primary sources:

- Flood insurance premiums, which are used to pay claims and flood-related grants, and provides funding to support the operating and administrative costs associated with maintaining the program.
- Policy fee income, also paid by flood insurance policy holders, supports floodplain management, flood mapping, insurance operations, and NFIP management.

The NFIP appropriation supports the following key program elements:

NFIP Management and Flood Insurance Operations

NFIP Management –supports the overall management of the National Flood Insurance Program (NFIP). FEMA applies insurance concepts and methods to reduce the Nation's vulnerability to natural flood hazards and manages NFIP to provide consumer-oriented flood insurance to accelerate recovery from floods, to mitigate future losses, and to reduce personal and national costs of flood disasters. FEMA administers NFIP so that insurance and floodplain management policies and operations are mutually reinforcing. Further, FEMA works to increase the NFIP policy base so that more people are indemnified by insurance from future financial losses from flood, facilitating their recovery, rebuilding communities, and reducing costs to taxpayers.

Flood Insurance Operations - provides for all aspects of managing the insurance program including: the development and oversight of insurance coverage policy and regulations; analysis and evaluation of insurance risks and claims data used to determine premium rates; and, oversight of insurance companies that write flood insurance policies and adjust claims.

Floodplain Management and Flood Mapping

Flood Hazard Mapping and Risk Analysis - a multi-year mapping effort intended to meet the FEMA statutory requirement to review the flood hazards maps on a five-year cycle and address flood hazard data update needs over a longer time horizon. Risk MAP is an integrated flood risk management approach, weaving county-level flood hazard data developed in support of NFIP into watershed-based risk assessments that serve as the foundation for local Hazard Mitigation Plans and targeted risk communication activities.

Floodplain Management - funds salaries and expenses for the implementation staff at FEMA's Headquarters and 10 regional offices to administer and deliver floodplain management activities that reduce flood risk. These activities include development of policy, guidance, regulations, and publications, and the provision of compliance monitoring and technical assistance.

National Flood Insurance Fund (Mandatory)

The National Flood Insurance Act of 1968 (42 U.S.C. § 4001 et seq.), as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued only in communities that participate in NFIP, and that enact and enforce appropriate floodplain management measures. Federally regulated funding institutions cannot provide loans for properties in nonparticipating communities with an identified flood hazard.

Flood-Related Grants

NFIF supports flood hazard reduction efforts facilitated through its flood-related grants and assistance program, Flood Mitigation Assistance (FMA). The FMA provides grants to States, communities and tribal nations to reduce the risk of flood damage to existing buildings and infrastructure by providing grants to States, communities, and tribal nations. Flood-Related grants fund activities that decrease or eliminate risk of flood damage to structures insured under NFIP. Flood-Related grants also fund activities that decrease the long-term risk of flood damage to structures insured under NFIP that have experienced losses from previous flood damage.

C. Budget Request Summary:

FEMA requests spending authority from mandatory and discretionary offsetting collections (i.e. premium collections) of \$3.5 billion and \$176 million from Federal Policy Fee income in FY 2014. The increase is due to additional revenue collections anticipated from implementing provisions of the Biggert-Waters Flood Insurance Reform Act of 2012, including regulatory and policy changes that will enhance National Flood Insurance Program fiscal solvency, and flood policy rate increases. This is also the first year FEMA use a model that estimates catastrophic NFIP losses for over the ten-year budget window. For FY 2014, FEMA projects a \$3.3 million increase in funding from FY 2012. Premium collections will be used to pay NFIP claims in addition to operating expenses. These funds also will support the flood-related grants.

2014 Adjustments-to-Base	3	11	-
2014 Current Services	107	101	22,000
2014 Total Request	107	101	22,000
Total Change 2012 to 2014	3	11	-

FEMA requests \$22 million in FY 2014 for this activity. Funding will support salaries and operating costs for flood insurance operations and flood mitigation activities and for implementing provisions of the new legislation.

CURRENT SERVICES PROGRAM DESCRIPTION:

Flood Mitigation and Flood Insurance Operations activities include management and oversight of NFIP insurance activities, business operations support, stakeholder engagement, outreach support, business process management and improvement activities. Appropriated funding also supports information systems support activities associated with the Federal Insurance and Mitigation Administration’s (FIMA) executive oversight. In FY 2014, FEMA will implement provisions of the Biggert-Waters Flood Insurance Reform Act of 2012 and provide guidance to the Write Your Own (WYO) insurance companies on how to implement new provisions of the statute.

Flood Insurance Operations activities include:

- Actuarial management to analyze insurance risks, claims data, and financial models in order to evaluate and communicate all aspects of the financial solvency of the program and to set the appropriate premium rates.
- Operations management for more than 5.6 million NFIP flood policies with more than \$1.2 trillion of insurance in force, to include issuance, renewal, claims, and resolution of claims appeals.

- Underwriting management to set policy and develop regulations regarding insurance coverage eligibility and the classification of risks.
- Claims management to set policy and develop regulations regarding the adjustment and payment of claims.
- Management of the private insurance companies that write flood insurance policies and adjust claims for the NFIP, including conducting periodic operational reviews.
- Education, training, and technical assistance for private insurance company agents and adjusters.
- Management of the vendors that supply services to NFIP, such as the Bureau and Statistical Agent and the Direct Servicing Agent.
- Management of flood insurance marketing and public communications, including advertising, community outreach programs, and publicity.
- Partnering with stakeholders in the private sector and other government agencies, including lenders who require the purchase of flood insurance for certain loans.

2014 Total Request	217	211	154,300
Total Change 2012 to 2014	11	15	5,300

FEMA requests \$154.3 million in FY 2014 for this activity by means of anticipated Federal policy fee revenue. Funding will support salaries and operating costs for ongoing floodplain management and flood mapping efforts and for implementing provisions of the new legislation.

CURRENT SERVICES PROGRAM DESCRIPTION:

Floodplain Management

Floodplain Management programs are designed to reduce risk through land use and building code regulations. Floodplain management activities are authorized under the National Flood Insurance Act, as amended. Through these programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Structures built to NFIP standards experience 80 percent less damage than structures not built to these standards.

FEMA and States partner in the Community Assistance Program-State Support Services Element (CAP-SSSE) program to provide a means to ensure that communities participating in NFIP are achieving the flood loss reduction goals of the NFIP through a state grant mechanism. CAP-SSSE funds States to provide significant technical assistance to NFIP communities and to evaluate community performance in implementing NFIP floodplain management activities with the additional goal of building State and community floodplain management expertise and capability. The grant is a product-oriented program directly related to the flood loss reduction objectives of NFIP.

FIMA has initiated a study to validate/improve on the methodology it uses to estimate the future losses avoided related to structures built in compliance with NFIP floodplain managements standards. FEMA will complete the study by the end of 2013.

NFIF supports the salaries and expenses of program management and implementation staff at FEMA's Headquarters and 10 regional offices that administer floodplain management programs. The responsibilities of these offices include reducing flood risk through floodplain management and flood hazard reduction efforts, providing technical assistance to communities participating in NFIP, and administration of the CAP-SSSE grant program. The salaries and expenses funding allows program staff: to deliver technical assistance to NFIP participating communities; to strengthen local flood loss reduction programs through onsite visits; and to provide funding for the necessary supplies and equipment, including computer equipment and other needed resources, to meet the mission of the program.

Flood Hazard Mapping and Risk Analysis

The Flood Hazard Mapping and Risk Analysis Program addresses flood hazard data update needs and preserves the successful Flood Map Modernization investment. The requested FY 2014 funding will allow FEMA to continue implementing a multi-year mapping effort that meets the FEMA statutory requirement to review the flood hazards maps on a five-year cycle and address flood hazard data update needs over a longer time horizon, as funding is available.

FEMA's FY 2014 Risk MAP approach will support local risk assessment and planning activities while addressing the flood hazard data update needs. Risk MAP provides the intelligence that enables the National Flood Insurance Program and the communities implementing it to reduce the costs of flooding by supporting management and mitigation of flood risks. The maps generated through the Risk MAP program identify areas most vulnerable to flooding. They alert homeowners of the inherent risk and necessity for flood insurance. They inform communities for effective floodplain management, leading to improved building practices and site development for new construction. Without updated maps, disaster survivors and their communities are more reliant on the Disaster Relief Fund (DRF) to aid their recovery. The primary focus areas are significant riverine flood hazard data update needs, mapping of areas impacted by levees and implementation of the requirements of the Biggert-Waters NFIP Reform Act of 2012.

FEMA's Risk MAP activities are funded from two primary sources of funds – the Flood Hazard Mapping and Risk Analysis Fund and the NFIF. Both sources of funding are critical to the development and implementation of new flood maps in communities across the Nation. The NFIF funding is the core funding for the program and supports all aspects of the program including map production and technical services.

PROCUREMENT ACTIVITIES

Procurement Activity Name	FYHSP Description	FY 2012 Activity Funding	FY 2013 Activity Funding	FY 2014 Activity Request
Risk Mapping, Analysis and Planning	<p>The purpose of the Risk Mapping, Assessment, and Planning Program (RiskMAP) is to Mitigate Hazards (DHS Quadrennial Homeland Security Review - QHSR Goal 5.1) by delivering quality data that increase public awareness of natural hazards and lead to action that reduces risk to life and property. RiskMAP is transforming its traditional flood identification and mapping efforts into a more integrated process of accurately identifying, assessing, communicating, planning, and mitigating flood - related risks. Over 90% of all natural disasters in the Nation involve flooding.</p> <p>RiskMAP fulfills a capability gap by delivering quality data that increase public awareness of natural hazards and lead to action that reduces risk to life and property. It is comprised of three major units: Program Enhancements, Program Operations, and Transition and Mobilization.</p>	\$119,723	\$118,017	\$119,126

FEMA requests \$3.5 billion in FY 2014 for this activity by means of anticipated premium revenue. Funding will provide for the payment of flood claims and operating costs of the program including Write Your Own (WYO) expenses and commissions and interest expenses, and for implementing the provisions of the new legislation.

CURRENT SERVICES PROGRAM DESCRIPTION:

NFIP Management

NFIP Management is the overall management and oversight of the NFIP operations including the selling and servicing of policies provided by the NFIP WYO partners. FEMA and its partners apply insurance industry concepts and methods to provide consumer-oriented flood insurance to accelerate recovery from floods. FEMA administers the NFIP so that insurance and floodplain management policies and operations are mutually reinforcing. Furthermore, FEMA works to increase the NFIP policy base so that more people are indemnified by insurance for future flood losses, facilitating their recovery, rebuilding communities, and reducing costs to taxpayers. Activities in this category include selling and servicing flood insurance policies, claims, and establishing appropriate premium rates.

NFIP Operation Expenses

FEMA provides for management and oversight of the insurance component of NFIP. This includes the development and oversight of insurance coverage policy and regulations; analysis and evaluation of insurance risks and claims data used to determine premium rates; and, oversight of insurance companies that write flood insurance policies and adjust claims. It also includes crosscutting activities

such as the Community Rating System (CRS) program, a Federal incentive program that rewards communities that take action to reduce flood losses, and NFIP operations in a post-disaster environment. Under the CRS, flood insurance premium rates are adjusted to reflect the reduced flood risk resulting from community activities that meet CRS goals, including reduction of flood losses, accurate insurance rating, and promotion of flood insurance awareness. Participating communities are rated by Class from 1 to 10, with Class 1 communities receiving the greatest premium rate reductions. Nonparticipating communities are rated as Class 10. Credits can be applied toward a community's CRS classification for various activities under the following floodplain management headings: Public Information, Mapping Regulations, Flood Damage Reduction, and Flood Preparedness. To support post-disaster operations, resources are provided to equip the mitigation disaster workforce with standards, training, and job aides to consistently inform disaster applicants about the NFIP in a post-disaster environment; and to effectively integrate NFIP into disaster operations, national disaster policy analysis, and crosscutting program and administrative issues.

2014 Total Request	29	29	100,000
Total Change 2012 to 2014	-	-	40,000

FEMA requests \$100 million in FY 2014 for this activity. Funding will provide for the payment of flood-related grants, and for implementing Section 225 Unification of Mitigation Grants Program provisions of the new legislation.

CURRENT SERVICES PROGRAM DESCRIPTION:

Flood Mitigation Assistance

A component of the business strategy is to reduce the risk associated with flood events through Flood-Related grants via the Flood Mitigation Assistance (FMA) program. The FMA grant program provides funding to States, federally recognized Indian tribal governments, and communities so that cost-effective measures can be taken to reduce or eliminate the long-term risk of flood damage to buildings, manufactured homes, and other structures insured under NFIP. The FMA program provides funds on an annual basis so that measures can be taken to reduce or eliminate risk of flood damage to buildings insured under the NFIP. On average, each dollar spent on Flood Mitigation grant activities reflects approximately \$2 in future losses avoided.

FEMA requests \$100 million in FY 2014 for this activity so that important loss reduction measures are completed. These measures include the acquisition and demolition of flood prone structures, the elevation of homes above expected flood levels, and the construction of minor drainage projects to reduce the impact of storms.

FEMA continues to unify the grant assistance previously delivered by the Repetitive Flood Claims and Severe Repetitive Loss programs into a single program, as mandated by the Biggert-Waters Flood Insurance Reform Act of 2012. FEMA expects that consolidation of these functions into a single

program will result in more efficient delivery of flood-related grants to States and local communities, thereby reducing future claims to the National Flood Insurance Program.

Severe Repetitive Loss

Section 100225 of the Biggert-Waters Flood Insurance Reform Act of 2012 rescinds the authorization for the Severe Repetitive Loss (SRL) Program. Through 2016, the program office will continue to provide technical assistance to applicants, as well as monitor and closeout open projects. SRL program funded positions will be reduced through natural attrition and reassigned to other mitigation programs.

Flood-Related Grant Program - Repetitive Flood Claims

Section 100225 of the Biggert-Waters Flood Insurance Reform Act of 2012 rescinds the authorization for the Repetitive Flood Claim (RFC) Program. Through 2016, the program office will continue to provide technical assistance to applicants, as well as monitor and closeout open projects. RFC program funded positions will be reduced through natural attrition and reassigned to other mitigation programs.

Total Change 2012 to 2014	-	-	162,000

FEMA requests \$162 million in FY 2014 for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Biggert-Waters Flood Insurance Reform Act of 2012 (BW) requires FEMA to establish an additional fund in the U.S. Treasury, National Flood Insurance Reserve Fund, to meet the future obligations of the NFIP. These obligations include paying claims, claims adjustment and expenses, and repayment of any outstanding debt owed to the U.S. Treasury under section 1309(a) [42 U.S.C. § 4016] of the Act. BW also authorized FEMA to increase or decrease premiums to enable FEMA to credit the Reserve Fund with a balance equal to 1 percent of the sum of the total potential loss exposure of all outstanding flood insurance policies in force in the prior year or a higher amount as determined necessary by the Administrator of FEMA. FEMA has established the Reserve Fund and intends to start collecting additional premiums for deposit into the fund in October 2013.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For activities under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), *the Biggert-Waters Flood Insurance Reform Act of 2012, Pub. L. 112-141*,¹ and the Flood Disaster Protection Act of 1973 (42 U.S.C. 4001 et seq.), [\$171,000,000] *\$176,300,000*², which shall remain available until September 30, [2014]*2015*³, and shall be derived from offsetting [collections assessed and] *amounts*⁴ collected under section 1308(d) of the National Flood Insurance Act of 1968 (42 U.S.C. 4015(d)), which is available for salaries and expenses associated with flood mitigation and flood insurance operations; and floodplain management and *additional amounts for*⁵ flood mapping: Provided, That [not to exceed]⁶ \$22,000,000 shall be available for salaries and expenses associated with flood mitigation and flood insurance operations; and [not less than \$149,000,000] *\$154,300,000*⁷ shall be available for flood plain management and flood mapping: Provided further, That any additional fees collected pursuant to section 1308(d) of the National Flood Insurance Act of 1968 (42 U.S.C. 4015(d)) shall be credited as an offsetting collection to this account, to be available for flood plain management and flood mapping: Provided further, That in fiscal year [2013]*2014*⁸, no funds shall be available from the National Flood Insurance Fund under section 1310 of that Act (42 U.S.C. 4017) in excess of:

- (1) \$132,000,000 for operating expenses;
- (2) [\$1,056,602,000]*\$1,152,000,000*⁹ for commissions and taxes of agents;
- (3) such sums as are necessary for interest on Treasury borrowings; and
- (4) [\$120,000,000]*\$100,000,000*¹⁰, which shall remain available until expended, for flood mitigation actions[; for repetitive insurance claims properties under section 1323 of the National Flood Insurance Act of 1968 (42 U.S.C. 4030);]¹¹ and for flood mitigation assistance under section 1366 of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c), notwithstanding subparagraphs (B) and (C) of subsection (b)(3) and subsection (f) of section 1366 of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c) and notwithstanding subsection (a)(7) of section 1310 of the National Flood Insurance Act of 1968 (42 U.S.C. 4017): Provided further, That the amounts collected under section 102 of the Flood Disaster Protection Act of 1973 (42 U.S.C. 4012a) and section 1366([i]*e*¹²) of the National Flood Insurance Act of 1968 shall be deposited in the National Flood Insurance Fund to supplement other amounts specified as available for section 1366 of the National Insurance Act of 1968, notwithstanding subsection (f)(8) of such section 102 (42 U.S.C. 4012a(f)(8) and subsection 1366([i]*e*) and paragraphs (2) [and (3)]*through (4)*¹³ of section 1367(b) of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c([i]*e*), 4104d(b)(2)-(3)): Provided further, That total administrative costs shall not exceed 4 percent of the total appropriation.

Flood Mitigation and Flood Insurance Operations Mission Statement

Resources under this activity support the salaries and expenses of FTE managing the National Flood Insurance Program (NFIP) and flood mitigation programs. In FY 2014 FEMA will continue to support the NFIP and to provide operational and administrative support for the Community Rating System and will enhance oversight of the program.

Floodplain Management and Flood Mapping Mission Statement

Through Floodplain Management programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Through the delivery of mitigation programs, FEMA leads a national effort to: identify and improve the understanding of communities' hazards and their risks; develop and improve techniques and planning processes which mitigate those risks; provide an environment at the State and local levels that is conducive to applying those techniques and processes; provide financial and technical assistance to facilitate application of those techniques and processes; and support development of incentives and disincentives which make application of those techniques and processes a social, political and/or economic priority.

National Flood Insurance Fund - Mandatory Mission Statement

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within 1 year of the time they are identified as flood-prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes. In addition, Federally regulated funding institutions cannot provide loans to nonparticipating communities with an identified flood hazard. More than 20,000 communities in all States and Territories participate in the NFIP. Structures built to NFIP criteria experience 80 percent less damage through reduced frequency and severity of losses. The flood mitigation program requirements are estimated to save in excess of \$1 billion per year in flood losses avoided. The NFIP limits the impact of disaster by encouraging property owners and others to manage their risk through flood insurance and other hazard insurance mechanisms.

Flood Related Grants Mission Statement

A component of the NFIP business strategy is to reduce the risk associated with flood events through floodplain management as well as through Flood-Related grants and assistance. FEMA provides funding to reduce the risk of flood damage to existing buildings and infrastructure by providing flood related grants to states, communities, and tribal nations. The FMA program provides funds on an annual basis so that measures can be taken to reduce or eliminate risk of flood damage to buildings insured under the NFIP.

**Federal Emergency Management Agency
Disaster Assistance Direct Loan Program**

I. Appropriation Overview

A. Mission Statement for Disaster Assistance Direct Loan Program:

The Disaster Assistance Direct Loan Program account provides loan authority and subsidy budget authority for disaster assistance direct loans.

B. Budget Activities:

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes two types of direct loans: (1) section 319 (State Share) loans to States for the non-Federal portion of cost-shared Stafford Act programs, and (2) section 417 (Community Disaster) loans to local governments that incurred substantial losses of tax and other revenues as a result of a major disaster and require financial assistance in order to perform governmental functions.

C. Budget Request Summary:

FEMA requests no subsidy budget authority or direct loan limitation in FY 2014.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

Note: The loan limitation amount above does not reflect the loan limitation carryover associated with the supplemental appropriation for section 419 Special Community Disaster Loans. FY 2013 data does not reflect the Sandy Supplemental (P.L. 113-2) of \$300M.

FEMA requests no subsidy budget authority or direct loan limitation in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Disaster Relief Appropriations Act, 2013 (P.L. 113-2) provides an appropriation of \$300,000,000 for the Disaster Assistance Direct Loan Program Account for the cost of direct loans which will remain available until expended. These funds are available to subsidize gross obligations for the principal amount of direct loans not to exceed \$400,000,000. The loans, with a term of five years, shall not exceed 25 percent of the annual operating budget of a local government for the fiscal year in which the major disaster occurred, or 50 percent of the annual operating budget for the fiscal year in which the major disaster occurred if the loss of tax and other revenues is at least 75 percent of the annual operating budget for the fiscal year in which the major disaster occurs, and may not exceed \$5 million. Funding for administrative expenses to carry out the direct loan program is provided in the amount of \$4,000,000.

Total Request	-	-	295	-	-	297	-	-	(295)

Description of Item

FEMA requests no subsidy budget authority or direct loan limitation in FY 2014.

Justification

Under 44 CFR 206.45, at the request of the Governor, FEMA is authorized to “lend or advance to a State, either for its own use or for the use of public or private nonprofit applicants for disaster assistance under the Stafford Act, the portion of assistance for which the State or other disaster assistance applicant is responsible under the cost-sharing provisions of the Stafford Act.”

Impact on Performance

There will be no impact on performance as FEMA has not provided a loan from this program since 1996.

Direct Loan Subsidy Mission Statement

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes two types of direct loans: 1) Section 319 (State Share) loans to States for the non-Federal portion of cost-shared Stafford Act Programs and 2) Section 417 (Community Disaster) loans to local governments that incurred substantial losses of tax and other revenues as a result of a major disaster and require financial assistance in order to perform governmental functions. In accordance with the Federal Credit Reform Act of 1990, this account supports subsidy budget authority and authorizes loan levels for the direct loan programs.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Emergency Management Agency United States Fire Administration

I. Appropriation Overview

A. Mission Statement for U.S. Fire Administration:

The mission of the United States Fire Administration (USFA) is to provide National leadership to foster a solid foundation for our fire and emergency services stakeholders in prevention, preparedness and response.

B. Budget Activities:

The United States Fire Administration was established to advance the professional development of fire service personnel and other persons engaged in fire prevention and control activities; to establish a technology program for the development, testing and evaluation of equipment for use by the Nation's fire, rescue, and civil defense services; and to establish a National Fire Data Center for the selection, analysis, publication, and dissemination of information related to the prevention, occurrence, control and results of fires of all types and to take all necessary steps to educate the public and to improve public awareness of fire prevention.

USFA prepares the Nation's first responders through these ongoing efforts. To fulfill its mission, USFA utilizes the assets of the NFA, NETC Facilities and Support Services, and the National Fire Programs Division.

C. Budget Request Summary:

FEMA requests \$41.306 million, 134 positions, and 133 FTE for FY 2014. This includes adjustment-to-base increase of 1 FTP and 9 FTE; and a decrease of \$1,732,000 for efficiencies and reductions and the movement of \$1,000,000 and the grant responsibility to Assistance to Firefighters Grants.

D: Efficiencies- FY 2013

Operation & Maintenance of Facilities

\$.395 million

USFA (\$.395 million) – FEMA will realize this efficiency by reducing facility operations and support services contract.

Operation & Maintenance of Equipment

\$.194 million

USFA (\$0.194 million) – FEMA will realize this efficiency through eliminating repair and upkeep services for wireless capabilities in student dormitories and contract efficiencies.

Other Services **\$0.110 million**

USFA (\$0.110 million) – FEMA will realize these savings through reducing the NFA course revision and development efforts.

Advisory & Assistance Services **\$0.979 million**

USFA (\$0.979 million) – FEMA will realize this savings by eliminating 18 NFA course deliveries, decrease in prevention activities, research studies, response activities and contract consolidations.

Travel **\$0.03 million**

USFA (\$0.3 million) – FEMA will realize savings by reducing staff travel.

Purchases for Other Government Accounts **\$0.110 million**

USFA (\$0.110 million) – FEMA will realize this reduction through reducing wildfire initiatives, discontinuing Wildland/Urban Interface-Fire Adapted Communities and reducing support to National Wildfire Coordinating Group

USFA (\$0.275 million) – FEMA will realize this savings through reducing the TRADE and State Fire Training Grant Programs and eliminating the Harvard Program.

Equipment **\$0.01 million**

USFA (\$0.01 million) – FEMA will realize savings by decreasing non-recurring purchases.

Supplies **\$0.649 million**

USFA (\$0.649 million) – FEMA will realize savings by reducing non-recurring purchases.

Subtotal	134	133	\$14,947	\$26,359	\$41,306

USFA prepares the Nation’s first responders through ongoing and when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all-hazards. The USFA coordinates with other Federal, State, and local emergency service agencies; the private sector; colleges and universities; and other DHS educational consortium participants in fostering a solid foundation for our citizens and stakeholders in prevention, preparedness, and response. To fulfill its mission, USFA utilizes the assets of the NFA, NETC Facilities and Support Services, and the National Fire Programs Division.

National Fire Academy

The NFA promotes the professional development of the fire and emergency response community and its allied professionals. NFA supports State and local training organizations to fulfill their obligation to the career and volunteer fire and emergency services. NFA also develops, delivers, and manages educational and training programs having a National focus that are outside of State and local training missions or that exceed State and local capabilities because of cost or audience. The programs are designed to support the DHS and FEMA goals to help State and local response agencies prevent, mitigate, prepare for, and respond to local, regional, and National emergencies.

The State Fire Training Assistance Grants Program will be transferred to the Assistance to Firefighter Grant Program. The transfer will help to reduce duplication of grant management activity with other FEMA grant programs. These grant funds will now be awarded competitively.

NETC Management, Operations, and Support Services Division (MOSS)

The MOSS Division manages, operates, and maintains the NETC facilities and training resources in the most efficient and effective manner. MOSS provides administrative, operational, and emergency services in support of the program activities and special groups at NETC.

National Fire Programs Division (NFP)

The NFP Division manages USFA public education and information efforts. NFP operates the National Fire Data Center utilizing NFIRS for the collection, analysis, publication, dissemination, and marketing of information related to the Nation's fire problem and USFA programs. NFP also manages USFA research efforts in fire detection, prevention, and suppression; first responder health, safety and effectiveness; and special programs that enhance FEMA, USFA and partner roles in all-hazard preparedness and response.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the United States Fire Administration and for other purposes, as authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.) and the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.), [\$42,520,000] **\$41,306,000**¹.

Language Provision	Explanation
¹ ...[\$42,520,000] <u>\$41,306,000</u> ...	Dollar change only. No substantial change proposed.

United States Fire Administration Mission Statement

The mission of the United States Fire Administration (USFA) is to provide National leadership to foster a solid foundation for our fire and emergency services stakeholders in prevention, preparedness and response. USFA coordinates with other Federal, State, and local emergency service agencies, the private sector, colleges and universities, and other DHS educational consortium participants. To fulfill its mission, USFA utilizes the assets of the National Fire Academy (NFA), the National Emergency Training Center (NETC), Management, Operations and Support Services (MOSS), and the National Fire Programs (NFP) Division.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	11,065	11,437	11,542	477
11.3 Other than full-time permanent	189	-	-	(189)
11.5 Other personnel compensation	68	114	115	47
12.1 Benefits	2,858	3,252	3,290	432
Total, Salaries & Benefits	14,180	14,803	14,947	767

Salaries and Benefits include costs for 133 FTEs. The FY 2014 request includes an increase of \$767,000 as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$300	\$290	\$260	-\$40

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. FY 2014 reflects a decrease of \$40,000 in staff travel as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of Things	\$59	\$78	\$78	\$19

Transportation of things (including animals), the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request includes an increase of \$19,000 due to increased service charges as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other Rent	\$16	\$30	\$30	\$14

Payments to a non-Federal source for rental of space, land, and structures. The FY 2014 request includes an increase of \$14,000 due to increased service charges as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized Cr	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$2,418	\$2,363	\$3,013	\$595

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request includes an increase of \$595,000 due to increased service charges as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$301	\$374	\$374	\$73

Printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 increase includes \$73,000 due to increased services charges as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$5,728	\$6,513	\$5,534	-\$194

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FY 2014 reflects a decrease of \$194,000 in annualized savings due to contract consolidations and conversions as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$2,937	\$1,577	\$1,467	-\$1,470

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request includes a decrease to reflect reduction in course revision and development efforts. FY 2014 also reflects a decrease of \$260,000 in Prevention initiatives, \$200,000 in research studies, \$125,000 in response activities, \$140,000 in course deliveries and \$254,000 in annualized savings due to contract consolidations and conversions as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$421	\$550	\$633	\$212

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes an increase of \$212,000 to OPM for use of online Learning Management System (LMS) as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$7,007	\$7,340	\$6,945	-\$62

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2014 request includes a decrease of \$62,000 resulting from operational efficiencies as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$4,303	\$5,909	\$5,715	\$1,412

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request includes an increase of \$1,412,000 as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$636	\$1,312	\$663	\$27

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes a decrease of \$27,000 for non-recurring charges as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$1,041	\$327	\$317	-\$724

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes a decrease of \$724,000 for non-recurring purchases as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & Structures	\$1772	0	\$0	-\$1,772

Purchase and improvement (additions, alterations, and modifications) of land and structures. This decrease is related to FY 2012 one-time roof replacement and HVAC upgrades that are not required in FY 2014.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
41.0 Grants/Subsidies/Contributions	\$2,916	\$2,842	\$1,330	-\$1,586

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2014 request includes a decrease of \$1,000,000 for the transfer of the USFA State Fire Training Assistance grants to the Assistance to Firefighter Grant Program, a \$160,000 decrease in student stipends, \$50,000 for the elimination of TRADE, and \$302,000 in non-recurring purchases as compared to FY 2012.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
43.1 Interest and Dividends	\$3	\$0	\$0	-\$3

Interests and dividends are payments to creditors for the use of moneys loaned, deposited, overpaid, or otherwise made available. Distribution of earnings to owners of trust or other funds. Interest payments under lease-purchase contracts for construction. The decrease reflects purchase card dividends received in FY 2012 that will not be received in FY 2014.

A. Component Overview

The Federal Emergency Management Agency (FEMA) is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Preparedness: FEMA's National Preparedness Program works to ensure that the Nation is prepared for disasters of all kinds. This program houses management and administrative support functions associated with training and national exercise programs funded through the State and Local Programs appropriation.

Protection: FEMA's National Continuity Program carries out a mandated mission to provide Executive Agent leadership to guarantee the survival of an enduring Constitutional government by ensuring continuity of national operations in response to national emergencies. FEMA maintains an appropriately resourced, staffed, and equipped ability to provide Executive Leadership for Continuity of Government (COG), Continuity of Operations (COOP), and national contingency programs.

Response: FEMA's Response programs provide the core Federal response capability to save lives and protect property in communities throughout the Nation that have been overwhelmed by the impact of a major disaster or an emergency. Response Operations ensures that Federal disaster response systems and capabilities are properly positioned to support Federal decision-makers to immediately receive and react to the requirements to support states that have been overwhelmed by the demands of an emergency or major disaster.

Recovery: FEMA's Recovery program ensures that individuals and communities affected by disasters of all sizes, including catastrophic and terrorist events, return to normal function with minimal suffering and disruption of services through Individual Assistance and Public Assistance. Through the Recovery program, FEMA takes the lead among Federal agencies, State and local governments and representatives of non-governmental organizations to support communities in rebuilding so individuals, civic institutions, businesses, and governmental organizations can function on their own, return to normal life, and protect against future hazards.

Mitigation: FEMA's Mitigation program works to strengthen mitigation nationwide to reduce the Nation's risk to natural disasters or other emergencies, and to facilitate adoption and enforcement of up-to-date design and construction practices through State and local building codes. Mitigation supports activities that result in sound risk management decisions by individuals, private-sector, and public-sector entities. Mitigation programs are conducted through three core activities: risk analysis, risk reduction, and insurance against flood risk. These programs work together to reduce the loss of life and property, to enable individuals to recover more rapidly from floods and other disasters, and to lessen the financial burden on taxpayers.

Management and Administration: FEMA's Management and Administration program encompasses mission support activities such as Information Technology, Human Capital, Facilities, Security and other programs that support the accomplishment of the other missions.

FY 2014 Budget Request

The table below shows the Federal Emergency Management Administration’s FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Preparedness	897	\$2,377,652
Protection	144	\$83,220
Response	939	\$298,656
Recovery	6,795	\$5,808,437
Mitigation	528	\$3,947,504
Management & Administration	2,867	\$935,416
Total Budget Request	12,170	\$13,450,885

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the Federal Emergency Management Administration programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Preparedness					100%		
Protection					100%		
Response					100%		
Recovery					100%		
Mitigation					100%		
Management and Administration					87%		13%

Mission 5: Ensuring Resilience to Disasters

Resources Requested

Federal Emergency Management Administration resources supporting *Ensuring Resilience to Disasters* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Preparedness	2,407,210	722	2,423,210	897	2,377,652	897
Protection	58,067	124	59,067	144	83,220	144

Recovery	6,568,348	5,246	5,938,911	5,246	5,808,437	6,795
Mitigation	3,642,190	433	3,684,146	528	3,947,504	528
Management & Administration	968,397	2,435	918,131	2,654	818,092	2,704
Total	13,990,029	9,799	13,373,282	10,408	13,333,561	12,007

Performance Measures

For *Ensuring Resilience to Disasters*, two types of performance measures are presented. Strategic Performance Plan Measures represent Federal Emergency Management’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Number of corrective actions completed to improve performance following National Level Exercises (since FY 2007)						
Description: This measure will count completed corrective actions assigned to DHS for action resulting from National Level Exercises. A National Level Exercise (NLE) helps the Federal Government prepare and coordinate a multiple-jurisdictional integrated response to a national catastrophic event. A NLE is the capstone exercise conducted as the final component of each National Exercise Program cycle and requires the participation of all appropriate department and agency principals, other key officials and all necessary staffs and operations centers, and operational elements at both the national and regional/local levels. The capstone exercise satisfies the biennial national exercise requirement established in 6 USC 748(b) (3). Corrective actions identified from the exercise are assigned to the respective Agency for completion and validation.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	23	40	120	127
Result:	N/A	N/A	30	114	N/A	N/A

Measure: Percent of communities in high earthquake, flood, and wind-prone areas adopting disaster-resistant building codes

Description: This measure assesses the number of communities adopting building codes containing provisions that adequately address earthquake, flood, and wind hazards. FEMA works with code adoption and enforcement organizations to support community implementation of disaster resistant building codes, defined as being in compliance with the National Flood Insurance Program regulations, equivalent to the National Earthquake Hazards Reduction Program recommended provisions, and in compliance with the provisions of the International Codes as designated by the International Codes Council. FEMA also works with the Insurance Services Office (ISO) Building Code Effectiveness Grading Schedule (BCEGS) data to track the number of high-risk communities subject to flood, wind, earthquake, and combined perils that have adopted disaster resistant building codes over time.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	45%	49%	53%	57%
Result:	N/A	N/A	48%	56%	N/A	N/A

Measure: Percent of high-priority core planning capabilities rated as proficient by states and territories

Description: This measure reports the percent of high-priority core capabilities related to planning that states and territories rate as proficient. Planning is a key indicator of their overall level of preparedness. This information is gathered from the State Preparedness Report (SPR), which is an annual self-assessment by states and territories of their levels of preparedness in nationally established capabilities to prevent, protect against, mitigate the effects of, respond to, and recover from those threats and hazards. that pose the greatest risk to the security of the Nation.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	36.9%	40%	43.5%
Result:	N/A	N/A	N/A	39.6%	N/A	N/A

Measure: Percent of households surveyed reporting they have taken steps to mitigate damage to property and protect themselves in the event of a disaster

Description: This measure tracks the percent of surveyed households that indicate they have taken steps to mitigate damage to their home in the event of a flood, hurricane, tornado or other wind hazard. Mitigation helps to reduce the loss of life and property by lessening the impact of natural disasters.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	35%	29%	31%	33%
Result:	N/A	N/A	27%	36%	N/A	N/A

Measure: Percent of households that, aside from a fire drill, participated in a preparedness exercise or drill at their workplace, school, or home in the past two years

Description: This measure calculates the percent of households responding to a survey who indicate that, aside from a fire drill, they have participated in a preparedness exercise or drill like the ShakeOut in their workplace, school, or home in the past two years. The survey collects individual disaster preparedness data from a random sample of households across the nation.

Fiscal	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
---------------	---------	---------	---------	---------	---------	---------

Federal Emergency Management Administration - Strategic Context

Year:						
Target:	N/A	N/A	N/A	N/A	30%	33%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of incident management and support actions necessary to stabilize a jurisdiction within 72 hours or by the agreed upon time						
Description: This measure reflects FEMA's role in effectively responding to any threat or hazard, with an emphasis on saving and sustaining lives within 72 hours, in support of State, local, tribal and territorial governments. "Actions necessary to stabilize an incident" are defined as those functions that must be initiated immediately following an incident in order to ensure the best outcomes for survivors. These actions include establishing joint federal/state incident objectives and interoperable communications between FEMA-supported incident sites, deploying urban search and rescue resources, rapidly activating response coordination centers, and issuing timely alerts, warnings, operations orders, and situation reports.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	100%	100%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of Incident Management Assistance Teams establishing joint federal and state response objectives within 18 hours						
Description: This measure gauges the percent of time that Incident Management Assistance Teams (IMATs) have deployed and have established initial joint federal and state response objectives within 18 hours of a request from a state or jurisdiction. IMATs rapidly deploy to an incident, provide leadership for federal assistance, and coordinate and integrate inter-jurisdictional response in support of an affected state or territory.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	100%	100%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of orders for required life-sustaining commodities (meals, water, tarps, plastic sheeting, cots, blankets and generators) and key initial response resources delivered by the agreed upon date						
Description: This measurement evaluates the percentage of orders from FEMA Distribution Centers or logistics partners that arrive at the specified location by the validated and agreed upon delivery date. Orders include but are not limited to: meals, water, tarps, plastic sheeting cots, blankets and generators. The measure is derived by dividing the number of orders that are received by the total number requested.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	80%	85%	95%	95%	95%
Result:	N/A	97.5%	93.3%	92.8%	N/A	N/A

Measure: Percent of recovery services through Individual Assistance delivered to disaster survivors gauging the quality of program services, supporting infrastructure, and customer satisfaction following a disaster						
---	--	--	--	--	--	--

Description: This is a weighted percent that reflects FEMA's role in delivering quality services to disaster survivors. This measure is based upon three categories: program services, supporting infrastructure, and customer satisfaction. Sub-elements within these three categories include providing temporary housing assistance and case management; having available grant management and internet and telephone registration systems; ensuring call centers respond quickly and business staff are in place; and, delivering these services to enhance customer satisfaction of those receiving individual assistance from FEMA following a disaster. Recovery assistance helps individuals affected by disasters and emergencies return to normal quickly and efficiently.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	91%	92%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of recovery services through Public Assistance delivered to communities gauging the quality of program services, supporting infrastructure, and customer satisfaction following a disaster

Description: This is a weighted percent of how FEMA delivers quality services to communities following a disaster based upon three categories: program services, supporting infrastructure, and customer satisfaction. Sub-elements within these three categories include ensuring timely kickoff meetings following requests for public assistance; having available grant management systems; assuring that business staff are in place; and, delivering these services to enhance customer satisfaction of those receiving public assistance. Supporting and ensuring our citizens have quality support after a disaster is critical to facilitating a community's recovery.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	92%	93%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of states with a Threat and Hazard Identification and Risk Assessment (THIRA) that meets current DHS guidance

Description: This measure quantifies the percentage of states and territories that develop a THIRA in accordance with the DHS guidance. The FY 2012 Homeland Security Grant Program (HSGP)/Urban Areas Security Initiative (UASI) grant guidance requires the development and maintenance of a THIRA. Developing and maintaining an understanding of risks faced by communities and the Nation is an essential component of the National Preparedness System. THIRA guidance provides a common and consistent approach for identifying and assessing risks and their associated impacts. This common approach will enable the whole community to maintain a baseline understanding of the risks that they face, facilitating efforts to identify capability and resource gaps, focus capability improvements, and inform the community of actions they can take to manage their risks.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	100%	100%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of the U.S. population directly covered by FEMA connected radio

transmission stations						
Description: This measure tracks the percentage of U.S. residents that will be capable of receiving an emergency alert message from a broadcast station that is connected and enhanced by FEMA to provide resilient, last resort capability for the President to address the American people. Executive Order 13407 requires the Integrated Public Alert Warning System (IPAWS) to implement a capability to alert and warn the American people in all hazards and "to ensure that under all conditions the President can communicate with the American people."						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	66%	80%	90%	90%	90%
Result:	N/A	72%	84%	85%	N/A	N/A

Measure: Percent of U.S. population (excluding territories) covered by planned mitigation strategies						
Description: This is a point in time metric that determines the percent of U.S. population (excluding territories) covered by approved or approvable local Hazard Mitigation Plans. The population of each community with approved or approvable local Hazard Mitigation Plans is used to calculate the percentage of the national population. The FEMA Mitigation program gathers and analyzes critical data to aid in future mitigation efforts and enable communities to be better informed and protected. FEMA Mitigation helps communities reduce risk through sound land-use planning principles (such as planned mitigation strategies), floodplain management practices, and financial assistance.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	75%	80%	80%	85%	85%
Result:	N/A	N/A	68.7%	70.96%	N/A	N/A

Measure: Reduction in the potential cost of natural disasters to communities and their citizens (in billions)						
Description: This measure reports the estimated dollar value of losses to the American public which are avoided or averted through a strategic approach of natural hazard risk management.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	\$2.2	\$2.3	\$2.3	\$2.4	\$2.4	\$2.4
Result:	\$3.12	\$2.975	\$3.4	\$2.97	N/A	N/A

Management Performance Plan Measures

Measure: Loss of life per million people due to fire in the U.S.						
Description: This measure analyzes the reduction in the rate of loss of life from fire-related events by one percent per year. It examines the fatalities in the U.S. per million population using modified targets based on the review of historical data. The National Fire Protection Association (NFPA) reports data in September for the previous year. NFPA Survey data are analyzed to produce the report on fire related civilian fatalities.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=12.9	<=12.7	<=12.6	<=12.5	<=12.4	<=12.3

Federal Emergency Management Administration - Strategic Context

Result:	10.9	9.8	10.1	9.6	N/A	N/A
----------------	------	-----	------	-----	-----	-----

Measure: Number of trainees that have completed continuity training designed to make them better prepared to respond during all hazard events						
Description: This measure will capture the increase of those individuals within Category 1-3 Departments and Agencies (D/As) better prepared to support continuity programs. To ensure continuity awareness among Federal, State, territorial, tribal, and local governmental jurisdictions nation-wide, FEMA's National Continuity Program (NCP) will increase its percentage of participation in Continuity training by 6% annually based off NCP's FY 2010 baseline of 23,690 new participants. This cumulative measure is relevant because Continuity awareness remains an important part of the continuity of government essential functions during all-hazard events. Social Media outreach will assist in promoting continuity training nation-wide.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	48,802	50,266	51,774
Result:	N/A	N/A	193,483	67,047	N/A	N/A

Measure: Percent accuracy of inventory of disaster response supplies						
Description: This measure assesses the accuracy of the physical inventory of disaster response supplies stored in strategic storage sites. Strategic sites are FEMA Distribution Centers, Food Banks, Private Sector/Vendor managed sites and state owned warehouses where FEMA-controlled stocks are stored under an official memorandum of agreement. Ensuring an accurate stock of these supplies enhances the government's ability to effectively and efficiently provide emergency supplies to disaster survivors.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	95%	95%	95%	98%	98%
Result:	N/A	99.3%	99.75%	100%	N/A	N/A

Measure: Percent of attendees from all levels of government including tribal, public and private sector, and non-governmental organizations reporting they are better prepared to deal with disasters and emergencies as a result of training						
Description: This measure reports the percent of students attending training at the Emergency Management Institute (EMI) who responded to a survey indicating that they are better prepared to deal with disasters and emergencies as a result of the training they received. Training is conducted at the EMI dedicated training facility in Emmitsburg, MD, the Noble Training Center in Anniston, AL, as well as other off-site resident classroom courses taught by EMI instructors. This training provides Federal, State, local and tribal officials, and public and private sector officials, and volunteer organizations having key emergency responsibilities with the knowledge and skills needed to strengthen nationwide preparedness and respond to, recover from, and mitigate against acts of terrorism, natural disasters, and other emergencies.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	92%	93%	96%	96%	96%	96.5%
Result:	92%	N/A	96%	96.42%	N/A	N/A

Measure: Percent of Federal Departments and Agencies that have viable continuity programs to maintain essential functions in case of disaster						
Description: This measure enables FEMA to track the percent of Category 1, 2, and 3 Federal Departments and Agencies with viable Continuity of Operations capabilities to perform essential functions in the event of disruption of normal operations. In addition, this measure allows for FEMA National Continuity Programs to track which agencies are in compliance with current Federal requirements and guidance.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	Classified	Classified	Classified	Classified	Classified	Classified
Result:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Percent of grantees reporting significant progress toward the goals and objectives identified in their current state homeland security strategies						
Description: This measure reflects grantees' progress toward the goals and objectives identified in their State homeland security strategies. These strategies detail jurisdictions' plans to strengthen their preparation for and response to acts of terrorism, as well as natural and man-made threats. Grantees can also provide written comments on the program and highlight "best practices" and major initiatives in the State as a result of grant funding. Progress toward homeland security strategies provides an over-arching assessment of grantees' ability to coordinate emergency management efforts.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	69%	35%	40%	40%	43%	46%
Result:	31%	N/A	50%	N/A	N/A	N/A

Measure: Percent of population where Risk MAP has been deployed enabling communities to take mitigation action to reduce risk						
Description: This measures the percent of the population that where Risk MAP has been deployed to provide communities with flood information and tools which they can use to enhance their mitigation plans and better protect their citizens. The population of each community with Risk MAP products is used to calculate the percentage of the national population. Flood risk data products provide information to states and local communities in order for them to develop sound Hazard Mitigation Plans, communicate risks to citizens, and allow the public to take action to prevent risks.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	40%	44%	47%	49%
Result:	N/A	N/A	N/A	47.3%	N/A	N/A

Measure: Percent of supervisors of students trained who believe their staff are better prepared as a result of National Fire Academy training						
Description: The measure assesses the increase in the level of students trained as reported by individual first-line supervisors. These supervisors observe and report through an on-line survey how training skills are being used on-the-job and whether or not their subordinate is better prepared to respond to disasters and emergencies as a result of the National Fire Academy training they received.						

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	80%	81%	82%	85%	86%
Result:	N/A	89%	88%	93.9%	N/A	N/A

Measure: Percent of time the Integrated Public Alert and Warning System (IPAWS) infrastructure is operating and available for use by Federal, State and Local officials for the dissemination of emergency alerts

Description: EO 13407 states "It is the policy of the United States to have an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American people in situations of war, terrorist attack, natural disaster, or other hazards to public safety and well-being (public alert and warning system), taking appropriate account of the functions, capabilities, and needs of the private sector and of all levels of government in our Federal system, and to ensure that under all conditions the President can communicate with the American people." The IPAWS infrastructure provides alert and warning message collection and dissemination so that United States residents will receive authenticated emergency alert messages over as many communications paths as possible.

Result:	N/A	N/A	N/A	96.6%	N/A	N/A

Maturing and Strengthening the Homeland Security Enterprise

One of the Department's objectives is to improve DHS's organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters components, enhanced programmatic alignment to the homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Citizenship & Immigration Services Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses:

Through the Salaries and Expenses appropriation, USCIS ensures the integrity of the immigration system, and promotes awareness and understanding of citizenship.

U.S. Citizenship and Immigration Services (USCIS) will secure America's promise as a nation of immigrants by granting citizenship and immigration benefits, providing accurate and useful information to our customers, promoting an awareness and understanding of citizenship, and ensuring the integrity of the immigration system.

USCIS has established six goals: (1) strengthen the security and integrity of the immigration system, (2) provide effective customer-oriented immigration benefits and information, (3) support immigrants' integration and participation in American civic culture, (4) promote flexible and sound immigration policies and programs, (5) strengthen the infrastructure supporting the USCIS mission, and (6) operate as a high-performance organization that promotes a highly talented workforce and a dynamic work culture.

USCIS is the component of the Department of Homeland Security (DHS) that facilitates legal immigration for people seeking to enter, reside, or work in the United States. USCIS possesses the authority to grant or deny immigration benefits -- approving nearly 6 million immigration benefit requests each year. These immigration benefits range from work authorization documents to asylum and refugee applications, to petitions for immediate relatives to immigrate to the United States.

The Salaries and Expenses account encompasses all of the discretionary funding of USCIS. The only program that received FY2012 funding through this account is E-Verify. E-Verify is an automated system that allows U.S. employers to electronically verify names, dates of birth, social security numbers, and immigration information for non-citizens, against Federal databases to ensure the employment eligibility of both citizen and non-citizen new hires. In FY 2014, USCIS is requesting appropriated funding to continue operation, enhancement, and expansion of E-Verify as well as discretionary funding to support the Citizenship and Integration Grant Program.

B. Budget Activities:

In FY2012, the Salaries and Expenses appropriation funded activities related to the operation of E-Verify. E-Verify is an Internet-based system that enables an employer to determine an employee's eligibility to work in the United States by verifying information reported on an employee's Form I-9 against DHS, Social Security Administration (SSA), and Department of State data. At the end of FY 2012, 404,295 employers were enrolled in E-Verify and during FY 2012 the E-Verify program processed more than 21 million queries. The program continues to grow by approximately 1,500 new employers per week.

The budget request includes funding to operate, enhance, and expand the E-Verify system, support E-Verify Self Check, and added funding for the Verification Information System (VIS) Modernization initiative. Funding is also requested to support the Citizenship and Integration Grant Program, started in FY 2009, which facilitates immigrant civic integration by supporting immigrants on the path to naturalization and by promoting education and awareness of the rights, responsibilities, and importance of U.S. citizenship.

C. Budget Request Summary: In FY 2014, USCIS requests \$124.2 million and 388 positions, 388 full-time equivalent employees for the Salaries and Expenses account. The FY 2014 request represents an increase of \$21.8 million, a decrease of 8 positions, and an increase of 73 FTE from FY 2012. The FY 2014 request includes an adjustment to base totaling \$10.3 million, which includes \$10.0 million (0 FTP / 0 FTE) for discretionary funding support for Citizenship and Integration Grants and \$330,000 (0 FTP / 73 FTE) for E-Verify. In FY 2012, nearly \$5 million in funding for the Citizenship and Integration Grant Program was provided from fees paid by immigration benefit applicants and deposited into the Immigrant Examinations Fees account (IEFA). In FY 2014, USCIS requests that \$10 million be provided through the discretionary Salaries and Expenses Account to directly fund the provision of grants. Salaries and related administrative expenses for the grant program will continue to be funded from the IEFA.

In addition to these base adjustments, the FY 2014 request includes \$11.5 million (0 FTP / 0 FTE) for the following program increase:

- **VIS Modernization:** A total of \$11.5 million (0 FTP / 0 FTE) is requested for the VIS Modernization initiative. The VIS Modernization initiative will meet the growing needs of E-Verify, and will have the collateral benefit of improving the SAVE program by enhancing the VIS operational environment, thus ensuring the system is able to effectively operate in an environment where the Federal and State demands are increasing. This initiative is critically needed to address service demands that are growing too fast for the current level of technology to adequately manage.

D. Efficiencies

Mission Support and Personnel Reduction Efficiencies: \$.759 million

USCIS is projecting a reduction of 8 mission support personnel resulting from efficiencies in FY 2014 that will yield a cost savings of \$584,000 in personnel pay and \$175,000 in personnel benefits.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

Total Change 2012 to 2014	(8)	73	11,789

U.S. Citizenship & Immigration Services (USCIS) requests 388 FTP, 388 FTE, and \$114.2 million for this activity in FY 2014. Adjustments to base include \$324,000 for the FY 2014 pay raise; \$740,000 (0 FTP / 8 FTE) for the annualization of 8 FTE for E-Verify; a transfer of \$25,000 from the Under Secretary for Management, Office of the Chief Readiness Support Officer for Shared Services for Working Capital Fund (WCF) / Office of the Chief Financial Officer for Financial Audit Clearinghouse Database for WCF; and efficiencies totaling 8 FTP / 8 FTE and \$759,000. USCIS requests a program increase for VIS Modernization for \$11.5 million.

CURRENT SERVICES PROGRAM DESCRIPTION:

E-Verify was established by the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA)* and is based on the Employment Eligibility Form (Form I-9). E-Verify is an Internet-based system that enables an employer to determine an employee’s eligibility to work in the United States by verifying information reported on an employee’s Form I-9 against DHS, Social Security Administration (SSA), and Department of State data. At the end of FY 2012, 404,295 employers were enrolled in E-Verify and during FY 2012 the E-Verify program processed more than 21 million queries. The program continues to grow by approximately 1,500 new employers per week.

USCIS launched the E-Verify Self Check service in March of 2011, and gradually made it available to the public through a three-phased approach, culminating in a nationwide expansion in February 2012. Self Check was developed through a partnership between DHS and SSA to provide individuals

with a tool to check their own employment eligibility status, as well as to provide guidance on how to correct their DHS and SSA records. It is the first online E-Verify service offered directly to workers. Self Check helps businesses by providing U.S. workers with the opportunity to ensure their employment authorization records are accurate before getting a job. It also improves employee understanding of the employment eligibility process. USCIS began offering this service in Spanish in August 2011, and plans further Self Check enhancements in FY 2013, including additional access to Department of State and state drivers' license databases.

E-Verify launched the first phase of a Data Analytics Tool (DAT) in FY 2012. The first phase of DAT offered key advanced analytic techniques, including models addressing compliance and program effectiveness. E-Verify deployed Voice of the Customer, a quality management system, designed to use customer feedback to improve service, policy, and operational systems.

In FY 2013, USCIS will enhance Self Check to include Employee Service Pages (ESP) and related functionality. After completing a Self Check query, users could choose to establish an individual ESP with a unique user ID and password. Through their ESP "accounts," individuals could: 1) protect against the fraudulent use of their social security number (SSN) by individuals seeking employment with E-Verify employers by locking ("Self Lock") their SSN; 2) if a record mismatch is identified, check the status of their case, and obtain more detailed information on how to correct the record online; 3) receive reminders of impending employment authorization document expiration; and 4) run future employment eligibility queries without going through the identity proofing step that is currently required in Self Check. ESPs will require the development of an account management solution that will include two factor authentication, and can serve as a platform for providing additional employee-focused services in the future.

In FY 2014, E-Verify plans to phase in an enhanced enrollment process that reduces the enrollment burden on the employer and the government and will provide more detailed user information for compliance assistance activities. Additionally, E-Verify will finalize the requirements for the electronic I-9 and its supporting processes. These enhancements will deploy in phases in FY 2014 and subsequent out-years.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<p>Benefits Provision - Verification Information System/Employment Eligibility Verification (VIS/EEV)</p>	<p>USCIS VIS supports the (Systematic Alien Verification for Entitlements) SAVE Program, allowing federal, state and local benefit granting agencies to verify the immigration status of applicants/customers applying for a government benefit. The SAVE program is mandated by the Immigration Reform and Control Act of 1986 (IRCA) and the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA). VIS is also utilized for the E - Verify program, to allow participating employers to verify the employment eligibility of all newly hired employees. The E - Verify program is mandated by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA). Any legislation enacted making participation in the E - Verify program mandatory will necessitate the usage of VIS as the primary information system used.</p> <p>VIS addresses a capability gap by allowing federal, state and local benefit granting agencies to verify the immigration status of applicants/customers applying for a government benefit. USCIS requests 0 FTP, 0 FTE, and \$10.0 million for this activity in FY 2014. In FY 2012, the Citizenship and Integration Grant Program funding is supported by the USCIS Immigration Examinations Fee Account. The adjustment to base of 0 FTP, 0 FTE, and \$10.0 million is to request appropriated, discretionary funding to support Citizenship and Integration grants.

CURRENT SERVICES PROGRAM DESCRIPTION:

Our continued success as a nation of immigrants depends on the ability of lawful newcomers to permanently settle in communities and enjoy the rights and freedoms that define our Nation. Naturalization is a critical milestone for immigrants in achieving full participation, gaining a sense of belonging, and receiving equality under the law. The Citizenship and Integration Grant Program builds community capacity to prepare immigrants for citizenship. The program funds competitive grants with the goal of expanding the availability of high-quality citizenship preparation programs for permanent residents in communities nationwide, to include citizenship instruction and naturalization application services.

Citizenship and Integration Grant Program grant recipients provided citizenship preparation services to 21,694 permanent residents under the program in FY 2012. Specifically, grant recipients enrolled 11,310 students in citizenship classes, provided naturalization eligibility screenings to 13,746 permanent residents, and prepared and submitted 8,392 naturalization applications. USCIS Citizenship and Integration Grant Program funding also helped eight (8) organizations to gain Board of Immigration Appeals (BIA) recognition and 23 grant recipient employees to secure BIA accreditation.

USCIS also highlights and shares promising practices gathered from the ongoing efforts of grant recipients. In FY 2012, seven (7) case studies were published on the web-based USCIS Citizenship Resource Center. This information assists other immigrant-serving organizations in their efforts to build and expand their capacity to provide high quality citizenship preparation services.

Description of Item

USCIS requests an \$11.5 million program enhancement for E-Verify, a program within the Enterprise Services Directorate (ESD) to fund the Verification Information System (VIS) Modernization initiative. The purpose of the VIS Modernization initiative is to meet the growing needs of the E-Verify and Systematic Alien Verification for Entitlements (SAVE) programs. The VIS operational environment must be enhanced and modernized to manage the increasing Federal and State demands and anticipated growth.

VIS Modernization represents a major redesign of the system that supports E-Verify. The initiative will transform the current E-Verify system, improve usability and overall ease of operations and maintenance, and will lay a foundation for the system's future expansion. This transformation will include training tutorials that will be tailored to employers' needs. Employers will be able to select the functionality they require in order to use E-Verify successfully with their business model. VIS Modernization will also reduce the overall enrollment burden for employers and increase the productivity of Verification Division staff by eliminating the need for USCIS staff to manually enroll employers. Because VIS also supports the SAVE Program, VIS Modernization improvements will benefit the SAVE Program as well.

Justification

The VIS Modernization initiative offers several programmatic advantages to E-Verify in future years, including: reduced operating costs; the ability to integrate with DHS and USCIS initiatives without incurring exorbitant costs; the ability to keep pace with growth in system usage; and the ability to further detect and reduce system misuse leading to fraud.

The cost reduction, improved and scalable system architecture and superior service benefits of VIS Modernization are summarized below.

Cost reductions will be achieved in a number of areas, including:

- Optimized application logic will result in fewer manual secondary verifications
- Integrated Content Management System will allow content modification without requiring expensive releases

System architecture improvements include:

- Accommodation of increased query volume that will allow easier integration with DHS and USCIS systems
- Modular customer profiles provides quicker response to new mission demands and restricts access to unauthorized data

Service advantages provided by VIS Modernization include:

- Improved logic will enable system to grow
- Reduced false negatives
- Improved system availability

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports DHS Mission 3: Enforcing and Administering Our Immigration Laws.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for citizenship and immigration services, [\$142,974,000]**\$124,213,000**¹, of which [\$131,972,000]**\$114,213,000**² is for [immigration verification programs, including \$111,924,000 for]³ the E-Verify Program, as described in section 403(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note), to assist United States employers with maintaining a legal workforce, **and of which \$10,000,000 is for the Citizenship and Integration Grant Program**⁴ [and \$20,048,000 for the SAVE Program to assist Federal, State and local benefit agencies needing immigration verification services]⁵: Provided, That, notwithstanding any other provision of law, funds otherwise made available to United States Citizenship and Immigration Services may be used to acquire, operate, equip, and dispose of up to 5 vehicles, for replacement only, for areas where the Administrator of General Services does not provide vehicles for lease: Provided further, That the Director of United States Citizenship and Immigration Services may authorize employees who are assigned to those areas to use such vehicles to travel between the employees' residences and places of employment: Provided further, That none of the funds made available in this Act for grants for immigrant integration may be used to provide services to aliens who have not been lawfully admitted for permanent residence[: Provided further, That nothing in this Act or any other provision of law shall be construed to limit the authority of United States Citizenship and Immigration Services to recover SAVE query costs from SAVE Program users]⁶.

Language Provision	Explanation
¹ ...[\$142,974,000] <u>\$124,213,000</u> ...	Dollar change only. No substantial change proposed.
² ...[\$131,972,000] <u>\$114,213,000</u> ...	Dollar change only. No substantial change proposed.
³ ...[immigration verification programs, including \$111,924,000 for]...	Removes unnecessary language. E-Verify is the only immigration verification program for which appropriated funds are being requested.
⁴ ... <u>and of which \$10,000,000 is for the Citizenship and Integration Grant Program</u> ...	Provides USCIS with authority for \$10 million in appropriated funding for the Citizenship and Integration Grant Program.
⁵ ...[and \$20,048,000 for the SAVE Program to assist Federal, State and local benefit agencies needing immigration verification services]...	Appropriated funding is not being requested for the SAVE Program.
⁶ ...[: Provided further, That nothing in this Act or any other provision of law shall be construed to limit the authority of United States Citizenship and Immigration Services to recover SAVE query costs from SAVE Program users]...	Removes unnecessary language. Appropriated funding is not being requested for the SAVE Program.

E-Verify Mission Statement

E-Verify is an Internet-based system that enables an employer to determine an employee's eligibility to work in the United States by verifying information reported on an employee's Form I-9 against DHS, Social Security Administration (SSA), and Department of State data.

Summary Justification and Explanation of Changes

Immigrant Integration & Citizenship Mission Statement

The USCIS Citizenship and Integration Grant Program seeks to build community capacity to prepare permanent residents for citizenship. The program funds competitive grants with the goal of expanding the availability of high-quality citizenship preparation programs for permanent residents in communities nationwide, to include citizenship instruction and naturalization application services. Since its inception in 2009, the grant program has been administered by the USCIS Office of Citizenship, which is responsible for promoting instruction and training on citizenship rights and responsibilities and providing permanent residents with information and tools necessary to successfully integrate into American civic culture.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Citizenship & Immigration Services Immigration Examinations Fee Account

I. Appropriation Overview

The Immigration Examinations Fee Account (IEFA) is the primary funding source for U.S. Citizenship and Immigration Services. Fees collected from the filing of immigration benefit applications are deposited into the IEFA and used to fund the cost of processing immigration benefit applications and associated support benefits, as well as to cover the costs of providing similar benefits to applicants without fees for purposes of fulfilling humanitarian objectives.

A. Mission Statement for Immigration Examinations Fee Account:

The IEFA account provides necessary resources for USCIS to:

- Strengthen and effectively administer the immigration system.
- Strengthen national security safeguards and combat fraud.
- Reinforce quality and consistency in administering immigration benefits.
- Enhance customer service and public engagement.

B. Budget Activities:

Adjudication Services

Through a network of approximately 240 domestic and foreign offices, USCIS is responsible for the timely and quality processing of:

- *Family-based petitions* - facilitating the process for close relatives of U.S. citizens and permanent residents to immigrate, gain permanent residency, work, etc.
- *Employment-based petitions* - facilitating the process for current and prospective employees to immigrate or work in the United States temporarily
- *Asylum and Refugee petitions* - adjudicating asylum applications and processing refugees
- *Naturalization applications* - processing applications of those who wish to become U.S. citizens

Secure identity cards and travel document booklets are personalized and provided to recipients of certain immigration benefits as evidence of immigration status and for use in proving eligibility to work and live in the United States and/or to re-enter the United States after travel abroad. Premium processing revenues collected into this account fund the Transformation Program which is a multi-year effort to modernize USCIS business processes and supporting systems.

Information and Customer Services

The Customer Service and Public Engagement Directorate (CSPED) provides clear, accurate, and timely responses to customer concerns and questions, and engages the public through

transparent dialogue that promotes participation and feedback. The Customer Service Division (CSD) is dedicated to proactively providing information and guidance to USCIS applicants, petitioners and advocates regarding immigration benefits. The Public Engagement Division (PED) is dedicated to coordinating and directing agency-wide dialogue with external stakeholders to actively collaborate and maintain open and transparent communication, and seek feedback regarding policies, priorities, and organizational performance reviews.

Administration

The Administration activity supports a variety of headquarters offices including the Office of the Director, Administration, Chief Financial Officer, Chief Counsel, Contracting, Communications, Legislative Affairs, Policy and Strategy, Equal Opportunity and Inclusion, Chief Human Capital Officer, and Security and Integrity.

Systematic Alien Verification for Entitlements (SAVE)

SAVE is an intergovernmental information-sharing program that verifies an individual's immigration status to help ensure that only those persons eligible to receive Federal, State, or local public benefits actually receive such benefits.

C. Budget Request Summary:

In FY 2014, USCIS requests \$3.041 billion and 13,240 positions, 12,578 FTE for the Immigration Examinations Fee account. The FY 2014 request represents an increase \$117.4 million and 1,543 positions, 2,302 FTE above FY 2012. The increase in projected spending authority is the net result of the following: a \$271.3 million increase associated with projected changes in workload and staffing requirements; \$11.7 million for the FY 2014 pay raise; a decrease of \$5.0 million to reflect funding requested in the Salaries and Expenses account for Citizenship and Integration grants; and, a decrease of \$160.6 million based on the projected FY 2014 funding requirements for the Transformation program.

In 2013, USCIS intends to complete a biennial fee study to assess whether changes to the current fee schedule are warranted for FY 2014/2015. The fee study and potential rule will account for updated workload and operating cost projections that may have changed since the agency's last comprehensive fee rule in 2010.

III. Current Services Program Description by PPA

Department of Homeland Security
Citizenship & Immigration Services
Immigration Examinations Fee Account:
District Operations
Program Performance Justification
 (Dollars in Thousands)

PPA: District Operations

	Perm. Pos	FTE	Amount
2012 Revised Enacted	6,054	5,297	1,290,544
2014 Adjustments-to-Base	785	1,199	220,292
2014 Current Services	6,839	6,496	1,510,836
2014 Total Request	6,839	6,496	1,510,836
Total Change 2012 to 2014	785	1,199	220,292

USCIS requests 6,839 positions, 6,496 FTE, and \$1.5 billion to process millions of immigration benefit applications while maintaining backlog goals and ensuring the security and integrity of the immigration system. Adjustments to base include \$6.5 million for the FY 2014 pay raise; 785 FTP / 1,199 FTE and \$116.6 million in spending authority based on changes in workload requirements and revenue projections; and \$102.2 million resulting from an improved methodology for allocating GSA rent charges, and a decrease of \$5.0 million associated with funding requested in the Salaries and Expenses Account for Citizenship and Integration grants.

CURRENT SERVICES PROGRAM DESCRIPTION:

Field Operations

Field Operations ensures the efficient adjudication of all applications and petitions for immigration benefits requiring face-to-face interviews, timely action on related ancillary applications and other assigned product lines, provision of direct customer service, immigration information, assurance of the integrity of the immigration system, and assistance to applicants, petitioners, and beneficiaries.

Fraud Detection and National Security (FDNS)

FDNS detects and combats immigration benefit fraud, identifies threats to national security and public safety posed by those seeking immigration benefits, and serves as an effective conduit of information between USCIS and the law enforcement and intelligence communities.

Office of Information Technology

The Office of Information Technology, a component within the Management Directorate, supports USCIS operations with technology services and solutions.

Office of Performance and Quality

The Office of Performance and Quality maintains the integrity and quality of the immigration process by providing for the development of annual performance goals and metrics, and oversees the National Quality Management Program that ensures the integrity of the adjudication process and the effective delivery of immigration services.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<p>Customer Service Web Portal</p>	<p>The USCIS Office of Communications (OCOMM) and the Office of the Chief Information Officer (OCIO) established the public - facing Customer Service Web Portal (CSWP) in October 2006. The primary goal of the CSWP is to provide the public with a positive, understandable and effective online experience. A public user, with minimal computing skills, can access the CSWP and easily access information, download forms, educational and instructional materials, and gain access to other systems responsible for scheduling interviews and applying for immigrant benefits. Customer access to the CSWP is seamless, regardless of technical sources, so that all information sources have a similar, if not the same, look and feel and apply a consistent and intuitive navigation strategy. The CSWP went through an exhaustive redesign in September 2009, including the deployment of USCIS Espanol.</p> <p><u>RELATED PERFORMANCE MEASURES</u></p> <ul style="list-style-type: none"> • Achieve an 85% overall customer satisfactions rating of the immigration process. 	
<p>\$23,613</p>	<p>\$24,232</p>	<p>\$24,256</p>
<p>Immigration - CLAIMS 3.0</p>	<p>The Computer Linked Application Information Management System 3.0 (CLAIMS 3) is a legacy case application tracking and processing system used for the adjudication of applications and petitions for immigration benefits and services except asylum and naturalization. CLAIMS 3 is the primary source of applicant/petitioner information used to perform background checks, conduct the examination (review of information that is being provided by petitioners), and adjudication. The information within CLAIMS 3 is used to assist the examiner in verifying and corroborating applicant petitions through the use of business rules to ensure that the process is consistent with all applicable laws and regulations. CLAIMS 3 resides in four service centers, the National Benefits Center, the</p>	

	<p>Administrative Appeals Office, and Baltimore Field Office. It channels information to over 90 district offices via the Integrated Case Management System (ICMS) Web Interface for Family Based 485 Forms, and is a source for accessing information for Performance Measures and Production Numbers.</p> <p><u>RELATED PERFORMANCE MEASURES</u></p> <ul style="list-style-type: none"> • Achieve an average processing cycle time of below four months for the adjustment of status to permanent resident applications (I-485). 	
\$16,835	\$17,118	\$17,120
<p>Infrastructure (End User Support)</p>	<p>Infrastructure (End User Support) covers operations and maintenance of the USCIS IT Infrastructure for over 15,000 federal and contract employees at over 300 locations throughout the country and overseas. The support and services include: A National USCIS Service Desk to include a Help Desk facility with IT systems and personnel to act a single point of contact; hardware maintenance support (approximately 50,000 pieces of hardware); a Technical Assistance Center (TAC); infrastructure operations; desk side support; and deployment services. The first project is to update existing workstations for 7,200 employees with aging technology. The second project is to provide complete workstations to 1,665 employees. Cloud computing services will be provided to 1,300 employees in the National Capitol Region.</p> <p>Infrastructure addresses a capability gap by covering operations and maintenance of the USCIS IT Infrastructure for over 15,000 federal and contract employees at over 300 locations throughout the country and overseas. Infrastructure plans to update 7,200 workstations (units).</p> <p><u>RELATED PERFORMANCE MEASURES</u></p> <ul style="list-style-type: none"> • Achieve an average processing cycle time of below four months for the adjustment of status to permanent resident applications (I-485). • Achieve an average processing cycle time of five months or less for naturalization applications (N-400). 	
\$90,352	\$91,934	\$91,941

<p>Infrastructure (Enterprise)</p>	<p>This program provides capabilities to USCIS employees to access all voice and data communications of USCIS. It is the basic infrastructure that represents information technology utility to USCIS and the comprehensive support of that infrastructure. This program provides support to the Data Center Migration effort. However, this program does not include help desk services, ICE shared services, and ICENET costs. USCIS Infrastructure (Enterprise) program is made up of Shared Services, Global Services, Hosting Services, and Converged Services. Shared Services group administrates and performs Contracting Officer Representative and Designated Agency Representative duties for all data services, telecommunications services and a majority of data center hosting services for USCIS. The investment supports/provides enterprise level data service, DSL data service, cable data service, enterprise level voice circuits, long distance service, toll free service, call center services, calling cards, web conferencing cards, video telecomm, solutions, custom audio conferencing, data center hosting services and cloud services.</p> <p>Infrastructure Enterprise addresses a capability gap by providing the basic infrastructure that represents information technology utility to USCIS and the comprehensive support of that infrastructure. The number of planned increments for 2013 include: 25 Riverbeds with RSP Licenses, 13 data sweeps and disk backups, and 35 Windows Enterprise services licenses.</p> <p><u>RELATED PERFORMANCE MEASURES</u></p> <ul style="list-style-type: none"> • The Infrastructure (Enterprise) program supports each of the USCIS Government Performance Results Act (GPRA) measures. 	
<p>\$133,356</p>	<p>\$135,490</p>	<p>\$135,518</p>
<p>Naturalization - CLAIMS 4.0</p>	<p>The purpose of CLAIMS 4 is to provide immigration benefits and services. CLAIMS 4 is a primary source of information for fraud checks, background checks, fee checks, and FBI name checks that assist adjudicator and field operations to process an applicant. Current benefits include the processing of N400, N336, N600 and N600K form applicants and providing immigration and naturalization benefits. CLAIMS 4 and its related plug-ins Complete File Review and Change of Address represents the primary case processing system for the adjudication of applications for naturalization (N - 400). It is now operational at 92 locations nationwide. The CLAIMS 4 application has initially been divided into subsystems, which support the major functions that CLAIMS 4 is required to provide as specified by the CLAIMS 4 Functional Requirements Document (FRD). CLAIMS 4 system architecture comprises several major subsystems, which include the following: 1) Receipting, 2) Adjudication, 3) Batch Status Update, 4) Case Status, 5), Case Management, 6) Scheduler/Batch Scheduler, 7) Notices, 8) Reports, 9) Oath Ceremony, 10) Management (formerly DocProd), 11) System</p>	

	Maintenance, 12) External Interface, and 13) Workflow Administration.		
	<u>RELATED PERFORMANCE MEASURES</u>		
	<ul style="list-style-type: none"> Achieve an average processing cycle time of five months or less for naturalization applications (N-400). 		
\$8,705	\$8,857		\$8,859
Biometrics Division Program	<p>The Biometrics Division Program captures biometrics, such as fingerprints or digital photographs. In addition to capturing biometrics, this program may accept certain applications for benefits. Approximately 3.2 million immigrants annually are processed through the Biometrics Division Program. The Biometrics Division Program offers six systems and services for immigration processing: "Benefits Fingerprint Processing - Mainframe (FD258MF), Benefits Biometrics Storage System (BBSS), Background Check Service (BCS), Fingerprint Masthead Notification System (FMNS), Image Storage and Retrieval System (ISRS-Web), Identity Management System (IDMS).</p> <p>Biometrics addresses a capability gap by capturing the biometrics of approximately 3.2 million immigrants (units) on an annual basis.</p> <p><u>RELATED PERFORMANCE MEASURES</u></p> <ul style="list-style-type: none"> Achieve an average processing cycle time of below four months for the adjustment of status to permanent resident applications (I-485). 2014 Total Request	3,167	3,009	550,653
Total Change 2012 to 2014	155	374	44,351

USCIS requests 3,167 positions, 3,009 FTE, and \$550.7 million for Service Center Operations to adjudicate applications and ensure improved customer service while delivering the right benefit, to the right person, without delay. Adjustments to base include \$2.4 million for the FY 2014 pay raise; 155 FTP / 374 FTE and \$66.8 million in revised spending authority based on changes in workload requirements and revenue projections; and a decrease of \$24.8 million resulting from an improved methodology for allocating GSA rent charges.

CURRENT SERVICES PROGRAM DESCRIPTION:

Service Center Operations (SCOPS)

SCOPS is one of the key operational components of USCIS. Tasked with the adjudication of the largest volume of applications across the broadest and most diverse cross-section of immigration benefits, SCOPS is a strong and vital partner in the development of immigration policies and programs to ensure improved customer service while delivering the right benefit, to the right person, without delay. SCOPS continuously evaluates and modifies workflow processes in order to more effectively and efficiently administer immigration laws within the established cycle times, and is dedicated to ensuring the security of the United States through a vigilant workforce of officers who incorporate numerous security checks on a broad range of immigration benefit applications. Specialized teams of adjudications staff, law enforcement agencies, and other government agencies work together to conduct extensive research and vetting of individuals and organizations that may pose a threat to the national security of the United States.

Office of Intake and Document Production

The Office of Intake and Document Production leads the processes that support the beginning and end of most immigration transactions. Support for the beginning of the immigration process includes managing USCIS’s forms design, printing and distribution processes, as well as those associated with application intake and fee collection. Support for the end of the immigration process includes production and delivery of secure proof of benefits documents.

PROCUREMENT ACTIVITIES:

Total Change 2012 to 2014	328	371	40,674

USCIS requests 1,125 positions, 1,069 FTE, and \$236.5 million to extend protection, citizenship, and other immigration benefits to eligible individuals as well as detecting fraud and protecting national security. Adjustments to base include \$910,000 for the FY 2014 pay raise; and 328 FTP / 371 FTE and \$39.8 million in revised spending authority requirements based on changes in workload requirements and revenue projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

Refugee, Asylum, and International Operations Directorate (RAIO) extends protection, citizenship, and other immigration benefits to eligible individuals as well as detecting fraud and protecting national security. RAIO is comprised of three operational divisions. The Refugee Affairs Division is a headquarters-based operation whose officers travel internationally to conduct refugee processing in accordance with U.S. law and international obligations. The Asylum Division has eight domestic offices which conduct adjudications of affirmative asylum applications and conduct credible fear screening for all persons placed in expedited removal who request asylum or express a fear of persecution or torture on return to their country of origin. At the start of FY 2013, the International Operations Division had three overseas district offices (Mexico City, Bangkok, and Rome) and 28 field offices. With a broad footprint extending from U.S. embassies and consulates to additional refugee processing locations, RAIO is the face of USCIS abroad.

In furtherance of USCIS's mission and United States interests, RAIO liaises with the United States and foreign governments, international organizations, civil society, non-governmental organizations that provide orientations and resettlement services to Cuban and Haitian migrants paroled into the United States, and private entities worldwide. RAIO is vigilant in safeguarding the integrity of USCIS' various programs by deterring and detecting fraud and threats to national security.

Total Change 2012 to 2014	39	62	7,408

USCIS requests 366 positions, 347 FTE, and \$94.0 million for the management of U.S. immigration records. Adjustments to base include \$286,000 for the FY 2014 pay raise; and 39 FTP / 62 FTE and \$7.1 million in spending authority based on changes in workload requirements and revenue projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

Records Operations

Records Operations funds the management of U.S. immigration records, which includes both the Records Division and the National Records Center (NRC) located within USCIS’s Enterprise Services Directorate. The Records Division is the caretaker of the country’s immigration records, commonly known as alien files or “A-files,” which document individuals’ journeys from (or even before) their original entries into the United States to naturalization. NRC provides customers with timely access to information from the agency’s A-files and subsidiary data systems. NRC operations include records, information liaison, case resolution, and Freedom of Information Act processing.

PPA: Transformation

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	344,054
2014 Adjustments-to-Base	-	-	(160,590)
2014 Current Services	-	-	183,464
2014 Total Request	-	-	183,464
Total Change 2012 to 2014	-	-	(160,590)

USCIS requests 0 positions, 0 FTE, and \$183.5 million to transition USCIS from a fragmented, paper-based operational environment to a paperless, centralized, and consolidated environment, utilizing electronic processing for benefits filing and adjudication. Adjustments to base include a decrease of \$160.6 million to reflect revised estimates for Transformation Funding requirements.

The difference is due to several program changes implemented during the latter part of FY 2012. USCIS moved to an Agile/Modular development process allowing for increments of capability to be fielded more often during the year. USCIS is planning to deploy new functionality supporting several benefit types at least three times during FY 2014. The previous development approach focused on only one large release a year, which USCIS concluded was an ineffective way of meeting its needs.

As a result of the change in development approach, USCIS has revised its contract cost estimates. The program office's Solution Architecture contract's 6th Option Period was originally estimated at \$153M based on the scope and level of effort required to support the previous development approach. The transition to an Agile/Modular development process enabled the program office to negotiate a reduction in scope, level of effort, and cost for Option Period 6 to \$58M. The program office also reduced its Program Management contract and the Office of the Chief Information Officer has re-estimated the internal information technology costs required to enable the new electronic immigration system.

In FY 2013, ELIS deployments will include processing of the new USCIS Immigrant Fee and one of the primary petitions associated with the EB-5 Immigrant Investor Visa program.

CURRENT SERVICES PROGRAM DESCRIPTION:

Business Transformation

As part of a comprehensive set of initiatives to modernize the agency, USCIS has embarked on an enterprise-wide Transformation investment that will transition the agency from a fragmented, paper-based operational environment to a paperless, centralized and consolidated environment, utilizing electronic processing for benefits filing and adjudication. This investment is a large-scale, complex undertaking that is forming the foundation of modernized USCIS-wide business processes and IT-enabled reengineering. The new operational environment, USCIS Electronic Immigration System (USCIS ELIS), employs methods of online customer account processing used in the private sector to facilitate transactions, track activities, and reduce fraud, while accomplishing USCIS's mission of enforcing and administering our immigration laws. In addition, the new operational environment reshapes the way we share information by providing access to information contained in digital immigration files to our own and other Federal partner agencies. The revised processes also help USCIS to meet customer expectations for on-demand information and immediate real-time electronic e-service over the Internet.

The Office of Transformation Coordination provides a centralized management structure to oversee all transformation activities within USCIS, including the coordination of several initiatives converting the current mix of legacy infrastructure and paper-based business processes to electronic-based business processes. The USCIS goals for the Transformation Investment address four major initiatives: (1) National Security and Integrity: USCIS will ensure the integrity of the immigration system and help safeguard the country by effectively collecting, analyzing, and sharing information used to verify identity, eligibility, and status of individuals seeking to become U.S. citizens or lawful permanent residents or to study, live, or work temporarily in this country; (2) Customer Service: USCIS will deliver world-class customer service by adjudicating requests for benefits accurately and within acceptable timeframes, by providing timely and accurate information about immigration benefits and the status of customer requests, and by promoting civic values; (3) Operational Efficiency: USCIS will be an innovative, flexible, and accountable organization that invests in its people and infrastructure to ensure cost-effective and consistent results; and (4) Quality: USCIS will consistently issue high-quality immigration benefit decisions.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
<p>Transformation</p>	<p>The goal of transformation is to modernize USCIS by deploying an enterprise-wide investment that will transition the Agency from a fragmented, paper-based operational environment to a paperless, centralized and consolidated environment, utilizing electronic adjudication. The key customers, stakeholders and beneficiaries of the ELIS Investment are as follows: Enterprise Partners – Department of Homeland Security Components; USCIS Leadership – Senior leaders from the Agency; USCIS Employees – All individuals working for USCIS; Customers and Advocates – The persons petitioning USCIS for benefits and services and the organizations representing those individuals; Government Oversight – Oversight and review entities, including Congress, the Office of Management and Budget, the Government Accountability Office and the Inspector General’s Office; and the Public – IT industry groups, U.S. Citizens, and media outlets.</p> <p>Transformation addresses a capability gap by deploying an enterprise-wide investment that will transition the Agency from a fragmented, paper-based operational environment to a paperless, centralized and consolidated environment, utilizing electronic adjudication. The program has had two major releases (increments), and is planning approximately 15 additional releases in order to complete the system.</p> <p><u>RELATED PERFORMANCE MEASURES</u></p> <ul style="list-style-type: none"> As it is deployed in phases, USCIS ELIS will support each of the USCIS Government Performance Results Act (GPRA) measures

2014 Total Request	284	270	96,409
Total Change 2012 to 2014	15	28	7,518

USCIS requests 284 positions, 270 FTE, and \$96.4 million to provide timely, consistent, and accurate information to our customers. Adjustments to base include \$239,000 for the FY 2014 pay raise and 15 FTP / 28 FTE and \$7.3 million in spending authority requirements based on changes in workload requirements and revenue projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Customer Service and Public Engagement Directorate (CSPED) provides clear, accurate, and timely responses to customer concerns and questions, and engages the public through transparent dialogue that promotes participation and feedback. The Customer Service Division (CSD) is dedicated to proactively providing information and guidance to USCIS applicants, petitioners, and advocates regarding immigration benefits. The Public Engagement Division is dedicated to coordinating and directing agency-wide dialogue with external stakeholders to actively collaborate and maintain open and transparent communication, and seek feedback regarding policies, priorities, and organizational performance reviews.

To meet the demand for telephone customer service, CSD designed and implemented a triage process whereby callers were able to access and obtain general information and case status through a network Interactive Voice Response (IVR) system. Callers whose inquiries require additional information can be transferred to receive live assistance.

The Contact Center Enterprise Office (CCEO) is the branch responsible for oversight of the National Customer Service Center (NCSC) 1-800 number for USCIS. This number provides the general public with prompt and accurate information to their telephonic inquiries regarding immigration laws and benefits. The NCSC 1-800 number averages nearly 1 million telephonic inquiries per month. When a customer calls the NCSC, the call goes directly to the IVR system, which is available in English and

Spanish. If the customer cannot receive resolution to his or her inquiry through the IVR, the customer can request to speak to a live Customer Service Representative (CSR) at a Tier 1 call center. CCEO operates five call center locations providing first line support to our customers. These centers are located in Chantilly, Virginia, Barbourville and London, Kentucky, and Fort Worth and El Paso, Texas. After speaking to a CSR, if the customer requires additional support or has a unique and complex scenario, the CSR will transfer the call to an Immigration Services Officer (ISO) at a Tier 2 Call Center. In this second line of support, the NCSC utilizes USCIS employees who have an extensive immigration law background. Tier 2 ISO call centers are located in New York City and Los Angeles.

2014 Total Request	1,273	1,209	339,421
Total Change 2012 to 2014	221	268	(42,245)

U.S. Citizenship & Immigration Services (USCIS) requests 1,273 positions, 1,209 FTE, and \$339.4 million to strengthen key management processes, systems, and administrative support activities; and to facilitate mission success and enhance the timeliness, accountability, efficiency, and effectiveness of service delivery. Adjustments to base include \$1.3 million for the FY 2014 pay raise; 221 FTP / 268 FTE and \$33.8 million in spending authority based on changes in workload requirements and revenue projections; and a decrease of \$77.3 million resulting from an improved methodology for allocating GSA rent charges.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Administration Program includes the Office of the Director, offices aligned under the Management Directorate, as well as other program offices. The Management Directorate is responsible for procurement operations; management of property plant and equipment, and other material resources; budget, planning and performance, strategic and competitive sourcing, financial and capital asset management; IT systems infrastructure and support; ensuring equal employment opportunities and inclusion for current and potential USCIS employees; human resources and personnel recruitment, hiring, training, leadership development, employee benefits, and work-life programs; immigration forms, print services, and receipt and intake of immigration benefit applications; and the management of security and emergency management operations.

The **Management Directorate** is comprised of the following:

Investment Management Division strives to provide transparency in acquisition and investment management within USCIS programs by analyzing contract performance, assessing and mitigating risks, ensuring effective utilization of resources, and enabling effective decision-making by senior leadership. The division is also responsible for managing, promoting and implementing the Agency's Balanced Workforce Strategy (BWS) and In-Sourcing initiatives.

Office of Administration plans, develops, implements, and evaluates agency-wide policies, procedures, and programs for personal property, facilities, and mail management, for the operation of centrally-managed, agency-wide support activities, and for the direct delivery of administrative support to Headquarters.

Office of the Chief Financial Officer coordinates the development and execution of the budget and biennial fee reviews; manages the performance measurement processes; and, conducts financial management activities consistent with law, regulation, standards, and best practices.

Office of Contracting provides the execution management, oversight, and guidance for the Contracting program. The primary role of the office is to provide USCIS with the supplies/services necessary to accomplish the mission in accordance with the Federal Acquisition Regulation and Departmental policy.

Office of Equal Opportunity and Inclusion provides services and programs to help USCIS maintain an efficient, fair and impartial employment discrimination complaint resolution process; promote inclusion and diversity at all levels of the organization through workforce analysis and barrier elimination/mitigation; and, provide an effective disability accommodation program to ensure that individuals with disabilities receive full access to employment opportunities.

Office of Human Capital & Training provides oversight, direction, and operational support for an integrated program of recruitment, hiring, training, leadership development, performance management, employee benefits, and work-life programs for the USCIS workforce.

Office of Security and Integrity provides leadership in security and emergency management within USCIS to protect employees, facilities, assets and information to advance the USCIS mission by ensuring effective, efficient, and continual operations.

In addition, other core offices not part of the Management Directorate include the following:

Office of the Chief Counsel consists of dedicated legal divisions advising and representing USCIS operational components both at Headquarters and in the field. Divisions include Adjudications Law, Refugee and Asylum Law, Commercial and Administrative Law, Ethics, Transformation Law, Training and Knowledge Management, and Field Operations. Each division is responsible for reviewing, interpreting, and providing legal advice and guidance to USCIS operational components.

Office of Communications oversees and coordinates communication to both internal and external stakeholders to empower employees with the tools needed to perform their jobs, educate the public regarding USCIS benefits and services, and facilitate consistent messaging and imaging for USCIS.

Office of Legislative Affairs maintains communication with Congress through its responses to constituent concerns, promotion of USCIS priorities, proactive outreach on issues of interest, and ongoing educational activities for Members of Congress and staff.

Office of Policy and Strategy directs, prioritizes, and sets the agenda for agency-wide policy, strategy, and long-term planning activities. In addition, the Office undertakes economic analysis supporting regulations development and conducts research and analysis on immigration services issues.

**Department of Homeland Security
Citizenship & Immigration Services
Immigration Examinations Fee Account:
SAVE
Program Performance Justification
(Dollars in Thousands)**

PPA: SAVE

	Perm. Pos	FTE	Amount
2012 Revised Enacted	186	178	29,937
2014 Current Services	186	178	29,937
2014 Total Request	186	178	29,937
Total Change 2012 to 2014	-	-	-

USCIS requests \$29.9 million, 186 positions, and 178 FTE for Systematic Alien Verification for Entitlements (SAVE) in FY 2014. Adjustments to base include an increase of \$157,000 for the FY 2014 pay raise and a decrease of \$157,000 resulting from workload efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

SAVE assists Federal, State, and local agencies in determining a non-citizen’s eligibility for public benefits by checking their immigration status against U.S. Department of Homeland Security immigration databases. By the end of FY 2012, the SAVE Program processed more than 12 million queries and registered 38 new agencies; a 3.8 percent increase over SAVE’s FY 2011 customer base. Large agency customers include the Social Security Administration, the U.S. Department of Housing and Urban Development, the U.S. Department of Education, and the California Department of Motor Vehicles. Every State and the District of Columbia are represented in SAVE’s customer base. The SAVE Program is funded by a combination of user fees paid by its agency customers and general fee receipts paid by USCIS immigration benefit applicants and petitioners. USCIS is committed to ensuring that SAVE user fees are set at a level that supports effective program operations and encourages SAVE users to utilize the system correctly.

Under the Patient Protection and Affordable Care Act (PPACA) partner agencies, such as USCIS, are required to verify applicant data. Eligibility for benefits under the PPACA is limited to citizens, nationals and lawfully present aliens. Undocumented/illegal aliens cannot purchase private health insurance through the Exchanges or qualify for premium tax credits or cost-sharing reductions.

When new benefits incrementally begin taking effect in 2014, with the Exchanges fully operational by October 1, 2013, SAVE expects a case volume increase equivalent to the number of eligible aliens not already covered by health insurance programs. Department of Health and Human Services (HHS) estimates that in FY 2014, SAVE could see between 2.5 and 4.5 million first step queries and between

250,000 and 450,000 additional verification requests with an average of 250,000 additional verifications per year beyond FY 2014.

The SAVE Program and associated technology are fully capable of supporting and implementing the requirements of the PPACA. The IT infrastructure in place is adequate to support this increased verification requirement. USCIS is still evaluating additional workload and potential staffing requirements associated with the PPACA. It is expected that any new positions would be funded by collections from the additional SAVE queries from PPACA agencies.

In preparation for the full implementation of the PPACA, SAVE is enhancing its system verification capabilities. These enhancements, currently in development, include:

- **Electronic Grant Dates for Lawful Permanent Residents, Refugees, Asylees and Parolees:** Currently, agencies must submit a G-845 and G-845 Supplement by mail to determine when an applicant was granted status. Agencies need this information for means-tested benefits. SAVE will provide this functionality electronically on initial verification.
- **Sponsorship Information:** Currently, agencies must request sponsorship information on additional verification. SAVE will provide this on initial verification.
- **Scan and Upload:** Currently, if a G-845 must be submitted, agencies must mail it to DHS. SAVE will provide agencies the ability to scan and upload necessary documents and submit electronically.

Auto Second Step: This functionality will allow SAVE to automatically send PPACA cases to additional verification if the first step response is “institute additional verification.” Currently agencies must submit an additional verification by performing an action in the system.

District Operations Mission Statement

USCIS ensures through program directorates and offices the efficient adjudication of immigration benefits; timely action on related ancillary applications and other assigned product lines; direct customer service, immigration information, assurance of the integrity of the immigration system; assistance to applicants, petitioners, and beneficiaries; detects and combats immigration benefit fraud; identifies threats to national security and public safety; and serves as an effective conduit of information between USCIS and the law enforcement and intelligence communities to address threats to national security and public safety.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	481,734	481,734	563,060	81,326
11.3 Other than full-time permanent	2,742	2,742	3,205	463
11.5 Other personnel compensation	13,955	13,955	16,311	2,356
12.1 Benefits	147,160	147,160	172,004	24,844
Total, Salaries & Benefits	645,591	645,591	754,580	108,989

An increase of \$108,989,000 is requested in Salaries and Benefits for changes in workload requirements and costs for the 2014 pay raise.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$9,020	\$5,855	\$5,855	-\$3,165

A decrease of \$3,165,000 is requested for travel, including all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$1,652	\$1,596	\$1,552	-\$100

A decrease of \$100,000 is requested for the transportation of things, including all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$29,322	\$42,549	\$144,883	\$115,561

An increase of \$115,561,000 is requested for GSA Rent, including all payments to General Services Administration (GSA) for rental of space and rent related services. This change includes re-assignment of rent charges to PPAs based on usage.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$6,202	\$6,202	\$6,357	\$155

An increase of \$155,000 is requested for communications, utilities, and miscellaneous charges, including all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$381,149	\$374,224	\$385,208	\$4,059

An increase of \$4,059,000 is requested for advisory and assistance services, including services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$8,611	\$8,317	\$8,087	-\$524

A decrease of \$524,000 is requested for other services, including contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$131,693	\$128,917	\$125,391	-\$6,302

A decrease of \$6,302,000 is requested for purchases from Government Accounts, including costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$25,761	\$25,761	\$26,405	\$644

An increase of \$644,000 is requested for the operation and maintenance of equipment, including costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.8 Subsistence & Support of persons	\$324	\$313	\$304	-\$20

A decrease of \$20,000 is requested for Subsistence & Support of Persons, including costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$7,302	\$7,302	\$7,485	\$183

An increase of \$183,000 is requested for supplies and materials that are ordinarily consumed or expended within one year after they are put into use, converted in the process of construction or manufacture, used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$30,860	\$30,860	\$36,632	\$5,772

An increase of \$5,772,000 is requested for equipment, including all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
41.0 Grants/Subsidies/Contributions	\$4,960	\$4,960	0	-\$4,960

A decrease of \$4,960,000 is requested for Grants/Subsidies/Contributions, including cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. This request reflects the request for Citizenship and Integration grant funding in the Salaries and Expense Account.

Service Centers Mission Statement

Service Center Operations partners in the development of immigration policies and programs to ensure improved customer service while delivering the right benefit, to the right person, without delay. USCIS continuously evaluates and modifies workflow processes at the four service centers in order to more effectively and efficiently administer immigration laws within the established cycle times, and ensures the security of the United States through a vigilant workforce of officers who incorporate numerous security checks on a broad range of immigration benefit applications.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Asylum, Refugee, and International Operations Mission Statement

USCIS leverages Asylum, Refugee, and International Operations funding domestically and overseas to provide protection, humanitarian, and other immigration benefits and services while combating fraud and protecting national security.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	64,769	64,769	91,510	26,741
11.3 Other than full-time permanent	876	876	1,238	362
11.5 Other personnel compensation	2,999	2,999	4,237	1,238
11.8 Special Service Pay	13	13	18	5
12.1 Benefits	22,328	22,328	31,546	9,218
13.0 Unemployment Compensation	41	41	58	17
Total, Salaries & Benefits	91,026	91,026	128,607	37,581

An increase of \$37,581,000 is requested in Salaries and Benefits for changes in workload requirements and costs for the 2014 pay raise.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$9,878	\$9,091	\$9,091	-\$787

A decrease of \$787,000 is requested for travel, including all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$1,451	\$1,451	\$1,596	\$145

An increase of \$145,000 is requested for the transportation of things, including all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$5,160	\$5,294	\$13,684	\$8,524

An increase of \$8,524,000 is requested for GSA Rent, including all payments to General Services Administration (GSA) for rental of space and rent related services. This change includes re-assignment of rent charges to PPA's based on usage.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$7,643	\$7,643	\$7,834	\$191

An increase of \$191,000 is requested for other rent, including all payments to a non-Federal source for rental space, land, and structures.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$3,667	\$4,144	\$3,778	\$111

An increase of \$111,000 is requested for communications, utilities, and miscellaneous charges, including all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$7,772	\$7,783	\$7,006	-\$766

A decrease of \$766,000 is requested for advisory and assistance services, including services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$14,354	\$16,221	\$14,787	\$433

An increase of \$433,000 is requested for other services, including contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$37,304	\$35,602	\$32,305	-\$4,999

A decrease of \$4,999,000 is requested for purchases from Government Accounts, including costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$5,981	\$5,981	\$6,131	\$150

An increase of \$150,000 is requested for the operation and maintenance of equipment, including costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$1,354	\$1,354	\$1,388	\$34

An increase of \$34,000 is requested for supplies and materials that are ordinarily consumed or expended within one year after they are put into use, converted in the process of construction or manufacture, used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$2,284	\$2,284	\$2,341	\$57

An increase of \$57,000 is requested for equipment, including all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

Records Operations Mission Statement

The Records Division is the caretaker of the country's immigration records, commonly known as alien files or A-files, which document individuals' journeys from (or even before) their original entries into the United States to naturalization. NRC provides customers with timely access to information from the agency's A-files and subsidiary data systems.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Citizenship & Immigration Services H-1B Nonimmigrant Petitioner Account

I. Appropriation Overview

The American Competitiveness and Workforce Improvement Act, requires employers who participate in the H-1B program to pay \$1,500 (or \$750 for those petitioners who employ fewer than 25 full-time equivalent employees), in addition to the base processing fee (currently \$325). U.S. Citizenship & Immigration Services (USCIS) receives 5 percent of the H-1B program funds, and the remaining H-1B program revenue is shared between the Department of Labor and the National Science Foundation. H-1B revenue accounts for less than 1 percent of the total USCIS budget. In FY 2011, the USCIS share of the H-1B revenue collection was \$13.1 million and, in FY 2012, was \$16.1 million.

The FY 2010 Emergency Supplemental Appropriation for Border Security Act increased the supplemental H-1B and L-1 application fees for certain employers. This law requires an additional filing fee of \$2,000 for H-1B petitions, and \$2,250 for certain L-1 petitions, where the petitioner employs 50 or more individuals in the United States and more than 50 percent of its employees are in H-1B or L-1 nonimmigrant status. Revenue from this additional fee is deposited into the General Fund of the Treasury, not the H-1B Nonimmigrant Petitioner or Fraud Prevention and Detection Accounts.

A. Mission Statement for H-1B Nonimmigrant Petitioner Account:

Resources from the H-1B Nonimmigrant Petitioner Account support USCIS's efforts to reinforce quality and consistency in administering immigration benefits.

B. Budget Activities:

Funding from the H-1B Nonimmigrant Petitioner Account primarily supports the Service Center Operations Directorate. Fee revenues primarily fund contract activities (mail, filing, biometric and data entry) and facility rent expenses related to the processing of immigration benefit applications at USCIS Service Centers.

The USCIS Service Center Operations Directorate manages four regionally-based Service Centers which receive, process, and adjudicate applications, petitions, and their related fees for immigration benefits not requiring face-to-face contact with the applicant, petitioner, or beneficiary.

C. Budget Request Summary:

In FY 2014, USCIS requests \$13.0 million and 0 positions, 0 FTE for the H-1B Nonimmigrant Petitioner account. These figures represent no change from FY 2012. H-1B Nonimmigrant Petitioner account funds will continue to support contract activities and facility rent expenses for

the processing of immigration benefit applications. The FY 2014 funding level is fully supported by projected fee receipts in FY 2014.

III. Current Services Program Description by PPA

Department of Homeland Security
Citizenship & Immigration Services
H-1B Nonimmigrant Petitioner Account
Adjudication Services
Program Performance Justification
 (Dollars in Thousands)

PPA: Adjudication Services

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	13,000
2014 Current Services	-	-	13,000
2014 Total Request	-	-	13,000
Total Change 2012 to 2014	-	-	-

USCIS requests \$13.0 million for contract activities and facility rent expenses that support the processing of immigration benefit applications. The fee associated with the requested amount is set by Congressional statute providing USCIS with 5 percent of the fees collected for the H-1B visas (Nonimmigrant Petitioner), in addition to the base-processing fee to file a Petition for a Nonimmigrant Worker (Form I-129).

CURRENT SERVICES PROGRAM DESCRIPTION:

The USCIS Service Center Operations Directorate receives, processes, and adjudicates applications, petitions, and related fees for immigration benefits not requiring face-to-face contact with the applicant, petitioner, or beneficiary, which includes:

- *Family-based petitions* -- facilitating the process for close relatives to immigrate, gain permanent residency, work, etc.
- *Employment-based petitions* -- facilitating the process for current and prospective employees to immigrate or stay in the United States temporarily.

USCIS annually processes millions of immigration benefit applications at its Service Centers. The \$13.0 million for contract activities and facility rent expenses is a portion of the total operations contract support and Service Center rent. The balance is covered by fees from the Immigration Examinations Fee Account.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Citizenship & Immigration Services Fraud Prevention and Detection Account

I. Appropriation Overview

The Fraud Prevention and Detection Account supports activities related to preventing and detecting fraud for all immigration benefit types. These funds primarily support the United States Citizenship and Immigration Services (USCIS) goal to ensure the security and integrity of the immigration system.

The L-1 Visa and H-1B Visa Reform Act of 2004 (title IV of Div. J of Pub. L. 108-447, later amended by Pub. L. 109-13) requires petitioners to pay \$500 when filing a petition for a beneficiary's initial grant of H-1B or L nonimmigrant classification, as well as for a beneficiary who is changing employers within these classifications. Petitioners also pay \$150 when filing a petition on behalf of H-2B workers, in addition to the base processing fee of \$325 for a Petition for Nonimmigrant Worker (Form I-129). These fees are used for anti-fraud purposes. USCIS receives one-third of the revenue, and the remaining revenue is shared between the Department of Labor and the Department of State. USCIS received \$40.8 million in fraud fees in FY 2011 and in FY 2012 received \$45.4 million.

A. Mission Statement for Fraud Prevention and Detection Account:

USCIS uses resources from the Fraud Prevention and Detection account to strengthen national security safeguards and combat fraud.

B. Budget Activities:

The USCIS Fraud Detection and National Security Directorate (FDNS) develops, coordinates and leads national anti-fraud operations for USCIS and oversees and enhances policies and procedures pertaining to the performance of law enforcement (background) checks on applicants and petitioners. In addition, FDNS identifies threats to national security and public safety as well as serving as a conduit for intelligence related information sharing between USCIS and the law enforcement and intelligence community.

C. Budget Request Summary:

In FY 2014, USCIS requests \$41.0 million and 185 positions, 185 FTE employees for the Fraud Prevention and Detection account. The FY 2014 request represents an increase of \$1.8 million and 0 positions, 7 FTE above the FY 2012 level. The increase projected for the FY 2014 request is a result of projected changes in workload and the pay increase. The FY 2014 funding level is fully supported by projected fee receipts in FY 2014.

PPA: District Operations

	Perm. Pos	FTE	Amount
2012 Revised Enacted	115	111	25,055
2014 Adjustments-to-Base	-	4	989
2014 Current Services	115	115	26,044
2014 Total Request	115	115	26,044
Total Change 2012 to 2014	-	4	989

U.S. Citizenship & Immigration Services (USCIS) requests \$26.0 million, 115 positions, and 115 FTE for this activity in FY 2014. Adjustments to base include increases of \$175,000 for the FY 2014 pay raise and \$814,000 and 4 FTE for changes in workload requirements and revenue.

CURRENT SERVICES PROGRAM DESCRIPTION:

As part of a joint anti-fraud strategy and in partnership with U.S. Immigration and Customs Enforcement (ICE), the Fraud Detection and National Detection Services (FDNS) identifies vulnerabilities in the Nation’s immigration system and works to eliminate the potential for exploitation of those vulnerabilities and to prosecute the violators.

Operationally, FDNS officers located in field offices, service centers, and the National Benefits Center perform most anti-fraud activities. These officers perform site inspections, background check, deconfliction, and vetting activities, and coordinate with law enforcement agencies. Field FDNS officers participate in Document Benefit Fraud Task Forces, Joint Terrorism Task Forces, State and Local Fusion Center and other Federal and local law enforcement initiatives. In FY 2012, FDNS officers completed over 27,000 administrative fraud investigations, finding fraud in over 18,000 of them. While these figures represent a significant commitment to anti-fraud work, the USCIS priority is the resolution of national security cases.

In FY 2012, FDNS continued its Administrative Site Visit and Verification Program (ASVVP). These site visits are performed on organizations filing I-129 H1-B temporary worker and I-360 religious worker petitions. Site inspections are conducted on religious worker petitions prior to adjudication, pursuant to regulation, and on post-adjudication religious worker petitions on a random basis. H-1B

site inspections are only conducted post-adjudication on a random basis. The ASVVP detects fraud in individual petitions and applications, and produces data that is useful in determining fraud risks and patterns.

Total Change 2012 to 2014	-	3	792

U.S. Citizenship & Immigration Services (USCIS) requests \$14.7 million, 70 positions, and 70 FTE for this activity in FY 2014. Adjustments to base include increases of \$79,000 for the FY 2014 pay raise and \$713,000 and 3 FTE for changes in workload requirements and revenue.

CURRENT SERVICES PROGRAM DESCRIPTION:

Service Center Operations (SCOPS) is one of the key operational components of USCIS. Tasked with the adjudication of the largest volume of applications across the broadest and most diverse cross-section of immigration benefits, SCOPS is a strong and vital partner in the development of immigration policies and programs to ensure improved customer service while delivering the right benefit, to the right person, without delay. SCOPS continuously evaluates and modifies workflow processes in order to more effectively and efficiently administer immigration laws within the established cycle times, and is dedicated to ensuring the security of the United States through a vigilant workforce of officers who incorporate numerous security checks on a broad range of immigration benefit applications. Specialized teams of adjudications staff work with law enforcement agencies and other government agencies to conduct extensive research and vetting of individuals and organizations that may pose a threat to the national security of the United States.

Performance Measures.....	3

A. Component Overview

The United States Citizenship and Immigration Services (USCIS) is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Management and Administration: This program supports all components of USCIS through the creation and implementation of policies, strategies, and management directives.

Adjudication Services: The Adjudication Services program oversees the legal review and adjudication of six to eight million immigration applications and petitions annually, including asylum applications, petitions by companies on behalf of foreign workers, and applications to naturalize and become a U.S. citizen.

Information and Customer Service: The Information and Customer Service Program manages and coordinates USCIS's information and customer service functions and operations, policies and activities, and manages customer service call center operations. This program helps USCIS's customers to understand eligibility rules and USCIS's procedures, provides case status information, and answers thousands of written inquiries and millions of phone calls regarding immigration programs and benefits.

Citizenship: The Office of Citizenship will strengthen the political and social cohesion of the nation by promoting the integration of immigrants into American civic culture. The Citizenship program: 1) develops educational products and information resources to foster immigrant integration and participation in American civic culture; 2) enhances training initiatives to promote an understanding of and appreciation for U.S. civic principles and the rights and responsibilities of citizenship; and 3) provides federal leadership on immigrant civic integration issues. The Office works with other federal agencies, state and local governments, community and faith-based organizations, adult educators, and other organizations that work with immigrants.

Immigration Status Verification: The USCIS Verification Division delivers employment and immigration status verification with innovative and unparalleled customer service. Through our Verification Information System, we enable authorized E-Verify and Systematic Alien Verification for Entitlements (SAVE) users to verify work authorization and immigration status. E-Verify enables employers to quickly and easily verify the work authorization of their newly-hired employees, and SAVE enables federal, state and local government agencies to obtain immigration status information to determine applicants' eligibility for public benefits and licenses.

Immigration Security and Integrity: Under the Immigration Security and Integrity program, the Fraud Detection and National Security detects, pursues, and deters fraud; ensures law enforcement background checks are conducted on all persons seeking benefits prior to according such benefits; identifies systemic vulnerabilities and other weaknesses that compromise the integrity of the legal immigration system; performs as USCIS' primary conduit to and from the law enforcement and intelligence communities; and coordinates interagency policies, procedures, and other issues with U.S. Customs and Border Protection and Immigration and Customs Enforcement.

Crosscutting Investments: This program includes activities and resources that incorporate the overall functions of USCIS such as Information Security and Enterprise Architecture.

FY 2014 Budget Request

The table below shows USCIS's FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Adjudication Services	9,111	\$1,931,731
Citizenship	23	\$18,093
Crosscutting Investments	191	\$360,599
Immigration Security and Integrity	892	\$167,925
Immigration Status Verification	566	\$144,150
Information and Customer Service	1,275	\$292,274
Management & Administration	1,093	\$304,693
Total Budget Request	13,151	\$3,219,466

B. Component Contributions to Achieving QHSR Missions

The table below shows the alignment of the USCIS programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Management and Administration			100%				
Adjudication Services			100%				
Information and Customer Service			100%				
Citizenship			100%				
Immigration Status Verification			100%				
Immigration Security and Integrity			100%				
Crosscutting Investments			100%				

Mission 3: Enforcing and Administering Our Immigration Laws

Resources Requested

USCIS resources supporting *Enforcing and Administering Our Immigration Laws* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Adjudication Services	\$1,804,871	7,282	\$1,747,362	7,256	\$1,932,933	9,111
Citizenship	\$12,659	25	\$13,029	25	\$18,093	23
Crosscutting Investments	\$323,441	160	\$332,540	191	\$360,599	191
Immigration Security and Integrity	\$136,311	734	\$150,397	735	\$166,417	892
Immigration Status Verification	\$132,361	493	\$132,988	537	\$144,268	566
Information and Customer Service	\$260,418	992	\$259,024	993	\$292,463	1,275
Management & Administration	\$408,403	1,083	\$443,752	1,083	\$304,693	1,093
Total	\$3,078,465	10,769	\$3,079,092	10,820	\$3,219,466	13,151

Note: In FY 2013, the total does not include a rescission of \$1.3M.

Performance Measures

For *Enforcing and Administering Our Immigration Laws*, two types of performance measures are presented. Strategic Performance Plan Measures represent USCIS's measures that gauge achievement for this mission area, and are considered to be our Government Performance and

Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Average of processing cycle time (in months) for adjustment of status to permanent resident applications (I-485)						
Description: An I-485, Application to Register for Permanent Residence or to Adjust Status, is filed by an individual to apply for permanent residence in the United States or to adjust their current status. This measure assesses the program's effectiveness in processing complete I-485 to provide immigration benefit services in a timely manner.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=4	<=4	<=4	<=4.0	<=4.0	<=4.0
Result:	4.4	3.8	4.4	5.1	N/A	N/A

Measure: Average of processing cycle time (in months) for naturalization applications (N-400)						
Description: An N-400, Application for Naturalization, is filed by an individual applying to become a United States citizen. This measure assesses the program's effectiveness in processing N-400 applications, while controlling for a number of external factors that can affect the timeline.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=5	<=5	<=5	<=5.0	<=5.0	<=5.0
Result:	4.2	4.5	4.6	4.6	N/A	N/A

Measure: Overall customer service rating of the immigration process						
Description: This measure gauges the overall rating of the immigration process and is based on the results from the following areas: 1) Accuracy of information; 2) Responsiveness to customer inquiries; 3) Accessibility to information; and 4) Customer satisfaction.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	80%	80%	85%	85%
Result:	N/A	N/A	80%	93%	N/A	N/A

Measure: Percent of Citizenship and Integration Grant Program grantees that meet annual performance plan goals						
Description: This measure reports on the success of grantees in meeting their annual performance goals as of the 3rd quarter. USCIS plays a significant and ongoing role in ensuring the success of grantees by performing the following functions: negotiating with grantees to identify manageable goals and targets to hold them accountable; implementing systems to measure grantee performance; conducting onsite grant monitoring, and prioritizing those grantees in need of technical assistance; providing proactive group technical assistance and guidance and reactive technical assistance to individual grantees deemed in need of such support to ensure grantees are on target to meet performance goals; and providing grantees with regular feedback on their performance including a written assessment of grantee quarterly reports.						
Fiscal	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

United States Citizenship and Immigration Services - Strategic Context

Year:						
Target:	N/A	N/A	N/A	90%	90%	90%
Result:	N/A	N/A	N/A	92%	N/A	N/A

Measure: Percent of initial mismatches for authorized workers that are later determined to be "Employment Authorized"						
Description: This measure assesses the accuracy of the E-verify process by assessing the percent of employment verification requests that are not positively resolved at time of initial review.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=3%	<=1.00%	<=1.00%	<=1.00%
Result:	N/A	N/A	0.28%	0.24%	N/A	N/A

Measure: Percent of non-immigrant worker (H1-B) site visits conducted that result in a potential finding of Fraud						
Description: This measure reflects how many H1-B fraud incidents have been discovered by the Administrative Site Visit Verification Program (ASVVP). This information begins the process to identify and counter systematic vulnerabilities that exist in our immigration system.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=11%	<=11%	<=15%	<=15%
Result:	N/A	N/A	1%	15%	N/A	N/A

Note: In FY 2012, USCIS implemented a more rigorous process through the use of Government Site Inspectors that are authorized to perform follow-up site visits or visit alternate locations if a beneficiary is not available at the site and on the date the initial visit is made.

Measure: Percent of religious worker site visits conducted that result in a potential finding of fraud						
Description: This measure reflects how many religious worker fraud incidents have been discovered as part of the Administrative Site Visit Verification Program (ASVVP). This information begins the process to identify and counter systematic vulnerabilities exist in our immigration system.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=50%	<=65%	<=11%	<=11%	<=10%	<=10%
Result:	60%	N/A	1%	7%	N/A	N/A

Note: In FY 2012, USCIS implemented a more rigorous process through the use of Government Site Inspectors that are authorized to perform follow-up site visits or visit alternate locations if a beneficiary is not available at the site and on the date the initial visit is made.

Management Measures

Measure: Accuracy rate of USCIS's processing of manual verifications for Systematic Alien Verification for Entitlements (SAVE) referrals						
Description: The measure tracks the accuracy of SAVE manual verifications using a quality review which is a monthly review of verification work performed by Status Verifiers (SV) to determine whether SAVE referrals are resolved correctly. Specifically, they determine whether						

the response provided to by USCIS reflects the immigration status on record for persons seeking benefits from other governmental agencies using the SAVE program.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	98.0%	98.0%	98.2%
Result:	N/A	N/A	N/A	98.0%	N/A	N/A

Measure: Average Citizenship Resource Center customer satisfaction rate

Description: This measure tracks how well customers are satisfied with the Citizenship Resource Center (CRC). The CRC is a free and easy-to-use website that helps immigrants better understand the citizenship process and gain the necessary skills required to be successful during the naturalization interview and test. It provides citizenship applicants, educators and immigrant-serving organizations with a one-stop portal for citizenship information and resources, and is the landing portal for USCIS’s Citizenship Public Education and Awareness Initiative.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	80%	85%	85%
Result:	N/A	N/A	N/A	88%	N/A	N/A

Measure: Percent of approved applications for naturalization that were appropriately decided

Description: A N-400, Application for Naturalization, is filed by an individual applying to become a United States citizen. The U.S. Citizenship and Immigration Services (USCIS) conducts quality reviews on a quarterly basis to determine the accuracy rate of final decisions on approved N-400 applications. Quality reviews are conducted using a team of experienced subject matter experts. This measure assesses the program's ability to process the N-400 to provide immigration benefit services in a fully supportable and accurate manner. Additionally, the results of this quality review process are used to improve the training of adjudicators and the processes used in conducting adjudications.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of approved applications for permanent residence that were appropriately decided

Description: An I-485, Application to Register for Permanent Residence or to Adjust Status, is filed by an individual to apply for permanent residence in the United States or to adjust their current status. The U.S. Citizenship and Immigration Services (USCIS) conducts quality reviews on a quarterly basis to determine the accuracy rate of final approved decisions. Quality reviews are conducted using a team of experienced subject matter experts. This measure assesses the program's ability to process the I-485 to provide immigration benefit services in a fully supportable and accurate manner. Additionally, the results of this quality review process are used to improve the training of adjudicators and the processes used in conducting adjudications.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Law Enforcement Training Center Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses:

We train those who protect our homeland.

B. Budget Activities:

The Federal Law Enforcement Training Center (FLETC) is the Nation's largest provider of law enforcement training. FLETC serves as an interagency law enforcement training organization for over 90 Federal Partner Organizations (POs) and numerous State, local, rural, tribal, territorial, campus and international law enforcement agencies.

Most of the Federal POs that train with FLETC attend one of its multi-agency basic programs, and then continue with their unique agency-specific follow-on programs at their own academies, most of which are co-located at one of FLETC's four domestic training sites. In addition to basic training, FLETC also offers a variety of advanced law enforcement training programs.

FLETC has embraced the philosophy that homeland protection is not the sole province of the Federal Government, and that the security of our Nation starts in rural counties, small towns, and municipalities and extends even to our law enforcement colleagues abroad. In addition to basic training, FLETC offers specialized training programs for State, local, rural, tribal, territorial, campus and, through partnership with the Department of State, international law enforcement personnel. These programs are designed to meet critical training needs and to enhance networking and cooperation domestically and globally.

In furtherance of FLETC's mission, our reach is extended through the use of non-traditional training delivery techniques, including the use of online training distribution and the use of technology-based simulation. Additionally, FLETC exports training programs to various locations when a geographical concentration of personnel is identified and the programs being conducted do not require the use of certain specialized facilities.

Training law enforcement officers in a collaborative, multi-agency environment offers both fiscal and qualitative advantages. FLETC teams with its training partners to jointly prepare Federal law enforcement professionals to perform their duties in the safest possible manner, at the highest possible level of proficiency. It endeavors to accomplish this critical mission by delivering consistent, accredited instruction using a proven consolidated training model.

C. Budget Request Summary:

The Federal Law Enforcement Training Center requests 1,126 positions, 1,099 FTE and \$240,544,000. The adjustments-to-base include a transfer of \$1,000 from the Office of the Chief Administrative Officer and a 2014 pay raise of \$932,000. A total of \$24,034,000 for program changes to include:

- Train up to 1,600 additional Customs and Border Protection officers (31 positions, 31 FTE, and \$15,534,000)
- Expand delivery of existing high quality active shooter threat training programs, such as FLETC's Active Shooter Threat Training Program (ASTTP) and First Responder Training Program (FRTP), to state, local, rural, tribal and territorial law enforcement agencies (0 positions, 0 FTE, and \$4,500,000)
- Coordinate with the United States Secret Service (USSS) and the Federal Bureau of Investigation (FBI) to develop a consolidated cyber investigative training curriculum (0 positions, 0 FTE, and \$4,000,000)

And, a reduction of \$23,380,000 for multiple efficiencies described below.

D. Efficiencies:

Mission Support Personnel Efficiencies **(\$7.553M)**

Pay efficiencies will be realized by reducing performance awards, permanent change of station moves, and premium pay in the Law Enforcement Training PPA (\$6.539M), the Management and Administration PPA (\$1.011M), and the Accreditation PPA (\$0.003M).

Travel Efficiencies **(\$0.798M)**

Efficiencies will be realized by reductions in staff travel and permanent change of station expenses in the Law Enforcement Training PPA (\$0.735M), the Management and Administration PPA (\$0.062M) and the Accreditation PPA (\$0.001M).

Transportation of Things Efficiencies **(\$0.240M)**

The reduced number of funded permanent change of station moves will reduce the associated cost of the transportation of things in the Law Enforcement Training PPA (\$0.165M) and the Management and Administration PPA (\$0.075M).

Rent, Communication and Utilities Efficiencies **(\$0.581M)**

Efficiencies will be realized primarily by implementing and maintaining energy efficient utility services in the Law Enforcement Training PPA (\$0.579M) and the Management and Administration PPA (\$0.002M).

Printing Efficiencies **(\$0.147M)**

Efficiencies will be realized by maintaining print services for mission critical law enforcement training products in the Law Enforcement Training PPA (\$0.147M).

Advisory and Assistance Contracts Efficiencies **(\$11.312M)**

FLETC will complete a review of law enforcement training support requirements and adjust the levels on non-mission critical service contracts accordingly, generating savings in the Law Enforcement Training PPA (\$11.015M) and the Management and Administration PPA

(\$0.297M).

Supplies, Materials and Equipment Efficiencies

(\$2.749M)

FLETC will complete a review of non-mission critical supplies, materials and equipment requirements and adjust accordingly, generating savings in the Law Enforcement Training PPA (\$2.708M) and the Management and Administration PPA (\$0.041M).

III. Current Services Program Description by PPA

**Department of Homeland Security
Federal Law Enforcement Training Center
Salaries and Expenses:
Management and Administration
Program Performance Justification
(Dollars in Thousands)**

PPA: Management and Administration

	Perm. Pos	FTE	Amount
2012 Revised Enacted	230	216	29,716
2014 Adjustments-to-Base	(7)	1	(1,296)
2014 Current Services	223	217	28,420
2014 Total Request	223	217	28,420
Total Change 2012 to 2014	(7)	1	(1,296)

FLETC requests 223 positions, 217 FTE, and \$28.420 million for this activity. Adjustments-to-base include:

- 2014 pay raise of \$0.192 million,
- Efficiencies of (\$0.553) million,
- A decrease of (\$0.116) million for service contract savings, and
- A decrease of (\$0.819) million for personnel reductions through attrition.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Management and Administration program includes the FLETC Director, Director’s Office, and immediate staff including the Office of Chief Counsel, Washington Office, Protocol and Communications Office, Equal Employment Opportunity Division, and Inspection and Compliance Division. Also included is the Chief Financial Officer Directorate, providing budget, finance, accounting, financial systems, financial statements, relocation, travel, and strategic planning functions.

The Management and Administration program also includes Asset Management functions, such as Procurement, Real and Personal Property Management, Environmental Compliance and Safety. It includes the Operation Support functions such as Human Capital and Critical Incident Stress Management to promote fairness, consistency, and efficiency in the utilization of staffing, scheduling, human capital and human resources.

2014 Total Request	896	875	210,818
Total Change 2012 to 2014	3	36	2,881

FLETC requests 896 positions, 875 FTE, and \$210.818 million for this activity. Adjustments-to-base include:

- 2014 pay raise of \$0.734 million,
- A transfer of \$0.001 million from the Office of the Chief Administrative Officer for Shared Services to be billed through the Working Capital Fund,
- A decrease of (\$6.660) million to the basic training account,
- Efficiencies of (\$6.273) million,
- A decrease of (\$5.679) million for service contract savings, and
- A decrease of (\$3.276) million for personnel reductions through attrition.

Program increases include:

- \$15.534 million to train up to 1,600 additional CBP officers,
- \$4.500 million to expand delivery of active shooter threat training programs to State, local, rural, tribal and territorial law enforcement agencies, and
- \$4.000 million to coordinate with the United States Secret Service and the Federal Bureau of Investigation to develop a consolidated cyber investigative training curriculum.

CURRENT SERVICES PROGRAM DESCRIPTION:

Law Enforcement Training: FLETC's services to its three major client groups underscore its homeland security support mission in promoting intergovernmental cooperation in law enforcement preparedness.

Federal – FLETC provides law enforcement training to over 90 Federal agencies having law enforcement responsibilities. FLETC prepares new and experienced law enforcement professionals to fulfill their responsibilities in a safe manner and at the highest level of proficiency. The average basic student spends 12 weeks training at FLETC, and receives a combination of classroom instruction and hands-on practical exercise training in all phases of law enforcement from firearms and high-speed vehicle operations to legal case instructions and defendant interview techniques. Students must apply their classroom knowledge during exercises that simulate typical situations encountered on the job. Each of the basic programs provides core knowledge essential for new Federal officers or agents to carry out their duties in a safe and efficient manner.

In addition to basic training, FLETC offers advanced and specialized training for career-long law enforcement preparation in subjects that are common to two or more of its Partner Organizations. Examples include Antiterrorism Port Security Boat Operations, Cyber Counterterrorism Investigator Training, Covert Electronics Surveillance, Critical Infrastructure Protection, Financial Forensics Techniques, Intelligence Analysts Training and Land Transportation Antiterrorism Training.

State and local – The Office of State, Local, Rural, Tribal and Territorial Training trains personnel from State and local law enforcement agencies in advanced topics designed to develop specialized law enforcement skills. The participants benefit from Federal expertise, specialized training, and instruction specific to their needs. Additionally, the program offerings are in subjects not generally available from State and local police academies or colleges and universities.

International – In the interest of combating global crime and protecting U.S. interests abroad, FLETC offers a range of training programs to foreign law enforcement agencies in coordination with the Department of State. Training focuses on the U.S. Government’s Law and Democracy Program and the International Law Enforcement Academy programs in Europe, Asia, Africa, and other regions in the world. In cooperation with the Department of State, FLETC manages an International Law Enforcement Academy in Gaborone, Botswana, and serves as Deputy Director at the International Law Enforcement Academy in Bangkok, Thailand. Additionally, FLETC provides training and technical assistance at locations worldwide in collaboration with and support of the respective U.S. embassies.

**Department of Homeland Security
Federal Law Enforcement Training Center
Salaries and Expenses:
Accreditation

2014 Current Services	7	7	1,306
2014 Total Request	7	7	1,306
Total Change 2012 to 2014	-	-	2

FLETC requests 7 positions, 7 FTE, and \$1.306 million for this activity. Adjustments-to-base include:

- 2014 pay raise of \$0.006 million, and
- FY 2013 efficiencies of (\$0.004) million.

CURRENT SERVICES PROGRAM DESCRIPTION:

Accreditation: The Federal Law Enforcement Training Accreditation (FLETA) process sets the standards for Federal law enforcement training. The accreditation of a Federal Law Enforcement academy or program provides assurance to the citizens they serve that they have voluntarily submitted to a process of self-regulation; and, that they have successfully achieved compliance with a set of standards that have been collectively established by their peers within their professional community that demonstrate their adherence to quality, effectiveness and integrity. To accomplish this goal, trainers in the same discipline, working through a professional accrediting body, assist each other in evaluating and improving their professionalism. The focus of the effort is to accredit Federal academies; entry-level and advanced or specialized training programs; instructor training; and, other programs that affect multiple Federal, State and local law enforcement officers.

IV. Program Justification Changes

**Department of Homeland Security
Federal Law Enforcement Training Center
Salaries and Expenses:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Train additional CBP Officers
PPA: Law Enforcement Training
Program Increase: Positions 31, FTE 31, Dollars \$15,534

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							865	844	186,784
Program Increase							31	31	15,534
Total Request	893	839	207,937	893	872	209,209	896	875	202,318

Description of Item

FLETC will provide basic training for up to 1,600 additional new CBP officers in support of the President's initiatives on promoting travel and trade.

Justification

Newly hired CBP officers must attend an 89 day basic training program at FLETC. Trainees receive extensive training in Title 8 Immigration Law, Title 19 Customs law and all other laws, rules and regulations that CBP enforces nationwide. The training emphasizes basic law enforcement skills such as integrity, firearms handling, defensive tactics and driving, arrest techniques, entry and control procedures, interviewing skills, behavioral analysis, and report writing. CBP officers that graduate from the basic program and are selected for duty locations requiring Spanish communications may also receive an additional 30 days of Spanish Language training.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports Homeland Security Mission 2 – Securing and Managing Our Borders, which is derived from the Quadrennial Homeland Security Review.

**Department of Homeland Security
Federal Law Enforcement Training Center
Salaries and Expenses:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Expand Active Shooter Threat Training
PPA: Law Enforcement Training
Program Increase: Positions 0, FTE 0, Dollars \$4,500

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	494
Program Increase							-	-	4,500
Total Request	3	3	725	2	2	494	2	2	4,994

Description of Item

In support of Presidential guidance that more must be done to prevent and respond to mass casualty shooting violence, the FLETC will expand related Active Shooter Threat Training Programs (ASTTP) and First Responder Training Programs (FRTP) delivered in FY 2014 over the number delivered in FY 2012 to provide training for law enforcement officers of State, local, rural, tribal and territorial law enforcement agencies.

Funding provided to FLETC and FEMA will be leveraged to support multi-discipline and multi-agency training currently being developed as part of the interagency planning efforts associated with the President’s plan to protect our children and our communities by reducing gun violence. This includes training for law enforcement, first responders, and school administrators to prevent, protect, react, respond, and recover from active shooter scenarios.

Justification

Recently issued guidance from the Administration has placed increased focus on the need to provide expanded training to law enforcement officers to enhance response capabilities to active shooter threat situations such as those resulting in multiple casualty shooting incidents. The additional \$4.5 million requested for FY 2014 will enable the FLETC to expand delivery of existing high quality active shooter threat training programs to state, local, rural, tribal and territorial law enforcement agencies.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports the Presidential gun violence reduction program, consisting of 23 Executive Orders, and Homeland Security Mission 1 – Preventing Terrorism and Enhancing Security, which is derived from the Quadrennial Homeland Security Review.

**Department of Homeland Security
Federal Law Enforcement Training Center
Salaries and Expenses:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: USSS/FBI Cyber Investigative Training
PPA: Law Enforcement Training
Program Increase: Positions 0, FTE 0, Dollars \$4,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	4,000
Total Request	-	-	-	-	-	-	-	-	4,000

Description of Item

FLETC will coordinate with the United States Secret Service (USSS) and the Federal Bureau of Investigation (FBI) to develop a consolidated cyber investigative training curriculum. The curriculum will include skills for State and local law enforcement and cyber partners required to effectively respond to major cyber incidents, as well as investigatory guidelines and protocols for cyber investigations.

Justification

DHS plays a key role in securing and guiding the protection of our nation’s cyber infrastructure. The utilization of FLETC’s subject matter expertise to coordinate, consolidate and implement a comprehensive cyber training curriculum will leverage interagency partnerships through information sharing and ensure consistency in curriculum development and delivery.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports DHS Strategic Goal 4 – Safeguarding and Securing Cyberspace – derived from the Quadrennial Homeland Security Review. Leveraging the collective subject matter expertise and shared best practices of the FBI, the USSS, and the FLETC will improve our Nation’s security and safety by supporting and enabling State and local law enforcement to develop expertise necessary to conduct effective cyber investigation as well as respond to major cyber incidents.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Federal Law Enforcement Training Center, including materials and support costs of Federal law enforcement basic training; the purchase of not to exceed 117 vehicles for police-type use and hire of passenger motor vehicles; expenses for student athletic and related activities; the conduct of and participation in firearms matches and presentation of awards; public awareness and enhancement of community support of law enforcement training; room and board for student interns; a flat monthly reimbursement to employees authorized to use personal mobile phones for official duties; and services as authorized by section 3109 of title 5, United States Code; [\$228,939,000]**\$240,544,000**; of which up to [\$44,758,000]**\$53,625,000** shall remain available until September 30, [2014]**2015**, for materials and support costs of Federal law enforcement basic training; of which \$300,000 shall remain available until expended to be distributed to Federal law enforcement agencies for expenses incurred participating in training accreditation; and of which not to exceed \$10,200 shall be for official reception and representation expenses: *Provided*, That the Center is authorized to obligate funds in anticipation of reimbursements from agencies receiving training sponsored by the Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available at the end of the fiscal year: *Provided further*, That section 1202(a) of Public Law 107-206 (42 U.S.C. 3771 note), as amended by Public Law [111-83 (123 Stat. 2166)] 112-74, is further amended by striking “December 31, [2013]**2015**” and inserting “December 31, [2015]**2016**”: *Provided further*, That the Director of the Federal Law Enforcement Training Center shall schedule basic or advanced law enforcement training, or both, at all four training facilities under the control of the Federal Law Enforcement Training Center to ensure that such training facilities are operated at the highest capacity throughout the fiscal year: *Provided further*, That the Federal Law Enforcement Training Accreditation Board, including representatives from the Federal law enforcement community and non-Federal accreditation experts involved in law enforcement training, shall lead the Federal law enforcement training accreditation process to continue the implementation of measuring and assessing the quality and effectiveness of Federal law enforcement training programs, facilities, and instructors.

We train those who protect our homeland.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	18,257	18,367	17,968	(289)
11.3 Other than full-time permanent	475	478	464	(11)
11.5 Other personnel compensation	7	7	7	-
11.6 Pay Diff (Sun/Night)	1,045	1,051	953	(92)
11.7 Military personnel/Awards	218	219	56	(162)
11.8 Special Service Pay	3	3	3	-
12.1 Benefits	5,355	5,387	5,283	(72)
12.4 Allowances	5	5	5	-
12.6 Temp Quarters	407	409	220	(187)
13.0 Unemployment Compensation	255	257	249	(6)
Total, Salaries & Benefits	26,027	26,183	25,208	(819)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	830	498	436	(394)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease of \$332,000 for adjustments and a decrease of \$62,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	120	140	83	(37)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request includes an increase of \$38,000 for adjustments and a decrease of \$75,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	40	49	56	16

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY2014 request includes an increase of \$18,000 for adjustments and a decrease of \$2,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	323	371	371	48

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes an increase of \$89,000 for adjustments and a decrease of \$41,000 for FY 2013 efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	794	974	970	176

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request includes an increase of \$355,000 for adjustments and a decrease of \$179,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	109	134	145	36

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes an increase of \$47,000 for adjustments and a decrease of \$11,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	25	30	33	8

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2014 request includes an increase of \$10,000 for adjustments and a decrease of \$2,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	13	17	19	6

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2014 request includes an increase of \$7,000 for adjustments and a decrease of \$1,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	325	348	300	(25)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request includes an increase of \$38,000 for adjustments and a decrease of \$63,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.8 Subsistence & Support of persons	5	6	7	2

Subsistence and support of persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2014 request includes an increase of \$2,000 for adjustments.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	207	250	265	58

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes an increase of \$81,000 for adjustments and a decrease of \$23,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	390	417	417	27

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes an increase of \$45,000 for adjustments and a decrease of \$18,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
42.0 Insurance Claims and Indemnity	93	110	110	17

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2014 request includes an increase of \$17,000 for adjustments.

Total, Salaries & Benefits	98,869	99,483	97,291	(1,686)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	5,783	4,746	3,928	(1,855)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a decrease of \$735,000 for efficiencies and a decrease of \$1,120,000 for adjustments.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	638	812	687	49

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2014 request includes an increase of \$84,000 for adjustments, a decrease of \$165,000 for efficiencies, an increase of \$74,000 to support additional CBP training, an increase of \$26,000 to support consolidation of cyber investigative training and an increase of \$30,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	8,101	10,314	10,244	2,143

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request includes an increase of \$1,068,000 for adjustments, a decrease of \$579,000 for efficiencies, an increase of \$944,000 to support additional CBP training, an increase of \$334,000 to support consolidation of cyber investigative training and an increase of \$376,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	565	719	607	42

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 request includes an increase of \$74,000 for adjustments, a decrease of \$147,000 for FY 2013 efficiencies, an increase of \$66,000 to support additional CBP training, an increase of \$23,000 to support consolidation of cyber investigative training and an increase of \$26,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	2,927	3,727	3,630	703

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes an increase of \$386,000 for adjustments, a decrease of \$281,000 for FY 2013 efficiencies, an increase of \$341,000 to support additional CBP training, an increase of \$121,000 to support consolidation of cyber investigative training and an increase of \$136,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	10,236	13,031	11,308	1,072

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request includes an increase of \$1,349,000 for adjustments, a decrease of \$2,367,000 for FY 2013 efficiencies, an increase of \$1,193,000 to support additional CBP training, an increase of \$422,000 to support consolidation of cyber investigative training and an increase of \$475,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	5,346	6,806	6,275	929

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes an increase of \$705,000 for adjustments, a decrease of \$868,000 for efficiencies, a transfer of \$1,000 from the Office of the Chief Administrative Officer, an increase of \$623,000 to support additional CBP training, an increase of \$220,000 to support consolidation of cyber investigative training and an increase of \$248,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	30,149	38,386	34,404	4,255

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2014 request includes an increase of \$3,558,000 for adjustments, a decrease of \$5,462,000 for efficiencies, an increase of \$3,517,000 to support additional CBP training, an increase of \$1,244,000 to support consolidation of cyber investigative training and an increase of \$1,398,000 for expansion of active shooter threat training program.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	3,253	4,141	3,678	425

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2014 request includes an increase of \$429,000 for adjustments, a decrease of \$668,000 for efficiencies, an increase of \$379,000 to support additional CBP training, an increase of \$134,000 to support consolidation of cyber investigative training and an increase of \$151,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	10,397	13,236	12,675	2,278

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request includes an increase of \$1,371,000 for adjustments, a decrease of \$1,216,000 for efficiencies, an increase of \$1,212,000 to support additional CBP training, an increase of \$429,000 to support consolidation of cyber investigative training and an increase of \$482,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.8 Subsistence & Support of persons	819	1,043	941	122

Subsistence and support of persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2014 request includes an increase of \$108,000 for adjustments, a decrease of \$153,000 for efficiencies, an increase of \$95,000 to support additional CBP training, an increase of \$34,000 to support consolidation of cyber investigative training and an increase of \$38,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	7,048	8,973	7,774	726

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes an increase of \$929,000 for adjustments, a decrease of \$1,642,000 for efficiencies, an increase of \$821,000 to support additional CBP training, an increase of \$291,000 to support consolidation of cyber investigative training and an increase of \$327,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	17,522	22,308	22,343	4,821

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes an increase of \$2,310,000 for adjustments, a decrease of \$1,066,000 for efficiencies, an increase of \$2,042,000 to support additional CBP training, an increase of \$722,000 to support consolidation of cyber investigative training and an increase of \$813,000 for expansion of active shooter threat training programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
43.0 Interest and Dividends	20	25	22	2

Interest and dividends includes payments to creditors for the use of moneys loaned, deposited, overpaid, or otherwise made available. The FY 2014 request includes an increase of \$2,000 for adjustments.

BUDGET REQUEST AND SUPPORTING INFORMATION

Federal Law Enforcement Training Center Acquisition, Construction, Improvements & Related Expenses

I. Appropriation Overview

A. Mission Statement for Acquisition, Construction, Improvements & Related Expenses:

We train those who protect our homeland.

B. Budget Activities:

The Federal Law Enforcement Training Center (FLETC) is the leading service provider for Federal law enforcement training. FLETC serves as an interagency law enforcement training organization for over 90 Federal Partner Organizations (POs) with personnel located throughout the United States and its territories. FLETC's personnel conduct instructional programs for basic law enforcement recruits and some advanced training based on agency requests. FLETC also provides the necessary facilities, equipment, and support services for conducting advanced, specialized and refresher training for Federal law enforcement personnel.

FLETC provides services to State, local, rural, tribal, territorial, international and other Federal law enforcement agencies with related law enforcement missions on a space-available basis. FLETC also provides export training conducted at other locations when the programs being conducted do not require the use of certain specialized facilities and when a geographical concentration of personnel is identified.

Consolidation of law enforcement training permits the Federal Government to cost-effectively emphasize training program excellence and shared experiences in cooperative training. Professional instruction and practical application provide students with the skills and knowledge necessary to meet the demanding challenges of a Federal law enforcement career. New Federal hires and journey-level personnel learn not only the responsibilities of a law enforcement officer and agent, but through interaction with students from many other agencies, they also become acquainted with the missions and duties of their colleagues. This interaction provides the foundation for a more cooperative Federal law enforcement effort.

FLETC's POs have considerable input regarding training issues as well as operational and functional aspects of the Center. Representatives from these agencies take part in regular curriculum review and development conferences, and participate in the development of FLETC policies and directives. This relationship is characteristic of a "true partnership", which is responsive to the training mission.

C. Budget Request Summary:

The Federal Law Enforcement Training Center requests \$30,885,000. The adjustments-to-base include efficiency savings of \$3,071,000. The program change of \$1,500,000 supports FLETC's Energy Savings Performance Contract.

D. Efficiencies:

Land and Structures Efficiencies

Efficiencies will be realized by deferring maintenance.

(\$3.071M)

III. Current Services Program Description by PPA

Department of Homeland Security
Federal Law Enforcement Training Center
Acquisition, Construction, Improvements & Related Expenses:
Program Performance Justification
(Dollars in Thousands)

PPA: Acquisition, Construction, Improvements & Related Expenses:

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	-	-	32,456
2014 Adjustments-to-Base	-	-	(3,071)
2014 Current Services	-	-	29,385
2014 Program Change	-	-	1,500
2014 Total Request	-	-	30,885
Total Change 2012 to 2014	-	-	(1,571)

FLETC requests \$30.885 million for this activity. The adjustments-to-base of (\$3.071) million is for deferred maintenance. The program increase of \$1.500 million supports FLETC’s Energy Savings Performance Contract.

CURRENT SERVICES PROGRAM DESCRIPTION:

Acquisition, Construction, Improvement & Related Expenses: This account provides for the acquisition and related costs for the expansion and maintenance of FLETC, to include funding for the Facilities Master Plan, Minor Construction and Maintenance, Environmental Compliance, and Communications Systems. The Master Plan provides the long range blueprint for expansion of facilities to meet the training requirements of over 90 Partner Organizations. Minor Construction and Maintenance provides alterations and maintenance funding for approximately 300 buildings. Environmental Compliance funding is to ensure compliance with the Environmental Protection Agency and State environmental laws and regulations. Communications Systems funding is to maintain and repair or replace the fiber optics telecommunications cable system.

Current Services Level							-	-	29,385
Program Increase							-	-	1,500
Total Request	-	-	32,456	-	-	32,655	-	-	30,885

Description of Item

This program increase will permit the first (and all subsequent) debt service payments to be made in advance rather than in arrears, resulting in a shortened payback period and reduced cumulative debt service payments.

Justification

The first debt service payment on the FLETC Energy Savings Performance Contract (ESPC) will be made upon completion of the project (June 2014) rather than a year later after the energy savings have accrued for the first year. The estimated total implementation price is \$32.6 million. The original payback period was reduced from 20 years to 16.7 years, combining cost reductions through negotiation, payment timing, and implemented interest rate. Funding the initial debt service payment in advance, rather than in arrears, will save an estimated \$1.7 million in interest payments and further reduce the payback period by 6 months to 16.1 years. After this initial payment, the project is self-supporting and no further investment is required.

Impact on Performance (Relationship of Increase to Strategic Goals)

The ESPC is a new initiative at the FLETC and will allow the FLETC to make significant progress towards the energy and water reduction goals found in the Energy Policy Act of 2005 and the Energy Independence and Security Act of 2007 as well as providing for significant reductions in the amount of greenhouse gases generated as required by Executive Order 13514. This award by the FLETC also allows the Department to make significant progress toward the Office of Management and Budget goal set for the Department of Homeland Security for alternatively financed energy projections.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For acquisition of necessary additional real property and facilities, construction, and ongoing maintenance, facility improvements, and related expenses of the Federal Law Enforcement Training Center, [\$29,385,000] \$30,885,000, to remain available until September 30, [2017]2018: *Provided*, That the Center is authorized to accept reimbursement to this appropriation from government agencies requesting the construction of special use facilities.

Acquisition, Construction, Improvements & Related Expenses: Mission Statement

We train those who protect our homeland.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	265	265	269	4

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes an adjustment to fund GSA rental payments of \$4,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	35,291	38,949	28,140	(7,151)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when required under contract or by capital lease. The FY 2014 request includes a one-time program increase of \$1,500,000 for the Energy Savings Performance Contract, a decrease of \$3,071,000 for deferred maintenance, an adjustment to fund GSA rental payments of \$4,000 and a decrease of \$5,576,000 for adjustments.

A. Component Overview

The Federal Law Enforcement Training Center (FLETC) is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Law Enforcement Training: The Law Enforcement Training program provides law enforcement training and technical assistance to Federal, State, local, tribal, territorial, and international law enforcement agencies.

Management and Administration: The Management and Administration program provides management and administrative support for the non-operational activities critical to the accomplishment of the FLETC’s law enforcement training mission.

Accreditation: The Federal Law Enforcement Training Accreditation (FLETA) Board enhances the quality of federal law enforcement by establishing and maintaining a body of standards for federal law enforcement training. Currently, there are more than twenty-five federal law enforcement agencies participating in the accreditation process.

FY 2014 Budget Request

The table below shows the Federal Law Enforcement Training Center’s FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Law Enforcement Training	875	241,703
Management and Administration	217	28,420
Accreditation	7	1,306
Total	1,099	271,429

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the Federal Law Enforcement Training Center programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	QHSR Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise ¹
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters

Performance Measures

Strategic Performance Measure

<p>Measure: Number of Federal law enforcement training programs and/or academies accredited or re-accredited through the Federal Law Enforcement Training Accreditation process</p>
<p>Description: This performance measure reflects the cumulative number of Federal law enforcement training programs and/or academies accredited or re-accredited through the Federal Law Enforcement Training Accreditation (FLETA) process. Accreditation ensures that training and services provided meet professional training standards for law enforcement. Re-accreditation is conducted every three years to remain current. The results of this measure provide on-going opportunities for improvements in Federal law enforcement training programs and academies.</p>

Federal Law Enforcement Training Center - Strategic Context

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	24	52	56	74	99	107
Result:	50	52	66	83	N/A	N/A

Management Measure

Measure: Number of Federal Law Enforcement Training Accreditation assessments conducted for accreditation or re-accreditation						
Description: This performance measure reflects the number of Federal Law Enforcement Training Accreditation (FLETA) assessments conducted for Federal law enforcement training programs and academies in the current fiscal year. Assessments are conducted to determine if training programs and/or academies meet FLETA standards for accreditation or re-accreditation. FLETA assessments for accreditation are conducted when Federal law enforcement agencies submit an application requesting accreditation of their training programs and/or academies. Assessments for re-accreditation are conducted every three years. Working through FLETA, trainers in the same discipline assist each other in evaluating and improving their professionalism, leading to a high-degree of public confidence in competent Federal law enforcement agents and officers.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	17	19	21	23	41	45
Result:	18	19	29	39	N/A	N/A

Cross-Cutting

Some of the Components in DHS provide mission support programs and activities that are cross-cutting in nature, and thus support multiple missions. The resources for these programs have been spread across the mission areas in previous sections.

Performance Measures

For performance that is *cross-cutting* in nature, two types of performance measures are presented. Strategic Performance Plan Measures represent FLETC's measures that gauge achievement at the mission level, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Measure

Measure: Percent of Partner Organizations that agree the Federal Law Enforcement Training Center training programs address the right skills (e.g., critical knowledge, key skills and techniques, attitudes/behaviors) needed for their officers/agents to perform their						
Description: This performance measure reflects the satisfaction of Partner Organizations						

Federal Law Enforcement Training Center - Strategic Context

that Federal Law Enforcement Training Center (FLETC) training programs address the right skills needed for their officers/agents to perform their law enforcement duties such as the prevention of the introduction of high-consequence weapons of mass destruction, terrorism and other criminal activity against the U.S. and our citizens. The results of the measure provide on-going opportunities for improvements that are incorporated into FLETC training curricula, processes and procedures.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	77%	79%	84%	97%	97%	97%
Result:	79.8%	83%	98%	96%	N/A	N/A

Management Measures

Measure: Percent of Partner Organizations satisfied with the overall Federal Law Enforcement Training Center training experience

Description: This performance measure reflects the satisfaction of Partner Organizations with the overall Federal Law Enforcement Training Center (FLETC) training experience. The training experience is defined as law enforcement training and services (e.g., housing, food, logistics, recreation, etc.) provided to Partner Organization students and training staff. FLETC training programs prepare Partner Organization officers/agents to perform their law enforcement duties such as the prevention of the introduction of high-consequence weapons of mass destruction, terrorism and other criminal activity against the U.S. and our citizens. The results of this measure provide on-going opportunities for improvements that are incorporated into FLETC training curricula, processes and procedures.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	81%	92%	93%	97%	97%	97%
Result:	91%	96%	98.5%	98%	N/A	N/A

Measure: Percent of Partner Organizations satisfied with the training provided by the Federal Law Enforcement Training Center

Description: This performance measure reflects the satisfaction of Partner Organizations with the training provided by the Federal Law Enforcement Training Center (FLETC) to their officers/agents to perform their law enforcement duties such as the prevention of the introduction of high-consequence weapons of mass destruction, terrorism and other criminal activity against the U.S. and our citizens. The results of the measure provide on-going opportunities for improvements that are incorporated into FLETC training curricula, processes and procedures.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

BUDGET REQUEST AND SUPPORTING INFORMATION

Science & Technology Management and Administration

I. Appropriation Overview

A. Mission Statement for Management and Administration:

Fund the effective and efficient management and leadership of the S&T Directorate activities to deliver advanced technology solutions to DHS components and first responders.

B. Budget Activities:

The Management and Administration (M&A) appropriation provides for salaries and benefits related to 337 FTE at the S&T Directorate headquarters. The 337 FTE provide executive direction to the S&T Directorate for program management, program execution oversight, program analysis, policy analysis, planning, financial management, guidance formulation, and operations and maintenance support for all S&T Directorate programs.

The M&A appropriation funds business operations and the S&T Directorate's share of the DHS Working Capital Fund. The Business Operations functions include paying for rent, office supplies, utilities, and other operational functions associated with the S&T Directorate's Washington, DC headquarters. This account pays for the training and travel associated with senior management of the S&T Directorate and contractor staff who support the execution of headquarters functions including financial management, facility planning, maintenance, and other administrative functions. M&A also funds the administration of the S&T Directorate's regulatory and treaty compliance activities, headquarters shared services agreements, and the financial and programmatic databases. The M&A appropriation does not fund contractor support or travel associated with the direct execution of Research, Development, Test, and Evaluation (RDT&E) programs across the S&T Directorate.

C. Budget Request Summary:

The S&T Directorate requests 337 positions, 337 FTE and \$129.608 million for M&A in FY 2014, a decrease of \$5.392 million from FY 2012. The FY 2014 funding includes an increase of \$0.608 million for the FY 2014 pay raise.

D. Efficiencies:

Mission Support and Personnel Efficiencies

\$2.069 million

S&T will manage 'Salaries and Benefits' to reduce support personnel through attrition and other natural workforce shaping strategies. The Directorate also is reviewing its personnel management strategy to ensure the appropriate resource mix.

Supplies and Materials

\$0.114 million

The savings realized in supplies and materials reflect S&T leadership engagement in reducing discretionary products that are not mission-critical.

Travel

\$0.191million

S&T is committed to reducing travel by 30 percent below FY 2010 levels. This efficiency is carried out by performing only mission-essential travel. S&T will maximize the use of conference calls, local area events, and web-based communications as appropriate to reduce costs to the Government.

Advisory & Assistance Contracts

\$2.340 million

These contracts savings will be realized through a comprehensive review of several advisory and assistance contracts to ensure that essential operational requirements are met. The contracts will be re-competed with expected savings of \$2.340 million in FY 2014.

S&T M&A Total Efficiencies

\$4.714 million

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

III. Current Services Program Description by PPA

**Department of Homeland Security
Science & Technology
Management and Administration:
Salaries and Expenses
Program Performance Justification**
(Dollars in Thousands)

PPA: Salaries and Expenses

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	334	333	135,000
2014 Adjustments-to-Base	3	4	(5,392)
2014 Current Services	337	337	129,608
2014 Total Request	337	337	129,608
Total Change 2012 to 2014	3	4	(5,392)

The S&T Directorate requests \$129.608 million for this activity. There is a decrease of \$5.392 million from FY 2012 and includes the following adjustments to base:

- Increase of \$0.186 million in the shared services administrative transfer from DHS CAO
- Increase of \$0.608 million for the 2014 pay raise
- Decrease of \$4.714 million in efficiencies
- Decrease of \$0.794 million in other adjustments
- Decrease of \$0.678 million for the Working Capital Fund.

CURRENT SERVICES PROGRAM DESCRIPTION:

The M&A appropriation funds salaries and benefits related to 337 FTE at the S&T Directorate headquarters. The 337 FTE provide executive direction to the S&T Directorate for policy analysis, planning, financial management, and guidance formulation. These FTE also conduct program management, execution, oversight, analysis, as well as operations and maintenance support for all S&T Directorate programs.

The M&A appropriation funds all of the corporate-level functions in the S&T Directorate that allow the technical divisions to manage the Research, Development, Test, and Evaluation (RDT&E) programs. Those functions include the Finance and Budget Division, including the Chief Financial Officer; the Administration and Support Division, which manages the facilities, personnel and

information technology infrastructure (IT); and the Corporate Communications Division, which coordinates internal and external information dissemination. The DHS Working Capital Fund (WCF) provides those shared services that the components rely on to execute their missions, such as contracting officers and the DHS-wide IT infrastructure.

This budget request supports the overhead and administration of the four Research, Development, Acquisition and Operations PPAs, each of which has an important role in implementing RDT&E activities. These PPAs are: Acquisition and Operations Support; Research, Development and Innovation; Laboratory Facilities; and University Programs.

Acquisition and Operations Support

Provides expert assistance to entities across the homeland security enterprise (HSE) to ensure that the transition, acquisition and deployment of technologies, information, and procedures improve the efficiency and effectiveness of the operational capabilities across the HSE mission. This includes providing technological assessment of major acquisition programs in DHS to help ensure that technologies, concept of operations, and procedures meet operational requirements; technology analysis and technology review of analysis of alternatives at the beginning and throughout an acquisition program's life; oversight of the test and evaluation of DHS major acquisition programs; standards to support the Homeland Security mission, and administration of the Support Anti-Terrorism by Fostering Effective Technologies (SAFETY) Act program.

The five main areas of Acquisition and Operations Support are: Operations Research and Analysis; Safety Act; Standards; Technology Transition Support; and Testing and Evaluation.

Laboratory Facilities

The Office of National Laboratories (ONL) manages the Laboratory Facilities programs. ONL provides the Nation with a coordinated, enduring core of productive science, technology and engineering laboratories, organizations and institutions, which can provide the knowledge and technology required to secure our homeland.

The *Homeland Security Act of 2002* assigns ONL "the coordination and utilization of the Department of Energy (DOE) national laboratories and other sites under Section 309 in a manner to create a networked laboratory system for the purpose of supporting the missions of the Homeland Security Department." In addition to oversight of the S&T Directorate's laboratory operations, ONL coordinates homeland security-related activities and laboratory-directed research conducted within DOE's national laboratories.

ONL's internal customers are the S&T Directorate's executing divisions and the Test and Evaluation and Standards division. The primary external Federal customers are: U.S. Department of Agriculture; Transportation Security Administration; and the Federal Bureau of Investigation. ONL executes two programs: Construction and Laboratory Operations.

Research, Development, and Innovation (RD&I)

RD&I provides state-of-the-art technology and solutions to meet the needs of the operational components of the Department and the first responder community. It includes customer-focused and output-oriented RDT&E programs that balance risk, cost, impact, and time to delivery. These RDT&E

programs support the needs of the operational components of the Department and the first responder community and address crosscutting areas such as standards and interoperability. The six thrust areas of research and development include: APEX Research and Development; Border Security; Chemical Biological, and Explosive Defense; Counter Terrorist; Cyber Security; and Disaster Resilience.

University Programs

University Programs supports critical homeland security-related research and education at U.S. colleges and universities to address high-priority DHS-related issues and to enhance homeland security capabilities over the long term. The program brings together scientists, mathematicians, and engineers from many academic disciplines and institutions. These researchers are investigating research questions important to DHS and developing new technologies and approaches to solve complex and challenging homeland security problems. The program focuses on building homeland security expertise in the academic community, creating strategic partnerships among universities and public agencies, and developing a new scientific workforce of homeland security experts. The primary customers for University Programs are the S&T Directorate's divisions, the DHS component agencies, and Federal, State, and local government agencies.

Finance and Budget Division

The Finance and Budget Division provides the S&T Directorate with high-quality, efficient, and cost-effective financial management services through six branches. The Budget and Performance Office develops long-term plans for resource allocation, execution plans, Congressional Justifications, and management of financial resources within the S&T Directorate. It also develops and implements internal and external performance metrics for S&T Directorate programs, as well as risk assessment methodologies to help inform programming decisions. The Acquisition Branch develops the S&T Directorate's acquisition strategy. The Financial Services Branch manages the travel and purchase card programs. The Financial Operations Branch is dedicated to sound fiscal stewardship of the S&T Directorate's appropriations and reimbursable funding; timely and accurate budget execution, financial management and financial reporting. The Internal Controls Branch monitors programs and activities to provide assurance about the adequacy of internal controls within the S&T Directorate. The Conferences and Contracts Services Branch streamlines the conference approval processes, implements processes that achieve cost savings in conference planning and supports the management and oversight of major contracts.

Administration and Support Division

The Administration and Support Division provides critical infrastructure support to the S&T Directorate and is composed of seven components: Facilities, Human Capital Office, Office of the Chief Information Officer, Office of the Chief Administrative Officer, Office of Administration and Audits, Central Security Office, and Readiness and Operational Coordination. In compliance with Presidential Directives, Federal regulations and Department guidance, the Administration and Support Division provides support and continuous process improvement through problem identification and solution, sound policy and procedure development, and high-quality service.

Corporate Communications Division

The Corporate Communications Division communicates the objectives and status of homeland security technology programs, disseminates information regarding opportunities for private-sector entities (corporate and academic), and ensures that the media understands and accurately represents DHS

technologies and programs. The Corporate Communications Division holds conferences and manages the S&T Directorate's presence at other information-sharing events to improve contact among technology developers, vendors, and acquisition personnel. They also promote the participation of colleges, universities, private research institutes, and companies (and consortia thereof) in the research process by disseminating information regarding research conducted or sponsored by the Department, and provide public-communication support to the S&T Directorate-sponsored FFRDCs.

Working Capital Fund

Funds provided within the M&A appropriation are also used to acquire services through the DHS WCF, which includes: IT services, human resources, procurement operations, and financial systems. The WCF also provides consolidated subscriptions, government-wide mandated services, and DHS crosscutting activities.

IV. Program Justification Changes

N/A

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

*For salaries and expenses of the Office of the Under Secretary for Science and Technology, and for management and administration of programs and activities as authorized by title III of the Homeland Security Act of 2002 (6 U.S.C. 181 et seq.),[\$138,008,000] ¹**\$129,608,000**: Provided, That not to exceed \$8,500 shall be for official reception and representation expenses.*

<i>Language Provision</i>	<i>Explanation</i>
¹ ...[\$138,008,000] <u>\$129,608,000</u> ...	<i>Dollar change only. No substantial change proposed.</i>

Salaries and Expenses Mission Statement

The Management and Administration (M&A) appropriation provides for salaries and expenses related to 337 full time equivalent (FTE) personnel in Washington, D.C. This appropriation also provides for the operation of the S&T Directorate's Washington, D.C., headquarters including business operations, contributions to the DHS Working Capital Fund, and other administrative costs associated with the management of the S&T Directorate and its resources.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	43,370	43,635	41,788	\$(1,582)
11.3 Other than full-time permanent	3,540	3,562	3,540	0
11.5 Other personnel compensation	1,508	1,517	1,508	0
12.1 Benefits	12,358	12,434	11,871	(487)
Total, Salaries & Benefits	60,776	61,148	58,707	(2,069)

Includes a reduction of \$2,069,000 in mission support personnel with a \$608,000 increase for a 1.0% federal pay raise. S&T will manage Salaries and Benefits to reduce support personnel through attrition and other natural workforce shaping strategies. The Directorate is also reviewing its personnel management strategy to ensure the appropriate resource mix.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$723	\$727	\$532	\$(191)

Includes a \$191,000 reduction due to travel efficiencies. S&T is committed to support OMB's mandate to reduce travel by 30 percent below FY 2010 levels. This efficiency is carried out by performing mission essential travel. S&T will maximize the use of conference calls, local area events, and web-based communications as appropriate to reduce costs to the Government.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$26,770	\$26,902	\$24,430	\$(2,340)

Includes a decrease of \$2,340,000 for a reduction in contractor support contracts. These contracts savings will be realized through a comprehensive review of several advisory and assistance contracts to ensure that essential operational requirements are met.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$800	\$805	\$800	\$(0)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$40,704	\$40,704	\$40,026	\$(678)

Includes a decrease of \$678,000 for Working Capital Fund activities. Includes \$186,206 for the transfer of Mail, Parking, Sedan and Transit Services to WCF.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$156	\$157	\$156	\$(0)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$2,464	\$2,479	\$2,464	\$(0)

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$614	\$618	\$500	\$(114)

Includes a reduction of \$114,000 in supplies. The savings realized in supplies and materials reflect S&T leadership engagement in reducing discretionary products that are not mission-critical.

BUDGET REQUEST AND SUPPORTING INFORMATION

Science and Technology Research, Development, Acquisitions, and Operations

I. Appropriation Overview

A. Mission Statement for Research, Development, Acquisitions, and Operations:

The S&T Research, Development, Acquisitions, and Operations (RDA&O) mission is to improve homeland security by working with partners to provide state-of-the-art solutions and/or technology that helps them achieve their missions. S&T partners and customers include the operating components of the Department; other government agencies; and state, local, tribal, and territorial emergency responders and officials. This mission is accomplished through partner-focused and output-oriented research, development, testing, and evaluation (RDT&E) programs that balance risk, cost, impact, and time to delivery. These RDT&E programs support the needs of the operational components of the Department and the first responder community and address crosscutting areas such as standards and interoperability.

Through RDA&O, S&T ensures that DHS and the homeland security community have the science, technical information, and capabilities they need to effectively and efficiently prevent, protect against, respond to, and recover from all-hazards and homeland security threats. S&T's RDA&O develops state-of-the-art solutions to protect the Nation's people and critical infrastructure from chemical, biological, explosive, and cyber attacks.

B. Budget Activities:

The Directorate has four RDT&E program, project, and activities (PPA), and 16 thrust areas, each of which has an important role in implementing research and development activities. These four PPAs are: Acquisition and Operations Support; Research, Development and Innovation; Laboratory Facilities; and University Programs.

Acquisition and Operations Support (AOS)

AOS provides expert assistance to entities across the homeland security enterprise (HSE) to ensure that the transition, acquisition, and deployment of technologies, information, and procedures improve the efficiency and effectiveness of the operational capabilities across the HSE mission. The five thrust areas of Acquisition and Operations Support are: Operations Research and Analysis; Safety Act; Standards; Technology Transition Support; and Testing and Evaluation.

Laboratory Facilities

The Office of National Laboratories (ONL) manages the Laboratory Facilities Programs. ONL provides the Nation with a coordinated, enduring core of productive science, technology and engineering laboratories, organizations and institutions, which can provide the knowledge and

technology required to secure our homeland. ONL executes two thrust areas: Construction and Lab Operations.

Research, Development, and Innovation (RD&I)

RD&I provides state-of-the-art technology and/or solutions to meet the needs of the operational components of the Department and the first responder community. It includes customer-focused and output-oriented RDT&E programs that balance risk, cost, impact, and time to delivery. The six thrust areas of RD&I include: APEX; Border Security; Chemical, Biological, and Explosive Defense (CBE); Counter Terrorist; Cyber Security; and Disaster Resilience.

University Programs

University Programs supports critical homeland security-related research and education at U.S. colleges and universities to address high-priority DHS-related issues and to enhance homeland security capabilities over the long term. The three thrust areas of University Programs include: Centers of Excellence and Minority Serving Institutions.

C. Budget Request Summary:

The S&T Directorate requests 130 positions, 130 FTE, and \$1,397,488,000 for RDA&O in FY 2014, an increase of \$859,488,000 from FY 2012. The FY 2014 funding reflects an increase in Maritime Border Security, Land Border Security, Chemical Attack Resiliency, Natural Disaster Resiliency, Information Sharing, and Counter Terrorist R&D. It also includes an increase of \$0.190 million for a one-percent Federal pay raise.

D. Efficiencies:

Travel

\$1.278 million

S&T is committed to reducing travel by 30 percent below FY 2010 levels. This efficiency is carried out by performing mission-essential travel. S&T will maximize the use of conference calls, local area events, and web-based communications as appropriate to reduce costs to the Government.

Advisory & Assistance Contracts

\$0.256 million

The contracts savings are realized through a comprehensive review of several advisory and assistance contracts to ensure that essential operational requirements are met. The contracts will be recomputed to garner expected savings in FY 2014.

S&T RDA&O Total Efficiencies

\$1.534 million

Net, Enacted Appropriations and Budget Estimates:	126	126	538,000	130	130	536,262	130	130	1,397,488	4	4	859,488	-	-	868,332	4	4	(8,844)

The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L. 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.

The FY 2013 column excludes funding from the FY 2013 Disaster Relief Supplemental.

III. Current Services Program Description by PPA

**Department of Homeland Security
Science & Technology
Research, Development, Acquisitions, and Operations
Acquisition and Operations Support
Program Performance Justification**

(Dollars in Thousands)

PPA: Acquisition and Operations Support

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	-	-	54,154
2014 Adjustments-to-Base	-	-	-
2014 Current Services	-	-	54,154
2014 Program Change	-	-	(12,451)
2014 Total Request	-	-	41,703
Total Change 2012 to 2014	-	-	(12,451)

The Science and Technology (S&T) Directorate requests \$41.703 million for AOS in FY 2014. The \$12.451 million decrease in FY 2014 reduces funding for Complex Event Modeling, Simulation, and Analysis (CEMSA), eliminates funding in Infrastructure and Community Resiliency and Radio Frequency Identification (RFID) Standards.

CURRENT SERVICES PROGRAM DESCRIPTION:

Acquisition and Operations Support PPA - Provides expert assistance, including systems engineering, to entities across the homeland security enterprise (HSE) to ensure that the transition, acquisition, and deployment of technologies, information, and procedures improve the efficiency and effectiveness of the operational capabilities across the HSE mission. This includes providing technological assessment of major acquisition programs in the DHS to help ensure that technologies, concept of operations (CONOPS), and procedures meet operational requirements, technology analysis and technology review of analysis of alternatives at the beginning and throughout an acquisition program's life; oversight of the test and evaluation of DHS major acquisition programs; standards to support the homeland security mission, and administration of the Support Anti-Terrorism by Fostering Effective Technologies (SAFETY) Act program.

The five thrust areas of AOS are: Operations Research and Analysis; SAFETY Act; Standards; Technology Transition Support; and Testing and Evaluation.

Operations Research and Analysis Thrust – FY 2012: \$12.280 million. FY 2014 Request: \$6.451 million. Provides science-based analytic capability and capacity to DHS to better understand threats and the implications of major decisions, evaluates alternatives, improves DHS mission operations and the use of technology across the HSE, and improves the Department's risk management capabilities.

Homeland Security Studies and Analysis Institute (HSSAI)

HSSAI is a Federally Funded Research & Development Center (FFRDC) that ensures the highest levels of objectivity and technical excellence by bringing together the expertise and point-of-view of government, industry, and academia to solve complex HSE technical problems based on their core technical capabilities, their long-term relationship with the Department, their special access to data, and their inherent objectivity and independence. HSSAI supports DHS Components by providing specialized technical expertise in a spectrum of mission critical capacities, to include independent program analyses and evaluation, targeted trade-off studies of mission-level goals and strategies; analyzing operations and operational requirements; assessing DHS organizations and their governance; and evaluating performance metrics to effectively meet the future challenges facing the Nation. HSSAI also supports senior Department leadership by performing cross-component analysis to recommend methods to optimize and prioritize competing priorities in a resource-constrained environment.

Intelligence, Surveillance, & Reconnaissance Project

This project involves collaborating and partnering with the Department of Homeland Security Components and associated HSE members, the Department of Defense (DOD), the 16-member intelligence community, and other USG interagency members to share information and expertise, operational requirements, and material science and technology solutions to HSE intelligence challenges.

Knowledge Management and Tech Foraging Project

This program enhances the Directorate's ability to gather and manage accumulated knowledge and essential information for the benefit of the HSE to identify and evaluate existing or developing technologies, services, and emerging trends.

The goals of Knowledge Management are to develop and maintain an environment where S&T employees share and access relevant knowledge and lessons learned, and foster collaborative development efforts. Proper management of knowledge and information helps to protect the privacy of all individuals and ensures compliance with Freedom of Information Act (FOIA) requirements. Knowledge Management works with S&T staff to assess privacy risks, recommend privacy protections, and mitigate improper disclosures and breaches of personal information, while also facilitating efforts to promote an open and transparent government.

The goal of Technology Foraging is to leverage the public and private sectors - both international and domestic - to identify, locate, and evaluate existing or developing technologies, products, services, and emerging trends that will expedite speed of execution, maximize partnership opportunities, and assemble resources to impact the development of current or future homeland security systems and architectures, and DHS operational needs. Through technology foraging, S&T stays abreast of advances throughout the research and development (R&D) community and effectively leverages others' investments. This approach enables S&T to rapidly match existing or near-term technologies to the operational requirements of the HSE, increasing efficiency in the expenditure of funds and accelerating time to fielding.

SAFETY Act Thrust— FY 2012: \$8.902 million. FY 2014 Request: \$7.880 million. This program provides legal liability protections for the development and deployment of qualified anti-terrorism technologies - equipped to save lives in the event of a terrorist attack. In accordance with the SAFETY Act of 2002, this program removes barriers to industry investments, enabling potential providers of

effective anti-terrorism technologies to develop, deploy, and commercialize these technologies with liability limitations for claims arising out of, relating to, or resulting from an act of terrorism.

Standards Thrust – FY 2012: \$15.938 million. FY 2014 Request: \$8.220 million. This program serves as the Standards Executive in support of all DHS activities; identifies standards needs; and funds initial standards development to ensure that technologies applied across the HSE meet minimum operational needs and do so in a safe, effective, and actionable manner.

Chemical and Biological Systems Standards Project (formerly Biological Countermeasures Standards and Chemical Countermeasures Standards)

This project supports cost-effective deployment of chemical and biological countermeasure technologies at the Federal, State, and local levels by working with other DHS Components and Federal agencies and by providing an effective, coordinated response to chemical and biological events through standards development and adoption. This project has developed both validated technical methods and training curricula that encourage capability building at the jurisdiction level that will provide manufacturers, responders, and facility operators with performance specifications, testing criteria, and application guidance.

Explosives Countermeasures Standards Project (formerly Explosives Countermeasures Standards and X-Ray Screening Equipment Standards)

This project develops standards that measure image quality, sensitivity, and contrast of imaging systems that provide the Transportation Security Administration (TSA), U.S. Customs and Border Protection (CBP), U.S. Coast Guard (USCG), and many other users with materials, methods, and training to increase the ability to detect concealed explosives and other weapons under clothing. These standards enhance the performance, reliability, and safety of explosive detection technologies, ensuring the safety of the general public and equipment operators, by keeping explosives out of transportation systems, Federal buildings, and critical infrastructure.

Human Systems Engineering Project

This project will improve customer capability to design and develop products in terms of human performance requirements that are more safe, reliable, affordable, supportable, and easy to use. It develops and defines requirements for systems, technologies, methods, and measures to influence and evaluate the design of user interfaces for new and existing technologies. Providing a standard process for applying human systems integration (HSI) as defined in the Acquisition Management Directive 102 and its respective appendices (i.e., Appendix B: Systems Engineering Life Cycle), this project plans to demonstrate HSI analysis, design, testing and evaluation (T&E), and risk management processes on various DHS S&T programs/projects. To date, the project successfully transitioned the process to the USCG (CG-1B3) and has a second Technology Transition Agreement (TTA) in place with Immigration and Customs Enforcement's (ICE) Office of the Chief Information Officer. Future TTAs with various other operational components are in progress.

Human Systems Research Project

This project addresses improving human performance capabilities of TSA screeners, X-ray image analysts, and first responders by incorporating human performance requirements into technology and deployed systems. The project maximizes the understanding of human performance to increase overall system efficiency and effectiveness. This project plans to complete research and transition of Checkpoint Screening Human Performance Research for aviation security operations to the TSA, and provide an improved safe and efficient patient compartment ambulance design to the first responder

community. Future efforts include investigating human performance issues for DHS end users in trace detection methodologies and information display commonalities across the Components.

Responder & Resiliency Standards (formerly Biometrics Equipment Standards, Infrastructure and Community Resiliency Standards, Mobile Platforms, and RFID)

This project safeguards the Nation's HSE by facilitating coordinated responses to emergencies and by increasing the confidence of responder equipment and building infrastructures through the development of standardized guidance, training plans, and performance specifications. This project ensures a coordinated response to emergencies by developing standards based capabilities and standardized response plans and training for responders, localities, and communities. This project also develops performance-based design methodologies for buildings and infrastructures subjected to a variety of hazards and defined performance specifications, test methods to determine performance specifications, and guidance related to Federal, State, and local response to emergencies.

Standards Infrastructure Project

This project supports S&T's participation in national and international standards organizations and activities to ensure that DHS equities are addressed and that the development and use of standards meet Departmental mission needs, enabling DHS and its customers to procure and acquire reliable, interoperable, and effective technologies and processes. This project promotes and maintains relationships with standards-development organizations to ensure communication with and commitment to partnerships, as well as ongoing infrastructure such as databases and working groups.

Technology Transition Support Thrust – FY 2012: \$10.393 million. FY 2014 Request: \$13.813 million. This thrust facilitates the transition of S&T Directorate solutions to customers. These activities involve integrating technology development efforts across the S&T Directorate to develop the most cost-effective and timely solutions and processes to meet customer requirements, including first responders.

Acquisitions Support and Operations Analysis (ASOA)

This project provides DHS with a full range of coordinated policy, guidance, processes, products, and outreach in 1) standards, 2) systems analysis, 3) research and development T&E, and 4) operational T&E. Working with the Under Secretary for Management, ASOA leverages S&T's critical mass of scientific and engineering expertise to ensure that DHS develops and/or procures technologies that work as expected, and are delivered or transitioned on time and on budget.

Interagency Programs

This program, in cooperation with other Federal agencies, works to leverage the existing and incoming capabilities of private sector organizations in a way that most efficiently and effectively meets the DHS mission. By doing so, S&T has identified several private industry organizations that are developing technologies to alleviate security and interoperability concerns as well as solving security technology gaps.

International Cooperative Programs

This program facilitates the matching of U.S. entities engaged in homeland security research with similar non-U.S. entities, so that they may share extensive experiences with and technological expertise in homeland security to safeguard lives and property against acts of terrorism and other high-consequence events. Collaboration within such partnerships develops new capabilities or improves operational effectiveness, efficiency, or safety for the HSE. Funding for International Cooperative Programs will be used to match foreign government and foreign private entities' direct funding, funding of complementary activities, or the provision of staff, facilities, material, or equipment to

provide DHS access to international research and development that can be used to detect, prevent, respond to, recover from, and mitigate against acts of terrorism or natural disasters.

Program Transition

This project establishes and implements a technology development program to focus near-term S&T work on the transitioning projects and capabilities needed by DHS operational components, directorates and their external customers. This includes partnering with In-Q-Tel, the not-for-profit venture capital firm that invests in high-tech companies for the Central Intelligence Agency (CIA), on projects for homeland security in high-tech, cutting-edge technologies such as DNA analysis, standoff explosives trace detection, cybersecurity, and secure covert surveillance. This program administers a requirements-driven, delivery-oriented effort that draws upon technologies that can be developed, matured, and delivered to DHS acquisition programs, commercialized, or validated as a standard within a three-year period.

Testing and Evaluation Thrust – FY 2012: \$6.641 million. FY 2014 Request: \$5.339 million. The T&E Thrust establishes policies and procedures and coordinates T&E resources to verify attainment of technical performance specifications and evaluate operational effectiveness/suitability prior to system deployment. T&E works to ensure that DHS integrates a uniform and centrally managed departmental test and evaluation process into the systems engineering and acquisition lifecycle. The infrastructure area will assess, integrate, and coordinate DHS and non-DHS test assets to ensure that adequate test capabilities are available to support DHS programs and projects.

First Responder Technologies (System Assessment and Validation for Emergency Responders (SAVER)) Project

This project provides high-quality, impartial, operationally relevant evaluations and specification verification of critical emergency responder-related equipment based on current national challenges as well as the needs of first responders. SAVER provides decision makers and responders with information to better select, procure, use, and maintain emergency response equipment. This sharing of information is a life-saving and cost-saving asset for DHS, as well as for Federal, State, local, and tribal users of emergency response equipment.

Oversight T&E Activities for Special DHS Projects (formerly Oversight Activities of DHS T&E Products and T&E Activities for Special DHS Projects)

This project increases the quality of information provided to decision makers and improves the quality of systems and technologies fielded to the end user by working directly with all 150+ DHS major acquisition programs to assist in the development and execution of a robust T&E program. This work leads to the determination of the program's effectiveness and suitability.

T&E Infrastructure Development Project

This project provides the Department with a searchable database to identify existing testing infrastructure available for DHS use, such as facilities, equipment, and analytical capabilities, by creating an inventory of current T&E infrastructure resources that identifies infrastructure needs and eliminates excess. This project decreases the cost of testing through efficient infrastructure utilization while increasing the awareness of test capabilities available for use by the T&E community, program managers, and other users.

T&E Policy Analysis and Development Project

This project improves the quality of T&E conducted throughout DHS by developing T&E policies and procedures that define T&E activities required of all DHS Components throughout the acquisition

process to verify the attainment of technical performance specifications and evaluate operational effectiveness/suitability prior to system deployment. This project continually maintains and revises the T&E Directives, Guidebooks, and training courses that support T&E efforts throughout the Department.

Department of Homeland Security
Science & Technology

2014 Total Request	130	130	857,785
Total Change 2012 to 2014	4	4	676,285

The S&T Directorate requests \$857.785 million for this activity in FY 2014. This \$676.285 million increase includes a one-percent Federal pay raise, funding to build the main laboratory at the National Bio and Agro-Defense Facility (NBAF), Plum Island Animal Disease Center (PIADC) infrastructure upgrades, NBACC operations, and includes the following adjustments to base:

- Increase of \$0.190 million for the 2014 pay raise
- Decrease of \$0.178 million in efficiencies
- Decrease of \$5 million due to one-time transfer from TSA for PIADC infrastructure upgrades

CURRENT SERVICES PROGRAM DESCRIPTION:

Laboratory Facilities PPA –ONL manages the Laboratory Facilities Programs. ONL provides the Nation with a coordinated, enduring core of productive science, technology, and engineering laboratories, organizations, and institutions, which can provide the knowledge and technology required to secure our homeland.

Construction Thrust – FY 2012: \$68.200 million. FY 2014 Request: \$743.250 million. This program oversees the planning, budgeting, and management of laboratory infrastructure construction and upgrade projects. Construction projects provide and maintain R&D capabilities to support the missions of the S&T Directorate, the Department, and other government agencies that have interrelated homeland security missions. The investments include the construction of future laboratories, where a current capability does not exist, and upgrades to extend the life and capabilities of present laboratory facilities.

Infrastructure Upgrades Project

This project ensures that S&T Directorate Laboratories do not reach a point where obsolete or insufficient infrastructure prohibits continued operations for R&D. Capital upgrades are more than routine operations and maintenance or expected upkeep of infrastructure. They may include new construction, renovation, or remodeling to structures that enable scientists to pursue new capabilities based on customer requirements; and major repairs of infrastructure systems (e.g., electrical, water/sewage). These efforts are planned and coordinated to help prevent an unmanageable and unaffordable situation where multiple key facilities require upgrades simultaneously. The highest priority for upgrade is PIADC to ensure operational continuity until NBAF comes on line.

National Bio-Agro Defense Facility Construction

NBAF will replace PIADC as the Nation's first line of defense against foreign animal diseases. NBAF will provide additional capabilities in a state-of-the-art research, development, testing, and evaluation infrastructure, including BSL-4 capabilities, for high-consequence zoonotic (i.e., transmitted from animals to humans) diseases that could threaten public health. The increased capabilities allow NBAF to address a broader and more complete spectrum of threats and improve our understanding of potential agro-terrorism such as employing foreign animal and zoonotic disease pathogens against U.S. targets.

Laboratory Operations Thrust – FY 2012: \$108.300 million. FY 2014 Request: \$114.535 million.

This program manages the operations, core capabilities, maintenance, and personnel requirements of the DHS S&T Laboratories and infrastructure. This program also oversees the continued operations of facilities to meet the mission requirements while maintaining safe, secure, compliant, and efficient operations.

Chemical Security Analysis Center (CSAC) Facility Operations

This facility develops and informs risk assessments related to national chemical defense. CSAC is located at the DOD Edgewood Chemical Biological Center (ECBC) in Aberdeen, MD. CSAC supports a variety of customers within DHS, the Federal Government, and the HSE: the S&T Directorate's Chemical and Biological Division, DHS components such as the National Protection and Programs Directorate (NPPD) and TSA, and Federal agencies, such as Environmental Protection Agency (EPA), Federal Bureau of Investigation (FBI), and DOD. CSAC also provides science- and technology-based quality assurance information regarding chemical threat to support the unified national effort to secure the Nation. The DOD Sample Receipt Facility (SRF) at ECBC houses CSAC, providing the capability to integrate knowledge across the full chemical threat spectrum. Operational costs for this facility include rent, security, utilities, and information technology.

National Urban Security Technology Laboratory (NUSTL) Operations

NUSTL provides testing and evaluation capabilities to the S&T Directorate and other DHS Components such as the Domestic Nuclear Detection Office (DNDO). NUSTL also is the liaison for the deployment of experimental technologies in the New York City metropolitan area and provides technical support to the regional first responder community. NUSTL is a government-owned, government-operated laboratory located in Manhattan, New York. Major operational costs include rent, information technology, and security.

National Biodefense Analysis and Countermeasures Center Operations

NBACC provides the capability to characterize current and future biological threats, assess their impacts, and inform the development of countermeasures and vaccines in response to events and identified threats. The NBACC mission is to provide the Nation with the scientific basis for characterization of biological threats and bioforensic analysis to support attribution of their planned

and actual use. NBACC is part of the National Interagency Biodefense Campus that includes the Department of Health and Human Services (HHS), DOD, and Department of Agriculture (USDA). The unique missions of threat characterization and bioforensics enhance the Nation’s overall biodefense capabilities. NBACC closely collaborates with the FBI and other law enforcement agencies. NBACC also continues to examine opportunities for the cooperative use of existing capacity for work needed by other Federal agencies. S&T operates NBACC as an FFRDC. The FFRDC plans, manages, and executes the NBACC research programs and operates the facility.

Plum Island Animal Disease Center Operations

PIADC conducts research on contagious foreign animal diseases (e.g., foot-and-mouth) and develops strategies and vaccines to protect the Nation’s animal industries and exports from foreign animal diseases accidentally or deliberately introduced into the United States. DHS and USDA jointly perform the R&D work at PIADC. Both organizations have a research presence, including laboratory employees, but DHS is responsible for the operations and maintenance of the facility. The combined work of both agencies supports the S&T Directorate’s agro-terrorism countermeasures programs. Research at the facility occurs in BSL-2, BSL-3, and BSL-3Ag laboratory spaces. The laboratory is a self-sustaining operation, with its own power plant, fuel storage, fire protection, waste disposal, and security systems. S&T provides the only ferry transport to and from the island and is responsible for operating and maintaining the ferries, docks, and harbor. S&T delivers the day-to-day operational support, including the operations work force. Major operational costs include security, an operations & maintenance contract, utilities, and fuel.

Transportation Security Laboratory (TSL) Operations

TSL performs research, development, and validation of solutions to detect and mitigate the threat of explosives. TSL is an RDT&E laboratory that develops promising explosive detection technologies to the point of operational T&E. TSL supports S&T’s Explosives Division and ASOA, and TSA. The real property and facilities belong to the Federal Aviation Administration (FAA). Major operational costs include rent, operation support contracts, building maintenance, utilities, security, and information technology. TSL is located at the FAA William J. Hughes Technical Center in Atlantic City, N.J.

Salaries and Benefits

Funds salaries and benefits for non-headquarters, Federal employees located at S&T’s field laboratories. These employees operate and execute programs at the S&T Laboratories in support of S&T divisions, DHS components, and other government agencies.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding \$79.000 million	FY 2013 Activity Funding \$29.000 million	FY 2014 Activity Request \$748.132 million
NBACC	<ul style="list-style-type: none"> The NBACC facility is comprised of the National Bioforensic Analysis Center (NBFAC) and the National Biological Threat Characterization Center (NBTCC). The NBFAC conducts bioforensic analysis of evidence from a biocrime or terrorist attack to attain a "biological fingerprint" to help investigators identify perpetrators and determine the origin and method of attack. The NBFAC supports the FBI in conducting and facilitating technical forensic analyses and 	

	<p>interpretation of material recovered following a real or suspected bioterrorist attack. The NBTCC conducts studies and laboratory experiments to fill in information gaps to better understand current and future biological threats; to assess vulnerabilities and conduct risk assessments; and to determine potential impacts to guide the development of countermeasures such as detectors, drugs, vaccines, and decontamination technologies. The NBACC is a key component in implementing the President's National Strategy for Homeland Security, as it addresses the need for substantial scientific research to better anticipate, prevent, and mitigate the consequences of biological attacks. The NBACC provides dedicated, secure, and responsive biocontainment laboratories to conduct biothreat characterization and vulnerability assessments, as well as dedicated bioforensics operational capacity; and capacity for high-containment research and development. Construction of the facility (one unit) has been completed and the NBACC is now operating in steady-state mode.</p> <p>NBACC addresses a capability gap by conducting bioforensic analysis of evidence from a biocrime or terrorist attack to attain a "biological fingerprint" to help investigators identify perpetrators and determine the origin and method of attack. NBACC has constructed 1 facility (unit), and it is complete.</p> <ul style="list-style-type: none"> • FY 2012: \$29.000 million; FY 2013: \$29.000 million; FY 2014: \$34.132 million
<p>NBAF</p>	<ul style="list-style-type: none"> • The proposed NBAF is an integrated foreign animal and zoonotic disease research, development and testing facility that will support complementary missions of DHS and USDA to protect the United States from the numerous infectious foreign animal and zoonotic diseases present throughout the world that could threaten our public health, agriculture, and economy, and bring effective countermeasures and vaccines to industry for further development. Several Presidential Directives and congressional mandates assign agricultural defense responsibilities to both DHS and USDA. Any animal disease outbreak posing a nationally significant impact on U.S. agriculture is within DHS's Homeland Security Presidential Directive 9 (HSPD-9) coordination responsibilities. DHS was authorized as the lead for bio- and agro-defense research and development at PIADC by the Homeland Security Act of 2002. PIADC is at the end of its lifecycle - as a facility it does not meet modern bio-containment standards and has several critical capability limitations. It does not possess large animal biosafety level 4 (ABSL-4) laboratory space, meaning that any outbreak of emerging or zoonotic disease requiring this bio-containment level could not involve direct livestock research, which would severely inhibit U.S. response capability. As a BSL-3 facility, PIADC also has a limited capacity to perform R&D. NBAF will provide the U.S. with these capabilities to protect our agricultural

economy, food supply, and public health. NBAF will provide the U.S. with BSL-4 diagnostic and research capabilities rather than relying on limited large animal ABSL-4 facilities located in other countries.

- NBAF addresses a capability gap by creating an integrated foreign animal and zoonotic disease research, development and testing facility to protect the United States from the numerous infectious foreign animal and zoonotic diseases present throughout the world that could threaten our public health, agriculture and economy, and bring effective countermeasures and vaccines to industry for further development. NBAF will be incrementally constructed in three segments as follows: 1) site Preparation (complete), 2) central utility plant and 3) main laboratory.
- FY 2012: \$50.000 million; FY 2014: \$714.000 million

2014 Current Services	-	-	264,490
2014 Program Change	-	-	202,510
2014 Total Request	-	-	467,000
Total Change 2012 to 2014	-	-	201,217

The S&T Directorate requests \$467.000 million for RD&I in FY 2014. The \$201.217 million increase in FY 2014 allows S&T to resume R&D work in areas such as: Land and Maritime Border Security; CB&E Defense Research; Disaster Resilience; Cyber Security; Counter Terrorist R&D; and include the following adjustments to base:

- Decrease of \$1.293 million in efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

RD&I PPA - Provides state-of-the-art technologies and solutions to meet the needs of the operational components of the Department and the first responder community. Includes customer-focused and output-oriented RDT&E programs that balance risk, cost, impact, and time to delivery. The six thrust areas of RD&I include: APEX; Border Security; CB&E Defense Research; Counter Terrorist R&D; Cyber Security; and Disaster Resilience.

APEX Thrust – Consists of cross-cutting, multi-disciplinary efforts requested by DHS Components. APEX projects are high priority, high-value, and short turn-around in nature.

APEX – FY 2012: \$14.000 million. FY 2014 Request: \$15.013 million. This project supports potential Apex projects for ICE, TSA, United States Secret Service (USSS) Criminal Investigative Division (CID), Homeland Security Investigations (HSI), and Federal Emergency Management Agency (FEMA).

APEX Border Enforcement Analytics Project (BEAP) Project

This project partners with ICE to formulate and deploy strategic solutions for counter-trafficking utilizing emerging Big Data Analytics technology. The program has three primary goals: (1) Reverse-engineering senior agent knowledge to create case leads and institutionalize; (2) Conduct operationally relevant experiments and characterize the performance of Big Data technologies; and (3) Deploy operational development capabilities in ICE to transition Big Data capabilities to HSI. The program will utilize technical metrics for assessing Big Data technologies that will be correlated to mission metrics for investigations based on developmental system deployments to ICE HSI.

APEX Air Entry/Exit Re-Engineering (AEER) Project

APEX AEER is a partnership between S&T and CBP. The purpose of the proposed project is twofold. First, the project will develop and subsequently transition an enduring capability to model and simulate Air Entry and Exit operational processes and the CBP Office of Field Operations (OFO) resources deployed to execute them. Leveraging the insight gleaned from the modeling and simulation tools, the project will then develop, test, pilot, and evaluate candidate integrated biographic and biometric solutions designed to yield more efficient and effective traveler facilitation and screening systems. This project plans to transition to CBP Air Entry/Exit technology prototypes, modeling and simulation capabilities, and knowledge products including, but not limited to: capability analyses; economic impact analyses; notional “to-be” concept of operations; acquisition and engineering processes, procedures, findings, and best practices.

Border Security Thrust – DHS secures the borders, territorial waters, ports, terminals, waterways, and air, land, and sea transportation systems of the United States. S&T invests in R&D of border security technology to: prevent the illicit movement and illegal entry or exit of people, weapons, dangerous goods, and contraband; manage the risk posed by people and goods in transit; and disrupt and dismantle transnational criminal organizations.

Land Border Security – FY 2012: \$9.600 million. FY 2014 Request: \$18.280 million. This program develops and transitions technical capabilities that strengthen U.S. land border security by safeguarding lawful trade and travel and disrupting and dismantling transnational criminal and terrorist organizations.

Air-Based Technologies Project

This project improves the use of airborne sensors from Unmanned Aircraft Systems (UAS), aerostats, and fixed and rotary wing manned aircraft by both CBP and the first responder community for improved detection, identification, and classification of illicit activity and improved situational awareness during emergency events (e.g. floods, forest fires). The project identifies and quantifies existing capability gaps and conducts flight testing and evaluation of commercial-off-the-shelf (COTS) or near-COTS technologies in operational environments to meet user requirements. The project will also improve CBP and the first responder community’s awareness and understanding of available airborne sensor capabilities by publishing the results of S&T flight experimentation and assessment of small UAS. The project also develops and conducts assessments of technologies for ultimately allowing UAS greater access to the National Airspace System

Border Spotter Project

This project will provide an ability to detect, locate and disrupt spotters employed by traffickers along the Southwest Border. These spotters are positioned at vantage points along the border to monitor Border Patrol and other U.S. law enforcement movements and advise drug smuggling operatives when it is clear to cross the border. The deployment of sensors with specialized sensing modalities will facilitate detecting the presence of spotters. This project will identify methods and technologies that

can be used by Border Patrol agents to effectively “spot the spotter” and take away the spotter’s advantage by selectively disrupting communications.

Ground-Based Technologies Project

This project improves CBP’s ability to secure U.S. terrestrial borders by developing advanced sensors and surveillance systems to detect and classify illegal incursions. The project performs RDT&E of algorithms and sensors (such as radars, imagers, unattended ground sensors, and tripwires) for detecting, tracking, and classifying slow moving targets in difficult terrain and four season weather. The project’s goal is to improve overall border security and agent safety by improving situational awareness through increased sensor and surveillance system capabilities.

Rapid Response Prototyping Team (RRPT) Project

This project provides rapid evaluation and integration of COTS and near-COTS technology where there is an identified border security need. Using matching funding from S&T and CBP, the project will assess technologies, including sensors, and sensor systems to address critical capability gaps in border security and will deliver prototype solutions to the field. RRPT will also address areas where prototype technology can result in cost-savings for operational infrastructure.

Small Dark Aircraft Project

This project significantly improves CBP’s capability to detect, track, and interdict low-flying, low-observable aircraft (helicopters, ultra-lights, fixed wing) carrying illicit cargo/contraband across the U.S. border. With thousands of miles of rugged, forested terrain, CBP has limited ability to detect and track small aircraft operating along the Northwest Border. This project will develop inexpensive, man-portable, flexible, wide-area sensors/sensor systems to detect and accurately track small aircraft and enable CBP to optimize the use of its limited interdiction assets.

Tunnel Activity Monitoring Project

This project provides CBP the capability to detect and track human activity in public infrastructure storm drains and sewers, which are being used increasingly as conduits for smuggling and illegal entry. This project will design, test, and operationally evaluate an S&T-developed system consisting of miniaturized, long-life sensors, robust relayed communications, signal processing algorithms, and command center displays providing persistent surveillance and monitoring of drainage tunnel activity.

Tunnel Age Project

This project will develop an accurate and consistent methodology to determine tunnel age for use by CBP and ICE field agents. We plan to investigate four different methodologies to identify a mechanism with the required sensitivity and time resolution so that the determination of the age of a tunnel that can be performed by CBP and ICE accurately and consistently.

Tunnel Detection Project

This project significantly improves the ability of CBP and ICE to detect, locate, and interdict clandestine tunnels used for smuggling people, illegal drugs, and contraband. Using collected and open-sourced geological/geophysical data from hot spots along the Southwest border and sensor and geophysical models, the project is developing a Sensor Performance Tool and Sensor Guidebook to inform CBP Acquisition and Operations of the best remote sensing tools to purchase and use to detect tunnels in the high risk areas of the southwestern U.S. border. Output from the Performance Tool and Guidebook will also help S&T to target specific systems/subsystems for further development in order to enhance detection performance.

Maritime Border Security Program – FY 2012: \$3.134 million. FY 2014 Request: \$9.000 million. This program develops and transitions technical capabilities that enhance U.S. maritime border security by safeguarding lawful trade and travel and disrupting and dismantling transnational criminal and terrorist organizations.

Coastal Surveillance (CSS) Pilot Project

This project provides CBP and USCG significantly enhanced maritime situational awareness of small vessel traffic in the port and coastal regions of the U.S. This project will integrate and pilot, in an operational environment, the tools and data sources identified and/or developed in other S&T maritime border security projects (*Port and Coastal Surveillance Improvement Project and Small Dark Vessels Project*)

Detection of People in Water Project

The project will provide an enhanced capability for USCG to detect humans in open water, significantly reducing search time while increasing the likelihood of detection and rescue. This will result in saved lives and more effective utilization of USCG assets (reduced flight hours, manpower, fuel). The system will provide the USCG with: (1) automated real-time detection, (2) cueing of detected position to other on-board systems such as heads-up displays, radar, turreted electro-optical /infrared sensors and recording systems, and (3) automated capability to minimize environmental effects for better detection accuracy.

Port and Coastal Surveillance Improvement Project

This project provides CBP and USCG improved maritime situational awareness of small vessel traffic in the port and coastal regions of the U.S. This project generates new data tracks on small vessels by integrating existing vessel tracks with new sources (e.g., National Oceanic and Atmospheric Administration (NOAA) high frequency (HF) radar), developing an unclassified data fusion engine (Open Mongoose), and continuing to leverage ongoing investments being made by other government agencies (e.g., DOD), the private sector, and international partners. The end result will provide the USCG and CBP the tools to effectively integrate and consolidate vessel track data to create actionable law enforcement information.

Small Dark Vessels Project

This project improves the ability of DHS components to detect, track, identify, and interdict self-propelled semisubmersible (SPSS) and fully submersible vessels (FSV) transporting illicit cargo into the U.S. Through technology foraging, collaboration with other government agencies, the private sector, and international partners, and the development of new capabilities, S&T will evaluate, develop, and integrate viable technologies to address the SPSS/FSV threat.

Cargo Security Program – FY 2012: \$3.000 million. FY 2014 Request: \$4.300 million. This program develops technologies to ensure the integrity of cargo shipments (including sea, air, and land conveyance) and enhances the end-to-end security of the supply chain, from the manufacturer of goods to final delivery, while ensuring economic throughput for the US economy. This work will reduce the risk of terrorists manipulating cargo as it conveys across various transit modes in the international supply chain.

Maritime Cargo Security Pilot Project

This project demonstrates to CBP and partner nations enhanced methods to provide security for maritime cargo in the global supply chain. The project showcases S&T-developed security devices including the Container Security Device, Marine Asset Tag Tracking System, Network Access Device,

and Data Consolidation Point in a pilot program that will enable improved visibility and door intrusion detection of maritime cargo/containers from the point-of-stuffing in overseas into and through U.S. ports of entry to final destination.

Maritime Secure Hybrid Composite Container (SHCC) Build/Pilot Project

This project will demonstrate to CBP the capability to secure maritime cargo throughout the global supply chain by using the S&T-developed SHCC with embedded security grid, providing 6-sided tampering monitoring, lighter weight and longer life (as compared to current steel containers). The project will design and build a prototype production line for the purpose of determining the anticipated cost of production of the SHCC, a crucial factor in industry acceptance/adoption. The results of the project will also form the basis for establishment of "Expedited Trade Lanes", enhancing the flow of legitimate commerce. We anticipate cost-sharing with other U.S government agencies and international partners.

Polymerase Chain Reaction Collection Efficiency Project

This project provides CBP the capability to detect illegal activity through the use of forensic analysis on genetic material collected from suspicious cargo/packages. The project will investigate, research, and exploit existing DNA genetic fingerprinting technology to develop methods of collection, storage, and processing of DNA samples from the variety of packages and materials encountered by CBP agents in our ports and border crossings. The aim is to collect and present DNA samples of adequate quantity and quality to maximize the opportunity to perform useful forensic analysis.

CB&E Defense Thrust – S&T Directorate invests in R&D to support threat awareness, prevention, and protective strategies, coordinated surveillance and detection, response and recovery initiatives to address chemical, biological, and explosive threats. Efforts include: prevention of terrorism; prevention of the unauthorized use of weapons of mass destruction (WMD) within the U.S.; reduction of vulnerability of critical infrastructure from terrorist attacks and other hazards; prevention of the illicit movement and illegal entry or exit of people, weapons, dangerous goods, and contraband; and, coordination with local and regional partners to identify hazards, assess vulnerabilities, and develop strategies to manage the risks associated with man-made hazards.

Bioagent Detection Program – FY 2012: \$27.080 million. FY 2014 Request: \$36.661 million. This program conducts research, and develops and identifies tools to enable rapid detection and provide advanced warning of attacks or releases of biological threat agents against the population and agriculture of the United States. It defines the intended use and application, develops the requirements, and executes the technology developmental efforts to support early detection and warning of potential bioagent threats to humans and animals.

Agricultural Screening Tools Project

This project improves the ability of Federal agencies such as the USDA and U.S. Food and Drug Administration (FDA) to screen for and detect high priority foreign animal diseases that threaten the U.S. agricultural critical infrastructure by developing and standardizing protocols and tools. It focuses on the development of standardized technologies to include immunoassay-based approaches and real-time polymerase chain reaction to identify animals infected with high priority foreign animal diseases. This project plans to develop and deploy screening tools to the National Animal Health Laboratory Network for the detection of foreign animal diseases including foot-and-mouth disease (FAD), classical swine fever, and rift valley fever.

Alternative Chemical, Biological, Radiological Sensor Architectures Project

This project expands the ability of the Centers for Disease Control and Prevention (CDC), DHS'S Office of Health Affairs (OHA), and the greater public health community to rapidly customize suites of sensors to meet specific mission needs in information assembly and fusion. The project will explore a variety of methods to rapidly collect information useful for identifying outbreaks or unusual events. Areas for research will include integration and interpretation of social media feeds, plug-and-play sensor integration concepts for organic assembly of multiple information sources to lead to more rapid interpretation and decisions, and support for the technology development needs of the National Biosurveillance Integration System and national rollout.

Bioassays Project

This project provides Federal Laboratories (e.g., Laboratory Response Network (LRN)) and first responders the ability to comprehensively validate biothreat agent detection assays to screen and monitor for multiple pathogens in the event of a bio-attack. This project develops rapid detection assays to recognize biological threat agents and toxins in support of the National Bio-Monitoring Architecture, Public Health Surveillance through the Public Health Actionable Assay initiative, and the Integrated Consortium of Laboratory Networks event detection, characterization, and mitigation. This project is also developing bio-informatics resources, reference strain repository, antibody repository, and standards. These resources and activities will evaluate and support use of Public Health Actionable Assays validated by the CDC's LRN for initiating a public health response based on environmental sensing. It will also promote interoperability and unified operational concepts for U.S. Government-deployed systems through the establishment of Federal Standards for Assay Performance and Equivalency. Finally, the bioassays project will evaluate novel approaches to recognize and identify emerging biological threats, and serve to create technologies to detect them.

High Confidence Actionable Rapid Indoor Detector Project

This project enhances the preparedness of building owners/operators and emergency personnel by developing and providing a stationary, autonomous system with sufficient sensitivity to allow actionable emergency responses upon detection of a broad range of chemical and biological threat agents. This system will be integrated into existing indoor facilities of concern to afford 24/7 protection of building occupants. In addition, system data can be sent, in real-time, to external first responders in route to the scene. This project will build upon previous DHS S&T investments in the areas of chemical and biological detector development, as well as leverage other agency and industrial investments.

Multi-Application Multiplex Technology Platform Project

This project will provide a robust, specific, and sensitive suite of detection assays that can be used by Federal Laboratories and the private sector by developing a rapidly deployable, easy-to-use, highly multiplexed nucleic acid detection system. This technology will provide greatly enhanced capabilities for DHS and its Components, CDC-LRN, OHA, EPA, USDA, FDA, and the greater public health community to accurately detect the presence of traditional biothreat agents, perform characterization of pathogens for their virulence and pathogenicity, provide a rough quantification of the amount of that agent, and preserve the viability of samples for further analysis. The system provides inexpensive, contamination free sample preparation and is capable of simultaneously analyzing ~100 agent specific signatures in one assay cassette. By utilizing inexpensive, pre-validated assay cassettes and reagents, we will realize a significant reduction in operational costs of detection, while providing highly reliable and timely results, and improved system reliability and maintainability to reduce the total lifecycle costs.

Next-Gen Biological Detection Project

This project develops the capability for the CDC, OHA, and the greater public health community to accurately detect the presence of traditional biothreat agents, provide characterization of pathogens for their virulence and pathogenicity, provide a rough quantification of the amount of that agent, and preserve the viability of samples for further analysis. The project will also explore cheaper or reusable reagents that will significantly reduce the operational cost of detection while providing highly reliable and timely results, and improve system reliability and maintainability to reduce the total lifecycle costs.

Portable BioDetector Project

This project will provide multiple Federal agencies the ability to rapidly identify a biothreat agent in the field where sample processing and detection are all integrated into a simple-to-use platform for field application. The efforts will leverage recent advances in high specificity assays as well as continued miniaturization of key instrument components. This project is built on the requirements generated in the Rapid BioDetection project, before that project's focus shifted to Rapid Diagnostic Capabilities.

Rapid Diagnostic Capability Project

This project establishes and/or improves the CDC, OHA, and the greater public health community's capabilities to rapidly and accurately screen and identify exposed or contagious persons and to include those clinically symptomatic or prior to exhibiting symptoms of disease. It addresses the operational need to rapidly determine infected individuals who require immediate treatment during a biological attack. It will establish capabilities for early detection of exposure to viral and/or bacterial pathogens and provide robust assessments that can trigger rapid deployment of appropriate therapeutics, such as antivirals or antibiotics, which can dramatically reduce the extent, duration, and spread of disease in exposed populations. Diagnostic solutions may be a cost-effective alternative to environmental sensors to determine spatial extent of a release.

Bioagent Threat Assessment Program – FY 2012: \$19.600 million. FY 2014 Request: \$35.147 million. This program addresses biological and agricultural knowledge gaps and develops defensive strategies to counter potential threats. It also supports a full spectrum of knowledge products (e.g. reports/studies) to better inform policy makers on the attributes, risks, and consequences associated with the intentional release of a biological or agricultural (livestock) agent.

Biodefense Knowledge Center

This project provides expertise and information about biological sciences and biothreats to DHS components and multiple Federal agencies. Products include tailored assessments, in-depth analyses of biodefense issues and biotechnologies, and a knowledge management system to enable rapid and secure customer access to biodefense knowledge and information. Example assessment products include Material Threat Assessments (MTA) - in-depth studies of estimates of human exposures to high-consequence agents in specific scenarios), periodic awareness bulletins, and focused reference resources (such as Biothreat Agent Fact Books). Example uses of knowledge management system include work with the FBI to develop large-scale scanning and reporting of advanced life sciences traffic in threat streams, and with CBP to enable improved targeting of potentially dangerous cargo. This project plans to publish a classified third edition of the Biothreat Agent Fact Book, finish delivery of select next-generation MTAs for issuance of updated Material Threat Determinations, and update the Biodefense Knowledge Management System to include additional data sources and applications for government customers.

Biological Threat Characterization Project (BTC)

This project improves the HSE's estimation of the impacts of a bioterrorism attack on the U.S. through experimental research and analysis to understand the critical physical, chemical, and physiological parameters associated with potential bioterrorism agents. The BTC project includes laboratory experiments performed to reduce the uncertainty in areas such as agent production and dissemination, environmental stability, and pathogenesis. The information gained from these experiments directly feeds into knowledge products such as the DHS biological terrorism risk assessments. This project plans to continue to support laboratory experiments to also address nontraditional threat agents as well as uncertainty gaps identified as top priority by the Biodefense Knowledge Center and the interagency community. The project develops agent information and analyses that improve the consequence and vulnerability assessments of many agencies in addition to DHS, such as the IC, HHS, DOD, and the National Security Staff.

Bioterrorism Risk Assessment (BTRA) Project

This project informs decision-making and shapes resource allocations across Federal agencies through the development and execution of a probabilistic risk assessment and alternative methodologies for comparison and verification. These risk assessments integrate the judgments of the intelligence and law enforcement communities (threat) with input from the scientific, medical, and public health communities to estimate the probability of an attack occurring and the consequences of an attack. The computational analysis provided by the BTRA helps inform investments for national strategic biodefense planning, while identifying key knowledge gaps and defining critical vulnerabilities. This helps guide investments in capabilities in the face of limited resources. This project plans to refine, update, and validate the BTRA model and adaptive adversary models to reflect current capabilities and the current threat environment in preparation for the June delivery of the 2014 BTRA.

Foreign Animal Disease (FAD) Modeling Project

This project improves the ability of Federal, State, and local government agencies to prepare for and respond to FAD outbreaks. The project supports the development and use of infectious disease models and analysis tools to explore control strategies and response options for FAD outbreaks at multiple scales. This project plans to address the conceptual design and potential implementation strategies for next-generation capabilities, and demonstrate initial operating capabilities for selected functionality.

Future BioThreat Analysis Project

Through engagement with the IC, academia, and others, this project completes literature analysis and experimental research to understand trends and potential risks and threats associated with advances in biology and biotechnology. The primary deliverables will be knowledge products used to inform strategic planning decisions.

Integrated Chemical, Biological, Radiological, and Nuclear (CBRN) Terrorism Risk Assessment (ITRA)

This project improves the decision-making across the Federal interagency and HSE by guiding the prioritization of medical countermeasure development and allocation of other scarce resources through comparison of the risks associated with CBRN terrorism, and will be used to guide decisions on resource allocation across CBRN terrorism prevention, preparedness, and response planning. The ITRA represents a consolidation and integration of stand-alone risk assessments (Chemical Terrorism Risk Assessment, BTRA, and Radiological/Nuclear Terrorism Risk Assessment). This project plans to continue developing risk mitigation studies for intra- and interagency stakeholders, as well as initiate coordination with IC and technical subject matter experts to inform the development of the 2014 ITRA.

System Studies Project

This project improves the coordination of DHS-led chemical and biological defense efforts by conducting system studies to help identify critical gaps, perform cost-benefit tradeoffs of different options for addressing those gaps, and inform guidance and CONOPS. Ongoing activities focus on transit security. Current cost and tradeoff studies include the investigation of chemical stand-off detection systems to reduce number of detectors and maintenance cost required to protect transit systems from a chemical attack. This would significantly assist transit operators with limited budgets by maximizing their grant funds to protect against chemical events with fewer assets and minimal maintenance costs.

Chemical Threat Assessment Program – FY 2012: \$4.000 million. FY 2014 Request: \$6.000 million. This program researches and identifies current and potential chemical threats to understand the risk posed to the United States by their illicit use. This program encompasses risk-based, chemical threat agent characterization programs, domestic defense strategic planning, and analytical technologies, strategies, and procedures.

Chemical Security Analysis Center (CSAC) Project

CSAC provides the only centralized repository of chemical threat information (hazard and characterization data) for analysis of the Nation's vulnerabilities to such chemical events. This project provides baseline funding for the CSAC to conduct key analytical assessments, including hazard assessments and MTAs, and the Chemical Terrorism Risk Assessment. In addition, this project provides the core funding to develop knowledge management capabilities such as the chemical knowledge management system, the chemical agent reactions database, and several user-specific electronic libraries. CSAC serves key customers such as NPPD, OHA, TSA, and Intelligence & Analysis (I&A) within DHS, as well as several interagency partners. CSAC is the Nation's first and only Federal studies, analysis, and knowledge management center for assessing the threat or hazard associated with an accidental or intentional large-scale chemical event in the American homeland.

Explosives Detection Program – FY 2012: \$66.175 million. FY 2014 Request: \$100.075 million. This program researches, develops, and/or identifies tools to detect and locate explosives intended to be used as terrorist weapons and strengthens aviation security by bolstering the international aviation security system, processes and technologies, and by encouraging partnerships with industry. It defines concepts, requirements, and procedures for improved techniques for early detection and warning of potential explosive threats, including explosive threats to the Nation's transportation systems and large public gatherings.

Air Cargo Project

This project improves the ability of air carriers and certified cargo screening facilities to screen medium- and high-density pallets and sealed containers. The project develops lower-cost, more effective tools to screen all air cargo before loading on passenger aircraft and will deliver screener tools to TSA for approval and release to air carriers and Certified Cargo Screening Facilities. The project also develops Hardened Unit Load Devices as potential blast mitigation technology for aircraft.

Canine Explosives Detection Project

This project improves TSA's explosive detection capabilities by improving canine training aids and techniques to detect explosives. The project evaluates broadened applications of canine screening operations, and studies the canine olfactory system and the behavioral and genetic markers that can

predict high-performance explosive-detection canines and canine physiological limitations and strengths.

Checked Baggage Project

This project develops technologies and advanced system concepts for TSA to detect a wider range of explosives threat materials during the screening of checked baggage through commercial development of next-generation explosives detection systems and explosives trace detectors. In addition, the next-generation checked baggage screening systems will operate with substantially reduced lifecycle costs and false alarm rates, faster screening time, and reduced labor costs associated with screening of checked baggage, making the process more cost-effective.

Dynamic X-ray Imaging Project

This project improves TSA's dynamic screening capability for checked and carryon baggage screening. The advanced X-ray imaging systems will be capable of supporting a system level risk-based screening capability with adaptive detection capability that will improve system detection performance and throughput.

Eye Safe Trace Detection Project

This project improves the screening for the Federal Protective Service (FPS) and other screening partners for the presence of chemical signatures from explosives in a rapid, noncontact process. Together with standoff anomaly detection, this security system will provide the foundation for high-throughput screening of personnel for aviation, mass transit, and facilities security.

Integrated Shoe Screening Project

This project allows passengers to keep their shoes on throughout the security screening process at aviation checkpoints by developing and testing integrated shoe screening devices and AIT systems. The initial shoe screening systems developed in this project will be stand-alone systems used to verify acceptable system performance.

Mass Transit Project

This project improves transportation system operators' ability to detect explosive threats for maritime and surface mass transit, including buses, commuter rail (i.e., subways or metros), light rail (i.e., trolleys and streetcars), long-distance rail (i.e., Amtrak), and heavy rail. The project develops and demonstrates technology to enable a resilient transit system that leverages public awareness, technology, and layered security processes, while maintaining efficient flow of passengers.

Next-Generation Passenger Checkpoint Project

This project improves TSA's screening capabilities for explosives and other threats at aviation checkpoints by developing advanced security checkpoint systems for risk-based screening of passengers and carried baggage. This project investigates next-generation passenger checkpoint system architecture concepts and develops advanced systems including Advanced Technology X-ray, AIT, Explosives Trace Detection, Shoe Screener Devices, and Bottled Liquid Screening Systems.

Person-Borne (PB) Threat-Imaging Sensor Development Project

This project improves FPS' and TSA's standoff detection of explosives devices worn or carried by persons as they approach a venue or checkpoint entrance. The project will develop the capability to perform anomaly detection on personnel at a standoff distance, providing improved threat detection and higher throughput for checkpoint screening processes.

Portable Detection Project

This project improves DHS'S and first responders' explosives threat detection capability in a handheld form. The project will develop noncontact portable explosives detectors employing sensitive and selective trace and/or bulk sensors for a number of potential applications, including secondary screening of passengers to mitigate the need for pat downs after AIT anomaly detection.

Screener Selection and Training Project

This project maximizes operational capabilities at screening checkpoints by collaboratively working with DHS Components to research, develop and deploy new screener selection and training tools and methods. This project works with TSA to identify the very best performers in the Transportation Security Officer (TSO) workforce to increase the ability to uncover potential threats to the traveling public. The top-performing TSOs, more often than other screeners, use color and luminance cues to make better decisions and correctly identify threats using threat specific patterns and goal-directed search strategies. Training the rest of the TSO workforce on the perceptual cues and strategies used by these top performers will increase X-ray image analysis performance across the TSO workforce, increasing overall TSA threat detection capabilities and promoting more effective screening operations.

Explosives Threat Assessment Program – FY 2012: \$9.700 million. FY 2014 Request: \$16.711 million. This program researches and identifies current and potential explosive threats to understand the risk posed to the United States, strengthens aviation security by bolstering the international aviation security system, improves security processes and technologies, and encourages partnerships with industry. It encompasses risk-based threat characterization, attribution, strategic planning, prediction of magnitude of explosive disasters, and analytical technologies, strategies, and procedures.

Actionable Indicators and Countermeasures Project

This project improves the capability of I&A, DHS Fusion Center analysts, and Federal, State, and local law enforcement to identify indicators that individuals and groups are moving toward extremist violence. It will also support the Offices of the Principal Deputy Counterterrorism Coordinator, Policy, and Civil Rights and Civil Liberties in assessing the impacts of policies and programs developed to counter violent extremism (CVE). The project will do this through creating a database on Terrorism and Extremist Violence in the United States, conducting surveys to understand public attitudes toward violent extremism and efforts to counter it, examining factors that lead to disengagement from violent extremism, evaluating specific CVE programs, and developing open-source analysis products and training modules. Long-term operational and policy benefits include increased analytical accuracy through empirical research, effective CVE training, and evidence-based policies and programs.

Aircraft Vulnerability Project

This project improves TSA's existing explosives detection requirements for aviation security. The project will assess the vulnerability of narrow- and wide-body aircraft passenger cabins and cargo holds to explosives threats through explosives blast effects testing as well as modeling and simulation.

Homemade Explosives Characterization Project

This project improves DHS's ability to detect and identify homemade explosives (HME) threats across a range of venues. The project determines the explosives properties of HME materials, conducts sensitivity tests such as impact, friction, and electrostatic-discharge, and characterizes chemical and physical properties to support development of advanced detection systems.

Risk Prediction Project

This project improves CBP's and TSA's capability to identify suspicious behaviors associated with illegally transporting persons and materials prior to their entering the U.S. by deriving, developing, and testing high speed anomaly-based threat models specific to DHS's air, land, and sea cargo targeting environments. This project will build upon joint S&T/CBP research, which demonstrated an approximately 300-percent increase in targeting accuracy when S&T-developed anomaly-based threat models were combined with existing CBP rule-based models. The operational benefits will include: 1) increased capability to interdict potential threats through ports of entry and mass transit portals and 2) prioritized screening and intelligence assets. The project directly supports CBP's operational Automated Targeting Systems and TSA's operational Secure Flight System.

Counter Terrorist Thrust – The S&T Directorate invests in the research and development of efforts to counter terrorism. Efforts include prevention of terrorist attacks and, prevention of the illicit movement and illegal entry or exit of people, weapons, dangerous goods, and contraband.

Hostile Behavior Predict and Detect Program – FY 2012: \$0.000 million. FY 2014 Request: \$10.500 million. This program leverages social and behavioral science research, data, and theory to understand the determinants and timing of group conversions to terrorism and the intent to engage in violence. Knowledge from this program informs analytical, operational, and policy concerns related to terrorists and terrorist activities. This program also develops and builds the capability to non-invasively detect suspicious behavior that indicates the intent to cause harm.

Centralized Hostile Intent Detection

This project improves CBP's and TSA's capability to identify threats to aviation security by empirically comparing direct-based versus video-based observation and decentralized versus centralized remote observation techniques for identifying high-risk behavior. The project will conduct analysis to assess effectiveness and efficiency measures for each technique. The operational benefits will include: (1) the increased capability to interdict potential threats to aviation security further from the checkpoint and (2) potential cost offsets through behavior-based screening of more passengers using fewer operational personnel employing a centralized remote behavioral screening approach. The project directly supports CBP's Rover Program and TSA's Risk-Based Security Program.

Insider Threat Detection Project

This project improves DHS's capability to identify potential insider threats through the derivation and validation of measurable behavioral indicators. The operational benefits will include the increased capability to interdict potential insider threats prior to their initiating action against the interest of the U.S. This project will directly support DHS operational customers (CBP, law enforcement, etc.) and will include and leverage the research conducted by the Office of the Director for National Intelligence (ODNI), FBI, and DOD.

Passive Methods for Precision Behavioral Screening Project

This project improves DHS Components' primary screening and throughput, reduces economic screening impacts, and improves classification accuracy and referral to secondary screening by transforming the screening process from active to more dynamic and passive detection. The project will differentiate mal-intent through the inclusion of passive stimuli by building on the Future Attribute Screening Technology program so that the screening process does not require direct interaction between the operator and the subject. The project will provide an operational support capability to protect critical infrastructure, guard against threats, and provide relevant, actionable information to

operators supporting protection of facilities and border security functions, in addition to delivering a strategic capability to recognize, track, and accurately access the significance of psychophysiological signals in relevant activities. Resources will be used to expand the body of knowledge in this area and to resume DHS S&T's leadership position in this very promising field of study with direct operational relevance to several DHS components.

Wide-Area Surveillance - Mass Transit Deployment and Evaluation Project

This project improves surveillance of mass transit systems by exploring integration of the Imaging System for Immersive Surveillance (ISIS) into a mass transit terminal or similar venue. This project supports the development of ISIS capabilities to identify objects left behind in a mass transit environment and tag and track the movement of the individual who left the object. The system overcomes limitations of existing surveillance technology, leveraging significant research investments by DOD to enhance image resolution beyond what is commercially available.

Identity Management Program – FY 2012: \$1.600 million. FY 2014 Request: \$14.061 million. This program researches and develops biometrics-based technologies, procedures, CONOPS, and information to identify known terrorists and criminals and prevent their movement into and out of the U.S. through effective, interoperable multi-biometrics in diverse areas, including border crossings, ports-of-entry, and visa application sites.

Biometric Database Interoperability Project

This project enables the cost-efficient and operationally effective matching, analysis, and exchange of biometric and actionable identity-based information between DHS and its mission partners, including DOD, FBI, and other Federal agencies. To support this objective, this project will design and test more efficient federated architectures and analytical capabilities that allow each agency to support the demanding high volume of transactions and short response times required of its mission partners. Currently, Federal agencies have varying resources and capabilities to 1) match biometric data, 2) rapidly develop context-specific intelligence, and 3) distribute actionable information to relevant stakeholders. The intent of the project is to support the operational needs of mission partners without overwhelming organizations with limited capabilities and resources. More efficient federated architectures and analytical capabilities developed would allow each agency to support the demanding high volume of transactions and short response times required of its mission partners.

Cooperative Biometrics Project (formerly Multi-modal Biometrics)

This project improves DHS Components' screening and throughput by collecting two or more biometrics in less than 10 seconds at a 95-percent acquisition rate. It is working with Federal partners and the biometrics industry to develop more robust iris recognition and improved fingerprint and facial image acquisition and matching technologies for integration with DHS biometric screening processes, including Biometric Air Entry and Exit. This project plans to conduct fingerprint, iris and face recognition operational evaluations in multiple DHS environments to assess improvements in operational effectiveness and cost savings; accelerate the publication of an International Iris Image Quality standard, commercialize standards-based biometric quality algorithms; and initiate challenge problems and encourage multi-disciplinary approaches to mitigate technology challenges that pose risks to successful deployment. The focus of this project is on the near-term transition of highly accurate biometrics into a fast, automated, and easy-to-use form factor that may be used in security, immigration, identity vetting, and other screening applications.

Mobile Biometrics System Project

The project improves U.S. border security efficiency and officer safety by providing mobile solutions to Federal, State, and local partners. The objective of this project is to give agents and first responders the ability to identify foreign and domestic threats in the field at the time of interdiction using fingerprints, face, iris, and latent prints at crime scenes. The project develops, tests, and deploys mobile biometric and biographic solutions for our Federal, State, and local partners verifying that these solutions meet the National Institute of Standards and Technology standards and best practices.

Non-Cooperative Biometrics Project (formerly Multi-modal Biometrics (Non-cooperative))

This project improves DHS Components' ability to identify and prevent potential threats from entering the U.S. and facilitates the movement of legitimate travelers in near real-time. This project will test and evaluate state of the art facial recognition systems using video in crowds for various air, rail, and sea port scenarios. Travelers do not need to be cooperative and thus, this deployment will identify watchlisted persons without impeding current flow.

Rapid DNA Project

This project enhances the security and integrity of the U.S. Customs and Immigration Services immigration system and the CBP Office of Border Patrol by providing a new rapid and low-cost capability to verify family relationships. The Rapid DNA systems support immigration reform by verifying family relationships in asylum, refugee, and overseas adoption cases, and counters human trafficking along the border. The project also can conduct DNA watch list checks for known terrorists or criminals, where appropriate and consistent with privacy, civil rights, and DHS policy. It plans to deliver a Rapid DNA extended kinship analysis system, expanding the relationships that can be verified to grandparents and siblings. This project also plans to conduct performance assessment and field tests of the extended kinship analysis capability.

Cyber Security Thrust – This thrust conducts and supports RDT&E and transition for advanced cybersecurity and information assurance technologies to secure the Nation's current and future cyber and critical infrastructures in response to the President's *National Strategy to Secure Cyberspace* and *Comprehensive National Cybersecurity Initiative (CNCI)*. These solutions include user identity and data privacy technologies, end system security, research infrastructure, law enforcement forensic capabilities, secure protocols, software assurance, and cybersecurity education.

Cyber Security Program – FY 2012: \$46.408 million. FY 2014 Request: \$70.529 million. This program includes user identity and data privacy technologies, end system security, research infrastructure, law enforcement forensic capabilities, secure protocols, software assurance, and cybersecurity education.

Cyber Economic Incentives Project

This project increases the technical community's understanding of the economics of cybersecurity. The research is identifying how incentives can drive the adoption of cybersecurity measures, which disincentives would most likely deter individuals and especially organizations from participating in criminal and malicious cyber behavior, and where cybersecurity investments would be most effective in protecting the critical infrastructures managed by the private and public sectors. The project aims to create a science-based understanding of cybersecurity markets, new decision-making processes suitable for businesses attempting to lessen the potential impact of cyber threats, and the behaviors and motivations of cyber criminals. These investments will significantly advance DHS'S understanding of the vulnerabilities of both organizations and humans to cyber attacks, and how economic factors affect the selection and use of specific security systems.

Cyber Security Assessment and Evaluation Project

This project increases overall system security and transition of cybersecurity solutions into commercial products by addressing component and system vulnerabilities throughout the development lifecycle, from design to operational evaluation, and by facilitating the dialogue between researchers and technology entrepreneurs and large companies. This project conducts red team evaluations, economic assessment, technical assessment, and risk analysis that focuses on implementation and deployment of cybersecurity technologies into operational environments. This project will conduct these technical assessment activities to better understand key cybersecurity challenges as it applies to transition and operations.

Cyber Security Forensics Project

This project increases the number of cyber forensic analysis tools and investigative techniques available for law enforcement officers, forensic investigators, and examiners at Federal, State, and local agencies. This project develops tools to visualize, analyze, share, and present data derived from digital media. This project will provide acquisition cost savings for law enforcement, decrease the time required for forensic analysis, and contribute to standards development across the digital forensics community.

Cyber Security Competitions Project

This project bolsters formal education programs, thereby improving the quality of the future cybersecurity workforce by funding and supporting a variety of cybersecurity competitions for high school and college students that give them access to cutting-edge technologies and exercises. In 2010, the National Initiative for Cybersecurity Education (NICE) was introduced by the White House to increase awareness, improve education, and augment the workforce for cybersecurity. The DHS S&T Cyber Security Division (CSD) is participating in NICE by taking a lead in cyber competitions and developing an education environment for cyber professionals. This project helps to fulfill the challenge in Priority III of the National Strategy to Secure Cyberspace to “foster adequate training and education programs to support the Nation’s cybersecurity needs.”

Cyber Security Experiments and Pilots (Experiments and Competitions) Project

This project enhances DHS operational components’ understanding of cutting edge cybersecurity capabilities and improves the likelihood of transition by ensuring that CSD-developed technologies are tested and evaluated in an operational environment. This project’s experiments address cybersecurity requirements from DHS customers in support of operational missions in critical infrastructure protection.

Data Privacy Technologies Project

This project increases valuable information sharing across the government and private sector by developing technologies to protect and minimize access to confidential personal information. The project develops technologies to ensure that privacy policies are met and that they allow organizations to protect, share, and control confidential personal information. This project also provides the tools necessary to utilize mobile applications while protecting private information.

Enterprise Level Security Metrics and Usability Project

This project improves the decision-making process for system and network owners and operators in both the HSE and the private sector by developing security metrics and supporting tools and techniques that will be useful as decision aids. This project evaluates security at the system level,

providing tools that facilitate decision-making and accountability through collection, analysis, and reporting of relevant performance data.

Experimental Research Testbed Project

This project improves attack mitigation and confinement strategies and the quality of new cybersecurity technologies by providing a secure environment to run large-scale, repeatable tests, and experiments. In addition to being used by DHS, the testbed is being used by other government agencies as a platform to develop and evaluate defensive mechanisms against attacks on infrastructure and by academia as a tool to provide realistic, “hands-on” educational experience.

Homeland Open Security Technology Project

This project improves Federal, State, and local governments’ access to cybersecurity solutions by increasing the awareness of available open source solutions and ensuring that both currently available and developed open source solutions meet the specific needs of government and private sector customers. This project will improve the security of popular open source software currently used in government, foster the development open source security tools, provide a collaborative environment for exchanging and discovering security related research products, and work to ease the certification hurdles related to the adoption of open source software in government.

Identity Management Project

This project facilitates the use of identity credentials and enhances secure access to sensitive information in cyberspace and physical infrastructures by improving authentication and authorization capabilities across all levels of government. The goal of the project is to provide innovative, interoperable, and cost-effective solutions based on open standards for identity, credentialing, and access management. These tools are helping to improve access controls, reduce identity fraud, and ensure resiliency across federated environments in the HSE.

Internet Measurement and Attack Modeling Project

This project helps understand, mitigate, recover from, and predict the effects of cyber-attacks on Federal Government installations and other critical infrastructure by using measurements for modeling and analysis capabilities. This project focuses on technologies that detect malware and botnets; enhance situational understanding of infrastructure, networks, and systems; and improve attack attribution. The technologies being developed are critical to U.S. missions that support DHS watch-center and U.S. communications environments that rely on the Internet.

Leap Ahead Technologies Project

This project improves cybersecurity capabilities across the HSE by focusing on cross-cutting, high-risk/high-payoff solutions to critical cybersecurity problems. This project invests in leap-ahead R&D, targeting revolutionary techniques and capabilities that can be deployed over the next decade with the potential to redefine the state of cybersecurity. Focus areas include insider threat, resilient systems and networks, and incident response communities.

Moving Target Defense Project

This project improves the security of critical information technology systems by developing tools and techniques that decrease the predictability of a system’s defenses, thus ultimately making attacks more difficult. This project enables the creation, analysis, evaluation, and deployment of mechanisms and strategies where one or more system attributes are automatically changed in a way that make the system attack surface area appear unpredictable to attackers while simultaneously ensuring that systems remain dependable to their users and maintainable by their owner.

Process Control Systems Security Project

This project improves the security of critical infrastructure Process Control Systems, used to monitor sensitive functions from oil and gas pipelines to the power grid, by partnering with private industry and establishing a model in which government agencies can work with each other and private industry to develop appropriate cybersecurity technologies to meet critical needs through technology projects and pilot deployments.

Research Data Repository Project

This project improves the quality of cybersecurity research and develops solutions by providing the only freely available, legally collected repository of large-scale datasets containing real network and system traffic. The repository data provides a mechanism for the cybersecurity R&D community to determine the efficacy of technologies based on real-world data as opposed to anecdotal evidence or small-scale test experiments. Also, repository data can be used to understand the structure and population of the global Internet, the cyber-impact of physical events such as earthquakes and tsunamis, the impact of censorship, the sources of malicious scanning, and the spread of malware, as well as the overall health and wellbeing of the Internet.

Secure Protocols Project

This project improves the security of the Internet's infrastructure by contributing to and fundamentally improving the core functions of the Internet through deployment and adoption of security standards key to the Internet's communications pathways and protecting users' online interactions. This project is working with the larger Internet community to develop and deploy standards and tools that enhance the security of the Internet's domain name system and routing infrastructure.

Software Assurance Marketplace (SWAMP) Project

This project will provide a collaborative research infrastructure to evaluate, analyze, and test software against a suite of software analysis tools, and provide continuous assurance for software where researchers, software developers, and tool developers can continuously test and evaluate software assurance tools against a growing set of reference software and real software products. This project will reduce weaknesses found in software, help to improve software quality assurance tools and techniques, advance the quality and adoption rate of software quality assurance tools, lower the threshold for using them, and make it easier to interpret the results from a suite of tools that will be integrated into the SWAMP.

Software Quality Assurance Project

This project will improve the ability to detect security weaknesses in the software used by our Nation's critical infrastructure (energy, transportation, telecommunications, banking and finance, and others) and networks by developing enhanced tools and techniques for evaluating, analyzing, and testing software. This project addresses the presence of internal flaws and weaknesses in software and deals with the root of the problem by improving software security. The work in this project will also address the gaps in existing state-of-the-art tools; specifically in the areas of soundness, precision, and scalability. These tools will play an important role in driving software developers and researchers to the SWAMP where they can leverage these tools to evaluate, analyze, and test their software applications for security weaknesses.

Tailored Trustworthy Spaces Project

This project includes two related efforts: one on Digital Provenance and the second concerning Nature-inspired Cyber Health. The two efforts focus on the information being exchanged and the methods

used to exchange them rather than securing physical computer systems or networks. The methods being investigated will create and maintain flexible, distributed, trusted environments that can adapt to changing security environments, with the security requirements being negotiated and altered depending on the context or situation. Additionally, models from the behavior of biological systems, such as the immune system, are being investigated and adapted to increase resiliency and fault tolerance and to create computer systems and networks that are defensible rather than perfectly secure.

Transition to Practice (TTP) Project

This project accelerates the transition of federally funded cybersecurity research that will have a notable impact on the security and resiliency of the Nation's networks and systems into widespread deployment and use via commercialization and open source licensing. This project is a result of recommendations made in the 2011 Federal Cybersecurity R&D Strategic Plan, as well as the White House's CNCI. The project's mission is achieved by (1) identifying mature federally funded technologies that address an existing or imminent cybersecurity gap in public or private systems that impact national security, (2) identifying and funding necessary improvements identified during pilot programs and test and evaluation activities, and (3) introducing cybersecurity technology throughout the entire HSE through partnerships, commercialization, and open source licensing.

Disaster Resilience Thrust – Work includes reduction of vulnerability of critical infrastructure, key leadership, and events to terrorist attacks and other hazards; working with state, local, tribal, and territorial governments to secure their information systems; working with local and regional partners to identify hazards, assess vulnerabilities, and develop strategies to manage risks associated with all hazards; increasing the state of preparedness of state, local, regional, tribal, and territorial partners, as well as nongovernmental organizations, the private sector, and the general public; advancing and improving disaster emergency and interoperable communications capabilities; and, improving the capabilities of DHS to lead in emergency management.

Bioagent Attack Resiliency Program – FY 2012: \$30.480 million. FY 2014 Request: \$52.900 million. This program provides advanced planning, develops CONOPS, develops and provides capabilities to support forensics, laboratory response, personnel protection, and decontamination, and utilizes exercises and training for responding to and recovering from a biological disaster. This program includes actions to limit the spread of disease among animal species to protect the United States economy.

Adaptive Facility Protection Project (Bio)

This project provides facility operators with a capability to protect buildings after a biological release through the development of a comprehensive, integrated, and rapid threat detection system. Both passive and active detection systems will be considered and selected architecture will be configured into buildings' active and passive facility response systems. Commercial-off-the-shelf (COTS) technologies as well as those previously developed by DHS S&T will be considered by participating facilities in testbed pilot configurations.

Bioforensics Research and Development (R&D) Project

This project provides investigators such as the FBI, CBP, and USSS with techniques to identify source material collected from a bio-crime in order to pursue legal prosecution against the responsible party. The Bioforensics R&D project leads national research efforts in microbial forensics and transitions analytical techniques to the National Bioforensics Analysis Center and other government stakeholders. This is accomplished through the development of advanced forensic capabilities to determine the source and production method of biological threat agents (BTA) collected from crime scenes.

Specifically, the project develops protocols for characterization and identification of BTAs, and utilizes a robust sample management, molecular signatures, and physical/chemical analysis research program. Currently, Bioforensics R&D is focused on establishing a genomics-based approach to BTA characterization, which does not depend on a priori knowledge of organisms and can detect novel and/or emerging organisms. Establishment of this approach includes development of ultra-clean reagents for sequencing, initiating an effort to build a national sequence database for whole genome comparison and development of computational algorithms for sequence analysis.

Chem-Bio Event Characterization and Response Project

This project improves the capability of the response community (local, State, tribal, and Federal) to rapidly determine the extent of chemical or biological contamination in an urban area following an event. This project addresses one of the high priority needs expressed by the emergency management, environmental, and public health communities. The effort will address the requirement for rapid environmental assessment methods integrated with health surveillance data to properly inform risk-based decisions regarding needed actions to respond to and mitigate the event. The outcome of the project will be a system of tools and methods for emergency responders in public health, environmental cleanup, and emergency management organizations at the Federal, State, and local levels to utilize in execution of their response and recovery duties. The project will assess technology solutions including the feasibility of modifying COTS or military-fielded equipment for this purpose, and develops methods for rapid environmental assessments.

Chem-Bio Urban Aerosol Dispersion Support Tools Project

This project enhances the capabilities of the OHA, NPPD, and first responders who direct evacuations and similar responses to hazard materials releases by analyzing the impact of urban structures (i.e., buildings) on the transport and dispersion of a bioagent aerosol release using data from past urban dispersion trials. The data and analysis will be used to evaluate, down-select, and validate appropriate emergency response transport and dispersion models for operational use in urban environments. Products will be piloted in two cities, with a functional and full-scale demonstration of the technology integrated into other response assets. Products will be down-selected, improved, commercialized, and added to FEMA's Authorized Equipment List.

FAD Vaccine and Diagnostics Project

This project strengthens the defense of the U.S. agricultural infrastructure by developing new and next generation countermeasures (vaccines and diagnostics) to protect the livestock industry against FMD and other high-consequence FADs. This project directly addresses HSPD-5 and HSPD-9 by ensuring that USDA and other first responders in the animal agriculture community have the countermeasure tools needed to safely and effectively respond to and recover from foreign animal and zoonotic disease outbreaks. New and next-generation countermeasures are developed and transitioned directly to USDA response labs or through veterinary biologic industry partners for commercialization and access by USDA. This project plans to coordinate with animal health industry partners on regulatory development programs for vaccine candidates for rift valley fever, classical swine fever, and Henipavirus. This project also plans to complete development regulatory requirement (master seeds, pre-licensing serials, clinical trials) for additional FMDv serotypes/subtypes molecular vaccine candidates. Project funding will enable the regulatory licensing of new countermeasures that can then be accessed by USDA in the event of a high-consequence FAD outbreak in the U.S.

National BioForensics Operations Center Project

This project ensures the unimpeachable technical data for use by law enforcement authorities, particularly the FBI, in the investigation and prosecution of crimes involving biological agents. The

NBFAC, located at the NBACC, is the Nation's lead facility for technical analysis of samples from biocrime and bioterror investigations. As an operational facility, NBFAC provides Federal law enforcement agencies with centrally coordinated and validated capabilities for sample handling, sample processing, and bioforensic analyses of evidentiary material derived from biocrime and bioterror investigations or from the actual use of a biological agent. The NBFAC also validates protocols for the identification and characterization of the biological, chemical, and physical "fingerprints" that those samples may contain, rigorous chain-of-custody and quality-control procedures to ensure the integrity of the sample and its analysis, and maintains 24/7 continuous hub-and-spoke laboratories to provide casework support and additional specialized capabilities. This project plans to develop capability for the identification and characterization of rare variants and quasi-species.

Rolling Stock Restoration Project

This project enables TSA and transportation system owners/operators to decontaminate several types of large vehicles, such as aircraft, train cars, buses, emergency vehicles, and others, following a chemical or biological incident that will enable the vehicles to return to service after remediation. The project will evaluate the impact of common decontamination techniques on electronic and critical systems in vehicles, quantify potential material compatibility issues (e.g., corrosion), determine gaps in current capabilities, and develop robust techniques and guidance for decontamination of large vehicle assets to return them to service.

Underground Transport Restoration Project

This project improves the capabilities of transit system operators to rapidly recover from a chemical or biological event, addressing a high-priority need expressed by TSA and transit systems. The project will identify potential solutions to the requirements for rapid characterization, clean-up, and clearance of chemical or biological contamination in the physical structures (tunnels, stations) and rolling stock (e.g., railcars, buses). The outcome of the project will be a system of tools and methods for transit systems - in partnership with public health, environmental cleanup, and emergency management at the Federal, State, and local levels - to conduct emergency response and recovery actions. This project plans to determine requirements, assess potential technology solutions including the feasibility of modifying COTS technologies, develop methods for rapid recovery and return-to-service of transit systems, and develop protocols for rapidly determining the extent of contamination and risk-based clearance goals.

Chemical Attack Resiliency Program – FY 2012: \$4.643 million. FY 2014 Request: \$9.000 million. Provides advanced planning, develops CONOPS, develops and provides capabilities in forensics, laboratory response, personnel protection, and decontamination, and utilizes exercises and training for responding to and recovering from a chemical disaster.

Adaptive Facility Protection Project (Chem)

This project provides facility operators with a capability to protect buildings after a chemical release through the development of a comprehensive, integrated, and rapid threat detection system. Both passive and active detection systems will be considered and selected architecture will be configured into buildings' active and passive facility response systems. Commercial-off-the-shelf (COTS) technologies as well as those previously developed by DHS S&T will be considered for by participating facilities in testbed pilot configurations.

Integrated Consortium of Laboratory Networks Project

This project improves the coordination of laboratory response to chemical, biological, and radiological contamination or disease incidents by promoting common standards of performance across laboratory

response assets of multiple Federal agencies. This project optimizes national laboratory preparedness through a coordinated and operational system of laboratory networks to provide timely, high-quality, interpretable results for early detection and effective consequence management of acts of terrorism and other events requiring an integrated laboratory response. The project develops effective protocols for communication and data transfer among Federal laboratory response networks. This project plans to complete a refined laboratory response gap assessment model, as well as the development and transition to use of a data system that enables large volumes of data to be assimilated from the disparate systems of the individual member networks.

Explosives Attack Resiliency Program – FY 2012: \$0.000 million. FY 2014 Request: \$7.145 million. This program provides advanced planning, develops CONOPS, develops advanced materials, and funds exercises and training for responding to and recovering from a disaster employing explosives.

Blast Analysis of Complex Structures Project

This project improves the resiliency of critical infrastructures for building owners by providing three analysis tools – the Integrated Rapid Visual Screening (IRVS), Urban Blast Tool (UBT) and the Owners Performance Requirements (OPR) Tool. It works closely with law enforcement, first responders, and the engineering community. The IRVS is the only tool available that computes risk and resilience to all hazards, including natural and man-made hazards and climate change events. It computes risk for buildings, subway stations, and tunnels by considering a total of 40 scenarios and improving the security of a facility at a minimum cost, allowing the building owners to select, a) a single vulnerability; and b) the most cost-effective mitigation measures capable of improving the entire performance of the building. The UBT is a fast-running tool that calculates blast loads, glass damage, and potential for collapse for buildings located in urban settings. It also calculates the likelihood of damage to building equipment needed for emergency evacuation, rescue, and recovery operations. OPR allows governments to understand cost-effective issues when incorporating security and other important attributes and assists the design community to prepare new building designs and retrofit projects by analyzing different performance scenarios and producing cost-effective strategies as outputs.

Blast/Projectile – Protective Measures – Bridges Project

This project improves the protection of the Nation’s most critical bridges by assessing vulnerabilities, investigating new materials, developing and testing technologies, and identifying mitigation schemes that are effective, affordable, and can be implemented in operational environments by bridge owners and operators. Protective measures may include mechanisms to reduce blast effects, rapid mitigation and restoration technologies, and other defensive measures that may be implemented by bridge owners and operators.

Radiological/Nuclear Response and Recovery Project

This project improves the Nation’s ability to respond to and recover from the effects of a nuclear/radiological attack by providing emergency responders the tools to: 1) save lives, protect and restore human health and wellbeing; 2) restore functionality of critical infrastructure; 3) accomplish long-term remediation and recovery; and 4) improve community resilience prior to the event. This project builds off work being accomplished by DNDO, FEMA, DOD, and other interagency partners and addresses technology and research in areas such as public warnings, alerts and communications, re-establishment of critical infrastructure, remediation of impact areas, and community and responder health and safety.

First Responder Capability Program – FY 2012: \$12.414 million. FY 2014 Request: \$21.328 million. This program develops technologies, information, procedures, and CONOPS to aid first responders, emergency managers, and incident commanders as they respond to hazardous situations. It assists the emergency response communities to establish requirements and tests technologies and assesses them for usability to help make the technologies available across all first responder communities.

Advanced Incident Management Enterprise System Project

This project improves the ability of responders, emergency managers, critical infrastructure owners/operators, and private sector organizations to share operational, resource management, and locality-based data between disparate software application systems by providing a secure, scalable, interoperable, and unified common operating data environment to the HSE. The project builds upon the Unified Incident Command and Decision Support (UICDS) architecture by deploying UICDS to all levels of Government and the private sector.

First Responder Technologies Project

This project develops and designs technologies and makes technology commercially available that will assist first responders in conducting their various missions more safely, effectively, and efficiently to address high-priority capability gaps identified by local, tribal, State, and Federal first responders. Topic areas include but are not limited to robotic applications for first responders, virtual simulation for training and exercise purposes, and development of next generation Personal Protective Equipment for first responders.

Geospatial Location Accountability and Navigation System for Emergency Responders (GLANSER) Project

This project improves the precision of locating first responders during an incident in complex environments and in non-global positioning system (GPS) environments (i.e., collapsed buildings, subterranean facilities, or underground). This capability provides incident commanders the ability to accurately locate and track personnel in real-time that will result in rapidly and effectively re-deploying and saving at-risk responders during an incident. GLANSER enhances situational awareness and enables the Incident Command Post to track, locate, and direct teams to rescue at-risk personnel by developing a 2D/3D locator prototype subcomponent to track first responders within an accuracy of less than three meters. GLANSER is compliant to HSPD-8 through development and adoption of appropriate first responder equipment standards that support nationwide interoperability and other capabilities consistent with the national preparedness goals, including the safety and health of first responders. This project works closely with FEMA and the U.S. Army Communications-Electronics Research, Development, and Engineering Center.

Technology Clearinghouse Project

This project increases first responders' ability to collaborate and share best practices to enhance homeland security through certified and accredited web-based central resource systems (i.e., FirstResponder.gov and First Responder Communities of Practice). This project also provides technology inventors with requirements and operational information that assist in developing useful tools and provides users with information to deploy technologies. The project plans to continue to grow membership and communities on First Responder Communities of Practice, operate and maintain First Responder Communities of Practice and FirstResponder.gov, and provide outreach to the first responder community and Federal agencies.

Tech Solutions Project

This project increases the speed of prototyping and transitioning emergent, high-priority technologies to the first responder community by capturing, reviewing, verifying, and developing technology needs identified by first responders. This project validates capability gaps and first responder priorities by working with a panel of first responder subject matter experts. This project also conducts operational field assessments of technologies and makes technology available to all first responder communities through commercialization.

Information Sharing, Analysis, and Interoperability Program – FY 2012: \$5.349 million. FY 2014 Request: \$19.500 million. This program creates an integrated information sharing architecture and links that architecture to interagency efforts to prevent terrorism while protecting privacy, civil rights, and civil liberties. It researches, analyzes, and develops technologies to strengthen interoperable communications and improve effective information sharing at all levels of government.

Citizen to Citizen/Citizen to Responder Communications during Emergencies

This project allows first responders to manage public response (i.e., citizen to citizen and citizen to responder) during emergencies and enhance their situational awareness by providing them with concepts, tools, and guidance to rapidly sift through and verify the vast amount of data gathered in real-time from social media. Research outcomes will help communities become more resilient during response and recovery periods through effective communications over appropriate channels in their respective networks.

Emergency Response and Management Tools for First Responders Project (formerly Virtual USA)

This project assists state and local partners develop information sharing capabilities to ensure interoperability among first responders at all levels of government. Further, it provides a new way for first responders at all levels of government (local, state, and Federal) to share and access information through web-based tools and applications that allow for improved situational awareness and decision support through real-time access to operational information using existing geospatial viewers.

Interoperability and Compatibility Standards Project (formerly EDXL, IP Communications Test and Evaluation Project)

This project provides first responders with the capability to effectively and efficiently communicate with one another during emergencies and day-to-day operations, regardless of their equipment's manufacturer, by accelerating the development of both broadband systems as well as legacy narrowband systems (i.e., P25 systems which will continue to be necessary for many more years). This project will ensure that first responders can communicate across agencies and will improve interoperability between older and new equipment.

Operational Assessment Tools to Strengthen Agency Acquisition Project

This project provides the First Responder Network Authority and public safety community the ability to leverage modeling and simulation tools to make more informed procurement decisions for everything from user equipment to network infrastructure, ultimately reducing the cost of the nationwide public safety broadband network. Further, this project provides the public safety community with the ability to test and evaluate standards, technology, and applications to ensure that they meet first responders' needs.

Responder Engagement Project (formerly Converged Interoperable Communications)

This project improves the ability for first responders to effectively and efficiently coordinate and communicate preparations for response and recovery efforts through the development of an integrated communication system. The project plans to develop improved, networking technology that will allow

emergency responders to share information and wireless broadband networks, as well as evaluate existing technologies. These networks may be shared between among local jurisdictions to create a regional network or with commercial entities through a public-private partnership.

Visual Analytics, Precision Information Environments Project

This project enables Federal, State, local, and tribal first responder; law enforcement; public safety; and public health communities to visualize diverse, diffuse, and dynamic data in a user-friendly form. Data will be shared, analyzed, and understood in real-time by developing advanced visualization-based techniques and technologies. This project focuses on developing informed decision-making capabilities for larger and longer-term disasters, which can have complex or even cascading consequences on multiple infrastructures, facilities, and communities. This project expands the capabilities and creates information environments tailored to specific users and applications.

Wireless Communications Project (formerly IP Backbone, IP Communications T&E, Multi-Band Radio, Wireless Broadband Technology)

This project meets first responders' mission-critical needs by developing affordable and appropriate technologies that enable interoperability across all forms of wireless communications, including voice, video, and data. Further, recognizing that public safety practitioners rely heavily on video technology as a tool by which to keep the Nation safe, this project brings together public safety practitioners, Federal partners, manufacturers, and representatives of standards making bodies to improve the way in which video technologies serve the public safety community.

Natural Disaster Detection Program – FY 2012: \$0.000 million. FY 2014 Request: \$1.400 million.

This program researches, develops, and/or identifies tools to detect and evaluate the magnitude of natural disasters to provide early warning. It defines concepts, requirements, and procedures for improved techniques for early detection and warning of natural disasters threats and the prediction of magnitude of these disasters.

Seismic Activity Detection Data Collection and Analysis Project

This project aids first responders by delivering a validation capability to test new methods for earthquake forecasting and developing technology to provide critical earthquake early warning working in disaster areas affected by aftershock events. The forecasting technology improves seismic detection by establishing a verification and validation infrastructure to conduct prospective testing of promising technologies against the authoritative earthquake catalog. Precursor measurement technologies from remote sensing satellites and ground-based systems could offer a game-changing set of information on the time and magnitude of future earthquake incidents. The earthquake early warning capability is focused on the development of an off-the-shelf, deployable, and targeted earthquake early warning device for use by urban search and rescue (USAR) teams. When deployed, the device would provide additional time for USAR to move to a safer place in a disaster area.

Natural Disaster Resiliency Program – FY 2012: \$8.000 million. FY 2014 Request: \$19.450 million.

This program develops and provides advanced planning, CONOPS, disaster management tools, and training aids for responding to and recovering from a large-scale natural disaster. This includes providing assistance to the private sector to “design-in” greater resilience for critical infrastructure and providing DHS with more robust tools for disaster response, disaster logistics, individual and public assistance programs, and national continuity programs.

Community Resilience Project (formerly Effective Risk Communications)

This project improves the efficacy of first responders by developing, delivering, and evaluating a program focused on training local leaders in the U.S. on effective risk communication practices. The recommended training program will reflect the current scientific understanding of effective communication of threats and risk based on experts' review of the science related to preparedness, warnings of imminent threats, and post-event recovery and mitigation. Training curricula will be evaluated and refined based on a pilot program in order to deliver to DHS a suite of training materials that can be used in multiple settings to support the communication efforts of local public officials.

Drinking Water Resilience Project

This project provides NPPD's Homeland Infrastructure Threat and Risk Analysis Center a new capability to assess, predict, and recommend preventive action against threats to the drinking water infrastructure, including cyber, physical, biological, and chemical contaminants. This project provides a greater landscape assessment and real-time situational awareness through creation of a multi-layer, agent-based model and simulation tool representing U.S. drinking water utilities that will benefit downstream customers, including EPA, utility service providers, and National Labs by improving drinking water infrastructure resilience. This project develops the first-ever national map of major drinking water utilities with interconnections for disruption models, overlaying data for geophysical, deterioration, threat assessment, population sensitivity, and national security. The modeling tools will provide sufficient warning of wildfire impacts to allow pre-treatment, enabling the utility to keep the material in suspension and prevent settling in the reservoir. The wildfire impact-modeling portion of this project can save a major water system, such as Denver Water, up to \$20 million in one-time costs to take a large reservoir out of service, removing ash and sediment following a fire. The automation of the risk assessment, on a national scale, will provide partners with a streamlined methodology to access data, perform their analysis, and share results that will reduce time and enable guided investment strategies for infrastructure replacement.

GPS Vulnerability and Infrastructure Security (G-VIS) Project

This project analyzes and mitigates the impacts of GPS interference on critical infrastructure. Commercial GPS is playing an increasingly important role in critical infrastructure operations. As the dependence on GPS continues to grow, so does the threat environment. Initial studies and experiments, along with real-world incidents, have shown that GPS jamming and spoofing events can have significant impacts on infrastructure such as energy and electricity, telecommunications, finance and banking, and transportation. This project conducts in-depth analyses of multiple critical infrastructure sectors to identify where, when, and how GPS is used, characterize GPS receivers, and fully assess each sector's vulnerability. Based on these results, this project will develop and transition comprehensive and affordable mitigation technologies that address the sectors' vulnerabilities. This project collaborates with DHS's NPPD and Chief Information Office/Office of Applied Technology as well as representative end-users from the infrastructure sectors.

Incident Logistics and Resource Tracking System Project

The project allows FEMA to manage critical resources effectively and enhance real-time coordination and situational awareness. The project allows for timely procurement and disbursement of public and private material inventories, locations of resources, and supplies to respond to an emergency through a capability that is scalable and interoperable with Federal, State, and local systems (legacy and future). In addition, this project will provide a comprehensive and transparent disaster logistics enterprise across all disaster response, including public and private partners. Past incidents, such as Hurricane Katrina, highlighted the need for an integrated logistics capability to provide relief supplies to victims in a timely manner. This project plans to integrate information and data sharing tools with FEMA SAVER2 Response Management System.

Overhead Imagery Data Project

This project reduces the time of satellite and aircraft imagery and increases the quality of information for response and recovery for Federal, State, and local emergency responders through improved tasking, acquisition, analysis, and use of image products. Improved phenomena-based tasking system for satellite and aircraft assets, real-time image acquisition from Civil Air Patrol aircraft and unmanned aerial vehicle (UAV) assets using smart phones are incorporated in this project. Development of analytical techniques that detect slight anomalies in levee structures and mobile devices that capture image data for use with other response information are under development within this project.

Quantitative Psychosocial Impacts Index Project

This project improves the capability of FEMA, the DHS Office of Public Affairs, and State emergency management agencies to use social media effectively during the preparedness, response, and recovery phases of disasters. This will be done by conducting National survey experiments, using a range of qualitative research methods, and conducting evaluations of current programs in order to understand how the public uses social media in emergency situations as well as offer evidence-based recommendations for how officials could improve their disaster-related communications.

Resilient Electric Grid Project

This project develops a new capability for public and private industry to increase the resiliency of the electric grid by interconnecting distribution-level substations together, allowing them to share power and assets in the event of an emergency. The first-of-its-kind, inherently fault current-limiting, high temperature superconducting cable, prevents cascading effects and protects the system while allowing increased and more flexible power flow.

Resilient Tunnel Project

This project reduces U.S. transit agencies' vulnerability to tunnel flooding resulting from a terrorist attack or natural disaster by developing an inflatable tunnel plug. Past assessments revealed that terrorists using IEDs could exploit certain weaknesses to cause catastrophic tunnel failure, and storm surge flooding presents another significant hazard to tunnels. The tunnel plug mitigates these vulnerabilities in mass transit systems. This project collaborates with major U.S. transit agencies to define technical and operational requirements for the plug and subsystem designs, and to design, manufacture, and test tunnel plug systems.

Smartphone-Controlled Unmanned Aerial Vehicle for Emergency Response Project

This project leverages emerging technologies and new capabilities of a smartphone platform to immediately provide small UAV guidance control and image acquisition to FEMA for impact assessment and resource priorities. After the onset of a disaster, this project allows emergency managers to immediately capture still and video images with built-in geo-tagging and transmit in real-time to a local ground station. Taking advantage of rapidly evolving small frame UAV and smartphone technologies and capabilities, this system will provide an order of magnitude cost reduction from currently available larger UAVs, manned aircraft, and satellites used during disaster response. The smartphone-controlled UAV reduces logistical support requirements and provides faster response times while maintaining image capture resolution and quality of the more expensive larger UAV platforms, manned aircraft, and satellites. Integrating smart phones with small frame UAVs will deliver the integrated GPS, video and computing capability built into smart phones to the UAV in a highly cost-effective way. This will fundamentally affect the way real-time damage information is provided to emergency responders.

Social Media Alert and Response to Threats for Citizens Project

This project improves the situational awareness of disasters for emergency management and first responder communities by developing a citizen participatory sensing system for decision support, alerting, and response. Targeted alerting technologies in the form of warning systems that customize the alerts based on contextual information (such as special needs of the recipient), geography, etc., have been shown to promote self-protective actions with the potential to minimize casualties and injuries due to disasters. The system is designed to support all the technology building blocks allowing citizens to send and receive real-time information from/to emergency organizations via a multitude of devices and modalities including cell phones, MMS messages, text messages, web portals, blogs, Twitter, etc. Features supported by the system include: all-hazard alerting, full disaster life-cycle alerts, manual override, plug-and-play technology, customization based on contextual information, and robust analytics-based reliability. The semantic enrichment of incident information will assist in decision-making by reducing false-positives and increasing the reliability of the data. By receiving real-time updates from citizens, targeted monitoring of social media feeds, and querying targeted sensors for the most recent updates, leaders can better respond to more accurate actionable intelligence. The open architecture of the system will allow ease of future updates with plug-n-play technologies.

Solar Storm Mitigation Project

This project enables critical infrastructure owners to prepare for geo-magnetically induced currents (GIC) events by developing a forecasting system and mitigations options. The electric sector is focusing in on the threats to the Nation's electric grid from GIC events that are created during a solar storm or during an electromagnetic pulse (EMP)-type attack. GIC has the potential to severely damage key extra high voltage electric transformers, which make up the backbone of our Nation's electric grid. A solar storm or EMP-type of attack will also have an impact on other critical infrastructure, such as GPS. There is very limited capability to accurately forecast a GIC-related event that would impact critical infrastructure, including the grid, and the science behind some of the potential threats is indeterminate. This project attempts to gain a better understanding of the threat, research the effects of GIC on other critical infrastructure, and analyze the potential cascading effects. It also explores the development of various mitigation devices and operational procedures to minimize the impacts of a solar storm on our Nation's critical infrastructure.

Standard Unified Modeling Mapping Integrated Toolkit (SUMMIT) Project

This project improves FEMA, State and local emergency responders, and DOD's verification and validation ability of emergency response tactics, plans, and procedures prior (preparedness, training and analysis), during, and after an incident (lessons learned) by delivering a framework for integrating existing incident related modeling, and simulation tools in real-time scenarios for operations and training exercises. SUMMIT develops accurate and reliable estimates of hazards from a wide range of natural and terrorist events, analyzes and uses route mapping to effectively manage transportation assets during mass evacuations or the post-event flow of emergency supplies, and conducts analyses to provide a better understanding of possible impacts from natural disasters and terrorist events.

Standard Unified Modeling Mapping Integrated Toolkit Spiral 2 (SUMMIT SP2) Project

This project improves national preparedness for analysts, emergency planners, responders, and decision makers using affordable, repeatable, and agile exercise and training activities by providing a new modeling and simulation platform in line with Presidential Policy Directive (PPD) 8 objectives. SUMMIT enables its users to seamlessly access integrated suites of modeling tools and data sources for planning, exercise, or operational response. SUMMIT supports both small and large-scale exercises and will accelerate scenario planning, provide scientifically-grounded scenario data, and

enhance the realism and common operating picture. SUMMIT SP2 builds on previous S&T investments in developing the SUMMIT platform and will move into the operational environment at the National Response Centers and local emergency operation centers to enhance the quality of the response operations as a force multiplier.

S&T Framework for Prioritizing R&D Projects

DHS has a mission to strengthen America's security and resiliency by providing knowledge products and innovative technology solutions for the HSE. To achieve this mission, S&T has outlined three critical areas of strategic focus. Firstly, S&T will pursue technology options and process enhancements that are focused on DHS Component operational priorities. Secondly, S&T will seek innovative, systems-based solutions to operationally complex problems. Thirdly, S&T will foster robust partnerships across the Federal Government; State, local, and tribal governments; and universities, the private sector, and internationally in order to leverage expertise and solutions and share resources. S&T priorities for areas of research, development, and analysis are derived from an understanding of near- and long-term threats, national needs, and DHS mission needs and operational vulnerabilities, as articulated in the Administration's National Security Strategy, the QHSR, and the capability gaps and operational requirements of DHS Components and first responder communities.

To ensure that individual R&D projects are meeting the priorities established by our partners in the operating Components and the broader HSE, S&T has instituted an annual review of its portfolio of basic and applied R&D and all proposed "new start" projects. The review process consists of written materials, an oral presentation by the project manager, and careful analysis of the project's likely impact and feasibility (or "riskiness") as judged against specific metrics determined by S&T with input from the operating Components. The metrics are designed to address elements essential to programmatic success in the context of DHS's QHSR missions and include:

- **Systems Analysis:** How well does the project's product(s) align with a customer's existing operational context/concept of use or an alternative that is agreeable to the customer?
- **Customer Buy-in:** Have the project objectives been developed through close consultation with appropriate decision authorities?
- **Efficiency:** What level of savings can be achieved by this project with respect to the customer's operations?
- **Capability:** To what extent does this project provide risk or threat reduction and/or improved fidelity, performance, etc.?
- **Technical/Research Feasibility:** How likely is it that the team will overcome the technical and/or research challenges facing this technology and/or knowledge product?
- **Transition Likelihood:** Is there a clear path/mechanism to enable transition/commercialization?
- **Customer readiness:** Are there any secondary issues related to the concept of use, prepotency, budgeting, affordability, regulatory or statutory realities, or business value?

- **Timeline:** When will the project achieve either an efficiency or capability improvement, as part of normal operations? Or, when will the first demonstration of the capability/efficiency be observed in an operational context?
- **Innovation:** Does the project attempt to realize its objectives in a way that others have not previously considered or exploited?
- **Resource Leverage:** What level of interaction exists between the project team and the target Component or customer?
- **Foraging:** Does the project exploit existing technology or research, and/or new or existing partnerships to minimize time and expense?
- **Cost Realism:** Is the cost projection credible?
- **Project Clarity:** How well is the project described, laid-out – is it clear what the team will do? Are the problems well defined and the approach clear? Has a letter of intent or technology transition agreement been obtained?

In addition, S&T established the following methods to ensure that S&T projects support the Component's highest priorities in supporting DHS QHSR missions:

- **S&T Component Liaisons:** Component Liaisons are a primary coordination mechanism for both S&T and the Components to ensure strong communication throughout the R&D process. Liaisons from TSA, CBP, ICE, NPPD, USSS, and USCG are detailed to S&T and S&T has provided liaisons to CBP, USSS, DHS's Office of Policy, DHS Tactical Communications Program Office, DNDO, TSA, and FEMA.
- **Component R&D Agreements:** Research and development agreements with Components strengthen cooperation, coordination, and investment in projects. S&T's APEX projects begin with a memorandum of understanding signed by the Undersecretary of Science and Technology and Component leadership. This process solidifies the agreement that both entities will provide resources and oversight for the length of the project. S&T has agreements with CBP and USSS regarding ongoing R&D efforts in various stages of completion, and plans to expand partnerships with other DHS Components.
- **Component R&D Strategies:** S&T and TSA issued a joint R&D strategy for aviation security that identified TSA's R&D priorities. That plan was a result of an internal planning process that prioritized capability gaps and focused on the work between TSA's and S&T's Explosives and Human Factors/Behavioral Sciences Divisions. S&T also is planning to work with the Secret Service, CBP, ICE, and FEMA to build component-specific R&D strategies that are linked to component acquisition programs.

R&D Coordination Teams: S&T plans to replace the current Integrated Product Team process with two new coordination teams—a cross-functional team comprised of S&T personnel focusing on strategic priorities and an integral partner team—led by S&T's newly created ASOA division to focus on components' operational needs.

PPA: University Programs

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	36,563
2014 Adjustments-to-Base	-	-	(2,563)
2014 Current Services	-	-	34,000
2014 Program Change	-	-	(3,000)
2014 Total Request	-	-	31,000
Total Change 2012 to 2014	-	-	(5,563)

The S&T Directorate requests \$31.000 million for University Programs (UP) in FY 2014. The \$5.563 million decrease in FY 2014 reduces funding for Centers of Excellence (COE) and Education Programs and includes the following adjustments to base:

- Decrease of \$2.500 million for Centers of Excellence
- Decrease of \$0.063 million in efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

University Programs PPA – FY 2012: \$36.563 million. FY 2014 Request: \$31.000 million. The Office of University Programs (OUP) supports critical homeland security-related research and education at U.S. colleges and universities to address high-priority DHS-related issues and to enhance homeland security capabilities over the long term. The program brings together scientists, mathematicians, and engineers from many academic disciplines and institutions. These researchers are investigating research questions important to DHS as well as developing new technologies and approaches to solve complex and challenging homeland security problems. The program focuses on building homeland security expertise in the academic community, creating strategic partnerships among universities and public agencies, and developing a new science and engineering workforce dedicated to homeland security. The primary customers for OUP are the S&T Directorate’s divisions, the DHS Component agencies, and Federal, State, and local government agencies.

Investments in university basic research and support for students in relevant fields are critical to preserving the United States' strategic/economic security and carries out activities in three program areas: 1) the S&T Directorate University COEs, 2) the S&T Directorate's Educational Programs, and 3) S&T Directorate's Minority Serving Institutions (MSI) program.

Centers of Excellence

The COEs work with the S&T Directorate, the DHS Component agencies, and State, local, and tribal first responders. COE research complements existing DHS research and development programs including those of Federal laboratories and FFRDCs. They take advantage of other relevant Federal agency-sponsored research and provide outcomes useful to Federal, State, and local government, private sector, and international partners. The selection process for the COEs is highly competitive, rigorously peer-reviewed, and merit-based.

In 2014, OUP will continue to focus on transition-related activities. The COEs have recently participated in a series of highly successful technology demonstrations to DHS components and first responders. The demonstrations increase exposure of new and existing COE tools, technologies, and knowledge products to end-users. In 2014, the COEs will increase resources dedicated to their flagship End-to-End (E2E) projects – larger research efforts with particular emphasis on end-user engagement from inception to product use.

The COEs are funded through research cooperative agreements, grants, and contracts, depending on the nature of the projects. The COEs are building expertise and reachback capabilities in multi-disciplinary fields of study important to homeland security.

Research will be focused on:

1. Areas identified as priorities in the QHSR
2. Research that is clearly within DHS's purview and closely related to DHS missions
3. Research that is not being done elsewhere
4. Research that can make a difference in operations or intelligence-gathering

The current COEs include:

- The National Center for Border Security and Immigration (NCBSI), co-led by the University of Arizona at Tucson and the University of Texas at El Paso (<http://www.borders.arizona.edu/> <http://osi.utep.edu/NCBSI/index.html>)
- Center of Excellence for Visualization and Data Analytics (CVADA), co-led by Rutgers and Purdue Universities, (<http://ccicada.rutgers.edu/>, <http://www.purdue.edu/discoverypark/vaccine/>)
- The Center for Awareness and Location of Explosives-Related Threats (ALERT), (formerly Center of Excellence for Explosives Detection, Mitigation, and Response), co-led by Northeastern University and the University of Rhode Island (<http://www.northeastern.edu/alert/>, <http://energetics.chm.uri.edu/?q=node/6>)
- The National Center for Food Protection and Defense (NCFPD), led by the University of Minnesota (www.ncfpd.umn.edu)

- The Center of Excellence for Maritime, Island and Remote and Extreme Environment Security (MIREES), co-led by the University of Hawaii and Stevens Institute of Technology (<http://www.cimes.hawaii.edu/>, <http://www.stevens.edu/csr/>)
- The National Center for Zoonotic and Animal Disease Defense, (formerly National Center for Foreign Animal and Zoonotic Disease Defense (FAZD)), co-located at Texas A&M University and Kansas State University (<http://fazd.tamu.edu/> , <http://www.ceeazad.org>)
- The Consortium for the Study of Terrorism and Responses to Terrorism (START), led by the University of Maryland (www.start.umd.edu)
- The National Center for Risk and Economic Analysis of Terrorism Events (CREATE) led by the University of Southern California (<http://create.usc.edu>)
- The Coastal Hazards Center of Excellence (formerly the Center of Excellence for Natural Disasters, Coastal Infrastructure, and Emergency Management (NDCIEM)), co-led by the University of North Carolina at Chapel Hill and Jackson State University (<http://hazardscenter.unc.edu/diem/>, <http://www.jsums.edu/cset/or/centers/centndciem.htm>)

The following section describes specific activities conducted by COEs managed by OUP.

The National Center for Border Security and Immigration

This Center improves the capabilities of CBP, ICE, USCIS, USCG, and State and local agencies to detect people and goods moving across U.S. borders (legally or illegally), using a fully integrated, system-of-systems approach. NCBSI provides fundamental research in support of DHS'S goals of strengthening border security, immigration enforcement, and immigration services.

Center of Excellence for Visualization and Data Analytics, formerly the Center of Excellence for Command, Control, and Interoperability

This Center's tools and analyses improve the capabilities of FEMA, CBP, ICE, USCG, USSS, I&A, the Port Authority of New York and New Jersey, the New Jersey Department of Homeland Security, and many State and local law enforcement agencies to identify vulnerabilities, detect threats, mitigate against catastrophic events, and perform post-event analysis for remediation. CVADA develops new methods, algorithms, and technologies that enable Federal, State, and local homeland security agencies to efficiently manage, analyze, visualize, and understand vast amounts of diverse and distributed data.

The Center for Awareness and Localization of Explosives-Related Threats

This Center supports the NPPD Office of Infrastructure Protection (OIP) and Office for Bombing Prevention (OBP), DHS Office of Policy, TSA, ICE, State homeland security agencies, and State and local police bomb squads by providing research and training to prepare for, prevent, mitigate, respond to, and recover from terrorist attacks involving explosives. ALERT provides basic explosives-related research to advance the technical tools and information that the S&T Directorate's customers will need in the future.

The National Center for Food Protection & Disease

This Center improves the ability of the S&T Directorate, NPPD-OIP, OHA Food, Agriculture, Veterinary Defense (OHA-FAVD), CBP, USDA, FDA, CDC, EPA, State and local agencies, and the food and agriculture private sector to respond to catastrophic food system events by minimizing or eliminating food/agriculture system vulnerabilities. NCFPD conducts research and education aimed at

reducing the potential for contamination at any point along the food supply chain and mitigating the potentially catastrophic public health and economic effects of such attacks.

National Center for Zoonotic & Animal Disease Defense (ZADD)

This Center improves the ability of the S&T Chemical and Biological Countermeasures Division (S&T-CBD), OHA, NPPD, PIADC, NBACC, USDA, CDC, State and local governments, and the agricultural industry to protect the Nation's agriculture and public health sectors against high-consequence foreign, emerging, and/or zoonotic animal disease threats in the United States. ZADD conducts research and develops products to defend the Nation from high-consequence foreign animal, emerging, and zoonotic diseases.

Center of Excellence for Maritime, Island & Remote, and Extreme Environmental Security

This Center enhances NPPD, OHA, FEMA, USCG, CBP, and State homeland security agencies' ability to respond to catastrophic events, particularly for U.S. ports, coasts, islands, and extreme environments, by developing a more secure and efficient marine transportation system. MIREES conducts integrated policy, legal, scientific, and engineering studies to detect and monitor ships, people and goods moving through the United States' maritime domain.

The National Consortium for the Study of Terrorism and Responses to Terrorism

This Center provides DHS Components, other Federal, State, and local agencies, private security agencies, and academia with data-driven research and capability strategies to disrupt terrorist networks, reduce the incidence of terrorism, and enhance the preparedness of American society. The Center uses advanced behavioral and social science theories, methods, and data to better understand the origins, dynamics, and impacts of terrorism and counterterrorism strategies.

START collaborated with terrorism experts to develop an open-source database that includes information on more than 104,000 terrorist events around the world from 1970 through 2012. It is used throughout government, industry, and academia as a source of objective data for various analytic and education projects.

Coastal Hazards Center of Excellence (CHC)

This Center provides FEMA, USCG, NOAA, U.S. Army Corps of Engineers (USACE), State, and local emergency managers, and infrastructure managers with improved coastal hazards planning, response, and recovery capabilities such as providing more accurate storm surge estimates within minutes instead of hours. CHC conducts basic and transformational research in coastal hazards modeling, coastal engineering, disaster response, and resiliency planning, and also develops expertise in related disciplines through education.

National Center for Risk & Economic Analysis of Terrorism Events

This Center's models and analyses improve the ability of DHS components and other Federal, State, and local agencies, private sector security/operators, and academia to predict and counter terrorist attacks and allocate limited resources more effectively. CREATE develops advanced models and tools to evaluate the risks, costs and consequences of terrorism, and to identify economically efficient investments to improve security and resilience.

Minority Serving Institutions Thrust

Minority Serving Institutions

The MSI programs enhance the capabilities of MSIs to conduct HS-STEM related research and move MSI students into HSE careers. Current MSI programs, including the Scientific Leadership Award program and the Summer Research Team program, are developing course content and training in areas critical to homeland security. With small investments, S&T will realize significant returns in the development of a new generation of scientists and engineers focused on homeland security. In addition, the programs can increase diversity and representation within the future homeland security science and engineering workforce.

IV. Program Justification Changes

**Department of Homeland Security
Science & Technology
Research, Development, Acquisitions, and Operations
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Laboratory Construction
PPA: Laboratory Facilities
Program Increase: Positions 0, FTE 0, Dollars \$675,050

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	68,200
Program Increase							-	-	675,050
Total Request	0	0	73,200	0	0	68,200	0	0	743,250

Description of Item

The increase provides funding for NBAF, which will replace PIADC as the Nation's first line of defense against FADs, as well as for critical infrastructure upgrades for PIADC.

Justification

ONL manages the Laboratory Facilities Programs. ONL provides the Nation with a coordinated, enduring core of productive science, technology and engineering laboratories, organizations, and institutions, which can provide the knowledge and technology required to secure our homeland.

Construction and Upgrades – The Directorate requests \$743.250 million to oversee the planning, budgeting, and management of laboratory infrastructure construction and upgrade projects. Construction projects provide and maintain R&D capabilities to support the missions of the S&T Directorate, the Department, and other government agencies that have interrelated homeland security missions. The investments include the construction of future laboratories, where a current capability does not exist, and upgrades to extend the life and capabilities of present laboratory facilities. The increase in funding to Construction will fully fund the construction of the NBAF main laboratory and provide funding for the construction of the new wastewater thermal decontamination facility at PIADC.

NBAF Construction

The Directorate requests \$714 million for NBAF construction. NBAF will be a state-of-the-art bio-containment facility for the study of foreign animal, emerging and zoonotic (transmitted from animals to humans) diseases that threaten the U.S. animal agriculture and public health. It will provide and strengthen our Nation with critical capabilities to conduct research, develop vaccines and other countermeasures, and train veterinarians in preparedness and response against these diseases. For the past 50 years, PIADC has served our Nation as the primary facility to conduct this research. However, PIADC is at the end of its lifecycle and needs to be replaced in order to meet U.S. research requirements and ensure the timely development of countermeasures in the event of an outbreak. NBAF meets that need and will serve as a replacement for the PIADC facility. Strategically, NBAF will boast of new and expanded capabilities, specifically, BSL-4 containment for the study of high-consequence diseases affecting large livestock and a biotechnology development module to expedite the licensure of vaccines.

PIADC Infrastructure Upgrades

The Directorate requests \$29.3 million for critical life and safety infrastructure upgrades at PIADC. Specifically, the construction of the new wastewater thermal decontamination facility is a high-priority project necessary to maintain capacity and safety at PIADC. The Directorate recently completed an engineering assessment to refine the estimate of PIADC infrastructure costs for FY 2014 and beyond. The assessment was risk-based to provide reliable and safe operations for at least 10 years while NBAF is constructed and certified.

Additionally, S&T has established a partnership with USDA to explore possible opportunities to transition non-FMD research from PIADC to other facilities, including Kansas State, before NBAF is opened, with the intent to minimize the load on the PIADC infrastructure and reduce the cost of outyear upgrades and operations.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2014 funding will increase Laboratory Facilities' ability to establish additional direct relationships between its researchers and customers across DHS and expand future funding mechanisms for its wide range of programs in support of *QHSR Mission 1: Preventing and Enhancing Security*, *QHSR Mission*, *QHSR Mission 5: Ensuring Resilience to Disasters*.

Program Increase							-	-	6,033
Total Request	126	126	108,300	130	130	109,380	130	130	114,535

Description of Item

The increase provides funding for NBACC operations.

Justification

ONL manages the Laboratory Facilities Programs. ONL provides the Nation with a coordinated, enduring core of productive science, technology and engineering laboratories, organizations, and institutions, which can provide the knowledge and technology required to secure our homeland.

Laboratory Operations – The Directorate requests \$114.535 million to manage the operations, core capabilities, maintenance, and personnel requirements of the DHS S&T Laboratories and infrastructure. This program also oversees the continued operations of facilities to meet the mission requirements while maintaining safe, secure, compliant, and efficient operations. The increase in funding to Laboratory Operations will support the operating cost of NBACC.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2014 funding will increase Laboratory Facilities’ ability to establish additional direct relationships between its researchers and customers across DHS and expand future funding mechanisms for its wide range of programs in support of *QHSR Mission 1: Preventing and Enhancing Security*, *QHSR Mission*, *QHSR Mission 5: Ensuring Resilience to Disasters*.

Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: Research, Development and Innovation
PPA: Research Development and Innovation
Program Increase: Positions 0, FTE 0, Dollars \$202,510

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	264,490
Program Increase							-	-	202,510
Total Request	-	-	265,783	-	-	267,410	-	-	467,000

Description of Item

Programs in the Research, Development and Innovation account support the HSE in three key ways:

- By working with internal and external partners to provide state-of-the-art solutions and/or technology to help them achieve their missions;
- Leveraging partner-focused and output-oriented RDT&E programs that balance risk, cost, impact, and time to delivery; and
- Supporting the needs of the Department’s operational Components and first responder community to address cross-functional areas such as standards and interoperability.

S&T requests a total of \$467 million for R&D work in areas such as: Land and Maritime Border Security; CBE Defense Research; Counter Terrorist; Cyber Security; and Disaster Resilience R&D.

Justification

RD&I provides state-of-the-art technology and/or solutions to meet the needs of the operational Components of the Department and the first responder community. It includes customer-focused and output-oriented RDT&E programs that balance risk, cost, impact, and time to delivery. The six thrust areas of RD&I include: APEX Research and Development; Border Security; CBE Defense Research; Counter Terrorist; Cyber Security; and Disaster Resilience.

APEX Thrust – The Directorate requests \$15.013 million, an increase of \$1.013 million from FY 2012, in support of QHSR Missions 1 and 5: Preventing Terrorism and Enhancing Security and Ensuring Resilience to Disasters.

This request results in changes to the following activities:

- New Projects:

- *APEX Border Enforcement Analytics Project (BEAP) Project* - Partners with ICE to formulate and deploy strategic solutions for counter-trafficking utilizing emerging Big Data Analytics technology. The program has three primary goals: (1) Documenting standard operating procedures and best practices for standardization and development of automated analytical tools; (2) Conducting operationally relevant experiments and characterize the performance of Big Data technologies; and (3) Deploying operational development capabilities in ICE to transition Big Data capabilities to HSI. The program will utilize technical metrics for assessing Big Data technologies that will be correlated to mission metrics for investigations based on developmental system deployments to ICE HSI.
- *APEX Air Entry/Exit Re-Engineering (AEER) Project* - APEX AEER is a partnership between S&T and CBP. The project will develop and, subsequently transition, an enduring capability to model and simulate Air Entry and Exit operational processes and the CBP OFO resources deployed to execute them. Leveraging the insight gleaned from the modeling and simulation tools, the project will then develop, test, pilot, and evaluate candidate integrated biographic and biometric solutions designed to yield more efficient and effective traveler facilitation and screening systems. This project plans to transition to CBP Air Entry/Exit technology prototypes, modeling and simulation capabilities, and knowledge products including, but not limited to: capability analyses; economic impact analyses; notional “to-be” CONOPS; acquisition and engineering processes, procedures, findings, and best practices.
- Increased funding due to normal project lifecycle for ongoing cross-cutting, multi-disciplinary APEX efforts.

Border Security Thrust – The Directorate requests \$31.580 million, an increase of \$15.846 million from FY 2012, in support of QHSR Mission 2: Securing and Managing Our Borders.

These program changes result in the following:

Cargo Security

- New projects:
 - *Maritime Cargo Security Pilot* - The project showcases S&T-developed security devices that provide security for maritime cargo in the global supply chain including the Container Security Device, Marine Asset Tag Tracking System, Network Access Device, and Data Consolidation Point in a pilot program that will enable improved visibility and door intrusion detection of maritime cargo/containers from the point-of-stuffing in overseas into and through U.S. ports-of-entry to the final destination.
 - *Maritime Secure Hybrid Composite Container (SHCC)* - This project will demonstrate the capability to secure maritime cargo throughout the global supply chain by using the S&T-developed SHCC with embedded security grid, providing 6-sided tampering monitoring, lighter weight, and longer life (as compared to current steel containers). The project will design and build a prototype production line for CBP to determine the anticipated cost of production of the SHCC, a crucial factor in industry acceptance/adoption. The results of the project will also form the basis for establishment of “Expedited Trade Lanes,” enhancing the flow of legitimate commerce. *Polymerase Chain Reaction Collection Efficiency Project* - This project provides CBP the capability to detect illegal activity

through the use of forensic analysis on genetic material collected from suspicious cargo/packages. The project will investigate, research, and exploit existing DNA genetic fingerprinting technology to develop methods of collection, storage, and processing of DNA samples from the variety of packages and materials encountered by CBP Officers in our ports and border crossings. The aim is to collect and present DNA samples of adequate quantity and quality to maximize the opportunity to perform useful forensic analysis.

- Decreased funding due to normal *project lifecycle for: Composite Container Project and Supply Chain Secure Corridors Pilot Project.*

Land Border Security

- New projects:
 - *Border Spotter Project* - This project will provide an ability to detect, locate, and disrupt spotters employed by traffickers along the Southwest Border. These spotters are positioned at vantage points along the border to monitor Border Patrol and other U.S. law enforcement movements and advise drug smuggling operatives when it is clear to cross the border. The deployment of sensors with specialized sensing modalities will facilitate detecting the presence of spotters. This project will identify methods and technologies that can be used by Border Patrol agents to effectively “spot the spotter” and take away their advantage by selectively disrupting communications.
 - *Rapid Response Prototyping Team Project* - This project provides rapid evaluation and integration of commercial off-the-shelf (COTS) and near-COTS technology where there is an identified border security need. Using matching funding from CBP, the project will assess technologies, including sensors, and sensor systems to address critical capability gaps in border security and will deliver prototype solutions to the field. RRPT will also address areas where prototype technology can result in cost-savings for operational infrastructure.
 - *Small Dark Aircraft Project* - This project significantly improves CBP’s capability to detect, track, and interdict low-flying, low-observable aircraft (helicopters, ultra-lights, fixed wing) carrying illicit cargo/contraband across the U.S. border. With thousands of miles of rugged, forested terrain, CBP has limited ability to detect and track small aircraft operating along the Northwest Border. This project will develop inexpensive, man-portable, flexible, wide area sensors/sensor systems to detect and accurately track small aircraft and enable CBP to optimize the use of its limited interdiction assets.
 - *Tunnel Activity Monitoring Project* - This project provides CBP the capability to detect and track human activity in public infrastructure storm drains and sewers that are being used increasingly as conduits for smuggling and illegal entry. This project will design, test, and operationally evaluate an S&T-developed system consisting of miniaturized, long-life sensors, robust relayed communications, signal processing algorithms, and command center displays providing persistent surveillance and monitoring of drainage tunnel activity.
 - *Tunnel Age Project* - This project will develop a consistent methodology to determine tunnel age for use by CBP and ICE field agents. S&T plans to investigate four different methodologies to identify a mechanism with the required sensitivity and time resolution so that the determination of the age of a tunnel can be performed by CBP and ICE accurately and consistently.
 - *Tunnel Detection Project* - This project significantly improves the ability of CBP and ICE to detect, locate, and interdict clandestine tunnels used for smuggling people, illegal drugs,

and contraband. Using collected and open-sourced geological/geophysical data from hot spots along the Southwest Border and sensor and geophysical models, the project is developing a Sensor Performance Tool and Sensor Guidebook to inform CBP Acquisition and Operations of the best remote sensing tools to purchase and use to detect tunnels in the high risk areas of the southwestern U.S. border. Output from the Performance Tool and Guidebook will also help S&T target specific systems/subsystems for further development in order to enhance detection performance.

- Increased funding due to normal project lifecycle for: *Air-Based Technologies Project* and *Ground-Based Technologies Project*.
- Decreased funding due to normal project lifecycle for: *Northern Border Testbed*.

Maritime Border Security

- New projects:
 - *Coastal Surveillance Pilot Project* - This project provides CBP and USCG enhanced maritime situational awareness of small vessel traffic in the port and coastal regions of the U.S. This project will integrate and pilot, in an operational environment, the tools and data sources identified and/or developed in other S&T maritime border security projects: *Port and Coastal Surveillance Improvement Project* and *Small Dark Vessels Project*.
 - *Detection of People in Water Project* - This project will provide an enhanced capability for USCG to detect humans in open water, significantly reducing search time while increasing the likelihood of detection and rescue. This will result in saved lives and more effective utilization of USCG assets (reduced flight hours, manpower, fuel). The system will provide the USCG with: (1) automated real-time detection, (2) cueing of detected position to other onboard systems such as heads-up displays, radar, turreted electro-optical/infrared sensors and recording systems, and (3) automated capability to minimize environmental effects for better detection accuracy.
- Increased funding due to normal project lifecycle for: *Port and Coastal Surveillance Improvement Project*.

CBE Defense Thrust - The Directorate requests \$194.594 million, an increase of \$68.039 million from FY 2012, in support of QHSR Missions 1 and 5: Preventing Terrorism and Enhancing Security and Ensuring Resilience to Disasters.

These program changes result in the following:

Bioagent Detection

- New Projects:
 - *Alternative Chemical, Biological, Radiological Sensor Architectures Project* - This project expands the ability of the CDC, OHA, and the greater public health community to rapidly customize suites of sensors to meet specific mission needs in information assembly and fusion. Areas for research will include integration and interpretation of social media feeds, plug-and-play sensor integration concepts for organic assembly of multiple information sources to lead to more rapid interpretation and decisions, and support for the technology development needs of the National Biosurveillance Integration System and national rollout.
 - *High Confidence Actionable Rapid Indoor Detector Project* - This project enhances the preparedness of building owners/operators and emergency personnel by developing and

providing a stationary, autonomous system with sufficient sensitivity to allow actionable emergency responses upon detection of a broad range of chemical and biological threat agents. This system will be integrated into existing indoor facilities of concern to afford 24/7 protection of building occupants. In addition, system data can be sent, in real-time, to external first responders in route to the scene.

- *Portable BioDetector Project* - This project will provide multiple Federal agencies the ability to rapidly identify a biothreat agent in the field where sample processing and detection are all integrated into a simple-to-use platform for field application. The efforts will leverage recent advances in high specificity assays as well as continued miniaturization of key instrument components.
- Increased funding due to normal project lifecycle for: *Bio-Assays Project* and *Next-Gen Biological Detection Project*.
- Decreased funding due to normal project lifecycle for: *Agricultural Screening Tools Project*, *Multi-Application Multiplex Technology Platform Project*, *Rapid Diagnostic Capability Project*, and *Viable Bioparticle Capture*.

Bioagent Threat Assessment

- New Projects:
 - *Future Bio-Threat Analysis Project* - Through engagement with the Intelligence Community, academia, and others, this project completes literature analysis and experimental research to understand trends and potential risks and threats associated with advances in biology and biotechnology. The primary deliverables will be knowledge products used to inform strategic planning decisions.
- Increased funding due to normal project lifecycle for: *Bio-Terrorism Risk Assessment Project*, *Bio-Defense Knowledge Center Project*, *Bio-Threat Characterization Project*, and *Integrated Terrorism Risk Assessment Project*.
- Decreased funding due to normal project lifecycle for: *FAD Modeling Project*.

Chemical Threat Assessment

- Increased funding due to normal project lifecycle for: *Chemical Security Analysis Center Project*.

Explosives Detection

- New Projects:
 - *Dynamic X-Ray Imaging Project* - This project improves TSA's dynamic screening capability for checked and carry-on baggage screening. The advanced X-ray imaging systems will be capable of supporting a system level risk-based screening capability with adaptive detection capability that will improve system detection performance and throughput.
 - *Eye Safe Trace Detection Project* - This project improves the screening for FPS and other screening partners for the presence of chemical signatures from explosives in a rapid, noncontact process. Together with standoff anomaly detection, this security system will provide the foundation for high throughput screening of personnel for aviation, mass transit, and facilities security.
 - *Integrated Shoe Screening Project* - This project will allow passengers to keep their shoes on throughout the security screening process at aviation checkpoints by developing and

testing integrated shoe screening devices and AIT systems. The initial shoe screening systems developed in this project will be stand-alone systems used to verify acceptable system performance.

- *Person-Borne Threat Imaging Sensor Development Project* - This project improves FPS's and TSA's standoff detection of explosives devices worn or carried by a person as they approach a venue or checkpoint entrance. The project will develop the capability to perform anomaly detection on personnel at a stand-off distance, providing improved threat detection and higher throughput for checkpoint screening processes.
- *Portable Detection Project* - This project improves DHS's and first responders' explosives threat detection capability in a handheld form. The project will develop noncontact portable explosives detectors employing sensitive and selective trace and/or bulk sensors for a number of potential applications, including secondary screening of passengers to mitigate the need for pat downs after AIT anomaly detection.
- *Screener Training and Selection Project* - This project maximizes operational capabilities at screening checkpoints by collaboratively working with DHS Components to research, develop and deploy new screener selection and training tools and methods. This project allows TSA to identify the very best performers in the TSO workforce to increase the ability to uncover potential threats to the traveling public. Training the rest of the TSO workforce on the strategies used by these top performers will increase X-ray image analysis performance across the TSO workforce, increasing overall TSA threat detection capabilities and promoting more effective screening operations.
- Increased funding due to normal project lifecycle for: *Canine Explosives Detection Project, Checked Baggage Project, Mass Transit Project, and Next Generation Passenger Checkpoint Project.*
- Decreased funding due to normal project lifecycle for: *Air Cargo Project, Algorithm and Analysis of Raw Images, MagViz, Person Borne Improvised Device, and Predictive Screening Project.*

Explosives Threat Assessment

- New Projects:
 - *Actionable Indicators and Countermeasures Project* - This project improves the capability of I&A, DHS Fusion Center analysts, and Federal, State, and local law enforcement to identify indicators that individuals and groups are moving toward extremist violence. The project will conduct surveys to understand public attitudes towards violent extremism and efforts to counter it, examine factors that lead to disengagement from violent extremism, evaluate specific countering violent extremism (CVE) programs, and develop open-source analysis products and training modules. Long-term operational and policy benefits include increased analytical accuracy through empirical research, effective CVE training, and evidence-based policies and programs.
 - *Risk Prediction Project* - This project improves CBP's and TSA's capability to identify suspicious behaviors associated with illegally transporting persons and materials prior to their entering the U.S. by deriving, developing, and testing high-speed anomaly-based threat models specific to DHS's air, land, and sea cargo targeting environments. The operational benefits will include: 1) increased capability to interdict potential threats through ports of entry and mass transit portals and 2) prioritized screening and intelligence

assets. The project directly supports CBP's Automated Targeting Systems and TSA's Secure Flight System.

- Increased funding due to normal project lifecycle for: *Aircraft Vulnerability* and *Home Made Explosives Characterization Project*.

Counter Terrorist Thrust – The Directorate requests \$24.561 million, an increase of \$22.961 million from FY 2012, in support of QHSR Missions 1 and 5: Preventing Terrorism and Enhancing Security and Ensuring Resilience to Disasters.

These program changes result in the following:

Hostile Behavior Predict and Detect

- New Projects:
 - *Centralized Hostile Intent Detection Project* - This project improves CBP's and TSA's capability to identify and interdict threats to aviation security further from the checkpoint. The project directly supports CBP's Rover Program and TSA's Risk-Based Security Program.
 - *Insider Threat Detection Project* - This project improves DHS's capability to identify potential insider threats through the derivation and validation of measurable behavioral indicators. It will directly support DHS operational customers (CBP, law enforcement, etc.) and will include and leverage the research conducted by ODNI, FBI, and DOD.
 - *Wide Area Surveillance-Mass Transit Deployment and Evaluation Project* - This project improves surveillance of mass transit systems by exploring integration of the Imaging System for Immersive Surveillance (ISIS) into a mass transit terminal or similar venue.

Identity Management

- New Projects:
 - *Biometric Database Interoperability Project* - This project enables cost-efficient and operationally effective matching, analysis, and exchange of biometric and actionable identity-based information between DHS and its mission partners, including DOD, FBI, and other Federal agencies. More efficient infrastructure and analytical capabilities would allow each agency to support the demanding high-volume of transactions and short response times required of its mission partners.
 - *Cooperative Biometrics Project* - This project improves DHS Components' screening and throughput by collecting two or more biometrics in less than 10 seconds at a 95-percent acquisition rate. It is working with Federal partners and the biometrics industry to develop more robust iris recognition and improved fingerprint and facial image acquisition and matching technologies for integration with DHS biometric screening processes, including Biometric Air Entry and Exit. The focus of this project is on the near-term transition of highly accurate biometrics into a fast, automated, and easy-to-use form factor that may be used in security, immigration, identity vetting, and other screening applications.
- Increased funding due to normal project lifecycle for: *Rapid DNA Project*.

Cyber Security Thrust – The Directorate requests \$70.529 million, an increase of \$24.121 million from FY 2012, in support of QHSR Mission 4: Safeguarding and Securing Cyberspace.

These program changes result in the following:

Cyber Security

- New Projects:
 - *Data Privacy Technologies Project* - This project increases valuable information sharing across the government and private sector by developing technologies to protect and minimize access to confidential personal information. The project develops technologies to ensure that privacy policies are met and allow organizations to protect, share, and control confidential personal information. This project also provides the tools necessary to utilize mobile applications while protecting private information.
 - *Homeland Open Security Technology (HOST) Project* - This project improves Federal, State, and local governments' access to cybersecurity solutions by increasing the awareness of available open source solutions and ensuring that both currently available and developed open source solutions meet the specific needs of government and private sector customers. This project will improve the security of popular open source software currently used in government, foster the development of open source security tools, provide a collaborative environment for exchanging and discovering security-related research products, and work to ease the certification hurdles related to the adoption of open source software in government.
 - *Software Quality Assurance Project* - This project will improve the ability to detect security weaknesses in the software used by our Nation's critical infrastructure and networks by developing enhanced tools and techniques for evaluating, analyzing and testing software. This project addresses the presence of internal flaws and weaknesses in software and deals with the root of the problem by improving software security. The work in this project will also address the gaps in existing state-of-the-art tools; specifically in the areas of soundness, precision and scalability. These tools will play an important role in driving software developers and researchers to SWAMP where they can leverage these tools to evaluate, analyze and test their software applications for security weaknesses.
- Increased funding due to normal project lifecycle for: *CNCI Cyber Economic Initiatives Project, CNCI Leap Ahead Technologies Project, CNCI Moving Target Defense Project, CNCI Tailored Trustworthy Spaces Project, CNCI Transition to Practice Project, Cyber Security Assessment and Evaluation Project, Cyber Security Competitions Project, Enterprise Level Security Metrics and Usability Project, Experimental Research Testbed Project, Experiments and Pilots Project, Identity Management, Process Control Systems Security Project, Research Data Repository Project, and SWAMP Project.*
- Decreased funding due to normal project lifecycle for: *Cyber Security Forensics Project, Internet Measurement and Attack Modeling Project, and Secure Protocols Project.*

Disaster Resilience Thrust – The Directorate requests \$130.723 million, an increase of \$69.237 million from FY 2012, in support of QHSR Missions 1 and 5: Preventing Terrorism and Enhancing Security and Ensuring Resilience to Disasters.

These program changes result in the following:

Bioagent Attack Resiliency

- New Projects:

- *Adaptive Facility Protection Project (Bio)* - This project provides facility operators with a capability to protect buildings after a biological release through the development of a comprehensive, integrated, and rapid threat detection system. Both passive and active detection systems will be considered and selected architecture will be configured into buildings' active and passive facility response systems. Commercial-off-the-shelf (COTS) technologies as well as those previously developed by DHS S&T will be considered by participating facilities in testbed pilot configurations.
- *Chem-Bio Event Characterization and Response Project* - This project improves the capability of the response community (local, State, tribal, and Federal) to rapidly determine the extent of chemical or biological contamination in an urban area following an event. The effort will address the requirement for rapid environmental assessment methods integrated with health surveillance data to properly inform risk-based decisions regarding needed actions to respond to and mitigate the event. The outcome of the project will be a system of tools and methods for emergency responders in public health, environmental cleanup, and emergency management organizations at the Federal, State, and local levels to utilize in execution of their response and recovery duties.
- *Chem-Bio Urban Aerosol Dispersion Support Tools Project* - This project enhances the capabilities of OHA, NPPD, and first responders who direct evacuations and similar responses to hazard materials releases by analyzing the impact of urban structures (i.e., buildings) on the transport and dispersion of a bio-agent aerosol release using data from past urban dispersion trials. The data and analysis will be used to evaluate, down-select and validate appropriate emergency response transport and dispersion models for operational use in urban environments. Products will be down-selected, improved, commercialized, and added to FEMA's Authorized Equipment List.
- *Rolling Stock Restoration Project* - This project enables local, State and Federal entities, as well as public transportation system owners/operators, to decontaminate several types of vehicles, such as aircrafts, train cars, buses, emergency response vehicles and others, following a chemical or biological incident. The project will evaluate the impact of common decontamination techniques on electronic and critical systems in vehicles, quantify potential material compatibility issues (e.g., corrosion), determine gaps in current capabilities, assess promising new technologies, and develop robust techniques and guidance for decontamination of emergency vehicle and mass transportation assets to return them to service.
- Increased funding due to normal project lifecycle for: *Bio-Forensics R&D Near Term Project*, *FAD Vaccine & Diagnostics Project*, and *Underground Transport Restoration Project*.
- Decreased funding due to normal project lifecycle for: *Bio-Forensics Operations at NBFAC Project*, and *Operational Tools for Response and Restoration*.

Chemical Attack Resiliency

- New Projects:
 - *Adaptive Facility Protection Project (Chem)* - This project provides facility operators with a capability to protect buildings after a chemical release through the development of a comprehensive, integrated, and rapid threat detection system. Both passive and active detection systems will be considered and selected architecture will be configured into buildings' active and passive facility response systems. Commercial-off-the-shelf (COTS)

technologies as well as those previously developed by DHS S&T will be considered for by participating facilities in testbed pilot configurations.

- *Chemical Forensic Project (Chem FP)* - This project improves the ability of the FBI, DHS, and other law enforcement components to conduct investigations of chemical terrorist and criminal acts by associating evidence with people, places, and other events, as well as potential attribution to their original source. The project develops and maintains a robust and enduring national capability for the collection, preservation, and processing of chemical threat agents and associated evidence to provide comprehensive and timely forensic analysis and attribution. This project plans to develop and transition additional collection and preservation methods, as well as design workshops and moot courts to identify and evaluate law enforcement and judicial admissibility issues as well as challenge the scientific underpinnings of chemical forensics methods.
- Increased funding due to normal project lifecycle for: *Integrated Consortium of Laboratory Networks Project*.

Explosives Attack Resiliency

- New Projects:
 - *Blast Analysis of Complex Structures Project* - This project supports law enforcement, first responders, and the engineering community and improves the resiliency of critical infrastructure by providing three analysis tools for building owners: 1) the Integrated Rapid Visual Screening (IRVS), 2) the Urban Blast Tool (UBT), and 3) the Owners Performance Requirements (OPR) Tool. The IRVS computes risk for buildings, subway stations, and tunnels by considering a total of 40 scenarios and improving the security of a facility at a minimum cost, allowing the building owners to select a) a single vulnerability; and b) the most cost-effective mitigation measures capable of improving the entire performance of the building. The UBT is a fast-running tool that calculates blast loads, glass damage, and potential for collapse for buildings located in urban settings. It also calculates the likelihood of damage to building equipment needed for emergency evacuation, rescue, and recovery operations. OPR allows governments to understand cost-effective issues when incorporating security and other important attributes and assists the design community to prepare new building designs and retrofit projects by analyzing different performance scenarios and producing cost-effective strategies as outputs.
 - *Blast/Projectile - Protective Measures - Bridges Project* - This project improves the protection of the Nation's most critical bridges by assessing vulnerabilities, investigating new materials, developing and testing technologies, and identifying mitigation schemes that are effective, affordable, and can be implemented in operational environments by bridge owners and operators. Protective measures may include mechanisms to reduce blast effects, rapid mitigation and restoration technologies, and other defensive measures that may be implemented by bridge owners and operators.
 - *Radiological/Nuclear Response and Recovery Project* - By funding research and development activities to address operational capability gaps identified and prioritized through interagency, state/local, and other means, this effort seeks to improve the Nation's ability to respond to and recover from the effects of a nuclear/radiological attack by providing emergency responders the tools to: 1) save lives, protect and restore human health and well-being; 2) restore functionality of critical infrastructure; 3) accomplish long-term remediation and recovery; and 4) improve community resilience prior to the event.

This project builds off work already undertaken by DNDO, FEMA, DOD, and other interagency partners and addresses technology and research in areas such as public warnings, alerts and communications, re-establishment of critical infrastructure, remediation of impact areas, and community and responder health and safety.

First Responder Capability

- New Projects:
 - *Tech Solutions Project* - This project increases the speed of prototyping and transitioning emergent, high priority technologies to the first responder community by capturing, reviewing, verifying, and developing technology needs identified by first responders. This project validates capability gaps and first responder priorities by working with a panel of first responder subject matter experts. This project also conducts operational field assessments of technologies and makes technology available to all first responder communities through commercialization.
- Increased funding due to normal project lifecycle for: *Advanced Incident Management Enterprise System Project, First Responder Technologies, and Geospatial Location Accountability and Navigation System for Emergency Responders Project.*
- Decreased funding due to normal project lifecycle for: *Technology Clearinghouse Project.*

Information Sharing, Analysis and Interoperability

- New Projects:
 - *Citizen to Citizen/Citizen to Responder Communications during Emergencies Project* - This project allows first responders to better manage public feedback during emergencies and enhance their situational awareness by providing them with concepts, tools, and guidance to rapidly sift through and verify the vast amount of data gathered in real-time from social media. Research outcomes will help communities become more resilient during response and recovery periods through effective communications over appropriate channels in their respective networks.
 - *Interoperability and Compatibility Standards Project* - This project provides first responders with the capability to effectively and efficiently communicate with one another during emergencies and day-to-day operations, regardless of their equipment's manufacturer, by accelerating the development of both broadband systems as well as legacy narrowband systems (i.e., P25 systems which will continue to be necessary for many more years). This project will ensure first responders can communicate across agencies and improve interoperability between older and new equipment.
 - *Responder Engagement Project (formerly Converged Interoperable Communications)* - This project improves the ability for first responders to effectively and efficiently coordinate and communicate preparations for response and recovery efforts through the development of an integrated communication system. The project plans to develop improved, networking technology that will allow emergency responders to share information and wireless broadband networks, as well as evaluate existing technologies. These networks may be shared among local jurisdictions to create a regional network or with commercial entities through a public-private partnership.
 - *Operational Assessment Tools to Strengthen Agency Acquisition Project* - This project provides the First Responder Network Authority and public safety community the ability to leverage modeling and simulation tools to make more informed procurement decisions for

everything from user equipment to network infrastructure, ultimately reducing the cost of the nationwide public safety broadband network. Further, this project provides the public safety community with the ability to test and evaluate standards, technology, and applications to ensure that they meet first responders' needs.

- *Visual Analytics, Precision Information Environments* - This project enables Federal, State, local, and tribal first responder; law enforcement; public safety; and public health communities to visualize diverse, diffuse, and dynamic data in a user-friendly form. Data will be shared, analyzed, and understood in real-time by developing advanced visualization-based techniques and technologies. This project focuses on developing informed decision-making capabilities for larger and longer-term disasters, which can have complex or even cascading consequences on multiple infrastructures, facilities, and communities.
- *Wireless Communications Project* - This project meets first responders' mission-critical needs by developing affordable and appropriate technologies that enable interoperability across all forms of wireless communications, including voice, video, and data. Further, recognizing that public safety practitioners rely heavily on video technology as a tool by which to keep the Nation safe, this project brings together public safety practitioners, Federal partners, manufacturers, and representatives of standards making bodies to improve the way in which video technologies serve the public safety community.
- Increased funding due to normal project lifecycle for: *Emergency Response and Management Tools for First Responders Project*.

Natural Disaster Detection

- New Projects:
 - *Seismic Activity Detection Data Collection and Analysis Project* - This project aids first responders by delivering a validation capability to test new methods for earthquake forecasting and develop technology to provide critical earthquake early warning in disaster areas affected by aftershock events. The forecasting technology improves seismic detection by establishing a verification and validation infrastructure to conduct prospective testing of promising technologies against the authoritative earthquake catalog. When deployed, the device would provide additional time for urban search and rescue (USAR) teams to move to a safer place in a disaster area.

Natural Disaster Resiliency

- New Projects:
 - *Community Resilience Project* - This project improves the efficiency of first responders by developing, delivering, and evaluating a program focused on training local leaders in the U.S. on effective risk communication practices. The recommended training program will reflect the current scientific understanding of effective communication of threats and risk based on experts' review of the science related to preparedness, warnings of imminent threats, and post-event recovery and mitigation. Training curricula will be evaluated and refined based on a pilot program in order to deliver to DHS a suite of training materials that can be used in multiple settings to support the communication efforts of local public officials.
 - *Drinking Water Resilience Project* - This project provides NPPD's Homeland Infrastructure Threat and Risk Analysis Center a new capability to assess, predict, and recommend preventive action against threats to the drinking water infrastructure, including cyber,

physical, biological, and chemical contaminants. This project provides a greater landscape assessment and real-time situational awareness building upon and adding to a sophisticated modeling and simulation tool representing U.S. drinking water utilities that will benefit downstream customers, including the EPA, utility service providers, and National Labs by improving drinking water infrastructure resilience. The automation of the risk assessment, on a national scale, will provide partners with a streamlined methodology to access data, perform their analysis, and share results that will reduce time and enable guided investment strategies for infrastructure replacement.

- *GPS Vulnerability and Infrastructure Security Project* - This project analyzes and mitigates the impacts of GPS interference on critical infrastructures. This project takes a deep-dive into multiple critical infrastructure sectors to identify where, when, and how GPS is used, characterize GPS receivers, and fully assess the sector's vulnerability. Based on these results, this project develops and transitions comprehensive and affordable mitigation technologies that address the sectors' vulnerabilities. This project collaborates with NPPD and the Chief Information Office/Office of Applied Technology as well as representative end-users from the critical infrastructures.
- *Incident Logistics and Resource Tracking System Project* – The project allows FEMA to manage critical resources effectively and enhance real-time coordination and situational awareness. The project allows for timely procurement and disbursement of public and private material inventories, locations of resources, and supplies to respond to an emergency through a capability that is scalable and interoperable with Federal, State, and local systems (legacy and future).
- *Quantitative Psychosocial Impacts Index Project* - This project improves the capability of FEMA, the DHS Office of Public Affairs, and State emergency management agencies to use social media effectively during the preparedness, response, and recovery phases of disasters. This will be done by conducting national survey experiments, using a range of qualitative research methods, and conducting evaluations of current programs in order to understand how the public uses social media in emergency situations as well as offer evidence-based recommendations for how officials could improve their disaster-related communications.
- *Resilient Tunnel Project* - This project reduces U.S. transit agencies' vulnerability to tunnel flooding resulting from a terrorist attack or natural disaster by developing an inflatable tunnel plug. Past assessments revealed that terrorists using IEDs could exploit certain weaknesses to cause catastrophic tunnel failure, and storm surge flooding presents another significant hazard to tunnels. The tunnel plug mitigates these vulnerabilities in mass transit systems. This project collaborates with major U.S. transit agencies to define technical and operational requirements for the plug and subsystem designs, and to design, manufacture, and test tunnel plug systems.
- *Smartphone-Controlled Unmanned Aerial Vehicle for Emergency Response Project* - This project leverages emerging technologies and new capabilities of a smartphone platform to immediately provide small UAV guidance control and image acquisition to emergency responders for impact assessment and resource priorities. After the onset of a disaster, this project allows emergency managers to immediately capture still and video images with built-in geo-tagging and transmit in real-time to a local ground station. This system reduces logistical support requirements, provides faster response times, and will provide an order of magnitude cost reduction from currently available larger UAVs, manned aircraft, and

satellites used during disaster response. Integrating smart phones with small-frame UAVs will deliver the integrated GPS, video, and computing capability built into smart phones to the UAV in a highly cost-effective way. This will fundamentally affect the way real-time damage information is provided to emergency responders.

- *Social Media Alert and Response to Threats for Citizens Project* - This project improves situational awareness during disasters for emergency management and first responder communities. The system is designed to enable citizens to send and receive real-time information from/to emergency organizations via a multitude of devices and modalities including cell phones, MMS messages, text messages, web portals, blogs, etc.
- *Solar Storm Mitigation Project* - This project enables critical infrastructure owners to prepare for geo-magnetically induced currents (GIC) events by developing a forecasting system and mitigations options. This project attempts to gain a better understanding of the threat, research the effects of GIC on other critical infrastructure, and analyze the potential cascading effects. It also explores the development of various mitigation devices and operational procedures to minimize the impacts of a solar storm on our Nation's critical infrastructure.
- *Standard Unified Modeling Mapping Integrated Toolkit Spiral 2 (SUMMIT SP2) Project* - This project improves national preparedness for analysts, emergency planners, responders, and decision makers using affordable, repeatable, and agile exercise and training activities by providing a new modeling and simulation platform in line with PPD-8 objectives. SUMMIT SP2 builds on previous S&T investments in developing the SUMMIT platform and will move into the operational environment at the National Response Centers and local emergency operation centers to enhance the quality of the response operations as a force multiplier.
 - Increased funding due to normal project lifecycle for: *Overhead Imagery Data Project*.
 - Decreased funding due to normal project lifecycle for: *Resilient Electric Grid Project*.

Impact on Performance (Relationship of Increase to Strategic Goals)

RD&I supports *QHSR Mission 1: Preventing and Enhancing Security*, *QHSR Mission 2: Securing and Managing Our Borders*, *QHSR Mission 4: Safeguarding and Securing Cyberspace*, and *QHSR Mission 5: Ensuring Resilience to Disasters*.

Department of Homeland Security
Science & Technology
Research, Development, Acquisitions, and Operations
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Consolidation of STEM programs at NSF
PPA: University Programs
Program Decrease: Positions 0, FTE 0, Dollars \$(3,000)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Base			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	34,000
Program Decrease							-	-	(3,000)
Total Request	-	-	36,563	-	-	36,787	-	-	31,000

Justification

OUP supports critical homeland security-related research and education at U.S. colleges and universities to address high priority DHS-related issues and to enhance homeland security capabilities over the long term. The program brings together scientists, mathematicians, and engineers from many academic disciplines and institutions. These researchers are investigating research questions important to DHS as well as developing new technologies and approaches to solve complex and challenging homeland security problems. The program focuses on building homeland security expertise in the academic community, creating strategic partnerships among universities and public agencies, and developing a new science and engineering workforce dedicated to homeland security. The primary customers for OUP are the S&T Directorate’s divisions, DHS Components, and Federal, State, and local government agencies.

DHS requests a total of \$31 million for programs in areas such as COEs DHS, as part of its request, also proposes the consolidation of its Scholars and Fellows Program in support of the Administration’s STEM initiative. Students today need a strong education in science, technology, engineering, and mathematics (STEM) in order to thrive in the 21st Century economy and drive our Nation’s ability to innovate. Despite an annual federal investment of almost \$3 billion, too many American students are unprepared in math and science, particularly students from underrepresented groups, and national STEM workforce needs are not being met. Reform in this area is stymied by a fragmented approach, which is reflected by federal investments in over 220 programs across 13 different agencies and by continued support for ineffective, untested, or poorly targeted programs.

To facilitate a cohesive national strategy, the Administration is proposing a comprehensive reorganization of STEM education programs to increase the impact of Federal investments in four areas: K-12 instruction; undergraduate education; graduate fellowships; and education activities that

typically take place outside the classroom. The reorganization involves consolidating or restructuring 90 programs across 11 agencies and improving the delivery, impact, and visibility of STEM efforts. Nearly \$180 million will be redirected from consolidated programs to the Department of Education, the National Science Foundation (NSF), and the Smithsonian Institution to implement initiatives in the four core reform areas. The Administration will ensure that all science mission agencies have input into the development and implementation of these initiatives so that they align with agency goals while improving STEM education at all levels in a streamlined way.

Description of Item

The Directorate requests \$31 million to continue support of COEs and MSIs targeting the following QHSR Missions: Preventing Terrorism and Enhancing Security, Securing and Managing Our Borders, Safeguarding and Securing Cyberspace, Ensuring Resilience to Disasters, and Maturing and Strengthening the Homeland Security Enterprise.

Impact on Performance (Relationship of Decrease to Strategic Goals)

There will be no impact as a result of the programmatic reduction. As part of the Administration's STEM reorganization initiative, DHS will work with NSF to ensure that HS-STEM initiatives align with the needs of the Homeland Security enterprise.

Program Decrease 2: Acquisition and Operations Support
PPA: Acquisition and Operations Support
Program Decrease: Positions 0, FTE 0, Dollars \$(12,451)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Base			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	54,154
Program Decrease							-	-	(12,451)
Total Request	-	-	54,154	-	-	54,485	-	-	41,703

Justification

The S&T Directorate requests a total of \$41.703 million for programs in areas such as: Operations Research and Analysis, SAFETY Act, Standards, Technology Transition Support, and Testing and Evaluation. Programs decreased were carefully chosen to ensure that high priority initiatives maintain adequate funding.

Description of Item

The Directorate requests \$41.703 million in support of the Department’s missions: Preventing Terrorism and Enhancing Security, Ensuring Resilience to Disasters, and Maturing and Strengthening the Homeland Security Enterprise.

These program changes result in the following:

Operations Research and Analysis

- Increased funding due to normal project lifecycle for: *Knowledge Management and Tech Foraging Project.*
- Decreased funding due to normal project lifecycle for: *Complex Event Modeling, Simulation, and Analysis (CEMSA), Future Capabilities Research and Development, Homeland Security Studies and Analysis Institute (HSSAI) and Intelligence, Surveillance, & Reconnaissance Project.*

SAFETY Act

- Decreased funding due to normal project lifecycle for: *Safety Act Program.*

Standards

- Resumed Projects:
 - *Human Systems Research Project* - This project addresses improving human performance capabilities of TSA screeners, X-ray image analysts, and first responders by incorporating human performance requirements into technology and deployed systems. This project maximizes the understanding of human performance to increase overall system efficiency and effectiveness. This project plans to complete research and transition of Checkpoint Screening Human Performance Research for aviation security operations to TSA, and to provide an improved safe and efficient patient compartment ambulance design to the first responder community. Future efforts include investigating human performance issues for DHS end users in trace detection methodologies and information display commonalities across DHS Components.
- Decreased funding due to normal project lifecycle for: *Biometrics Equipment Standards, Communications Standards, Human Systems Engineering, Mobile Platforms, and X-Ray Screening Equipment Standards.*

Technology Transition Support

- Increased funding due to normal project lifecycle for: *Acquisition Support and Operations Analysis and Program Transition.*
- Decreased funding due to normal project lifecycle for: *Interagency Programs and International Programs.*

Test & Evaluation

- Decreased funding due to normal project lifecycle for: *First Responder Technologies (System Assessment and Validation for Emergency Responders), Oversight Activities of DHS T&E Products, and T&E Policy Analysis & Development.*

Impact on Performance (Relationship of Increase to Strategic Goals)

AOS will continue to maintain established direct relationships between its researchers and customers across DHS in support of *QHSR Mission 1: Preventing Terrorism and Enhancing Security, QHSR Mission 5: Ensuring Resilience to Disasters, and Maturing and Strengthening the Homeland Security Enterprise.*

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for science and technology research, including advanced research projects, development, test and evaluation, acquisition, and operations as authorized by title III of the Homeland Security Act of 2002 (6 U.S.C. 181 et seq.), and the purchase or lease of not to exceed 5 vehicles [\$693,464,000] \$1,397,488,000, of which [\$566,032,000] \$539,703,000, to remain available until September 30, [2015] 2016; and of which [\$127,432,000] \$857,785,000, to remain available until September 30, [2017] 2018, solely for operation and construction of laboratory facilities.

Language Provision	Explanation
¹ ...[\$693,464,000] \$1,397,488,000...	Dollar change only. No substantial change proposed.
² ...[\$566,032,000] \$539,703,000...	Dollar change only. No substantial change proposed.
³ ... [2015] 2016...	Fiscal year change only. No substantial change proposed.
⁴ ... to remain available until...	Provides S&T with 3-year authority for the \$539,703,000 available for advanced research projects, development, test and evaluation, acquisition, and operations
⁵ ...[\$127,432,000] \$857,785,000...	Dollar change only. No substantial change proposed.
⁶ ... [2017] 2018...	Fiscal year change only. No substantial change proposed.
⁷ ... to remain available until...	Provides S&T with 5-year authority for the \$857,785,000 available solely for operation and construction of laboratory facilities

NATIONAL BIO-AND AGRO-DEFENSE FACILITY

1. Project Description, Justification, and Scope

The NBAF will be an integrated foreign animal and zoonotic disease research, development, and testing facility to support the complementary missions of DHS and the United States Department of Agriculture (USDA). Currently, some of this research occurs at Plum Island Animal Disease Center (PIADC), where researchers have contributed significantly to protecting against Foreign Animal Diseases (FAD) for the past 50 years. The Homeland Security Act of 2002 (Public Law 107-296) transferred the operation of the PIADC from USDA to DHS. DHS and USDA discussed a coordinated agricultural research strategy, as called for in the Homeland Security Act of 2002 and Homeland Security Presidential Directive 9 (HSPD-9), “Defense of United States Agriculture and Food (January 30, 2004).” These discussions revealed a capability gap that must be filled by an integrated research, development, test, and evaluation infrastructure for combating agricultural and public health threats posed by FADs, emerging, and zoonotic

diseases in livestock. The DHS Science and Technology (S&T) Directorate is responsible for addressing this gap.

Accordingly, DHS proposed building NBAF to bridge the capability gap and to comply with HSPD-9. Co-locating DHS with USDA’s Animal and Plant Health Inspection Service – Veterinary Services and Agricultural Research Service at NBAF would increase capabilities in research, diagnostics, and responses to outbreaks in agricultural animals (i.e., cattle, swine, and sheep). NBAF will provide a domestic, modern, integrated high-containment facility that includes Biosafety Level (BSL)-2, BSL-3E, BSL-3Ag, and BSL-4 laboratories for an estimated 350 scientists and support staff to safely and effectively prevent the accidental or intentional introduction of animal diseases of high consequence into the United States.

PIADC, the current facility built in the 1950s, is nearing the end of its lifecycle, and does not contain the necessary BSL facilities to meet research requirements. NBAF would fulfill the need for a secure U.S. facility to support collaborative efforts among researchers from Federal and state agencies, academia, and international partners to perform necessary research to protect the agricultural economy and public health. Additionally, the NBAF mission supports the recommendations of the *Report of the Commission on the Prevention of Weapons of Mass Destruction (WMD) Proliferation and Terrorism (December 2008)*, which advises the U.S. to undertake a series of mutually reinforcing domestic measures to prevent agro and bioterrorism.

NBAF Space Justification – NBAF will satisfy the requirements identified in HSPD-9 by providing an integrated facility for studying foreign animal and zoonotic diseases. The existing animal holding, laboratory, training, and support spaces at PIADC present challenges for scientists and building operators since they are inefficiently designed and not designed to modern bio-containment standards. Major limitations exist in the ability to conduct large-animal research trials necessary for assessing and countering emerging threats and developing necessary vaccines. NBAF will be designed to maximize laboratory space and research efficiencies while providing state-of-the-art technologies that meet modern bio-containment standards.

NBAF will have approximately 176,000 net square feet and 574,000 gross square feet, which includes the necessary support space to safely operate and maintain NBAF at the various biosafety levels. Foot and Mouth Disease research requires BSL-3Ag laboratory space while zoonotic disease research requires BSL-4 laboratory space. The overall space is broken out as follows:

Space	NSF
Office/Support	63,500
BSL-2	9,700
BSL-3	81,100
BSL-4	13,400
Vaccine Prod.	8,300
	<hr/> <hr/> 176,000
NBAF GSF	574,000

2. Significant Changes

Description of Item

The FY 2014 program change reflects a program change increase of \$714.000 million for construction of the NBAF main laboratory building and associated support infrastructure. The State of Kansas, pending legislative approval, will provide up to an additional \$202.000 million in gift funds to fully fund the construction program.

Justification

The \$714.000 million will provide the funding for the construction of the NBAF main laboratory that will provide an integrated animal, foreign animal, and zoonotic disease research, development, and testing facility to support the complementary missions of DHS and USDA. NBAF will replace PIADC and provide additional capabilities in state-of-the-art research, development, testing, and evaluation infrastructure to conduct research on high-consequence zoonotic (i.e., transmitted from animals to humans) diseases that could be a threat to public health. Expanded capabilities from the existing PIADC mission will allow NBAF to address a broader and more complete spectrum of threats. Research and development at NBAF will additionally address multiple threats/vulnerabilities related to bio- and agro-attacks and improve our understanding of potential agro-terrorism such as employing foreign animal and zoonotic disease pathogens against U.S. targets.

FY 2012 Accomplishments

In FY 2012, the project completed detailed design, which included additional design features to mitigate risks identified in the DHS Site-Specific Risk Assessment published in 2010. Additionally, DHS completed the Updated Site-Specific Risk Assessment and the associated National Academies of Science review as required by the FY 2011 enacted Continuing Resolution. DHS also completed a Mission Need Assessment by the National Academies of Science to review the mission of NBAF and options to meeting the mission need. The construction contractor completed preparation of the site for construction activities. The site preparation scope was funded using gift funds from the State of Kansas and included earthwork, roadways, parking, fencing, and utility distribution.

The General Services Administration (GSA) is currently working with DHS to evaluate the timing of the sale of Plum Island to maximize the sale value. The FY 2010 Appropriations language (H.R. 2892, Section 540) directs that the Secretary will have the GSA Administrator sell Plum Island's real and related personal property along with transportation assets supporting PIADC operations through public sale if the DHS Secretary were to determine that Plum Island would not be the future site of NBAF. Gross proceeds from the sale will be available in an offsetting account of the S&T Directorate's Research, Development, Acquisition, and Operations to offset site acquisition, NBAF construction, and related costs including due diligence requirements necessary to remediate Plum Island. The timing of the sale correlates to when DHS will transition from Plum Island into the newly constructed and commissioned NBAF.

FY 2013 Accomplishments

For FY 2013, the S&T Directorate has taken ownership of the NBAF land in the State of Kansas and has awarded the construction of the central utility plant (CUP). The scope of the

construction of the CUP includes mass site excavation, foundations, substructure, superstructure, utility rough-ins, and installation of mechanical equipment.

FY 2014 Accomplishments

In FY 2014, the S&T Directorate will award the construction of the NBAF main laboratory. The construction activities will primarily include foundation and structural work for the laboratory facility and early procurement of major mechanical systems and equipment. The \$714.000 million will provide funding for the construction of the NBAF main laboratory facility as well as construction administration activities, site security, and procurement support.

3. Project Schedule and Current Cost Estimate

NBAF Project Milestones	Fiscal Quarter and Year				Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)
	Work Initiated	Work Completed	Physical Construction Start	Physical Construction Complete		
Management and Procurement Support	1Q FY 2005	3Q FY 2020			38,200	38,200
Planning and Studies (including site selection, EIS, risk assessments, Mission Need Assessment)	2Q FY 2006	4Q FY 2012			14,900	14,900
Technical Services (including pre-design and pre-construction services, cost estimating, title services, site security)	3Q FY 2009	3Q FY 2020			34,100	34,100
Facility Detailed Design	4Q FY 2009	4Q FY 2012			78,700	78,700
Existing Infrastructure and Utility Improvements ⁽¹⁾	2Q FY 2010	3Q FY 2013			27,600	27,600

Physical Construction-Lab Facility (Construction)			3Q FY 2014	1Q FY 2020	887,900	887,900
Commissioning (for both CUP and Lab Facility)			3Q FY 2014	3Q FY 2020	9,200	9,200
Total					\$1,229,600	\$1,229,600

PIADC D&D Project Durations	Work Initiated	Work Completed	Physical Construction Start	Physical Construction Complete	Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)

Preliminary Planning & Development	2Q FY 2009	4Q FY 2013			4,000	4,000
Management	1Q FY 2015	2Q FY 2021			25,000	25,000
Transition	1Q FY 2017	4Q FY 2021			90,000	90,000
Closure Activities	2Q FY 2017	4Q FY 2021			71,000	71,000
Total					190,000	190,000
Grand Total NBAF Construction + PIADC Transition/D&D					\$1,419,600	\$1,419,600

(1) Funded through in-kind contributions that will be executed by Kansas State University.

4. Schedule of Project Funding (Dollars in Thousands)

	Prior	FY 2012	FY 2013	FY 2014	FY 2015-2020	Total
Fund Source						
Appropriation	153,600	50,000		714,000		917,600
Kansas In-Kind Contribution ⁽¹⁾	40,700		40,000	231,300		312,000
Obligations (Planned)						
S&T – Obligation	110,700	13,000	49,900	744,000		917,600
Kansas In-Kind – Obligation	40,700		40,000	231,300		312,000
Expenditures (Planned)						
S&T – Expenditure	80,600	44,300	22,300	69,200	701,200	917,600
Kansas In-Kind – Expenditure	33,600	8,100	6,300	29,000	235,000	312,000
Total	114,200	52,400	28,600	98,200	936,200	1,229,600
NBAF Project Expenditures⁽²⁾						
Management and Procurement Support	13,200	200	3,000	2,800	19,000	38,200
Planning and Studies (including site selection, EIS, risk assessments, Mission Need Assessment)	11,200	3,700				14,900
Technical Services (including pre-design and pre-construction services, cost estimating, title services, site security)	12,900	5,000	2,300	2,000	11,900	34,100
Facility Detailed Design	43,300	35,400				78,700
Existing Infrastructure and Utility Improvements	22,400			5,200		27,700
Site Preparation	9,200	7,600				16,800

Construction Support Services (including construction administration and materials testing)	2,000	500	1,300	2,000	36,400	42,200
Physical Construction-CUP (Construction) – Gift Funds			22,000	35,000	23,000	80,000
Physical Construction-Lab Facility (Construction)				51,200	836,700	887,900
Commissioning (for both CUP and Lab Facility)					9,200	9,200
Total NBAF Project Expenditures						1,229,600
PIADC Transition/D&D					190,000	190,000
Grand Total NBAF + PIADC Transition/D&D						1,419,600

(1) In addition to appropriations, the State of Kansas offered DHS gift funding of \$110.000 million to offset construction costs for the NBAF as part of its site offer package. To further support NBAF construction, the State of Kansas, pending legislative approval, may provide up to \$202.000 million in additional gift funds. These terms will be formalized in a Memorandum of Agreement with the State of Kansas. DHS will not receive the entire amount of gift funding directly, as portions are managed as in-kind contributions.

(2) Expenditures include Kansas gift funds and in-kind contributions.

5. Cost Estimate Detail and Changes (Dollars in Thousands)

There are no changes in cost to report.

6. Method of Performance

The NBAF project consists of three phases: design; site preparation and CUP construction; and NBAF building construction. For accountability and in accordance with sound project management principles, the program management team will track all of the project’s activities in an organizational work breakdown structure (WBS) to manage cost, scope, and schedule. The S&T Directorate’s Office of National Laboratories (ONL), DHS Federal Law Enforcement Training Center (FLETC) Bio-containment Branch, the Construction Contractor (known as the Construction Manager as Contractor (CMc)), and the Architecture and Engineering (A/E) team will form the integrated project team and will coordinate inputs into the WBS. The project execution plan includes the following components:

- Program Organizational Structure
- Contract Administration Oversight
- Quality Assurance
- Status and Cost Reporting
- Communications with Stakeholders
- Cross-Task Linkages

- Risk Management
- Cost Controls

A robust, well-integrated plan that includes a WBS is an essential ingredient in effective project management and will provide the source data for internal and external reporting requirements. Such a plan provides a detailed blueprint for project execution and facilitates project coordination, control, reporting, and communications between team components, and all stakeholders.

The FLETC Bio-containment Procurement Branch (FLETC-BPB) will provide day-to-day management and execution of the NBAF design and construction activities and will lead an experienced team of contracting officers, technical managers, and procurement specialists. The NBAF Project Management Office (PMO) will provide analytical and management support and maintain constant communication and coordination among the project team members, cooperating agencies, stakeholders, regulatory agencies, senior leaders, and other local and regional interests. Project communication will occur both internally and externally. Additionally, the ONL Director and NBAF Project Director may establish other critical interfaces throughout the development process.

The NBAF Project Director and the PMO will implement project controls, address reporting requirements, and produce documents to support this project. Project controls include an integrated project schedule, earned value management (EVM) system, and project communication portal. The EVM will effectively integrate the project's scope, schedule, and cost elements to assess and optimize project planning and performance. The NBAF project will meet all reporting requirements. Reports include the following:

- Monthly Project Report to Project Director
- Monthly Periodic Report to DHS Headquarters (HQ) Acquisition Program Management Division (APMD)
- Quarterly Construction Update to Management Directorate
- Quarterly Probability of Program Success (PoPS) Report to DHS HQ APMD
- Quarterly Risk Report
- Yearly Office of Management and Budget (OMB) Exhibit 300
- Cost Accounting and Status Reports
- Hill Briefings
- Ongoing availability of the integrated project schedule.

The NBAF Steering Committee, consisting of individuals from the integrated project team, will execute the NBAF Risk Management Plan. The Committee will identify, manage, track, and control risks in order to minimize adverse impacts that would jeopardize mission success.

The Acquisition Strategy for NBAF includes the involvement of a CMc early in the process, prior to actual construction. This approach improves the project decision-making framework, resulting in a blended perspective on the design and associated construction cost estimates. At pre-determined stages of the project, the CMc and A/E will participate in cost reconciliation

exercises that will result in the CMC submitting a Guaranteed Maximum Price for a firm fixed price agreement for the work.

7. Related Annual Funding Requirements (Dollars in Thousands)

Once operational, the estimated annual operating and support cost for NBAF is \$44.500 million and is based on the NBAF Site Cost Analysis (July 2008) document, which used actual cost data from an existing facility comparable to the size of the proposed NBAF. The A/E and CMC will further refine this estimate upon completion of detailed design.

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2013	FY 2014
Laboratory Facilities	\$0	\$714,000
Total	\$0	\$714,000

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

Identify and certify compliance with all applicable laws, regulations, standards, and executive orders to this project.

- DHS, in coordination with USDA, is fulfilling requirements from HSPD-9: *Defense of the United States Agriculture and Food* (January 2004) by constructing the NBAF to replace the PIADC.
- The FY 2006 Appropriations House Report directed S&T to pursue NBAF:
 - The Committee recognized that the PIADC facility would need to be replaced in the near future and that other potential locations needed to be explored.
 - NBAF will provide safe, secure, and state-of-the-art agriculture biocontainment laboratories that research and develop diagnostic capabilities for foreign animal and zoonotic diseases. It will house BSL-3 and -4 laboratories. There is currently no BSL-4 lab for livestock in the United States.
- DHS completed a 3-year, multi-agency competitive site selection process including an EIS assessing the impacts of accidental release of foot-and-mouth disease on the mainland.
- DHS and USDA evaluated the existing Biosecurity Research Institute at Kansas State University during the design phase and found that the use of this facility may be appropriate to offset some transition costs.
- Final security requirements and design criteria may affect construction costs.

- The FY 2010 Appropriations language (H.R. 2892, Section 540) directs that should the DHS Secretary determine that Plum Island will not be the future site of NBAF, the Secretary will have the GSA Administrator sell Plum Island's real and related personal property along with transportation assets supporting PIADC operations through public sale. Gross proceeds from the sale will be available in an offsetting account of the S&T Directorate's RDA&O to offset site acquisition, NBAF construction, and related costs including due diligence requirements necessary to remediate Plum Island.
- The FY 2010 Appropriations directed DHS to complete a site-specific Bio Safety and Bio Security Risk Assessment followed by the National Academies of Science review prior to beginning construction. DHS completed this assessment in FY 2010.
- The FY 2011 Appropriations directed DHS to complete an updated site-specific Bio Safety and Bio Security Risk Assessment followed by the National Academies of Science review prior to beginning construction. DHS completed this assessment in FY 2012.

Prior to passage of the Food, Conservation, and Energy Act of 2008 (H.R. 6124 [2008 Farm Bill]) which became law on May 22, 2008, the United States Code (21 U.S.C. Section 113a) stipulated that live foot-and-mouth disease virus (FMDV) could not be studied on the U.S. mainland unless the Secretary of Agriculture made a determination that such study was necessary and in the public interest and issued a permit for such research to be conducted on the mainland. Section 7524 of the 2008 Farm Bill directs the Secretary of Agriculture to issue a permit to the Secretary of Homeland Security for work on the live FMDV at any facility that is a successor to PIADC and charged with researching high-consequence biological threats involving zoonotic and FADs. The permit is limited to a single successor facility. On December 18, 2008, Michael Chertoff, the Secretary of Homeland Security, sent a letter to Ed Schafer, the Secretary of Agriculture, requesting that USDA issue a permit if the evaluation process selects a mainland site. On January 9, 2009, DHS received a letter from Secretary Schafer that affirmed USDA's intention of complying with congressional direction to issue a permit for the movement and use of live FMDV at the NBAF.

Acquisition and Operations Support Mission Statement

Provides expert assistance to entities across the Homeland Security Enterprise to ensure that the transition, acquisition and deployment of technologies, information, and procedures improve the efficiency and effectiveness of the operational capabilities across the Homeland Security mission. The five thrust areas of Acquisition and Operations Support are: Operations Research and Analysis; Safety Act; Standards; Technology Transition Support; and Testing and Evaluation.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$455	\$455	\$711	\$256

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Research and Development includes costs for contracts for basic and applied research and development. An increase of \$202,510,000 is included to support the transition of cyber security developments to practice. The program increase also includes R&D activities in Land and Maritime Border Security, Bioagent Detection and Threat Assessment, Explosives Detection and Threat Assessment, Disaster Resiliency, including First Responder Capability, and Hostile Behavior and Identity Management.

University Programs Mission Statement

Supports critical homeland security-related research and education at U.S. colleges and universities to address high-priority DHS-related issues and to enhance homeland security capabilities over the long term. The three thrust areas of University Programs include: Centers of Excellence, Education, and Minority Serving Institutions.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$199	\$199	\$136	\$(63)

Travel includes all costs of personnel while in an authorized travel status, either directly or by reimbursing the traveler. The Travel object class includes costs for travel to funded Centers of Excellence (COEs); potential COEs for management, review, and determination of suitability to become new COEs; to attend workshops and conferences; and potential invitational travel for COE personnel.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
41.0 Grants/Subsidies/Contributions	\$33,771	\$33,995	\$28,271	\$(5,500)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. This includes funding provided to Centers of Excellence (COEs), homeland security related science, technology, engineering and mathematics (HS-STEM) Career Development Grants, and Minority Serving Institutions (MSI) Leadership Grants. The decrease reduces funding for Centers of Excellence and eliminates the Scholars and Fellows Education Program.

Laboratory Facilities Mission Statement

Manages the Laboratory Facilities programs. The Office of National Laboratories (ONL) provides the Nation with a coordinated, enduring core of productive science, technology and engineering laboratories, organizations and institutions, which can provide the knowledge and technology required to secure our homeland. ONL executes two programs: Construction and Lab Operations.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	13,512	13,512	13,702	190
11.7 Military personnel/Awards	1,561	1,561	1,561	-
12.1 Benefits	3,850	3,850	3,850	-
Total, Salaries & Benefits	18,923	18,923	19,113	190

Salaries and Benefits includes costs for FTEs located at DHS S&T-operated laboratories. The 2014 pay increase of 1% is also included.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$635	\$635	\$457	\$(178)

Travel includes all costs of S&T's personnel while in an authorized travel status, either directly or by reimbursing the traveler. A decrease of \$178,000 is included to support the Reduction in Administrative Spend mandate.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$48,907	\$44,987	\$50,130	\$1,223

Operation and maintenance of facilities provides normal daily operations of PIADC, NUSTL, TSL, and NBACC. The costs include maintenance and repair of buildings and land. The increase of \$1,223,000 is for NBACC operations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
32.0 Land & structures	\$68,200	\$68,200	\$743,250	\$675,050

Land and Structures provides costs for construction and capital improvement activities. The FY 2014 request reflects a non-recur increase of \$675,050,000 for NBAF construction and PIADC infrastructure upgrades.

A. Component Overview

The Science and Technology (S&T) Directorate is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Management and Administration: Funds salaries and benefits related to FTE at the S&T Directorate headquarters. The FTE provide executive direction to the S&T Directorate for policy analysis, planning, financial management, and guidance formulation. These FTE also conduct program management, program execution oversight, program analysis, as well as operations and maintenance support for all S&T Directorate programs.

Acquisition and Operations Support: Provides expert assistance to entities across the Homeland Security Enterprise to ensure that the transition, acquisition and deployment of technologies, information, and procedures improve the efficiency and effectiveness of the operational capabilities across the HSE mission. The five areas within AOS are: Operations Research and Analysis; SAFETY Act (Support Anti-terrorism by Fostering Effective Technologies Act of 2002); Standards; Technology Transition Support; and Testing and Evaluation.

Laboratory Facilities: Provides a coordinated, enduring core of productive science, technology and engineering laboratories, organizations and institutions, which can provide the knowledge and technology required to secure our homeland.

Research, Development, and Innovation: A portfolio of customer-focused and output-oriented research, development, testing and evaluation (RDT&E) programs that balance risk, cost, impact, and time to delivery. These RDT&E programs support the needs of the operational components of the Department and the first responder community and address crosscutting areas such as standards and interoperability.

University Programs: University Programs supports critical homeland security-related research and education at U.S. colleges and universities to address high-priority, DHS-related issues and to enhance homeland security capabilities over the long term. The program brings together scientists, mathematicians, and engineers from many academic disciplines and institutions. These researchers are investigating research questions important to DHS and developing new technologies and approaches to solve complex and challenging homeland security problems. The program focuses on building homeland security expertise in the academic community, creating strategic partnerships among universities and public agencies, and developing a new scientific workforce of homeland security experts.

FY 2014 Budget Request

The table below shows Science and Technology’s FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Management and Administration	337	\$129,608
Acquisition and Operations Support		\$41,703
Laboratory Facilities	130	\$857,785
Research, Development, and Innovation		\$467,000
University Programs		\$31,000
Total Budget Request	467	\$1,527,096

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the Science and Technology programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Management and Administration	42%	7%	0%	4%	19%	0%	28%
Acquisition and Operations Support	10%	2%	0%		20%	0%	68%
Laboratory Facilities	8%		0%		9%	0%	83%
Research, Development, and Innovation	65%	8%	0%	15%	12%	0%	0%
University Programs	20%	10%	0%	10%	49%	0%	12%

Mission 1: Preventing Terrorism and Enhancing Security

Resources Requested

Science and Technology resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

\$ in thousands

Science and Technology - Strategic Context

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Management and Administration	57,005	188	57,383	188	54,212	175
Acquisition and Operations Support	6,211		10,540		4,189

Research, Development, and Innovation	182,582		181,062		302,559	
University Programs	6,647		6,703		6,092	
Total	298,898	241	302,721	244	436,198	231

*Totals account for rounding

Performance Measures

For *Preventing Terrorism and Enhancing Security*, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Number of new or improved explosive technologies available for transition to the customers at a Technology Readiness Level (TRL) 6 or above						
Description: The number of technologies includes those that have reached a maturity level of TRL 6 or above; this indicates that a technology is ready for demonstration. These technologies will be transitioned to the primary customer, the Transportation Security Administration.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	5	5	3	5	5	5
Result:	5	5	1	7	N/A	N/A

Measure: Percent of chemical and biological program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of chemical and biological program milestones that meet their established fiscal year budget execution and five-year plan goals. The Chemical and Biological Defense Division works to increase the Nation's preparedness against chemical and biological threats through improved threat awareness, advanced surveillance and detection, and responsive countermeasures.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	93%	95%	75%	75%	75%	75%
Result:	96%	76%	78%	64%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of explosives program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of explosives program milestones meeting their						

Science and Technology - Strategic Context

fiscal year budget execution and five-year plan goals. These milestones are derived from the Directorate's Integrated Product Teams in which the Explosives program works closely with its Department of Homeland Security customers (e.g. the Transportation Security Administration and U.S. Secret Service), to identify customer requirements, set goals for milestones and deliverables, plan for the allocation of resources, discuss the status of projects, and etc. The Science and Technology (S&T) Directorate develops Technology Transition Agreements with its customers to identify what S&T will do to meet customer requirements in the development of a technology, and how a customer expects to invest in this technology once it is ready.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	80%	85%	75%	75%	75%	75%
Result:	72%	83%	78%	76%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of high-priority chemical and biological agents detectable in target operational scenarios

Description: This measure reflects progress across the entire chemical and biological detection program toward developing technologies for transition to appropriate customers for deployment and use. Targeted agents for these detection systems are prioritized through biological and chemical terrorism risk assessments, which are updated by the program on a biennial basis and reviewed by other agencies with a stake in the outcome. The set of agents chosen comprise some 90-95 percent of total risk presented by chemical and biological agents.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	17%	39%	68%	73%	74%	74%
Result:	17%	47%	49%	0%*	N/A	N/A

*Note: The principal reason the Chemical/Biological Defense Division target was not met is the lack of funding under the Continuing Resolution. The Division has opted to place these projects in hiatus status pending future funding in FY13. The Chemical/Biological Defense Division managers are working with S&T's Budget Office to ensure funding for the completion of the remaining projects is available in FY13.

Measure: Percent of laboratory facilities program milestones supporting protection against biological attacks that are met, as established in the fiscal year's budget execution plan

Description: This measure reflects the percent of Laboratory Facilities program milestones that meet their fiscal year budget execution and five-year plan goals. Laboratory Facilities program works closely with its stakeholders to identify requirements, set goals for milestones and deliverables, discuss the status of projects, and plan for the allocation of resources.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	75%	75%	75%	75%
Result:	90%	100%	80%	92%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of laboratory facilities program milestones supporting the protection of transportation sectors that are met, as established in the fiscal year's budget execution plan

Description: This measure reflects the percent of Laboratory Facilities program milestones that meet their fiscal year budget execution and five-year plan goals. Laboratory Facilities program works closely with its stakeholders to identify requirements, set goals for milestones and deliverables, discuss the status of projects, and plan for the allocation of resources.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	75%	75%	75%	75%
Result:	95%	100%	100%	92%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Mission 2: Securing and Managing Our Borders

Resources Requested

Science and Technology resources supporting *Securing and Managing Our Borders* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Management and Administration	9,866	32	9,932	32	9,383	30
Acquisition and Operations Support	5,631		4,622		904	
Research, Development, and Innovation	16,230		16,230		35,939	
University Programs	3,324		3,348		3,046	
Total	35,051	32	34,132	32	49,272	30

*Totals account for rounding

Performance Measures

For *Securing and Managing Our Borders*, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Percent of borders and maritime security program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of borders and maritime security program milestones that meet their fiscal year budget execution and five-year plan goals. The Borders and Maritime Security Division's mission is to develop and transition (to our DHS partners) technologies that help enhance the security of our nation's borders and waterways without impeding travelers and the flow of commerce. The Division works closely with its operational customers to understand their capability needs and identify the gaps in these capabilities that can be addressed by science and technology, then work on appropriate technical solutions to fill those gaps.						
Fiscal	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Science and Technology - Strategic Context

Year:						
Target:	90%	90%	75%	75%	75%	75%
Result:	91%	96%	77%	80%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Mission 4: Safeguarding and Securing Cyberspace

Resources Requested

Science and Technology resources supporting *Safeguarding and Securing Cyberspace* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Management and Administration	5,481	18	5,518	18	5,213	17
Research, Development, and Innovation	46,408		48,035		70,529	
University Programs	3,324		3,348		3,046	
Total	55,213	18	56,901	18	78,788	17

Performance Measures

Strategic Performance Plan Measures

Measure: Percent of planned cyber security products and services transitioned to commercial and open sources						
Description: This measure reflects the percent of Science & Technology Directorate, projects that identify and complete planned transitions of a cyber security product and/or service to a commercial or open source. The percent reported is reviewed using the number of planned transitions stated in CSD's budget execution plan for the fiscal year, and the explanation that is provided in each quarterly performance data call. The Program identifies, funds and coordinates cyber security research and development resulting in deployable security solutions. These solutions include user identity and data privacy technologies, end system security, research infrastructure, law enforcement forensic capabilities, secure protocols, software assurance, and cybersecurity education.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	60%	65%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of projects that involve outside collaboration with DHS components, other government agencies, the private sector, universities and international offices to advance cybersecurity research efforts

Description: This measure reflects the amount of collaboration between DHS Science and Technology (S&T) and external partners on cybersecurity projects. This measure includes outside collaboration with DHS components, other government agencies, private sector, universities, and international offices, for both user coordination and strengthening the performance and quality of research efforts (examples: Working Groups, shared policy documents, teaming exercises, etc.). Collaboration for these purposes is defined as entering into an agreement between an individual or group within S&T CSD and an external collaborator; both parties must have approval by an individual that has designated authority to execute a contract or obligate resources on behalf of the party. This may include, but is not limited to: a signed artifact (MOU, MOA, IA, email, etc); leveraging shared resources such as personnel, facilities, and funding; or a combination of these items.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	60%	65%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Management Measures

Measure: Percent of cybersecurity program milestones that are met, as established in the fiscal year's budget execution plan

Description: This measure reflects the percent of cyber security program milestones that meet their established fiscal year budget execution and five - year plan goals. These milestones are derived from the Cyber Security program working closely with its Department of Homeland Security customers to identify customer requirements, set goals for milestones and deliverables, plan for the allocation of resources, discuss the status of projects, etc. The Science and Technology (ST) Directorate develops Technology Transition Agreements with its customers to identify what ST will do to meet customer requirements in the development of a technology, and how a customer expects to invest in this technology once it is ready.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	100%	N/A	N/A

Note: There is no historical data for this measure; S&T started reporting against the measure in FY12.

Mission 5: Ensuring Resilience to Disasters

Resources Requested

Science and Technology resources supporting *Ensuring Resilience to Disasters* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Management and Administration	26,310	87	26,484	87	25,021	81

Research, Development, and Innovation	20,563		22,083		57,344	
University Programs	16,620		16,740		15,230	
Total	161,728	163	154,075	161	180,480	155

**Totals account for rounding*

Performance Measures

For *Ensuring Resilience to Disasters*, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Percent of infrastructure protection and disaster management program milestones supporting preparedness that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of Infrastructure Protection and Disaster Management program milestones that meet their established fiscal year budget execution and five-year plan goals. The Infrastructure Protection and Disaster Management Division develops technical solutions, modeling and simulation tool and reach back capabilities to improve federal, state, local, tribal, and private sector preparedness for and response to all-hazards events impacting the U.S. population and critical infrastructure. The division also concentrates on developing improved preparedness and response capabilities to protect the nation's emergency responders in the field.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	75%	75%	75%	75%
Result:	100%	100%	75%	41%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of the Homeland Security Enterprise and First Responders Group program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Homeland Security Enterprise and First Responders Group (FRG) program milestones that meet their fiscal year budget execution and five-year plan goals. FRG identifies, validates, and facilitates the fulfillment of First Responder capability gaps through the use of existing and emerging technologies, knowledge products, and the acceleration of standards. FRG manages working groups, teams, and other stakeholder outreach efforts in order to better understand the needs and requirements of local, tribal, state, and Federal First Responders, including those on the front line of border protection and transportation security.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75 %	75%
Result:	N/A	N/A	N/A	83%	N/A	N/A

Note: There is no historical data for this measure; S&T started reporting against the measure in FY12.

Cross-Cutting

Some of the Components in DHS provide mission support programs and activities that are cross-cutting in nature, and thus support multiple missions. The resources for these programs have been spread across the mission areas in previous sections.

Performance Measures

For performance that is *cross-cutting* in nature, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Number of applications for SAFETY Act coverage submitted						
Description: The Office of SAFETY (Support Anti-Terrorism by Fostering Effective Technologies) Act Implementation (OSAI) is responsible for review and approval of applications for Designation and Certification of Qualified Anti-Terrorism Technologies under the SAFETY Act program. This measure reflects the cumulative number of applications received regarding anti-terrorism technologies under the SAFETY Act. The number of applications received is an indicator of long-term success because it is a reflection of the homeland security market's desire to develop and deploy anti-terrorism technologies and the necessity of a program that will enable this process. By continuing to increase the number of applications the SAFETY Act program will continue to be effective in enabling the widespread commercial availability of effective anti-terrorism technologies.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	138	220	220	220	150	150
Result:	218	219	189	132	N/A	N/A

Measure: Number of SAFETY Act "transition" (new, highly innovative) technologies awarded						
Description: In order to stay up to date with the continually changing nature of terrorism, the Office of SAFETY (Support Anti-Terrorism by Fostering Effective Technologies) Act Implementation (OSAI) will seek out those evolving technologies that can serve a homeland security mission and provide coverage to enable their transition into the commercial market, at a rate of 20 percent a year. A "transition" technology is defined as any technology that is awarded Developmental Testing and Evaluation (DTE) Designation, and those that can be considered new and innovative (i.e. a new technological application in the homeland security arena). OSAI is actively seeking out these technologies in an effort to address the ever-changing nature of terrorism. The SAFETY Act program is the only federal program that attempts to help industry transition these developmental technologies into the commercial marketplace.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	17	21	21	21	21	21
Result:	17	18	21	21	N/A	N/A

Measure: Percent of Acquisition Support and Operations Analysis (ASOA) program milestones
--

that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Acquisition Support and Operations Analysis (ASOA) program milestones that meet their fiscal year budget execution and five - year plan goals. These milestones reflect the programmatic and technical events, accomplishments, or intermediate goals in the life of projects and programs. These milestones indicate satisfactory progress toward achieving long - term program performance goals and Department - wide goals and objectives. Milestones are defined as significant events, accomplishments, or intermediate goals in the life of projects, programs, etc. used to indicated satisfactory progress toward achieving long - term program performance goals and Department - wide goals and objectives. They help identify specific and established criteria for measuring incremental progress associated with long - term activities and program outcomes.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	100%	N/A	N/A

Measure: Percent of capstone analysis and requirements program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Capstone Analysis and Requirements Office (CAR) program milestones that meet their fiscal year budget execution and five-year plan goals. CAR provides subject matter expertise and the organic and non-organic operations analysis services/support required to meet the analytical needs of Science & Technology Research & Development programs, the acquisition programs of other DHS Directorates and Components in all DHS Acquisition Lifecycle Framework (ALF) phases.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	100%	N/A	N/A

Measure: Percent of fiscal year milestones met for the Administration and Support Division governed by applicable laws, regulations and management directives						
Description: This measure reflects the Administration and Support Division milestones identified in the Future Years Homeland Security Program (FYHSP), Program Data Module (PDM) and are governed by applicable laws, regulations and management directives. These milestones reflect the business and administrative requirements of DHS S&T including facilities, property, administration, audits and assessments, physical and information security, information technology, human capital, occupational health and safety, environment and energy, and readiness and operations coordination. Milestones are defined as significant events, accomplishments, or intermediate goals in the activities of the administrative support functions used to indicated satisfactory progress toward achieving long-term performance goals and Department-wide goals and objectives. They help identify specific and established criteria for measuring incremental progress associated with long-term activities and program outcomes.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	100%	N/A	N/A

Measure: Percent of Homeland Security Advanced Research Projects Agency (HSARPA) program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Homeland Security Advanced Research Projects Agency (HSARPA) program milestones that meet their fiscal year budget execution and five-year plan goals. HSARPA manages a portfolio of highly innovative programs that are transforming the future mission space for Homeland Security. Complimentary to the S&T Directorate's other programs and projects, HSARPA projects push scientific limits to address customer-identified gaps in areas where current technologies and R&D are inadequate or non-existent. HSARPA program managers lead teams of national experts in the development of new homeland security technologies, demonstrations and applications that offer significant breakthroughs for DHS operations. These milestones reflect the programmatic and technical events, accomplishments, or intermediate goals in the life of HSARPA projects and programs.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	85%	N/A	N/A

Measure: Percent of human factor program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of Human Factors/Behavioral Sciences Division program milestones that meet their established fiscal year budget execution and five-year plan goals. The Human Factors/Behavioral Sciences Division advances national security by developing and applying the social, behavioral, and physical sciences to improve the identification and analysis of threats, to enhance societal resilience, and to integrate human capabilities into the development of technology.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	75%	75%	75%	75%
Result:	95%	91%	89%	100%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of infrastructure protection and disaster management program milestones supporting the protection of critical infrastructure that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of Infrastructure Protection and Disaster Management program milestones that meet their established fiscal year budget execution and five-year plan goals. The Infrastructure Protection and Disaster Management Division develops technical solutions, modeling and simulation tool and reach back capabilities to improve federal, state, local, tribal, and private sector preparedness for and response to all-hazards events impacting the U.S. population and critical infrastructure. The division also concentrates on developing improved preparedness and response capabilities to protect the nation's emergency responders in the field.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	75%	75%	75%	75%

Science and Technology - Strategic Context

Result:	100%	100%	92%	38%	N/A	N/A
----------------	------	------	-----	-----	-----	-----

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of interagency office program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Interagency Office (IAO) program milestones that meet their fiscal year budget execution and five-year plan goals. IAO serves as the Directorate's lead facilitator and systems integrator for helping our internal and external customers achieve their respective missions. This is accomplished through a shared vision among the various stakeholders, leveraging the knowledge and experience of others, and maintaining open and honest communications that foster cohesiveness and the sharing of information. IAO is also responsible for establishing processes and mechanisms for the Directorate to hear directly and routinely from organizations external to the Department of Homeland Security, obtaining input directly from state, local, tribal and territorial representatives on their capability gaps; and creating sustainable partnerships within DHS S&T.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	100%	N/A	N/A

Measure: Percent of Research and Development Partnerships (RDP) program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Research and Development Partnerships (RDP) Group program milestones that meet their fiscal year budget execution and five-year plan goals. RDP conducts extensive outreach efforts with members of the HSE based on the strategic and programmatic needs of the Department and S&T. The R&D Partnerships Group assists in both "transmitting and receiving information" to stakeholders across the HSE. The R&D Partnerships Group enables opportunities for evaluating, expediting and monitoring the execution of programs with an increased speed-of-execution compared to "in-house only" activities. Our Group maintains extensive contacts and key references to conduct outreach, and provide research and funding opportunities to the public and private sectors both domestically and internationally.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	91%	N/A	N/A

Note: There is no historical data for this measure; S&T started reporting against the measure in FY12.

Measure: Percent of supported students who declare and complete a Homeland Security - Science, Technology, Engineering and Mathematics major or program of study						
Description: This measure gauges the effectiveness of the program's efforts to develop the scientific and technical leadership needed for the Nation's future security by measuring the percent of Science and Technology Directorate-funded students that complete their Homeland Security-Science, Technology, Engineering and Mathematics (HS-STEM) program of study. The percentage is calculated from the pool of students eligible to graduate in the current fiscal year. The funds are granted through the University Centers of Excellence (COEs) which are mission-focused university consortiums that leverage the multi-disciplinary capabilities of universities to address the						

Department of Homeland Security's needs.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	85%	85%	75%	75%	75%
Result:	N/A	96%	85%	100%	N/A	N/A

Measure: Percent of systems engineering program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the Office of Systems Engineering program milestones that meet their fiscal year budget execution and five-year plan goals. The Office of Systems Engineering provides systems engineering advice and services to the Department and the S&T Directorate to strengthen the DHS acquisition processes. The main areas of responsibility include requirements development, systems engineering strategic planning, process management, programmatic risk management and systems engineering subject matter expertise.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	75%	75%	75%
Result:	N/A	N/A	N/A	100%	N/A	N/A

Measure: Percent of test, evaluation and standards program milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of Test & Evaluation and Standards Office (TES) program milestones that meet their established fiscal year budget execution and five-year plan goals. The Test & Evaluation and Standards Division works across all DHS elements and entities to support Test & Evaluation (T&E) programs and Standards Development efforts. TES integrates T&E and Standards into the entire development and acquisition cycle via early and continuous evaluation of system test requirements, planning, and execution. TES coordinates with other federal agencies as required to adopt appropriate standards and implement effective T&E programs.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	80%	80%	75%	75%	75%	75%
Result:	85%	100%	94%	93%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Measure: Percent of university programs milestones that are met, as established in the fiscal year's budget execution plan						
Description: This measure reflects the percent of University Programs milestones that meet their fiscal year budget execution and five-year plan goals. University Programs works closely with its stakeholders to identify requirements, set goals for milestones and deliverables, discuss the status of projects, and plan for the allocation of resources.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	85%	85%	75%	75%	75%	75%
Result:	100%	100%	92%	85%	N/A	N/A

Note: S&T restructured the level of milestones captured and tracked against this measure for FY11 and FY12, thus making the historical data no longer comparable with the measure going forward.

Maturing and Strengthening the Homeland Security Enterprise

One of the Department’s objectives is to improve DHS’s organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters components, enhanced programmatic alignment to the homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

BUDGET REQUEST AND SUPPORTING INFORMATION

Domestic Nuclear Detection Office Management and Administration

I. Appropriation Overview

A. Mission Statement for Management and Administration:

The Domestic Nuclear Detection Office (DNDO) was established by National Security Presidential Directive (NSPD)-43 and Homeland Security Presidential Directive (HSPD)-14 to protect against radiological and nuclear (rad/nuc) attacks directed against the United States or its interests. Title V of the Security and Accountability for Every Port Act of 2006 (SAFE Port Act of 2006, P.L. 109-347) directs DNDO to serve as the primary entity of the United States Government (USG) to further develop, acquire, and support the deployment of an enhanced domestic system to detect and report on attempts to import, possess, store, transport, develop, or use an unauthorized nuclear explosive device, fissile material, or radiological material in the United States, and to improve that system over time.

The Nuclear Forensics and Attribution Act (NFAA), signed into law on February 16, 2010, codified the mission of the National Technical Nuclear Forensics Center (NTNFC) within DNDO and included specific requirements to lead the development and implementation of the National Strategic Five-Year Plan for Improving U.S. Nuclear Forensic and Attribution Capabilities and to establish a National Nuclear Forensics Expertise Development Program to address the workforce pipeline needs in nuclear forensics. The NTNFC provides the technical capability to determine the origin and nature of nuclear or radiological attacks, interdicted source materials, and devices to support national priorities for deterrence, attribution, and prosecution.

To fulfill the mandates of the authorizing legislation and directives, DNDO's activities are focused on developing and implementing a Global Nuclear Detection Architecture (GNDA) and advancing technical nuclear forensics capabilities through the National Technical Nuclear Forensics (NTNF) program. Together, the GNDA and NTNF work to strengthen prevention and deterrence by detecting weapons and rad/nuc materials that are out of regulatory control,¹ enabling the identification and closure of illicit radiological and nuclear trafficking networks, promoting nuclear security, and deterring potential adversaries by increasing their perceived risk of failure and the prospect of being held accountable for planned and executed attacks.

The Management and Administration (M&A) appropriation provides for the support to accomplish the DNDO mission. M&A includes all costs related to Federal personnel (including detailees from other organizations), supplies and materials, and information technology (IT) equipment and support, as well as financial management support. DNDO also contributes M&A funds to the DHS Working Capital Fund (WCF) for facilities, other infrastructure and security costs, human resource support, acquisition support, IT services, training, and travel costs. Most of DNDO's contributions to the DHS WCF are included within the M&A request with the exception of procurement support costs, and the costs for hosting of the Joint Analysis Center Collaborative Information System at the DHS Datacenter.

¹ The term "out of regulatory control" refers to materials that are being imported, possessed, stored, transported, developed, or used without authorization of the appropriate regulatory authority, either inadvertently or deliberately.

B. Budget Activities:

The DNDO FY 2014 request for M&A provides for 127 full-time positions (FTP) and 127 full-time equivalents (FTE), of which approximately 17 are detailees. As a jointly staffed office with personnel from across the Federal Government, DNDO provides reimbursement to parent organizations for detailed staff.

In FY 2014, DNDO will be able to reduce mission support services by transitioning to an integrated acquisition and financial management solution that addresses inefficiencies and duplicative work in our current business operations. With support from the DHS Under Secretary of Management (USM), Office of the Chief Financial Officer (OCFO), and Office of the Chief Procurement Officer (OCPO), DNDO will begin the transition in FY 2013 either through improvements to existing business support systems and operations, or migration to a different solution. This transition will reduce the requirement for support services that are presently necessary to maintain controls over financial management operations and ensure accurate and timely reporting.

C. Budget Request Summary:

The Domestic Nuclear Detection Office requests \$37.510 million and 127 FTE within M&A for FY 2014.

D. Efficiencies:

Purchases from Government Accounts

\$0.836 million

Reduction of Costs for Procurement Support (\$0.133 million) – Through a joint review of procurement support service requirements, DNDO and the Office of Procurement Operations (OPO) have been able to identify savings that can be realized in FY 2014. The reduced requirement will be achieved through process and responsibility changes in the how interagency agreements (IAA) are negotiated. The process change will begin in FY 2013 with IAAs with the Department of Energy (DOE) for the use of the National Laboratories. These savings are proportionally spread to DNDO's appropriations.

Reduction of IT Services Costs (\$0.703 million) – DNDO expects to achieve efficiencies in the cost of IT support services received from the DHS Office of the Chief Information Officer (OCIO) and increased transparency in costs for wireless services. OCIO has initiated a multi-year campaign to drive down costs for IT services that provide desktop and network services. Locally, DNDO has been able to reduce the total cost for wireless services by instituting a process where BlackBerry and wireless card users are provided a monthly summary of usage costs. Through the simple awareness of the billing structure and usage, employees were able to alter habits and see the changes reflected in their individual bills.

¹The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.

²FY 2012 Actual 101 FTE complies with OMB MAX A-11 requirements. The Actual FTE level does not include an average of 14 FTE for reimbursable detailees. The Adjustment-to-Base of 29 FTE includes the average of 14 FTE reimbursable detailees.

III. Current Services Program Description by PPA

**Department of Homeland Security
Domestic Nuclear Detection Office
Management and Administration
Program Performance Justification**
(Dollars in Thousands)

PPA: Management and Administration

	Perm. Pos	FTE	Amount
2012 Revised Enacted	130	101	38,000
2014 Adjustments-to-Base	-	29	8
2014 Current Services	130	130	38,008
2014 Program Change	(3)	(3)	(498)
2014 Total Request	127	127	37,510
Total Change 2012 to 2014	(3)	26	(490)

DNDO requests \$37.510 million and 127 FTE within M&A for FY 2014.

Included in DNDO’s M&A FY 2014 request are efficiencies amounting to \$0.836 million. Through a joint review of procurement support service requirements, DNDO and the OPO have been able to identify savings that can be realized in FY 2014. The reduced requirement will be achieved through process and responsibility changes in the how IAAs are negotiated. The process change will begin in FY 2013 with IAAs with DOE for the use of the National Laboratories. These savings are proportionally spread to DNDO’s appropriations. DNDO also expects to achieve efficiencies in the cost of IT support services received from OCIO and increased transparency in costs for wireless services. OCIO has initiated a multi-year campaign to drive down costs for IT services that provide desktop and network services. Locally, DNDO has been able to reduce the total cost for wireless services by instituting a process whereas BlackBerry and wireless card users are provided a monthly summary of usage costs. Through the simple awareness of the billing structure and usage employees were able to alter habits and see the changes reflected in their individual bills.

Adjustments to Base include:

- Increase of \$0.083 million for transfer from Office of the Chief Readiness Support Officer for the WCF
- Increase of \$0.001 million for transfer from OCFO for the Financial Audit Clearinghouse Database for the WCF
- Increase of \$0.157 million for the 2014 pay raise

- Increase of \$0.530 million for WCF, including GSA rent
- Decrease of \$0.836 million in efficiencies associated with procurement costs and IT services
- Increase of \$0.073 million for technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

The M&A appropriation funds the administration of DNDO and provides for the execution of salaries, benefits, and expenses related to 127 FTE. Additionally, funds are provided to the WCF, which provides such services as rent, acquisition support from OPO, and IT infrastructure support.

The FY 2014 M&A budget request incorporates reductions to IT expenses, and other efficiencies initiated in FY 2012. DNDO continues to operate in a nonintegrated environment for financial and procurement management and has made great strides to improve transparency in all aspects of financial management operations, from formulation through execution. With support from USM, OCFO, and OCPO, DNDO will begin the transition in FY 2013 either through improvements to existing business support systems and operations, or migration to a different solution.

In addition to providing funding for Federal salaries and benefits for DNDO personnel, M&A funds support detailees from other DHS Components and from other Federal agencies such as DOE, the Federal Bureau of Investigation, the Department of Defense, and the Nuclear Regulatory Commission.

The M&A appropriation also supports the following:

- DNDO Professional Development Program – Upgrades employees’ knowledge, skills, and abilities and supports required certifications and training. This program supports individual development plans, departmental requirements, and DNDO’s need to employ and retain skilled personnel.
- Facilities – Provides day-to-day building and maintenance services, utilities, security upgrades, document destruction service, moving services, furniture repair and replacement, and any additional services that directly support the physical work environment.
- Information Technology – Includes all IT services not directly procured through the WCF such as maintenance support, printing supplies, video teleconferencing equipment, operations and maintenance of the secure network, and database management applications such as SharePoint.
- Official Reception and Representation – Provides a small amount of funding to host official events and extend official courtesies on behalf of DHS, within the limitations established by Congress.
- DNDO Accounting Systems and Services – Provides funding to utilize the United States Coast Guard (USCG) and other contract services for operations and maintenance of accounting databases and to provide compensating controls to ensure financial data integrity.

The M&A appropriation provides funding that assists in the achievement of DNDO's mission through the following leadership and administrative elements:

Office of the Director

- **Director's Office.** The Director's Office supports the Director in disseminating information and communicating the DNDO vision, plans, strategies, and activities to partners including DHS Components, other Executive Branch agencies, Congress, international partners, and the American public. Communications and policy support for the Director and Deputy Director include coordination of DNDO messaging and external affairs and associated preparation of materials (papers, responses, speeches, testimony, fact sheets, briefings, etc.), as appropriate.
- **Office of the Chief Financial Officer.** DNDO's Office of the Chief Financial Officer oversees financial management activities including budget planning and formulation, budget execution, internal controls, data management, and performance-based budgeting.
- **Office of the Assistant General Counsel.** Office of the Assistant General Counsel serves as primary advisor to DNDO regarding legal issues arising under all aspects of the DNDO mission. This includes advising on the scope of authority of DNDO, procurement contracts, assistance agreements, claims, protests, litigation, ethics, privacy, and other areas. In addition, the office serves as liaison between DNDO and the DHS Headquarters Office of the General Counsel.
- **Red Team and Net Assessments (RTNA).** RTNA serves as DNDO's primary means to assess the operational effectiveness and performance of DNDO programs and deployed rad/nuc detection capabilities at the Federal, State, local, and tribal levels in support of the GNDA.

Office of the Chief of Staff

- **Information Technology.** Provides oversight of and leads DNDO IT initiatives and programs and coordination with OCIO.
- **Executive Secretariat.** Collaborates within DNDO and with other Component Executive Secretariats to ensure full compliance with and cross coordination for tasks assigned to DNDO. Coordinates internally-generated tasks, ensuring timely response.
- **Security.** Implements, directs, and manages the following programs for DNDO: Counterintelligence, Information Security, Foreign Disclosure, Operations Security, Physical Security, Personnel Security, Anti-Terrorism/Force Protection, and Crime Prevention.
- **Human Resources.** Executes the functions of the Human Resources Officer and ensures the provision of a variety of human capital services in support of DNDO personnel in accordance with DHS Chief Human Capital Office requirements. This includes overseeing recruitment, staffing, performance management, professional development, and employee relations.

- **Administration and Facility Resources.** Oversees and provides various administrative support services pertaining to general office operations, facilities, purchase cards, travel, and records management.

M&A also provides support to the Directorates operating within the organizational structure of DNDO. The functions of each Directorate include:

- **Architecture and Plans Directorate (APD).** In cooperation with DNDO's intra- and interagency partners, APD develops the GNDA strategies and plans for improving the Nation's ability to detect and prevent (rad/nuc) attacks. APD also identifies, coordinates, and prioritizes programs across DNDO that meet the needs and enhance the capabilities of stakeholders, thereby reducing the risk of rad/nuc terrorism.
- **Nuclear Forensics.** Provides national-level integration, centralized planning, and stewardship for the technical nuclear forensics community and leads the USG efforts in establishing a robust and enduring pre-detonation nuclear materials forensics capability.
- **Operations Support Directorate (OSD).** OSD provides the capability to monitor the status of GNDA resources and provides the information sharing and analytical capability necessary to support decision makers. OSD also fosters standard-based training, exercises, outreach, and technical assistance in support of rad/nuc detection programs, fulfilling GNDA goals among Federal, state, local, and tribal partners.
- **Product Acquisition and Deployment Directorate.** Carries out the engineering development, production, logistics, procurement, and deployment of current and next-generation nuclear detection systems in support of DNDO's end-user partners, including U.S. Customs and Border Protection USCG, and Transportation Security Administration.
- **Systems Engineering and Evaluation Directorate (SEED).** Characterizes and evaluates technical solutions for rad/nuc detection and ensures that systems are thoroughly tested prior to deployment. SEED also maintains DNDO's test infrastructure and works to develop standards for rad/nuc detection equipment.
- **Transformational and Applied Research Directorate (TARD).** Through an aggressive and expedited research and development program, TARD develops break-through technologies that will address gaps in the GNDA and will have a positive impact on capabilities to detect nuclear threats.

IV. Program Justification Changes

**Department of Homeland Security
Domestic Nuclear Detection Office
Management and Administration

Strategic Goal(s) & Objective(s):

DHS Quadrennial Homeland Security Review (QHSR)

- Mission 1: Preventing Terrorism and Enhancing Security

Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities

Objective 1.2.3: Control Movement of CBRN

Objective 1.2.4: Protection Against Hostile Use of CBRN

Description of Item

Funding for Federal personnel is provided in DNDO's M&A account. This request provides for a reduction in the number of Federal positions by three while continuing to support pay, benefits and administrative costs for 127 FTE.

Justification

The reduction to FTE is part of the Department's drive to realize efficiencies in mission support costs in order to fund higher priority front line operations. DNDO will adjust program management staffing

levels that were to oversee the development of Maritime Small Vessel Standoff Detection, and additional capability at air ports of entry and this reduction will have a minimal impact.

Impact on Performance (Relationship of Increase to Strategic Goals)

This decrease in funding will allow high priority efforts to be funded and will have minimal impact.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

*For salaries and expenses of the Domestic Nuclear Detection Office, as authorized by title XIX of the Homeland Security Act of 2002 (6 U.S.C. 591 et seq.), for management and administration of programs and activities, \$[39,692,000] **\$37,510,000**¹: Provided, That not to exceed \$2,500 shall be for official reception and representation expenses.*

Explanation of Changes:

¹Dollar change only. No substantive changes proposed.

Management and Administration Mission Statement

Per the National Security Presidential Directive (NSPD) 43 / Homeland Security Presidential Directive (HSPD) 14, the mission of Domestic Nuclear Detection Office (DNDO) is to substantially reduce the risk of nuclear terrorism against the United States by continuously improving capabilities to deter, detect, respond to, and attribute attacks, in coordination with domestic and international partners. The M&A appropriation provides for the management and administrative support of that goal. M&A includes all costs related to Federal personnel, including detailees from other organizations. The M&A appropriation accounts for the funding that assists in the achievement of DNDO's mission through the maintenance of an operations level that provides facilities, supplies and materials, IT equipment and administrative support. Most of DNDO's contributions to the DHS Working Capital Fund are included within the M&A request.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	16,568	16,568	16,256	(312)
11.5 Other personnel compensation	406	406	445	39
12.1 Benefits	4,088	4,088	4,020	(68)
Total, Salaries & Benefits	21,062	21,062	20,721	(341)

The FY 2014 request is \$20,721,000 for personnel compensation and benefits. The FY 2014 request for Management and Administration includes funding for a staffing level of 127 FTEs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$85	\$86	\$51	(\$34)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request is \$51,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$4,444	\$4,444	\$4,671	\$227

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request is \$4,671,038. Factored into the GSA cost is the rental of space through GSA to accommodate DNDO office requirements at a secondary location in Washington D.C.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$90	\$91	0	(\$90)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request is \$0.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$20	\$20	\$15	(\$5)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 request is \$15,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	0	0	\$1,229	\$1,229

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2014 request is \$1,229,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$319	\$321	\$269	(\$50)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25 including training development and delivery. The FY 2014 request is \$269,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$11,158	\$10,303	\$9,908	(\$1,250)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request is \$9,908,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$674	\$678	\$239	(\$435)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2014 request is \$239,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$148	\$149	\$305	\$157

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request is \$305,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	0	0	\$102	\$102

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request is \$102,000.

BUDGET REQUEST AND SUPPORTING INFORMATION

Domestic Nuclear Detection Office Systems Acquisition

I. Appropriation Overview

A. Mission Statement for Systems Acquisition:

The Domestic Nuclear Detection Office (DNDO) was established by National Security Presidential Directive (NSPD)-43/Homeland Security Presidential Directive (HSPD)-14 to protect against radiological and nuclear (rad/nuc) threats directed against the United States or its interests. Title V of the Security and Accountability for Every Port Act of 2006 (SAFE Port Act, P.L. 109-347) directs DNDO to “serve as the primary entity of the United States Government (USG) to further develop, acquire, and support the deployment of an enhanced domestic system to detect and report on attempts to import, possess, store, transport, develop, or use an unauthorized nuclear explosive device, fissile material, or radiological material in the United States, and improve that system over time.”

To fulfill the mandates of the authorizing legislation, DNDO’s activities are focused on developing a Global Nuclear Detection Architecture (GNDA) and implementing the domestic component. The GNDA strengthens prevention and deterrence by detecting radiological and nuclear materials that are out of regulatory control.¹ DNDO has been charged with coordinating the development of the GNDA among the USG partners.

In December 2010, DNDO delivered the GNDA Strategic Plan 2010 to Congress. This interagency product is designed to guide the Nation’s nuclear terrorism detection capacity and capability development over the next five years. The GNDA incorporates detector systems, telecommunications, and personnel with the supporting information exchanges, programs, and protocols that serve to detect, analyze, communicate, and coordinate on rad/nuc materials that are out of regulatory control. We seek to make nuclear terrorism prohibitively difficult for our adversaries through the acquisition of an adaptable and agile detection architecture that can readily surge in response to intelligence cues.

DNDO acquires rad/nuc detection equipment for other Department of Homeland Security (DHS) Components, including the U.S. Coast Guard (USCG), U.S. Customs and Border Protection (CBP), and the Transportation Security Administration (TSA). DNDO also issues cooperative agreements under the Securing the Cities (STC) Program, supporting State, local, and tribal authorities in the development of nuclear detection capabilities for high-threat, high-density urban areas. All deployed technologies for Federal, State, local, and tribal, partners are accompanied by the appropriate concepts of operations (CONOPS), training, exercises, and alarm response protocols.

Recognizing the rapid advancement of technology and innovation, constrained budgets, and market forces, DNDO has shifted focus from government-sponsored development of materiel solutions to a

¹ The term “out of regulatory control” refers to materials that are being imported, possessed, stored, transported, developed, or used without authorization of the appropriate regulatory authority, either inadvertently or deliberately.

“Commercial First” approach. To address gaps identified in the GNDA and by using a “Commercial First” approach, DNDO can leverage important industry-led innovations and technologies.

The “Commercial First” approach is based on the principle that all DNDO programs will first engage the private sector for solutions to address the gaps identified in the GNDA. There are several “Commercial First” pathways that a program can follow depending on the defined gap and the technical maturity and commercial availability of potential materiel solutions that may be able to address that gap. These pathways include:

- Commercial-Off-the-Shelf (COTS)
- Customized COTS – COTS modified by the government or Industry partner
- Commercialization (e.g. Commercial Development) — Industry-developed solutions using Industry internal Research and Development funding
- Government-Sponsored Development

In concert with the end user community and in keeping with this “Commercial First” approach for acquisitions, DNDO first attempts to identify commercially available equipment to meet its requirements. DNDO continues to foster open communications with industry partners to share key aspects of future requirements and projected quantities of planned procurements.

The DNDO Systems Acquisition (SA) request includes resources to procure and deploy fixed site radiation detections systems at ports of entry (POE), to support State and local nuclear detection operations through the Securing the Cities (STC) Program, and to provide Federal, State, and local law enforcement and emergency response communities with human portable radiation detection capabilities.

B. Budget Activities:

Radiation Portal Monitor Program (RPMP)

At the U.S. land border, the USG has full control over detection and interdiction operations, presenting unique opportunities for interdicting rad/nuc materials and threats. After 9/11, concern was raised about the possibility that terrorists could use the enormous volume of cargo flowing into the U.S. as a pathway for bringing in nuclear material or a nuclear weapon. As such, starting in 2002, significant effort and resources have been placed at U.S. land and sea POEs under the cognizance of CBP. In 2006, the RPMP acquisition responsibilities were subsequently transferred to DNDO while operations and maintenance functions were retained by CBP. DNDO’s mission, in part, was to deploy monitoring equipment at U.S. POEs and provide the scientific and technical expertise to design, acquire, and deploy these systems. Additionally, in the SAFE Port Act of 2006, Congress mandated that all containers coming into the U.S. through the 22 highest volume seaports be scanned for radiation. To address this mandate, DNDO has acquired and, in accordance with CBP priorities, deployed COTS polyvinyl toluene (PVT) RPMs as defined in a joint DNDO/CBP deployment strategy.

The FY 2014 budget request will provide funding to support front-line operational rad/nuc detection capability needs for CBP as follows:

- Continue to work with CBP to prioritize fixed rad/nuc detection equipment deployment and effectively manage inventory; and
- Provide support for site reconfigurations with deployment of portal monitors consistent with the Program Execution Plan.

Securing the Cities Program

The STC Program is the cornerstone of rad/nuc detection capability development within the domestic layer of the GNDA. The program seeks to assist State, local, and tribal stakeholders to design and implement or enhance existing architectures for coordinated and integrated detection and interdiction of nuclear materials out of regulatory control within high-threat, high-density urban areas. The New York City (NYC) region includes two major metropolitan areas (NYC and Jersey City/Newark) and was the first to participate in this initiative. The FY 2014 Budget continues an emphasis on supporting State and local rad/nuc detection operations through a three-phased STC Program. This three-phase approach will provide for the implementation of rad/nuc detection capabilities in select high-threat, high-density urban areas. The three program phases are described below.

Phase I

DNDO provides a mechanism for cities to develop an initial operating capability to detect and report the presence of nuclear materials that are out of regulatory control. This capability utilizes detection equipment, protocols, and personnel and is integrated into and supports the GNDA. During Phase I, efforts will focus on satisfying the immediate needs of State and local agencies in developing baseline detection and reporting capabilities. DNDO will provide resources allowing partners an increased understanding and awareness of the nuclear threat, enhanced regional capabilities to detect and interdict nuclear threats, and increased cooperation and coordination among regional jurisdictions and agencies. Initial capabilities include development of CONOPS and alarm adjudication protocols, deployment of equipment, training and exercise support, and technical program assistance. Phase I concludes when the region establishes a nuclear detection program encompassing coordinated operations, self-delivered nuclear detection training and exercise capabilities, and a plan in place to sustain the program over time in support of the GNDA.

Phase II

DNDO provides additional resources to allow development of enhanced detection, analysis, communication, and coordination functionality and builds on the integration of State and local capabilities with USG activities and the GNDA that previously existed or was established during Phase I. In this phase, the USG will leverage capabilities established locally in Phase I to partner with State and local jurisdictions to ensure a national coordinated response in support of the GNDA. In addition, DNDO will work with the STC partners to define end states for DNDO direct support to State and local activities. Phase II concludes when region successfully demonstrates its ability to integrate into a national nuclear detection framework in support of the GNDA. Cities may also use DHS homeland security grant funds in support of the activities under Phase II.

Phase III

DNDO provides indirect support to sustain the program. DNDO will maintain connectivity with the established local architecture through alarm adjudication and subject matter expertise to provide advice on training, exercise, and other program support. State and local participants will maintain and continue to improve their developed capabilities to support the GNDA using local funds or other Federal government grant funds.

STC aims to produce information linkages between implementation sites in support of a comprehensive national security layer. A multi-year engagement is needed for each high-threat, high-density Urban Area Security Initiative region to implement all phases, depending on the complexity and individual needs of the area.

STC efforts in the NYC area have resulted in the development of a robust detection architecture allowing DNDO to realize significant efficiencies as it supports future metropolitan areas.

Human Portable Radiation Detection Systems (HPRDS)

Federal, State, and local law enforcement entities that conduct routine and contingency rad/nuc detection missions require human portable radiation detection capability. DNDO procures rad/nuc detection and identification equipment on behalf of DHS Components and for the Mobile Detection Deployment Program which supports specific events by supplementing state and local law enforcement agency capabilities. The HPRDS program consists of several projects supporting multiple users whose primary mission is to detect and identify rad/nuc threats. The objectives of the HPRDS program are to provide more capable systems, expand the range of activities, and address different types of conveyances and cargo to be scanned for rad/nuc material. The HPRDS PPA supports the procurement of multiple types of equipment, including Radio-Isotope Identification Devices (RIID), Personal Radiation Detectors (PRD), and radiation detection backpacks for CBP, USCG, and TSA's Visible Intermodal Prevention and Response (VIPR) teams; procurement of equipment for the Mobile Detection Deployment Program to provide a surge capability in support of rad/nuc detection operations; the Helium-3 (^3He) Gas Procurement for Legacy Neutron Detectors Project; the HPRDS Wide Area Search, the Human Portable Tripwire (HPT), and the Small Vessel Standoff Detection (SVSD) programs.

Both the HPT and SVSD programs are leveraging the commercial marketplace to maximize the use of commercially available products. Using the guidelines and methods documented in DNDO's Acquisition and Commercial Engagement Strategy, both programs are using this "Commercial First" approach to address gaps identified in the GNDA. Specifically, the HPT program's goal is to identify and procure devices that will increase the probability of detecting rad/nuc material through constant, non-deliberate scanning during normal law enforcement operations. The SVSD program's goal is to identify and procure a solution that will improve the efficiency of scanning vessels of less than 300 gross tons by providing equipment to conduct standoff detection operations.

The FY 2014 budget request will provide funding to partially fulfill front-line operational rad/nuc detection capability needs for the USCG, CBP, and TSA by procuring commercial technologies such as advanced and basic handheld RIIDs, PRDs, backpack systems, and HPT systems.

C. Budget Request Summary:

DNDO requests \$42.6 million in FY 2014 funding for the SA appropriation.

III. Current Services Program Description by PPA

**Department of Homeland Security
Domestic Nuclear Detection Office
Systems Acquisition
Radiation Portal Monitor Program
Program Performance Justification
(Dollars in Thousands)**

PPA: Radiation Portal Monitor Program

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2012 Revised Enacted	-	-	1,500
2014 Adjustments-to-Base	-	-	5,500
2014 Current Services	-	-	7,000
2014 Total Request	-	-	7,000
Total Change 2012 to 2014	-	-	5,500

DNDO requests \$7.0 million in FY 2014 for this activity.

Adjustments-to-Base include:

- Decrease of \$0.029 million for WCF
- Increase of \$5.5 million as an adjustment to account for funds transfer to HPRDS in FY 2012
- Increase of \$0.029 million for non-recurring technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

The RPMP was established in January 2002 with the objective of deploying RPM systems at U.S. POEs and providing the scientific and technical expertise needed to design, acquire, deploy, and effectively maintain and operate RPM systems. This effort is part of the DHS multilayered strategy to keep U.S. ports safe and secure by interdicting illicit rad/nuc materials.

Program funds are used to support CBP's efforts to maintain scanning coverage at previously completed POEs (e.g. sustainment of existing POEs). As POEs are reconfigured, RPMs must be relocated, decommissioned, and/or additional RPM systems must be deployed to maintain current scanning capabilities.

QHSR Strategic Alignment - RPMP

- DHS Quadrennial Homeland Security Review (QHSR) Mission 1, Preventing Terrorism and Enhancing Security
 - Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities
 - Objective 1.2.3: Control Movement of CBRN
 - Objective 1.2.4: Protection Against Hostile Use of CBRN

RADIATION PORTAL MONITOR PROGRAM

Historically, the RPMP has been the source of funding for the acquisition and deployment of RPMs at U.S. land and sea POEs. DNDO will continue to manage the deployment of the remaining PVT systems in its inventory and will deploy selected improvements that have been projected to enhance operational or threat detection performance to fielded systems in FY 2014.

**Department of Homeland Security
Domestic Nuclear Detection Office
Systems Acquisition:
Securing the Cities
Program Performance Justification**

Total Change 2012 to 2014	-	-	0

DNDO requests \$22.0 million in FY 2014 for this activity.

Adjustments-to-Base include:

- Decrease of \$0.09 million for WCF
- Increase of \$0.09 million for non-recurring technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

The STC Program seeks to assist State, local, and tribal stakeholders to design and implement or enhance existing architectures for coordinated and integrated detection and interdiction of rad/nuc materials out of regulatory control within high-threat, high-density urban areas.

QHSR Strategic Alignment – Securing the Cities

- DHS QHSR Mission 1, Preventing Terrorism and Enhancing Security
 - Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities
 - Objective 1.2.3: Control Movement of CBRN
 - Objective 1.2.4: Protection Against Hostile Use of CBRN

SECURING THE CITIES PROGRAM

The STC program is a multi-year rad/nuc detection capability development program. First year activities include planning and evaluation to determine the most critical detection needs within the area. The second and third years focus on phased capability development and implementation, executed through financial support for equipment, training, exercises, and program management. Cities may also use DHS homeland security grant funds for some of these items. The fourth and fifth years continue with training and exercises, emphasizing the area's ability to surge and integrate with Federal rad/nuc detection capabilities. The phased strategy enables DNDO to provide Federal assistance to multiple areas simultaneously while expanding capabilities to further implement the domestic component of the GNDA.

Throughout STC's implementation in the NYC area, assessments of the program's effectiveness in building capabilities were conducted. An interim report published in September 2008 described the business model. A second interim report was completed in January 2011 and focused on evaluating the program as implemented in the NYC area. Two other assessments were completed: an independent assessment of STC completed in April 2011 and an assessment of the April 2011 full-scale exercise completed in October 2011. These reports assessed Phase I and II activities in NYC and indicated the STC program has succeeded in developing a robust area-wide detection program focused on preventing a rad/nuc attack on the NYC region.

In FY 2012, the STC program initiated the Phase I planning and evaluation activities for the Los Angeles/Long Beach area to determine the most critical detection needs within the area.

Implementations in both the NYC and Los Angeles areas have resulted in the development of a robust, repeatable development model allowing DNDO to realize significant efficiencies as it supports future metropolitan areas. Funding for this program will continue to be used to procure, integrate, deploy, test, evaluate, train, and exercise multi-layer, multi-pathway, multi-jurisdiction rad/nuc detection and reporting architectures. Funds will be allocated to ensure detection capabilities are integrated with Federal, State, and local command, control, and communication systems. State and local partners will provide in-kind resources by bearing operational costs. Funds will also be used for logistics, maintenance, and calibration costs as well as personnel costs to support the training necessary to operate detection equipment and conduct operational exercises. DNDO will work with State and local partners to budget appropriately for the long-term sustainability of capabilities implemented under this program.

DNDO SA funds are disbursed under the STC program through competitively awarded cooperative agreements to the State and local agencies participating in the STC program.

Established STC Program tools include the Program Plan, Implementation Plan, Lifecycle Cost Estimate, and the Sustainment Plan. DNDO tools to assist STC implementation include:

- Preventive Radiological/Nuclear Detection Community of Interest website on the Homeland Security Information Network
- Preventive Radiological/Nuclear Detection and Adjudication Capability Development Framework and Calculator

- Preventive Radiological/Nuclear Detection National Incident Management System Resource Typing

Total Change 2012 to 2014	-	-	100

DNDO requests \$13.6 million in FY 2014 for this activity.

Adjustments-to-Base include:

- Decrease of \$5.5 million as an adjustment to account for funds transfer from RPMP in FY 2012
- Decrease of \$0.033 million for WCF
- Increase of \$0.081 million for non-recurring technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

Under the HPRDS PPA, DNDO procures multiple types of rad/nuc detection and identification equipment on behalf of DHS Components and for specific events supplementing State and local law enforcement agency capabilities. The HPRDS program consists of several projects supporting multiple users whose mission is to detect and identify rad/nuc threats. The objectives of the HPRDS program are to provide more capable systems, expand the range of activities, and address different types of conveyances and cargo to be scanned for rad/nuc material. These systems are relatively light, easy to use, and of sufficiently low cost to support widespread deployment. Projects include all human portable radiation detection devices that can be worn, carried, or moved by a person. The devices procured under the HPRDS program are fully developed and most are commercially available.

QHSR Strategic Alignment –HPRDS

- DHS QHSR Mission 1, Preventing Terrorism and Enhancing Security
 - Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities
 - Objective 1.2.3: Control Movement of CBRN
 - Objective 1.2.4: Protection Against Hostile Use of CBRN

HPRDS ACQUISITION PROGRAM

DNDO procures multiple types of human portable equipment for DHS Operational Components (CBP, USCG, and TSA). This equipment includes handheld RIIDs, PRDs, rad/nuc detection backpacks, and other boat-to-boat detection equipment pending results of SVSD analysis.

Customs and Border Protection Joint Acquisition Strategy (JAS) Project

Per the cooperatively developed JAS, DNDO coordinates with CBP for the deployment of human portable systems for CBP officers and agents to scan people, cargo, and privately owned vehicles at and between POEs. DNDO will continue to deploy next generation RIIDs after the successful initiation of a five-year procurement contract in FY 2013. The procurement of COTS PRDs will continue in FY 2014 while evaluation of next-generation solutions for operational suitability is conducted.

U.S. Coast Guard Joint Acquisition Strategy Project

Per the cooperatively developed JAS, DNDO procures rad/nuc detection systems to satisfy USCG requirements. Required equipment includes PRDs, RIIDs, Linear and Handheld Radiation Monitors, and backpack systems. In addition to these requirements, DNDO may also purchase equipment for the HPT and/or boat-to-boat detection missions in FY 2014 (pending the results of these systems development efforts and funding availability).

Transportation Security Administration

DNDO supports the needs of TSA VIPR teams for rad/nuc detection equipment by providing teams with PRDs, handheld RIIDS, and radiation detection backpacks. HPRDS funds would be used to sustain - in terms of lifecycle replenishment - the equipment of the existing VIPR teams and to begin outfitting additional VIPR teams with rad/nuc detection equipment in FY 2014.

Helium-3 Gas Procurement for Legacy Neutron Detectors Project

DNDO plans to acquire approximately 50 liters of ³He in FY 2014 to ensure that DHS has the gas required to execute its mission during the transition to alternative technologies. ³He is released for use when authorized by the ³He Sub-Interagency Policy Committee.

The ³He Mitigation Program is currently identifying technologies that may replace legacy neutron detectors acquired by CBP, TSA, and USCG. Beginning in FY 2014, ³He will be procured for systems

that have not transitioned away from ^3He . This requirement is expected to decline when alternative technologies become available for HPRDS.

IV. Program Justification Changes

**Department of Homeland Security
Domestic Nuclear Detection Office
Systems Acquisition
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Human Portable Radiation Detection Systems
PPA: Human Portable Radiation Detection Systems
Program Increase: Positions 0, FTE 0, Dollars \$5,552

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	8,048
Program Increase							-	-	5,552
Total Request	-	-	13,500	-	-	8,049	-	-	13,600

Total Program Change \$5.552M

Description of Item

The HPRDS PPA supports the procurement of multiple types of equipment including RIIDs, PRDs, and radiation detection backpacks for CBP, USCG, and TSA’s VIPR teams; procurement of equipment for the Mobile Detection Deployment Program to provide a surge capability in support of rad/nuc detection operations; the He³ Shortage Acquisition Program; and the HPT, and SVSD programs. HPT devices will increase the probability of detecting and identifying rad/nuc material through constant non-deliberate scanning during normal law enforcement operations. Because HPT devices will be worn at all times, they will also function as personal protective equipment, providing personnel with warnings when exposed to potentially harmful levels of radiation. The SVSD solution will provide radiation detection capability to DHS maritime assets to protect major U.S. population centers and critical infrastructure from “direct-to-target” threats from rad/nuc weapons. SVSD will improve the efficiency of scanning vessels of less than 300 tons by providing equipment to conduct standoff detection operations.

Justification

The funding increase of \$5.6 million in the HPRDS PPA supports the acquisition of next generation handheld nuclear detection equipment to DHS front-line operations that began in FY 2011, as well as supports HPT, SVSD, and other programs.

As the designated Executive Agent for Strategic Sourcing of Handheld Radiation Detection (HRD) devices and PRDs for DHS, the HPRDS program is currently conducting an acquisition to address end-user operational requirements for rad/nuc detection and identification devices. The outcome of this acquisition for basic handheld RIID will determine the types and quantities of devices to be acquired.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested program increase in HPRDS will be targeted to address the most pressing requirements and field a mix of devices addressing the areas of highest vulnerabilities in the GNDA and needs of our operational partners.

The funding will enable DNDO to:

- Procure additional next-generation basic handheld RIIDS shortening the recapitalization plan for CBP by approximately one year;
- Acquire 80 percent more detection equipment for USCG;
- Continue to deploy Boat-to-Boat scanning capability for CBP & USCG; and
- Acquire HPT solution.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For expenses for the Domestic Nuclear Detection Office acquisition and deployment of detection systems in accordance with the global nuclear detection architecture, [\$51,455,000] \$42,600,000¹, to remain available until September 30, 2016.

Explanation of Changes:

¹Dollar change only. No substantive changes proposed.

Radiation Portal Monitor Program Mission Statement

The Radiation Portal Monitor (RPM) Program was established at CBP in January 2002 with the objective of deploying RPMs at ports of entry (POEs) and providing the scientific and technical expertise to design, acquire, deploy, operate and maintain these systems. In 2005, DNDO assumed the responsibility of designing, acquiring and deploying the systems, and it has established a Ports of Entry program to work with CBP to bring the latest technology to bear on the threat of illicit nuclear materials crossing our borders. This program procures equipment to meet the needs of end-users, in accordance with the Global Nuclear Detection Architecture (GNDA). The RPMP was established with the objectives of deploying RPMs at United States ports of entry (POEs), and providing the scientific and technical expertise to design, acquire, and deploy these systems. As the Department of Homeland Security (DHS) works to keep the major seaports and northern and southwest land borders safe using radiological/nuclear (rad/nuc) detection capabilities, the Domestic Nuclear Detection Office (DNDO) continues to address the vulnerabilities in other locations and pathways.

Securing the Cities Mission Statement

The objective of the Securing the Cities (STC) initiative is to reduce the risk of a radiological or nuclear attack in high-risk metropolitan areas by enhancing regional capabilities to detect and interdict radiological material out of regulatory control. This initiative was initiated in the New York City (NYC region). Acquisition funds were utilized to procure, integrate, deploy, test, evaluate, train, and exercise a multi-layer, multi-pathway, multi-jurisdiction nuclear detection and reporting architecture for the region. Funds were also allocated to ensure that detection capabilities are integrated with Federal, State, and local command, control, and communication systems. State and local partners provided in-kind resources by bearing operational costs. Funds were also used for logistics, maintenance, and calibration costs as well as personnel costs to support the training necessary to operate detection equipment and conduct operational exercises. DNDO Systems Acquisition funds are dispersed under the STC program through competitively awarded Cooperative Agreements to the state and local agencies participating in the STC program.

Human Portable Radiation Detection Systems Mission Statement

DNDO procures multiple types of equipment that provide Department of Homeland Security (DHS) components, and in some cases, law enforcement and first responders with effective human portable systems for radiological/nuclear (rad/nuc) detection and identification. These solutions are used for detecting, localizing, and identifying rad/nuc materials, and they are relatively light, easy to use, and of sufficiently low cost to support widespread deployment. The objectives of the HPRDS project are to expand the range of activities and address different types of conveyances and cargo to be scanned for rad/nuc material. Projects include all human portable radiation detection devices that can be worn, carried, or moved by an individual. The devices are fully developed and most are commercially available.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$120	\$120	\$799	\$679

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request is \$799,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$75	\$75	0	(\$75)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request is \$0.

BUDGET REQUEST AND SUPPORTING INFORMATION

Domestic Nuclear Detection Office Systems Acquisition

I. Appropriation Overview

A. Mission Statement for Systems Acquisition:

The Domestic Nuclear Detection Office (DNDO) was established by National Security Presidential Directive (NSPD)-43/Homeland Security Presidential Directive (HSPD)-14 to protect against radiological and nuclear (rad/nuc) threats directed against the United States or its interests. Title V of the Security and Accountability for Every Port Act of 2006 (SAFE Port Act, P.L. 109-347) directs DNDO to “serve as the primary entity of the United States Government (USG) to further develop, acquire, and support the deployment of an enhanced domestic system to detect and report on attempts to import, possess, store, transport, develop, or use an unauthorized nuclear explosive device, fissile material, or radiological material in the United States, and improve that system over time.”

To fulfill the mandates of the authorizing legislation, DNDO’s activities are focused on developing a Global Nuclear Detection Architecture (GNDA) and implementing the domestic component. The GNDA strengthens prevention and deterrence by detecting radiological and nuclear materials that are out of regulatory control.¹ DNDO has been charged with coordinating the development of the GNDA among the USG partners.

In December 2010, DNDO delivered the GNDA Strategic Plan 2010 to Congress. This interagency product is designed to guide the Nation’s nuclear terrorism detection capacity and capability development over the next five years. The GNDA incorporates detector systems, telecommunications, and personnel with the supporting information exchanges, programs, and protocols that serve to detect, analyze, communicate, and coordinate on rad/nuc materials that are out of regulatory control. We seek to make nuclear terrorism prohibitively difficult for our adversaries through the acquisition of an adaptable and agile detection architecture that can readily surge in response to intelligence cues.

DNDO acquires rad/nuc detection equipment for other Department of Homeland Security (DHS) Components, including the U.S. Coast Guard (USCG), U.S. Customs and Border Protection (CBP), and the Transportation Security Administration (TSA). DNDO also issues cooperative agreements under the Securing the Cities (STC) Program, supporting State, local, and tribal authorities in the development of nuclear detection capabilities for high-threat, high-density urban areas. All deployed technologies for Federal, State, local, and tribal, partners are accompanied by the appropriate concepts of operations (CONOPS), training, exercises, and alarm response protocols.

Recognizing the rapid advancement of technology and innovation, constrained budgets, and market forces, DNDO has shifted focus from government-sponsored development of materiel solutions to a

¹ The term “out of regulatory control” refers to materials that are being imported, possessed, stored, transported, developed, or used without authorization of the appropriate regulatory authority, either inadvertently or deliberately.

“Commercial First” approach. To address gaps identified in the GNDA and by using a “Commercial First” approach, DNDO can leverage important industry-led innovations and technologies.

The “Commercial First” approach is based on the principle that all DNDO programs will first engage the private sector for solutions to address the gaps identified in the GNDA. There are several “Commercial First” pathways that a program can follow depending on the defined gap and the technical maturity and commercial availability of potential materiel solutions that may be able to address that gap. These pathways include:

- Commercial-Off-the-Shelf (COTS)
- Customized COTS – COTS modified by the government or Industry partner
- Commercialization (e.g. Commercial Development) — Industry-developed solutions using Industry internal Research and Development funding
- Government-Sponsored Development

In concert with the end user community and in keeping with this “Commercial First” approach for acquisitions, DNDO first attempts to identify commercially available equipment to meet its requirements. DNDO continues to foster open communications with industry partners to share key aspects of future requirements and projected quantities of planned procurements.

The DNDO Systems Acquisition (SA) request includes resources to procure and deploy fixed site radiation detections systems at ports of entry (POE), to support State and local nuclear detection operations through the Securing the Cities (STC) Program, and to provide Federal, State, and local law enforcement and emergency response communities with human portable radiation detection capabilities.

B. Budget Activities:

Radiation Portal Monitor Program (RPMP)

At the U.S. land border, the USG has full control over detection and interdiction operations, presenting unique opportunities for interdicting rad/nuc materials and threats. After 9/11, concern was raised about the possibility that terrorists could use the enormous volume of cargo flowing into the U.S. as a pathway for bringing in nuclear material or a nuclear weapon. As such, starting in 2002, significant effort and resources have been placed at U.S. land and sea POEs under the cognizance of CBP. In 2006, the RPMP acquisition responsibilities were subsequently transferred to DNDO while operations and maintenance functions were retained by CBP. DNDO’s mission, in part, was to deploy monitoring equipment at U.S. POEs and provide the scientific and technical expertise to design, acquire, and deploy these systems. Additionally, in the SAFE Port Act of 2006, Congress mandated that all containers coming into the U.S. through the 22 highest volume seaports be scanned for radiation. To address this mandate, DNDO has acquired and, in accordance with CBP priorities, deployed COTS polyvinyl toluene (PVT) RPMs as defined in a joint DNDO/CBP deployment strategy.

The FY 2014 budget request will provide funding to support front-line operational rad/nuc detection capability needs for CBP as follows:

- Continue to work with CBP to prioritize fixed rad/nuc detection equipment deployment and effectively manage inventory; and
- Provide support for site reconfigurations with deployment of portal monitors consistent with the Program Execution Plan.

Securing the Cities Program

The STC Program is the cornerstone of rad/nuc detection capability development within the domestic layer of the GNDA. The program seeks to assist State, local, and tribal stakeholders to design and implement or enhance existing architectures for coordinated and integrated detection and interdiction of nuclear materials out of regulatory control within high-threat, high-density urban areas. The New York City (NYC) region includes two major metropolitan areas (NYC and Jersey City/Newark) and was the first to participate in this initiative. The FY 2014 Budget continues an emphasis on supporting State and local rad/nuc detection operations through a three-phased STC Program. This three-phase approach will provide for the implementation of rad/nuc detection capabilities in select high-threat, high-density urban areas. The three program phases are described below.

Phase I

DNDO provides a mechanism for cities to develop an initial operating capability to detect and report the presence of nuclear materials that are out of regulatory control. This capability utilizes detection equipment, protocols, and personnel and is integrated into and supports the GNDA. During Phase I, efforts will focus on satisfying the immediate needs of State and local agencies in developing baseline detection and reporting capabilities. DNDO will provide resources allowing partners an increased understanding and awareness of the nuclear threat, enhanced regional capabilities to detect and interdict nuclear threats, and increased cooperation and coordination among regional jurisdictions and agencies. Initial capabilities include development of CONOPS and alarm adjudication protocols, deployment of equipment, training and exercise support, and technical program assistance. Phase I concludes when the region establishes a nuclear detection program encompassing coordinated operations, self-delivered nuclear detection training and exercise capabilities, and a plan in place to sustain the program over time in support of the GNDA.

Phase II

DNDO provides additional resources to allow development of enhanced detection, analysis, communication, and coordination functionality and builds on the integration of State and local capabilities with USG activities and the GNDA that previously existed or was established during Phase I. In this phase, the USG will leverage capabilities established locally in Phase I to partner with State and local jurisdictions to ensure a national coordinated response in support of the GNDA. In addition, DNDO will work with the STC partners to define end states for DNDO direct support to State and local activities. Phase II concludes when region successfully demonstrates its ability to integrate into a national nuclear detection framework in support of the GNDA. Cities may also use DHS homeland security grant funds in support of the activities under Phase II.

Phase III

DNDO provides indirect support to sustain the program. DNDO will maintain connectivity with the established local architecture through alarm adjudication and subject matter expertise to provide advice on training, exercise, and other program support. State and local participants will maintain and continue to improve their developed capabilities to support the GNDA using local funds or other Federal government grant funds.

STC aims to produce information linkages between implementation sites in support of a comprehensive national security layer. A multi-year engagement is needed for each high-threat, high-density Urban Area Security Initiative region to implement all phases, depending on the complexity and individual needs of the area.

STC efforts in the NYC area have resulted in the development of a robust detection architecture allowing DNDO to realize significant efficiencies as it supports future metropolitan areas.

Human Portable Radiation Detection Systems (HPRDS)

Federal, State, and local law enforcement entities that conduct routine and contingency rad/nuc detection missions require human portable radiation detection capability. DNDO procures rad/nuc detection and identification equipment on behalf of DHS Components and for the Mobile Detection Deployment Program which supports specific events by supplementing state and local law enforcement agency capabilities. The HPRDS program consists of several projects supporting multiple users whose primary mission is to detect and identify rad/nuc threats. The objectives of the HPRDS program are to provide more capable systems, expand the range of activities, and address different types of conveyances and cargo to be scanned for rad/nuc material. The HPRDS PPA supports the procurement of multiple types of equipment, including Radio-Isotope Identification Devices (RIID), Personal Radiation Detectors (PRD), and radiation detection backpacks for CBP, USCG, and TSA's Visible Intermodal Prevention and Response (VIPR) teams; procurement of equipment for the Mobile Detection Deployment Program to provide a surge capability in support of rad/nuc detection operations; the Helium-3 (^3He) Gas Procurement for Legacy Neutron Detectors Project; the HPRDS Wide Area Search, the Human Portable Tripwire (HPT), and the Small Vessel Standoff Detection (SVSD) programs.

Both the HPT and SVSD programs are leveraging the commercial marketplace to maximize the use of commercially available products. Using the guidelines and methods documented in DNDO's Acquisition and Commercial Engagement Strategy, both programs are using this "Commercial First" approach to address gaps identified in the GNDA. Specifically, the HPT program's goal is to identify and procure devices that will increase the probability of detecting rad/nuc material through constant, non-deliberate scanning during normal law enforcement operations. The SVSD program's goal is to identify and procure a solution that will improve the efficiency of scanning vessels of less than 300 gross tons by providing equipment to conduct standoff detection operations.

The FY 2014 budget request will provide funding to partially fulfill front-line operational rad/nuc detection capability needs for the USCG, CBP, and TSA by procuring commercial technologies such as advanced and basic handheld RIIDs, PRDs, backpack systems, and HPT systems.

C. Budget Request Summary:

DNDO requests \$42.6 million in FY 2014 funding for the SA appropriation.

¹The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.

² The FY 2013 column excludes funding from the FY 2013 Disaster Relief Supplemental.

III. Current Services Program Description by PPA

Department of Homeland Security
Domestic Nuclear Detection Office
Systems Acquisition
Radiation Portal Monitor Program
Program Performance Justification
 (Dollars in Thousands)

PPA: Radiation Portal Monitor Program

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	1,500
2014 Adjustments-to-Base	-	-	5,500
2014 Current Services	-	-	7,000
2014 Total Request	-	-	7,000
Total Change 2012 to 2014	-	-	5,500

DNDO requests \$7.0 million in FY 2014 for this activity.

Adjustments-to-Base include:

- Decrease of \$0.029 million for WCF
- Increase of \$5.5 million as an adjustment to account for funds transfer to HPRDS in FY 2012
- Increase of \$0.029 million for non-recurring technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

The RPMP was established in January 2002 with the objective of deploying RPM systems at U.S. POEs and providing the scientific and technical expertise needed to design, acquire, deploy, and effectively maintain and operate RPM systems. This effort is part of the DHS multilayered strategy to keep U.S. ports safe and secure by interdicting illicit rad/nuc materials.

Program funds are used to support CBP's efforts to maintain scanning coverage at previously completed POEs (e.g. sustainment of existing POEs). As POEs are reconfigured, RPMs must be relocated, decommissioned, and/or additional RPM systems must be deployed to maintain current scanning capabilities.

QHSR Strategic Alignment - RPMP

- DHS Quadrennial Homeland Security Review (QHSR) Mission 1, Preventing Terrorism and Enhancing Security
 - Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities
 - Objective 1.2.3: Control Movement of CBRN
 - Objective 1.2.4: Protection Against Hostile Use of CBRN

RADIATION PORTAL MONITOR PROGRAM

Historically, the RPMP has been the source of funding for the acquisition and deployment of RPMs at U.S. land and sea POEs. DNDO will continue to manage the deployment of the remaining PVT systems in its inventory and will deploy selected improvements that have been projected to enhance operational or threat detection performance to fielded systems in FY 2014.

**Department of Homeland Security

Total Change 2012 to 2014	-	-	0

DNDO requests \$22.0 million in FY 2014 for this activity.

Adjustments-to-Base include:

- Decrease of \$0.09 million for WCF
- Increase of \$0.09 million for non-recurring technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

The STC Program seeks to assist State, local, and tribal stakeholders to design and implement or enhance existing architectures for coordinated and integrated detection and interdiction of rad/nuc materials out of regulatory control within high-threat, high-density urban areas.

QHSR Strategic Alignment – Securing the Cities

- DHS QHSR Mission 1, Preventing Terrorism and Enhancing Security
 - Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities
 - Objective 1.2.3: Control Movement of CBRN
 - Objective 1.2.4: Protection Against Hostile Use of CBRN

SECURING THE CITIES PROGRAM

The STC program is a multi-year rad/nuc detection capability development program. First year activities include planning and evaluation to determine the most critical detection needs within the area. The second and third years focus on phased capability development and implementation, executed through financial support for equipment, training, exercises, and program management. Cities may also use DHS homeland security grant funds for some of these items. The fourth and fifth years continue with training and exercises, emphasizing the area's ability to surge and integrate with Federal rad/nuc detection capabilities. The phased strategy enables DNDO to provide Federal assistance to multiple areas simultaneously while expanding capabilities to further implement the domestic component of the GNDA.

Throughout STC's implementation in the NYC area, assessments of the program's effectiveness in building capabilities were conducted. An interim report published in September 2008 described the business model. A second interim report was completed in January 2011 and focused on evaluating the program as implemented in the NYC area. Two other assessments were completed: an independent assessment of STC completed in April 2011 and an assessment of the April 2011 full-scale exercise completed in October 2011. These reports assessed Phase I and II activities in NYC and indicated the STC program has succeeded in developing a robust area-wide detection program focused on preventing a rad/nuc attack on the NYC region.

In FY 2012, the STC program initiated the Phase I planning and evaluation activities for the Los Angeles/Long Beach area to determine the most critical detection needs within the area.

Implementations in both the NYC and Los Angeles areas have resulted in the development of a robust, repeatable development model allowing DNDO to realize significant efficiencies as it supports future metropolitan areas. Funding for this program will continue to be used to procure, integrate, deploy, test, evaluate, train, and exercise multi-layer, multi-pathway, multi-jurisdiction rad/nuc detection and reporting architectures. Funds will be allocated to ensure detection capabilities are integrated with Federal, State, and local command, control, and communication systems. State and local partners will provide in-kind resources by bearing operational costs. Funds will also be used for logistics, maintenance, and calibration costs as well as personnel costs to support the training necessary to operate detection equipment and conduct operational exercises. DNDO will work with State and local partners to budget appropriately for the long-term sustainability of capabilities implemented under this program.

DNDO SA funds are disbursed under the STC program through competitively awarded cooperative agreements to the State and local agencies participating in the STC program.

Established STC Program tools include the Program Plan, Implementation Plan, Lifecycle Cost Estimate, and the Sustainment Plan. DNDO tools to assist STC implementation include:

- Preventive Radiological/Nuclear Detection Community of Interest website on the Homeland Security Information Network

- Preventive Radiological/Nuclear Detection and Adjudication Capability Development Framework and Calculator
- Preventive Radiological/Nuclear Detection National Incident Management System Resource Typing

2014 Program Change	-	-	5,552
2014 Total Request	-	-	13,600
Total Change 2012 to 2014	-	-	100

DNDO requests \$13.6 million in FY 2014 for this activity.

Adjustments-to-Base include:

- Decrease of \$5.5 million as an adjustment to account for funds transfer from RPMP in FY 2012
- Decrease of \$0.033 million for WCF
- Increase of \$0.081 million for non-recurring technical adjustment

CURRENT SERVICES PROGRAM DESCRIPTION:

Under the HPRDS PPA, DNDO procures multiple types of rad/nuc detection and identification equipment on behalf of DHS Components and for specific events supplementing State and local law enforcement agency capabilities. The HPRDS program consists of several projects supporting multiple users whose mission is to detect and identify rad/nuc threats. The objectives of the HPRDS program are to provide more capable systems, expand the range of activities, and address different types of conveyances and cargo to be scanned for rad/nuc material. These systems are relatively light, easy to use, and of sufficiently low cost to support widespread deployment. Projects include all human portable radiation detection devices that can be worn, carried, or moved by a person. The devices procured under the HPRDS program are fully developed and most are commercially available.

QHSR Strategic Alignment –HPRDS

- DHS QHSR Mission 1, Preventing Terrorism and Enhancing Security
 - Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities
 - Objective 1.2.3: Control Movement of CBRN
 - Objective 1.2.4: Protection Against Hostile Use of CBRN

HPRDS ACQUISITION PROGRAM

DNDO procures multiple types of human portable equipment for DHS Operational Components (CBP, USCG, and TSA). This equipment includes handheld RIIDs, PRDs, rad/nuc detection backpacks, and other boat-to-boat detection equipment pending results of SVSD analysis.

Customs and Border Protection Joint Acquisition Strategy (JAS) Project

Per the cooperatively developed JAS, DNDO coordinates with CBP for the deployment of human portable systems for CBP officers and agents to scan people, cargo, and privately owned vehicles at and between POEs. DNDO will continue to deploy next generation RIIDs after the successful initiation of a five-year procurement contract in FY 2013. The procurement of COTS PRDs will continue in FY 2014 while evaluation of next-generation solutions for operational suitability is conducted.

U.S. Coast Guard Joint Acquisition Strategy Project

Per the cooperatively developed JAS, DNDO procures rad/nuc detection systems to satisfy USCG requirements. Required equipment includes PRDs, RIIDs, Linear and Handheld Radiation Monitors, and backpack systems. In addition to these requirements, DNDO may also purchase equipment for the HPT and/or boat-to-boat detection missions in FY 2014 (pending the results of these systems development efforts and funding availability).

Transportation Security Administration

DNDO supports the needs of TSA VIPR teams for rad/nuc detection equipment by providing teams with PRDs, handheld RIIDS, and radiation detection backpacks. HPRDS funds would be used to sustain - in terms of lifecycle replenishment - the equipment of the existing VIPR teams and to begin outfitting additional VIPR teams with rad/nuc detection equipment in FY 2014.

Helium-3 Gas Procurement for Legacy Neutron Detectors Project

DNDO plans to acquire approximately 50 liters of ³He in FY 2014 to ensure that DHS has the gas required to execute its mission during the transition to alternative technologies. ³He is released for use when authorized by the ³He Sub-Interagency Policy Committee.

The ³He Mitigation Program is currently identifying technologies that may replace legacy neutron detectors acquired by CBP, TSA, and USCG. Beginning in FY 2014, ³He will be procured for systems

that have not transitioned away from ^3He . This requirement is expected to decline when alternative technologies become available for HPRDS.

IV. Program Justification Changes

**Department of Homeland Security
Domestic Nuclear Detection Office
Systems Acquisition
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Human Portable Radiation Detection Systems
PPA: Human Portable Radiation Detection Systems
Program Increase: Positions 0, FTE 0, Dollars \$5,552

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	8,048
Program Increase							-	-	5,552
Total Request	-	-	13,500	-	-	8,049	-	-	13,600

Total Program Change \$5.552M

Description of Item

The HPRDS PPA supports the procurement of multiple types of equipment including RIIDs, PRDs, and radiation detection backpacks for CBP, USCG, and TSA’s VIPR teams; procurement of equipment for the Mobile Detection Deployment Program to provide a surge capability in support of rad/nuc detection operations; the He³ Shortage Acquisition Program; and the HPT, and SVSD programs. HPT devices will increase the probability of detecting and identifying rad/nuc material through constant non-deliberate scanning during normal law enforcement operations. Because HPT devices will be worn at all times, they will also function as personal protective equipment, providing personnel with warnings when exposed to potentially harmful levels of radiation. The SVSD solution will provide radiation detection capability to DHS maritime assets to protect major U.S. population centers and critical infrastructure from “direct-to-target” threats from rad/nuc weapons. SVSD will improve the efficiency of scanning vessels of less than 300 tons by providing equipment to conduct standoff detection operations.

Justification

The funding increase of \$5.6 million in the HPRDS PPA supports the acquisition of next generation handheld nuclear detection equipment to DHS front-line operations that began in FY 2011, as well as supports HPT, SVSD, and other programs.

As the designated Executive Agent for Strategic Sourcing of Handheld Radiation Detection (HRD) devices and PRDs for DHS, the HPRDS program is currently conducting an acquisition to address end-user operational requirements for rad/nuc detection and identification devices. The outcome of this acquisition for basic handheld RIID will determine the types and quantities of devices to be acquired.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested program increase in HPRDS will be targeted to address the most pressing requirements and field a mix of devices addressing the areas of highest vulnerabilities in the GNDA and needs of our operational partners.

The funding will enable DNDO to:

- Procure additional next-generation basic handheld RIIDS shortening the recapitalization plan for CBP by approximately one year;
- Acquire 80 percent more detection equipment for USCG;
- Continue to deploy Boat-to-Boat scanning capability for CBP & USCG; and
- Acquire HPT solution.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For expenses for the Domestic Nuclear Detection Office acquisition and deployment of detection systems in accordance with the global nuclear detection architecture, [\$51,455,000] \$42,600,000¹, to remain available until September 30, 2016.

Radiation Portal Monitor Program Mission Statement

The Radiation Portal Monitor (RPM) Program was established at CBP in January 2002 with the objective of deploying RPMs at ports of entry (POEs) and providing the scientific and technical expertise to design, acquire, deploy, operate and maintain these systems. In 2005, DNDO assumed the responsibility of designing, acquiring and deploying the systems, and it has established a Ports of Entry program to work with CBP to bring the latest technology to bear on the threat of illicit nuclear materials crossing our borders. This program procures equipment to meet the needs of end-users, in accordance with the Global Nuclear Detection Architecture (GNDA). The RPMP was established with the objectives of deploying RPMs at United States ports of entry (POEs), and providing the scientific and technical expertise to design, acquire, and deploy these systems. As the Department of Homeland Security (DHS) works to keep the major seaports and northern and southwest land borders safe using radiological/nuclear (rad/nuc) detection capabilities, the Domestic Nuclear Detection Office (DNDO) continues to address the vulnerabilities in other locations and pathways.

Securing the Cities Mission Statement

The objective of the Securing the Cities (STC) initiative is to reduce the risk of a radiological or nuclear attack in high-risk metropolitan areas by enhancing regional capabilities to detect and interdict radiological material out of regulatory control. This initiative was initiated in the New York City (NYC region). Acquisition funds were utilized to procure, integrate, deploy, test, evaluate, train, and exercise a multi-layer, multi-pathway, multi-jurisdiction nuclear detection and reporting architecture for the region. Funds were also allocated to ensure that detection capabilities are integrated with Federal, State, and local command, control, and communication systems. State and local partners provided in-kind resources by bearing operational costs. Funds were also used for logistics, maintenance, and calibration costs as well as personnel costs to support the training necessary to operate detection equipment and conduct operational exercises. DNDO Systems Acquisition funds are dispersed under the STC program through competitively awarded Cooperative Agreements to the state and local agencies participating in the STC program.

Full Time Equivalents	-	-	-	-

Human Portable Radiation Detection Systems Mission Statement

DNDO procures multiple types of equipment that provide Department of Homeland Security (DHS) components, and in some cases, law enforcement and first responders with effective human portable systems for radiological/nuclear (rad/nuc) detection and identification. These solutions are used for detecting, localizing, and identifying rad/nuc materials, and they are relatively light, easy to use, and of sufficiently low cost to support widespread deployment. The objectives of the HPRDS project are to expand the range of activities and address different types of conveyances and cargo to be scanned for rad/nuc material. Projects include all human portable radiation detection devices that can be worn, carried, or moved by an individual. The devices are fully developed and most are commercially available.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$120	\$120	\$799	\$679

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request is \$799,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$75	\$75	0	(\$75)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request is \$0.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$13,305	\$7,854	\$12,801	(\$504)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request is \$12,801,000.

B. Component Contributions to Achieving Departmental Missions	2
Mission 1: Preventing Terrorism and Enhancing Security	2
Resources Requested	2
Performance Measures	2

A. Component Overview

The Domestic Nuclear Detection Office is composed of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Domestic Rad/Nuc Detection, Forensics, and Prevention Capability: The Domestic Nuclear Detection Office (DNDO) is the lead agency within the US Government (USG) charged with development of the global nuclear detection architecture (GNDA) and the implementation of its domestic components, as well as coordination and stewardship of USG technical nuclear forensics efforts. Functions include integrating interagency efforts to develop and acquire radiological and nuclear (rad/nuc) detection technologies, evaluating detector performance, ensuring effective response to detection alarms, integrating and ensuring readiness of US nuclear forensics capabilities, and conducting transformational research and development for rad/nuc detection and forensics technologies.

Management and Administration: Management and administration provides necessary support functions to enable DNDO to conduct the technical programs involved with rad/nuc detection and forensics capability development. Funding for Federal salaries and expenses, as well as other administrative costs (e.g., infrastructure and shared services) that support these efforts, are part of the Management and Administration Appropriation.

FY 2014 Budget Request

The table below shows Domestic Nuclear Detection Office's FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Domestic Rad/Nuc Detection, Forensics and Prevention Capability	98	270,090
Management and Administration	29	21,230
Total Budget Request	127	291,320

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the DNDO programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Domestic Rad/Nuc Detection, Forensics and Prevention Capability	100%						
Management and Administration	100%						

Mission 1: Preventing Terrorism and Enhancing Security

Resources Requested

DNDO resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Domestic Rad/Nuc Detection, Forensics, and Prevention Capability	268,548	101	270,090	101	270,090	98
Management and Administration	21,452	29	20,605	29	21,230	29
Total	\$290,000	130	\$290,695	130	291,320	127

\$ in thousands

Performance Measures

For *Preventing Terrorism and Enhancing Security*, two types of performance measures are presented. Strategic Performance Plan Measures represent DNDO’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Performance Plan Measures

Measure: Percent of cargo conveyances that pass through radiation detection systems upon entering the nation via land border and international rail ports of entry
Description: This measure gauges the amount of cargo conveyances scanned by radiation

detection equipment deployed to the Nation's land border crossing ports of entry and international rail ports of entry. It is expressed in terms of the percent that is scanned by fixed, mobile, and hand-held radiation detection equipment of the total number of cargo conveyances entering the nation through land ports of entry and by international rail.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO
Result:	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO

Measure: Percent of containerized cargo conveyances that pass through fixed radiation portal monitors at sea ports of entry						
Description: This measure gauges the amount of containerized cargo scanned by the radiation detection equipment deployed to the Nation's sea ports of entry. It is expressed in terms of the percent that is scanned by fixed radiation portal monitors of the total number of containerized cargo conveyances entering the nation through sea ports of entry.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO
Result:	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO

Management Measures

Measure: Number of comprehensive evaluations and demonstrations of new and improved technologies to protect against nuclear terrorism						
Description: This measure includes several technology development activities: feasibility evaluations completed of proposed radiological and nuclear (rad/nuc) detection and forensics technologies through the Academic Research Initiative and the Exploratory Research Program; proof-of-concept demonstrations completed of emerging rad/nuc detection and forensics technologies through the Exploratory Research Program; technology demonstrations and characterizations completed of promising rad/nuc detection and forensics technologies in an operationally relevant environment through the Advanced Technology Demonstration program; and test campaigns planned and executed for systems development testing and commercial systems evaluation testing. Development and acquisition programs are supported by a rigorous and objective test and evaluation program to characterize technologies and systems to understand technical performance, operational effectiveness, and system limitations.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	23	23
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Number of exercises, assessments, and deployments to enhance Federal, state, local and tribal agencies' readiness to combat nuclear terrorism						
Description: Number of operational support exercises, assessments, and deployments conducted by DNDO that enhance the Global Nuclear Detection Architecture (GNDA) by assisting Federal, state, local and tribal partners to improve their rad/nuc detection tactics, techniques and procedures. This measure also includes the number of interagency nuclear forensics exercises in which DNDO serves as the Lead Planner. In leading these nuclear						

Domestic Nuclear Detection Office - Strategic Context

forensics exercises, DNDO ensures a consistent and comprehensive approach to assessing the government's operational capability to perform the nuclear forensics mission.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	61	61
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Number of undergraduate, graduate, and post-doctorate fellowships and internships, university and junior faculty awards, and academic research awards in nuclear forensics and radiation detection-related specialties						
Description: This measure gauges the total number of undergraduate, graduate, and post-doctorate fellowships in nuclear forensics- and radiation detection-related sciences, research internships in nuclear forensics, and education awards and junior faculty awards per fiscal year to support nuclear-related academic programs. Recipients of the various Nuclear Forensics Fellowships and Faculty Award programs are selected from a competitive, merit-based application process. The Academic Research Initiative is a collaborative program with the National Science Foundation. These programs seek to advance fundamental knowledge for nuclear and radiological threat detection and related sciences with emphasis on fundamental research to develop human capital for the nuclear science and engineering professions.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	15	28	46	56	63	63
Result:	18	35	50	58	N/A	N/A

Measure: Percent of international air cargo that passes through radiation detection systems upon entering the nation at air ports of entry						
Description: This measure gauges the amount of international air cargo scanned by radiation detection equipment deployed to the Nation's international cargo aviation airports (U.S. air ports of entry). It is expressed in terms of the percent of the total amount of air cargo entering the Nation through the aviation pathway that is scanned using fixed and non-fixed radiation detection equipment.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO
Result:	FOUO	FOUO	FOUO	FOUO	N/A	N/A

Measure: Percent of planned nuclear and radiation detection equipment acquired to combat nuclear terrorism						
Description: This measure reports the ratio of fixed, mobile, and portable radiation detection equipment that DNDO acquired for Federal operators to protect against rad/nuc threats to the baseline set out in the spend plan for a particular year. The spend plan is updated annually as requirements are identified by the Federal operators and funding is appropriated. All equipment will be acquired in accordance with Acquisition Directive 102-01 and will meet codified performance and operational requirements.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
