

Our Vision

A homeland that is safe, secure, and resilient against terrorism and other hazards.

Our Mission

We will lead efforts to achieve a safe, secure, and resilient homeland. We will counter terrorism and enhance our security; secure and manage our borders; enforce and administer our immigration laws; protect cyber networks and critical infrastructure; and ensure resilience from disasters. We will accomplish these missions while providing essential support to national and economic security and maturing and strengthening the Department of Homeland Security and the homeland security enterprise.

About this Report

The U.S. *Department of Homeland Security Annual Performance Report for Fiscal Years (FY) 2012 – 2014* presents the Department's performance measures and applicable results aligned to our missions, provides the planned performance targets for FY 2013 and FY 2014, and includes information on the Department's Priority Goals. The report is consolidated to incorporate our annual performance plan and annual performance report.

The *FY 2012 – 2014 Annual Performance Report* is one in a series of three reports which comprise the Department's Performance and Accountability Reports:

- ***DHS Annual Financial Report:*** Delivery date – November 15, 2012
- ***DHS Annual Performance Report:*** Delivery date – April 10, 2013
- ***DHS Summary of Performance and Financial Information:*** Delivery date – February 15, 2013

When published, all three reports will be located on our public website at:

http://www.dhs.gov/xabout/budget/editorial_0430.shtm.

Introduction

The U.S. Department of Homeland Security (DHS) Annual Performance Report (APR) for Fiscal Years 2012 – 2014 presents the Department’s performance measures and applicable results for FY 2012, associated performance targets for FY 2013 and FY 2014, and information on our Agency Priority Goals (APG). The FY 2012 – 2014 APR is submitted as part of DHS’s FY 2014 Congressional Budget Justification and satisfies the *Government Performance and Results Act* (GPRA) and the *GPRA Modernization Act of 2010* requirement to publish the Department’s Annual Performance Report and Annual Performance Plan.

Organization

The Department of Homeland Security’s seven operational Components, listed along the bottom of the chart below, lead the Department’s front-line activities to protect our Nation. The remaining Components of the Department provide resources, analysis, equipment, research, policy development, and support to ensure the front-line organizations have the tools and resources to accomplish the DHS mission. For more information about the Department’s structure, visit our website at <http://www.dhs.gov/organization>.

DHS Organizational Chart

Missions and Responsibilities for Homeland Security

This report is organized around the major missions and responsibilities identified in the [U.S. Department of Homeland Security Strategic Plan for Fiscal Years \(FY\) 2012-2016](#). The Strategic Plan continues the Department's efforts to prioritize front-line operations while maximizing the effectiveness and efficiency of every taxpayer dollar the Department receives. The Plan was developed from the deliberations and conclusions of the Quadrennial Homeland Security Review ([QHRS](#)) and the Plan describes the homeland security missions and the Departmental efforts to provide essential support to national and economic security and to mature and strengthen DHS. The Missions and Goals of the Department are provided below.

Mission 1: Preventing Terrorism and Enhancing Security

Protecting the United States from terrorism is the cornerstone of homeland security. DHS's counterterrorism responsibilities focus on three goals: preventing terrorist attacks; preventing the unauthorized acquisition, importation, movement, or use of chemical, biological, radiological, and nuclear materials and capabilities within the United States; and reducing threats to and vulnerability of critical infrastructure, key resources, essential leadership, and major events from terrorist attacks and other hazards.

Goal 1.1: Preventing Terrorist Attacks – Prevent malicious actors from conducting terrorist attacks within or against the United States.

Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities – Prevent malicious actors from acquiring or moving dangerous chemical, biological, radiological, and nuclear materials or capabilities within the United States.

Goal 1.3: Manage Risks to Critical Infrastructure, Key Leaders, and Events – Reduce the vulnerability of key sectors to attack or disruption.

Mission 2: Securing and Managing Our Borders

The protection of the Nation's borders—land, air, and sea—from the illegal entry of people, weapons, drugs, and other contraband while facilitating lawful travel and trade is vital to homeland security, as well as the Nation's economic prosperity. The Department's border security and management efforts focus on three interrelated goals: effectively securing U.S. air, land, and sea borders; safeguarding and streamlining lawful trade and travel; and disrupting and dismantling transnational criminal and terrorist organizations.

Goal 2.1: Secure U.S. Air, Land, and Sea Borders – Prevent the illegal flow of people and goods across U.S. air, land, and sea borders.

Goal 2.2: Safeguard Lawful Trade and Travel – Facilitate and secure lawful trade and travel.

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations – Disrupt and dismantle transnational organizations that engage in smuggling and trafficking across the U.S. border.

Mission 3: Enforcing and Administering Our Immigration Laws

DHS is focused on smart and effective enforcement of U.S. immigration laws while streamlining and facilitating the legal immigration process. The Department has fundamentally reformed immigration enforcement, focusing on identifying and removing criminal aliens who pose a threat to public safety and targeting employers who knowingly and repeatedly break the law.

Goal 3.1: Strengthen and Effectively Administer the Immigration System – Promote lawful immigration, facilitate administration of immigration services, and promote the integration of lawful immigrants into American society while guarding against fraud and abuse of the immigration system.

Goal 3.2: Prevent Unlawful Immigration – Reduce conditions that encourage foreign nationals to illegally enter and remain in the United States, while identifying and removing those who violate our laws.

Mission 4: Safeguarding and Securing Cyberspace

DHS is responsible for protecting the federal Executive Branch civilian agencies and while working collaboratively with the private sector to protect the Nation’s critical infrastructure. This includes the “dot-gov” world, where the government maintains essential functions that provide services to the American people, as well as privately owned critical infrastructure which includes the systems and networks that support the financial services industry, the energy industry, and the defense industry.

Goal 4.1: Create a Safe, Secure, and Resilient Cyber Environment – Ensure malicious actors are unable to effectively exploit cyberspace, impair its safe and secure use, or attack the Nation’s information infrastructure.

Goal 4.2: Promote Cybersecurity Knowledge and Innovation – Ensure that the Nation is prepared for the cyber threats and challenges of tomorrow.

Mission 5: Ensuring Resilience to Disasters

DHS coordinates the comprehensive federal efforts to prepare for, protect against, respond to, recover from, and mitigate a terrorist attack, natural disaster or other large-scale emergency, while working with individuals, communities, the private and nonprofit sectors, faith-based organizations, federal, state, local, tribal, and territorial partners to ensure a swift and effective recovery. The Department’s efforts to build a ready and resilient Nation include fostering a Whole Community approach to emergency management nationally; building the Nation’s capacity to stabilize and recover from a catastrophic event; bolstering information sharing and building unity of effort and common strategic understanding among the emergency management team; building plans and providing training to our homeland security partners; and promoting preparedness within the private sector.

Goal 5.1: Mitigate Hazards – Strengthen capacity at all levels of society to withstand threats and hazards.

Goal 5.2: Enhance National Preparedness through a Whole Community Approach to Emergency Management – Engage all levels and segments of society in improving preparedness.

Goal 5.3: Ensure Effective Emergency Response – Strengthen nationwide response capacity to stabilize and recover from a catastrophic event.

Goal 5.4: Rapidly Recover from a Catastrophic Event – Improve the Nation’s ability to adapt and rapidly recover.

In addition to the core missions of the Department described above, DHS provides focus in two areas: 1) providing essential support to national and economic security; and, 2) maturing and strengthening DHS.

Providing Essential Support to National and Economic Security

DHS leads and supports many activities that provide essential support to national and economic security including, but not limited to: maximizing collection of customs revenue; maintaining the safety and security of the marine transportation system; preventing the exploitation of children; providing law enforcement training; and coordinating the Federal Government’s response to global intellectual property theft. DHS contributes in many ways to these elements of broader U.S. national and economic security while fulfilling its homeland security missions.

Goal: Collect Customs Revenue and Enforce Import/Export Controls – Maximize the collection of customs revenue and protect U.S. intellectual property rights and workplace standards.

Goal: Ensure Maritime Safety and Environmental Stewardship – Prevent loss of life in the maritime environment, maintain the marine transportation system, and protect and preserve the maritime environment.

Goal: Conduct and Support Other Law Enforcement Activities – Prevent the exploitation of individuals and provide law enforcement training for the execution of other non-DHS federal laws and missions.

Goal: Provide Specialized National Defense Capabilities – Support national defense missions and post-conflict reconstruction and stabilization.

Maturing and Strengthening DHS

Maturing and strengthening DHS and the entire homeland security enterprise—the collective efforts and shared responsibilities of federal, state, local, tribal, territorial, non-governmental, and private-sector partners, as well as individuals, families, and communities—is critical to the Department’s success in carrying out its core missions and operational objectives. This includes enhancing shared awareness of risks and threats, building capable, resilient communities, and fostering innovative approaches and solutions through cutting-edge science and technology, while continuing to improve Department management and accountability.

Goal: Improve Cross-departmental Management, Policy, and Functional Integration – Transform and increase the integration of departmental management.

Goal: Enhance DHS Workforce – Continue to build human resource programs that support departmental mission goals and objectives, create high technical proficiency, and address the needs of the Department’s employees in executing DHS missions.

Goal: Enhance Intelligence, Information Sharing, and Integrated Operations – Institute optimal mechanisms to integrate the Department’s intelligence elements, increase operational capability, and harmonize operations.

DHS Management Priorities

To address the challenges of managing 15 Components with varied management systems and processes as a unified agency, the Department continues a strategic approach focused on maturing organizational effectiveness through integration. Secretary Napolitano challenged the Department to become “One DHS” in 2009, and the Under Secretary for Management embraced that challenge by developing an *Integrated Strategy for High Risk Management* that provides an aggressive, yet sustainable plan to improve horizontal and vertical integration throughout the Department’s management functions.

While there is still work ahead, a stronger management framework has contributed to positive results such as:

- A full scope qualified audit opinion on all financial statements;
- A more seamless process to evaluate and oversee all investments;
- Clearer lines of authority between the Department and Components through new management delegations and directives;
- Enhanced business intelligence to better inform investment decisions and management health;
- Consolidation of numerous data centers;
- A more mobile workforce; and
- Stronger acquisition oversight to identify poor performing programs in a timely manner.

Moving forward, the Department is focused on ensuring that the right systems, processes, and people are in place to meet DHS mission goals. This approach is built around three key elements:

1. *Financial Enhancement*: improve DHS financial systems so information is reliable and timely to support Department-wide decision-making needs to ensure efficient and effective management of funds.
2. *Acquisition Enhancement*: continue building and institutionalizing an acquisition framework that improves program execution.
3. *Human Capital Management Enhancement*: recruit a diverse workforce, enhance employee engagement, and improve workforce planning

Financial Management: Since its inception, the DHS budget has nearly doubled to \$60.5 billion in FY 2012. DHS is committed to reducing improper payments, managing property effectively, increasing the reliability of financial information, and improving debt collection.

Specifically, the Department has adopted a decentralized approach to address financial management system modernization, focusing first on Components with the greatest need. Additionally, the

Department is developing CFO Horizon, a centralized business intelligence solution that provides financial information across organizational boundaries and from disparate systems. CFO Horizon will deliver an enterprise reporting capability with dashboard views of key business metrics to support Departmental leadership in making investment decisions. These priority efforts will ensure efficient and effective management of funds.

Acquisition Management: The Department continues to enhance its acquisition oversight by addressing the “front end” requirements as well as the “back end” program management in order to minimize risk, encourage fiscal responsibility, and improve execution across the entire acquisition lifecycle. In FY 2012, the Department issued the Program Management and Execution Playbook, which introduces a plan for strengthening program management and execution capabilities. The Playbook outlines a series of initiatives, including: improving acquisition and program management expertise, improving governance processes, increasing access to best practices through Centers of Excellence, and increasing access to reliable investment data and analysis via improved business intelligence tools. In addition, the Department established an Executive Steering Committee during FY 2012 to implement the Integrated Investment Life Cycle Management (IILCM), a transformational initiative to integrate budget formulation and execution so “strategy drives budget versus budget driving strategy.” The IILCM will be piloted in three areas beginning in FY 2013. Based upon lessons learned from the pilots, the Department will establish a more robust framework for the implementation of the IILCM process. The IILCM will provide a strategic framework to manage investments within the Department; providing the critical linkages between strategy, requirements, resource allocation, procurement, and programs.

Human Capital Management: Secretary Napolitano issued the *DHS Workforce Strategy for FY 2011-2016* to serve as the foundation for continued growth of DHS employees and to strengthen the Department’s collective ability to prevent and respond to the threats facing America. This strategy continues to be a priority of the Department as seen in a number of human capital achievements, including: the mid-level leader development program; exceeding Veteran hiring goals in FY 2012; and the creation of an Employee Engagement Executive Steering Committee to address the results of the Federal Employee Viewpoint Survey. Additionally, the Department is developing a strategic workforce planning capability that will allow leadership to better match critical resource needs with hiring efforts, make prudent decisions about the talent pipeline, and ensure the continued development of the workforce. The Department will continue to integrate its Balanced Workforce tools into a consolidated approach to workforce planning.

DHS is also achieving improved integration and realizing efficiencies through phased consolidation efforts. While the Department moves toward physical consolidation of the headquarters facility at St. Elizabeths, the achievement of “One DHS” in the near term will occur through virtual consolidation. DHS will continue to build out secure IT infrastructure capabilities, complete Enterprise Data Center consolidation, and establish public and private cloud services to facilitate access to mission-enabling enterprise services. A major consolidation effort centers on Human Resource Information Technology, including the roll-out of a Personnel Accountability System in FY 2013. The Department will also continue to empower the workforce through mobile work initiatives.

Through this integration strategy, DHS can continue to leverage common resources to create efficiencies and improve performance across the diverse mission activities of the Department.

Organizational Performance Management Framework in DHS

DHS has created a robust performance framework that drives performance management and enables the implementation of performance initiatives and the reporting of results within the Department for a comprehensive set of measures that are aligned with the mission outcomes articulated in the Department's [Strategic Plan](#). The DHS Organizational Performance Management Framework consists of:

- The DHS performance community;
- An annual process to review and improve performance measures;
- A rigorous measure verification and validation process;
- The reporting and review of quarterly measure data by Component program managers and their leadership and performance reviews by the Chief Operating Officer (COO) and Performance Improvement Officer (PIO); and
- The development of an integrated performance budget in conjunction with the Department's Planning, Programming, Budgeting, and Execution (PPBE) process.

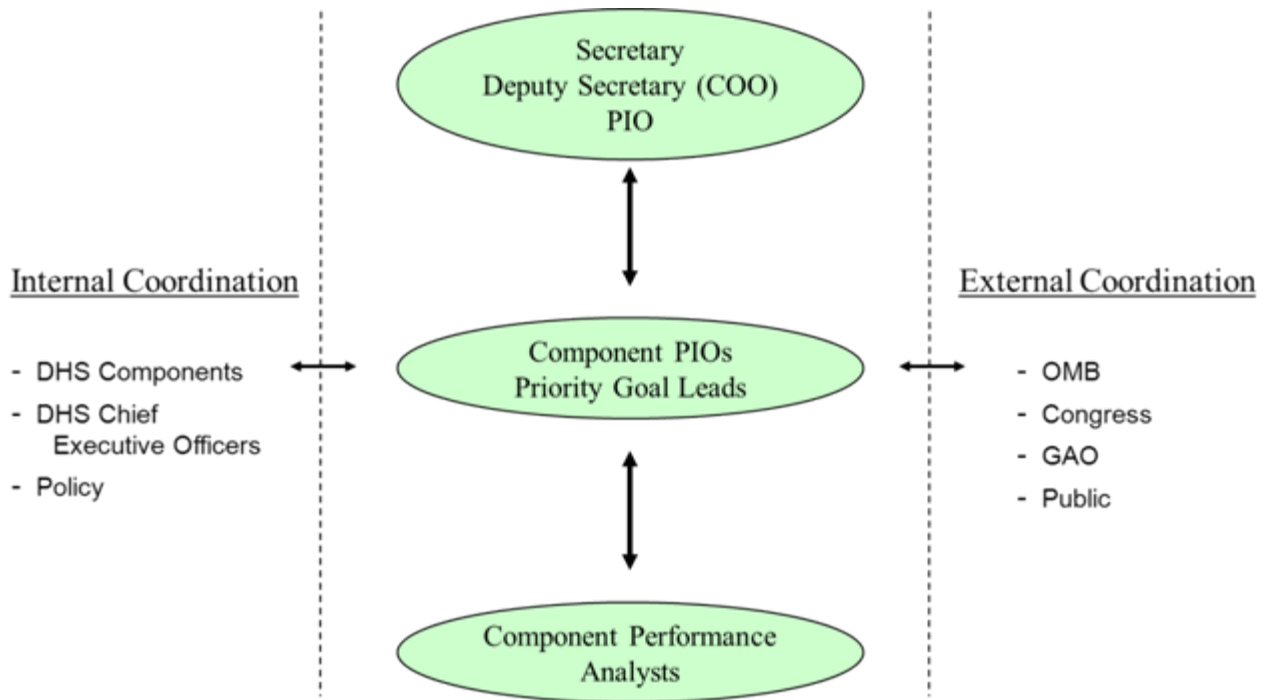

Collectively, this framework ensures that DHS leadership, Component leadership, program managers, and the performance staff managing these efforts have consistent, timely, and reliable performance information with which to make informed decisions to support performance improvement and to achieve our mission outcomes.

Performance Community

The DHS performance community is led by the COO and PIO who are supported by the Office of Program Analysis and Evaluation (PA&E) located under the Chief Financial Officer. In DHS, COO and PIO are actively involved in managing performance through a variety of venues, some of which are discussed later in this section. The performance community also includes Component PIOs and APG Leads who are the senior leaders driving performance management efforts in their respective Components, and interacting with senior DHS leadership on performance management issues. Component performance analysts are the performance measurement experts within their Component who communicate key guidance to program managers, provide advice on measure development concepts, collect and review quarterly and year-end data, coordinate with Component leadership on communicating results internally, and are the primary points of contact on matters related to GRPA Modernization initiatives.

At the headquarters level, under the direction of the COO and the PIO, along with guidance provided by the Chief Financial Officer, PA&E performance analysts facilitate and manage GPRPA Modernization Act performance initiatives for the Department. PA&E performance analysts are the liaison among internal and external stakeholders on performance matters, managing implementing of the framework outlined above, and ensuring the Department meets its GPRPA Modernization Act responsibilities. PA&E brings together this community, shown in the diagram below, to drive performance initiatives.

DHS Organizational Performance Community

Annual Process to Review and Improve Performance Measurement

With the support of senior leadership and the PIO, PA&E initiates the annual measure improvement process to improve our set of publicly reported measures as well as other measures the Department oversees to more effectively convey the results delivered to meet our missions. Improvement ideas are driven by a number of factors: feedback provided by senior leadership either in performance review meetings or in the vetting of proposed measure changes; suggestions from OMB examiners desiring more visibility into program performance and connection to program resources; suggestions from PA&E performance analysts working to fill gaps and improve quality; and Component leadership and program managers wishing to better characterize the results of their efforts. This process typically begins in the second quarter of the fiscal year (FY) and culminates with proposed changes by the Components submitted by the end of the third quarter. DHS senior leadership reviews and approves these proposed changes and submits the set of measures and associated targets to OMB for final review and concurrence. The measures and targets are included in the Annual Performance Report, the Strategic Context of the Congressional Justification, the Future Years Homeland Security Program (FYHSP) Report to Congress, and support other strategic management processes such as Senior Executive Service (SES) certification and personnel performance plans.

Verification and Validation Process

The Department recognizes the importance of collecting complete, accurate, and reliable performance data since this helps determine progress toward achieving program and Department goals and objectives. Performance data are considered reliable if transactions and other data that

support reported performance measures are properly recorded, processed, and summarized to permit the preparation of performance information in accordance with criteria stated by management. OMB Circular A-136, Financial Reporting Requirements, OMB Circular A-11, and the Reports Consolidation Act of 2000 (P.L. No. 106-531) further delineate this responsibility by requiring Agency heads to attest to the completeness and reliability of the performance data they report. DHS implemented a two-pronged approach to effectively mitigate risks and reinforce processes that enhance the Department's ability to report complete and reliable data for performance measure reporting. This approach consists of 1) the GPRA Performance Measure Checklist for Completeness and Reliability; and 2) independent assessments of the completeness and reliability of GPRA performance measures.

GPRA Performance Measure Checklist for Completeness and Reliability

The GPRA Performance Measure Checklist for Completeness and Reliability is used by Components to self-evaluate key controls over GPRA performance measure planning and reporting actions. For each key control, Components are required to describe their control activities and provide their assessment regarding their level of achievement at the end of each fiscal year. Components also factor the results of any internal or independent measure assessments into their rating. The GPRA Performance Measures Checklist for Completeness and Reliability supports the Component Head assurance statements attesting to the completeness and reliability of the performance data. Individual Component Head assurance statements serve as the primary basis for the Secretary's assertion whether or not the Department has effective controls over financial and performance reporting as well as efficiencies of our operations.

Independent Assessment of the Completeness and Reliability of GPRA Performance Measures

PA&E conducts an assessment of performance measure data for completeness and reliability on a sample of its performance measures annually using an independent review team. An independent review team assesses selected measures using the methodology prescribed in the DHS Performance Measure Verification and Validation Handbook, documents their findings, makes recommendations for improvement, and performs a subsequent follow-up review within a year after the initial assessment to observe the Component's implementation of their recommendations. Corrective actions are required for performance measures determined to be unreliable. The Handbook is distributed and made available to all Components to encourage the development and maturation of internal data verification and validation capabilities, increase transparency, and facilitate the review process. The results obtained from the independent assessments are also used to support the Component's assertions over the reliability of its performance information reported in the GPRA Checklist and Component Head Assurance Statement. DHS has shared our process with other Agencies in support of their verification and validation improvement efforts.

Management Assurance Process for GPRA Performance Measure Information

The Management Assurance Process requires all Component Heads in DHS to assert that performance measure data reported in the Department's Performance and Accountability Reports are complete and reliable. If a measure is considered unreliable, the Component reports the measure on the GPRA Performance Measure Checklist for Completeness and Reliability along with the actions the Component is taking to correct the measure's reliability.

The DHS Office of Risk Management and Assurance, within the Office of the CFO, oversees management of internal controls and the compilation of many sources of information to consolidate into the Component Head and the Agency Assurance Statements. The Annual Financial Report contains statements attesting to the completeness and reliability of performance measure information in our Performance and Accountability Reports. Any unreliable measures and corrective actions are specifically reported in the Annual Performance Report.

Based on the process described above, all performance information is deemed complete and reliable except for the measure below:

- Performance Measure: Percent of high-risk urban areas designated within the Urban Areas Security Initiative (UASI) able to demonstrate increased Emergency Communications capabilities
 - The National Protection and Programs Directorate, Office of Emergency Communications did not have the mechanism to collect the data required to report results for this measure. The measure is being retired as the program does not have the ability to develop a reliable methodology to collect the needed data.

Reporting and Reviews

The Department has implemented a quarterly review process of performance information, led by the COO and supported by the PIO, in accordance with the GPRCA Modernization Act. The emphasis of these meetings has been on both the review of performance measure information related to our APGs (a set of ambitious, but realistic goals that reflect short-term priorities within our mission areas), along with the review of our strategic measures and their associated results that reflect achievement of our missions. These meetings have resulted in several improvements to include:

- Performance information is reviewed across Components by mission regarding performance within the space, the emphasis of programs, and how to better capture results from our efforts;
- Improved the quality of the performance measures used to assess our mission outcomes;
- Enhanced communication and coordination across Components supporting similar mission activities;
- Elevated the importance and visibility of performance information; and
- Increased accountability of SES to achieve our APGs and mission outcomes.

During FY 2012, the COO led six mission-focused performance reviews and had five follow-up meetings during FY 2012. The Deputy Secretary was instrumental in improving our publically reported performance measures to better communicate to our stakeholders the value being delivered in regards to our strategic missions and goals. These discussions led to Component leadership working with their program staffs to craft improved measure proposals to mature the measure set. These proposals resulted in continued dialog among senior leadership of how to best capture meaningful results. This deliberative process resulted in the implementation of 27 new measures, and retirement of those agreed to be less informative for leadership. The quarterly review process provided the venue for leadership to examine and illuminate areas where we need to improve the information the Department uses to assess our progress in meeting our mission.

The Department also produces quarterly APG and DHS performance measure reports to promote transparency and provide timely information to leadership on performance. These quarterly reports not only provide actual performance results to date, but also an assessment by program managers of whether they believe they are going to achieve their targets by the end of the fiscal year. If it appears that targets may not be met, program managers are required to initiate corrective actions to address performance shortfalls.

At the end of the fiscal year, program managers report fiscal year-end results, along with analyses of their results and corrective action plans for those performance measures not meeting their targets. These performance results are then incorporated into the Department's Annual Performance Report and made available on the DHS public website as well as linked from Performance.gov.

Planning, Programming, Budgeting, and Execution (PPBE) and the Performance Budget

Performance management is relevant to each stage of the Department's PPBE process. PPBE is an annual process that incorporates long-term planning decisions and serves as the basis for developing the Department's annual budget submission and out year spending profile as enumerated in the FYHSP Report, in accordance with the provisions of the [Homeland Security Act of 2002](#).

In Planning, goal setting, risk assessment, and mission scoping are conducted to determine and prioritize the capabilities necessary to meet the needs of the Department in light of current performance. In Programming, resources are allocated to best meet the prioritized needs within projected resources, considering potential performance gains in the process. In Budgeting, budget estimates are developed ensuring the efficient and effective use of funding to meet priorities and the planned levels of performance are integrated with the levels of funding requested. Finally, in Execution, program execution and performance results are compared to plans to assess accomplishments, shortfalls, and inform future planning and performance targets.

Performance by Mission

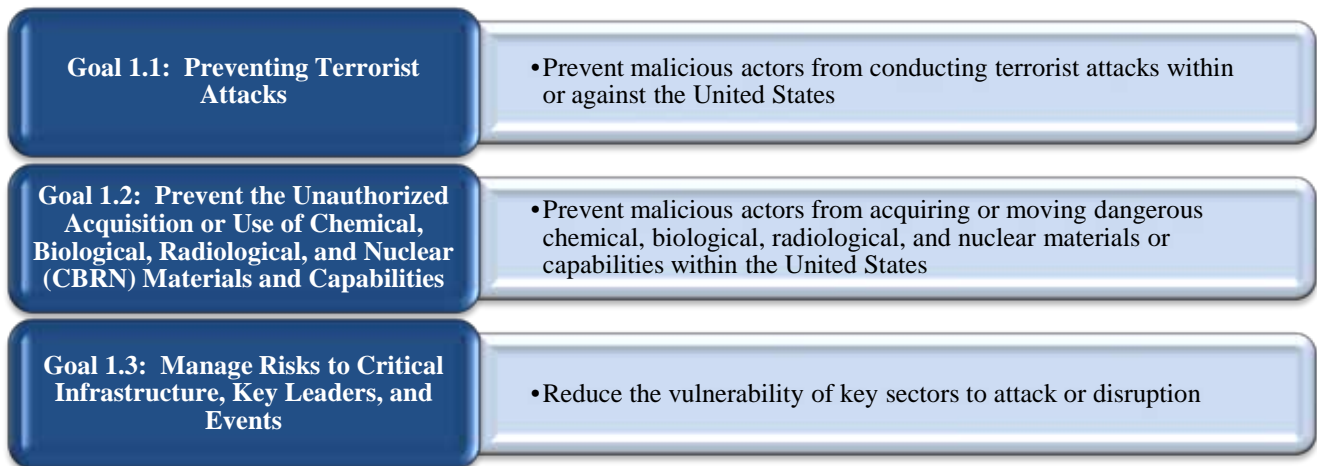

This section of the Annual Performance Report provides an analysis of the Department’s missions and responsibilities. Each section includes the goals and the performance measures used to assess our success in accomplishing each goal. Also included are highlights of DHS’s accomplishments across the mission areas in FY 2012.

DHS continues to improve the measures it uses to gauge the results delivered by the Department. Within the measure tables for each mission, new and retired measures are specifically identified, and in most instances the new measures are replacing one or more retired measures. In some cases, new measures have been developed to fill an identified information need. In some cases, measures have been retired as they no longer provide the level of information to support the assessment of the mission outcomes.

Mission 1: Preventing Terrorism and Enhancing Security

Protecting the United States from terrorism is the cornerstone of homeland security. DHS’s counterterrorism responsibilities focus on three goals: preventing terrorist attacks; preventing the unauthorized acquisition, importation, movement, or use of chemical, biological, radiological, and nuclear materials and capabilities within the United States; and reducing threats to and vulnerability of critical infrastructure, key resources, essential leadership, and major events from terrorist attacks and other hazards.

We will achieve this mission through meeting the following goals:

DHS Performance

In FY 2012, there were 22 performance measures used to assess the Department’s efforts in *Mission 1: Preventing Terrorism and Enhancing Security*. For the FY 2013 – 2014 plan, two new measures are being introduced and four measures are being retired. Detailed results for each performance measure are provided in the following tables.

Table 1: Performance Measures for Goal 1.1: Preventing Terrorist Attacks

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of intelligence reports rated “satisfactory” or higher in customer feedback that enable customers to understand the threat (AO)	---	---	---	---	80%	90%	90% ¹	90%
Percent of intelligence reports rated “satisfactory” or higher in customer feedback that enable customers to anticipate emerging threats (AO)	---	---	---	---	80%	89%	Retired	
Percent of international air enplanements vetted against the terrorist watch list through Secure Flight (TSA)	---	---	---	100%	100%	100%	100%	100%
Percent of domestic air enplanements vetted against the terrorist watch list through Secure Flight (TSA)	---	---	---	100%	100%	100%	100%	100%
Percent of air carriers operating from domestic airports in compliance with leading security indicators (TSA)	96%	98%	98%	99.2%	100%	98.1%	100%	100%
Explanation: More rigorous risk-based operational security requirements built on key performance indicators impacted the FY 2012 compliance rate. TSA communicates inspection findings to air carriers for corrective action where compliance is below acceptable levels and conducts additional inspection and assessment activities to bring the air carrier into full compliance. In addition, TSA conducts outreach sessions to help industry understand new and revised regulations to increase compliance rates.								
Average number of days for DHS Traveler Redress Inquiry Program (TRIP) redress requests to be closed (TSA)	---	---	---	99	< 97	93	< 93 ²	< 91

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of air cargo screened on commercial passenger flights originating from the United States and territories (TSA)	---	---	100%	100%	100%	100%	100%	100%
Percent of inbound air cargo screened on international passenger flights originating from outside the United States and territories (TSA)	---	---	---	---	85%	93%	100%	100%
Percent of law enforcement officials trained in methods to counter terrorism and other violent acts that rate the training as effective (DHS HQ - CRCL)	---	---	---	84%	82%	86%	84%	86%

Note 1: The FY 2013 target previously published as 80 percent in the FY 2011 – 2013 Annual Performance Report was changed to 90 percent based on FY 2012 results.

Note 2: The FY 2013 target previously published as < 95 in the FY 2011 – 2013 Annual Performance Report was changed to < 93 based on FY 2012 results.

TSA Pre✓™

The Transportation Security Administration (TSA) employs risk-based, intelligence-driven operations to prevent terrorist attacks and to reduce the vulnerability of the Nation’s transportation system to terrorism. TSA

Pre✓™ is a pre-screening initiative that allows eligible passengers to volunteer information about themselves to possibly expedite their screening experience. Eligible passengers enter a separate security lane, and may pass through metal detectors without needing to remove shoes, light outerwear, belts, or remove laptops and 3-1-1 compliant liquids/gels from their carry-on.

Currently, eligible passengers include U.S. citizens flying on participating airlines as well as those who are members of U.S. Customs and Border Protection (CBP) Trusted Traveler programs, including Global Entry, SENTRI, and NEXUS. Since November 15, 2012, Canadian citizens traveling domestically in the United States who are members of NEXUS are also qualified to participate in TSA Pre✓™.

More than three million passengers have received expedited screening through TSA Pre✓™ security lanes since the initiative began in October 2011. TSA Pre✓™ is now available at 40 of the Nation’s busiest airports.

TSA will always incorporate random and unpredictable security measures throughout the airport and no individual will be guaranteed expedited screening.

Table 2: Performance Measures for Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of inspected high-risk chemical facilities in compliance with the Chemical Facility Anti-Terrorism Standards (NPPD)	---	---	---	9.1%	20%	23.7%	Retired	
Percent of performance standards implemented by the highest risk chemical facilities and verified by DHS (NPPD)	---	---	---	---	New Measure		57% ¹	97%
Percent of containerized cargo conveyances that pass through fixed radiation portal monitors at sea ports of entry (DNDO)	---	---	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO
Percent of cargo conveyances that pass through radiation detection systems upon entering the nation via land border and international rail ports of entry (DNDO)	---	---	FOUO	FOUO	FOUO	FOUO	FOUO	FOUO
Percent of targeted urban areas that are monitored for biological threats using BioWatch technology (OHA)	---	---	---	100%	100%	100%	Retired	

Note 1: An small proportion of these facilities have had their Site Security Plans (SSPs) approved by DHS as of FY 2012, so most work to approve SSPs will occur in FY 2013-2014. The targets are based on an analysis of how long it will take NPPD to authorize SSPs and number of Tier 2 facilities that will require technical assistance before their SSPs can be authorized.

Table 3: Performance Measures for Goal 1.3: Manage Risks to Critical Infrastructure, Key Leadership, and Events

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of owner/operators of critical infrastructure and key resources who report that the products provided by Infrastructure Protection enhance their understanding of the greatest risks to their infrastructure (NPPD)	---	---	---	---	75%	58%	80%	85%
Explanation: Initial results were lower than expected due to a lack of awareness of Infrastructure Protection tools and products by our stakeholders. NPPD has been working through its regional initiative and Protective Security Advisors (PSAs) program to enhance awareness. Through the regional initiative, NPPD is working to better coordinate with its partners on a region-by-region basis to better understand their needs and to promote awareness of the products offered. PSAs have also been directed to highlight a subset of tools that NPPD believes will be most helpful to its partners.								
Percent of facilities that have implemented at least one security enhancement that raises the facility's protective measure index score after receiving an Infrastructure Protection vulnerability assessment or survey (NPPD)	---	---	---	61%	50%	70%	65% ¹	70%
Percent of countermeasures that are determined to be in compliance with standards when tested in federal facilities (NPPD)	94%	94.4%	96.2%	N/A	N/A	N/A ²	Retired	
Percent of high risk facilities that receive a facility security assessment in compliance with the Interagency Security Committee (ISC) schedule (NPPD)	---	---	---	---	New Measure		63% ³	100%
Percent of tenants satisfied with the level of security provided at federal facilities (NPPD)	---	---	81.3%	77.8%	83%	78%	84%	85%
Explanation: FPS did not deliver completed facility security assessments in time to impact the results of the survey due to information technology issues. FPS is leading the Interagency Security Committee in establishing security standards for federal facilities. The three newly appointed Assistant Directors for Field Operations are meeting regularly with each Federal Employee Board to discuss more openly the role of FPS and obtain feedback to improve FPS operations and improve customer satisfaction.								

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of overall compliance of domestic airports with established aviation security indicators (TSA) ⁴	95%	95%	96%	95.9%	100%	95%	100%	100%
Explanation: TSA continues to improve the security posture at the Nation’s airports, with 95% of airports compliant with established aviation security indicators. TSA’s regulatory inspection program evaluates the security integrity of the 446 federalized U.S. airports. TSA communicates inspection findings to airports for corrective action, and where compliance is below acceptable levels, TSA conducts additional inspection and assessment activities to bring the airport into full compliance. Beginning in FY 2013, the regulatory inspection and enforcement program will conduct two types of inspections: 1) “Targeted” inspections which will be conducted annually and focus on operational performance through compliance testing; and 2) “Comprehensive” inspections consisting of the previously described “targeted” inspection in addition to reviews of supporting security requirements (i.e. records, signage, etc.), which will be conducted bi-annually.								
Percent of overall level of implementation of industry agreed upon Security and Emergency Management action items by mass transit and passenger rail agencies (TSA) ⁵	23%	23%	23%	28%	75%	39%	75% ⁶	77%
Explanation: Implementation of recommended security enhancements has been impacted by budgetary constraints primarily at state and local governments. Transit agencies are assessed every three years. The Transportation Security Inspectors for Surface assess a percentage of the transit agencies each year and it takes approximately six years for all transit agencies assessed to demonstrate that vulnerabilities identified in the first assessment have been addressed. Improvements made by an agency would not be captured until the following cycle of assessments. Progress has been made toward the target; however, sustained progress is contingent on funding available to state and local agencies.								
Percent of currency identified as counterfeit (USSS)	0.0086%	0.0081%	0.0087%	0.0078%	<0.0098%	0.0085%	<0.0090%	<0.0088%
Financial crimes loss prevented through a criminal investigation (in billions) (USSS)	\$1.96	\$1.28	\$6.56	\$4.85	\$1.40	\$2.75	\$1.80	\$1.90
Percent of total U.S. Secret Service protection activities that are incident-free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities (USSS)	100%	100%	100%	100%	100%	100%	100%	100%
Percent of National Special Security Events that were successfully completed (USSS)	---	---	---	100%	100%	100%	100%	100%

Note 1: The FY 2013 target previously published as 55 percent in the FY 2011 – 2013 Annual Performance Report was changed to 65 percent based on FY 2012 results.

- Note 2: The program has developed and recently implemented a new tool for Facility Security Assessments; however, the tool will not support the needed data to report this measure as written. As such, the measure will be retired and the program will propose a replacement measure in FY 2014.
- Note 3: Due to the design, implementation, and rollout of the Modified Infrastructure Survey Tool (MIST), FPS did not complete all facility security assessments as identified by the ISC schedule in FY 2011-2012. Beginning in FY 2013, FPS has established an adjusted schedule to bring these facilities back into a standard assessment review schedule.
- Note 4: Previous measure name: Percent of domestic airports that comply with established aviation security indicators.
- Note 5: Previous measure name: Percent of mass transit and passenger rail agencies that have effectively implemented industry agreed upon Security and Emergency Management Action items to improve security.
- Note 6: The FY 2013 target previously published as 80 percent in the FY 2011 – 2013 Annual Performance Report was changed to 75 percent based on FY 2012 results.

2012 NATO Summit Protection

The 2012 North Atlantic Treaty Organization (NATO) Summit—held in Chicago, Illinois in May 2012—was the largest gathering of world leaders on U.S. soil, outside of the United Nations General Assembly in New York City and was designated as a National Security Special Event (NSSE). When an NSSE is declared, the U.S. Secret Service becomes the lead agency for developing and executing a comprehensive operational security plan in coordination with Federal and local law enforcement partners, state and local governments, and the military.

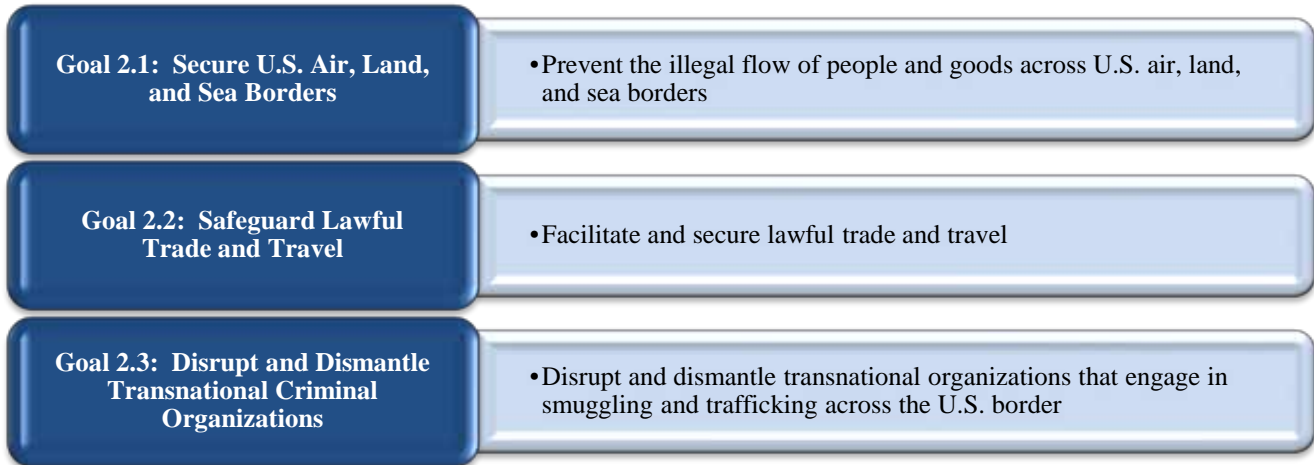

In addition to securing nine different venues for 60 visiting delegations, the U.S. Secret Service provided protective details for 42 visiting heads of state or government in addition to the President. In total, more than 50 federal, state, local, and military agencies participated in the planning and execution of the security plan.

Mission 2: Securing and Managing Our Borders

The protection of the Nation’s borders—land, air, and sea—from the illegal entry of people, weapons, drugs, and other contraband while facilitating lawful travel and trade is vital to homeland security, as well as the Nation’s economic prosperity. The Department’s border security and management efforts focus on three interrelated goals: effectively securing U.S. air, land, and sea borders; safeguarding and streamlining lawful trade and travel; and disrupting and dismantling transnational criminal and terrorist organizations.

We will achieve this mission through meeting the following goals:

DHS Performance

In FY 2012, there were 13 performance measures used to assess the Department’s efforts in *Mission 2: Securing and Managing Our Borders*. For the FY 2013 – 2014 plan, six new measures are being introduced and six measures are being retired. Detailed results for each performance measure are provided in the following tables.

Table 4: Performance Measures for Goal 2.1: Secure U.S. Air, Land, and Sea Borders

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Number of apprehensions on the Southwest Border between the ports of entry (CBP)	705,022	540,851	447,731	327,577	≤ 371,000	356,873	≤ 391,000 ¹	≤ 361,200 ²
Percent of people apprehended multiple times along the Southwest border (CBP) ³	---	---	---	---	New Measure		≤ 18%	≤ 17%
Percent of detected conventional aircraft incursions resolved along all borders of the United States (CBP)	---	---	---	95.3%	100%	96%	100%	100%
Explanation: In FY 2012, there were 303 conventional aircraft detected and classified as border incursions of which 291 were resolved. Twelve incursions were not resolved due to the difficulty in resolving incursions visually identified vs. being tracked by radar. The Air and Marine program will continue to evaluate and improve tactics, techniques, and procedures to track and resolve visually detected incursions in order to bring individuals that commit illegal incursions to a successful law enforcement resolution.								
Number of weapons seized on exit from the United States (CBP)	---	---	---	1,987	2,100	649	Retired	

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Explanation: The target for FY 2012 was based upon previous year's seizures, which included a large number of commercial shipper weapon seizures that did not meet firearms compliance requirements. Due to continuing outbound enforcement operations, together with outreach to shippers to clarify requirements, firearms seizures related to commercial shipper non-compliance have been substantially reduced and commercial firearms shippers are now considerably more compliant. This resulted in a significant drop in outbound-related firearms seizures. CBP will continue to conduct risk-based outbound enforcement operations to identify and seize weapons being transported out of the country illegally and work with other law enforcement agencies and both local and international partners to identify and disrupt outbound smuggling activities.								
Number of smuggled outbound weapons seized at the ports of entry (CBP)	---	---	---	---	New Measure		400	400
Amount of smuggled outbound currency seized at the ports of entry (in millions) (CBP) ⁴	---	---	---	\$47	\$35	\$31.9	\$30	\$30
Explanation: CBP will continue to conduct risk-based outbound enforcement operations to identify and seize currency being transported out of the country illegally and work with other law enforcement agencies and local and international partners to identify and disrupt outbound smuggling activities.								

- Note 1: The FY 2013 target previously published as ≤ 352,000 in the FY 2011 – 2013 Annual Performance Report was changed to ≤ 391,000 based on FY 2012 results.
- Note 2: Due to the long-term uncertainty in border crossing attempts, out-year projections will be reevaluated on an annual basis.
- Note 3: This performance measure will track the program's effectiveness at reducing recidivism (individuals apprehended multiple times).
- Note 4: Previous measure name: Amount of currency seized on exit from the United States (in millions).

Southwest Border Security

Under this Administration, DHS has dedicated historic levels of personnel, technology, and resources to the Southwest Border. Today, the Border Patrol is staffed at higher levels on the Southwest Border than at any time in its 88-year history, having more than doubled the number of agents from approximately 9,100 in 2001 to more than 18,500 today. Under the Southwest Border Initiative, DHS has doubled the number of personnel assigned to Border Enforcement Security Task Forces; increased the number of intelligence analysts focused on cartel violence; tripled deployments of Border Liaison Officers to work with

their Mexican counterparts; increased screening of southbound shipments for illegal weapons, drugs, and cash; and expanded unmanned aircraft system coverage to the entire Southwest Border.

Along the Southwest Border, DHS has deployed thousands of technology assets, including mobile surveillance units, thermal-imaging systems, large- and small-scale non-intrusive inspection equipment, and three Unmanned Aircraft Systems. For the first time, DHS unmanned aerial capabilities now cover the Southwest Border from California to Texas—providing critical aerial surveillance assistance to personnel on the ground. Attempts to cross the Southwest Border illegally, as measured by Border Patrol apprehensions, have decreased 49 percent in the past four years and are 78 percent less than what they were at their peak.

Table 5: Performance Measures for Goal 2.2: Safeguard Lawful Trade and Travel

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Compliance rate for Customs-Trade Partnership Against Terrorism (C-TPAT) members with the established C-TPAT security guidelines (CBP)	99.9%	97.5%	97.8%	95.1%	100%	94.5%	Retired	
Explanation: The overall compliance rate decreased after a number of companies were suspended or removed due to the implementation of strengthened C-TPAT security criteria, including new suspension and removal guidelines and increased management oversight. C-TPAT is working with partner companies to explain the enhanced security criteria and ensure they understand the validation requirements.								
Percent of requested cargo examinations conducted at foreign ports of origin in cooperation with host nations under the Container Security Initiative (CBP)	---	---	---	96%	100%	98%	Retired	
Explanation: The Container Security Initiative relies on the voluntary cooperation of host nation customs officials. CBP continually works with the host ports to resolve examination issues as they arise and works with foreign governments to increase the percentage of conducted examinations.								
Percent of inbound cargo identified by CBP as potentially high-risk that is assessed or scanned prior to departure or at arrival at a U.S. port of entry (CBP) ¹	---	---	---	---	FOUO	FOUO	FOUO	FOUO
Explanation: FOUO.								
Percent of cargo by value imported to the U.S. by participants in CBP trade partnership programs (CBP)	---	---	---	55.1%	45%	54.7%	57% ²	59%
Percent of imports compliant with U.S. trade laws (CBP) ³	---	---	---	97.67%	98%	96.46%	97.5% ⁴	97.5%
Explanation: During the random sample review process, CBP found misclassification errors by importers that resulted in a reduced compliance rate. CBP will target importers to ensure shipments are classified correctly.								

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of air carriers operating flights from foreign airports that serve as last point of departure to the U.S. in compliance with leading security indicators (TSA)	---	---	---	85%	100%	94.1%	Retired	
Explanation: During FY 2012, TSA identified air carriers that were not compliant with requirements stipulated in their respective Standard Security Programs. In all instances where violations were identified, TSA notified the corporate security office of each airline with a detailed description of the infraction. Each corporate security office responded to TSA with additional information identifying the cause of the violation and their corrective action plan. TSA will continue to provide detailed, accurate, and timely feedback to the corporate security offices that regulate the air carriers to ensure that those responsible for resolving the issues have the information necessary to improve aviation security.								
Percent of foreign airports serving as last point of departure in compliance with leading security indicators (TSA)	---	---	---	95.3%	100%	94%	Retired	
Explanation: TSA is engaged with counterpart agencies governments whose airports are last points of departure (LPD) to the United States in order to track the implementation of security improvements; however, host governments of these sovereign nations are occasionally unwilling or unable to implement the required improvements. If these concerns persist, TSA may levy additional security requirements on airlines that operate from the locations to the United States to compensate for the ongoing shortfalls at these LPD airports. TSA will continue to provide detailed, accurate, and timely feedback to government authorities that regulate airports to ensure that those entities with the responsibility for resolving the issues have the information necessary to improve aviation security.								
Percent of foreign airports that serve as last points of departure and air carriers involved in international operations to the United States advised of necessary actions to mitigate identified vulnerabilities in order to ensure compliance with critical security measures (TSA)	---	---	---	---	New Measure		100%	100%
Security compliance rate for high risk maritime facilities (USCG) ⁵	---	---	---	99.9%	100%	98.7%	100%	100%
Explanation: The U.S. Coast Guard conducted concerted enforcement efforts which yielded slightly more instances of Maritime Transportation Security Act (MTSA) related Notices of Violation and/or Civil Penalties than the previous year. In FY 2012, 41 of the 3,163 high-risk facilities were not in compliance. The notices of violation and/or civil penalties issued prompted corrective action at each of the 41 facilities to remedy the deficiencies. U.S. Coast Guard facility inspectors regularly follow up with facilities who received notice of violations and or civil penalties to ensure that the discrepancies have been corrected and are not repeated. The U.S. Coast Guard will continue to work with high-risk maritime facilities to meet MTSA related security requirements in efforts to reduce violations and improve security. In addition, the U.S. Coast Guard will continue to develop and enforce federal maritime security regulations by reviewing maritime facility security plans, conducting security and safety inspections, and enforcing Transportation Worker Identification Credential regulations.								

- Note 1: Previous measure name: Percent of inbound high-risk cargo transported by air, land, or sea that has been screened and entry status is resolved prior to or during processing at a United States port of entry.
- Note 2: The FY 2013 target previously published as 45.5 percent in the FY 2011 – 2013 Annual Performance Report was changed to 57 percent based on FY 2012 results.
- Note 3: Previous measure name: Percent of imports compliant with applicable U.S. trade laws.
- Note 4: The FY 2013 target previously published as 98 percent in the FY 2011 – 2013 Annual Performance Report was changed to 97.5 percent based on FY 2012 results.
- Note 5: Previous measure name: Percent of maritime facilities in compliance with security regulations as they have not received a notice of violation and/or civil penalty.

Facilitating Legal Trade and Travel

Active Lane Management: CBP is leveraging its Trusted Traveler Programs and the growing prevalence of radio frequency identification travel documents to initiate the “active lane management” concept at our land border ports of entry (POEs). Active Lane Management (ALM) involves monitoring and making adjustments to a POE’s lane designations as traffic conditions and infrastructure limitations warrant expediting traffic and enhancing security. Ready Lanes, Dedicated Commuter Lanes, and Light Emitting Diode signage are established best practices being deployed so Port Directors can re-designate lanes and communicate to the public in order to expedite both trusted and “ready” traffic.

Business Transformation at Ports of Entry: In order to strengthen security and expedite legal travel and trade at POEs, CBP is engaged in a series of business transformation initiatives. These initiatives involve reassessing core processes, incorporating technology enhancements, assessing utilization of law enforcement staffing, and developing automation efforts. Efficiencies and new technologies that have already been implemented, such as the Western Hemisphere Travel Initiative, Radio Frequency Identification enabled documents, License Plate Readers, Trusted Traveler Programs, and Non-Intrusive Inspection equipment are saving CBP hundreds of millions of dollars and creating a workforce multiplier of several thousand positions.

Table 6: Performance Measures for Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of significant high-risk transnational criminal investigations that result in a disruption or dismantlement (ICE)	---	---	---	---	16%	18%	Retired	
Percent of transnational drug investigations resulting in the disruption or dismantlement of high-threat transnational drug trafficking organizations or individuals (ICE)	---	---	---	---	New Measure		11%	12%

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of transnational child exploitation or sex trafficking investigations resulting in the disruption or dismantlement of high-threat child exploitation or sex trafficking organizations or individuals (ICE)	---	---	---	---	New Measure		20%	21%
Percent of transnational gang investigations resulting in the disruption or dismantlement of high-threat transnational criminal gangs (ICE)	---	---	---	---	New Measure		15%	16%

Mission 3: Enforcing and Administering Our Immigration Laws

DHS is focused on smart and effective enforcement of U.S. immigration laws while streamlining and facilitating the legal immigration process. The Department has fundamentally reformed immigration enforcement, focusing on identifying and removing criminal aliens who pose a threat to public safety and targeting employers who knowingly and repeatedly break the law.

We will achieve this mission through meeting the following goals:

Goal 3.1: Strengthen and Effectively Administer the Immigration System	<ul style="list-style-type: none"> •Promote lawful immigration, facilitate administration of immigration services, and promote the integration of lawful immigrants into American society while guarding against fraud and abuse of the immigration system
Goal 3.2: Prevent Unlawful Immigration	<ul style="list-style-type: none"> •Reduce conditions that encourage foreign nationals to illegally enter and remain in the United States, while identifying and removing those who violate our laws

DHS Performance

In FY 2012, there were 17 performance measures used to assess the Department’s efforts in Mission 3: *Enforcing and Administering Our Immigration Laws*. For the FY 2013 – 2014 plan, one new measure is being introduced and six measures are being retired. Detailed results for each performance measure are provided in the following tables.

Table 7: Performance Measures for Goal 3.1: Strengthen and Effectively Administer the Immigration System

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Overall customer service rating of the immigration process (USCIS)	---	---	---	80%	80%	93%	85% ¹	85%
Average customer satisfaction rating with information provided about legal immigration pathways from USCIS call centers (USCIS)	---	---	---	84%	80%	91%	Retired	
Percent of Form I-485, Application to Register for Permanent Residence or to Adjust Status, approval decisions determined by quarterly quality reviews to have correctly followed established adjudication procedures (USCIS)	---	---	91%	91%	91%	95%	Retired	
Percent of Form N-400, Application for Naturalization, approval decisions determined by quarterly quality reviews to have correctly followed established adjudication procedures (USCIS)	---	---	97%	95%	96%	95%	Retired	
Explanation: The deviation from the target was slight and there was no effect on overall program performance. The measures for the N-400 and the I-485 were revised to focus on the correctness of the adjudication decision.								
Average of processing cycle time (in months) for adjustment of status to permanent resident applications (I-485) (USCIS)	13.6	4.4	3.8	4.4	≤ 4	5.1	≤ 4	≤ 4
Explanation: USCIS experienced an increase in applications over the projected volume for both the I-485 (employment) and N-400 form types. The increase in applications required a reallocation of staffing which affected USCIS's ability to process the I-485 application within the prescribed targets. The program will adjust staffing levels to be consistent with the Staffing Allocation Model (some hiring has already begun) and utilize overtime to alleviate the backlog of receipts that occurred from this year.								

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Average of processing cycle time (in months) for naturalization applications (N-400) (USCIS)	8.7	4.2	4.5	4.6	≤ 5	4.6	≤ 5	≤ 5
Percent of Citizenship and Integration Grant Program grantees that meet annual performance plan goals (USCIS)	---	---	---	---	90%	92%	90%	90%

Note 1: The FY 2013 target previously published as 80 percent in the FY 2011 – 2013 Annual Performance Report was changed to 85 percent based on FY 2012 results.

USCIS's Electronic Immigration Application System

In 2012, U.S. Citizenship and Immigration Services (USCIS) launched the first two phases of its electronic immigration application system, known as USCIS ELIS. The system has been created to modernize the process for filing and adjudicating immigration benefits.

Historically, USCIS customers have had to apply for most benefits by mail and USCIS employees then review paper files and ship documents between offices to complete their adjudication. Under ELIS, eligible individuals can establish an account and apply online to extend or change their nonimmigrant status for certain visa types. ELIS also enables USCIS officers to review and adjudicate online filings from multiple agency locations across the country.

Benefits of using ELIS include filing applications and paying fees online, faster average processing times, and the ability to update user profiles, receive notices, and respond to requests electronically. The system also includes enhanced tools to combat fraud and identify national security concerns. As of September 30, 2012, 4,679 primary applications have been initiated online through ELIS.

Since the launch of ELIS in May 2012, the ELIS Customer Satisfaction Surveys show overwhelmingly positive results with 90.3 percent of respondents reporting a positive overall experience with ELIS and 94 percent of respondents would recommend ELIS to another USCIS applicant.

Table 8: Performance Measures for Goal 3.2: Prevent Unlawful Immigration

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of initial mismatches for authorized workers that are later determined to be "Employment Authorized" (USCIS)	---	---	---	0.28%	≤ 1.0%	0.24%	≤ 1.0%	≤ 1.0%

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Accuracy rate of USCIS's processing of manual verifications for Systematic Alien Verification for Entitlements (SAVE) referrals (USCIS)	---	---	---	---	98%	98%	Retired	
Percent of religious worker site visits conducted that result in a potential finding of fraud (USCIS)	---	---	---	1%	≤ 11%	7%	≤ 10% ¹	≤ 10%
Explanation: Although the target was met in FY 2012, USCIS implemented a more rigorous process through the use of Government Site Inspectors that are authorized to perform follow-up site visits or visit alternate locations if a beneficiary is not available at the site and on the date the initial visit is made. USCIS will continue to use this approach to uncover potential fraud.								
Percent of non-immigrant worker (H1-B) site visits conducted that result in a potential finding of fraud (USCIS)	---	---	---	1%	≤ 11%	15%	≤ 15% ²	≤ 15%
Explanation: In FY 2012, USCIS implemented a more rigorous process through the use of Government Site Inspectors that are authorized to perform follow-up site visits or visit alternate locations if a beneficiary is not available at the site and on the date the initial visit is made. USCIS will continue to use this approach to uncover potential fraud.								
Dollar value of fines assessed for employers who have violated the I-9 requirements (ICE)	---	---	\$6,956,026	\$10,914,356	\$7,237,049	\$29,851,659	Retired	
Number of employers arrested or sanctioned for criminally hiring illegal labor (ICE)	---	---	433	624	478	735	Retired	
Number of employers audited, sanctioned, or arrested for violating immigration-related employment laws or otherwise brought into compliance with those laws (ICE)	---	---	---	---	New Measure		1,800	1,854
Number of convicted criminal aliens removed per fiscal year (ICE)	---	---	195,772	216,698	220,350	225,390	225,390 ³	227,360
Percent of aliens arrested or charged who will be electronically screened through Secure Communities (ICE)	---	---	63.8%	75.57%	96%	97.96%	100% ⁴	100%

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Average length of stay in detention of all convicted criminal aliens prior to removal from the United States (in days) (ICE)	---	---	37	34.7	≤ 35	31.9	≤ 35	≤ 34.5
Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection (ICE)	---	---	---	95%	94%	97%	100% ³	100%

Note 1: The FY 2013 target previously published as less than ≤ 11 percent in the FY 2011 – 2013 Annual Performance Report was changed to ≤ 10 percent based on FY 2012 results.

Note 2: The FY 2013 target previously published as ≤ 11 percent in the FY 2011 – 2013 Annual Performance Report was changed to ≤ 15 percent based on FY 2012 results.

Note 3: The FY 2013 target previously published as 224,000 in the FY 2011 – 2013 Annual Performance Report was changed to 225,390 based on FY 2012 results.

Note 4: The FY 2013 target previously published as 94 percent in the FY 2011 – 2013 Annual Performance Report was changed to 100 percent based on FY 2012 results.

Detention and Removal of High-Risk Criminal Aliens

U.S. Immigration and Customs Enforcement (ICE) has implemented common sense policies that ensure our immigration laws are enforced in a way that best enhances public safety, border security and the integrity of the immigration system.

As part of this approach, ICE has adopted clear priorities that call for the agency's enforcement resources to be focused on removing from the country convicted criminals and other individuals that fall into priority areas for enforcement. ICE priorities include the identification and removal of those that have broken criminal laws, threats to national security, recent border crossers, and repeat violators of immigration law.

Through programs like Secure Communities and Operation Cross Check—and in conjunction with our local law enforcement partners—we have removed record numbers of criminal aliens from the United States. In FY 2012, ICE's Enforcement and Removal Operations (ERO) removed 225,390 criminal aliens, up from 195,772 in FY 2010, a 15.1 percent increase. Simultaneously, ERO has improved efficiencies and reduced the cost to detain criminal aliens. In FY 2012, the average length of stay in detention was 31.9 days, down 13.8 percent from the FY 2010 results of 37.0 days.

Mission 4: Safeguarding and Securing Cyberspace

DHS is responsible for protecting the federal Executive Branch civilian agencies and while working collaboratively with the private sector to protect the Nation's critical infrastructure. This includes

the “dot-gov” world, where the government maintains essential functions that provide services to the American people, as well as privately owned critical infrastructure which includes the systems and networks that support the financial services industry, the energy industry, and the defense industry.

We will achieve this mission through meeting the following goals:

Goal 4.1: Create a Safe, Secure, and Resilient Cyber Environment	<ul style="list-style-type: none"> •Ensure malicious actors are unable to effectively exploit cyberspace, impair its safe and secure use, or attack the Nation’s information infrastructure
Goal 4.2: Promote Cybersecurity Knowledge and Innovation	<ul style="list-style-type: none"> •Ensure that the Nation is prepared for the cyber threats and challenges of tomorrow

DHS Performance

In FY 2012, there were seven performance measures used to assess the Department’s efforts in *Mission 4: Safeguarding and Securing Cyberspace*. For the FY 2013 – 2014 plan, nine new measures are being introduced and four measures are being retired. Detailed results for each performance measure are provided in the following tables.

Table 9: Performance Measures for Goal 4.1: Create a Safe, Secure, and Resilient Cyber Environment

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of intelligence reports rated “satisfactory” or higher in customer feedback that enable customers to manage risks to cyberspace (AO)	---	---	---	---	80%	88%	90% ¹	90%
Percent of traffic monitored for cyber intrusions at civilian Federal Executive Branch agencies (NPPD)	---	---	---	---	55%	73%	70%	75%
Percent of Federal Executive Branch civilian networks monitored for cyber intrusions with advanced technology (NPPD)	---	---	---	31.9%	55%	52%	Retired	

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Explanation: The program made significant progress in FY 2012; however, the target was not met due to outstanding contract actions at 18 federal agencies that have delayed service initiation with their Managed Trusted Internet Protocol Service providers. Although this measure is being retired, the program office will continue to report monitoring status to the Office of Management and Budget, the National Security Staff, and the Office of the Director of National Intelligence.								
Number of cybersecurity vulnerability and resiliency assessments and self-assessments facilitated by DHS (NPPD)	---	---	---	---	New Measure		7,075	7,580
Percent of unique vulnerabilities detected during cyber incidents where mitigation strategies were provided by DHS (NPPD)	---	---	---	93%	95%	100%	Retired	
Percent of organizations that have implemented at least one cybersecurity enhancement after receiving a cybersecurity vulnerability assessment or survey (NPPD)	---	---	---	---	New Measure		50%	55%
Percent of cybersecurity mitigation strategies provided by DHS for unique vulnerabilities that are timely and actionable (NPPD)	---	---	---	---	50%	58%	60%	70%
Average amount of time required for initial response to a request for assistance from public and private sector partners to prevent or respond to major cyber incidents (in minutes) (NPPD)	---	---	---	138	< 90	14.1	Retired	
Percent of incidents detected by the U.S. Computer Emergency Readiness Team for which targeted agencies are notified within 30 minutes (NPPD)	---	---	---	---	New Measure		86%	87%

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions) (USSS)	\$410.9	\$534.2	\$6,946	\$1,480	\$279	\$476.1	Retired	
Amount of dollar loss prevented by Secret Service cyber investigations (in millions) (USSS)	---	---	---	---	New Measure		\$800	\$900
Number of financial accounts recovered (in millions) (USSS)	---	---	---	---	New Measure		2.0	2.1
Terabytes of data forensically analyzed and protected from future malicious use (USSS)	---	---	---	---	New Measure		1,600	1,800
Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas (USSS)	---	---	---	---	New Measure		1,000	1,000

Note 1: The FY 2013 target previously published as 80 percent in the FY 2011 – 2013 Annual Performance Report was changed to 90 percent based on FY 2012 results.

Cyber Workforce Initiative

DHS is focused on building the next generation of cybersecurity professionals to support the Department’s work today and in the future. In June 2012, Secretary Napolitano announced a new initiative through the Homeland Security Advisory Council, in conjunction with public and private sector partners, to develop an agile cyber workforce across the Federal Government. Since its creation, the Department has increased its cybersecurity workforce by more than 600 percent while working with universities to develop and attract talent through competitive scholarships, fellowships, and internship programs.

Table 10: Performance Measures for Goal 4.2: Promote Cybersecurity Knowledge and Innovation

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of planned cybersecurity products and services transitioned to commercial and open sources (S&T)	---	---	---	---	New Measure		60%	65%
Percent of projects that involve outside collaboration with DHS components, other government agencies, the private sector, universities and international offices to advance cybersecurity research efforts (S&T)	---	---	---	---	New Measure		60%	65%

Industrial Control Systems Cyber Emergency Response Team

DHS provides key analysis and assistance through its Industrial Control Systems Cyber Emergency Response Team (ICS-CERT) to protect the industrial control systems that help operate the U.S. power grid, manufacturing systems and other essential critical infrastructure from dangerous malware and viruses that may cause damage or destroy key resources.

In early December 2011, ICS-CERT responded to a cybersecurity incident affecting a rail company. The initial report indicated that the rail company was experiencing a cyber attack to its secondary communications equipment. ICS-CERT, working in coordination with asset owners, analyzed various data and determined that the incident was not the result of a targeted attack. In this case, the rail company quickly implemented effective measures to maintain the safety of its operation and worked closely with ICS-CERT to understand the incident and take appropriate mitigation measures.

In addition, DHS's ICS-CERT has been working since March 2012 with critical infrastructure owners and operators in the oil and natural gas sector to address a series of cyber intrusions targeting natural gas pipeline companies. In conjunction with the FBI and other federal agencies, ICS-CERT is working with affected organizations to prepare mitigation plans customized to their current network and security configurations to detect, mitigate, and prevent such threats.

Mission 5: Ensuring Resilience to Disasters

DHS coordinates the comprehensive federal efforts to prepare for, protect against, respond to, recover from, and mitigate a terrorist attack, natural disaster or other large-scale emergency, while working with individuals, communities, the private and nonprofit sectors, faith-based organizations, federal, state, local, tribal, and territorial partners to ensure a swift and effective recovery. The Department’s efforts to build a ready and resilient Nation include fostering a Whole Community approach to emergency management nationally; building the Nation’s capacity to stabilize and recover from a catastrophic event; bolstering information sharing and building unity of effort and common strategic understanding among the emergency management team; building plans and providing training to our homeland security partners; and promoting preparedness within the private sector.

We will achieve this mission through meeting the following goals:

DHS Performance

In FY 2012, there were 15 performance measures used to assess the Department’s efforts in *Mission 5: Ensuring Resilience to Disasters*. For the FY 2013 – 2014 plan, eight new measures are being introduced and seven measures are being retired. Detailed results for each performance measure are provided in the following tables.

Table 11: Performance Measures for Goal 5.1: Mitigate Hazards

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of households surveyed reporting they have taken steps to mitigate damage to property and protect themselves in the event of a disaster (FEMA)	---	---	---	27%	29%	36%	31%	33%
Percent of U.S. population (excluding territories) covered by planned mitigation strategies (FEMA)	---	---	---	68.7%	80%	70.96%	85%	85%
Explanation: Mitigation plans are updated on a five year review cycle. Although the target was not met, the Program is trending in a positive direction. The Program will continue to conduct targeted outreach and work with state and local governments to support their efforts in updating mitigation plans.								
Reduction in the potential cost of natural disasters to communities and their citizens (in billions) (FEMA)	\$2.53	\$3.12	\$2.98	\$3.40	\$2.40	\$2.97	\$2.40	\$2.40
Percent of communities in high earthquake, flood, and wind-prone areas adopting disaster-resistant building codes (FEMA)	---	---	---	48%	49%	56%	53%	57%

Table 12: Performance Measures for Goal 5.2: Enhance National Preparedness through a Whole Community Approach to Emergency Management

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of households surveyed reporting they have taken steps to be prepared in the event of a disaster (FEMA)	---	---	---	36%	37%	35%	Retired	
Explanation: Although the target was not met, one survey element showed a 6% increase in the number of households that reported they were more informed, which included training, familiarity with alert and warning systems, and familiarity with local hazards. FEMA will continue to work with stakeholders across the country to increase preparedness.								

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of households that, aside from a fire drill, participated in a preparedness exercise or drill at their workplace, school, or home in the past two years (FEMA)	---	---	---	---	New Measure		30%	33%
Percent of states with a Threat and Hazard Identification and Risk Assessment (THIRA) that meets current DHS guidance (FEMA)	---	---	---	---	New Measure		100%	100%
Percent of high-priority core planning capabilities ¹ rated as proficient by states and territories (FEMA)	---	---	---	---	New Measure		40%	43.5%
Number of corrective actions completed to improve performance following National Level Exercises (since FY 2007) (FEMA)	---	---	---	30	40	114	120 ²	127

Note 1: Please see the [FY 2012 National Preparedness Report](#) for a description of the core capabilities.

Note 2: The FY 2013 target previously published as 60 in the FY 2011 – 2013 Annual Performance Report was changed to 120 based on FY 2012 results.

National Preparedness Goal

In October 2011, DHS announced the release of the country's first-ever National Preparedness Goal. The goal is the first deliverable required under Presidential Policy Directive (PPD) 8: National Preparedness. The goal sets the vision for nationwide preparedness and identifies the core capabilities and targets necessary to achieve preparedness across five mission areas laid out under PPD 8—prevention, protection, mitigation, response, and recovery.

In March 2012, the first National Preparedness Report (NPR) was released which focuses on the five mission areas outlined in the National Preparedness Goal. Within these mission areas are 31 core capabilities central to preparedness. The NPR assesses each core capability and identifies areas where the Nation has made significant progress, opportunities for improvement and reinforces the core principles of national preparedness. The NPR is an annual reporting requirement, and the 2013 report will focus on progress made over the past year within the 31 core capabilities.

The NPR is part of a series of deliverables required under PPD 8 aimed at strengthening the security and resilience of the United States through systematic preparation for the threats that pose the greatest risk to the security of the Nation, including acts of terrorism, cyber attacks, pandemics, and catastrophic natural disasters.

Table 13: Performance Measures for Goal 5.3: Ensure Effective Emergency Response

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of the U.S. population directly covered by FEMA connected radio transmission stations (FEMA)	---	---	---	84%	90%	85%	90%	90%
Explanation: FEMA faced some implementation delays at seven stations in the latter part of FY 2012. Six of these stations are scheduled to be online in FY 2014 and the seventh station is scheduled to be online in FY 2014.								
Percent of time that critical communications for response operations are established within 12 hours (FEMA)	---	---	---	100%	100%	100%	Retired	
Percent of urban search and rescue teams arriving on scene within 12 hours of deployment notification (FEMA)	---	---	---	100%	100%	100%	Retired	
Percent of essential incident command functions (enabled through response teams and operations centers) that are established within 12 hours (FEMA)	---	---	---	100%	100%	100%	Retired	
Percent of Incident Management Assistance Teams establishing joint federal and state response objectives within 18 hours (FEMA)	---	---	---	---	New Measure		100%	100%
Percent of incident management and support actions necessary to stabilize a jurisdiction within 72 hours or by the agreed upon time (FEMA)	---	---	---	---	New Measure		100%	100%
Percent of orders for required life-sustaining commodities (meals, water, tarps, plastic sheeting, cots, blankets and generators) and key initial response resources delivered by the agreed upon date (FEMA)	---	---	97.5%	93.3%	95%	92.8%	95%	95%
Explanation: Several factors impacted this measure including: a lack of availability and delayed arrival of shipments for a number of transportation carriers during the Derecho in late June 2012; changes in original delivery locations of shipments without an adjustment to the established order requested delivery date; and a small number of								

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
partner-sourced vendors did not meet planned timelines for sourcing and movement during Hurricane Isaac. None of the 19 delayed orders (representing 80 of 3,063 separate shipments) impacted mission support. FEMA will continue to work with its ESF-7 Partners to ensure accurate and timely requested delivery dates are used to ensure effective response following a disaster.								
Percent of jurisdictions with access to the FEMA National Shelter System which allows users to locate and monitor open congregate shelters (FEMA)	---	---	---	24%	40%	23%	Retired	
Explanation: Thirteen states and territories have memoranda of agreements with FEMA to use the National Shelter System. FEMA has shifted efforts to develop data exchanges between systems that would allow states and territories to enter the shelter data in the IT system they currently use and the data would be instantly viewable in the FEMA National Shelter System. FEMA will continue to work with states and territories to increase the number of memoranda of agreements following the establishment of data exchanges.								
Percent of high-risk urban areas designated within the Urban Areas Security Initiative (UASI) able to demonstrate increased Emergency Communications capabilities (NPPD)	---	---	---	---	50%	N/A	Retired	
Explanation: This measure is being reported as unreliable for FY 2012. The Office of Emergency Communications did not have the mechanism to collect the data required to report results for this measure. The measure is being retired as the program does not have the ability to develop a reliable methodology to collect the needed data.								
Percent of urban area interoperable communications capabilities that are rated at the most advanced levels (NPPD)	---	---	---	---	New Measure		50%	55%
Percent of calls made by National Security/Emergency Preparedness users during emergency situations that DHS ensured were connected (NPPD) ¹	97.0%	94.2%	99.4%	97.8%	90%	99.4%	100% ²	100%

Note 1: Previous measure name: Government Emergency Telecommunications Service call completion rate during emergency communication periods.

Note 2: The FY 2013 target previously published as 90 percent in the FY 2011 – 2013 Annual Performance Report was changed to 100 percent based on FY 2012 results.

Hurricane Isaac Response and Recovery Efforts

On the evening of August 28, 2012, Hurricane Isaac made landfall along the coast of Louisiana and continued to impact Gulf Coast communities for days thereafter. Within hours, both Louisiana and Mississippi received Presidential disaster declarations allowing federal assistance to flow into those states. FEMA and other federal agencies deployed prior to the storm and located in states all along the Gulf Coast to prepare for and be ready to respond to the damages of Isaac. Supply centers in the anticipated impact areas were stocked with supplies including large and small generators in expectation of widespread power outages.

Hurricane Isaac demonstrated the value of mitigation projects put in place following Hurricane Katrina allowing communities along the Gulf Coast to successfully respond to and recover from Isaac's impact.

Table 14: Performance Measures for Goal 5.4: Rapidly Recover from a Catastrophic Event

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of eligible applicants provided temporary housing (including non-congregate shelters, hotel/motel, rental assistance, repair and replacement assistance, or direct housing) assistance within 60 days of a disaster (FEMA)	---	---	99.5%	99%	97%	99.78%	Retired	
Percent of recovery services through Individual Assistance delivered to disaster survivors gauging the quality of program services, supporting infrastructure, and customer satisfaction following a disaster (FEMA)	---	---	---	---	New Measure		91%	92%

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of recovery services through Public Assistance delivered to communities gauging the quality of program services, supporting infrastructure, and customer satisfaction following a disaster (FEMA)	---	---	---	---	New Measure		92%	93%

Providing Essential Support to National and Economic Security

DHS leads and supports many activities that provide essential support to national and economic security including, but not limited to: maximizing collection of customs revenue; maintaining the safety and security of the marine transportation system; preventing the exploitation of children; providing law enforcement training; and coordinating the Federal Government’s response to global intellectual property theft. DHS contributes in many ways to these elements of broader U.S. national and economic security while fulfilling its homeland security missions.

We will achieve this through meeting the following goals:

Goal : Collect Customs Revenue and Enforce Import/Export Controls	<ul style="list-style-type: none"> •Maximize the collection of customs revenue and protect U.S. intellectual property rights and workplace standards
Goal: Ensure Maritime Safety and Environmental Stewardship	<ul style="list-style-type: none"> •Prevent loss of life in the maritime environment, maintain the marine transportation system, and protect and preserve the maritime environment
Goal: Conduct and Support Other Law Enforcement Activities	<ul style="list-style-type: none"> •Prevent the exploitation of individuals and provide law enforcement training for the execution of other non-DHS federal laws and missions
Goal: Provide Specialized National Defense Capabilities	<ul style="list-style-type: none"> •Support national defense missions and post-conflict reconstruction and stabilization

DHS Performance

In FY 2012, there were eight performance measures used to assess the Department’s efforts in *Providing Essential Support to National and Economic Security*. Detailed results for each performance measure are provided in the following tables.

Table 15: Performance Measures for Goal: Collect Customs Revenue and Enforce Import/Export Controls

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of import revenue successfully collected (CBP) ¹	---	---	---	99.12%	100%	98.88%	100%	100%
Explanation: During the random sample review process, CBP found misclassification errors that resulted in a reduction of revenue collected. CBP will target importers to ensure shipments are classified correctly.								

Note 1: Previous measure name: Percent of revenue directed by trade laws, regulations, and agreements successfully collected.

Table 16: Performance Measures for Goal: Ensure Maritime Safety and Environmental Stewardship

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of people in imminent danger saved in the maritime environment (USCG)	76.8%	77.3%	74.4%	77.3%	100%	77.3%	100%	100%
Explanation: The Search and Rescue program strives to save 100% of lives in imminent danger in the maritime environment. Many uncontrollable variables influence the number and outcome of search and rescue incidents (weather, location, incident severity, life saving devices on board, etc.). In FY 2012, the U.S. Coast Guard saved 3,560 lives in 19,790 search and rescue cases; of the 726 lives lost, 424 (63%) were lost prior to U.S. Coast Guard notification. The remaining 302 (37%) lives were lost before assistance arrived on scene. To reduce the number of lives lost prior to notification, the U.S. Coast Guard works with stakeholders to provide outreach and education on boating safety through the Office of Auxiliary and Boating Safety. The U.S. Coast Guard will continue to allocate search and rescue assets to maximize effectiveness.								
Five-year average number of commercial and recreational boating deaths and injuries (USCG)	---	---	---	4,567	≤ 4,642	4,469	≤ 4,546	≤ 4,503
Availability of maritime navigation aids (USCG)	98.3%	98%	98.5%	98.5%	97.5%	98.3%	97.5%	97.5%
Number of detected incursions of foreign fishing vessels violating U.S. waters (USCG)	81	112	82	122	< 140	160	< 140 ¹	< 148 ²

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Explanation: The U.S. Coast Guard documented 160 illegal Exclusive Economic Zone (EEZ) incursions by foreign fishing vessels in FY 2012. This represents a 31% increase in detected incursions from FY 2011 and there has been a positive trend in detected incursion of the U.S. EEZ since FY 2010. The increase in detected incursions is a result of increased U.S. Coast Guard patrol hours in high threat areas, such as the Gulf of Mexico. District 17 (Alaska) also gained additional capabilities to monitor international Vessel Monitoring Systems and Automated Identification Systems, resulting in increased detections. 25% of detected incursions involved the seizure of foreign fishing gear with no associated vessel nearby, which qualifies as a detected incursion. The U.S. Coast Guard will continue to conduct targeted patrols based on intelligence to best utilize available resources to deter foreign fishing vessels from entering the U.S. Exclusive Economic Zone.								
Fishing regulation compliance rate (USCG)	95.3%	96.7%	97.2%	97.4%	96%	98.3%	96%	96.5%

- Note 1: The FY 2013 target previously published as < 85 in the FY 2011 – 2013 Annual Performance Report was changed to < 140 based on FY 2012 results.
- Note 2: HC-144s, once delivered to Sector Corpus Christi, will provide greater on station capability, leading to a further increase in detections, both in close and far from shore.

Protecting the Nation’s Living Marine Resources

Protecting the Nation’s living marine resources is an important law enforcement function and is one of the U.S. Coast Guard’s eleven Congressionally-mandated missions. Protecting commercial and recreational fisheries not only ensures sustainable fish stocks, it safeguards billions of dollars generated by the industry and preserves thousands of jobs for U.S. citizens.

Eighty miles south of Galveston, Texas, the crew of the U. S. Coast Guard Cutter Heron detected three radar contacts within a shrimp closure area. The boarding team geared up while the remaining crewmembers maintained cutter watches, continued tracking the vessels, and began collecting evidence for case packages. In coordination with the National Marine Fisheries Service, all three vessels were stopped, boarded, and escorted back to port. After working close to 24 hours, Heron’s crew and the National Marine Fisheries Service seized most of the catch, which brought in a fair market value of more than \$47,000. With a short turnaround time, the crew completed the evidence packages and forwarded them to the Fisheries Service to continue a formal investigation.

In less than a week’s time, Heron’s crew was responsible for five fisheries seizures, totaling more than 31,000 pounds of shrimp and netting a fair market value of more than \$69,000. The seizures exemplify the partnerships with federal and state entities to identify, disrupt, and eliminate illegal fishing in the Gulf of Mexico.

Table 17: Performance Measures for Goal: Conduct and Support Other Law Enforcement Activities

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Number of Federal law enforcement training programs and/or academies accredited or re-accredited through the Federal Law Enforcement Training Accreditation process (FLETC)	---	50	52	66	74	83	99 ¹	107
Percent of National Center for Missing and Exploited Children (NCMEC) examinations requested that are conducted (USSS)	---	---	---	100%	100%	100%	100%	100%

Note 1: The FY 2013 target previously published as 82 in the FY 2011 – 2013 Annual Performance Report was changed to 99 based on FY 2012 results.

Cross-Cutting Performance Measures

Some of the Components’ efforts, by the very nature of their work, support multiple missions in DHS. Specific examples include awareness and understanding of risks and threats offered by Analysis and Operations, research and development to advance technology and processes provided by Science and Technology, and law enforcement training both within DHS and with our law enforcement partners delivered by the Federal Law Enforcement Training Center. Below are the current measures to reflect cross-cutting results.

Table 18: Cross-Cutting Performance Measures

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of initial breaking homeland security blast calls initiated between the National Operations Center and designated homeland security partners within targeted timeframes (AO) ¹	---	88%	100%	100%	95%	100%	95%	95%

Performance Measures	Prior Year Results				FY 2012		Planned Targets	
	FY08	FY09	FY10	FY11	Target	Results	FY13	FY14
Percent of Partner Organizations that agree the Federal Law Enforcement Training Center training programs address the right skills (e.g., critical knowledge, key skills and techniques, attitudes/behaviors) needed for their officers/agents to perform their law enforcement duties (FLETC) ²	79.75%	82%	96%	98.5%	97%	96%	97%	97%

Explanation: The deviation from the target was slight and there was no effect on overall program performance. FLETC is committed to providing the best training possible to all law enforcement organizations by establishing and maintaining a robust process to examine law enforcement trends and emerging issues.

- Note 1: Previous measure name: Percent of breaking homeland security situations integrated and disseminated to designated partners within targeted timeframes.
- Note 2: Previous measure name: Percent of Partner Organizations satisfied that the Federal Law Enforcement Training Center training programs address the right skills needed for their officers/agents to perform their law enforcement duties.

Priority Goals

In the FY 2013 Budget, the Obama Administration defined Agency Priority Goals (APG), which represent areas in which the Administration has identified opportunities to significantly improve near-term performance. These goals are a subset of each agency's critical efforts, which also include long-term strategic goals and goals dependent on new legislation or additional funding.

Per the *GPR Modernization Act* requirement to address Cross-Agency Priority Goals in the agency strategic plan, the annual performance plan, and the annual performance report please refer to www.Performance.gov for the agency's contributions to those goals and progress, where applicable.

Cross-Agency Priority Goal

Per the GPR Modernization Act requirement to address Cross-Agency Priority Goals in the agency strategic plan, the annual performance plan, and the annual performance report please refer to www.Performance.gov for the agency's contributions to those goals and progress, where applicable. The Department currently contributes to the following CAP Goal: Cybersecurity.

Agency Priority Goals

Agency Priority Goal 1: Strengthen Aviation Security Counterterrorism Capabilities by Using Intelligence-Driven Information and Risk-Based Decisions

Goal Lead: Howard Goldman, Senior Counselor and Director, Office of Policy Coordination and Intergovernmental Affairs, Office of the Administrator

Goal Statement: Strengthen aviation security counterterrorism capabilities by using intelligence driven information and risk-based decisions. By September 30, 2013, TSA will expand the use of risk-based security initiatives to double the number of passengers going through expedited screening at airports, thereby enhancing the passenger experience.

Overview: TSA performs and oversees security operations at the nation's airports, screening over 600 million passengers annually, to ensure the freedom of movement of people and commerce. In an effort to strengthen aviation security while enhancing the passenger experience, TSA is focusing on risk-based, intelligence driven security procedures and enhancing its use of technology. By learning more about travelers through information they voluntarily provide, and combining that information with our multi-layered system of aviation security, TSA can better focus limited resources on higher-risk and unknown passengers. Since efforts began in 2011, the agency has implemented several risk-based initiatives, such as: the deployment of modified screening protocols for passengers 12 and younger; passengers 75 and over; active duty service members; exempting Veterans on chartered Honor Flights from physical screening; and the deployment of the TSA Pre✓™ program.

While driving the growth of trusted traveler populations that comprise TSA Pre✓™ is key to the program's long term success, TSA faces challenges in aligning, planning, and executing activities for incorporating these various populations into the program. In addition, the success of achieving TSA's risk-based security milestones is in many ways reliant upon external and internal partners. For example, expansion and growth of TSA Pre✓™ is contingent upon airline technical integration, as well as the U.S. Customs and Border Protection's (CBP) Global Entry program. Accordingly, participation rates and application processing times can impact TSA Pre✓™ volume at some airports. Further challenging TSA, the agency is fundamentally changing the way it trains its officers under a risk-based security model since Transportation Security Officers were originally trained to screen all passengers in the same manner since its inception. This Priority Goal contributed to achieving DHS's Mission 1: Preventing Terrorism and Enhancing Security.

Progress Update: As of September 30, 2011, as a result of the nationwide deployment of screening protocols for passengers 12 and under and the Honor Flights policy decision, approximately 59,500 of the 1.7 million passengers per day were eligible for expedited screening based on assessed low risk. By the end of Q4 FY12, with the deployment of initiatives such as TSA Pre✓™ and modifying screening protocols for passengers 75 and older, this population has grown to 122,684 passengers per day.

As of the end of Q4 FY12, TSA Pre✓™ was operating at 24 airports for select frequent flyers of Alaska Airlines, American Airlines, Delta Air Lines, United Airlines, and/or US Airways and members of CBP Trusted Traveler programs. Since TSA Pre✓™ began in October 2011, more than 3 million passengers have received expedited screening through TSA Pre✓™ security lanes.

TSA kiosks have been placed at two airports with TSA Pre✓™ operations in order to solicit passenger feedback. The initial data shows that passengers are very satisfied with TSA Pre✓™ security screening.

Next Steps: Risk-based screening initiatives will continue to expand to additional airports during FY13 Q1 and Q2 as TSA explores integrating additional low risk populations who voluntarily provide information about themselves.

- **Milestone:** In order to expand the ability to conduct expedited screening, expand TSA Pre✓™ to eligible passengers flying on six participating airlines at 35 airports.

Description: As airline and airport participation grows, the volume of passengers able to participate in TSA Pre✓™ also grows, as does the value of the TSA Pre✓™ program to new participants. Expanding the TSA Pre✓™ program allows TSA to further focus its efforts on those passengers who are more likely to pose a risk to transportation while enhancing the travel experience for more travelers.

- **Milestone:** In order to expand the capacity to process crewmembers eligible for expedited screening, expand the Known Crewmember program to 31 airports.

Description: The Known Crewmember program collaborates with airports to build out their physical capacity to provide expedited screening for flight crew through designated portals.

- **Milestone:** In order to expand to other low risk populations, include Canadian NEXUS members in TSA Pre✓™.

Description: Canadian citizens traveling domestically in the U.S. who are members of the CBP and Canada Border Services Agency (CBSA) NEXUS program are eligible to participate and may receive expedited screening at participating U.S. airports.

- **Milestone:** In order to increase screeners’ ability to identify potentially suspicious behavior, behavioral awareness training will be provided to field personnel at 95% of federalized airports.

Description: This broadens the base of field screening workforce able to identify potentially suspicious behavior. This is not the Behavior Detection Officer (BDO) role; this training is targeted to non-BDOs to further enable TSA’s real-time threat assessment capabilities.

Future Actions: For FY 2013 (Q3 and Q4), additional airlines are forecasted to join TSA PreP™. TSA will continue deployment to additional airports and expand expedited screening to additional low-risk populations throughout the year.

- **Milestone:** In order to expand the ability to conduct expedited screening, expand TSA Pre✓™ to eligible passengers flying on 7 participating airlines at 50 airports.

Description: As airline and airport participation grows, the volume of passengers able to participate in TSA Pre✓™ also grows, as does the value of the TSA Pre✓™ program to new participants. Expanding the TSA Pre✓™ program allows TSA to further focus its efforts on those passengers who are more likely to pose a risk to transportation while enhancing the travel experience for more travelers.

Results:

Table 19: Agency Priority Goal 1 Performance Measures

Performance Measures	FY12 Target	FY12 Results	FY 13 Target
Number of daily passengers who have qualified for expedited physical screening based on assessed low risk	89,250	122,684	255,000
Percent of domestic air enplanements vetted against the terrorist watchlist through Secure Flight	100%	100%	100%
Percent of international air enplanements vetted against the terrorist watchlist through Secure Flight	100%	100%	100%
Level of passenger security screening assessment results, (including TSA Pre✓™ screening assessment results)	Classified	Classified	Classified

Performance Measures	FY12 Target	FY12 Results	FY 13 Target
Level of baggage security screening assessment results	Classified	Classified	Classified
Percent of passengers satisfied with TSA Pre✓™ security screening, calculated via checkpoint kiosk surveys.	90%	93%	95%
Percent of nationwide airport operational hours with wait times of less than 20 minutes	99%	99.05%	99%
Average number of days for DHS Traveler Redress Inquiry Program (TRIP) redress requests to be closed	< 97	93	< 93

Agency Priority Goal 2: Enforcing and Administering our Immigration Laws through Detention and Removal Efficiency

Goal Lead: Gary Mead, ICE Executive Associate Director, Enforcement and Removal Operations

Goal Statement: Improve the efficiency of the process to detain and remove criminal aliens from the United States. By September 30, 2013, reduce the average length of stay in immigration detention of all convicted criminal aliens prior to their removal from the country by 5 percent.

Overview:

U.S. Immigration and Customs Enforcement (ICE) is committed to identifying, arresting, detaining, prosecuting, and removing aliens who present a danger to national security or are a risk to public safety, as well as those who otherwise undermine the integrity of our immigration laws and the Department’s border security efforts. These include, but are not limited to, felons and repeat offenders, organized criminal gang members and aliens engaged in or suspected of terrorism or espionage. Also critical to ICE enforcement priorities are recent illegal border crossers. The five percent reduction in the average length of stay is based on the result of 37 days obtained when this goal was first initiated in FY 2010.

ICE is working to increase efficiencies in every step of the removal process to reduce the duration of an alien’s stay in ICE custody, while ensuring transparency, accountability, and detainees’ quality of life through improved detention standards. Increased efficiency in detention and removal operations will further enable ICE to focus finite resources on these priorities. Additionally, ICE is coordinating with countries outside of the United States to expand the use of an electronic travel document (eTD) system to support removals. The primary elements in this strategy include identifying and removing all high-risk fugitives; ensuring that aliens who have already been identified as convicted criminals are expeditiously removed; and developing and maintaining efficient removal programs. This Priority Goal contributed to achieving DHS’s Mission 3: Enforcing and Administering Our Immigration Laws.

Progress Update: By limiting detainee transfers (which increase the average length of stay), utilizing lower cost detention facilities, and renegotiating daily detention bed rates where possible, ICE has had success in keeping the average length and cost of stay below the target goals, while exceeding established federal detention standards. The average length of stay for criminal detainees is currently 31.9 days, below the FY 2012 target goal of 35 days. Additionally, the average bed cost per day is \$118.14, which is below the \$122.00 target goal set for FY2012.

ICE has continued to implement Secure Communities, a simple and common sense way to carry out ICE's priorities using an already-existing federal information-sharing partnership between ICE and FBI that helps to identify criminal aliens without imposing new or additional requirements on state and local law enforcement. In FY 2012 (as of September 30, 2012), Secure Communities activated a total of 3,074 jurisdictions nationwide, bringing coverage to approximately 98 percent of the foreign-born non-citizen population (individuals born outside the United States and who are not U.S. citizens). As of the first quarter of FY 2013, Secure Communities completed nationwide activation.

Next Steps: For FY 2013 Q1 and Q2, ICE has established the following milestones:

- **Milestone:** Conduct a review of ICE's Criminal Alien Program's (CAP) screening at all 24 field offices to evaluate the strengths, weaknesses, and potential realignment of resources for increased CAP jail coverage or expansion of at large operations in order to increase its current coverage of jails from FY 2012's approximate 37%.
- **Description:** CAP will evaluate program successes through statistical analysis of immigration arrests, encounters and charging documents issued to determine future realignment of resources to further enhance efficiency and effectiveness of the CAP program.
- **Milestone:** In order to increase program efficiency, provide a status report and recommendations to ICE Enforcement and Removal Operations (ERO) leadership on key indicators showing progress toward the targeted Average Length of Stay (ALOS) in detention and removal facilities.
- **Description:** Criminal ALOS, or the length of time a criminal alien remains in ICE custody prior to removal, is a significant cost driver. Custody Operations continue to monitor criminal ALOS and factors impacting criminal ALOS. Successful achievement of this milestone will help reduce criminal ALOS relative to the intake and removal of criminal aliens.

Future Actions: For remainder of FY 2013 (Q3 and Q4), the program has established the following milestones:

- **Milestone:** Deploy Institutional Removal Case Management (IRCM) standard procedures in two FOD locations. IRCM will work to achieve 100% screening of existing jail/prison facilities by dedicating its resources toward identifying and processing criminal aliens amenable to removal while incarcerated, with the end goal of obtaining an order of removal

prior to the alien being remanded into ICE custody. This is expected to reduce detention costs and expedite the removal of criminal aliens.

- **Description:** Upon implementation of the IRCM standard procedures, ERO estimates that a significant number of current removals will be expedited through the issuance of removal orders prior to the alien coming into ICE custody. This will significantly decrease ICE detention costs as proposed in future budgets. CAP will develop an action plan to establish IRCM in two field offices that actively conduct internal jail screenings.
- **Milestone:** In order to continue focusing on enforcement priorities, ICE will conduct two CAP surge operations in order to expand the jurisdictions where CAP is deployed in order to identify and remove increased numbers of criminal aliens. Surge Operations are the influx of CAP resources in jails and prisons, as well as at-large operations aimed at identifying and removing criminal aliens.
- **Description:** This milestone will be achieved through an analysis of the successes from the previous year's operations. These results and the determination of the FY 2013 operations funding will inform the ability of ERO to improve the efficiency of the process to use CAP resources to identify and remove criminal aliens from the United States.

Results:

Table 20: Agency Priority Goal 2 Performance Measures

Performance Measures	FY12 Target	FY12 Results	FY 13 Target
Average length of stay in detention of all convicted criminal aliens prior to removal from the United States	≤ 35 days	31.9 days	≤ 35 days
Number of convicted criminal aliens removed per fiscal year	220,350	225,390	225,390
Number of aliens removed convicted of the most serious crimes (level 1 offenders)	80,050	77,954	85,000
Explanation: The FY 2012 result of 77,954 was a 3.8 percent improvement over the FY 2011 record results of 75,086. Based on the FY 2011 results, ICE set very aggressive targets for this category of removals, and will continue to prioritize its enforcement resources to those that affect national security, border security, public safety, and the integrity of the immigration system.			
Estimated average bed cost per day	≤ \$122	\$118.14	≤ \$122
Percent of aliens arrested or charged who will be electronically screened through Secure Communities ¹	96%	97.96%	100%

Note 1: Secure Communities uses the interoperability between the Department of Justice fingerprint database (IAFIS) and the DHS immigration database (IDENT) which allows a single query by a participating local law enforcement agency to check both systems and confirm the identification and immigration status of an individual.

Agency Priority Goal 3: Ensure Resilience to Disasters by Strengthening Disaster Preparedness and Response Capabilities

Goal Lead: David Kaufman, Associate Administrator for Policy, Program Analysis, and International Affairs

Goal Statement: Ensure resilience to disasters by strengthening disaster preparedness and response capabilities. By September 30, 2013, every state will have a current, DHS-certified threat, hazard, identification, and risk assessment (THIRA).

Overview: As recognized in the National Preparedness Goal, a secure and resilient Nation is one that can, in the shortest time possible and under all conditions, successfully prevent, protect, respond, recover, or mitigate threats that pose the greatest risk to the country. The National Preparedness Goal was developed as required by the National Preparedness System, as established by Presidential Policy Directive 8: National Preparedness. FEMA is improving its capabilities and strengthening state, local, individual and private sector preparedness by ensuring every state has a current, DHS-certified Threat, Hazard, Identification, and Risk Assessment (THIRA). Analysis of the THIRA results will guide future efforts by educating individuals, families, businesses, organizations, and executive leaders on the risks facing a community and on their roles in preparedness. To complement these efforts, FEMA is also providing training to individuals at all levels of government to better prepare for disasters, while ensuring orders for life-sustaining commodities and resources are delivered on time during emergencies. This Priority Goal contributed to achieving DHS's Mission 5: Ensuring Resilience to Disasters.

Progress Update: The measures on the delivery of life-sustaining commodities and preparedness training are trending at or above the FY 2012 targets, and are projected to meet the annual targets. For the other two measures, baseline data base been established for "*Percent of high priority core capabilities rated as proficient by states and territories (Planning)*," and FEMA expects to have results for the THIRA measure during the second quarter of FY 2013. All milestones are projected to be met in FY 2012.

Next Steps: For FY 2013 Q1 and Q2, the program has established the following milestones:

- **Milestone:** All 56 states and territories submit their THIRA, developed using the process described in CPG 201.

Description: Development of a state THIRA is the first step in implementing the National Preparedness System. States will use the THIRA process to establish capability targets using a consistent, comprehensive, and integrated process of identifying threats and hazards.

- **Milestone:** All 56 states and territories submit their calendar year (CY) 2012 State Preparedness Report (SPR).

Description: Capability assessment is the next step in fully implementing the National Preparedness System. States and territories will assess their current capability levels against the capability targets identified in the THIRA process.

- **Milestone:** FEMA analyzes SPR results for inclusion in the 2013 National Preparedness Report.

Description: SPR results provide valuable information on the states' capabilities in building and sustaining the core capabilities in the National Preparedness Goal. This information informs findings in the annual National Preparedness Report.

- **Milestone:** FEMA regions review the THIRA for compliance with CPG 201 and provide feedback to the states and territories.

Description: FEMA will review the THIRAs for compliance with current guidance and continue to offer assistance to states and territories to improve future iterations of their THIRAs. FEMA regions and FEMA's National Integration Center assist states and territories with THIRA revisions and technical assistance on planning, as needed.

Future Actions: For remainder of FY 2013 (Q3 and Q4), the program has established the following milestones:

- **Milestone:** Conduct the National Preparedness Directorate Annual National Training, 2013.

Description: This annual event highlights new FEMA training and exercise initiatives and State best practices related to emergency management training and exercises.

- **Milestone:** FEMA publishes The National Preparedness Report (NPR), sent to the President March 30, which contains the aggregated SPR results from all states and territories.

Description: The National Preparedness System requires the submission of a yearly National Preparedness Report (NPR). The NPR identifies areas where the Nation has made significant progress, acknowledges remaining opportunities for improvement, and reinforces the important principles of national preparedness.

- **Milestone:** State and territory THIRA and SPR results are incorporated into FEMA Regional THIRAs.

Description: Consistent with the National Preparedness System, FEMA regions use the state and territory THIRAs and SPR results to inform the next iteration of the regional THIRAs. FEMA Regions, working with its partners, identifies and implements priority actions to address state and territory THIRA and SPR results.

- **Milestone:** FEMA publishes the CY 2013 SPR tool.

Description: To ensure consistency of data and continued implementation of the capability assessment aspect of the National Preparedness System, the CY 2013 SPR tool will continue to be an online, interactive tool that guides states and territories through the SPR assessment process.

- **Milestone:** Achieve full implementation of Logistics Supply Chain Management System (LSCMS) capabilities enabling the most efficient, streamlined warehousing, shipment, and transportation processes to ensure consistent attainment of 95 percent on time order delivery rate in support of disaster survivors.

Description: FEMA will transition from a partial manual supply chain management system that is currently being used to track assets to transitioning to the LSCMS. LSCMS will fully automate and integrate system and processes for complete end-to-end supply chain management and situational awareness enabling on-time delivery of critical life-sustaining resources to the States and disaster survivors. The current process and system requires entries from numerous disparate systems for tracking entries and reporting information from Distribution Centers, and other designated delivery sites. LSCMS will generate “real time” updated reports from data input through the (1) request, (2) ordering, (3) shipment, and (4) receiving capabilities.

Results:

Table 21: Agency Priority Goal 3 Performance Measures

Performance Measures	FY12 Target	FY12 Results	FY 13 Target
Percent of states with a Threat and Hazard Identification and Risk Assessment (THIRA) that meets current DHS guidance ¹	N/A	N/A	100%
Percent of orders for required life-sustaining commodities (meals, water, tarps, plastic sheeting, cots, blankets and generators) and key initial response resources delivered by the agreed upon date	95%	92.8%	95%
Explanation: Several factors impacted this measure including: a lack of availability and delayed arrival of shipments for a number of transportation carriers during the Derecho in late June 2012; changes in original delivery locations of shipments without an adjustment to the established order requested delivery date; and a small number of partner-sourced vendors did not meet planned timelines for sourcing and movement during Hurricane Isaac. None of the 19 delayed orders (representing 80 of 3,063 separate shipments) impacted mission support. FEMA will continue to work with its ESF-7 Partners to ensure accurate and timely requested delivery dates are used to ensure effective response following a disaster.			
Percent of attendees from all levels of government including tribal, public and private sector, and non-governmental organizations reporting they are better prepared to deal with disasters and emergencies as a result of training	96%	96.42%	96%
Percent of high priority core capabilities rated as proficient by states and territories (Planning)	N/A	39.6%	40%

DHS Workforce Strategy

The DHS Workforce Strategy, signed by Secretary Napolitano in December of 2010, has continued to provide a unifying framework for human capital priorities across DHS. Overall, FY 2012 was an important year for maturing the Strategy; Component alignment to the Strategy improved, and the Office of the Chief Human Capital Officer (OCHCO) devoted increased staffing resources to implementation and oversight. Moreover, in conjunction with the 2012 Management Delegation, OCHCO anticipates that the DHS Workforce Strategy will strengthen the relationship between Components and OCHCO, and that the Workforce Strategy will also facilitate greater cross-Component dialogue around best practices and common challenges.

Key milestones have included revalidating the performance measures associated with the Strategy, and instituting a detailee position within OCHCO to further encourage Component investment and collaboration. Moreover, Components have submitted their FY 2012 performance data and FY 2013 operational plans.

Examples of key accomplishments in each of the four goal areas of the DHS Workforce Strategy follow below.

Goal 1: Build an effective, mission-focused, diverse and inspiring cadre of leaders.

- DHS continued to make progress in implementing the DHS Leader Development Framework which provides a strategic roadmap for developing a consistent, seamless continuum of leader development opportunities across the Department over the next 3 to 5 years. The “Cornerstone” program, identified by the Deputy Secretary as a top priority, has reached roughly 80 percent of first-line supervisors. A pilot of the “Capstone” course for new Senior Executive Service (SES) and U.S. Coast Guard flag officers reached 24 new SES members.
- OCHCO implemented an improved selection process for the second cohort of the DHS-wide SES Candidate Development program. The new process is more cost-effective, and there was a more-than 100 percent increase in applications compared to the first cohort.

Goal 2: Recruit and build a highly qualified and diverse workforce.

- Secretary Napolitano signed DHS’s first-ever Diversity and Inclusion Strategic Plan on September 17, 2012. The Plan, which has been reviewed by OPM and OMB, provides a basis for DHS and Component diversity metrics that are prepared and analyzed every quarter to gauge our progress in achieving the Department’s diversity goals.
- In FY 2012, DHS surpassed the Veterans Council hiring goals for veterans and for disabled veterans, and DHS also continues to exceed the Secretary’s goal of employing more than 50,000 veterans.
- OCHCO centralized the administration of DHS-wide internship programs, the recent graduates program, and the Presidential Management Fellows under the Student Programs

and Services office, and worked closely with the Office of Academic Engagement to develop the Secretary's Honors Program.

Goal 3: Retain an engaged workforce.

- The CHCO established and led the Employee Engagement Executive Steering Committee (EE ESC), which has met five times since the spring to develop a DHS employee engagement action plan. One key focus of the EE ESC was to encourage high levels of employee participation in the Federal Employee Viewpoint Survey, since this was the first year the survey was sent to all employees. This effort was successful, with an overall response rate of 47 percent. This is slightly higher than the government-wide average, despite the fact that much of our field-based workforce does not regularly log onto a computer.
- OCHCO added a new anti-harassment unit within the Diversity and Inclusion division to support the Department's anti-harassment policy for DHS Headquarters in compliance with new procedures developed by OCHCO, the Office for Civil Rights and Civil Liberties, and the Office of the General Counsel.

Goal 4: Solidify a unified DHS culture of mission performance, adaptability, accountability, equity and results through linking overall priorities, strategy, risk and investments.

- The Deputy Secretary signed the first-ever Human Resources Information Technology (HRIT) Strategic Plan in April of 2012, marking senior-level support for the work of the Human Capital Business Systems division of OCHCO and the HRIT Executive Steering Committee.
- OCHCO ensured alignment of DHS workforce planning processes to new government-wide practices by participating in the OPM-led Strategic Human Capital Management High Risk Initiative Integrated Product Team throughout FY 2012, and leveraged this effort to assist in establishing a skills gap assessment strategy to pilot with selected DHS mission critical occupations.

In conjunction with FEMA and the DHS Office of the Chief Information Officer, OCHCO developed an integrated project schedule with identified milestones for deployment of the Enterprise Personnel Accountability System; the pilot has been deployed within FEMA and will begin at other Components soon.

Major Management Challenges and High-Risk Areas – Summary of Progress

DHS responds to reports on major management challenges and high-risk areas from both the DHS Office of Inspector General (OIG) and the U.S. Government Accountability Office (GAO), respectively. Annually, OIG reports what is considered to be the most serious management and performance challenges facing the Department. OIG's FY 2012 Major Management Challenges report included challenges in 11 broad areas.

Mission Areas

- Intelligence
- Transportation Security
- Border Security
- Infrastructure Protection
- Disaster Preparedness and Response

Accountability Issues

- Acquisition Management
- Financial Management
- IT Management
- Grants Management
- Employee Accountability and Integrity
- Cyber Security

Progress on the Department's Major Management Challenges as identified by the OIG can be found in the Other Accompanying Information section of the [DHS Annual Financial Report for FY 2012](#).

Biannually, GAO identifies federal programs and operations that are high risk due to their greater vulnerabilities to fraud, waste, abuse, and mismanagement. In recent years, GAO has also included areas needing broad-based transformations to address major economic, efficiency, or effectiveness challenges. The GAO maintains these high-risk items until it is satisfied that acceptable progress has occurred to address them. The most recent report, *High Risk Series: An Update* ([GAO-13-283](#)), was published in February 2013. The four areas in which DHS is the lead federal agency, as well as, two Government-wide areas with significant DHS equities are listed below.

- Strengthening Department of Homeland Security Management Functions
- Establishing Effective Mechanisms for Sharing Terrorism-Related Information to Protect the Homeland
- Protecting the Federal Government's Information Systems and the Nation's Cyber Critical Infrastructure
- National Flood Insurance Program
- Strategic Human Capital Management (Government-wide)
- Managing Federal Real Property (Government-wide)

This year, GAO also reported on a newly-created Government-wide area, "Limiting the Federal Government's Fiscal Exposure by Better Managing Climate Change Risks." Pursuant to Executive Order 13514 and at the direction of the Secretary, DHS has been working in this area and formed the Climate Change Adaptation Executive Steering Committee in March of 2011. The body ensures that extreme weather is considered in the context of departmental missions and operations. We look forward to a productive dialogue with Congress and GAO on this newly created GAO High Risk area.

DHS carries out multiple complex and highly diverse missions. Although the Department continually strives to improve the efficiency and effectiveness of its programs and operations, the areas identified above merit a higher level of focus and attention. Overcoming challenges in these areas requires long-term strategies for ensuring stable operations, sustained management attention, and resources. As such, DHS’s Under Secretary for Management has implemented a quarterly review of the Department’s progress in addressing each of these areas.

The remainder of this section provides a brief summary of the Department’s efforts in addressing each of the GAO High-Risk areas.

GAO High-Risk – Status Update

GAO High-Risk Area: Strengthening Department of Homeland Security Management Functions

GAO Overview: In 2003, GAO designated “Implementing and Transforming DHS” as high risk because the Department had to transform 22 agencies—several with major management challenges—into one department. GAO’s prior work on mergers and acquisitions, undertaken before the creation of DHS, found that successful transformations of large organizations, even those faced with less strenuous reorganizations than DHS, can take years to achieve. GAO acknowledged the significant improvement DHS has made to date, by narrowing the High Risk area this year, from “Implementing and Transforming DHS” to “Strengthening DHS Management Functions.” The refocusing by GAO of this High Risk category is a reflection of the Management Directorate’s efforts to systematically address major management concerns. DHS, with more than 230,000 employees, is the third-largest federal department, and its transformation is critical to achieving its homeland security missions. This high-risk area includes challenges in strengthening DHS’s management functions, including acquisition, information technology, financial, and human capital management; the impact of those challenges on DHS’s mission implementation; and challenges in integrating management functions within and across the Department and its Components.

DHS Lead Office and Official: Office of the Under Secretary for Management, Dr. Ken Buck, Executive Director for Management Integration

DHS Progress: Initially, DHS (2010–2011) focused on strengthening the Department’s foundation so that it could support higher-level initiatives. Examples include strengthening the delegations of authority to clarify the roles between the Department and Components, elevating the role of the Program Accountability and Risk Management function to improve the quality and oversight of acquisition programs, improving the quality and integrity of The Department’s financial statements, and implementing the framework for the Integrated Investment Life Cycle Management (IILCM) to ensure the total budget is spent effectively and efficiently. Future phases (2011–2014) include several specific initiatives to reinforce good management principles, which will ultimately reduce the “degree” of risk.

The Department’s *Integrated Strategy for High Risk Management* was first published in January 2011 to address 31 Outcomes identified by GAO as necessary to manage the risk at DHS Headquarters. The *Integrated Strategy* has been updated every 6 months to reflect the progress made by the Department. This strategy is composed of 18 specific initiatives, each with detailed corrective action plans that contain goals and metrics that correlate directly to GAO’s 31 Outcomes.

In addition, the *Integrated Strategy* also includes a methodology to track progress toward addressing GAO's Outcomes. When the first *Integrated Strategy* was published, only 6.5 percent of the Outcomes were fully addressed, while another 6.5 percent had yet to be initiated. Less than a year later, 77 percent were at least partially addressed and the remaining 23 percent had been initiated.

Furthermore, the Department has made significant progress in implementing the 18 initiatives over the past 2 years. To illustrate this progress, DHS provided GAO with an update of the *Integrated Strategy* in September 2012. Overall, the *Integrated Strategy* has allowed the Department to realize greater efficiencies through good management practices, while also addressing the GAO High-Risk designation. The Department remains committed to demonstrating measurable, sustained progress over the coming years so that all management functions can be eligible for removal from the High-Risk list.

Planned Actions and Key Milestones: DHS will continue to implement the *Integrated Strategy for High Risk Management* and track the progress of the 18 initiatives using quarterly internal progress reviews. Over the next year, the Department expects to make important progress integrating and transforming DHS's management functions to create "One DHS." Specifically, DHS plans to:

- Enhance IT infrastructure by continuing to consolidate systems within DHS data centers.
- Continue establishing public and private cloud services to facilitate access to mission-enabling enterprise services.
- Develop a Workforce Transformation Playbook to enhance and empower the homeland security workforce.
- Execute the Department's Diversity and Inclusion Strategy.
- Consolidate Human Resource Information Technology efforts, including rolling out a Personnel Accountability System.
- Lead activities to increase employee engagement, morale, and leadership development.
- Issue a Financial Systems Modernization Playbook.
- Continue developing a centralized business intelligence solution that will provide management information across organizational boundaries and from disparate systems to support informed decision making by Department leadership.
- Issue a revision to the Acquisition Management Directive (MD-102) to enhance oversight of investments.
- Develop a sustainment plan to maintain a clean audit opinion and strengthen internal controls.

Of the 18 initiatives in the *Integrated Strategy*, two are considered transformational as they are cross-cutting and will likely take multiple years to implement. These initiatives are the IILCM and the Management Health Assessment (MHA). Once fully operational, the IILCM will transform the budget process to "strategy driving budget vs. budget driving strategy." During FY 2013, the Department will work with Components to develop an IILCM Playbook, which will identify the major business processes and key decision criteria for the associated Boards and Councils. The MHA is part of a broader effort to promote the integration of management dashboards to ensure better information sharing, allow for more comprehensive assessments of management health, and ultimately improve the efficiency and effectiveness of the Department. In FY 2013, the

Management Directorate will institutionalize MHA reporting and begin expanding the tool to the Components to improve communication and accountability.

GAO High-Risk Area: Establishing Effective Mechanisms for Sharing Terrorism-Related Information to Protect the Homeland

GAO Overview: In January 2005, GAO designated terrorism-related information sharing as high risk. GAO has since monitored federal efforts to implement the Federal Information Sharing Environment (Federal ISE) because the government faced serious challenges in analyzing key information and sharing among federal, state, local, and other security partners in a timely, accurate, and useful way to protect against terrorist threats.¹ The Federal ISE serves as an overarching solution to strengthening the sharing of intelligence, terrorism, law enforcement, and other information among these partners. DHS, in addition to the U.S. Department of Defense, and the U.S. Department of Justice Federal Bureau of Investigation (FBI), are the key federal participants in the Federal ISE.

In February 2011, GAO found that the government had begun to implement initiatives that improved information sharing, but did not yet have a comprehensive approach that was guided by an overall plan to help gauge progress and achieve desired results. In addition, the evolving nature of domestic threats makes continued progress in improving information sharing critical.

DHS Lead Office and Official: Office of Intelligence and Analysis, Glenn Krizay, Deputy Under Secretary for Plans, Policy, and Performance Management

DHS Progress: DHS has made progress in both its contributions to the Federal ISE as well as executing its own information-sharing and safeguarding mission. In September 2012, GAO found that DHS has demonstrated leadership in sharing terrorism-related information to protect the Homeland through its establishment and operation of the Information Sharing and Safeguarding Governance Board (ISSGB), which serves as the decision-making body for DHS information-sharing and safeguarding issues. The ISSGB has enhanced collaboration among DHS Components by identifying key information-sharing initiatives, while developing and documenting a process to prioritize initiatives for additional oversight and support. DHS has overseen an initial baseline assessment of the Department’s programs, systems, and initiatives to determine the magnitude of effort needed to implement key information-sharing capabilities. This includes a gap analysis that will form the basis for recommendations to the ISSGB regarding priority initiatives and related milestones to track the maturity of key capabilities, enabling the Department to fulfill its information-sharing vision.

DHS addressed all of GAO’s recommendations in the *FY 2013–2017 DHS Information Sharing and Safeguarding Strategy (DHS Strategy)* released in January 2013 and is currently developing the *Fiscal Years 2013–2017 Information Sharing and Safeguarding Implementation Plan (Implementation Plan)*, which is expected to be complete by May 2013.

Planned Actions and Key Milestones: The *DHS Strategy* specifically focuses on 16 priority objectives, including a gap analysis as well as key activities and milestones to address the identified

¹ The Federal ISE is an approach that facilitates the sharing of terrorism and homeland security information, which may include any method determined necessary and appropriate.

gaps. The *DHS Strategy* describes indicators and measures that (1) assess accomplishments, (2) facilitate decision making, (3) hold DHS leaders accountable, and (4) allow the Homeland Security Enterprise to continuously improve.

The development and execution of the Implementation Plan will allow the ISSGB to support the Department's investments in information-sharing solutions to most effectively reduce risks. DHS will update its current *Information Sharing and Safeguarding Roadmap (Roadmap)* as well as the *Roadmap Implementation Guide (Guide)* to track the implementation of the 16 priority objectives. The revised *Guide* and updates will also provide the Department with an institutional record to sustain ongoing implementation efforts that improve information sharing.

DHS, working closely with the FBI and other federal partners, has re-focused its information-sharing and production efforts to better address the needs of state and local governments and private-sector partners. DHS consults with law enforcement officials from major metropolitan areas, the directors of fusion centers, and State Homeland Security Advisors to tailor the Department's products and briefings to better support state and local law enforcement and homeland security officials.

Consistent with the direction the President has set for a robust information-sharing environment, DHS provides, in coordination with the FBI and other federal partners, regular training programs for local law enforcement and homeland security officials to help them identify indicators of terrorist activity. In addition, DHS continues to improve and expand the information-sharing mechanisms by which front-line personnel are made aware of the threat picture, vulnerabilities, and what it means for their local communities.

The Department expects to develop the *Implementation Plan* by May 2013, and update the *Roadmap* and revise the *Guide* by August, 2013.

GAO High-Risk Area: Protecting the Federal Government's Information Systems and the Nation's Critical Infrastructure

GAO Overview: Federal agencies and our Nation's critical infrastructures—such as power distribution, water supply, telecommunications, and emergency services—rely extensively on computerized information systems and electronic data to carry out their operations. The security of these systems and data is essential to protecting national and economic security, and public health and safety. Safeguarding federal computer systems and the systems that support critical infrastructures—referred to as cyber Critical Infrastructure Protection (CIP)—is a continuing concern. Federal information security has been on GAO's list of high-risk areas since 1997; in 2003, GAO expanded this high-risk area to include cyber CIP. Risks to information systems include continuing insider threats from employees and business partners, escalating and emerging threats from around the globe, the ease of obtaining and using hacking tools, the steady advance in the sophistication of attack technology, and the emergence of new and more destructive attacks.

DHS Lead Office and Official: National Protection & Programs Directorate (NPPD) Office of Cybersecurity & Communications (CS&C)/Enterprise Performance Management Office, Matthew Shabat, Program Analyst

DHS Progress: DHS has made significant progress in improving its ability to protect against cyber

threats by advancing its cyber analysis and warning capabilities, acquiring enhanced analytical and technical capabilities, developing strategies for hiring and retaining highly qualified cyber analysts, and strengthening the effectiveness of its public-private-sector partnerships in securing cyber critical infrastructure. For example, DHS developed the National Cyber Incident Response Plan to coordinate incident management, enhance data flow, and support analytical collaboration between federal, state, and local government entities as well as private-sector partners. Additionally, the National Cybersecurity and Communications Integration Center has brought together partners from the public and private sector as well as law enforcement to improve information sharing and develop a common operational picture of the cybersecurity landscape across networks.

DHS is working with the Office of Management and Budget (OMB) to strengthen cybersecurity across Federal Executive Branch civilian agencies, including in the areas of continuous diagnostics and mitigations as well as automated asset, configuration and vulnerability management, two-factor authentication, and Trusted Internet Connections (TIC) Initiative compliance. DHS continues to build relationships and mechanisms to improve information sharing by sponsoring SECRET and TS/SCI clearances for critical infrastructure representatives and developing collaborative frameworks through which classified and unclassified threat, vulnerability, and mitigation information is shared. DHS's United States Computer Emergency Readiness Team provides Department and Agency Cybersecurity Reports, which provide individual agencies a better understanding of their intrusion detection data. Finally, DHS has significantly grown its federal cyber workforce over the last 4 years in order to ensure it maintains technical expertise commensurate with its critical mission.

The Administration's Executive Order 13636 on Cybersecurity and Presidential Policy Directive 21 on Critical Infrastructure and Resilience take a whole-of-government approach and reinforce the need for holistic thinking about security and risk management across critical infrastructure sectors. Furthermore, as DHS continues to develop and deploy new capabilities, such as Continuous Diagnostics and Mitigation and intrusion prevention technology, DHS will be better positioned to assist federal agencies as they improve their cybersecurity.

With respect to Federal Information Security Management Act reporting and future Continuous Diagnostics & Mitigation priorities, DHS has actively collaborated with other federal agencies in launching and administering the Federal Risk and Authorization Management Program for cloud computing services. To address outstanding GAO recommendations, DHS is working with the Federal Desktop Core Configuration and U.S. Government Configuration Baseline (USGCB) requirements to strengthen agency information security by (1) requiring stricter security settings on workstations than those previously in place and (2) standardizing agencies' management of workstations, making it easier to manage changes across the organization. As of September 30, 2012, 84 percent of DHS Components are USGCB-compliant.

Senior NPPD and GAO officials meet quarterly to keep abreast of ongoing cyber activities, discuss DHS's strategic direction in cybersecurity, and review the status of open recommendations. DHS has provided GAO with significant documentation to close 16 recommendations over the last year regarding cyber analysis and warning, the TIC initiative, and EINSTEIN. DHS has provided GAO with significant documentation to close its two recommendations focused on public-private information sharing.

Where recommendations remain open, DHS has demonstrated to GAO progress in strengthening

the effectiveness of partnerships and is continuing to support GAO's request for additional information on DHS's National Cybersecurity and Communications Integration Center.

Planned Actions and Key Milestones: To further protect the Federal Government's information systems, DHS has begun using continuous monitoring diagnostics and mitigation data feeds from Component tools to monitor the implementation of USGCB settings. As of December 2012, Components' progress in implementing and maintaining compliance with the DHS baseline configuration settings is being communicated to Executive Management in the monthly DHS Information Security Scorecard for monitoring and action when appropriate.

GAO High-Risk Area: National Flood Insurance Program

GAO Overview: The National Flood Insurance Program (NFIP) is a key component of the Federal Government's efforts to limit the damage and financial impact of floods; however, it likely will not generate sufficient revenues to repay the billions of dollars borrowed from the Treasury Department to cover claims from the 2005 hurricanes or future catastrophic losses. The lack of sufficient revenues highlights structural weaknesses in how the program is funded. Also, weaknesses in NFIP management and operations, including financial reporting processes and internal controls, and oversight of contractors place the program at risk. The Federal Emergency Management Agency (FEMA), within DHS, is responsible for managing the NFIP. While FEMA has taken some steps to address these issues, including increasing the number of policyholders and implementing new contractor oversight processes, it continues to face complex challenges and Congress needs to act to restructure the program.

DHS Lead Office and Official: Flood Insurance and Mitigation Administration (FIMA), David L. Miller, Associate Administrator

DHS Progress: Within FEMA, FIMA continues to address the structural and operating challenges that confront the NFIP. With the passage of the *Biggert-Waters Flood Insurance Act of 2012* in July, the NFIP now has authority to implement actuarial rates for most policies, which will improve the financial and operational position of the program. Specifically, the Act raises the statutory limit on annual rate increases, mandates premium increases for many Pre-Flood Insurance Rate Map structures that do not pay full risk premiums, and requires grandfathered structures to pay premiums more closely related to their individual flood risk after a map change. The provision for a reserve fund will allow the NFIP to build surplus capital to pay losses in a greater-than-average loss year. A new grants program will allow NFIP to address frequently flooded properties, which represent 1 percent of policies and account for 25 percent to 30 percent of claims.

FIMA has been responsive in working with GAO to address the operating challenges identified in GAO's recommendations to improve management and operations. Revisions to procedures for monitoring contractors and sharing information on contractor performance resulted in closing two recommendations. FIMA changed the process for Write Your Own (WYO) company performance under the WYO Financial Control plan; initiated a new marketing bonus program to focus on areas with low market penetration; implemented procedures to select statistically representative samples of all claims for conducting claims re-inspections; and requested an independent audit of the NFIP's financial statements. Because of these actions, FIMA has requested that GAO close 11 of the 20 recommendations and is awaiting feedback.

Planned Actions and Key Milestones: In FY 2013, FIMA will begin implementation of the

provisions of the *Biggert-Waters Act*. FIMA has identified seven priorities, including phase-in of actuarial rates for non-primary residences, phase-in of actuarial rates for subsidized and newly mapped policies, grants, installment payments, reserve fund, flood mapping provisions, and residential condominium provisions. Focusing on these areas will result in revenue increases, which will help to stabilize the NFIP's financing.

GAO High-Risk Area: Strategic Human Capital Management (Government-wide)

GAO Overview: GAO initially designated strategic human capital management as a high-risk area because of the long-standing lack of leadership in this area. While significant steps have been taken, the area remains high risk because of a need to address current and emerging critical skills gaps that are undermining agencies' abilities to meet their vital missions. The Federal Government's current budget and long-term fiscal pressures underscore the importance of a strategic and efficient approach to recruitment, hiring, development, and retention of individuals with critical skills.

DHS Lead Office and Official: Office of the Chief Human Capital Officer, Catherine V. Emerson, Chief Human Capital Officer

DHS Progress: DHS is making progress towards achieving the OMB Cross-Agency Priority Goal for FY 2013 of closing skills gaps by 50 percent, and is taking actions as directed by the Office of Personnel Management (OPM) to achieve this goal. OPM and the Chief Human Capital Officer Council launched the Strategic Human Capital Management High-Risk Initiative (SHCM HRI) at the beginning of FY 2012 to develop a comprehensive plan to reduce skill/staffing gaps in targeted Mission Critical Occupations (MCOs) across the Federal Government and within agencies. In support of this initiative, DHS participated in the OPM-led SHCM HRI Executive Steering Committee and Integrated Project Teams, which developed a Federal Government-wide comprehensive plan to reduce skill/staffing gaps.

In FY 2012, DHS fully implemented the guidance of the SHCM HRI by rolling out a pilot process to identify and reduce staffing and competency gaps. Specifically, DHS conducted supply and demand analysis, gap/discrepancy identification, gap closure strategy development, and action planning for three DHS SCHM HRI MCOs. This process and supporting tools and templates have been documented in an updated *DHS Workforce Planning Guide* for use by Components. In addition, DHS developed a framework for competency models and launched a pilot for identifying competency gaps through the deployment of competency assessment surveys. Lastly, DHS has strengthened oversight of Component workforce planning efforts by developing and implementing a Workforce Planning Checklist used in DHS Accountability audits. Members of the Workforce Planning team also participate as team members in conducting these audits.

Planned Actions and Key Milestones: In FY 2013 and FY 2014, DHS plans to continue following the guidance set forth by the SHCM HRI. In addition, the pilot competency assessments for selected DHS occupations will continue throughout FY 2013 and will serve as the basis for competency gap identification and closure strategies to include action plans. To address staffing gaps, DHS plans to implement the action plans developed in FY 2012 that drive skill gap reductions in the SHCM HRI MCOs. DHS also plans to expand the SHCM HRI pilot process to other priority MCOs by applying the guidance documented in the *DHS Workforce Planning Guide*.

GAO High-Risk Area: Managing Federal Real Property (Government-wide)

GAO Overview: The federal real property portfolio is vast and diverse. It totals over 900,000 buildings and structures with a combined area of over 3 billion square feet. Progress has been made on many fronts, including significant progress with real property data reliability and management of the condition of facilities. However, federal agencies continue to face long-standing problems, such as overreliance on leasing, excess and underutilized property, and protecting federal facilities. As a result, this area remains on GAO's High-Risk List, with the exceptions of government-wide real property data reliability and management of condition of facilities, which GAO found to be sufficiently improved to be no longer considered high risk.

DHS Lead Office and Official: Office of the Chief Readiness Support Officer (formerly, Office of the Chief Administrative Officer), Asset and Logistics Management, Richard Espinoza, Assistant Deputy Director for Real Estate.

DHS Progress: DHS continues to work through the Federal Real Property Council to improve property management and reduce overreliance on leasing, excess and underutilized property, and protecting federal facilities. The Department is committed to reducing real property spending in accordance with the presidential memo on Real Property Planning and Cost Savings. The DHS National Capital Region Housing Master Plan was designed to consolidate mission execution functions at a new DHS Headquarters at St. Elizabeths while reducing the number of mission support locations to decrease overall costs.

The St. Elizabeths Master Plan was approved in 2009 and the Phase 1 relocation of the U.S. Coast Guard Headquarters is on schedule for completion and start of occupancy by August 2013. However, in consideration of the current budget environment, the Department is working with the U.S. General Services Administration (GSA) and OMB to re-baseline the St. Elizabeths' completion schedule. In the meantime, the Department is developing a plan to leverage flexible workspace technologies to achieve the goals of mission support consolidation through lease compression and realignment of existing space.

Finally, DHS is addressing remaining High-Risk Series issues in both its leased and owned facilities. The Department is working to deliver portfolio square-foot reduction and cost savings, while requiring the implementation of a risk management process to determine necessary levels of protection and development of Facility Security Plans.

Planned Actions and Key Milestones: The Department continues to meet regularly with GSA to discuss leasing strategies, while developing a flexible work strategy based on the results of a successful pilot conducted at the Office of the Chief Readiness Support Office. The information from the pilot will provide guidance to help facilitate the integration of workplace strategies, such as consistent space guidelines, into Component management of the Department's real property inventory.

DHS Federal Protective Service continues to work directly with GAO auditors and is addressing previous recommendations to enhance the protection of federal facilities and their counterparts.

Low-Priority Program Activities

The President's Budget identifies the lower-priority program activities, as required under the *GPRA Modernization Act*, 31 U.S.C. 1115(b)(10). The public can access the volume at:

<http://www.whitehouse.gov/omb/budget>.

Component Acronyms

Below is the list of DHS Components and their Acronyms.

AO – Analysis and Operations
CBP – U.S. Customs and Border Protection
DMO – Departmental Management and Operations
DNDO – Domestic Nuclear Detection Office
FEMA – Federal Emergency Management Agency
FLETC – Federal Law Enforcement Training Center
ICE – U.S. Immigration and Customs Enforcement
NPPD – National Protection and Programs Directorate
OHA – Office of Health Affairs
OIG – Office of Inspector General
S&T – Science and Technology Directorate
TSA – Transportation Security Administration
USCG – U.S. Coast Guard
USCIS – U.S. Citizenship and Immigration Services
USSS – U.S. Secret Service

FY 2014 Budget Overview

	FY 2012 Revised Enacted ¹	FY 2013 Annualized CR ²	FY 2014 Pres. Budget ³	FY 2014 +/- FY 2012
	\$000	\$000	\$000	\$000
Net Discretionary:	\$ 46,381,144	\$ 46,560,550	\$ 44,672,346	\$ (1,708,798)
Discretionary Fees:	3,515,166	3,639,720	3,785,021	269,855
<i>Less rescission of prior year funds: ⁴</i>	<i>(196,468)</i>	<i>(131,412)</i>	-	-
Gross Discretionary	49,699,841	50,068,858	48,457,367	(1,438,943)
Mandatory, Fee, Trust Funds:	10,271,646	10,616,486	11,501,970	1,230,324
Total Budget Authority:	\$ 59,971,487	\$ 60,685,344	\$ 59,959,337	\$ (208,619)
Supplemental: ⁵	\$ -	\$ 12,071,908	\$ -	\$ -

1/ FY 2012 Revised Enacted:

- Reflects a transfer of \$24 million from FEMA to OIG pursuant to P.L. 112-74.
- Excludes USCG Overseas Contingency Operations funding of \$258.0 million P.L. 112-74.
- Includes \$63.5 million transfer to USCG - AC&I from DoD pursuant to P.L. 112-74.
- Includes FEMA Disaster Relief base funds of \$700 million and an additional \$6.4 billion enacted separately pursuant to the Budget Control Act.

2/ FY 2013 Annualized CR:

- FY 2013 Annualized CR reflects FY 2012 Enacted pursuant to P.L. 112-74 less rescission of prior year unobligated balances plus 0.612% increase.
- Reflects a transfer of \$24 million from FEMA to OIG pursuant to P.L. 112-74.
- Excludes USCG Overseas Contingency Operations funding of \$258.0 million P.L. 112-74.
- Excludes \$63.5 million transfer to USCG - AC&I from DoD pursuant to P.L. 112-74.
- Includes FEMA Disaster Relief base funds of \$700 million and an additional \$6.4 billion enacted separately pursuant to the Budget Control Act.

3/ FY 2014 President's Budget:

- Reflects a proposed transfer of \$24 million from FEMA to OIG.
- Includes FEMA Disaster Relief base funds of \$570 million (\$570.522) and an additional \$5.6 billion (\$5,626.386) for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief pursuant to section 251 (b)(2)(D) of the Balance Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended by the Budget Control Act of 2011.
- Total Budget Authority Request excluding DRF Major Disasters Cap Adjustment is: \$54,332,951
- Gross Discretionary Request excluding DRF Major Disasters Cap Adjustment is: \$42,830,981.
- Net Discretionary Request excluding DRF Major Disasters Cap Adjustment is: \$39,045,960.

4/ Rescissions of Prior Year Unobligated Balances:

- FY 2012 - Pursuant to P.L. 112-74, reflects FY 2012 rescissions of prior year unobligated balances of -\$196.468 million.
Excludes rescissions from Working Capital Fund \$5.201 million and CT Fund \$0.96 million.
- FY 2013 - Reflects rescissions of prior year unobligated balances of -\$131.412 million.

5/ In order to obtain comparable figures, Net Discretionary, Gross Discretionary, and Total Budget Authority excludes:

- FY 2013 supplemental funding pursuant to P.L. 113-2 (Disaster Relief Appropriations Act 2013): CBP (\$1.667 million), ICE (\$0.855 million), USCG (\$274.233 million), USSS (\$0.300 million), FEMA (\$11.787 billion), S&T (\$3.249 million), DNDO (\$3.869 million).
- Excludes FEMA NFIF (\$9.7 billion) increase in borrowing authority provided in P.L. 113-1.

- Notes:
- 1/ FY 2012 Revised Enacted:
- Reflects a transfer of \$24 million from FEMA to OIG pursuant to P.L. 112-74.
 - Excludes USCG Overseas Contingency Operations funding of \$258.0 million P.L. 112-74.
 - Includes \$63.5 million transfer to USCG - AC&I from DoD pursuant to P.L. 112-74.
 - Includes FEMA Disaster Relief base funds of \$700 million and an additional \$6.4 billion for major disasters declared pursuant to the Budget Control Act.
- 2/ FY 2013 Annualized CR:
- FY 2013 Annualized CR reflects FY 2012 Enacted pursuant to P.L. 112-74 less rescission of prior year unobligated balances plus 0.612% increase.
 - Reflects a transfer of \$24 million from FEMA to OIG pursuant to P.L. 112-74.
 - Excludes USCG Overseas Contingency Operations funding of \$258.0 million P.L. 112-74.
 - Excludes \$63.5 million transfer to USCG - AC&I from DoD pursuant to P.L. 112-74.
 - Includes FEMA Disaster Relief base funds of \$700 million and an additional \$6.4 billion for major disasters declared pursuant to the Budget Control Act.
- 3/ FY 2014 President's Budget:
- Reflects a proposed transfer of \$24 million from FEMA to OIG.
 - Includes FEMA Disaster Relief base funds of \$570 million (\$570.522) and an additional \$5.6 billion (\$5,626.386) for major disasters declared pursuant to the Budget Control Act.
 - Total Budget Authority Request excluding DRF Major Disasters Cap Adjustment is: \$54,332,951
 - Gross Discretionary Request excluding DRF Major Disasters Cap Adjustment is: \$42,830,981.
 - Net Discretionary Request excluding DRF Major Disasters Cap Adjustment is: \$39,045,960.
- 4/ In order to obtain comparable figures, Net Discretionary, Gross Discretionary, and Total Budget Authority excludes:
- FY 2013 supplemental funding pursuant to P.L. 113-2 (Disaster Relief Appropriations Act 2013): CBP (\$1.667 million), ICE (\$0.855 million), USCG (\$274.233 million), USSS (\$0.300 million), FEMA (\$11.787 billion), S&T (\$3.249 million), DNDO (\$3.869 million).
 - Excludes FEMA NFIF (\$9.7 billion) increase in borrowing authority provided in P.L. 113-1.

DEPARTMENT OF HOMELAND SECURITY

Fiscal Year 2014

Congressional Justification

Explanation of Changes – General Provisions

Title V – Fiscal Year 2014 Explanation of Changes – General Provisions

Proposal to Amend *Old* Section 503

Sec. 503. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year ~~[2012]~~ 2014, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that: (1) creates a new program, project, or activity; (2) eliminates a program, project, office, or activity; (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress; (4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or the House of Representatives for a different purpose; or (5) contracts out any function or activity for which funding levels were requested for Federal full-time equivalents in the object classification tables contained in the fiscal year ~~[2012]~~ 2014 Budget Appendix for the Department of Homeland Security, as modified by the joint explanatory statement accompanying this Act, unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds. (b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year ~~[2012]~~ 2014, or provided from any accounts in the Treasury of the United States derived by the collection of fees or proceeds available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or reduces the numbers of personnel by 10 percent as approved by the Congress; or (3) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress, unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds. (c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: *Provided, That for FY 2014 and thereafter, subject to approval by the Director of the Office of Management and Budget, any unobligated funds between appropriations within such department or agency may be transferred in order to expedite a more rapid and effective response to a catastrophic event, as provided in the National Response Plan required under Public Law 107-296:* Provided further, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer. (d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations based upon an initial notification provided after June 30, except in extraordinary circumstances that imminently threaten the safety of human life or the protection of property. (e) The notification thresholds and procedures set forth in this section shall apply to any use of deobligated balances of funds provided in previous Department of Homeland Security Appropriations Acts.

Explanation: The Department requests routine date changes and the insertion of a proviso in subsection (c) to provide greater flexibility to the Department to respond to Presidentially declared major disasters.

Proposal to Amend *Old* Section 504

Sec. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103-356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year [2012] 2014: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President's fiscal year [2012] 2014 budget: Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: Provided further, That the Working Capital Fund shall be subject to the requirements of section 503 of this Act.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2014.

Proposal to Amend *Old* Section 505

Sec. 505. Except as otherwise specifically provided by law, not to exceed 50 percent of unobligated balances remaining available at the end of fiscal year [2012] 2014 from appropriations for salaries and expenses for fiscal year [2013] 2014 in this Act shall remain available through September 30, [2014], 2015 in the account and for the purposes for which the appropriations were provided: Provided, That prior to the obligation of such funds, a request shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives for notification in accordance with section 503 of this Act.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2014.

Proposal to Amend *Old* Section 506

Sec. 506. Funds made available by this Act for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year [2013] 2014 until the enactment of an Act authorizing intelligence activities for fiscal year [2013] 2014.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2014.

Proposal to Delete *Old* Section 512

[Sec. 512. None of the funds made available in this Act may be used by any person other than the Privacy Officer appointed under subsection (a) of section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142(a)) to alter, direct that changes be made to, delay, or prohibit the transmission to Congress of any report prepared under paragraph (6) of such subsection.]

Explanation: The Department requests deletion of this provision as it is restrictive in nature and infringes upon the Department's ability to manage administrative functions and to carry out its requirements for providing homeland security.

Proposal to Delete *Old* Section 513

[Sec. 513. None of the funds made available in this Act may be used to amend the oath of allegiance required by section 337 of the Immigration and Nationality Act (8 U.S.C. 1448).]

Explanation: The Department requests deletion of this provision as it is restrictive in nature and infringes upon the Department's ability to manage administrative functions and to carry out its requirements for providing homeland security.

Proposal to Delete *Old* Section 516

[Sec. 516. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration "Aviation Security", "Administration", and "Transportation Security Support" for fiscal years 2004 and 2005 that are recovered or deobligated shall be available only for the procurement or installation of explosives detection systems, air cargo, baggage, and checkpoint screening systems, subject to notification: Provided, That quarterly reports shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives on any funds that are recovered or deobligated.]

Explanation: The Department proposes deletion of this provision as referenced funds are no longer recovered or deobligated.

Proposal to Amend *Old* Section 518

Sec. **[518]** 515. Section 532(a) of Public Law 109–295 (120 Stat. 1384) is amended by striking "[2011] 2012" and inserting "[2012] 2014".

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2014.

Proposal to Amend *Old* Section 520

Sec. **[520]** 517. (a) Except as provided in subsection (b), none of the funds appropriated in this or any other Act to the "Office of the Secretary and Executive Management", the "Office of the Under Secretary for Management", or the "Office of the Chief Financial Officer", may be obligated for a grant or contract funded under such headings by any means other than full and open competition.

(b) Subsection (a) does not apply to obligation of funds for a contract awarded--

(1) by a means that is required by a Federal statute, including obligation for a purchase made under a mandated preferential program, including the AbilityOne Program, that is authorized under the Javits–Wagner–O'Day Act (41 U.S.C. 46 et seq.);

(2) pursuant to the Small Business Act (15 U.S.C. 631 et seq.);

(3) in an amount less than the simplified acquisition threshold described under section 302A(a) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252a(a)); or

(4) by another Federal agency using funds provided through an interagency agreement.

(c)(1) Subject to paragraph (2), the Secretary of Homeland Security may waive the application of this section for the award of a contract in the interest of national security or if failure to do so would pose a substantial risk to human health or welfare.

(2) Not later than 5 days after the date on which the Secretary of Homeland Security issues a waiver under this subsection, the Secretary shall submit notification of that waiver to the Committees on Appropriations of the Senate and the House of Representatives, including a description of the applicable

contract to which the waiver applies and an explanation of why the waiver authority was used: Provided, That the Secretary may not delegate the authority to grant such a waiver.

(d) In addition to the requirements established by subsections (a), (b), and (c) of this section, the Inspector General of the Department of Homeland Security shall review departmental contracts awarded through means other than a full and open competition to assess departmental compliance with applicable laws and regulations: Provided, That the Inspector General shall review selected contracts awarded in the previous fiscal year through means other than a full and open competition: Provided further, That in selecting which contracts to review, the Inspector General shall consider the cost and complexity of the goods and services to be provided under the contract, the criticality of the contract to fulfilling Department missions, past performance problems on similar contracts or by the selected vendor, complaints received about the award process or contractor performance, and such other factors as the Inspector General deems relevant: Provided further, That the Inspector General shall report the results of the reviews to the Committees on Appropriations of the Senate and the House of Representatives no later than February [4] 3, [2013] 2014.

Explanation: The Department requests a routine date change.

Proposal to Delete *Old* Section 521

[Sec. 521. None of the funds provided by this or previous appropriations Acts shall be used to fund any position designated as a Principal Federal Official (or the successor thereto) for any Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.) declared disasters or emergencies unless -- (1) The responsibilities of the Principal Federal Official do not include operational functions related to incident management, including coordination of operations, and are consistent with the requirements of subsection 509(c) and subsections 503(c)(3) and (c)(4)(A) of the Homeland Security Act of 2002 (6 U.S.C. 319(c) and 313(c)(3) and (c)(4)(A)) and section 302 of the Robert T. Stafford Disaster Relief and Assistance Act (42 U.S.C. 5143); (2) Not later than 10 business days after the latter of the date on which the Secretary of Homeland Security appoints the Principal Federal Official and the date on which the President issues a declaration under section 401 or section 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170 and 5191, respectively), the Secretary of Homeland Security shall submit a notification of the appointment of the Principal Federal Official and a description of the responsibilities of such Official and how such responsibilities are consistent with paragraph (1) to the Committees on Appropriations of the Senate and the House of Representatives, the Transportation and Infrastructure Committee of the House of Representatives, and the Homeland Security and Governmental Affairs Committee of the Senate; and (3) Not later than 60 days after the date of enactment of this Act, the Secretary shall provide a report specifying timeframes and milestones regarding the update of operations, planning and policy documents, and training and exercise protocols, to ensure consistency with paragraph (1) of this section.]

Explanation: The Department requests deletion of this restrictive provision in part because the Secretary is the Principal Federal Official and does not intend to appoint other individuals to this position.

Proposal to Delete *Old* Section 522

[Sec. 522. None of the funds made available in this or any other Act for fiscal years 2012 and thereafter may be used to enforce section 4025(1) of Public Law 108-458 unless the Administrator of the Transportation Security Administration reverses the determination of July 19, 2007, that butane lighters are not a significant threat to civil aviation security.]

Explanation: The Department requests deletion of this provision as it is unnecessary and restricts the Department's flexibility to carry out requirements and implement policies for protecting the Homeland.

Proposal to Delete *Old* Section 523

[Sec. 523. None of the funds provided or otherwise made available in this Act shall be available to carry out section 872 of the Homeland Security Act of 2002 (6 U.S.C. 452).]

Explanation: The Department requests deletion of this restrictive provision to enable the Department to have the flexibility to carry out its operational and mission requirements. If this provision is retained, the Department requests continuation of the 2012 Conference language which reads:

A provision proposed by the House and Senate is continued that precludes DHS from using funds in this Act to carry out reorganization authority. This prohibition is not intended to prevent the Department from carrying out routine or small reallocations of personnel or functions within components, subject to Section 503 of this Act. This language prevents large scale reorganization of the Department, which should be acted on legislatively by the relevant Congressional committees of jurisdiction.

Proposal to Delete *Old* Section 524

[Sec. 524. Funds made available in this Act may be used to alter operations within the Civil Engineering Program of the Coast Guard nationwide, including civil engineering units, facilities design and construction centers, maintenance and logistics commands, and the Coast Guard Academy, except that none of the funds provided in this Act may be used to reduce operations within any Civil Engineering Unit unless specifically authorized by a statute enacted after the date of enactment of this Act.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources as may be required for protecting the Homeland.

Proposal to Amend *Old* Section 526

Sec. [526] 519. None of the funds made available in this or any other Act for fiscal year [2012] 2014 and thereafter may be used to destroy or put out to pasture any horse or other equine belonging to any component or agency of the Department of Homeland Security that has become unfit for service, unless the trainer or handler is first given the option to take possession of the equine through an adoption program that has safeguards against slaughter and inhumane treatment.

Explanation: The Department requests routine date changes.

Proposal to Amend *Old* Section 527

Sec. [527] 520. Section 831 of the Homeland Security Act of 2002 (6 U.S.C. 391) is amended--(1) in subsection (a), by striking "Until September 30, [2011] 2012," and inserting "Until September 30, [2012] 2014"; (2) [by striking subsection (b); (3) by redesignating subsections (c), (d), and (e) as subsections (b), (c), and (d), respectively; and (4)] in subsection (c)(1) [(as redesignated by paragraph (3) of this section)], by striking "September 30, [2011] 2012," and inserting "September 30, [2012] 2014,".

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2014.

Proposal to Delete *Old Section 529*

[Sec. 529. Notwithstanding any other provision of law, none of the funds provided in this or any other Act shall be used to approve a waiver of the navigation and vessel-inspection laws pursuant to 46 U.S.C. 501(b) for the transportation of crude oil distributed from the Strategic Petroleum Reserve until the Secretary of Homeland Security, after consultation with the Secretaries of the Departments of Energy and Transportation and representatives from the United States flag maritime industry, takes adequate measures to ensure the use of United States flag vessels: Provided, That the Secretary shall notify the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, and the Committee on Transportation and Infrastructure of the House of Representatives within 48 hours of any request for waivers of navigation and vessel-inspection laws pursuant to 46 U.S.C. 501(b).]

Explanation: The Department requests deletion of this provision as unnecessary, unduly restrictive, and onerous.

Proposal to Delete *Old Section 531*

[Sec. 531. None of the funds in this Act shall be used to reduce the United States Coast Guard's Operations Systems Center mission or its government-employed or contract staff levels.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

Proposal to Delete *Old Section 533*

[Sec. 533. None of the funds appropriated by this Act may be used to conduct, or to implement the results of, a competition under Office of Management and Budget Circular A-76 for activities performed with respect to the Coast Guard National Vessel Documentation Center.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

Proposal to Delete *Old Section 536*

[Sec. 536. If the Administrator of the Transportation Security Administration determines that an airport does not need to participate in the E-Verify Program as described in section 403(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note), the Administrator shall certify to the Committees on Appropriations of the Senate and the House of Representatives that no security risks will result from such non-participation.]

Explanation: The Department requests deletion of this provision as it is unnecessary and burdensome.

Proposal to Delete *Old Section 537*

[Sec. 537. (a) Notwithstanding any other provision of this Act, except as provided in subsection (b), and 30 days after the date on which the President determines whether to declare a major disaster because of an event and any appeal is completed, the Administrator shall publish on the Web site of the Federal Emergency Management Agency a report regarding that decision that shall summarize damage assessment information used to determine whether to declare a major disaster. (b) The Administrator may redact from a report under subsection (a) any data that the Administrator

determines would compromise national security. (c) In this section -- (1) the term ``Administrator'' means the Administrator of the Federal Emergency Management Agency; and (2) the term ``major disaster'' has the meaning given that term in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).]

Explanation: The Department requests deletion of this provision because posting of the referenced information is now standard operating procedure, and, therefore, the provision is redundant.

Proposal to Delete *Old* Section 538

[Sec. 538. (a) Notwithstanding any other provision of law during fiscal year 2012 or any subsequent fiscal year, if the Secretary of Homeland Security determines that the National Bio- and Agro-defense Facility should be located at a site other than Plum Island, New York, the Secretary shall ensure that the Administrator of General Services sells through public sale all real and related personal property and transportation assets which support Plum Island operations, subject to such terms and conditions as may be necessary to protect Government interests and meet program requirements. (b) The proceeds of such sale described in subsection (a) shall be deposited as offsetting collections into the Department of Homeland Security Science and Technology ``Research, Development, Acquisition, and Operations'' account and, subject to appropriation, shall be available until expended, for site acquisition, construction, and costs related to the construction of the National Bio- and Agro-defense Facility, including the costs associated with the sale, including due diligence requirements, necessary environmental remediation at Plum Island, and reimbursement of expenses incurred by the General Services Administration.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 539

[Sec. 539. Any official that is required by this Act to report or to certify to the Committees on Appropriations of the Senate and the House of Representatives may not delegate such authority to perform that act unless specifically authorized herein.]

Explanation: The Department requests deletion of this provision as unnecessary, unduly restrictive and onerous, and contributes to delays in the Department's reporting to Congress.

Proposal to Amend *Old* Section 540

Sec. [540] 526. Section 550(b) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109-295; 6 U.S.C. 121 note), as amended by section 550 of the Department of Homeland Security Appropriations Act, 2010 (Public Law 111-83), is further amended by striking "on October 4, [2011] 2012" and inserting "on October 4, [2012] 2014".

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2014.

Proposal to Delete *Old* Section 541

[Sec. 541. None of the funds appropriated or otherwise made available in this or any other Act may be used to transfer, release, or assist in the transfer or release to or within the United States, its territories, or possessions Khalid Sheikh Mohammed or any other detainee who -- (1) is not a United States citizen or a member of the Armed Forces of the United States; and (2) is or was held

on or after June 24, 2009, at the United States Naval Station, Guantanamo Bay, Cuba, by the Department of Defense.]

Explanation: The Administration requests deletion of this provision which infringes upon the President's prerogative and executive authority on national security matters.

Proposal to Delete *Old* Section 544

[Sec. 544. None of the funds made available in this Act may be used to employ workers described in section 274A(h)(3) of the Immigration and Nationality Act (8 U.S.C. 1324a(h)(3)).]

Explanation: The Department requests deletion of this provision as it is restrictive in nature.

Proposal to Delete *Old* Section 546

[Sec. 546. For fiscal year 2012 and thereafter, for purposes of section 210C of the Homeland Security Act of 2002 (6 U.S.C. 124j), a rural area shall also include any area that is located in a metropolitan statistical area and a county, borough, parish, or area under the jurisdiction of an Indian tribe with a population of not more than 50,000.]

Explanation: The Department requests deletion of this provision because it is a onetime, permanent directive.

Proposal to Delete *Old* Section 548

[Sec. 548. (a) Not later than 180 days after the date of enactment of this Act, the Administrator of the Transportation Security Administration shall submit to the Committees on Appropriations of the Senate and the House of Representatives, a report that either -- (1) certifies that the requirement for screening all air cargo on passenger aircraft by the deadline under section 44901(g) of title 49, United States Code, has been met; or (2) includes a strategy to comply with the requirements under title 44901(g) of title 49, United States Code, including -- (A) a plan to meet the requirement under section 44901(g) of title 49, United States Code, to screen 100 percent of air cargo transported on passenger aircraft arriving in the United States in foreign air transportation (as that term is defined in section 40102 of that title); and (B) specification of -- (i) the percentage of such air cargo that is being screened; and (ii) the schedule for achieving screening of 100 percent of such air cargo. (b) The Administrator shall continue to submit reports described in subsection (a)(2) every 180 days thereafter until the Administrator certifies that the Transportation Security Administration has achieved screening of 100 percent of such air cargo.]

Explanation: The Department requests deletion of this provision because its requirements are permanent until fully complied with.

Proposal to Delete *Old* Section 549

[Sec. 549. In developing any process to screen aviation passengers and crews for transportation or national security purposes, the Secretary of Homeland Security shall ensure that all such processes take into consideration such passengers' and crews' privacy and civil liberties consistent with applicable laws, regulations, and guidance.]

Explanation: The Department requests deletion of this provision because it is a onetime directive which has been complied with on a permanent basis.

Proposal to Delete *Old* Section 550

[Sec. 550. (a) None of the funds made available in this Act may be obligated for construction of the National Bio- and Agro-defense Facility until the Department of Homeland Security -- (1) completes 50 percent of design planning for the National Bio- and Agro-defense Facility; (2) submits to the Committees on Appropriations of the Senate and the House of Representatives a revised site-specific biosafety and biosecurity mitigation risk assessment that describes how to significantly reduce risks of conducting essential research and diagnostic testing at the National Bio- and Agro-defense Facility and addresses shortcomings identified in the National Academy of Sciences' evaluation of the initial site-specific biosafety and biosecurity mitigation risk assessment; and (3) submits to the Committees on Appropriations of the Senate and the House of Representatives the results of the National Academy of Sciences' review of the risk assessment as described in subsection (c). (b) The revised site-specific biosafety and biosecurity mitigation risk assessment required by subsection (a) shall -- (1) include a quantitative risk assessment for foot-and-mouth disease virus, in particular epidemiological and economic impact modeling to determine the overall risk of operating the facility for its expected 50-year life span, taking into account strategies to mitigate risk of foot-and-mouth disease virus release from the laboratory and ensure safe operations at the approved National Bio- and Agro-defense Facility site; (2) address the impact of surveillance, response, and mitigation plans (developed in consultation with local, State, and Federal authorities and appropriate stakeholders) if a release occurs, to detect and control the spread of disease; and (3) include overall risks of the most dangerous pathogens the Department of Homeland Security expects to hold in the National Bio- and Agro-defense Facility's biosafety level 4 facility, and effectiveness of mitigation strategies to reduce those risks. (c) The Department of Homeland Security shall enter into a contract with the National Academy of Sciences to evaluate the adequacy and validity of the risk assessment required by subsection (a). The National Academy of Sciences shall submit a report on such evaluation within four months after the date the Department of Homeland Security concludes its risk assessment.]

Explanation: The Department requests deletion of this provision as it is restrictive in nature and infringes upon the Department's ability to manage resources and to carry out its mission and operational requirements.

Proposal to Delete *Old* Section 551

[Sec. 551. (a) Notwithstanding section 1356(n) of title 8, United States Code, of the funds deposited into the Immigration Examinations Fee Account, \$10,000,000 shall be available to United States Citizenship and Immigration Services in fiscal year 2012 for the purpose of providing an immigrant integration grants program. (b) None of the funds made available to United States Citizenship and Immigration Services for grants for immigrant integration may be used to provide services to aliens who have not been lawfully admitted for permanent residence.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 552

[Sec. 552. For an additional amount for necessary expenses for reimbursement of the actual costs to State and local governments for providing emergency management, public safety, and security at events, as determined by the Administrator of the Federal Emergency Management Agency, related to the presence of a National Special Security Event, \$7,500,000, to remain available until September 30, 2013.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old Section 556*

[Sec. 556. (a) For an additional amount for data center migration, \$70,000,000. (b) Funds made available in subsection (a) for data center migration may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act. (c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Amend *Old Section 557*

Sec. [557] 534. For fiscal year [2012] 2014, and thereafter, U.S. Customs and Border Protection's Advanced Training Center is authorized to charge fees for any service and/or thing of value it provides to Federal Government or non-government entities or individuals, so long as the fees charged do not exceed the full costs associated with the service or thing of value provided: Provided, That notwithstanding 31 U.S.C. 3302(b), fees collected by the Advanced Training Center are to be deposited into a separate account entitled "Advanced Training Center Revolving Fund", and be available, without further appropriations, for necessary expenses of the Advanced Training Center program, and are to remain available until expended.

Explanation: The Department requests routine date changes.

Proposal to Delete *Old Section 558*

[Sec. 558. Section 559(e) of Public Law 111-83 is amended -- (a) in the matter preceding the first proviso, by striking "law, sell" and inserting "law, hereafter sell"; and (b) in the first proviso -- (1) by striking "shall be deposited" and inserting "shall hereafter be deposited"; and (2) by striking "subject to appropriation," and inserting "without further appropriations,".]

Explanation: The Department requests deletion of this provision because it is a permanent change to the U.S. Code.

Proposal to Delete *Old Section 560*

[Sec. 560. For an additional amount for the "Office of the Under Secretary for Management", \$55,979,000, to remain available until expended, for necessary expenses to plan, acquire, construct, renovate, remediate, equip, furnish, and occupy buildings and facilities for the consolidation of department headquarters at St. Elizabeths and associated mission support consolidation: Provided, That the Committees on Appropriations of the Senate and the House of Representatives shall receive an expenditure plan not later than 90 days after the date of enactment of this Act detailing the allocation of these funds.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 561

[Sec. 561. None of the funds made available by this Act may be used to enforce the requirements in -- (1) section 34(a)(1)(A) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229(a)(1)(A)); (2) section 34(a)(1)(B) of such Act; (3) section 34(c)(1) of such Act; (4) section 34(c)(2) of such Act; (5) section 34(c)(4)(A) of such Act; and (6) section 34(a)(1)(E) of such Act.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 562

[Sec. 562. Notwithstanding the requirement under section 34(a)(1)(A) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229a(a)(1)(A)) that grants must be used to increase the number of firefighters in fire departments, the Secretary of Homeland Security, in making grants under section 34 of such Act using the funds appropriated for fiscal year 2011, shall grant waivers from the requirements of subsections (a)(1)(B), (c)(1), (c)(2), and (c)(4)(A) of such section: Provided, That section 34(a)(1)(E) of such Act shall not apply with respect to funds appropriated for fiscal year 2011 for grants under section 34 of such Act: Provided further, That the Secretary of Homeland Security, in making grants under section 34 of such Act, shall ensure that funds appropriated for fiscal year 2011 are made available for the hiring, rehiring, or retention of firefighters.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 563

[Sec. 563. For fiscal year 2012 and thereafter, notwithstanding section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)) and 31 U.S.C. 3302, in the event that a spill of national significance occurs, any payment of amounts from the Oil Spill Liability Trust Fund pursuant to section 1012(a)(1) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(1)) for the removal costs incurred by the Coast Guard for such spill, shall be credited directly to the accounts of the Coast Guard current at the time such removal costs were incurred or when reimbursement is received: Provided, That such amounts shall be merged with and, without further appropriations, made available for the same time period and the same purpose as the appropriation to which it is credited.]

Explanation: The Department requests deletion of this provision because it is permanent law.

Proposal to Delete *Old* Section 564

[Sec. 564. (a) Civil Penalties for Circumventing Security Screening.--Section 46301(a)(5)(A)(i) of title 49, United States Code, is amended -- (1) by striking ``or chapter 449'' and inserting ``chapter 449''; and (2) by inserting ``, or section 46314(a)'' after ``44909''. (b) Criminal Penalties for Circumventing Security Screening. -- Section 46314(b)(2) of title 49, United States Code, is amended by inserting ``with intent to evade security procedures or restrictions or'' after ``of this section''. (c) Notice of Penalties. -- Section 46314 of title 49, United States Code, is amended by adding at the end the following new subsection: ``(c)Notice of Penalties. -- ``(1)In general. -- Each operator of an airport in the United States that is required to establish an air transportation security program pursuant to section 44903(c) shall ensure that signs that meet such requirements as the Secretary of Homeland Security may prescribe providing notice of the penalties imposed under section 46301(a)(5)(A)(i) and subsection (b) of this section are displayed near all screening

locations, all locations where passengers exit the sterile area, and such other locations at the airport as the Secretary of Homeland Security determines appropriate. `` (2) Effect of signs on penalties. -- An individual shall be subject to a penalty imposed under section 46301(a)(5)(A)(i) or subsection (b) of this section without regard to whether signs are displayed at an airport as required by paragraph (1).".]

Explanation: The Department requests deletion of this provision because it is a permanent change to the U.S. Code.

Proposal to Delete *Old* Section 565

[Sec. 565. (a) Short Title.--This section may be cited as the ``Disaster Assistance Recoupment Fairness Act of 2011''. (b) Debts Since 2005. -- (1) Definition. -- In this section, the term ``covered assistance'' means assistance provided -- (A) under section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5174); and (B) in relation to a major disaster declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) during the period beginning on August 28, 2005, and ending on December 31, 2010. (2) Waiver authority. -- The Administrator of the Federal Emergency Management Agency -- (A) subject to subparagraph (B) and paragraph (3), may waive a debt owed to the United States related to covered assistance provided to an individual or household if -- (i) the covered assistance was distributed based on an error by the Federal Emergency Management Agency; (ii) there was no fault on behalf of the debtor; and (iii) the collection of the debt would be against equity and good conscience; and (B) may not waive a debt under subparagraph (A) if the debt involves fraud, the presentation of a false claim, or misrepresentation by the debtor or any party having an interest in the claim. (3) Presumption of repayment. -- In determining whether to waive a debt under paragraph (2), the Administrator of the Federal Emergency Management Agency shall presume that, if the adjusted gross income (as defined under section 62 of the Internal Revenue Code of 1986) of the household of the debtor for the last taxable year ending in or with the calendar year preceding the date on which the income is determined exceeds \$90,000, the debtor should be required to make at least a partial payment on the debt. (4) Reporting. -- Not later than 3 months after the date of enactment of this Act, and every 3 months thereafter until the date that is 18 months after the date of enactment of this Act, the Inspector General of the Department of Homeland Security shall submit a report that assesses the cost-effectiveness of the efforts of the Federal Emergency Management Agency to recoup improper payments under the Individuals and Household Program under section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5174) to -- (A) the Committee on Homeland Security and Governmental Affairs and the Subcommittee on Homeland Security of the Committee on Appropriations of the Senate; and (B) the Committee on Homeland Security, the Committee on Transportation and Infrastructure, and the Subcommittee on Homeland Security of the Committee on Appropriations of the House of Representatives.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 566

[Sec. 566. (a) Notwithstanding section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act and subject to subsection (b), recipients of Small Business Administration Disaster loans for disaster-related damage to their homes may be eligible for reimbursement at the discretion of the state, under Section 404 of that Act, for documented and eligible mitigation work performed on their home. (b) Limitations. -- (1) Any reimbursement provided to or on behalf of a homeowner pursuant to subsection (a) shall not exceed the amount of the disaster loan that may be

used and was used for disaster mitigation activities; and (2) Subsection (a) shall only apply if the disaster loan and assistance provided under section 404 were made available in response to the same disaster declaration. (3) Shall be applicable only to disasters declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) during the period beginning on August 28, 2005 and ending on August 28, 2006. (c) If a state chooses to use funds under section 404 to reimburse homeowners as provided in subsection (a), it shall make payments in the following order: (1) First, to the Small Business Administration on behalf of the eligible homeowner for the purpose of reducing, but not below zero, the homeowner's outstanding debt obligation to the Small Business Administration for the disaster loan; and (2) Second, any remaining reimbursement shall be paid directly to the homeowner.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 567

[Sec. 567. None of the funds made available under this Act or any prior appropriations Act may be provided to the Association of Community Organizations for Reform Now (ACORN), or any of its affiliates, subsidiaries, or allied organizations.]

Explanation: The Department requests deletion of this provision because it was a onetime directive.

Proposal to Insert *New* Section 538

Sec. 538. Section 401(b) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, as amended (8 U.S.C. 1324a note), is amended by striking "September 30, 2012" and inserting "September 30, 2014".

Explanation: The Department requests insertion of this provision as a routine extension of authority.

Proposal to Insert *New* Section 539

Sec. 539. Predisaster Hazard Mitigation - The FEMA Administrator may make grant awards at his discretion pursuant to Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133) with funds otherwise designated as congressionally directed spending and appropriated in any fiscal year under FEMA "National Predisaster Mitigation Fund", if either: (a) the intended applicant for such earmarked funding informs FEMA in writing that no application will be submitted to use the funding; or (b) no application for such earmarked funding is submitted to FEMA within two years of the date of the respective appropriation for such funds; Provided, That amounts appropriated under "National Predisaster Mitigation Fund" in any fiscal year shall be available for necessary and reasonable costs to administer and to close out Predisaster Mitigation grants. Provided further, That the Administrator of the Federal Emergency Management Agency may transfer and merge unexpired funds previously appropriated to FEMA for the purposes of predisaster mitigation into the "National Predisaster Mitigation Fund."

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to help ensure national resiliency.

Proposal to Insert *New* Section 540

Sec. 540. DAM SAFETY ACT. The National Dam Safety Program Act, as amended (33 U.S.C. 467 note) is amended -- (1) In section 8(e) (33 U.S.C. 467f) by inserting after paragraph (6) the following new

paragraphs: "(7) PERFORMANCE-BASED EVALUATION-FEMA shall establish performance measures for its assessment of State programs participating in the National Dam Safety Program. FEMA shall assess State performance under this section using these measures. FEMA shall establish targets for the States for the performance measures within 120 days of the enactment of this Act and may update them, as needed, each fiscal year."(8) ALLOCATION- IN GENERAL. -- Subject to subparagraphs (C) and (D), for each fiscal year, amounts made available under this subsection to carry out section 8 shall be allocated among the states as follows: (A) "One-third of the funds shall be awarded among states that qualify as eligible for assistance under this section. (B) "Two-thirds of the funds shall be awarded among states that not only qualify as eligible for assistance under this section, but also meet or exceed their target established for the performance measures referred to in section 8(e)(7). (C) "MAXIMUM AMOUNT OF ALLOCATION.-The amount of funds allocated to a State under this paragraph may not exceed the funds committed by the State to implement dam safety activities. (D) "DETERMINATION. -- The Administrator shall determine the amount allocated to States.". (2) By redesignating sections 11 through 13, as sections 12 through 14, respectively, and by inserting after section 10, the following new section: Sec.11. PUBLIC AWARENESS AND OUTREACH FOR DAM SAFETY. The Administrator, in consultation with other Federal agencies, State, and local governments, dam owners, the emergency management community, the private sector, non-governmental organizations and associations, and universities and academia, and others as appropriate, shall carry out a nationwide public awareness and outreach program to provide risk information to the public related to the hazards of dam failures and related matters.". (3) In section 14, as redesignated by this Act, (33 U.S.C. 467j) by -- (A) striking subsection (a) and inserting (a) "APPROPRIATIONS -- "There is authorized to be appropriated to FEMA to carry out the National Dam Safety Program Act (in addition to any amounts made available for similar purposes included in any other Act) \$14.8 million for fiscal year 2013, \$15.2 million for fiscal year 2014, \$15.7 million for fiscal year 2015, \$16.2 million for fiscal year 2016."; (B) striking subsections (c), (d) and (e); and (C) redesignating subsection (f) as subsection (c).

Explanation: The Department requests insertion of this provision to provide for a nationwide public awareness and outreach program to provide risk information to Americans living and working downstream of high-hazard and significant-hazard potential dams. The information will assist emergency action planning and mitigate risk to the public from dam incidents and dam failures.

Proposal to Insert New Section 541

Sec. 541. (a)(1) For fiscal year 2014, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection: (A) For paragraph (1), \$594; (B) For paragraph (2), \$7.50; (C) For paragraph (3), \$11.25; (D) For paragraph (4), \$37.50; (E) For paragraph (5), \$7.50 for the fee imposed in subparagraph (A) and \$2.60 for the fee imposed in subparagraph (B); (F) For paragraph (6), \$7.50; (G) For paragraph (7), \$188; and (H) For paragraph (8), \$150. (2) For fiscal year 2014, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection: (A) For paragraphs (2) and (3), \$135; (B) For subparagraph (A) of paragraph (5), \$8,316; (C) For paragraph (6), \$2,100; (D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and (E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading. (3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended. (b) For fiscal year 2014, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section: (1) For subsection (d), \$9; and (2) For paragraph (3) of subsection (e), \$5.

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to meet frontline mission needs.

Proposal to Insert New Section 542

Sec. 542. (a) Notwithstanding section 13031(e) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(e)) and section 451 of the Tariff Act of 1930 (19 U.S.C. 1451) upon the request of any persons, the Commissioner of U.S. Customs and Border Protection may enter into reimbursable fee agreements for a period of up to 5 years with such persons for the provision of U.S. Customs and Border Protection services and any other costs incurred by U.S. Customs and Border Protection relating to such services. Such requests may include additional U.S. Customs and Border Protection services at existing U.S. Customs and Border Protection-serviced facilities (including but not limited to payment for overtime), the provision of U.S. Customs and Border Protection services at new facilities, and expanded U.S. Customs and Border Protection services at land border facilities. (1) By December 31, 2013, the Commissioner may enter into not more than 5 agreements under this section. (2) The Commissioner shall not enter into such an agreement if it would unduly and permanently impact services funded in this or any other appropriations Acts, or provided from any accounts in the Treasury of the United States derived by the collection of fees.

(b) Funds collected pursuant to any agreement entered into under this section shall be deposited in a newly established account as offsetting collections and remain available until expended, without fiscal year limitation, and shall directly reimburse each appropriation for the amount paid out of that appropriation for any expenses incurred by U.S. Customs and Border Protection in providing U.S. Customs and Border Protection services and any other costs incurred by U.S. Customs and Border Protection relating to such services.

(c) The amount of the fee to be charged pursuant to an agreement authorized under subsection (a) of this section shall be paid by each person requesting U.S. Customs and Border Protection services and shall include, but shall not be limited to, the salaries and expenses of individuals employed by U.S. Customs and Border Protection to provide such U.S. Customs and Border Protection services and other costs incurred by U.S. Customs and Border Protection relating to those services, such as temporary placement or permanent relocation of those individuals.

(d) U.S. Customs and Border Protection shall terminate the provision of services pursuant to an agreement entered into under subsection (a) with a person that, after receiving notice from the Commissioner that a fee imposed under subsection (a) is due, fails to pay the fee in a timely manner. In the event of such termination, all costs incurred by U.S. Customs and Border Protection, which have not been reimbursed, will become immediately due and payable. Interest on unpaid fees will accrue based on current U.S. Treasury borrowing rates. Additionally, any person who, after notice and demand for payment of any fee charged under subsection (a) of this section, fails to pay such fee in a timely manner shall be liable for a penalty or liquidated damage equal to two times the amount of the fee. Any amount collected pursuant to any agreement entered into under this subsection shall be deposited into the account specified under subsection (b) of this section and shall be available as described therein.

(e) Each facility at which such U.S. Customs and Border Protection services are performed shall provide, maintain, and equip, without cost to the Government, facilities in accordance with U.S. Customs and Border Protection specifications.

(f) The authority found in this section may not be used to enter into agreements to expand or begin to provide U.S. Customs and Border Protection services outside of the United States.

(g) The authority found in this section may not be used at existing U.S. Customs and Border Protection serviced air facilities to enter into agreements for costs other than payment of overtime.

(h) The Commissioner shall notify the appropriate Committees of Congress 15 days prior to entering into any agreement under the authority of this section and shall provide a copy of the agreement to the appropriate Committees of Congress.

(i) For purposes of this section the terms: (1) U.S. Customs and Border Protection services means any activities of any employee or contractor of U.S. Customs and Border Protection pertaining to customs and immigration inspection-related matters. (2) Person means any natural person or any corporation, partnership, trust, association, or any other public or private entity, or any officer, employee, or agent thereof. (3) Appropriate Committees of Congress means the Committees on Appropriations; Finance; Judiciary; and Homeland Security and Governmental Affairs of the Senate and the Committees on Appropriations; Judiciary; Ways and Means; and Homeland Security of the House of Representatives.

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to meet frontline mission needs.

Proposal to Insert New Section 543

Sec. 543. (a) IN GENERAL - - Notwithstanding any other provision of law, including Chapter 33 of Title 40, United States Code, the Secretary of Homeland Security may, for purposes of constructing, altering, operating or maintaining a new or existing land port of entry facility, accept donations of real and personal property (including monetary donations) and non-personal services, from private parties and State and local government entities. (b) PURPOSES - - The Secretary of Homeland Security may, with respect to any donation provided pursuant to subsection (a), (1) use such property or services for necessary expenses related to the construction, alteration, operation or maintenance of a new or existing land port of entry facility under the custody and control of the Secretary, specifically including but not limited to expenses related to land acquisition, design, construction, repair and alteration, furniture and fixtures and equipment (FFE), deployment of technology and equipment, and operation and maintenance (O&M); or (2) transfer such property or services to the Administrator of General Services for necessary expenses as described in subsection (b)(1) related to a new or existing land port of entry facility under the custody and control of the Administrator. (c) SUPPLEMENTAL FUNDING - - Property (including monetary donations) and services provided pursuant to subsection (a) may be used in addition to any other funding (including appropriated funds), property or services made available for the same purpose. (d) UNCONDITIONAL DONATIONS - - A donation provided pursuant to subsection (a) may specify the land port of entry facility(ies) in support of which the donation is being made and the timeframe in which the donated property or services must be used, but must otherwise be made unconditionally. (e) RETURN OF DONATIONS - - If the Secretary or Administrator do not use the property or services donated pursuant to subsection (a) for the specific land port of entry facility(ies) designated or within the timeframe specified, then such donated property or services shall be returned to the entity that made the donation; provided, however, that no interest shall be owed on any donation of funding provided under subsection (a) and returned pursuant to this subparagraph. (f) SAVINGS — Nothing in this section shall be deemed to affect or alter the underlying authority of the Secretary of Homeland Security or the Administrator of General Services to construct, alter, operate and maintain land port of entry facilities.

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to meet frontline mission needs.

Proposal to Insert New Section 544

Sec. 544. (a) The Commissioner of the United States Customs and Border Protection shall: (1) conduct a study assessing the feasibility and cost relating to establishing and collecting a land border crossing fee for both land border pedestrians and passenger vehicles along the northern and southwest borders of the United States; the study should include: (A) the feasibility of collecting from existing operators on the land border such as bridge commissions, toll operators, commercial passenger bus, and commercial passenger rail; (B) requirements to collect at land ports of entry where existing capability is not present;

and (C) any legal and regulatory impediments to establishing and collecting a land border crossing fee; and (2) complete the study within 9 months of enactment of this Act.

Explanation: The Department requests insertion of this provision to enable the Department to examine the feasibility and costs of establishing a land border fee.

Proposal to Insert New Section 545

Sec. 545. (a) IN GENERAL — Section 33 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229) is amended to read as follows: (a) ASSISTANCE PROGRAM. — (1) AUTHORITY. — The Director may make grants on a competitive basis directly to State fire training academies, in consultation with the chief executive of the State, in accordance with paragraph (11)(C).

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to help ensure national resiliency.

Proposal to Insert New Section 546

Sec. 546. (a) Of the unobligated balances available under the heading Coast Guard, Acquisition, Construction, and Improvements by Public Law 111–83, the following funds are hereby permanently cancelled, from the following programs, projects, or activities in the specified amounts: (1) Integrated Deepwater Systems program (surface ships), \$9,000,000; (2) Integrated Deepwater Systems program (other), \$4,000,000; and (3) High Endurance Cutter Sustainment by Public Law 111–83, \$1,500,000. (b) Of the unobligated balances available under the heading Coast Guard, Acquisition, Construction, and Improvements by Public Law 112–10, the following funds are hereby permanently cancelled, from the following programs, projects, and activities in the specified amounts: (1) Integrated Deepwater Systems program (surface), \$7,000,000; and (2) Integrated Deepwater Systems program (other), \$2,000,000. (c) Of the unobligated balances available under the heading Coast Guard, Acquisition, Construction, and Improvements by Public Law 112–74, the following funds are hereby permanently cancelled, from the following programs, projects, and activities in the specified amounts: (1) Shore and Aton (Major Shore, MASI), \$8,500,000; (2) Aircraft (HH-60 Sustainment), \$2,000,000; (3) Vessels (Fast Response Cutter), \$7,000,000; and (4) Other (Systems Engineering & Integration), \$1,000,000.

Explanation: The Department requests rescission of these funds to allow the reappropriation of funds to meet current recapitalization needs.

Proposal to Insert New Section 547

Sec. 547. The Commissioner of the United States Customs and Border Protection may waive the claim for reimbursement of \$221,123 from the fiscal year 2009 appropriation for the Office of the Federal Coordinator for Gulf Coast Rebuilding.

Explanation: The Department requests insertion of this provision to enable the Department to meet its fiscal obligations within available resources.

Proposal to Delete Old Section 570

[(RESCISSIONS)]

[Sec. 570. Of the funds transferred to the Department of Homeland Security when it was created in 2003, the following funds are hereby rescinded from the following accounts and programs in the

specified amounts: (1) \$2,577,000 from Coast Guard “Acquisition, Construction, and Improvements”; (2) \$5,355,296 from U.S. Immigration and Customs Enforcement “Salaries and Expenses”; (3) \$99,012 from U.S. Immigration and Customs Enforcement “Violent Crime Reduction Programs”; (4) \$3,332,541 from U.S. Customs and Border Protection “Salaries and Expenses”; (5) \$3,121,248 from Department of Homeland Security “Office for Domestic Preparedness”; (6) \$678,213 from Federal Emergency Management Agency “National Predisaster Mitigation Fund”; (7) \$5,201,000 from “Working Capital Fund”; (8) \$95,998 from “Counterterrorism Fund”; (9) \$41,091 from U.S. Customs and Border Protection “Violent Crime Reduction Fund”; and (10) \$153,095 from U.S. Immigration and Customs Enforcement “Violent Crime Reduction Trust Fund”.]

Explanation: The Department requests deletion of this provision because it is a onetime rescission.

Proposal to Delete *Old* Section 571

[(RESCISSIONS)]

[Sec. 571. The following unobligated balances made available to the Department of Homeland Security pursuant to section 505 of Department of Homeland Security Appropriations Act, 2011 (Public Law 112–10; 125 Stat. 147) are rescinded: (1) \$178,783 from “Analysis and Operations”; (2) \$1,619,907 from U.S. Customs and Border Protection “Salaries and Expenses”; (3) \$296,022 from Transportation Security Administration “Federal Air Marshals”; (4) \$37,800,412 from Coast Guard “Operating Expenses”; (5) \$879,153 from Coast Guard “Acquisition, Construction, and Improvements”; (6) \$1,104,347 from United States Secret Service “Salaries and Expenses”; (7) \$97,046 from National Protection and Programs Directorate “Management and Administration”; (8) \$78,764 from National Protection and Programs Directorate “Infrastructure Protection and Information Security”; (9) \$117,133 from Office of Health Affairs “Salaries and Expenses”; (10) \$1,301,581 from “United States Citizenship and Immigration Services”; (11) \$369,032 from Federal Law Enforcement Training Center “Salaries and Expenses”; (12) \$279,098 from Science and Technology “Management and Administration”; (13) \$1,072,938 from Domestic Nuclear Detection Office “Management and Administration”; and (14) \$216,744 from Federal Emergency Management Agency “Management and Administration”.]

Explanation: The Department requests deletion of this provision because it is a onetime rescission.

Proposal to Delete *Old* Section 572

[(RESCISSIONS)]

[Sec. 572. Of the funds appropriated to the Department of Homeland Security, the following unobligated balances are hereby rescinded from the following accounts and programs in the specified amounts: (1) \$10,000,000 from U.S. Immigration and Customs Enforcement “Salaries and Expenses”; (2) \$10,000,000 from U.S. Immigration and Customs Enforcement “Automation Modernization”; (3) \$5,000,000 from U.S. Customs and Border Protection “Automation Modernization”: Provided, That no funds shall be rescinded from prior year appropriations provided for the TECS modernization program; (4) \$71,300,000 from Transportation Security Administration “Aviation Security” account 70x0550; (5) \$7,000,000 from U.S. Customs and Border Protection “Border Security Fencing, Infrastructure, and Technology”; (6) \$2,427,336 from Coast Guard “Acquisition, Construction, and Improvements”; (7) \$5,000,000 from the “Office of the Chief Information Officer” related to Emerge2; and (8) \$27,400,000 from National Protection and Programs Directorate “United States Visitor and Immigrant Indicator Technology”.]

Explanation: The Department requests deletion of this provision because it is a onetime rescission.

Proposal to Delete *Old* Section 573

[Sec. 573. Sections 1309(a) and 1319 of the National Flood Insurance Act of 1968 (42 U.S.C. 4016(a) and 4026) are each amended by striking “September 30, 2011” and inserting “the earlier of the date of the enactment into law of an Act that specifically amends the date specified in this section or May 31, 2012”.]

Explanation: The Department requests deletion because the date has already been amended.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

Department of Homeland Security Departmental Management and Operations

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2012	2/15/2012	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	Quarterly Border Security Status Report The Secure Border Initiative shall now be called the Border Security Status Report and shall continue to include all performance metrics and resource data from past reports in their current format, with the exception that they no longer should include resource data on SBI total budget obligations and outlays and budget execution reports. that is included in the BSFIT expenditure plan. Additionall the report shall include the following: a. estimates of the impact of programs (such as Operation Streamline) that are intended to reduce the rate of recidivism of illegal border crossers; b. for ports of entry, the maritime domain and between the ports of entry: 1. border crossings, 2. the rate of apprehension of attempted border crossings, 3. the inflow into the US of illegal entrants that evade apprehension and c. data on the subsequent enforcement actoins associated with CBP apprehensions such as voluntary return, expedited removal, transfer to ICE custody, transfer to criminal prosecution, Mexican Interior Repatriation Program, and other categories necessary to provide an accurate accounting of such actions.	In department clearance.
2012	5/15/2012	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	See above.	Combined with first quarter, see above.
2012	8/15/2012	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	See above.	In production.
2012	11/15/2012	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	See above.	Combined with third quarter, see above.
2013	2/15/2013	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	See above.	In production.
2012	Upon completion.	Joint Explanatory Statement; House Report 112-91	FY12 DHS Efficiency Review Directs the Department to arrange for an independent evaluation of that review, and to provide the results of that evaluation to the Committee not later than 30 days after its completion.	Evaluation currently underway.

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2012	2/15/2012	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	Federally Funded Research and Development Centers - FY11 1st Semi-Annual The Department is directed to report semi-annually to the Committee on the current projects tasked to Federally Funded Research and Development Centers [FFRDCs], the funding obligated by component, including the purposes for the funds, and any projects completed in the prior 6-month period, with the first report due February 15, 2012. The Committee has yet to receive a report for fiscal years 2010 or 2011 pursuant to the requirement in Joint Explanatory Statement [111–298]. These reports are to be submitted expeditiously.	In department clearance.
2012	8/15/2012	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	Federally Funded Research and Development Centers - FY11 2nd Semi-Annual See above.	In department clearance.
2013	2/15/2013	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	Federally Funded Research and Development Centers - FY12 1st Semi-Annual See above.	In department clearance.
2013	8/15/2013	Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	Federally Funded Research and Development Centers - FY12 2nd Semi-Annual See above.	In production.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Secretary and Executive Management

I. Appropriation Overview

A. Mission Statement:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) provides leadership, direction, and management to the Department and all of its Components. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. OSEM oversees the Department's ongoing efforts to integrate and consolidate its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

B. Budget Activities:

OSEM is a separate appropriation within Departmental Management and Operations (DMO) that provides resources for 15 separate Programs, Projects and Activities (PPAs) including: Immediate Office of the Secretary, Immediate Office of the Deputy Secretary, Chief of Staff, Office of the Executive Secretary (ESEC), Intergovernmental Affairs (IGA), Office of Policy, Office of Public Affairs (OPA), Office of Legislative Affairs (OLA), Office of the General Counsel (OGC), Office for Civil Rights and Civil Liberties (CRCL), Office of the Citizenship and Immigration Ombudsman (CISOMB), Privacy Office, the Private Sector Office (PSO), the Office for State and Local Law Enforcement (OSLLE), and the Office of International Affairs (OIA). As in the 2013 Budget, the Department proposes establishing the Private Sector Office, the Office for State and Local Law Enforcement, and the Office of International Affairs as new PPAs. Below are brief descriptive summaries of the PPAs.

Immediate Office of the Secretary: The Office of the Secretary's role is to provide executive leadership, management, direction, and oversight for the Department's Components. The Secretary represents the Department of Homeland Security (DHS) to the President, Congress, State, local, tribal and territorial partners, and the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department, especially regarding internal management and direction.

Chief of Staff: The Chief of Staff is responsible for coordinating policy initiatives and other actions of the Department's Components, directorates, and offices.

Office of the Executive Secretary: ESEC supports the Offices of the Secretary and Deputy Secretary with management of their correspondence, decision documents, and other written communications, including briefing books, Congressional questions for the record, and testimony for all Departmental

hearings. ESEC is charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature has been thoroughly cleared with all relevant Components.

Office of the General Counsel: The General Counsel is the chief legal officer for DHS and oversees and integrates more than 1,800 attorneys throughout the Department. OGC is responsible for ensuring that Departmental activities comply with applicable legal requirements, as well as establishing that the Department's efforts to secure the Nation are consistent with the civil rights and civil liberties of the public and observe the rule of law. OGC provides legal advice on areas such as national security, immigration, litigation, international law, maritime safety and security, transportation security, border security law, cyber security, fiscal and appropriations law, environmental law, and many others. OGC also provides legal services in several areas where the law intersects with the achievement of mission goals, such as the coordination of the Department's rulemaking activities, managing interdepartmental clearance of proposed legislation, and providing legal training for law enforcement officers. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute).

Office for Civil Rights and Civil Liberties: CRCL supports the Department as it secures the Nation while preserving individual liberty, fairness, and equality under the law. CRCL performs four key functions to integrate civil rights and civil liberties into Departmental activities:

- Advising Department leadership, personnel, and partners about civil rights and civil liberties issues; ensuring respect for civil rights and civil liberties in policy decisions and in the implementation of those decisions.
- Communicating with individuals and communities whose civil rights and civil liberties may be affected by DHS activities, informing them about policies and avenues of redress, and promoting appropriate attention within the Department to their experiences and concerns.
- Investigating and resolving civil rights and civil liberties complaints filed by the public.
- Leading the Department's equal employment opportunity programs and promoting personnel diversity and merit system principles.

Office of Public Affairs: OPA is responsible for managing external and internal communications. The office responds to national media inquiries, maintains and updates the Department's website, writes speeches for senior department officials, and coordinates speaking events for Department officials. OPA fosters strategic communication throughout the Department and with external stakeholders through development and coordination of major DHS announcements and rollouts as well as setting common goals to promote "One DHS" objectives. OPA manages the expansion of the "If You See Something, Say Something"™ campaign, which is a simple and effective program to engage the public and key frontline law enforcement personal to identify and report indicators of terrorism and terrorism-related crime to the proper transportation and law enforcement authorities. The office manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. Also, the office oversees the Department's employee communication activities, which include coordinating communications for Department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Per Presidential directive, OPA's incident communications program guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accurate and timely information is provided to the public during a crisis.

Office of Legislative Affairs: OLA serves as the Department's primary liaison to Congress. OLA advocates for the policy interests of the Administration and the Secretary. OLA also ensures that all DHS Components are actively engaged with Congress in their specific areas of responsibility. OLA articulates views on behalf of DHS Components and their legislative initiatives. OLA responds to requests and inquiries from congressional committees, individual Members of Congress, and their staffs. OLA also participates in the Senate confirmation process for all DHS Presidential nominees.

Privacy Office: The Privacy Office protects the collection, use, and disclosure of Personally Identifiable Information (PII) and Departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department; and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of the public. The Privacy Office has oversight of all privacy and disclosure policy matters, including compliance with the *Privacy Act of 1974*, the *Freedom of Information Act*, and the completion of privacy impact statements on all new programs and systems, as required by the *E-Government Act of 2002* and Section 222 of the *Homeland Security Act*. The DHS Privacy Office is the first statutorily-mandated Privacy Office within the Federal Government.

Citizenship and Immigration Services Ombudsman: CISOMB assists individuals and employers in resolving problems connected with pending United States Citizenship and Immigration Services (USCIS) cases. In addition, as required by statute, CISOMB identifies common problems experienced by individuals and employers when seeking USCIS services, and proposes changes to mitigate such problems and improve the delivery of immigration services. In accomplishing each of these missions, the CISOMB works impartially, soliciting information and feedback from USCIS, other government agencies, immigration benefits applicants, and the immigration stakeholder community.

Office of Policy: The Office of Policy (PLCY) serves as a central resource to the Secretary and other Department leaders for policy development and review, strategic planning and analysis, and facilitation of decision-making on the full breadth of issues that may arise across the dynamic homeland security enterprise.

PLCY is responsible for strengthening our Nation's homeland security by developing DHS-wide policies, programs, and planning to promote and ensure the highest level of performance, quality, consistency, and integration in the execution of all homeland security missions. PLCY represents and coordinates the consolidated DHS position at White House interagency committee meetings. The Office develops and articulates the long-term strategic view of the Department and translates the Secretary's strategic priorities into the Quadrennial Homeland Security Review, DHS Strategic Plan, and other planning products that drive increased operational effectiveness through integration, prioritization, and resource allocation. The Department proposes establishing independent offices for the Office for State and Local Law Enforcement, the Office of International Affairs (OIA), and Private Sector Office. While OIA will coordinate the Department's international operations and engagement, the Office of Policy will continue to work with OIA to coordinate and develop international policy.

Office of International Affairs: The Office of International Affairs (OIA) leads, coordinates, and integrates the Department's interaction with its international partners, while developing and overseeing the implementation of the Department's international engagement strategy. The Office of International

Affairs provides oversight on visa waiver negotiations through its Visa Waiver Program Office. The Department proposes to establish OIA as an independent office and PPA in FY 2014.

Private Sector Office: The Private Sector Office (PSO) fosters strategic communications with businesses, trade associations, and other non-governmental organizations to build stronger relationships between them and the Department. The office advises Departmental leadership on prospective policies and regulations, informs the Secretary about the economic impact of DHS policies, promote public-private partnerships and best practices to improve the Nation's homeland security, and serve as the primary point of entry for the private sector into DHS. The Department proposes to establish PSO as an independent office and PPA in FY 2014.

Office for State and Local Law Enforcement: The Office for State and Local Law Enforcement (OSLLE) is the Department's principal liaison with non-Federal law enforcement partners. OSLLE formulates and coordinates national-level policy relating to law enforcement's role in preventing acts of terrorism, and serves as the primary Department liaison with State, local, and tribal law enforcement agencies. The Department proposes to establish OSLLE as an independent office and PPA in FY 2014.

Office of Intergovernmental Affairs: IGA is responsible for communicating and coordinating State, local, tribal, and territorial (SLTT) government interactions throughout and across the Department. IGA promotes an integrated national approach to homeland security by coordinating and advancing Federal interaction with SLTT governments. IGA is responsible for continuing the homeland security dialogue with our SLTT partners, along with the national associations that represent them. IGA serves as the Secretary's primary point of contact for SLTT elected and appointed officials and their associations to ensure there are open lines of communications between the Department and its homeland security partners.

In FY 2014, OSEM is requesting the break out of the Office of International Affairs, the Private Sector Office, and the Office for State and Local Law Enforcement from the Office of Policy. The creation of these standalone offices will provide greater visibility for international, private sector, and state and local law enforcement stakeholders. Strategic communication and coordination with international partners, businesses, trade associations, other non-governmental organizations, and state and local law enforcement enables the Department to strengthen its efforts toward achieving its mission.

C. Budget Request Summary:

The Office of the Secretary and Executive Management requests 628 positions, 628 FTE, and \$126,554,000 for FY 2014. This includes the transfer of 10 positions, 10 FTE, and \$2,990,000 from National Protection and Programs Directorate (NPPD) in FY 2012 for Risk Management and Analysis (RMA) and the termination of the Office of Counternarcotics Enforcement (CNE), per Public Law 112-74. The FY 2014 request results in a net decrease of 62 positions, 60 FTE, and \$7,856,000 from the FY 2012 base. Total base adjustments of (\$12,318,000) include:

- Transfer of RMA from NPPD (\$2,990,000, 10 positions, 10 FTE)
- Transfer of 4 positions from OCIO to OPA for Web Communications, to provide oversight and operations and maintenance support for www.dhs.gov (\$545,000, 4 positions, 4 FTE)

- Transfer from OCRSO for Shared Services items transferred to the Working Capital Fund (\$388,000)
- Increase – Pay Raise (\$894,000)
- Increase – Annualization of prior year funding for 287(g) and Secure Communities (\$373,000, 2.5 FTE)
- Decrease – Right-Sizing of Personnel (40 Positions, 40 FTE)
- Decrease – Efficiencies described in Section D. – (\$15,708,000, 41 Positions, 41 FTE)
- Decrease – Termination of CNE – (\$1,800,000)
- Net zero change – Realignment from Office of Policy for OIA, PSO, and OSLL
 - Increase – Office of International Affairs (\$7,988,000, 44 Positions, 44 FTE)
 - Increase – Private Sector Office (\$1,761,000, 11 Positions, 11 FTE)
 - Increase – Office for State and Local Law Enforcement (\$891,000, 5 Positions, 5 FTE)
 - Decrease – Office of Policy – (\$10,640,000, 60 positions, 60 FTE)

The Office for Civil Rights and Civil Liberties has two program changes that include 1 position, 0.5 FTE, and \$135,000 to support the Department’s role in countering domestic violent extremism, and \$1,327,000 in oversight support of ICE’s 287(g)/Secure Communities programs. The Office of Public Affairs includes one program change that includes \$3,000,000 for the continuation and expansion of the “If You See Something, Say Something TM” campaign. These changes are described in greater detail in Section IV.

D. Efficiencies: **\$15.708 million**

Mission Support and Personnel Efficiencies **\$7.348 million**

Mission Support Staffing (\$7.348 million) – This request includes a savings of \$7.348 million, which will be realized by reducing mission support activities by 41 FTE.

Printing Efficiencies **\$0.302 million**

Print Shop services (\$0.302 million) – This request reflects a \$0.302 million savings for the elimination of printing services for discretionary products which are not required by law or are not considered mission critical.

Supplies and Materials Efficiencies **\$0.161 million**

Supplies and Materials (\$0.161 million)–This request reflects a \$0.161 million savings due to a reduction in ordering supplies and materials. With a reduction of 41 FTE, less supplies and materials will be needed.

Travel Efficiencies **\$1.77 million**

Travel (\$1.77 million) – This request reflects a savings of \$1.77 million which will be realized by reducing travel for conferences and non-local training, combining site visits, and increasing the use of technology such as video teleconferencing.

Advisory and Assistance Contracts Efficiencies **\$4.238 million**

Advisory and Assistance Contracts (\$4.238 million) – This request reflects a savings of \$4.238 million which will be realized by the use of strategic sourcing and reducing the scope of contracts.

Other Services Efficiencies **\$0.208 million**

Other Services (\$0.208 million) – This request reflects a savings of \$0.208 million which will be realized by reducing the operations and maintenance of facilities and equipment.

Rent Efficiencies **\$1.681 million**

Rent (\$1.681 million) – This request reflects a savings of \$1.681 million which will be realized by reducing space requirements.

Total Change 2012 to 2014	-	-	(477)

OSEM requests 6 positions, 6 FTE, and \$4,128,000 in FY 2014 for the Immediate Office of the Secretary. Base adjustments include:

- Increase – Transfer from OCRSO for Shared Services (\$67,000)
- Increase – Pay Raise (\$17,000)
- Increase – Realignment between offices (\$395,000)
- Decrease – Efficiencies (\$956,000)
 - Decrease – Travel (\$922,000)
 - Decrease – Supplies and materials (\$34,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secretary is appointed by the President and confirmed by the Senate to lead DHS and act as the principal adviser to the President on homeland security matters. The Secretary ensures a coordinated national effort for the accomplishment of all DHS mission requirements, which include but are not limited to the prevention of terrorist attacks in the United States, the reduction of vulnerability to and minimization of impacts from catastrophic events, and the recovery from damage that may occur. The Secretary is a member of the Homeland Security Council, and serves as the principal spokesperson on homeland security issues for the Administration when testifying before the House Homeland Security Committee, the Senate Homeland Security and Government Affairs Committee, and the House and Senate Appropriations Committees.

Program changes include:

- Increase – Oversight of 287(g) and Secure Communities (\$1,327,000)
- Increase – Countering Domestic Violent Extremism (\$135,000, 1 Position, 0.5 FTE)

CURRENT SERVICES PROGRAM DESCRIPTION:

CRCL provides DHS with advice on the full range of civil rights and civil liberties issues, investigates complaints by the public about civil rights and civil liberties violations, and offers recommendations to solve problems uncovered by those investigations. CRCL provides training and technical assistance to DHS personnel and SLTT partners; and conducts outreach and engagement with communities whose civil rights and civil liberties are affected by DHS activities. CRCL is specifically involved in the oversight of ICE's 287(g) and Secure Communities programs by providing policy advice, investigations, and training to SLTT partners. CRCL also works on countering domestic violent extremism through community engagement initiatives and training for SLTT partners. The Office acts as the DHS-designated single point of contact for human rights treaties and complaints. CRCL also facilitates U.S. Government-wide communication to community leaders after a security or other incident, through its Incident Community Coordination Teams. CRCL makes information available to the public on the responsibilities and functions of, and how to contact, the Officer for Civil Rights and Civil Liberties, including how to file civil rights and civil liberties complaints. It conducts administrative adjudication of disability discrimination claims under Section 504 of the Rehabilitation Act of 1973. CRCL leads the Department's Equal Employment Opportunity (EEO) and diversity programs and is responsible for DHS-wide policies, training, and complaint adjudication processes to promote EEO and diversity for all employees and applicants.

Program changes include:

- Increase – “If You See Something, Say Something TM” Campaign (\$3,000,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Public Affairs (OPA) is responsible for oversight and management of all external and internal communications. On a daily basis, OPA responds to national media inquiries, maintains and updates the Department's website, writes speeches for principals and reviews and coordinates speaking events for Department officials. OPA fosters strategic communication throughout DHS and with external stakeholders. For the "If You See Something, Say Something™" campaign, OPA works with a variety of cities, states, and private sector partners, including universities, major sports leagues and entertainment venues to raise public awareness on indicators of terrorism and terrorism-related crimes, and to emphasize the importance of reporting suspicious activity to the proper state and local law enforcement authorities. OPA manages the DHS Organizational Identity Program, which provides guidelines for the proper use of the DHS seal and related identities. OPA oversees DHS employee communication activities which include Connect, and town hall meetings between management and employees. The Incident Communications Team coordinates incident communications with the White House, Federal departments and agencies, and state, local and international partners to ensure accurate and timely information is provided to the public during an incident. Communicating emergency public information is mandated by Homeland Security Presidential Directive (HSPD) 5 to ensure that potentially life-saving information is provided to the public in a timely manner.

CURRENT SERVICES PROGRAM DESCRIPTION:

The statutory mission of CISOMB is to assist individuals and employers in resolving immigration benefits problems, propose changes in its practices to improve customer service, and directly provide Congress and the Department with substantive analysis on the quality of immigration services. CISOMB accomplishes this mission through individual case assistance, public outreach geared toward unrepresented and underrepresented immigrant communities; the diligent study of important issues across the spectrum of immigration benefits and services; identifying best practices and forward-looking business models that will meet future challenges for DHS; proposing impartial, operationally

sound, and credible solutions to customer-service barriers; and working cooperatively with government partners to benefit the public. Throughout the year, CISOMB publishes recommendations, updates, and other advisories focused on improving the receipt, processing, review, and adjudication of immigration benefits. CISOMB provides Congress with a comprehensive annual report analyzing serious and pervasive problems affecting the delivery of immigration services.

 - Decrease – Other services (\$56,000)
 - Decrease – Rent (\$1,681,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Policy serves as the Department's principal source of thought leadership, policy development, and decision analysis for DHS senior leadership, Secretarial initiatives, and for other critical matters that may arise in a dynamic threat environment. This office leads the coordination, integration, and development of DHS-wide policies, programs, strategies, and plans across the Department's mission portfolios, including: counterterrorism; chemical, biological, radiological and nuclear (CBRN); transborder security; immigration; resilience; and screening. Further, the office facilitates decision-making by providing timely advice and analysis to the Secretary and other Departmental leaders.

PLCY also represents the Department at White House interagency policy committee meetings on the areas in the mission portfolios and also represents DHS on strategic planning efforts and major interagency strategy reviews. The office develops long-term strategic priorities to increase operational effectiveness and mission execution. Furthermore, PLCY is charged with and provides the Department with an integrated and DHS-wide capability for strategy development, strategic planning, long-term assessment, and decision analysis, including statistical and economic analysis and risk assessment and modeling.

The office also leads the charge on several Congressionally mandated and authorized programs and responsibilities to include: the development and execution of the Quadrennial Homeland Security Review (QHSR); work with states to move forward on the security standards of the REAL ID Act; work and interagency review concerning cases brought before the Committee on Foreign Investments in the United States; and the delivery of several reporting requirements on immigration and certain border security statistics.

The 2010 QHSR set a vision for and definition of homeland security, and set the mission structure that has since driven DHS strategy, management, and performance planning and activities. The second QHSR, due for delivery in FY2014, will preserve the existing vision statement and the five homeland security missions. The final report of the second QHSR will describe and communicate: (1) changes in the overall security environment that have occurred since the 2010 QHSR; (2) updates to certain goals within the five missions to reflect those changes; and (3) the specific *strategic shifts* necessary in certain key areas to address the changing security environment.

Total Change 2013 to 2014	41	41	7,626

OSEM requests 41 positions, 41 FTE, and \$7,626,000 in FY 2014 for the Office of International Affairs. Base adjustments include:

- Realignment (increase) – From the Office of Policy (\$7,988,000, 44 positions, 44 FTE)
- Increase – Pay Raise (\$47,000)
- Decrease – Right-Sizing Personnel (1 Position, 1 FTE)
- Decrease – Efficiencies (\$409,000, 2 Positions, 2 FTE)
 - Decrease – Mission support staffing (\$409,000, 2 Position, 2 FTE)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of International Affairs (OIA) leads, coordinates, and integrates the Department’s interaction with its international partners, while developing and overseeing the implementation of the Department’s international engagement strategy. Serving as the principal liaison with foreign governments, international stakeholders, and the interagency community in matters concerning DHS engagement, OIA also reviews international agreements and manages the DHS Attachés. OIA also provides oversight and recommendations on visa waiver negotiations through its Visa Waiver Program Office.

OIA was established in the 2002 Homeland Security Act (Public Law 107–296) as an office within the Office of the Secretary (Sec. 879). In 2005, however, then-Secretary Chertoff consolidated OIA into the Office of Policy as part of the Second Stage Review. In 2008, the DHS Inspector General recommended that DHS “Clearly define the Office of International Affairs’ purview and provide it

with some authorities vis-à-vis DHS component international programs and offices...”¹. In 2010, addressing another recommendation of the Inspector General, OIA wrote the first DHS International Strategy. In 2011, Secretary Napolitano directed that OIA undertake a series of reforms to address problems and challenges in DHS’s international engagement, which also addressed all remaining Inspector General recommendations. Those reforms, all of which OIA carried out, included the first DHS global footprint review, the issuing of an International Affairs Management Directive concerning the coordination of DHS’s international engagement, the establishment of the first DHS-wide international pre-deployment training program, and the naming of DHS Attachés in more than 50 U.S. Missions around the world. As an independent office, OIA will be able to carry out its new responsibilities and prioritize resources in order to more effectively and efficiently achieve its mission. Reporting to the Secretary, OIA can provide decision-making, coordination, review, and dissemination of international information Department-wide more efficiently. Furthermore, the position of OIA within the Department would be more akin to that of other cabinet level agencies.

The creation of OIA as an independent office would not result in increased costs. Dedicated resources for finance, acquisitions, and human capital are already in place that currently support OIA as a division within the Office of Policy. As an independent office, OIA’s business support resources will be able to more effectively focus on the challenging, specialized processes and procedures of working in the international realm. Below is an object class breakout to depict prior year funding levels for OIA.

2014 Total Request	10	10	1,666
Total Change 2013 to 2014	10	10	1,666

OSEM requests 10 positions, 10 FTE, and \$1,666,000 in FY 2014 for the Private Sector Office. Base adjustments include:

- Realignment (increase) – From the Office of Policy (\$1,761,000, 11 positions, 11 FTE)
- Increase – Pay Raise (\$13,000)
- Decrease – Efficiencies (\$108,000, 1 Position, 1 FTE)
 - Decrease – Mission support staffing (\$88,000, 1 Position, 1 FTE)
 - Decrease – Travel (\$20,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The mission of the Private Sector Office (PSO) is to foster strategic communications with leaders of businesses, trade associations, and other non-governmental organizations to create stronger relationships with DHS. As a direct report to the Secretary, PSO will be the lead office and point of contact for advising the Secretary, Deputy Secretary, and Component heads on prospective programs, initiatives, and regulations which relate to the private sector. PSO informs the senior DHS leadership on the economic impact to the private sector from DHS activities across all five QHSR mission areas. In addition, PSO leads DHS in the promotion of public-private partnerships and best practices to improve the Nation’s homeland security and aid in both economic and national security.

PSO coordinates active engagement between DHS and the private sector to build strong partnerships, shape policy, and enhance internal and external dialog. In times of heightened threat/crisis and emergency response, the Private Sector Office serves as an advisor as well as a resource for the

Secretary, Deputy Secretary and Component Heads with key strategic links to the private sector community.

In FY 2014, the Department proposes establishing PSO as an independent office as directed in the original Homeland Security Act of 2002. The current organizational structure of PSO has misrepresented the office as a policy office and not an outreach office. By identifying PSO as an outreach and external engagement organization, the office can better achieve its role as identified by the Homeland Security Act of 2002.

Reporting to the Secretary, PSO can provide more efficient and effective decision-making, coordination, and communication with both internal and external stakeholders. PSO has the required support infrastructure (financial, acquisition and human capital resources) within its current office to operate as an independent office. As such, there will be no additional costs or personnel required to support this new office.

Total Change 2013 to 2014	4	4	852

OSEM requests 4 positions, 4 FTE, and \$852,000 in FY 2014 for the Office of State and Local Law Enforcement. Base adjustments include:

- Realignment (increase) – From the Office of Policy (\$891,000, 5 positions, 5 FTE)
- Increase – Pay Raise (\$7,000)
- Decrease – Right-Sizing Personnel (1 Position, 1 FTE)
- Decrease – Efficiencies (\$46,000)
 - Decrease – Supplies and materials (\$2,000)
 - Decrease – Travel (\$35,000)
 - Decrease – Advisory and assistance contracts (\$9,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office for State and Local Law Enforcement (OSLLE) is the Department’s principal liaison to the non-Federal law enforcement community. As such, OSLLE is responsible for coordinating national-level policies related to non-Federal law enforcement’s role in preventing, preparing for, protecting against, and responding to natural disasters, acts of terrorism, and other hazards within the United States.

In the FY 2014, the Department proposes to establish OSLLE as an independent office. OSLLE responsibilities are similar to other DHS stand-alone offices that have primary liaison responsibilities with external stakeholders. State, local, and tribal law enforcement are vital partners in the Department’s efforts to keep our communities safe, secure, and resilient. Therefore, a clearly identified and highly visible point-of-contact within the Department is essential to ensure that the

homeland security and terrorism prevention needs of State, local, and tribal law enforcement are being addressed during policy development, grant allocation, and strategy formation.

As a standalone office, the OSLLLE would be better positioned to coordinate activities with and between other DHS offices and Components to ensure that intelligence and information sharing requirements of non-Federal law enforcement agencies are being addressed, as well as to ensure that law enforcement and terrorism-focused grants to state, local, and tribal government agencies are appropriately focused on terrorism prevention activities.

Below is an object class breakout to reflect prior year funding levels for OSLLLE.

 - Decrease – Travel (\$37,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

IGA serves as the voice and advocate for the State, Local, Tribal, and Territorial (SLTT) elected and appointed officials within the Department as well as the primary liaison between those officials and DHS leadership and senior officials.

IGA’s stakeholder community consists of the Nation's more than 500,000 elected and appointed officials. These officials include governors, state homeland security advisors (HSAs), mayors, county executives, city and county appointed officials, leadership of the 566 federally recognized Native American and Native Alaskan tribes, emergency managers, and the various national associations that represent these officials. On a daily basis, IGA coordinates and consults with the Department's stakeholders in the homeland security enterprise as they develop and implement policy and budget decisions that impact SLTT homeland security efforts as well as the Department and our operations.

IGA manages communications with SLTT officials and coordinates outreach activities across the spectrum of Departmental issues, initiatives, and programs confronting all agencies and Components of the Department. IGA also coordinates with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House. IGA strives to ensure that elected and appointed government officials across the nation at the state, local, tribal and territorial levels are informed of DHS policies programs, and priorities. IGA coordinates messaging and activities with the other DHS stakeholder offices—including Private Sector Office, State and Local Law Enforcement, Public Affairs, and Legislative Affairs—to ensure that the full spectrum of our partners are engaged in the homeland security process.

OSEM requests 0 positions, 0 FTE, and \$0 in FY 2014 for the Office of Counternarcotics Enforcement. Base adjustments include:

- Increase –Realignment between offices (\$623,000)
- Decrease – Termination of one-time costs (\$1,800,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Counternarcotics Enforcement (CNE) was terminated in Fiscal Year 2012 per Public Law 112-74. The FY 2012 funding remaining after CNE was terminated was transferred to the Office of Policy, which assumed policy development and coordination responsibilities previously assigned to CNE.

IV. Program Justification Changes

**Department of Homeland Security
Departmental Management and Operations
Office of the Secretary and Executive Management
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: CRCL- Oversight of 287(g) and Secure Communities
PPA: Office for Civil Rights and Civil Liberties
Program Increase: Positions 0, FTE 0, Dollars \$1,327

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							5	5	1,067
Program Increase							-	-	1,327
Total Request	-	-	-	5	2.5	694	5	5	2,394

Description of Item

The Office for Civil Rights and Civil Liberties (CRCL) requests a program increase of \$1.327 million to ensure that the Department's immigration efforts comply with all applicable civil rights statutes and constitutional requirements. In FY 2012, CRCL received a program increase of 5 positions, 2.5 FTE, and \$694K. The remaining 2.5 FTE are included as an adjustment-to-base in FY 2014 at \$373K.

The program increase of \$1.327 million will enable CRCL to further provide policy advice, investigations, and training relating to Immigration and Customs Enforcement's (ICE) Secure Communities and 287(g) programs. CRCL will continue to participate in ICE's 287(g) advisory committee, improve ICE's site audits of 287(g) jail model programs, conduct sole and joint investigations, improve data-based and statistical oversight, review policies and procedures to ensure respect for civil rights and civil liberties, and provide training and awareness briefing materials and roll call videos for State and local law enforcement.

Justification

Secure Communities has grown rapidly since the program first began in 2009. It reached nationwide activation in FY 2013. As such, CRCL's oversight is needed to ensure that the program complies with all applicable civil rights statutes and constitutional requirements.

CRCL is statutorily responsible for providing civil rights oversight for the Secure Communities and 287(g) programs, but as Secure Communities has rapidly expanded across the country, additional funding is required. In particular, funding will assist CRCL in establishing a robust ability to perform the following activities:

- Investigate broad civil rights complaints against such programs;
- Work with 287(g) jail model programs on systematic reporting and other compliance with Title VI of the Civil Rights Act of 1964 (which bans race and national origin discrimination);
- Support Secure Communities program training to assist compliance with civil rights requirements while identifying, detaining and processing individuals who have been identified as potentially removable immigration offenders, or to engage with affected communities to educate them about the program;
- Conduct outreach to ensure that local communities are aware of civil rights complaint procedures.

Moreover, funds will enable CRCL to:

- Conduct statistical analysis of Secure Communities to produce quarterly reports that will be made public and guide oversight analysis and investigation;
- Provide assistance to ICE on its 287(g) Office of Professional Responsibility (OPR) audit process;
- Work with ICE on training for 287(g) officers working in the jail model program; and
- Prepare a series of awareness briefings for front-line state and local law enforcement personnel on civil rights issues related to Secure Communities.

CRCL staff will conduct investigations involving systematic or consistent discriminatory practices, augment training (both live and web-based) provided to state and local law enforcement personnel that participate in the programs, conduct sophisticated special and routine statistical analysis, provide civil rights and civil liberties policy advice, and engage with affected communities. CRCL will also be able to increase collaboration efforts with both ICE and the U.S. Department of Justice (DOJ). ICE collaboration will include assistance in program development and evolution of policies, procedures, and activities to ensure appropriate protection for civil rights and civil liberties, to assist ICE's OPR in its audits of 287(g) jurisdictions both through on-site participation and recommendations for better incorporation of civil rights and civil liberties issues into its standardized audit procedures, and to provide civil rights and civil liberties training to ICE OPR auditors and to ICE 287(g) program managers. CRCL will also further collaboration with ICE's Law Enforcement Support Center (LESC) to better survey and monitor the exercise of immigration authority by state and local law enforcement.

Impact on Performance (Relationship of Increase to Strategic Goals)

The performance of this program will directly support DHS's mission of Enforcing and Administering Our Immigration Laws, which is enhanced by the Secure Communities and 287(g) jail model programs. It is crucial that these programs proceed with sufficient regard for civil rights requirements.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Secretary and Executive Management
 Justification of Program Changes
 (Dollars in Thousands)**

Program Increase 2: CRCL- Countering Domestic Violent Extremism
 PPA: Office for Civil Rights and Civil Liberties
 Program Increase: Positions 1, FTE 0.5, Dollars \$135

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							1	0.5	135
Total Request	-	-	-	-	-	-	1	0.5	135

Description of Item

The Office for Civil Rights and Civil Liberties (CRCL) requests 1 positions, 0.5 FTE, and \$135,000 to ensure the continuation of the CRCL “Counter Violent Extremism (CVE) through Community Partnerships” community engagement initiative and training program for state, local, and federal law enforcement. CRCL supports the implementation of the White House’s *National Strategy on Empowering Local Partners to Prevent Violent Extremism in the United States* and the DHS CVE strategy through enhanced community engagement initiatives, as well as comprehensive CVE training programs for law enforcement stakeholders. CRCL conducts community engagement workshops, in partnership with FBI, NCTC, and local law enforcement officials, to educate and inform community members of issues related to countering violent extremism. Additionally, CRCL’s CVE program trains thousands of law enforcement personnel annually to effectively use community partnerships to counter violent extremism. The CRCL CVE training curriculum includes three components of on-site instruction: understanding radicalization to violence; cultural awareness; and community engagement. Participants receive a how-to guide for community interaction and effective policing without the use of ethnic profiling. The course orients law enforcement personnel to key cultural issues involving the American Arab, Muslim, Sikh, Somali, and South Asian communities. Since October 2010, DHS CRCL trained over 3,500 law enforcement officials on CVE and cultural awareness at over 60 separate events.

Justification

With the requested funding, CRCL will be able to appoint a fully dedicated employee to provide continuous program support of CRCL’s CVE strategy. CRCL’s continuation of the enhanced community engagement and the CVE training program is necessary to conduct several of the activities designated under the White House’s *Strategic Implementation Plan for Empowering Local Partners to Prevent Violent Extremism in the United States* (SIP), released on December 8, 2011. The SIP is the

blueprint for how the U.S. Government will implement the Domestic Strategy on Countering Violent Extremism, its first strategy to address violent extremism in the Homeland. The SIP lists the current and future actions the U.S. Government will take in support of a locally-focused, community-based approach, in three broad areas: (1) enhancing engagement with and support to local communities; (2) building government and law enforcement expertise; and (3) countering violent extremist propaganda while promoting our ideals. This is the first U.S. Government strategy and implementation plan to address ideologically-inspired violent extremism in the homeland.

CRCL's CVE engagement and training project is listed as one of the key initiatives in the DHS role in the implementation for the White House Strategy.

CRCL served as a critical resource for the development of the DHS-FLETC effort in furtherance of the SIP to develop a CVE curriculum to be integrated into existing training programs for federal law enforcement. The curriculum gives federal law enforcement a better understanding of CVE and how to more effectively leverage existing local partnerships.

In addition, DHS, in partnership with the Los Angeles Police Department and the National Consortium for Advanced Policing, developed a CVE curriculum that includes a 16-hour continuing education module for executive and front line officers.

CRCL has been instrumental in empowering community based efforts to counter violent extremism. CRCL is working closely with Somali American communities, in Minneapolis, Minnesota and Columbus, Ohio, among others, to develop grassroots CVE efforts. Examples include: Day long community retreats with law enforcement, summit meetings with Somali youth on CVE strategies, and training programs to encourage community oriented policing.

In 2013, CRCL is working to integrate its training efforts into the Department's overall CVE training effort to support federal, state, and local law enforcement by making more resources available on the DHS/FBI CVE Training Resources Web portal that is hosted on the Homeland Security Information Network (HSIN). Further CRCL also co-chairs the NSS Sub-IPC the National Engagement Taskforce (NETF) with DOJ. The NETF has been tasked by NSS and the SIP to support federal, state, and local partners with best practices and resources regarding engagement and how best to partner with communities to prevent violent crime and violent crime that may be ideologically motivated.

Impact on Performance (Relationship of Increase to Strategic Goals)

The performance of the CVE project will directly support DHS's mission of *Preventing Terrorism and Enhancing Security*. CRCL will be able to dedicate full time support to continue to:

Meet the current and future DHS planned participation in the White House SIP implementation;

- Enhance community engagement initiatives to develop and promote grassroots efforts to counter violent extremism; and
- Improve the development of and use of standardized training based on the latest intelligence and academic research, which conveys information about violent extremism; improves cultural competency; and imparts best practices and lessons learned for effective community engagement and partnerships.

(Dollars in Thousands)

Program Increase 3: OPA- See Something, Say Something- Mass Casualty Shooting
PPA: Office of Public Affairs
Program Increase: Positions 0, FTE 0, Dollars \$3,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request		
	Pos	FTE	Dollars ² (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	3,000
Total Request	-	-	40	-	-	-	-	-	3,000

Description of Item

The Office of Public Affairs requests \$3 million to support the expansion of the “If You See Something, Say Something™” public awareness campaign. Originally implemented by New York's Metropolitan Transportation Authority (MTA), and later licensed to the U.S. Department of Homeland Security, “If You See Something, Say Something™” is a simple and effective program to engage the public and key frontline employees to identify and report indicators of terrorism and terrorism-related crime to the proper transportation and law enforcement authorities. Although the campaign has primarily focused on anti-terrorism efforts, it will continue to expand to include the prevention, preparation, mitigation, and response to violent incidents such as active shooter and mass casualty scenarios. This work will be done in coordination with the Department of Justice, the Federal Bureau of Investigation, and our State, local, and private sector partners. The funding will allow DHS to expand this campaign to additional cities, states, law enforcement partners, the private sector and the academic community and create educational materials, videos and other training tools. The funding will also facilitate the production and distribution of public service announcements (PSAs), advertisements, printing and translation of educational/informational material, and travel to briefings/trainings that are critical to increasing the reach of this successful campaign.

² The “If You See Something, Say Something™” campaign is a Department-wide initiative receiving contributions from other DHS components for total obligations of \$3 million in FY 2012.

Justification

The Department launched the “If You See Something, Say Something™” campaign in conjunction with the Department of Justice’s Nationwide Suspicious Activity Reporting Initiative—an Administration effort to train state and local law enforcement to recognize behaviors and indicators related to terrorism and terrorism-related crime; standardize how those observations are documented and analyzed; and ensure the sharing of those reports with the Federal Bureau of Investigation-led Joint Terrorism Task Forces for further investigation and fusion centers for analysis. The campaign underscores the Department’s message that homeland security begins with hometown security, in which an alert public plays a critical role in keeping our nation safe.

Since its launch in July 2010, “If You See Something, Say Something™” has expanded to include more than 215 partnerships with cities, states and the private sector, including universities, sports leagues and the transportation industry. Through these collaborations, DHS provides employees, volunteers and the general public with tailored DHS suspicious activity reporting materials including information on behaviors and indicators of terrorism and terrorism related crime, and how to report suspicious activities. The Department creates unique materials for each partnership, such as posters, digital materials for video boards or jumbotrons, tri-folds, and online assets among others, at no placement cost to the Department. Promotional materials and PSAs shown at past events—including the past three NFL Super Bowls, past two MLB World Series, the last three NBA All-Star Game and Jam Sessions and last three U.S. Opens— have been displayed at no cost to DHS.

As part of the Administration’s comprehensive efforts to prevent gun violence, DHS will continue to work with Federal and State and local law enforcement on expanding nationwide public awareness efforts such as the “If You See Something, Say Something™” campaign. The funding would enable DHS to better work with law enforcement and support new partnerships for educational and public awareness efforts, in order to further the Department’s ongoing efforts to prevent mass casualty shootings, as well as other acts of terrorism. With this funding, the Department will be able to proactively develop and provide materials to schools and local law enforcement, in order to better educate the public on active shooter activities.

The request funds advertisements for 15 to 20 cities, 10 Public Service Announcements geared towards colleges/universities, religious organizations and private sector groups, 7 to 10 in-person briefings/trainings and printing and translation of materials (posters, brochures, tri-folds, paystub inserts, etc.).

Impact on Performance (Relationship of Increase to Strategic Goals)

The “If You See Something, Say Something™” program is a top priority for the Department, aligning to its mission of *Preventing Terrorism and Enhancing Security*. Citizens play an active role in their communities in reporting suspicious activity to law enforcement and have helped foil numerous plots including a planned attack against a Martin Luther King Jr. Day parade route in Washington State in 2011. Separately in 2011, a gun store owner contacted authorities when a customer made unusual inquiries and a large ammunition purchase, helping to prevent a likely attack in Killeen, Texas. More recently, an alert construction worker helped to prevent the 2012 shooting in front of the Empire State Building from becoming an even worse tragedy by quickly finding police officers, who then acted to take down the shooter.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, [\$134,150,000] \$126,554,000: Provided, That not to exceed \$51,000 shall be for official reception and representation expenses, of which \$17,000 shall be made available to the Office of International Affairs for Visa Waiver Program negotiations in Washington, DC, and for other international activities: Provided further, That all official costs associated with the use of government aircraft by Department of Homeland Security personnel to support official travel of the Secretary and the Deputy Secretary shall be paid from amounts made available for the Immediate Office of the Secretary and the Immediate Office of the Deputy Secretary.

Immediate Office of the Secretary Mission Statement

The Office of the Secretary provides central leadership, management and direction for the entire Department of Homeland Security. This office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of Homeland Security to the President, Congress and the general public.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	623	662	630	7
11.3 Other than full-time permanent	342	509	347	5
11.5 Other personnel compensation	10	14	12	2
11.8 Special Service Pay	-	246	-	-
12.1 Benefits	225	274	228	3
Total, Salaries & Benefits	1,200	1,705	1,217	17

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The FY 2014 request reflects a 1% pay inflation increase of \$17,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$2,427	\$2,568	\$1,515	-\$912

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects an increase of \$395,000 for a realignment of funds between OSEM offices, a decrease of \$385,000 to offset an increase to the Working Capital Fund, and a decrease of \$922,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$328	\$328	\$371	\$43

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes an increase of \$43,000 due to an increase in GSA rent funded through the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$236	\$38	\$202	-\$34

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. The FY 2014 request reflects a decrease of \$34,000 to offset increases to the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$292	\$292	\$735	\$443

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2014 request includes an increase of \$376,000 for a realignment to the Working Capital Fund, and an increase of \$67,000 for the Shared Services transfer from OCRSO.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$78	\$78	\$44	-\$34

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request reflects a decrease of \$34,000 in efficiencies.

Immediate Office of the Deputy Secretary Mission Statement

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Department. This focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	489	489	302	(187)

11.5 Other personnel compensation	75	75	76	1
12.1 Benefits	253	253	256	3
Total, Salaries & Benefits	1,243	1,197	1,064	(179)

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The FY 2014 request reflects an increase of \$13,000 for a pay inflation of 1% and a decrease of \$192,000 for a realignment of funds between OSEM offices.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$518	\$384	\$339	-\$179

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease of \$60,000 to offset an increase to the Working Capital Fund, and an efficiency decrease of \$119,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$112	\$112	\$127	\$15

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes an increase of \$15,000 due to an increase in GSA rent funded through the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$168	\$168	\$223	\$55

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2014 request includes a total increase of \$55,000 due to an increase of \$45,000 for a realignment to the Working Capital Fund and an increase of \$10,000 for the Shared Services transfer from OCRSO.

Chief of Staff Mission Statement

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

12.1 Benefits	420	420	424	4
Total, Salaries & Benefits	1,642	1,642	1,533	(109)

Salaries and Benefits funds compensation directly related to duties performed by Federal civilian employees. The FY 2014 request includes a net decrease of \$109,000 which includes an increase of \$16,000 for 1% pay inflation and a decrease of \$125,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$339	\$258	\$226	-\$113

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a decrease of \$16,000 to offset increases to the Working Capital Fund and a decrease of \$97,000 for a realignment of funds between OSEM offices.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$73	\$73	\$82	\$9

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes an increase of \$9,000 due to an increase in GSA rent funded through the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$21	\$19	\$17	-\$4

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. The FY 2014 request includes a decrease of \$4,000 to offset an increase to the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$301	\$301	\$321	\$20

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2014 request includes an increase of \$20,000 for a realignment to the Working Capital Fund.

Office for Civil Rights and Civil Liberties Mission Statement

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall: Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	11,498	11,498	12,105	607

Office of Public Affairs Mission Statement

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. The Department's organizational identity, including the Homeland Security seal and word mark, was designed and implemented by the Office of Public Affairs. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with state, local, and international partners to ensure accuracy and timely information to the public during a crisis.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	2,236	1,917	1,876	(361)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes an increase of \$175,000 for travel related to the “If You See Something, Say SomethingTM” Campaign and a decrease of \$33,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$735	\$735	\$830	\$95

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request reflects an increase of \$95,000 due to an increase in GSA rent funded through the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$346	\$358	\$3,171	\$2,825

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes an increase of \$2,825,000 to fund advertisement buys, Public Service Announces (PSAs), printing, and translation services through the “If You See Something, Say SomethingTM” contract.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$1,058	\$986	\$801	-\$257

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF and DHS Shared Services. The FY 2014 request reflects an increase of \$6,000 for realignment to the Working Capital Fund and a decrease of \$263,000 for a realignment of funds between OSEM offices.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$50	\$46	\$20	-\$30

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when performed by contract with the private sector or another Federal Government account. The FY 2014 request reflects a decrease of \$30,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$40	\$55	\$15	-\$25

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request reflects a decrease of \$25,000 for efficiencies.

Privacy Officer Mission Statement

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens. Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider and the framework for considering the privacy impact of their technology decisions. The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	4,108	4,231	4,296	188

Citizenship and Immigration Services Ombudsman Mission Statement

The mission of the Citizenship and Immigration Service Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Service, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Office of Policy Mission Statement

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges Headquarters, Components, and operating agencies improves communication among DHS entities, eliminates duplication of effort, and translates policies into timely action. The Office of Policy also serves as a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	17,147	18,546	12,350	(4,797)
11.3 Other than full-time permanent	2,335	1,935	2,354	19

Total, Salaries & Benefits	25,976	26,469	19,144	(6,832)

Salaries and Benefits fund compensation directly related to duties performed for the Office of Policy by Federal civilian employees. The FY 2014 request reflects a net decrease of \$6,832,000 which includes an increase of \$200,000 for 1% pay inflation, a decrease of \$125,000 to offset an increase in the Working Capital Fund, a decrease of \$6,486,000 due to the realignment of 60 FTE to the Private Sector Office (PSO), the Office for State and Local Law Enforcement, and the Office of International Affairs out of the Office of Policy, a transfer in of \$2,990,000 for RMA, and a decrease of \$3,411,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$995	\$920	\$233	-\$762

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a total decrease of \$594,000 due to the realignment of the Office of International Affairs, Private Sector Office, and the Office for State and Local Law Enforcement, an increase of \$87,000 for realignment to the Working Capital Fund, an increase of \$54,000 for the Shared Services transfer from OCRSO, and a decrease of \$309,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$90	\$43	\$95	\$5

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of furniture and other household goods. The FY 2014 request reflects an increase of \$5,000 for realignment to the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$2,755	\$2,755	\$698	-\$2,057

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request reflects a decrease of \$732,000 for the realignment of the Office of International Affairs, Private Sector Office, and Office for State and Local Law Enforcement, an increase of \$356,000 due to an increase in GSA rent funded through the Working Capital Fund, and \$1,681,000 in efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$586	\$587	\$193	-\$355

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 realigns \$355,000 for GSA Rent and the realignment of the Office of International Affairs, Private Sector Office, and Office for State and Local Law Enforcement.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$2,934	\$2,203	\$1,960	-\$974

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes a decrease of \$640,000 in to transfer for the Office of International Affairs, Private Sector Office, and Office of State and Local Law Enforcement, a decrease of \$364,000 due to an increase in the Working Capital Fund, and an increase of \$30,000 for Shared Services transfer from OCRSO.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$442	\$501	\$0	-\$442

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request reflects a decrease of \$4,000 due to an increase in the Working Capital Fund, a \$10,000 realignment, and a decrease of \$428,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$7,359	\$6,341	\$4,999	-\$2,360

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including intra-agency service requirements. The FY 2014 request reflects an increase of \$85,000 for realignment to the Working Capital Fund, a decrease of \$415,000 for a realignment of funds between OSEM offices, and a decrease of \$2,030,000 in a transfer for the Office of International Affairs, Private Sector Office, and Office of State and Local Law Enforcement.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$349	\$349	\$293	-\$56

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when performed by contract with the private sector or another Federal Government account. The FY 2014 request reflects a decrease of \$56,000 to offset increases to the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$75	\$65	\$46	-\$29

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request reflects a decrease of \$29,000 as a result of the transfer out of OIA, PSO, and OSLLLE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$29	0	\$54	\$25

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes an increase of \$25,000.

Office of International Affairs Mission Statement

The Office of International Affairs (OIA) will report directly to the Secretary and will lead, coordinate, and integrate the Department's interaction with its international partners, and develop and oversee implementation of the Department's international engagement strategy. In FY 2014, OIA will be established as an independent office in order to improve visibility into ongoing international negotiations and other activities for the Secretary and the various other U.S Government departments, and to ensure immediate access by the international security community. The Office of International Affairs will be the Department's primary representative to the National Security Staff's regionally focused Interagency Planning Committees (IPC) and will oversee visa waiver negotiations via the Visa Waiver Program Office.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	-	-	2,949	2,949
12.1 Benefits	-	-	1,241	1,241
Total, Salaries & Benefits	-	-	4,190	4,190

Salaries and Benefits fund compensation directly related to duties performed for the Office of International Affairs by Federal civilian employees. The FY2014 request reflects a net increase of \$4,190,000 which includes a realignment of \$4,552,000 from the

Office of Policy to establish the Office of International Affairs as a standalone office, an increase of \$47,000 for pay inflation of 1%, and a decrease of \$409,000 for efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	0	0	\$451	\$451

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request reflects a realignment of \$451,000 from the Office of Policy to cover travel expenses.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	0	0	\$520	\$520

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request reflects a realignment of \$520,000 from the Office of Policy.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	0	0	\$585	\$585

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2014 request reflects a realignment of \$585,000 from the Office of Policy for advisory and assistance services.

Private Sector Office Mission Statement

The Private Sector Office (PSO) is charged with providing America's private sector with a direct line of communication to the Department. PSO works directly with individual businesses and through trade associations and other non-governmental organizations to foster dialogue between the private sector and DHS. PSO functions include: advising the Secretary on the impact of DHS policies, regulations, processes, and actions on the private sector and promoting public private partnerships to address homeland security challenges. In FY 2014, PSO will be established as an independent office.

Summary Justification and Explanation of Changes

Office of Intergovernmental Affairs Mission Statement

The mission of the office of Intergovernmental Affairs (IGA) is to act as an advocate for the State, local, tribal and territorial officials within DHS and to operate as the primary liaison between those officials and the secretary and senior DHS leadership. IGA facilitates an integrated national approach to homeland security across a broad spectrum of issues confronting DHS by ensuring, coordinating and advancing Federal interaction with State, local, tribal and territorial governments.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	1,141	1,296	1,163	22

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Under Secretary for Management

I. Appropriation Overview

A. Mission Statement for Under Secretary for Management:

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department to achieve its mission to lead the unified national effort to secure America. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

B. Budget Activities:

Departmental Management and Operations (DMO)

In addition to the specific organizations of the Management Directorate, DMO also includes the Office of the Chief Financial Officer (OCFO), the Office of the Chief Information Officer (OCIO), the DHS HQ Consolidation Project, and the Office of the Secretary and Executive Management (OSEM).

Immediate Office of the Under Secretary for Management

The Immediate Office of the Under Secretary for Management's primary mission is to provide leadership and oversight for all Departmental management line of business functions, including information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Office of the Chief Readiness Support Officer

The Office of the Chief Readiness Support Officer (OCRSO) is responsible for the overall leadership, internal controls and oversight, Department-wide, of: logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint Nationwide; and, support of DHS Headquarters operations. The CSRO focus is to deliver affordable readiness, meaning providing, in an affordable manner, the support products and services needed to enable people across DHS to perform their missions effectively. The CSRO team accomplishes this through building partnerships and collaboration, leveraging best practices and fostering innovation.

DHS Nebraska Avenue Complex Consolidation Project

The Nebraska Avenue Complex (NAC) currently serves as the headquarters facility for DHS, as well as the location for many mission support functions. DHS continues to invest in this property to sustain our overall operational capabilities. The NAC investments will be leveraged as the Department realigns the overall real estate portfolio to support the integration of DHS operations in the National Capital Region.

Office of the Chief Human Capital Officer

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs, and practices for attracting, retaining, and developing the skilled workforce needed to protect and secure our Nation. The work of the OCHCO is critical to supporting and enabling the Secretary's workforce strategy, which centers around four key goals: building an effective, mission-focused, diverse and inspiring cadre of leaders; recruiting a highly qualified and diverse workforce; retaining an engaged workforce; and solidifying a unified DHS culture of mission performance, adaptability, accountability, and results.

Human Resources Information Technology

The Human Resources Information Technology (HRIT) program provides leadership and enterprise IT solutions to enable core HR functionality and data access efficiency. The program manages the Department's HRIT portfolio and consolidates, integrates, and modernizes core HR systems by planning, acquiring, configuring, implementing, and supporting the ongoing operation of enterprise HRIT systems and services. HRIT works in partnership with the Operational Components and the Office of the Chief Information Officer to ensure effective and strategic alignment of effort.

Office of the Chief Procurement Officer

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support; policy and acquisition workforce issues; procurement ombudsman and industry liaison; and small and disadvantaged business utilization. The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services.

Office of the Chief Security Officer

The Office of the Chief Security Officer (OCSO) leads the collaborative security program to safeguard DHS people, information, and property. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. The office manages operational security systems and HSPD-12 card issuance for the Department. Additionally, the OCSO provides liaison support to the intelligence community on security matters affecting DHS.

C. Budget Request Summary:

The Under Secretary for Management (USM) requests 872 positions, 872 FTE and \$206.686 million for FY 2014. This is a net decrease of \$32.901 million from the FY 2012 Base.

The USM adjustment-to-base includes:

- Transfer from OCRSO to DHS Components for WCF Shared Services of 7 FTE and \$2.072 million.
- Transfer from OCRSO to OCIO of the Records, Forms and Printing function of 9 FTE and \$2.010 million.
- Increase of \$1.111 million for pay increase.
- Increase of 14 FTE and \$2.011 million for annualization of prior year enhancements.
- Increase of \$.352 million for a Technical Adjustment from FY 2012 Base to FY 2014 Request.
- Decrease of 23 FTE and \$18.768 million for Efficiencies.

Program Changes include:

- OCRSO Asset Management Portfolio Review \$1.751 million.
- OCRSO NAC Facility Design \$0.271 million.
- Human Resources Information Technology Reduction \$4.492 million.
- OCPO In-Residence Course Offerings \$3.808 million.
- OCSO Security Support Services \$3.454 million.

D: Efficiencies

Mission Support and Personnel Efficiencies

\$3.445 million

The Office of the Under Secretary for Management (USM) request includes a savings of \$3.445 million, which will be realized by eliminating 23 FTE positions in mission support through attrition and through the reduction of premium pay.

Travel Efficiencies

\$0.141 million

The USM request includes a savings of \$0.141 million which will be realized by reducing travel to conferences and non-local training, combining site visits, and increasing the uses of technology such as video teleconferencing.

Advisory and Assistance Contracts Efficiencies

\$15.119 million

The USM request includes a savings of \$15.119 million which will be realized by the use of strategic sourcing and reducing the scope of contracts.

Supplies and Materials Efficiencies

\$0.024 million

The USM request includes a savings of \$0.024 million which will be realized by reducing the purchase of supplies and materials and also leveraging buying power using strategic sourcing strategies.

Vehicles Efficiencies

\$0.039 million

The USM request includes a savings of \$0.039 million in vehicle savings which will be realized by the return of three leased vehicles and a delay in the replacement of fleet vehicles.

2014 Adjustments-to-Base	2	2	(65)
2014 Current Services	17	17	2,485
2014 Program Change	-	-	250
2014 Total Request	17	17	2,735
Total Change 2012 to 2014	2	2	185

The Immediate Office of the Under Secretary for Management (OUSM) requests 17 FTP, 17 FTE, and \$2.735 million for FY 2014. This is a net increase of \$185 thousand from the FY 2012 Base.

OUSM adjustments-to-base include:

- Increase of \$20 thousand for FY 2014 pay increase.
- Increase of 2 FTP/2 FTE and \$441 thousand for the transfer of the Delegations, Directives and Instructions function from OCRSO to OUSM.
- Increase of \$15 thousand for Shared Services funding from OCRSO.
- Decrease of \$541 thousand for Efficiencies:
 - Decrease of \$6 thousand in travel efficiencies.
 - Decrease of \$520 thousand in savings through administrative reductions and other efficiencies (to include reductions due to attrition and other workforce shaping strategies as well as advisory and assistance services).
 - Decrease of \$1 thousand for overtime.
 - Decrease of \$14 thousand for supply savings.

Program Changes include:

- An increase of \$250 thousand for enhancements to the analytic capabilities related to Integrated Investment Lifecycle Management efforts.

CURRENT SERVICES PROGRAM DESCRIPTION:

OUSM ensures the offices within the Management Directorate function effectively and efficiently in support of the Department. The requested funding will allow the OUSM to: oversee the functions of the Management Directorate offices; further DHS efforts to enhance functional integration; respond quickly to queries from within and outside the Department;; and identify and track performance related to the responsibilities of the Department.

The Office of the Chief Readiness Support Officer (OCRSO) requests 110 FTP, 110 FTE, and \$30.793 million for FY 2014. This is a net decrease of \$9.907 million from the FY 2012 Base.

OCRSO adjustment-to-base includes:

- Increase of 1 FTE and \$172 thousand for realignment adjustment from OCHCO to OCRSO.
- Increase of \$170 thousand for pay increase.
- Increase of \$198 thousand for a Technical Adjustment from FY 2012 base to FY 2014
- Decrease of 15 FTE and \$4.269 million to realign appropriate functions and personnel to OUSM, OCHCO, and OCIO.
- Decrease of 6 FTE and \$1.086 million to realign appropriate personnel to OCSO.
- Decrease of 7 FTE and \$2.072 million to transfer Shared Services to the WCF.
- Decrease of \$370 thousand million to transfer Shared Services to the WCF.
- Decrease of 2 FTE and \$900 thousand for Efficiencies:
 - Decrease of \$11 thousand for General TDY and Travel savings.
 - Decrease of \$53 thousand for DHS Strategic Sourcing Initiatives savings.
 - Decrease of \$19 thousand for vehicles purchase savings.
 - Decrease of \$10 thousand for supply savings.
 - Decrease of \$525 thousand in savings through efficiencies (from Advisory and Assistance Services).
 - Decrease of 2 FTE and \$282 thousand in mission support reductions.

Program Changes include:

- A decrease of \$1.751 million for the OCRSO Asset Management Portfolio Review.

CURRENT SERVICES PROGRAM DESCRIPTION:

Last year, an extensive review was conducted last year which resulted in an enhanced focus for the office formerly known as the Office of the Chief Administrative Officer. OCRSO is responsible for the overall leadership, internal controls and oversight, Department-wide, of: logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint Nationwide; and, support of DHS Headquarters operations. The collaborative review enabled OCRSO and Components to better integrate around affordable readiness efforts.

Asset Management Program

The Asset Management Program (ASP) provides policy and internal controls DHS-wide to support life-cycle management of all DHS assets and environmental sustainment programs. The organization is comprised of four major areas and focuses: sustainability & environmental programs; real property; personal property & mobile assets; and capital planning.

Operations Support

Operations Support provides effective delivery of Department administrative support services. The approach of OCRSO is to strengthen these support services through an integrated portfolio approach and by building stronger relationships with other DHS support organizations while aggressively driving down costs without sacrificing readiness. The functional areas include facilities management, support services, and HQ consolidation.

Affordable Readiness and Integration

Affordable Readiness and Integration serves as the focal point to collaborate on the efficiency of mission support activities across the Department. The primary functions of this organization include logistics integration; regional support coordination; and Departmental collaboration..

Centralization of Department Shared Services into the DHS Working Capital Fund

Based on a decision by the DHS Working Capital Fund Governance Board (WCFGB) for efficiency of the Department, starting in FY 2014 all Shared Services are to be centralized into the Working Capital Fund (WCF). The programs to be centralized include: Parking Services, Sedan Services, Mail Services, Transit Services, and Shuttle Services. Since inception of the Department in FY 2005, OCAO (now OCRSO) has been responsible for an outsize share of funding for the Shared Services while the Department consolidated and solidified. As a result of this realignment to WCF, funding originally provided to the OCRSO Shared Services needs to be allocated to the appropriate organizations responsible to pay for services received. This realignment of funding from OCRSO is neutral across the Department as a whole resulting in no additional cost or funding requirements.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 DHS HQ NAC Project
 Program Performance Justification
 (Dollars in Thousands)**

PPA: DHS HQ NAC Project

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	5,000
2014 Adjustments-to-Base	-	-	(31)
2014 Current Services	-	-	5,000
2014 Program Change	-	-	(271)
2014 Total Request	-	-	4,729
Total Change 2012 to 2014	-	-	(302)

The DHS Headquarters Project at the Nebraska Avenue Complex (NAC) requests \$4.729 million for FY 2014. This is a decrease of \$271 thousand from the FY 2012 Base. There are no adjustments within current services for this account.

NAC Program Changes include:

- Decrease of \$271 thousand for NAC Facility Design.

CURRENT SERVICES PROGRAM DESCRIPTION:

The NAC currently serves as the headquarters facility for DHS. The NAC and other current locations continue to operate at nearly full capacity in order to meet the Department’s current space demands. DHS long-range plans include the retention of this property as a consolidated location for DHS programs. Accordingly, DHS will need to continue to invest in this property to sustain operational capabilities in order to use it as one of the sites for DHS Components within the National Capital Region (NCR). The NAC investments will be leveraged as the overall real estate portfolio is realigned to support DHS operations and integration in the NCR. In FY 2014, the Department will undertake and complete the following projects at the NAC:

- Planning and implementation for upgrades and reconfigurations of space – to support changing mission requirements – and any moves to and from consolidated locations that would change the composition of Components at the NAC.

- Reconfiguration of spaces in several NAC buildings to increase utilization and support implementation of mobile workforce initiatives.
- Continue Electrical and Heating, Ventilation, and Air Conditioning (HVAC) utility upgrades, back-up generators, along with ongoing maintenance painting and carpet replacement of DHS spaces.
- The design, procurement, and installation of an emergency notification system for the NAC campus.
- Identification, construction upgrades, and signage for multiple Shelter-in-Place locations on the NAC campus designed for response to multiple potential hazards.

The Office of the Chief Human Capital Officer (OCHCO) requests 114 FTP, 114 FTE, and \$22.276 million for FY 2014. This is a net decrease of \$2.889 million from the FY 2012 Base.

OCHCO adjustment-to-base includes:

- Increase of 4 FTP/4 FTE and \$1.818 million for the realignment of the Occupational Safety & Health function from OCRSO to OCHCO.
- Increase of \$164 thousand for pay increase.
- Increase of \$90 thousand for Shared Services funding from OCRSO.
- Increase of \$154 thousand for a technical adjustment from FY 2012 base to FY 2014.
- Decrease of 1 FTE/1 FTE and \$172 thousand for the realignment of the Occupational Safety & Health function from OCHC to OCRSO.
- Decrease of 7 FTE and \$4.943 million for Efficiencies:
 - Decrease of \$33 thousand for General TDY and Travel.
 - Decrease of \$5 thousand for Purchasing Savings.
 - Decrease of \$2 thousand for Overtime.
 - Decrease of \$77 thousand for DHS Strategic Sourcing Initiatives.
 - Decrease of \$3.529 million through efficiencies (to include Other Services and Purchase from Government Accounts).
 - Decrease of 7 FTE and \$1.297 million in mission support reductions.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration of the Department's human capital policies, programs, and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation. DHS must build a strategic workforce planning capability to serve as the foundation for a balanced workforce and build a pipeline of talent to ensure the continued development, recognition, and advancement of our current workforce. The OCHCO continues to implement the DHS Workforce Strategy, which outlines the human capital goals of the Department. OCHCO's key programs are:

Human Capital Policies and Programs: Human Capital Policies and Programs develops and implements department-wide policy, programs, and strategic human capital guidance and ensures policies reinforce the highest standards of commitment, performance excellence, integrity and accountability in terms of alignment with mission priorities and compliance with laws and regulations. Human Capital Policies and Programs represents the Department to external stakeholders and participate in government-wide working groups and task forces and serves as the liaison to Office of Personnel Management on human capital initiatives.

Strategic Workforce Planning and Balanced Workforce Strategy : The Department has recently deployed a pilot strategic workforce planning process to identify and reduce staffing and skill gaps for selected Mission Critical Occupations (MCOs), as well as to develop a DHS-wide competency framework. The Balanced Workforce Strategy (BWS) is a repeatable process designed to determine the appropriate mix of Federal and contractor employees, simultaneously ensuring compliance with statutes and regulations while assessing and reducing potential risk to the Department's mission. The BWS includes reviewing Proposed Requirements for Services (i.e., new or re-competed contracts) for specific Special Interest functions.

Learning and Leader Development: OCHCO coordinates Department-wide training and development strategies, policy and programs to cultivate a capable workforce with the critical knowledge, skills and abilities to lead DHS in mission accomplishment. The DHS Leader Development Program (LDP) provides an integrated framework that enables both Department-wide consistency and mission-related Component flexibility in fostering a DHS culture of leadership effectiveness. The purpose of the LDP is to create and sustain a high-performing, diverse, engaged, and inspiring cadre of effective leaders now and into the future. Other key learning and leader development activities include the Secretary's Honors Program, Pathways Program, Presidential Management Fellows Program, and Rotations Programs.

Diversity and Inclusion: Diversity and Inclusion (D&I) partners with the Office for Civil Rights and Civil Liberties (CRCL) to provide Department-wide leadership and guidance on diversity and inclusion management, including recruitment and outreach, career development and workplace inclusion, and leadership commitment and management accountability. D&I manages the Department's efforts regarding veteran's employment as required by Executive Order, developing and implementing strategies to increase the number of veterans hired and employed by DHS. D&I also executes the DHS HQ harassment prevention program, which includes a process independent of the

HQ EEO complaint process to promptly investigate allegations of workplace harassment and provide prompt resolution and appropriate corrective action, when appropriate and necessary.

Occupational Health and Safety: The Department is requesting to realign the Occupational Safety and Health (OSH) function from the Office of the Chief Readiness Support Officer (OCRSO) to the OCHCO in FY 2014. This realignment is included in the \$22.276 million request and includes a net transfer of 3 FTP/3FTE and \$1.646 million. OSH functions have a natural nexus to existing programs within OCHCO to include Workers Compensation, Medical Qualifications and Fitness Standards, Drug Free Workplace, Employee Assistance Program and Employee Resiliency. Establishing the Department OSH Office within OCHCO for overall DHS OSH policy and program functions and accountability, and a separate safety office under the OCRSO for direct support to National Capital Region offices will improve the quality of DHS OSH performance and enhance overall OCHCO functions. Ultimately, the realignment will increase accountability, improve efficiencies, and reduce risks by aligning OSH resources with the most suitable functional channels.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 HRIT
 Program Performance Justification
 (Dollars in Thousands)**

PPA: HRIT

	Perm. Pos	FTE	Amount
2012 Revised Enacted	19	21	14,172
2014 Adjustments-to-Base	5	3	(467)
2014 Current Services	24	24	13,705
2014 Program Change	-	-	(4,492)
2014 Total Request	24	24	9,213
Total Change 2012 to 2014	5	3	(4,959)

The Human Resources Information Technology (HRIT) requests 24 FTP, 24 FTE, and \$9.213 million for FY 2014. This is a net decrease of \$4.959 million from the FY 2012 Base.

HRIT adjustment-to-base includes:

- Increase of \$16 thousand for pay increase.
- Decrease of 3 FTE and \$483 thousand in mission support reductions and efficiencies.

Program Changes include:

- A decrease of \$4.492 million for Human Resources Information Technology reduction.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HRIT program was established to support the mission of consolidating, integrating, and modernizing the Department's HRIT infrastructure to provide the flexibilities and management information that will allow the Department to evolve in response to changing business, legislative, and economic drivers.

The HRIT program plans for, acquires, and implements systems and services by leveraging existing enterprise solutions, reducing redundancies, and increasing the functionality of HR systems across DHS. The program is governed by an HRIT Executive Steering Committee (ESC) established by the

Deputy Secretary in January 2010. HRIT program leaders have identified HR and HRIT performance gaps and areas for potential consolidation through a collaborative Human Capital Segment Architecture Study (HCSA) completed in August 2011. This effort identified fifteen Strategic Improvement Opportunities, involving over 80 potential projects, which will result in more efficient enterprise solutions.

A five-year HRIT Strategic Plan informed by the HCSA outcomes was completed in November 2011 through a cross-Departmental process approved by the HRIT ESC. The plan promotes an efficient and coherent approach to HRIT transformation throughout DHS and advances the management of HRIT as a portfolio of systems and services.

Current Challenges:

A number of advances were made in FY 2012 to improve the effectiveness of the HRIT programs. A key challenge to the HRIT enhancements, with over 80 potential projects involved, remain resource availability. HRIT staff will continue to work with Component staff through the HRIT Executive Steering Committee to identify segments of the strategic planning to be implemented.

Key Strategies and Action Plans:

The HRIT Strategic Plan FY 2012-16 established the direction and approach for achieving a prescribed shift toward Departmental HRIT systems and services:

- Enterprise Services: Maintain the commitment demonstrated by executive stakeholders to achieve a major transformation for HRIT from a Component and system-centric model toward an enterprise services model where department and government-wide services are selected that meet the majority of the HR business needs across DHS. This shift will reduce HRIT redundancies and promote economies of scale to enhance the quality and consistency of every aspect of HRIT, promote seamless processing, and drive cost efficiencies.
- Strategic Sourcing: Identify and leverage solutions that currently exist within the Department, where possible, to reduce the cost and time to deliver enterprise services. Enhance the use of strategic sourcing to leverage purchasing power and eliminate the burden of managing duplicate contracts. Continued access to a comprehensive DHS systems inventory and HRIT contract information is paramount to this effort.
- Governance: Continue to engage and develop partnerships among HR, Training and IT leadership through the HRIT ESC and working groups (e.g. the HRIT Advisory Team) and management councils.
- Investment Planning: Place a greater emphasis on developing investment strategies to drive cost reductions and improve budget alignment across the Department. Added levels of rigor in the planning process will help ensure Components better understand and prepare for the cost implications associated with the transition to enterprise services that benefit the entire Department.
- Project Execution: Actively involve stakeholders in the identification of core needs and drive toward common business processes and requirements that can be delivered using modular development to shorten the time to implement enterprise services.

FY 2012 Activity Funding (\$thousands) \$14,172	FY 2013 Activity Funding (\$thousands) \$14,259	FY 2014 Activity Request (\$thousands) \$9,213
¹ DHS - Human Resources Information Technology (HR-IT)	<ul style="list-style-type: none"> The Human Resource Information Technology’s mission is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds plan for, acquire, configure, and implement COTS/GOTS packages and eGov/HRLoB shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. The program is governed by the HRIT Executive Steering Committee (ESC), established per Deputy Secretary guidance. Once IT solutions have been acquired and deployed to DHS components, their Operations and Maintenance (O&M) is funded via Component contributions to Working Capital Funds (WCF). The DHS Chief Human Capital Officer (CHCO) and Component HC Executives, in partnership with the Chief Information Officer (CIO), have redefined a long-term strategic plan for HRIT through a Human Capital Segment Architecture (HCSA) study. 	

¹ This includes the appropriated funding towards the HRIT Program within OCHCO only and does not reflect Department-wide funding within the Working Capital Fund.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 Office of the Chief Procurement Officer
 Program Performance Justification
 (Dollars in Thousands)**

PPA: Office of the Chief Procurement Officer

	Perm. Pos	FTE	Amount
2012 Revised Enacted	315	325	78,000
2014 Adjustments-to-Base	38	28	(7,277)
2014 Current Services	353	353	70,723
2014 Program Change	-	-	(3,808)
2014 Total Request	353	353	66,915
Total Change 2012 to 2014	38	28	(11,085)

The Office of the Chief Procurement Officer (OCPO) requests 353 FTP, 353 FTE, and \$66.915 million for FY 2014. This is a net decrease of \$11.085 million from the FY 2012 Base.

OCPO adjustment-to-base includes:

- Increase of \$419 thousand for FY 2014 pay increase.
- Increase of 10 FTE and \$1.572 million for the annualization of prior year enacted enhancements to the acquisition workforce for cost estimators.
- Increase of \$184 thousand for Shared Services funding from OCRSO.
- Decrease of 6 FTE and \$9.452 million for Efficiencies:
 - Decrease of \$46 thousand for General TDY and Travel.
 - Decrease of 6 FTE and \$778 thousand in mission support reductions.
 - Decrease of \$8.628 million for efficiencies (to include Printing, Advisory and Assistance Services, Other Services, and Supplies).

Program Changes include:

- A decrease of \$3.808 million for the OCPO In-Residence Course Offerings.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCPO is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support, policy and acquisition workforce, Procurement Ombudsman and Industry Liaison, and small and disadvantaged business utilization. The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services.

Acquisition Support and Oversight

- Acquisition Workforce: Responsible for facilitating centralized hiring of the acquisition workforce including the Acquisition Professional Career Program for initial entry into select acquisition career fields and strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce.
- Operations Support: Principal liaison for the acquisition community.
- Acquisition Oversight: Responsible for developing and implementing a DHS acquisition oversight strategy in accordance with Management Directive (MD) 0784 and implementing internal controls for DHS's acquisition function in accordance with A-123.
- Program Management: Responsible for providing support to program managers DHS-wide and assisting in the development of a DHS-wide acquisition management system.

Strategic Initiatives

- Acquisition Policy and Legislation: Responsible for developing DHS acquisition regulations and policies, developing proposed acquisition legislation, and responding to proposed acquisition legislation.
- Competitive Sourcing and Privatization: Responsible for the Department's implementation of the *Federal Activities Inventory Reform (FAIR) Act of 1998*, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative.
- Strategic Sourcing and Acquisition Systems: Responsible for managing the DHS strategic sourcing program; developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

Office of Small and Disadvantaged Business Utilization (OSDBU)

- In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program.

The Under Secretary for Management is leading an effort to improve the overall acquisition process, namely strengthening the early requirements development process and enhancing our ability to manage the implementation and execution of acquisition programs. The establishment and institutionalization of MD-102 and the Management Directorate's Office of Program Accountability and Risk Management (PARM) have been instrumental in helping the Department establish a foundation of acquisition practices to govern how to manage DHS acquisition investments.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 Office of the Chief Security Officer
 Program Performance Justification
 (Dollars in Thousands)**

PPA: Office of the Chief Security Officer

	Perm. Pos	FTE	Amount
2012 Revised Enacted	240	237	70,000
2014 Adjustments-to-Base	14	17	(521)
2014 Current Services	254	254	69,479
2014 Program Change	-	-	(3,454)
2014 Total Request	254	254	66,025
Total Change 2012 to 2014	14	17	(3,975)

The Office of the Chief Security Officer (OCSO) requests 254 FTP, 254 FTE, and \$66.025 million for FY 2014. This is a net decrease of \$3.975 million from the FY 2012 Base.

OCSO adjustment-to-base includes:

- Increase of \$322 thousand for FY 2014 pay increase.
- Increase of \$81 thousand for Shared Services funding from OCRSO.
- Increase of 4 FTEs and \$439 thousand associated with the annualization of State, Local, Tribal, and Private Sector (SLTPS) personnel.
- Increase of 6 FTE and \$1.086 million for the realignment of personnel from OCRSO to OCSO.
- Decrease of 5 FTE and \$2.449 million for Efficiencies:
 - Decrease of \$54 thousand in premium pay.
 - Decrease of 5 FTE and \$548 thousand in mission support reductions.
 - Decrease of \$20 thousand due to the return of three CSO leased vehicles.
 - Decrease of \$45 thousand due to travel efficiencies.
 - Decrease of \$1.782 million in Administrative and Technical service contracts.

Program Changes include:

- A decrease of \$3.454 million for the OCSO Security Support Services.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCSO provides security personnel trained to lead, govern, integrate, and manage the security functions of the Department. The Chief Security Officer serves as the chair of the DHS CSO Council, in consultation with the head security officials for each Component. OCSO provides security solutions in support of DHS missions and objectives, and implements Department-wide security programs, policies, and standards to effectively and efficiently safeguard DHS personnel, property, facilities, and information.

OCSO directly provides security services to the Components and offices within the DHS HQ organization. OCSO delivers effective business security support services to each Component of the DHS HQ organization through the integration of the following security disciplines:

- Administrative Security – implements and oversees policies, programs, and standards necessary to ensure the protection of collateral classified and sensitive but unclassified information; creates self-inspection programs that ensure classified and sensitive information is protected; and safeguards information for DHS, State and local fusion centers, major metropolitan police departments, and State emergency operations centers.
- Internal Security and Investigations – administers security audits, inspections, and investigations involving alleged crimes against DHS or its employees, and allegations of illegal activities by DHS personnel; provides investigative and liaison support to the intelligence community on security matters affecting DHS.
- Special Security Programs – provides security policy oversight, management, and guidance for the protection of Sensitive Compartmented Information (SCI) and information received from the intelligence community; provides administrative, industrial, and operational security programs for the handling and protection of SCI; and delivers security education and training.
- Physical Security – manages and implements physical security policies, programs, and standards for DHS facilities; provides access control, physical barriers, surveillance equipment, and technical services.
- Personnel Security – provides personnel security and suitability policies, programs, and standards, including procedures for granting, denying, and revoking access to classified information; initiates and adjudicates personnel security and suitability background investigations and periodic reinvestigations of applicants and appointees.
- Systems Security – manages, supports, and coordinates the OCSO systems and related processes, and collaborates with the OCIO to secure the OCSO proprietary operational systems.
- Identity Management – implements the Homeland Security Presidential Directive 12 (HSPD-12) requirement for a common identification standard for federal employees and contractors through the Working Capital Fund (WCF).

IV. Program Justification Changes

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Analytic Capacity for Integrated Investment Life Cycle Management
PPA: Immediate Office of the USM
Program Decrease: Positions 0, FTE 0, Dollars \$250

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	180
Program Decrease							-	-	250
Total Request	-	-	180	-	-	180	-	-	430

Description of Item

Integrated Investment Life Cycle Management (IILCM) is a transformational initiative to seamlessly integrate the budget formulation and execution process so “strategy drives budget versus budget driving strategy.” The IILCM provides a strategic framework to manage investments within the Department; providing the critical linkages between strategy, requirements, resource allocation, procurement and program management. The overall objectives of the IILCM are to align major investments with mission priorities; empirically determine how those investments perform over time; streamline the budget formulation and execution process; improve efficiency by consolidating the number of program reviews; reduce the number of duplicate investments by requiring the development of “joint” requirements and improve the effectiveness of governance through better data quality and business intelligence.

Justification

The Under Secretary for Management requests \$250 thousand to continue the phased approach to building the analytic capacity to fully support and mature IILCM. The IILCM framework identifies four distinct but connected phases: Strategy, Capabilities and Requirements, Program and Budget, and Execution Oversight. This will enable the Department to continue developing the method by which we refine and revise strategies to evaluate and manage DHS missions.

Impact on Performance

This request will allow the Department to continue improving inter-component coordination of acquisitions to optimize investments and transform and integrate the Department's people, processes and systems to better support the homeland security mission.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 Justification of Program Changes**
 (Dollars in Thousands)

Program Decrease 2: OCRSO Asset Management Portfolio Review
 PPA: Office of the Chief Readiness Support Officer
 Program Decrease: Positions 0, FTE 0, Dollars \$(1,751)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	4,220
Program Decrease							-	-	(1,751)
Total Request	2	2	4,220	2	2	4,220	2	2	2,469

Description of Item

The Office of the Chief Readiness Support Officer (OCRSO) remains vigilant and steadfast in its commitment to enable operational components to achieve affordable readiness. To accomplish this goal, OCRSO is responsible for the overall leadership, internal controls and oversight for logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint; and, support of DHS Headquarters operations. . The OCRSO is taking steps for necessary reductions while still being able to provide full customer support and continuing to support the Department’s priorities, goals, and objectives.

Justification

OCRSO is in the process of an enterprise-wide effort to integrate Component data from the Consolidated Asset Management Portfolio Information System (CAMPIS); the Sunflower Asset Management System (SAMS); and the DHS Virtual Office into a comprehensive management program. This initiative is at the core of the OCRSO mission and requires continued financial commitment in order to realize the full return on this investment. However, OCRSO will slow development and implementation to ensure funding for other high-priority initiatives.

Impact on Performance

OCRSO will slow the integration of their enterprise-wide effort to integrate Component Asset data through CAMPIS and SAMS. This will allow for analysis of current and future needs.

This reduction will also delay the implementation of OCRSO's DHS Virtual Office as a comprehensive management program. This program will allow for a more flexible mobile workforce and allow for reduction in costs such as rent. While DHS will be able to realize these possible savings, they will be spread over a longer time period due to the delay of implementation.

Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: OCRSO NAC Facility Design
PPA: DHS HQ NAC Project
Program Decrease: Positions 0, FTE 0, Dollars \$(271)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	5,000
Program Decrease							-	-	(271)
Total Request	-	-	5,000	-	-	5,000	-	-	4,729

Description of Item

The Office of the Chief Readiness Support Officer (OCRSO) remains vigilant and steadfast in its commitment to enable operational components to achieve affordable readiness. To accomplish this goal, OCRSO is responsible for real property, including DHS Headquarters operations. . The OCRSO is taking steps for necessary reductions while still being able to provide full customer support and continuing to support the Department’s priorities, goals, and objectives.

Justification

OCRSO is in the process of updating the facilities at the Nebraska Avenue Complex (NAC). In order to support the Department’s highest priorities, OCRSO will reduce professional services to the NAC by scaling back on the design, furniture management, and construction of lesser priority projects.

Impact on Performance

OCRSO will still be able to provide these services to the NAC occupants; however the funding reduction will cause a slight delay in the timeline to get projects completed.

Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 4: OCPO In-Residence Course Offerings
PPA: Office of the Chief Procurement Officer
Program Decrease: Positions 0, FTE 0, Dollars \$(3,808)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	8,897
Program Decrease							-	-	(3,808)
Total Request	-	-	8,897	-	-	8,897	-	-	5,089

Description of Item

The Office of the Chief Procurement Officer (OCPO) remains vigilant and steadfast in its commitment to provide overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs. Based on prior usage and student demand, the OCPO will reduce some in-residence course offerings. The OCPO has taken these necessary reductions while still being able to provide full customer support and continuing to support the Department’s priorities, goals, and objectives.

Justification

- Funding remains available to sustain contractor support for selected in-resident training programs for Acquisition Professional Career Program (APCP) participants and allows for the upgrading of selected in-residence course offerings critical for the certification of contract specialists.
- The OCPO Centralized Training function is adequately funded to allow training and classroom space specifically designed for the DHS Consolidated Training Facility. This will allow the APCP program managers to continue to provide certification training at no costs to the Components.

Impact on Performance

Reducing funding in support of in-residence course offerings permits OCPO to right-size requirements to align with anticipated demand. The OCPO will continue to monitor course enrollment statistics and reevaluate as necessary to ensure full support to APCP participants.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 Justification of Program Changes**
 (Dollars in Thousands)

Program Decrease 5: OCSO Security Support Services
 PPA: Office of the Chief Security Officer
 Program Decrease: Positions 0, FTE 0, Dollars \$(3,454)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	9,485
Program Decrease							-	-	(3,454)
Total Request	-	-	9,485	-	-	9,485	-	-	6,031

Description of Item

The Office of the Chief Security Officer (OCSO) remains vigilant and steadfast in its commitment to lead a collaborative security program to safeguard the Department’s personnel, information, and property so DHS may secure the Homeland. The OCSO has taken reductions while still being able to provide security support to our business partners and stakeholders and in fulfillment of the Department’s priorities, goals, and objectives.

Justification

- Contractual support for industrial security and *Contract Security Classification Specification* (DD254) form compliance for contractors will be eliminated.
- Contractual support for pre-employment processing, quality review and customer services, and special investigations required for additional investigative leads related to revocations, denials, and suspensions will be eliminated. A reduction in scope of the background investigations contract provided through OPM and the technical service contract for the Integrated Security Management System (ISMS) will also be made.
- Elimination of contractual support for security policy and program management support for Special Access Program will also be made.

Impact on Performance

Reducing funding for these contracts may impact timeliness, reduce the level of service provided, and the adaptability of OCSO. In the short term, OCSO government personnel will have to take on some of the collateral duties previously covered by these contracts. OCSO will realign resources to meet the Department's priorities and work to continue to provide necessary service to DHS Components.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Under Secretary for Management (USM):
 Justification of Program Changes**
 (Dollars in Thousands)

Program Decrease 6: HRIT Reduction
 PPA: HRIT
 Program Decrease: Positions 0, FTE 0, Dollars \$(4,492)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	11,114
Program Decrease							-	-	(4,492)
Total Request	-	-	11,114	-	-	11,114	-	-	6,622

Description of Item

The Human Resources Information Technology (HRIT) program remains steadfast in its mission to consolidate, integrate, and modernize the Department’s HRIT infrastructure to provide the flexibilities and management information.

Justification

DHS has shifted to obtaining Software as a Service solution, preferably hosted by the private sector, to address capability gaps. As solutions are identified, OCHCO will work in close coordination with the Office of the Chief Procurement Officer (CPO) Strategic Sourcing organization to develop a business case. OCHCO will submit the business case and cost proposal as a part of the Department’s Resource Allocation Plan (RAP) process. If the Department approves the requirement, each Component will need to identify funding in their budget to support the solution. Implementation will be in close partnership with CPO Strategic Sourcing to award enterprise Blanket Purchase Agreement (BPA) contract vehicles. Components will directly fund task orders using these BPAs. Changing the strategy by which the Department acquires enterprise-wide HRIT solutions will result in a \$4.492 million reduction in the FY 2014 HRIT budget request.

Impact on Performance

A reduction in funding will extend the timeline needed to address the 80 projects identified by the HRIT Executive Steering Committee. Future migrations of approved enterprise solutions to include CBP to WebTA and CBP, USSS, ICE, CIS and OIG to EmpowHR may require Component funding for implementation.

Immediate Office of the Under Secretary for Management Mission Statement

The Immediate Office of the Under Secretary for Management's primary mission is to provide leadership and oversight for all Departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	1,136	1,136	1,187	51
11.3 Other than full-time permanent	431	431	435	4
11.5 Other personnel compensation	20	20	19	(1)
12.1 Benefits	397	397	411	14
Total, Salaries & Benefits	1,984	1,984	2,052	68

The OUSM requests \$2,052,000 to fully fund the salaries and benefit costs for 17 FTEs, providing Departmental leadership, management and oversight in FY 2014. This is a net increase of \$68,000 and net increase of 2 FTP/2 FTE from the FY 2012 Base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$15	\$15	\$9	-\$6

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a net decrease of \$6,000 from the FY 2012 Base due to planned efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$339	\$339	\$376	\$37

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY2014 budget requests an increase of \$37,000 associated with additional space requirements and cost increases.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$10	\$10	\$9	-\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY2014 budget requests a decrease of \$1,000 associated with planned efficiencies in this area.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$149	\$165	\$250	\$101

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes an increase of \$101,000 due to planned efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$25	\$25	\$11	-\$14

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes a decrease of \$14,000 from the FY 2012 Base as a result of the DHS Federal Government Strategic Sourcing Initiative for micro-purchases.

Office of the Chief Readiness Support Officer Mission Statement

The mission of the Office of the Chief Readiness Support Officer (OCRSO) ensures USM offices function effectively and efficiently in support of the Department as a whole and in direct support of other USM offices.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	14,645	14,894	8,503	(6,142)
11.3 Other than full-time permanent	89	89	89	-
11.5 Other personnel compensation	232	232	232	-
12.1 Benefits	4,093	4,093	2,598	(1,495)
Total, Salaries & Benefits	19,059	19,308	11,422	(7,637)

Salaries and benefits include costs for 110 FTEs in FY 2014. This change includes the a pay raises for FY 2014; the transfer of OCRSO functions to OCIO; the realignment of functions to OUSM and OCHCO; the realignment of functions from OCRSO to OCSO; the realignment of functions to the WCF for Shared Services; as well as an efficiency reduction of 2 FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$75	\$75	\$64	-\$11

Travel includes all costs of transportation of persons, subsistence of travelers in accordance with Federal travel regulations. The FY2014 requested level includes \$11,000 in reductions taken as part of the efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$1,383	\$1,383	\$1,419	\$36

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes an anticipated increase of \$36,000 for space cost increases.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$13,626	\$13,626	\$9,983	-\$3,643

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The decreases in this account are reflective of the movement of functions to OCIO, OCHCO, the WCF; as well as efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$3,772	\$3,772	\$5,149	\$1,377

Purchases from Government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. This account reflects a \$1,377,000 increase in anticipated WCF costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$187	\$187	\$177	-\$10

Supplies and materials are defined as commodities are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above. This account reflects a decrease of \$10,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$158	\$158	\$139	-\$19

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is a decrease of \$19,000 due to efficiencies.

Office of the Chief Human Capital Officer Mission Statement

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	11,957	12,132	10,585	(1,372)
11.3 Other than full-time permanent	703	703	617	(86)
11.5 Other personnel compensation	199	199	175	(24)
12.1 Benefits	3,358	3,358	2,526	(832)
Total, Salaries & Benefits	16,217	16,392	13,903	(2,314)

Salary and Benefit costs support 114 FTEs. The FY 2014 Request includes a decrease in overtime costs, the FY 2014 pay increase, the realignment of the Safety function from the Office of the Chief Readiness Support Officer, and to accommodate promotions and step increases. The request includes a decrease of 7 FTE and further salary and benefit reductions will be managed through the hiring of a different grade mix or the delay in backfilling a position to remain within funding levels.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$154	\$154	\$76	-\$78

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a net decrease of \$78,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$1,858	\$1,858	\$2,411	\$553

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes a net increase of \$553,000 associated with increased space requirements and cost increases.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$99	\$99	\$87	-\$12

Other rent includes all payment to a non-Federal source for rental space, land, and structures. The FY 2014 request includes a net decrease of \$12,000 due to reduction of FTE and efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$10	\$10	\$9	-\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. There is a decrease of \$1,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$28	\$28	\$25	-\$3

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. There is a decrease of \$3,000 in FY 2014 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$732	\$732	\$643	-\$89

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is a decrease of \$89,000 due to efficiencies through strategic sourcing.

	FY 2012	FY 2013	FY 2014	FY 2012 to

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2014 Change
25.3 Purchases from Gov't accts.	\$5,939	\$5,918	\$5,009	-\$930

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. These costs represent OCHCO's costs for WCF/CRSO Shared Services, excluding rent. There is a decrease in FY 2014 of \$930,000 due to efficiencies identified and through the use of strategic sourcing contracts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$34	\$34	\$30	-\$4

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. There is a decrease of \$4,000 in FY 2014 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$69	\$69	\$61	-\$8

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is a decrease of \$8,000 due to efficiencies and savings achieved through purchasing via strategic sourcing contracts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$24	\$24	\$21	-\$3

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is a decrease of \$3,000 due to efficiencies.

HRIT Mission Statement

The HRIT Investment's mission is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds the planning, acquisition, configuration, and implementation of COTS/GOTS packages and eGov/HRLoB shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. The program is governed by the HRIT Executive Steering Committee (ESC), established per Deputy Secretary guidance. Once IT solutions have been acquired and deployed to DHS components, their Operations and Maintenance (O&M) is funded via Component contributions to Working Capital Funds (WCF).

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	2,370	2,459	1,548	(822)
11.5 Other personnel compensation	17	17	11	(6)
12.1 Benefits	658	658	427	(231)
Total, Salaries & Benefits	3,045	3,134	1,986	(1,059)

Salaries and Benefits include costs for 24 FTEs. The FY 2014 Request includes a decrease of 3 FTE and a small increase in personnel compensation to fund the FY 2014 pay increase. Further salary and benefit reductions will be managed through the hiring of a different grade mix or the delay in backfilling a position to remain within funding levels.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$11	\$11	\$7	-\$4

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a net decrease of \$4,000 from the enacted budget.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Office of the Chief Procurement Officer Mission Statement

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support, policy and acquisition workforce, Procurement Ombudsman and Industry Liaison, and small and disadvantaged business utilization. The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	31,057	31,057	31,177	120
11.3 Other than full-time permanent	288	288	296	8
11.5 Other personnel compensation	852	852	868	16
12.1 Benefits	9,704	9,704	9,987	283
Total, Salaries & Benefits	41,901	41,901	42,328	427

The OCPO requests \$42,328,000 to fully fund the salaries and benefit costs for 353 FTEs, providing Departmental leadership, oversight, and acquisition policy to the Department in FY 2014. This is a net increase of \$427,000, and a net increase of 4FTE from the FY 2012 Base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$290	\$290	\$244	-\$46

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a net decrease of \$46,000 from the FY 2012 Base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$2,264	\$2,264	\$3,536	\$1,272

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY2014 budget requests an increase of \$1,272,000 associated with additional space requirements and cost increases.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$75	\$75	\$50	-\$25

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 Request includes a net decrease of \$25,000 from the FY 2012 Base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$154	\$154	\$116	-\$38

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 Request includes a net decrease of \$38,000 from the FY 2012 Base due to a reduction in administrative support contracts.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$27,337	\$27,814	\$13,176	-\$14,161

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is a decrease in FY 2014 due to various administrative reductions. The FY 2014 request includes a decrease of \$14,161,000 from the FY 2012 Base due to reductions for services associated with the scaling back of in-residence course offerings, strategic sourcing initiatives, and acquisition workforce programs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$5,101	\$5,101	\$6,769	\$1,668

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY2014 budget requests an increase of \$1,668,000 associated with increased Working Capital Fund costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$26	\$26	\$20	-\$6

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. There is a decrease in this area in the amount of \$6,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$716	\$716	\$540	-\$176

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes a decrease of \$176,000 from the FY 2012 Base as a result of the DHS Federal Government Strategic Sourcing Initiative for micro-purchases.

Office of the Chief Security Officer Mission Statement

The OCSO leads the collaborative security program to safeguard the Department's people, information, and property so that the Department can secure the homeland. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; conduct investigations of criminal activities within or directed against DHS; and provide security support to DHS Components. The OCSO also manages and governs the operational security systems and HSPD-12 card issuance on behalf of the Department.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	23,848	23,994	25,452	1,458
11.3 Other than full-time permanent	73	73	61	(12)
11.5 Other personnel compensation	1,177	1,184	1,146	(38)
12.1 Benefits	7,040	7,083	7,648	565
Total, Salaries & Benefits	32,138	32,334	34,307	1,973

The OCSO requests \$34,307,000 to fully fund the salaries and benefit costs of 254 FTEs, providing Departmental leadership, operational services, and security business support to the Department's collaborative security program in FY 2014. This is a net increase of 1 FTP/5 FTE and \$1,973,000 from the FY 2012 Base. The adjustments to base include an increase of 4 FTE and \$439K

for the annualization of SLTPS personnel, the transfer of 6 FTP/FTE and \$749,000 from OCRSO to OCSO and to continue the operations and maintenance of the security requirements at St. Elizabeths Campus.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$255	\$257	\$230	-\$25

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2014 request includes a net decrease of \$25,000 from the FY 2012 Base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$3,842	\$3,842	\$3,756	-\$86

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes an anticipated decrease of \$86,000 for CSO space reductions in costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$59	\$59	0	-\$59

The OCSO does not request any funding for this object class and is a \$59,000 decrease from the FY 2012 Base.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$9	\$9	\$2	-\$7

The OCSO budget request includes a decrease of \$7,000 for continued printing requirements in FY 2014.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$8,705	\$8,758	\$4,623	-\$4,082

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 Request includes a net decrease of \$4,082,000 from the FY 2012 Base and is due to a reduction in administrative and technical security support contracts and background investigations.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$112	\$113	\$100	-\$12

The FY 2014 request includes a decrease of \$12,000 from the FY 2012 Base for the training of CSO employees.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$23,624	\$23,792	\$22,543	-\$1,081

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes a net decrease of \$1,081,000 due in part to the efficiencies gained

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	----------------------------	--------------------------	--------------------	------------------------------

through the reduction of leased vehicles, background investigations, and security system support.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$154	\$155	0	-\$154

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. In FY 2014, the OCSO does not require any funding for this object class as Data Center hosting was the primary cost driver in FY 2013 and will be funded through the WCF and is included under 25.3.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$18	\$18	\$22	\$4

There is a small increase projected in FY2014 associated with increased costs to maintain security systems.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$320	\$322	\$284	-\$36

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2014 request includes a decrease of \$36,000 from the FY 2012 Base as a result of the DHS Federal Government Strategic Sourcing Initiative for micro-purchases.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$750	\$755	\$144	-\$606

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2014 request includes a decrease of \$606,000 from the FY 2012 Base due to current estimates and need for equipment purchases.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Financial Officer

I. Appropriation Overview

A. Mission Statement

The mission of the Office of the Chief Financial Officer (OCFO) is to ensure that the funds necessary to carry out the Department's mission are obtained, allocated, and spent in support of the Department's priorities and in accordance with law and policies.

The DHS OCFO goals are to:

- Provide timely, accurate, useful, and actionable financial information to decision makers and stakeholders.
- Provide assurance that internal controls are effective.
- Provide efficient financial management services and operations.
- Develop program plans and budgets that are well-justified and balanced to support DHS priorities.
- Strengthen DHS financial management systems.
- Recruit, develop, and retain a talented workforce to achieve the OCFO mission.
- Strengthen financial assistance accountability.

B. Budget Activities:

Under OCFO, the following Divisions fulfill these functions:

Budget:

- Issue guidance to the Department's Components to ensure that all phases of budget formulation and execution are efficiently completed;
- Determine that sufficient resources are available to support activities of the appropriate fiscal year;
- Administer the Department's budget, appropriations, and expenditures of funds;
- Work with Program Analysis & Evaluation (PA&E) and DHS Components to formulate annual budget submissions, ensure these properly reflect DHS requirements, and assist in the presentation and defense of submissions to the Office of Management and Budget (OMB) and Congress;
- Coordinate and review budget execution for each Component and appropriation, conduct spend plan and execution reviews, and act on requests for modifications;
- Conduct special studies and analyses of execution of financial plans and recommend reprogrammings as necessary for effective funds utilization;

- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Prepare the Secretary to testify on the budget request and coordinate responses to Questions for the Record;
- Track, monitor status, and validate budgetary information of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of Component budget materials in accordance with OMB or Congressional guidance;
- Manage and coordinate Components' input into MAX, the on-line budget preparation data system;
- Analyze budgetary impact of pending legislation, testimony, and other documents; and
- Coordinate and review apportionments, reappropriations, and allotments for all DHS appropriations.

Program Analysis and Evaluation (PA&E):

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to homeland security objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;
- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs, and oversee preparation of the DHS performance plan and other performance reporting;
- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Deputy Performance Improvement Officer (PIO) in order to supervise performance management activities, provide advice on program performance goals, convene responsible parties to assess and improve program performance, and guide the use of performance measures in personnel performance appraisals;
- Develop and promote improved analytical tools and methods for analyzing homeland security planning and resource allocation;
- Establish policies for and oversee the integration of the planning, programming, and budgeting system of the Department; and
- Coordinate with and support the Office of Policy on DHS long-term strategic planning.

Financial Management:

- Develop and oversee Departmental financial management policy;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Resource Management Transformation (RMT) division;
- Coordinate the Department's participation in government-wide financial management initiatives;
- Manage the DHS Treasury Information Executive Repository (TIER);

- Prepare the Department's consolidated financial statements and other required financial information, including the Annual Financial Report;
- Provide guidance and oversight to DHS Components on accounting and financial reporting requirements, and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report; and
- Administer the DHS Bankcard Program (purchase, travel, and fleet), develop and document bankcard policy, provide training and internal controls to provide reasonable assurance that the objectives of the Bankcard Program are met, and ensure that fraudulent or improper use and untimely payment are identified in a timely manner and appropriate corrective action is taken.

Risk Management and Assurance:

- Implement the *Federal Managers' Financial Integrity Act* and its guidelines, *OMB Circular A-123: Management's Responsibility for Internal Control*, the *Chief Financial Officers Act*; the *DHS Financial Accountability Act*, and the *Improper Payments Information Act*;
- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;
- Issue guidance on and coordinate preparation of the Secretary's year-end Internal Control Assurance Statements; and
- Conduct reviews of key financial processes to ensure internal controls are operating effectively, with the goal of identifying weaknesses before they become problems.

Financial Assistance Policy and Oversight:

- Advise senior DHS leadership regarding the situation-specific application of government-wide statutes, regulations, OMB circulars, Executive Orders, and DHS Financial Assistance Policy as these relate to use of federal funds;
- Define the DHS Financial Assistance Line of Business, including streamlining and standardizing business models and business processes and developing supporting technology;
- Lead the development of a DHS-wide, end-to-end financial assistance (grants) management system to ensure a transaction audit trail and improve financial assistance award reporting;
- Develop and distribute DHS Financial Assistance Policy for use across DHS to communicate legal requirements, regulation, circulars, Executive Directives, Comptroller General Decisions, and other legal issuances related to the use of federal funds;
- Provide oversight to ensure DHS and recipient compliance with requirements regarding the use of federal funds;
- Assess OMB Circular A-133: Audits of States, Local Governments and Non-Profit Organizations high risk audit findings, resolve high risk findings backlog, and develop Cost Policy to assist recipients in avoiding repeat high risk findings;
- Gather award data across Components to meet the reporting requirements of the Federal Financial Accountability and Transparency Act of 2006;

- Increase the accuracy, timeliness, and reliability of all DHS financial assistance award data, and ensure any end-to-end system has auto reporting capabilities, including file transfer to public venues and robust ad hoc query capability;
- Develop and maintain Grant Officer/Assistance Officer standards and qualifications; and
- Articulate the steady state for an adequate centralized DHS Financial Assistance Policy and Oversight function.

Financial Operations:

- Oversee budget formulation and execution for Departmental Management and Operations (DMO) offices, including the Offices of the Secretary and Executive Management (OSEM) and the Under Secretary for Management (USM);
- Provide budget execution, accounting, and financial management and reporting services for DMO including managing apportionments, allotments, funds certifications, invoice processing, general ledger, payroll reconciliations, bank card, and travel;
- Oversee and manage the Department-wide Working Capital Fund (WCF);
- Perform internal audits and audit follow-up for DMO offices; and
- Provide reasonable assurance on internal controls over financial reporting and internal controls over operations.

GAO and OIG Audit Liaison:

- Coordinate the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings;
- Track audit recommendations and the Department's implementation of those recommendations; and
- Provide oversight and guidance to Component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

Resource Management Transformation:

- Provide guidance, training, integration assistance, and implementation of the new eTravel system (ETS2) for DHS;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Financial Management (FM) division; and
- Oversee and develop business intelligence activities and capabilities including developing executive reporting capabilities and implementing tracking databases.

Workforce Development:

- Provide the training and tools to support individual staff performance and career path development, and execute talent management initiatives to recruit the next generation of financial management leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS; and

- Create a pipeline of strong candidates for senior financial management leadership roles at DHS.

C. Budget Request Summary:

The OCFO requests \$48.779 million, 208 full-time positions (FTP) and 208 full-time equivalents (FTE). This is a decrease of \$2.081 million from FY 2012 Base. The program changes include an increase of \$4.000 million for Financial Systems Modernization and a decrease of \$2.764 million for contract support. This request also includes a decrease of \$3.638 million in efficiencies.

D. Efficiencies

Mission Support and Personnel Efficiencies

\$0.565 million

The OCFO request includes a savings of \$0.565 million, which will be realized by eliminating 4 FTE in mission support through attrition and through the reduction of overtime.

Advisory and Assistance Contracts Efficiencies

\$3.067 million

The OCFO request includes a savings of \$3.067 million which will be realized by the use of strategic sourcing and reducing the scope of contracts. The tasks affected by the reduction in scope will be shifted to current Federal employees in order to ensure priority functions are sustained.

Supplies and Materials Efficiencies

\$0.006 million

The OCFO request includes a savings of \$0.006 million which will be realized by reducing the purchase of supplies and materials.

2014 Total Request	208	208	48,779
Total Change 2012 to 2014	15	16	(2,081)

CURRENT SERVICES PROGRAM DESCRIPTION:

OCFO ensures that the funds necessary to carry out the Department’s mission are obtained, allocated, and expended in accordance with the Department’s priorities and relevant law and policies. This mission is supported by the Budget, PA&E, and Financial Operations divisions. OCFO also provides guidance and oversight of the Department’s budget, financial management, and resource management systems. This guidance and oversight are supported by the Financial Management, Internal Controls, Financial Assistance Policy and Oversight, GAO and OIG Audit Liaison, Resource Management Transformation, and Workforce Development divisions.

OCFO will achieve efficiencies through the strategic backfilling of positions, strategic sourcing, and information technology support reductions. OCFO will achieve additional efficiencies by reducing funding placed on contracts, relying on Federal staff to assume contractor responsibilities wherever possible, and reducing purchasing of supplies and equipment.

Adjustments to base include:

- Increase of \$109 thousand from the Office of the Chief Readiness Support Officer for Shared Services items transferring into the Working Capital Fund (WCF).
- Increase of \$220 thousand for a 1% pay raise.
- Increase of \$53 thousand for the annualization of one half FTE for the FY 2012 enhancement for the CFO Special Access Program Control Office (SAPCO).

- Decrease of \$61 thousand for a transfer of funding to various DHS Components of funding in support of the Federal Audit Clearinghouse System (FACS) which will be transferring into the WCF in FY 2014.
- Decrease of 4 FTE and \$3.638 million through efficiencies:
 - Decrease of \$145 thousand of purchasing savings (through Advisory and Assistance Services);
 - Decrease of \$10 thousand in overtime;
 - Decrease of \$6 thousand for DHS Strategic Sourcing Initiative;
 - Decrease of \$2.922 million through efficiencies (to include Advisory and Assistance Services and Supplies); and
 - Decrease of 4 FTE and \$555 thousand for a mission support FTE reduction.

Total Request	-	-	-	-	-	-	-	-	4,000

Description of Item

DHS has adopted a federated approach to meet its need for modernized financial systems and improved Department-wide financial reporting. This approach includes:

- Targeted investments to modernize Component financial systems, focused on those Components with the most critical need for financial system improvements.
- Developing business intelligence capabilities which will allow OCFO to provide enterprise-level financial reporting to DHS leadership, OMB, and Congress.

Historically, DHS has funded financial systems modernization program management (oversight) and Business Intelligence efforts with no-year and multi-year OCFO funding. DHS requests that \$4 million be added to OCFO annual funds to continue ongoing FSM efforts. This request supports the financial management systems modernization requirements at DHS and enables OCFO to continue providing support to DHS Components with a critical business need to modernize their financial systems and improve financial reporting and analysis (via business intelligence).

Incorporating lessons learned from other agencies and prior DHS modernization efforts, the Department now plans to target those Components with the most urgent need for Financial Systems Modernization over the next few years in close collaboration with the Office of Federal Financial Management.

Justification

DHS has a critical business need to report accurate and timely Department-wide financial information. This funding request of \$4 million is required to support continued financial systems modernization and improvement efforts across the Department. DHS continues making progress standardizing and reporting financial data, including overseeing system modernization approaches and improvements needed to ensure consistent and accurate Department-wide financial reporting. Additionally, DHS Components have a critical business need to improve the performance of their financial systems, and regardless of which improvement approach is determined to be most affordable and efficient, resources are required to support and oversee these efforts.

The CFO will continue to lead this effort by providing guidance, policy, and oversight for Component financial system modernization projects through the Financial Management Systems Branch within the Office of Financial Management. OCFO will monitor Component efforts as they plan and execute changes to financial management systems including implementations, transitions to shared service providers or substantial upgrades of current systems. Additionally, prior to obligating any funds on financial system modernization and sustainment efforts, Components must present an Analysis of Alternatives to the Management Directorate for approval through the Financial Systems Modernization Executive Steering Committee.

As part of the financial management system modernization effort, OCFO is enhancing business intelligence capability to consolidate Component data and provide for accurate, timely, and reliable financial management reporting across DHS. This supports the goal of compliance, performance, and quality improvement and improves the overall health of financial management.

Impact on Performance (Relationship of Increase to Strategic Goals)

Strong financial management and accounting systems are a fundamental prerequisite to fully ensuring that the Department can meet its strategic and operational goals. The successful implementation of the Financial Systems Modernization program will directly support the missions of the Department as described in the Quadrennial Homeland Security Review, and further the Departmental goal to continue to mature and strengthen the homeland security enterprise. For the first time, DHS has earned a qualified audit opinion on all of its Fiscal Year 2012 financial statements. This means that DHS can report more accurately than ever before how it accounts for its resources, and demonstrates the Department's commitment to transparency and accountability for taxpayer dollars. The migration of USCG to a new financial management solution will allow the Department to make further progress in reducing material weaknesses.

This request will build upon that success and will allow Components to have systems that enable accurate and timely financial reporting, address systems security issues, facilitate a clean audit opinion, and remediate financial control and financial system weaknesses.

Program Decrease							-	-	(2,764)
Total Request	-	-	13,065	-	-	13,376	-	-	10,301

Description of Item

The mission of the OCFO is to ensure the Department’s financial resources are managed effectively and efficiently. OCFO manages all Department funds to maximize performance of the Department’s missions, and ensure funds are obtained, allocated, and expended in accordance with all governing law and regulation and to eliminate fraud, waste, and abuse.

This request reduces funding for resource allocation and financial management support in the amount of \$2.764 million. These reductions will be achieved by eliminating some contracts and reducing the scope of other contracts.

Justification

Despite this reduction, OCFO will work to continue improvements in resource allocation, budgeting, performance management, financial management and reporting, internal controls, and other activities which serve to maximize program performance, and ensure that the Department’s financial resources are managed responsibly. OCFO will reduce, yet work for continued progress in, PA&E analysis for the DHS resource allocation process, financial audit, or other contract support and will prioritize all requirements to meet the mission.

Impact on Performance (Relationship of Decrease to Strategic Goals)

OCFO will reduce these efforts, yet work for continued progress, in PA&E analysis for the DHS resource allocation process, financial audit, or other contract support and will prioritize all requirements to meet the mission. OCFO will make every effort to minimize the performance reduction by continually assessing the contract support needs of OCFO and ensuring that resources are directed towards tasks that have the highest priority, the highest rate of return, and provide the biggest impact to the DHS community.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

Appropriation Language

For necessary expenses for enforcement of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113) [\$55,414,000] \$48,779,000 [of which \$6,700,000 shall remain available until expended for financial systems modernization.].

Language Provision	Explanation
¹ ...[\$55,414,000] \$48,779,000 ...	Dollar change only.
² [of which \$6,700,000 shall remain available until expended for financial systems modernization].	OCFO requests all funding for oversight and governance of financial systems modernization and business intelligence efforts be provided as one-year budget authority.

B. FY 2012 to FY 2014 Budget Change

Office of the Chief Financial Officer Mission Statement

The mission of the Office of the Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department's missions are obtained, allocated, and spend in accordance with the Department's priorities and relevant law and policies.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	19,703	19,703	19,444	(259)
11.3 Other than full-time permanent	640	640	618	(22)
11.5 Other personnel compensation	353	353	341	(12)
12.1 Benefits	5,863	5,863	5,662	(201)
Total, Salaries & Benefits	26,559	26,559	26,065	(494)

Salary and Benefits support 208 FTEs. The FY 2014 Request includes a decrease in overtime costs, a 1 percent pay increase, and an increase to accommodate promotions and step increases. The request includes a decrease of 4 FTE and further salary and benefit reductions will be managed through the hiring of a different grade mix or the delay in backfilling a position to remain within funding levels.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$2,689	\$2,689	\$2,876	\$187

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is an increase in FY 2014 of \$187,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$11,749	\$12,060	\$9,526	-\$2,223

Advisory and assistance services include services acquired by contract from non-Federal sources (the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. There is a decrease in FY 2014 of \$2,223,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$747	\$747	\$721	-\$26

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25.1. There is a decrease in FY 2014 of \$26,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$8,316	\$8,316	\$8,814	\$498

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. These costs represent OCFO's costs for WCF/OCRSO Shared Services, excluding rent. There is an increase of \$498,000 due to increased WCF costs.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$99	\$99	\$96	-\$3

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	----------------------------	--------------------------	--------------------	------------------------------

contract with the private sector or another Federal Government account. There is a decrease of \$3,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$28	\$28	\$27	-\$1

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. There is a decrease in FY 2014 of \$1,000 due to a reduction in FTE.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$173	\$173	\$167	-\$6

Operations and maintenance of equipment funds the O&M of physical security equipment used for the protection of people, information, and property. There is a decrease in FY 2014 of \$6,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$171	\$171	\$165	-\$6

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is a decrease in FY 2014 of \$6,000 due to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$213	\$213	\$206	-\$7

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is a decrease in FY 2014 of \$7,000 due to efficiencies.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Information Officer

I. Appropriation Overview

A. Mission Statement for Office of the Chief Information Officer:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the programs necessary to align DHS's Information Technology (IT) personnel, resources, and assets, including all systems and infrastructure, to support Department-wide missions and activities. OCIO's mission is to provide DHS and its partners with the IT services required to lead a unified national effort to prevent and deter terrorist attacks as well as protect against and respond to threats and hazards.

The Department's goals and priorities require IT capabilities and services to:

- Establish secure IT services and capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation, and recovery capabilities;
- Strengthen and unify the Department's ability to share information and services internally and with Federal, State, local, tribal, international, and private industry partners;
- Improve IT service and program performance, transparency, accountability, and efficiencies through effective governance and enterprise architecture (EA); and
- Develop and implement a comprehensive approach to IT employee recruitment, development, retention, and recognition to ensure that the right personnel and skill sets are in place to achieve Department-wide excellence in IT delivery.

These goals directly align to the Office of Management and Budget's (OMB) *25 Point Implementation Plan to Reform Federal Information Technology Management*. Specifically, the DHS CIO is committed to implementing modular system development, improving performance on IT programs, implementing a "Cloud First" policy, and reducing the number of data centers. OCIO is driving consolidation of commodity IT, in particular IT infrastructure.

Per OMB memorandum M-11-29, *Chief Information Officer Authorities*, the role of Agency CIOs are changing from policymaking and infrastructure maintenance to managing by portfolio to deliver enterprise-wide IT solutions. The OCIO has implemented OMB's PortfolioStat process to identify opportunities to eliminate duplication, consolidate the acquisition and management of commodity IT services, and increase the use of shared-service delivery models. The CIO is also responsible for implementing an enterprise information security program to protect sensitive mission data through continuous monitoring of DHS networks, and developing an enhanced risk assessment process.

DHS continues the OMB TechStat review process for troubled IT programs and has implemented the process at the Component level. This process has improved the transparency of program health across the Department and is focused on identifying program risks and failures and taking corrective action in alignment with the tenets of IT reform.

To achieve its mission, OCIO is committed to recruiting talented, capable IT program managers that are held accountable for the performance of IT programs.

B. Budget Activities:

OCIO activity functions are divided into four major Programs, Projects, and Activities (PPAs):

Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and acquisition and financial support functions to all offices within the OCIO. It covers payments for some Working Capital Fund (WCF) services, such as rent, mail services, contracting support, and financial management support received from other management lines of business. Salaries and Expenses covers the IT security function, which sets IT security policy, and provides security architecture, certification and accreditation (C&A) remediation, Federal Information Security Management Act (FISMA) compliance and oversight, operations and maintenance (O&M) for legacy infrastructure and new infrastructure investments, and IT awareness and training programs. In FY 2014, DHS proposes realigning some WCF payments to S&E such as rent, shared services, and OCIO's contribution to the National Capital Region Infrastructure Operations WCF activity.

Information Technology Services

Information Technology Services (ITS) supports development, implementation, and maintenance of IT functional services, including enterprise architecture (EA), enterprise data management, information sharing, IT strategic policy and planning, performance measurement, capital planning and investment control (CPIC), and program/portfolio management. It also covers geospatial technologies, application delivery, enterprise hosting, and portal consolidation. IT Services also includes the Office of Accessible Systems and Technology (OAST), which provides guidance and oversight to all DHS Components on implementing and maintaining initiatives to ensure electronic and technological information is accessible to DHS employees and customers with disabilities.

Infrastructure and Security Activities

Infrastructure and Security Activities (ISA) are a set of IT projects that provide integration and protection of DHS information. This PPA funds the DHS OCIO effort to continue to consolidate numerous legacy data centers into two DHS Data Centers and multiple disparate networks into DHS OneNet. ISA funds manage infrastructure support which includes support for network and data center services and DHS Component enterprise applications. ISA also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC. The DHS OCIO's immediate and long-term goal, executed through ISA, is to protect the Department's IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the

Department and with external stakeholders, such as Federal, State, and local government agencies and their partners.

Homeland Secure Data Network

The Homeland Secure Data Network (HSDN) program enables agencies to collaborate and communicate effectively at a Secret-classified level among Federal and State governments and supporting entities. HSDN provides the capabilities to enable DHS to electronically collect, disseminate, and exchange both tactical and strategic Secret-level information throughout DHS and between DHS and its partners. The HSDN PPA also includes the Communications Security (COMSEC) Central Office of Record (COR) that develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with government-wide and Departmental policies and procedures.

C. Budget Request Summary:

The OCIO requests \$327.254 million, 274 full-time positions (FTP) and 274 full-time equivalents (FTE). This is a decrease of \$46 thousand from the FY 2012 base.

The total net Adjustments-to-Base include a decrease of \$80.477 million and an increase of 13 FTE from FY 2012. Adjustments-to-Base are as follows:

- Increase of \$348 thousand for FY 2014 pay raise.
- Transfer in of \$147 thousand for Office of the Chief Readiness Support Officer (OCRSO) Shared Services activities moved into the WCF.
- Transfer in of \$2.010 million and 9 FTP/FTE from OCRSO for the Records, Forms & Printing function.
- Annualization of 3 FTE for the Acquisition Workforce Strategy and OAST for an increase of \$759 thousand.
- Increase of \$0 and 10 FTE for staffing to requested FTP/FTE levels from FY 2012 Revised Enacted.
- Decrease of \$13.196 million through efficiencies.
- Transfer out of \$545 thousand and 4 FTE to Office of Public Affairs for re-alignment of web communications.
- Decrease of \$70.000 million in non-recurring Data Center Migration costs.

The total net Program Changes is an increase of \$80.431 million. The Program Changes are as follows:

- Increase of \$35.000 million for Sharing and Safeguarding Classified Information.
- Increase of \$6.155 million for Identity, Credential, and Access Management (ICAM).
- Increase of \$54.200 million for Data Center Migration (to be paid by OCIO into the WCF).
- Decrease of \$200 thousand for reduced Continuity of Operations Capability.

- Decrease of \$500 thousand for the Enterprise Systems Development Office’s Executive Correspondence Tracker.
- Decrease of \$1.200 million for Enterprise-wide Human Capital Planning.
- Decrease of \$400 thousand for Chief Information Security Office Deep Dives.
- Decrease of \$1.000 million for Geospatial Information Infrastructure.
- Decrease of \$195 thousand for Enterprise Architecture Activities.
- Decrease of \$250 thousand for IT Health, Transparency, and Decision Support.
- Decrease of \$1.179 million for IT Governance and Oversight.
- Decrease of \$10.000 million in Information Security and Infrastructure Activities.

D: Efficiencies

Mission Support and Personnel Efficiencies

\$858 thousand

The Office of the Chief Information Officer request includes a savings of \$858 thousand which will be realized by reducing mission support by 5 FTE through attrition.

Travel Efficiencies

\$175 thousand

The request includes a savings of \$175 thousand in general TDY and travel that will be realized through increased use of videoconferencing and other technologies and by increased prioritization to ensure that only mission-critical travel is funded.

Advisory and Assistance Contract Efficiencies

\$4.980 million

The request includes a savings of \$4.980 million that will be realized through contract efficiencies and strategic sourcing initiatives.

Operation & Maintenance of Equipment Efficiencies

\$7.183 million

The request includes a reduction of \$7.183 million that will be realized through increased efficiencies in the operation and maintenance of equipment.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

Footnotes:

1. The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.
2. FY 2012 Revised Enacted does not include \$7.106 million dollars in Spectrum Relocation Funds transferred to this appropriation.
3. \$5 million in OCIO e-merge financial systems funding was rescinded in FY 2012 per P.L. 112-74.

III. Current Services Program Description by PPA

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Salaries and Expenses
Program Performance Justification
(Dollars in Thousands)

PPA: Salaries and Expenses

	Perm. Pos.	FTE	Amount
2012 Revised Enacted	261	261	105,500
2014 Adjustments-to-Base	13	13	14,147
2014 Current Services	274	274	119,647
2014 Program Change	-	-	(2,300)
2014 Total Request	274	274	117,347
Total Change 2012 to 2014	13	13	11,847

PPA: Salaries & Expenses

The OCIO requests \$117.347 million for this activity.

The Adjustments-to-Base are as follows:

- Increase of \$348 thousand for FY 2014 pay raise.
- Transfer in of \$147 thousand for OCRSO Shared Services activities moved into the WCF.
- Transfer in of \$2.010 million and 9 FTP/FTE from OCRSO for the Records, Forms & Printing function.
- OCIO WCF realignment from ITS, ISA and HSDN PPAs for an increase of \$17.441 million and 0 FTP/FTE in the S&E PPA.
- Annualization of 3 FTE for the Acquisition Workforce Strategy and OAST for an increase of \$759 thousand.
- Increase of \$0 and 10 FTE for staffing to requested FTP/FTE levels from FY 2012 Revised Enacted.
- Decrease of 5 FTE and \$6.013M for Efficiencies.
 - Decrease of \$175 thousand for General TDY and Travel.
 - Decrease of \$108 thousand for purchasing savings.
 - Decrease of \$1 thousand for overtime.
 - Decrease of \$5 thousand for DHS Strategic Sourcing Initiatives.
 - Decrease of 5 FTE and \$5.724 million through efficiencies (to include Advisory and Assistance Services).

- Transfer out of \$545 thousand and 4 FTE to Office of Public Affairs personnel for re-alignment of web communications.

The Program Changes are as follows:

- Decrease of \$200 thousand for reduced Continuity of Operations Capability.
- Decrease of \$500 thousand for the Enterprise Systems Development Office's Executive Correspondence Tracker.
- Decrease of \$1.200 million for Enterprise-wide Human Capital Planning.
- Decrease of \$400 thousand for Chief Information Security Office Deep Dives.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Salaries and Expenses PPA provides funds to the following five programs and offices: Information Security, Infrastructure Operations, Applications Operations & Maintenance, and Infrastructure Transformation Program Operations.

Information Security Program

Through the Information Security Program, the Chief Information Security Officer (CISO) ensures existence of a secure and trusted computing environment, which enables the Department to use information systems resources effectively to achieve its mission.

The Information Security Program ensures protection of sensitive information and allows sharing of all mission-related data. It also ensures compliance with the Federal Information Security Management Act (FISMA) and with National Institute of Standards and Technology (NIST) security policies and requirements. The Information Security Program develops and documents Departmental information security requirements; develops enterprise security management tools; and oversees the implementation of information security systems supporting Departmental Operations.

Specifically, the Information Security Program provides:

- **Security Policy** and guidance to ensure protection of DHS information resources that help secure the Homeland. The CISO provides a waiver and exception process to document and manage mitigation of system control weaknesses. The program also develops the Department-wide system configuration guidance that provides baseline security configuration for the Department's hardware and software.
- **Security Architecture** that supports development of secure enterprise information-sharing capabilities and their integration with the DHS Enterprise Architecture Technical Reference Model (TRM), System Engineering Life Cycle (SELC) methodology, and the Capital Planning and Investment Control (CPIC) and acquisition processes. The CISO supports the Department's mission by protecting its information and IT resources (e.g. systems, network resources, and supporting data).
- **Compliance and Technology** includes oversight, measurement, validation, and reporting of information systems security throughout the Department, including management of the FISMA System Inventory, Security Authorizations (SAs) and Plan of Actions and

Milestones (POA&Ms), and IT audit management and Federal reporting. This includes FISMA reporting and the implementation of continuous monitoring for the Department.

- **DHS IT Security Awareness, Training, and Education** to ensure DHS complies with all Federal regulations and OMB and NIST guidance governing IT security training, and Departmental standardization of security training content development.
- **National Security Systems Risk Management** to support risk acceptance and system authorization decisions. The program supports secure integrated operations of classified systems and National Security Information across the Department. It also evaluates the operational risk posture and formulates effective risk management strategies and mitigations.

Infrastructure Operations

Infrastructure Operations (IO) includes initiatives for IT security and continuity operations, providing alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary for Continuity of Operations (COOP). In accordance with *Presidential Decision Directive 67, Federal Continuity Directive 1 (FCD1)* and *Homeland Security Presidential Directive (HSPD)-20: National Continuity Policy*, Federal agencies are mandated to develop COOP plans. A COOP facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems. A COOP functions during an emergency or any other situation that may disrupt normal operation. As such, IT is a critical element of business continuity.

It is critical that DHS and its Components ensure information residing, created, received, transmitted within, and shared by the Department is secured in a manner compliant with Federal Acts, Memorandums, Circulars, Executive Orders, and Presidential Directives. OCIO has a leadership role in meeting legislative requirements and Executive directives regarding information security and using best practices to ensure the viability of systems supporting DHS business missions. OCIO is also responsible for ensuring systems and accompanying security controls and measures are functional and active which is accomplished through use of security software residing on the DHS network.

Applications Operations & Maintenance (AO&M)

The AO&M Program maintains and oversees the Department's Private Cloud and enterprise services, which directly support OMB's *25 Point Implementation Plan to Reform Federal Information Technology Management*. These services include the development, test, and production environments within both of the DHS enterprise data centers (EDCs) to support secure enterprise application services. The AO&M Program provides ongoing O&M of enterprise application services such as Enterprise Correspondence Tracking, Collaboration service such as Project Server as a Service (PSaaS), Workplace as a Service (WPaaS), and Case and Relationship Management as a Service (CRMAaaS) for Headquarters and Components. This funding is also used to provide quality management and security functions to ensure the Enterprise Service Development Office (ESDO) deployed services meet Federal standards and IT best practices. Additionally, this funding provides enterprise authentication services to all Components allowing for enhanced DHS security posture and customer service capabilities for single sign-on and access to over 100 DHS applications. AO&M also provides support via the Project Management and Cloud Support Division for five private cloud services that will modernize and enhance our ability to share information and deliver technology to focus more on mission needs and less on support functions. This function provides change

management, release and configuration control management, resolving systemic issues with the service and other support activities related to cloud services.

Infrastructure Transformation Program (ITP) Operations

The Infrastructure Transformation Program (ITP) is responsible for implementing the Department's vision of "One Infrastructure". ITP is a major DHS investment with a Life Cycle Cost Estimate (LCCE) of \$2.16 billion. ITP infrastructure improvements enable the Department to reduce lag time and complexity in accessing data, create a robust platform on which to quickly launch new capabilities, and provide a cost-effective and reliable IT infrastructure. This is accomplished by streamlining and standardizing the network environment, minimizing the number of overlapping elements, providing operational and security support, and developing a Department-wide network topology with centralized governance and standardized procedures. DHS infrastructure transformation includes the provision of capabilities to continuously monitor and maintain the DHS IT Infrastructure in an operational and secure state.

ITP Operations support DHS's efforts to optimize IT infrastructure by providing Configuration Management services. Configuration/Change management is an Information Technology Infrastructure Library (ITIL) "Best Practice" and assesses risk related to changes requested or required by IT Services Office (ITSO) customers or ITSO entities to a "live" IT infrastructure in order to ensure its continued availability, effectiveness, and safety. Through consolidation of DHS networks, ITP Operations reduced the amount of O&M charges incurred across the Department by migrating seven wide area networks (WANs), consolidating Component legacy data centers, and centralizing email.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Information Officer (CIO) and Department-wide IT:
 Information Technology Services
 Program Performance Justification
 (Dollars in Thousands)**

PPA: Information Technology Services

	Perm. Pos.	FTE	Amount
2012 Revised Enacted	-	-	38,800
2014 Adjustments-to-Base	-	-	(10,798)
2014 Current Services	-	-	28,002
2014 Program Change	-	-	4,710
2014 Total Request	-	-	32,712
Total Change 2012 to 2014	-	-	(6,088)

PPA: Information Technology Services

The OCIO requests \$32.712 million in FY 2014 for Information Technology Services. The Adjustments-to-Base are as follows:

- Decrease of \$10.798 million for realignment of the OCIO Working Capital Fund to the Salaries and Expenses PPA.

The Program Changes are as follows:

- Increase of \$6.155 million for Identity, Credential, and Access Management.
- Decrease of \$1.000 million for Geospatial Information Infrastructure.
- Decrease of \$195 thousand for Enterprise Architecture Activities.
- Decrease of \$250 thousand for IT Health, Transparency, and Decision Support.

CURRENT SERVICES PROGRAM DESCRIPTION:

The IT Services PPA provides funding for the following seven programs:

Enterprise Architecture (EA)

EA provides a “blueprint” for systematically defining DHS’s baseline environment, target environment, and transition plan for implementing mission-critical capabilities. The program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stove-piped systems, and increase system interoperability and information sharing. EA

ensures the essential evolution of information systems and the development of a common IT environment.

Enterprise Data Management

The Enterprise Data Management Program provides the architectural guidance and governance for utilization of Departmental data assets. The Enterprise Data Management Office (EDMO) establishes the guidance and provides oversight for DHS data policy, data management, and data stewardship efforts. EDMO participates in efforts to investigate and identify new opportunities for managing and delivering mission-required data more effectively and efficiently. The program supports the development of the Department-wide roadmap for identifying trusted and reliable data to eliminate existing stovepipe data systems, and increase data systems interoperability and information sharing. Data architecture is the key governance tool to ensure mission needs drive technology investments. Through the use of data architecture practices and the Federal Enterprise Architecture (FEA) Data Reference Model (DRM), EDMO expects to recommend realignment of key IT investments and acquisitions that will reduce maintenance costs of existing systems and drive common requirements for development of centralized services.

In FY 2012 EDMO initiated identification and mapping of redundant reference data sets in order to establish enterprise-wide governance and shared services that support IT maintenance cost reduction efforts. EDMO also initiated development of common mathematical models for identifying the value of data management efforts and improving data architecture practices at the program level.

EDMO holds the primary responsibility for the adoption, training, and implementation of the National Information Exchange Model (NIEM) within the Department. A national program supported by the Federal government, NIEM connects communities of people who share a common need to exchange information in order to advance their missions. The NIEM model is applied to support the development and dissemination of enterprise-wide information exchange standards and processes. These standards and processes enable Federal, State, local and tribal jurisdictions to share critical information effectively in emergency situations and support the daily operations of agencies throughout the nation. NIEM enables information reuse, management of information as an enterprise asset, and information sharing.

EDMO also acts as the lead for the NIEM Program Management Office (PMO) for the U.S. Government and its State, local, tribal, and international partners. The PMO provides core services such as governance, tools, training, and common development processes. The NIEM PMO's executive steering council is led by DHS, Department of Justice, and Department of Health and Human Services. In addition, 16 other Federal departments have reported commitments to use NIEM.

In FY 2012 use of NIEM was written into two new laws that were passed by Congress and signed by the President to support the information sharing needs of State and Local agencies and their Federal counterparts such as Department of Health and Human Services and the Department of Labor. The first law enacted was P.L. 112-34, Child and Family Services Improvement and Innovation Act. The second law was P.L. 112-399, Middle Class Tax Relief and Jobs Creation Act. The NIEM PMO is providing guidance, technical expertise, and NIEM's reusable framework to support the successful implementation of these two initiatives.

Geospatial Management

The Geospatial Information Office (GIO) serves as the central point of coordination for the alignment and integration of geospatial investments across the Department by providing oversight and guidance to DHS Components for geospatial policy and technology matters. The GIO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities (e.g., infrastructure, software, data, and services). This provides DHS stakeholders the ability to integrate, analyze and visualize specific mission data from a mapping perspective. Such capabilities leverage base geographic data, mission specific data/infrastructure, satellite imagery, geo-coding services, and geo-analytical tools. DHS requires coordinated and, in some cases, consolidated enterprise geospatial solutions for emergency management, intelligence and operations, law enforcement, and other DHS mission objectives to ensure efficient and cost-effective shared usage of geospatial assets. The GIO provides the operational design, development and deployment of the DHS Common Operating Picture and Request For Information capabilities for situational awareness on behalf of Component mission requirements. GIO is a leader in the Program Manager-Information Sharing Environment's (PM-ISE) initiatives to develop the Identity and Access Management (IdAM) Reference Architecture and Geospatial Interoperability Reference Architecture for government-wide alignment to maximize geospatial information sharing and drive cost efficiencies.

Identity, Credential, and Access Management

The Identity, Credential, and Access Management (ICAM) program funds the DHS ICAM Program Management Office (PMO). The ICAM PMO provides enterprise-level coordination and planning to enable the implementation of target state ICAM processes, policies, and technologies including implementing the use of the Smartcard required by Homeland Security Presidential Directive 12 (HSPD-12) for access to IT networks, systems, and applications; Public Key Infrastructure (PKI); Single Sign-on; and fine-grained access control in support of the DHS information sharing environment. The ICAM PMO is chartered to serve as the Departmental focal point for Federal policy, standards, and implementation guidance relating to ICAM. The ICAM PMO is responsible for several government-wide and Departmental mandates, directives, goals and objectives including the continued implementation of HSPD-12 defined by OMB Memorandum (M) 11-11 and the DHS Strategic Objective 3.3 to improve cyber security. The ICAM PMO delivers Department-wide leadership and continuity by combining essential coordination between Components, leveraging existing ICAM investments, justifying and providing acquisition oversight for new ICAM investments.

Procurement Activities

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
OCIO Funding: \$1,828	OCIO Funding: \$1,839	OCIO Funding: \$7,983
Component Funding: \$6,788	Component Funding: \$23,361	Component Funding: \$22,135
Total : \$8,616	Total: \$25,200	Total: \$30,118

<p>Identity Credentialing and Access Management</p>	<p>The ICAM PMO ensures that access to DHS facilities, systems, and applications is provided to Departmental staff, contractors, partners, and valid users. Through appropriate identity verification, only authenticated and authorized people will gain access to systems and facilities. This preserves privacy rights and civil liberties. Second, the ICAM program will improve secure information sharing by restricting access to personnel with approved attributes or roles. Therefore, increased sharing will occur because the information owner has a high degree of trust that users with access have been vetted and are acting in their official capacities.</p>
--	---

* Funding profile includes OCIO appropriated funds as well as DHS Component ICAM budgets.

Enterprise Application Delivery

Enterprise Application Delivery (EAD) supports the Department’s aggressive move to a Cloud-based, on-demand set of service offerings as part of government-wide Data Center Migration and Cloud First strategies. The benefits of adopting Cloud-type architectures include, but are not limited to: a reduction in the time-to-market for new capabilities, increased efficiencies by reusing existing capabilities (e.g., platforms, code), enhanced adoption of green technologies, and streamlined governance requirements. EAD leads the transformation through innovation by planning and delivering secure, high-quality enterprise application services for DHS customers as part of the DHS Private and Public Cloud initiatives. The request ensures identified DHS CIO High Priority Initiatives (HPIs) are executed by establishing robust Cloud services which meet business requirements and by deploying a Department-wide service catalog to enhance the consumer experience for DHS services. These efforts are executed by the DHS Applications Services Council, consisting of DHS Component CIO representatives, who establish capabilities and service-level agreements required to achieve Cloud services. EAD funding also supports the development and deployment of the DHS mobile development environment within the Enterprise Data Centers. The mobile development environment directly supports the Digital Government Federal Mandate.

Program Management Support

The OCIO Enterprise Business Management Office (EBMO) provides program management support services to the OCIO, DHS management, and Component programs to maximize DHS IT program productivity. EBMO’s program management support provides Departmental IT strategic planning, IT performance measurement, IT resource management and analysis, enterprise portfolio governance, IT program governance oversight, IT acquisition review assistance, IT policy and compliance, and IT Requirements Engineering Center of Excellence support services. The office is currently standing up Department-wide Executive Steering Committees (ESCs) to further enhance program governance of major IT investments. The ESCs are decision-making bodies that provide oversight and collaboration for respective programs. The ESCs membership consists of Senior Executive Leadership across the Department to ensure cross-functional participation. The ESCs roll up to one of the Department’s Portfolio Governance Boards.

EBMO provides Capital Planning and Investment Control support to all Components to ensure effective resource allocation across the Department’s IT investment portfolios. EBMO is responsible for conducting annual IT Portfolio Reviews, conducting program assessments and updating the Federal IT Dashboard with monthly cost and schedule and performance data, gathering information for and presenting DHS-led TechStats, providing best practices and guidance to programs as Centers of

Excellence, submitting annual OMB Exhibit 300s and Exhibit 53s, and conducting Privacy Act initiatives.

E-Gov Initiatives

Under the OCIO EBMO, the Electronic Government (E-Gov) Program coordinates DHS participation in crosscutting, government-wide programs. Under the E-Gov umbrella, the Department manages or participates in 20 E-Gov initiatives and lines of business (LoBs) such as eRulemaking, Grants Management, Financial Management, and Budget Formulation and Execution. These initiatives / LoBs drive continuous progress and improvement using internet-based technologies, which enable citizens and businesses to interact with the Federal Government more easily, increases public participation, and saves taxpayer dollars. The EBMO E-Gov team works with OMB, other Federal Agencies (E-Gov Initiative Managing Partners), and various other internal and external stakeholders to ensure the Department remains compliant with federal E-Gov policies and mandates. The E-Gov Program also includes the Open Government Directive to support the government's commitment to increase transparency of data, expand participation of the public, and improve cross-government collaboration through systems and Web sites such as USA.gov, USAspending.gov, Data.gov, and the Federal IT Dashboard.

The Office of Accessible Systems & Technology (OAST)

The OAST Program provides best practices, IT governance support, technical assistance, and compliance oversight to DHS Components regarding implementation of Section 508 of the Rehabilitation Act (as amended). This is accomplished by ensuring qualified individuals with disabilities have fair opportunity for employment and access to the information and data necessary to perform their jobs. OAST develops policies, training, and technical assistance best practices, and participates in IT governance to ensure all electronic and information technology (EIT) procured, developed, maintained, or used is accessible to individuals with disabilities.

IT Governance and Compliance activities include: Management and oversight of the Web Accessibility and Remediation Program (WARP), Section 508 Acquisition Audit Program, and Trusted Agent FISMA (TAF) Section 508 Audit Program, Section 508 Compliance Enterprise Architecture, Infrastructure Change-Control, and other Life Cycle activities. Oversight activities include conducting compliance reviews, providing technical assistance, and verifying and validating compliance with DHS Section 508 standards. These efforts ensure the following: (1) regular Web accessibility scans are completed and that OAST-approved testing methods are followed; (2) acquisition audits for Section 508 compliance are conducted on a routine basis; (3) IT system owners have appropriately entered the required accessibility information into TAF and uploaded the requisite Section 508 artifacts; (4) Enterprise Architecture Section 508 compliance reviews are conducted; and (5) Section 508 requirements for the DHS SELC are adhered to.

Service activities include: Management and oversight of Section 508 compliance for DHS IT Change Management and the Learning Management System (LMS) Accessibility Assessment programs. In addition, the Accessibility Compliance Center of Excellence coordinates with DHS and Component IT Programs to ensure relevant IT accessibility subject matter expertise and services are available to strengthen overall Section 508 compliance through a consistent program review process. Oversight activities include conducting EIT accessibility assessments of software, internet applications, telecommunications, multimedia and video, and desktop and portable computers to determine Section 508 compliance. Oversight requires a close working relationship with the Department's LMS managers to ensure e-learning platforms and courses are Section 508 compliant when deployed.

Management activities include: Management and oversight of OAST operations, including contract management, strategic planning, and administrative support and operations. The program is also responsible for managing and operating the DHS Accessibility Help Desk, along with training development and delivery and outreach activities. The Accessibility Help Desk serves as a single point of entry for disability-related services and technical assistance for the Department. The goal of the program is to work collaboratively with existing DHS and Component-level help desks to ensure seamless delivery of IT services for customers with disabilities, including the provision of reasonable accommodations. The OAST training program provides Section 508 awareness with hands-on EIT accessibility testing training for personnel with significant development responsibilities. In addition, the program provides role-based training for relevant Section 508-related stakeholders. The goal is to develop a knowledgeable workforce and culture in compliance with Section 508 accessibility standards.

2014 Total Request	-	-	100,063
Total Change 2012 to 2014	-	-	(38,937)

PPA: Infrastructure and Security Activities

The OCIO requests \$100.063 million for this activity; the Adjustments-to-Base are as follows:

- Decrease of \$70.000 million in non-recurring data center migration costs.
- Decrease of \$4.775 million for the OCIO WCF realignment to the Salaries and Expenses PPA.
- Decrease of \$7.183 million through efficiencies.

The Program Changes are as follows:

- Increase of \$54.200 million for Data Center Migration.
- Decrease of \$1.179 million for IT Governance and Oversight.
- Decrease of \$10.000 million for Information Security and Infrastructure Activities.

CURRENT SERVICES PROGRAM DESCRIPTION:

Information Sharing Environment Office

Under the Intelligence Reform and Terrorism Prevention Act (IRTPA), DHS is mandated to improve information sharing among Federal agencies and with State, local, tribal, territorial, and private industry partners. A key priority for the Department is maturing the Information Sharing Environment (ISE). The Information Sharing Environment Office (ISEO) is the organization responsible for developing and implementing policies, standards, guidelines, practices and solutions that enable the

ISE. ISEO provides leadership, oversight, and management of the HSIN program (per the MOU with the office of Operations Planning and Coordination), leads the National Information Exchange Model (NIEM) Joint Program Management Office (JPMO), leads the Information Sharing Environment (ISE) Suspicious Activities Reporting (SAR) technology initiative, is responsible for guiding and supporting implementation of federated identity management with Sensitive But Unclassified (SBU) information sharing partners, and is responsible for establishing the DHS ICAM environment to extend to, and be interoperable with, all homeland security stakeholders and information sharing partners, including all levels of government, the private sector, and with citizens.

Information Security & Infrastructure

The Infrastructure Transformation Program (ITP) is a DHS Level 1 investment that improves the Department's Information Technology (IT) infrastructure by unifying disparate Component information technology networks, platforms, and services to provide a common IT infrastructure across the Department. The program/projects that are funded under Information Security & Infrastructure (ISI) include Network Services (OneNet), Trusted Internet Connections (TIC), Policy Enforcement Points (PEPs), Email Services, and Data Center Services.

The ISI request ensures that DHS OCIO provides a reliable, resilient, and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations, such as State and local law enforcement agencies. The core of this unified environment is the consolidation of legacy networks into one enterprise-wide, integrated network called OneNet. Major services provided under ISI include:

- DHS OneNet WAN services
- Network and Security Operations Centers (NOC/SOCs)
- Traffic modeling and data analysis
- Internet Protocol (IP) address administration
- Network management
- Access controls

The NOCs and SOCs centrally oversee DHS infrastructure systems and network components. Incident response and detection is coordinated and escalated by the NOC/SOC within the network security and computing services groups, depending on the nature of the breach or failure. The NOC/SOC aids in availability and capacity management by providing respective service groups with collected monitoring data.

Email services provide additional and comprehensive communication ability across DHS and to external Federal, State, local, tribal, international, and private sector partners. Email legacy systems will be consolidated within DHS as the Email as a Service (EaaS) capability is deployed at the Enterprise Data Centers (EDCs) in FY 2013. Email services will enable personnel to access critical business communications and are designed to deliver greater security, availability, and reliability. Major email services include a consolidated DHS-wide Global Address List (GAL), a standard email-naming convention, and a DHS-wide email platform.

Data Center (DC) Development

DHS is in the process of consolidating the Department's legacy data centers into the Enterprise Data Center (EDC), known as DC1 and DC2. This is in alignment with the Federal Data Center Consolidation Initiative (FDCCI). Support at the EDC includes management and control of DC hardware, operating systems software, and environmental systems. In addition both DCs are prepared to support a higher density virtual environment from both an infrastructure and managed-service perspective. The DCs support the delivery of private cloud and "as-a-service" offerings to customers seeking a scalable and secure virtual environment of configurable computing resources that can be rapidly provisioned with minimal cost of ownership. DC1 and DC2 have the ability to continuously synchronize applications based upon mission requirements. The purpose of DC consolidation is to ensure DHS has a seamless disaster recovery capability and to significantly enhance the cyber security posture of DHS systems. DHS DC capabilities provide personnel the tools to successfully and efficiently manage service delivery and support activities.

Major services provided by DC1 and DC2 include capacity and availability management; system management and administration; hardware/software maintenance; facility monitoring, security management; and disaster recovery management and testing.

Infrastructure and Security Activities funds DC consolidation and assists migrating legacy DC environments to the EDC. The Data Center Development program focuses on building capabilities at both DHS data centers.

Total Change 2012 to 2014	-	-	33,132

PPA: Homeland Secure Data Network

The OCIO requests \$77.132 million for the Homeland Secure Data Network (HSDN) activity; the Adjustments-to-Base are as follows:

- Decrease of \$1.868 million for the OCIO WCF realignment to the Salaries and Expenses PPA.

The Program Changes are as follows:

- Increase of \$35.000 million for Sharing and Safeguarding Classified Information.

CURRENT SERVICES PROGRAM DESCRIPTION:

Homeland Secure Data Network (HSDN)

HSDN enables Department of Homeland Security offices and Components, other Federal departments and agencies, and State, local and tribal entities to collaborate and communicate effectively at the collateral Secret-classification level. HSDN is the primary means for communicating classified Secret information with the national network of State and Major Urban Area Fusion Centers. HSDN is strengthening its relationship to Secret Internet Protocol Router Network (SIPRNet) to enable trusted access by Fusion Centers to SIPRNet resources, and is expanding its collaboration capabilities through applications like H-Space. The Executive Order 13587 *Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information* Senior Information Sharing and Safeguarding Steering Committee recognized HSDN as the primary Secret

network for non-Defense and non-Intelligence Federal departments and agencies. HSDN is advancing its sharing and safeguarding posture by adopting the Department of Defense (DoD) as the Common Service Provider for hard-token based PKI authentication, advancing access management solutions, and improving auditing and monitoring capabilities.

HSDN has established 430 sites, comprised of 4,550 workstations, across the United States. The program has established user accounts for approximately 9,192 end-users who currently log on and exchange information across both HSDN and the broader Secret-level community in performing daily missions. HSDN currently operates continuous 24 hours a day, 7 days a week — system-wide capabilities.

These capabilities include the NOC, SOC, four-tiered help desk, data centers, system-wide telecommunications backbone, and enterprise applications, including office email and messaging in support of end-user mission requirements.

Procurement Activities

FY 2012 Activity Funding (\$thousands)	FY 2013 Activity Funding (\$thousands)	FY 2014 Activity Request (\$thousands)
\$44,000	\$44,269	\$77,132
Homeland Secure Data Network (HSDN)	<p>The Homeland Secure Data Network (HSDN) is a classified wide-area network for DHS and its partners, providing effective interconnections to the intelligence community and federal law enforcement resources. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic intelligence and other homeland security information up to the SECRET level.</p> <p>HSDN addresses a capability gap by providing a secure and reliable infrastructure for exchanging timely and actionable classified information for Intelligence, Counter Terrorism, Counter Narcotics, Immigration Enforcement, Infrastructure Protection, and Emergency Preparedness and Response missions among federal, state and local governments. In FY 2013 HSDN will incrementally build out the remaining State and Local Fusion Center sites and install HSDN in Sioux Falls, Miami, and Washington DC.</p>	

* Funding profile is enterprise – wide.

Communications Security

The Homeland Security Communications Security (COMSEC) Central Office of Record (COR) was established in accordance with national policy as delineated in the interagency *Committee on National Security Systems Instruction (CNSSI) 4005*. The DHS Management Directive 4300B provides guidance for administering the National Security Policies required to provide for accounting, safeguarding, and management control over COMSEC keying material, controlled cryptographic items, and secure communications equipment. The COR provides consolidated COMSEC accounting services and training, and assists in acquisition and maintenance of COMSEC equipment for the

Department. Additionally, the COR develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with National and Departmental policies and procedures.

To comply with the joint DoD and National Security Agency (NSA) Crypto Modernization program, DHS continues to migrate legacy encryptors, and COMSEC accounting infrastructure. The transition to modern cryptographic equipment and account management includes systems such as the Network-Centric Key Management Infrastructure (KMI) and the COMSEC Accounting, Reporting Distribution System (CARDS), both of which are emerging and critical components of the Global Information Grid. This migration is essential to the success of the Department by enabling and equipping the DHS COMSEC COR and accounts to migrate to new systems affording DHS the opportunity to automate, streamline, and restructure the COMSEC distribution and accounting infrastructure.

IV. Program Justification Change

**Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Cyber Identity (Mandatory PIV and ICAM)
PPA: Information Technology Services
Program Increase: Positions 0, FTE 0, Dollars \$6,155

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,828
Program Increase							-	-	6,155
Total Request	-	-	1,828	-	-	1,828	-	-	7,983

Description of Item

The DHS Office of the Chief Information Officer (OCIO) established the Identity, Credential, and Access Management Program Management Office (ICAM PMO) to provide enterprise-level coordination and planning to enable the implementation of ICAM processes, policies, and technologies to improve the way in which DHS manages identity and access management throughout the Department, its Components, and partners.

The ICAM PMO coordinates many ICAM-related initiatives that address capability gaps, compliance and mission needs throughout the Department. These span the spectrum of internal (e.g., Public Key Infrastructure), external (e.g., federated single sign-one), unclassified (e.g., HSPD-12 logical access) and classified (e.g., EO 13587) initiatives.

Justification

This increase will allow DHS to achieve the goal of 75 percent of employees using HSPD-12 compliant Personal Identity Verification (PIV) smartcards to access DHS networks by the end of Fiscal Year 2014 across all DHS Components.

Meeting this goal will help DHS comply with OMB Memorandum M-11-11
The Office of Management and Budget (OMB) issued Memorandum for the Heads of Executive Departments and Agencies M-11-11 directing:

- DHS to exercise primary responsibility within the Executive Branch for the operational aspects of Federal agency cybersecurity with respect to the Federal information systems that fall within the Federal Information Security and Management Act (FISMA) under 44 U.S.C. §3543.
- Government agencies in meeting the requirements of HSPD-12 to outline a plan of action to expedite the Executive Branch's full use of the Personal Identity Verification (PIV) credential for access to federal facilities, networks, and information systems

Applying the FY 2014 funding efficiently at the enterprise level will:

- Ensure continued Component implementation support to meet FY 2014 targets;
- Bridge any remaining requirements/gaps for remote access, alternate authentication, and dependent system gateway;
- Provide additional Component support services including:
 - Program and Project management
 - Procurement and acquisition life cycle management support
 - ICAM system interface and integration, and configuration management support
 - Enterprise architecture design, development, and system integration support;
- Make progress to initiate PIV-enabled Component internal facing applications, systems platforms and network which will increase efficiencies and promote adaption of mandatory PIV card use;
- Support response to enterprise auditing/reporting/monitoring requirements for FISMA;
- Establish a secure authentication credential eliminating user name and password to access the DHS unclassified network; and,
- Initiate encryption capability using PIV certificate to provide confidentiality.

Completing the implementation of mandatory PIV use is a significant starting point for leveraging the PIV card as the primary credential that can be used to access systems, networks applications and facilities throughout DHS. Other benefits include:

- Enhanced cyber security posture by decreasing the number of unauthorized access attempts to the DHS Network;
- Compliance with HSPD-12 mandate and ICAM framework reducing the need for other two-factor solutions (e.g. RSA token, etc.); and,
- Reduced technical and security risks that stem from reliance on low level of assurance username/password for DHS network login.

Impact on Performance

The program increase will continue to support ICAM fulfillment of the intent of HSPD-12 by enabling networks and systems to accept Federal PIV credentials while enhancing security, increasing government efficiency, protecting personal privacy, and will allow DHS to achieve the goal of 75 percent user compliance by the end of FY 2014 across all DHS Components.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Data Center Migration
PPA: Infrastructure and Security Activities
Program Increase: Positions 0, FTE 0, Dollars \$54,200

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	54,200
Total Request	-	-	70,000	-	-	70,000	-	-	54,200

Description of Item

OCIO requests \$54.200 million of appropriated funding to fully complete the data center migration activities for CBP, TSA, FEMA, and USCIS, which will be paid into and executed through the DHS Working Capital Fund. Data Center (DC) Migration provides funding to Components to consolidate data center environments into the two enterprise-wide DHS data centers. DHS is committed to the integration, consolidation, and the transformation of individual Component infrastructures into a more efficient and more secure world-class IT infrastructure capable of supporting the significant demands required of an organization of more than 200,000 employees.

At the completion of the migration effort, Components will relocate their existing or new applications to the two data centers, occupying a number of racks in the data centers and paying for the charges associated with this occupancy. The recurring Operations & Maintenance costs for operating the two enterprise-wide data centers is requested to be administered through the DHS-wide Working Capital Fund in the FY 2014 President’s Budget Request.

Justification

The purpose of this request is to continue execution of the planned timeline to migrate Component information systems, applications, and disaster recovery facilities to the DHS Enterprise DCs. This will enable continued closures of the major Component data centers and achieve the Secretary’s goal of consolidating DHS data centers.

The transition to the DHS Enterprise DC architecture is standardizing IT resource acquisitions across all DHS Components, as well as streamlining the maintenance and support contracts, allowing for less complex vendor support and expediting response times during emergencies. Benefits derived from the transition to the DHS Enterprise DCs include increased security, enhanced operability, and long-term

cost avoidances. DHS is placing information systems behind Trusted Internet Connections, thus removing exposure of essential functions to those that would exploit weaknesses. Migration makes technologies available as easily ordered services and provides for DHS-wide standardization.

Impact on Performance

The FY 2014 program increase supports the migration of the CBP Newington production systems, the TSA National Transportation Security Board site; the USCIS Service Centers, HQ Site, and Records/Benefits Center; and the FEMA Norwich, CT center. It enables the CIO to manage funding on IT infrastructure investment and operations and maintenance in support of the Department's front-line operations as well as assurance of meeting the DHS's contractual liabilities to the managed service providers.

Completing these migrations will eliminate further investments by the Components in legacy data centers' operations, including continuity of operations, maintenance, support, security certification and accreditation. An extended migration timeline will result in concurrent costs to fund both old and new data centers while the completion of DHS Enterprise data centers reduces the number and cost of Federal data centers, associated energy costs, and physical space allocations, in concert with a transition to cloud computing. A recent study performed by the DHS Office of the Chief Financial Officer (OCFO) showed that the ten of the first completed migrations to enterprise data centers resulted in average savings of 14 percent, which is equal to \$17.4 million in savings annually.

This action also directly supports OMB's Federal Data Center Consolidation Initiative to promote the use of Green IT by reducing the overall energy and real estate footprint of government data centers; reduce the cost of data center hardware, software and operations; increase the overall IT security posture of the government; and shift IT investments to more efficient computing platforms and technologies.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Sharing and Safeguarding Classified Information

Program Increase 3:

PPA: Homeland Secure Data Network
Program Increase: Positions 0, FTE 0, Dollars \$35,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	35,000
Total Request	-	-	-	-	-	-	-	-	35,000

Description of Item

This request supports Executive Order 13587, which directs structural reforms to improve information security across the Federal Government. The request funds five DHS-wide initiatives related to safeguarding classified information: Removable Media, Reduce Anonymity, Insider Threat, Access Control, and Enterprise Audit.

Removable Media is supported by three activities: automated lock down of drives, data loss prevention, and system alerts. This increase in funding prevents DHS networks and Information resources from being vulnerable to the mass removal of classified information.

Reduce Anonymity is supported by three activities: Hard token PKI, authentication, and consolidation of information resources. This is critical to DHS’s connection to all other Federal classified networks such as Joint Worldwide Intelligence Communications System (JWICS) and Secure Internet Protocol Router Network (SIPRnet). The increase in funding enables DHS to implement these programs, which results in DHS users, Federal agencies that use DHS HSDN, SLT Information sharing environment users, gain access to mission critical data resident on servers that use PKI (e.g., DOD).

Access Control is supported by two activities: access control (the ability to gain access to needed resources) and data discoverability (the ability to find resources, and only the resources one is allowed). The increase in funding allows DHS to maintain interoperability with other Federal networks which have implemented controls. With this interoperability, DHS will be able to provide adequate access control.

Enterprise Audit is used to protect national intelligence, identify threats, detect and deter penetration of classified resources, reveal misuse and identity usage trends, thereby tying all the other initiatives together. With this increase, DHS will have the ability to share audit information with other agencies. DHS will remain connected to other Department and agencies networks, (e.g., JWICS, SIPRnet) and DHS also will be complying with Federal mandates.

The final initiative, Insider Threat, is classified. More information can be provided under separate cover.

Justification

This request meets the Administration’s mandate, improves information security and provides necessary protections for privacy and civil liberties across the Department’s classified networks in response safeguarding actions directed by the Senior Information Sharing and Safeguarding Steering Committee, as established under Executive Order 13587.

Impact on Performance

This program increase will allow DHS to be able to implement the critical information sharing and safeguarding measures on our classified networks in order to be compliant with direction from the Executive Agent for Safeguarding Classified Information on Computer Networks, as established under Executive Order 13587.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Enterprise-wide Human Capital Planning (S&E)
PPA: Salaries and Expenses
Program Decrease: Positions 0, FTE 0, Dollars \$(1,200)

Funding Profile

Current Services Level							-	-	2,700
Program Decrease							-	-	(1,200)
Total Request	-	-	2,700	-	-	2,700	-	-	1,500

Description of Item

One of the goals of the *DHS Information Technology Strategic Plan FY2011-2015* is “Transform the organizational health of the DHS IT community by developing an exceptional workforce that will function effectively, deliver operational excellence, and grow from within.” Specifically, the DHS IT Strategic Plan includes three IT human capital objectives:

- Attract high-caliber IT professionals by enhancing recruitment, screening and hiring practices.
- Retain and develop high-caliber IT professionals through succession planning, defining IT and program management career tracks, implementing staff development programs, and establishing a mentorship program.
- Establish cross-functional collaboration, increase employee engagement, and communicate a shared vision for the DHS IT community to increase organizational performance and improve employee well-being.

Justification

The primary purpose of this initiative is to create a world-class IT community with common human capital practices to attract, develop and retain high performing professionals that provide pertinent information and best practices to secure America through excellence in service delivery.

The reduction will impact the CIO community’s ability to continue to implement and maintain an efficient approach for recruitment, hiring, development and retention of individuals with needed critical IT and Acquisition skills. However, OCIO is partnering with TSA to jointly implement this effort and is leveraging TSA’s best practices to minimize the impact of the reduction.

Impact on Performance

OCIO is partnering with TSA to jointly implement this effort and is leveraging TSA's best practices and success in this area to minimize risk.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: ESDO Executive Correspondence Tracker (S&E)
PPA: Salaries and Expenses
Program Decrease: Positions 0, FTE 0, Dollars \$(500)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	600
Program Decrease							-	-	(500)
Total Request	-	-	600	-	-	600	-	-	100

Description of Item

The Enterprise Correspondence Tracking (ECT) provides Department-wide documentation and tracking of communication, reporting, and responses to Congress, the Office of Management and Budget (OMB), Government Accountability Office (GAO), and the Office of the Inspector General (OIG).

Justification

The reduced funding level enables the Enterprise System Development Office (ESDO) to provide a basic level of application operations and management support. While the reduction will impact the process effectiveness and business efficiency of the ECT capability, OCIO will continue to support the system to meet the Department-wide requirement for consistent and unified response to appropriate stakeholders.

Impact on Performance

The ECT is an important tool for ensuring consistent, unified, and timely responses. Remaining funding will enable the OCIO to continue supporting the systems core documentation capability to ensure consistent and complete responses.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: CISO Deep Dives (S&E)
PPA: Salaries and Expenses
Program Decrease: Positions 0, FTE 0, Dollars \$(400)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,844
Program Decrease							-	-	(400)
Total Request	-	-	1,844	-	-	1,844	-	-	1,444

Description of Item

DHS uses “Deep Dive” security reviews to meet its Federal Risk and Authorization Management Program (FedRAMP) obligations and to ensure that system owners at the Components are effectively securing their systems. Although the pace may be altered based upon the timing of FedRAMP submissions, the deep dives are performed regularly throughout the fiscal year. Deep dives enable the Department to identify and mitigate security risks that affect DHS’s ability to perform its missions.

Justification

Each deep dive costs approximately \$16,700 (in FY 2012), and the request reduces planned deep dives by approximately 20%. To minimize risk, OCIO will ensure the 86 remaining deep dives will be performed on the most urgent programs first.

In the absence of Deep Dive reviews, DHS CISO office will seek to maintain the reduction of security-related audit findings by continuing Component Security Program assistance visits which focus on more general component deficiencies and offer recommendations on how Components can improve certain processes. Also, the persistent promotion of continuous monitoring and diagnostics activities through new and more rigorous Information Security Scorecard metrics seeks to create more visibility of component IT assets, more efficient maintenance of information systems (e.g., patch and configuration management), and overall reduction of system vulnerabilities. This maturation of continuous monitoring and diagnostics metrics in FY 2013 – 2014 intends to reduce vulnerabilities and operational inefficiencies by analyzing and scoring the aforementioned metrics monthly which in turn promotes security progress and awareness.

Impact on Performance

The impact of this decrease is that the Chief Information Security Office will perform 86 prioritized deep dives for FedRAMP or DHS systems versus the 110 planned in FY 2013. Impacts will be minimized by ensuring the most urgent programs are reviewed first.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Information Officer (CIO) and Department-wide IT:
 Justification of Program Changes**
 (Dollars in Thousands)

Program Decrease 4: COOP Capability (S&E)
 PPA: Salaries and Expenses
 Program Decrease: Positions 0, FTE 0, Dollars \$(200)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	2,130
Program Decrease							-	-	(200)
Total Request	-	-	2,130	-	-	2,130	-	-	1,930

Description of Item

In accordance with Presidential Decision Directive 67, Federal Continuity Directive 1 (FCD1) and Homeland Security Presidential Directive (HSPD)-20: National Continuity Policy, Federal agencies are mandated to maintain a comprehensive continuity program. The OCIO continuity program supports continuity planning and operations that directly support the USM directorate. The continuity program facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems. The continuity program functions during an emergency or any other situation that may disrupt normal operation. The OCIO Continuity of Operations (COOP) program provides daily operations, COOP planning, and provides alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary.

Justification

IT is a critical element of business continuity. IT ensures the Department's defined Emergency Response Group (ERG) requirements are met and critical program data is available.

Impact on Performance

The funding decrease will reduce contractor support provided by OCIO for emergency IT communications support.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 5: IT Health, Transparency, and Decision Support (ITS)
PPA: Information Technology Services
Program Decrease: Positions 0, FTE 0, Dollars \$(250)

Current Services Level							-	-	4,202
Program Decrease							-	-	(250)
Total Request	-	-	4,525	-	-	4,202	-	-	3,952

Description of Item

OCIO supports the Department’s approximately 88 Major and 600 Non-Major IT investments within a \$5.6 billion (including O&M) IT investment portfolio. The Enterprise Business Management Office’s (EBMO) mission is to improve IT health and transparency within the Department and externally to the public by reviewing and performing health assessments all major IT programs.

Justification

To improve the health of IT Programs, OCIO conducted IT program health assessments on 88 major IT programs in FY 2012 and will conduct 91 in FY 2013. The health assessments gauge how well a program is performing through a thorough review of program risks, requirements, human capital, cost and schedule performance, and contractor oversight. The Department is continuously working to improve the program health assessment process by making it more rigorous and objective; however, a certain degree of subjectivity and case-by-case judgment is required to determine the final score. It is imperative that any additional pertinent information obtained from sources such as Executive Steering Committee meetings, Program Management Reviews, and other discussions are factored into the assessments. This information can positively or negatively impact the final score and will facilitate a more thorough assessment of a program’s health.

OCIO has been improving the transparency of IT programs through a rollout of the OMB TechStat process Department-wide. Four Departmental TechStats were conducted and OMB-led TechStats supported, as requested. The Enterprise Business Management Office (EBMO) trained TechStat leads in all DHS Components to conduct TechStat reviews.

Finally, to increase the operational excellence of IT programs, EBMO implemented initiatives to provide enterprise-level oversight based on functional IT Portfolios by establishing governance boards, which provide guidance, decision-making, and oversight of one or more programs. In FY 2012 EBMO

stood up a total of 17 Executive Steering Committees (ESC) and three Governance Boards at the program/project level.

Impact on Performance

This reduction will decrease the number of program health assessments by 5% or approximately 4 assessments per year.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 6: Enterprise Architecture Activities (ITS)
PPA: Information Technology Services
Program Decrease: Positions 0, FTE 0, Dollars \$(195)

Program Decrease							-	-	(195)
Total Request	-	-	2,500	-	-	2,540	-	-	2,345

Description of Item

The Enterprise Architecture Program Office (EAPMO) develops segment architectures through a process that identifies gaps in the Department’s ability to meet its mission, overlapping and redundant capabilities, and inefficient processes. Additionally, the EAPMO ensures that major IT investments are aligned with business and mission needs, meet applicable standards, and are designed and built using proven architectural practices.

Justification

Remaining funds will be carefully executed to minimize the programmatic impact. The EAPMO will continue to identify duplicative and wasteful spending on information technology and develop a prioritized list of new investments to close gaps in the Department’s ability to meet its goals and objectives.

Impact on Performance

The decrease in funding for the EAPMO will delay the development and maintenance of segment architectures by two segments per year.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	6,454
Program Decrease							-	-	(1,000)
Total Request	-	-	7,682	-	-	6,454	-	-	5,454

Description of Item

The DHS Geospatial Management Office (GMO) is responsible for delivering Infrastructure as a Service (IaaS) enterprise geospatial capabilities across DHS and to the wider homeland security community. These services support all Mission Areas under Presidential Policy Directive 8: National Preparedness (PPD-8). Capabilities provided include analytical software services, situational awareness data, visualization and consequence modeling tools. Law enforcement, intelligence, emergency management as well as infrastructure protection program directly benefit from these efforts. In addition the GMO is the DHS lead for supporting the Federal Geoplatform, a Presidential initiative which provides an unclassified capability for supporting incident management information sharing.

Justification

The proposed decrease will reduce support for the Federal Geoplatform from the level requested by the Federal Geographic Data Committee and reduce funding to extend the Federal Geospatial Concept of Operations to address PPD-8 Mission Areas of Protection and Prevention.

Impact on Performance

The GMO will mitigate the risk to essential geospatial capabilities by consolidating operating infrastructure, renegotiating enterprise software licensing agreements, ongoing devolution of mission specific operating requirements to Components, increasing cost-share and reuse of existing enterprise capabilities, and accelerating implementation and enforcement of geospatial enterprise architecture guidance during the IT acquisition review and portfolio management processes.

Department of Homeland Security

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	13,883
Program Decrease							-	-	(1,179)
Total Request	-	-	15,491	-	-	13,883	-	-	12,704

Description of Item

The Infrastructure Transformation Program (ITP) represents the Department’s full-scale move toward a DHS-consolidated information technology which is the DHS roadmap for consolidating and securing the IT Infrastructure including networks, data centers, e-mail, wireless services, desktop services, and help desk services. ITP represents OCIO’s vision of One Infrastructure, by unifying disparate Component information technology networks, platforms and services into a set of enterprise wide IT Services. ITP ensures that every major project is implemented in the most responsible and efficient manner possible. This goal includes having disciplined oversight processes and robust acquisition program management teams in place. OCIO is also attempting to speed the pace of Data Center migrations for which these support functions are necessary.

Justification

The PMO provides program oversight for the enterprise IT Infrastructure services such as OneNet, Data Center, and Email as a Service to ensure that these services are run in an efficient and effective manner that complies with DHS reliability, scalability, security, and survivability standards to support the unification and strengthening of DHS operations, management, governance, and performance by reducing vulnerabilities and improving security across the DHS IT enterprise. This decrease was selected to focus remaining funding on priority initiatives within this program such as OneNet, trusted internet connection, policy enforcement points, and the email secure gateway.

Impact on Performance

The proposed reduction for ITP PMO Support would result in a reduction of 25% of contractor support, impacting program governance, OMB Exhibit 300 preparation, and Systems Engineering Life Cycle documentation requirements.

Description of Item

The Information Security and Infrastructure program include Wireless (National Telecommunications & Information Administration (NTIA) Spectrum fees), PKI (Public Key Infrastructure) and Network Services. Wireless NTIA manages the Federal government's use of spectrum, ensuring that America's domestic and international spectrum needs are met while making efficient use of this limited resource. PKI Management Authority (MA) was established to manage and oversee PKI Services, such as securing networks, systems, remote access, email, communications, wireless devices, and data/information in transit. The DHS PKI MA provides engineering, policy guidance, and registration authority training across DHS to ensure that all Components leverage PKI services to improve security and information sharing among DHS Components. Network Services include critical DHS network infrastructure support efforts such as department wide network architecture and bandwidth requirements.

Justification

Funding received will focus on OneNet, enterprise projects, NTIA Spectrum compliance, and PKI interoperability. Program management support for the numerous programs the IT Services Office (ITSO) leads is also funded including support for Trusted Internet Connection, Policy Enforcement Points, and the Email Secure Gateway. Though reductions to NTIA Spectrum compliance is necessary, ITSO will continue to provide the technical engineering expertise needed to perform specific spectrum resource assessments and automated computer capabilities needed.

Impact on Performance

The proposed reduction would impact infrastructure and security work, and a review will be done to prioritize OCIO programs to ensure funding is used to support DHS priority initiatives.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

*For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments [\$247,846,00], **\$273,054,000** of which [\$120,670,000] **\$117,347,000** shall be available for salaries and expenses; and of which [\$127,176,000] **\$155,707,000** to remain available until September 30, [2015] **2016**, shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security: Provided, That in addition to the amounts provided herein, [\$64,797,000] **\$54,200,000** shall be available for data center migration.*

Language Provision	Explanation
<p><i>[\$247,846,00], \$273,054,000 [\$120,670,000] \$117,347,000 [\$127,176,000] \$155,707,000 [\$64,797,000] \$54,200,000 [2015] 2016</i></p>	<p>Dollar or date changes only.</p>

B. FY 2012 to FY 2014 Budget Change

Salaries and Expenses Mission Statement

The Salaries and Expenses (S&E) PPA is a crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	37,978	37,978	39,504	1,526
11.3 Other than full-time permanent	248	248	200	(48)
11.5 Other personnel compensation	485	485	400	(85)
11.8 Special Service Pay	183	183	183	-
12.1 Benefits	7,588	7,588	8,518	930
Total, Salaries & Benefits	46,482	46,482	48,805	2,323

The increase of \$2,323,000 is due to the FY 2014 pay raise and the transfer of Records, Forms, and Printing FTE from OCRSO.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$592	\$592	\$242	-\$350

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel has decreased by \$350,000 due to efficiencies realized through increased use of videoconferencing and other technologies, and by increased prioritization to ensure that only mission-critical travel is funded. Travel also decreased as shared services costs for transit subsidy, parking, and sedan/shuttle services moving to the Working Capital Fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$7,278	\$7,278	\$10,939	\$3,661

GSA rent includes all payments to General Services Administration (GSA) for rental space and rent related services. The FY 2014 increase of \$3,661,000 is due to increased square footage utilized across the OCIO.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$1,101	\$1,101	\$1,138	\$37

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2014 request includes a \$37,000 increase for the Secretary's communications team.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$68	\$68	\$76	\$8

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2014 request has a small increase of \$8,000 for various OCIO printing needs such as the annual OCIO Open House, DHS CIO Offsite, and Industry Day.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$23,174	\$18,789	\$15,221	(\$7,953)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The decrease of \$7,953,000 is due to savings that will be realized through contract efficiencies and strategic sourcing initiatives, a reduction in enterprise-wide human capital planning, Executive Correspondence Tracker operations and maintenance, security deep dives, and information security policy and compliance support.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$549	\$549	\$601	\$52

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2014 request includes an increase of \$52,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$15,012	\$15,012	\$27,918	\$12,906

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 includes an increase of \$12,906,000 for the transfer of Working Capital Fund services from the ITS, ISA, and HSDN PPAs to the S&E PPA, as well as OCRSO shared services moving into the PPA.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	\$3,911	\$3,911	\$4,180	\$269

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2014 includes an increase of \$269,000 for maintenance and reconfiguration of space within OCIO.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.6 Medical care	\$30	\$30	\$34	\$4

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2014 request includes an increase of \$4,000.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$5,156	\$5,156	\$6,017	\$861

The FY 2014 request has an increase of \$861,000 due to Hosting and Operation and maintenance and rack fees for Data Centers 1 and 2.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.8 Subsistence & Support of persons	\$1,724	\$1,724	\$1,405	(\$319)

Subsistence and Support of persons includes a decrease of \$319,000 due to program reductions.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$423	\$423	\$771	\$348

The FY 2014 request includes an increase of \$348,000 due to realignment of a centralized OCIO supply budget.

Information Technology Services Mission Statement

The IT Services PPA supports development, implementation, and maintenance of: a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department, geospatial technologies, and information sharing.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
Total, Salaries & Benefits	-	-	-	-

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	0	0	\$150	\$150

The increase of \$150,000 for travel is due to Program Offices paying for travel instead of using a central fund.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$23,861	\$30,098	\$17,916	(\$5,945)

The overall FY 2014 decrease will be realized through contract efficiencies and strategic sourcing initiatives, as well as the program changes in IT health, transparency, and decision support (program and portfolio governance support). The \$6,155,000 for ICAM and the \$250,000 for portfolio reviews requested as program increases were added to this object class. \$6,000,000 in FY 2012 carryover is also included in this object class under the FY 2013 Annualized CR.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$5,302	\$7,302	\$4,247	(\$1,055)

The FY 2014 request includes a decrease of \$1,055,000 for geospatial infrastructure and data services and \$2,000,000 in FY 2012 carryover under the FY 2013 Annualized CR.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$2,020	\$3,704	\$5,118	\$3,098

The FY 2014 increase is due to WCF being funded in this object class, and \$1,700,000 in FY 2012 carryover is also included under the FY 2013 Annualized CR.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.4 O&M of facilities	0	0	\$2,000	\$2,000

This increase is due to the Office of Accessible Systems Technology (OAST) program office now being funded from this PPA.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$4,242	\$4,242	\$3,281	(\$961)

The decrease of \$961,000 is due to a reduction in geospatial software enterprise license agreements.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$3,375	\$3,375	0	(\$3,375)

The reduction of \$3,375,000 in the FY 2014 request is due to COMSEC cryptographic equipment being funded from the HSDN PPA in FY 2014.

Infrastructure and Security Activities Mission Statement

Infrastructure and Security Activities (ISA) are a set of IT projects that provides integration and protection of sensitive DHS information. ISA funds manage infrastructure support, which includes support for network and data center services and DHS Component enterprise applications, and also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
Total, Salaries & Benefits	-	-	-	-

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$17,216	\$28,131	\$27,865	\$10,649

The FY 2014 request includes an increase of \$2,000,000 for the Information Sharing Environment Office, a decrease of \$2,787,000 through contract efficiencies and strategic sourcing initiatives, as well as a decrease in IT governance and oversight. \$10,915,079 managed by OCFO for Financial Systems Modernization is also included in this object class as FY 2012 carryover under the FY 2013 Annualized CR.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$82,764	0	\$66,964	(\$15,800)

The \$15,800,000 decrease is due to a \$70,000,000 reduction in non-recurring data center migration costs from FY 2012. Includes \$54,200,000 in FY 2014 for Data Center Migration funding that will be executed through the WCF as well as other WCF activities such as Trusted Internet Connection (TIC) and Policy Enforcement Point (PEP) that will be moving to the WCF in FY 2014.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$39,020	\$130,093	\$5,234	(\$33,786)

Decrease is realized through increased efficiencies in the operation and maintenance of equipment. \$7,500,000 in FY 2012 carryover is also included in this object class under the FY 2013 Annualized CR.

Homeland Secure Data Network Mission Statement

Homeland Secure Data Network is a classified wide area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
Total, Salaries & Benefits	-	-	-	-

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	0	0	\$25	\$25

HSDN travel is now funded from the HSDN Program Office.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$3,139	\$3,139	\$34,685	\$31,546

Advisory and Assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local government, tribes, etc.) as well as from other units within the Federal Government. The FY 2014 request includes an increase in COMSEC support and services, as well as the program increase for implementation of Sharing and Safeguarding Classified Information. \$3,800,000 in FY 2012 carryover is also included in this object class under the FY 2013 Annualized CR.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	0	0	\$1,159	\$1,159

The FY 2014 increase is due to WCF being funded in this object class.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$38,139	\$42,165	\$34,348	(\$3,791)

The decrease is due to data center operations and maintenance moving to the WCF in FY 2014 and through increased efficiencies in the operation and maintenance of equipment.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$2,722	\$2,722	\$6,915	\$4,193

The FY 2014 request includes an increase of \$693,000 for HSDN technical refresh and a program increase for implementation of sharing and securing classified information initiatives.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of Federal employee and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS Component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS Components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations DHS Headquarters Consolidation Project

I. Appropriation Overview

A. Mission Statement:

The focus of the DHS Headquarters (HQ) Consolidation Project is the co-location of the Department through lease consolidation and build out of the St. Elizabeths campus. The DHS HQ Consolidation Project will enhance effectiveness by consolidation of HQ and Component executive leadership, operations coordination, policy and program management, and “mission execution” personnel who require a secure setting. We will optimize the real estate portfolio by increasing utilization efficiency integrating mobile workplace strategies.

The Management Directorate provides coordination, planning, policy, guidance, operational oversight, and innovative solutions for the management needs of the Department for the consolidated campus.

The DHS HQ Consolidation Project appropriation allows the Department to provide overall management of the program.

B. Budget Activities:

The DHS HQ facilities portfolio is scattered in over fifty locations throughout the National Capital Region, many with sub-optimal security protections. The Department will continue the development of the DHS Headquarters Consolidation at the St. Elizabeths Campus in a secure setting. The collocation of the Secretary’s Headquarters with Component Leadership will enhance command and control functions in the preparation for the response to natural disasters and terrorist attacks. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

C. Budget Request Summary:

The Under Secretary for Management requests 0 positions, 0 FTE, and \$105.5M for FY 2014. The FY 2014 request includes the following projects:

- Development costs for tenant specific construction, IT, security, outfitting and move costs for the renovation of the Center Building Complex for the consolidation of DHS Headquarters to the St. Elizabeths campus. (0 positions, 0 FTE, and \$92.7M).
- Operational Support costs for campus security to occupy St. Elizabeths (0 positions, 0 FTE, and \$2.8M) transferred from the United States Coast Guard (USCG).
- Operational Support costs for campus security to occupy St. Elizabeths (0 positions, 0 FTE, and \$10M).

**Department of Homeland Security
 Departmental Management and Operations
 DHS Headquarters Consolidation Project
 HQ Consolidation - St. Elizabeths
 Program Performance Justification**
 (Dollars in Thousands)

PPA: HQ Consolidation - St. Elizabeths

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	55,979
2014 Adjustments-to-Base	-	-	(55,979)
2014 Current Services	-	-	-
2014 Program Change	-	-	92,700
2014 Total Request	-	-	92,700
Total Change 2012 to 2014	-	-	36,721

The HQ Consolidation effort requests 0 FTP, 0 FTE, and \$92.7 million for St. Elizabeths FY 2014 development funding for tenant specific costs for the renovation of the Center Building Complex.

CURRENT SERVICES PROGRAM DESCRIPTION:

The DHS mission is to lead a unified national effort to secure America. Yet the Department’s legacy facilities are scattered in over fifty locations throughout the National Capital Region (NCR), adversely impacting critical communication and coordination across DHS Components. To support the incident management and command-and-control requirements of our mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus in a secure setting. Consolidation will allow the strategic realignment of the real property portfolio in the NCR to more effectively and efficiently support the DHS mission. In addition, consolidation will contribute to reduced facility costs and provide quality workspace to attract and retain the best professional workforce.

This request represents a revised approach to the build-out of the St. Elizabeths campus from the original plan. Instead of requesting large development segments of 1 million square feet or more, the FY2014 request and the revised development plan is based on market-sized segments of approximately 300,000 square feet.

St. Elizabeths Construction Status:

- Critical Phase 1 requirements for USCG FY 2013 occupancy will proceed to completion based on prior year funding (FY 2012).

- Certain non-critical elements planned for Phase 1 are being deferred.
- Continuing Phase 1A construction of USCG Headquarters toward completion as well as progressing Phase 1B renovation of four of the original planned six historic buildings for shared use functions toward completion in FY 2013.

In the FY 2013 President's Budget, DHS requested \$89 million for transportation infrastructure improvements for the West Campus Access Road Extension and the Malcolm X/I-295/South Capitol Street Interchange Reconstruction.

**Department of Homeland Security
 Departmental Management and Operations
 DHS Headquarters Consolidation Project
 St. Elizabeths Support Costs
 Program Performance Justification
 (Dollars in Thousands)**

PPA: St. Elizabeths Support Costs

	Perm. Pos	FTE	Amount
2012 Revised Enacted	-	-	-
2014 Adjustments-to-Base	-	-	2,800
2014 Current Services	-	-	2,800
2014 Program Change	-	-	10,000
2014 Total Request	-	-	12,800
Total Change 2012 to 2014	-	-	12,800

The HQ Consolidation effort requests 0 FTP, 0 FTE and \$12.8 million in FY 2014 for St. Elizabeths campus security support costs. \$2.8 million of these funds are being transferred from United States Coast Guard (USCG) as this amount is within their base for the security guard force, remaining from their transition to the campus in 2013.

CURRENT SERVICES PROGRAM DESCRIPTION:

In order to establish the foundation for sustained operations and maintenance for St. Elizabeths, a new Program/Project/Activity (PPA) is requested. Included in this PPA are St. Elizabeths Operations Center requirements for security services and technology integration operations, as well as campus security costs required to support the USCG at the St. Elizabeths campus. This PPA will become the foundation for centralized operational support costs for all St. Elizabeths campus functions.

Program Increase							-	-	92,700
Total Request	-	-	55,979	-	-	56,322	-	-	92,700

Description of Item

The FY 2014 request continues the St. Elizabeths development with the renovation of the Center Building Complex to house the Secretary's Office, several hundred headquarters staff, and key leadership functions for command/control and daily operations of the Department. The budget request represents a complete severable segment.

It should be noted that the Center Building Complex renovation is not intended to accommodate the entire DHS Headquarters facility needs currently housed at the Nebraska Avenue Complex.

Justification

The DHS Headquarters facilities portfolio is scattered in over fifty locations throughout the NCR. With the USCG Headquarters scheduled to begin relocation to St. Elizabeths in August 2013, it is critical the Department continue the development of the St. Elizabeths Campus. The collocation of the Secretary's Headquarters with Component Leadership will enhance command and control functions in the preparation for the response to natural disasters, terrorist attacks and other contingencies. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

Impact on Performance

This project directly supports the Department's Strategic Plan goal to Strengthen and Unify DHS Operations and Management. Continued development of the Consolidated DHS Headquarters campus

at St. Elizabeths is vital to enhance command, control, planning and response to functions of the Department.

Program Increase 2: Operational Support Costs
 PPA: St. Elizabeths Support Costs
 Program Increase: Positions 0, FTE 0, Dollars \$10,000

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	2,800
Program Increase							-	-	10,000
Total Request	-	-	-	-	-	-	-	-	12,800

Description of Item

The USCG Headquarters and the USCG Command (Operations) Center are due to relocate to the St. Elizabeths campus in August 2013. With this move, the Department will experience costs not currently within base resources to support the USCG in their new location. Starting in FY 2014, the Department will need to fund operational support costs for rent within the Department Operations Center (DOC), a facility for security services and technology integration operations, as well as a security guard force service required to support the USCG at the St. Elizabeths campus.

Justification

As St. Elizabeths transitions to an operational campus in August 2013, the Interagency Security Committee (ISC) standards for a Level 5 secure facility must be implemented to support Coast Guard Headquarters operations. The physical security concept of operations includes a layered defense strategy with a centrally managed security operations for efficiency and seamless integration of physical security between the Coast Guard operational perimeter and the portions of the campus under current and future development. Rent costs for security operations and guard force support costs are required to manage the ISC Level 5 security program across the campus.

The Technology Integration Program (TIP) for the St. Elizabeths campus is designed to provide information technology enterprise architecture across the campus to support all of the components on a common framework or backbone. Integration of the Coast Guard Dot Mil network with the DHS Dot Gov network requires careful and continued oversight and management to assure 24/7 availability of the networks to support operations. Funding for rent costs for an onsite IT Operations Center for campus enterprise management is essential to assure the availability of IT systems on a continuous basis and critical to support Coast Guard Headquarters operations.

Impact on Performance

The continued development of a consolidated DHS Headquarters campus at St. Elizabeths supports the goal to strengthen and mature DHS. Establishing and funding a new PPA for operational costs will support the USCG transition to a new headquarters and provide a streamlined way to manage operations for future occupants of St. Elizabeths.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses [directly related to planning, engineering, and constructing transportation-related improvements at the Malcolm X interchange, Shepherd Parkway, and expansion of Martin Luther King Boulevard to facilitate vehicle and pedestrian access to department headquarters at the St Elizabeths campus]¹ *to plan, acquire, construct, renovate, remediate, equip, furnish and occupy buildings and facilities for the consolidation of department headquarters at St. Elizabeths and associated mission consolidation, and to fund operational costs within St Elizabeths Department Operations Center, [\$89,000,000] **\$105,500,000***² to remain available until [September 30,2014]³ *expended.*

<p>¹ ...[planning, engineering, and constructing transportation-related improvements at the Malcolm X interchange, Shepherd Parkway, and expansion of Martin Luther King Boulevard to facilitate vehicle and pedestrian access to department headquarters] the continued construction at the St. Elizabeths campus as well as....[\$89,000,000] \$105,500,000</p>	<p>New PPA within the appropriation.</p> <p>The funding requested in the prior year was only for construction whereas this year, this request is also for operational support costs associated with the USCG occupancy of the campus.</p>
<p>² [\$89,000,000] \$105,500,000</p>	<p>Dollar change only.</p>
<p>³ ... [to remain available until September 30, 2014] to remain available until expended.</p>	<p>Period of availability change</p>

St. Elizabeths Support Costs Mission Statement

The purpose of the St. Elizabeths program is to consolidate the majority of the Department into a single site campus to effectively and efficiently support the Department's mission. The St. Elizabeths support costs allow the Department the required resources to manage these vital functions to support Coast Guard occupancy.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Base	FY 2014 Request	FY 2013 to FY 2014 Change
23.1 GSA rent	0	0	\$3,515	\$3,515

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes a request for \$3,515,000 in rent associated with the USCG's occupancy of the St. Elizabeths campus in 2013.

	FY 2012 Revised Enacted	FY 2013 Base	FY 2014 Request	FY 2013 to FY 2014 Change
25.3 Purchases from Gov't accts.	0	0	\$9,285	\$9,285

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2014 request includes an increase associated with a campus security guard force.

BUDGET REQUEST AND SUPPORTING INFORMATION

Working Capital Fund

I. Appropriation Overview

A. Mission Statement:

The Working Capital Fund's (WCF) mission is to deliver cost-effective support services throughout DHS. The goal of the Under Secretary for Management (USM) is to maintain and operate a fund that promotes economy, efficiency, accountability, and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services.

The WCF is continually evaluating its programs and operations with the goal of achieving across-the-board economies of scale that result in increased efficiencies and cost savings. In an effort to control administrative spending across the Department, the WCF's FY 2014 budget build includes an \$88 million across the board reduction with a cost savings adjustment totaling \$18 million.

The WCF provides a mechanism for shared service costs to be distributed and recouped, as well as facilitates the delivery and oversight of these costs. The WCF supports selected services, activities, and programs that benefit numerous DHS organizational Components. Additionally, the WCF supports the funding for government-wide initiatives as well as DHS-crosscutting initiatives approved by the Office of Management and Budget (OMB) and Congress.

B. Budget Activities:

WCF activities are organized under the four PPA categories listed below.

Fee for Service Activities

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. Examples of a fee for service activity are the print and electronic access subscription services through the Library of Congress FEDLINK. These WCF activities are reimbursed for the provision of services and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services at rates that are pre-approved by the Department's Chief Financial Officer and reviewed by Component customers. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the Components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Tri-Bureau Service Activity

The WCF eliminated all activities within the Tri-bureau category.

Government-wide Mandated Service Activities

These Administration-sponsored initiatives are managed by a designated Federal department to improve overall government performance. Participating departments are assessed for the costs of services provided by this activity, which provides a direct benefit to participating DHS Components. Examples include the government-wide e-Government initiatives and the OMB-sponsored Interagency Councils.

DHS Crosscutting Activities

Activities provided through the DHS Crosscutting Activity are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

WCF Management Activity

The WCF Management Activity includes funding for the staff that develop WCF policy and procedures, formulate and execute the WCF budget and facilitate dispute resolution of issues between activity managers and customers.

C. Budget Request Summary:

The DHS WCF operating requirements for FY 2014 are estimated to be 564 FTE and \$1,022.661 million in reimbursable authority. This is a net increase of \$389.304 million and an increase of 152 positions and 152 FTE which includes a pay increase of \$0.654 million, efficiencies decrease of \$0.477 million, administrative savings of \$87.850 million, and program changes of \$476.977 million.

In FY 2014, the WCF will continue all services and activities from the FY 2012 Base and adds nine additional services and activities, described below. The FY 2014 net increase is attributable to a program increase of \$397.632 million for Fee for Service Activities, a program decrease of \$6.408 million for Government-wide Mandated Service Activities, a program decrease of \$1.865 million for DHS Crosscutting Activities, and a decrease of \$.055 thousand for Working Capital Fund Operations.

The Working Capital Fund Governance Board (WCFGB) sets policy, evaluates program requirements, and tracks performance outcomes for all existing and new WCF activities. In the FY 2014 budget planning phase, the WCFGB approved program requirements for nine potential WCF activities as follows:

- Data Center Consolidation Operations and Maintenance;
- Homeland Security Presidential Directive 12 (HSPD-12);
- Environmental Planning and Historic Preservation Support System;
- Transit Subsidies;
- Executive Sedan Services;
- Parking Services;
- Shuttle Services;
- Mail Operations; and
- National Defense University.

In efforts to streamline administrative oversight, the following activities were approved by the WCFGB for consolidation:

- Employee Assistance Program activity - Approved for realignment into the HQ Human Capital Services;
- E-Grants activity - Approved for realignment to E-Integrated Financial Assistance Environment;
- E-Docket - Approved for realignment to E-Rulemaking; and
- Personnel Accountability System - Approved for realignment to the Human Capital Business System.

The WCFGB disapproved the Regulatory Management System activity for inclusion in FY 2014 because the system is in the developmental stages of deployment. The WCFGB will re-evaluate this activity once it is in the operations and maintenance stage of its life cycle.

The Department revised the WCF's FY 2013 cost requirements from the Congressional Budget Submission of \$939.319 million to \$633.357 million based on the annualized CR. .

D. Efficiencies

Working Capital Fund Efficiencies totaling \$18.325 million in FY 2014 are required by Executive Order 13859 and are not mission critical or required by law include:

Printing & Reproduction Efficiencies **\$.006 million**

The request includes a \$.006 million reduction in print services for discretionary products.

Supplies & Materials Efficiencies **\$.400 million**

The request includes a \$.400 million reduction in supplies and materials for discretionary products.

Travel Efficiencies **\$.072 million**

The request includes a \$.072 million reduction for discretionary travel to align with the requirements from Executive Order 13589 directing agencies to spend at least 30 percent less on travel than in FY 2010. \$.070 million is a reduction from the Fee for Service PPA and \$.002 million from the Government Wide Mandated PPA.

Purchase from Other Government Accounts Efficiencies **\$.971 million**

The request includes a \$.971 million reduction to align with a Department wide initiative to streamline cost. The projected reduction including \$.908 from the Government Wide Mandated PPA and \$.063 from the Working Capital Fund Operations PPA, anticipates a decrease in Interagency Agreements between DHS and other Federal agencies.

Other Services Efficiencies **\$6.812 million**

The request includes a \$6.812 million reduction of which \$5.691 million is from the Government Wide Mandated PPA and \$1.121 is from the DHS Cross Cutting PPA to align with a department wide initiative to streamline cost. The projected reduction anticipates a cost savings as a result of improvements in contract management.

Advisory & Assistance Services Efficiencies **\$10.064 million**

The request includes a \$10.064 million reduction of which \$9.310 million is from the Fee for Service PPA through contractor conversion, mission support, and management efficiencies. Reductions of \$0.754 million will be achieved from the DHS Crosscutting PPA with \$0.370 million coming from the Strategic Sourcing's elimination of contract related expenses and \$0.384 in contract savings achieved through improved contract management identified by the Office of the Chief Information Officer's (OCIO) Capital Planning and Investment Control (CPIC) office.

2014 Total Request	542	542	975,314
Total Change 2012 to 2014	148	148	397,632

The Working Capital Fund requests \$975.314 million and 542 FTE for the Fee for Service activity in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

GSA Rent – Fee for Service Activity - \$149.868 million

Description of Service: The WCF Rent Activity assist customers with initiating requests for new space and working with the General Services Administration (GSA) to identify, procure, and construct appropriate office space. The WCF Rent Activity also manages space assignments and growth requirements for all existing locations within the DHS HQ National Capital Region (NCR) portfolio. Along with space management, the activity is also tasked with fairly allocating the rent costs incurred for each location among the components. Costs include rental payments to GSA, Federal Protective Service (FPS) charges, and funding reimbursable agreements with GSA for overtime utilities. Centrally managing these costs and transactions through the WCF enables the Department to provide greater efficiency to its Components.

Other responsibilities of the WCF Rent Activity include managing and forecasting space and budget requirements and developing Housing Occupancy Plans to maximize the utilization of space. To provide effective customer service, a Space/Rent Analyst is assigned to each Component.

Managing Office: Office of the Chief Readiness Support Officer

Cost Allocation Methodology: Customers are charged based on their occupied space in each building. The square footage is multiplied by the price per rentable square foot cost for each building. The per building rentable square foot price is based on GSA rent and includes FPS charges, overtime utilities, antenna charges, and DHS shared space.

Full Time Equivalent (FTE): This activity requires 5 FTE.

FEDLINK (Library of Congress) – Fee for Service Activity - \$10.122 million

Description of Service: The Department of Homeland Security (DHS) Library and Information Services' mission is to provide DHS program managers and their end users with timely desktop access to mission critical, authoritative, commercial information content, products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, and research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC shares its expertise in information services and consolidates buying power for Federal agencies.

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The costing algorithm is based on three differing service types: enterprise-wide availability, account specific availability, and percentage of use.

Enterprise-wide Availability: Services available enterprise-wide and made available to all DHS personnel as identified by Internet Protocol (IP) authentication. The cost distribution for these services is based on FTE numbers approved by the Office of the Financial Officer. Examples of products provided under the enterprise-wide available service plan include subscriptions to Leadership Directories, Newsbank, EBSCO, ASTM, National Fire and Protection Association, and the Oxford English Dictionary.

Account Specific Availability: Services available based on specific account availability and accessed using vendor provided user names and passwords. The cost for these services is distributed based on the actual cost of the user subscription service including applicable FEDLINK fees. West Government Services is one of the products provided under this type of service plan and only used by certain DHS Components.

Percentage of use: Under this service plan, products and subscriptions can be accessed by all DHS Components using their user names and passwords. The cost for these services is distributed to each component organization based on prior usage percentages related to the annual product cost. Westlaw is one of the products provided under this type of service plan.

Full Time Equivalent (FTE): This activity requires 4 FTE.

Financial Management (Finance & Accounting Shared Services) – Fee for Service Activity - \$23.673 million

Description of Service: The Office of the Chief Financial Officer (OCFO) provides authorization for

financial systems used by DHS. OCFO sets policy and manages the development, implementation, operation and maintenance of Departmental financial management systems and related business processes. The US Immigration and Customs Enforcement (ICE) performs selected financial management services for the DHS HQ offices on a reimbursable basis.

Activities include:

- **Financial Policies and Procedures:** In conjunction with all involved parties, ICE supports the implementation of any new or modified financial management procedure for processing and reporting financial transactions. ICE, in conjunction with all parties involved, works to establish appropriate policies, procedures, and standards for business process activities.
- **Administration (including Customer Service):** ICE provides administrative tasks associated with ongoing management and resourcing of financial operations on behalf of the DHS customers. Examples of these activities include Continuity of Operations Planning (COOP), customer outreach and evaluation of services, and financial management group meetings.
- **Financial Processing:** ICE performs financial management transaction processing tasks. In collaboration with DHS OCFO, appropriate internal controls are maintained by ICE to provide reasonable assurance that financial information is reported in compliance with all applicable laws, regulation, and accounting standards and policies established by DHS. These activities include, but are not limited to collections and reimbursable agreements, disbursements, payroll processing, and budgetary resources.
- **Financial Analysis, Reporting, and Statements:** ICE provides financial statement reporting and issue resolution. ICE maintains separate general ledger accounts within the Federal Financial Management System (FFMS) for the DHS customers, maintains the DHS customer's balances on accruals, and conforms to the U.S. Standard General Ledger (SGL) at the transaction level. Some of the functions under this activity include general ledger maintenance, fund balance with Treasury, and financial management data.
- **External Reviews and Inquiries:** When appropriate, ICE provides responses to financial management and reporting related questions and data requests from external sources including independent auditors, the Inspector General's Office (IG), Government Accountability Office (GAO), and Congressional offices and staff.
- **Financial Systems:** Provides financial system support tasks. These activities include, but are not limited to hosting and maintenance of Federal Financial Management System (FFMS); administration of contract for FFMS training; FFMS and E-travel User Access; FFMS and E-travel Help Desk; Support of DHS systems modernization efforts; and system updates and enhancements.

Managing Office: Immigration and Customs Enforcement (ICE)

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the actual cost derived from the Customer Billing Model (CBM) of the prior year plus a 2 percent inflation rate or inflation rate guidelines provided by the WCF. Cost allocation methodology for this activity is

based on the historical cost of providing the following seven categories of financial support to each participating component: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Statement Audit – Fee for Service Activity - \$12.960 million

Description of Service: The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting (CPA) firm to perform financial statement audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract and maintained by the Office of the Inspector General as the Contracting Officer's Technical Representative (COTR). The award is made under a GSA schedule contract.

The Financial Statement Auditor is selected by the OIG through contracting procedures (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS Components that are being audited.

The Office of the Chief Financial Officer coordinates and prepares the DHS consolidated financial statements and acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the OCFO Director of Financial Management to prepare financial statements and complete the audit requirements.

The Office of the Inspector General is the COTR for the Financial Statement Audit contract. The OIG has the following responsibilities:

- Contracting with an independent public accounting firm to perform the DHS financial statement audit;
- Providing oversight of the contract auditor;
- Providing estimated cost information that allows the OCFO to properly budget for audit costs;
- Notifying the OCFO of any potential cost overruns and the related reasons; and
- Reviewing and approving invoices for payment.

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting (CPA) firm to perform financial statement audit functions. The costs include billable hours, travel, and incidental associated with the performance of the audit as permitted by the contract maintained by the OIG as the Contracting Officer's Technical Representative (COTR). The OIG prepares the scope of work and the audit firm provides their estimate for completing the work.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Internal Control Audit - Fee for Service Activity - \$1.225 million

Description of Service: A contract is awarded annually to provide internal control audit services. The selected auditor provides services through a time and materials contract which includes travel and incidental costs associated with the performance of the audit. The award is made under a GSA schedule contract and the OIG acts as the COTR.

The Internal Control Auditor is selected by the OIG (with the Bureau of Public Debt acting as the procurement office) and must stay independent from the DHS components that are being audited.

The Office of the Chief Financial Officer coordinates the assessment process and acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the OCFO Director of Financial Management in the preparation of and completion of the independent audit, and with the Director of the Internal Controls Program Management Office on management's assessment of internal controls.

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: Each Component pays for its own assessment by multiplying the auditor's estimated billable hours multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Support (Financial Operations) – Fee for Service - \$4.085 million Activity

Description of Service: The Office of Financial Operations (FO) is a line of business under WCF that provides financial management services to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The WCF Financial Operations activity manages the processing of multiple types of financial documents and transactions for its customers as well as Fed Traveler Help Desk Support.

This funding provides the personnel and materials to perform the following activities:

- Procurement requisition operations and management;
- Invoice and Inter-governmental Payment and Collection System (IPAC) operations and management;
- Travel operations support and management;
- Payroll reclassification, reconciliation, and reporting management;
- End of Fiscal Year closeout coordination and support;
- Travel cards operations and management;
- Purchase card operations management; and
- Overall financial management services and oversight.

In addition, the Financial Management Support Activity supports internal control functions for HQ. The internal control function assess entity-level controls and conduct A-123 process assessments of

financial reporting processes for General Ledger Management and oversees the reconciliation of the Fund Balance with Treasury for OSEM and USM offices. The internal control function helps the Office of Financial Operations meet the requirements of the Federal Managers' Financial Integrity Act and provide the required annual internal control assurance to the Secretary for Departmental Management offices.

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: The cost allocation methodology is percentage of FTEs per office utilizing Financial Management Support multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 32 FTE.

Bankcard Program - Fee for Service Activity- \$0.053 million

Description of Service: The Customs and Border Protection (CBP) provides a centralized bankcard invoicing and payment system for Components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS.

This system ensures payments of invoices within one business day of receipt and provides transmission of an electronic file containing transaction data to each component's accounting system.

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the number of each Component's processed bankcard transactions divided by the total number of bankcard transactions processed for all participating components, multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Treasury Information Executive Repository (TIER) – Fee for Service Activity - \$0.686 million

Description of Service: The Treasury Information Executive Repository (TIER) is the application used by the DHS OCFO to create Department-wide financial statements. TIER is critical for monthly, quarterly, and annual reporting requirements and meeting accelerated timeframes for financial statement audit deliverables and producing the Annual Financial Report. TIER reduces the cost of producing financial statements in a timely manner.

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is the annual cost of the TIER software divided equally among all participating Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity - \$34.474 million

Description of Service: The Department of Agriculture’s National Finance Center (NFC) provides Payroll/Personnel services utilizing their legacy mainframe systems (payroll), WebTA (time and attendance) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides Payroll/Personnel policy support and benefits reconciliation, tax reporting, and payroll problem resolution. NFC Payroll/Personnel services billed to DHS components include Earnings and Leave and Personnel Benefits statements, USDA OIG oversight of non-USDA Payroll processing, Payroll Operations branch support, claims, ad-hoc reporting, and debt management. Along with NFC Payroll/Personnel services and EmpowHR hosting, NFC provides hosting services for the WebTA (Time & Attendance) application.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component’s cost allocation methodology is based on cost drivers which include pieces of mail, checked mailed, average number of employees paid, receivables established, claims processed, CPU minutes, number of manual garnishment accounts and NFC labor cost for the following:

COST AREA

COST DRIVER

Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail*
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Average # of employees paid
Payroll Operations Branch Support	Average # of employees paid
Tax Reporting	Average # of employees paid
Payroll Policy Support	Average # of employees paid
e-Pay Policy Support	Average # of employees paid
Benefits Reconciliation and Liaison Area	Average # of employees paid
Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Average # of employees paid
Certification	Average # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Average # of employees paid
Payroll/Personnel Baseline Services	Average # of employees paid
3 rd Party Garnishment Processing	# of manual garnishment accounts & NFC labor cost

Full Time Equivalent (FTE): This activity requires 0 FTE.

HQ Human Capital Services – Fee for Service Activity- \$13.629 million.

Description of Service: The HQ Human Capital Services (HCS) activity provides operational human resource services. The team ensures that the personnel processes for HQs managers/employees and service providers operates efficiently and effectively. Examples of services provided include: staffing and recruitment; position classification/position management; performance management; payroll and personnel action processing; employee and labor relations support; retirements and benefits support; time and attendance support; delegated examining unit (DEU) administration, audits and quality control services; Employee Assistance Program (EAP) services; and new employee and other leadership/supervisory training to support ongoing initiatives. Executive Resources services include a broad range of operational support in assisting HQ offices (including NPPD) in recruiting and hiring/on-boarding executives and political appointees. Some of these services include continued support and guidance upon entrance on duty; organization and coordination of statutory Executive Resources Boards; and Performance Review Boards to ensure adequate oversight of the Department’s executive cadre.

The HQ HCS Team provides coordinated services to all DHS HQ customers, ensures timely and effective recruitment of staff, effectively manages the “on-board” staffing process (which includes security clearances and collaboration with the Personnel Security Office), and supports the efficient facilitation of staff exiting DHS HQ. In FY 2014, the Office of the Chief Human Capital Officer will realign EAP to the HQ Services activity in efforts to streamline administrative oversight.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each HQ Component’s FTE divided by the total number of participating Components’ FTE multiplied by the total estimated cost of the activity.

Full Time Equivalent: This activity requires 81 FTE.

Human Capital Business Systems (HCBS) – Fee for Service Activity - \$8.624 million

Description of Service: The mission of the HCBS activity is to maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems. The systems’ capabilities meet the requirements specified by the user-community and provide services in a timely and cost-effective manner. HCBS continues its enterprise acquisition strategies on behalf of all of DHS components, avoiding considerable duplicative costs if DHS components proceeded independently.

HCBS supports several enterprise-wide systems to include: web-based Time & Attendance; Personnel and Payroll; the Personnel Accountability System; and the Enterprise Integration Environment (EIE) which allows hosting and integration of enterprise application data. In each case, the components are supported by the HCBS unit in a collaborative and leveraged approach.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Costs are based on three billable areas: (1) estimated FTE costs for providing HCBS operational support; (2) operations and maintenance of the HR systems and hosting environment; and (3) estimated costs for operational support and reporting (contract labor hours).

The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE divided by total participating Components' FTE multiplied by the total estimated cost of the activity. Customers will only be billed for the areas for which they receive service.

Full Time Equivalent: This activity requires 21 FTE.

Flexible Spending Accounts (FSA) Administrative Costs - Fee for Service Activity - \$1.389 million

Description of Service: FSAs are employee-funded accounts that are used by the employee account holders to pay for medical expenses and dependent care costs that are not reimbursed by another source. Contributions to the accounts come from an employee's pre-taxed salary. The government does not make contributions. There is a fee that is charged by the administrator of these accounts. Effective FY 2008, the law requires that an agency pay these fees on behalf of their employees.

The costs for this program are charged based on actual invoices received in October and March of each calendar year. The March bill includes employees of record as of January 1 of the calendar year. The October bill makes an adjustment for any new employees who have entered the program since January 1. The invoice process is managed by SHPS (FSA provider) and costs are billed to components based upon actual invoices received from the vendor.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: The cost allocation methodology is based on components' current year actual participation rates.

Full Time Equivalent (FTE): This activity requires 0 FTE.

DHS Senior Executive Service Candidate Development Program (SES CDP) – Fee for Service Activity - \$0.952 million

Description of Service: The DHS Senior Executive Service Candidate Development Program (SES CDP) is a key element in accomplishing the Secretary's goal of "One DHS." An SES-CDP is a formal program approved in writing by the Office of Personnel Management (OPM) that permits the certification of the executive qualifications of graduates by the OPM Qualifications Review Board (QRB) and selection for the SES without further competition. Previously, TSA, CBP, and USSS offered CDPs for mission critical employees. The Department is consolidating its multiple Candidate Development Programs and the "One DHS" CDP will be the only CDP offered moving forward. Candidates from across the Department will be exposed to a core training program and will have the opportunity to participate in mentoring, developmental assignments, and other activities throughout the Department.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: The costs are allocated based on the percentage of SES slots a component has relative to the total DHS SES (or SES equivalent) population excluding military.

Full Time Equivalent: This activity requires 4 FTE.

HQ Executive Leadership Development Program (HQ ELDP)– Fee for Service Activity - \$0.286 million

Like the SES CDP, this formal program approved in writing by the Office of Personnel Management (OPM) that permits the certification of the executive qualifications of graduates by the OPM Qualifications Review Board (QRB). Each candidate will be closely observed by an Executive Resources Board (ERB) either at DHS HQ or their operational component. The staff will work with candidates, mentors, developmental assignment supervisors, and members of ERBs to closely evaluate the progress of each candidate. These evaluations will ensure the candidate is taking maximum advantage of developmental opportunities and modify developmental activities as necessary.

The DHS SES CDP serves as a cornerstone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan, contributes to meeting our succession planning goals, and creates a high-quality SES leadership cadre. It is also a critical element in sustaining a “Green” rating on OMB’s Human Capital Scorecard.

This centralized program complements and enhances the strengths of existing component leadership development initiatives across the Department and further facilitates succession planning opportunities. It provides the opportunity for participants to take advantage of developmental and rotational opportunities in other DHS components, thereby increasing participants’ corporate DHS knowledge and experience. In addition, components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component’s cost allocation methodology is based on the following factors:

- Pro-rata share based on the percentage of each component’s SES allotment divided by DHS’s total SES population multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

CIO/DHS Infrastructure Transformation (ITP) Program – Fee for Service Activity - \$69.600 million

Description of Service: The DHS consolidation of information technology (IT) infrastructure has served the majority of employees of the Department since its establishment on March 1, 2003. Since its creation, the department supported numerous legacy IT programs, 43 DHS run data centers, seven wide area networks, and multiple local area networks with overlapping system circuitry. Contrasting

acquisition strategies and IT infrastructure policies among Components further complicated the DHS environment and the ultimate goal of moving to one DHS-wide IT infrastructure in a consolidated IT data center operational environment.

Infrastructure Transformation Program (ITP) is a group of interrelated initiatives designed to improve the Department's IT infrastructure by unifying disparate Component information technology networks, platforms, and services into a set of enterprise wide IT Services. It implements the DHS Chief Information Officer's (CIO) vision of One Infrastructure, which requires an integrated IT infrastructure to serve as the foundation for information sharing and agile responses to threats against the homeland. ITP was chartered by the Deputy Secretary as a DHS Level 1 investment with the following project domain initiatives included in the scope of the transformation effort: Network Services, Email Services, Data Center, and Wireless. A majority of the ITP WCF supports DHS enterprise-wide IT infrastructure O&M activities for Network Services (OneNet). OneNet provides the foundation for DHS's Information Sharing Environment (ISE). DHS's unclassified, classified, and secret networks utilize OneNet for information transport. OneNet also centralizes wide area networks; network and security operations centers; and serves the mission to create a robust, reliable, scalable, secure, survivable, and cost effective infrastructure to support Components across the DHS IT Enterprise.

The Trusted Internet Connection (TIC) initiative is the first of the President's Comprehensive National cyber security Initiatives (HSPD-12/NSPD-54) and is led by OMB and DHS. The initiative is aimed at optimizing individual agency network services into a common solution for the Federal government. The TIC at the two enterprise data centers provides security controls across four services; the Internet, VPN, Extranet, and Application hosting that meet or exceed Trusted Internet Connection Access Provider (TICAP) standards. The TICs are under the control of the enterprise Security Operations Center (SOC) to ensure that the Department maintains the right balance between Internet access and security protections. Two specific initiatives within the TIC Services include the High Assurance Gateways (HAG) and Reverse Proxy. The HAG protects the user's workstation from any malicious content, as well as attempts to infiltrate the users' system. Reverse Proxy provides secure network connectivity to applications that are not physically co-located with the Trusted Internet Connections at DC1 and DC2.

The Policy Enforcement Points (PEP) serve as the Component's trust zone gateway to the DHS enterprise and external sources, advancing the DHS Secretary's goal of unifying and maturing DHS through the secure sharing and exchange of information. PEPs are a control point in the DHS network used to enforce policies, and monitor, capture, and playback network traffic. This will reduce vulnerability and improve system access and implementation of information sharing policies across the Department through centralized change management.

ITP resides within the IT Services Office (ITSO) of the DHS CIO. ITP is managed by the ITSO Enterprise Services Division (ESD) and is led by the Director of ESD and a CIO Council member executive sponsor. Furthermore, ITP is supported by a senior executive steering group of CIOs, which is staffed by a team of technical experts hired by the Department HQ from the Components, several Components' working group members, and contractor support.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources.

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost of Component contribution for DHS IT Infrastructure Investment divided by total DHS IT Infrastructure Investment equals the customer percent. Customer assessments equal the customer percent multiplied by total charges.

Full Time Equivalent (FTE): This activity requires 17 FTE.

PROCUREMENT ACTIVITIES

FY 2012 Activity Funding (\$thousands) \$52,649	FY 2013 Activity Funding (\$thousands) \$52,649	FY 2014 Activity Request (\$thousands) \$69,600
DHS - Infrastructure Transformation Program (ITP)	The Infrastructure Transformation Program (ITP) is a group of interrelated initiatives providing enterprise IT Services for Network, Data Center, and Email to support the DHS Mission, Goals, and Objectives of strengthening the Homeland Security (HLS) enterprise; improving cross-departmental management, policy and function integration; and, enhancing and integrating Departmental management functions. ITP is a group of interrelated initiatives designed to improve the DHS’s Information Technology infrastructure by unifying individual Component IT networks, platforms and services into a set of Enterprise IT Services. This investment was designed to address issues identified in the following areas: 1) creates a secure, survivable enterprise network with centralized operations (NOC), security (SOC) and governance, 2) establishes a common, reliable and standardized email communication system which provides a single enterprise Global Address List; and, 3) consolidates 43 primary Component Data Centers into two (2) physically secure, geographically diverse Enterprise Data Centers (EDCs). The two (2) EDCs offer services for: computing, applications, data storage management and disaster recovery.	

National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity - \$184.777 million

Description of Service: The National Capital Region Infrastructure Operations (NCRIO) serves the DHS Headquarters (HQ), select Department Components, and field offices for network and internet/intranet access; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security and information technology (IT) operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains all desktop applications for full functionality and continuous availability of unclassified and classified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services and supports build-out of new facilities and provides customer service through a 24/7 help desk.

In providing these services, the NCRIO adheres to applicable Executive Orders, Presidential directives, other Federal laws, management policies, handbooks, guidelines, processes, and procedures. The NCRIO continually monitors vendors' performance and technology to ensure that DHS HQ IT infrastructure services conform to specified standards for reliability, readiness, sustainability, supportability, availability, stability, security, flexibility, responsiveness and cost effectiveness. The NCRIO tracks workload data by functional service area to identify trends and statistical variations, and provides technical, logistical, and financial forecasts for future years. The NCRIO conducts baseline assessments of its existing systems and infrastructure against industry standards for items such as configuration and performance metrics. Using the results of baseline evaluations, the NCRIO maintains a program for the improvement of IT services.

The NCRIO resides within the IT Services Office (ITSO) of the DHS CIO. NCRIO is managed by the ITSO Customer Relationship Management Division (CRMD). NCRIO is led by the Director of CRMD. Cost-and activity-based analyses are conducted and validated by the ITSO Budget and Financial Management Division (BFMD), independent of NCRIO management. Senior executive management of the DHS HQ Directorate Components formed a review group to identify and resolve customer service issues in monthly meetings with the DHS CIO.

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The FY 2014 WCF submission is allocated among the participating organizational Components based on their total number of accounts on the network as determined by the Global Address List (GAL). For Classified Land Area Network (C-LAN), costs are driven by the number of Component accounts and devices. For Unclassified Land Area Network (A-LAN), the non-discrete costs are shared across the total number of network accounts, with the Component being charged for their pro-rated share of the total network accounts. A Component's discrete costs; e.g. wireless and circuits, are billed directly to the Component based on their actual consumption of these services.

Full Time Equivalent (FTE): This activity requires 73 FTE.

PROCUREMENT ACTIVITIES

FY 2012 Activity Funding (\$thousands) \$134,869	FY 2013 Activity Funding (\$thousands) \$134,869	FY 2014 Activity Request (\$thousands) \$184,777
DHS - National Capital Region Infrastructure Operations (NCRIO)	The NCRIO serves the DHS Headquarters (HQ), select Department Components, and field offices for network and internet/intranet access; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security; and IT operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains all deployed applications for full functionality and continuous availability across the Department of Homeland Security’s HQ unclassified and classified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services with build-out of new facilities and provides customer service through a 24/7 help desk..	

Enterprise Licenses Agreements (formerly Microsoft) – Fee for Service Activity - \$98.639 million

Description of Service: This service allows Components to leverage DHS buying power by consolidating license requirements into a single enterprise-wide procurement. The activity further helps to decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office specific software or hardware licenses to larger enterprise licenses for common services. The four existing WCF ELAs are:

Microsoft: In the spirit of the Federal Acquisition Streamlining Act (FASA), DHS and Dell Marketing, L.P. decided to re-enter into a single Blanket Purchase Agreement (BPA) for a DHS-wide Microsoft Enterprise License Agreement to standardize office automation and communication applications across the Component agencies’ existing IT environments. The account provides for the funding and management of the Microsoft Enterprise Agreement awarded in June 2009, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This license agreement is utilized by all of DHS and this budget request reflects the contractual obligations of each of the Components.

Adobe: The Secretary's Efficiency Review Board tasked the OCIO with establishing an Adobe Enterprise License Blanket Purchase Agreement (Adobe BPA) to provide DHS desktops and servers with the suite of Adobe products. The Adobe BPA reduces costs, eliminates inconsistent licensing, takes advantage of economies of scale to ensure the best pricing and streamlines the procedures required to procure all Adobe licenses for the Department. The Adobe BPA includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

Oracle: DHS negotiated a BPA for Oracle software products and miscellaneous services associated with Oracle software. The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase Oracle program licenses, technical support services and training, as well as level-set all existing maintenance, at the most competitive pricing available. The terms of the BPA also allow for the transfer of all existing Oracle licenses owned by DHS to the new BPA. The Department-wide vehicle not only allows for the timely, renewal of software maintenance for the Department's (110,000+) Oracle licenses, but also allows for the purchase of additional software, software licenses, and software-associated products and services by Components when needed (and at greatly reduced prices) between consolidated purchase cycles.

Symantec: DHS negotiated a maintenance-only BPA for Symantec maintenance coverage for all DHS Components. The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase Symantec software maintenance, technical support services and training, as well as level-set all existing maintenance, through co-termination of existing contracts, at the most competitive pricing available.

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The annual costs are based on the total number of existing licenses multiplied by the pre-negotiated cost of licenses plus an administrative fee.

Full Time Equivalent (FTE): This activity requires 3 FTE.

PROCUREMENT ACTIVITIES

FY 2012 Activity Funding (\$thousands) \$71,902	FY 2013 Activity Funding (\$thousands) \$71,902	FY 2014 Activity Request (\$thousands) \$98,639
DHS - Enterprise License Agreement (ELA)	The Enterprise License Agreement (ELA) service allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office specific software or hardware licenses to larger enterprise licenses for common services.	

Office of Procurement Operations – Fee for Service Activity - \$45.823 million

Description of Service: The DHS Office of Procurement Operations (OPO) provides full service acquisition support to OSEM, USM, S&T, USCIS, NPPD, OHA, OIG, A&O, DNDO and USVISIT. This includes the range of activities from acquisition planning and awarding to contract administration. In addition, OPO provides acquisition management services for Department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS that promotes cost savings and small business participation. OPO support provides quality control to improve submission of acquisition documents, partnering with programs for identify and improve advance acquisition planning, hiring and training of personnel to achieve and maintain certification, execution of contracting and acquisition management through improved lead times by using integrated project teams

Managing Office: Office of the Chief Procurement Officer

Cost Allocation Methodology: Each customer is charged for the direct costs of their respective support division as well as a proportion of indirect and administrative costs. In the case of the Department Operations Acquisition Division (DOAD), the full cost is further disaggregated and charged to each of its 15 customers according to their respective percentage of DOAD's total procurements.

Full Time Equivalent (FTE): This activity requires 246 FTE.

Enterprise Data Center Consolidation - Migration – Fee for Service Activity - \$54.200 million

Description of Service: The Enterprise Data Center activity will continue to use the WCF as the mechanism to pool appropriated data center migration funds to move Component systems and applications to the two DHS Enterprise Data Centers (EDCs) for central DHS management. This includes: discovery, migration planning, and scheduling activities, as well as the first 90 days of Operations and Maintenance (O&M) costs specifically related to systems/applications that will transition to the DHS Data Centers.

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: Funding for this activity is requested in accordance with the approved Data Center Migration schedule. Migration allocations are determined by the costs, as estimated by the Components, to physically relocate the application/system from the legacy data center to one or both of the DHS Enterprise Data Centers (EDCs).

Full Time Equivalent (FTE): This activity requires 0 FTE.

**Enterprise Data Center – Operations and Maintenance (O&M) – Fee for Service Activity
\$204.622 million**

Description of Service: The Data Center Consolidation – O&M activity, as approved by the WCF Governance Board for FY 2013, will add collection of Component post-migration O&M and enterprise occupancy payments beyond the first 90 days. This is a cost transfer of Component payments

currently made to their legacy data centers. The activity will also reposition into the WCF the collection of current reimbursable Enterprise Data Center (EDC) Component O&M and associated enterprise occupancy payments. The funding includes services purchased based on the volume and type of service level purchased by the Components from the Managed Service Providers (MSPs) and services for activities performed within the Office of the Chief Information Officer (OCIO) Information Technology Services Office (ITSO) such as security related and management support activities.

The WCF will allow DHS to act as a single bill payer to the Data Center service providers, will reduce necessary procurement activities, and will allow for greater transparency and more effective management of the goods and services being provided to the Department. By allowing for the central management of the contracts between Data Center providers, the Data Center Consolidation – O&M activity enables Components to focus their resources on their missions, rather than contracting and administrative support for acquiring data center services.

Managing Office: Office of the Chief Information Officer (CIO)

Cost Allocation Methodology: Service costs that are directly benefiting a particular Component, such as O&M costs, are 100 percent billable to Components. Enterprise costs consist of EDC facility, enterprise, security, and ITSO management costs, thus a portion of these costs are allocated to all benefiting Components. All enterprise costs are allocated on the basis of rack occupancy.

Full Time Equivalent (FTE): This activity requires 34 FTE.

Environmental Planning & Historic Preservation Decision Support System – Fee for Service Activity - \$0.445 million

Description of Service: The Office of the Chief Readiness Support Officer (OCRSO) will provide a centralized computerized system to conduct environmental reviews of components and DHS HQ proposed actions in accordance with the National Environmental Protection Act. OCRSO will provide this service on a reimbursable basis to all components and DHS HQ elements.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Cost Allocation Methodology:

The cost is allocated to Components based on the total activity cost divided by the number of Components using the system, including operations and maintenance, plus individual charges for each usage.

Full Time Equivalent (FTE): Activity requires 1 FTE.

HSPD-12 Infrastructure Support – Fee for Service Activity - \$21.915 million

Description of Service: HSPD-12 Infrastructure Support, through the Identity Management Division (IMD) of the Chief Security Officer, is a central headquarters program that is charged with managing HSPD-12 implementation across DHS through the issuance of a secure and reliable form of

identification for its workforce, employees, and contractors located within an estimated 16,000 DHS facilities and sites. The IMD will provide the necessary guidance and tools to facilitate this Department-wide program, creating a unified approach and solution.

The IMD business activity supports DHS with services and technology to establish the DHS HSPD-12 infrastructure and issue credentials in the following areas:

- Identity Management System (IDMS)
- Card Management System (CMS)
- Enrollment and Card Issuance Work Stations (EIWS) including printers and work station consumables
- DHS Personal Identity Verification (PIV) Card Stock including Security Printing and laminate
- Installation and Maintenance of the EIWS
- Hosting, Backup, Disaster Recovery, and Test Environment Server Support
- Certification and Accreditation (C&A) Support
- Operations and Maintenance (O&M) Support including Service Support/Help Desk
- Appointment Scheduling Hosting and Support
- Onsite Training Support
- DHS Authoritative Databases Interface and Support
- Open Interfaces/Modules for HSPD-12/DHS IDMS and CMS
- Public Key Infrastructure (PKI) Certificates

These services have been and are currently provided for all DHS users of the Identity Management System. In addition, the IMD business activity coordinates the card issuance functions at 322 DHS PIV Card Issuance Facilities nationwide, HSPD-12 technology evaluation for future DHS use, continuous project management support for the deployment of EIWS to 1,049 DHS facilities/sites nationwide, vendor management and oversight of existing contracts, as well as budget and financial management.

The services have been provided to customers by a cadre of Government personnel and Federal contractors. Since the standing up of HSPD-12, IMD Government personnel have primarily provided executive direction, planning, oversight and only in some instances direct service to end users. Federal contractors have provided technical and EIWS support to end users through contracts that are acquired, monitored, and managed by the IMD.

Managing Office: Office of the Chief Security Officer (OCSO)

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

1. Number of Federal and Contractor employees within each Component at the beginning of the fiscal year
2. Sum of all costs associated with the DHS PIV Card Program supporting Components
3. Percentage of Component identities compared to the DHS' total identities

Full Time Equivalent (FTE): The activity currently requires 9 FTE.

PROCUREMENT ACTIVITIES

FY 2012 Activity Funding (\$thousands) \$1.358 ¹	FY 2013 Activity Funding (\$thousands) \$535	FY 2014 Activity Request (\$thousands) \$21,915
DHS - Homeland Security Presidential Directive (HSPD-12)	<p>On August 27, 2004, the President signed HSPD-12 Policy for a Common Identification Standard for Federal Employees and Contractors (the Directive). The Directive requires the development and agency implementation of a mandatory, government-wide standard for secure and reliable forms of identification for Federal employees and contractors. HSPD-12 requires a secure and reliable form of identification that is: a) issued based on sound criteria for verifying an individual employee’s identity; b) resistant to identify fraud, tampering, counterfeiting, and terrorist exploitation; c) can be rapidly authenticated electronically: and, d) is issued only by providers whose reliability has been established by an official accreditation process. To comply with HSPD-12, DHS has developed an Identity Management System (IDMS) for issuing credentials that meet the requirements in accordance with National Institute of Standards and Technology (NIST) Federal Information Processing Standards 201-1.</p> <p>HSPD-12 addresses a capability gap by providing a strong and more assured identity management, via biometrics and secure and reliable forms of personal identification to achieve the Department’s security objectives. In FY13, HSPD12 will incrementally establish 100 PIV Card Issuance Facilities (PCIF) across DHS to issuance DHS PIV Cards to DHS employees and contractors.</p>	

¹HSPD-12 is a new activity in FY14 within the WCF. FY12 and FY13 represent appropriated funding to OCSO.

Mail Service – (Fee for Service): - \$17.438 million

Description of Service: The Mail Service operates a Consolidated Remote Delivery Site (CRDS) for receiving, screening, processing, courier servicing, and delivery of safe mail to DHS Headquarters and Component HQ facilities in the National Capital Region (NCR). With the exception of the United States Secret Service (USSS), all DHS Components currently participate in the CRDS mail shared service support activity.

The CRDS currently receives and screens approximately 1.5 million pieces of inbound mail and delivers it to nearly 100 DHS mail delivery locations within the NCR. It processes over 8 million pieces of outbound mail and provides over 6,000 trips of courier services. The CRDS is also supported by an Inter-Agency Agreement with DHS Office of Health Affairs for biological detection services.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on several factors, such as the volume of mail delivered, the number of mail stops that receive mail, the number of locations with mail delivery, onsite customer service support, the number of courier services, and the cost of screening incoming mail for safety and security threats.

Full Time Equivalent (FTE): This activity requires 2 FTE.

Parking Service – (Fee for Service): - \$1.203 million

Description of Service: The Parking Service is available to DHS HQs employees based on space availability, parking need accessibility under American Disability Act (ADA); employee's position; employee's required working hours; and funding approval from Office/Directorate. Permit types in order of priority are: Law Enforcement vehicles; official government vehicles (owned, leased, or rented); handicapped employees; executive parking; unusual work hours; and carpool/vanpool. There are currently ten commercial parking garages providing over 300 parking spaces, one government-run parking garage providing 37 parking spaces, and one parking lot of 1,197 spaces.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the number of spaces utilized.

Full Time Equivalent (FTE): This activity requires 1 FTE

Executive Sedan Service – (Fee for Service): - \$1.743 million

Description of Service: The Executive Sedan Service provides transportation for authorized senior officials who travel between various locations during the course of official Government duties. It allows senior officials to conduct official business while in transit, which may not be possible on Metro or in taxicabs.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on participant usage.

Full Time Equivalent (FTE): This activity requires 2 FTE

Shuttle Service – (Fee for Service): \$6.429 million

Description of Service: The Shuttle Service provides a safe and effective means of transporting employees between DHS buildings throughout the National Capital Region (NCR). The services consists of eight (8) scheduled routes supported by 20-25 passenger buses and is limited to the conduct of official business.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percentage of population located on a shuttle route.

Full Time Equivalent (FTE): This activity requires 1 FTE.

Transit Subsidy – (Fee for Service): \$5.597 million

Description of Service: The Transit Subsidy Program encourages Federal employees to commute to work via public transportation. This program provides a subsidy to all eligible Federal employees who commute to and from work on a regular basis using rapid transit, public or commuter buses, commuter rail, incorporated vanpools, or any combination of the above. This helps reduce petroleum consumption, traffic congestion, and air pollution by taking vehicles off the road that are otherwise used in daily commuting.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on participant usage.

Full Time Equivalent (FTE): This activity requires 2 FTE.

DHS Faculty at National Defense University (NDU) – (Fee-For-Service Activity) - \$0.856 million

Description of Service: DHS faculty at the National Defense University (NDU) design, develop, and lead homeland security-related courses and events. The faculty arrange for an array of expert speakers from various homeland security areas to visit NDU as guest speakers. DHS faculty also lead an array of domestic and international trips and studies related to homeland security missions and concerns. In addition, DHS faculty serves as advisors/mentors to all DHS employees who are enrolled as Master's Degree candidates each year. In exchange, under the terms of a Memorandum of Understanding, DHS is able to select approximately 20 individuals each year to attend a war college. Employees are selected for specific Colleges by an independent DHS selection panel that utilizes a matching process based upon the panel's review of the employees' academic qualifications, work experiences and the needs of the Department.

The five colleges are the College of International Security Affairs (CISA), Industrial College of the Armed Forces (ICAF), Information Resources Management College (iCollege), Joint Forces Staff College (JFSC), and National War College (NWC). NDU has also developed a program at the John F. Kennedy Special Warfare Center and School in Ft. Bragg, NC. The diversity in campuses allows the University to offer a variety of master's degrees, graduate certificates, and continuing education programs. Unlike private colleges and universities these degree and certificate programs can be tailored to address the varied homeland security mission requirements of DHS. The program enhances DHS' strategic leadership and decision making in national, homeland and international security.

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- One reserved slot for each operational component, NPPD, and HQ, for a total of 9 reserved slots at \$45K (for FY14).
- Costs for the remaining 11 slots are allocated based on each components percentage of employees eligible to attend any of the colleges support by the program. Eligible participants are GS-14 and GS-15 employees and TSA equivalents.

Full Time Equivalent (FTE): This activity requires 4 FTE.

CURRENT SERVICES PROGRAM DESCRIPTION:

Interagency Council Funding - Government-wide Service activity - \$0.834 million

Description of Service: GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- Chief Financial Officers (CFO) Council funding supports the following activities:
 - Federal Audit Clearing House (FAC) - Disseminates audit information to Federal agencies and the public, supports OMB oversight and assessment of Federal award audit requirements, and assists Federal cognizant and oversight agencies in obtaining OMB Circular A-133 data and reporting packages.
 - Grants Streamlining – Implements P. L. 106-107, the Federal Financial Assistance Management Improvement Act of 1999. It also proposes a standard format for Federal agency use in announcing discretionary grant and cooperative agreement funding opportunities.
- Chief Information Officers (CIO) Council funding supports the following activities:
 - A contract to support the Portfolio Management Office for the ongoing e-government initiatives efforts.
 - Federal Enterprise Architecture (FEA) —identifies and develops collaboration and consolidation opportunities across Federal agencies.

- Federal Acquisition Council (FAC) funding supports the following activities:
 - The Federal Competitive Sourcing Database (FCSD) facilitates comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
 - Acquisition Workforce Competency Development and Training - Funds the Acquisition Career Management Information System (ACMIS) database which provides workforce training data and OPM data to make strategic workforce decisions that affect the agency's training and certification requirements.
 - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
 - The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB's Office of Federal Procurement Policy to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of government-wide contracts.
 - Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services.

- Chief Human Capital Officers Council (CHCO) funding supports the following activity:
 - CHCO website - Provides a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system provides a forum for the exchange of information among members of the Council in both a public and private manner.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding) divided by DHS's total adjusted budget multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

USAJOBS (formerly Recruitment One-Stop) -Government-wide Service activity – 1.080 million

Description of Service: The USAJOBS initiative is a government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333 and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies in order to pay the cost of providing Federal employment information and services.

USAJOBS delivers state-of-the-art on-line recruitment services to job seekers, simplifying the process of locating and applying for Federal jobs. It delivers a number of job seeker focused features including

intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility.

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percentage of each component's FTE divided by DHS' total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Training – Government-wide Service Activity - \$10.789 million

Description of Service: e-Training provides an enterprise approach to leveraging technology to support learning and development programs, initiatives, and capabilities. This includes an enterprise architecture approach to the modernization and reduction in complexity of DHS Learning Management Systems (LMS'), building enhanced capability through tools such as web conferencing, and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books. Government-wide accomplishments derived from this activity are:

- Centralized procurement of primary DHS LMS' in use, providing greater visibility to CFO's, CIO's, and all DHS management regarding costs
- Consistent, standardized delivery of all legislatively mandated training to all DHS employees (and contractors where appropriate), launched IT security courses mapped to the Government Information Security Reform Act (GISRA) and The National Institute of Standards and Technology requirements
- Providing 21st Century approach to training in critical areas such as Emergency Medical Technician training by assisting in the coordination of DHS Modeling and Simulation activity relating to training
- Compliance with OPM and OMB requirements for reporting Enterprise Human Resources Integration (EHRI) training data for all DHS Federal civilian employees

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percentage of each component's FTE divided by DHS' total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 7 FTE.

Enterprise Human Resources Integration – Government-wide Service Activity - \$2.831 million

Description of Service: EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and managers access human resource information and the way all Federal employees access their personnel file information. EHRI is in the process of replacing the current paper based Official Personnel Folder (OPF) with an electronic employee record for all executive branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI provides HR managers and specialists with powerful workforce analytic and planning capabilities.

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Costs for products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency.
- Charges are based on distributing total EHRI costs to all clients on the basis of the number of Official Personnel Folder's or on the basis of actual cost, depending on the service.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Rulemaking – Government-wide Service Activity - \$0.508 million

Description of Service: e-Rulemaking is a collaborative, interagency activity designed to establish a function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering functionality such as one-stop access, search capabilities, and public commenting. e-Rulemaking activities include:

- Expanding public understanding of the rulemaking process
- Improving the quality of Federal rulemaking decisions
- Increasing the amount, breadth, and ease of citizen and intergovernmental participation in rulemaking
- Administering Regulations.gov, a cross-agency, front-end Web application that posts and allows comments on proposed Federal agency rules
- Writing memoranda to the President's Management Council (PMC), directing agencies to include a link to Regulations.gov on agency homepages and in the synopsis of the notice of any

regulatory action requesting public comment

- Posting the dockets for nearly 300 Federal agencies, including DHS, on EPA's online system.

Managing Partner: Environmental Protection Agency

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget (excluding grant funding) divided by DHS's total adjusted budget multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Human Resources Line of Business (HRLoB) – Government-wide Service Activity - \$.261 million

Description of Service: The Human Resources Line of Business (HR LOB) provides the Federal Government with an infrastructure to support pay-for-performance systems, modernized HR systems, and the core functionality necessary for the strategic management of human capital.

The HR LOB offers a cost-effective, standardized, and interoperable HR solution which allows Federal departments and agencies to work more efficiently and effectively, while providing managers and executives with an improved means to meeting strategic objectives. The HR LOB initiative seeks to accomplish the following four goals: 1) Improved Management, 2) Operational Efficiencies, 3) Cost Savings/Avoidance, and 4) Improved Customer Service.

By focusing on the strategic management of human capital and addressing duplicative HR systems and processes, the HR LOB initiative will enable faster decision-making and more informed policy-making capability; improved service ratio/response times and reduced cycle times; increased cost savings/avoidance through reducing duplicative software, hardware, and labor resources; and improved communication and responsiveness through enhanced quality, timeliness, accuracy and consistency.

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percent of each component's FTE divided by DHS's total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Benefits – Government-wide Service Activity - \$0.221 million

Description of Service: The e-Gov Benefits activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services, GovBenefits.gov. The site's core function is the eligibility prescreening questionnaire or "Benefit Finder." Answers to the questionnaire are used to evaluate a visitor's situation and compare it with the eligibility criteria for more than 1,000 Federally-funded benefit and assistance programs. Each program description provides citizens with the next steps to apply for any benefit program of interest.

Managing Partner: Department of Labor

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's civilian FTE divided by DHS's total civilian FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Line of Business (FMLoB) – Government-wide Service Activity - \$0.187 million

Description of Service: The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB's current objective is to improve the cost, quality, and performance of financial management reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding), divided by DHS' adjusted total budget and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Geospatial Line of Business (LoB) – Government-wide Service Activity - \$0.225 million

Description of Service: The Geospatial LoB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial LoB will result

in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

Managing Partner: Department of Interior

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding) divided by DHS's adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Budget Formulation and Execution Line of Business (BFELoB) – Government-wide Service Activity - \$0.105 million

Description of Service: The focus of the Budget Formulation and Execution Line of Business (BFELoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFELoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

Managing Partner: Department of Education

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget (excluding grant funding) divided by DHS's adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment – Government-wide Service Activity - \$1.727 million

Description of Service: The e-Gov Integrated Acquisition Environment (IAE) is a Presidential e-Government initiative managed by GSA. IAE supports and automates the procurement process through the use of shared systems which are required by regulation.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Procurement Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each component's number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Disaster Management – Government-wide Service Activity - \$12.200 million

Description of Service: The Federal Emergency Management Agency (FEMA) has developed a Public Web Strategic Plan that focuses on achieving greater cost efficiencies, improving ease of access to key disaster preparedness and assistance information for the American public, and instituting an agency wide, web-centric culture for information sharing and collaboration. The focus of the Disaster Management (DM) Program supports this plan by ensuring that the information that is relevant to disaster survivors, the general public and the emergency management community is organized and presented in a manner that engages and improves the overall user experience. Adopting a new up-to-date content management system (CMS), consolidating websites, centralizing operational and maintenance costs, and standardizing the way information is presented are key goals of the plan. The end result is to make the public web presence for FEMA a primary medium for information exchange in a manner that is cost effective, easier for all to use and maintain, and which has a much greater range of capabilities, including Web 2.0 functionality, all of which will help instill an internal web-centric culture within the programs across the agency.

Managing Partner: Federal Emergency Management Agency

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in disaster management divided by the total sum of all Component levels of participation in disaster management multiplied by the total estimated cost of the activity. Levels of participation are determined by measuring a Component's active participation in 16 sixteen elements of disaster management, as defined by Disaster Management e-Government Initiative Program Office within FEMA. The 16 elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The 16 elements are the cost drivers for each component's assessment and because many Components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment Loans And Grants– Government-wide Service Activity - \$0.221 million

Description of Service: The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to "ensure the existence and operation of a single searchable website, accessible by the public at no cost that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Some contracts (and some grants) already require Data Universal Numbering System (DUNS) numbers. This will allow those areas to feed information into the FFATA portal.

Managing Partner: General Services Administration
Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE, divided by DHS' total FTE and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Integrated Financial Assistance Environment – (Government-wide Service Activity) – \$0.377 million

Description of Service: The e-Integrated Financial Assistance Environment Activity is a collaborative, interagency activity designed to establish common, automated, and integrated approaches to managing the Federal government's financial assistance function. The activity combines government-wide financial assistance systems, i.e., USA spending, Grants.gov, and the Federal Audit Clearinghouse System (FACS), at the various departments and agencies and is centrally managed by OMB through assignment of each system to an agency for day to day operations. Grants.gov creates a single portal for all Federal financial grant and cooperative agreement program applicants to find and apply for funding on-line. This provides electronic functionality for applicants while reducing paper-based processes that previously challenged the Federal grants and cooperative agreement program environment. FACS is the government-wide repository into which independent auditors post the annual OMB Circular A-133 Audits of federal financial assistance (FA) awardees for subsequent retrieval by federal agencies. USA spending is the site where all Federal award data is posted per the requirements set forth the Federal Financial Accountability and Transparency Act.

This activity is designed to reduce inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to implement streamlining activities developed by the OMB lead Committee for Financial Assistance Reform (COFAR) on which DHS is one of the eight primary funding agencies represented.

Managing Partners: Grants.gov: Department of Health and Human Services; USAspending.gov: OMB; and FACS: Commerce Department, Census Bureau Development

Managing Office: Office of the Chief Financial Officer (OCFO), Financial Assistance Policy and Oversight (FAPO)

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on systems' usage plus a base fee when appropriate.

Full Time Equivalent (FTE): This activity requires 0 FTE.

**Department of Homeland Security
Working Capital Fund
DHS Cross Cutting Activities
Program Performance Justification**
(Dollars in Thousands)

PPA: DHS Cross Cutting Activities

	Perm. Pos	FTE	Amount
2012 Revised Enacted	2	2	16,384
2014 Adjustments-to-Base	2	2	(1,865)
2014 Current Services	4	4	14,519
2014 Program Change	3	3	-
2014 Total Request	7	7	14,519
Total Change 2012 to 2014	5	5	(1,865)

The Working Capital Fund requests \$14.519 million and 7 FTE for DHS Cross-Cutting Activities in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

Capital Planning And Investment Control (CPIC) – DHS Crosscutting Activity- \$7.312 million

Description of Service: The Capital Planning and Investment Control (CPIC) process is a DHS Secretary’s Crosscutting Activity and is required to comply with budget preparation guidance provided by OMB Circular A-11 and management guidance provided by OMB Circular A-130. Policy direction and process for DHS is provided by Management Directive 102 – Acquisition Management and Management Directive 1330 on Planning Programming, Budgeting and Execution (PPBE). This Activity provides services to support these efforts, including automated tools to assist with portfolio analyses, document preparation, and document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality. It supports the Project Management Offices in preparing decision packages for DHS investment review boards at key acquisition decision points in their projects’ life cycle. CPIC is also the central point for the Department’s response to OMB initiatives and priorities on investment management, currently focusing on such Control Phase areas as consolidation, earned value management, and periodic project review.

Managing Office: Office of the Chief Information Officer

Cost Allocation Methodology: The Component’s cost allocation methodology is the number of Component Exhibits 300 divided by the total DHS Exhibits 300 minus the Contribution percentage of

a Component. It is then multiplied by the total Cost of the CPIC activity.(Consolidated 300's will be distributed back to Components based on actual contribution shares).

Full Time Equivalent (FTE): This activity requires 0 FTE.

Strategic Sourcing – DHS Crosscutting Activity - \$1.979 million

Description of Service: The Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. The SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

Managing Office: Office of the Chief Procurement Officer

Cost Allocation Methodology: Assessments are allocated to Components proportional to the average of the following two factors: (1) savings on DHS-wide contract vehicles and (2) spend excluding simplified acquisition (less than \$150,000, as defined in Federal Acquisition Regulations Part 2.101) spend. Data from Federal Procurement Data System-Next Generation is used to determine savings and spend by Component.

Full Time Equivalent (FTE): This activity requires 7 FTE.

CPO Shared Reporting – DHS Crosscutting Activity - \$5.228 million

Description of Services: The CPO Shared Reporting activity provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and consistency.

Managing Office: Office of the Chief Procurement Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each Component's number of procurement transactions, dollar value of procurement transactions, and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

**Department of Homeland Security
Working Capital Fund
Working Capital Fund Management Activity
Program Performance Justification**
(Dollars in Thousands)

PPA: Working Capital Fund Management Activity

	Perm. Pos	FTE	Amount
2012 Revised Enacted	8	8	1,316
2014 Adjustments-to-Base	-	-	(55)
2014 Current Services	8	8	1,261
2014 Total Request	8	8	1,261
Total Change 2012 to 2014	-	-	(55)

The Working Capital Fund requests \$1.261 million and 8 FTE for this activity in FY 2014.

CURRENT SERVICES PROGRAM DESCRIPTION:

Working Capital Fund Operations – WCF Management Activity - \$1.261 million

Description of Service: The Working Capital Fund Operations office manages the WCF and provides policy, procedures, budget formulation, execution and customer dispute resolution services. The office provides services to the activity managers as well as customer Components across DHS.

Budget Formulation Services:

- Oversee budgets and perform or direct financial management duties and responsibilities.
- Provide direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF.
- In coordination with the Director of Financial Operations, make recommendations on operating plans, rate structures, and activities to be supported by the fund.

Budget Execution Services:

- Review financial reports for conformance with program and financial plans, and inform senior management and program officials of trends and changes.

Managing Office: Office of the Chief Financial Officer

Cost Allocation Methodology: The cost allocation methodology for this activity is the pro rata share based on the percentage of each components WCF assessment amount divided by the total WCF assessment multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 8 FTE.

IV. Program Justification Changes

**Department of Homeland Security
Working Capital Fund
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: GSA Rent
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$70,282

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							5	5	79,586
Program Increase							-	-	70,282
Total Request	5	5	84,169	-	-	-	5	5	149,868

Description of Item

The General Services Administration (GSA) provides workspace and related services for over 100 Federal client agencies serving more than one million workers through the Public Buildings Service (PBS). GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA's Computer Integrated Facility Management Program uses cutting edge technology to look at the buildings life cycle. Real estate services provided to clients appear in Federal agencies monthly electronic rent bills.

The Department has established a clearing account to expedite the payment of WCF GSA rent billings for DHS headquarters offices, excluding the Components such as CBP, ICE, TSA, FEMA, CIS, and USSS, which pay their rent expenses directly to GSA. The monthly WCF bills include all GSA-controlled space that the Department headquarters occupies, including parking spaces allotted to the Department.

Justification

In FY 2014, a \$70.282 million increase is requested for this activity primarily due to the incorporation of USCG as a new customer into the WCF Rent activity. USCG will be moving into St. Elizabeths and their 1,105,246 sq. ft. headquarters location will be added under the WCF for a total rent cost of \$56.5 million.

To support USCG's move to St. Elizabeths, additional space will be coming online in Departmental Operations Center A (DOC A) which will increase rent for a total of \$5.5 million.

Additional changes to the WCF include the addition of one new customer and two new locations. The Federal Protective Services, (FPS) under the National Protection and Programs Directorate (NPPD) will become a new customer with the addition of 37,474 sq. ft. for their headquarters location at 800 N Capital St for a total rent cost of \$2.3 million. Also, a new training center will be operational and will be occupied by I&A, CHCO and CPO increasing the rent portfolio by \$2.2 million. Similarly, the Office of the General Counsel (OGC) will add 6,284 sq. ft. to the WCF Rent portfolio with their move to a space located at 999 N Capital Street, adding \$0.317 million in rent costs.

Nominal increases in FY 2014 for square footage occupied and inflationary increases in rent equate to increases in the WCF Rent portfolio totaling \$3.46 million.

Impact on Performance

The requested amount is necessary to cover obligations to GSA and FPS.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: HCBS-Payroll Services
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$727

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							21	21	7,897
Program Increase							-	-	727
Total Request	24	24	7,809	-	-	-	21	21	8,624

Description of Item

This WCF activity provides funding for operations support FTE for enterprise systems, as well as operations and maintenance (O&M) for deployed systems (not including those covered via OPM IAAs or under the NFC umbrella). In FY 2014, HCBS will include O&M for the Personnel Accountability System (PAS) provided via IAA with FEMA, licenses for the WebTA time and attendance application, the HRIT Enterprise Integration Environment (EIE), and other enterprise HR services and applications.

Justification

In FY 2014, an increase of \$0.727 million is requested to expand the portfolio to include O&M for the Personnel Accountability System (PAS) which was introduced as a new activity in the FY 2013 Budget. The Office of the Chief Human Capital Officer (OCHCO) performed a Requirements Analysis and an Analysis of Alternatives that evaluated several automated systems. OCHCO selected FEMA’s Emergency Notification System (FEMA ENS) as the automated system to provide the required accountability functionality for all of DHS. While the final four automated systems considered were all capable of meeting the Federal Continuity Directive (FCD-1) and DHS’ requirements, the FEMA ENS is currently operated and maintained within the DHS infrastructure, thus increasing the Department’s ability to ensure accountability service and reliable data availability during an emergency.

FEMA ENS has been operating for 10 years and is currently used by six Components for emergency notifications. It will concurrently implement the FCD-1 and DHS Enterprise -wide requirements for personnel accountability. Additionally, the Department will be the system’s sole personnel accountability customer, thus ensuring consistency in personnel data gathering, status information, and the lowest risk to guaranteed service. The current FEMA ENS will be enhanced, through the

acquisition of an additional module (Global Alert Link), to provide the additional capability needed to provide a uniformed DHS-wide Personnel Accountability System (DHS PAS).

The Statutory requirements for PAS are:

- National Security and Presidential Directive-51/Homeland Security Presidential Directive-20 (May 2007)
- National Continuity Policy Implementation Plan (August 2007)
- Federal Continuity Directive 1 (FCD-1). This directive provides specific direction to the Executive Branch of the Federal Government for developing continuity programs and plans.

Impact on Performance

The requested funding level will allow HCBS to continuously deliver Enterprise-wide support and solutions to meet the requirements of its customers. With the inclusion of PAS, the Department will be able to meet the standards required of all Executive branch departments and agencies under the 2008 FCD-1.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Infrastructure Transformation Program
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$16,398

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012

Current Services Level							17	17	53,202
Program Increase							-	-	16,398
Total Request	10	10	52,649	-	-	-	17	17	69,600

Description of Item

The Infrastructure Transformation Program (ITP) is a group of interrelated initiatives designed to improve the Department's Information Technology (IT) infrastructure by unifying disparate Component information technology networks, platforms, and services into a set of Enterprise-wide IT services. The program implements the DHS Chief Information Officer's (CIO) vision of "One Infrastructure, serving as the foundation for information sharing and agile responses to threats against the homeland. ITP was chartered by the Deputy Secretary in 2005 as a DHS Level 1 investment with the following project domain initiatives included in the scope of the transformation effort: Network Services; Security Services; Hosting Capabilities; Email Services; Data Center; Wireless; Desktop Services; Identity, Credential and Access Management (ICAM) Services; Help Desk Services; Site Services; Video Services; Voice Services; and Core Support such as Wide Area Network (WAN) Design, Engineering, Troubleshooting Services; Traffic Modeling and Data Analysis to support capacity management; Internet Protocol (IP) Address Administration; Network Configuration Management and Change Management; Access Controls, including firewalls and routers.

ITP WCF supports DHS Enterprise-wide IT infrastructure O&M activities for Network Services (OneNet). OneNet centralizes wide area networks, network and security operations centers, and serves the mission to create a robust, reliable, scalable, secure, survivable, and cost effective infrastructure to support Components across DHS. OneNet is the foundation for DHS's Information Sharing Environment (ISE) and provides the means by which information can be disseminated across all DHS Components and Federal, State, local, and tribal partners. Secure information sharing across the Department is the key to successful integration of mission operations.

The Trusted Internet Connections (TIC) and Policy Enforcement Points (PEP) are centralized OneNet services that facilitate information sharing while preserving the specific Component security policies

and requirements, further strengthening information sharing and security capabilities across the DHS IT Enterprise.

Justification

The FY 2014 request includes a program increase of \$16.4M million to manage the TIC and PEP initiatives for the Department. The TIC initiative is the first of the President's Comprehensive National Cyber Security initiatives (HSPD-12/NSPD-54) and is mandated by OMB with policy and oversight provided by the NPPD Federal Network Security Division. The initiative is aimed at optimizing individual agency network services into a common solution for the Federal Government. The TIC at the two Enterprise Data Centers (EDCs) provides security controls across four services: Internet, Virtual Private Network (VPN), Extranet, and Application hosting that meet or exceed Trusted Internet Connection Access Provider (TICAP) standards.

The concept of OneNet is to provide network segmentation between Components to protect the various categories of controlled unclassified and classified information. To encourage an enterprise network solution throughout, PEPs were established to protect the information, while allowing for the sharing of services and information across Components. PEPs are a control point in the DHS network used to enforce policies, and monitor, capture, and playback network traffic. This reduces vulnerability and improves system access and implementation of information sharing policies across the Department through centralized change management.

COMPONENT	PEP	TIC	NOC	SOC	HOSTING CAPABILITY	CORE BACKBONE SUPPORT	OVERHEAD	TOTAL

U.S. Citizenship & Immigration Services	1,233	1,099	1,461	2,050	641	1,365	449	8,298
U.S. Secret Service	330	294	391	549	171	364	121	2,220
MGT - Chief Information Officer	541	482	641	899	282	598	197	3,640
TOTAL	10,340	9,217	12,260	17,196	5,382	11,440	3,765	69,600

Impact on Performance

DHS has already begun migrating DHS Components behind TICs and administrating PEPs. These two services further strengthen the information sharing capability at all security levels of the DHS IT Enterprise and enables the Department to overcome technical barriers to a broad range of information sharing. Establishment and implementation of data security policies through technical solutions allows the Department to establish trust between user communities ensuring appropriate protection of data resources. PEPs allow systems access and information sharing policies to be implemented quickly and consistently across the Department via role-based user access to data resources. This reduces vulnerability and improves security within the Department.

Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: NCR Infrastructure Operations
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$48,923

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							73	73	135,854
Program Increase							-	-	48,923
Total Request	30	30	134,870	-	-	-	73	73	184,777

Description of Item

The National Capital Region Infrastructure Operations (NCRIO) services the DHS Headquarters' and Component users with network, email, internet, intranet, telecom infrastructure, all end-user desktop computing, telecommunications, and wireless services. The OCIO's IT Services Office (ITSO) coordinates the management and deployment of infrastructure resources along with the infrastructure build-out of new facilities and provides continuous IT operations, service desk, vendor management, financial management, and technology evaluation.

Justification

The DHS NCRIO will incur a cost increase of \$48.9 million in FY 2014. The NCRIO currently has the approval from the Working Capital Fund Governance Board (WCFGB) to deliver IT infrastructure services to DHS HQ Components and St. Elizabeths tenants accessing the DHS HQ unclassified network (ALAN) and to all DHS Components accessing the top secret network (CLAN). An increase in funding authority is necessary to expand services within the NCR. The funding increase is largely due to the USCG move to the St. Elizabeths campus and the FPS transition from ICE to NPPD. Prior to FY 2013, FPS obtained IT services from ICE. Of the \$48.9 million increase, \$45.4 million is directly related to approximately 6,000 new USCG (\$27.7 million) and FPS (\$17.7 million) customers who will be provided services under the NCRIO.

In addition, the NCRIO core services customer base requires an additional \$3.5 million for C-LAN increased accounts and services. These requirements represent the total program increase of \$48.9 million in FY 2014. The increase of 6,000 new users from St Elizabeths and FPS as well as new C-LAN users necessitates procuring additional circuit bandwidth and circuit redundancy for effective continuity and sustainment of daily operations as well as increased shared file storage space capability with the data center service providers. More users and accounts require additional network

infrastructure equipment. Much of the current equipment is overextended, obsolete, and no longer supported by the vendor under a maintenance contract due to its age. More users and accounts drive the need for additional end user equipment and software, and the associated increase in service desk and end-user contractor support across the multiple DHS Headquarters and Component operational sites.

Impact on Performance

The initiatives described and the operations and maintenance of existing capabilities is necessary to achieve DHS' objective of improved IT performance and continuity of operations for system users. DHS cannot properly operate and achieve its mission without reliable and consistent information technology and telecommunication services. The services required by DHS Components must be both predicable and uninterrupted, even in times of natural disaster or during a catastrophic national event.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: Enterprise Licenses Agreements
PPA: Fee for Service Activity
Program Increase: Positions 1, FTE 1, Dollars \$26,014

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	72,625
Program Increase							1	1	26,014
Total Request	2	2	71,902	-	-	-	3	3	98,639

Description of Item

The Enterprise License Agreement (ELA) service allows Components to consolidate license requirements into a single Enterprise-wide procurement to leverage DHS buying power. Historically, the ELA Working Capital Fund (WCF) provided funding and management for the Microsoft ELA only. In FY 2014, this activity will expand to include additional ELAs as the agreements are developed, including Adobe, Oracle, Symantec, and other miscellaneous enterprise license agreements.

Justification

The FY 2014 request includes an increase of 1 FTE, 1 position and \$26.014 million for the ELA program. The increase supports the expansion of the current ELA suite to include Adobe, Symantec and Oracle licenses. Adobe, Symantec, and Oracle licenses will require \$7.0 million, \$9.4 million, and \$9.6 million, respectively for maintenance cost on current software and support services; maintenance cost on software products and miscellaneous services; and maintenance cost on the software license agreement renewal and support services.

The products include the software needed for individual desktops and laptops, as well as server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. The expansion of the existing WCF enables the Department to:

- Achieve the Federal Acquisition Streamlining Act (FASA) strategic goals and ensure a centralized funding and tracking mechanism for Department-wide software licenses.
- Create a WCF activity for ELAs that allows DHS to reduce the time and resources required to procure multiple license maintenance plans across the Department with multiple periods of performance.

- Negotiate more aggressive pricing on the purchase of software licenses and maintenance plans by leveraging the buying power of all DHS Components' software spend across the Department.

The software included in the ELA activity is used by all of DHS and reflects the contractual obligations of each Component. In addition, future expansion of this WCF activity will include other enterprise software and hardware license agreements.

Impact on Performance

Funding this program through the WCF will enhance OCIO's ability to service users, gain efficiencies of scale, further achieve cost savings, and maintain information sharing across DHS. The requested ELA activity will fulfill the FASA requirements for simplified procurement procedures that facilitate reliance of Commercial off the Shelf technology.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Data Center Migration
PPA: Infrastructure and Security Activities
Program Increase: Positions 0, FTE 0, Dollars \$54,200

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	54,200
Total Request	-	-	70,000	-	-	70,428	-	-	54,200

Description of Item

Data Center Migration provides funding to Components to consolidate data center environments into the two enterprise-wide DHS data centers. DHS is committed to the integration, consolidation, and the transformation of individual Component infrastructures into a more efficient and more secure world-class IT infrastructure capable of supporting the significant demands required of an organization of more than 200,000 employees.

At the completion of the migration effort, Components will relocate their existing or new applications to the two data centers occupying a number of racks in the data centers and paying for the charges associated with this occupancy. The recurring costs for operating the two enterprise-wide data centers are requested to be administered through the Enterprise Data Center – Operations & Maintenance WCF activity.

Justification

The FY 2014 request includes \$54.200M to fully complete the data center migration activities for CBP, TSA, FEMA, and USCIS. The purpose of this request is to continue execution of the planned timeline to migrate Component information systems, applications and disaster recovery facilities to the DHS Enterprise DCs. This will enable continued closures of the major Component data centers and achieve the Secretary’s goal of consolidating DHS data centers. Funding requested for OCIO would be transferred into the WCF for execution on behalf of the Components. As a result, DHS Data Center Migration activities will be transparent and centralized.

The transition to the DHS Enterprise DC architecture is standardizing IT resource acquisitions across all DHS Components, as well as streamlining the maintenance and support contracts, allowing for less complex vendor support and expediting response times during emergencies. Benefits derived from the transition to the DHS Enterprise DCs include increased security, enhanced operability, and long-term cost avoidances. DHS is placing information systems behind Trusted Internet Connections, thus removing exposure of essential functions to those that would exploit weaknesses. Migration makes technologies available as easily ordered services and provides for DHS-wide standardization.

Impact on Performance

The FY 2014 program increase supports the migration of the CBP Newington production systems, the TSA National Transportation Security Board site; the USCIS Service Centers, HQ Site, and Records/Benefits Center; and the FEMA Norwich, CT center. It enables the CIO to manage funding on IT infrastructure investment and operations and maintenance in support of the Department's front-line operations as well as assurance of meeting the DHS's contractual liabilities to the managed service providers.

Completing these migrations will eliminate further investments by the Components in legacy data centers operations, including continuity of operations, maintenance, support, security certification and accreditation. An extended migration timeline will result in concurrent costs to fund both old and new data centers while the completion of DHS Enterprise data centers reduces the number and cost of Federal data centers, associated energy costs, and physical space allocations, in concert with a transition to cloud computing. A recent study performed by the DHS Office of the Chief Financial Officer (OCFO) showed that the ten of the first completed migrations to enterprise data centers resulted in average savings of 14 percent, which is equal to \$17.4 million in savings annually.

This action also directly supports OMB's Federal Data Center Consolidation Initiative to promote the use of Green IT by reducing the overall energy and real estate footprint of government data centers; reduce the cost of data center hardware, software and operations; increase the overall IT security posture of the government; and shift IT investments to more efficient computing platforms and technologies.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 7: Enterprise Data Center O&M
PPA: Fee for Service Activity
Program Increase: Positions 34, FTE 34, Dollars \$204,622

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							34	34	204,622
Total Request	-	-	-	-	-	-	34	34	204,622

Description of Item

The Enterprise Data Center O&M is a new program in the WCF in FY 2014. Consistent with the Federal Data Center Consolidation Initiative, DHS Components are mandated to transition all systems and applications into two DHS Enterprise Data Centers (EDCs). In prior years, the Data Center Migration funds appropriated to DHS were directed to system and application migration, closure of targeted legacy data centers, and related activities including discovery and migration planning. The funds are collected in the WCF for centralized management and transparency.

The Office of the Chief Information Officer (OCIO) has historically funded the construction and the majority of the operations and maintenance (O&M) costs associated with the establishment of the two EDCs. However, Components that are migrating applications to the data centers will need to pay for the continued services they receive through the WCF. Currently, Components with existing systems in the two data centers are paying for O&M costs through a fee-for-service chargeback mechanism. Three months of O&M costs are included in Components receiving migration funding through the WCF to cover O&M costs while transitioning into the data centers. Components are responsible for paying the sustained O&M costs once applications are fully transitioned.

The WCF will be used to collect annual O&M and rack rate fees from customer applications that are known or existing as of the point in time when the WCF budget is formulated. Customers that do not meet the cut-off date for budget formulation will be billed as a direct/reimbursable collection until the WCF is able to capture O&M and rack fees via a reprogramming or in the next budget cycle.

Justification

The FY 2014 request includes 34 FTE, 34 positions, and \$204.622 million for the EDC O&M to manage collection of funding for the ongoing O&M activities at the DHS data centers. The WCF

allows DHS to act as a single bill payer to data center service providers, reduces necessary procurement activities, and allows for greater transparency and more effective management of the goods and services provided to the Department. By centrally managing the contracts between data center providers, the Enterprise Data Center activity enables Components to focus resources on mission activities, rather than contracting and administrative support for acquiring data center services.

A significant outcome of complete migration is the elimination of further investments by the Components in legacy data centers operations, including continuity of operations, maintenance, support, and security certification and accreditation. By including the on-going O&M collections in the WCF, the Department is able to achieve increased benefits including: ensuring service provider contracts are fully funded and paid on time; providing customers with anticipated costs up-front; and, reducing workload and time associated with executing interagency agreements.

U.S. Citizenship and Immigration Services	\$17,738
U.S. Secret Service	\$4,901
U.S. VISIT	\$56,864
Management Directorate	\$27,670
TOTAL	\$204,622

Impact on Performance

This increase provides funding for the ongoing Component O&M requirements at the two enterprise-wide DHS data centers. This action also directly supports OMB's Federal Data Center Consolidation Initiative to promote the use of Green IT by reducing the overall energy and real estate footprint of government data centers; reduce the cost of data center hardware, software and operations; increase the overall IT security posture of the government; and shift IT investments to more efficient computing platforms and technologies.

Current Services Level							-	-	-
Program Increase							9	9	21,915
Total Request	-	-	-	-	-	-	9	9	21,915

Description of Item

The Homeland Security Presidential Directive 12– Identity Management (HSPD-12) is a new activity to the WCF in FY 2014. The Office of the Chief Security Officer’s (OCSO) Identity Management Division (IMD) is the central headquarters program charged with managing HSPD-12 across DHS through the issuance of a secure and reliable form of identification for its workforce and the modernization of the Department’s Physical Access Control Systems (PACS) located within an estimated 16,000 DHS facilities and sites. IMD will provide the necessary guidance and tools to facilitate this Department-wide program, creating a unified approach and solution, improving asset protection through secure and trusted facility access, enabling interoperability through standardization, achieving cost avoidance through the reduction of redundant infrastructures, and facilitating compliance with HSPD-12 and OMB M-11-11.

The HSPD-12 program supports DHS with services and technology to establish the DHS HSPD-12 infrastructure and issue DHS Personal Identity Verification (PIV) cards to customers. The HSPD-12 program will provide the following services to DHS customers: infrastructure services; policy development, governance, and compliance; service management; logistics and asset management; and PACS modernization services.

IMD is currently providing these services for all DHS users of the Identity Management System (IDMS). The IMD business activity coordinates: PIV card issuance functions at DHS PIV Card Issuance Facilities (PCIF) nationwide; HSPD-12 technology evaluation for future DHS use; continuous project management support for the deployment of enrollment/card issuance workstations (EIWS) to 1,049 DHS facilities/sites nationwide; vendor management and oversight of existing contracts; and budget and financial management. In addition, IMD coordinates PACS modernization activities across DHS, which includes the development of strategy, metrics, policy, and architectures

along with coordinating, managing, and monitoring the implementation of compliant PACS solutions across the DHS Enterprise.

Justification

The FY 2014 request includes 9 FTE, 9 positions, and \$21.915 million for the HSPD-12 program. In FY 2011 and FY 2012, the HSPD-12 program was centrally managed by OCSO and executed under the Economy Act via Interagency Agreements (IAA) with DHS Components outside of the WCF. Although this is being requested as a new activity within the WCF, this program has been an ongoing operation within DHS.

The Department will establish more than 300 PCIFs nationwide by the end of FY 2014 to support borders, airports, ports of entry, Joint Field Offices for disasters, and other designated locations. The shared locations will eliminate redundancies to ensure the Department gain economies of scale. Of the \$21.915 million request for the HSPD-12 program, \$1.3 million will be used to fund 9 FTE to assist in management, oversight, and card issuance; \$15.4 million is estimated to fund the anticipated contractual requirements for PIV card program; and \$5.2 million will provide funding for other services to include equipment purchases, travel, ancillary supplies, and GPO printing services.

Impact on Performance

The HSPD-12 program contributes to the DHS goal of maturing and strengthening the Homeland Security Enterprise. It is aligned to the “manage identification standards” activity with the objective to improve DHS’s organizational and programmatic alignment and its management systems and processes.

IMD is currently reviewing metrics and developing a “system dashboard” to facilitate reporting to Components.

Program Increase 9: Environmental Planning & Historic Preservation Decision Support System
PPA: Fee for Service Activity
Program Increase: Positions 1, FTE 1, Dollars \$445

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	1	1	445				1	1	445
Total Request	1	1	445				1	1	445

Description of Item

This new WCF activity consists of a single computerized system to facilitate environmental impact review of DHS activities, as required by the National Environmental Policy Act of 1970 (NEPA). These reviews may be required at any level of the organization; therefore the system is available behind the DHS firewall to all DHS HQ and Component employees to enter project related information. In addition to automating what is currently a manual process, the system will establish a standard of review and the capability to identify common issues, share best practices across the enterprise, and act as a National Archives and Records Administration (NARA) approved schedule of records. Examples of DHS activities that may require this environmental impact review include but are not limited to organizational changes, Federal assistance, construction, operations, purchasing, and research and development.

Justification

In FY 2014, Environmental Planning & Historic Preservation Decision Support System (EP&HP DSS) requests an increase of 1 FTE, 1 position and \$0.445 million in system requirements. These resources will be used to fund hosting requirements, contract support for maintenance, upgrade the system-specific programming, and to provide expert help support for users. Currently, DHS conducts more than 50,000 EP&HP reviews annually across the Department. The EP&HP DSS will provide standard of reviews, system capabilities to automate current manual ad-hoc processes for project proponents to track the status of the reviews; searches for relevant projects and information; and program managers to collect the number and types of environmental reviews used in their Component. It will allow Components to increase governance over personnel who conduct environmental reviews and allow only designated employees to approve the results. It will also replace the existing FEMA EMIS system and provide a single process for use across all DHS Components.

The current FEMA system has been found to be costly to operate and update. The systems consolidation will establish a Departmental-wide automated review process which will decrease the total cost of environmental reviews, increase efficiency, improve the workflow of environmental reviews, and increase the quality of environmental reviews throughout the Department. The estimated cost avoidance from the system implementation exceeds \$3.1 million for the EP&HP reviews performed annually across DHS.

Impact on Performance

The request will allow the Department to lower its cost for conducting environmental reviews and provide for enhanced oversight of the process.

Program Increase 10: Mail Services
PPA: Fee for Service Activity
Program Increase: Positions 2, FTE 2, Dollars \$17,438

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							2	2	17,438
Total Request	-	-	-	-	-	-	2	2	17,438

Description of Item

Currently provided as a shared service through the Chief Readiness Support Office (CRSO), the Mail Services, a new WCF activity in FY 2014, requires consolidated mail operations for the National Capital Region (NCR) and establishment of a Safe Mail Program (Management Directive 0590; superseded by Directive Number 119-01). DHS operates a Consolidated Remote Delivery Site (CRDS) for reception, screening, processing, courier service and delivery of safe mail to DHS Headquarters and Component HQ facilities in the NCR.

Justification

In FY 2014, the Mail Services request 2 FTE, 2 positions, and \$17.438 million to support contract costs for administering the mail facility processes, supplies, equipment, weapons, ammunition, evidence and special handling documentation for the entire Department.

The cost factors for the mail services contract include inbound mail volume, outbound mail volume, onsite customer service support, inbound parcels, mail delivery locations, mailstops and courier service. In FY 2011, the CRDS handled 1,200,000 pieces of incoming mail, 490,000 pieces of outgoing mail and 5,200 courier packages for the DHS Headquarters.

Impact on Performance

The inclusion of the mail services program into the WCF ensure that mail delivered to DHS Components remains secure and free of harmful contaminants and that all potential Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) attacks are detected at the screening facility designed to stop potential attacks before they pose a threat to DHS employees or facilities.

The request enables DHS to be in compliance with Management Directive 0590 and avoid using the U.S. Postal Service (USPS) to handle all incoming and out-going mail through its facilities instead of CRDS. The USPS does not have the ability to test all incoming letters/packages for CBRNE threats, which places the DHS work force at risk for potential contamination.

Program Increase 11: Parking Services
PPA: Fee for Service Activity
Program Increase: Positions 1, FTE 1, Dollars \$1,203

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							1	1	1,203
Total Request	-	-	-	-	-	-	1	1	1,203

Description of Item

The Chief Readiness Support Office (CRSO) oversees parking services for DHS Headquarters at various headquarters locations occupied by DHS employees with disabilities, car and van pools, headquarter executives, and employees required to work outside of core business hours. Employee parking is determined using the following criteria: the availability of parking space; requirements under the American Disability Act (ADA), employee’s rank and position, and required work hours. There are currently six commercial parking garages providing over 330 parking spaces, one government-run parking garage providing 37 parking spaces and one parking lot with 1,197 spaces that the CRSO oversees from a policy and operational perspective.

Justification

This new activity in FY 2014 requests 1 FTE, 1 position, and \$1.203 million for Parking Services. The projected cost is for approximately 320 leased spaces in garages used by organizations within the National Capital Region. DHS HQ has seven contractors with vendors throughout the metropolitan Washington, DC area. Downtown Parking is contracted through independent parking garages. The costs for spaces range from \$200 - \$550 per month per space, depending on whether the space is reserved or unreserved. Spaces are contracted on an annual basis with the ability to modify the contract twice each calendar year.

Impact on Performance

The integration of the Parking Service in the WCF will support accessibility under the ADA to disabled employees, parking services for employees who must commute via personal vehicle, and parking for government use vehicles.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 12: Executive Sedan Service
PPA: Fee for Service Activity
Program Increase: Positions 2, FTE 2, Dollars \$1,743

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							2	2	1,743
Total Request	-	-	-	-	-	-	2	2	1,743

Description of Item

The Chief Readiness Support Office (CRSO) administers the executive sedan service on annual basis for senior staff officials traveling between DHS facilities, Capitol Hill, the White House, and other Federal facilities located inside the beltway, during the course of their official Federal Government duties. This activity is new to the WCF for FY 2014.

Justification

In FY 2014, the Executive Sedan Service request includes 2 FTE, 2 positions, and \$1.743 million to manage the overall cost of the activity. Due to the dispersed nature of the DHS headquarters, it is necessary to provide an efficient method of transportation to minimize delays and disruptions to the execution of the Department’s mission. Use of the executive sedan service is limited to transportation to official business meetings held at locations that are not Metro accessible and/or where parking is not readily available. Offices are charged a flat fee per authorized user to ensure the contract costs are covered by the number of individuals using the service.

The sedan service operates from 6:00am to 8:00pm Monday through Friday, excluding Federal holidays. The Department pays a flat fee includes the cost of the dispatchers, drivers, the vehicle, fuels, and all other costs associated with the operation of the vehicles and service. The only additional costs incurred by DHS HQ would be overtime service, when vehicles and drivers are scheduled outside of the core hours of operations.

In FY 2013, ridership was limited to SES members and senior staff, which resulted in a reduction of eligible riders by 70 people. To operate the service with the highest level of efficiency, with a goal of providing as many transports as possible, the requestor is required to share vehicles when necessary (OMB Executive Order 13423).

Impact on Performance

The integration of the Executive Sedan Service program into the WCF will support DHS HQ senior officials to offsite meetings in a timely and secure manner, particularly to secure government locations, and those locations not accessible by public transportation.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 13: Shuttle Services
PPA: Fee for Service Activity
Program Increase: Positions 1, FTE 1, Dollars \$6,429

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							1	1	6,429
Total Request	-	-	-	-	-	-	1	1	6,429

Description of Item

Currently administered by the Chief Readiness Support Office (CRSO), the Shuttle Transportation Services provides a safe and effective means of transporting employees between DHS-occupied locations throughout the NCR. This service is especially crucial given the large number of geographically dispersed locations within DHS. Also, the shuttle services are available to areas that are not accessible to public transportation,

Justification

The FY 2014 request, which proposes to move the Shuttle Transportation Services into the WCF in FY 2014, includes 1 FTE, 1 position, and \$6.429 million to manage the overall cost of the Shuttle Service program. Included in this request is \$0.177 million to support one full time employee. Their responsibilities include contract and contractor oversight, invoice processing, policy oversight and ridership analysis.

The contract cost to acquire the Shuttle service is \$6.252 million. There is a flat cost which includes the drivers, vehicles, dispatch, supervisory personnel and maintenance costs. CRSO performs regular analysis of the shuttle ridership to ensure that the government is receiving the best value for the cost of the service.

Impact on Performance

The integration of the Shuttle Transportation Service into the WCF will support safe and effective transportation for DHS employees required to travel between DHS locations for meetings, training, and normal business activities. The ridership for the DHS shuttles average 1,800 people per business day and 451,000 riders per year.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 14: Transit Subsidy
PPA: Fee for Service Activity
Program Increase: Positions 2, FTE 2, Dollars \$5,596

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request as compared to FY 2012		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							2	2	5,596
Total Request	-	-	-	-	-	-	2	2	5,596

Description of Item

The Transit Subsidy program, a new activity to the WCF in FY 2014, is a tax-free transportation fringe benefit, commonly known as Transit Benefits. Currently managed by the Chief Readiness Support Office (CRSO), this program provides a subsidy to Federal employees who commute to and from work on a regular basis using rapid transit, public or commuter buses, commuter rail, incorporated van pools, or any combination of the above.

Justification

In FY 2014, the Transit Subsidy activity requests 2 FTE, 2 positions, and \$5.596 million to manage the overall cost of the program. Executive Order 13150 requires the implementation of the Commuter Transit Subsidy Program at all Federal agencies. Benefits are allocated based on documented expense of the employees' transportation costs not to exceed \$125 per month. The cost of the transit benefit services is based on actual usage of the participants, administrative fees and program management cost.

There are approximately 3,400 people enrolled in the transit benefit program within DHS-HQ with fluctuations each month as a result of hiring and attrition. The Department of Transportation (DOT) charges a 6 percent service fee for all benefits issued to individuals outside of the SmartBenefits programs. DHS HQ currently pays \$0.012 million in DOT service fees.

Since FY2010, CRSO has instituted mandatory SmartBenefits enrollment to all individuals who commute via a transportation mode accepting electronic payments through the Washington Metropolitan Area Transit Authority (WMATA), which has saved CRSO approximately \$0.100 million. As additional transportation modes participate with WMATA, CRSO will simultaneously convert.

Impact on Performance

The integration of the Transit program into the WCF will support DHS HQ employees utilizing mass transportation transit subsidies benefits.

Description of Item

DHS faculty at the National Defense University (NDU) designs, develops, and leads Homeland Security-related courses and events. The faculty arrange for an array of expert speakers from various homeland security areas to visit NDU as guest speakers. DHS faculty also lead an array of domestic and international trips and studies related to homeland security missions and concerns. Additionally, DHS faculty serve as advisors/mentors to DHS employees enrolled as Master’s Degree candidates each year. In exchange, DHS is able to select approximately 20 individuals each year to attend a college accredited by the program. Employees are selected for specific colleges by an independent DHS selection panel utilizing a matching process based on the panel’s review of the employees’ academic qualifications, work experiences and needs of the Department.

Justification

As a new activity to the WCF in FY 2014, NDU requests 4 FTE, 4 positions, and \$.856 million to assist DHS faculty with institutionalizing homeland security planning and execution with the National Security Planning Strategy.

Impact on Performance

This program supports participants in the Secretary's Honors Program (SHP) with earning a Master’s degree in an area of study relevant to strategic thinking/strategic planning and homeland security.

Description of Item

The E-Gov Implementation Guidance from OMB states that “Agencies are expected to make their public regulatory dockets electronically accessible and searchable using Regulations.gov, the President’s eRulemaking E-Gov initiative to comply with Section 206 of the E-Government Act of 2002” (M-03-18). The Federal Docket Management System (FDMS), the government’s online public docket and comment system, is designed to expand public access to the rulemaking process. Users have the ability to sort, search, view, download, and print docket contents. Documents available through the system may include Federal Register rules, notices, background and support materials, analyses, reports, studies, hearing transcripts, guidance documents, and public comments. FDMS helps to facilitate the submission of comments by allowing users the ability to comment online and view comments submitted.

FDMS is managed and operated by the U.S. Environmental Protection Agency (EPA). DHS is a partner agency for the eRulemaking initiative and has successfully migrated from the public rulemaking dockets to FDMS. FDMS allows public commenter’s the option to submit comments electronically to FDMS or to an agency by email, fax, U.S. Postal Service, or overnight delivery.

Justification

In FY 2014, the eRulemaking activity includes a program increase of \$0.107 million to support the FDMS. The docket center creates dockets, processes Federal Register documents and posts public submissions. The E-Government Act required regulatory agencies, to the extent practical, to ensure there was a Website the public could use to comment on regulations that impacted them. Established in October of 2002, eRulemaking was an E-GOV initiative that was committed to:

- Increasing access to and participation in developing regulations and other related documents that could impact the public, and
- Promoting more efficient and effective rulemaking through public involvement.

Impact on Performance

The Docket Support system is necessary for the management of documents in FDMS and Regulations.gov. Currently DHS does not have docket center funding, technology, or the capacity to support the demand within the E-Government initiative. Funding is critical in order to be in compliance with the E-Government Act.

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	301
Program Increase							-	-	77
Total Request	-	-	-	-	-	-	-	-	378

Description of Item

E-Integrated Financial Assistance Environment encompasses Grants.gov and Federal Audit Clearinghouse (FAC) requirements for the Department. Grants.gov has been designed to make Federal grant awarding effortless for agencies when posting grant applications for the general public and leverages the power of the Web to streamline the grant acquisition process. Grants.gov provides a Program Management Office (PMO) that services the Department’s grantor needs and has a 24-hour help-desk that is set-up to assist our applicants. The Department receives all its grants through this mechanism.

The Federal Audit Clearinghouse (FAC) database consists of information about Single Audits of Federal awards as required by OMB Circular A-133. This database is used by the Components to pull down A-133 reports submitted by their grantees. FAC also has a mechanism that allows the grantee population to electronically submit their A-133 audit reports. The Department’s grantor population has the ability to pull down all the relevant audit reports of their applicants, thus providing the Department the value of retrieving and storing valuable grantee audit reports at a low cost.

The consolidation of the Grants.gov and FAC database leads to greater transparency and centralized costs for government-wide Financial Line of Business systems.

Justification

The FY 2014 request includes a program increase of \$0.077 million for the E-IFAE activity to provide the benefit of a consistent “storefront for all of the Department’s grant applications for both grantee and grantor population. Consolidating these two initiatives will result in a name change to the e-Integrated Financial Assistance Environment. It will be managed by the Office of the Chief Financial

Officer's Financial Assistance Policy & Oversight (FAPO) office. FAPO is a leading member of the Financial Line of Business community and evaluates the benefits of these systems to DHS.

Impact on Performance

As one of the participating 26 federal grant-making agencies required by OMB, the Department utilizes Grants.gov to the award DHS annual grants to State and local governments, academia, not-for-profits and other organizations.

Program Increase							3	3	-
Total Request	2	2	2,072	2	2	2,072	7	7	1,979

Description of Item

The DHS Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

Justification

The FY 2014 request includes an increase of 3 FTE and 3 positions for the Strategic Sourcing activity. No additional funds are required for these FTE. Funds to support the FTE were provided by eliminating other contract-related expenses under the Advisory and Assistance Services object class. Strategic Sourcing was able to identify a cost savings of \$.119M due to a decrease in contract-related expenses of \$0.369 million of which \$0.250 million will support 3 additional workforce balance positions. Strategic Sourcing will be able to more effectively focus on implementing and executing additional strategic sourcing initiatives by having three additional FTE to perform activities such as: spend analysis, business case development, cross-component coordination, requirements consolidation, strategy formulation, source selection, and post-award outreach. Using government FTE instead of contractors, results in both cost savings and greater implementation of strategic sourcing initiatives.

Impact on Performance

By having additional FTE, Strategic Sourcing will be able to more effectively provide stakeholders economic and performance benefits through collaboration, analysis, and enterprise planning on DHS-wide initiatives.

Fee for Service Activity Mission Statement

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a components use of services or products. An example of a fee for service activity is print and electronic access subscription services through the Library of Congress FEDLINK. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the business are reimbursed by billing customers for the provision of goods and services at rates that are pre-approved by the CFO and reviewed by component customers. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2012 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	48,817	48,817	57,238	8,421
11.3 Other than full-time permanent	405	405	253	(152)
11.5 Other personnel compensation	373	373	483	110
12.1 Benefits	15,189	15,189	17,947	2,758
Total, Salaries & Benefits	64,784	64,784	75,921	11,137

In FY14, the WCF's Fee for Service PPA requests an increase of \$11.137M. The increase includes a 1% pay inflation of \$.623M and \$10.514M for an additional 57 FTE. These FTEs are for Enterprise Licenses Agreements (1), Enterprise Data Center O&M (34), EP&HP DDS (1), HSPD-12 (9), Mail Services (2), Parking Services (1), Executive Sedan Services (2), Shuttle Services (1), Transit Subsidy Services (2), and National Defense University (4).

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$226	\$226	\$202	-\$24

In FY14, the WCF Fee for Service PPA requests a decrease of \$.024M to streamline costs per Executive Order 13589.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
22.0 Transportation of things	\$4	\$4	\$10	\$6

In FY14, the WCF Fee for Service PPA requests an overall increase of \$.006M to cover transportation requirements for EP&HP DSS in the amount of \$0.010M and a decrease of \$.004M for FedLink. Fedlink's decrease is a direct result of requirements from OMB's Executive Order 13589 to reduce cost related to management efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$76,889	\$76,889	\$137,754	\$60,865

In FY14, the WCF's Fee for Service PPA requests a net increase of \$60.87M for the GSA Rent activity. \$54.02M is in support of the Coast Guard's move to Saint Elizabeths, \$5.5M for an increase in new space requirements, and \$2M for space requirements for Federal Protection Service (FPS) at their headquarters location.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$27,585	\$27,585	\$30,212	\$2,627

For FY14, the Fee for Service PPA requests an increase of \$2.6M due to NCRIO's IT Infrastructure services provided to DHS HQ components and St. Elizabeths tenants accessing DHS HQ unsecured network and to all DHS components assessing the top secret network. This increase also includes funding for US Coast Guard's move to the St. Elizabeths campus and the Federal Protective Service transition from ICE to NPPD in the amount of \$1.6M. In addition, \$1M is required for the secure video teleconferencing operations and maintenance.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$24	\$24	\$1,819	\$1,795

In FY14, the Fee for Service Activity requests a net increase of \$1.795M for printing and reproduction cost for the HSPD-12 activity. The request includes cost associated with card stock purchases with the Government Printing Office as well as printing and reproduction cost obtained from the private sector and other federal entities.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$50,497	\$50,497	\$45,542	-\$4,955

The FY14 request for the WCF's Fee for Service PPA reflects a net decrease of 4.96M to honor a department wide initiative to streamline cost. The Advisory & Assistance Services will assume this decrease through contractor conversion, mission support, and management efficiencies decrease across all Fee for Service Activities.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$21,591	\$21,591	\$60,535	\$38,944

The FY14 request for the WCF's Fee for Service PPA reflects a net increase of \$39M. This increase is in support of service requirements provided by Mail Services in the amount of \$14M, Parking Services in the amount of \$1M, Shuttle Services in the amount of \$6M, and Transit Services in the amount of \$5M. GSA Rent's cost requirement of \$5M is due to nominal increases in square footage occupied as well as inflationary adjustments. HSPD-12 requires funding for cost associated with Contractual services for Identity Management & Secure Credentialing Services, Appointment Scheduling Services, Public Key Infrastructure (PKI) Services, Identity Management System/Card Management System (IDMS/CMS), Certificate Authority (CA) Services in the amount of \$8M.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$93,867	\$93,867	\$104,624	\$10,757

In FY14, the WCF's Fee for Service PPA requests a net increase of \$10.8M for the following: An increase of \$1M to include the Personnel Accountability System under the Human Capital Business System activity; \$5M increase to ITP for the inclusion of the Trusted Internet Connection Service(TIC) and the Policy Enforcement Point Service (PEP) to provide a secure network service for DHS. Additionally, this request includes an increase of \$3.8M for NCRIO due to customer base requirements and Enterprise Licenses providing secure network services. The Executive Sedan Services requirement will cover the contractual cost of dispatchers, drivers, vehicles, fuel and all other cost associated with the operation of the service provided in the amount of \$1M. These purchases will be made through interagency agreements between DHS and outside vendors.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.5 R&D of contracts	\$18	\$18	\$152	\$134

The FY14 request for the WCF Fee for Service PPA reflects a net increase of \$.134M to the R&D object class to cover research and development requirements for EP&HP DSS in the amount of \$.129M and Fedlink, in the amount of \$.005M.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.7 Operation and maintenance of equipment	\$214,547	\$214,547	\$492,850	\$278,303

In FY14, the WCF Fee for Service PPA requests a net increase of \$278M to the O&M object class to cover operation and maintenance costs, of which \$25.8M is for ITP, \$38M is for DCM, \$49.78M for NCRIO, \$26.53M for ELA, \$120.55M for EDC O&M, and \$18.31M for HSPD-12.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$2,159	\$2,159	\$2,165	\$6

For FY14, the WCF's Fee for Service PPA requests an increase of \$0.006M to the travel object class to cover travel requirements in the amount of \$.006M

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$25,490	\$25,490	\$23,527	-\$1,963

For FY14, the WCF's Fee for Service PPA requests a net decrease of \$1.963M to the HSPD-12 activity.

Government Wide Mandated Service Activity Mission Statement

Government-wide Service Activities are Administration-sponsored initiatives that are managed by a designated Federal department to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include the government-wide e-Government initiatives and the OMB-sponsored Interagency Councils.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	650	650	670	20
12.1 Benefits	254	254	261	7
Total, Salaries & Benefits	904	904	931	27

The \$.027M increase in FY14 is for a 1% pay inflation that supports projected salaries and benefit requirements for 7 FTE and 7 positions in the DHS Crosscutting PPA.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$3	\$3	\$2	-\$1

In FY14, the Government Wide Mandated Service PPA requests a decrease of \$1M for administrative savings associated with a department wide initiative to streamline costs.

DHS Cross Cutting Activities Mission Statement

The DHS cross cutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	1,250	1,250	1,506	256
Total, Salaries & Benefits	1,250	1,250	1,506	256

For FY14, the WCF's DHS Crosscutting PPA requests an increase of \$0.256M for the Strategic Sourcing activity. The increase includes a .1% pay inflation of \$0.010M and \$0.246M program change to support 3 FTE as a result of contractor conversions, to plan, organize, and direct program activities associated with establishing Department-wide contract vehicles.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	0	0	\$19	\$19

For FY14, the WCF's DHS Crosscutting PPA requests \$0.019M for the travel object class to cover travel requirements for the Strategic Sourcing activity to support collaboration with stakeholders.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$8,446	\$8,446	\$7,694	-\$752

For FY14, the WCF's DHS Crosscutting PPA requests a net decrease of \$.753M for contract efficiencies. Strategic Sourcing has eliminated contract-related expenses in the amount of \$.369M of which \$.250M will fund an additional 3 FTE and \$.119M is identified as additional contractor conversion cost savings. The remaining are contract cost savings identified by CPIC as a result of improved contract management.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$6,687	\$6,687	\$5,299	-\$1,388

In FY14, the WCF's DHS Crosscutting PPA requests a decrease of \$1.388M to align with a department wide initiative to streamline costs in the budget area of Other Services

Working Capital Fund Management Activity Mission Statement

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and facilitates dispute resolution of issues between activity managers and customers.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	905	905	916	11
12.1 Benefits	221	221	221	-
Total, Salaries & Benefits	1,126	1,126	1,137	11

The \$.011M increase in FY14 is for a 1% pay inflation that supports projected salaries and benefits requirements for 8 FTE and 8 positions in the Working Capital Fund Operations

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$160	\$160	\$99	-\$61

In FY14 the WCF PPA requests a decrease of \$.062M to align with a department wide initiative to reduce cost.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
--	-------------------------	-----------------------	-----------------	---------------------------

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$10	\$10	\$5	-\$5

In an effort to contain cost in FY14 and to align with the requirements from OMB Executive Order 13589, the WCF Operations will reduce cost in the budget area of supplies and materials by \$.005M.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS Components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

WORKING CAPITAL FUND requests \$0 million and 101 FTE for the FY 2014 DHS Balanced Workforce Strategy.

Annualization of DHS Balanced Workforce Strategy

The Working Capital Fund seeks to increase authorized staffing levels by 101 FTE and 101 Positions in FY2014. From FY 2012, the WCF began implementing the Balanced Workforce Strategy by reducing its overreliance on contractor support and re-directing the contractor dollars to fund federal FTE. In doing so, the WCF will gain much greater control and accountability of outcomes, and more importantly, will be appropriately staffed to implement key program strategies and operations.

A. Component Overview

Departmental Management and Operations is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Office of the Secretary and Executive Management:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) provides leadership, direction, and management to the Department and all of its Components. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. OSEM oversees the Department's ongoing efforts to integrate and consolidate its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

Immediate Office of the Secretary: The Office of the Secretary's role is to provide executive leadership, management, direction, and oversight for the Department's components. The Secretary represents the Department of Homeland Security (DHS) to the President, Congress, and the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department especially regarding internal management and direction.

Chief of Staff: The Chief of Staff is responsible for coordinating policy initiatives and other actions of the Department's components, directorates, and offices.

Office of the Executive Secretary: The Office of the Executive Secretary (ESEC) supports the Offices of the Secretary and Deputy Secretary with management of their correspondence, decision documents, and other written communications, including briefing books, Congressional questions for the record, and testimony for all departmental hearing witnesses. ESEC is especially charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature has been thoroughly cleared with all relevant Components.

Office of Intergovernmental Affairs: The Office of Intergovernmental Affairs (IGA) is responsible for communicating and coordinating State, local, tribal, and territorial (SLTT) government interactions throughout and across the Department. IGA promotes an integrated national approach to homeland security by coordinating and advancing Federal interaction with SLTT governments. IGA is responsible for continuing the homeland security dialogue with executive-level partners with our SLTT partners, along with the national associations that represent them. IGA serves as the Secretary's primary point of contact for SLTT elected and appointed officials and their associations to ensure there are open lines of communications between the Department and its homeland security partners.

Office of Policy:

The Office of Policy (PLCY) serves as a central resource to the Secretary and other Department leaders for policy development and review, strategic planning and analysis, and facilitation of decision-making on the full breadth of issues that may arise across the dynamic homeland security enterprise. PLCY is responsible for strengthening our Nation's homeland

security by developing DHS-wide policies, programs, and planning to promote and ensure the highest level of performance, quality, consistency, and integration in the execution of all homeland security missions. PLCY represents and coordinates the consolidated DHS position at White House interagency committee meetings. The Office develops and articulates the long-term strategic view of the Department and translates the Secretary's strategic priorities into the Quadrennial Homeland Security Review, DHS Strategic Plan, and other planning products that drive increased operational effectiveness through integration, prioritization, and resource allocation. The Department proposes establishing independent offices for the Office for State and Local Law Enforcement, the Office of International Affairs (OIA), and Private Sector Office. While OIA will coordinate the Department's international operations and engagement, the Office of Policy will continue to work with OIA to coordinate and develop international policy.

Office of Public Affairs: The Office of Public Affairs (OPA) is responsible for managing external and internal communications. The office responds to national media inquiries, maintains and updates the Department's website, writes speeches for senior Department officials, and coordinates speaking events for Department officials. OPA fosters strategic communication throughout the Department and with external stakeholders through development and coordination of major DHS announcements and rollouts as well as setting common goals to promote "One DHS" objectives. OPA manages the expansion of the "If You See Something, Say Something"™ campaign, which is a simple and effective program to engage the public and key frontline law enforcement personnel to identify and report indicators of terrorism and terrorism-related crime to the proper transportation and law enforcement authorities. The office manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. Also, the office oversees the Department's employee communication activities, which include coordinating communications for Department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Per Presidential directive, OPA's incident communications program guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accurate and timely information is provided to the public during a crisis.

Office of Legislative Affairs: The Office of Legislative Affairs (OLA) serves as the Department's primary liaison to Congress. OLA advocates the policy interest of the Administration and the Secretary. OLA also ensures that all DHS Components are actively engaged with Congress in their specific areas of responsibility. OLA articulates views on behalf of DHS Components and their legislative initiatives. OLA responds to requests and inquiries from congressional committees, individual Members of Congress, and their staffs. OLA also participates in the Senate confirmation process for all DHS Presidential nominees.

Office of the General Counsel: The General Counsel is the chief legal officer for DHS and oversees and integrates more than 1,800 attorneys throughout the Department. OGC is responsible for ensuring that Departmental activities comply with applicable legal requirements, as well as establishing that the Department's efforts to secure the Nation are consistent with the civil rights and civil liberties of the public and observe the rule of law. OGC provides legal advice on areas such as national security, immigration, litigation,

international law, maritime safety and security, transportation security, border security law, cyber security, fiscal and appropriations law, environmental law, and many others. OGC also provides legal services in several areas where the law intersects with the achievement of mission goals, such as the coordination of the Department's rulemaking activities, managing interdepartmental clearance of proposed legislation, and providing legal training for law enforcement officers. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute).

Office for Civil Rights and Civil Liberties: The Office for Civil Rights and Civil Liberties (CRCL) supports the Department as it secures the nation while preserving individual liberty, fairness, and equality under the law. CRCL is involved in all of the Department's missions and performs four key functions to integrate civil rights and civil liberties into Departmental activities:

- Advising Department leadership, personnel, and partners about civil rights and civil liberties issues; ensuring respect for civil rights and civil liberties in policy decisions and in the implementation of those decisions.
- Communicating with individuals and communities whose civil rights and civil liberties may be affected by DHS activities.
- Investigating and resolving civil rights and civil liberties complaints filed by the public.
- Leading the Department's equal employment opportunity programs and promoting personnel diversity and merit system principles.

Citizenship and Immigration Services Ombudsman: The Citizenship and Immigration Services Ombudsman (CISOMB) assists individuals and employers in resolving problems connected with cases pending before United States Citizenship and Immigration Services (USCIS). In addition, as required by statute, CISOMB identifies common problems experienced by individuals and employers when seeking USCIS services, and proposes changes to mitigate such problems and improve the delivery of immigration services. In accomplishing each of these missions, the CISOMB works impartially, soliciting information and feedback from USCIS, other government agencies, immigration benefits applicants, and the immigration stakeholder community.

Office of Privacy: The Privacy Office protects the collection, use, and disclosure of Personally Identifiable Information (PII) and departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department; and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy and disclosure policy matters, including compliance with the *Privacy Act of 1974*, the *Freedom of Information Act*, and the completion of privacy impact statements for all new programs and systems, as required by the *E-Government Act of 2002* and Section 222 of the *Homeland Security Act*. The DHS Privacy Office is the first statutorily-mandated Privacy Office within the Federal Government.

Private Sector Office: The Private Sector Office (PSO) fosters strategic communications with businesses, trade associations, and other non-governmental organizations to build stronger relationships between them and the Department. The office advises Departmental leadership on prospective policies and regulations, informs the Secretary about the economic impact of DHS policies, promote public-private partnerships and best practices to improve the Nation's

homeland security, and serve as the primary point of entry for the private sector into DHS. The Department proposes to establish PSO as an independent office and PPA in FY 2014.

Office for State and Local Law Enforcement: The Office for State and Local Law Enforcement (OSLLE) is the Department's principal liaison with non-Federal law enforcement partners. OSLLE formulates and coordinates national-level policy relating to law enforcement's role in preventing acts of terrorism, and serves as the primary Department liaison with State, local, and tribal law enforcement agencies. The Department proposes to establish OSLLE as an independent office and PPA in FY 2014.

Office of International Affairs: The Office of International Affairs (OIA) leads, coordinates, and integrates the Department's interaction with its international partners while developing and overseeing the implementation of the Department's international engagement strategy. The Office of International Affairs provides oversight on visa waiver negotiations through its Visa Waiver Program Office. The Department proposes to establish OIA as an independent office and PPA in FY 2014.

Under Secretary for Management: The Department of Homeland Security (DHS) Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department to achieve its mission to lead the unified national effort to secure America. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department

Immediate Office of the Under Secretary for Management: The Immediate Office of the Under Secretary for Management's primary mission is to provide leadership and oversight for all Departmental management line of business functions, including information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Office of the Chief Readiness Support Officer The Office of the Chief Readiness Support Officer (OCRSO), formerly called the Office of the Chief Administrative Officer (OCAO), is responsible for the overall leadership, internal controls and oversight of Department-wide logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint Nationwide; and, support of DHS Headquarters operations. The CSRO focus is to deliver affordable readiness, meaning providing, in an affordable manner, the support products and services needed to enable people across DHS to perform their missions effectively. The CSRO team accomplishes this through building partnerships and collaboration, leveraging best practices and fostering innovation.

Office of the Chief Human Capital Officer: The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs, and practices for attracting, retaining, and developing the skilled workforce needed to protect and secure our Nation. The work of the OCHCO is critical to

supporting and enabling the Secretary's workforce strategy, which centers around four key goals: building an effective, mission-focused, diverse, and inspiring cadre of leaders; recruiting a highly qualified and diverse workforce; retaining an engaged workforce; and solidifying a unified DHS culture of mission performance, adaptability, accountability, and results.

Office of the Chief Procurement Officer: The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support; policy and acquisition workforce issues; procurement ombudsman and industry liaison; and small and disadvantaged business utilization. The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services.

Office of the Chief Security Officer: The Office of the Chief Security Officer (OCSO) leads the collaborative security program to safeguard DHS people, information, and property. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. The office manages operational security systems and HSPD-12 card issuance for the Department. Additionally, the OCSO provides liaison support to the intelligence community on security matters affecting DHS.

Office of the Chief Financial Officer The mission of the Office of the Chief Financial Officer (OCFO) is to ensure that the funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies, and to provide guidance and oversight of the Department's budget, financial management, and resource management systems.

Office of the Chief Information Officer: The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the programs necessary to align DHS's Information Technology (IT) personnel, resources, and assets, including all systems and infrastructure, to support Department-wide missions and activities. OCIO's mission is to provide DHS and its partners with the IT services required to lead a unified national effort to prevent and deter terrorist attacks as well as protect against and respond to threats and hazards.

FY 2014 Budget Request

The table below shows Departmental Management and Operations FY 2014 Budget request by its Future Years Homeland Security Program (FYHSP) programs.

Mission 1: Preventing Terrorism and Enhancing Security

Resources Requested

Departmental Management and Operations’ resources supporting *Preventing Terrorism and Enhancing Security* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Civil Rights and Civil Liberties	3,135	16	3,224	16	2,862	13
Counternarcotics Enforcement ¹	248	0				
Total	3,383	16	3224	16	2,862	13

Performance Measures

For *Preventing Terrorism and Enhancing Security*, strategic performance measures are presented. Strategic Performance Plan Measures represent the Departmental Management and Operations’ measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act performance measures.

¹ The Office of Counternarcotics Enforcement was terminated in FY 2012, per PL 112-74. After termination, any remaining funds were transferred to the Office of Policy, which assumed legacy CNE functions.

Strategic Performance Plan Measures

Measure: Percent of law enforcement officials trained in methods to counter terrorism and other violent acts that rate the training as effective						
Description: This measure assesses the effectiveness of DHS training to state and local law enforcement officials offered by the DHS Office of Civil Rights and Civil Liberties (CRCL). This training covers three components: 1) Cultural Competency, 2) Community Engagement, and 3) Understanding and Countering Violent Radicalization. A post training survey is administered to assess effectiveness. A pre- and post-test of topic familiarity will also be administered.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	80%	82%	84%	86%
Result:	N/A	N/A	84%	86%	N/A	N/A

Mission 2: Securing and Managing Our Borders

Resources Requested

Departmental Management and Operations’ resources supporting *Securing and Managing Our Borders* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Civil Rights and Civil Liberties	3,265	17	3,358	17	2,981	13
Counternarcotics Enforcement ²	661	0	0	0	0	0
Total	3,926	17	3,358	17	2,981	13

Performance Measures

Departmental Management and Operations contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Mission 3: Enforcing and Administering Our Immigration Laws

Resources Requested

Departmental Management and Operations’ resources supporting *Enforcing and Administering Our Immigration Laws* are provided in the table below.

² The Office of Counternarcotics Enforcement was terminated in FY 2012, per PL 112-74. After termination, any remaining funds were transferred to the Office of Policy, which assumed legacy CNE functions.

Departmental Management and Operations - Strategic Context

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Civil Rights and Civil Liberties	5,946	30	6,116	30	5,429	27
Total	5,946	30	6,116	30	5,429	27

Performance Measures

Departmental Management and Operations contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Mission 4: Safeguarding and Securing Cyberspace

Resources Requested

Departmental Management and Operations' resources supporting *Safeguarding and Securing Cyberspaces* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Civil Rights and Civil Liberties	595	3	612	3	543	3
Total	595	3	612	3	543	3

Performance Measures

Departmental Management and Operations contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Mission 5: Ensuring Resilience to Disasters

Resources Requested

Departmental Management and Operations' resources supporting *Ensuring Resilience to Disasters* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Civil Rights and Civil Liberties	945	5	972	5	863	4
Total	945	5	972	5	863	4

Performance Measures

Departmental Management and Operations contributes to this mission, but does not have its own strategic-level or management-level performance measures in this area.

Maturing and Strengthening the Homeland Security Enterprise

One of the Department’s objectives is to improve DHS’s organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters components, enhanced programmatic alignment to the homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

Office of the Secretary and Executive Management

DHS Office of the Secretary and Executive Management (OSEM) supports the Department and all of its components by providing leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

Under Secretary for Management

The Office of the Under Secretary for Management (USM) delivers quality administrative business support services and provides both leadership and oversight for all departmental management functions; information technology; security; budget and financial management; procurement and acquisition; human resources; facilities and logistics. The USM delivers departmental customer support services, while eliminating redundancies and reducing support costs, with the objective of improving the effective and efficient delivery of business and management services throughout the Department. The delivery of these business support activities is in direct support of the QHSR goal of Maturing and Strengthening the Homeland Security Enterprise.

Resources Requested

Departmental Management and Operations’ resources supporting *Maturing and Strengthening the Homeland Security Enterprise* are provided in the table below.

Performance Measures

Because Maturing and Strengthening the Homeland Security Enterprise is not a direct Departmental mission, measures for this area are developed at the management level.

Management Measures

Measure: Average rating from Small Business Administration (SBA) Small Business Procurement Scorecard						
Description: This measure reflects an overall performance assessment rating for the DHS Socio-Economic Contracting Program from SBA on an annual basis. The letter rating is an aggregate assessment for DHS across three program areas: prime contracting achievement, subcontracting achievement, and progress plan towards meeting specific prime and subcontracting goals. The measure is derived from applying a weighted assessment across all three areas, with six potential grade ranges and is converted to a numerical score to the purposes of reporting internally. (A+=5, A=4, B=3, C=2, D=1, F=0).						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	4	4	4	4
Result:	N/A	N/A	N/A	4	N/A	N/A

Measure: DHS Enterprise Architecture Maturity Score						
Description: Based on GAO standards, this measure reflects the overall capability of DHS to mature its Enterprise Architecture (EA). The development of the EA’s maturity is based on a scale of 1 to 5, 5 being the end target for “fully capable to mature”. Enterprise architecture defines the relationship between an agency’s mission, business processes, information, and supporting technologies. It illustrates how the business processes and technology support the mission. Having a clearly documented, mature EA is critical to the organization’s success because it describes the technology and information needed to perform the mission, and includes descriptions of how the architecture of the organization should be changed in order to respond to changes in the mission.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	3	4.00	5.00	5.00
Result:	N/A	N/A	2.92	4.20	N/A	N/A

Measure: Interest penalties paid on all invoices (per \$1 million in total payments)						
Description: This measure reflects the amount of interest penalties incurred by the Department of Homeland Security for late payment of invoices submitted by vendors that provided goods and services to the Government. The Prompt Payment Act requires that Federal agencies pay all approved vendor invoices in a timely manner. The Act assesses late interest penalties against agencies that pay vendors after a payment due date. Reducing the amount of interest paid ensures that all Department of Homeland Security vendors are paid in a timely manner without additional cost to the Government.						

Departmental Management and Operations - Strategic Context

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<=\$250	<=\$200	<=\$175	<=\$160.00	<=\$160.00	<=\$160.00
Result:	\$169.3	\$72.95	\$88.23	\$27.24	N/A	N/A

Measure: Number of days Personnel Security Division (PSD) takes to adjudicate investigations in order to render a final decision after receiving a completed investigation from either OPM or a contract provider

Description: This measure gauges the time from start to processed results for final clearance. As part of making a final clearance decision for an employee, the Office of Security receives a completed investigation. Once the investigation is received, the Office of Security begins the process of adjudicating the information collected. The Office of Security adjudicators analyze the information using the "whole" person methodology. Upon completion of this process, the disposition is entered into the Integrated Security Management System (ISMS), the Human Capital is notified that either a favorable decision has been processed or a decision has been delayed based on findings.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	<=20	<=20	<=20
Result:	N/A	N/A	N/A	12	N/A	N/A

Measure: Number of days to vet foreign nationals officially interacting with DHS

Description: This measure gauges the days it takes to vet a foreign national who will officially interact with DHS (e.g. Foreign Visitors, Foreign Service Nationals and Foreign National Detailees). The foreign nationals are vetted through several US Government information systems as part of a risk mitigation process. The risk assessment is based on the foreign national's background and provides DHS Components with an assessment.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	<=10	<=10
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent compliance rate for data in Federal Procurement Data System - Next Generation

Description: This measure reflects the overall accuracy of data in the Federal Procurement data System (FPDS). The data accuracy is measured based on a statistical review of data elements specified by the Office of Management and Budget. FPDS contains detailed information on DHS contract actions. The accuracy of this data is extremely important because it is the central source of data used by Congress, DHS management, oversight organizations, and the public.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	93%	94%	95%
Result:	N/A	N/A	N/A	93%	N/A	N/A

Measure: Percent of accounts receivable from the public delinquent over 180 days						
Description: This measure reflects the percent of dollars owed to the Department and its Components from individuals and organizations that are more than 180 days past the due date. By collecting these dollars sooner, the Department receives the cash in a timeframe that it can be used in a more effective manner. Money tied up in the collections process cannot be used by the Department to provide the services the American public expects. There is a reporting lag of one quarter for the results of this measure.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<20%	<15%	<15%	<15%	<15%	<15%
Result:	18%	10%	14%	22%	N/A	N/A

Measure: Percent of Component Acquisition Executives (CAEs) with Component level approved processes/procedures that are aligned to DHS acquisition management directives and policies						
Description: Component Acquisition Executive (CAE) is the senior acquisition official within a component responsible for the implementation, management, and oversight of his or her Component's acquisition processes, and coordinating those processes with the contracting and procurement processes of the Head of Contracting Activity. The CAE is responsible for establishing acquisition processes within the component; overseeing execution of the Component's acquisition portfolio; and serving as the Acquisition Decision Authority for component level acquisition approvals. To that end, this measure represents the level of maturity of the Operational Component CAEs' efforts to develop and implement policies and procedures that are in compliance with MD-102-01. The measure is the relation of Components whose acquisition policies have reviewed by HQ, and approved by the Component leadership.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	80%	85%	100%
Result:	N/A	N/A	N/A	73%	N/A	N/A

Measure: Percent of contracts awarded on the basis of full and open competition						
Description: This measure gauges the percent of contracts issued by DHS that meet agreed upon standards set by the Office of Management and Budget (OMB), Office of Federal Procurement Policy, for competition level. This competition assessment assists in determining agency compliance with the Competition in Contracting Act and provides a qualitative measure for reviewing high risk contracts.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	68.0%	67.0%	68.0%
Result:	N/A	N/A	N/A	72.3%	N/A	N/A

Measure: Percent of DHS headquarters users that use PIV cards for network access						
Description: This measure tracks the number of Department of Homeland Security (DHS) Headquarters employees are required to use Personal Identity Verification (PIV) cards to access the DHS network.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	50%	70%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of environmentally preferable and sustainable purchasing actions						
Description: This measures gauges green purchases for sustainable acquisition. Green purchases are those products and services that utilize renewable energy technologies, energy efficiency, including using products containing energy-efficient standby power devices, and products that contain the use of recovered material, biobased products, and other materials that are environmentally preferable, and/or energy- and water-efficient. This measure helps to ensure compliance with the Office of Management and Budget's (OMB's) guidance to meet Presidential priorities for sustainable purchasing, which will promote energy and water efficiency, renewable energy, and foster markets for emerging technologies.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	95%	95%	95%
Result:	N/A	N/A	N/A	98%	N/A	N/A

Measure: Percent of Equal Employment Opportunity complaints timely adjudicated						
Description: This measure tracks the improvement of CRCL in timely adjudicating EEO claims. Timeliness is defined by the EEO regulations - CRCL has between 45 and 60 days to issue a Final Agency Decision, depending on the type of case. (See 29 C.F.R. sec. 1614).						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	25%	40%	40%
Result:	N/A	N/A	N/A	49%	N/A	N/A

Measure: Percent of favorable responses by DHS employees on the annual employee survey						
Description: This measure reflects the average percent of positive responses to the 39 questions which make up the four Human Capital Assessment and Accountability Framework Indices (HCAAF) on the annual employee survey. The U.S. Office of Personnel Management (OPM) has determined the make up of the four HCAAF Indices as: Leadership and Knowledge Management; Results-Oriented Performance Culture; Talent Management; and Job Satisfaction. Employee surveys are conducted annually to gauge employees' perceptions on whether they are effectively led and managed, if they have opportunities to grow professionally and advance in their careers, and if their contributions are valued and recognized. The survey results are used by DHS agency managers to address human capital management issues and improve agency performance in these areas.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	51%	55%	57%	58%	53%	54%
Result:	54%	56%	55%	53%	N/A	N/A

Measure: Percent of information technology segments covered by portfolio governance						
Description: This measure represents the total number of information technology segments that are covered by governing bodies. The governing bodies are established to provide oversight and strategic direction for investments as they align to information technology segments. There are a total of 30 information technology segments.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	50%	67%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of major acquisition programs with approved core program management documentation for each acquisition life cycle phase						
Description: This measure gauges the percent of major acquisition programs with core program management documentation and that have a complete set of approved documents for a given acquisition life cycle phase. The core documents and set of required documents are defined by Department of Homeland Security (DHS) acquisition guidelines and Federal Acquisition/Procurement policy.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	55%	65%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of major information technology systems meeting annual Federal Information Security Management Act (FISMA) Compliance performance goals						
Description: This measure reflects the percentage of major operational IT systems at DHS headquarters and Components that are compliant with stated FISMA performance milestones and goals.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	90%	90%	90%	90%	90%	90%
Result:	92%	92%	86%	92%	N/A	N/A

Measure: Percent of supervisors who complete requirements established under the Cornerstone Leadership Development Program						
Description: This measure tracks the percent of supervisors who have completed the requirements of the Cornerstone Development program, which is a subset of the larger Leader Development Program that is managed by the Office of the Chief Human Capital Officer. The Cornerstone program is the first phase of the Leader Development framework and includes a comprehensive baseline set of experiences (trainings, readings, seminars, etc.) that are required for all supervisors at all levels in the Department.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	N/A	50%	60%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of the Office of Civil Rights and Civil Liberties (CRCL) reports of investigation in which CRCL's recommendations to the DHS components are implemented						
Description: CRCL reports of investigations include recommendations which, if accepted and implemented, will improve the respective program. This measure reflects the percent of recommendations made by CRCL that are accepted and implemented by the Department of Homeland Security (DHS). CRCL tracks the recommendations that are issued until they have been implemented.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	N/A	85%	85%	86%
Result:	N/A	N/A	N/A	90%	N/A	N/A

Measure: Percent of vendors paid electronically						
Description: This measure reflects the percent of vendors that are paid using Electronic Funds Transfer for payment of invoices. The Debt Collection Improvement Act requires the use of Electronic Funds Transfer for most Federal payments. An Electronic Funds Transfer is any transmission of monies, other than by cash, check, or similar paper, made through an electronic means. The Treasury Department indicates that it costs the Government \$0.98 to issue a payment by check and \$0.10 to issue an Electronic Funds Transfer payment. Payments made electronically reduce the administrative cost to the Government.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	96.5%	96%	97.5%	98.0%	98.0%	98.0%
Result:	97.4%	99.6%	99.6%	98.8%	N/A	N/A

Measure: Percent of veterans hired as a total of the DHS workforce each fiscal year						
Description: This measure reflects the percentage of new Veteran hires for each fiscal year based on the total number of DHS new hires. As part of the President's Executive Order 13518 (November 9, 2009), on the Employment of Veterans in the Federal Government, the Council on Veterans Employment is required to establish performance goals to assess the effectiveness of the government-wide Veterans Employment Initiative.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	24%	22.0%	25.0%	25.0%
Result:	N/A	23.4%	21.2%	24.9%	N/A	N/A

Measure: Percent reduction in scope 1 & 2 greenhouse gas emissions						
Description: The measure captures the percent reduction of greenhouse gas (GHG) emissions across the Department of Homeland Security. This percentage only includes scope 1 & 2 GHG emissions. This is an annual DHS measure calculated in Q2 of each year. This is also an OMB sustainability scorecard measure and is used to drive Government-wide reduction of GHG 1 & 2 emissions by Federal agencies. DHS' target is to reduce emissions 25% by 2020 as compared to the 2008 baseline numbers.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	2.0%	3.0%	4.0%	5.0%
Result:	N/A	N/A	13.6%	5.3%	N/A	N/A

Measure: Percent variance from project schedule for the DHS Campus at St. Elizabeths						
Description: Schedule Variance (SV) measures the actual progress of the DHS consolidation effort at St. Elizabeths as compared to the scheduled plan, the baseline. The equation is $SV = EV - PV$. SV, the measure of schedule performance, is equal to the earned value (EV) minus the planned value (PV). SV can indicate a project falling behind its baseline schedule. SV will ultimately equal zero when the project is completed because all of the planned values will have been earned. Assuming sufficient funding is received, tenant occupancy begins at St. Elizabeths in FY 2013 with Phase 1. SV measures both the activities of GSA and DHS since this is a joint Program. GSA maintains the master schedule for the DHS Consolidated HQ Project - St Elizabeths. SV is calculated monthly by GSA as part of Earned Value Management calculations on contracts.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=10%	<=10%	<=10%	<=10%
Result:	N/A	N/A	0%	1%	N/A	N/A

Measure: Space utilization rate per person (in square feet)						
Description: The objective is to reduce DHS's space utilization footprint over the next 5 year period in order to meet the goals of the President's June 10, 2010 Memo. It is anticipated that there will be cost savings as DHS gradually reduces space utilization across our real property inventory. (The terms Sq. Ft. and USF/pp are interchangeable in the below.)						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	N/A	<=198	<=196	<=190	<=180
Result:	N/A	N/A	200	199	N/A	N/A

Measure: Total instances of material weakness conditions identified by the independent auditor in their report on the DHS financial statements						
Description: The number reported is the total instances of material weakness conditions in both the DHS Office of Financial Management and DHS components. A material weakness is a deficiency significant enough to be reported outside the agency.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	<12	<11	<10	<10	<9	<7

BUDGET REQUEST AND SUPPORTING INFORMATION

ANALYSIS AND OPERATIONS

I. Appropriation Overview

A. Mission Statement for Analysis and Operations:

The Analysis and Operations appropriation provides resources supporting the Office of Intelligence and Analysis and the Office of Operations Coordination and Planning. Even though these two offices are different and distinct in their missions, they work together and with other DHS components to support the Department's mission of protecting the Homeland. The mission of the Office of Intelligence and Analysis is to provide homeland security intelligence to the Secretary, other government officials, and State, local, and private sector partners. The mission of the Office of Operations Coordination and Planning is to integrate DHS and interagency planning and operations coordination in order to prevent, protect, respond to, and recover from terrorist threats/attacks or threats from other man-made or natural disasters.

B. Budget Activities:

Office of Intelligence and Analysis (I&A) - As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the nation's intelligence apparatus and DHS Components and other State, local, and private sector (SLP) partners. I&A ensures that information is gathered from all relevant DHS field operations and other SLP partners and that this information is shared with appropriate stakeholders to produce accurate, timely, and actionable analytical intelligence products and services. The Under Secretary for Intelligence and Analysis (U/SIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT), responsible for managing the entire DHS Intelligence Enterprise, and the Department's Chief Information Sharing Officer, responsible for implementing the objectives of the Program Manager – Information Sharing Environment (PM-ISE) within DHS.

Office of Operations Coordination and Planning (OPS) – OPS' mission is to provide decision support and enable the Secretary's execution of responsibilities across the homeland security enterprise by promoting situational awareness and information sharing, integrating and synchronizing strategic operations and planning, and administering the DHS continuity program. OPS plays a pivotal role in DHS' mission to lead the unified national effort to secure America by facilitating the Secretary's responsibilities across the full spectrum of incident management (prevention, protection, response and recovery). OPS provides situational awareness, assessments and operations coordination for the DHS Secretary and facilitates operational information sharing with all DHS Components, as well as for Federal, State, local, tribal, private sector and international partners. In support of the Secretary's role as principal Federal official for domestic incident management, OPS develops and coordinates Departmental and interagency strategic-level operations plans.

C. Budget Request Summary:

The Analysis and Operations account requests 874 positions, 852 FTE and \$309.23 million for FY 2014: Please reference classified annex for detail.

D: Efficiencies: Please reference classified annex for detail.

<u>Mission Support and Personnel Efficiencies</u>	<u>\$3.3 million</u>
<u>Supplies and Materials Efficiencies</u>	<u>\$8 thousand</u>
<u>Advisory and Assistance Contracts Efficiencies</u>	<u>\$13.1 million</u>

1	1978	10/31/2012 & 4/30/2013 to Department and to Congress 30 days later	Inspector General Act of 1978 (P.L. 95-452), as amended. Sec. 5	Semiannual Report to Congress – Inspector General Act requires semiannual reports summarizing the activities of the office during the preceding six-month period	SAR (4/1/12-9/30/12) delivered 11/30/2012. SAR (10/1/12-3/31/13) expected on time.
2	2010	10/31/2012 & 4/30/2013 to Department and to Congress 30 days later	Dodd-Frank Wall Street Reform Act (P.L. 111-203)	Information on Peer Reviews - Requires "(A) an appendix containing the results of any peer review conducted by another Office of Inspector General during the reporting period;" or "(B) if no peer review was conducted within that reporting period, a statement identifying the date of the last peer review conducted by another Office of Inspector General; "(15) a list of any outstanding recommendations from any peer review conducted by another Office of Inspector General that have not been fully implemented, including a statement describing the status of the implementation and why implementation is not complete; and "(16) a list of any peer reviews conducted by the Inspector General of another Office of the Inspector General during the reporting period, including a list of any outstanding recommendations made from any previous peer review (including any peer review conducted before the reporting period) that remain outstanding or have not been fully implemented." (Note - This information is included in the SAR.)	SAR (4/1/12-9/30/12) delivered 11/30/2012. SAR (10/1/12-3/31/13) expected on time.
3	1991	11/15/2012	CFO Act of 1990 (P.L. 101-576), Sec. 304	Annual Audit of DHS' Consolidated Financial Statements - The Chief Financial Officers Act requires that an annual financial statement audit be performed at DHS.	Completed. <i>OIG-13-20, Independent Auditors' Report on DHS' FY 2012 Financial Statements and Internal Control over Financial Reporting</i>

#	Fiscal Year	Due Date	Reference/Citation	Requirement	Status
4	2005	11/15/2012	DHS Financial Accountability Act (P.L. 108-330), Sec. 4; OMB Circular A-123, Appendix A, II-V	Annual Audit of DHS' Internal Control Over Financial Reporting - Annual audit, jointly conducted by the Chief Financial Officers Council and the President's Council on Integrity and Efficiency (PCIE), of DHS' internal control over financial reporting to express an opinion about whether DHS maintained effective internal control. OMB Circular A-123, Management's Responsibility for Internal Control (Revised), requires agency management to assess and document internal control over financial reporting; identify needed improvements; take corresponding corrective action; and make an assertion about the effectiveness of internal control over financial reporting. The audit will assess DHS management's assertion and effort to implement the Circular, which addresses financial performance in the President's Management Agenda. <i>(Note - This audit is included with the Consolidated Financial Statement Audit.)</i>	Completed. <i>OIG-13-20, Independent Auditors' Report on DHS' FY 2012 Financial Statements and Internal Control over Financial Reporting</i>
5	2000	11/15/2012	Reports Consolidation Act of 2000 (P.L. 106-531), Sec. 3(a)	Annual Report on Major Management Challenges - Congress requires an Inspector General report that summarizes what the Inspector General considers to be the most serious management and performance challenges facing the agency and briefly assesses the agency's progress in addressing those challenges. Report is included in the Department's annual report submitted to the President, Director of OMB, and Congress no later than 150 days after the end of the fiscal year.	Completed. <i>OIG-13-09, Major Management Challenges Facing the Department of Homeland Security</i>
6	2003	9/15/2013	Federal Information Security Management Act of 2002 (FISMA) (Title III of the E-Government Act of 2002) (P.L. 107-347); House Report 107-787 Sec. 3535 (b)(1), p. 34, p. 80, p. 102, p. 109	Annual Information Security Review - Annual independent evaluation of the information security program and practices of the agency to determine the effectiveness of such program and practices.	Expected to complete by 9/15/2013.

#	Fiscal Year	Due Date	Reference/Citation	Requirement	Status
7	2008	9/15/2013	FY 2008 Consolidated Appropriations (P.L. 110-161)	Annual Agency-wide Periodic Privacy Act Review -Sec. 742. (a) None of the funds made available in this Act may be used in contravention of Section 552a of Title 5, United States Code (popularly known as the Privacy Act) and regulations implementing that section. (b) Section 522 of Division H of the Consolidated Appropriations Act, 2005 (Public Law 108-447; 118 Stat. 3268; 5 U.S.C. 552a note) is amended by striking subsection (d) and inserting the following: “(d) INSPECTOR GENERAL REVIEW.—The Inspector General of each agency shall periodically conduct a review of the agency’s implementation of this section and shall report the results of its review to the Committees on Appropriations of the House of Representatives and the Senate, the House Committee on Oversight and Government Reform, and the Senate Committee on Homeland Security and Governmental Affairs. The report required by this review may be incorporated into a related report to Congress otherwise required by law including, but not limited to, 44 U.S.C. 3545, the Federal Information Security Management Act of 2002. The Inspector General may contract with an independent, third party organization to conduct the review.” (Note - This review is included in the annual FISMA review.)	Expected to complete by 9/15/2013.
8	1998	2/1/2013	Office of National Drug Control Policy Reauthorization Act of 1998 (P.L. 105-277), Sec. 705(d) (Title VII of the FY 1999 Omnibus Consolidated and Emergency Supplemental Appropriations Act); ONDCP Circular: Drug Control Accounting (May 1, 2007)	Annual Office of National Drug Control Policy (ONDCP) Review – Reviews of CBP, USCG, and ICE – Under 21 U.S.C. § 1704(d) and the ONDCP Circular: Drug Control Accounting (dated May 1, 2007), our office is required to perform a review of assertions made by the Department related to all funds expended by the Department for National Drug Control Program activities during the previous fiscal year.	Completed. OIG-13-27; OIG-13-28; OIG-13-29; OIG-13-30; OIG-13-31; OIG-13-32; OIG-13-34; OIG-13-35.

#	Fiscal Year	Due Date	Reference/Citation	Requirement	Status
9	2012	2/4/2013	FY 2012 Omnibus Appropriations Act (P.L. 112-74); FY 2013 Homeland Security Appropriations (H.R. 5855 - passed House only); FY 2013 Continuing Appropriations Act (P.L. 112-175)	Review of Departmental Contracts - Requires the Inspector General to review Departmental contracts awarded noncompetitively during the prior Fiscal Year and report on the results.	Completed. <i>OIG-13-36, DHS Contracts Awarded Through Other Than Full and Open Competition During Fiscal Year 2012</i>
10	2010	3/30/2013	Improper Payments Elimination and Recovery Act (IPERA) of 2010 (P.L. 111-204)	IPERA Audit - Requires each agency's Inspector General to report each fiscal year regarding the agency's compliance with requirements of the Act.	Ongoing: Expected to complete by 3/30/2013.
11	2008	Third Quarter Calendar Year 2012 report due 10/31/2012	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Completed.
12	2008	Fourth Quarter Calendar Year 2012 report due 1/31/2013	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Completed.

13	2008	First Quarter Calendar Year 2013 report due 4/30/2013	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Expected to complete by 4/30/2013.
14	2008	Second Quarter Calendar Year 2013 report due 7/31/2013	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Expected to complete by 7/31/2013.
15	2002	9/15/2013	The Homeland Security Act of 2002 (P.L. 107-296), Sec. 888(f)	Annual USCG Mission Review - Annual review to assess thoroughly the performance by the Coast Guard of all missions of the Coast Guard, with a particular emphasis on examining the non-homeland security missions.	Expected to complete by 9/15/2013.
16	2004	9/15/2013	The Coast Guard & Maritime Transportation Act of 2004 (P.L. 108-293), Sec. 809(g)	Annual Cargo Inspection Report - Inspector General report evaluating cargo inspection targeting system for international intermodal cargo containers.	Expected to complete by 9/15/2013.
17	2012	9/15/2013	FY 2012 Omnibus Appropriations Act (P.L. 112-74); FY 2013 Homeland Security Appropriations (H.R. 5855 - passed House only); FY 2013 Continuing Appropriations Act (P.L. 112-175)	ICE's 287(g) Agreements -- It is implied that OIG must review the delegation of law enforcement authority agreements that ICE enters into pursuant to section 287(g) of the Immigration and Nationality Act. Specifically, the bill requires ICE to cancel any 287(g) agreements where the Inspector General has determined that the terms of the agreement have been violated.	Expected to complete by 9/15/2013.

#	Fiscal Year	Due Date	Reference/Citation	Requirement	Status
18	2007	12/31/2012	Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53), Sec. 2022(a)(3) (D)	Annual Consolidated Report on Reviews of Grants to States and High Risk Urban Areas - The Inspector General of the Department shall submit to the appropriate committees of Congress an annual consolidated report regarding the audits completed during the fiscal year before the date of that report.	Completed. OIG-13-18, <i>Annual Report to Congress on States' and Urban Areas' Management of Homeland Security Grant Programs</i>
19	2007	8/3/2014	Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53), Sec. 2022(a)(3)	Annual Review of Grants to States and High Risk Urban Areas - Requires Inspector General to conduct annual audits of a sample of states and high-risk urban areas that receive certain grant monies. Also requires one audit of each state that is a recipient of grant funding in the seven year period post-enactment of the legislation.	Ongoing: 30 state audits completed; 16 audits currently ongoing. All required audits expected to be completed by August 2014.
20	2011	9/30/2016	Reducing Over-Classification Act (P.L. 111-258)	Classification Program Review - Requires that the Inspector General (in consultation with the Information Security Oversight Office) perform at least two evaluations of the Department's classification program by September 30, 2016. The first review must be completed no later than September 30, 2013.	Part 1 expected to complete by 9/30/2013.
21	2012	03/24/2012 & every 3 months thereafter until June 2013	FY 2012 Omnibus Appropriations Act (P.L. 112-74); Division D, Sec. 565	Disaster Assistance Recoupment Fairness Act of 2011 – Three months after the date of enactment of this Act and every three months thereafter for 18 months, the DHS IG shall submit a report that assesses the cost-effectiveness of the efforts of FEMA to recoup improper payments under the Individuals and Households Program under section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act. The report must be submitted to Senate and House Appropriations, Senate HSGAC, the House Committee on Homeland Security, and the House Committee on Transportation and Infrastructure.	4 reports completed; remaining two reports expected on time.
22	2012	10/1/2012	FY 2012 National Defense Authorization Act (P.L. 112-81)	Report Regarding SBIR and STTR – The IG of each federal agency participates in the SBIR or STTR program must submit an annual report to the Senate Committee on Small Business and Entrepreneurship and the House Committee on Small Business and the Committee on Science, Space, and Technology a report describing (1) the number of cases referred to the OIG in the preceding year that related to fraud, waste, or abuse with respect to the SBIR program or STTR program; (2) the actions taken in each case described in paragraph (1) if fraud, waste, or abuse was determined to have occurred; (3) if no action was taken in a case described in paragraph (1) and fraud, waste, or abuse was determined to have occurred, the justification for action not being taken; and (4) an accounting of the funds used to address fraud, waste, and abuse, including a description of personnel and resources funded and funds that were recovered or saved.	Completed.

BUDGET REQUEST AND SUPPORTING INFORMATION

Office of Inspector General Audits, Inspections and Investigations

I. Appropriation Overview

A. Mission Statement:

The Department of Homeland Security (DHS) Office of Inspector General (OIG) was established by the *Homeland Security Act of 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The OIG has a dual reporting responsibility to the Secretary of DHS and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS's programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. The OIG's oversight extends to the Department's 200,000+ employees and varied missions and programs worldwide. The requested resources are required to sustain on-going initiatives and maintain the level of oversight required by the scope, complexity, and the importance of DHS's mission, which is to secure a safer America resilient against terrorism and other potential threats. Based on direction from DHS, for fiscal year (FY) 2014, the OIG requests 681 full-time positions (FTP), 681 full time equivalents (FTE) and \$143.309 million. This includes a transfer from the Federal Emergency Management Agency's (FEMA's) Disaster Relief Fund (DRF) of \$24 million. The request is an increase of \$2.309 million over the FY 2012 Revised Enacted.

Mission Statement

The OIG contributes to DHS's success by providing objective information to promote government management, decision making, and accountability. The OIG is an agent of positive change, focusing on eliminating waste, fraud and abuse, and on identifying problems and recommendations for corrective actions by agency leadership. The OIG provides the Department and the Congress with objective assessments of departmental programs and operations in order to make them more successful.

The OIG conducts and supervises audits, inspections, special reviews, and investigations of the Department's programs and operations, including program and financial management, contract and grant activity, and disaster relief efforts. The OIG conducts these reviews to offer recommendations for improving the economy, efficiency, and effectiveness of the Department's operations and activities, when necessary; and to deter, identify, and address fraud, waste, and abuse. The OIG annually publishes a schedule of audits, inspections, and investigations that will assist the Department in fulfilling its mission and goals, and reports its findings to the Secretary, the Congress, and the public, when appropriate. The Inspector General's (IG's) statements for the record and testimony may be accessed through our website at www.oig.dhs.gov.

B. Budget Activities:

The OIG has one budget for audits, inspections, and investigations; the request funds 681 FTE assigned to the following executive management and oversight teams:

The Executive Office consists of the IG, the Deputy IG, a Chief of Staff, a Deputy Chief of Staff, a Senior Management Analyst, and a Special Assistant. It provides executive leadership to the OIG. The office has 6 FTE.

The Office of External Affairs (OEA) serves as primary liaison to members of Congress and their staffs, the White House and Executive Branch, and to other governmental agencies and entities involved in securing the Nation. OEA also is the principal point of contact for the OIG with all media outlets and the general public. The office staff responds to inquiries from the Congress and the White House; notifies the Congress about OIG initiatives, policies, and programs; and informs other governmental entities about OIG initiatives that affect their operations and activities. The office distributes correspondence and final audit, inspection, and special reports to the Congress and the White House. It also provides advice to the IG and supports OIG staff as they address Congressional and White House inquiries. OEA provides news organizations with accurate and timely information in compliance with legal, regulatory, and procedural rules and requirements. Additionally, OEA is responsible for an integrated communications approach, addressing external and internal communication functions. The office prepares and issues news releases, arranges interviews, and coordinates and analyzes information to support the OIG's policy development and mass communications needs. OEA ensures that information provided is current, accurate, and issued in a timely manner, promoting accountability and transparency in the work of the OIG. Furthermore, OEA provides counsel to the IG and other management officials on complex programmatic and public affairs issues that affect the OIG and its relationship with DHS, other Federal, State, and local government offices, the media, and the general public. The office has 6 FTE.

The Office of Counsel (OC) provides legal advice and guidance to the IG and other management officials. The office interprets laws, rules and regulations, reviews reports and correspondence, and further supports audits, inspections, and investigations by ensuring and conducting legal sufficiency reviews. OC represents the OIG in Equal Employment Opportunity actions, Merit Systems Protection Board actions, and claims filed under the *Federal Torts Claims Act*; represents OIG investigators in conjunction with the Department of Justice (DOJ) in *Bivens* actions; and assists DOJ with *Giglio* requests. The office reviews all DHS management directives and delegations to ensure protection of OIG authorities and compliance of applicable laws and regulations. The office serves as the OIG's designated ethics office, manages the OIG's *Freedom of Information Act* and *Privacy Act* responsibilities, furnishes attorney services for the issuance and enforcement of OIG subpoenas, and provides legal advice on OIG operations. The office has 14 FTE.

The Office of Management (OM) provides critical administrative support functions, including strategic planning and budgeting; development and implementation of administrative directives; management of information and office automation systems; and oversight of personnel, training, procurement, security systems, and policy. It utilizes the Bureau of Public Debt to provide travel and accounting services on a reimbursable basis. The office also prepares the OIG's annual performance plans and the semiannual reports to the Congress. The office has 63 FTE.

The Office of Audits (OA) conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. The office evaluates whether established goals and objectives are achieved and resources are used economically and efficiently; ensures whether intended and realized results are consistent with laws, regulations, and good business practice; and determines whether financial accountability is achieved and the financial statements are not materially misstated. The office has 173 FTE.

The Office of Information Technology Audits (ITA) conducts audits and evaluations of DHS's information management, cyber infrastructure, and systems integration activities; and provides technical forensics assistance to OIG offices in support of the OIG's fraud prevention and detection mission. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. The office evaluates the information systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office assesses DHS's information security program as mandated by the *Federal Information Security Management Act*. The office also provides technical forensics assistance to OIG offices in support of OIG's fraud prevention and detection program. The office has 50 FTE.

The Office of Inspections (ISP) provides the IG with a means to analyze programs quickly and to evaluate operational efficiency, effectiveness, and vulnerability. This work includes special reviews of highly visible or sensitive issues that arise suddenly, as well as congressional requests and mandates for studies that require immediate attention. The nature of this work requires timely reporting to high-level audiences, including the Secretary and the Congress. The office has four specialty areas: science and technology, civil rights and civil liberties, intelligence oversight, and international operations, but may examine any area of the Department in an effort to strengthen and unify DHS operations and management systems and make recommendations that can help ensure that the Department programs function efficiently, effectively, and with minimal vulnerability. The office is the lead organization in the OIG for monitoring DHS intelligence activities. DHS has two members of the Intelligence Community (IC) - the United States Coast Guard and the Office of Intelligence and Analysis, both of whom represent DHS's connection to the IC. Therefore, it is essential that the OIG provide oversight of their intelligence activities. OIG's goal is to ensure that the DHS intelligence enterprise conducts its operations according to law; that intelligence is appropriately shared among DHS components, other Federal agencies, and State and local stakeholders; and that initiatives such as fusion centers and protective security advisors operate effectively and efficiently. In this capacity, the office reports on the use of intelligence information within the Department, and coordinates the OIG's interaction with the multi-agency intelligence community. The office has 44 FTE.

The Office of Investigations (INV) conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, grantees, and programs. These investigations can result in criminal prosecutions, fines, civil monetary penalties, and administrative sanctions and personnel actions. The office has broad investigative and oversight responsibilities which mirrors Departmental priorities in working to ensure the integrity of the Nation's immigration system, borders, ports of entry, and national transportation network. INV is committed to protecting the civil rights and liberties of all persons in the US and investigates all referrals of detainee deaths

involving unusual or suspicious circumstances, all on-duty incidents involving the discharge of a firearm by a DHS employee, and all credible allegations of criminal abuse of authority that result in the deprivation of rights or other serious criminal offense. Further, INV conducts investigations into allegations of gross misuse of classified information, privacy or law enforcement information and allegations of criminal misconduct in the administration of immigration benefits. In addition, INV oversees the integrity of programs that distribute DHS funds for routine operations; in response to disasters and disaster preparedness training and in association with programs used in the development of technologies critical to combating terrorism. INV collects, analyzes, and distributes data concerning fraud and misconduct through our national hotline operation and the National Center for Disaster Fraud (NCDF). The Investigations Hotline Correspondence Unit continues improvements to its systems for receiving, routing, and responding to thousands of routine complaints each year which report allegations of criminal or administrative misconduct, theft of Departmental funds, corruption by DHS employees or other serious misconduct involving DHS employees, contractors, grantees, and programs. The unit also receives and responds to Congressional and other official correspondence. The INV FEMA Support Unit maintains a liaison with FEMA and provides support to the NCDF by improving information access and communications, ensuring complaints are referred for investigation, and that prosecutions and recoveries are accurately tracked and documented. Additionally, INV continues to exercise important oversight responsibilities and monitors the investigative activity of the DHS Component Internal Affairs units who are tasked with investigating administrative misconduct issues within the Department. The newly developed Forensic Threat Analysis Unit is responsible for analyzing investigative information and associating data to identify trends, patterns, locations, and individuals suspected of corrupt behavior. Evidence of criminality will be forwarded to field Components for further investigation, enhancing our effectiveness in detecting and combating corruption. The office has 260 FTE.

The Office of Emergency Management Oversight (EMO) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. The office is an independent and objective means of keeping the Congress, the Secretary, the Administrator of FEMA, and other Federal disaster relief agencies fully informed on problems and deficiencies relating to disaster operations and assistance programs, and progress regarding corrective actions. EMO's focus is weighed heavily towards prevention, including reviewing internal controls, and monitoring and advising DHS and FEMA officials on contracts, grants, and purchase transactions before they are approved. This allows the office to stay current on disaster relief operations and provide on-the-spot advice on internal controls and precedent-setting decisions. The office coordinates with other Federal IG offices, meets with State and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 65 FTE.

C. Budget Request Summary:

The OIG requests 681 FTP, 681 FTE, and \$143.309 million for FY 2014. This includes \$119.309 million as a base appropriation and \$24 million as a transfer from the Federal Emergency Management Agency (FEMA) Disaster Relief Fund (DRF). The FY 2014 OIG request includes \$1.0 million for training and \$0.468 million for supporting the Council of Inspectors General on Integrity and Efficiency (CIGIE). The OIG's request reflects adjustments-to-base totaling -\$0.256 million including increases of \$0.023 million for the transfer of working capital fund Under Secretary for Management Office of Chief Readiness Support Office (USM CRSO) shared services, \$1.068 million for pay increase, and \$1.320 million for annualization of prior year part year funded FTE. The base adjustment also includes decreases for efficiencies totaling \$2.667 million with \$0.316 million for mission support personnel, \$0.052 million for supplies and materials, \$1.062 million for travel, and \$1.237 million for outsourcing efficiencies. The programmatic increase of \$2.565 million executes the *9/11 Commission Act* audits of States and territories receiving grants administered by the Department. The overall increase over the FY 2012 Revised Enacted is \$2.309 million.

D. Efficiencies:

- **Mission Support and Personnel Efficiencies** **\$0.316 million**

Mission Support Staffing - OM (\$0.316 million) - This request includes a savings of \$0.316 million, which will be realized by eliminating 2 FTE positions in mission support, saving \$0.250 million in salaries and benefits and \$0.066 million in non-personnel categories.

- **Supplies and Materials Efficiencies** **\$0.052 million**

Supplies and Materials (\$0.052 million) - This efficiency reflects a \$0.052 million reduction in supplies and materials that will be utilized at the OIG headquarters and field offices.

- **Travel Efficiencies** **\$1.062 million**

Travel (\$1.062 million) – This reflects savings of \$1.062 million which will be realized by minimizing conferences and travel for individual training, restricting any travel other than for mission - critical projects, fully implementing the requirement to utilize the self-service feature in the GovTrip system, and utilizing video conference technology for meetings.

- **Advisory and Assistance Contracts Efficiencies** **\$1.237 million**

Outsourcing Efficiencies (\$1.237 million) – This request includes savings of \$1.237 million from reducing outsourcing of services OIG-wide. This includes inter-agency agreements and private contracts.

E. Initial Budget Request:

The OIG submitted an initial request of \$161.7 million in funding to DHS at the beginning of the

FY 2014 budget process. It requested 50 new positions and 25 FTE for investigative efforts. The request included program increases totaling \$18.2 million that consisted of two major components:

- \$12.5 million to increase investigative services
- \$ 5.7 million to build out General Service Administration space with no increase in position or FTE.

Complying with Departmental guidance, OIG's request was reduced to \$118.3 million and excluded the \$24 million transfer from FEMA's DRF. The OMB's passback settlement provided \$143.309 million in resources, an increase of \$2.309 over the FY 2012 Revised Enacted and includes the \$24 million transfer from FEMA's DRF. This is \$18.4 million less than the initial request.

Notes: The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L. 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.

FY 2014 Request includes \$24 million transfer from FEMA's DRF. FY 2013 Annualized CR does not include \$3 million for Hurricane Sandy Supplemental.

FY 2012 Revised Enacted 779 FTE displayed on the SF 113G includes Cadre of On-Call Response/Recovery Employees (CORE), Student Interns, and American Recovery and Reinvestment Act (ARRA) audit employees.

III. Current Services Program Description by PPA

Department of Homeland Security
Office of Inspector General
Audits, Inspections and Investigations
Program Performance Justification
(Dollars in Thousands)

PPA: Audits, Inspections and Investigations

	Perm. Pos	FTE	Amount
2012 Revised Enacted	683	676	141,000
2014 Adjustments-to-Base	(2)	5	(256)
2014 Current Services	681	681	140,744
2014 Program Change	-	-	2,565
2014 Total Request	681	681	143,309
Total Change 2012 to 2014	(2)	5	2,309

The OIG requests 681 FTP, 681 FTE, and \$143.309 million for FY 2014. This includes \$119.309 million as a base appropriation and \$24 million as a transfer from the Federal Emergency Management Agency (FEMA) Disaster Relief Fund (DRF). The FY 2014 OIG request includes \$1.0 million for training and \$0.468 million for supporting the CIGIE. The OIG’s request reflects adjustment-to-base increases totaling -\$0.256 million including increases of \$0.023 million for the transfer of Working Capital Fund USM CRSO shared services, \$1.068 million for pay increase, and \$1.320 million for annualization of prior year part year funded FTE. The base adjustment also includes decreases for efficiencies totaling \$2.667 million with \$0.316 million for mission support personnel, \$0.052 million for supplies and materials, \$1.062 million for travel, and \$1.237 million for outsourcing efficiencies. The programmatic increase of \$2.565 million executes the *9/11 Commission Act* audits of States and territories receiving grants administered by the Department. The overall increase over the FY 2012 Revised Enacted is \$2.309 million.

The Audits, Inspections and Investigations Program/Project Activity will achieve efficiencies through personnel, supplies and materials, travel, strategic sourcing, contractual services, and information technology infrastructure reductions.

CURRENT SERVICES PROGRAM DESCRIPTION:

Specifically, the OIG’s key legislated responsibilities, and the funds requested in FY 2014 are to:

- Promote economy, efficiency, and effectiveness in the management of the Department’s programs and supporting operations;

- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other Federal, State, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIGs;
- Inform the Secretary of Homeland Security and the Congress of serious problems and recommend corrective actions and implementation strategies; and,
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and report violations of Federal criminal law to the U.S. Attorney General.

PROCUREMENT ACTIVITIES:

Not applicable.

IV. Program Justification Changes

**Department of Homeland Security
Office of Inspector General
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Implementing the Recommendation of the 9/11 Commission Act
PPA: Audits, Inspections and Investigations
Program Increase: Positions 0, FTE 0, Dollars \$2,565

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request(as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							681	681	140,744
Program Increase							-	-	2,565
Total Request	683	676	141,000	683	681	141,863	681	681	143,309

Description of Item

The *9/11 Commission Act* mandated that the OIG conduct audits of all States and territories that received FEMA grant funds to prevent, prepare for, protect against, or respond to natural disasters, acts of terrorism, and other disasters. Also, the Act authorized DHS to allocate \$8.5 million for fiscal years 2008, 2009, and 2010 and sums as are necessary for FY 2011 and each fiscal year thereafter. Accordingly, the OIG requested \$36.6 million from fiscal years 2008 - 2013. However, OIG received a total of \$3.5 million in DHS transfers in fiscal years 2008 and 2009 to conduct the mandated audits. Funding pays for contracted auditing services as well as OIG in-house auditors' expenses, which includes travel and supplies. The OIG will accomplish the *9/11 Commission Act* audits using both contracted and in-house auditors. The OIG expects to perform compliance audits with contracted auditors and the performance audits with in-house personnel.

Justification

The \$2.565 million requested increase in FY 2014 will provide the necessary contract funds to stay on track to complete the congressionally mandated audits by August 2014. To date, the OIG has completed 31 and started 16 out of 61 required audits. In FY 2013, the OIG plans to complete 20 audits and start the remaining audits. The \$2.565 million increase will allow the OIG to conduct the remaining audits in FY 2014, meeting the deadline. Without these budgetary resources, the OIG cannot meet the congressionally mandated timeline for completion.

Impact on Performance (Relationship of Increase to Strategic Goals)

The proposed increase will enable the OIG to prioritize, schedule, and execute pending *9/11 Commission Act* audits according to the timeline established by Congress. Funding enables the OIG to design the right mix of contracted and in-house services, without stressing its core oversight functions or assets. Averting fraud, waste, and abuse through OIG audits contributes to the Department's goal of maturing and strengthening the Homeland Security enterprise.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Office of Inspector General
Justification of Proposed Changes in Audits, Inspections and Investigations
Appropriation Language**

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), [\$143,664,000] \$119,309,000 of which not to exceed \$300,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General..

Note: Please see Exhibit A in FEMA DRF CJ for Appropriations language transferring \$24 million to the OIG.

Explanation of Changes:

The FY 2014 request formalizes the transfer of \$24 million to the OIG for audits and investigations related to disasters.

Audits, Inspections and Investigations Mission Statement

The OIG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and operations of DHS, recommending ways for the Department to carry out its responsibilities in the most effective, efficient, and economical manner possible. The OIG serves as an independent body to deter, identify and address fraud, abuse, mismanagement, and waste in DHS programs and operations.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
11.1 Total FTE & personnel compensation	\$70,194	\$70,194	\$71,748	\$1,554
11.3 Other than full-time permanent	2,417	2,417	2,417	-
11.5 Other personnel compensation	5,006	5,006	5,006	-
11.6 Pay Diff (Sun/Night)	14	14	14	-
11.7 Military personnel/Awards	1,570	1,570	707	(863)
12.1 Benefits	25,799	26,018	26,536	737
12.4 Allowances	-	8	8	8
13.0 Unemployment Compensation	7	7	7	-
Total, Salaries & Benefits	\$105,007	\$105,234	\$106,443	\$1,436

Annualization of prior year part year funding and FY 2014 pay increase. The reduction of 2 positions for efficiency is also factored.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
21.0 Travel	\$4,785	\$3,641	\$3,641	-\$1,144

The FY 2014 request reflects savings in travel which will be realized by minimizing conferences and travel for individual training, restricting any travel other than for mission critical projects.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.1 GSA rent	\$12,540	\$12,891	\$12,590	\$50

GSA rent increase from FY 2012 to FY 2014 due to inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.2 Other rent	\$206	\$406	\$406	\$200

Other rent increase due to inflation.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
23.3 Communications, utilities, and misc. charges	\$3,474	\$3,761	\$3,761	\$287

Communications, utilities, and miscellaneous charges reflect an increase from FY 2012 to FY 2014 for Federal Telecommunications System and Washington Interagency Telecommunication System charge increases.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
24.0 Printing	\$38	\$34	\$34	-\$4

The FY 2014 request reflects the reduction in printing as it relates to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.1 Advisory and assistance services	\$2,843	\$3,542	\$4,870	\$2,027

The FY 2014 request includes a programmatic increase of \$2.565 million to execute the 9/11 Commission Act audits. Also, the requests incorporate the decrease of \$1.237 million for outsourcing efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.2 Other services	\$715	\$735	\$758	\$43

The FY 2014 request reflects an increase including the transfer of the working capital fund USM OCAO shared services.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
25.3 Purchases from Gov't accts.	\$6,247	\$6,247	\$5,486	-\$761

The FY 2014 request reflects reduced Interagency Agreements.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
26.0 Supplies and materials	\$1,176	\$882	\$830	-\$346

The FY 2014 request reflects the reduction in supplies as it relates to efficiencies.

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change
31.0 Equipment	\$2,242	\$2,763	\$2,763	\$521

The increase for equipment from FY 2012 to FY 2014 includes all costs as it relates to the initial installation of equipment when performed under contract. The FY 2014 request reflects the anticipated needs of the OIG for equipment.

FY 2014 Budget Request	1
B. Component Contributions to Achieving QHSR Missions	2
Maturing and Strengthening the Homeland Security Enterprise	2
Resources Requested	2
Performance Measures	3

A. Component Overview

The Office of Inspector General (OIG) is comprised of the following programs that support achievement of the Department of Homeland Security (DHS) strategic missions, goals, and objectives.

Audits, Inspections and Investigations:

The *Inspector General Act of 1978*, as amended, requires OIG to serve as an independent and objective audit, inspection, and investigative body to promote effectiveness, efficiency, and economy in DHS's programs and operations, and to prevent and detect fraud, abuse, mismanagement, and waste in such programs and operations. The criteria used to select programs for audits and inspections include: statutory and regulatory requirements; adequacy of internal control systems; newness; changed conditions; mission criticality; and potential dollar magnitude.

FY 2014 Budget Request

The table below shows OIG's FY 2014 budget request by its Future Years Homeland Security Program (FYHSP) programs.

FYHSP Program	FY 2014 Request	
	FTE	Dollars (in thousands)
Audits, Inspections and Investigations	681	\$143,309
*Total Budget Request	681	\$143,309

*Includes transfer from FEMA's DRF in the amount of \$24 million

B. Component Contributions to Achieving QHSR Missions

The table below shows the alignment of OIG programs to the DHS Missions and Maturing and Strengthening the Homeland Security Enterprise.

Programs	DHS Missions					National and Economic Security	Maturing and Strengthening the Homeland Security Enterprise
	Preventing Terrorism and Enhancing Security	Securing and Managing Our Borders	Enforcing and Administering Our Immigration Laws	Safeguarding and Securing Cyberspace	Ensuring Resilience to Disasters		
Audits, Inspections, and Investigations							100%

Maturing and Strengthening the Homeland Security Enterprise

One of the Department’s objectives is to improve DHS’s organizational and programmatic alignment and its management systems and processes. Ensuring unity of effort across the homeland security enterprise requires unity of effort within the Department. Critical to unifying DHS is improved organizational alignment, particularly among DHS headquarters components, enhanced programmatic alignment to homeland security missions, and more efficient and effective management processes, including strategic planning, performance management, and accounting structure.

In accordance with the *Inspector General Act of 1978*, as amended, the OIG provides a comprehensive oversight program that is independent of the Department, and has separate statutory authority. The OIG Audits, Inspections, and Investigations program provides an objective, third party assessment to ensure integrity, prevention, and detection, and ferrets out fraud, waste, and abuse in DHS programs and operations. These activities result in financial savings, cost avoidance and recoveries. Averting fraud, waste, and abuse clearly contributes to the DHS goal of achieving organizational excellence, in addition to all other DHS strategic goals, while also providing the various DHS components and Congress with the assurances that DHS resources are being used as intended.

Resources Requested

OIG resources supporting *Maturing and Strengthening the Homeland Security Enterprise* are provided in the table below.

\$ in thousands

Program	FY 2012		FY 2013		FY 2014	
	\$	FTE	\$	FTE	\$	FTE
Audits, Inspections and Investigations	\$141,000	676	\$141,863	681	\$143,309	681
*Total	\$141,000	676	\$141,863	681	\$143,309	681

*Includes transfer from FEMA’s DRF in the amount of \$24 million

Performance Measures

Because Maturing and Strengthening the Homeland Security Enterprise is not a direct Departmental mission, measures for this area are developed at the management level.

Management Measures

Measure: Number of management reports (audits and inspections) issued during the reporting period						
Description: The IG Act requires the OIG to audit programs for fraud, waste, and abuse. The Act also requires the review of programs for activities designed to promote economy, efficiency, and effectiveness. The criteria used to select programs for audit and inspection include: statutory and regulatory requirements; adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; etc. Where appropriate, OIG audit and inspection reports include recommendations which if accepted and implemented, will improve the respective program. The OIG tracks final audit and inspection reports and the recommendations that are issued in those reports.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	N/A	71	90	95	95	95
Result:	N/A	124	118	132	N/A	N/A

Measure: Percent of recommendations made by the Office of Inspector General (OIG) that are accepted by the Department of Homeland Security						
Description: The OIG audits and inspects programs for fraud, waste, and abuse. OIG also reviews programs to promote economy, efficiency, and effectiveness. The criteria used to select programs for audit or inspection includes: statutory and regulatory requirements; adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; etc. Where appropriate, OIG audit and inspection reports include recommendations which, if accepted and implemented, will improve the respective program. This measure reflects the percent of recommendations made by the OIG that are accepted and implemented by the Department of Homeland Security (DHS). The OIG tracks the recommendations that are issued until they have been implemented.						
Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	85%	85%	85%	90%	90%	90%
Result:	93%	95%	96%	95%	N/A	N/A

Measure: Percent of substantiated investigations that are accepted for criminal, civil, or administrative action

Description: The measure reports on the number of substantiated investigations that are accepted for criminal, civil, or administrative action in comparison to all substantiated investigations that the Department of Homeland Security (DHS) Office of Inspector General (OIG) conducts during the fiscal year. This measure demonstrates a portion of the impact that OIG investigations have on DHS operations, as well as operations of the entire federal government.

Fiscal Year:	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Target:	75%	75%	75%	76%	76%	76%
Result:	82%	80%	81%	68%	N/A	N/A

* Of the \$197.3 million Immigration User Fee increase, \$165.7 million is attributable to the increase in fee rates and \$31.6 million is associated with an increase in passenger and conveyance volume.

** Of the \$231.5 million COBRA increase, \$194.5 million is attributable to the increase in fee rates and \$37 million is associated with an increase in passenger and conveyance volume.

iii. Status of Congressional Requested Studies, Reports, and Evaluations

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2012	9/30/2012	FY 2012 Department of Homeland Security Appropriations Act; Senate Report 112-74	Drug Trafficking Organization "Spotters" -- The Committee is concerned that reports of activities by drug cartel “spotters”—individuals stationed in key locations in the United States along drug and alien smuggling routes on the Southwest Border—are increasing. The Committee directs the Secretary to submit a report detailing the extent and scope of this activity, its impact on Federal border law enforcement activities, methods it uses—or is considering using—to stop or limit this activity, and specific Federal, State, or local laws violated by these individuals and their activities. The report should also note, if applicable, whether this activity is illegal and/or preventable. A classified version of the report should be submitted if necessary.	Report is being reviewed by DHS.
2012	2/15/2012	FY 2012 Department of Homeland Security Appropriations Act; Joint Explanatory Statement, Division D; Senate Report 112-74; House Report 112-91	Ports of Entry Staffing Model (Resource Optimization at the POEs) -- CBP must update its POE staffing model with a particular emphasis on staffing requirements reflecting both the new and renovated POEs that have been brought online, as well as the increase in cross-border commercial and passenger traffic as the economy improves.	Report is being reviewed by DHS.
2008	12/26/2012	FY 2008 Appropriations Act, PL 110-161	SEC 605 – Port of Entry Technology Demonstration Program: (e) Report- (1) REQUIREMENT- Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security a report on the activities carried out at each demonstration site under the technology demonstration program established under this section. (2) CONTENT- The report shall include an assessment by the Commissioner of the feasibility of incorporating any demonstrated technology for use throughout U.S. Customs and Border Protection.	Report is being reviewed by DHS.

2012	12/31/2012	<p>FY 2012 Department of Homeland Security Appropriations Act; Joint Explanatory Statement, Division D; Senate Report 112-74</p> <p>NAFTA Implementation Act, Section 691</p>	<p>FY12 Annual Antidumping and Countervailing Duty Enforcement -- The Committee directs CBP to continue to work with the Departments of Commerce and the Treasury and the Office of the United States Trade Representative (and all other relevant agencies) to increase collections, and provide a public report on an annual basis within 30 days of each year's distributions under the law. The report should summarize CBP's efforts to collect past due amounts and increase current collections, particularly with respect to cases involving unfairly traded United States imports from China. The report shall provide the amount of uncollected duties for each antidumping and countervailing duty order, and indicate the amount of open, unpaid bills for each such order. In that report, the Secretary, in consultation with other relevant agencies, including the Secretaries of the Treasury and Commerce, should also advise as to whether CBP can adjust its bonding requirements to further protect revenue without violating U.S. law or international obligations, and without imposing unreasonable costs upon importers.</p> <p>...</p> <p>Consistent with section 691a of Public Law 103-182, the North American Free Trade Agreement Implementing Act of 1993, the Committee directs the Commissioner of Customs to submit to Congress before the 60th day of each fiscal year a report regarding the collection of duties imposed under the antidumping and countervailing duty laws during the preceding fiscal year.</p>	Report is being drafted and/or reviewed by CBP.
2008	1/31/2013	FY 2008 Appropriations Act, PL 110-161, Section 603	<p>POE Infrastructure Assessment Study (FY 2008 Appropriations Act, Section 603 biannual report) -- SEC 603. PORT OF ENTRY INFRASTRUCTURE ASSESSMENT STUDY- (a) REQUIREMENT TO UPDATE- Not later than January 31 of every other year, the Commissioner, in consultation with the Administrator of General Services shall--</p> <p>(1) review--</p> <p>(A) the Port of Entry Infrastructure Assessment Study prepared by the United States Customs Service, the Immigration and Naturalization Service, and the General Services Administration in accordance with the matter relating to the ports of entry infrastructure assessment set forth in the joint explanatory statement on page 67 of conference report 106-319, accompanying Public Law 106-58; and</p> <p>(B) the nationwide strategy to prioritize and address the infrastructure needs at the land ports of entry prepared by the Department of Homeland Security and the General Services Administration in accordance with the committee recommendations on page 22 of Senate report 108-86, accompanying Public Law 108-90;</p> <p>(2) update the assessment of the infrastructure needs of all United States land ports of entry; and</p> <p>(3) submit an updated assessment of land port of entry infrastructure needs to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on</p>	Report is being drafted and/or reviewed by CBP.

Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security.

(b) Consultation- In preparing the updated studies required under subsection (a), the Commissioner and the Administrator of General Services shall consult with the Director of the Office of Management and Budget, the Secretary, and affected State and local agencies on the northern and southern borders of the United States.

(c) Content- Each updated study required in subsection (a) shall--

- (1) identify port of entry infrastructure and technology improvement projects that would enhance border security and facilitate the flow of legitimate commerce if implemented;
- (2) include the projects identified in the National Land Border Security Plan required by section 604; and
- (3) prioritize the projects described in paragraphs (1) and (2) based on the ability of a project--
 - (A) to enhance the ability of U.S. Customs and Border Protection to achieve its mission and to support operations;
 - (B) to fulfill security requirements; and
 - (C) facilitate trade across the borders of the United States.

(d) Project Implementation- The Commissioner, as appropriate, shall--

- (1) implement the infrastructure and technology improvement projects described in subsection (c) in the order of priority assigned to each project under subsection (c)(3); or
- (2) forward the prioritized list of infrastructure and technology improvement projects to the Administrator of General Services for implementation in the order of priority assigned to each project under subsection (c)(3).

(e) Divergence From Priorities- The Commissioner may diverge from the priority order if the Commissioner determines that significantly changed circumstances, including immediate security needs, changes in infrastructure in Mexico or Canada, or similar concerns, compellingly alter the need for a project in the United States.

2008	1/31/2013	FY 2008 Appropriations Act, PL 110-161, Section 604	<p>National Land Border Security Plan (FY 2008 Appropriations Act, Section 604 biannual report) -- SEC. 604. NATIONAL LAND BORDER SECURITY PLAN. (a) Requirement for Plan- Not later than January 31 of every other year, the Secretary, acting through the Commissioner, shall prepare a National Land Border Security Plan and submit such plan to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the Senate Committee on the Judiciary, the House Committee on Transportation and Infrastructure, the House Committee on Homeland Security, and the House Committee on the Judiciary.</p> <p>(b) Consultation- In preparing the plan required under subsection (a), the Commissioner shall consult with other appropriate Federal agencies, State and local law enforcement agencies, and private entities that are involved in international trade across the northern or southern border.</p> <p>(c) Vulnerability Assessment-</p> <p>(1) IN GENERAL- The plan required under subsection (a) shall include a vulnerability, risk, and threat assessment of each port of entry located on the northern border or the southern border.</p> <p>(2) PORT SECURITY COORDINATORS- The Secretary, acting through the Commissioner, may establish one or more port security coordinators at each port of entry located on the northern border or the southern border--</p> <p>(A) to assist in conducting a vulnerability assessment at such port; and</p> <p>(B) to provide other assistance with the preparation of the plan required under subsection (a).</p> <p>(d) COORDINATION WITH THE SECURE BORDER INITIATIVE- The plan required under subsection (a) shall include a description of activities undertaken during the previous year as part of the Secure Border Initiative and actions planned for the coming year as part of the Secure Border Initiative.</p>	Report is being drafted and/or reviewed by CBP.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses

As the frontline border agency in the U.S. Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) has the dual mission of preventing suspected terrorists and terrorist weapons from entering the United States, while also facilitating the flow of legitimate trade and travel into and out of the United States. CBP ensures that all persons and cargo enter the United States legally and safely through official checkpoints and ports of entry (POE).

The Salaries and Expenses appropriation funds all operating costs associated with CBP's accomplishment of its dual mission. CBP achieves its mission using a combination of advanced information, risk assessment, appropriate scanning and other technologies, and by partnering with Federal, state, local, tribal and foreign law enforcement agencies as well as private industry and international partners. CBP's approximately 62,000 highly-trained employees ensure that the agency performs its mission with vigilance, integrity and professionalism.

B. Budget Activities:

Headquarters Management and Administration

The Headquarters Management and Administration activities provide critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP frontline personnel.

Border Security Inspections and Trade Facilitation at the Ports of Entry (POE)

CBP uses the resources of this Program, Project, and Activity (PPA) to mitigate the threats from terrorists and to prevent contraband from entering the U.S. while facilitating the legal flow of people and trade. CBP achieves this mission by deploying CBP Officers (CBPO) to the POEs and by using a combination of technology, intelligence, risk information, targeting, and international cooperation to screen inbound international cargo and travelers and, in targeted border areas, to screen departing export cargo. Additional attention to outbound travel along areas of the southwest border also helps prevent the exit of money and weapons for illegal purposes.

CBP has extended a zone of security beyond U.S. physical borders through the use of bilateral and private-sector partnerships, targeting, and by scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy and created a unified, recognizable

presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

Border Security and Control Between the Ports of Entry

This PPA funds the U.S. Border Patrol (USBP). In FY 2014, CBP will implement a new USBP approach focused on Information, Integration, and Rapid Response capabilities in performing the mission of Securing America's Borders. This new strategy involves the USBP moving from a resource-dependent approach to border security to a risk-based approach that enables rapid response to areas of greatest risk in the immediate border area. The USBP will deploy its capabilities to align with the threats along the border. This is an ongoing process that will continue to adapt as threats change.

The new strategic plan places risk management at the core of Border Patrol's strategic planning. Through enhanced situational awareness and intelligence (Information); coordinated operations with Federal, state, local and international partners (Integration), and the ability to respond quickly to changing threats (Rapid Response), the USBP will be able to put the greatest capabilities in place to combat the greatest threats. Field commanders will adopt risk-management as a core planning principle. All sectors will identify their greatest risk and employ sector-specific plans for mitigating risk, using Information, Integration, and Rapid Response.

CBP Air and Marine Salaries

The Air and Marine Operations and Personnel Compensation Benefits PPA contains funding for staff of approximately 1,721 Air Interdiction agents/pilots, Marine Enforcement officers, operational support, and administrative positions. This PPA funds enhancement of staff skills and expertise to enable deterrence, interdiction, and prevention of acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

C. Budget Request Summary:

CBP requests 53,021 positions, 51,742 FTEs, and \$9,237,088,000 for Salaries and Expenses in FY 2014. In total, this represents a change of 1,708 positions, 990 FTE and \$537,207,000 from FY 2012 to FY 2014.

Program Transfer:

Transfer of US-VISIT - The requested funding of \$253.533 million and 283 FTEs reflects the proposed transfer of US-VISIT to CBP and the sustainment of US-VISIT mission and mission support capabilities. CBP would assume responsibility for the core US-VISIT operations and the management of the biometric and biographic information storage and matching and watchlist management services, and ICE will assume responsibility of the US-VISIT overstay analysis services.

Program Increases:

Increase to CBPOs Staffing Level to Promote Travel and Trade - CBP requests an increase of \$210.1 million to fund approximately 1,600 additional CBPOs, (CBPOs) to include 70 canine teams at Ports of Entry, and 245 operational and mission support personnel. The increase will enhance CBP's ability to facilitate processing of legitimate travelers and cargo. In conjunction with the additional CBPOs, additional resources for canine operations will increase the seizures of unlawful items and help reduce wait times. This increase, along with the proposed increase in fee-funded positions (1,877 FTE) will increase the number of CBP officers by over 3,400 and provide the CBPO staffing levels called for in the Office of Field Operations Workload Staffing Model.

Automated Targeting Systems (ATS) O&M - The requested increase of \$31.1 million addresses resource requirements that will support the maintenance of, enhancement and improvement to the ATS, which supports operations of the six modules that comprise it. The funds support time-sensitive technical requirements, continued technical support for maintenance of the targeting framework, advanced targeting capabilities, and ATS hardware and software upgrades.

Targeting Systems - The requested increase of \$31.6 million will support enhancements to targeting systems by updating rules in real time and providing CBP with 24/7 targeting capability. This investment is directly in response to the program/workload increase over the past few years. Improvements in targeting lead to greater efficiencies (broader functionality, time savings, and improved accuracy) in the field and allow CBP to focus on higher-risk passengers and cargo.

National Targeting Center - The requested increase of \$7.8 million will allow CBP to continue to support significant workload increases and program expansion to develop and implement an enhanced targeting strategy that more effectively and efficiently divides cargo and travelers according to the potential threat they pose.

Integrated Traveler Processing - CBP requests an increase of \$8 million for the acquisition of 60 kiosks at airports and at 8 high-volume pedestrian crossings, which represents approximately 73% of the 40 million total pedestrians annually at all pedestrian crossings. These automated kiosks allow trusted travelers to bypass queues and process through Passport Control without having to see a CBP officer. These kiosks will help reduce wait-times and streamline entry into the U.S.

CBP Mobile Program - CBP requests an increase of \$10.8 million for 1,500 additional mobile devices which include Enforcement Link for Mobile Operations (ELMO), handheld license plate/ document reader (MC75A) and SEEK devices to enhance U.S. border operations (air, land, and sea). With these additional investments, CBP anticipates a cost avoidance of up to \$9.7 million and 95,742 inspectional hours, equivalent to adding an additional 81 CBPO FTEs.

Single Transaction Bond (STB) Centralization - CBP currently does not have a centralized office responsible for overseeing and administering the STB program. With this \$3.3 million increase, the Office of Administration (OA) - Revenue Division would assume overall responsibility for

developing, maintaining, and enforcing STB policy; reporting on bond activities; and monitoring results.

Program Decreases:

Managed Hiring, Awards and Support Services- This reduction of consolidates reductions to Mission Support staffing for a number of offices, including Human Resource Management, Commissioner, Congressional Affairs, Administration, Public Affairs, Training and Development, Trade, and International Affairs. The overall reduction, \$103.686 million, will still allow for selected backfill for especially critical positions.

Non-Intrusive Inspection (NII) Investments & Operations and Maintenance (O&M) - The \$30.9 million reduction transitions the NII program to an O&M steady state mode. With this shift in strategy, the program will rely on currently fielded equipment. The NII program will develop a risk mitigation plan to shift NII resources in order to meet mission requirements for facilitating the movement of legitimate trade and intercepting and screening high risk cargo and conveyances.

CBP Transportation Program - CBP will realize a savings of \$23.8 million due to a reduction of the transportation workload and through cost efficiencies. This savings will be acquired through the reconfiguration of the assets used in meeting the lower workload and cost reductions gained from the re-competition of the transportation contract.

Suspend Western Hemisphere Travel Initiative Land Border Integration (WHTI/LBI) Procurement - CBP will decrease the WHTI/LBI procurement program by \$6.0 million. The decrease will not affect program operations. CBP will maintain its current deployed investment and process improvements as well as the operations and maintenance of this program.

Extend Customs-Trade Partnership Against Terrorism (C-TPAT) Validation Cycle to 4 Years - C-TPAT will extend the validation cycle to four years as mandated by the *Security and Accountability for Every (SAFE) Port Act of 2006* (P.L. 109-347). In past years, CBP accelerated the re-validation schedule to once every three years for all importers, carriers and for manufacturers and, more specifically, once every year for Mexico highway carriers which are considered to be high risk. This extension to a four year cycle will yield a savings of \$5.0 million.

Rescoping Immigration Advisory Program (IAP) Program in Incheon and Warsaw - CBP will realize a savings of \$3.5 million from ceasing IAP operations in Warsaw, Poland and Incheon, South Korea; these are the two lowest-volume IAP locations. The closures will allow CBP to maintain its international footprint while expanding the IAP program to other locations.

Legacy Application Standardization - The CBP budget request includes a reduction of \$2.9 million for Legacy Application Standardization. CBP will be consolidating infrastructure environments where possible, and will be looking to retire/consolidate legacy government developed applications.

National Account Manager, Rulings, & Revenue Policy Staff - This request includes a savings of \$2.4 million which will be realized by reducing FTEs in the following offices: two FTE National Account Managers (NAMS); five FTE from Trade, Policy and Program (TP&P) Revenue Branch; and 14 FTE from the Regulations and Rulings (R&R) Policy Staff.

Merge two National Targeting & Analysis Groups (NTAG) - CBP will merge two NTAGs; one located in Dallas, Texas and the other in Chicago, Illinois. These closures will yield a savings of \$1.4 million.

Deactivation of nine inland Border Patrol Stations - CBP will realize savings of \$1.3 million with the deactivation of nine inland stations. The stations are: Billings, MT; Twin Falls, ID; Abilene, Texas; San Angelo, TX; Riverside, CA; Dallas, TX; San Antonio, TX; Lubbock, TX; and Amarillo, TX.

Workforce Shaping – In addition to the managed hiring strategy, CBP will need to make further reductions in mission support staffing. These additional staffing reductions, equating to \$15.5 million and 100 FTE, will be achieved through separation incentives, including Voluntary Early Retirement Authority.

Tactical Analytical Units (TAU) - CBP will realize a \$5.3 million reduction, equating to 48 FTE, across its TAUs. The TAUs collect, analyze, develop, and disseminate actionable information to enhance detection and interdiction capabilities of front-line officers. CBP will realign resources to mitigate risk by maintaining a strong TAU presence at high risk threat locations while reducing the number of TAUs with lower risk threats.

Foreign Language Awards Program (FLAP) - CBP requests a reduction of \$16.0 million in the FLAP to ensure law enforcement staffing costs are fully funded. FLAP was originally implemented as an incentive for U.S. Customs inspectors to learn foreign languages to augment duties at the ports of entry. The value of this incentive has diminished over the years and other CBP personnel [for example Border Patrol agents (BPA) have a language requirement for employment and do not receive special compensation].

CBP Information Technology (IT) Infrastructure & Systems Support - The CBP budget request includes a reduction of \$53.9 million and 25 FTE for CBP-Wide IT Systems and Support. IT infrastructure allows CBP front-line agents and officers to query CBP mission critical applications and receive admissibility data on people and cargo entering our nation's borders

Port Runner/Absconder Mitigation - CBP requests a reduction of \$10.0 million in funding for Port Runner/Absconder Mitigation efforts to ensure law enforcement staffing costs are fully funded. This reduction is a low-risk to operations because the number of port runner/absconder incidents is trending down, and apprehension activities only in low-risk land POEs such as the tactical placement of pursuit vehicles and drivers, and implementation of a Secondary Lot Entry Exit Control (SLEEC) Officer, will be impacted.

Personnel Security – CBP will reduce by \$7.0 million funding to the contracts of Investigation Service Providers for the investigation portion of the Background Investigations (BI) and Periodic Reinvestigations to a level anticipated to address the needs of the agency based on the

current expected hiring plans for CBP. The sequencing of the required polygraph examination for agent and officer candidates enables savings in the contract BI program. CBP will remain in compliance with the *Anti-Corruption Border Act of 2010* (P.L. 111-376).

CBP Fleet Acquisition and Management - CBP will defer replacing vehicles used for operations resulting in a savings of \$48.36 million.

Training and Development - CBP will realize a savings of \$18.9 million and 22 FTE by converting courses to distance learning technology, reducing contractor provided courses, consolidating courses, relocating course venues to more cost efficient delivery locations, eliminating the Tuition Assistance Program and 22 mission support FTEs, and by leveraging opportunities to send instructors to student locations to reduce overall travel costs.

Office of Border Patrol (OBP) Support - In FY 2014, OBP will reduce 7 contract support positions and will also reduce agent-to-equipment ratios and lengthen replacement cycles when appropriate. The total savings from these reductions is \$2.2 million.

OBP Horse Patrol - The \$1 million reduction represents an approximate 33 percent reduction to the Horse Patrol Program, or approximately 115 horses. CBP would preserve the program in critical, more active and high-risk locations along the southwest border, such as Tucson, Rio Grande Valley, and Laredo Sectors.

Overseas Program (Attaches) - The request includes a savings of \$3.7 million and 11 FTE, which will be realized by closing three CBP Attaché offices (Netherlands, Dominican Republic, and Philippines), thereby reducing three FTE, eliminating four Deputy Attaché positions (Japan, China, Brussels, and Canada), terminating support (one FTE) to the DHS Attache' in Canada, and reducing staffing in Mexico by three FTE, saving \$1.8 million in pay and \$1.8 million in non-pay categories.

Financial Systems Support -The Financial Systems Division, which is responsible for the financial systems management, development, and support, will realize reductions totaling \$3.8 million.

Commercial Targeting Enforcement Staff - Commercial Targeting and Enforcement (CTE) will reduce each division (Commercial Targeting, Commercial Enforcement, Trade Analysis & Measures, Trade Information Management, and FOIA) by four positions each. In total, these reductions will yield a savings of \$2.5 million.

US-VISIT mission support staff - The US-VISIT program will reduce its mission support, through attrition, by 55 FTE and \$7.9 million in the areas of strategic and operational planning, human capital, budget and financial management, information technology security and support, acquisition, administration, and logistics. Reduction in staffing costs is one of the savings resulting from consolidation of this program within CBP.

Print Shop services - This program change reflects a \$2.910 million reduction in print services for discretionary products which are not required by law or are not considered mission critical.

Border Patrol Agent overtime - The Office of Border Patrol (OBP) will reduce the agent overtime hours performed nationwide which otherwise would require compensation under the Administratively Uncontrollable Overtime (AUO) provisions: 5 U.S.C. § 5545(c)2; 5 CFR § 550.151-164; Office of Personnel Management (OPM), Compensation Policy Memorandum (CPM) 96-19 Guidance on AUO Pay, December 30, 1996; OPM CPM 97-5 Guidance on AUO Pay, June 13, 1997. In addition, the Border Patrol will reduce the payment of overtime under the Fair Labor Standards Act (FLSA; P.L. 75-718) which is associated with the reduction in the overtime hours performed under the AUO compensation provisions. The overall reduction is \$47.855 million.

Firearms Qualifications - CBP law enforcement personnel receive firearms training on a regular basis and currently must qualify every quarter for proficiency. The Office of Training and Development proposes to achieve significant savings of approximately \$6.4 million by centralizing ammunition procurement and distribution, using less expensive training ammunition, and utilizing a per agent/officer ammunition ratio that meets each operational office's qualification and Use of Force Policy Division established training requirements.

D. Efficiencies and Reductions:

Some of the efficiencies and reduction shown below are spread across multiple sub object class codes.

Personnel Costs & Benefits and Overtime Efficiencies

\$4.8 million

Efficiency through contractor conversions \$31.8 million – This efficiency will be gained through the federalization of additional OIT personnel, which includes an additional in sourcing/federalization of 308 positions. These conversions will also improve CBP compliance with the balanced workforce and government to contractor ratio requirements of OMB 11-30.

Efficiency to Office of Border Patrol Holiday Pay (\$8.0 million) – To achieve this efficiency, OBP would allocate holiday hours and associated funding at the sector and station level in line with minimum staffing requirements. Currently the compensation by holiday varies greatly with some holidays having a much higher financial impact than others. Managing holiday scheduling would essentially smooth the requirements from holiday to holiday without creating staffing shortages.

Efficiencies [Overtime] (\$0.52 million) – To achieve this efficiency, CBP will strengthen the overtime approval process for GS-15 employees by requiring approval from their component organization's assistant commissioner to get paid for overtime. The Office of Border Patrol and Office of Field Operations will be exempt from this process.

Efficiencies [PCS Costs] (\$2.5 million) – This savings will be achieved by adopting the Voluntary Relocation Test Program (VRT) across CBP and replacing the Federal Travel Regulation (FTR) method of paying for relocation costs.

Travel Efficiency (\$0.052 million) – CBP’s Office of Internal Affairs will conduct fewer inspections, program evaluations, contract and financial reviews which are used as diagnostic tools by CBP management to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. For each review that is not done due to restriction of resources, there is a corresponding increase in the probability that vulnerabilities, compromising situations, and possible wrongful behavior will go undetected.

Closure of Two National Targeting & Analysis Groups (\$1.4 million) – CBP will close two National Targeting and Analysis Groups (NTAG); one located in Dallas, Texas and the other in Chicago, Illinois. The workload generated by the closure of these two facilities will shift to other existing NTAG. These closures will yield a savings of \$1.4 million.

ACE Business Office Staff (\$2.5 million) - This request includes a savings of \$2.5 million which will be realized by reducing FTEs in the ACE Business Office by 21 positions in Communications, Training, Outcomes, and Deployment (CTOD); Cargo Control and Release Business (CCR); Entry Summary, Accounts & Revenue Business (ESAR); Program Control; and Trade Modernization & ACE Coordination (TMAC).

CBP-wide IT Systems and Support (\$3.9 million) - In order to meet FY 2014 CBP IT program budget targets, the CBP Office of Information and Technology (OIT) is examining the following areas: software re-evaluations, hardware maintenance strategy reviews, efficiencies realized by the installation of the CBP Cloud Computing Environment (C3E), and mission application services.

Print Shop Services (\$0.1 million) –This program change reflects a \$1.1 million reduction in print services for discretionary products which are not required by law or are not considered mission critical.

US-VISIT mission support staff (\$7.9 million) - The US-VISIT program will reduce its mission support vacancies by 35 FTPs and 35 FTEs.

Printing and Reproduction Efficiencies

\$1.3 million

Efficiencies (\$0.03 million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.45M); and a percentage reduction across all CBP offices (\$3.32M).

Print Shop Services (\$1.2 million) –This program change reflects a \$1.1 million reduction in print services for discretionary products which are not required by law or are not considered mission critical.

Supplies and Materials Efficiencies

\$62.9 million

Efficiency through contractor conversions \$0.250 million – This efficiency will be gained through the federalization of additional OIT personnel, which includes an additional

insourcing/federalization of 308 positions. These conversions will also improve CBP compliance with the balanced workforce and government to contractor ratio requirements of OMB 11-30.

Efficiencies [DHS Strategic Sourcing Program] (\$2.4 million) – By utilizing DHS strategically sourced contracts, CBP is projected to save \$6.7 million in FY 2014. There are a number of existing strategic sourcing initiatives, but the three that most impact CBP are bulk fuel, wireless, and tactical communications (TACCOM).

Efficiencies (\$1.4 million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.5M); and a percentage reduction across all CBP offices (\$3.3M).

Efficiencies [OFPP Directed Purchasing Savings] (\$9.5 million) – In a November 2011 Memorandum, the Office of Federal Procurement Policy directed federal agencies to reduce spending by 15 percent in FY 2011-2012 on management support service contracts, including engineering & technical services, acquisition services, information technology services, and program management support services. For FY 2013, DHS identified an additional \$31.5 million reduction for these service contracts. The \$9.5M in savings will be allocated across CBP based on FY 2010 spend data.

CBP Fleet Acquisition and Management (\$48.2 million) – The requested decrease of \$48.2 million will defer replacing vehicles used for non-mission critical operations resulting in a deferment of \$46.7 million. In addition, CBP will reduce projected fuel and maintenance expenses by \$1.6 million.

CBP-wide IT Systems and Support (\$0.6 million) - In order to meet FY 2014 CBP IT program budget targets, the CBP Office of Information and Technology (OIT) is examining the following areas: software re-evaluations, hardware maintenance strategy reviews, efficiencies realized by the installation of the CBP Cloud Computing Environment (C3E), and mission application services.

OBP Support (\$1.0 million) - In FY 2014, the Office of Border Patrol (OBP) will reduce seven contract support positions with savings of \$1.2 million. The Office of information Technology (OIT) will support OBP with their OIT support structure in lieu of the OBP contract positions. OBP will reduce agent-to-equipment ratios where feasible, and lengthen replacement cycles when appropriate. Through stricter management and efficiency efforts, OBP will also reduce costs in support equipment by \$1 million in FY 2014.

Print Shop Services (\$0.1 million) –This program change reflects a \$1.1 million reduction in print services for discretionary products which are not required by law or are not considered mission critical.

Travel Efficiencies

\$23.0 million

Efficiency from decentralization of CBP Discipline Program (\$0.4 million) – To achieve this efficiency, CBP's Office of Human Resource Management will no longer provide central

Disciplinary Review Board services. Each CBP office would be responsible to determine appropriate discipline on a case-by-case basis.

Efficiencies (\$0.5million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.5M); and a percentage reduction across all CBP offices (\$3.3M).

Efficiencies [PCS Costs] (\$0.2 million) – This savings will be achieved by adopting the Voluntary Relocation Test Program (VRT) across CBP and replacing the Federal Travel Regulation (FTR) method of paying for relocation costs.

Efficiencies [TDY and Travel] (\$17.8 million) – CBP will strengthen internal policies to strongly enforce graduated TDY per diem reductions. Higher levels of approval will be required if a graduated system is not enforced by the CBP program offices. TDYs extended beyond 30 days after the initial orders would be subject to the same graduated rules with the extension beyond the first 30 days.

Geographic relocation efficiency (\$0.2 million) – This efficiency will involve Relocating 500 IT positions outside the DC metro area and recruiting backfill positions at the GS-11/12 range. It is assumed about \$200K per position could be saved by moving from DC average pay of GS-14 to lower grades outside the DC metro area.

Travel Efficiency (\$4.0 million) – CBP’s Office of Internal Affairs will conduct fewer inspections, program evaluations, contract and financial reviews which are used as diagnostic tools by CBP management to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. For each review that is not done due to restriction of resources, there is a corresponding increase in the probability that vulnerabilities, compromising situations, and possible wrongful behavior will go undetected.

Transportation of Things Efficiencies

\$0.9 million

Efficiencies (\$0.03 million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.5M); and a percentage reduction across all CBP offices (\$3.3M).

Efficiencies [PCS Costs] (\$0.8 million) – This savings will be achieved by adopting the Voluntary Relocation Test Program (VRT) across CBP and replacing the Federal Travel Regulation (FTR) method of paying for relocation costs.

Travel Efficiency (\$0.05 million) – CBP’s Office of Internal Affairs will conduct fewer inspections, program evaluations, contract and financial reviews which are used as diagnostic tools by CBP management to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. For each review that is not done due to restriction of resources, there is a corresponding increase in the probability that vulnerabilities, compromising situations, and possible wrongful behavior will go undetected.

Advisory and Assistance Contracts Efficiencies

\$0.2 million

Efficiencies [DHS Strategic Sourcing Program] (\$0.030 million) – By utilizing DHS strategically sourced contracts, CBP is projected to save \$6.7 million in FY 2014. There are a number of existing strategic sourcing initiatives, but the three that most impact CBP are bulk fuel, wireless, and tactical communications (TACCOM).

Efficiencies (\$0.024 million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.5M); and a percentage reduction across all CBP offices (\$3.3M).

Efficiencies [OFPP Directed Purchasing Savings] (\$0.2 million) – In a November 2011 Memorandum, the Office of Federal Procurement Policy directed federal agencies to reduce spending by 15 percent in FY 2011-2012 on management support service contracts, including engineering & technical services, acquisition services, information technology services, and program management support services. For FY 2014, DHS identified an additional \$31.5 million reduction for these service contracts. The \$31.5M in savings will be allocated across CBP based on FY 2010 spend data.

Other Contract Services Efficiencies

\$166.1 million

Efficiency from deployment of Thin Client Device (\$6.0 million) – With a slight investment in thin client technology, CBP estimates substantial savings in operations and maintenance support from a help desk and field technology officer perspective. This savings projection assumes a \$600 savings per device, which equals \$6.0M when spread over 10,000 devices.

Efficiency through contractor conversions (\$50.3 million) – This efficiency will be gained through the federalization of additional OIT personnel, which includes an additional insourcing/federalization of 318 positions. These conversions will also improve CBP compliance with the balanced workforce and government to contractor ratio requirements of OMB 11-30.

Geographic relocation efficiency (\$6.49 million) - This efficiency will involve Relocating 500 IT positions outside the DC metro area and recruiting backfill positions at the GS-11/12 range. It is assumed about \$200K per position could be saved by moving from DC average pay of GS-14 to lower grades outside the DC metro area.

Travel Efficiency (\$0.2 million) – CBP's Office of Internal Affairs will conduct fewer inspections, program evaluations, contract and financial reviews which are used as diagnostic tools by CBP management to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. For each review that is not done due to restriction of resources, there is a corresponding increase in the probability that vulnerabilities, compromising situations, and possible wrongful behavior will go undetected.

Efficiencies [DHS Strategic Sourcing Program] (\$4.3 million) – By utilizing DHS strategically sourced contracts, CBP is projected to save \$6.7 million in FY 2014. There are a number of

existing strategic sourcing initiatives, but the three that most impact CBP are bulk fuel, wireless, and tactical communications (TACCOM).

Efficiencies (\$2.7million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.5M); and a percentage reduction across all CBP offices (\$3.3M).

Efficiencies [OFPP Directed Purchasing Savings] (\$18.5 million) – In a November 2011 Memorandum, the Office of Federal Procurement Policy directed federal agencies to reduce spending by 15 percent in FY 2011-2012 on management support service contracts, including engineering & technical services, acquisition services, information technology services, and program management support services. For FY 2014, DHS identified an additional \$31.5 million reduction for these service contracts. The \$31.5M in savings will be allocated across CBP based on FY 2010 spend data.

Efficiencies [PCS Costs] (\$0.3 million) – This savings will be achieved by adopting the Voluntary Relocation Test Program (VRT) across CBP and replacing the Federal Travel Regulation (FTR) method of paying for relocation costs.

CBP Transportation Program (\$23.8 million) – CBP will realize a savings of \$23.8 million due to a reduction to transportation workload and through cost efficiencies. This savings will be acquired through reconfiguration of the assets used in meeting the lower workload requirements and cost reductions gained from the re-competition of the transportation contract.

Legacy Standard Application (\$2.9 million) - The CBP budget request includes a reduction of \$2.9 million for Legacy Application Standardization. CBP will be consolidating infrastructure environments where possible, and looking to retire/consolidate legacy government developed applications.

CBP-wide IT Systems and Support (\$47.9 million) - In order to meet FY 2014 CBP IT program budget targets, the CBP Office of Information and Technology (OIT) is examining the following areas: software re-evaluations, hardware maintenance strategy reviews, efficiencies realized by the installation of the CBP Cloud Computing Environment (C3E), and mission application services.

OBP Support (\$1.2 million) - In FY 2014, the Office of Border Patrol (OBP) will reduce 7 contract support positions with savings of \$1.2 million. The Office of information Technology (OIT) will support OBP with their OIT support structure in lieu of the OBP contract positions. OBP will reduce agent-to-equipment ratios where feasible, and lengthen replacement cycles when appropriate. Through stricter management and efficiency efforts, OBP will also reduce costs in support equipment by \$1 million in FY 2014.

Print Shop Services (\$1.5 million) –This program change reflects a \$1.1 million reduction in print services for discretionary products which are not required by law or are not considered mission critical.

Communications, Utilities, and Miscellaneous Charges Efficiencies \$9.0 million

CSI Dedicated Circuits Efficiencies (\$1.4 million) – CBP will achieve this efficiency in the following areas: Circuit Migration to Verizon from Sprint (\$0.8M); remote targeting implementation in Italy and the United Kingdom (\$0.25M); elimination of three foreign national positions in Italy (\$0.2M); and associated reduction in TDY costs (\$0.2M).

Efficiencies (\$2.6 million) – This efficiency will be divided into three initiative areas: Wireless Usage Initiative (\$1.6M); Ammunition Savings Initiative (\$2.5M); and a percentage reduction across all CBP offices (\$3.3M).

Geographic relocation efficiency (\$.486 million) – This efficiency will involve Relocating 500 IT positions outside the DC metro area and recruiting backfill positions at the GS-11/12 range. It is assumed about \$200K per position could be saved by moving from DC average pay of GS-14 to lower grades outside the DC metro area.

Travel Efficiency (\$1.6 million) – CBP’s Office of Internal Affairs will conduct fewer inspections, program evaluations, contract and financial reviews which are used as diagnostic tools by CBP management to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. For each review that is not done due to restriction of resources, there is a corresponding increase in the probability that vulnerabilities, compromising situations, and possible wrongful behavior will go undetected.

Deactivation of Nine Inland Border Patrol Stations (\$1.3 million) – OBP recommends the deactivation of nine inland stations. The stations are: Billings, MT; Twin Falls, ID; Abilene, Texas; San Angelo, TX; Riverside, CA; Dallas, TX; San Antonio, TX; Lubbock, TX; and Amarillo, TX. These locations were selected based on a study that assessed the stations’ operational utility relative to the Border Patrol’s operating environment. The 43 agents currently assigned to these positions will be reassigned to other stations. This deactivation will result in a savings \$1.3 million.

CBP-wide IT Systems and Support (\$1.6 million) - In order to meet FY 2014 CBP IT program budget targets, the CBP Office of Information and Technology (OIT) is examining the following areas: software re-evaluations, hardware maintenance strategy reviews, efficiencies realized by the installation of the CBP Cloud Computing Environment (C3E), and mission application services.

E: Legislative Initiatives:

CBP is responsible for securing America’s borders against threats, while facilitating legal travel, trade, and immigration. This critical mission is carried out through the diligence of CBP’s personnel, as well as the use of intelligence, targeting, technology, infrastructure, and a broad range of other assets and capabilities.

As the guardians of America’s borders, CBP is responsible for protecting the United States and the American people from the entry of dangerous goods and people. This includes ensuring that all persons and cargo enter the U.S. through official Ports of Entry (POEs) and do so legally and

safely, and preventing the illegal entry of persons and contraband, while facilitating the safe and efficient flow of commerce into the United States and enforcing trade and tariff laws and regulations.

CBP recognizes the critical role that CBP Officers (CBPOs) play in ensuring border security, preventing terrorism, strengthening international cooperation and also in securing and facilitating the trade and travel that is vital to the Nation's economy.

CBP operates 329 POEs, welcoming travelers and facilitating the flow of goods essential to our economy 24 hours a day, 7 days a week. Each day, almost 1 million people arrive at U.S. POEs by land, sea, and air. In FY 2012, \$2.38 trillion worth of goods were processed through U.S. POEs (CBP is the second-largest government revenue generator after the IRS – on average, collecting \$105 million a day in fees, duties, and tariffs and processing \$2.3 trillion in total trade value). It is CBP's mission to ensure that these travelers and cargo shipments do not pose a threat to our national security and are processed in a timely and efficient manner in order to facilitate legitimate trade and travel.

Recent staffing deployments continue to indicate that additional CBPO staffing reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. Additional staff also enables CBP to expand CBP inspection services at new locations and during additional time periods requested by public and private stakeholders. All of these benefits – particularly the reduction in wait times – have a positive impact on the Nation's economy.

Fee revenues have not kept pace with the growth in workload at our POEs. CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP's *Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress*, and include fluctuating user fee collections, expansion of workload including new or expanded facilities, and historic levels of travel volumes - up 12 percent since FY 2009 and projected to increase 3-4 percent each year for the next three years. This is further complicated by a complex and expanding mission, including pre-departure targeting for risk management, international partnerships, and outbound operations, as well as by overall increasing demands for services to support growing passenger and cargo volumes.

In response to these challenges and the current fiscal environment, CBP is executing an aggressive multi-pronged strategy to improve POE operations that includes optimizing current business processes through the use of automation, best practices, and travel and trade programs, which strengthen security and maximize limited CBPO work hours. These Business Transformation Initiatives are intended to help mitigate the staffing need identified by the Workload Staffing Model (WSM) in the near term and while additional resourcing options are pursued. The staffing requirements identified by the WSM, as well as CBP's strategy for addressing these needs, are detailed in the *Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress*, which is intended to be read in conjunction with these proposals.

NEED FOR LEGISLATIVE PROPOSALS

Despite the efficiency gains that CBP will achieve by continuing to streamline its current processes and a proposed increase in appropriated funding in the President's FY 2014 Budget for an additional 1600 CBPOs, CBP will still face significant staffing and infrastructure challenges in FY 2014 and beyond. Air passenger volume increased by nearly four percent in FY 2012 (compared to 2011) and is currently at a record level – heading towards 100 million annual passenger international arrivals in FY 2013. Furthermore, volume has increased by three percent at our land and seaports in FY 2012.

To more effectively support current operations and to enable CBP to support new requests for service, CBP is seeking Congressional support for a series of legislative proposals to identify alternative sources of funding to provide for additional CBP officers and infrastructure requirements. These proposals would complement the WSM by creating a mechanism for CBP to engage in public-private partnerships to fund enhanced CBP services, support POE improvements that would better facilitate flows of international trade and travel, and allow CBP to fund additional CBPOs.

LEGISLATIVE PROPOSAL DETAILS

1. Immigration User Fee and the Consolidated Omnibus Budget Reconciliation Act User Fee Increase

As part of its efforts to address CBPO staffing challenges at POEs, CBP proposes raising two user fees associated with CBP processing: the Immigration User Fee (IUF) and the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) user fee.

User Fee Increases Have Not Kept Pace

- Over the years, increases in the IUF and COBRA user fees have not kept pace with either inflation or the cost of CBP operations.
- The IUF air and sea passenger fee was authorized in 1987 at \$5.00 and is currently set at \$7.00. This fee was last updated in 2001. If this fee had been adjusted for inflation since its authorization using the Consumer Price Index, it would currently be \$12.13.
- The COBRA air and sea passenger user fee was established in 1985 at \$5.00 and is currently set at \$5.50. These fees were last updated in 2007. If this fee had been adjusted for inflation since it was established using the Consumer Price Index, it would currently be \$10.67.
- Increases to other applicable fees under COBRA are requested as well and adjusted based on a proportionate increase to include the annual cap amounts. For example, CBP is proposing a \$.36 increase to the Express Consignment Courier Facilities Fee (ECCF).

- Additional CBPOs at ECCFs will allow CBP to inspect packages and clear holds more quickly for both commercial and non-commercial shipments.
- As previously mentioned, from 2009 to 2012, trade volume and passenger traffic at POEs steadily increased. In 2011, international travelers generated a trade surplus of \$43 billion - the largest for travel and tourism on record for the United States.

- Meanwhile funding and staffing have been relatively flat. Moreover, budgetary pressures are lessening the availability of overtime as a tool for leveraging existing resources. The OFO inspectional overtime budget has experienced an 8.2 percent decrease from FY 2008 through FY 2013. The FY 2010 upgrade of journeyman officers to the GS-12 level further reduces the actual number of available CBPO hours that can be purchased with overtime, reducing buying power by up to 20 percent.

Projected Impact: Raising IUF and COBRA

- CBP has proposed a \$2.00 increase to both the IUF and COBRA air and sea passenger user fees, as well as proportional increases in other COBRA fee categories. The IUF increase is projected to provide approximately \$166 million in additional funding, supporting up to 974 additional CBPOs. The COBRA user fee increase is projected to provide approximately \$194 million in additional funding, supporting up to 903 additional CBPOs. Future budget requests (beginning in FY 2015) will propose increases in line with the Consumer Price Index.
- The projected impact of raising the two user fees is summarized in the table below.

User Fee	Additional Funding (Dollars in Thousands)	Number of CBPOs
IUF	\$165,715	974
COBRA	\$194,493	903
Total	\$360,493	1,877

- A \$2 increase to the COBRA fee will also enable CBP to collect an additional \$40 million, from passengers traveling to the United States by air and sea from countries previously exempt from paying the COBRA fee.¹ These funds could be used for a combination of additional officers, overtime, and infrastructure support.

Addressing Stakeholder Feedback

CBP intends to pursue the following actions as a way to assess existing user fees and explore options for new user fees:

- Report on Use of User Fees and Associated Service Levels - CBP will provide an annual electronic report to the general public and interested stakeholders to provide transparency on the amount of reimbursable activity that occurred and how the fees were spent to support this activity. The report will also provide annual average wait time data for high volume port locations receiving additional COBRA and IUF fee resources in order to assess the connection between service levels and resources. Each port's current average wait time will be measured against wait time averages from the prior year to measure the impact that the additional resources have made with respect to service levels and other related economic benefits.
- Allocation of Resources - As part of its resource optimization efforts, CBP is committed to improving service levels by increasing efficiency and throughput. This will be informed by OFO's Workload Staffing Model and achieved through CBP's transformation efforts.
- Study to Determine Feasibility of User Fee collection in the Land Border Environment – CBP is in the process of initiating a full study of land border fee options and continues to review collections and cost recovery for the sea environment. CBP will first explore the feasibility of collecting from existing operators such as bridge commissions, toll operators, commercial passenger bus, commercial passenger rail, and any potential legal impediments. In the course of the study, CBP intends to pursue a pilot that tests all steps to be involved in fee collection short of actual collections without the statutory or regulatory authority to do so. Finally, CBP will follow by assessing how to address land border pedestrians and passenger vehicle fees.
- Accounting for Inflation in User Fees – It is the Administration's intent to adjust the IUF annually for inflation. Barring a change to the underlying statute governing these fees

¹ This refers to passengers whose journeys originated from countries formerly exempt from paying COBRA air and sea passenger fees: Canada, Mexico, and certain Caribbean islands. The exemption was lifted by Section 601 of *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42).

that would authorize such an adjustment, future budget requests (beginning in FY 2015) will propose increases in line with the Consumer Price Index.

2) Reimbursable Agreements Authority

As an additional effort to explore alternate sources of financing, this legislative proposal amends existing legislation in response to requests from interested parties for new CBP inspectional services.

Current statutory limitations on CBP's authority to receive outside funding, except in narrowly defined instances, have prevented CBP from receiving reimbursement from interested private sector and international, state, and local partners, which has resulted in the denial of the requested services or the provision of services without reimbursement.

The proposed legislation stipulates that reimbursement will only be for costs incurred above and beyond any user fees collected in association with the service provided to avoid double payment.

The proposed COBRA and IUF legislative changes are intended to bridge the gap in the Workload Staffing Model identified staffing need related to current service levels. These public-private partnerships resulting in reimbursable agreements are intended to fund additional and future expanded services at the request of third parties.

3) Enhanced Partnership Authority for Facilities

This proposed legislation would allow CBP to, accept donations of real and personal property (including monetary donation) and non-personal services, from private parties and State and local government entities for the purposes of constructing, altering, operating, or maintaining a new or existing land port of entry facility,. The growing demand for facilities, especially on the southwest border, the ongoing modernization needs of CBP's land port-of-entry portfolio, and the hold on federal funding for land POE projects since FY 2010, have led CBP to evaluate alternative methods to finance these major modernization and construction projects.

The proposed legislation addresses the limitations of CBP's existing authorities by broadly encompassing all land POE project-related costs regardless of port ownership. The legislation mitigates the Government cost-burden of land POE construction and modernization by enabling CBP to accept donations of real and personal property (include monetary donations) and non-personal services from private, State, or local entities.

F. Payroll and Workforce Assumptions in the FY2014 Budget Request

The FY 2014 budget supports the following frontline staffing levels, which make up approximately 75 percent of our workforce:

- 21,370 BPAs,
- 25,252 CBPOs (includes the initiative of 1,600 CBPOs and 1,877 CBPOs funded by proposed IUF and COBRA fee increases),

- 2,383 Agricultural Specialists, and
- 1,138 Air and Marine Interdiction Agents

CBP's FY 2014 budget includes the following additional position assumptions, which CBP may increase as operational requirements dictate:

- 2,376 Trade and Revenue positions, and
- 85 Polygraph Examiners

CBP is focusing on our highest priorities in FY 2014, including maintaining frontline staff and other Congressionally-mandated floors. We estimated payroll needs for maintaining our frontline staff, accounting for career ladder promotions and within grade increases. Historical attrition rates were used and backfill hires were based on entry-level grades.

CBP is managing the remainder of the workforce to best support our frontline and mission-critical needs. We are leveraging our mission-support attrition and using backfill strategies that maintain staffing in the critical support areas. Payroll needs for mission support staffing levels were estimated using historical average salaries and attrition rates. Backfill of vacant mission support positions is limited to an average of one backfill for every seven vacancies. Even with this limited backfill, CBP will need to employ additional workforce shaping strategies such as Voluntary Early Retirement Authority (VERA).

In addition to aggressive staffing management strategies, we are proposing additional savings by reducing payroll items that can be managed more directly, specifically awards, overtime and premium pay. We are reducing our awards allocation from 1.0 percent to 0.6 percent of prior year base salaries, and are proposing to reduce the Foreign Language Award Program (FLAP). Additionally, CBP is identifying and executing strategies for data-driven analysis to align overtime scheduling and usage with requirements and operational risk. Lastly, CBP is directly managing scheduling of holiday assignments to ensure staffing aligns with known and anticipated traffic and assignments. By focusing on our priorities, CBP will be able to accomplish our mission in FY 2014.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security U.S. Customs and Border Protection Salaries and Expenses

Summary of FY 2014 Budget Estimates by Program Project Activity

FY 2014 Request
(Dollars in Thousands)

Program Project Activity	FY 2012			FY 2013			FY 2014			Increase(+) or Decrease(-) for FY 2014 from FY 2012								
	Revised Enacted			Annualized CR			Request			Total Changes			Program Changes			Adjustments-to-Base		
	POS	FTE	Amount	POS	FTE	Amount	POS	FTE	Amount	POS	FTE	Amount	POS	FTE	Amount	POS	FTE	Amount

1. FY 2012 total does not include \$13.508 million for Spectrum Relocation
2. FY 2012 FTE displayed in the Congressional Justification for CBP are Revised Enacted. FY 2013 and 2014 FTE differ from MAX due to budget development scheduling.
3. The numbers displayed in the FY 2013 Base column are the annualized short-term continuing resolution amounts from P.L 112-175. All display and discussion of the request are written as comparisons between FY 2012 Revised Enacted and FY 2014 Request.
4. FY 2013 Salaries and Expenses discretionary total in MAX includes the Virgin Island Deposit Fund.
5. The FY 2013 column excludes funding from the FY 2013 Disaster Relief Supplemental.
6. FY 2014 Salaries and Expenses discretionary total in MAX include the Small Airports user fee and projected increases to COBRA and Immigration User fees from the legislative proposals.

2012 Revised Enacted	2,296	2,199	625,865
2014 Adjustments-to-Base	247	247	(12,523)
2014 Current Services	2,543	2,446	613,342
2014 Program Change	(16)	(75)	7,314
2014 Total Request	2,527	2,371	620,656
Total Change 2012 to 2014	231	172	(5,209)

CBP requests 2,527 positions, 2,371 FTE, and \$620.656 million in FY 2014 for the Headquarters Management & Administration, at the POE PPA

- An increase of \$98.036 million is for Increase to CBPOs Staffing Level to Promote Travel and Trade
- An increase of \$11.813 million is for Realigning OTIA funding from the Border Security Fencing, Infrastructure, and Technology (BSFIT) account to S&E
- An increase of \$2.152 million is for PPA Realignment
- An increase of \$3.3 million is for Single Transaction Bond Centralization
- An increase of \$3.247 million is for Pay Increase
- An increase of \$3.12 million is for Adjustment for Workers and Unemployment Compensation Requirements
- An increase of \$1.063 million is for Transfer of Freedom of Information Act (FOIA; P.L. 104-231) to Office of Commissioner
- An increase of \$1.0 million is for Trade Compliance & Enforcement Congressional add-on positions
- An increase of \$80 thousand is for 2012 OFO Positions for New Ports of Entry - Year 2
- An increase of \$80 thousand is for 2010 Border Security Supplemental - Year 3 (250 CBPOs)
- An increase of \$67 thousand is for 2010 Border Security Supplemental - Year 2 (250 CBPOs)
- An increase of \$42 thousand is for 2012 Immigration Advisory Program - Year 1
- An increase of \$23 thousand is for Realigning USM CRSO for Shared Services for Working Capital Fund (WCF)

- An increase of \$2 thousand is for 2012 National Targeting Center - Year 2
- An increase of \$41.929 million is to non-recur one-time 2012 reprogrammings
- A decrease of -\$27.803 million is for Managed Hiring, Awards & Support Services
- A decrease of -\$26.127 million is for CBP IT Infrastructure & Systems Support
- A decrease of -\$24.155 million is for CBP Fleet Acquisition and Management
- A decrease of -\$21.464 million is for Management Efficiencies
- A decrease of -\$8.599 million is for Efficiency through Contractor Conversions
- A decrease of -\$13.0 million is for Realigning OIT to OT to fund ACE Business Office
- A decrease of -\$10.808 million is for 2012 OFO Positions for New Ports of Entry - Year 1
- A decrease of -\$11.688 million is for Rent Consolidation
- A decrease of -\$7.452 million is for Workforce Shaping
- A decrease of -\$3.323 million is for Personnel Security
- A decrease of -\$3.319 million is for Geographic Relocation Efficiency
- A decrease of -\$2.849 million is for Deployment of Thin Client Device
- A decrease of -\$1.645 million is for 2012 National Targeting Center - Year 1
- A decrease of -\$1.804 million is for Financial Systems Support
- A decrease of -\$1.469 million is for Legacy Application Standardization
- A decrease of -\$1.455 million is for Print Shop Services
- A decrease of -\$1.186 million is for Public Transportation Incentive Program
- A decrease of -\$986 thousand is for Utilities Consolidation
- A decrease of -\$839 thousand is for Travel Efficiency
- A decrease of -\$565 thousand is for Realigning International Affairs Personnel to Office of Training & Development
- A decrease of -\$434 thousand is for Training and Development
- A decrease of -\$193 thousand is for Decentralization of CBP Discipline Program

CURRENT SERVICES PROGRAM DESCRIPTION:

The Headquarters Management and Administration (HQ M&A) Program, Project, and Activities (PPA) funds the infrastructure necessary to provide critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. Funding within this PPA is vital to sustaining the safety of our borders and expeditiously carrying out trade activities. This PPA is essential to performing CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Note: Current Services for offices associated with the M&A Border Security Inspection and Trade Facilitation PPA are included with the M&A Border Security and Control between the Ports of Entry PPA.

Description of Selected Adjustments to Base:

Transfer to realign OTIA funding:

In response to direction in the FY 2012 Consolidated Appropriations Act (P.L. 112-74) Conference Report, starting in FY 2014 all OTIA Government FTE and associated expenses were moved from the BSFIT Program Management (PM) PPA into HQ M&A within the Salaries and Expenses appropriation. This funding restructuring complies with Congressional guidance and provides a clearer, consolidated view of Government FTE throughout CBP. This will also allow OTIA the authority to use its organizational resources across CBP (i.e. non-BSFIT programs) to fulfill its role as CBP Component Acquisition Executive (CAE.)

Transfer of Freedom of Information Act Division: This transfer reflects movement of the FOIA Division from the Office of International Trade, funded by the Inspections, Trade, and Travel Facilitation PPA, to the Office of the Commissioner, funded by both HQ M&A PPAs. The full amount of \$2.17 million funds 23 positions and other associated expenses. This realignment will elevate the FOIA program to the senior management level, in compliance with Executive Order 13392, and appropriately raise FOIA visibility as well as that of any and all other relevant regulations and policies.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Advanced Passenger Information System (APIS)	The APIS system is used to review air and sea passengers and crew in an effort to identify possible terrorists, uncover high-risk individuals, and facilitate the clearance process for a vast majority of legitimate travelers. APIS almost entirely closed the performance gap of not knowing the identity of air travelers in transit to the U.S. and provided the capability to compare these against a watch list. APIS maintains the closure of this gap. Enhancements to the program are primarily reactive in response to event driven needs and noted operational performance. The program supports the mission need identified in the Aviation and Security Act by providing the information medium for commercial air carriers to provide APIS data for inbound passengers and crew members before their arrival in the United States. This PPA and the HQ M&A Between the Ports of Entry (HQ01) funds APIS. Total funding for this procurement activity is \$2.991 million in FY 2012, \$2.991 million in FY 2013, and \$4.202 million in FY 2014.	
\$1,425	\$1,425	\$1,994

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Infrastructure Infrastructure, cont.	<p>CBP Infrastructure is the Information Technology (IT) backbone that supports all CBP systems. The systems supported by CBP Infrastructure allow for a unified border presence and provides for more efficient and effective information sharing amongst trade and law enforcement agencies. Infrastructure is funded out of this PPA, HQ01 between the Ports of Entry, Immigration User Fee, Animal and Plant Health Inspection Service (APHIS) User Fee, and Automation Current Operations Protection (COPPS) PPA. Total funding for this procurement activity is \$530.799 million in FY 2012, \$531.957 million in FY 2013, and \$470.694 million in FY 2014.</p>	
\$142,391	\$142,391	\$106,588
Mobile Asset Program (MAP)	<p>The CBP Mobile Assets Program Management Office (MAPMO) coordinates the acquisition and disposal of the vehicles used by CBP Offices to carry out their operations in support of the DHS mission. These vehicles are acquired, configured and deployed to support detection, interdiction, enforcement and support activities at and between the ports of entry throughout the United States of America and U.S. territories. The CBP fleet facilitates the various activities necessary to achieve the primary mission, including: training; transportation; technology installations; and other support activities. The MAP is funded out of this PPA, HQ01 between the Ports of Entry, and Border Security and Control Total funding for this procurement activity is \$73.206 million in FY 2012, \$91.082 million in FY 2013, and \$53.448 million in FY 2014.</p>	
\$37,039	\$45,739	\$32,283
Systems, Applications and Products (SAP)	<p>SAP permits CBP to accomplish its mission with more efficiency than ever before as well as reduce functional gaps by closing material weaknesses identified during past audits of CBP Financial Statements required by the Federal Managers Financial Integrity Act (P.L. 97-255). The SAP Program provides for accurate and timely processing of financial, property, and procurement transactions occurring on a daily basis that enable CBP to accomplish its mission. SAP is an integrated enterprise-wide resource planning (ERP) system that replaced 10 stove-piped, outdated, and underperforming mainframe systems that CBP deemed insufficient and no longer suited to meeting data processing and reporting needs. SAP is funded out of this PPA, HQ01 between the Ports of Entry, and the Immigration User Fee. Total funding for this procurement activity is \$18.270 million in FY 2012, \$18.720 million in FY 2013, and \$14.492 million in FY 2014.</p>	
\$7,646	\$7,646	\$5,853

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Tactical Communications (TACCOM) Modernization	<p>CBP is responsible for securing the nation’s borders against illegal entry of people and goods while managing legitimate travel and trade. To support this mission, CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal government. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where their radio is often their only communications channel to coordinate activities or summon assistance. TACCOM Modernization is funded out of this PPA, HQ01 between the Ports of Entry, BSFIT Development & Deployment, and BSFIT O&M. Total funding for this procurement activity is \$57.783 million in FY 2012, \$67.783 million in FY 2013, and \$78.854 million in FY 2014.</p>	
\$6,998	\$6,998	\$18,810
Analytical Framework for Intelligence (AFI)	<p>The goal is to provide a suite of “force multiplication” tools that automate CBP analyst tasks regarding data access, query and information retrieval, analysis, and reporting. AFI will be fully integrated with other endeavors that seek to accomplish similar but discretely different or additional objectives, such as the CBP Intelligence and Operations Framework System (IOFS), Immigration and Customs Enforcement Pattern Analysis and Information Collection System (ICEPIC), Secure Border Initiative (SBIInet), and other intelligence analysis applications currently in planning or production stages, to ensure such initiatives complement one another and avoid unnecessary duplication. AFI is funded out of this PPA and the HQ01 between the Ports of Entry. Total funding for this procurement activity is \$24.0 million in FY 2012, \$24.0 million in FY 2013, and \$24.014 million in FY 2014.</p>	
\$11,393	\$11,393	\$11,400
Automated Targeting System (ATS) Maintenance	<p>A web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. Automated Targeting System allows CBPOs to focus their efforts on cargo shipments and passengers that most warrant further attention.</p> <p>Funding for ATS is funded out of this PPA and the HQ01 between the Ports of Entry, and Automated Targeting Systems. Total funding for this procurement activity is \$72,016 in FY 2012, \$40,016 in FY 2013, and \$111,462 in FY 2014.</p>	
\$42	\$42	\$1,470

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Block 1	<p>The main mission for Block 1 Sustainment is increased situational awareness and persistence surveillance across the Tucson and Ajo Stations within the Tucson Sector. Block 1 technology supports U.S. CBP officers and agents to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 covers approximately 53 miles of international border in Arizona. Funding for the Block 1 is funded out of this PPA, HQ01 between the Ports of Entry and BSFIT O&M (SB02). Total funding for this procurement activity is \$9,770 in FY 2012, \$11,270 in FY 2013, and \$22,733 in FY 2014.</p>	
\$630*	\$630*	\$209
Integrated Fixed Towers (IFT)	<p>Integrated Fixed Towers (IFT) is a system that provides automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, Integrated Fixed Towers (IFTs), equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest. Funding for Integrated Fixed Towers is funded out of this PPA, HQ01 between the Ports of Entry, BSFIT O&M, and BSFIT D&D. Total funding for this procurement activity is \$119,394 in FY 2012, \$119,394 in FY 2013, and \$87,322 in FY 2014.</p>	
\$947*	\$947*	\$971
Mobile Surveillance Capabilities (MSC)	<p>The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.</p> <p>OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered "mixed non-IT/IT."</p>	

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
	Funding for Mobile Surveillance Capabilities is funded out of this PPA, HQ01 between the Ports of Entry, and SB02 BSFIT O&M. Total funding for this procurement activity is \$4,570 in FY 2012, \$5,070 in FY 2013, and \$5,891 in FY 2014.	
\$275*	\$275*	\$138
Northern Border Remote Video Surveillance System (NB-RVSS)	<p>The NB - RVSS systems consist of day night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist.</p> <p>OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”</p> <p>Funding for NB-RVSS is funded out of this PPA, HQ01 between the Ports of Entry, and SB02 BSFIT O&M. Total funding for this procurement activity is \$6,927 in FY 2012, \$7,927 in FY 2013, and \$6,637 in FY 2014.</p>	
\$204*	\$204*	\$208
Remote Video Surveillance System (RVSS)	<p>A RVSS is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes.” – Chief, USBP memo of June 10, 2010. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities. At the current time, FY11 funding is being executed in acquisition of the RVSS system.</p> <p>OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”</p> <p>Funding for RVSS is funded out of this PPA, HQ01 between the Ports of Entry, and SB02 BSFIT O&M. Total funding for this procurement activity is \$2,282 in FY 2012, \$2,282 in FY 2013, and \$17,916 in FY 2014.</p>	
\$610*	\$610*	\$625

*This funding was provided by the BSFIT Program Management PPA. In FY 2014, its funding is proposed for full transfer into HQ M&A and the Program Management PPA itself will be subsequently disestablished. For comparative purposes, the FY 2012 and FY 2013 funding is displayed within this chart.

CBP requests 2,656 positions, 2,566 FTE, and \$592.330 million in FY2014 for the Headquarters Management and Administration, Between the POE PPA

- An increase of \$14.561 million is for Realigning OTIA funding to S&E
- An increase of \$2.371 million is for PPA Realignment
- An increase of \$3.416 million is for Pay Increase
- An increase of \$3.12 million is for Adjustment for Workers and Unemployment Compensation Requirements
- An increase of \$1.107 million is for Transfer of FOIA to Office of Commissioner
- An increase of \$316 thousand is for 2010 Border Security Supplemental - Year 3 (1000 BPAs)
- An increase of \$229 thousand is for 2010 Border Security Supplemental - Year 2 (1000 BPAs)
- An increase of \$24 thousand is for Realigning USM OCAO for Shared Services for WCF
- An increase of \$17.004 million is to non-recur one-time 2012 reprogrammings
- A decrease of -\$36.107 million is for Managed Hiring, Awards & Support Services
- A decrease of -\$26.312 million is for CBP IT Infrastructure & Systems Support
- A decrease of -\$22.561 million is for CBP Fleet Acquisition and Management
- A decrease of -\$16.458 million is for Management Efficiencies
- A decrease of -\$9.588 million is for Efficiency through Contractor Conversions
- A decrease of -\$8.003 million is for Workforce Shaping
- A decrease of -\$11.782 million is for Rent Consolidation
- A decrease of -\$3.677 million is for Personnel Security
- A decrease of -\$3.673 million is for Geographic Relocation Efficiency

- A decrease of -\$3.151 million is for Deployment of Thin Client Device
- A decrease of -\$1.996 million is for Financial Systems Support
- A decrease of -\$1.481 million is for Legacy Application Standardization
- A decrease of -\$1.455 million is for Print Shop Services
- A decrease of -\$1.314 million is for Public Transportation Incentive Program
- A decrease of -\$1.025 million is for Utilities Consolidation
- A decrease of -\$928 thousand is for Travel Efficiency
- A decrease of -\$419 thousand is for Training and Development
- A decrease of -\$193 thousand is for Decentralization of CBP Discipline Program

CURRENT SERVICES PROGRAM DESCRIPTION:

The M&A PPA Border Security and Control between Ports of Entry (POEs) provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. M&A funding is essential in carrying out CBP's dual mission of protecting our homeland, while facilitating legitimate trade and travel.

The following offices, listed in descending order of total requested budgetary authority and discussed in greater detail below, are funded within this PPA: Information and Technology (OIT), Administration (OA), Technology Innovation and Acquisition (OTIA), Human Resources Management (HRM), Intelligence and Investigative Liaison (OIIL), Training and Development (OTD), Internal Affairs (IA), Commissioner (OC), Public Affairs (OPA), Chief Counsel (OCC), Joint Operations Directorate (JOD), Joint Field Command (JFC), and Congressional Affairs (OCA).

Office of Information and Technology

The Office of Information and Technology supports CBP by providing integrated, comprehensive technical support that facilitates the CBP and DHS missions. OIT is responsible for developing, acquiring, testing, and maintaining legacy and new government and commercial off-the-shelf applications, and for ensuring the reliable performance of CBP's data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line. CBP's Information Technology applications contribute to the multi-layered defense, which enables users of CBP applications to connect to CBP's mission-critical applications at either the CBP and/or DHS data centers and to a vast array of data related to operational areas of passenger and cargo processing, targeting, and border enforcement, as well as mission support areas of finance, human resource, and training.

CBP mission-critical and administrative applications depend on the availability and reliability of the IT infrastructure. The IT infrastructure is a complex network of field equipment hardware, software, data routers, and switches that exist in each of CBP's 650 field locations, along with the data storage, retrieval, engineering, network monitoring, and other IT capabilities at the CBP and DHS data centers. This supports the day-to-day delivery of all vetting/screening data from CBP and/or DHS data centers to CBP's officers and agents. This information allows them to make admissibility decisions on cargo and passengers entering at our nation's borders, and to collect required trade revenue. Infrastructure requirements continue to grow in response to

increased DHS and federal requirements, daily changes in the risks and threats posed to our nation’s borders, and in the growth of international trade and immigration.

CBP’s IT infrastructure is the catalyst that enables the CBP frontline to protect the United States from the entry of dangerous goods and people while simultaneously expediting the legitimate flow of people and goods.

Specifically, on a daily basis, CBP’s IT systems allow frontline officers and agents to:

- process millions of passengers and pedestrians arriving internationally, by air, sea and land across our borders;
- process more than 1,000 truck, rail, and sea containers, and shipments of goods;
- collect more than \$90 million per day in fees, duties, and tariffs

To accomplish the above, on a daily basis, CBP’s IT infrastructure and applications -

- process more than 21 billion messages, and 50-55 billion database queries with Other Governmental Agencies (OGAs), passenger carriers, cargo brokers, trade representatives, and airlines

Challenges	Opportunities
With billions of trade and passenger queries are performed per day, CBP’s on-line database queries are among the highest in the world.	To sustain these capabilities requires a robust IT infrastructure and a dynamic IT O&M strategy to rapidly respond to daily issues/problems.
User demand for data continues to increase, which significantly increases software licensing costs.	Migrate from disparate to more streamlined consolidated application environments to reduce the software licensing costs in various environments.
Centralize all applications into DHS data centers	CBP has started to migrate back-office applications such as Microsoft Project Server, and has completed the move of Outlook eMail. Migrate all legacy mainframe applications from old to new platforms; or retire old applications.
Workforce will continue to evolve and users will demand new capabilities to respond to new business processes, future threats, and so on	Look for new and enhanced ways to deliver current capabilities at reduced cost (via actions described above), yet continue to look for opportunities to progress toward the desired future state.
Enhance availability and redundancy to meet operational demands	CBP must implement a streamlined and modernized infrastructure that takes advantage of today’s technologies such as virtualization, commodity hardware, web services, cloud management, and scalable infrastructure. Beyond providing information, OIT must help CBP field officers and agents stay ahead and

Challenges	Opportunities
	<p>maintain strong situational awareness. OIT must move toward a standard target architecture that uses quick-to-deploy pre-built hardware appliances based on open standard, vendor agnostic, and industry best practices for highly available and scalable infrastructure which can maximize automated support and maintenance. Better integration and open standards will enable the quick delivery of new capabilities. Greater integration results in easier access to high quality data to inform rapid decision-making for situational awareness, command and control, and emergency response.</p>

The on-going sustainment of CBP’s critical IT infrastructure and applications is supported by the following organizations, with primarily responsibility for functions/services as described below:

Division	Functions/Services
<p>Border Enforcement and Management Systems (BEMS)</p>	<p>Supports CBP’s activities by developing government software application systems that respond to the requirements of the U.S. Border Patrol (USBP). Includes the Enforcement Application for CBP (e3), which consists of five modules: processing; biometrics; assault; prosecution; and Operation Against Smugglers Initiative on Safety and Security (OASISS). Collectively, these systems provide the processing application by which BPAs process all apprehensions, including all biographical information for each subject apprehended. BEMS also provides to other enforcement applications such as Enterprise Geospatial Information Services, Border Patrol Enforcement Tracking System (BPETS²), and Intelligence Computer Assisted Detection.</p> <p>BEMS also maintains and ensures integration of CBP’s financial, human resource, and mission support applications used for pay, officer scheduling, and travel.</p>
<p>Cargo Systems Program Office (CSPO)</p>	<p>Facilitates the flow of cargo at the nation’s borders through the development, operations, and maintenance of CBP’s mission-critical trade systems, such as the Automated Commercial Environment/International Trade Data System (ACE/ITDS), the Automated Commercial System (ACS), and the Automated Export System (AES). These systems provide vetting and targeting data to CBPOs that enable them to identify and target cargo.</p> <p>Provides the ongoing maintenance and operation of these trade applications, which interface with and support CBP, other</p>

Division	Functions/Services
	<p>government agencies, and the trade community regarding the importation, exportation, and control of merchandise shipments. These systems also facilitate the collection of revenue.</p>
<p>Passenger Systems Program Office (PSPO)</p>	<p>Facilitates the flow of people at the nation's border through the development, deployment, operations, and maintenance of numerous passenger applications that enable advanced passenger screening, consolidated trusted traveler, and in-bound passenger screening. These applications provide critical information to the front-line to screen and vet passengers before and/or upon arriving at our nation's borders. CBP's passenger processing systems enabled CBPOs to vet and screen 351.5 million pedestrians and passengers and over 98 million aircraft passengers at our nation's ports in FY 2012. PSPO is also responsible for enrolling and processing applicants in the trusted traveler programs (Global Entry, NEXUS, SENTRI, and FAST).</p> <p>PSPO's programs support other agencies outside CBP, including U.S. Citizenship and Immigration Services (USCIS) and U.S. Immigration and Customs Enforcement (ICE). In coordination with multiple law enforcement agencies, PSPO maintains, updates, and disseminates advance traveler information and lookout data in real time. These applications also provide entry/exit data to intelligence agencies and to United States Visitor and Immigrant Status Indicator Technology (US-VISIT), which is proposed for transfer to CBP and ICE in the FY 2014 Budget.</p> <p>PSPO supports connectivity services to the Federal Bureau of Investigation's (FBI) National Crime Information Center (NCIC) and to state data via the National Law Enforcement Telecommunications System via TECS. OIT and PSPO support the Transportation Security Administration (TSA) by providing one central communication hub for carriers via DHS Router, which sends data to TSA and CBP as appropriate.</p>
<p>Targeting & Analysis Systems Program Office (TASPO)</p>	<p>TASPO supports CBP's targeting systems capabilities through the development and maintenance of robust rules-based targeting systems in the passenger and cargo environments (land, narcotics, passenger, and outbound environments, as well as cross domain among various security levels).</p> <p>Maintains and operation ATS which provides direct support to OIIL and the National Targeting Center (NTC) by augmenting CBPOs' determinations regarding whether a passenger, crew member, or in-bound cargo shipment should receive additional screening because of potentially greater risk.</p> <p>- Automated Targeting System-Land (ATS-L) enables the immediate analysis and risk assessment of private vehicles crossing the U.S. land</p>

Division	Functions/Services
	<p>borders. Within seconds, after reading and processing license plate information against various existing data, the system provides CBPOs at primary booths a risk assessment for the vehicle and passengers.</p> <ul style="list-style-type: none"> - ATS-Inbound provides CBPOs with a more efficient and consistent method for targeting high risk inbound cargo for examination. - ATS-Passenger (ATS-P) is an internet-based enforcement and decision support tool used to collect, analyze, and disseminate information at all U.S. airports and seaports where international flights and voyages make ports of call. ATS-P provides a risk assessment of those passengers and crew members prior to their arrival or departure.
<p>Wireless Systems Program Office (WSPO)</p>	<p>WSPO is responsible for the land mobile radio (LMR) infrastructure and subscriber equipment used by more than 40,000 CBP law enforcement agents and officers in the course of their duties. Existing systems have gaps that may affect the operational efficiency of CBP's officers and agents performing their day-to-day missions. As a result, WSPO is working to modernize existing LMR systems with digital technology that complies with Project 25 standards, expand system coverage to support operations in critical areas, add capacity to support higher numbers of agents, provide the Advanced Encryption Standard (AES) to protect sensitive communications, and support communications interoperability efforts with other Federal, state, local, and tribal law enforcement agencies.</p>
<p>Field Support</p>	<p>OIT's Field Support focuses on providing high-quality customer service to CBP users with 24/7 support for CBP's operational systems and infrastructure. With staff dispersed throughout the United States who provides on-site support to CBP employees, Field Technology Officers are OIT's primary interface with CBP field customers world-wide. Field Support services and maintains CBP's technology systems, networks, and equipment and strives to minimize all systems' downtime. Field Support is also responsible for the maintenance, repair, installation, and operation of a wide range of highly complex voice and data communications systems, video surveillance equipment, sensor intrusion systems, and Non-Intrusive Inspection (NII) devices.</p>
<p>Enterprise Networks & Technology Support (ENTS)</p>	<p>ENTS is responsible for enterprise architecture, design and management of CBP network infrastructures, including the shared departmental DHS OneNet. ENTS provides operational day-to-day technology support to all CBP field locations, technology training, enterprise wide area network, security operations and helpdesk services. ENTS provides 24x7 local area network, wireless, surveillance and detection technology support to all CBP field offices, performs field outreach, manages field modernization projects and oversees all field deployments. ENTS is aggressively working to modernize CBP Field locations deploying a common</p>

Division	Functions/Services
	<p>wireless communications infrastructure and a consistent desktop configuration across all of CBP, while improving network diversity and survivability.</p> <p>ENTS provides reliable and responsive technology systems, tools and services in unwavering support of the CBP mission to protect our nation with goals of improved availability of critical systems, improved customer satisfaction and increased integration across teams and technologies.</p>
Enterprise Data Management & Engineering (EDME)	<p>EDME provides innovative Information Technology (IT) services and solutions to CBP and DHS users by engineering solutions that provide optimal IT data integrity and accessibility that ensure performance quality, reliability and 24x7 IT systems availability which supports the protection of our borders and the facilitation of legitimate trade.</p> <p>In this capacity, EDME uses industry and government best practices to integrate business and technical solutions across the OIT enterprise. EDME provides its DHS and CBP users with enterprise architecture design and management, systems engineering, data center operations and services, strategic planning, security program management, technology evaluation and integration, audit coordination; and enterprise process management.</p>
Laboratories and Scientific Services (LSS)	<p>LSS is the forensic/scientific arm of CBP, which provides forensic and scientific testing in the area of Trade Enforcement, Weapons of Mass Effect (WME), Intellectual Property Rights (IPR), and Narcotics Enforcement.</p> <p>LSS consists of seven regional laboratories located throughout the United States and one national research laboratory. LSS also operates several mobile laboratories that are used at our nation's borders for random trade blitzes and for on-site emergency response and programmatic on-site border security operations. A specially trained laboratory forensic "jump team", which can be activated at a moment's notice, provides crime scene investigation, documentation, and testing for cases involving possible terrorist activity.</p>
OIT Support Organizations	<p>OIT has several support organizations that provide support to all OIT program and support organizations. The Financial Management Group provides program, financial, and asset management oversight. The Workforce Management Group provides human resource and facility support. The Transformation Management Support Group is working to define and plan to meet future requirements from a human resource and acquisition perspective. Lastly, the Chief Technology Officer and Chief Security Officer serve to ensure that technologies approved and introduced to the CBP network meet the required</p>

Division	Functions/Services
	architecture and security requirements to secure CBP's network and critical data.

Office of Administration

The Office of Administration serves an integral role as the mission support core for CBP by providing the necessary goods and services required by operational personnel and business partners to fulfill mission goals. Through modern and integrated financial systems, OA provides essential financial management services including budgeting, accounting, collection of over \$38 billion in revenue annually, processing of 301,000 vendor payments, procurement of products and services, and investment analysis. OA provides oversight and contributions to programs that offer leadership training and workforce development opportunities to its employees. OA ensures that certification levels are maintained by employees who serve as technical liaisons between CBP and private contractors as part of the Contracting Officer's Representative (COR) program. As the sole provider of asset management for CBP, OA acquires, implements, and controls all asset related programs including fleet, uniforms, personal property, seized and forfeited property, mail, and the CBP printing program. OA also manages CBP's consolidated facilities portfolio, which includes operations and maintenance (addressed in detail in the Construction and Facilities Management Congressional Justification) and rent (addressed in detail in the Rent PPA).

OA Capabilities	OA Functions/Services
Enforce Trade Law and Collect Revenue	<ul style="list-style-type: none"> • Supports the collections of duties, taxes, and fees tied to cargo, passengers, and conveyances entering the U. S. • Retains over \$1.5 billion annually in mandatory user fees that support activities performed by over 21,000 CBPOs and 2,300 Agriculture Specialists and costs incurred for the processing of air and sea passengers, private and commercial land, sea, air, and rail carriers and shipments • Maintains a sophisticated activity based costing system to appropriately account for the collection and use of various fees, allowing for the timely and effective management of funding used to support CBP personnel performing functions in support of the trade and travel facilitation mission vital to the U.S. economy • Deposits, reconciles, and manages collections for over a dozen government agency totaling over \$38 billion in FY 2012 • Processes associated trade payments related to the refunds of duty, drawback, and distribution of funds collected through various trade programs • Reviews, processes, and maintains all surety bond related documents securing revenue totaling over 150,000 bond documents in FY 2012 • Maintains the electronic cash registers and associated system used to collect more than \$360 million annually at ports throughout the nation
Management (Services and Oversight Activities)	<ul style="list-style-type: none"> • Develops, deploys, and maintains sourcing strategies to ensure efficient and effective sourcing of goods and services while supporting strategic sourcing and process improvement efforts within CBP and DHS • Develops required analysis of multiple programs to identify initiatives that support the capabilities and goals of the organizational strategic direction, enhancing the programs' stewardship, service delivery and performance management • Executes the Accountability role within the CBP Planning, Programming, Budgeting, and Accountability (PPBA) process, providing periodic review of leadership initiatives, programs, sub-programs, activities and requirements, to inform leadership on the Agency's progress towards achieving its strategic goals and objectives • Provides rigorous, in-depth analyses which evaluate the current state and/or performance of programs, organizations, processes, and capabilities across the Agency designed to provide leadership comprehensive information and business improvement recommendations • Provides oversight and coordination of efficiency reviews,

OA Capabilities	OA Functions/Services
Management (Services and Oversight Activities), Cont.	<p>program management reviews, and change management of multiple CBP programs</p> <ul style="list-style-type: none"> • Facilitates the development, monitoring, and reporting of performance metrics, including Government Performance and Results Act (GPRA; P.L. 103-62) measures to stakeholders • Provides services through modern, integrated financial systems in support of CBP’s goal of developing and promoting more effective and efficient methods to obtain and manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders • Provides financial management services as required by Office of Management and Budget (OMB) Circular A-11, including budgeting, accounting, and investment analysis • Provides effective and efficient payroll services for the unique pay circumstances encountered by CBP • Operates and maintains CBP’s Enterprise Resource Planning (ERP) system for integrated financial, procurement, and property management thereby eliminating many paper processes and improving efficiencies in several business areas while allowing CBP to continue its outstanding financial performance with unqualified audit opinions since 2004 • Provides efficient and timely payment for employee travel and the payment of products and services provided by both private companies and other government agencies • Provides print and print related services for CBP and other DHS components to ensure that the most economical and lowest competitive price; some of which include signage, forms, critical DHS and CBP Financial presentations to Congress and OMB, other congressional presentations and branded items. • Establishes forms policies and procedures, conducts periodic reviews of forms to determine compliance with applicable authorities, provides uniformity in forms design, and ensures public forms are accessible by persons with disabilities. • Provides procurement contract operations, which include all pre-award and post-award contract activities required to plan, select, acquire and manage the acquisition of products, services, supplies and equipment • OA oversees CBP’s internal controls over financial reporting as required by OMB Circular A-123, the <i>Federal Managers Financial Integrity Act</i> (P.L. 97-255; FMFIA), and <i>Federal Financial Management Improvement Act</i> (P.L. 104-208; FFMIA) • Coordinates and oversees the annual audit of CBP’s financial statements and the annual consolidated audit of DHS’

OA Capabilities	OA Functions/Services
Management (Services and Oversight Activities), Cont.	financial statements and internal controls <ul style="list-style-type: none"> • Provides personal property management, fleet management, seized and forfeiture property management and oversees uniforms • Provides policy and guidance for creating and preserving adequate and proper documentation of agency transactions in compliance with DHS, OMB, and National Archives and Records Administration (NARA)
Asset Management	<ul style="list-style-type: none"> • Provides program management and oversight for CBP personal property (approximately 530,000 assets in FY 2012) through its sustainable lifecycle, to include accurate accounting of property, efficient utilization of property resources, identification of efficiencies/effectiveness in property management, and integration of property records with financial accounting and reporting • Facilitates the acquisition, up-fit, and disposal of vehicles necessary to maintain an operationally ready fleet (26,331 vehicles in FY 2012) to support interdiction, enforcement, intelligence gathering, pursuit, surveillance, seizure, trade and travel facilitation at and between the ports of entry and first responder activities required by officers and agents nationwide • Fleet management provides environmental reporting, acquisition reporting, program performance status, administration of the Home-to-Work program and leading the maintenance, repair and operations initiatives aimed to gain efficiencies and drive down costs • Manages the uniforms lifecycle for CBPOs and agents; key capabilities and responsibilities include establishing and managing uniforms acquisition contracts; formulating and reporting on the uniforms program budget; ensuring proper distribution of uniform items to CBP academy graduates; managing the uniforms catalog; monitoring uniforms inventory; and tracking and reporting use of uniform allowances.

Office of Technology Innovation and Acquisition

OTIA is responsible for the acquisition, deployment, and integration of border security technology solutions. OTIA is developing into a center of excellence, mastering the essential competencies of acquisition and program management while extending their knowledge and expertise to other offices throughout CBP. OTIA will actively share best practices, useful insights, and practical breakthroughs to help CBP and DHS achieve their missions.

Under the direction of the OTIA Assistant Commissioner are four directorates:

1. Acquisition Policy and Oversight—Responsible for establishing policy, both for the conduct of acquisition program management within CBP as well as for ensuring technology initiatives are well defined, integrated across CBP, and based on sound analysis. Acquisition Policy and Oversight also provides workforce development acquisition support to CBP programs. This office serves as the principal support organization to the CBP Component Acquisition Executive (CAE).
2. Program Management—Provides direction, management oversight, and overall coordination for all acquisition and program management functions within OTIA.
3. Technology Management—Responsible for ensuring that CBP’s approach to technology is forward-looking, well advised by both the state-of-the-art and the state-of-the-technology, and focused on the value of the technology to CBP’s operational mission.
4. Operations Integration and Analysis—Ensures that operational requirements for goods and services are identified, documented, and approved by appropriate governance structures. Creates and exercises appropriate analytical tools so that CBP management can effectively evaluate and select alternative solutions to meet operational end-user needs.

OTIA manages the technology portfolio and the program management offices for the Southwest Border Technology, the Northern Border programs, and other technical support capabilities. Of the four directorates, OTIA Program Management Office (PMO) is the largest and employs a number of acquisition teams responsible for planning, organizing, staffing, and leading the management of specific acquisition program or programs throughout the system life cycle. In addition to the program/portfolio offices, the PMO includes Business Operations, Systems Engineering, and Integrated Logistics Support Divisions.

OTIA PMO has implemented an Integrated Product/Project Team structure to directly assign subject matter experts from the support directorates to the programs. This strategy increases efficiency and involves each support directorate with the programs and increases accountability for program success. All OTIA acquisitions will be led by a certified and experienced Program/Project Manager (PM) to ensure the programs are properly managed. Deployed technologies will undergo an operational assessment by the Border Patrol to ensure their needs are being met along the Arizona border. At a minimum, each acquisition team will include:

1. PM
2. Lead Systems Engineer
3. Assistant PM for Logistics
4. Assistant PM for Business
5. Users Representative
6. Contracting Officer/Specialist

Office of Human Resources Management

The Office of Human Resources Management is CBP’s lead for managing and developing the workforce. HRM provides centralized human resources support to nearly 61,000 CBP employees nationwide and overseas and is responsible for promoting mission accomplishment

through the efficient and effective delivery of the following services: hiring and recruitment; organizational realignments; compensation and pay administration; retirement and benefits; workplace health and safety; and labor and employee relations. Following are some of the key activities HRM performs.

- Recruiting, assessing, and hiring candidates to fill critical agency positions;
- Creating efficiencies by leveraging technology to improve human resources business processes;
- Providing medical, benefit, and work life advisory services;
- Promoting a safe and healthy work environment;
- Facilitating workforce and organizational effectiveness;
- Establishing Agency-wide policies; and
- Conducting operational services for all CBP labor and employee relations.

Office of Intelligence & Investigative Liaison

The Office of Intelligence and Investigative Liaison administers CBP's intelligence and targeting programs, which support a flexible enforcement capability that anticipates and detects potential threats to our security, economy, and public safety. Serving as a powerful partnership that connects the law enforcement and intelligence communities, these programs develop, provide, and coordinate capabilities to support CBP's primary mission to secure our borders while facilitating legal trade and travel. CBP's intelligence and targeting programs work to:

- (1) detect threats away from our borders;
- (2) identify travelers and shipments according to the threat they pose;
- (3) integrate and coordinate our intelligence and targeting capabilities; and
- (4) establish stronger partnerships with domestic and foreign partners.

CBP's strategic approach, both at and between the ports of entry, relies on risk management. Segmenting the flows of people and goods by the risk they pose allows CBP to focus law enforcement efforts on the relatively small fraction of goods and people that pose a threat to public safety and economic prosperity while facilitating lawful trade and travel. This strategy depends on reliable and timely intelligence and information for success, from which informed judgments about the risk posed by encountered people and goods can be made. Effective intelligence not only involves the identification of known threats and hazards, but also facilitates the identification of unknown dangerous people and goods which, because of their anonymity, often pose a greater threat to the security and safety of our country, citizens, and interests. CBP's intelligence and targeting capabilities are force multipliers and have proven its return on CBP's investment.

OIIL provides CBP front line operators and decision-makers with relevant and current situational awareness and facilitates operational responses for all crimes, threats, and hazards throughout the various CBP areas of responsibility (AOR) by utilizing resources such as the Intelligence Coordination Team (ICT) in Detroit, the Tucson Intelligence and Operations Coordination Center (IOCC), and the 24/7 National Intelligence Watch and OIIL personnel at the El Paso Intelligence Center (EPIC). Through the collection and production of intelligence and analytical

products, OIIL provides intelligence and deploys technical, analytical, targeting and collection management tools in support of front line border operations to all geographic AORs.

OIIL is operationally broken down into the following divisions:

OIIL Division	OIIL Key Functions and Capabilities
<p>Targeting</p>	<ul style="list-style-type: none"> • Operate and maintain the Automated Targeting System (ATS). Tables below illustrate ATS’s current capabilities and other agencies it supports. • Other Targeting efforts include: <ul style="list-style-type: none"> ▪ Creation of the National Targeting Centers (NTC) and National targeting rules that cover all threats/hazards; ▪ Processing of 2.1 million air passengers and crew weekly and referring 0.06 percent (1,300 weekly) of these travelers for additional examination; ▪ Identification of over 5,000 Terrorism Watch List matches each year, of which approximately 300 to 350 annually are denied boarding or refused entry into the United States; ▪ Development and integration of: <ul style="list-style-type: none"> ▪ Modernized entity resolution capabilities; and ▪ Machine learning targeting rules in land border and cargo environments. ▪ Conducting risk assessments of the large volume of regulatory and commercial data generated by commercial entities and other government agencies by verifying the identity of businesses that ship goods across our borders. • Employ the Analytical Framework for Intelligence, a suite of “force multiplication” tools to automate time-consuming tasks that face CBP analysts today regarding data access, query and information retrieval, analysis, and reporting.
<p>Collections</p>	<ul style="list-style-type: none"> • Support the leveraging of CBP and other Intelligence Community (IC) assets to provide Intelligence, Surveillance, and Reconnaissance (ISR) capabilities that synchronize and integrate the planning and operation of sensors, assets, and processing, exploitation, and dissemination systems in direct support of current and future operations. • Provide an enhanced common intelligence picture (CIP) to CBP leadership both in the field and at Headquarters levels. • Deploy cutting-edge technologies and capabilities, including collections subject matter experts in imagery, signal and human intelligence disciplines, tracking, tagging and locating, law enforcement technical collection (LETC), synchronizing IC airborne ISR, and Tasking, Collecting, Processing, Exploitation, and Dissemination procedures.
<p>Analysis</p>	<ul style="list-style-type: none"> • Responsible for the all-source analysis, production, and dissemination of classified and unclassified tactical and strategic intelligence products designed to inform both the strategic and operational decision-making processes at all levels of the agency.

OIL Division	OIL Key Functions and Capabilities
	<ul style="list-style-type: none"> • Focus identification of known/unknown threats, high-risk persons/conveyances/cargo and the identification of the tactics, techniques, and procedures (TTP) used by transnational criminal organizations (TCO).
<p>Commissioner’s Situation Room and Intelligence Watch (CSIRW)</p>	<ul style="list-style-type: none"> • Central hub responsible for all classified and unclassified indications, watch, and warning activities for the agency, to include receiving and reporting on critical incidents occurring across the CBP complex and around the globe. Provide actionable intelligence at the lowest possible classification level to CBP’s frontline agents and officers. • The CBP real-time, all-source, law enforcement, and intelligence center responsible for triaging and rapidly fusing operational information and intelligence to inform CBP leadership’s decision-making, including providing direct support to the newly established corridors and field commands such as the South Texas Campaign (STC) and Arizona Joint Field Command (JFC).
<p>Detroit Intelligence Coordination Team (ICT)</p>	<ul style="list-style-type: none"> • Collect, prioritize, and process requests for information (RFI) from the OFO, USBP, and OAM in the Detroit Sector and provide timely responses to assist with ongoing interdiction and intelligence operations. • Task and collect images from National Technical Means (NTM) and LETC materials, as well as the in-depth analysis of the information and data collected. • Provide reporting to drive operational planning in the area of responsibility (AOR).
<p>El Paso Intelligence Center (EPIC)</p>	<ul style="list-style-type: none"> • Leverage and collaborate with interagency resources in order to collect all relevant, actionable, and perishable information to enhance interdiction and attract investigative resources to the CBP mission. • Identify the most effective way to mitigate risks imposed by TCOs through utilization of a risk-based management system allowing for a greater ability to enhance situational awareness, identify TCO Threats, Tactics, and Procedures (TTP) and reveal vulnerabilities in existing enforcement layers. • Identify and fill intelligence gaps, and provide tactical intelligence to law enforcement operations, including CBP’s frontline personnel in the AOR. • Facilitate the timely and expeditious sharing of criminal information and intelligence between and among participating agencies to provide critical information and support. • Directly supports the JFC, STC, and the New Mexico/West Texas Alliance to Combat Transnational Threats (ACTT) across the entire spectrum of threats. • Respond to RFI and analytical targeting training from OFO and OBP units in the AOR.

OIL Division	OIL Key Functions and Capabilities
<p>Intelligence and Operations Coordination Center (IOCC)</p>	<ul style="list-style-type: none"> • Centralized location for CBP field leadership to plan and coordinate joint operations and share intelligence with CBP operational components and their partners to enable CBP to transform into a more intelligence driven organization and ensure continuity and sustainability of national border security. • Establish a single venue for increased operations coordination while facilitating the flow of classified and unclassified information to CBP components and their partners, to strengthen communications and relationships, and to establish a unified enforcement posture at and between the ports of entry. • Aid field leadership in directing joint operations and establishing the primary focus to determine the direction and tempo of joint operations and establish priority intelligence requirements in the AOR. • Strive to meet the integrated priorities and goals of the IOCC with a focus on smart operations and efficient resource allocation. • Provide a CIP and a Common Operating Picture (COP) to make recommendations to leadership in operational decision making. • Participate in external Federal, state, local, tribal or international partners to establish relationships to effectively engage other agencies with interests and assets in the AOR. • Coordinates and provides liaison support to facilitate cross-organizational operations as well as CBP operations involving non-CBP elements from throughout the IC as well as international, state, local, and tribal partners and authorities.

Office of Training and Development

The Office of Training and Development is responsible for the centralized leadership and direction of all training programs for the CBP workforce. OTD manages CBP's National Training Plan (NTP), which prepares employees to carry out the core missions of CBP by providing basic and advanced training based on identified agency and organizational requirements.

OTD establishes and upholds standards for designing, developing, delivering, and evaluating training to ensure the agency's training programs are transparent, accountable, and legally defensible. OTD has also developed and maintains a robust distance learning program (the Virtual Learning Center) that enables CBP to deliver hundreds of training courses to CBP personnel in an efficient and cost effective manner.

The Headquarters Management and Administration Training PPA funds basic, advanced, and supervisory/management/leadership training for a wide range of CBP employees, training course development and maintenance costs, operating costs for CBP's on-line training and course scheduling and management systems, and salaries and benefits for OTD's mission support activities. Funding levels requested for this area in FY 2014 will enable CBP to achieve targeted FY 2014 staffing levels for positions covered under this PPA and maintain mission critical skills and certifications of existing employees. Below are descriptions of the types of training programs funded under this PPA.

Headquarters Training Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
Basic Training	Training for Air and Marine Interdiction Agents, Attorneys, Intelligence Research Specialists, Internal Affairs Agents, and Regulatory Auditors is funded under this PPA. Successful completion of basic training is a pre-requisite for employment in these positions and ensures proficiency in the foundational knowledge and skills required by these positions.	175	599	600
Mandatory Continuing Education (CPE/CLE)	Certain CBP occupations (e.g. Attorneys, Regulatory Auditors, Procurement Specialists, Polygraphists, Nurses, and other health and safety professionals) have mandatory continuing education requirements in order to maintain their certifications/licenses. Funding for this training enables personnel in these occupations to maintain their certifications/licenses so that they can remain in their occupation and continue to carry out mission critical duties.	1,383	1,952	1,950
Supervisor/ Leadership Training	Training for first-line and second-line Air & Marine Interdiction Agents and all other non-uniformed CBP supervisors is funded under this PPA. This training provides supervisors with the technical and supervisory skills required to effectively lead the employees under their supervision. CBP's succession management and leadership training programs are also funded under this PPA. These programs provide training for CBP leaders to develop the critical skills, such as strategic thinking, planning, ethical decision making, and leadership, required to defend our nation's borders as well as protect lawful trade and the travelling public.	300	300	300
Trade	This training is required for CBP to effectively carry out various trade-related initiatives (e.g. Intellectual Property Rights enforcement, Broker Management and Oversight, and enforcement of regulations on Foreign Trade Zones and Free Trade Agreements). It provides training for newly-hired International Trade Specialists and Fines, Penalties and Forfeitures Specialists. As the second largest revenue producing agency in the	1,871	1,870	1,870

Headquarters Training Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
	government, CBP must maintain current levels of knowledge in the trade disciplines in order to identify fraudulent trade practices and protect and collect the revenue of the United States.			
Health & Safety	This training provides CBPOs, agents, and other employees training in first aid, radiation safety, and suicide prevention. It also provides required safety training for supervisors and Safety Officers, as well as injury prevention and compensation training.	2,114	4,886	3,000
International Pre-Deployment	This training is mandatory for any CBP employee deploying overseas and is necessary for CBP to continue filling overseas positions supporting our many international programs which are designed to enhance national security.	42	200	200
Intelligence	This training is required for CBP to maintain and enhance skill levels of existing employees who perform intelligence functions.	53	193	190
Internal Affairs Investigations	This training expands IA Agents' investigative capabilities in areas such as forensics, covert electronic surveillance, and tracking. As a national security and law enforcement agency, it is critical for CBP to have the highest levels of protection in place to maintain the integrity of its personnel and to identify areas of corruption.	105	166	166
Emergency Preparedness & Response	This training is required for CBP to maintain sufficient skill levels in incident management and response procedures. This training provides capabilities not only to maintain security of the border, but also to provide support to areas struck by natural disasters (CBP supports responses to these types of events).	200	200	200
Skills Enhancement/ Professional Development	This includes high priority training such as New Employee Orientation and required privacy and Freedom of Information Act training.	1,730	1,300	1,300
Essential Training Operating Costs	This includes course development and maintenance costs. Funding allows CBP to maintain the currency of existing training and complete the development of new courses deemed mandatory or mission-critical. It also covers costs	\$1,877,900	\$2,600,000	\$2,600,000

Headquarters Training Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014

Office of Internal Affairs

The Office of Internal Affairs exercises oversight authority for all aspects of CBP security including operational, personnel, and facilities, as well as the CBP counterintelligence (CI) program (including cyber protection). IA's mission is to promote the integrity and security of the CBP workforce. IA performs and manages a wide variety of functions and programs distributed among seven divisions: Personnel Security, Investigative Operations, Integrity Programs, Credibility Assessment, Operational Field Testing, Security Management, and Management Inspections. The primary responsibilities of each division/group are listed in the table below.

Division/Group	Key Functions and Capabilities
Counterintelligence Operational Liaison Group	Formulates and implements policies, practices and procedures that make the foreign penetration of CBP more difficult to accomplish and easier to detect.
Personnel Security Division	Initiates and adjudicates background investigations on all CBP applicants, employees and contractors.
Investigative Operations Division	Conducts investigations of alleged criminal and serious, non-criminal misconduct on the part of CBP employees.
Integrity Programs Division	Serves as the research, analysis and education component of IA.
Credibility Assessment Division	Conducts applicant screening polygraph examinations.
Operational Field Testing Division	Assesses and evaluates the integrity of CBP's multilayered security systems.
Security Management Division	Provides oversight for physical, information, industrial, and operations security programs.
Management Inspections Division	Conducts inspections that provide CBP executive management with information concerning the effectiveness and efficiency of operations, programs, and areas of special interest or priority.

IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of all CBP employees. The office coordinates its internal investigative activity with the

Department of Homeland Security's Office of the Inspector General, U.S. Immigration and Customs Enforcement's Office of Professional Responsibility, the Federal Bureau of Investigation, and numerous other Federal, state and local law enforcement authorities.

CBP has implemented a Comprehensive Integrity Strategy, which integrates prevention, detection, and investigation capabilities to deter, disrupt, and respond to corruption and serious misconduct in the CBP workforce. The Comprehensive Integrity Strategy employs:

- Improved personnel security screening of prospective CBP employees (each Background Investigation (BI) and Periodic Reinvestigation (PR) costs approximately \$3,200);
- Polygraph examinations of law enforcement candidates as mandated by the *Anti-Border Corruption Act of 2010* (P.L. 111-376) (each polygraph administered costs approximately \$800);
- Application of behavioral and analytical research tools to identify potential indicators of corruption;
- Intelligence-driven investigative responses to instances of criminal corruption and serious misconduct on the part of CBP employees; and
- Research (data) and analysis (behavior) conducted by the Integrity Programs Division designed to detect corruption, develop data/intelligence to drive the focus of integrity investigations, and apply "Insider Threat" methodologies for advanced detection of possible integrity threats.

A top priority for IA is remaining current with the initiation of all PRs for all CBP law enforcement personnel and conducting polygraph examinations on 100 percent of all law enforcement applicants before being hired for such positions as mandated by the *Anti-Border Corruption Act of 2010*. As an efficiency measure, the polygraph examinations are placed at the beginning of the applicant screening process, prior to the scheduling of the full background investigation, to ensure investigative resources are only being expended on viable candidates. Those who do not successfully complete the polygraph examination are no longer considered for employment with CBP which allows CBP to avoid the costs associated with conducting BIs on unsuitable Law Enforcement Officer (LEO) candidates.

Office of the Commissioner

The Office of the Commissioner is responsible for the overall management and strategic direction of CBP. OC determines agency policies, directs the budget, and leads the command of an agency with broad law enforcement and regulatory responsibilities. The Commissioner of CBP is authorized to promulgate rules and regulations and prescribe internal instructions for the guidance of CBP employees that are consistent with regulations issued, and the authority delegated, by the Department of Homeland Security. OC includes the following seven offices to support the implementation of the Commissioner's agenda:

OC Office	OC Function
Office of Diversity and Civil Rights (DCR)	Responsible for ensuring diversity and inclusion as well as overseeing compliance with applicable civil rights and civil liberties law. DCR is also responsible for carrying out CBP's functions to ensure compliance with the Freedom of Information Act (FOIA).
Office of the Executive Secretariat (OES)	Ensures appropriate and expeditious action on all requests for information, executive correspondence, and official memoranda addressed to the Commissioner and other CBP and DHS officials.
Office of Strategic Integration (OSI)	Represents the Commissioner's intent with enterprise-wide focus, and manages CBP's strategic integration portfolio.
Office of Program Development (OPD)	Develops and oversees the Planning, Programming, Budgeting, and Accountability (PPBA) framework for managing resources.
Office of Policy and Planning (OPP)	Provides leadership, direction, and advice regarding CBP's overall policy development and implementation. Implements CBP's Strategic Management Framework (SMF) to fully integrate CBP's investment, resource, and program management.
State, Local, and Tribal Office (SLT)	Responsible for advising the Commissioner and program offices regarding the impact of CBP policies and initiatives on state, local, and tribal stakeholders.
Office of Trade Relations (OTR)	Provides timely information about CBP trade policy to the international community. Conducts formal outreach efforts by hosting regional and local trade conferences.

The Joint Field Command of Arizona AZ

The Joint Field Command of Arizona (JFC-AZ) was created to meet unique challenges in the state of Arizona that each operational element of CBP has historically faced as individual components. The JFC-AZ has been charged with implementing the CBP Commissioner's strategic guidance and intent through the operational control of each CBP component and their respective assets within the Arizona Area of Responsibility (AOR) to include the Tucson/Yuma Sectors, Tucson Field Office, and Tucson/Yuma Air Branches.

By establishing a corporate mindset, the JFC-AZ has expanded operational capacities that allow CBP resources to maximize operational effectiveness and capabilities across the Arizona border. This is accomplished through a unified, integrated and cohesive risk based approach to border security, commercial enforcement and trade facilitation by fully integrating component operational missions and resources.

The JFC-AZ serves as an extension of the Office of the Commissioner in the field and allows JFC-AZ leadership to make strategic decisions in real time that were once made from headquarter elements in Washington, DC. As a result of this joint force synergy, CBP is able to better safeguard the border, protect the American public against terrorists and the instruments of terror, defeat transnational criminal organizations (TCO) and their smuggling operations, enforce

the laws of the United States and promote economic prosperity by securing and expediting lawful international trade and travel to and from the homeland. These goals are made possible through integrated planning and execution of Department of Homeland Security/CBP mission objectives, intelligence enterprises, outcome-based consequences, and fostered partnerships with military, federal, state, local, tribal and bi-national agencies.

Joint Operations Directorate

The CBP Joint Operations Directorate occupies a pivotal position for CBP through which the Commissioner exercises joint (intra/inter-agency) strategic and operational oversight of the field operations of CBP, whether in steady state operations or during a CBP response to a threat or incident, both manmade or natural. As such, the JOD manages the Office of the Commissioner's joint executive staff functional responsibilities of C⁴/I³ – command and control, coordination, communications, intelligence, information and technology, and integrated operations. The JOD is responsible for facilitating collaboration, coordination, and communication with and amongst intra/interagency partners to ensure a unified and synchronized approach to national border security issues and concerns. The JOD establishes, implements, and manages joint strategic and operational doctrine for CBP. Under the authority and guidance of the Commissioner, the JOD develops and effects operational, strategic joint-policies while achieving and maintaining a common operating picture (COP) as well as managing consequential risk and joint operational response.

JOD is comprised of 31 personnel transferred from various offices within CBP Headquarters including: Office of Intelligence and Investigative Liaison, Office of Air and Marine, Office of Border Patrol, Office of Field Operation and Office of Information and Technology/Laboratories and Scientific Services. The JOD consists of five divisions – Communications, Incident Management, Special Programs, Integrated Planning, and Joint Field Integration. The table below provides an overview of the major responsibilities of each of these divisions.

Function	Projects
Communications	
Ensure the transmission of time-sensitive, mission critical information in alignment with the CBP communication strategy.	<ul style="list-style-type: none"> • Situational Management System (SMS): Initiate, deploy, and train personnel on the SMS event based tracking system. • Joint Operations Center (JOC) and Common Operating Picture (COP): Initiate and oversee JOC and COP for CBP in the National Capitol Region (NCR). • CBP Emergency Notification System (ENS): Communicate through various devices to CBP personnel to ensure status and safety during emergent and catastrophic events. • Next Gen Tactical Communication: Developed in conjunction with CBP operational programs.
Incident Management	
Manage CBP response efforts and ensures CBP emergency preparedness to significant events beyond the scope of steady state operations.	<ul style="list-style-type: none"> • Incident Management (IM): Executes policy, strategic planning, and administrative actions through positioning emergency equipment, personnel, and supplies. • Incident Management Jump Teams: Conduct response operations executed through established Incident Management and incident support workers. • COOP/Business Resumption: The ability to maintain or expeditiously restore the flow of commerce and people to, through and away from Ports of Entry during and following a disruptive event.
Special Programs	
Leads the coordination of CBP field operations ensuring the effective allocation of resources and provides management oversight and direction of programmatic functions for CBP Headquarters and field components.	<ul style="list-style-type: none"> • Weapons of Mass Destruction Office: Developed and established the office. • Medical Countermeasures for Aerosolized Anthrax: Developed implementation of measures. • Global Nuclear Detection Architecture: Developed the architecture. • National Special Security Events (NSSE) and Special Events Assessment Rating (SEAR - Levels I & II) Coordinate and manage the support and provide law enforcement personnel for significant national events such as the Super Bowl, Presidential Inauguration, the Republican and Democrat National Conventions, the G8 Summit, and Stafford Act Disaster Declarations and related actions.
Integrated Planning	
Provides strategic and operational planning support, plan development and joint operational coordination in CBP, across DHS, and with DoD, federal, state, local, and tribal partners.	<ul style="list-style-type: none"> • Northern Border Joint Operations Assessment • Southwest Border Corridor Concept of Operations • CBP, USCG, ICE Maritime Operations Coordination Plan • CBP and DHS Caribbean/Puerto Rico Response Plan • Operational Requirements Review Board Concept of Operations
Joint Field Integration	
Implement the Commissioner's vision for CBP field integration and serve as the mechanism to collaborate and coordinate HQ support for all joint/unified field operational efforts.	<ul style="list-style-type: none"> • Integrate policy and doctrine to effectively and efficiently provide a unified CBP operational response to emerging threats. • Deliver operational field constructs that task and organize available CBP forces to establish and maintain the continuity of border security.

Office of Public Affairs

The Office of Public Affairs (OPA) is responsible for informing and managing the flow of information to the public about CBP and its missions, accomplishments, and ongoing operations. OPA accomplishes this through its Executive Team, Media Division, Outreach Division, Multi-Media Products Division, CBP Info Center, Television and Movie Liaison Office, and Self-Sustainment Division.

Division/Program	Function
Executive Team	OPA's Assistant Commissioner and Executive Team direct OPA's strategic activities and oversee day-to-day operations and interaction with DHS OPA.
Media Division	Engages Major Market Media. Includes pitching CBP stories - Researching and providing requested information - Hosting media visits - Organizing interviews - Coordinating and clearing statements - Researching and clearing press releases - Preparing CBP spokespersons - Responding to breaking news - Responding to critical incidents. (Average number of annual major market media stories covering CBP = 4,900)
Public Outreach Division	Manages all CBP web content, - Coordinates CBP external presentations (Trade Symposium, CBP Events, etc.) – Conducts special emphasis outreach programs (Human trafficking campaign, Border Deaths, Global Entry etc.) – Manages CBP branding – Produces CBP publications
Movie and Television Production	Informs TV and Movie portrayals of CBP activities (i.e. "Border Wars" "To Catch a Smuggler" etc.). Pitches concepts - Reviews production proposals - Coordinates approvals – Coordinates on-site coordination and logistics - Reviews of rough-cut products - Resolves privacy, proprietary, personal, and protected disclosure issues.
CBP INFO Center	Analyzes and marshals information requested by CBP clients, customers, and stakeholders - Provides requested information on-demand in real-time - Analyzes client/customer requests – Analyzes and reports on client and customer trends to the appropriate CBP offices
Multi Media Production Division	Scripts, produces and delivers multi-media products. Includes CBP Executive Services (Record Hearings, Interviews, Speeches, etc.) - CBP Events (Awards Ceremony - 9/11 Anniversary - Trade Symposiums - S-1 Videos) - Inspirational and informational products (Suicide prevention, CBP's Centers for Excellence and Expertise, Diversity campaigns, etc.)

Division/Program	Function
OPA Program Self Sustainment (Mission Support)	Acquires and maintains OPA’s budget, personnel, equipment and infrastructure, and guides OPA compliance with all Federal, DHS, and CBP laws, rules, regulations, policies, and procedures for budget, personnel, audit, administration and logistics

Office of the Chief Counsel

The Office of Chief Counsel is the chief legal officer of CBP and reports to the General Counsel, DHS through a Deputy General Counsel. OCC also serves as the CBP Ethics Officer and is the principal legal advisor to the Commissioner of CBP, CBP’s senior executive management, and CBPOs and employees in their official capacities. OCC attorneys provide legal advice to, and legal representation of, CBPOs in matters relating to the activities and functions of CBP. As CBP’s in-house law office, OCC is responsible for providing comprehensive legal services to CBP, including but not limited to: reviewing proposed administrative actions to ensure compliance with legal requirements; preparing formal legal opinions; preparing or reviewing responses in all court actions, civil or criminal, that involve CBP; assisting with the collection and protection of revenue; representing the agency in administrative and judicial forums, including arbitration, the U.S. Court of International Trade, federal district and appellate courts, and immigration court proceedings; reviewing contractual, procurement, and real property actions; reviewing legislative proposals; and training CBP officials in myriad law enforcement, trade and ethics subjects.

OCC has three functional areas: Ethics, Labor and Employment; Enforcement; and Trade and Finance. Each functional area is supervised by an Associate Chief Counsel at Headquarters. In the field, Associate and Assistant Chief Counsels are located in major cities across the United States, providing “one-stop” legal services to CBP field managers in their geographic areas of responsibility. There are 28 offices within OCC, 27 of which are in field locations, currently employing approximately 256 attorneys and 40 support staff. The legal and ethics work performed by OCC cannot be contracted out, as it is inherently governmental and must be performed by attorneys who work within the overall DHS Office of General Counsel, as only those attorneys have the delegated authority from the General Counsel to provide legal advice and counsel to and for the agency.

OCC does not set agency policy or priorities; rather, it acts to support agency priorities and initiatives as set forth by the Commissioner and senior executive management across the organization, often on tight deadlines and on matters of high visibility and great significance for the agency’s mission. The current model for legal services is the “in house counsel” model where the agency pays salaries, benefits and expenses for a set number of attorneys, and any and all legal and ethics questions and requests for legal services and support are handled by OCC without additional costs for the agency to obtain legal services. OCC also represents CBP in all third-party administrative proceedings, including procurement protest proceedings, hearings before administrative judges of the Merit Systems Protection Board (MSPB), Equal Employment Opportunity Commission (EEOC), and Federal Labor Relations Authority (FLRA), and proceedings before labor arbitrators.

Office of Congressional Affairs

The Office of Congressional Affairs serves as a conduit between DHS, CBP, and the Congress. OCA performs the vital work of advancing CBP's core mission priorities in the legislative arena by facilitating effective and timely information exchange and analysis between its stakeholders in three critical areas: Enforcement, Trade and Agriculture, and Appropriations and Management.

Working Capital Fund Overview by Activity Manager

CBP's Working Capital Fund (WCF) costs are paid from the HQ M&A PPAs. Below is a breakout of the WCF Activities that includes the Managing Office and anticipated FY 2014 costs.

Working Capital Fund Activity	Managing Office	Anticipated FY 2014 Charges

Description of Selected Adjustments to Base:

Transfer to realign OTIA funding:

In response to direction in the FY 2012 Consolidated Appropriations Act (P.L. 112-74) Conference Report, starting in FY 2014 all OTIA Government FTE and associated expenses were moved from the BSFIT Program Management (PM) PPA into HQ M&A within the Salaries and Expenses appropriation. This funding restructuring complies with Congressional guidance and provides a clearer, consolidated view of Government FTE throughout CBP. This will also allow OTIA the authority to use its organizational resources across CBP (i.e. non-BSFIT programs) to fulfill its role as CBP Component Acquisition Executive (CAE.)

Transfer of FOIA Division: This transfer reflects movement of the FOIA Division from Office of International Trade, funded by the Inspections, Trade, and Travel Facilitation PPA, to the Office of the Commissioner, funded by both HQ M&A PPAs. The full amount of \$2.2 million funds 23 positions and other associated expenses. This realignment will elevate the FOIA program to the senior management level in compliance with Executive Order 13392 and appropriately raises FOIA visibility as well as that of any and all other relevant regulations and policies.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Advanced Passenger Information System	The APIS system is used to review air and sea passengers and crew in an effort to identify possible terrorists, uncover high-risk individuals, and facilitate the clearance process for a vast majority of legitimate travelers. APIS almost entirely closed the performance gap of not knowing the identity of air travelers in transit to the U.S. and provided the capability to compare these against a watch list. APIS maintains the closure of this gap. Enhancements to the program are primarily reactive in response to event driven needs and noted operational performance. The program identifies the mission need identified in the Aviation and Security Act by providing the information medium for commercial air carriers to provide APIS data	

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
	for inbound passengers and crew members before their arrival in the United States. Funding for the APIS is funded out of this PPA and the HQ01 at the Ports of Entry. Total funding for this procurement activity is \$2.991 million in FY 2012, \$2.991 million in FY 2013, and \$4.202 million in FY 2014.	
\$1,566	\$1,566	\$2,208
Infrastructure	CBP Infrastructure is the Information Technology (IT) backbone that supports all of CBPs systems. The systems supported by CBP Infrastructure allow for a unified border presence and provides for more efficient and effective information sharing amongst trade and law enforcement agencies. Funding for Infrastructure is funded out of this PPA, the HQ01 at the Port of Entry, Immigration User Fee, APHIS User Fee, and Automation COPPS. Total funding for this procurement activity is \$530.799 million in FY 2012, \$531.957 million in FY 2013, and \$470.694 million in FY 2014.	
\$152,497	\$152,497	\$114,110
SAP	SAP permits CBP to accomplish its mission with more efficiency than ever before as well as reduce functional gaps by closing material weaknesses identified during past audits of CBP Financial Statements required by the Federal Managers Financial Integrity Act. The SAP Program provides for accurate and timely processing of financial, property, and procurement transactions occurring on a daily basis that enable CBP to accomplish its mission. SAP is an integrated enterprise-wide resource planning (ERP) system that replaced ten stove-piped, outdated, and underperforming mainframe systems that CBP deemed insufficient and no longer suited to meeting data processing and reporting needs. Funding for SAP is funded out of this PPA, the Immigration User Fee, and HQ01 at the Ports of Entry. Total funding for this procurement activity is \$18.270 million in FY 2012, \$18.270 million in FY 2013, and \$14.492 million in FY 2014.	
\$8,624	\$8,624	\$6,639
Tactical Communications (TACCOM) Modernization	CBP is responsible for securing the nation's borders against illegal entry of people and goods while managing legitimate travel and trade. To support this mission, CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal government. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where their radio is often their only communications channel to coordinate activities or summon assistance. Funding for TACCOM Modernization is funded out of this PPA, HQ01 at the Ports of Entry,	

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
	and BSFIT Development & Deployment, and BSFIT O&M. Total funding for this procurement activity is \$57.783 million in FY 2012, \$67.783 million in FY 2013, and \$78.854 million in FY 2014.	
\$7,785	\$7,785	\$5,744
Analytical Framework for Intelligence	The goal is to provide a suite of “force multiplication” tools that automate CBP analyst tasks regarding data access, query and information retrieval, analysis, and reporting. AFI will be fully integrated with other endeavors that seek to accomplish similar but discretely different or additional objectives, such as the CBP Intelligence and Operations Framework System (IOFS), ICEPIC, SBInet, and other intelligence analysis applications currently in planning or production stages, to ensure such initiatives complement one another and avoid unnecessary duplication. Funding for the Analytical Framework for Intelligence is funded out of this PPA and the HQ01 at the Ports of Entry. Total funding for this procurement activity is \$24.0 million in FY 2012, \$24.0 million in FY 2013, and \$24.014 million in FY 2014.	
\$12,607	\$12,607	\$12,614
Mobile Asset Program (MAP)	The CBP Mobile Assets Program Management Office (MAPMO) coordinates the acquisition and disposal of the vehicles used by the CBP Offices to carry out their operations in support of the DHS mission. These vehicles are acquired, configured and deployed to support detection, interdiction, enforcement and support activities at and between the ports of entry throughout the United States of America and U.S. territories. The CBP Fleet facilitates the various activities necessary to achieve the primary mission including; training, transportation, technology installations, and other support activities. Funding for the Mobile Asset Program is funded out of this PPA, HQ01 at the Ports of Entry, and Border Security and Control. Total funding for this procurement activity is \$73.206 million in FY 2012, \$91.082 million in FY 2013, and \$53.448 million in FY 2014.	
\$34,617	\$43,793	\$21,165
Automated Targeting System (ATS) Maintenance	A web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. Automated Targeting System allows CBPOs to focus their efforts on cargo shipments and passengers that most warrant further attention. Funding for ATS is funded out of this PPA and the Automated Targeting Systems, and HQ01 at the POE. Total funding for this procurement activity is \$72,016 in FY 2012, \$40,016 in FY 2013, and	

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
	\$111,462 in FY 2014.	
\$44	\$44	\$1,530
Block 1	<p>The main mission for Block 1 Sustainment is increased situational awareness and persistence surveillance across the Tucson and Ajo Stations within the Tucson Sector. Block 1 technology supports U.S. CBP agents and officers to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 covers approximately 53 miles of international border in Arizona.</p> <p>Funding for Block 1 is funded out of this PPA and the HQ01 at the POE, and SB02 BSFIT O&M. Total funding for this procurement activity is \$9,770 in FY 2012, \$11,270 in FY 2013, and \$22,733 in FY 2014.</p>	
\$652*	\$652*	\$230
Integrated Fixed Towers	<p>Integrated Fixed Towers (IFT) is a system that provides automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, Integrated Fixed Towers (IFTs), equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest.</p> <p>Funding for Integrated Fixed Towers is funded out of this PPA and the HQ01 at the Ports of Entry, BSFIT O&M, and BSFIT D&D. Total funding for this procurement activity is \$119,394 in FY 2012, \$119,394 in FY 2013, and \$87,322 in FY 2014.</p>	
\$1,047*	\$1,047*	\$1,075

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Mobile Surveillance Capabilities	<p>The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.</p> <p>OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered "mixed non-IT/IT."</p> <p>Funding for Mobile Surveillance Capabilities is funded out of this PPA and the HQ01 at the Ports of Entry and SB02 BSFIT O&M. Total funding for this procurement activity is \$4,570 in FY 2012, \$5,070 in FY 2013, and \$5,891, in FY 2014.</p>	
\$295*	\$295*	\$153
Northern Border Remote Video Surveillance System (NB-RVSS)	<p>The NB - RVSS systems consist of day night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist.</p> <p>OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered "mixed non-IT/IT."</p> <p>Funding for NB-RVSS is funded out of this PPA and the HQ01 at the Ports of Entry, and SB02 BSFIT O&M. Total funding for this procurement activity is \$6,927 in FY 2012, \$7,927 in FY 2013, and \$6,637 in FY 2014.</p>	
\$223*	\$223*	\$229
Remote Video Surveillance System (RVSS)	<p>A Remote Video Surveillance System (RVSS) is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes." – Chief, USBP memo of June 10, 2010. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand</p>

CBP requests \$407.898 million in FY 2014 to fund organization-wide rent costs

- An increase of \$56.541 million is for Adjustment for Rent
- An increase of \$61.918 million is for Rent Consolidation
- An increase of \$1.59million is for 2012 OFO Positions for New Ports of Entry - Year 1
- An increase of \$335 thousand is for 2012 National Targeting Center - Year 1
- A decrease of -\$196.235 million is for Land Port of Entry Delegation of Authority

CURRENT SERVICES PROGRAM DESCRIPTION:

The Rent PPA supports the rental of facilities, space, buildings, structures, land, and rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). Leased operational space requirements include Marine Units, National Marine Training Centers, Unmanned Aerial Systems (UAS), and Air Branches and Units supporting the Office of Air and Marine (OAM); Sector Headquarters facilities, Border Patrol Stations, Forward Operating Bases, and checkpoints supporting United States Border Patrol (USBP); field offices and Ports of Entry (excluding Land POEs in the Delegation of Authority) supporting the Office of Field Operations (OFO); and Mission Support Facilities (MSF) comprised of administrative office space and laboratories belonging to Mission Support offices. The Rent PPA also funds resources for the rent costs associated with over 900 Tactical Communication (TACCOM) leases at both borders and throughout the United States, which facilitate communications and house critical surveillance equipment.

CBP leases a substantial portion of its real property assets through the General Services Administration (GSA) and by direct lease delegation to non-federal sources. CBP's leased portfolio consists of over 8 million square feet of leased space executed through occupancy

agreements and leases through GSA and direct leases with commercial sources. This excludes the GSA-owned LPOEs transferred to CBP through the delegation of authority effective in FY 2014; the funding is referenced below under “Adjustments to Base.”

In FY 2014, \$334 million or 82 percent of CBP’s rent budget will fund leases negotiated through GSA for GSA-owned or leased facilities nationwide; \$31 million or 8 percent will fund direct leases, most of which support OAM and USBP; and \$43 million or 10 percent will fund rent-related costs for building security services provided by FPS. The planned allocation of FY 2014 Rent PPA funds across CBP’s rent portfolio is shown in the table below. (Note that the allocation and cost details are subject to change to ensure CBP’s highest priorities for critical facilities and infrastructures are funded.)

Rent PPA – FY 2014 Spend Plan

Lease Type	OAM	USBP	OFO	MSF	Total (\$000)	% of Total
GSA-Owned Lease	\$ 162	\$ 6,446	\$ 68,344	\$ 51,043	\$ 125,975	31%
GSA-Leased Lease	1,965	41,142	67,738	97,490	208,335	51%
Direct Leases	12,363	10,543	780	7,313	30,999	8%
FPS Security Costs	55	1,084	23,199	18,251	42,589	10%
Total Rent PPA	\$ 14,545	\$ 59,215	\$ 160,061	\$ 174,077	\$ 407,898	100%
% of Total	4%	15%	39%	42%		

Rent – Adjustments to Base

The Rent PPA request includes a transfer of \$196.235 million from the Rent PPA into the Construction and Facilities Management Appropriation, Facilities Construction & Sustainment (FC&S) PPA, for the Delegation of Authority for LPOEs. Because CBP will be responsible for the sustainment and capital investment activities related to the LPOEs, the funding resources previously paid to GSA for rent will be retained by CBP in the FC&S PPA for building operations, maintenance, repairs, and capital investments required to adequately manage the LPOE portfolio. The distinctive nature of LPOEs as mission-oriented, operational assets of CBP, as well as the national trade and transportation infrastructure, differentiates this part of the portfolio from other federal buildings managed by GSA. The Delegation facilitates faster delivery of services tailored to the specific needs of CBP’s Field Operations mission and the ability to explore an effective service model that is more responsive to changing priorities and critical operations.

The Rent PPA request consists of a transfer of \$61.918 million for rent consolidation across CBP for overtime utilities at GSA-leased facilities and rent and rent-related activities and is comprised of the following: \$22.593 million for centralization of overtime utilities at GSA-leased facilities and \$39.325 million for centralization and consolidation of rent activities into the Rent PPA. The \$22.593 million for the centralization of overtime utilities at GSA-leased facilities allows CBP to incorporate overtime utilities at the standard rate through lease negotiations realizing

efficiencies for facilities typically operating 24/7, such as mission critical facilities for OFO and USBP.

The \$39.325 million for rent consolidation includes a transfer of \$7.969 million and \$31.356 million which allow CBP to effectively manage lease administration and rent costs associated with CBP’s leased facilities by enhancing CBP’s ability to centrally manage all rent and rent-related activities for its leased facilities portfolio, and provide clearer insight into CBP’s true rent costs. This centralized business model further enhances CBP’s ability to effectively and efficiently manage the leased portfolio and realize efficiencies wherever possible through co-location and other economies of scale. The \$7.969 million transfer of funds supports direct leased facilities for OAM, OFO, and USBP; TACCOM towers for the Office of Technology Innovation and Acquisition (OTIA); and GSA-leased facilities for OFO. The base transfer of \$31.356 million into the Rent PPA is for rent consolidation from OAM, OFO, USBP, OTIA TACCOM, Office of Information Technology (OIT), Office of Internal Affairs (IA), Office of Human Resource Management (HRM), and Office of Trade (OT).

Additionally, the Rent PPA request includes an adjustment of \$56.541 million for increased costs to CBP for rent and rent-related building charges for GSA and direct leased facilities of USBP, OFO, OAM, and Mission Support offices. The adjustment is due to increases in the space inventory from new facilities (replacing of existing facilities, other space additions), and increased cost due to rent escalation. It includes increases from rent-related building charges including utilities and services such as those provided by FPS.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Border Patrol Facilities: The Border Patrol Facilities Program (BFPF)	The Border Patrol Facilities Program (BFPF) provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. When fully funded, the investment addresses the requirements for new, modernized, and repaired facilities to fulfill mission-driven operational needs; accommodates increasing capacity demands associated with new agent and asset deployments; provides resources to modify or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio. Funding for the BFPF is funded out of this PPA and the FM01 FC&S and FM02 PO&M. Total funding for this procurement activity is \$135.263 million in FY 2012, \$136.380 in FY 2013, and \$202.655 million in FY 2014.	
\$36,406	\$36,406	\$59,215

OFO Facilities	Oversees facilities and infrastructure management for the Office of Field Operations (OFO) to ensure the timely and effective planning, delivery, operation, and sustainment of the portfolio of facilities and infrastructure for OFO, as well as rent and lease management activities. Administers financial management, communications, data collection and reporting for all programs and projects related to the OFO facilities portfolio. Funding for Land Ports of Entry Modernization is funded out of this PPA, APHIS, Immigration User Fee, FM01 FC&S, and the FM02 PO&M. Total funding for this procurement activity is \$356.289 million in FY 2012, \$359.250 million in FY 2013, and \$429.469 million in FY 2014.	
\$310,241	\$313,202	\$160,061
Mission Support Facilities	The Mission Support PMO develops plans, executes, and sustains the facilities and infrastructure inventory necessary to support the mission of the CBP Mission Support Offices nationwide. Mission Support Program Management oversees facilities and infrastructure management for CBP mission support offices to ensure the timely and effective planning, delivery, and sustainment of the portfolio of facilities and infrastructure, as well as rent and lease management activities. Funding for Mission Support Facilities is funded out of this PPA, FM01 FC&S, and the FM02 PO&M. Total funding for this procurement activity is \$215.196 million in FY 2012, \$215.527 million in FY 2013, and \$236.315 million in FY 2014.

CBP requests 21,709 positions, 20,714 FTE, and \$2,837.294 million in FY 2014 for the Inspections Trade and Travel Facilitation PPA

- An increase of \$153.235 million is for Pay Adjustment for Workforce Maturation
- An increase of \$110.0 million is for Restoration of Base
- An increase of \$98.227 million is for Increase to CBPOs Staffing Level to Promote Travel and Trade
- An increase of \$18.643 million is for Pay Increase
- An increase of \$14.076 million is for 2012 OFO Positions for New Ports of Entry - Year 1
- An increase of \$13.0 million is for Realigning OIT to OT to fund ACE Business Office
- An increase of \$10.8 million is for CBP Mobile Program
- An increase of \$8.0 million is for Integrated Traveler Processing
- An increase of \$7.952 million is for 2010 Import Safety Initiative - Year 1
- An increase of \$5.747 million is for 2011 CBPO Staffing - Year 2 (318 CBPOs)
- An increase of \$5.422 million is for 2012 OFO Positions for New Ports of Entry - Year 2
- An increase of \$5.398 million is for 2010 Border Security Supplemental - Year 3 (250 CBPOs)
- An increase of \$4.906 million is for 2009 War Supplemental on Combating Southbound Firearms and Currency Smuggling - Year 3 (125 CBPOs)
- An increase of \$4.509 million is for 2010 Border Security Supplemental - Year 2 (250 CBPOs)
- An increase of \$2.361 million is for 2011 CBPO Staffing - Year 3 (318 CBPOs)
- A decrease of -\$34 million to non-recur one-time 2012 reprogrammings
- A decrease of -\$23.585 million is for Rent Consolidation

- A decrease of -\$16.0 million is for Foreign Language Awards Program
- A decrease of -\$14.951 million is for Management Efficiencies
- A decrease of -\$12.31 million is for Eliminate work performed by CBPO for other DHS Entities
- A decrease of -\$10.0 million is for Port Runner/Absconder Mitigation
- A decrease of -\$6.023 million is for Suspend WHTI/LBI Procurement
- A decrease of -\$5.341 million is for Tactical Analytical Units
- A decrease of -\$1.0 million is for Trade Compliance & Enforcement Congressional add-on Positions
- A decrease of -\$4.45 million is for Firearms Qualifications
- A decrease of -\$961 thousand is for 2012 Immigration Advisory Program - Year 1
- A decrease of -\$3.476 million is for Rescoping IAP Program in Incheon and Warsaw
- A decrease of -\$2.518 million is for Commercial Targeting Enforcement Staff
- A decrease of -\$2.369 million is for National Account Manager; Rulings; & Revenue Policy Staff
- A decrease of -\$2.17 million is for Transfer of FOIA to Office of Commissioner
- A decrease of -\$1.391 million is for Merge 2 National Targeting & Analysis Groups
- A decrease of -\$4 thousand is for Utilities Consolidation
- A decrease of -\$2.668 million is for Managed Hiring, Awards & Support Services

CURRENT SERVICES PROGRAM DESCRIPTION:

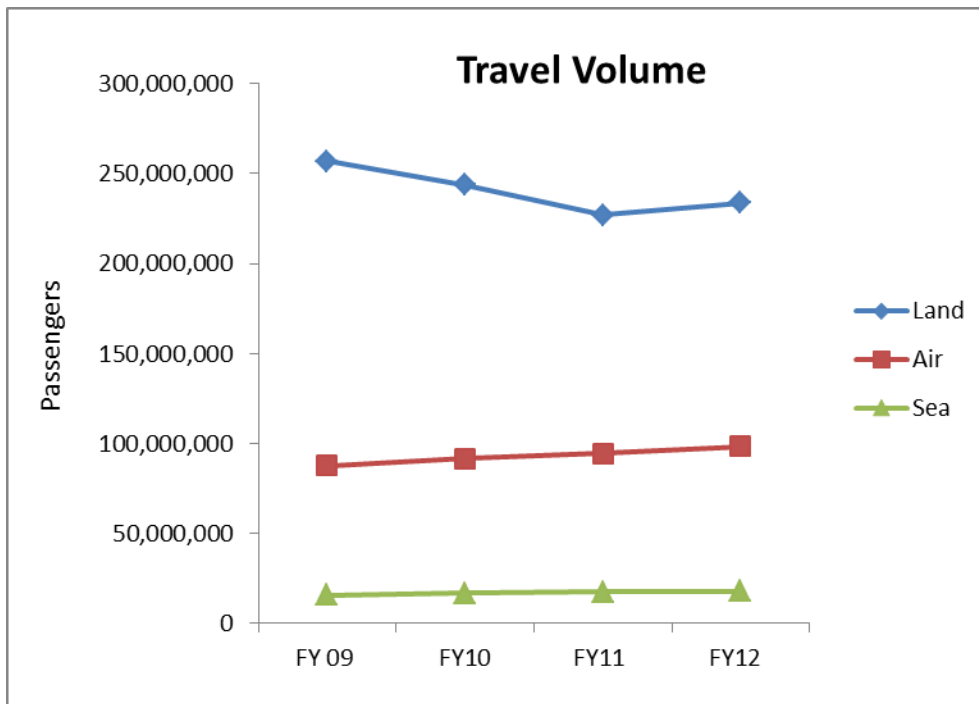

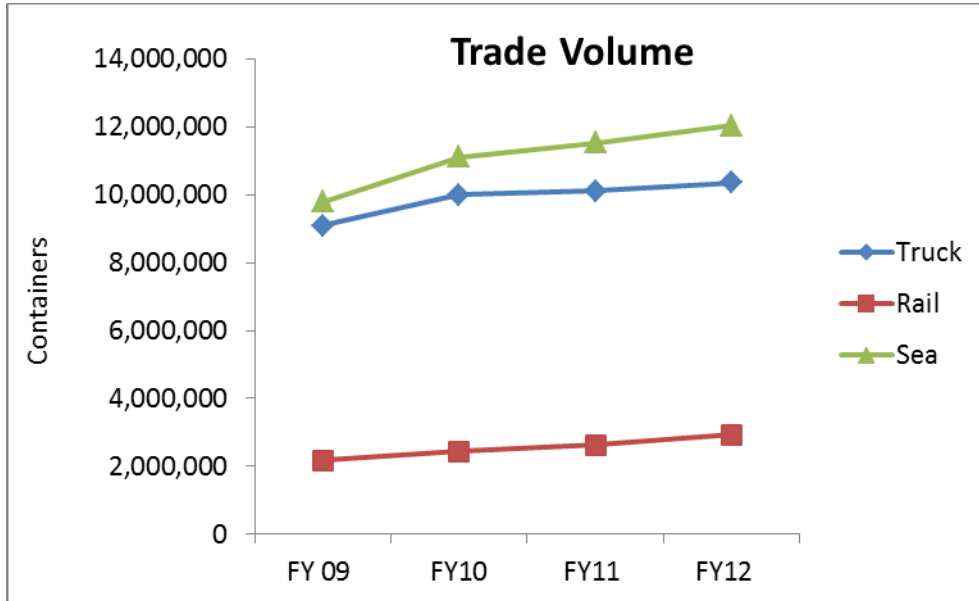

Inspections trade and travel facilitation supports funding for the Office of Field Operations (OFO) and the Office of International Trade (OT). This PPA enables these offices to meet the mission requirements to ensure border security, prevent terrorism, strengthen international cooperation, and expedite legitimate trade and travel.

Inspections and Trade Facilitation	FY 2014 Request (\$000)
CBPO, Ag. Specialist, Salary & Benefits	\$1,999,172
Other Salary & Benefit	\$622,025
Non-personnel Costs	\$216,097
Total	\$2,837,294

Office of Field Operations (OFO)

OFO operates 329 Ports of Entry (POEs) welcoming travelers and facilitating the flow of goods essential to our economy 24/7. Each day, almost 1 million people arrive at U.S. POEs by land, sea, and air. Air passenger volume increased by over 12 percent between FY 2010 and FY 2012 and is currently at a record level – heading towards more than 100 million annual passenger arrivals in FY 2013. Furthermore, volume has increased by three percent at our land and seaports in FY 2012. In FY 2012, \$2.38 trillion worth of goods were processed through the ports of entry, with inbound trade volume growing by 16 percent between FY 2010 and FY 2012 and expected to exceed previous records in the air, land, and sea environments in FY 2013.

It is OFO's mission to ensure that these travelers and cargo shipments do not pose a threat to our national security. The following charts depict trade and travel volume trends at POEs from FY 2009 to FY 2012:

In FY 2014, OFO seeks to preserve frontline staff, continue passenger process reengineering, sustain and enhance workforce multiplier programs and implement business transformation initiatives while identifying alternative sources of funding. The current POE environment has a

rapidly expanding workload, which means more potential threats that must be screened to protect and ensure the United States' security and economic competitiveness. While modest increases in the number of CBPOs have had a positive impact, OFO continues to face a myriad challenges. OFO challenges include: mitigating increased wait times; new/expanded services; and, increased cost requirements in a declining budget environment. The most prevalent example is the cost of frontline staff which has increased significantly in recent years. Given the current fiscal landscape, OFO must enhance and expand its current workforce multiplier programs in order to process trade and travel more efficiently.

Economic Implications

International travel and trade is vital to the U.S. economy. Travelers from abroad inject new money into the U.S. economy by purchasing U.S. goods and services. All of those purchases are considered U.S. exports that ultimately support America's trade balance. In 2011, international travelers provided the largest U.S. trade surplus on record (approximately \$43 billion) for travel and tourism. According to the U.S. Travel Association report, Travel Means Jobs, in 2012, one new American job was created for every 33 travelers arriving from overseas.

Resource Management vs. Increase in Wait Times and Workload

CBP is innovating and transforming to maximize operational efficiencies while continuing to examine other resourcing options. The current workload environment is rapidly expanding; potential threats must be screened and vetted expeditiously in order to protect and safeguard the United States' economic competitiveness. While CBP is proactively mitigating the risks, projected increases to workload volumes and fiscal constraints present serious challenges to effectively facilitate travel and trade.

Wait Times

The clearest and most studied economic impact is from the reduction in wait times. Wait times at the POEs can cause delays and travel time uncertainty for automobiles, trucks, pedestrians and air passengers. The delays can add to supply chain and transportation costs for commercial companies, and also serve as a deterrent to trade and cross border travel. As a result, wait time reduction can be a significant economic stimulus and vice versa. Conversely, despite the increases in staffing and technology, passenger volumes continue to outpace the resources directed towards reducing wait times.

CBPOs and Agricultural Specialists: Duties and Responsibilities

CBPOs and Agriculture Specialists (CBP-AS) perform the full range of inspection, intelligence analysis, examination, and law enforcement activities related to the arrival and departure of persons, conveyances, and merchandise at ports of entry. CBP's primary responsibility is to identify potential terrorists and terrorist threats and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities prevent the entry of terrorists, harmful pests and diseases, illegal drugs and contraband, illegal aliens, and importations/exportations contrary to law and trade agreements, from entering/exiting the United

States. CBP personnel interpret the laws and regulations of a broad range of Federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances.

Individuals seeking entry into the United States are inspected at POEs by CBPOs who determine their admissibility. The inspection process includes all work performed in connection with the entry of aliens and U.S. citizens into the United States, including pre-inspection performed by CBPOs outside the United States. An officer is responsible for determining the nationality and identity of each applicant for admission and for preventing the entry of ineligible aliens, including criminals, terrorists, and drug traffickers, among others. Aliens are questioned and their documents are examined to determine admissibility based on the requirements of U.S. immigration law.

Another important part of the CBP mission is the facilitation of legitimate trade. In addition to its own regulations, CBP enforces over 400 laws on behalf of over 40 other U.S. Government agencies.

Under the *Trade Act of 2002 (P.L. 107-210)*, CBP issues regulations providing for advanced electronic submission of cargo information for security purposes. CBP is working with the thousands of companies who are members of the Customs-Trade Partnership Against Terrorism (C-TPAT) to strengthen security in the supply chain.

In March of 2003, the *Homeland Security Act of 2002 (6 U.S.C. 231)* realigned the agricultural border inspection duties from the Department of Agriculture's Animal and Plant Health Inspection Service (APHIS) to CBP. Since the initial transition period of inspection responsibilities, CBP has fulfilled its agriculture mission with Agriculture Specialists who are trained to serve as experts in agriculture, border intelligence, analysis, and examination and enforcement activities. Each year, millions of pounds of fresh fruits, vegetables, cut flowers, herbs, and other agricultural items enter the United States via commercial shipments from around the world. Agriculture Specialists are trained to detect potential threats in passenger baggage, truckloads, trainloads, and containers of agricultural imports that could potentially threaten U.S. agriculture, our natural resources, and our economy. Agriculture Specialists at U.S. POEs and international mail facilities target, detect, intercept, and prevent the entry of these potential threats before they have a chance to do any harm. Annually, these specialists intercept tens of thousands of actionable pests, or those identified through scientific risk assessment and study as being dangerous to the health and safety of U.S. agricultural resources.

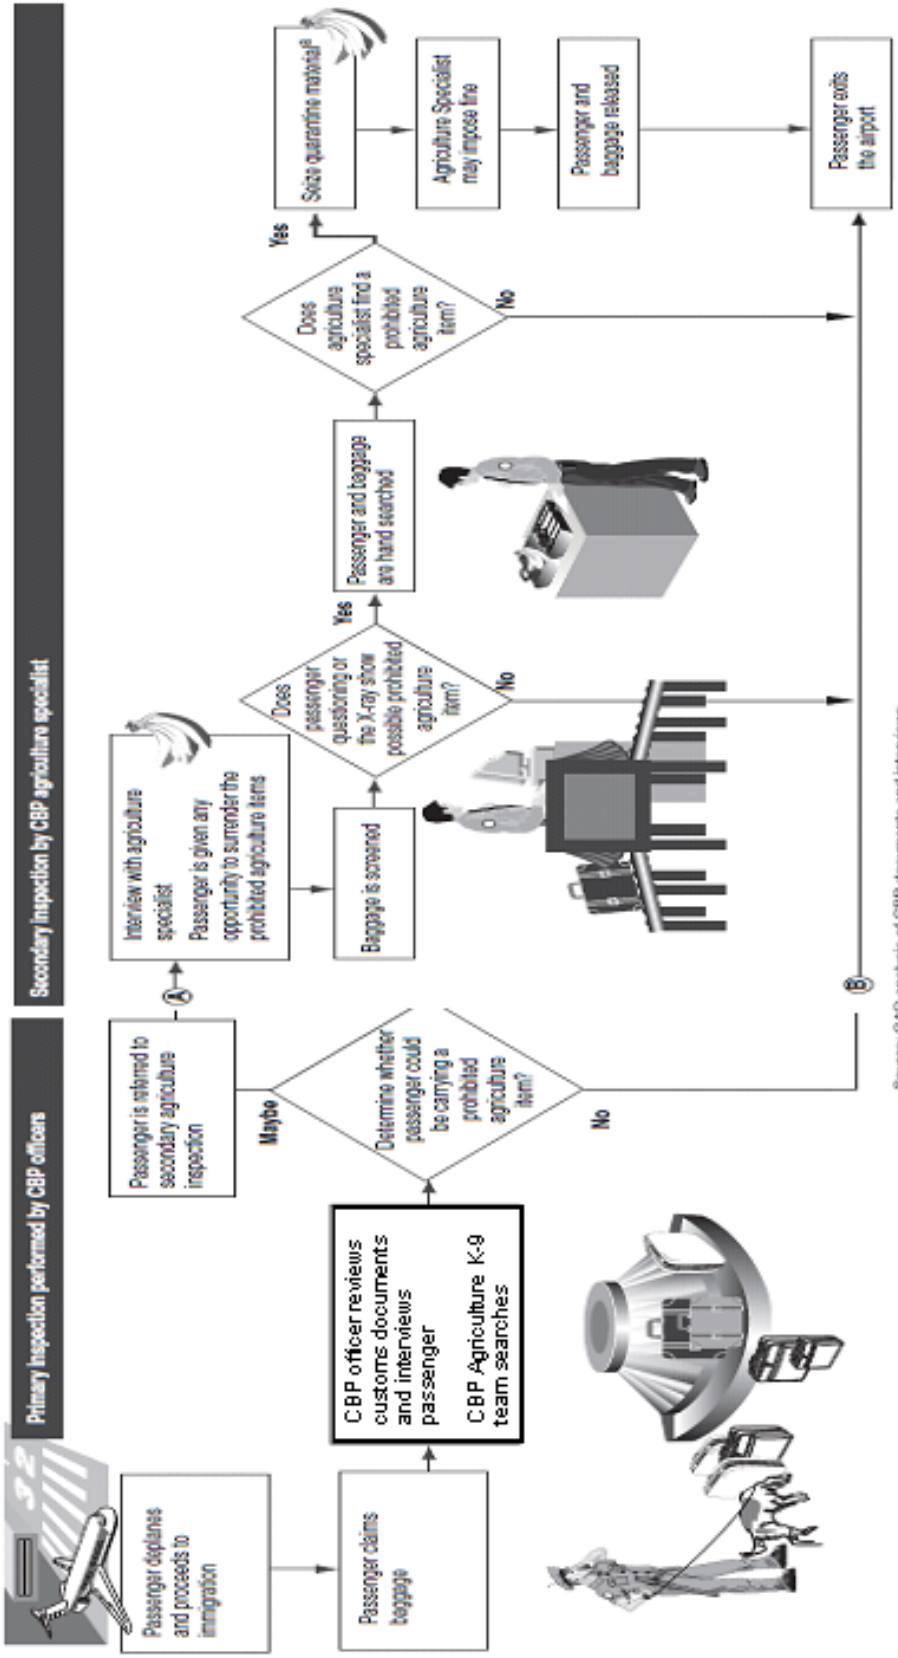

CBP Agriculture Specialists, with science-based degrees in the areas of botany, entomology, biology, or plant pathology, have the knowledge to recognize questionable and dangerous agricultural commodities, flag them for inspection, and oversee their testing or destruction. Agriculture Specialists also educate travelers about why certain agricultural commodities and meat products are seized. The detailed job performed by these specialists is vital to ensuring the safety of our Nation. Agriculture Specialists perform their mission at more than 300 ports of entry located at airports, seaports and land borders throughout the United States and along the Canadian and Mexican borders.

Agriculture Specialists also check containers and trucks for smuggled agricultural products or packaging materials that might contain invasive species that could harm our agriculture and environment. They examine wooden pallets that could hide the larvae of wood-boring insects poised to attack native trees or nursery stock and make sure that imported fruits and vegetables are pest free. Agriculture Specialists also work with specialized x-ray machines that detect organic materials and utilize agricultural canines specifically trained to sniff out meat and plant materials in international airport passenger areas.

Since 2005, CBP and APHIS have continued to develop and deploy agricultural pest detection modules to anticipate the needs of the agricultural community. These include modules on the Asian gypsy moth, Khapra beetle, and the Asian citrus psyllid.

In the development pipeline are technology transfer modules on the fruit fly complex and wood packaging material. CBP and APHIS are also building train-the-trainer programs on data collection for agriculture coordinators.

See the following chart for primary and secondary stages in the agricultural inspection process:

Source: GAO analysis of CBP documents and interviews.
 *After material has been seized, the agriculture specialist either sends an unknown detected pest to the APHIS pest identifiers or the material is sent to the incinerator to be destroyed.

The following section (Securing and Expediting Travel) provides detailed information on Office of Field Operations programs within the Inspections and Trade and Travel Facilitation PPA.

Securing and Expediting Travel

The international traveler process and the border entry traveler process involve many stakeholders working together to develop travel policy, set priorities, operate daily travel procedures at home and abroad, and address security and safety concerns. Experienced CBPOs and CBP-AS use their expertise and experience to target and process travelers, review travel documents, and interact with the traveling public to enforce and ensure compliance with U.S. laws. The chart below outlines key programs that help to facilitate the travel process.

SECURING AND EXPEDITING TRAVEL	
Electronic System for Travel Authorization (ESTA)	Electronic applicant screening in advance of travel to U.S.
Immigration Advisory Program (IAP)	Provide information on persons of interest to host country or appropriate authorities.
Western Hemisphere Travel Initiative (WHTI)	Joint initiative program with the Department of State (DOS) to ensure secure documentation requirements are enforced.
Fraudulent Document Analysis Unit (FDAU)	Detect and remove circulation and use of fraudulent documentation.
Admissibility Review Office (ARO)	Review and determine if inadmissible aliens may travel as non-immigrants with waivers.
Passenger Analysis Unit (PAU)	Support the NTC - Passenger by identifying Terrorist Screening Database matches and any other threats or national security related issues.
Preclearance	Inspect U.S. bound travelers in overseas locations relieving congestion at U.S. gateway airports and extending U.S. borders outward.

In FY 2012, total air passenger volume increased four percent (approximately 3.7 million air passengers) at the top 10 U.S. airports when compared to FY 2011 data. The overall average wait time increased nearly 10 percent. To address this increasing passenger volume and workload, OFO has identified five innovative and transformative initiatives in the traveler environment that provide a smarter use of available resources in response to growing challenges:

1. *Expansion of Benefits and Locations of Trusted Traveler/Trade Programs:* These programs help CBP to redirect resources to screening other high risk, unknown travelers and enforcement (e.g. NEXUS, SENTRI, Global Entry, and FAST).
2. *Growing of Operational Best Practices:* These programs enable CBP to effectively use resources that efficiently facilitate travel (e.g. Pedestrian Ready Lanes, Active Lane Management and Model Ports). Pedestrian Ready Lanes

throughput potential has been measured at 240 travelers per hour versus 90 travelers per hour for non-ready lanes.

3. *Pre-Travel Authorization*: This increases security and reduces wait times resulting in significant cost avoidance and reduced data entry (e.g. ESTA).
4. *Forms Automation*: This automation improves the accuracy of data entry while creating a substantial cost avoidance and increasing efficiencies (e.g. I-94, General Declaration, Customs Declaration, I-418). In FY 2012, there were approximately 16 million I-94Ws processed in the air environment. The automation of I-94 reflects a time savings equivalent to 47 CBPOs, and these benefits are recurring. In addition, this initiative will result in a savings of approximately \$8 million per year since data entry costs will no longer be incurred. Once the I-94 automation within the air environment is implemented through FY 2014, CBPOs would have spent approximately 75,600 hours processing these forms. Therefore, automation will relieve up to 64 CBPOs who can be returned to the front-line to process passengers and reduce wait times. The total annual cost avoidance is \$7.7 million in CBPO salaries and benefits. This savings in time allows the CBPO to more appropriately redirect efforts to frontline law enforcement activities. Additionally, arriving passenger processing time decreases by 20 - 30 seconds per traveler.
5. *Port of Entry Processing Innovations*: This enhances security, reduces wait times and allows more efficient use of the officer time. Port of Entry processing innovations include: Enforcement Link Mobile (ELMO) and other CBP mobile devices, Baggage Operations, and Airport Wait Time Consoles. For example, ELMO eliminates time/location constraints through the deployment of real-time technology through enhanced trade flow, reduced overtime, increased situational awareness, and passenger processing efficiencies. In FY 2012, CBP successfully piloted ELMO Cargo at two seaport ports of entry. The use of hand-held mobile devices has transformed the business practice (eliminating the hold sheet and travel time and providing real-time release of cargo at the inspection site), resulting in a 4,700-hour reduction in man-hours, at two ports, in a single year.

Electronic System for Travel Authorization

Beginning in FY 2011, the Electronic System for Travel Authorization (ESTA) program became funded through user fees. Collections from ESTA are authorized to recover the full cost to administer the ESTA program and maintain IT equipment. The \$14 fee for each approved ESTA authorization (comprised of \$10 for the *Travel Promotion Act of 2009* (P.L. 111-145) fee for the Corporation for Travel Promotion and \$4 for ESTA processing) went into effect through an interim final rule published in the Federal Register, on Sept. 8, 2010. Fee revenue funds the salaries and benefits of personnel, overtime, and the cost to maintain kiosks and other IT equipment. Refer to the ESTA budget request for more information on the ESTA user fee.

The below chart displays statistical information for ESTA program activities as of FY 2012.

ESTA Statistics	
Number of Member Nations	37
Total Number of Visa Waiver Program Applicants since program inception	49.7 million
FY 2012 Compliance Rate	99.6%
FY 2012 Denial Rate	0.21%

With ESTA data and Advanced Passenger Information provided by the airlines, CBP automated the collection of form I-94W data, resulting in a significant reduction in the use of the paper form, and the ability to provide electronic information immediately.

Cost Avoidance/Workforce Multiplier Impact:

CBP will continue to enhance ESTA, a program that requires all nationals or citizens of Visa Waiver Program countries who plan to travel to the United States for temporary business or pleasure to have an approved ESTA application prior to boarding. In FY 2012, 25,036 ESTA applications were denied; as a result, CBP did not have to process refusals of admission for these individuals, leading to over \$3 million in cost avoidance for OFO and 103 FTE and \$11.9 in CBPO frontline savings.

Additionally, it is projected that OFO will benefit from an additional \$2.2 million in cost avoidance through FY 2014 as a result of the ESTA program (21,276 inspection hours equaling 18 CBPO FTEs above FY 2012 savings).

Immigration Advisory Program

Under the Immigration Advisory Program (IAP), CBP deploys officers overseas (Amsterdam, Frankfurt, Doha, London-Gatwick, London-Heathrow, Madrid, Manchester, Paris, and Tokyo) to support CBP's goal of enhancing the security of air travel by preventing terrorists from boarding commercial aircraft destined for the United States. This reduces the number of improperly documented passengers traveling from or through a country to the United States. IAP provides information to host countries, or appropriate authorities, regarding travelers of interest. It focuses on high-risk persons through the use of targeting and passenger analysis information or an assessment of the passenger's travel documentation. The goals of this effort are the interdiction and apprehension of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens, and the disruption of attempts to enter the U.S. with fraudulent documents.

Since IAP does not have enforcement authority in the host country, the program relies upon cooperation by the host country's immigration and/or control authority and the air carrier to take appropriate actions to prevent persons of interest from boarding flights destined for the U.S.

The IAP program successes from 2004 through September 2012 are outlined in the below chart:

IAP Successes		
Action	During FY 2012	FY 2004- FY 2012 Total
No Boards	2,505	16,172
Improper Traveler Documentation	2,422	15,329
Fraudulent Documents	15	375
Potential High-Risk Traveler Interviews	863	2,779
Alien Smugglers	2	32
Terrorist Screening Database Matches	66	436
TSA No Fly Matches	10	44

Cost Avoidance/Workforce Multiplier Impact:

The cost avoidance associated with IAP overseas admissibility reviews versus detainment costs at the POEs is approximately \$2,500 per admissibility action. To date, IAP no-board recommendations have enabled airlines to avoid \$26.7 million in potential fines (calculated at \$1,650 per passenger). These recommendations have resulted in estimated cost avoidance to CBP of \$26.1 million in costs associated with the detention and removal of inadmissible passengers (originally calculated in FY 2004 at \$1,507 per passenger; revised and calculated in FY 2012 at \$2,499.34 per passenger). Combined cost avoidance to carriers and CBP in FY 2012 exceeded \$10.3 million.

Joint Security Program (JSP)

CBP built upon the IAP concept by launching the JSP in Mexico City and Panama City partnering with host country law enforcement to identify air passengers linked to terrorism, narcotics, weapons, and currency smuggling. Since the inception of JSP in Mexico City in September 2009, JSP officers have assisted their Mexican counterparts in a number of enforcement related activities resulting in the successes outlined below:

JSP Mexico (Since inception September 2009 through FY 2012)		JSP Panama (Since inception September 2011 through FY 2012)	
Fraudulent Documents	244 passengers (33 in FY 2012)	Fraudulent Documents	164

JSP Mexico (Since inception September 2009 through FY 2012)		JSP Panama (Since inception September 2011 through FY 2012)	
Potential High-Risk Travelers	143 passengers (57 in FY 2012)	Potential High-Risk Travelers	28
Fugitives Intercepted	124 passengers (56 in FY 2012)	Fugitives Intercepted	45
Narcotics Violations	6 passengers (2 in FY 2012)	Narcotics Violations	15
Illicit Currency	3 passengers (0 in FY 2012)	Illicit Currency	18
No-Fly List Passengers Identified	3 (1 in FY 2012)	No-Fly List Passengers Identified	0

Western Hemisphere Travel Initiative/Land Border Integration (WHTI/LBI)

WHTI is the joint DOS and DHS initiative implementing a key 9/11 Commission recommendation and the statutory mandates of the *Intelligence Reform and Terrorism Prevention Act of 2004* (P.L. 108-458). WHTI has established document requirements for travelers entering the United States who were previously exempt, including citizens of the United States and Canada. The WHTI requirements for air travelers went into effect in January 2007 and compliance continues to be high—well over 99 percent for U.S. and Canadian citizens. WHTI secure document requirements were successfully implemented on June 1, 2009 at all of the Nation’s ports.

FY 2012 WHTI Query Rates	
Northern Border	99.5%
Southern Border	96.5%
National Average	97.6%

In FY 2012, the WHTI program contained both investment and operations and maintenance components. CBP funded WHTI operations at all high volume land ports to ensure optimal performance of the program. In an effort to achieve a 100 percent query rate against the national security and law enforcement watch for all travelers, the WHTI program has reached a national query rate of over 97 percent. There has also been a steady growth in the use of Radio Frequency Identification (RFID)-enabled travel documents with 38 percent of all law enforcement queries initiated through such documents. As of September 30, 2012, there are more than 17.3 million RFID-enabled travel documents in the hands of travelers, an increase from 11.8 million since September 30, 2011. The query rates for the northern and southern borders, as well as the National average, are outlined in the chart above.

Additionally, CBP sought to capitalize on the initial success, foundation, and investment of the WHTI program through the implementation of the “Triangle Strategy.” The goals of this strategy are to implement and expand innovative technologies and processes to provide efficiencies at the land border by integrating Inbound, Outbound and Border Patrol Checkpoint processing, and the sharing of information between these areas to improve targeting capabilities. These goals are being achieved via an integrated approach that includes:

- *Active Lane Management* – re-designation of primary vehicle lanes as either Ready Lanes or Dedicated Commuter Lanes (DCL) based on current traffic conditions;
- *Pedestrian Reengineering* – application of a hybrid WHTI solution to pedestrian processing;

Initial Findings:

- The efforts made in Otay Mesa and El Paso will provide valuable data to CBP to capitalize on the efficiencies made in passenger processing with the utilization of these kiosks. Re-engineered pedestrian lanes and kiosks in Otay Mesa gain similar efficiencies seen by similar efforts in El Paso.
 - Pedestrian reengineering will allow for the process of pedestrian travelers with Ready Lane eligible RFID – enabled documents.
 - Additionally, kiosks at Paso Del Norte occupying two lanes (lanes 10 and 14) are shown to be processing 25 percent of the pedestrian traffic.
 - CBP is currently conducting surveys in order to add additional sites for roll-out.
- *Outbound Strategy* –deployment of a technical solution to support pulse and surge operations; and
 - Coordination and extension of WHTI technology to Border Patrol checkpoints.
 - Preliminary analysis indicates that during FY 2012 for each \$1 spent by the LBI program, the traveling public received a \$5.10 benefit due to reduced wait times.

Cost Avoidance/Workforce Multiplier Impact:

The successful deployment of Ready Lanes has resulted in faster inspections in these lanes, contributing to reduced border wait times at these locations. Ready Lanes have been deployed to 21 locations, improving vehicle throughput from 15-25 percent in the deployed lanes.

In FY 2012, of the 23,932 fraudulent documents CBP intercepted at the POEs, only 445 were altered or counterfeit RFID documents. Additionally, the use of RFID cards vis-à-vis Border Crossing Cards reduces opportunity for human error and time required for CBPOs.

Preclearance

Preclearance provides for the inspection and clearance of commercial air passengers prior to departure from fifteen (15) locations in five (5) foreign countries and six time zones in support of CBP's extended border strategy. Preclearance locations include Aruba; Bermuda; Freeport and Nassau, Bahamas; Calgary, Edmonton, Halifax, Montreal, Ottawa, Toronto, Victoria, Vancouver, and Winnipeg, Canada; and Dublin and Shannon, Ireland.

A Preclearance inspection is essentially the same inspection an individual would undergo at a U.S. port of entry except that it is conducted outside the United States. Travelers inspected and cleared overseas do not have to undergo a second CBP inspection upon arrival in the U.S. All mission requirements are completed at the Preclearance port of entry prior to departure,

including customs, immigration, and agriculture inspections. In FY 2012, Preclearance processed 14,751,382 travelers at international Preclearance locations.

Preclearance relieves congestion at U.S. “gateway” airports, reduces airline delays, and a ‘domestic’ style arrival at U.S. airports provides a more efficient transfer for travelers. Preclearance improves CBP’s ability to protect the American homeland by extending our borders and preventing terrorists, terrorist instruments, and other national security threats from gaining access to the United States. Additionally, Preclearance protects U.S. agricultural infrastructure from foreign pests, disease and global outbreaks; fosters cooperation with foreign (host) authorities in diplomatic, law enforcement, and international security issues; and supports economic interests by improving travel and commerce with the United States.

Preclearance supports CBP’s initiative to extend the U.S. borders outward and is part of the DHS strategic plan to deploy systems technology overseas to detect radiological threats before they leave foreign territories. COBRA User Fees are also utilized in part to support Preclearance operations.

Cost Avoidance/Efficiencies/ Workforce Multiplier Effect

Although Preclearance locations operate with a reduced layered enforcement posture that is typical of U.S. air POE’s, the average annual CBPO output per passenger is nearly 60 percent higher at these locations than at comparable U.S. air ports of entry. In addition, the average cost to inspect and clear a passenger prior to entering the U.S. is approximately 30 percent less than the cost to perform the inspection at domestic airports.

Overall, Preclearance locations produce a higher annual average rate of inadmissible interceptions than U.S. POE’s. These passenger interceptions result in cost avoidance for the US government in short and long term detention and support costs generally associated with domestic apprehensions.

Fraudulent Document Analysis Unit (FDAU)

The FDAU was created in January 2005 to serve as the central location for analysis of all fraudulent documents seized by CBPOs nationwide. As of January 17, 2013 there were 12 personnel assigned to the FDAU division. The mission of the FDAU is to remove fraudulent travel documents from circulation and to prevent the use of these documents by *mala fide* travelers attempting to enter the United States. In addition to the fraudulent document training provided by FDAU, the unit manages the Fraud Prevention Program (FPP) and Carrier Liaison Program (CLP). The FPP trains CBPOs to detect fraudulent documents and currently has 256 CBP Fraud Prevention officers at 155 locations. The CLP enhances border security by effectively identifying improperly documented passengers destined for the United States. During FY 2012, CLP trained 3,408 airline and security personnel. The FDAU has also developed the Fraudulent Document Center website for officers and agents to obtain information and updates by viewing bulletins, reports, and intelligence on resources, documents, fraud and trends.

Admissibility Review Office (ARO)

The ARO provides CBP with a dedicated resource in making determinations of admissibility under the INA. The ARO works extensively with the Department of State and other agencies to determine whether inadmissible aliens may be permitted to travel as non-immigrants with waivers that include all temporary and permanent waiver applications. The ARO reviews applications submitted by aliens who have been determined by CBPOs or consular officers to be ineligible for admission to the United States based on grounds of inadmissibility established under section 212(a) of the INA. The ARO is completed action on 20,500 cases in FY 2012.

Passenger Analysis Unit (PAU)

The PAUs are responsible for all local coordination and provide support to the NTC by serving as the point of contact for the processing of Terrorist Screening Data Base (TSDB) matches, any identified threats to civil aviation and any other national security related issues. Additionally, PAUs conduct local advanced targeting on travelers who may be narcotics or currency smugglers, criminal aliens, immigration violators, or any other subject of interest. The PAUs regularly serve as an agency point of contact for local law enforcement and investigative agencies.

The following section (Securing and Facilitating Trade) provides detailed information on Office of Field Operations and Office of Trade programs within the Inspections and Trade and Travel Facilitation PPA.

Securing & Facilitating Trade

Office of Field Operations

The international trade process involves many stakeholders working together to develop trade policy, set priorities, operate daily import and export procedures at home and abroad, address security and safety concerns, and deliver and use imported goods.

CBP controls trade through the ports of entry as goods arrive at the border. CBP maximizes trade processing by applying a mix of frontline staffing, technology, and programs that maximize the staffing and technology resources. Experienced CBPOs, Import Specialists, Agriculture Specialists, and Entry Specialists use their expertise to target, examine cargo, review entry documentation, collect duties, and interact with the importing community to enforce and ensure compliance with U.S. trade laws.

Anti-Terrorism Contraband Enforcement Teams (A-TCET)

OFO estimates that in FY 2013 there will be over 5,000 CBPOs assigned to the A-TCET. CBP established these teams in 2003, uniting the former Contraband Enforcement Teams, Manifest Review Units, Non-Intrusive Inspection (NII), Canine, and Outbound teams to form a single A-TCET. The A-TCET works closely with the Passenger Enforcement Rover Team and Passenger Analysis Unit (PAU) teams to coordinate all enforcement activities. Although the primary

mission of A-TCET teams is anti-terrorism, their activities encompass all types of contraband, including items such as narcotics, currency, weapons, and counterfeit goods.

Non-Intrusive Inspection (NII) Conveyance Inspections

Since examinations with NII equipment are much faster than manual inspections, NII conveyance searches (which include large-scale x-ray and gamma ray imaging systems, radiation detection equipment, small-scale baggage x-ray systems and portable and hand-held devices) are important tools that help CBPOs fulfill their mission. Without NII equipment, CBP front line personnel would be dependent on labor intensive and time consuming manual inspections. The NII equipment inventory is funded by the Inspection and Detection Technology PPA. The Inspection, Trade and Travel Facilitation PPA primarily represent salary and benefits costs associated with the NII Conveyance Inspections activities at the POEs.

The following graph depicts the number of NII exams performed on cargo inbound to the U.S. from FY 2008 to FY 2012:

The following graph depicts the number of Radiation Portal Monitor (RPM) exams performed on cargo inbound to the U.S. from FY 2008 to FY 2012 (this does not include Express Consignment Courier Facility (ECCF) mail scanned):

Cost Avoidance/Workforce Multiplier Impact:

NII Technology exams require a fraction of the time required by a manual CBPO exam, which creates a workforce multiplier effect. A typical manual cargo inspection requires three (3) people an average of two (2) hours to complete. A typical large-scale NII examination requires three (3) personnel an average of eight (8) minutes to complete, saving approximately 112 minutes per inspection, on average.

In FY 2012, CBP conducted approximately 5.9 million NII exams in the land, air and sea environment. If NII technology had not been used to conduct these exams, the same workload would have required 7,124 CBPOs as opposed to only 500 CBPOs with the use of the NII technology. Additionally, CBP is piloting the remote viewing of scans from multiple types of NII equipment, an approach that will further decrease the number of officers needed for NII image analysis.

Canine Enforcement Program (CEP)

CBP's CEP plays a crucial role in anti-terrorism and interdiction efforts. CBP has established and deployed a world-class detector dog program to augment existing technology while establishing cutting edge detection capabilities. OFO canine teams are strategically assigned to POEs around the United States and to Preclearance stations abroad. CBPOs use specially trained detector dogs in interdiction and to support specialized programs aimed at combating the terrorist threat at the Nation's borders, international airports, and seaports. In FY 2012, OFO had approximately 680 CBPOs and CBP agricultural specialists dedicated to OFO canine enforcement operations across the nation. CBP Agriculture Specialist Canine Handlers and their canines serve a vital role in detecting fruits, vegetables, meats or other prohibited items that may carry animal and plant diseases or pests entering the United States, intentionally or by accident, which can cause serious damage to America's crops, livestock, pets, environment and economy. The table below provides a breakout of the OFO canine enforcement team population by type.

FY 2012	Narcotic	Human/ Narcotic	Currency/ Firearms	Agriculture	K9 Trainers	K9 Supervisor	Field Office Advisors	Total
OFO Canine Teams	112	355	52	115	26	14	6	680

Office of International Trade (OT)

CBP's OT leads and manages the development of mechanisms utilized to implement key elements of U.S. trade policies. These policies are implemented through the development of programs, guidance, regulations and rules, and other compliance mechanisms and are executed by the Office of Field Operations at our POEs.

In addition, through coordination with international partners and OGAs, OT directs the enforcement of IPR, the identification of risks to detect and prevent the importation of

contaminated agricultural or food products and the enforcement of free trade agreement eligibility.

OT comprises five directorates to fulfill its mission in the most efficient and effective manner. These directorates perform key functions that produce commercial benefits (see table below; note that it is limited to operational directorate only, which excludes the 54 FTE in mission support each year.).

Directorate	Key Functions	Commercial Benefits	Positions by EOY
Commercial Targeting & Enforcement (CTE)	Provides performance measures for trade compliance and enforcement as well CBP performance; Field oversight for all validation activity and trade compliance measurement.	Provides analytical support, data collection/ correlation, analysis, risk management techniques; development/ reporting systems to the national targeting and analysis groups located in the field.	135
Regulations & Rulings (R&R)	Provides technical legal support, advice, and guidance for CBP trade and border operations; issues uniform interpretation and application standards for trade laws; ensures FOIA compliance.	Ensures uniform and impartial application of trade laws and the facilitation of legitimate trade.	237
Regulatory Audit (RA)	Protects government revenue; ensures compliance; facilitates legitimate trade; and prevents harmful goods from entering the country.	Conducts external audits to protect government revenue; ensure compliance with the trade laws; facilitate legitimate trade; and protect the security and safety of American businesses and citizens from harmful goods.	394
Trade Policy and Programs (TPP)	Develops CBP trade policy; conducts national operations on multiple source countries, commodities, and threats; coordinates with industry and other agencies to develop national operations.	Conducts risk analysis and composes multi-disciplined strategies to address of commercial trade fraud along the defined priority trade issues of IPR, Antidumping and Countervailing Duties (AD/CVD), Textiles, Trade Agreements, Import Safety & Centers for Excellence and Expertise (CEEs).	100
ACE Business Office (ABO)	Makes all business decisions concerning ACE, including requirements collection, prioritization, and communications	Ensures all stakeholders from the trade community and government are actively involved in the planning, development, deployment, and maintenance of ACE.	90
Totals	-	-	956

OT is responsible for several critically important programs of which five priority trade issues (PTI) have been highlighted below: Intellectual Property Rights (IPR), Textiles and Apparel, Antidumping and Countervailing Duties (AD/CVD), Import Safety, Trade Agreements and Centers for Excellence and Expertise (CEEs). For a complete PTI list, please visit http://www.cbp.gov/xp/cgov/trade/priority_trade/.

I. Intellectual Property Rights

CBP has implemented its 5-year strategy to enforce IPR based on the pillars of facilitation, enforcement, and deterrence. This strategy improves CBP's ability to facilitate lawful trade, seize counterfeit and pirated goods, and deter violations. CBP's IPR strategy assesses the risk of imports for IPR violations, targets suspect shipments, conducts seizures of infringing goods, and completes the process with post-entry audits and coordination with the United States Immigration and Customs Enforcement (ICE). OT has also continued refining the maritime environment IPR predictive risk model. As illustrated in the chart below, the IPR strategy has resulted in a 53 percent increase in seizures from 2008 to 2012². Further information, including a list of recent IPR initiatives, is available on the CBP webpage: http://www.cbp.gov/xp/cgov/trade/priority_trade/ipr/.

II. Antidumping & Countervailing Duties (AD/CVD)

To protect U.S. commerce against imported merchandise that is sold at an unfairly low or subsidized price, and facilitate the legitimate flow of imports, CBP is implementing a 5-year strategic plan. This plan maximizes our resources on detection and evasion enforcement through advanced targeting and analysis and will streamline our administrative process. The plan's goal is to protect lawful revenue, detect and deter evasion while facilitating legitimate imports. Tools utilized to accomplish these goals are increased use of automation, identification of high risk transactions, verification of evasion followed by swift penalty actions, and the development of new ways to share information with our trade partners. For more information on CBP's Antidumping and Countervailing Duties Program, please visit: http://www.cbp.gov/xp/cgov/trade/priority_trade/add_cvd/.

² CBP experienced an 8 percent decline in IPR seizures in 2012 due to a shift from enforcement against small shipments of counterfeit goods to concentration on the websites, which traffic in counterfeit goods. While this strategic shift will produce fewer IPR seizures in the short-term, it will produce a long-term decrease in the overall flow of counterfeit goods into domestic commerce.

III. Textiles and Apparel

Textile and apparel continue to be politically and economically sensitive commodities. Complex regulations and the increasing number of trade agreements and trade preference programs, each with unique requirements, create opportunities for fraud. Textile and apparel imports account for approximately \$115 billion annually. These commodities are subject to high duty rates and account for 43 percent of all duties collected. CBP has developed an enforcement strategy to identify and address various forms of fraud, including false trade preference program claims for duty free treatment, false invoicing, false marking, false claims of origin, misclassification, misdescription, undervaluation of products, and smuggling. During FY 2013, CBP projects the recuperation \$850 thousand in revenue based on Textile Production Verification Team (TPVTs) findings. Verification Teams are one of the most effective tools for executing CBP's enforcement strategy. These teams inspect factories for compliance with trade preference programs. Approximately one-third of the targeted factories visited by CBP's verification teams are found non-compliant. The continued success of the program relies on experienced personnel to target and conduct these detailed factory visits and recordkeeping reviews abroad. For updated statistical data on CBP's Textile and Apparel program, please visit: http://www.cbp.gov/xp/cgov/trade/priority_trade/textiles/enf_stat/.

IV. Import Safety

CBP continues to foster interagency coordination, by chairing the Border Interagency Executive Council. The council coordinates interagency resources on matters relating to import safety. CBP continues to work with the OGA and the trade community on the Importer Self-Assessment Product Safety Pilot partnership program. CBP is persistent in the expansion of the Import Safety Commercial Targeting and Analysis Center (CTAC); where agencies are co-located to share targeting tools, resources, data and expertise to accomplish the common mission of protecting U.S. consumers from harmful goods. As illustrated by the following chart, CBP has increased import safety seizures by 23 percent over the past five years³. For more information regarding OT and import safety, please visit: http://www.cbp.gov/xp/cgov/trade/priority_trade/import_safety/.

³ CBP experienced a 5 percent decline in import safety seizures in 2012 due to a refinement in its data processing in this area.

V. Trade Agreements

Over the last decade, the number of Free Trade Agreements (FTA) and preferential trade legislation programs has increased significantly. In FY 2012, FTA (excluding textiles and apparel) accounted for over \$687 billion; approximately 29 percent (by value) of all imports. The United States currently has Free Trade Agreements with 20 countries. In FY 2012, CBP began enforcing the implementation of agreements with Colombia, Panama, and South Korea. The United States is also currently negotiating the Trans-Pacific Partnership with seven other participating countries; Canada and Mexico are expected to join these negotiations in FY 2013. As new agreements are negotiated and finalized, it is paramount to address their complexities in order to minimize any potential loss of revenue. For a complete overview of CBP’s Free Trade Agreements program, please visit the CBP website at:

http://www.cbp.gov/xp/cgov/trade/trade_programs/international_agreements/free_trade/.

VI. Centers for Excellence and Expertise (CEE): Innovation in Trade Enforcement

As part of CBP’s efforts to protect U.S. economic competitiveness, CBP is transforming trade processing to find efficiencies for both CBP and the Trade community. Leading the way in these efforts are CBP’s CEEs, which provide “one-stop processing” for the Trade community using a team of industry-focused CBP experts located virtually nationwide. The CBP employees at the Centers protect the U.S. economy by halting harmful products from entering into U.S. commerce, and by recovering lost revenue due to unfair or illegal trading practices.

By having a dedicated industry Center, the Trade community now has one location responsible for processing shipments for a particular industry, which enhances uniformity of decisions. The following graphic displays this “one stop processing” concept. The small/medium-sized businesses can contact the Center on any importing questions they have. The Centers also collaborate with other government agency partners to resolve issues.

CBP is Finding Efficiencies for U.S. Business

Current

- ACME Electronics was importing into 60 Ports of Entry (POE), with 60 ports conducting reviews.

U.S. Customs and Border Protection

Future

- Instead of 60 ports making decisions on ACME Electronics entries, they are all reviewed by the Electronics Center of Excellence in coordinated from Long Beach, CA.

1

CBP also benefits from the Centers, as employee expertise on complex industry issues can be shared nationally. This team structure provides the Center with a diverse set of trade disciplines, which enhances our enforcement efforts on emerging threats. Finally, the Centers connect CBP leadership with industry leaders, so they stay in line with current industry trends.

The current Centers are Electronics in Long Beach, CA; Pharmaceuticals, Health & Chemicals in New York City; Automotive & Aerospace in Detroit; and Petroleum, Natural Gas & Minerals in Houston.

CBP plans on 6 Centers in FY 2013, to include:

1. Agriculture & Prepared Products: Miami
2. Apparel, Footwear & Textiles: San Francisco
3. Base Metals: Chicago
4. Consumer Products & Mass Merchandising: Atlanta
5. Industrial & Manufacturing Materials: Buffalo
6. Machinery: Laredo

Once these Centers are established, CBP will have covered the entirety of the harmonized tariff schedule.

The following section (Specialized Trade and Travel Programs) provides detailed information on Office of Field Operations programs within the Inspections and Trade and Travel Facilitation PPA.

Specialized Trade and Travel Programs

The Outbound Programs Division was created in 2009 to oversee current outbound operations and develop a long-term national outbound strategy for CBP. The division’s mandate includes addressing the escalating violence in Mexico and increasing outbound operations throughout the United States.

The division’s efforts include ensuring that CBPOs are: trained to conduct outbound operations; possess adequate outbound facilities, equipment, and technology; work with international and other government law enforcement agencies as appropriate; and leverage trade/traveler partnerships programs and the use of automated targeting systems to identify high risk exports/ travelers while facilitating the flow of legitimate trade and travelers. The program oversees operations at all POEs, including land crossings, airports, international mail and express courier facilities, and seaports.

CBP employs a risk based strategy for outbound operations on the southwest border. These operations are normally short in duration; periodic outbound inspections followed by periods without inspections. This allows for the immediate stand-down of outbound inspections to manage traffic flow departing the POE.

National statistics for program seizures are charted below.

National Outbound Program (Seizures) From FY 2009 through FY 2012*	
Illicit Currency	Over \$184.4 million
Firearms	Over 5,400
Firearm Parts	Over 6.3 Million
Ammunition Rounds	11.7 million

*FY 2012 statistics: \$31.9 million worth of illicit currency seizures, approx. 700 firearms seizures, over 8,000 firearms parts seizures, and over 213,000 rounds of ammo seized.

There are approximately 700 CBPOs conducting outbound operations nationally. This does not include officers detailed to the southwest border POEs to support port operations, to include supporting some 24/7 southbound operations and the Alliance to Combat Transnational Threats (ACTT). The intent of these temporary details is to utilize a collaborative enforcement approach that leverages the capabilities and resources of Federal, tribal, state, and local law enforcement and public service agencies against individuals and criminal organizations that are involved in illicit cross border activity.

Advanced Targeting Unit (ATU)

The primary focus of the ATU is to identify shipments that pose a possible threat to the national security of the United States and determine the CBP operational response to those possible threats. The primary and imminent threat relates to terrorists and instruments of terrorism. Other threats include smuggling of narcotics and other contraband, alien smuggling, fraudulent documents, agricultural threats, and shipments that pose a threat to the economic security of the United States.

Agriculture Programs and Trade Liaison (APTL)

APTL provides leadership, expertise, and innovation to defend the U.S. from the threats of agricultural and biological terrorism (or Ag/bio-terrorism). APTL is also responsible for meeting the traditional goals of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases.

The Agriculture program receives funding from the Salary and Expenses appropriation and user fees. Refer to the APHIS budget request for more information on the APHIS user fee.

Development of the Agricultural Model:

APTL is continuing efforts to establish the CBP Agriculture Specialist Resource Allocation Model in order to ensure that adequate agriculture specialists are staffed at the highest risk ports for introducing pests and disease in the U.S. Without effective inspections, the agriculture sector would be more vulnerable to foreign pests and diseases. DHS estimates that invasive species cause \$136 billion in lost agricultural revenue every year. As noted in the APHIS budget request, CBP and the Department of Agriculture are reviewing existing fee rates to ensure they are set at a level that recovers the full cost of performing agricultural inspection services. After a comprehensive review of program resource requirements, CBP and the Department of Agriculture will propose user fee rate adjustments.

Descriptions of Selected Adjustments to Base:

Workforce Maturation: This PPA contains a \$153.24 million increase that is part of the overall \$423.8 million “Pay Adjustment for Workforce Maturation”. The majority of the additional funding is due to changes in the requirements associated with Border Patrol agents and CBP officers. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2012, compensation has grown to approximately 70 percent of the total CBP budget and the projected growth in salaries and benefits will not be able to be absorbed within CBP’s remaining funding. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the Border Patrol agent and CBP officer floors. However further reductions to non-pay and mission support pay funding is becoming increasingly difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

Restoration of Base: The underlying language in the *Colombia Trade Promotion Agreement Implementation Act* (P.L. 112-42) did not make the collected fees available as a result of eliminating fee exemptions for travelers from certain countries. Fees are available only to the extent provided in appropriations acts. The \$110 million restoration, along with the user fee language under the DHS General Provisions, will make those fees available thereby ensuring that the budget has sufficient funding for the base level (21,775) of CBPOs. Over the past several years, OFO has experienced a significant growth in the workload resulting from increases in passenger and cargo traffic. This will restore the appropriated cuts that were taken in FY 2012 and carried forward in FY 2013.

Transfer of FOIA Division: This transfer reflects movement of the FOIA Division from the Office of International Trade, funded by the Inspections, Trade, and Travel Facilitation PPA, to the Office of the Commissioner, funded by the Headquarters Management and Administration PPAs. The full amount of \$2.17 million funds 23 positions and other associated expenses. This realignment will elevate the FOIA program to the senior management level in compliance with Executive Order 13392 and appropriately raises FOIA visibility as well as that of any and all other relevant regulations and policies.

Eliminate work performed by CBPOs for other DHS Entities: CBP will realize this efficiency by working with the U.S. Citizenship and Immigration Services (USCIS) and the Department of State (DOS) to automate the current manual processing of immigration visa documents. In FY 2012, DOS, USCIS and CBP formed a working group to address the automation of immigrant visa processing. Currently, the Department of State is transferring 1.6 million visa applications to electronic packages for processing and foreign consulates are now processing electronically rather than using the paper packets. The DOS intends to process all visa packages electronically. CBP will begin to process digital immigrant visa packets in September 2013. CBP will be processing both manual and electronic visa packets at this time. As DOS moves forward to all foreign consulates in phased implementation, all immigrant visa processing will be automated. USCIS has identified a potential automated process to alleviate the burden from the ports but is unable to fully automate the process at this time.

CBP estimates that the current immigration visa process cost the agency approximately \$12.3 million annually and dedicates over 100 CBPOs nationally to this administrative process. Other administrative costs associated with the immigrant visa process include packaging, document control, and postage. As an example the Port of El Paso spends an estimated \$108K yearly to mail overnight immigrant visa packages to the USCIS Service Processing Center.

Eliminating manual processing will yield a saving of \$12.3 million.

Realigning Automation Commercial Environment (ACE) Business Office Funding: To improve the management of the ACE Modernization Program, a transfer of functions and funds from the Office of Information and Technology to the Office of International Trade has been implemented. This transfer will increase accountability for program costs, enable timely delivery of products and functionality, improves management of Information and promotes program planning and management.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Land Border Integration	Under LBI, CBP is capitalizing on the success of WHTI by reusing the capabilities developed for inbound vehicles in other mission areas: pedestrian inbound, vehicle outbound, and Border Patrol checkpoints. CBP is further leveraging these capabilities by integrating systems and sharing data across these missions. This integrated approach and expanded scope is reflected in the program name change from WHTI to LBI.

CBP requests 268 positions, 258 FTE, and \$72.260 million in FY2014 for the International Cargo Screening PPA

- An increase of \$13.032 million is for Restore CSI funding to maintain overseas activities
- An increase of \$565 thousand is for Realigning International Affairs Personnel to Office of Training & Development
- An increase of \$299 thousand is for Pay Increase
- A decrease of -\$14.774 million is for Realignment of funding for Office of International Affairs
- A decrease of -\$6.7 million for non-recur 2012 Reprogramming
- A decrease of -\$1.419 million is for CSI Dedicated Circuits Efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

The International Cargo Screening (ICS) PPA primarily supports the Office of Field Operations (OFO) and secondarily the Office of International Affairs (INA). ICS enables the implementation of a key part of CBP's layered cargo security strategy by deploying multidisciplinary teams to foreign seaports. These teams target and examine high-risk cargo before it is placed on vessels bound for the United States. The Container Security Initiative (CSI) and the Secure Freight Initiative (SFI) inspection activities protect global trade lanes and systems between overseas points of origin and the United States. The process enables greater security through collaboration.

The synergy between the CSI and SFI programs have resulted in a blended approach to targeting and inspecting high-risk cargo before reaching a U.S. port. The rebalancing of these programs will allow CBP to optimize its resources and efforts to synchronize, streamline, and advance operations and technology in a more efficient manner with limited resources.

The following section provides detailed information on Office of Field Operations programs within the International Cargo Screening PPA.

Container Security Initiative

Since CSI was unveiled in January 2002, it has been part of our government’s strategy to secure the nation from the potential terrorist threat of using maritime cargo containers. The CSI program continues to foster partnerships with other countries and our trading partners in order to inspect high-risk shipments before they are loaded on vessels bound for the U.S. CBP, through CSI, ensures effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP encourages interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

CSI is the only multi-national program in the world protecting the primary system of global trade – maritime containerized shipping – from being exploited or disrupted by international terrorists. Operational in 58 ports, CSI facilitates screening of over 80 percent of the volume of maritime cargo destined for the U.S. by using automated tools to identify containers that pose a potential risk and using technology to scan these containers for radiological or nuclear material without impeding the flow of trade.

CSO/SFI Ports (as of September 2012)

Country	City	Country	City	Country	City
Argentina	Buenos Aires	Israel	Ashdod	Portugal	Sines
Bahamas	Freeport		Haifa	Singapore	Singapore
Belgium	Antwerp	Italy	Genoa	South Africa	Durban
	Zeebrugge		Gioia Tauro	Spain	Algeciras
Brazil	Santos		La Spezia		Barcelona
Canada	Halifax		Livorno	Valencia	
	Montréal	Naples	Sri Lanka	Colombo	
	Vancouver	Jamaica	Kingston	Sweden	Gothenburg
China	Chiwan	Japan	Nagoya and Kobe	Taiwan	Chi-Lung
	Shanghai		Tokyo		Kaohsiung
	Shenzhen		Yokohama	Thailand	Laem Chabang

Germany	Bremerhaven	Pakistan	Qasim		Southampton
	Hamburg	Panama	Balboa		Thames port
Greece	Piraeus		Colón	Tilbury	
Honduras	Port of Cortes		Manzanillo		
Hong Kong	Hong Kong				

CBP has shifted from the initial CSI operating protocols (which were heavily dependent on the placement of U.S. personnel overseas) to a more technology-based approach, relying on the NTC to conduct more bill review and targeting.

CSI personnel screen and evaluate containers before they are shipped. The shipments are screened as early in the supply chain as possible, generally at the last port of lading. Using technology to scan high-risk containers, CSI ensures rapid scanning without impeding the flow of trade. CSI technology includes large-scale X-ray, gamma ray machines, and radiation detection devices. In FY 2012, CSI reviewed 10,953,372 bills of lading and conducted 49,415 exams of high risk cargo in cooperation with the host government.

Cost Avoidance/Workforce Multiplier Impact

In FY 2012, CSI performed 49,415 exams at foreign port locations. The cost for performing these exams domestically would be approximately \$145 million or roughly an additional 1,256 FTE. Cargo exams for domestic cargo can potentially cost \$2,500 to \$3,000 per exam. Frequently, the U.S. charges a higher rate to perform exams domestically as compared to the charge for the same exams performed at foreign locations despite the additional costs incurred from Officers being stationed at foreign ports. For example, some Asian ports do not pass on the costs for exams to the shipper/importer, while others charge approximately \$1,000 per exam and the examination cost is passed on to the shipper/importer.

Transition to CSI Operational Hybrid Model

In FY 2014, CSI will become a hybrid of different operational models to include traditional inspectional staffing with CBP personnel at foreign ports, remote targeting utilizing hubs in foreign locations, and remote targeting from the NTC with no foreign personnel and reciprocal arrangements. This will enable CBP to operate CSI in a more mission and cost effective manner while maintaining current security screening.

CSI will enter into the hybrid operational models by ensuring the following:

- CSI will monitor overseas deployments and ensure that the proper numbers of personnel are stationed at each foreign port where the traditional inspectional model is utilized.
- CSI will maintain staffing levels at the NTC to ensure 100 percent review of all shipments prior to lading on a vessel destined to the U.S.
- CSI will look to expand targeting beyond the traditional weapons of mass effect to include trade violations and other trans-national criminal activity, which will be dependent on the host country's willingness to expand targeting beyond the current declaration of principles.
- CSI will expand to additional countries of strategic interest within current budget constraints.

Secure Freight Initiative (SFI)

The SFI system's objective is to scan all containers destined for the United States using Radiation Portal Monitors (RPMs) and Non-Intrusive Inspection (NII) scanners. SFI personnel perform the following steps within the process: (1) electronically transmit scanned images and information for evaluation and analysis; (2) resolve all radiation alarms according to alarm resolution procedures; (3) utilize the information collected to enhance the ATS or other relevant programs; and (4) store the information for later retrieval and analysis.

SFI operations at pilot locations have afforded CBP the opportunity to further test possible solutions to the complex challenges posed by scanning 100 percent of U.S.-bound maritime containers, particularly at transshipment and high-volume ports. While the data can be useful, operational costs are significant even in these limited environments. CBP has documented numerous challenges associated with implementing 100 percent scanning including diplomatic challenges, international opposition, port reconfigurations, potential for reciprocal requirements on the U.S., and a lack of available technology to efficiently scan transshipped cargo. CBP understands the need to proceed with container security programs in a responsible, practical manner that maximizes the security of U.S.-bound maritime cargo but believes an effective risk-based strategy will best ensure we achieve that goal. To that end, CBP has ceased SFI operations at the ports of Southampton, United Kingdom; Puerto Cortés, Honduras; Salalah, Oman and Busan, South Korea and is currently using CSI protocols of risk-based targeting in those locations.

Port Qasim, Pakistan continues to showcase the success of the SFI program in a country where the government and terminal operators are very supportive of the initiative. In FY 2014, SFI will maintain operations in Qasim, Pakistan. CBP continues to explore options for upgrading the equipment in Port Qasim.

The following section provides detailed information on Office of International Affairs programs within the International Cargo Screening PPA.

Overseas Program

This PPA represents the portion of the Overseas Program that specifically supports CSI and SFI. Attachés provide support to multiple overseas programs, including but not limited to CSI and SFI. Beginning in FY 2013, the funding associated with activities performed by the Attaché offices outside of CSI and SFI changed from the International Cargo Screening PPA to the Other International Programs PPA. As a result, the International Cargo Screening PPA will fund only the Attaché offices that directly support international cargo screening programs, CSI and SFI. This change better represents the overall efforts of Attachés. For more information regarding attaché activities outside of CSI and SFI, please refer to the current services description of the Other International Programs PPA.

The CBP Attachés perform the following duties in support of international cargo screening:

- Fulfill the role of CBPOs for cargo security and trade facilitation purposes;

- Serve as liaisons to other U.S. government agencies and host government authorities on any and all matters related to cargo security of interest to CBP; and
- Support and oversee all CBP personnel and program in-country, including CSI, SFI and capacity building efforts.

The partnerships with foreign governments/agencies, international organizations, and U.S. agencies supported by CBP Attachés enhance CBP’s ability to mitigate and avoid risks related to cargo security, and trade enforcement. More concretely, the Attachés foment strong relationships with CSI/SFI host government officials and allow CBP to facilitate customs reform and modernization through training and technical assistance. These partnerships also facilitate information-sharing with a focus on areas of mutual interest to both CBP and its foreign counterparts, such as preventing, detecting, and interdicting illegal shipments.

Description of Selected Adjustments to Base:

Restoration to CSI to Maintain Overseas Activities:

The requested increase of \$13.0 million will support the CSI’s rebalancing of its international footprint and maintain current operations. The program will continue the hub concept in several international locations where there are multiple CSI ports. The funding will also support the repositioning of remote targeting at the ports by introducing internet and software technology capabilities to transfer imaging to major hub sites or to the NTC in Reston, VA.

Realignment for funding for Office of International Affairs :

Beginning in FY 2014, any INA funding not directly associated with CSI in the International Cargo Screening PPA will be transferred to the Other International Programs PPA. This amounts to 65 percent of the funding for CBP Attachés, based on weekly activity reports. The other 35 percent of funding for attachés already located in the International Cargo Screening PPA will remain there. This way, activities performed by the Attaché offices to support CSI and SFI will remain in the International Cargo Screening PPA, while the Other International Programs PPA will fund the Attaché offices that do not directly support the CSI and SFI programs. As the attachés support multiple programs including but not limited to CSI and SFI, this change will better represent the overall efforts of CBP Attachés.

CSI Dedicated Circuits Efficiencies:

Beginning in FY 2014, CBP will increase efficiencies in CSI dedicated circuits at overseas ports. CBP has conducted an analysis of the dedicated circuits at CSI ports and identified circuits that have been underutilized in past years. As a result, CBP will be able to downgrade some of these circuits without negatively impacting CSI operations. CSI will also implement central hubs and remote targeting in selected countries where CSI has multiple locations. This will allow CBP to disconnect the circuits in the remote CSI ports as they will no longer be staffed with CBP personnel.

- A decrease of -\$3.665 million is for Overseas Programs (Attaches)
- A decrease of -\$659 thousand is for Management Efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

Through its international partnership programs and the overseas program, the CBP Office of International Affairs (INA) is the agency's lead program office, responsible for coordinating foreign initiatives, programs, and activities funded within the Other International Programs PPA. Partnership programs and the overseas program are integral enablers to both advance international trade and support the US Government's security objectives in areas of anti-terrorism, border security, export controls, non-proliferation, and customs and immigration policy.

International Partnership Programs

INA administers several international partnership programs, including but not limited to Asia-Pacific Economic Cooperation, International Law Enforcement Academies, the Columbia/Andean Initiative, the Export Control and Border Security Program, Iraq Reconstruction Assistance, and liaison with the World Customs Organization. CBP's key objectives for these international partnership programs include:

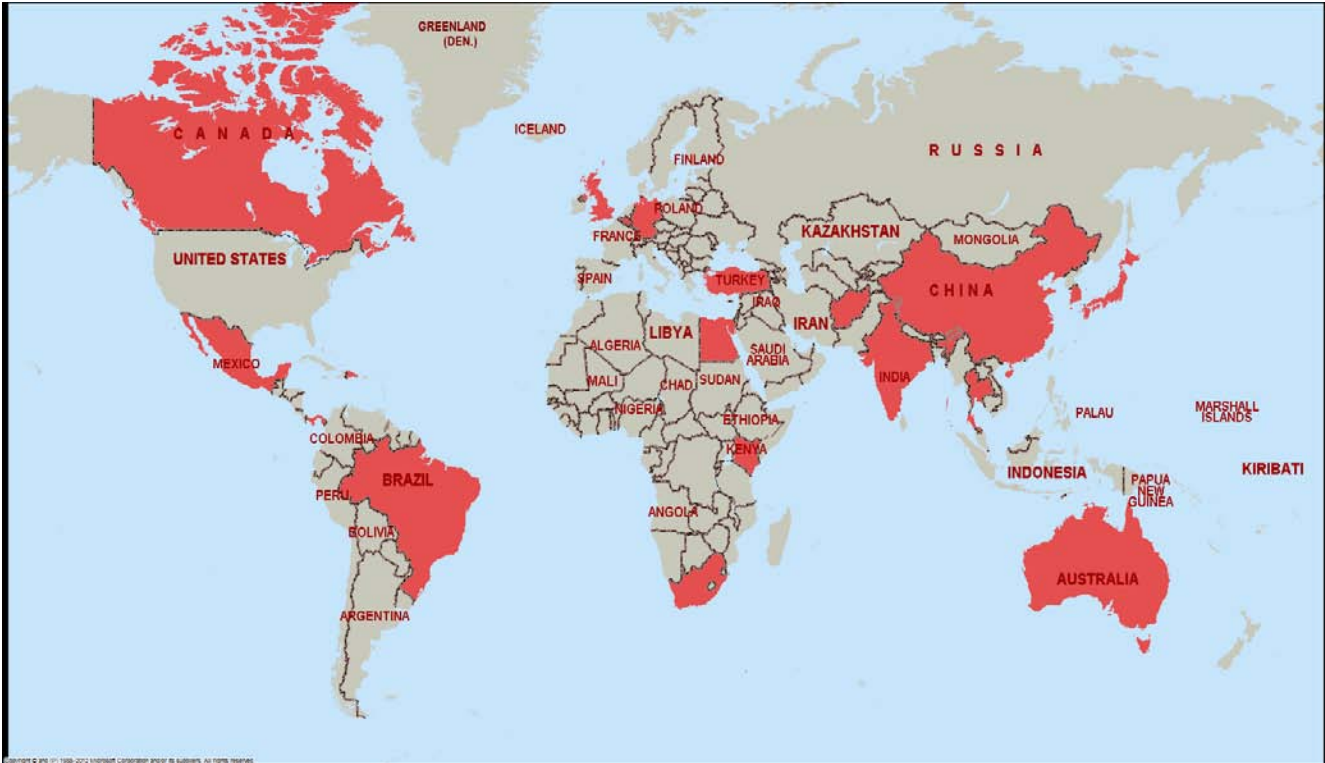

- Develop, promote, and implement CBP's international strategy;
- Negotiate international agreements and other instruments such as bilateral agreements and letter of intent for CBP;
- Advance CBP's international policy initiatives in international forums; and
- Develop and maintain strategic international relationships

INA strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, legal immigration, capacity building, and facilitating legitimate trade. INA focuses on international cooperation and strengthening multi- and bi-lateral relationships to achieve international agreements and other joint efforts that both facilitate and secure legitimate trade and travel. Additionally, INA identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA provides in-country advisory support for broad-based customs reform and modernization and ensures CBP is represented at overseas posts and influences policy throughout the world.

Overseas Program

The CBP Overseas Program is composed of Attaché offices located in U.S. Embassies and Consulates in 20 countries and Hong Kong, concentrating on countries and regions of high geo-political and commercial value of the U.S. (see the following map).

CBP Attaché Office Locations (FY 2014)

Kabul, Afghanistan	Santo Domingo, Dominican Republic	Mexico City, Mexico
Canberra, Australia	Cairo, Egypt	Johannesburg, South Africa
Brussels, Belgium (EU)	Frankfurt, Germany	Panama City, Panama
Brasilia, Brazil	Tokyo, Japan	Singapore, Singapore
Beijing, China	Nairobi, Kenya	Bangkok, Thailand
Ottawa, Canada	Seoul, South Korea	Ankara, Turkey
Hong Kong, China		London, United Kingdom

The Overseas Program is dedicated to supporting CBP programs and activities overseas that safeguard the American homeland from beyond our borders, while facilitating lawful trade, travel, and immigration. CBP Attachés:

- Serve as the primary representatives of the CBP Commissioner in-country, informing the U.S. ambassador or consular officer at post about CBP programs and capabilities;
- Fulfill the role of CBPOs for security, immigration, and trade facilitation purposes;
- Serve as liaisons to other U.S. government agencies and host government authorities on any and all matters of interest to CBP;
- Support and oversee all CBP personnel and programs in-country, including the Immigration Advisory Program, the Customs-Trade Partnership Against Terrorism, and capacity building efforts; and
- Handle inquiries and requests for CBP assistance from the trade industry and the traveling public, including on issues such as intellectual property rights, boarding letters, *mala fide* intercepts, and fraudulent documents.

The Overseas Program builds strategic partnerships with foreign governments and enhances the ability of CBP to address risks related to immigration, security, travel, and trade enforcement. CBP Attachés work diligently on focusing on programs related to immigration threats. Specific programs include Automated Targeting System-Global (ATS-G), IAP and Global Entry (GE). The CBP Attaché is actively promoting these programs with our foreign counterparts.

The presence of a CBP Attaché overseas fosters strong relationships with host government officials and allows CBP to facilitate customs reform and modernization through training and technical assistance. These contacts allow CBP to cooperate in the sharing of criminal intelligence and best practices with foreign customs and immigration agencies. INA and the Overseas Program contribute to CBP's overall mission of securing America's borders, securing and facilitating the flow of goods and movement of people, and CBP's strategic objective of building and maintaining essential partnerships with foreign government/agencies, international organizations, and U.S. agencies. These partnerships facilitate information-sharing with a focus on areas of mutual interest to both CBP and its foreign counterparts, such as preventing the entry of known terrorists and illegitimate travelers as well as detecting and interdicting illegal shipments.

Shift to a Regional Strategy

INA is shifting from a country-specific to a regional approach to international engagements. Under the new regional approach, the office of a CBP Attaché will be responsible for a portfolio of neighboring countries within that office's assigned region, rather than limiting responsibility to one individual nation. The new regional strategy will allow for CBP to better leverage relationships in the region, cultivate regional expertise in headquarters, and realize some efficiencies and savings through more coordinated regional capacity building, targeting centers, and trade transformation efforts.

INA regional engagement is divided into 5 regions: Europe, Africa, Asia, the Middle East, and the Western Hemisphere, with priority currently placed on the latter three. INA supports CBP

goals for each region by focusing on activities in FY 2014, which will build foreign relationships, enhance commercial opportunities, secure more opportunities to exchange information, and increase CBP capacity to detect and interdict threats from abroad. In addition, INA is further addressing certain areas of interest in each of the three the priority regions. In the Middle East region, INA is focusing on terrorism. In the Western Hemisphere, INA is concentrating on transnational criminal organizations in the Western Hemisphere. And in Asia, the INA priority is international trade.

An international agreement is the first step for any exchange of information between CBP and our foreign partners. INA will work to increase the number of international agreements and thereby ensure that CBP mission can be accomplished. The following table lists the number of international agreements in each of the three current priority regions.

Planned International Agreements in Priority Regions

	FY 2013	FY 2014
Middle East	4	8
Western Hemisphere	11	15
Asia	13	15

Description of Selected Adjustments to Base:

Realignment for funding for Office of International Affairs

Beginning in FY 2014, any INA funding not directly associated with CSI in the International Cargo Screening PPA will be transferred to the Other International Programs PPA. This amounts to 65 percent of the funding for CBP Attachés, based on weekly activity reports. The other 35 percent of funding for attachés already located in the International Cargo Screening PPA will remain there. This way, activities performed by the Attaché offices to support CSI and SFI will remain in the International Cargo Screening PPA, while the Other International Programs PPA will fund the Attaché offices that do not directly support the CSI and SFI programs. As the attachés support multiple programs including but not limited to CSI and SFI, this change will better represent the overall efforts of CBP Attachés.

CBP requests 127 positions, 123 FTE, and \$40.183 million in FY2014 for the C-TPAT PPA

- An increase of \$223 thousand is for Pay Increase
- A decrease of -\$5.019 million is for Extend C-TPAT Validation Cycle to 4 Years

CURRENT SERVICES PROGRAM DESCRIPTION:

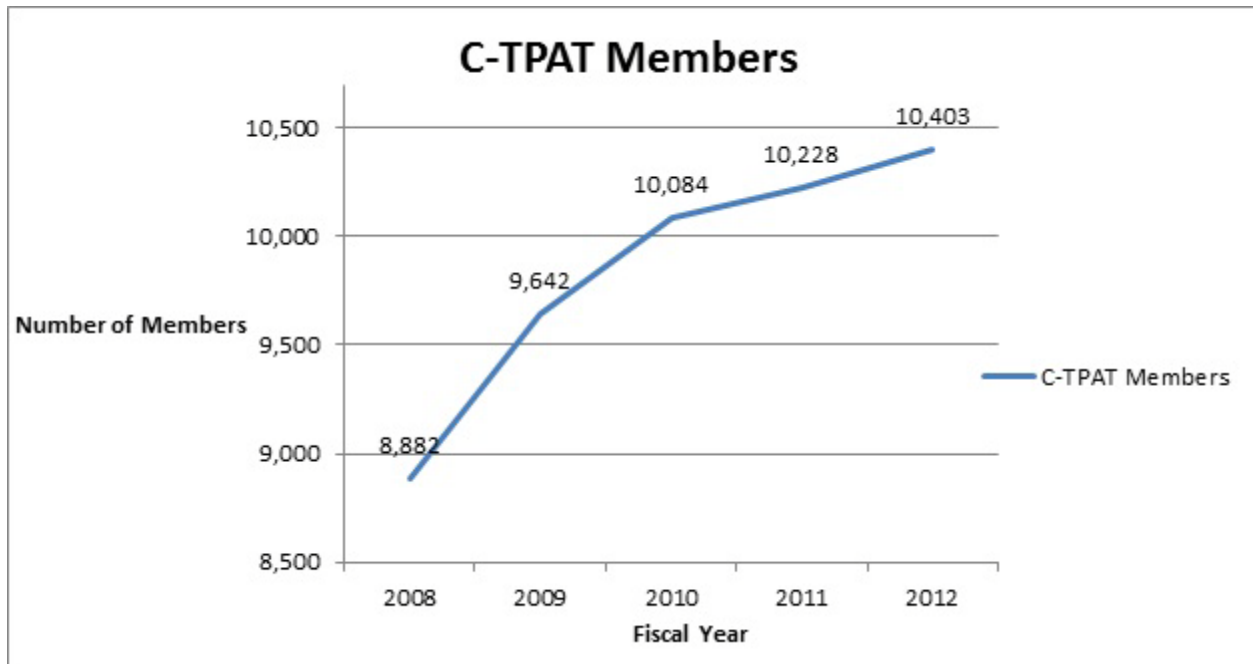

Customs–Trade Partnership Against Terrorism (C-TPAT) is CBP’s premier cargo and conveyance entry program. More than 11 million cargo containers arrive on ships and are offloaded at U.S. Seaports each year. CBP uses risk-based analysis and intelligence to pre-screen, assess, and examine 100 percent of suspicious containers. The remaining cargo is cleared for entry to the U.S. using advanced inspection technology. C-TPAT provides CBP greater flexibility in shifting functions away from the physical border, allowing CBP to intercept potential threats before they can cause harm, while also expediting legal commerce. C-TPAT ensures another layer of secure treatment for cargo entering the U.S. C-TPAT helps the agency achieve two goals—securing and facilitating trade moving into the United States. The *Security and Accountability for Every Port Act of 2006 (P.L. 109-347)* provides the statutory framework for the C-TPAT program and imposes strict oversight requirements.

The C-TPAT program helps to promote trade security by developing partnerships with members of the trade community. The purpose of C-TPAT is to partner with the trade community to secure the U.S. and international supply chains from possible intrusion by terrorist organizations. C-TPAT requires trade community participants to document and validate their supply chain security procedures in relation to existing C-TPAT criteria or guidelines, as applicable. Companies participating in C-TPAT develop an internal process to validate the existence of security measures documented in their Supply Chain Security Profile and in any supplemental information provided to CBP. As a part of the process, C-TPAT Supply Chain Security

Specialists (SCSS) and C-TPAT participants jointly conduct a validation of the company’s supply chain security procedures. The validation process is essential to verify the company’s commitment to C-TPAT.

C-TPAT’s SCSS conduct validations, identify supply chain security vulnerabilities, and work to monitor company initiatives that address those vulnerabilities. Validations conducted by SCSS determine the accuracy and effectiveness of a company’s security profiles. The validation process is essential to verifying the company’s commitment to C-TPAT and ensuring that best practices and procedures implemented by the company are reliable, accurate, effective, and meet the agreed upon security standards.

The C-TPAT program customizes each validation according to the trade partner. C-TPAT’s *trust but verify* system ensures that the security profile is accurate and security procedures and measures are reliable and effective. The validation process involves creating a “Partnership Validation Team” (PVT), which performs a joint review of the supply chain based on the security profile submitted and identifies deficiencies and best practices. In FY 2012, C-TPAT completed over 2,455 validations (a number of validations were initiated in FY 2012 but have not been completed) and conducted 2,613 on-site visits (1,571 foreign, and 1,042 domestic). From FY 2008 to FY 2012, the number of C-TPAT members has increased by over 15 percent. The following table shows the number of C-TPAT members by year:

Cost Savings/Efficiencies/ Workforce Multiplier Effect

The C-TPAT program has been highly successful with a reach in security that covers over fifty percent of all imports entering the U.S. commerce via supply chains. C-TPAT importers are four to six times less likely to undergo a security related examination. More specifically, containers inspected from trusted partners are seven times less likely to undergo resource-intensive secondary examinations.

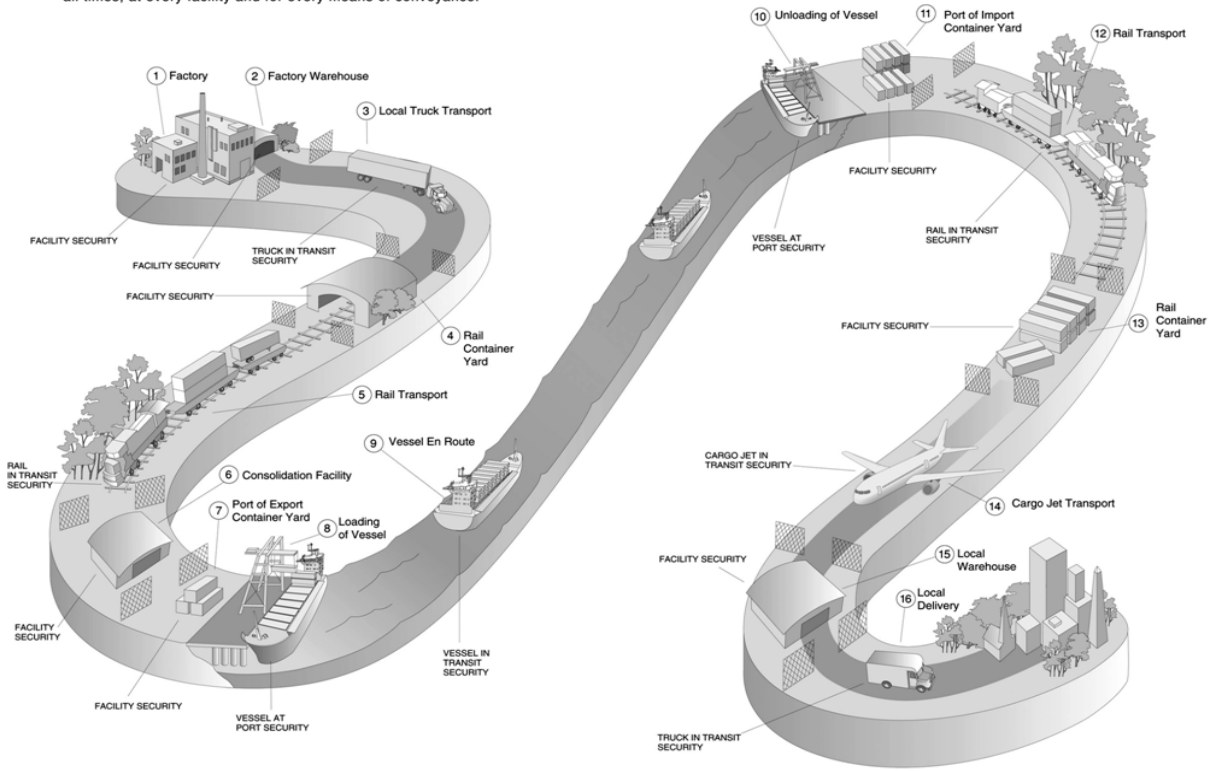

C-TPAT is a critical component in CBP's layered enforcement strategy which complements other efforts such as Non-Intrusive Inspection Technology and Container Security Initiative programs (For more information about these programs, please see current services program descriptions for the Inspection and Detention Technology and International Cargo Screening PPAs). To continue the current success rate of the C-TPAT program and maintain secure facilitation of the flow of goods into the United States, CBP will:

1. Ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented.
2. Work with C-TPAT partners to finalize minimum applicable supply chain security criteria and security best practices.
3. Send C-TPAT teams around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. The teams also ensure that best practices and procedures used are reliable, accurate, effective, and meet the agreed upon security standards.
4. Provide tools and create incentives for the private sector to join C-TPAT, which is a prerequisite for the Free and Secure Trade (FAST) program and other CBP expedited processing programs.

The following diagram depicts the C-TPAT cargo supply chain conveyance process:

SECURITY AND THE SUPPLY CHAIN

Securing the supply chain means providing appropriate security at all times, at every facility and for every means of conveyance.

Total Change 2012 to 2014	-	-	-

CBP requests \$6.311 million in FY 2014 for the Trusted Traveler Programs (TTP) PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

The Trusted Traveler Programs PPA supports the operations and maintenance of critical Pre-Arrival Processing activities. These activities are comprised of the following programs: NEXUS Highway and Air, Secure Electronic Network for Traveler’s Rapid Inspection (SENTRI), Free and Secure Trade (FAST), Global Entry (GE), and Global Enrollment System (GES). The TTP programs are funded with a combination of Salary and Expenses and user fees (for additional information refer to the Land Border and Global Entry Congressional Justifications). These programs help to improve the targeting, screening, and apprehension of high-risk international travelers, thereby preventing terrorist attacks and criminal activity while expediting the processing of legitimate travelers.

Trusted Traveler Programs are predicated on thorough vetting of travelers who have voluntarily applied for membership, paid an enrollment fee, and provided personal data (including biometric information, photos and fingerprints) to CBP, who then performs rigorous background checks. Individuals joining through a CBP arrangement with their country of citizenship must successfully pass vetting conducted by their home government based on a mutually identified vetting standard.

Trusted Traveler Programs

Since the terrorist attacks of September 11, 2001, CBP has placed great emphasis on developing and expanding TTP for passengers and commercial truck drivers at the land borders with Canada and Mexico and developing similar programs for international air passengers. TTP helps to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint-based checks of law enforcement databases,

fingerprint/name checks, and an interview with a uniformed officer. The TTP programs continue to expand and include a total of 1,547,899 members in FY 2012. Currently, TTP is comprised of four programs NEXUS, SENTRI, FAST, and Global Entry which are discussed below. The following chart provides FY 2012 actuals and FY 2013 and FY 2014 projected TTP enrollments for NEXUS, SENTRI, FAST and Global Entry.

TRUSTED TRAVELER PROGRAMS	Actual FY 2012 Membership (as of September 30, 2012)	FY 2013 Projected Membership	FY 2014 Projected Membership
NEXUS	737,302	936,000	1,180,000
SENTRI	301,889	350,000	390,000
FAST	77,704	78,000	80,000
GLOBAL ENTRY	431,004	636,000	850,000
TOTAL:	1,547,899	> 2.0 Million	> 2.5 Million

**The Trusted Traveler Program has significantly increased its membership for the NEXUS and Global Entry programs. The NEXUS membership increase is due to the Beyond the Border initiatives involving increased outreach and its blitzes: (Enrollment Center blitzes and mobile enrollment blitzes for companies; with a 25 percent membership expansion in FY 2012). The Global Entry (GE) membership increase is due to the GE promotions; with a 115 percent membership expansion in FY 2012.*

NEXUS Highway and Air

NEXUS, a joint U.S./Canada enrollment program at the northern border land POE and at all Canadian preclearance ports, identifies low-risk travelers through: a complete biographic check, an interview with a CBP officer and a Canada Border Security Agency (CBSA) officer, and a fingerprint check. Once applicants are identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID)-enabled card that is unique to the traveler. The RFID-enabled card allows the traveler to use specified primary lanes at land border ports of entry that are reserved for NEXUS enrollee use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes, and iris scans are utilized to identify low-risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

Cost Avoidance/Workforce Multiplier Effect:

In FY 2012, the average NEXUS program lane processing time, 20 seconds, was two and a half times faster than vehicles processed at general lanes crossing the northern border (general lane times along the northern border average 50 seconds per vehicle). For FY 2012, the NEXUS program lanes produced an inspection time savings equivalent to 25 CBPOs (a cost avoidance value of approximately \$2.9 million in salaries and benefits). Continued membership growth for this program will result in further efficiency.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBP officer.

Once applicants are approved, they are issued a RFID that will identify their record and their status in the CBP database upon arrival at the U.S. POEs. A sticker decal is also issued for the applicant's vehicle or motorcycle. SENTRI users have access to specific, dedicated primary lanes into the United States.

The SENTRI program was first implemented at Otay Mesa, CA, in 1995, and has grown to include a total of 17 lanes at the ten largest southern border POEs along the U.S.-Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Cost Avoidance/Workforce Multiplier Effect:

In FY 2012, the average SENTRI lane processing time, 21 seconds, was almost 3 times faster than vehicles processed at general lanes crossing the southern border (general lane times along the southern border averaged 60 seconds per vehicle). In FY 2012, SENTRI lanes produced an inspection time savings equivalent to 106 CBPOs (a cost avoidance value of approximately \$12.2 million in salaries and benefits). Continued membership growth for this program will result in further efficiency.

Free and Secure Trade (FAST)

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Global Entry (GE)

CBP designed GE to allow for expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without having to see a CBP officer. This program facilitates entry into the United States and is especially beneficial to frequent international flyers. Currently (as of February 28, 2013), GE is available at the following domestic locations*: Atlanta, Baltimore, Boston, Dallas/Ft. Worth, Charlotte, Chicago, Denver, Detroit, Ft. Lauderdale, Guam, Honolulu, Houston, Las Vegas, Los Angeles, Miami, Minneapolis, Newark, New York (JFK), Orlando,

Philadelphia, Phoenix, Portland, Raleigh-Durham, Saipan, Sanford (FL), Salt Lake City, San Antonio, Santa Ana, San Juan, San Diego, San Francisco, Seattle, Tampa and Washington Dulles airports. GE is also available at all Canadian preclearance sites (Calgary, Edmonton, Halifax, Montreal, Ottawa, Toronto, Vancouver, and Winnipeg) and at the two Irish preclearance sites (Dublin and Shannon).

* The number of domestic locations provided in the Workload Staffing Model was finalized in early FY 2013 and additional edits to the document were not incorporated. The figure provided in the Congressional Justification is the most current data as of February 28, 2013.

GE applications, enrollments, and joint agreements are growing quickly:

April 2009: CBP initiated a joint program with the government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch trusted traveler program, and allows Dutch citizens to join GE.

December 29, 2010: Mexican nationals are eligible to participate in a pilot which expands GE eligibility to Mexican citizens.

June 2011: CBP began implementing a limited pilot with the United Kingdom (UK), allowing UK citizens to participate in GE.

October 2011: CBP began implementing a limited pilot with Germany, allowing German citizens to participate in GE.

February 2012: CBP began implementing a limited pilot with Qatar, allowing Qatari citizens to participate in GE.

June 12, 2012: CBP implemented a trusted traveler arrangement with the Republic of Korea. The arrangement allows qualified U.S. citizens to join the Smart Entry Service, the Republic of Korea's trusted traveler program, and allows Korean citizens to join GE.

For all of the above pilots, joint programs and agreements individuals must pass vetting by both CBP and the foreign government.

In 2012, CBP expanded GE to include eight additional airports. Additional expansions are planned.

CBP has signed joint statements with Australia, Israel, New Zealand, and Panama, laying the framework for the development of trusted traveler arrangements with each of these countries. CBP is working with representatives from these governments to develop individual bilateral arrangements to enable trusted travelers from either country to receive expedited clearance when traveling.

Cost Avoidance/Workforce Multiplier Effect:

In FY 2012, GE kiosks were used approximately 2.5 million times*, producing an inspection time savings equivalent to 56 CBPOs (a cost avoidance value of approximately \$6.2 million in salaries and benefits). GE usage in FY 2012 increased throughput by 2.1 percent for all passengers, including the majority of passengers not in GE. GE passengers currently represent only 2 percent of total arriving passengers, but kiosk usage is increasing sharply. Continued growth in GE will result in further efficiency.

*Statistics include NEXUS Air data.

Global Enrollment System (GES)

CBP has developed GES for all CBP Trusted Traveler Programs to be operational on the CBP national network. GES has integrated the independent CBP enrollment and validation processes into a single solution, and it provides a more efficient platform to share data and perform real-time watch list and lookout checks.

GES also reduces the redundancy of maintaining several application processes, and it allows for a quicker and more accurate application process. CBP has developed a single online, paperless application process to support the GES and will allow a traveler to apply to multiple programs online. The on-line application Global On-Line Enrollment System supports all TTP applications.

Total Change 2012 to 2014	-	-	(36,011)

CBP requests 86 positions, 86 FTE, and \$112.526 million in FY2014 for the Inspection and Detection Technology PPA

- An increase of \$22 thousand is for Pay Increase
- A decrease of -\$30.99 million is for NII Investments and O&M
- A decrease of -\$3.386 million is for PPA Realignment
- A decrease of -\$1.557 million is for CBP IT Infrastructure & Systems Support
- A decrease of -\$100 thousand is for Managed Hiring, Awards & Support Services

CURRENT SERVICES PROGRAM DESCRIPTION:

The Inspection and Detection Technology PPA provides funding for the CBP Non-Intrusive Inspection (NII) Technology that supports CBPs goals of enforcement and facilitation of legitimate trade and travel. CBP faces a challenge as it seeks to acquire, deploy, maintain, and replace its NII technologies while meeting the requirements of CBPOs and BPAs for safe, effective, and reliable Radiation Detection Equipment (RDE) and NII systems at and between approximately 350 land border ports, Border Patrol checkpoints, airports, seaports, and international locations. Solutions to meet these demands must be effective and efficient in an ever-changing and continuing threat environment. Terrorists, drug cartels, and other entities/individuals pursuing their own illicit agendas seek to exploit the vulnerabilities of the U.S. POEs and Border Patrol checkpoints, often using inbound cargo, conveyances, and travelers in ways never before conceived. CBP must narrow its focus by strengthening the most effective tools and sustaining required capabilities. This purpose will be achieved by threat- and requirements-based deployment and by the elimination or reassignment of underused technologies, resulting in the ability to sustain the right capabilities in the right locations. The summarized strategies for accomplishing this are: 1) re-validate minimum NII/ RDE requirements in the field; 2) reallocate available technology resources to address the highest risk

gaps; 3) decommission unneeded/unused and un-repairable equipment from inventory; and, 4) strengthen the integration of inspection and detection technologies into CBP's layered enforcement strategy.

The current inventory of NII imaging systems are aging and will require replacement in the future; however, analysis has shown that most of the imaging equipment will be functional past the expected ten year life predicted by the vendors. By the end of FY 2014, 101 imaging systems will exceed this ten year expected life but only six large scale systems will need to be retired. With the decommissioning of these six systems, an analysis using new risk based criteria, estimates that there will be minor but manageable impacts upon operations.

CBP will continue to extend the life-cycle of these systems that may potentially increase the operations and maintenance cost in future years. NII technology dramatically enhances the ability of CBP to inspect cargo and conveyances for components of weapons of mass effect and other articles and instruments used in support of terrorist activities, narcotics and undeclared currency while facilitating legitimate commercial traffic through our nation's ports of entry. As the NII requirements continue to be refined based on the evolving port specific threat based requirements, the out-year funding requirements will be assessed with intent to maintain commerce while sustaining security goals.

CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood of detecting a nuclear or radiological weapon or elements of these weapons, and illegal aliens or other contraband being smuggled across the U.S. borders. NII technologies are viewed as force multipliers that enable CBPOs to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo, and travelers.

Since September 11, 2001, NII technology has been a cornerstone of CBP's multi-layered enforcement strategy. Technologies currently deployed at and between our Nation's POEs include large-scale X-ray and Gamma-ray imaging systems, Radiation Portal Monitors, handheld and wearable radiation detection and identification devices, and a variety of other portable and handheld technologies.

CBP has 308 large-scale imaging systems deployed at and between our POEs. As of October 3, 2012, CBP also had a total of 4,632 small-scale NII, 1,482 Radiation Portal Monitors (RPMs), 2,554 Radiation Isotope Identification Devices (RIIDS), and 27,176 Personal Radiation Detectors (PRDs).

The NII Technology Program consists of maintenance, sustainment, build-out, and enhancement activities. The term "maintenance" means the activities required to ensure that deployed NII technologies remain operational through annual calibrations and upkeep, repairs, and replacement from breakage or end of lifecycle. The term "sustainment" means the activities required to continue to meet established scanning percentage goals by deploying new or relocated NII technologies when changes occur at ports, sites or checkpoints (modifications, expansions, or upgrades). The term "build-out" refers to the activities required for initial

deployment to a POE, site, or checkpoint. “Enhancement” includes activities such as those that improve the efficacy of technologies or combine functionality of technologies.

Each year, a number of POEs undergo reconfigurations in which the lanes of traffic that contain NII equipment and/or RPMs, as well as the infrastructure associated with these technologies, are moved or altered. Additionally, a number of port expansions occur where new lanes of traffic require the addition of new technologies. While historically these reconfigurations and port expansions account for approximately 20 percent of deployment efforts, currently approximately 80 percent of current funds have been allocated to reconfigurations.

The Operations and Maintenance (O&M) funding for NII provides original equipment manufacturer maintenance support at approximately 600 locations throughout the U.S. and its territories. These funds will ensure the deployed NII technologies meet the expected operational requirements of CBP, as well as the requirements as defined in the *Federal Information Systems Management Act of 2002* (P.L. 107-347).

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Non-Intrusive Inspection (NII) Systems Program	The Non - Intrusive Inspection (NII) Systems Program (large scale and small scale) supports the detection and prevention of contraband, including weapons of mass effect, illicit radioactive materials, illicit drugs, currency and other illegal contraband, from entering or furthering their entry into the U.S. The program is vital to the U.S. CBP layered enforcement strategy. The NII Program seeks to match the technology and equipment with the conditions and requirements at, and between, domestic ports of entry and U.S. facilities that process international mail; and helps ensure CBP can meet its goal to inspect 100 percent of all targeted high - risk shipments.

Total Change 2012 to 2014	-	-	38,431

CBP requests 62 positions, 62 FTE, and \$109.944 million in FY 2014 for the Systems for Targeting PPA

- An increase of \$31.551 million is for Targeting Systems
- An increase of \$31.118 million is for Automated Targeting Systems O&M
- An increase of \$7.0 million is for Realignment of Funding for Targeting Systems
- An increase of \$12 thousand is for Pay Increase
- A decrease of -\$30.113 million for non-recr 2012 Reprogramming
- A decrease of -\$1.137 million is for PPA Realignment

CURRENT SERVICES PROGRAM DESCRIPTION:

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law-abiding travelers and commerce to move through without unnecessary delay. Recent legislation and regulatory action, such as the *Trade Act of 2002* (P.L. 107-210); the 24-hour rule; the *Aviation Transportation Security Act of 2001* (P.L. 107-71); the *Enhanced Border Security and Visa Reform Act of 2002* (P.L. 107-173); and the *SAFE Port Act of 2006* have made it mandatory to provide advance information about travelers, conveyances, and goods arriving in the U.S. CBP uses computer technology and rule-based software to analyze the data provided for travelers, conveyances, and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which travelers, conveyances, or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this targeting analysis is the Automated Targeting System (ATS). The Automated Commercial System (ACS), TECS, and associated databases provide

CBPOs (including those stationed overseas at Preclearance stations, Container Security Initiative (CSI) ports, and Immigration Advisory Panel (IAP) locations) with advance notice of travelers, conveyances, and goods arriving at U.S. ports of entry. This allows them to cross-check passenger, crew, and cargo manifests against subject lookouts including those contained in the Terrorist Identities Datamart Environment (TIDE) and the NCIC. CBP also uses ATS to analyze data in the Automated Export System (AES) on shipments leaving the U.S.

ATS enhances the TECS, ACS, and AES data by running rules developed by CBP’s subject matter experts to identify travelers, conveyances, and shipments with high-risk travel patterns. ATS also allows CBPOs to conduct advanced queries of these and other government databases to reveal emerging threat patterns.

Currently, ATS consists of six modules that focus on exports, imports, travelers and crews (airline passengers and crew on international flights, passengers and crew on sea carriers), private vehicles crossing at land borders, and import trends over time. The six modules are: (1) ATS-Inbound, which serves as the primary decision support tool for inbound targeting of cargo; (2) ATS-Outbound, which is used for targeting outbound cargo and assists in identifying exports which pose a high risk of containing goods requiring specific export licenses, narcotics, or other contraband; (3) ATS-Passenger (ATS-P), which is used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure; (4) ATS-Land (ATS-L) which provides analysis and rules-based risk assessment of private passenger vehicles crossing the nation’s borders; (5) ATS-Trend Analysis and Analytical Selectivity which improves CBP’s ability to examine, locate, and target for action violators of U.S. laws, treaties, quotas, and policies regarding international trade; and (6) ATS-International which provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

HIGH RISK TRAVELERS IDENTIFIED

Fiscal Year	APIS	VISA	ESTA
2008	245,854	-	-
2009	250,320	-	-
2010	250,811	8,217	-
2011	297,620	12,345	59,043
2012	313,717	28,624	139,923
Sub Total	1,358,322	49,186	198,966
TOTAL	1,606,474		

Note: VISA and ESTA Hotlists do not go back 5 years.

HIGH RISK CARGO IDENTIFIED

Fiscal Year	Number Identified
2008	441,543
2009	482,625
2010	528,614
2011	594,821
2012	694,757
TOTAL	2,742,360

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities. Targeting improvements will enable continuous, incremental improvement of ATS, helping to replace unproductive inspections and vetting operations (false positives) with more productive / more effective enforcement activities (successful seizures / apprehensions) and expansion to better mitigate known and emerging threats. Enhancement and expansion of CBP’s targeting enterprise will provide front line personnel the ability to provide comprehensive risk assessments on the large volume of regulatory and commercial data generated by commercial entities, states, and other government agencies to verify the identity of businesses, cargo, and persons using and crossing our borders. This can be achieved by rapidly institutionalizing deployed stop-gap measures by developing the advanced analytics capabilities to augment the “officer developed algorithms.” Further expansion of ATS capabilities to cover additional transportation modes, such as air and sea, will enhance agency-wide responsiveness to threats. This approach will allow CBP to continue facilitating the flow of legitimate passengers and cargo, while enhancing the capability to detect and prevent terrorist threats, and resolve IPR related issues. This could include expansion of ATS capabilities to other DHS component needs; such as Visa Overstay Vetting and Refugee Screening.

Descriptions of Selected Adjustments to Base

Realignment of Funding for Targeting Systems:

The transfer of \$7.0 million of funding from the Automated Commercial Environment (ACE) PPA to the ATS PPA will allow CBP to consolidate all targeting funding within the Systems for Targeting PPA. This PPA supports activities that give CBP the ability to achieve its critical border security objectives and maintain the flow of lawful commerce by identifying high-risk travelers and goods for inspection while allowing law-abiding travelers and commerce to move without unnecessary delay.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding \$71,930	FY 2013 Activity Funding \$39,930	FY 2014 Activity Request \$108,462
Automated Targeting System (ATS) Maintenance	A web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. Automated Targeting System allows CBPOs to focus their efforts on cargo shipments and passengers that most warrant further attention. Funding for this ATS comes from this PPA as well as Headquarters Management and Administration (HQ M&A) at the Ports of Entry and HQ M&A Between the Ports of Entry. Total funding in \$72.016 million in FY2012, \$40.016 million in FY2013, and \$111.462 million in FY2014

- An increase of \$120 thousand is for 2012 National Targeting Center - Year 2
- A decrease of -\$750 thousand for non-recur 2012 Reprogramming

CURRENT SERVICES PROGRAM DESCRIPTION:

NTC supports CBP's goal to employ an enhanced targeting strategy that effectively and efficiently segments cargo and travelers according to the potential threat they pose. The NTC integrates the Agency's diverse intelligence capabilities into a cohesive data enterprise enabling CBP to serve the Nation as a premier intelligence-driven border law enforcement agency.

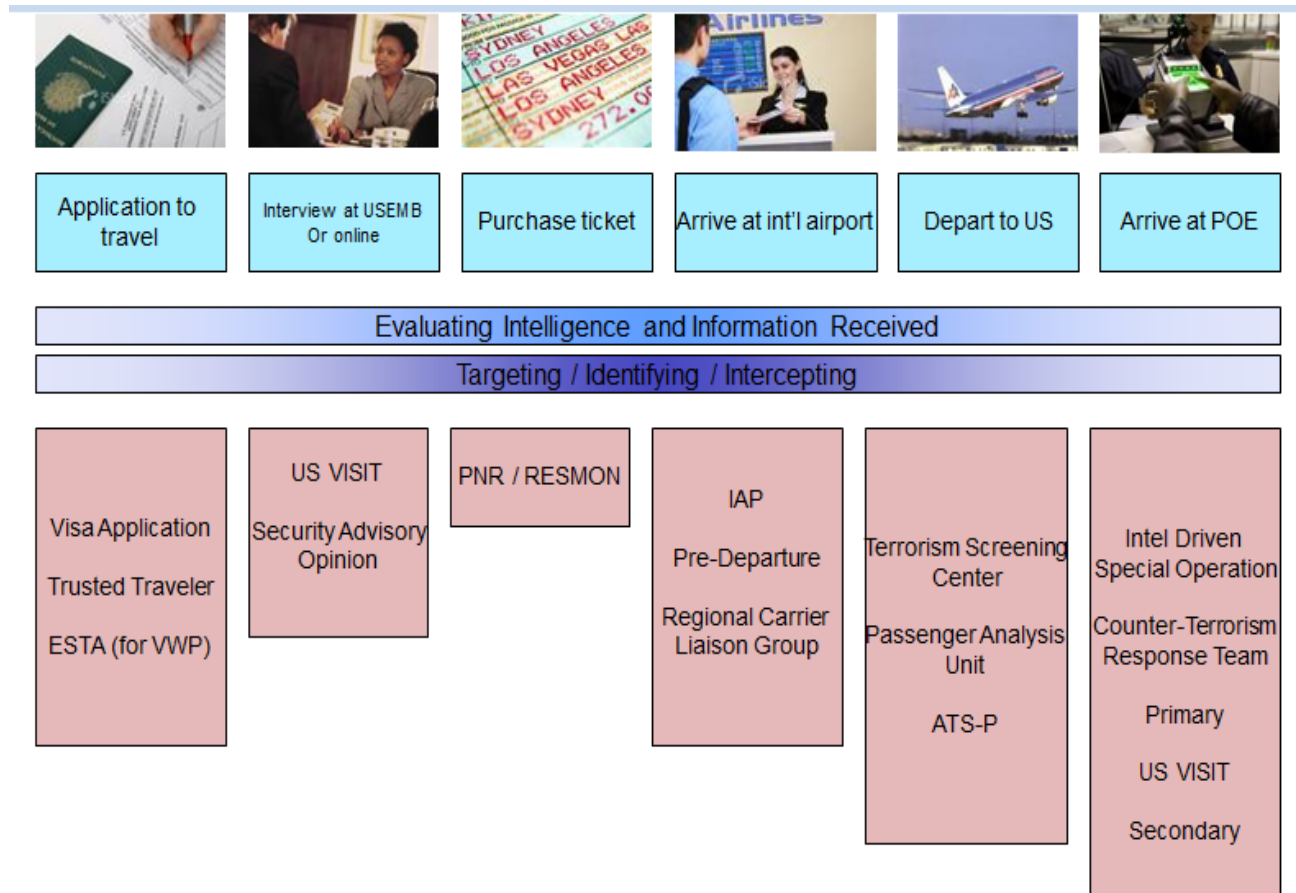

The NTC was created in November 2001 in response to the terrorist attacks of September 11, 2001, to provide advanced targeting, research and coordination between numerous law enforcement and intelligence agencies in support of the CBP anti-terrorism mission. The NTC provides around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts in both the passenger and cargo arenas.

The NTC facilities are primarily staffed by CBPOs, BPAs, Agriculture Specialists, and Import Specialists, all subject matter experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw

intelligence in support of CBP’s primary mission to detect and prevent terrorists and terrorist weapons from entering the U.S. While the vast majority of travelers and goods are legitimate, the NTC mission is designed to carefully identify and examine the small percentage of shipments and/or travelers that may be connected to terrorism or other transnational crimes, such as money laundering, human trafficking, and narcotics smuggling.

The following diagrams depict the NTC’s passenger and cargo targeting processes:

Passenger Targeting*

*Acronyms in Chart

USEMB = US Embassy

PNR = Passenger Name Record

RESMON = this is the name of a system, not an acronym

IAP = Immigration Advisory Program

ATS-P = Automated Targeting System-Passenger

US VISIT = United States Visitor and Immigrant Status Indicator Technology

Conduct Pre-Departure Screening

The NTC screens relevant traveler and cargo information prior to their departure. This approach is a key part of the CBP’s layered security strategy to protect the homeland by extending U.S.

borders outward to identify and mitigate threats, interdict possible terrorists, other *mala fide* travelers and suspect cargo before they can board or be laden on a conveyance destined for the United States.

The pre-departure screening approach is accomplished through a conglomerate of programs and activities that, in aggregate, further the CBP mission. The following tables summarize the main program and activities that support passenger/travel and cargo pre-screening.

The following table shows a list of core passenger related activities at the NTC:

Program	Description
Pre-Departure Targeting	Identifies high-risk passengers and keeps them from boarding commercial carriers bound for the United States. In FY 2012, the NTC reviewed 257,135 records and identified 3,118 passengers who were inadmissible to the United States and were denied boarding at foreign departure locations, an increase from FY 2011 in reviews of 21 percent and denials of 28 percent.
Immigration Advisory Program	IAP officers interview the passengers to identify the targets referred from NTC and assist airlines to determine whether passengers have the proper documents to apply for entry to the United States. In FY 2012, the NTC reviewed 148,839 records resulting in 1,081 boarding denials at foreign departure locations, an increase of 2 percent in reviews and 43 percent in denials from FY 2011.
Visa Re-Vetting and ICE/DOS Pre-application vetting	Re-vets previously issued U.S. visas against No Fly, Terrorist Screening Database (TSDB), Visa Revocation Records, certain National Crime Information Center (NCIC) records, Public Health, and Department of State (DOS) lookout records with terrorist related inadmissibility codes. Vets visa applications before they are submitted to DOS. In FY 2012, the NTC reviewed 30,907 records with 2,757 positive matches that were forwarded to DOS for possible visa revocation. Ultimately 2,068 were revoked by DOS. This represents an increase over FY 2011 in reviews of 151 percent, a 102 percent increase in referrals, and an increase in confirmed revocations of 86 percent. <i>Pre-Adjudication Visa Vetting:</i> Additionally, the NTC in coordination with ICE and DOS vets visa applications before they are submitted to DOS. During the second quarter of FY2013 Phase I was implemented at 19 Posts where ICE Visa Security Units (VSUs) are co-located. Full implementation is expected by the end of FY 2013.
Office of Alien Smuggling Interdiction	Deters, detects, and disrupts illegal migration to the United States by focusing on migratory trends utilized to facilitate human smuggling and trafficking.
Regional Carrier Liaison Group (RCLG)	Prevents fraudulently and improperly documented aliens from boarding U.S. bound aircraft through various targeting methods and by working with carriers and U.S. government representatives overseas. Since the December 25, 2009 attempted terrorist attack, the RCLGs have taken on a greater role as part of CBP's expanded Pre-Departure Screening

	program and in FY 2012, RCLGs answered more than 57,657 phone calls from air carriers and offloaded nearly 9,288 passengers bound for the United States, of which 227 were fraud related. This represents an increase in calls of 140 percent and an increase in offloads of 218 percent over FY 2011.
Electronic System for Travel Authorization	Requires all aliens who plan to travel to the United States under the Visa Waiver Program (VWP) for temporary business or pleasure, to obtain an electronic travel authorization prior to boarding a U.S.-bound commercial flight or cruise ship. The NTC-P conducts manual review all possible matches to No Fly, TSDB, and other derogatory records indicating a possible law enforcement or national security risk. The ESTA website began accepting voluntary applications in July 2008 and the program became mandatory for travelers from the 37 VWP countries in January. 2009. In FY 2012, ESTA approved 11,897,447 applications and denied 24,811.
United Kingdom Border Agency / National Border Targeting Centre/ International Targeting Center	Enhances border security for all involved countries by exchanging critical passenger information in order to disrupt the movement of criminals and terrorists, deter alien and contraband smugglers and identify those using fraudulent or stolen travel documents. As a result of the MOU, 336 Targeting Framework (TF) events were created in FY 2012, and NTC personnel have been involved in several joint agency anti-currency smuggling operations.
Biometric Watch List	Reconciles Biometric watchlists with TSDB.

NTC (Passenger Statistics) End of Year 2012

Program	Number of Records Reviewed	Number of Passengers Denied Boarding	Number of Applications Received	Number of Applications Revoked
Pre-Departure Targeting	257,135	3,118	-	-
Immigration Advisory	148,839	1,081	-	-
Visa Re-Vetting	30,907	-	-	2,068*
Esta Applications Received	-	-	11,897,447	24,811

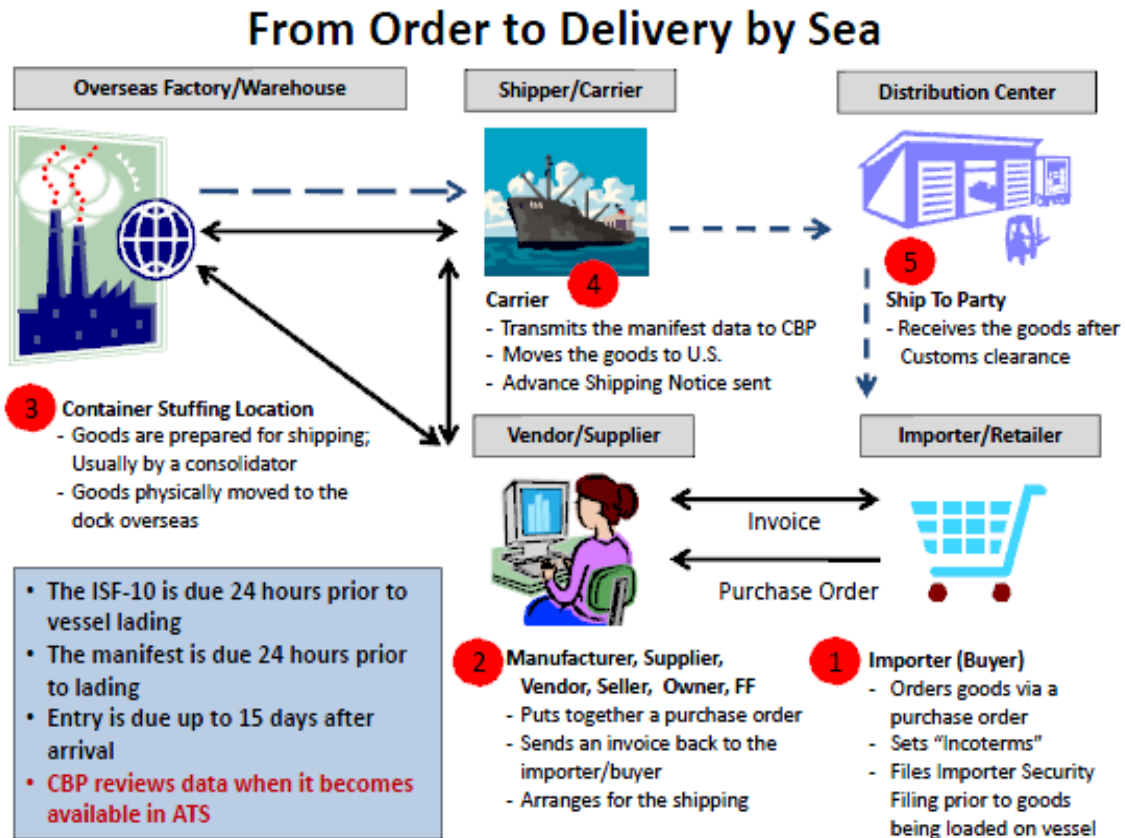

* This number indicates the Department of State visa revocations.

Cost Avoidance/Workforce Multiplier Impact:

The NTC, in coordination with IAP and the RCLGs, enhances pre-departure targeting efforts and conducts visa vetting efforts, which allows CBP, in coordination with other agencies and with the affected airlines, to assist in preventing inadmissible travelers from traveling to the United States. Pre-departure targeting continues to pay security and efficiency dividends. In FY 2012, the NTC was responsible for the offloading of 9,288 passengers due to RCLG offloads (3,883 passengers), pre-departure targeting matches (4,199 passengers) and Immigration Advisory Program (1,206 passengers) efforts. This targeting work alleviates field operational

requirements equivalent to the work of 289 CBPOs avoiding of over \$33.4 million in staffing requirements for CBP.

Cargo Targeting *

*Acronyms Used in Chart

ISF = Importer Security Filing

ATS = Automated Targeting System

FF = Freight Forwarder

The following table shows a list of core cargo related activities at the NTC:

Program	Description
Outbound Targeting	Conducts daily outbound and in-transit cargo reviews which target shipments such as personal effects destined to high risk countries, controlled chemicals, and strategic equipment used in the production of Weapons of Mass Effect (WME). In FY 2012, NTC was responsible for the arrest of 58 individuals attempting to exit the country. All subjects were a positive match to an NCIC warrant and extradition coordination was completed by the port of departure. In addition to the 173 arrest on the passenger side, 49 cargo seizures were completed in FY 2012.
Pre-Departure Screening of Cargo	Screens relevant information prior to cargo departure. Provides cargo research and analysis on positive TSDB passengers, responds to research requests from CBP domestic and Container Security Initiative (CSI) ports, and conducts cargo research for NTC liaisons. Additionally, the NTC: conducts national cargo sweeps in the ATS; supports Intelligence Driven Special Operations (IDSOs); and conducts WMD /Weapons of Mass Effect (WME), agro-terrorism, and bio-terrorism rules development.
Air Cargo Advanced Screening (ACAS)	Targets and mitigates air cargo identified as high risk before allowing it to be loaded onto an aircraft. The ACAS team currently receives data from 145 countries. Express couriers, UPS, Federal Express (FedEx), DHL, TNT, passenger carriers, Delta Airlines, Lufthansa, Air Canada, and freight forwarder, DHL Global Forwarding are transmitting data on a voluntary, pilot program basis. Furthermore, the Federal Register notice formalizing and expanding the ACAS pilot was published October 24, 2012.
Agriculture/Bioterrorism Cargo Screening	Supports tactical targeting, research, follow-up, reporting, analysis, coordination, and automated risk management, including all activities related to targeting and researching trade activities related to agriculture and bioterrorism.
Cargo Targeting Unit (CTU) and National Initiative for Illicit Trade Enforcement (NIITE)	<p>As part of CBP's layered enforcement strategy, the NTC CTU supports anti-terrorism efforts via the utilization of the Automated Targeting System (ATS) WME cargo user-defined queries (UDQs) to target chemical, biological, radiological, conventional weapons, explosives, and ammonium nitrate shipments in all modes of transportation.</p> <p>NIITE is a joint ICE Homeland Security Investigations (HSI) and CBP initiative to target shipments for counter-proliferation, narcotics, currency smuggling, and other concerns by tracking suspect shipments using carrier websites. It utilizes new automated tools to conduct digital surveillance and target suspect shipments. An automated system has been created to replace the pre-existing manual process.</p> <p>In FY 2012, CTU/NIITE collaborative efforts resulted in 40 seizures and 5 compromised containers totaling \$87,358,776, 28 narcotics</p>

	<p>seizures totaling 2,492 kilos of cocaine with a NDIC average wholesale value of \$69,339,900, three Outbound/CPI seizures involving Iranian sanctions and weapons to the Philippines, two IPR seizures of counterfeit garments and batteries, and seven contraband cigarette seizures totaling \$18,018,876.</p>
<p>Container Security Initiative (CSI)/Secure Freight Initiative (SFI)</p>	<p>CSI at the NTC works in support for all CSI overseas ports creating a focal point for all domestic exam requests to the ports of entry, acting as the overseas port in instances where the port cannot function, and the functional port for 100 percent review of bills of lading for the “Big 8” (Australia, New Zealand, Haifa and Ashdod, Israel, Halifax, Montreal, Vancouver, Canada, and Piraeus, Greece). Depending on the support needed, CSI NTC also covers Asian ports with marginal bill review. CSI NTC is responsible for all radiation alerts, x-ray exams, and daily operations in SFI Port Qasim, Pakistan. In FY 2012, CSI and SFI ensured the examination of 1,968 shipments both domestic and foreign.</p>
<p>International Cargo Targeting Fellowship Program</p>	<p>NTC cooperates with international partners to identify, prevent, deter, disrupt and manage risks in the cargo environment through dynamic information and knowledge sharing by hosting foreign customs officials under the International Fellowship Program and participating in Officer Exchange Programs. The main objectives of the program are to foster the timely exchange of information, share and refine targeting techniques, and increase each country’s capability to target and eliminate criminal trade entities on a global scale. NTC is working with two Mexican analysts from the Tax Administration Service (TAS) and one analyst from Abu Dhabi Customs to facilitate cooperation and enhance targeting goals through the joint analysis of risk indicators. In FY 2012, 17 seizures were directly linked to the International Cargo Targeting Fellowship Program.</p>

2014 Total Request	30	30	47,651
Total Change 2012 to 2014	(2)	(2)	13,517

CBP requests 30 positions, 30 FTE, and \$47.651 million in FY 2014 for the Training at the Ports of Entry PPA

- An increase of \$13.837 million is for Increase to CBPOs Staffing Level to Promote Travel and Trade
- An increase of \$3.7 million for non-recur 2012 Reprogramming
- An increase of \$30 thousand is for Pay Increase
- A decrease of -\$2.632 million is for 2012 OFO Positions for New Ports of Entry - Year 1
- A decrease of -\$753 thousand is for Training and Development
- A decrease of -\$356 thousand is for 2012 National Targeting Center - Year 1
- A decrease of -\$309 thousand is for Rent Consolidation

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development (OTD) is responsible for the Training at the Ports of Entry PPA, which supports basic, advanced and supervisory/management/leadership training for new and incumbent CBPOs, Agriculture Specialists, Import Specialists, and Entry Specialists assigned to the ports of entry. The training provided establishes and sustains the proficiency of those directly responsible for the front line mission of CBP. Funding levels requested for this training in FY 2014 will enable CBP to achieve targeted FY 2014 staffing levels for these positions and maintain mission critical skills and certifications of existing employees assigned to the ports of entry.

The following are descriptions of the types of training programs funded under this PPA.

Training At the Ports of Entry Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
Basic Training	Basic Training for CBPOs, Import Specialists and Entry Specialists is conducted at the Field Operations Academy (FOA) located at the Federal Law Enforcement Training Center (FLETC) facilities in Glynco, GA and Charleston, SC. Agriculture Specialist Basic Training is delivered at FLETC's training center in Frederick, MD. Successful completion of basic training is a pre-requisite for employment in these positions and ensures proficiency in the foundational law enforcement knowledge and skills required by the CBP mission in securing the ports and facilitating trade and travel.	1,802	1,357	1,359
Firearms and Use of Force Instructor Training	Per CBP policy armed officers and agents are required to undergo periodic qualifications of firearms proficiency and annual use of force training/certification. Failure to successfully complete these periodic qualifications results in the officer/agent losing his/her certification to carry a firearm and/or use intermediate force devices. These periodic qualifications are administered by certified Firearms Instructors and Use of Force Instructors at field locations. These instructors are required to attend training for initial certification, and recertification training every five years. Less Lethal Speciality Impact Training, Pepperball & Electronic Control Device recertification will increase the seats for all CBP to be trained in FY2013.	1,382	25,397	5,000
Driver Training	This training provides CBPOs the skills required to safely and effectively respond to vehicle-related incidents (such as port runners), that occur at POEs.	119	120	120
Health & Safety	This training provides CBPOs skills in dealing with hazardous materials, operating in confined spaces and operating dangerous equipment – scenarios they deal with on a daily basis. It also includes funding for peer support/chaplaincy training to support staff dealing with stressful and traumatic events, such as loss of a colleague on the job.	142	160	160

Training At the Ports of Entry Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
Emergency Preparedness & Response	This training is required for CBPOs to maintain sufficient skill levels in incident management and response procedures. This training provides capabilities not only to maintain security of the border, but also to provide support to areas struck by natural disasters. CBP supports responses to these types of events.	226	200	200
International Pre-Deployment	This training is mandatory for any CBP employees deploying overseas and is necessary for CBP to continue filling overseas positions supporting our many international programs which are designed to enhance national security. These include the Immigration Advisory Program, which works with airlines overseas to identify persons who may not be admissible to the U.S.; the Container Security Initiative, which works with foreign customs administrations to screen containers bound for the U.S. before they enter our ports; the Preclearance Program for clearing passengers on U.S. bound flights prior to their arrival in the U.S.; and CBP Attachés and Representatives operating overseas to advance U.S. goals and partnerships in the areas of border security and trade.	242	542	542
Canine	Training for CBPOs and Agriculture Specialist canine teams operating at the ports of entry is funded under this PPA. This includes CBPO canine teams trained in the disciplines of Basic Detection, Concealed Human/Narcotics Detection, and Currency/Firearms Detection.	179	229	229
Anti-Terrorism/Counter Terrorism/Targeting	This training provides CBPOs skills in screening and targeting travelers and cargo for potential threats (terrorists, drugs, currency, and weapons). Training encompasses everything from advanced interviewing skills to use of targeting systems to use of specialized detection technologies.	712	700	700
Trade	Training in various trade-related initiatives (e.g., Intellectual Property Rights enforcement) for CBPOs and trade specialists operating at ports of entry, is funded under this PPA.	600	600	600

Training At the Ports of Entry Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
Agriculture	CBP's mission of protecting the border includes keeping agricultural pests and products that might be detrimental to US agriculture out of the country. CBP expands its capability in this regard by providing training for military inspectors to conduct agricultural examinations of inbound international military flights.	85	108	108
Instructor Training	This training is required for CBP to maintain a sufficient cadre of certified, quality instructors to deliver basic and advanced training to officers and specialists operating at ports of entry.	356	460	460
Supervisor/Leadership Training	Training for first- and second-line CBPO, Agriculture Specialist, Import Specialist, and Entry Specialist supervisors is funded under this PPA. This training provides these supervisors the technical and supervisory skills required to effectively lead officers and specialists under their command	300	300	300

CBP requests 22,968 positions, 22,955 FTE, and \$3,700.317 million in FY 2014 for the Border Security Control PPA

- An increase of \$270.565 million is for Pay Adjustment for Workforce Maturation
- An increase of \$26.417 million is for 2010 Border Security Supplemental - Year 3 (1000 BPAs)
- An increase of \$26.044 million is for Pay Increase
- An increase of \$19.377 million is for 2010 Border Security Supplemental - Year 2 (1000 BPAs)
- An increase of \$1.235 million is for 2010 War Supplemental on Combating Southbound Firearms and Currency Smuggling - Year 2 (44 BPAs)
- A decrease of -\$47.855 million is for Border Patrol Agent overtime
- A decrease of -\$23.819 million is for CBP Transportation Program
- A decrease of -\$22.070 million is for Managed Hiring, Awards & Support Services
- A decrease of -\$19.433 million for non-recur 2012 Reprogramming
- A decrease of -\$18.886 million is for Realignment of Wage Grade Facilities Positions
- A decrease of -\$15.976 million is for Utilities Consolidation
- A decrease of -\$15.029 million is for Management Efficiencies
- A decrease of -\$10.573 million is for Rent Consolidation
- A decrease of -\$8.0 million is for Efficiency to OBP Holiday Pay
- A decrease of -\$4.15 million is for Travel Efficiency
- A decrease of -\$2.2 million is for OBP Support
- A decrease of -\$1.9 million is for Firearms Qualifications
- A decrease of -\$1.55 million is for CBP Fleet Acquisition and Management
- A decrease of -\$1.307 million is for Deactivation of 9 inland Border Patrol Stations
- A decrease of -\$1.0 million is for OBP Horse Patrol

CURRENT SERVICES PROGRAM DESCRIPTION:

OBP Mission

The mission of the U.S. Border Patrol (USBP) is to secure America's Borders. This will be accomplished by preventing terrorist and terrorist weapons from entering the United States; and by disrupting and degrading the activities of transnational criminal organizations. The USBP will coordinate and integrate its activities with the Office of Field Operations and the Office of Air and Marine within CBP.

Border Security and Control	FY 2014 Request (000)
BPA Salary & Benefits	\$3,216,056
Other Salary & Benefits	\$221,036
Non-Personnel Costs	\$263,225
Total	\$3,700,317

OBP Strategy

In FY 2014, CBP will implement a new USBP approach focused on Information, Integration, and Rapid Response capabilities in performing the mission of Securing America's Borders. This new strategy involves the USBP moving from a resource-dependent approach to border security to a risk-based approach that enables rapid response to areas of greatest risk in the immediate border area. The USBP will deploy its capabilities to align with the threats along the border. This is an ongoing process that will continue to adapt as threats change.

The new strategic plan places risk management at the core of Border Patrol's strategic planning. Through enhanced awareness and intelligence (Information); coordinated operations with Federal, state, local and international partners (Integration), and the ability to respond quickly to changing threats (Rapid Response), the USBP will be able to put the greatest capabilities in place to combat the greatest threats. Field commanders will adopt risk-management as a core planning principle. All sectors will identify their greatest risk and employ sector-specific plans for mitigating risk, using Information, Integration, and Rapid Response.

A new management decision tool (Integrated Mission Analysis Tool – IMAT) is under development and will provide a methodology to track and assess threats, vulnerabilities, consequences, and capabilities of both the USBP and threat elements. This tool has completed pilot testing and will be used by all sectors by the end of FY 2013. The IMAT will provide valuable baseline information on vulnerabilities and capabilities of the USBP and known or potential threats. This assessment will then provide a Border Assessment Level (BAL) which will guide the USBP in its operational decision-making process to deal with the threat. As the Border Patrol uses this new analysis tool over time it will gain a better understanding of how capabilities, such as agent staffing and technology, directly contribute to the Border Patrol's ability to counteract threats in specific areas and impact employment of resources at large in those areas. It could also help determine whether OBP can reduce technology and manpower

requirements in a given area because they are better used in another high risk area. This will ultimately make the Border Patrol more agile in its ability to reduce capabilities from secured areas of the border and re-position them to areas of greater risk, without creating vulnerabilities to other border areas.

Efficiencies in FY 2014 Budget Submission

The Border Patrol has implemented measures to improve the efficiency of various programs, including an \$8.0 million reduction to BPA Holiday pay, a reduction of \$4.2 million to travel expenses, reducing the frequency of firearms qualification to generate \$1.9 million in savings, and constraining Permanent Change of Station (PCS) costs resulting in a reduction of \$1.1 million. The Border Patrol is taking steps to reduce costs in low-priority, low-risk programs and will continue to review its business practices to identify future candidates for cost-savings.

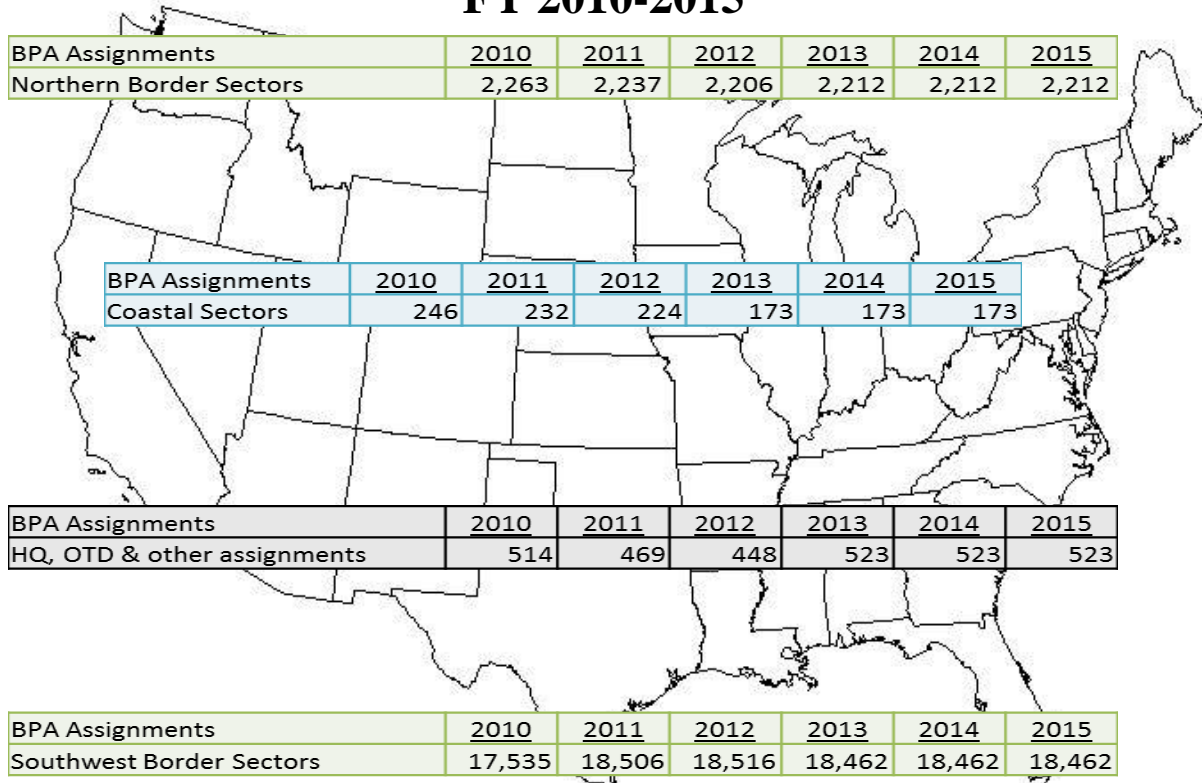

Manpower/Personnel

USBP will maintain a staffing level of 21,370 BPAs during FY 2014. The current mission support authorized staffing level is 1,874 and represents a decline of 212 personnel from FY 2012 and a drop of 426 since FY 2010.

	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>
BPAs	20,558	21,444	21,394	21,370	21,370
OPs Support Personnel	2,300	2,299	2,086	1,874	1,874

Although technology provides enhanced detection capability throughout the operational environment of USBP and serves as a force multiplier, it requires BPAs on the ground executing actions against identified targets. For every detection and identification resulting from technology, there must be an accompanying action from an agent to classify the detection, respond, and resolve illegal activities. As technology employment intensifies, it will continue to increase CBP’s detection capabilities and may require a rebalancing of agent resources in the future. Supporting the employment of planned technology is important in increasing CBP’s detection capabilities and as a direct result increase mission success.

Border Patrol Agent Assignments FY 2010-2015

OBP Organization and Structure: The U.S. Border Patrol’s Headquarters, is the Office of Border Patrol (OBP) and is located in Washington, D.C.

OBP is led by the Office of the Chief who oversees Special Operations, Enforcement Systems and three divisions: the Operations Division, the Strategic Planning, Policy and Analysis Division, and the Mission Support Division. Each division directs numerous programs in support of the 20 Border Patrol Sectors responsible for all enforcement efforts.

A. USBP Sectors: The 20 Border Patrol Sectors serve as the primary regional command structure. There are 19 within the continental United States, and one in the island of Puerto Rico. Each is headed by a sector chief and designated staff. Similar to OBP headquarters, the sector staff is responsible for programs in support of the numerous Border Patrol stations within their sector. Nationwide, there are 139 Border Patrol stations that report to their respective Sectors. The Border Patrol station is the basic geographic command structure within a sector and is the primary operational element of the Border Patrol. It is from Border Patrol stations that the men and women of the Border

Patrol deploy to Forward Operating Bases, operate checkpoints, and conduct the various other duties to protect America 24 hours a day 7 days a week.

United States Border Patrol

Totals:	139	12	4	35

B. To ensure effective and efficient command and control of personnel, OBP initiated a restructuring of sector headquarters and station organization in early 2012. This restructuring standardized and flattened the organizational structure at sectors and stations to allow for an increase in supervisors' span of control, which complemented the growing workforce.

C. Likewise, as the Border Patrol grew and the diversity of programs began to expand, it became apparent that the geographic centric headquarters command structure required restructuring. The resulting command structure provided executive leaders significantly greater oversight by allowing them to focus efforts individually on operations, programs, or planning.

SOG: The Special Operations Group (SOG) is a specially trained and equipped team that provides critical support to DHS, CBP and USBP in rapidly responding to emergent and/or unusual law enforcement situations that require special tactics and techniques, to include search, rescue and medical response capabilities via land, air and sea. In support of the USBP National Strategy, SOG provides day-to-day emergency support functions (ESFs) for DHS, CBP and USBP and responds to national level incidents, as outlined in the National Response Framework. The SOG will continue to operate against unconventional and complex threats, to include terrorist and Transnational Criminal Organizations, and is aggressively preparing for the future while addressing today's threats through maintaining a presence in key strategic locations in order to mitigate future risk.

A. Organization of SOG

SOG is comprised of three components: Border Patrol Search, Rescue and Trauma Team (BORSTAR); Border Patrol Tactical Team (BORTAC); and the Mobile Response Team (MRT). The command and support staffs for the teams are located at the Special Operations Group in El Paso, TX where SOG also maintains administrative control over all special operations personnel and MRT throughout the Border Patrol. The Sector Chiefs maintain tactical control of special operations personnel and MRT for day to day operations. The Chief of the Border Patrol can move special operations personnel at his discretion to address high threat or rescue operations within or outside the Continental U.S. (CONUS/OCONUS). When Special Operations and MRT personnel are detailed outside their respective sectors, both administrative and tactical control remains with the Chief of the Border Patrol through his proxy (SOG Director or OBP Special Operations Headquarters Branch Chief). SOG personnel also conduct international training and capacity building operations to enhance the capabilities of our foreign border security law enforcement partners.

B. SOG Component Personnel Numbers

SECTOR	BORSTAR Personnel			BORTAC Personnel			Overall Total
	Total	Active	Reserve*	Total	Active	Reserve*	
OTD/ART	1	0	1	5	0	5	6
Big Bend	4	4	0	3	3	0	7

Yuma	17	15	2	12	10	2	29
TOTALS	282	231	51	266	211	55	548

* Active status agents possess active, up-to-date training qualifications and can be immediately called upon and utilized for day-to-day operations. Reserve status agents have previously attained required training qualifications but have elected not to participate in current, day-to-day operations since they occupy management positions which may preclude participation; however these agents can still be called upon in the event of a national emergency.

MRT Personnel by Sector

SECTOR	Total	Active	Inactive
Tucson	85	81	4
El Paso	122	122	0
Rio Grande Valley	95	95	0
San Diego	106	106	0
TOTALS	408	404	4

FY 2012 SOG Seizure and Apprehension Statistics

SOG Team	Rescues	Seizures				Apprehensions
		Marijuana (lbs)	Vehicles	Weapons	Currency	Aliens
BORTAC		57,439	126	65	\$276,345	1,921
BORSTAR	907	45,566	80	4		12,016
MRT		97,398	84	10	\$22,681	16,431

- BORTAC apprehensions included 4 armed suspects and 11 lookouts. BORTAC weapons seizures included 4000 rounds of ammunition and 478 AK magazines.

C. Response Time

The USBP Special Operations Group (SOG) units are on an operational cycle that ensures that teams are available for rapid response to National Special Security Events (NSSE), National Response Framework and Counter-Terrorism (CT) events. The units are on a four hour call-up which means once they are notified, they will be ready to deploy in four hours. Response time to emergent events will vary from 24 to 72 hours CONUS and 72 hours to 5 days OCONUS. Moving forward, SOG is looking to enhance its special operations mobile response capability and response times by working with CBP Office of Air and Marine (OAM) to co-locate air assets at SOG, which would optimize training opportunities, minimize risk, and reduce costs.

D. SOG Team Descriptions, Training Qualifications and Mission Deployments

1. USBP Search Trauma and Rescue Unit (BORSTAR)

BORSTAR is a core operational component of the USBP SOG. In support of the USBP Strategic Plan, BORSTAR provides rapid response law enforcement, search, rescue, and tactical medical capabilities for the USBP. BORSTAR plans, prepares, and trains to neutralize imminent threats to national security. National level incidents include the possibility of widespread bio-terrorism and other pandemic perils that remain a paramount concern for CBP and other federal, state, and municipal entities. Additionally, BORSTAR provides mutual assistance to local, county, state, tribal, and Federal entities by responding to enforcement and search and rescue requirements, acts of terrorism, potential terrorism, and natural disasters throughout the United States.

BORSTAR Annual Mission Essential Task List:

- Search & Rescue Fundamentals
- Land Navigation
- Emergency Medical Technician (EMT) Basic and Advanced
- Paramedic Certifications
- Helicopter Rope Suspension Technique (HRST) Operations / HRST Master Certifications
- Technical Rescue Operations
- Swift Water Rescue Operations
- Air Operations
- Tactical Combat Casualty Care (TCCC)
- Weapons Proficiency
- Cold Weather Operations
- Specialty Skill Sets for Technical Rescue, HRST Master, Dive Team, Marine Operations, and Swift Water Rescue etc.
- Yearly Physical Fitness Test Standard
- Communications

BORSTAR Mission Deployments

In addition to providing day to day support to Border Patrol sector operations, during FY 2012, BORSTAR has been deployed in support of 15 OCONUS missions with 56 days being the average length of OCONUS deployment. OCONUS missions were conducted in Honduras, Panama, Guatemala, Costa Rica, Morocco, Peru, Kenya, Kosovo, Belize, and Mexico. During this same time frame, BORSTAR deployed in support of 17 CONUS missions with an average length of deployment of 26 days. CONUS missions were conducted in Rio Grande Valley, Tucson, San Diego, and Yuma, sectors as well as Hawaii and Playas, NM.

2. USBP Tactical Unit (BORTAC)

BORTAC is a core operational component of the USBP Special Operations Group. BORTAC provides a tactical rapid response capability, at a national level, to resolve emergent, high-risk and unusual law enforcement situations by employing specialized skills, weapons and tactics. BORTAC supports the National Border Patrol Strategic Plan by matching capabilities to emerging threats, through planning, training and tactical deployment. This increases the USBP's

ability to respond to specific terrorist and criminal threats and incidents, and supporting the traditional USBP mission. BORTAC has developed partnerships with the FBI Hostage Rescue Team (HRT) and U.S. Immigration and Customs Enforcement (ICE). BORTAC will continue to foster these relationships as they support the Border Patrol Strategic Plan for a whole-of-government approach to joint operations.

BORTAC Annual Mission Essential Task List:

- Patrolling / Land Navigation
- Intelligence / Reconnaissance
- High Risk Warrant Service
- High Risk Operations
- Weapons Proficiency
- Less Lethal / Mobile Field Force (MFF)
- Air Operations
- Helicopter Rope Suspension Technique (HRST) Operations
- Basic First Aid
- Protective Services
- Specialty Skills to include PM/O, Medical, HRST Master, Breaching, Defensive Tactics and Command and Control and CBRNE capabilities.
- Yearly Physical Fitness Test Standard

BORTAC Mission Deployments

In addition to providing day to day support to Border Patrol sector operations, over the past FY, BORTAC has been deployed in support of 13 OCONUS missions with 75 days being the average length of OCONUS deployment. OCONUS missions were conducted in Moldova, Panama, Honduras, Costa Rica, Guatemala, Kenya, Ukraine and Peru. During this same time frame, BORTAC deployed in support of three CONUS missions with an average length of deployment of 28 days. CONUS missions were conducted in SDC and TCA sectors as well as Playas, NM.

3. Mobile Response Team (MRT)

In support of the USBP National Strategy for enhanced mobility and intelligence-driven response capabilities, the MRT provides a flexible and tiered-response capability to counter the emerging and evolving threats along the challenging operational areas of our Nation's borders. The MRT provides a national group of organized, trained, and equipped USBP agents capable of rapid movement to regional and national incidents, and events in support of priority CBP operations as well as respond to intelligence driven targets and shifts in local cross-border criminal activity as deemed necessary by the USBP Chief Patrol agents.

MRT Training:

- Patrolling / Land Navigation
- Weapons Proficiency
- Less Lethal / Mobile Field Force (MFF)
- Tactical Combat Casualty Care (TCCC)
- Physical Fitness

Operations

In FY 2012, USBP national operations seized approximately 2,999,000 pounds of marijuana, a 9 percent decrease from FY 2011 and apprehended 364,768 illegal aliens, a 7 percent increase from FY 2011.

Tucson Sector is the most active Border Patrol Sector. In FY 2011, Tucson Sector agents seized more than 1,039,000 pounds of marijuana, which accounts for 41 percent of the marijuana seized nationwide, and arrested more than 123,000 illegal aliens, which accounts for more than 36 percent of all USBP apprehensions. In FY 2012, Tucson Sector apprehended 120,000 illegal aliens, a 3 percent reduction from FY 2011, and seized approximately 1,015,000 pounds of marijuana, a 2 percent reduction FY 2011. The Rio Grande Valley Sector, the second-most active sector, has apprehended 97,762 illegal aliens and seized 886,000 pounds of marijuana in FY 2012.

A comprehensive set of USBP statistics for Fiscal Year 2013 are provided below:

U.S. Border Patrol Statistics by Border FY2013

Apprehension Data includes Deportable Aliens Only Data Source: EID (Unofficial) as of 1/18/13

	Southwest Border	Northern Border	Coastal Border	Nationwide Total
Apprehensions	79,866	779	808	81,453
OTMs	24,987	376	569	25,932
Marijuana Pounds	610,475	50	479	611,004
Cocaine Pounds	863	1	0	864
Heroin Ounces	1,943	118	3	2,064
Methamphetamine Pounds	1,195	0	1	1,196
Ecstasy Pounds	3	100	0	102
Other Drugs* Pounds	48	24	0	72
Marijuana Seizures	3,844	79	26	3,949
Cocaine Seizures	87	14	12	113
Heroin Seizures	46	15	1	62
Methamphetamine Seizures	156	7	5	168
Ecstasy Seizures	10	2	1	13
Other Drugs* Seizures	251	24	5	280
Conveyances	2,414	19	23	2,456
Firearms	117	20	5	142
Ammunition Rounds	7,133	2,152	94	9,379
Currency Value	\$1,546,667	\$206,000	\$242,927	\$1,995,594

*Other Drugs include all USBP drug seizures excluding Marijuana, Cocaine, Heroin, Methamphetamine, Ecstasy

CBP also uses the Arizona Alliance to Combat Transnational Threats (AZ ACTT), New Mexico/West Texas Alliance to Combat Transnational Threats (NM/WTX ACTT), South Texas

Campaign (STC), Surge Operations, Forward Operating Bases (FOBs), and Traffic Checkpoints to secure the border. These are described below:

a. Arizona Alliance to Combat Transnational Threats (AZ ACTT)

In September 2009, USBP initiated the AZ ACTT as the next stage of border operations along the Arizona border. The mission of the AZ ACTT:

DHS along with international, Federal, state, local and tribal interagency partners will implement intelligence driven operations in the Arizona – Sonora Area of Operation to deny, degrade, disrupt, and dismantle the illegal activities of transnational criminal organizations in order to establish a secure and safe border environment and improve the quality of life of affected communities throughout the state of Arizona.

The AZ ACTT is an enforcement approach that leverages partnerships, capabilities, and resources between DHS Components, federal agencies, state and local actors, and tribal governments. This operation increases the certainty of arrest of those who enter illegally at and between the ports of entry (POEs), in order to reduce smuggling and crimes associated with smuggling in Arizona.

AZ ACTT operations have targeted the Sonora border area to deny criminal organizations from operating along approximately 80 miles of the Arizona border. The enforcement strategy of the AZ ACTT is a five-faceted approach based on collaboration, intelligence coordination, unity of effort, prioritized focus, and sustained efforts.

Since its inception in September of 2009 thru FY 2012, AZ ACTT operations provided the following results as recorded by the AZ ACTT Unified command: the seizure of approximately 2.8 million pounds of marijuana, 1,300 pounds of cocaine, 803 pounds of methamphetamine, and 368 weapons. Additionally, AZ ACTT efforts resulted in approximately 437,000 apprehensions between the POEs.

b. New Mexico/West Texas Alliance to Combat Transnational Threats (NM/WTX ACTT):

In April 2010, the NM/WTX ACTT was established along the entire state of New Mexico and 17 counties in West Texas, to include the Big Bend Sector. The mission of the NM/WTX ACTT:

The New Mexico/West Texas Alliance to Combat Transnational Threats Unified Command will conduct coordinated law enforcement/ intelligence activities and information sharing with partner agencies and the Government of Mexico in order to increase border security and support their efforts to reduce levels of violence.

The six strategic goals identified as priorities to facilitate the success of the NM/WTX ACTT mission are: identify and detain cartel “trigger men” and facilitators, deny safe haven to Transnational Criminal Organizations (TCO) members and their associates, ramp-up crime prevention and deterrence efforts, enable more prosecutions, establish accepted intelligence protocols, and enhance efforts with our strategic partners in the NM/WTX Area of Responsibility (AOR).

This multi-agency collaborative initiative leverages a myriad of law enforcement resources via intelligence driven operations (IDO) in order to deny, disrupt, degrade, and dismantle TCOs operating in the NM/WTX AOR. The NM/WTX ACTT is comprised of 11 different U.S. agencies and has been instrumental in developing and formalizing a mechanism for sharing information with the Government of Mexico (GoM), as it increased coordinated law enforcement/intelligence efforts for a unified response against TCOs. Through established agency liaison groups between the ICE's HSI Assistant Attaché Ciudad Juarez and the El Paso Sector International Liaison Unit, bi-national border security-related information is shared in multiple forums. In addition to information sharing, bi-national operations have increased in participation and frequency. Coordinated bi-national efforts include operations at the POEs, parallel border boundary patrols, bi-national functional exercises and large-scale events, such as the Annual El Paso Sun Bowl game.

NM/WTX ACTT operations such as Operation No Refuge has denied safe haven to TCO members and associates in the U.S. As of September 2012, approximately 1,868 targets of interest have been identified under Operation No Refuge and 80 of the targets have been encountered in the NM/WTX ACTT AOR, fostering safer communities throughout the area.

Since its inception in April 2010 thru September 2012, NM/WTX ACTT efforts have resulted in the seizure of over 2 million pounds of various narcotics, vehicles, 89 firearms, and \$3 million in U.S. currency. Approximately 2,484 arrests for various immigration and criminal violations have occurred as a result of joint operations. AZ ACTT and NM/WTX ACTT operations, investigations, and intelligence sharing efforts will increase throughout the respective AORs and are expected to continue through FY 2013 and FY 2014.

c. South Texas Campaign (STC)

In August 2011, the USBP initiated the planning and development of the STC in the South Texas Corridor (Del Rio, Laredo, and Rio Grande Valley Border Patrol Sectors, and Houston and Laredo Field Offices). The STC seeks to mitigate risk by establishing a secure environment through operational integration of bi-national efforts to deprive TCOs of the ability to exploit the South Texas Corridor. The current focus of STC is on the establishment of joint interagency, integrated targeting teams (JTTs) within the South Texas Corridor. The objective of JTTs is to provide oversight for the STC Unified Command targeting of TCOs. The STC is to ensure that the unified effort in the South Texas Corridor employs targeted and focused enforcement based on risk, a Consequence Delivery System, Operational discipline, coordination and integration of intelligence, interdiction, and investigation.

The intended outcomes of the STC include, (i) Diminishing the capacity of TCOs to use major smuggling routes and commercial conveyances and force a displacement in their smuggling and transportation methods; (ii) Depriving TCOs of resources and forcing them into a more costly/vulnerable continuous state of reorganization; (iii) Diminishing the presence/influence of TCOs throughout the South Texas Corridor; and (iv) Achieving and maintaining the operational initiative.

Efforts continue in developing joint integrated operational planning against prioritized TCOs based on threat and risk. Once planned and approved for execution, operations will focus on those responsible for the smuggling of narcotics, weapons, bulk cash, stolen vehicles and a significant number of aliens and other than Mexicans (OTMs). These targeted organizations are part of ongoing investigations involving multiple agencies. It is the objective of the STC to integrate the intelligence, interdiction, and investigative components to maximize the cumulative law enforcement impact against the target organization.

From March 4, 2012 to August 25, 2012, Operation Genesis sought to degrade TCOs by enhancing awareness through integrated intelligence, aggressively targeting smugglers and associates, disrupting operations, and increasing certainty of arrest, while denying key terrain and infrastructure vital to illegal operations. Operation Genesis is an enforcement initiative designed to aggressively target smugglers by leveraging available assets within the South Texas Corridor. Due to the success of Operation Genesis, Operation Genesis II is currently ongoing in the Rio Grande Valley (RGV) Sector. The STC also provides Intelligence Integration Workshops to coordinate intelligence sharing efforts with local, state, and federal agencies. Through partnership with the Secretaria de Seguridad Publica (SSP) the STC has provided the GoM a total of 26,913 names of Mexican Nationals, for further analysis/investigation.

Due to the work of the STC, within the South Texas Corridor, RGV continues to be the predominant area of activity with 97,762 apprehensions in FY 2012. RGV accounts for more than 59 percent of all the USBP apprehensions in the South Texas Corridor (Laredo Sector (LRT) 44,872 and Del Rio Sector (DRT) 21,720) and has experienced the most significant rate of change nationwide (65 percent increase from FY 2011). This is an average increase of approximately 105 apprehensions per day over the same time period last year. It is important to note as of the end of FY 2012, arrests of OTMs in RGV were up 79 percent from FY 2011.

Despite this increase of apprehensions, the Border Patrol sectors within the South Texas Corridor have recidivist rates that are lower than the southwest border average of 17 percent. Specifically, RGV, LRT and DRT have recidivist rates of 13, 13, and 7 percent respectively. Further examination of STC apprehensions reveals that, of those arrested in FY 2012, 95,919 were first time USBP apprehensions, which represented more than half of the total number of first time USBP apprehensions.

d. Surge Operations

The USBP's strategy for implementing surge operations across the southwest border is based on threats, risks, vulnerabilities, and the resources of partner agencies. Surge operations proactively address intelligence, seasonal migration, and smuggling trends. Unlike ACTT operations, which encompass a large area and are sustained indefinitely, surge operations are short term and address small areas. They involve short-term deployments of additional resources and technology to target areas that require, or may potentially require, a heightened presence based upon risk assessment. These operations increase the probability of preventing terrorists and their weapons from illegally entering the U.S. between the POEs and assists in the reducing of crime in border communities.

e. Forward Operating Bases (FOBs)

FOBs are strategically placed permanent facilities in forward or remote locations used to sustain tactical operations. Forward locations are usually closer in vicinity between the border and stations. The use of FOBs directly supports the USBP's mission of gaining, maintaining, and expanding effective control of the Nation's borders. There are currently eight operational FOBs situated along the border that provide housing to agents on a 24-hour basis. In order to respond to the ever-changing activities and tactics of illegal immigrants and criminal organizations particularly in remote areas, our tactics must shift. Strategically identified FOBs afford a distinct advantage in that they provide a cost effective, secure staging facility that allows agents to be forward deployed in close proximity to the border – thereby improving USBP's capability to rapidly respond to and counter these shifts in illicit cross-border traffic. FOBs are now utilized wherever the USBP has a need to extend its reach by raising effectiveness and efficiency levels as their presence has been successful in lowering response times and disrupting smuggling activity in remote areas.

f. Traffic Checkpoints

As the USBP transitions from a resource-based to a risk-based approach to securing our Nation's borders between the, it continues to utilize multi-tiered enforcement capabilities to increase the certainty of arrest of those who pose a threat to the U.S. This includes the critical use of traffic checkpoints along the major routes of egress from our Nation's borders.

Currently, there are 34 permanent traffic checkpoints strategically located on routes of egress leading away from our Nation's borders. Each checkpoint is operationally integrated with other enforcement efforts to increase the USBP's detection and interdiction capabilities. In traffic checkpoint locations, TCOs must utilize other tactics, such as using secondary staging areas and circumvention routes, which disrupt and degrade their operations. This also gives the USBP additional time and distance to detect, deter, and interdict them.

In FY 2012, USBP checkpoints seized approximately 313,000 pounds of marijuana. Checkpoint operations account for approximately 14 percent of USBP national marijuana seizures.

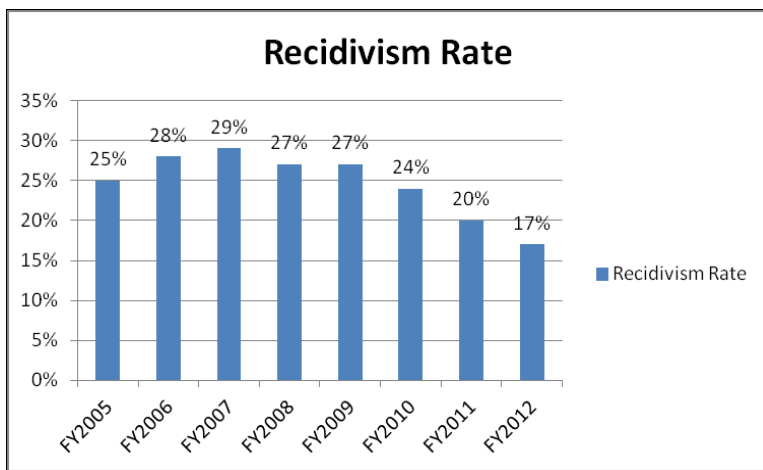

Consequence Delivery System (CDS)

The USBP conducts operations along Southwest, Northern and coastal U.S. borders. Each area has unique circumstances that afford the Border Patrol a range of applicable consequences for use in response to cross-border illegal activity. The Border Patrol has objectively evaluated these unique environs across the border and concluded that border security can be enhanced through a concerted analysis to improve consequence application and effect – using a process called the Consequence Delivery System – in order to further disrupt the smuggling cycle and continue the recent progress that has been made to enhance security along the Nation's borders.

The CDS is an initiative that began conceptually in FY 2010 and was fully implemented across the southwest border Patrol sectors by the end of FY 2012. During FY 2012, CDS was expanded to the Northern and Coastal Border Patrol sectors, as well as to southwest border Office of Field Operations offices, with full implementation expected by the end of FY 2013. CDS implements an aspect of targeted enforcement promoted in the 2012-2016 Border Patrol Strategic Plan. Previously, consequences were applied based on the availability of consequence programs and

the demands of a high volume of illegal aliens. Today, through the application of CDS, consequences are applied through advanced analysis of consequence programs and alien classification to yield the greatest impact. CDS standardizes the decision making process, guiding management and agents through a process designed to uniquely evaluate the circumstances of each apprehension of a subject and apply the best consequence for that individual to break the smuggling cycle and influence the subject against future illegal entry attempts. The seven categories of classifications – First Apprehension; Family Unit; Second/Third Apprehension; Persistent Alien; Suspected Smuggler; Targeted Smuggler; and Criminal Alien – are paired with the most appropriate consequence options and range from administrative voluntary repatriation to criminal prosecution.

Post-apprehension Indicators

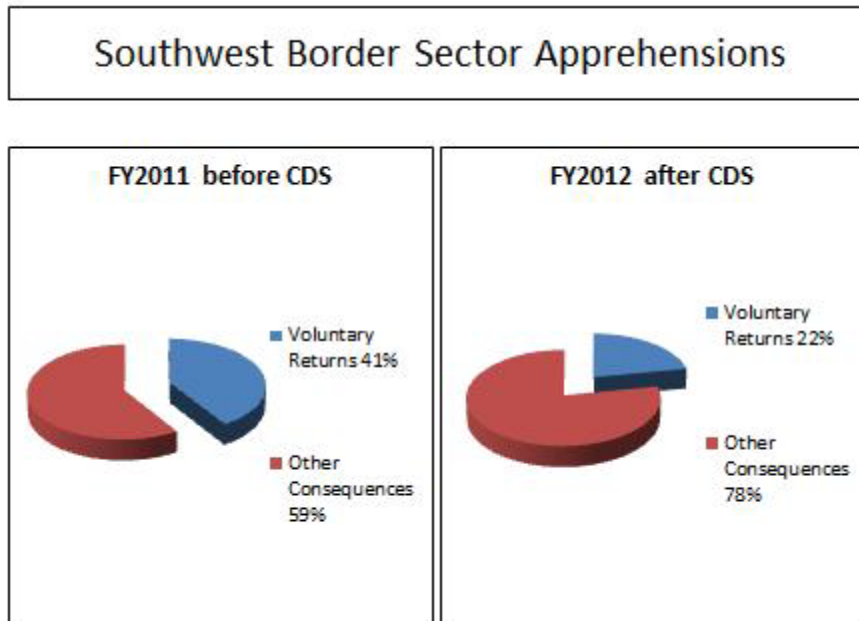

Primary Outcome Indicator – Recidivism Rate and Average Apprehensions per Recidivist.

Using CDS analysis in FY 2012, the Border Patrol increased the percentage of apprehensions that were subject to a more effective and efficient consequence, identified from CDS, from 59 percent in FY 2011, to 78 percent. Subsequently, the overall recidivism reported for the subjects apprehended on the southwest border fell from 20 percent in FY 2011 to 17 percent in FY 2012,

and the average number of apprehensions for recidivists fell from 2.54 in FY 2011 to 2.40 in FY 2012.

Consequence Delivery System (CDS)

Consequence Options:

Operation Against Smugglers Initiative on Safety and Security (OASISS) is a bilateral criminal prosecution agreement between the U.S. and the Government of Mexico (GoM). Since 2005, OASISS allows for Mexican citizens found smuggling aliens in the U.S. to be prosecuted by the GoM.

Streamline is a criminal prosecutions program targeting individuals who illegally enter the U.S. Streamline is a multi-agency effort that relies heavily upon the collaborative efforts of CBP, the U.S. Magistrate, the Federal Judiciary, the U.S. Attorney’s Office, the U.S. Marshals Service, ICE, and the Department of Justice (DOJ) Executive Office of Immigration Review (EOIR).

Quick Court is a joint CBP and DOJ effort. CBP works with EOIR to increase the efficiency of immigration court hearings by placing aliens in removal proceedings in immigration courts close to the border, eliminating the need to acquire detention space to hold an alien while awaiting an appearance before an Immigration Judge. As in other immigration proceedings, an administrative final order of removal issued to the alien generally results in a ten year bar to legal re-entry. Further, when a subject who was previously removed is re-arrested, he or she is amenable to a federal criminal charge of felony re-entry under 8 U.S.C. § 1326.

Alien Transfer Exit Program (ATEP) repatriates aliens through geographic areas different from that of their entry location to disrupt future coordination with smugglers after their arrest

and removal. ATEP is designed to disrupt the smuggling cycle that often reunites removed aliens with their hired smugglers to attempt another illegal entry.

Expedited Removal proceedings are initiated against aliens who are present without admission and encountered by an immigration officer within 100 air miles of the U.S. border, and have not been physically present in the U.S. for the 14-day period immediately before their arrest. Aliens processed for expedited removal procedures are not detained pending a hearing before an immigration judge, but are immediately processed for a formal administrative removal order. If an alien expeditiously removed returns illegally, he or she may be considered for criminal prosecution (Illegal Re-entry after Removal).

Reinstatement of Removal provides the ability to reinstate a previously executed removal order with respect to aliens who illegally reenter the United States. If an alien is found to have reentered the United States after removal, the prior order of removal is reinstated from its original date and is not subject to review. In most cases, it is not necessary to detain aliens processed for reinstatement pending a hearing before an immigration judge. Reinstatement does not preclude criminal prosecution in accordance with local procedures and guidelines.

Voluntary Return is used at the discretion of BPAs and their supervisors to allow an alien to depart voluntarily from the U.S. in lieu of being subject to removal proceedings.

Warrant of Arrest / Notice to Appear is used when BPAs make an arrest and the alien is to be detained in DHS custody pending a hearing before an immigration judge.

International/Community Efforts

a. USBP International Liaison Unit (ILU)

The ILU creates and maintains positive working relationships and fosters alliances with foreign counterparts in order to increase border security. The ILU builds partnerships and enhances border security awareness in support of the National Border Patrol Strategy. The ILU paved the way for programs like the Operation against Smugglers Initiative on Safety and Security (OASISS), which is focused on the prosecution of alien smugglers across the southwest border.

The liaison efforts with Mexican authorities that have occurred and continue to take place along the southwest border have essentially bridged the communication gap between the U.S. and Mexico.

b. Integrated Border Enforcement Teams (IBET)

There are fifteen IBETs in twenty-three locations working in land, air and marine environments between the POEs along the United States and Canadian international border. IBETs are composed of five core members; The Royal Canadian Mounted Police (RCMP), Canada Border Services Agency (CBSA), United States Border Patrol (USBP), U.S. Coast Guard and Immigration and Customs Enforcement (ICE). Other federal, state and local law enforcement agencies are eligible for membership in the IBET if they apply and are granted approval by the five core agencies. These multi-agency intelligence driven teams augment the integrity and security of the border by identifying, investigating and interdicting individuals and organizations

that pose a threat to the security of both nations. Through continuous collaboration and coordination the IBETs are able to synchronize operations between countries to expand the borders. In FY 2012, fifty joint IBET operations were conducted on the northern border.

c. USBP Advisory Positions located within Canada

USBP currently has two agents assigned to the RCMP headquarters in Ottawa and one agent assigned to Toronto. A fourth position in Vancouver is currently under negotiation. The USBP advisory positions located within Canada provide access to the critical governmental, political, and law enforcement locations for our entire shared border. The USBP advisors are a key communication piece for the USBP Strategic Plan and other operational programs, making possible real-time response to incidents, situations, and reporting on challenges confronted along our shared border. These advisors will continue to provide coordination at the local, state, and federal levels with subject matter expertise for these operations.

d. Border Violence Prevention Protocols (BVPP)

The Border Violence Protocols (BVP) created a bi-national response mechanism for incidents of violence along the southwest border. The Border Violence Prevention Protocols (BVPP) complement the response procedures in the existing BVPP, and provide a mechanism to jointly access threats and plan coordinated patrols to prevent violent incidents from occurring. The BVPP address the following seven topics to improve protocols for border security coordination: (i) law enforcement procedures and best practices; (ii) response to incidents of violence; (iii) joint threat assessments; (iv) coordinated patrols; (v) communications; (vi) Border Violence Prevention Group; and (vii) oversight.

e. USBP National Native American Program

The mission of the USBP National Native American Program is to facilitate new partnerships, improve relationships, and increase trust throughout the Native American Indian tribes that have a nexus to the U.S. border. The program champions partnerships between tribal law enforcement, various Native American organizations, and the USBP to support the national strategy. The USBP National Native American Program is operational in 13 of the 20 USBP sectors. The program acts as a conduit between the USBP and tribal, local, state and federal law enforcement agencies, as well as tribal councils located along both the Southwest and Northern borders.

Communication and liaison between some sectors and tribal council officials has led to enhancing the security and safety of the agents who are working in dangerous areas along the border. Through the USBP National Native American Program, information-sharing efforts have allowed the Border Patrol sectors to conduct All-Terrain Vehicle training, search and rescue training, advanced four-wheel-drive training, firearms training, winter survival training and vehicle stops. The USBP National Native American Program is working to standardize policies and procedures and is proactively developing performance measures for the program to evaluate and measure the effectiveness of its initiatives.

f. Borderlands Management Task Forces (BMTF)

These task forces were created to facilitate an intergovernmental forum for cooperative problem-solving on common issues related to the international border. The primary mission is to address

border security, human safety, and natural and cultural resource protection through shared resources, information, communication, problem-solving, standardization, and training. The goals of the BMTF are the following:

- Create a positive, intergovernmental working relationship and foster support among agencies charged with border responsibilities;
- Create mutually beneficial solutions to resource management issues within the border area;
- Provide expertise, experience, and information to address common border issues; and
- Educate our agencies and interested parties about border issues and provide recommendations for the implementation of possible solutions.

An integral part of the BMTF is the participation of the Sector Public Lands Liaison Agents (PLLA). The PLLA works to foster better communication, increase the interagency understanding of respective mission objectives and priorities, and serve as a central point of contact within the Border Patrol to facilitate the successful resolution of environmental issues at the local level. In addition, there exists a Memorandum of Understanding (MOU) between DHS, DOI and USDA. The MOU, entitled “Memorandum of Understanding Among U. S. Department of Homeland Security and the U.S. Department of the Interior and U.S. Department of Agriculture regarding Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders”, is intended to provide consistent goals, principles, and guidance related to border security, such as law enforcement operations; tactical infrastructure installation; utilization of roads; minimization and/or prevention of significant impact on or impairment of natural and cultural resources; implementation of the Wilderness Act, Endangered Species Act, and other related environmental law, regulation, and policy across land management agencies; and provide for coordination and sharing information on threat assessments and other risks, plans for infrastructure and technology improvements on Federal lands, and operational and law enforcement staffing changes.

In FY 2012, a total of 14 sector BMTFs collectively held more than 50 meetings along the border. At these meetings, participating governmental agencies developed discreet strategies to strengthen law enforcement interagency efforts and effectively comply with environmental, cultural resources, and historic preservation laws. In the year ahead, it is anticipated that the number of BMTF meetings will increase by at least 20 percent.

g. Border Community Liaison (BCL) Program

The purpose of this program is to facilitate the national expansion of relationships and interactions between government, law enforcement, and non-government agencies, border community partners, and Border Patrol offices (i.e., sectors and the Border Patrol Academy). The BCL Program provides stakeholders with a designated point of contact at Border Patrol offices and encourages communication between the USBP and its border-community partners.

h. Central America & Mexico

In support of the DHS Strategy for Engagement in Central America, the USBP is providing support and complementing the CBP International Strategy by leveraging the resources of

partner nations through capacity building, advisory support, training, technical assistance, improved information exchange, and shared best practices in order to augment border security efforts in the United States. In its strategy, DHS specifically highlights the key importance of U.S. collaboration with both Mexico and Central America, due to the increase in TCOs, gangs, and drug trafficking organizations, human trafficking and smuggling networks, widespread corruption and the use of the region as a global transit zone for illicit activities.

USBP will continue to support CBP's Office of International Affairs (INA) with partner nations and provide short term advisors from SOG to be detailed to Central America. These advisors have been deployed to the United States Embassies in: Panama, Costa Rica, Honduras, Guatemala, and Belize to conduct border and operational capabilities assessments and to provide the host nations with subject matter expertise in the area of border enforcement operations. Additionally they will coordinate with host nations and other U.S. entities.

i. Panama

As a result of senior level meetings held between the U.S. and the Government of Panama, it was agreed that the U.S. through CBP, would help establish a Regional Border Protection Training Program in Panama. The regional training program will incorporate all aspects of border security in which CBP engages. This includes the land border, both at and between the POEs; air and marine patrol and interdiction; transitory enforcement (i.e. transportation hubs and thoroughfares transiting the country); and intelligence and targeting. This program is designed to enhance Panama's border security capabilities as well as allow for expansion to its regional partner nations.

j. Immigration Advisory Program (IAP)

As part of CBP's layered enforcement strategy, USBP augments OFO's Immigration Advisory Program with personnel. IAP focuses on enhancing the safety of air travel by preventing terrorists and other high-risk travelers from boarding commercial aircraft bound for the United States and reducing the number of improperly documented passengers from traveling to the United States. IAP is already established in the Western Hemisphere as a mechanism to prevent terrorists, criminals or inadmissible aliens from boarding U.S. bound flights, thus preventing entry into the U.S. as well as eliminating the costs associated with removal proceedings, transportation back to country of origin, and the penalties applied to the airline. IAP officers serve in an advisory capacity assisting host nations and the airlines. Border Patrol's participation has resulted in 4,345 target hits. IAP agents provided boarding assistance to 735 U.S. citizens who would have otherwise been denied boarding by the airline. Future plans include additional personnel to be deployed to Central America and Mexico.

k. Integrity Advisory Committee (IAC)

The IAC provides strategic recommendations to combat corruption and promote integrity among all USBP employees. The committee includes a select group of USBP field and headquarters personnel, as well as advisors and subject-matter experts from CBP component offices of Internal Affairs, Chief Counsel, Human Resources Management, and Field Operations.

FY 2014 PROJECTED ACCOMPLISHMENTS:

a. Air and Marine Operations Center (AMOC), Integrated Operations

The USBP has integrated into operations at the AMOC in Riverside, CA. In FY 2012, six Not to Exceed (NTE) three years liaison positions were filled. These permanently assigned personnel in Riverside support the Commissioner's intent of a comprehensive, whole-of-government approach to combating transnational threats across our nation's borders.

These positions enhance our ability to provide air and marine domain awareness to field commanders by augmenting AMOC's current capabilities. This relationship allows for enhanced integrated steps to be taken towards dismantling targets of interest in the border region and provide invaluable knowledge of air and marine surveillance systems.

AMOC is currently working towards mitigating the maritime threat along the California coastline by infusing an array of coastal sensor feeds into the AMOC that will provide federal, state, and local law enforcement entities with real time surface targets of interest.

b. Border Security Operations Center (BSOC), Integrated Operations

The BSOC is located in Austin, TX and serves as the focal point for Joint Operations and Intelligence Centers (JOICs) located along the Texas/Mexico border. The BSOC is tasked with the timely dissemination of intelligence to law enforcement and governmental partners, including the in-depth weekly Border Operations Sector Assessment of the Texas/Mexico border. CBP currently staffs one USBP Assistant Chief and one Office of Intelligence and Investigative Liaison (OIIL) Analyst. Responsibilities include collecting border security information and analyzing intelligence, while collaborating with state, local, and federal law enforcement partners to conduct intelligence-driven border enforcement operations and information exchange between agencies.

The USBP's presence at the BSOC is critical in CBP's comprehensive support and application of mission integration to include managing the drawbridge sensor enforcement system. USBP's presence has and will continue to enhance the overall whole-of-government approach while combatting TCOs operating within the land border of Texas as well as the maritime arena of the Gulf of Mexico. CBP/USBP will continue to integrate the process where organizations strive to operate in a cohesive, coordinated fashion to achieve mission goals for homeland security.

c. National Air Security Operations Centers, Integrated Operations (NASOC)

USBP has established permanent liaison positions within CBP's NASOC in Sierra Vista, AZ, Grand Forks, ND, and Corpus Christi, TX. These positions have proven vital to gaining greater operational efficiencies, capabilities and enhanced border security while providing subject matter expertise to NASOC pilots and crews. USBP liaison personnel working with local NASOC leadership have developed and implemented several processes and standardized procedures while improving integration and Unmanned Aircraft Systems (UAS) utilization for CBP's field commanders and external stakeholders.

Within the Sierra Vista NASOC, USBP has integrated and trained nine agents as Sensor Operators. These agents augment a staff of seven permanent Office of Air and Marines

(OAM)/UAS personnel. Without this augmentation, NASOC Sierra Vista would be unable to maintain its current level of support to any NASOC or CBP operation. Three of these agents are currently trained in Vehicle and Dismount Exploitation Radar (VaDER) operations, doubling VaDER's operational capacity. Agents will be trained in the operation of the SeaVue Radar system due to the pending East Pacific mission support request. It is anticipated that OAM will not be enhancing staffing levels at the NASOC's.

The liaison mission for FY 2014 is to further integrate and incorporate UAS operational capabilities into field commander's intelligence assessments and operations. Enhancing field commander's operational and intelligence outlook through robust employment of UAS capabilities will result in shifting from singular, tactical events to campaign level engagements and risk mitigation providing greater efficiencies of fixed and limited resources.

d. National Marine Training Center (NMTC)

In efforts to achieve a fully trained, standardized, flexible and immediately deployable workforce to address the CBP Maritime Mission, OAM and USBP consolidated training personnel at the National Marine Training Center (NMTC) in St. Augustine, FL. The center became fully operational in December 2011 and in addition to ten OAM full time employees (FTE), NMTC currently employs eight USBP FTE personnel. USBP staff at NMTC conduct yearly evaluations/certifications and initial evaluations/certifications for all USBP Marine Standardization Evaluators, Marine Instructors and Vessel Commanders in accordance with OAM Marine Operations Handbook and Marine Standardization Manual.

In FY 2012 USBP staff at NMTC conducted 18 classes to train 127 BPAs-Marine (BPA-Ms) during a span of 8,280 hours of instruction. Additionally, NMTC staff provided oversight for five Airboat Vessel Commander Initial classes to train 21 BPA-Ms during a span of 1,680 hours of instruction. USBP staff project training 145 BPA-Ms in FY 2013 and 145 BPA-Ms in FY 2014.

e. North American Aerospace Defense Command/U.S. Northern Command (NORAD/USNORTHCOM)

Currently, USBP has one liaison agent assigned to NORAD/USNORTHCOM. The Liaison serves as a subject matter expert, to the Command on USBP's operational objectives and strategic goals. In the Liaisons capacity, he/she facilitates the support provided to OBP by Department of Defense (DOD) Title 10 and Title 32 forces. In FY 2013, there are four Point of Integration (POI) missions planned along USBP's area of responsibility. These POI missions have been strategically prioritized and coordinated between the Border Patrol Special Coordination Center, the different unified corridor commands and Joint Task Force North. Furthermore, during the Spring/Summer of FY 2013 there will be "Senior Staff Talks" between CBP and DOD on how to better synchronize current operational and training efforts with the GoM.

Conclusion

In FY 2014, the USBP will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. The USBP is committed to continuing the southbound land border enforcement efforts to combat the smuggling of firearms and currency to Mexico. A

major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. The USBP will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

Descriptions of Selected Adjustments to Base:

Workforce Maturation: This PPA contains a \$270.565 million increase that is part of the overall \$423.8 million “Pay Adjustment for Workforce Maturation”. The majority of this additional funding is because of changes in the requirements associated with BPAs and CBPOs. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2012, compensation has grown to approximately 70 percent of the total CBP budget and the projected growth in salaries and benefits will not be able to be absorbed within CBP’s remaining funding. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the Border Patrol Agent and CBP Officer floors. However further reductions to non-pay and mission support pay funding is becoming increasingly difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

Realignment of Wage Grade Facilities Positions: The Office of Border Patrol, which is funded by the Border Security and Control Between the Ports of Entry PPA, is realigning 220 FTEs and the associated \$18.886 million in salaries and other expenses from the USBP facilities maintenance staff to the Office of Administration, funded by the Construction and Facilities Management Appropriation, Program Oversight and Management PPA. This transfer is for movement of highly skilled specialists to support the centralization of responsibilities previously dispersed throughout CBP, such as utilities and rent, tower leasing, and regional maintenance of facilities. The transfer to the Construction and Facilities Management Program will enable USBP to focus on its core border security mission and has the potential to produce savings through consolidation of maintenance resources and the reduction of duplicative facilities and tactical infrastructure maintenance activity.

PROCUREMENT ACTIVITIES:

FY 2012 Activity Funding (\$ in thousands)	FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Request (\$ in thousands)
Mobile Asset Program (MAP)	<p>The CBP Mobile Assets Program Management Office (MAPMO) coordinates the acquisition and disposal of the vehicles used by the CBP Offices to carry out their operations in support of the DHS mission. These vehicles are acquired, configured and deployed to support detection, interdiction, enforcement and support activities at and between the ports of entry throughout the United States of America and U.S. territories. The CBP Fleet facilitates the various activities necessary to achieve the primary mission including; training, transportation, technology installations, and other support activities. Funding for the Mobile Asset Program is funded out HQ01 at the Ports of Entry, HQ01 Between the Ports of Entry, and Border Security and Control. Total funding for this procurement activity is \$73.206 million in FY 2012, \$91.082 million in FY 2013, and \$53.445 million in FY 2014.</p>

Total Change 2012 to 2014	(171)	(172)	(24,082)

CBP requests 133 positions, 132 FTE, and \$55.928 million in FY2014 for the Training Between the Ports PPA

- An increase of \$8.6 million for non-recur 2012 Reprogramming
- An increase of \$370 thousand is for Pay Increase
- A decrease of -\$17.373 million is for Training and Development
- A decrease of -\$15.679 million is for Managed Hiring, Awards & Support Services

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development (OTD) is responsible for The Training Between the Ports of Entry PPA, which supports basic, advanced and supervisory/management/leadership training for new and incumbent Border Patrol agents. The training provided establishes and sustains the proficiency of those directly responsible for the front line mission of CBP. Funding levels requested for this training in FY 2014 will enable CBP to achieve targeted FY 2014 Border Patrol agent staffing levels and maintain mission critical skills and certifications of incumbent Border Patrol agents. Below are descriptions of the types of training programs funded under this PPA.

Between the Ports Training Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
Basic Training	Basic Training for Border Patrol agents is conducted at the Border Patrol Academy located at the Federal Law Enforcement Training Center (FLETC) facility in Artesia, NM. Successful completion of basic training is a pre-requisite for employment as a Border Patrol agent and ensures proficiency in the foundational law enforcement knowledge and skills required by the CBP mission.	1,358	1,200	1,200
Firearms and Use of Force Instructor Training	Per CBP policy armed officers and agents are required to undergo periodic qualifications of firearms proficiency and annual use of force training/certification. Failure to successfully complete these periodic qualifications results in the officer/agent losing his/her certification to carry a firearm and/or use intermediate force devices. These periodic qualifications are administered by certified Firearms Instructors and Use of Force Instructors at field locations. These instructors are required to attend training for initial certification, and recertification training every five years. New Mandatory training in FY2013 for FN303, Less Lethal Speciality Impact Training, Pepperball & ECD recertification.	1,382	25,397	5,000
Driver Training	This training provides Border Patrol agents the skills required to effectively and safely perform their duties in High Center of Gravity Vehicles (HCGVs) and to safely and properly utilize Offensive Driving Techniques. Completion of this program is required by policy to engage in a pursuit in a HCGV.	1,820	1,600	1,600
Health & Safety	This training provides BP agents training in dealing with hazardous materials, operating in confined spaces and operating dangerous equipment – scenarios they deal with on a daily basis. It also includes funding for peer support/chaplaincy training to support staff dealing with stressful and traumatic events, such as loss of a colleague on the job.	201	205	205
Emergency Preparedness & Response	This training is required for CBP to maintain sufficient skill levels in incident management and response procedures. This training provides capabilities not only to maintain security of the border, but also to provide support to areas struck by natural disasters. CBP supports responses to these types of events.	300	300	300

Between the Ports Training Programs	Descriptions	Training Seats Filled for FY 2012	Training Seats Planned for FY 2013	Training Seats Projected for FY 2014
International Pre-Deployment	This training is mandatory for any CBP employee deploying overseas and is necessary for CBP to continue filling overseas positions supporting our many international programs which are designed to enhance national security.	25	30	30
Canine	Training for Border Patrol agent canine teams operating along the U.S. border between ports of entry and at Border Patrol Checkpoints. This includes canine teams trained in the disciplines of Basic Detection, Concealed Human/Narcotics Detection, Search and Rescue, Human Remains Detection, and Special Response.	317	351	351
Special Operations Groups	Training for the Office of Field Operations Special Response Teams and Border Patrol's BORTAC and BORSTAR teams is funded under this PPA. This includes training new/replacement team members, as well as training to maintain the skills/certifications of existing team members.	889	1781	1781
Riverine Training	This training is required for Border Patrol agents to serve as a vessel commander in the riverine environment. Border enforcement operations are frequently conducted in such an environment and skilled use of Border Patrol vessels is required by certified operators.	82	140	140
Anti-Terrorism/Counter Terrorism	This training provides Border Patrol agents advanced interviewing skills to identify potential threats (terrorists, drugs, currency, and weapons).	711	700	700
Instructor Training	This training is required for CBP to maintain a sufficient cadre of certified, quality instructors to deliver basic and advanced training to new and incumbent Border Patrol agents.	250	567	567
Supervisor/Leadership Training	Training for first- and second-line Border Patrol agent supervisors is funded under this PPA. This training provides these supervisors the technical and supervisory skills required to effectively lead agents under their command.	821	600	600

- An increase of \$2.278 million is for Pay Increase
- A decrease of -\$2.721 million is for Managed Hiring, Awards & Support Services
- A decrease of -\$689 thousand is for Management Efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Air and Marine (OAM) supports CBP’s core mission of securing the border and preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the U.S. It includes the personnel that perform the mission as well as the air platforms, marine assets, technology, supporting infrastructure, and equipment that they use.

OAM organizes, trains, and equips CBP’s nation-wide air and marine assets, which are deployed to 114 branches and smaller units located at strategic points along the land and maritime borders. The branches and units house an integrated and coordinated air and marine personnel force, including Air and Marine Interdiction agents who patrol the skies, oceans, lakes, and rivers and conduct covert and overt operations to prevent the entry of weapons of terror, interdict illegal narcotics, prevent the illegal entry of undocumented aliens, and to support interior investigations. The agents deploy to natural disaster areas to assist in recovery operations and to fly low-level damage surveillance missions over varied terrain. They also provide airspace security over national events including the Presidential Inauguration, political conventions, and major public events such as the Super Bowl.

The table below summarizes OAM on-board staffing by major occupation and location:

OAM On-Board Staffing by Major Occupation and Location as of Pay Period Ending June 30, 2012

- An increase of \$261.523 million is for Transfer of US-VISIT to CBP
- A decrease of -\$7.99 million is for US-VISIT Mission Support Staff

CURRENT SERVICES PROGRAM DESCRIPTION:

The United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program supports the DHS missions of border security and immigration law enforcement and administration. In providing DHS with biometric identification services and managing the overstay analysis data repository, US-VISIT implements key statutory mandates, Presidential Directives, and elements of the DHS Strategic Plan.

In addition to supporting DHS agencies, US-VISIT provides services to the Department of Defense (DoD), Department of Justice (DOJ), Department of State (DOS), Office of Personnel Management (OPM), state, local, tribal, law enforcement, the Intelligence Community, and international partners.

In FY 2014, CBP will assume management of core US-VISIT operations and oversight of the Automated Biometric Identification System (IDENT), the Arrival and Departure Information System (ADIS), and the US-VISIT biometric watchlist and management services. This transition will better align the existing functions of US-VISIT with DHS operational components and realize long term efficiencies and cost savings.

The US-VISIT program and organizational structure was developed in 2003 with a specific mission – implementing a comprehensive entry/exit program. However, over time, as the

biometric entry portion was complete, DHS and the administration recognized that DHS is no longer best served by continuing to co-locate the functions performed by US-VISIT in a single office due to budget constraints, the completion of mission goals, and the transition of the program from program development to operational support.

DHS will continue to provide mission-critical US-VISIT services during and after the transition. US-VISIT functions naturally align with the missions of CBP and ICE, and both agencies have existing capabilities that can be leveraged to support the current US-VISIT mission functions while realizing efficiencies. Accordingly, the transition will provide better services for DHS at less cost.

Further, CBP is by far US-VISIT's largest customer; the program's services help officers determine admissibility of foreign nationals arriving at all U.S. ports of entry (POEs) and process aliens entering the United States illegally between POEs. Currently, CBP operates numerous screening and targeting systems, supporting more than 70,000 users from more than 20 Federal agencies responsible for a wide range of programs that rely on US-VISIT information and systems to determine benefits, process travelers, inform investigations, support case management, and enhance intelligence capabilities. US-VISIT information technology (IT) systems enhance CBP resources by adding biometric identification and screening capabilities that are used across DHS. For instance, US-VISIT biometric and biographic systems support the U.S. Immigration and Customs Enforcement (ICE) Secure Communities program which assists State and local law enforcement in identifying criminal aliens for detention and removal. US-VISIT supports the United States Coast Guard in interdicting illegal migrants at-sea and the U.S. Citizenship and Immigration Services (USCIS) in adjudicating immigration benefits, which will all continue following the transition to CBP.

US-VISIT's customer base is dynamic with continually evolving demands. For example, US-VISIT is supporting the implementation of numerous Preventing and Combating Serious Crime agreements that call for the sharing of biometric and biographic information between the U.S. Government and participants in the Visa Waiver Program. US-VISIT works closely with CBP to support aspects of the Beyond the Borders initiative with Canada. In addition, US-VISIT vets Federal employees and contractors for OPM and works with the DHS Chief Security Officer to establish new services to fulfill Homeland Security Presidential Directive-12, *Policy for a Common Identification Standard for Federal Employees and Contractors*, and furthers the security of DHS workforce and facilities.

As a PPA, US-VISIT consists of four line items: Salaries and Expenses (S&E), Systems Engineering, Systems Operations and Maintenance (O&M), and Identity and Screening Services (ISS).

Salaries and Expenses

S&E provides funding for US-VISIT Federal staff for mission support, systems O&M, identity screening, fingerprint examinations, and watchlist management. S&E contains supportive services including the Working Capital Fund, which contains rent expenses, acquisition and procurement support, financial management operations, human capital services, asset management, and logistical capabilities. US-VISIT federal staff performs program oversight and fiduciary responsibilities such as compliance with the Government Performance and Results Act, financial projections and reconciliations, inventory control, records management, and privacy impact assessments. In FY 2014, US-VISIT Federal staff will perform recurring quality assurance checks on acquisition and procurement documentation and inter-branch communications to ensure traceability and accountability of Government assets. The transition into CBP and ICE will allow this line item to be reduced over time as duplicative administrative functions now performed by both CBP and US-VISIT are eliminated.

Systems Engineering

Systems Engineering provides effective and efficient information technology engineering operations across the systems life cycle, covering systems acquisition, development, deployment, and maintenance. Systems Engineering provides specialized engineering and process skills in capacity planning, system availability, the service-level management process, performance and service quality analysis, system and workload modeling and simulation, and statistical analysis. In FY 2014, Systems Engineering will monitor system capacity and end-to-end performance to avoid or mitigate system failures.

Systems Operations and Maintenance

Systems O&M includes application support for adaptive, preventive, and perfective maintenance, release and configuration management, architecture support, interface support, configuration management, security certifications and accreditations, software licenses, and appropriate technology refreshes. Systems O&M maintains IT architecture and platforms for user and program interfaces, data center operations support and services, network and data communications integration and support, and IT support services.

In FY14, in addition to operations and maintenance support of ADIS and IDENT, CBP Office of Information Technology will provide technology direction and oversight ensuring the US-VISIT systems meet all CBP standards. The integration of US-VISIT systems into OIT will also help to leverage data center space/services and other technical infrastructure and processes to ensure the most efficient operation.

In FY 2014, IDENT is currently projected to contain the fingerprints of approximately 175 million individuals who travel to the United States, seek immigration benefits, or have violated U.S. immigration laws. Each time fingerprints are scanned, the reason for the encounter—such as entry to the United States at an air, sea, or land POE or an application for a visa or immigration benefits—is recorded in IDENT. For example, when a foreign traveler provides fingerprints to a CBP officer at a POE, US-VISIT returns identity verification and watchlist results to the officer

within 10 seconds. Identity verifications or matches against a watchlist assist decision makers in determining admissibility, assist in granting a visa or eligibility for immigration benefits. Using an automated biometric system enables rapid identification of known or suspected terrorists, criminal aliens, and repeat immigration violators, even if an individual tries to conceal his or her true identity by using an alias or fraudulent travel document. As the example shows, the most significant mission benefits provided by US-VISIT fall to CBP, reinforcing the need to transition the program.

As biometric identity services continue to grow, IDENT faces increasing service demands by existing customers as well as expanding performance requirements. The following table illustrates IDENT projected growth until FY 2018:

Projected Growth for IDENT

(in millions)	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013 (est.)	FY 2014 (est.)	FY 2015 (est.)	FY 2016 (est.)	FY 2017 (est.)	FY 2018 (est.)
Annual Transaction Volumes	47	51	60	69	74	81	87	94	100	107	113
Gallery Size (records)	95	106	120	132	146	161	175	189	203	216	230

ADIS is integral to efforts to identify lawfully admitted nonimmigrant aliens who remain in the United States beyond the period authorized by DHS. ADIS records the biographic information of air and sea travelers arriving and departing at all POEs across the United States and maintains interconnectivity with biographic systems at CBP, ICE, and USCIS. In addition, ADIS provides records to ICE for analysts to investigate overstay leads and creates lookouts in IDENT to assist CBPOs in detecting potential former overstays who seek re-entry into the country. ADIS also provides biographic information to support the Intelligence Community.

The ADIS system is comprised of three transactions: person identity, events, and observations. Person identity is the unique identifier that groups ADIS event-based biographic immigration data with a biometric identifier from the IDENT fingerprint identification number to form a person-centric identity for an overstay indicator status. Events are arrivals, departures, and alterations in immigration status based on data feeds from the USCIS Computer Linked Application Information Management System 3 (CLAIMS3) and ICE Student and Exchange Visitor Information System (SEVIS) databases. Observations are a series of messages that comprise an ADIS event based on the specific event type, which is determined and documented by interface control agreements. The following table illustrates ADIS projected growth through FY 2018:

Projected Growth for ADIS

(in millions)	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013 (est.)	FY 2014 (est.)	FY 2015 (est.)	FY 2016 (est.)	FY 2017 (est.)	FY 2018 (est.)
Person Identity	124	145	170	255	271	286	302	317	333	349	364
Events	668	871	1,115	1,656	1,950	2,261	2,568	2,879	3,183	3,488	3,793
Observations	1,266	1,586	2,030	2,990	3,542	4,062	4,603	5,133	5,656	6,202	6,727

Identity and Screening Services

US-VISIT is the single DHS source for providing biometric identity management and screening services support. US-VISIT meets mission requirements by: positively confirming biometric identity through IDENT, supplemented with fingerprint analyses conducted by examiners; coordinating identity analysis and operational activities to improve the accuracy and usefulness of US-VISIT-maintained identities; and, providing technical assistance to foreign government authorities engaged in developing biometric capabilities to secure and manage border and immigration management programs.

US-VISIT provides biometric identity-matching services including manual fingerprint verifications. US-VISIT also manages and screens watchlist records that include known and suspected terrorists, persons of interest, and immigration violators. Moreover, manual fingerprint verifications are necessary to analyze poor-quality fingerprints and to ensure that derogatory data is not erroneously associated with an individual. Together, these capabilities strengthen national security, immigration services, and enforcement needs of users at the Federal, state, local, and tribal government levels as well as international partners.

US-VISIT supports existing end users at agreed service levels with analytical capabilities that have substantially grown over the last few years. US-VISIT ensures legitimate travel is not impeded and officer safety is not adversely impacted by providing fingerprint verifications on urgent requests in less than 10 minutes and non-urgent verifications within 24 hours, including enrollment and verification of terrorism-related prints in two hours or less.

Biometrics are unique physical characteristics, such as fingerprints, that can be used for automated recognition. They are reliable, convenient, and virtually impossible to forge. US-VISIT performs latent fingerprint comparisons and manual fingerprint verifications, which first go through an automated matching process followed by a manual verification process to ensure a fingerprint match has been properly identified. Latent prints are full or partial fingerprints left behind at crime scenes or by terrorists or other persons of interest. US-VISIT fingerprint examiners assist law enforcement efforts to solve crimes, support terrorist investigations, and identify unknown deceased individuals.

The table below illustrates the US-VISIT biometric workload for fingerprint comparisons and manual verifications since FY 2008:

FY 2008 – FY 2012 Biometric Workload Statistics

Activity	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
Latent Fingerprint Comparisons	2,502,934	4,616,604	5,169,509	4,194,714	4,483,604
Manual Fingerprint Verifications	631,574	643,091	637,366	599,837	625,636
Field-Submitted IDENT Lookout	28,694	22,281	6,327	8,163	3,576
Urgent Fingerprint Verifications	230,354	180,123	185,866	183,007	191,852
National Security Entry-Exit Registration Enrollments ¹	2,957	4,498	2,642	1,502	0
Identified Unknown Individuals	339	397	242	173	132

¹ The National Security Entry-Exit Registration Enrollments program was terminated in FY 2011.

Latent print comparisons represent the number of latent print comparisons completed by US-VISIT Biometric Support Center (BSC) latent print examiners against known prints. *Manual fingerprint verifications* are the number of fingerprint comparisons completed by BSC fingerprint examiners that supplement the automated matching capabilities of IDENT. *Field-submitted IDENT lookouts* are the number of hardcopy fingerprint cards received by the BSC and enrolled in IDENT. This activity occurs when automated watchlist capabilities are not available to the field. *Urgent fingerprint verifications* are the number of fingerprint comparisons completed by BSC fingerprint examiners to supplement IDENT's automated matching capabilities. These urgent verifications are completed, on average, in 10 minutes or less and are a subset of the manual fingerprint verification category. *The National Security Entry-Exit Registration program* was discontinued in FY 2011. *Identified unknown individuals* are the number of unknown individuals, typically deceased, whose prints are submitted to the BSC, searched in IDENT, and then identified by the BSC.

The following table illustrates the US-VISIT watchlist analysis since FY 2008:

FY 2008 – FY 2012 Watchlist Management and Identity Analysis

Watchlist Statistics	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
Watchlist Encounters Received	42,035	120,600	266,848	223,927	247,527
Watchlist Matches Adjudicated	27,555	23,586	143,737	285,214	266,569
Watchlist Demotions	24,274	50,954	60,296	75,940	122,076

Watchlist encounters received are watchlist matches at POEs sent to the US-VISIT watchlist for research and adjudication to verify admissibility. *Watchlist matches adjudicated* are watchlist records that have been closed, including records remaining on the watchlist and demotions.

Watchlist demotions are subject records deemed admissible and subsequently demoted from the watchlist. Demoted records do not show up as ‘alerts’ at POEs.

In FY 2014, ISS will continue to service customer requirements. For instance, US-VISIT fingerprint examiners will vet latent prints received from other agencies against known prints in IDENT. Examiners will also facilitate identification of victims of accidents, crimes, and natural disasters. US-VISIT identity analysts will provide value-added biometric identity management services to support analytical, investigative, and operational needs. This includes reviewing biometric watchlist encounters and adjudicating the promotion or demotion of persons to and from the watchlist on the basis of the most current information associated with individuals. Adjudications will ensure watchlist information continues to be accurate, up-to-date, and actionable. US-VISIT will also provide research and contextual data to law enforcement, intelligence agencies, external agencies, and foreign partners.

US-VISIT will continue to lead biometric standards development efforts to improve data sharing and interoperability between DHS, DoD, DOJ, DOS, and with foreign partners. US-VISIT will also continue to increase the effectiveness and accountability of biometric technical expertise across domestic agencies and with international partners through Web-based technologies.

IV. Program Justification Changes

Current Services Level							-	-	47,275
Program Increase							-	-	31,118
Total Request	-	-	71,513	-	-	41,653	-	-	78,393

Description of Item

Automated Targeting System (ATS) is a web-based enforcement and decision support tool that is the cornerstone for all of CBP's targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subject to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

Justification

The requested increase of \$31.1 million addresses resource requirements that will support the maintenance of, enhancements and improvements to the ATS, which supports the overall operations and maintenance (O&M) of the six modules that comprise ATS.

The performance and operation of ATS is critical to the successful performance of CBP missions. This request will maintain current service levels that were achieved based on a

reprogramming in FY2012 which is proposed to occur in FY2013. This funding will help ensure sustained operations and performance of ATS and its sub-systems.

The nature of the targeting support that ATS provides requires a system that responds to advances in targeting techniques and methodologies, one able to incorporate new government data sources to improve targeting capability, and capable of continued improvement to process the electronic data related to the ever-increasing number of people and goods entering the United States.

ATS requires resources to expand targeting coverage to more completely analyze the volume of passengers and cargo across all modes of transportation and to make improvements to its targeting capabilities, coordinate intelligence, support architectural improvements to the service delivered to CBP officers in the field, and to move towards true 24/7 system availability.

The requested increase will fund the following:

- \$2.9 million – Time-sensitive technical requirements, including daily rules updates and ad-hoc data requests;
- \$3.0 million – Continued technical support for the maintenance of the Targeting Framework;
- \$4.0 million – Advanced targeting capabilities to include Entity Resolution, Predictive Modeling and Visualization, and Intelligence Driven Targeting and Machine Learning;
- \$6.0 million – ATS hardware and software upgrades including high availability appliances, infrastructure and circuits technology refresh, data center infrastructure refresh;
- \$4.0 million – Cargo targeting methodology refresh including capture of findings information and support to outbound targeting;
- \$4.0 million – Failover/Disaster recovery of the ATS modules; and
- \$7.2 million – Other critical costs associated with CBP Targeting Enterprise.

Impact on Performance

Funding this program increase will help prevent lengthy system outages and ensure the ability to react to real time terrorist threats, as well as front line operational decision making being based on accurate/complete intelligence and information.

This funding will allow ATS to:

- Provide daily Rule Updates and Weekly Rule Releases in response to emerging terror threats;
- Complete Targeting System Upgrades to support High Availability Appliances, Infrastructure Upgrades, Data Center Costs in support of the Data Center build out, and to continue to modernize and improve cargo targeting capabilities. This is essential to realize improvements to system resiliency and mitigate increased risks of system outages;
- Provide timely support to Rapid Response Ad-Hoc Data Requests - staff receives several of these requests a week, often with very short turn-around requested, from CBP and

other agencies (Federal Bureau of Investigation, Transportation Security Administration, etc.) ;

- Continue support for the Automated Commercial Environment (ACE) Screening and Targeting Modules and quarterly releases of the S2 / Targeting Framework, including the Intelligence Operations Framework System and S3 / Advanced Targeting;
- Provide Targeting Methodology Improvement Support to expand the capture of inspection results to complete the targeting feedback loop. This provides the feedback loop from the capture of examination findings which will allow CBP management to evaluate the effectiveness of inspection and targeting techniques employed at ports of entry as well as specific inspection technologies, including Non-Intrusive Inspection technologies; and
- Complete Full Failover Disaster Recovery –continue efforts to migrate targeting applications to the DHS data center and realize full fail-over disaster recovery capabilities for cargo targeting applications. This provides CBP the capability to restore full system functionality and minimize disruption of service to personnel using it in the field in the case of a disaster.

This funding will enable CBP to avoid lengthy system outages, react to real time terrorist threats, and improve front line operational decision making being based on timely and up-to-date intelligence and information.

This enhancement supports CBP's Goal #2, Ensure the efficient flow of legitimate trade and travel across U.S. borders, Objective 2.2, Fully employ the use of risk management and targeting to detect and deter trade noncompliance and apply consistent enforcement actions.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: CBP Mobile Program
PPA: Inspections Trade and Travel Facilitation
Program Increase: Positions 0, FTE 0, Dollars \$10,800

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	2,774,503
Program Increase							-	-	10,800
Total Request	-	-	2,518,235	-	-	2,499,439	-	-	2,785,303

Description of Item

CBP requests an increase of \$10.8 million for 1,500 additional mobile devices which include Enforcement Link Mobile (ELMO), handheld license plate/ document readers (MC75A) and Secure Electronic Enrollment Kits (SEEK) devices to enhance U.S. border operations in the air, land, and sea environments. In addition to the mobile devices, the request also includes costs for services, wireless network installation, telephone and data charges, and travel. This enhancement will allow CBP to continue realizing the successes and efficiencies achieved at the Ports Of Entry and Border Patrol checkpoints. CBP has currently deployed over 300 ELMO devices, over 100 MC75A devices, and four SEEKS. CBP intends to continue deploying mobile devices to leverage existing operations, enable processing on the go, and better enable targeting and processing in real time. The Agency ultimately desires to issue a mobile device to each officer, agricultural specialist, and agent deployed to an air, land, or sea operational environment.

Justification

The benefits of the ELMO, MC75A, and SEEK are widespread (multiple modes and multiple missions) and wide ranging (enhanced enforcement, providing services in new areas, improving operations, improving data, and data timeliness).

ELMO devices enable officers to enter inspection results in real time and remove “holds” for arriving cargo in the Automated Targeting System (ATS) at the point of inspection. This eliminates return trips to the office and reentry into ATS. At seaports, ELMO helps automate the paper-based vetting process of passengers and crew on board. For large ships the savings can be several hours for multiple officers. The onboard processing saves approximately 15 minutes per

arrival. For the Immigration Advisory Program (IAP), ELMO devices enable ATS data access screening and inspection results entry and transmission in real time. For passengers at the land border, ELMO enables law enforcement queries in real time (outbound travelers and inbound bus passengers) and variable location processing.

The MC75A provides a portable solution for CBP officers to query vehicles and persons entering and departing the U.S. For Outbound solutions, the MC75A supports outbound enforcement efforts that are directed at targeting and interdicting illegal exportations. In the pedestrian environment, the MC75A supports pedestrian enforcement efforts that are directed at targeting and interdicting terrorists, port runners, and drugs.

SEEK II is a comprehensive, multimodal identification and enrollment platform. It enables Border Patrol Agents to collect multiple biometric modalities (slap and rolled finger prints, iris, and facial images). The Mission Oriented Biometric Software (MOBS) provides for biometric processing and matching (fingerprints and iris).

Impact on Performance

ELMO, MC75A, and SEEK devices are primarily used to query people including support for biometric identity checks in multiple environments including pedestrian, outbound, and cargo inspection operations. Together, the use of these mobile devices has directly led to over 1,500 successful CBP enforcement actions by the Office of Field Operations, the Office of Border Patrol, and the Office of Air and Marine including identification of subjects of National Crime Information Center warrants, and the interdiction of undocumented aliens, narcotics interdictions, unreported currency, and weapons violations. The proposed deployment of additional devices should extend these observed enforcement benefits. These devices enhance enforcement efforts; transform CBP business practices; and provide notable improvements and efficiencies to CBP operations including:

ELMO Improvements and Efficiencies:

- Since its deployment, ELMO has contributed to over 1,000 successful CBP enforcement actions;
- A decrease in IAP telephone calls to the National Targeting Center;
- Improvements in cargo inspection process and reductions in CBP cargo-cycle time; and
- Automation of cruise ship passenger and crew processing.

MC75A Improvement and Efficiencies:

- The initial MC75A deployment (110 devices) has resulted in over 200 seizures and successful enforcement actions in one year;
- Improvements in automated license plate reads and document queries; and
- “Swing” capacity for inbound processing during high volume traffic.

SEEK Improvement and Efficiencies:

- The initial SEEK pilot deployment (four devices) has resulted in identification of numerous immigration violations which resulted in successful enforcement actions; and

- Enables matching against on-board watch list of up to 250,000 persons or remotely to other government databases via transmission manager application.

In 2010, CBP conducted over 6.1 million secondary truck inspections. The use of mobile technology (automatically releasing holds at the point of inspection, eliminating return trips, and reentering in to ATS) conservatively resulted in a five minute reduction in inspection time. This improvement reduced the total officer hours required for secondary inspection by 508,333 in a single year – a quantified benefit of \$45.75 million. Further, the trucking and shipping industries save on operating costs (\$42.7 million annually). Combined, \$10.8 million spent on additional ELMO, MC75A, and SEEK devices would result in saving millions of dollars annually– in just this one operational environment.

Finally, based on CBP’s Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress, and assuming CBP receives approximately \$10.8 million in requested funding, the FY 2013/FY 2014 benefits of increased deployments could support an annual cost avoidance of up to \$9.7 million and 95,742 inspectional hours, equaling 81 CBPO FTEs.

This initiative directly supports the QHSR Goal 2.2: Safeguard Lawful Trade and Travel;
Objective 2.2.3: Manage the risk of people and goods in transit

CBP Goal 1: Secure our Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: Targeting Systems
PPA: Systems for Targeting
Program Increase: Positions 0, FTE 0, Dollars \$31,551

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	47,275
Program Increase							-	-	31,551
Total Request	-	-	71,513	-	-	41,653	-	-	78,826

Description of Item

The Targeting staff within the Office of Intelligence and Investigative Liaison (OILL) responds to security-related operational and real-time events involving people, goods, and conveyances entering and exiting the United States. The requested resources are needed to respond to potential terrorism alerts on a 24/7 basis, covering all international modes of transportation, at and between the ports of entry (POE). As intelligence reporting continues to expand and automated analytical techniques become available and enhanced and other agency and international government targeting efforts are expanded, additional personnel are required to properly analyze and employ actionable intelligence, develop internal information, and enhance automated information management tools to improve targeting.

Additionally, OILL staff collaboratively interacts with all CBP anti-terrorism border security initiatives, which require additional staff support. OILL Targeting Division provides real-time analysis and threat assessment support to all CBP components and other participating government agencies. To accomplish this task, additional personnel are required to establish data-sharing relationships and agreements with internal and external DHS components, other law enforcement agencies, private companies, and foreign counterparts.

Currently, this work is conducted by a limited number of technical staff and managers. The additional resources would ensure that most of the ongoing deliverables would not have to be scaled back or eliminated. Through these focused targeting efforts, CBP will expand its layered risk management approach and move from a reactive posture to a more effective and proactive one.

Justification

The requested increase of \$31.6 million will support enhancements to targeting systems and staff within OIIL. The OIIL program includes resources for the identification, development, implementation, and refinement of mechanisms for various methods of targeting and responding to security-related operational and real-time events involving people, goods, and conveyances entering and exiting the United States. The increase will allow CBP to increase its targeting capabilities by providing the ability to update rules in real time and allow CBP to attain a true 24/7 targeting capability to better support CBP officers in the field. A detailed description of this increase is as follows:

Advanced Targeting Capabilities	\$5.4 million
	<ul style="list-style-type: none">- Enterprise Data Warehouse for information storage and data standardization- BorderStat statistical tracking system for border enforcement- Continual analysis on rule effectiveness
Targeting System Hardware and Software Upgrades	\$4.5 million
	<ul style="list-style-type: none">- Network Improvements- Security and Monitoring- Geospatial Tools- Discovery and Exploration Tools- New Proprietary Data sources
Cargo Targeting Methodology Improvement	\$1.7 million
ATS-Global	\$12.0 million
	<ul style="list-style-type: none">- Four highest priority countries
Air Cargo	\$3.0 million
	<ul style="list-style-type: none">- Address Air Cargo Manifest Gap- Intel capability for anomaly detection
NTC Infrastructure	\$5.0 million
	<ul style="list-style-type: none">- Network Upgrades- Maximum Redundancy and Network Diversity- Localized Monitoring

Impact on Performance

These enhancements include moving to real-time rule updates, a 24/7 targeting capability that will allow CBP to more effectively develop and implement intelligence in order to effectively target threats to our Nation. They will also enable comprehensive reporting and sharing of information for all people, goods, and conveyances entering and exiting the United States. CBP officers and agricultural specialists will have access to the right information at the right time and possess greater awareness of the current environment and factors affecting the POEs. CBP will gain an intelligence advantage and be prepared to respond to all threats or emergencies that arise.

These initiatives support the DHS strategic goals of Advance Knowledge, Effective Inspections, and Focused Security and the CBP strategic goals of Securing America's Borders and Securing and Expediting the Movement of People and the Flow of Goods.

This funding will allow CBP to:

- Efficiently process time-sensitive technical requirements, including daily rules updates and ad-hoc data requests;
- Analyze and leverage inspection results to improve targeting methodologies and complete the targeting feedback loop. Capturing and using examination findings, negative and positive, will allow CBP to evaluate the effectiveness of inspection and targeting techniques employed at ports of entry, as well as specific inspection technologies, including NII technologies, to improve management and operational capability;
- Continue Operations and Maintenance support for the Automated Commercial Environment (ACE) Screening and Targeting Modules and quarterly releases of the S2 / Targeting Framework, including the Intelligence Operations Framework System and S3 / Advanced Targeting;
- Provide technical support for the maintenance of the Targeting Framework, which is a critical case management process in the vetting of potential terrorists attempting to travel to the US;
- Improve ATS's performance by using Entity Resolution, Predictive Modeling and Visualization, and Intelligence Driven Targeting and Machine Learning;
- Upgrade and refresh the ATS hardware and software required to process increased passenger and cargo volumes;
- Refresh the existing cargo targeting methodology; and
- Provide adequate Failover/Disaster recovery of the ATS modules.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 4: National Targeting Center
PPA: National Targeting Center
Program Increase: Positions 0, FTE 0, Dollars \$7,839

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	57,635
Program Increase							-	-	7,839
Total Request	-	-	52,700	-	-	52,268	-	-	65,474

Description of Item

The requested increase of \$7.8 million will allow CBP’s National Targeting Center (NTC) to support significant workload increases and program expansion. The NTC, which is housed in two facilities, supports CBP’s goal to employ an enhanced targeting strategy that effectively and efficiently divides cargo and travelers according to the potential threat they pose. The NTC helps to integrate the Agency’s diverse intelligence capabilities into a cohesive intelligence enterprise enabling CBP to serve the Nation as a premier intelligence-driven border law enforcement agency.

Targeting responsibilities continue to grow as CBP’s strategic plan is implemented. Primarily CBP officers, Border Patrol agents, and import specialists, all experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments, staff both NTC facilities. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw intelligence in support of CBP’s mission to detect and prevent terrorists and terrorist weapons from entering the U.S. While the vast majority of travelers and goods are legitimate, both NTC facilities are designed to carefully vet shipments and/or travelers that may be connected to terrorism or other transnational crimes, such as money laundering or narcotics smuggling.

Justification

Since the December 25, 2009 attempted terrorist attack on Northwest Airlines Flight #253, the attempted New York City Times Square bombing, and the October 2010 attempt to ship explosive devices through express consignment air cargo from Yemen, CBP has re-structured its

targeting efforts. Targeting must now address interdicting possible terrorists or other *mala fide* international travelers before they can board a flight destined to the United States. While these new targeting programs have been very effective, the re-structuring has caused a significant increase in the NTC workload leading to significantly increased overtime costs and temporary duty (TDY) staff augmentation.

NTC pre-departure vetting of passengers at foreign locations where CBP does not have an Immigration Advisory Program (IAP) presence keeps high-risk travelers from boarding flights to the United States. CBP works in close coordination with the airline industry to prevent the boarding of mala fide travelers. Since the inception of this program in 2010, the NTC has reviewed over 635,000 records and more than 8,000 mala fide passengers have been denied boarding.

NTC continues to provide 24/7 support for the expanded IAP program, which now has officers posted at eleven airports in nine countries. Since FY 2010 the IAP program has successfully prevented more than 2,800 mala fide travelers from boarding flights bound for the U.S.

In coordination with the Transportation Security Administration (TSA), the NTC launched the Air Cargo Advance Screening (ACAS) program in November 2010, after the October 2010 attempt to ship explosive devices through express consignment air cargo from Yemen. The NTC is responsible for implementing new targeting rules and analysis for high-risk cargo. The ACAS team is staffed with both CBP and TSA targeting analysts who jointly target and mitigate air cargo identified as high risk before allowing it to be loaded onto an aircraft.

Pre-departure targeting allows CBP to push U.S. borders outward by keeping high risk cargo off international conveyances destined to the United States.

In October 2011 the NTC became the adjudication center for all internal and external Automated Biometric Identification System (IDENT) users in relation to Automated Biometric Identification System (ABIS) encounters by the Department of Defense (DOD). Users include, but are not limited to, United States Visitor and Immigrant Status Indicator Technology (US-VISIT), Department of Justice (DOJ), DOS, United States Citizenship and Immigration Services (USCIS), DOD, and State and local law enforcement agencies. Workload impact is considerable; by the second quarter FY 2013, the number of ABIS encounters the NTC has adjudicated has already increased by 151 percent as compared to the previous fiscal year.

Impact on Performance

The NTC is a 24/7 operation with the centralized mission of coordinating anti-terrorism targeting and support to all of CBP's Anti-Terrorism activities. NTC provides research support and responds to inquiries from the field, conducts tactical targeting to identify actionable targets, develops targeting rules, and supports intelligence-driven special operations. NTC also coordinates inter-agency responses to emergent situations through the various on-site liaison officers and is in constant contact with the FBI Terrorist Screening Center.

The additional funding will allow CBP to realign resources to support the following efforts:

- The NTC will be able to continue support to the visa application vetting pilot started in February 2013. This initiative will help to streamline the visa issuance process by improving information sharing and leveraging existing technology to enhancing visa security.
- The NTC will be able to continue mission critical overtime and travel for TDY officers. Overtime ensures NTC continuity in support of enforcement actions. TDY Officers provide subject matter expertise and bridge gaps in staffing for high impact, high volume programs such as the pre-adjudicative visa application vetting program and the biometric program.
- The NTC will be able to advance work on a consolidated hot list and entity resolution, which will result in more frequent false matches, eliminate unnecessary secondary referrals at ports of entry, and decrease secondary wait times.
- The NTC will be better able to support adjudication of biometric encounters by other agencies. As the adjudication center for all internal and external Automated Biometric Identification System (IDENT) users in relation to Automated Biometric Identification System (ABIS) encounters, the NTC has seen a 151 percent increase in the number of ABIS encounters in the last fiscal year

National Targeting Center supports the following CBP Goal:

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security

Description of Item

The Office of Field Operations (OFO) is the law enforcement component within CBP responsible for carrying out CBP’s complex and demanding border security mission at all POEs. OFO manages the lawful access to our Nation and economy by securing and expediting international trade and travel. The staffing challenges identified in CBP’s Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress continue to increase as CBP takes on expanded mission requirements and capacity at ports of entry grows.

CBP requests an increase of \$210.1 million to fund approximately 1,600 additional Customs and Border Protection officers (CBPOs), to include 70 canine teams at Ports of Entry (POE), and 245 operational and mission support positions, for a total of 1,845 positions. The 245 support positions include 107 for direct field operational support in positions such as mission support specialist and CBP technicians to directly support the new officers. The additional 138 positions are integral to recruiting, hiring, and supporting the frontline positions, but also to generally support the increased workload associated with routine activities – such as processing payroll; processing and resolving personnel claims; continued training and professional development; performing polygraph examinations, background investigations, and periodic background reinvestigations; increase in technology oversight and support; procurement of equipment, uniforms, and space; providing legal support; etc. The increase will enhance CBP’s ability to facilitate processing of legitimate travelers and cargo. In conjunction with the additional CBPOs, additional resources for canine operations will increase the seizures of unlawful items and help reduce wait times. The additional officers will provide much-needed assistance to

move closer to the CBPO staffing levels pursuant to the Workload Staffing Model (WSM) requirement. CBP proposes to address the remainder of the staffing needs determined by the WSM with additional fee funded FTE. Additional collections from changes to the COBRA, Agriculture, and Immigration Inspection User Fees (IUF) could fund over 2,200 additional officers when fully implemented.

Justification

Despite the efficiency gains that CBP will achieve by continuing to streamline its current processes and a request in the President's FY 2014 Budget for additional CBPOs based on the results of the WSM, CBP will still face significant staffing challenges until the fee increases are fully implemented.

Trade and travel at POEs have increased over the last two fiscal years and continued to rise during FY 2012. In the air traveler environment, passenger volume has increased steadily. From FY 2011 to FY 2012, passenger volume in the air environment increased by 4 percent, reaching historic traffic volume levels. Additionally, since 2010, cargo volume in all environments (truck, rail and sea) has increased. From FY 2011 to FY 2012 trade volume at the POEs increased by 4.4 percent. The same trends are projected in the outyears. The processing of trade import value has also increased. Additionally, despite process improvements, average wait times in the air environment have increased, largely due to an increase in the number of travelers and greater workload requirements for frontline personnel.

Further, supplementing the current number of teams will increase the canine presence in the highest threat level areas, adding both deterrent and detection capabilities to those locations, as well as the ability to respond rapidly to evolving threats. At this time additional canine resources are necessary to conduct searches both inbound and outbound, especially in high-risk areas such as the Southwest Border.

Impact on Performance

As part of its efforts to enhance its resource optimization strategy and improve the Workload Staffing Model, CBP will be engaging the National Center for Risk and Economic Analysis of Terrorism Events, a DHS Center of Excellence, to fully quantify the direct, indirect, and induced economic impacts of projected wait time reductions due to adding CBPOs. In the interim, using ratios based on the work accomplished by OFO's current workforce and leveraging results from publicly available economic studies (the San Diego Association of Governments study cited in the footnote), CBP has made the following estimates of the benefits of adding CBPOs.

The projected impact from the increase of 1,600 additional CBPOs is as follows:

- Total enforcement actions would increase by 36,800
- Trade penalty assessments would increase by \$12,560,000
- Intellectual property rights seizures would increase by \$4,000,000
- Liquidated damage assessments would increase by \$67,200,000

Gross Domestic Product (GDP) would increase by \$3,128,300,000⁴
Revenues to local economies would increase by \$1,028,200,000⁵
Drug seizure values would increase by \$64,000,000
Currency seizure value would increase by \$4,400,000

Furthermore, CBP has demonstrated that additional CBPOs help to lower wait times. Numerous studies have quantified how long wait times affect the U.S. economy and how shortening those wait times would provide for a substantial economic benefit. The magnitude of the additional CBPOs provided for in the FY 2014 President's Budget would be expected to contribute billions of dollars to the U.S. GDP, save over a billion dollars in opportunity costs and add tens of thousands of U.S. jobs.

The officer workforce directly supports the QHSR Mission 1: Preventing Terrorism and Enhancing Security.

This program is also aligned to QHSR Mission 2: Securing and Managing Our Borders; QHSR Goal 2.1: Effectively Control U.S. Air, Land, Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; and QHSR objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

⁴ *"The Impact on the U.S. Economy of Changes in Wait Times at Ports of Entry"* Draft Final Report University of Southern California February 2013

⁵ *Economic Impacts of Border Wait Times at the San Diego-Baja California Border Region* Final Report by the San Diego Association of Governments, January 2006, estimated that 45-minute wait times at the San Diego land POEs were causing \$1.28 billion in lost business income in the San Diego market area

Total Request	-	-	2,518,235	-	-	2,499,439	-	-	2,782,503

Description of Item

CBP requests an increase of \$8 million for investing in technology to improve processing at air and land ports of entry through the acquisition of 60 kiosks at airports and at eight high volume pedestrian crossings, representing approximately 73 percent of the 40 million total pedestrians annually at all pedestrian crossings.

Justification

Integrated Traveler Processing delivers technology improvements and facility enhancements which maximize efficiencies in the air and land environment. Low cost improvements to land and air infrastructure (technology, facility, staff resources, and policy) can result in rapid performance transformation. Implementation of the self-service kiosk in a CBP environment allows a traveler or traveling group to complete the administrative portion of an inspection prior to speaking with a CBP Officer. This infusion of the right technology frees the CBP Officer to focus on identity verification and interviews which ultimately results in improved officer safety and efficiency while reducing traveler processing times.

The use of Radio Frequency Identification (RFID) and the promotion of new RFID documents is a strategy to transition travelers to more efficient processing methods. CBP has greatly increased its use of technology in the land border environment; which is now integral to CBP operations, providing clear security and facilitation benefits. CBP continues to take a proactive management approach in addressing passenger wait times, officer safety and security at land border ports of entry and will continue to work to improve the traveler process in the air and land environment.

Impact on Performance

The implementation of the kiosk technology at the 8 high volume pedestrian crossings will have a significant impact on CBP manpower requirements and will also benefit pedestrians, who will enjoy a faster border crossing experience. CBP estimates that this optimal solution will enable CBP to process the 29.2 million pedestrians at these 8 high volume pedestrian sites saving approximately \$7.3 million in officer labor (72,102 inspection hours, equivalent to 61 CBP officers). Additionally, the 10 minutes saved (on average) by each of the 29.2 million pedestrians utilizing the kiosks translates to an estimated at \$35.4 million in annual economic savings or value to those citizens⁶. When considering the annualized cost of kiosks, the reduced equivalent officer labor, and the value to the citizen, this implementation will return more than \$41 million in benefits each year, for the next three years.

CBP's Land Border Initiative (LBI, formerly WHTI) deployed automated pedestrian kiosks at Otay Mesa, CA, reducing CBP officer processing time as the kiosks initiate a document query, return the law enforcement query results, and create the pedestrian processing package before the pedestrian reaches the officer for inspection.

- At the Otay Mesa POE, this reduction is a minimum of 10 seconds and reduces average processing time from 40 seconds to 30 seconds. That is, a single CBP officer can process an average of 90 pedestrians per hour without a kiosk but 120 pedestrians per hour with a kiosk.
- The Otay Mesa POE processes 2.4 million pedestrians per year. The current infrastructure requires approximately 27,000 CBP officer hours per year to process pedestrians (per the throughput metric above), but only 20,000 with the help of the kiosks.
- Further, Otay Mesa average wait time without kiosks is approximately 25 minutes, but just 15 minutes with kiosks.

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

This initiative supports CBP Objective 2.1.2, Increase security and facilitate the lawful movement of people and goods through programs that identify low-risk travelers and shipments.

⁶ The figures are from the Land Border Regulatory Analysis, October 1, 2007 and based on a Department of Transportation determination of wage rates for land border crossers.

Justification of Program Changes**
(Dollars in Thousands)

Program Increase 7: Single Transaction Bond Centralization
PPA: MA Border Security Inspections and Trade Facilitation
Program Increase: Positions 0, FTE 0, Dollars \$3,300

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	6,191
Program Increase							-	-	3,300
Total Request	-	-	6,191	-	-	6,191	-	-	9,491

Current Operating Model

CBP currently does not have a centralized office responsible for overseeing and administering the Single Transaction Bond (STB) program. Instead, the Port Directors and other OFO personnel are responsible for setting bond amounts and validating their accuracy and completeness without a centralized body to coordinate activities and policy enforcement across the ports. **Figure 1** depicts the current operating model, showing the individual ports' responsibilities for policy, monitoring, and reporting.

Figure 1: Graphical Depiction of CBP's Current STB Program

Future Operating Model

Under the proposed centralized structure, the Office of Administration (OA) - Revenue Division would assume overall responsibility for developing, maintaining, and enforcing STB policy; reporting on bond activities; and monitoring results. To note, the bond policy component encompasses the following two main program areas:

- Bond administration, regarding proper bond completion, application procedures, and required minimum bond amounts.
- Policy development and conducting risk based assessments and analysis needed to determine when STBs should be used as additional security to protect against revenue loss, and what the bond amounts should be.

Upon implementation of the new operating model, all STBs will be filed at the Revenue Division. Establishing a centralized single transaction bond process is critical to CBP’s efforts to safeguard revenue and improve compliance with laws and regulations. **Figure 2** illustrates the proposed structure.

Figure 2: Graphical Depiction of the Proposed Centralized STB Program

Implementation of a Web-Based Bond Application Platform and System Considerations

The proposed operating model also requires the development of a web-based bond application that serves as the platform through which Sureties are to file a CF301 (Single Transaction Bond). The expected volume of transactions for this year and the next five fiscal years is:

Fiscal Year	2013	2014	2015	2016	2017	2018
STBs Recorded in Automated Commercial System (ACS)	366,088	355,105	344,452	334,118	324,095	314,372
Continuous Bonds	188,776	194,440	200,273	206,281	212,469	218,844

As shown in the table below, the amount of STBs filed has decreased over the last four fiscal years the number of continuous transaction bonds filed has increased over the same time frame.

Fiscal Year	2009	2010	2011	2012
STBs Recorded in ACS	529,074	461,503	403,507	377,410
Active Continuous Bonds in ACS	146,272	160,731	172,781	183,278

The corresponding increase in continuous bonds would indicate that more importers are obtaining continuous bonds for importation and are getting away from obtaining STBs several times in a year. However, increased transparency and accountability is still needed for this program even if the numbers continue trending down. The data above is not complete due to the coding in ACS not always being populated with the STB indicator. A survey of the surety industry revealed that they estimate an annual filing of 750,000 to 1,000,000 single transaction bonds while CBP data is significantly less.

Due to system limitations, CBP does not maintain STB information in ACS. Moreover, if the same email-based processes and systems used for continuous bonds were to be applied to STBs, the transaction volume would overwhelm the email servers. Accordingly, CBP plans to utilize a web-based solution that is substantially built and in use for other Revenue Division programs. STB centralization calls for building out the front-end bond entry component of this platform linked to a standalone database with interfaces to both the Automated Commercial Environment and ACS. The same data warehouse system used for continuous bonds will maintain the single transaction bonds without the need for additional cost or investment.

Justification

CBP is responsible for collecting import duties, taxes, and fees. CBP collected \$33 billion in FY 2010, \$38 billion in FY 2011, and \$40 billion in FY 2012. CBP has the authority to require bonds in order for companies or individuals to import merchandise into the United States. These bonds can be continuous or for a single transaction and serve as an insurance policy to protect CBP from revenue loss if importers fail to fulfill their financial obligations. In addition to facilitating efficient flow of lawful trade and travel, CBP is charged with ensuring collection of all lawfully owed revenue and identifying and pursuing delinquencies. CBP continues to make improvements to increase collections of customs revenue. Despite these efforts, opportunities still exist for CBP to improve its revenue collection procedures, specifically with regard to the management and organization of the STB process.

In June 2011, the DHS Office of the Inspector General (OIG) completed an audit and published a report, "Efficacy of Customs and Border Protection's Bonding Process," (OIG-11-92) citing a lack of adequate controls over the STB process, resulting in potential revenue loss from fraud, waste, or mismanagement. CBP concurred with all four of the OIG's recommendations intended to increase the efficacy of CBP's bonding process, including appointing a centralized office with the responsibility for developing and implementing STB policy, reporting on activities, and monitoring results. The report also recommended CBP develop formal policies and procedures for the validation, approval, sufficiency, and storage processes for single transaction bond.

Impact on Performance

Financial Benefits

CBP anticipates centralizing the STB process within the Revenue Division to yield significant financial benefits for CBP and other key stakeholders. This would be accomplished by:

- Increasing Revenue Collection by Reducing Write-offs and Delinquencies;
- Enabling Increased Oversight and Consistent Application of Policies and Procedures;
- Supporting CBP and DHS Strategic Goals;
- Reducing Time and Effort Required to Locate and Identify STBs;
- Prioritizing Resources based on Specialization to Align to Mission Needs;
- Promoting Specialized Knowledge and Expertise Leading to Faster Bond Processing; and
- Reducing Turnover and Training Needs.

Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Border Patrol Agent Overtime
PPA:
Program Decrease: Positions 0, FTE 0, Dollars \$(47,855)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,802,018
Program Decrease							-	-	(47,855)
Total Request	-	-	3,550,427	-	-	3,552,604	-	-	3,754,163

Description of Item

The Office of Border Patrol (OBP) will reduce the agent overtime hours performed nationwide which otherwise would require compensation under the Administratively Uncontrollable Overtime (AUO) provisions: 5 U.S.C. § 5545(c) 2; 5 CFR § 550.151-164; Office of Personnel Management (OPM), Compensation Policy Memorandum (CPM) 96-19 Guidance on AUO Pay, December 30, 1996; OPM CPM 97-5 Guidance on AUO Pay, June 13, 1997. In addition, the Border Patrol will reduce the payment of overtime under the Fair Labor Standards Act (FLSA) which is associated with the reduction in the overtime hours performed under the AUO compensation provisions.

CBP and OBP are constantly reviewing the use of all overtime hours in conducting the operations and activities by all employees, uniformed and non-uniformed, performed in the field and at the Headquarters level. OBP has over the last several fiscal years significantly reduced the amount of scheduled Federal Employees Pay Act (FEPA), commonly known as 45 Act overtime, in performing the various job functions of the Border Patrol. In furtherance of this overtime reduction effort, field managers will continue to employ work scheduling alternatives which will reduce the requirement for AUO hours and their associated costs and benefits. As the AUO hours worked are reduced, the associated FLSA overtime will also be decreased. Overtime will vary based on operational requirements, staffing structures, and the risk assessments requiring agent availability due to border conditions and other operational factors. As such, overtime will not be the same across the board and will vary as required to meet operational situations.

The total overtime cost reduction of \$47.9 million represents about a 9.5 percent reduction from FY2012 actuals to the total Border Patrol agent overtime (AUO, FLSA and FEPA) current services resource level for FY 2014. The FY2012 actuals figure correlates to the FY2012 enacted for overtime.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

CBP will manage the overtime reduction in a manner which ensures that its border security mission is not negatively impacted. Therefore, these reductions will not adversely impact performance in meeting the Strategic Goal 2.1, Effective Control U.S. Air, Land and Sea Borders.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses

Total Request	-	-	71,502	-	-	89,378	-	-	41,112

Description of Item

U.S. Customs and Border Protection will defer replacing vehicles.

Justification

In FY 2011, CBP examined vehicle lifecycle criteria to reassess future year requirements in consideration of evolving field environments, manufacturer improvements and operational use. The resultant decisions extended vehicle lifecycles based on these stated variables. The new CBP expected vehicle lifecycle replacement criteria is 8 or 10 years, with the exception of the Office of Border Patrol Sport Utility Vehicles (SUVs), trucks, and sedans, which are now fixed at 6 years. These criteria were established by CBP Offices to maximize CBP vehicle funding while remaining sensitive to overall impacts to CBP’s mission at and between the Ports of Entry along the U.S. borders. The reassessment has in part alleviated the previously projected replacement requirement.

Concurrently, CBP continues to analyze and optimize the maintenance, repair, and operation of the vehicle fleet while developing and implementing cost savings/avoidance strategies nationwide to optimize its aging fleet. This includes identifying best practices to support vehicles throughout an extended lifecycle while minimizing the impact increased maintenance activities could have to operational readiness.

Impact on Performance

To mitigate risk, the most critical needs (e.g. replacement of vehicles with significant mechanical issues and/or that are no longer functional) are to be addressed first. Subsequent acquisitions will be based upon mission priority as determined in coordination with partner offices. Additionally, CBP is currently embarking upon Phase 2 of an Optimal Fleet Composition Study to review and analyze its current fleet composition requirements and realize any efficiency in those requirements.

The operational components of CBP will mitigate risk by ensuring that the current fleet is used as efficiently and effectively as possible, ensuring that vehicles are available to support the highest priority missions. CBP headquarters will mitigate risk by ensuring the remaining acquisition dollars are used to support vehicle replacements in mission critical areas.

CBP vehicle replacements relate to CBP Goal 1.1: Secure the southwest border and Goal 1.2: Secure the Northern Border, Littoral Borders, and Associated Airspace.

Program Decrease							(25)	(25)	(53,996)
Total Request	-	-	773,207	-	-	773,207	(25)	(25)	626,159

Description of Item

The request includes a reduction of \$54.0 million for CBP-Wide IT Systems and Support.

In order to meet FY 2014 CBP IT program budget targets, the CBP Office of Information and Technology (OIT) is examining the following areas:

- All software currently being used within OIT is being re-evaluated for critical need. In 2013, CBP anticipates awarding numerous new support contracts for OIT, and through these awards seek savings to be realized in 2014.
- Hardware maintenance strategies are being reviewed and requirements are being re-assessed based on risk and other factors.
- Efficiencies realized by the installation of the CBP Cloud Computing Environment (C3E) will offset this budget decrease by providing opportunities for manpower efficiencies, retirement of some legacy services, and for system migrations that could further affect hardware requirements. C3E and enhanced management capabilities allow for the more efficient use of personnel to conduct standard administrative tasks and contributes to the reduction in the level of engineering support needed to perform certain infrastructure maintenance and service functions.
- Systems will be maintained; however, changes or enhancements to specified non-mainframe applications will be restricted to only critical requirements with senior management approval and funding. . Furthermore, mainframe-based applications support will be limited to legislatively mandated changes and efforts aligned with OIT's

transformation strategy for moving legacy applications off of the mainframe environment.

In order to keep pace in a challenging and dynamic environment, CBP is updating its IT program business model to align with enabling technologies that are more flexible, responsive, scalable, reliable, secure, and affordable. This transformation will enable CBP to more efficiently and effectively meet its mission of securing America's borders, protecting the American people from external threats, collecting revenues, and promoting legitimate trade and travel. The goal is to securely deliver the right information to the right people in time to make accurate decisions and take appropriate actions.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

- User requests for application changes will require prioritization, and it may take longer to implement changes. Improvements to these critical screening systems may be limited. Beginning in FY 2013 and continuing in FY 2014, approval of user change requests for enhanced and/or new capabilities for the following applications will be reduced by 50 percent versus FY 2012 levels: Advance Passenger Information System, TECS, Primary Application Maintenance, and Passenger Enforcement Systems. Change requests for the Automated Export System will also be reduced.
- OIT has sought funding to modernize, upgrade, and standardize the operating environment at Data Center 1 and 2 in an effort to reduce operating costs in advance of FY 2014.
- Technology upgrades will be done as funding is identified by CBP operational entities.
- There may be increased system outage and cybersecurity risks to CBP's IT network infrastructure (routers, circuits, switches, etc.) that control the flow of data across the diverse CBP network. CBP was able to utilize \$18.4 million in FY2012 to acquire 57 replacement switches, 1,327 routers, and 880 Uninterruptible Power Supply (UPSs). This new equipment will be deployed throughout FY2013 and will partially mitigate the risk.

CBP is dependent on DHS funding for Data Center Migration; \$34.745 million is requested in FY2013 and \$23.2 million is requested in FY2014. This funding will transform existing legacy applications from CBP's National Data Center to standard operating platforms at the DHS data centers that may reduce future operations and maintenance cost, and minimize risk of application

outages. CBP's eventual target is to move to an active-active infrastructure with load balancing so that the agency will never have to do a switch over – the system will always be available in a load balanced environment between data centers – that may allow CBP to achieve a 99.999 percent applications availability.

CBP will work to mitigate any potential network availability or system slow down and outages. As a result of the reduction, network availability is estimated to drop to 98 percent, approximately 3.36 hours of downtime a week and TECS availability may be reduced to 99 percent, approximately 1.68 hours of downtime per week.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 4: NII Investments and O&M
PPA: Inspection and Detection Technology
Program Decrease: Positions 0, FTE 0, Dollars \$(30,990)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	145,173
Program Decrease							-	-	(30,990)
Total Request	-	-	148,537	-	-	149,446	-	-	114,183

Description of Item

This \$30.990 million reduction transitions the Non-Intrusive Inspection (NII) program to an Operations and Maintenance (O&M) steady state mode. With this shift in strategy, the program will rely on currently fielded equipment. The NII program will develop a risk mitigation plan to shift NII resources in order to meet mission requirements for facilitating the movement of legitimate trade and intercepting and screening high risk cargo and conveyances. Since September 11, 2001, NII technology has been a cornerstone of CBP’s multi-layered enforcement strategy. CBP has 308 large-scale imaging systems deployed at and between our POEs. As of October 3, 2012, CBP also had a total of 4,632 small-scale NII, 1,482 Radiation Portal Monitors (RPMs), 2,554 Radiation Isotope Identification Devices (RIIDS), and 27,176 Personal Radiation Detectors (PRDs). Each year, a number of POEs undergo reconfigurations in which the lanes of traffic that contain NII equipment and/or RPMs are moved or altered. Additionally, a number of port expansions where new lanes of traffic requiring new technologies are added each year. Typically these reconfigurations and port expansions accounted for approximately 20 percent of deployment efforts.

The O&M funding will be used to help deployed NII technologies meet expected CBP operational requirements. Funding will also support the RPM program to upgrade sites to be Port Radiation Inspection Detection and Evaluation (PRIDE) compliant. O&M funds provide maintenance support at approximately 600 locations throughout the U.S. and its territories. O&M funds will also be used to support RPM systems that are reaching the end of their life cycle and to supplement the interdiction systems with ancillary equipment and components to enhance their capability.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The funding reductions through FY 2014 will require NII to shift to a revised port specific threat and risk based approach in managing NII technology with the goal of right sizing the NII technology inventory. CBP must narrow its focus by strengthening the most effective tools and sustaining required capabilities. This purpose will be achieved by threat- and requirements-based deployment, elimination or reassignment of underused technologies, resulting in the ability to sustain the right capabilities in the right locations. The summarized strategies for accomplishing this are: 1) re-validate minimum NII/Radiation Detection Equipment (RDE) requirements in the field; 2) reallocate available technology resources to address the highest risk gaps; 3) decommission unneeded/unused and un-repairable equipment from inventory; and, 4) strengthen the integration of inspection and detection technologies into CBP's layered enforcement strategy.

All of the currently deployed NII imaging systems are aging and will require replacement in the future; however, analysis has shown that most of the imaging equipment will be functional past the expected ten year life predicted by the vendors. By the end of FY 2014, 101 imaging systems will exceed this ten year expected life but only six large scale systems will need to be retired. In addition, the acquisition strategy for operations and maintenance of this equipment will be reviewed to identify if there are more cost effective ways to obtain this support. With the decommissioning of these six systems, an analysis using new risk based criteria, estimates that there will be minor but manageable impacts upon operations.

As the NII requirements continue to be refined based on the evolving port specific threat based requirements, the out-year funding requirements will be assessed with intent to maintain commerce while sustaining security goals.

The NII Systems Program supports QHSR Mission 1: Preventing Terrorism and Enhancing Security and Mission 2: Securing and Managing our Borders. The NII Systems Program also directly contributes to two DHS strategic goals: Goal 1: Protect our nation from dangerous people, and Goal 2: Protect our nation from dangerous goods.

U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 5: Training and Development
 PPA: Training at the Ports of Entry
 Training Between the Ports of Entry
 MA Border Security and Control between Ports of Entry
 MA Border Security Inspections and Trade Facilitation
 Program Decrease: Positions (22), FTE (22), Dollars \$(18,979)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							786	786	205,401
Program Decrease							(22)	(22)	(18,979)
Total Request	766	766	200,094	766	766	213,693	764	764	186,422

Description of Item

The Office of Training and Development (OTD) leads and directs CBP’s training programs. OTD ensures that all training efforts support the CBP mission and strategic goals and meets the needs of a diverse and geographically dispersed workforce. CBP will realize a savings of \$18.979 million through a combination of transitioning courses to distance learning technology, converting courses from contractor provided to in-house instructors, course consolidation, relocating courses to more cost efficient delivery locations, eliminating the Tuition Assistance Program (TAP) and 22 mission support FTEs, and leveraging opportunities to send instructors to student locations vice incurring travel costs. Mandatory training for new frontline employees to perform their duties and officer and agents certifications will be maintained.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands

for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

Since FY 2011, OTD has reduced its target staffing level by consolidating mission support functions of the Field Operations Academy (FOA) and Border Patrol Academy (BPA), integrating mission support functions of the two canine centers, reducing staffing at the FOA and BPA to reflect the reduced basic training demand, and reducing OTD headquarters staffing levels.

To achieve the reductions above, the following additional impacts will result:

- Funding trade-offs will occur in other advanced training designed to expand and promote growth of CBP personnel including various forms of specialty training.
- A further reduction of 22 FTEs from mission support positions will be achieved by realigning certain mission support duties and, in some cases, requiring training instructors to take on certain mission support functions.
- While TAP is a valuable tool that provides financial assistance for CBP employees to broaden their knowledge and enhance their skills, eliminating TAP will not have a negative impact on the core mission of CBP.

Reductions will not impact OTD's ability to deliver mission critical training to CBP employees in support of CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel, and CBP Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders. Mandatory training for new recruits to perform their duties will be maintained, and officer and agent certifications will be sustained. Furthermore, this decrease preserves CBP's overall strategic goal (3.1.2) to provide CBP agents, officers and mission support personnel with the necessary resources and support for their professional development.

Total Request	-	-	70,254	-	-	70,254	-	-	46,435

Description of Item

The Transportation Program transports detainees at and between the U.S. ports of entry. The program goal is to relieve apprehending officers and agents of transport and guard functions in order to perform higher priority law enforcement missions. CBP will realize a savings of \$23.8 million due to a reduction to transportation workload and through cost efficiencies. This savings will be acquired through reconfiguration of the assets used in meeting the lower workload requirements and cost reductions gained from the re-competition of the transportation contract.

This reduction would preserve critical, more active locations in Tucson, Rio Grande Valley and Laredo sectors. Other less active locations would experience a reduction or elimination of service and result in increased transportation assignments for Border Patrol agents. The CBP Border Patrol Transportation Program contract was initiated in 2006 along the Southwest Border as a component of the Secure Border Initiative. At that time, Border Patrol was apprehending approximately 1 million illegal entrants per year and agent strength was approximately 12,000, or a little over half of the current number of agents. During its first year, the program transported over 580,000 detainees and freed up over 600,000 hours for CBP agents and officers to perform their primary law enforcement and investigative duties utilizing approximately 300 contract transportation officers. The scope of the contract has included ground transportation, medical escort guard, courtroom transportation, security services and other related transportation and facility guard services, and today is largely supporting Border Patrol between the ports of entry.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made significant reductions across the agency while working to minimize operational impacts.

Impact on Performance

Since 2006, apprehensions along the Southwest Border have decreased substantially. In a continuing downward trend over the past several years, apprehensions in FY 2011 were approximately 327,577 or less than half of the 2006 amount, the lowest since 1971. With the reduced number of apprehensions, and combined with the large growth in the number of agents, CBP can accept selective reduced transportation services with marginal or no impact to operations. The Transportation Program budget for transportation services in FY 2011 was \$83 million and has been reduced over the last few years to a \$46.513 million funding level.

CBP will preserve transportation contract services in critical, more active locations along the southwest Border, including Tucson, Rio Grande Valley and Laredo Sectors, as well as any Alien Transfer and Exit Program runs occurring in other sectors. Other less active locations will be targeted first, experiencing a reduction of services from the FY 2013 contract level.

Border Patrol will monitor the impact of this program prior to and upon implementation of the reduction, and periodically thereafter. This is to ensure the underlying assumption regarding expected apprehensions does not change enough to warrant restoration of transportation contract services.

These reductions will not adversely impact performance in meeting the Strategic Goal 2.1, Effective Control U.S. Air, Land and Sea Borders.

Description of Item

CBP will achieve this reduction, equating to \$15.5 million in savings, through normal attrition (separations and retirements) coupled with minimal hiring and Voluntary Early Retirement Authority (VERA).

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made significant reductions across the agency while working to minimize operational impacts.

Impact on Performance

CBP began workforce shaping efforts in FY 2012 which is expected to continue through FY 2013 in the form of an agency-imposed pause on hiring of non-frontline positions. CBP

continues its workforce shaping initiatives in FY 2014 to achieve personnel reductions, including an extended hiring pause for non-frontline positions and the use of multiple rounds of VERA.

CBP's mission is dependent on the skills and expertise of its workforce, and today's current and long-term fiscal outlook underscore the importance of a strategic and efficient approach to human capital management. The ability of CBP to continue to achieve its mission and carry its responsibilities depends on whether we can sustain a workforce that possesses the necessary education, knowledge, skills, and competencies.

The approach to downsizing will rely primarily on voluntary attrition, retirements, and the results of the hiring pause to achieve reductions in the workforce and could result in significant imbalances in terms of shape and skill sets of the agency's employment population.

Going forward, CBP's approach will be to achieve and maintain a degree of balance between limited accessions and losses in order to shape our workforce in terms of skills, years of service, and specialties. CBP is working through a strategic human capital plan that requires managers to systematically consider what is to be done, how it will be done, and how to gauge progress and results. There are six key elements of the strategic workforce planning that support CBP's ability to effectively and efficiently achieve its mission. The six elements in strategic workforce planning to appropriately balance current and future workforce structure, and requirements include:

- Aligning workforce planning with strategic planning and budget formulation;
- Involving managers, employees, unions, and stakeholders in planning;
- Identifying critical skills and competencies and analyzing workforce gaps;
- Employing workforce strategies to fill the gaps;
- Building the capabilities needed to support workforce strategies through steps to ensure the effective use of human capital flexibilities; and
- Monitoring and evaluating progress toward achieving workforce planning and strategic goals.

The overall decrease will enable CBP to support its highest priority of maintaining maximum officer and agent staffing along the border. The sustainment of the officer workforce directly supports DHS Goal 2.1: Effectively Control U.S. Air, Land, and Sea Border, and directly supports CBP Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 8: Suspend WHTI/LBI Procurement
PPA: Inspections Trade and Travel Facilitation
Program Decrease: Positions 0, FTE 0, Dollars \$(6,023)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	80,000
Program Decrease							-	-	(6,023)
Total Request	-	-	80,000	-	-	80,000	-	-	73,977

Description of Item

CBP will decrease the Western Hemisphere Travel Initiative Land Border Integration (WHTI/LBI) procurement program by \$6.0 million. The decrease will not affect program operations. CBP will maintain its current deployed investment and process improvements as well as the operations and maintenance of this program.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The WHTI/LBI program is in sustainment mode. CBP will implement a strategy to reduce focus on the procurement functionalities while maintaining current operational levels and focus

strategies towards more critical mission areas. CBP anticipates a manageable operation as a result of this decrease and will employ standard mitigation procedures should the need arise.

WHTI supports the following CBP and QHSR mission, goals and objectives:

Mission 2: Securing and Managing Our Borders; Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; and Objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 9: Extend C-TPAT Validation Cycle to 4 Years
PPA: C-TPAT
Program Decrease: Positions 0, FTE 0, Dollars \$(5,019)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	45,202
Program Decrease							-	-	(5,019)
Total Request	-	-	44,979	-	-	45,254	-	-	40,183

Description of Item

C-TPAT will extend the validation cycle to four years as mandated by *the Security and Accountability for Every (SAFE) Port Act of 2006* (P.L. 109-347). In past years, CBP accelerated the re-validation schedule to once every three years for all importers, carriers and for manufacturers and, more specifically, once every year for Mexico highway carriers which are considered to be high risk. This extension to a four year cycle will yield a savings of \$5.0 million.

C-TPAT personnel have aggressively worked to identify and successfully implement travel and validation procedures aimed at maximizing remaining program resources. C-TPAT will conduct more regionally-focused operations, fewer domestic site visits, and conduct annual training for the trade community every other year. The program will pursue more mutual recognition arrangements with foreign customs administrations and strategically merge C-TPAT field offices. Additionally, the program will eliminate contractors and Personal Digital Assistants for Supply Chain Security Specialists. Finally, the program will seek to achieve a “maintenance only” status for the web-based portal system.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired

workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

CBP will use a phased approach with the implementation of the necessary enhancements to the Automated Web-Base Portal System. The enhancements will be implemented over an extended period of time. C-TPAT will delay the development of the second generation automated portal system required to meet existing and future workload requirements. The phased deployment of the C-TPAT 2.0 Portal will not impact the extended validation schedule proposed here.

Moving to a four year validation cycle across the board will reduce the number of validations in FY 2013 resulting in fewer validations performed each fiscal year. CBP will meet all timelines and responsibilities as mandated by *the Security and Accountability for Every Port Act of 2006* (P. L. 109-347).

The initiative supports the following QHSR mission, goals, and objectives:

Mission 2: Securing and Managing Our Borders; Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; Objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce; Goal 2.2: Safeguard Lawful Trade and Travel: Ensure security and resilience of global movement systems; and Objective 2.2.3: Manage the risk of people and goods in transit: People seeking to come to the United States, as well as goods in transit, must be positively identified and determined not to pose a threat to this country or the larger global movement system as far in advance as possible.

Program Decrease							-	-	(3,476)
Total Request	-	-	14,124	-	-	14,124	-	-	10,648

Description of Item

CBP will realize a savings of \$3.5 million from ceasing Immigration Advisory Program (IAP) operations in Warsaw, Poland and Incheon, South Korea. The closures will allow CBP to maintain its international footprint by expanding the IAP program to other locations, allowing CBP officers to monitor known individuals of interest (matches to the watchlist), and the unknown individuals identified through targeting and intelligence.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

IAP will incorporate mitigation strategies to ensure that security and enforcement capabilities are not degraded and to realign staff to support these functional areas.

The IAP program is aligned to QHSR Mission 2: Securing and Managing Our Borders; QHSR Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; and QHSR Objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Program Decrease 11: Legacy Application Standardization
 PPA: MA Border Security and Control between Ports of Entry
 MA Border Security Inspections and Trade Facilitation
 Program Decrease: Positions 0, FTE 0, Dollars \$(2,950)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	397,214
Program Decrease							-	-	(2,950)
Total Request	-	-	483,512	-	-	483,512	-	-	394,264

Description of Item

The request includes a reduction of \$3.0 million for Legacy Application Standardization. CBP will be consolidating infrastructure environments where possible, and looking to retire/consolidate legacy government developed applications. The deployment of Universal Technology Operating Platform & Integration Appliance (UTOPIA) will provide the infrastructure necessary to consolidate/host CBP developed applications in a manner that will give program offices the best opportunity to gain efficiencies in common Operations & Maintenance, consistent back-up and recovery, fail-over, and eventually shared data infrastructure.

- UTOPIA will accomplish this through the use of technologies such as load balancing, web server, application server, and database servers:
 - Support for future applications using the Common Application Integration Project/Enterprise Service Bus (ESB) model; and
 - Support for existing Java and .Net applications to allow them to migrate to the UTOPIA.
- Provide standardized infrastructure design to support rapid provisioning of environments;
- Reduce the complexity and number of different application technology stacks;
- Facilitate adoption of standardized application technology stacks; and
- Leverage application infrastructure as a general support system to drastically reduce Certification & Accreditation efforts when deploying new applications.

The goal is to consolidate commodity hardware and commercial off the shelf infrastructure that supports the ability to scale both up and out. This type of environment reduces the cost of

hardware and provides High Availability by removing any single points of failure. The implementation provides the ability to scale applications by adding additional commodity servers as well as by leveraging virtualization and clustering. The application framework provides additional functionality in that it supports multiple designs including portal, Single Sign-On, ESB, and Service Oriented Architecture. The flexibility of the design enables current applications to move to the environment without significant modifications. As business users identify new requirements, application teams can adopt the advanced technologies supported by the UTOPIA.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

With the successful deployment of UTOPIA, the development program offices will no longer need to use the current practice of installing and building each individual component of the infrastructure. This former approach is complex, costly, time consuming, and significantly hinders the scalability of the CBP infrastructure.

**Department of Homeland Security

Program Decrease							(25)	(21)	(2,369)
Total Request	1,138	1,138	136,571	1,138	1,138	136,571	1,091	1,095	167,364

Description of Item

This request includes a savings of \$2.4 million which will be realized by reducing 21 Full Time Equivalents (FTEs) in the following offices: two FTE National Account Managers (NAMS); five FTE from Trade, Policy and Program (TPP) Revenue Branch; and 14 FTE from the Regulations and Rulings (R&R) Policy Staff.

The Centers for Excellence and Expertise (CEEs) will absorb many of the functions of the National Account Managers and provide a more efficient platform for managing trade risk and trade compliance. There are currently four operational CEEs (Electronics, Pharmaceuticals, Petroleum and Automotive/Aerospace).

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The cost reduction will enable CBP to support its highest priorities. The sustainment of the officer workforce directly supports the DHS goal 2: Securing and Managing Our Borders and CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security
U.S. Customs and Border Protection

Program Decrease 13: Merge 2 National Targeting & Analysis Groups
PPA: Inspections Trade and Travel Facilitation
Program Decrease: Positions (12), FTE (12), Dollars \$(1,391)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,116	1,116	169,733
Program Decrease							(12)	(12)	(1,391)
Total Request	1,138	1,138	136,571	1,138	1,138	136,571	1,104	1,104	168,342

Description of Item

CBP will reduce functionality at two National Targeting and Analysis Groups (NTAG), which will yield a savings of \$1.4 million. CBP will cease providing specific targeting expertise for Trade Agreements at the NTAG in Dallas, Texas and will similarly end work on Revenue Collections in Chicago, Illinois. Instead, CBP will continue to provide these services through NTAG operations in other cities.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

CBP will mitigate potential operational risks by combining targeting and analytical skill sets at existing NTAGs with the National Targeting Center-Cargo (NTC-C). The fusing of the NTAGs

with the NTC-C will strengthen CBP's efforts to identify and prevent revenue evasion associated with imports claiming preferential duty treatment and potential violations of international trade agreements.

The Trade Agreement personnel program decreases are aligned to QHSR Mission, Goals and Objective: Mission 2 Securing and Managing Our Borders; Goal 2.2: Safeguard Lawful Trade and Travel; and Objective 2.2.3: Manage the risk of people and goods in transit.

(Dollars in Thousands)

Program Decrease 14: Deactivation of 9 inland Border Patrol Stations
PPA: Border Security Control
Program Decrease: Positions 0, FTE 0, Dollars \$(1,307)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,802,018
Program Decrease							-	-	(1,307)
Total Request	-		-3,550,427	-		-3,552,604	-		-3,800,711

Description of Item

CBP will realize a savings of \$1.3 million by deactivating nine inland stations. The stations are: Billings, MT; Twin Falls, ID; Abilene, TX; San Angelo, TX; Riverside, CA; Dallas, TX; San Antonio, TX; Lubbock, TX; and Amarillo, TX.

These locations were chosen on the basis of a 2010 study that assessed the stations' operational utility relative to the Border Patrol's current operating environment and their contributions to operations at the immediate border. The evaluation included an assessment of historical apprehension data and a review of the operational risk associated with deactivation. The 43 agents currently assigned to these positions will be reassigned to other higher traffic areas such as South Texas which will allow CBP to better address emerging threats and mitigate risk. The \$1.307 million in estimated savings is comprised of \$1.1 million in costs associated with General Service Administration or CBP leases and approximately \$207,000 in utility costs.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands

for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The deactivation of these inland stations is necessary to reduce costs and support CBP’s priority to maintain maximum agent staffing along the border. It directly supports DHS goals 2.1.1 and 2.3.2 for Securing and Managing Our Borders. It also supports CBP Goal 1: Secure our Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel. The decrease will ensure maximum effectiveness of the agent force while reducing costs and realizing efficiencies.

Description of Item

CBP is right-sizing the budget to ensure that it fully supports the funding of mission and support personnel, while allowing the agency to attrit down with a managed hiring strategy that would, on average, backfill only one out of every seven personnel who leave the agency, with the exception of CBP officers, Border Patrol agents, Agriculture Specialists, Air and Marine Interdiction agents, Polygraph Examiners, and Trade and Revenue positions, which at the Current Services level will be backfilled to sustain these targeted levels:

- 21,370 Border Patrol agents,
- 21,775 Customs and Border Protection officers,
- 2,383 Agricultural Specialists,
- 1,138 Air and Marine Interdiction agents,
- 2,376 Trade and Revenue positions, and
- 85 Polygraph Examiners.

The backfills for the rest of the population will be for high priority, critical positions necessary to sustain mission and support activities. CBP leveraged existing attrition rates to estimate the

losses needed to execute this managed hiring strategy. Fully funding the FY 2014 pay adjustment for workforce maturation in the Office of Field Operations and the Office of Border Patrol is a necessary adjustment-to-base in order for this program reduction to be achievable and still maintain the above mentioned staffing targets. Also this managed hiring strategy is predicated upon the idea that CBP will be executing limited and targeted backfills throughout FY 2013, to be continued into and throughout FY 2014. Therefore, the one in seven backfill process in FY 2014 reflects a continuation of the selective hiring approach that CBP is currently employing in FY 2013. This managed hiring strategy is estimated to save \$47.1 million from the FY 2013 annualized Continuing Resolution (CR) funding level.

This adjustment also includes a reduction in CBP's awards levels, from an estimated 1 percent of base pay to 0.6 percent. This change in the awards policy would reflect an across-the-board reduction for CBP, and provides an estimated savings of \$18.8 million.

In addition to managed hiring CBP is reducing several non-pay support services and costs. The total reduction in non-pay approximates \$25.3 million and will be achieved through lapsing contractual services; decreasing human resources efforts related to recruiting, hiring, and benefits; IT Infrastructure reductions; and further reducing supplies and equipment purchases.

Combining these strategies saves the agency an estimated \$103.7 million from a FY 2013 annualized CR funding level base.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

CBP will continue to comply with all statutory and regulatory compliance requirements in the execution of its Human Resources Management responsibilities.

The Office of Administration will initiate work force realignment and prioritization as required by mission needs and will shift home-to-work program management to CBP operational offices.

The Office of International Trade will incorporate mitigation strategies and realign staff to ensure that trade enforcement and facilitation capabilities are not degraded, realign mission support work to other staff members, and offset a reduction to the National Account

Management staff through the continued growth of the Centers of Excellence and Expertise. Additionally, the Office of International Trade will maximize the use of video teleconferences and newer technologies to maintain communications with the trade community and CBP staff. It will also leverage trade community associations and their communications technologies to ensure that all stakeholders are involved in the agency's new trade initiatives and efforts, as well as informed of any changes to those programs and policies.

The Office of International Affairs will migrate into a regional model. This approach will facilitate a greater leverage of resources and facilitate a holistic approach to international activities.

Offices of Public Affairs, Congressional Affairs, Training and Development, and Commissioner will rescope and reprioritize the functions which they perform.

Description of Item

Tactical Analytical Units (TAUs) were established in 2010 to collect, analyze, develop, and disseminate actionable information for the purpose of enhancing the detection and interdiction capabilities of front-line officers. TAUs augment CBP’s intelligence and targeting missions by assisting in identifying threats, risks and vulnerabilities at various Ports of Entry (POE) located within a given Field Office. TAUs act as field office analytical units that garner information from seizures made at the POEs and develop trend analyses that are further disseminated as tactical intelligence to a number of individual components at those POEs, including seaport Anti-Terrorism Contraband Enforcement Teams, Airport Passenger Analysis Units (PAUs), Advanced Targeting Units (ATUs), and Outbound Teams. In order to implement this reduction, CBP must reduce the number of Customs and Border Protection officers performing TAU work and redeploy them to law enforcement duties at the ports of entry. The reduction will eliminate TAU workload performed by approximately 48 non-frontline personnel. To mitigate this reduction, ATUs and PAUs will perform the functions previously associated with TAUs, where necessary.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce

benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

Preventing terrorism and terrorist activities from entering our borders is our highest priority. CBP will realign resources to mitigate risk within this priority area by maintaining a strong TAU presence at high risk threat locations while reducing the number of TAUs within lower risk threat locations based upon the current threat assessment/environment. TAUs were established to provide a common intelligence picture for the Area of Responsibility of the field office by providing tactical intelligence to develop targeted operations to disrupt the Transnational Criminal Organization's ability to operate.

The impact of this reduction will require the analytical units at the POEs to perform additional responsibilities and serve as the link/conduit to law enforcement entities. CBP will ensure that front line officers are provided with the latest actionable information by maintaining sufficient TAU personnel at higher risk port locations. Where appropriate, these activities will be absorbed by other teams and offices within CBP.

This program is aligned to QHSR Mission 2: Securing and Managing Our Borders; QHSR Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; and QHSR Objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Program Decrease							(55)	(55)	(7,990)
Total Request	-	-	-	-	-	-	296	283	253,533

Description of Item

In FY 2014, US-VISIT will realize a savings of \$8.0 million or approximately a 16 percent reduction to mission support positions and associated personnel expenses.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The US-VISIT program will reduce its mission support staff by 55 Full Time Permanent positions in the areas of strategic and operational planning, human capital, budget and financial management, information technology security and support, acquisition, administration, and logistics. In addition to the reduction in salaries and benefits, US-VISIT plans to decrease associated personnel costs for such items as facility space, human capital support, payroll

services, and telecommunications/network services. The planned transition of US-VISIT into CBP will mitigate the impact of these reductions, primarily through efficiencies derived from supporting US-VISIT via the larger CBP corporate enterprise. The transition plan envisions significant distribution of US-VISIT mission support personnel into CBP corporate offices, wherein the program will then benefit from access to deeper support resources at reduced cost.

Program Decrease 18: Foreign Language Awards Program
PPA: Inspections Trade and Travel Facilitation
Program Decrease: Positions 0, FTE 0, Dollars \$(16,000)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	2,774,503
Program Decrease							-	-	(16,000)
Total Request	-	-	2,518,235	-	-	2,499,439	-	-	2,758,503

Description of Item

The request includes a reduction of \$16.0 million in the Foreign Language Awards Program (FLAP) to ensure CBP's highest priority capabilities are fully funded to achieve our core missions. As authorized by 19 USC 58c FLAP benefits are approved to be covered by revenue from COBRA user fees. If the FLAP reduction is enacted, previously dedicated user fee revenues to cover this requirement would be redirected to fund other authorized expenses by the COBRA user fees such as inspectional overtime, premium pay, Civil Service Retirement System (CSRS) benefits and preclearance. The funds recovered from other COBRA authorized expenses can be used to offset the Salary and Expenses appropriation. The funding reduction will be taken against the Inspections, Trade, and Travel Facilitation at POEs PPA.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

FLAP was originally implemented as an incentive for U.S. Customs inspectors to learn foreign languages to augment duties at the ports of entry. However under the current CBP structure, the value of this incentive has diminished. Most notably, CBP officers now receive enhanced retirement benefits similar to other law enforcement officers. In addition, other CBP personnel (for example Border Patrol agents) have a language requirement for employment and do not receive special compensation. Section 5.4.1 of the FLAP directive indicates that all FLAP awards are subject to the availability of funds.

The FLAP is contained within the National Collective Bargaining Agreement (NCBA), Article 42, Section 7 and Appendix F between CBP and the National Treasury Employees Union (NTEU). CBP will provide notification to the NTEU regarding any intention to modify provisions of the NCBA and enter into bargaining with the NTEU regarding the impact and implementation of the desired changes in FLAP.

Note: Award payments under FLAP are authorized to be funded with revenues from the Consolidated Omnibus Budget Reconciliation Act (COBRA) inspection user fees as established in 19 USC 58c. CBP's Office of Field Operations (OFO) is only capable of realizing a reduction in FLAP through either a reduction to the Inspections, Trade, and Travel Facilitation PPA, or through a reduction in OFO's User Fee Plan. Either method would require OFO to reevaluate their expenditures in the COBRA expense hierarchy as established in 19 USC 58c; eliminating FLAP payments from COBRA fees would, without a corresponding change to the COBRA legislation, require OFO to no longer fund any requirements from such fees which are currently ranked below FLAP in the COBRA statute, namely the payment of salary and benefits for "enhanced positions." OFO's COBRA spending would need to be confined only to legitimate expenses with higher rank in the COBRA expense hierarchy, including: Inspectional Overtime, Premium Pay, and Excess Preclearance costs.

Total Request	14	14	8,368	14	14	8,368	13	13	5,458

Description of Item

This program change reflects a \$1.1 million reduction in print services for discretionary products which are not required by law or are not considered mission critical. An additional \$1.8 million reduction in print services will be spread across print supplies and contract support bringing the total program change to \$2.9 million.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The reduction will require longer lead time for printing needs and eliminate the walk-up print shop service currently provided. The impact of this reduction will be mitigated by ensuring that

print services for products required by law (such as the Customs Declaration Form) and which provide information to the travelling public will continue.

Current Services Level							-	-	2,774,503
Program Decrease							-	-	(10,000)
Total Request	-		-2,518,235	-		2,499,439	-	-	2,764,503

Description of Item

The Office of Field Operations enhances effective border security at the POEs by implementing layered enforcement strategies to improve the prevention of absconders and port runners and ensure that ports of entry maintain operational control while ensuring the safety of CBP officers and the traveling public. The reduction of \$10.0 million in funding for the Port Runner/Absconder Mitigation efforts ensures CBP's highest priority capabilities are fully funded to achieve our core missions.

CBP's Port Runner/Absconder Mitigation efforts include a combination of strategies such as port hardening, the tactical placement of pursuit vehicles and drivers, and implementation of a Secondary Lot Entry Exit Control (SLEEC) officer.

Port hardening includes physical infrastructure changes at the ports that allow CBP greater control of traffic through the port, for instance through the installation of bollards and barriers at strategic points. The SLEEC officer's primary responsibility is to ensure processing areas such as pedestrian, passport control, vehicle secondary and vehicle egress flow is controlled appropriately to prevent or mitigate port runners and/or absconders.

Current practice is for ports of entry to ensure that a SLEEC officer is posted at or near egress points as part of an assigned rotational or fixed duty post, and that officers certified as pursuit drivers must remain in close proximity to a pursuit vehicle at all times during an assigned shift. As a result of this reduction, these requirements may be modified and the personnel returned to regular duties.

CBP believes that an approximate 50 percent reduction in the SLEEC officer and pursuit driver requirements will have minimal impact. The reduction will be implemented in a strategic manner, taking into account risk factors, size of the port, minimum staffing requirements, overtime and scheduling. Moreover, the port hardening layered enforcement strategies implemented over the past 10 years will remain in effect.

CBP assesses this reduction as low-risk to operations since the number of port runner/absconder incidents is trending down, current deterrence capabilities will be sustained, and apprehension activities only in low-risk land POEs such as the tactical placement of pursuit vehicles and drivers, and implementation of a SLEEC officer, will be impacted. A review of the number of incidents which occurred from Fiscal Years 2011 to 2012 show a significant downward trend, a 45percent decrease overall with an average apprehension rate of 56 percent. The decline in the volume of incidents and aggressive apprehension rate suggests that the implementation of layered deterrence efforts has effectively mitigated the majority of potential absconders and port runners.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

These duties have become a cost burden for ports in terms of overtime expended. The decline in the volume of incidents suggests that the implementation of proactive mitigation efforts has effectively deterred potential absconders and port runners. CBP will continue to monitor via existing measures to gauge how this change will impact the volume and apprehension of absconders and port runners and to validate the ongoing trend of maintained deterrence.

This program is aligned to QHSR Mission 2: Securing and Managing Our Borders: QHSR Goal 2.1: Effectively control U.S. Air, Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; and QHSR Objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Program Decrease							-	-	(7,000)
Total Request	-	-	168,060	-	-	168,060	-	-	143,148

Description of Item

Background Investigations (BIs) and Periodic Reinvestigations (PRs) are critical components in a comprehensive integrity strategy to ensure individuals employed by CBP are suitable for employment in a law enforcement agency and to assure the agency maintains the capacity to identify individuals' whose post-employment conduct and actions both on and off duty do not render them unsuitable for continued employment and/or unsuitable to hold a security clearance. All employees who enter on duty with CBP must undergo a BI. Additionally, all current employees must complete a PR every five years.

Justification

CBP will reduce funding to the contracts of Investigation Service Providers for the investigation portion of the BIs and PRs to a level anticipated to address the needs of the agency based on the current expected hiring plans for CBP. The sequencing of the required polygraph examination for agent and officer candidates early in the hiring process reduces the total number of required BIs and therefore enables savings in the contract BI program. CBP will remain in compliance with the *Anti-Border Corruption Act* of 2010.

Impact on Performance

This request supports the following strategic mission set, goal, and objective:

- Mission Set 3: Sustaining Investment in People and Capabilities

- Goal 3.1: Enhance Integrity Programs and Identify, Develop, and Train New Leaders
 - Objective 3.1.1: Prevent corruption at all levels, and swiftly identify and remove personnel who have been corrupted

Total Request	84	80	10,684	84	80	10,749	106	102	21,278

Description of Item

The request includes a reduction of \$3.7 million, which will be realized as part of a shift to a regional approach for the agency’s international programs. Specifically, CBP will eliminate three FTE by closing three CBP Attaches offices (Netherlands, Italy, and Philippines), eliminating four Deputy Attaché positions (Japan, China, Brussels, and Canada), terminating one FTE’s support to the DHS Attache in Canada, and reducing staffing in Mexico by three positions, saving \$1.8 million in pay and \$1.9 million in non-pay categories.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

CBP is shifting from a country-specific to a regional approach to international engagements, based on the current trends and the relationships that CBP has developed with several foreign partners. The new regional strategy will allow for CBP to better leverage relationships in the region, cultivate regional expertise in headquarters, and realize some efficiencies and savings through more coordinated regional capacity building, targeting centers, and trade transformation efforts. For more information on the CBP shift to a regional strategy, please refer to the current services description of the Other International Programs PPA.

The decrease will enable CBP to support its highest priority of maintaining agent staffing along the border. The sustainment of the officer workforce directly supports DHS Goal 2.1: Effectively Control U.S. Air, Land, and Sea Border, and directly supports CBP Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

Program Decrease 23: OBP Horse Patrol
PPA: Border Security Control
Program Decrease: Positions 0, FTE 0, Dollars \$(1,000)

Funding Profile

	FY 2012 Revised Enacted			FY 2013 Annualized CR			FY 2014 Request (as compared to FY 2012)		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	2,800
Program Decrease							-	-	(1,000)
Total Request	-	-	2,800	-	-	2,800	-	-	1,800

Description of Item

CBP currently maintains a herd of 350 horses and 388 riders (agents) along the southwest and northern borders in areas where the lack of infrastructure and access to the immediate border make the use of horses a practical alternative and solution for patrolling areas otherwise inaccessible due to remote and rural terrain. To help with costs of purchasing horses, CBP has been innovative by adopting and partnering with the Bureau of Land Management (BLM) to acquire wild mustangs captured on Federal lands by the BLM.

This program change will decrease the costs incurred in the operation of the OBP horse patrol program in FY 2014.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The \$1.0 million reduction represents an approximate 33 percent reduction to the Horse Patrol Program, or approximately 115 horses. CBP would preserve the program in critical, more active and high-risk locations along the southwest border, such as Tucson, Rio Grande Valley, and Laredo Sectors. Other less-active, lower-risk locations will be targeted, experiencing a reduction or perhaps a complete elimination of the program in that area. To mitigate the loss of horse patrols in these low-risk areas, agents will utilize other modes of transportation to patrol the border and perform their duties, including specialty vehicles such as All Terrain Vehicles, motorcycles, and 4-wheel drive vehicles to provide appropriate capabilities and accomplish mission requirements.

CBP considers this reduction low-risk to operations, particularly since the high-risk areas are preserved where horse patrols are still a preferred means of patrol. In the low-risk areas, the use of horses is one solution to patrolling the border, whereas new roads and/or technology, both vehicular and surveillance, have mitigated the need for this more traditional approach.

CBP will monitor the impact of this program change on a regular basis upon and after implementation, and continuously seek to make alternative changes/solutions to maintain appropriate capability needs along the southwest and northern borders, to ensure mission requirements are met.

These reductions will not adversely impact performance in meeting the Strategic Goal 2.1, Effective Control U.S. Air, Land and Sea Borders.

Description of Item

In FY 2014, the Office of Border Patrol (OBP) will reduce seven contract support positions with savings of \$1.2 million. The Office of Information Technology (OIT) will support OBP with their OIT support structure in lieu of the OBP contract positions. OBP will also reduce agent-to-equipment ratios where feasible, and lengthen replacement cycles when appropriate. Through stricter management and efficiency efforts, OBP will reduce these costs in support equipment by \$1 million in FY 2014.

OIT has the responsibility to support and maintain computer and information systems throughout CBP. Because of size and location challenges, OBP currently maintains its own Information Technology help support contract for its Headquarters staff.

In the field, Border Patrol agents rely on support equipment (hand held night vision devices, Global Positioning System devices, binoculars, etc.) as tools to enhance their law enforcement capabilities. Some tools are required for personal carry, while others can be checked out as needed. This equipment has an estimated usable life cycle and needs to be replaced periodically.

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired

workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The OIT supports the conversion from OBP contract positions to OIT support capabilities. The conversion will have no anticipated impacts on OBP operations.

Reducing equipment ratios and lengthening replacement cycle for agent support equipment is assessed as no- to low- risk and will not have a negative impact to operations along the border, or to the mission. Agents will still have access to necessary support equipment and non-functional equipment will still be replaced as needed.

OBP will monitor the impact of this program change on a regular basis upon and after implementation, and continuously seek to make alternative changes/solutions to maintain appropriate capability needs along the southwest and northern borders, to ensure mission requirements are met.

These reductions will not adversely impact performance in meeting the Strategic Goal 2.1, Effective Control U.S. Air, Land and Sea Borders.

Program Decrease							-	-	(6,350)
Total Request	-	-	6,068,662	-	-	6,052,043	-	-	6,570,171

Description of Item

The Office of Training and Development (OTD) proposes savings of approximately \$6.4 million by centralizing ammunition procurement and distribution and utilizing a per agent/officer ammunition ratio that meets each operational office’s qualification and Use of Force Policy Division (UFPD) established training requirements. This per officer/agent ammunition ration has been established by the Director, UFPD. Additionally, UFPD will enter into a contract with private vendors for training-only ammunition. This training-only ammunition is approximately 20-30 percent cheaper than the duty ammunition that is currently used for qualification and training. This plan maintains the current firearm proficiency and training standards established in the CBP Use of Force Policy Handbook.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

These reductions will have no impact on performance. By maintaining the same amount of firearms training and qualifications per officer/agent, CBP will ensure that personnel are well-prepared to conduct the mission while maintaining officer safety. The targeted decreases will enable CBP to support the highest priority of maintaining core frontline personnel. The sustainment of core frontline personnel directly is aligned to QHSR Mission 2: Securing and Managing Our Borders; Goal 2.1: Effectively Control U.S. Air Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce; QHSR objective 2.1.1 Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food environment, and agriculture, while facilitating the safe flow of lawful travel and commerce; and QHSR Objective 2.1.2: Prevent illegal export and exit: Prevent the illegal export of weapons, proceeds of crime, and other dangerous goods, and the exit of malicious actors.

Description of Item

The Office of Administration, Financial Operations, Financial Systems Division (FSD) is responsible for the financial systems management, development, and support to CBP. FSD will administer \$3.8 million in reductions by reducing contract support in non-core financial functions and contracting efficiencies.

Justification

This and other program reductions are being implemented in order to ensure CBP’s law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The cost reduction will enable CBP to support its highest priorities. FSD’s support functions relate to CBP Mission Set 3: Sustaining Investment in People and Capabilities, Goal 3.2:

Integrate CBP as an Organization to Enhance Effectiveness, Initiative 3.2.1.3: Better integrate mission support functions at CBP in order to achieve economic and operational efficiencies.

Total Request	20,131	19,853	2,518,235	20,131	19,853	2,499,439	20,080	19,937	2,771,985

Description of Item

Commercial Targeting and Enforcement (CTE) will reduce each division (Commercial Targeting, Commercial Enforcement, Trade Analysis & Measures, Trade Information Management and FOIA) by four positions each. In total, these reductions will yield a savings of \$2.5 million.

The chart below illustrates the positions which will be impacted by this reduction:

Type or Organization	Number of Positions Reduced
International Trade Specialists	4
Paralegal Specialists	4
National Analysis Specialists	4
Information Technology Specialists	4
FOIA Clerks/Mission Support Specialists	4
Total	20

Justification

This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2014. These staffing floors cover 80 percent of the workforce and about 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired

workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce which largely cannot be reduced due to statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance

The reduced positions currently assigned to CTE will not impact CBP's current focus on priority trade areas.

Reductions in our targeting divisions will require that CBP leverage existing expertise and utilize automated systems in a more efficient manner to support operations. Revenue staff responsibilities will be completed; however, they may result in lengthier case processing times; as well as lengthier reviews and seizure referrals timeframes.

Program decreases in the Measures Division may impact trade measure reporting, eliminating the mid-year Trade Trends report and trade targeting effectiveness measures. The reduction to the Freedom of Information Act (FOIA) staff will be mitigated by identifying new processes that comply within the required response timeframe and the new staffing levels.

This decrease is aligned to QHSR Mission 2: Securing and Managing Our Borders; Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders; and Objective 2.1.1: Prevent illegal entry.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, agricultural inspections and regulatory activities related to plant and animal imports, and transportation of unaccompanied minor aliens; purchase and lease of up to 7,500 (6,500 for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$9,010,581,000] \$9,237,088,000¹; of which [\$3,274,000] \$3,274,000² shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$38,250 shall be for official reception and representation expenses; of which not less than [\$269,039,000] \$286,769,000³ shall be for Air and Marine Operations; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: Provided, That for fiscal year [2013] 2014⁴, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000[]; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies: Provided further, That of the amount provided under this heading, [\$261,523,000] \$253,533,000⁵ is for necessary expenses for the United States Visitor and Immigrant Status Indicator Technology program, as authorized by section 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1365a), of which [\$161,110,000] \$178,789,000⁶ shall remain available until September 30, [2015] 2016⁷. Note.--A full-year 2013 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 112-175). The amounts included for 2013 reflect the annualized level provided by the continuing resolution.

MA Border Security Inspections and Trade Facilitation Mission Statement

Headquarters Management and Administration provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Rent Mission Statement

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities.

Inspections Trade and Travel Facilitation Mission Statement

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP officers, agricultural specialists, and import specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

International Cargo Screening Mission Statement

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

Other international programs Mission Statement

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

C-TPAT Mission Statement

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised or diverted by terrorists or their accomplices.

Trusted Traveler Programs (TTP) Mission Statement

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk trusted travelers arriving into the United States by allowing CBP officers additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; and respond to congressional and industry inquiries of trusted traveler program related matters.

Inspection and Detection Technology Mission Statement

The CBP reliance on Non-Intrusive Inspection (NII) technology to secure the borders has become more and more critical. In conjunction with CBP's many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats. These complementary layers enhance security and protect our nation. CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens, or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo and travelers. Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

Systems for Targeting Mission Statement

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection. The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

National Targeting Center Mission Statement

The priority mission of the U.S. Customs and Border Protection's National Targeting Centers is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. The NTC facilities are primarily staffed by CBP officers, border patrol agents, and field analysis specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including CSI personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

Training at the Ports of Entry Mission Statement

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Border Security Control Mission Statement

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for Border Security and Control between the Ports of Entry. The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities. Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Summary Justification and Explanation of Changes

	FY 2012 Revised Enacted	FY 2013 Annualized CR	FY 2014 Request	FY 2012 to FY 2014 Change

Training Between the Ports of Entry Mission Statement

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

Air and Marine Operations Personnel Compensation and Benefits Mission Statement

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

US VISIT Mission Statement

The mission of the US-VISIT program is to provide biometric identification through the collection, maintenance, and sharing of biometric information and selected biographic data to authorized DHS, Federal, State, local government and law enforcement agencies, and through international data-sharing agreements with strategic foreign partners in support of the DHS mission. Through its use of biometrics, US-VISIT collects, stores, and shares digital finger scans and digital photographs for subsequent verification. This biometric information is paired with biographic information used to establish and verify an individual's identity, as well as match that identity against criminal and immigration violator watchlists.

Summary Justification and Explanation of Changes

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

CBP requests 308 FTE for the FY 2014 DHS Balanced Workforce Strategy.

VI. Addendum

FY 2013 Northern Border Staffing and Funding

The following information provides the U.S. Customs and Border Protection's (CBP) staffing plans and enforcement initiatives at the Northern Border ports of entry (POEs), pursuant to the legislative requirement in the Senate Report 112-169.

CBP Office of Field Operations (OFO) employs a layered defense strategy and utilizes personnel, cutting-edge technology, and canine detection teams to screen people, vehicles, and cargo attempting entry into the United States through designated POEs. Currently, OFO operates 95 land POEs on the U.S.-Canada border, including 3 in Alaska.

OFO regularly develops special operations in coordination with area POEs based on current intelligence trends and analysis developed and reviewed by the Tactical Analytical Units and in cooperation/coordination with the Intelligence Community. Many of these special operations focus on current threat analysis that includes inbound/outbound narcotics and currency smuggling and are conducted in a pulse and surge fashion in order to maximize the effect, both inbound to the United States and outbound to Canada. Beyond threat specific operations, OFO employs several enforcement initiatives to include:

Project North Star: Project North Star is a bi-national, multi-agency forum that further strives to enhance existing communication, cooperation, and partnerships between U.S. and Canadian law enforcement personnel. The aim is to promote and improve cross-border networking, intelligence gathering and sharing, targeting, prosecution, training, and coordinated planning among local, state/provincial, and federal law enforcement.

Border Enforcement Security Task forces (BESTs): U.S.- and Canada-integrated investigations occur in part through the BESTs, led by U.S. Immigration and Customs Enforcement (ICE). BESTs incorporate personnel from ICE, CBP, U.S. Coast Guard, Canada Border Services Agency, Royal Canadian Mounted Police, and other key U.S. and Canadian federal, state, and local agencies. BESTs were developed as a comprehensive approach to identifying, disrupting, and dismantling transnational criminal organizations, including drug trafficking organizations, posing significant threats to border security.

Integrated Border Enforcement Teams (IBETs): Canada and the United States have cooperated since 1997 through Integrated Border Enforcement Teams (IBETs), which are now international models for cooperation. IBETs work in an integrated land, air, and marine environment within their authorities at and along the border and complement the authorities of other U.S. law enforcement agencies.

OFO has approximately 17 percent of its CBP Officers assigned to Northern Border POEs. The current staffing plan includes 3,677 CBP Officers positions. CBP expects to maintain this level of staffing throughout Fiscal Year (FY) 2013. The salary and expense funding required to maintain this level, to include overtime, is approximately \$446.1 million annually.

Periodically throughout the year, OFO re-evaluates its staffing allocations based on the threat, current and future operations, and workload analysis; and makes adjustments as necessary. In August 2013, OFO will determine the FY 2014 CBP Officer staffing allocations by Field Office and POEs. At that time, OFO will make adjustments to FY 2014 Northern Border staffing.

The Northern Border staffing allocations by field office are identified below:

Field Office	CBP Officers Assigned to Northern Border POEs
Boston	568
Buffalo	1,114
Detroit	880
Portland	20
Seattle	1,095
Total Assigned to Northern Border POEs	3,677

Vehicle Fleet Life Cycle Revision

The following information provides the rationale and analysis related to the extension of U.S. Customs and Border Protection (CBP) vehicle life cycles, pursuant to the legislative requirement in the House Report 112-492. Extension of current vehicle replacement lifecycles was identified during an internal assessment of the CBP fleet program as an approach to help ensure CBP's highest priority capabilities are fully funded to achieve our core missions. The increasing vehicle replacement life cycle criteria results in resource savings that are necessary to offset growing personnel costs. CBP analyzed historical replacement trends and operational considerations, and this analysis determined that new replacement criteria for the motor vehicle fleet are appropriate. These replacement criteria should not impact mission performance, are in the best interest of taxpayers, do not jeopardize agency readiness or effectiveness, and are expected to be in place through Fiscal Year (FY) 2014.

Retention of mission capability and optimal use of taxpayer resources were the foremost considerations in formulating the recommended changes to fleet-replacement criteria. These considerations are evident in the transition to variable criteria used for the multiple CBP operating offices rather than proposing a "one size fits all" solution. In particular, operating environments and usage conditions are significant criteria for determining appropriate replacement cycles, as demonstrated in the recommendation that U.S. Border Patrol vehicle life cycles only extend a single year (see Table 1), in recognition of more rigorous operating demands placed upon those vehicles. Other offices' vehicles operate in less-demanding paved environments that allow additional years of service prior to replacement. CBP believes these recommended changes are operationally sound, fiscally responsible, and serve as an example of prudent stewardship of taxpayer resources.

	CBP Vehicle Replacement Cycle Criteria (values in years)									
	Other		Sedan		SUV		Truck		Van	
Office	Old	New	Old	New	Old	New	Old	New	Old	New
Internal Affairs	10	10	8	8	8	8	8	8	8	8
Air and Marine	10	10	8	10	8	10	8	10	8	10
Border Patrol	10	10	3	6	5	6	5	6	6	8
Field Operations	10	10	6	8	8	8	8	8	8	8
Information and Technology	10	7	8	10	8	6	8	6	8	10
Training and Development	10	10	6	6	6	6	6	6	6	6
Other Offices	10	10	8	10	8	10	8	10	8	10

The CBP Mobile Assets Program Management Office (MAPMO) conducted an analysis on 2009 and 2010 actual vehicle retirement data for all CBP operational offices and determined the average age of disposition for each vehicle type within each office (see Tables 2 and 3). MAPMO also determined the overall average retirement mileage and age by vehicle type for the entire agency for FYs 2009 and 2010 (see Table 4).

Table 2					
FY 2009 Average Retirement Age					
Office	Other	Sedan	SUV	Truck	Van
Air and Marine	19	10	11	13	19
Human Resource Management		4		4	
Internal Affairs		6	11		
Border Patrol	19	7	7	6	14
International Trade		5			
Field Operations	17	7	7	9	8
Grand Total	18	8	8	7	9

Table 3					
FY 2010 Average Retirement Age					
Office	Other	Sedan	SUV	Truck	Van
Commissioner			3		
Administration		5			7
Air and Marine		9	8	12	
Border Patrol	14	8	7	7	8
International Trade		5			7
Field Operations	15	7	7	8	8
Information and Technology					2
Grand Total	15	7	7	7	8

Table 4				
FY 2009-10 CBP Vehicle Retirement Statistics Analysis				
Vehicle Type	FY 2009		FY 2010	
	Average Mileage	Average Age (in years)	Average Mileage	Average Age (in years)
Other	46,603	18	38,716	15
Sedan	53,580	8	45,701	7
SUV	79,466	8	64,341	7
Truck	71,875	7	66,518	7
Van	42,558	9	43,725	8
Grand Total	62,947	9	54,200	8

Based upon the data analysis, MAPMO coordinated with CBP offices to determine revised criteria that better suited actual vehicle retirement performance and norms. The investment, for example, in border access roads improves the operating environment for the CBP fleet. The components provided feedback on acceptable retirement ages due to operating conditions and mission needs. The revised criteria more accurately articulate funding requirements to sustain the acquisition cycle of the fleet. The resultant benefit from criteria adjustments will provide cost avoidance in FY 2013 related to replacement of vehicles. Replacement criteria changes

defer the replacement of vehicles for 1-3 years, as illustrated in Table 1, depending upon office and vehicle type. Changes in these criteria ultimately reduce the number of times a vehicle is replaced over a 20-year period by approximately one turn and increase the reliance on appropriate vehicle maintenance funding. Specifically, under the old replacement criteria, 5,325 vehicles are eligible to be replaced in FY 2013; however under the new parameters, only 2,774 are eligible for replacement. This leads to a reduction in the gap between CBP vehicle replacement requirements and anticipated vehicle replacements based upon projected funding levels.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

U.S. Customs and Border Protections (CBP) core mission of securing our nation's borders, while facilitating the flow of legitimate travel and trade is complex and constantly evolving. As a result, sufficient maintenance and modernization of CBP's automated systems is critical to meet our organizational mandates and to achieve 24x7 availability of critical functionality to CBP officers and Border Patrol agents. Modernization efforts, in particular, often increase the efficiency of CBP's workforce as they have better and faster access to data and services that help frontline personnel to protect the nation's borders and facilitate the flow of cargo and people. CBP's automation framework comprises two large information technology structures: the Automated Commercial Environment (ACE) and Critical Operations Protection and Processing Support (COPPS).

ACE represents the most ambitious automation effort CBP has undertaken to date. It is being developed and deployed in phases. The deployed ACE capabilities have already yielded tangible benefits to CBP, other government agencies, and the trade community. As ACE functionality is introduced the associated segments of its predecessor, the Automated Commercial System (ACS), will be retired. The plan is to complete core ACE capabilities in the next three years and this will be accomplished by developing and deploying useful segments of capability on a periodic basis. As each segment is completed, users will have more robust, easy-to-use and accessible tools to aid in securing U.S. borders, facilitating legitimate trade, and targeting illicit goods. Incremental development and deployment will be obtained by utilizing an Agile development methodology and framework. Product backlogs as identified and prioritized by CBP internal customers will define the capabilities needed within the three year window for ACE core functionality that may include but not limited to: Cargo Release, Entry Summary Edits, Exports, ITDS, and Air Manifest. The program has made great progress reducing ACE Operations and Maintenance (O&M) costs, along with identifying internal sources of CBP funds to support remaining ACE development.

CBP manages the operational availability of its IT infrastructure via COPPS, which provides nearly all the CBP IT infrastructure necessary to operate and maintain the mission-critical IT systems used to secure the borders while facilitating legitimate trade and travel. COPPS funds also support the multi-year modernization of TECS, a key system for border enforcement that shares information concerning people who are inadmissible or may pose a threat to the United States, and Terrorism Prevention Systems Enhancement (TPSE), which focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations.

B. Budget Activities:

Automated Commercial Environment (ACE)/ International Trade Data System (ITDS)

ACE is an initiative originally designed to re-engineer trade business processes and modernize the IT systems that support them. Initially, ACE was created in response to the Title VI of the *North American Free Trade Agreement Implementation Act*, (P.L. 103-182, commonly referred to as the Modernization Act of December 1993), to focus on import processing. Later, other elements of customs modernization, such as enforcement, were included. An overarching goal of the Modernization Act was to place greater responsibility for compliance with import requirements on the trade community.

The terrorist attacks of September 11, 2001 changed ACE's focus from a multi-year modernization effort to an initiative to enhance national border security and expedite lawful trade. This allows for unprecedented integration of information and communication between CBP, other participating government agencies (PGAs), and the trade community. This change in direction incorporated the International Trade Data System (ITDS) into the ACE initiative. ITDS assists PGAs in making use of ACE to support their border security, product safety, and international trade missions by helping the PGAs design, develop, and integrate their requirements into ACE Cargo Release functionality. ITDS also provides guidance on the legal implications of PGA integration into ACE and serves as a forum for agency issues. Through ITDS, ACE provides a "single window" for filing and facilitating the exchange of trade and transportation information to improve business operations and facilitate lawful trade. A total of 47 government agencies are currently participating in the ACE/ITDS initiative.

CBP has aligned ACE with the DHS Quadrennial Homeland Security Review (QHSR) Mission 2: Securing and Managing our Borders. ACE helps reduce our Nation's vulnerability to changing threats without diminishing economic security, by providing threat awareness, prevention, and protection for the homeland. Specifically, ACE provides DHS personnel with automated up-to-date tools and information to help them decide, before a shipment reaches U.S. borders, what cargo should be targeted because it poses a potential risk and what cargo should be expedited because it complies with U.S. laws. ACE also supports the revenue collection activity under QHSR Mission 6, Providing Essential Support to National and Economic Activity.

Critical Operations Protection and Processing Support (COPPS)

COPPS funding supports COPPS IT infrastructure, TECS modernization, and TPSE. COPPS provides nearly all of CBP's IT infrastructure to operate and maintain the mission-critical IT systems used to secure the borders while facilitating legitimate trade and travel. The TECS Modernization Program is a multi-year project dedicated to modernizing TECS which will improve and sustain DHS and other Federal agency screening capabilities into the future and support new screening requirements and capabilities. It provides critical border enforcement and POE processing capabilities and is a key tool for the sharing of data information for consideration of benefits and regarding inadmissible individuals. TPSE focuses on enhancing our system infrastructure and provides continuous, uninterrupted availability of operational systems.

C. Budget Request Summary:

In FY 2014, DHS requests \$340,105,000 and 82 positions and 82 FTE for Automation Modernization.

II. Summary of FY 2014 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security U.S. Customs and Border Protection Automation Modernization:

2014 Adjustments-to-Base	13	13	830
2014 Current Services	81	81	140,830
2014 Total Request	81	81	140,830
Total Change 2012 to 2014	13	13	830

PPA: ACE/ITDS

CBP requests \$ 140.830 million for ACE/ITDS. This request includes:

- An increase of \$7.762 million to maintain current operational capability;
- An increase of \$68 thousand for pay increase;
- A decrease of -\$7.0 million for Realignment of Funding for Targeting Systems;

CURRENT SERVICES PROGRAM DESCRIPTION:

The Automated Commercial Environment (ACE)/ International Trade Data System (ITDS) is a CBP program designed to modernize the business processes and information technology systems essential to securing U.S. borders, facilitating the flow of legitimate shipments, and targeting illicit goods. ACE modernizes and enhances trade processing with features that provide account-based, consolidated, and automated border processing. It provides a centralized online access point to connect CBP, participating government agencies (PGAs), and the trade community. ACE interfaces with and consolidates information from targeting, the Automated Commercial System, border enforcement systems, and PGA systems. ITDS is the mechanism for coordinating intergovernmental involvement with ACE.

ACE/ITDS benefits include:

- Enhanced cargo control business processes for imports and exports;
- Reduction of costly labor- and paper-intensive activities;
- Reporting of trade data to multiple agencies via a single, secure, Internet based portal;
- Enhanced revenue collection capability; and
- Ability to view and manage trade activity from a national account perspective.

In addition, ACE allows other government agencies to better fulfill the mandate set forth under the *Security and Accountability For Every Port Act of 2006* (P.L. 109-347), which requires agencies with licensing and admissibility requirements to participate in ITDS. ACE is the platform through which the vision and goals of the ITDS will be achieved by facilitating collection and distribution of standard electronic import and export data required by all Federal agencies that participate in ITDS. Currently 47 government agencies are participating in the ACE/ITDS initiative. Once fully utilized, ACE will provide unprecedented interagency coordination and information sharing, ultimately making ACE the “single window” for the collection and dissemination of trade data.

The plan is to finish core trade processing capabilities in ACE in approximately three years and to modernize the collections process. At that time ACS will be fully turned off. In FY 2013 and FY 2014 CBP will accomplish this plan through achieving cost efficiencies in Operations and Maintenance requirements and redirecting those savings to additional development. Estimated savings in cost efficiencies is projected to be around five million annually that will be made available for completing core ACE functionality.

Capabilities Delivered:

To date, ACE has deployed capabilities, which address the first four of the five planned phases for the cargo business processing lifecycle:

- Pre-arrival (manifests are submitted prior to cargo entering United States (U.S.);
- Arrival (cargo arrives at U.S. Port of Entry);
- Cargo release (CBP releases cargo for consummation);
- Post-release (Entry Summaries are submitted (if they have not been pre-filed), reviewed, and liquidated, so that issues associated with payments of duty, taxes, and fees can be resolved; and,
- Collections (collecting duties, fees, and taxes of imports and exports).

The following table shows total revenue collected, broken down by Duties, Taxes and Fees (or Miscellaneous Collections):

	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
Total Revenue Collected	\$34,480,143,906	\$29,529,729,864	\$32,023,009,855	\$37,180,898,372	\$39,404,171,101
Actual Duty Collections	\$27,800,000,000	\$23,445,340,326	\$25,629,936,745	\$29,830,547,586	\$31,160,245,897
Actual Taxes	\$2,380,143,906	\$2,460,572,052	\$2,722,274,659	\$2,855,564,187	\$3,000,169,532
Actual Misc Collections	\$ 4,300,000,000	\$ 3,623,817,486	\$ 3,670,798,451	\$ 4,494,786,599	\$ 5,243,755,672

Table 1 lists each deployed ACE capability by release (i.e. a major set of related functionality implemented in production) and phase in the cargo business processing lifecycle. The deployed ACE capabilities strengthen national security, facilitate the flow of legitimate trade, and provide industry with new tools that save them money and help them comply with U.S. laws.

Table 1: Capabilities Delivered in ACE

<i>Capabilities Delivered in ACE</i>		
Phase	Capability	Significance
Pre-Arrival and Arrival	Screening & Targeting Capabilities <i>ACE dollars have funded development of the Automated Targeting System (ATS) since 2001</i>	<ul style="list-style-type: none"> Improves ability to keep dangerous cargo out of U.S. and focus government resources on higher risk shipments. Makes more data available for assessing security, safety, and compliance. Speeds import of legitimate goods, enhancing economic viability for U.S. consumers. Advances data for 100 percent of ocean imports for targeting pre-departure, identifying threats before arrival in the U.S. Modernizes “pipeline” that provides commercial cargo data to targeting system, allowing CBP to be more efficient.
	Truck Manifest (Delivered 2007)	<ul style="list-style-type: none"> Estimated savings of \$39.5M/year for CBP processing.* 33 percent faster processing with ACE electronic manifest, increasing efficiencies for CBP and business. Complies with 2002 Trade Act, requiring advanced electronic submission of trade data. Automates paper process, reducing costs for trade and CBP and providing nationwide tracking. Identifies high risk shipments prior to arrival in U.S., allowing CBP to stop risky cargo before it reaches the U.S. Expedites processing of legitimate cargo at time of arrival, increasing efficiencies for CBP and trade. Provides data to the Federal Motor Carrier Safety Administration (FMCSA) for enforcement of truck safety border project.
	Rail and Sea Manifest (Delivered 2012)	<ul style="list-style-type: none"> As of 9/29/12, 100 percent of rail and sea manifests are entered in ACE, providing easier access to information and increasing the efficiency of CBP Officers (CBPOs). Advances goal of processing all imports on single, “Multi-Modal” platform, reducing cycle time. Identifies high risk cargo prior to arrival in U.S., allowing CBP to stop risky cargo before it reaches the U.S. Facilitates pre-arrival processing of legitimate cargo, enhancing economic viability for trusted traders. 100 percent of in-bond data for rail, ocean and truck shipments is entered in ACE, allowing for simpler and quicker CBP processing and better shipment visibility and control, a GAO-identified issue. (PGAs) are now able to directly refer or hold certain cargo for more review, increasing security and protection for U.S. consumers.
	Export Manifest via Document Image System (Pilot initiated April 2012)	<ul style="list-style-type: none"> Electronic submission of ocean carrier manifests which were previously submitted on paper, significantly increasing efficiencies. Promotes President’s National Export Initiative (NEI). Data collected allows export manifests to link to targeting for the first time.
	Export Processing (Delivered draft, June 2012)	<ul style="list-style-type: none"> Promotes President’s National Export Initiative (NEI). Complies with 2002 Trade Act, requiring advanced, electronic submission of export data. New electronic availability of export data improves targeting for high risk exports prior to departure.

Cargo Release	Simplified Entry – First part of ACE Cargo Release (Initial pilot for air cargo, delivered May 2012)	<ul style="list-style-type: none"> Streamlines data required from Trade, reducing costs to industry. Allows Trade to provide data earlier in transportation chain and update data up until conveyance arrival, helping CBP pinpoint risks and increasing efficiencies for both CBP and Trade.
	PGA Interoperability	<ul style="list-style-type: none"> Previously unavailable data is now provided from ACE to PGAs for safety targeting on imports, increasing all agencies’ ability to segment risk and focus on those shipments with security, health and safety, and admissibility concerns. Consumer Products Safety Commission (CPSC) and Food Safety Inspection Service (FSIS) are receiving data. Expansion to other agencies in progress.

Phase	Capability	Significance
Post-Release	ACE Accounts (Initial delivery 2003 with corresponding capabilities growing with subsequent ACE deliveries)	<ul style="list-style-type: none"> Estimated savings of \$0.2M/year in CBP processing* Online, free access to data previously only available to CBP provided to 590 PGA Users from 47s PGAs and 20,051 Trade accounts Enables account-based processing vs. transaction by transaction processing, which benefits large traders by aggregating import information for subsidiary entities (e.g. GE has 495 importer numbers). Supports CBP priority program Centers of Excellence and Expertise by enabling account-based approach to traders.
	ACE Reports (Initial delivery 2003 with corresponding capabilities growing with subsequent ACE deliveries)	<ul style="list-style-type: none"> Estimated savings of \$4.2M/year in ACE reports and ACE navigational capabilities.* Provides trade with simple technology to access their data not previously available. Equips CBP with easy to access data and visibility to information across agency. Meets need for making information available, as evidenced by >60,000 ACE reports run per month by CBP, PGA and Trade users.
	Monthly Statement Payment (Delivered 2004)	<ul style="list-style-type: none"> Modernizes collection capability to better align with business practice, resulting in current 63 percent of duties and fees paid via ACE. Capability to migrate from daily payments to interest-free monthly payments, realizing significant cash flow benefits for importers and brokers.
	Entry Summary Filing (Delivered 2009)	<ul style="list-style-type: none"> Estimated savings of \$1.6 million annually in CBP processing and validation costs.* Paperless filings in ACE allow courier cost reductions as high as 43 percent. Replacement of paper process with automated Census overrides and warnings increases efficiencies and reduces costs for government and industry. Allows Trade better access to information by expanding system queries. Allows CBP to screen incoming data, resulting in more efficient reviews and cost reductions for CBP and Trade.
	Antidumping/ Countervailing Duty transaction processing and case management (Delivered 2010)	<ul style="list-style-type: none"> Estimated savings of \$0.6 million annually in CBP processing costs.* Conversion of AD/CVD case tracking process between CBP and Department of Commerce from paper-based to electronic greatly simplifies the process for CBP, DOC, and Trade and provides online, nationwide visibility to the data

Courtesy Notice Report (Delivered 2011)	<ul style="list-style-type: none"> Estimated savings to CBP of \$3.4 million annually. Delivery of this report replaces a previous report that CBP was required to print and post.
Electronic Entry Summary Corrections (Delivered 2011)	<ul style="list-style-type: none"> Automation of the paper-based system allows Trade to electronically correct previously submitted entry summary data. Automated CBP screening provides risk assessment of corrected data for the first time. Uniform process increases the predictability of the supply chain and reduces costs for Trade.
Document Image System for Entry Summary (Capability delivered 2010, Pilot initiated April 2012)	<ul style="list-style-type: none"> Trade can electronically supply documentation that was previously required in paper format.
Responses to CBP Information Requests (Delivered 2010)	<ul style="list-style-type: none"> Allows CBP to request and Trade to provide additional information online. Nationwide visibility eliminates duplicate requests to business community, reducing costs to trusted traders and thus reducing costs to the end consumers.

* Estimates are based on an independent study from Industrial Economics, Inc., 3/12/12. Dollar savings is based on monetization of CBP labor hour savings.

PROCUREMENT ACTIVITIES

FY 2012 Activity Funding \$140,000	FY 2013 Activity Funding \$135,857	FY 2014 Activity Request \$140,830
Automated Commercial Environment (ACE)/International Trade Data System (ITDS)	ACE will form the one system that provides a single window for CBP to interact, manage, and oversee the import and export data, custodial revenue management, and enforcement systems to provide end - to - end visibility of the entire trade cycle. In addition, ACE will reduce Government and private sector costs through the elimination of unnecessary paperwork and enable electronic processing of manifests, entry, and other trade documentation. With more automated tools and information CBP will be able to decide, before a shipment reaches U.S. borders, what cargo to target for further investigative action because it poses a potential risk, and what cargo to expedite because it complies with U.S. laws.	

Discussion of Selected Adjustments-to-Base

Due to the federalization of contractors, the Salaries and Benefits (S&B) requirement has increased by \$3.56 million, totaling \$12.1 million. The program is using these savings to continue developing ACE. The total FTE supported by the ACE PPA has increased from 68 to 81.

2014 Current Services	1	1	194,275
2014 Program Change	-	-	5,000
2014 Total Request	1	1	199,275
Total Change 2012 to 2014	-	-	5,000

CBP requests \$199.275 million for COPPS. The request includes:

- An increase of \$5.0 million for TECS Modernization;

CURRENT SERVICES PROGRAM DESCRIPTION:

The Critical Operations Protection and Processing Support (COPPS) PPA supports the following three areas, which are described in greater detail below:

- **COPPS IT Infrastructure:** Operation and maintenance of a complex network of hardware, software, and data switches and routers that must be in place to transmit screening, targeting, terrorist watch list, and apprehension data from CBP’s mission-critical IT systems to the front line.
- **TECS Modernization:** Multi-year project that will enhance CBP’s passenger screening capabilities by developing and deploying a modernized TECS to transition to the CBP common IT infrastructure and to better meet operational needs of CBP officers at our nation’s POEs.
- **Terrorism Prevention Systems Enhancement (TPSE):** 24x7x365 systems operational availability to meet processing and storage/backup requirements for passenger screening.

COPPS IT Infrastructure

The COPPS IT infrastructure is the data network that supports the data storage, transmission, and delivery of all vetting/screening data from CBP and/other DHS data centers to CBP’s front line. It is a complex network of field equipment hardware, software, data routers and switches in each of CBP’s 1,200 field locations that connects to the data center to provide data storage, retrieval, engineering, network monitoring, and other capabilities. The IT infrastructure supports the day-to-day requirements of CBP’s mission support personnel and provides connectivity and data transmission for users within CBP, PGAs, and CBP’s trade and travel partners. It also connects users to a vast array of data related

to operational areas of passenger and cargo processing, targeting, and border enforcement, as well as mission support areas of finance, human resource, and training. The IT infrastructure enables users of CBP applications to connect to CBP's mission critical applications (hosted at CBP and DHS data centers), to access data necessary to conduct the mission of CBP nearly every minute of every day.

As such, it is critical that CBP's IT infrastructure is secure, available, and reliable without interruption to enable CBP officers and agents to make timely decisions and take appropriate action to protect our Nation. The network and application systems must also be accessible to meet growing pre-screening requirements in response to changing risks and threats and the growth of international trade and immigration. On a typical day CBP systems process data from over 1,000,000 inbound passengers; 350,000 passenger vehicles; 60,000 truck, rail, & sea containers; 2,500 aircraft; 550 vessels; and 85,000 merchandise entries, and collect over \$74 million in revenue. The processing of these passengers, vehicles, and containers is dependent on the availability of and quick data response from CBP's IT infrastructure to transmit passenger and cargo vetting and screening data to the front-line. CBP's infrastructure provides rapid access to vetting data so that admissibility decisions can be made by CBP's front line within seconds and pre-departure manifest data from world-wide locations can be received and vetted, providing a board/no-board response before the departure of international flights destined for the United States. The applications supported by CBP's IT infrastructure allow for a unified border presence and provide for more efficient and effective sharing of information among trade and law enforcement agencies.

CBP Infrastructure serves a variety of Federal, state, local, and international government agencies. These agencies have varying missions and strategic goals but collectively their purpose is to minimize threats to the American people. The IT systems are vital tools that CBP and other federal agencies depend on to improve the security of our borders and support our Ports of Entry. The systems assist CBP Officers in identifying potential threats, including terrorists, weapons of mass destruction and bioterrorism. The systems provide the means by which U.S. Criminal and Trade Laws are enforced and provide the capability to collect tariffs and taxes related to international trade and commerce.

The majority of COPPS supports on-going necessary operations and maintenance of network engineering services, data center services, Technical Support Desk (help desk), annual hardware/software licensing and maintenance, and e-mail. Network Services include the hardware, software, and communication services that allow any two computers or other devices too quickly and effectively exchange data. These services are described in greater detail below.

Data center services	The facilities used for equipment and the storage, management, and dissemination of electronic data and information to users. Data center operations include the management and oversight of data center facilities and computer operations activities. For example validating and documenting any change made to production systems; providing email services, and incident reporting from the Situation Room. These services support CBP activities 24x7x365.
Help desk services	Provide information, assistance, and 24x7x365 support to troubleshoot problems with computers and other information technology products. The Technology Service Desk is the initial single point of contact for reporting system, application, email, LAN, communications, and

	hardware problems for CBP IT worldwide.
Hardware	Includes backup generators, scanners, hand held computers, a network operations center, Local and Wide Area Networks, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/application servers, modems, and Value Added Network (VAN) connections. Software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, Section 508 tools, testing tools, LAN/WAN administration tools, and other management tools.
Email Services	Include the acquisition, deployment, and ongoing support for email platform hardware and software. Examples of costs included in email services are system software (e.g. Microsoft Outlook), hardware (servers, workstations, storage – Storage Area Network (SAN), tape backup), diagnostic tools, troubleshooting tools, antivirus, intrusion detection, and management tools for change, configuration and release management.

All of CBP’s major mission-critical systems, applications, and programs, as well as mission support applications, depend on the information technology infrastructure to access and transmit data from some 3,600 CBP facilities to the CBP National Data Center (NDC). Listed below are some of CBP’s major applications:

- Automated Commercial Environment (ACE) / International Trade Data System (ITDS);
- Automated Commercial System (ACS);
- TECS;
- Automated Export System (AES);
- Advanced Passenger Information System (APIS) and e-APIS;
- CAOS (Combined Automated Operating System);
- Free and Secure Trade (FAST);
- Seized Asset and Case Tracking System (SEACATS);
- CBP’s Financial and Human Resources Management Systems;
- Port Radiation Identification Detection and Evaluation (PRIDE) system;
- Enterprise Data Warehouse system;
- Border Patrol Enforcement Tracking System 2 (BPETS2);
- Automated Targeting Systems (various ATS environments);
- Container Security Initiative (CSI);
- Secure Freight Initiative (SFI);
- Global Enrollment System/Global Online Enrollment System (GES/GOES);
- Electronic System Travel Authorization (ESTA);
- US Passport;
- Western Hemisphere Travel Initiative (WHTI);
- DHS Secure Flight;
- DHS Router;
- Enterprise Geospatial Information Services (eGIS);
- ENFORCE (E3); and

- Virtual Learning Center (VLC).

These systems directly support CBP’s mission. Many of these IT systems are funded by and described under other programs and/or accounts, but all are dependent on the basic IT infrastructure funded primarily by COPPS.

TECS Modernization

TECS Modernization is also funded within the COPPS PPA. TECS is a key passenger border enforcement system for CBP and DHS and plays an essential role in the screening of travelers entering the U.S. and supporting the screening requirements of other federal agencies. Maintaining TECS functionality is critical to CBP’s border enforcement mission. The current TECS system is more than 20 years old and uses technology that will be increasingly difficult to support in the future. It is also expensive to maintain and is not easily adapted to meet operational challenges. The following multi-year TECS Modernization projects will update and improve the system:

Secondary Inspection	Consolidates and replaces the functionality of three legacy processes for supporting passport control (immigration), baggage control, and agriculture inspections as well as the ability to view the results of previous secondary inspections. It will also modernize inspection logs, where additional information is documented regarding physical inspection of travelers, vehicles, or their belongings. It also navigates to the adverse actions application. This project will migrate the secondary inspection data from the legacy system to the target databases.
High Performance Primary Query (HPPQ)	Supports person and vehicle searches to better integrate available data within TECS and improve the effectiveness and efficiency of primary inspections. The Advanced Passenger Information System (APIS) will also be modernized under this project. This is the first TECS Modernization project to initiate the migration of data from the legacy system to the target databases.
Travel Document and Encounter Data (TDED)	Provides improved functionality for querying and validating travel documents and encounter data for passengers and conveyances. This project will support the migration of travel document and encounter data from the legacy system to the target databases.
Lookout Record Data and Services	Migrates mainframe-based lookout records to target infrastructure and provide CBP and will support the creation and maintenance of the lookout records. The project will also support internal CBP systems and external agencies with access to lookout records and TECS screening/vetting via services.

Primary Inspection Processes	Completes modernization for existing primary applications (Air, Sea, and Land), transitioning data and processing off of the legacy system and onto the modernization infrastructure and target databases. Business operations will be modernized to support random referral and operational messaging to primary officers (CAOS - Combined Automated Operating System).
------------------------------	--

TECS provides critical POE border enforcement and is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record “watch list” processing for DHS and other agencies (this includes maintenance of lookout records and vetting services against these records with PGAs and international partners);
- Supports primary and secondary inspections for persons and conveyances at the POEs;
- Tracks crossing history for persons and conveyances;
- Receives and processes passenger manifests from carriers;
- Provides screening services for more than 20 PGAs, trusted traveler programs, ESTA, and supports targeting analysis;
- Supports more than 70,000 users from over 20 federal agencies responsible for screening to determine benefits, traveler processing, investigations, case management, and intelligence;
- Provides entry/exit data to other systems/agencies;
- Provides a real time interface with Federal Bureau of Investigation’s National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on-line-queries of wants/warrants and criminal history records;
- Provides a real-time interface to National Law Enforcement Telecommunications System (Nlets) for on-line queries of driver’s licenses, vehicle registration and state wants/warrants from all 50 states and Canada;
- Provides a real time interface with the US-VISIT Automated Biometric Identification System (IDENT) system for collection and verification of fingerprints of non-U.S. citizens;
- Provides a real-time interface to travel document issuing authorities (the travel document photos and biographic data are displayed at primary and secondary inspection, and made available for data share with other federal stakeholders as provisioned in the memoranda of understanding. These issuing authorities include the Department of State, U.S. Citizenship and Immigration Services, CBP’s Trusted Traveler Programs, departments of motor vehicles of states and Canadian provinces with enhanced driver’s licenses, and tribal authorities);
- Processes over two million transactions daily; and
- Supports the case management solution for ICE investigations including functions such as Investigative Case Management, Money Laundering Tracking and Reporting, Casino and Bank Secrecy Act data, Telephone Analysis and other functionalities unique to ICE’s mission.

Terrorism Prevention Systems Enhancements

Terrorism Prevention Systems Enhancements (TPSE) is also funded within the COPPS PPA. TPSE was initiated in FY 2008 to ensure uninterrupted availability of IT systems and monitoring in the

Passenger and Targeting areas by enhancing critical IT infrastructure. The TPSE infrastructure enhancements will be implemented at CBP’s National Data Center (NDC), the two DHS Data Centers, and targeted POEs, thereby improving availability and reliability. TPSE will further CBP’s efforts to provide uninterrupted availability of operational systems to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems. Strategic investments such as TPSE will ensure that the critical infrastructure services that enable continuous passenger systems operations are improved to meet the mission demand and withstand threats which could compromise system availability.

PROCUREMENT ACTIVITIES

FY 2012 Activity Funding \$139,141	FY 2013 Activity Funding \$140,299	FY 2014 Activity Request \$139,141
Infrastructure	CBP Infrastructure is the Information Technology (IT) backbone that supports all of CBP’s systems. The systems supported by CBP Infrastructure allow for a unified border presence and provides for more efficient and effective information sharing amongst trade and law enforcement agencies. Funding for Infrastructure is funded out of these PPAs: APHIS, Immigration User Fee, HQ01 Management & Administration at The Ports of Entry, and HQ01 Management & Administration Between the Ports of Entry. Total funding for this procurement activity is \$530,799 in FY 2012, \$531,957 in FY 2013, and \$470,694 in FY 2014.	
FY 2012 Activity Funding \$50,000	FY 2013 Activity Funding \$50,000	FY 2014 Activity Request \$55,000
TECS Modernization	The focus of CBP TECS Mod is to improve the technological and data sharing functions at and between the Ports of Entry (POEs) and to improve Primary and Secondary Inspection processes at border POEs. CBP TECS Mod will also modernize the core TECS subject record and support services for all TECS users. This modernization effort predominantly includes new applications and host system components that are specific to the CBP mission.

Description of Item

DHS requests a \$5 million increase to the TECS Modernization program. This modernization effort is to be completed in September 2015. TECS is a key border enforcement system for CBP and DHS. As such, TECS provides critical processing capabilities for the sharing of information about people who are inadmissible or may pose a threat to the security of the United States. TECS is the primary lookout record database for all of DHS and plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other federal agencies.

Justification

Modernizing TECS functionality is critical to CBP's border enforcement mission. The current TECS system is more than 20 years old and uses technology that will be increasingly difficult to support in the future and expensive to maintain. The multi-year Modernization project will employ an incremental approach that addresses seven objectives as established in the CBP Mission Needs Statement:

1. Reduce the possibility of missing someone who should be intercepted by improving data integration and search capabilities.
 - a. TECS Modernization will improve both the integrity of data as well as search capabilities so front-line CBP officers can effectively make border crossing decisions;
2. Improve access to person-centric information by Government officials.

- a. TECS Modernization will provide an updated system with better access, improved information sharing, and tighter security over sensitive person-centric information;
- 3. Improve the effectiveness and efficiency of secondary inspections.
 - a. TECS Modernization will simplify and streamline one of the most important CBP functions, Secondary Inspections. TECS Modernization will eliminate the need to re-enter redundant data and make it easier for end users to do their jobs;
- 4. Improve flexibility to incorporate new capabilities and respond to evolving threats.
 - a. TECS Modernization will provide a more modular environment, more receptive to changes for meeting critical business objectives;
- 5. Provide a highly reliable and scalable system with quick response times.
 - a. TECS Modernization is built on a much more scalable foundation so that CBP can grow and meet new emerging requirements;
- 6. Eliminate dated technologies that are no longer able to support the CBP mission over the long term.
