PPA Mission Statement

In FY 2010, ICE has included several information technology (IT) transformational initiatives into the Automation Modernization program: ICE Law Enforcement Systems Modernization, ATLAS Program – Infrastructure, Cyber Security Modernization, Tactical Communications, Detention and Removals Operations (DRO) Modernization program, and the replacement of ICE’s Financial System.

The Automation Modernization program will allow ICE to improve information sharing across the Department of Homeland Security (DHS) and ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

Summary Justification and Explanation of Changes

	Actual	Enacted	Request	Change
	0	0	0	0
Salaries and Benefits	\$655	\$1,696	\$4,088	\$2,392

Salaries and Benefits include costs of 13 new FTE's in FY 2010) to provide management and oversight for Automation Modernization programs. A \$2,392,000 increase is requested for 25 additional positions required to manage the increased number of programs funded through Automation Modernization..

	Actual	Enacted	Request	Change
Travel	---	15	100	85

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes a \$85,000 increase.

	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	---	108	858	750

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Includes Blackberry/pager/cellular phone (land line). The FY 2010 request includes a \$750,000 increase.

	Actual	Enacted	Request	Change
	0	0	0	0
Advisory and Assistance Services	14,399	20,451	39,494	19,043

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign government, State and local government, tribes, etc.) as well as from other units within the Federal Government. A \$19,043,000 increase is requested to support new Automation Modernization initiatives.

	Actual	Enacted	Request	Change
	0	0	0	0
Other Services	---	110	390	280

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. For Automation Modernization costs associated with payroll, recruitment, human resource services, background investigations, and permanent change of station (if required) are included. A \$280,000 increase is requested to support 25 new positions.

	Actual	Enacted	Request	Change
	0	0	0	0
Purchase from Government Accounts	1,992	31	50	19

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. For Automation, costs are associated with career development training for 25 positions. The FY 2010 request includes an increase of \$19,000.

	Actual	Enacted	Request	Change
	0	0	0	0
Operation & Maintenance of equipment	2,000	27	2,700	2,673

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. This request includes \$2,673,000 increase.

	Actual	Enacted	Request	Change
	0	0	0	0
Supplies & materials	---	13	20	7

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes a \$7,000,000 increase.

	Actual	Enacted	Request	Change
	0	0	0	0
Equipment	11,654	34,549	62,300	27,751

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. For Automation Modernization programs, costs are primarily associated with updated application hardware environments, off-the-shelf software licenses upon which to run modernized ICE applications, customized software to enhance existing ICE applications, and tactical communications equipment (including radios, infrastructure such as repeaters, fly-away communication kits and mobile law enforcement communications vans). The \$27,751,000 increase is requested to support the increased number of programs funded through Automation Modernization.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement **Construction** **Appropriation Overview**

I. Appropriation Overview

A. Mission Statement for Construction:

The Construction Program provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Detention and Removal activities. The Construction account funds are available until expended.

B. Budget Activities:

The ICE Construction Program has the authority to plan, design, and construct: housing, and processing, medical, administrative, and support facilities not consistent with privatization to support the detention of aliens, as well as perform repair and alteration of existing structures.

C. Budget Request Summary:

ICE requests no additional funding for FY 2010. ICE will use carry-forward resources to perform necessary repairs of facilities and expenditures. The 9 current on-board positions will be transferred from Construction to Salaries and Expenses (S&E) to fund salaries and operations and maintenance (O&M) on existing ICE structures.

FY 2010 Program Change	-	-	-
FY 2010 Request	-	-	-
Total Change 2009-2010	(9)	(9)	(5,000)

ICE requests no new funding for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

ICE relies on a mix of Service Processing Centers (SPCs) that it owns and operates, as well as more than 300 Inter-governmental Service Agreement facilities owned by State and local governments and contractor-owned and operated facilities to house individuals who have entered the United States illegally and are undergoing adjudication. At present, approximately 89 percent of the detainee population is housed at contractor or state or local government-owned and operated facilities, with the remaining 11 percent housed at seven ICE-owned SPCs. The SPCs are located in: Aguadilla, Puerto Rico; Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas.

The number of illegal alien detainees held in the DHS/ICE system has risen significantly in recent years, with a corresponding increase in the cost for housing and serving this population. Projections show this population continuing to grow for the foreseeable future, further burdening the ICE-owned and operated SPC facilities.

For this reason, ICE initiated a three-phased study to determine if some level of privatization of detention facilities would be cost-effective for ICE. Phase I of this study consisted of a review of physical conditions and market values of the SPCs, development of a cost model, and development of strategic options along a spectrum from status quo to full privatization. Phase I was completed in March 2007. The results of Phase I indicated that a privatization option (either ICE-owned/contractor-operated or contractor-owned/contractor-operated) showed sufficient promise in order to warrant proceeding with Phase II of the study. Phase II of the study has been completed. Phase II continued and expanded the analysis begun in Phase I, and addressed specific privatization issues, high level cost and benefits, and transition requirements on an individual facility basis. ICE is currently reviewing the Phase II results to determine appropriate next steps. ICE has included in the Budget a general provision that would allow the Secretary to sell surplus facilities if such sales are deemed to be in the best interest of the Federal government.

In FY 2008, ICE used the \$16.5 million Construction Program funding for alteration and repairs to existing ICE-owned SPCs based on priorities identified in the facility assessment completed in FY 2007.

In FY 2009, ICE is using carry-forward funding to maintain ICE-owned facilities.

In FY 2010, ICE will use carry-forward funding to maintain ICE-owned facilities.

G. Capital Investment and Construction Initiative Listing

U.S. Immigration and Customs Enforcement Construction

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain illegal aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country. ICE's Office of Detention and Removal (DRO) administers a national detention program that uses funding appropriated specifically for the care of these aliens and includes the transportation, housing, subsistence, medical care, and guard service necessary to provide safe and humane environments for the detainee population and detention staff. The responsibility begins when a detainee enters DRO custody and continues until the alien can be released into the community or removed from the United States.

The ICE Construction Program provides housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These expansion projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

In FY 2010, zero dollars are requested in support of the Construction Program. Carry-forward funds will be used for maintenance of existing ICE-owned SPCs.

Facility Repair & Alterations

1. Project Description, Justification, and Scope

Repair and alteration projects are continually identified at existing ICE owned facilities. These projects are not capital construction projects, but are repair and alteration projects necessary to maintain government owned facilities and ensure they comply with life safety requirements and code compliance.

2. Significant Changes

In FY 2010, carryover funds within the no-year Construction account will be used for emergency repairs and alterations. There are no new planned construction projects planned for FY 2010, as reflected in the table below.

3. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)
FY 2010 Budget Request	-	-	10/01/2009	9/30/2010	\$0	\$0

4. Schedule of Project Funding

	Dollars in Thousands				
	Prior	FY 2008	FY 2009	FY 2010	Total
Obligation (actual and planned)	\$5,872	\$16,500	\$0	\$0	\$22,372
Expenditure (actual and planned)	\$5,872	\$16,500	\$0	\$0	\$22,372

Repair and alteration projects are not capital construction projects and are not illustrated in the same manner as capital construction projects. Breakdown of projects related to expenditures is modified to reflect segments of repair and alteration.

5. Method of Performance

All detention-related projects are currently planned, managed, and monitored within the ICE Office of Asset Management. ICE/OAM entered into a MOU with the United States Army Corps of Engineers (USACE) to provide environmental documentation, planning, design, construction, procurement, and management of services to include construction design, planning, and project management.

6. Budget Allocation to Programs

	Allocated Budget (Thousands)
Program	FY 2010
Construction	\$0
Total	\$0

7. Compliance with Applicable Public Laws, Regulations, Standards and Executive Orders

The United States Army Corps of Engineers (USACE) is responsible for the compliance of all applicable laws, code compliance, regulations and standards for all ICE projects. The services being provided by USACE are managed and monitored by ICE/OAM.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, including Uniform Building Code (UBC); Building Officials & Code Administrators International (BOCA); Standard Building Code (SBC); and International Building Code 2000 (IBC)
- National Fire Protection Association (NFPA) Standard 101 Life Safety Code
- National Electric Code

ICE Facilities must also comply with the ICE Detention Design Guidelines (2002 edition), and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities should comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG)

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Immigration Inspection User Fee

I. Appropriation Overview

A. Mission Statement for Immigration Inspection User Fee:

The ICE Immigration User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C 1103, 1356, section 286, the Immigration and Nationality Act. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. These ICE activities encompass: expanding, operating, and maintaining information systems for nonimmigrant control; detecting fraudulent documents used by passengers traveling to the United States; investigating and establishing the government's legal position regarding all detentions; providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry; and providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents.

B. Budget Activities:

The Immigration Inspection User Fee will fund 276 positions.

C. Budget Request Summary:

ICE requests 276 positions, 276 FTE, and \$109,799,505 in new collections and corresponding spending authority for FY 2010. The decrease from FY 2009 represents a projected decrease in fee collections based on reduced passenger volume and will allow for the funding of 1,380 detention beds.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Immigration User Fee account was established as a repository for fees collected from arriving airline passengers for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended. U.S. Customs and Border Protection has reported a decrease in fee collections due to a decline in air travel and a corresponding reduced passenger volume.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement **Breached Bond Detention Fund**

I. Appropriation Overview

A. Mission Statement for Breached Bond Detention Fund:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund.

B. Budget Activities:

Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

C. Budget Request Summary:

For FY 2010 ICE requests 63 positions, 63 FTE, and \$75,000,000 for new collections and corresponding spending authority. This is an adjustment to base of \$15 million over the FY 2009 enacted amount. This will allow for the funding of an estimated 1,842 detention beds.

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of the first \$8,000,000 are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

All collections in excess of the first \$8,000,000 are deposited as offsetting collections into the Breached Bond Detention fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

ICE uses these resources to support bed space and related staff. These resources will support an estimated 1,842 beds in FY 2010. These funds also support 63 staff including bond control specialists, immigration enforcement agents, and administrative personnel.

PPA Mission Statement

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$850	\$1,296	\$1,620	\$324

Salaries and Benefits includes costs for 63 FTEs. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$44	\$65	\$81	\$16

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$71	\$81	\$101	\$20

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$58	\$176	\$220	\$44

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Rent	\$1	\$3	\$4	\$1

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous ch:	\$201	\$223	\$279	\$56

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$27	\$52	\$65	\$13

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Other Services	\$11,326	\$12,030	\$15,038	\$3,008

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Purchase from Government Accounts	\$635	\$644	\$805	\$161

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Operation & maintenance of facilities	\$38,168	\$18,937	\$23,671	\$4,734

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Operation & Maintenance of equipment	\$20	\$3,953	\$4,941	\$988

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Subsistence & Support of Persons	\$540	\$506	\$633	\$127

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Supplies & materials	\$1,836	\$2,156	\$2,695	\$539

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes proportionate share of overall Breached Bond increase.

	<u>2008 Actual</u>	<u>2009 Enacted</u>	<u>2010 Request</u>	<u>2009 to 2010 Change</u>
Equipment	\$3,061	\$495	\$619	\$124

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes proportionate share of overall Breached Bond increase.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement **Student and Exchange Visitor Program**

I. Appropriation Overview

A. Mission Statement for Student and Exchange Visitor Program:

The Student and Exchange Visitor Program's (SEVP) mission is to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool to assist in keeping our Nation safe while facilitating the participation of students and exchange visitors in the academic programs in the United States.

B. Budget Activities:

SEVP administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP also provides outreach and training for SEVIS users. SEVIS is used by ICE's Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements.

C. Budget Request Summary:

ICE requests \$120 million and 387 positions, 387 FTE, for SEVP in FY 2010. This includes an adjustment-to-base from the previous year of 126 FTE. The current fee level, increased in FY 2009 will allow ICE to:

- Enhance SEVIS functionality and data integrity;
- Increase outreach and training provided to the academic community;
- Enhance the sharing of SEVIS data with federal partners; and
- Increase the monitoring and oversight of schools hosting foreign students through the recertification process, allowing for greater enforcement of immigration laws.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (ICE) Student and Exchange Visitor Program (SEVP) works to enhance national security. The program accomplishes this by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP facilitates the participation of students and exchange visitors in the academic programs in the United States and works to ensure that the programs are not used to illegally allow entrance into the country.

SEVP administers the Student and Exchange Visitor Information System (SEVIS). SEVIS collects, maintains and provides information on foreign students, exchange visitors and their dependents on F, M, and J visas while studying in the United States. SEVIS also maintains information on the schools and program sponsors authorized to use SEVIS and host foreign students and exchange visitors. SEVIS assists in the identification of those who are not in compliance with visa rules and immigration law and who may be a threat to national security.

SEVIS is ICE's core technology in this critical homeland security mission. It is the first web-based system that provides real-time, up-to-date information on F, M, and J visa holders. The system can be

accessed at any time making it an effective law enforcement tool used by agencies within the Department of Homeland Security, Department of State, and Department of Justice. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. SEVP and CEU also use SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements. Information maintained in SEVIS is instrumental in supporting ICE's role in conducting human smuggling investigations that identify and prosecute criminal organizations involved in the transporting and harboring of illegal aliens into the United States.

All prospective students and exchange visitors are required to pay a SEVP processing fee electronically or by check using the Form I-901 (currently fees are \$100 for most and \$35 for some exchange visitors) prior to seeking a visa at consulates and embassies overseas. This fee, in addition to the fees collected from schools seeking certification to host nonimmigrant students, provides the full funding for SEVP, including CEU agents that support enforcement of SEVP policies and regulations.

Key Accomplishments

Significant SEVP accomplishments in FY 2008 included:

- Ensuring the continued success of SEVIS fee payment processing by working with the Department of the Treasury to facilitate timely and accurate fee collections and payments;
- Improving SEVIS interoperability and data sharing capabilities through the development of SEVIS II, a more robust and comprehensive successor system to SEVIS;
- Continuing to provide effective training of SEVIS users;
- Maintaining outreach to the academic community;
- Increasing enforcement of school compliance requirements; and
- Completing a comprehensive fee rule and sent it through the rule-making process.

FY 2009, planned accomplishments include:

- Implementation of the revised fee rule, which will result in a doubling of fees taken in. The increase in fees will result in a spending authority increase from \$65,900,000 in FY 2008 to \$120,000,000 in FY 2009;
- Development of the more advanced Student and Exchange Visitor Information System II (SEVIS II) database to succeed the current SEVIS system;
- Increase in staffing to 155 full-time employees (FTEs) for CEU activities;
- SEVP, to be staffed by 64 FTEs which will provide assistance to SEVP's stakeholders; and
- Forming a recertification unit within SEVP, to be staffed by 33 FTEs to enforce a 2002 Congressional requirement to recertify all certified educational institutions.

For FY 2010, SEVP will continue to work on the existing initiatives and further execute activities and programs newly established in FY 2009. Also, SEVP is working towards having SEVIS II online in FY 2010. The current SEVIS system will be maintained for at least part of FY 2010 as any migration needs are met, after which SEVIS will be shut down.

Below is a more detailed analysis of the accomplishments and goals for the ongoing compliance enforcement, SEVIS II, liaison and recertification initiatives that will be new in FY 2009.

Compliance Enforcement: The budget supports expanded ICE's SEVIS compliance enforcement efforts that are essential to support ICE and DHS' strategic objectives to prevent the unlawful exploitation of our Nation's people and institutions by nonimmigrant's violating laws within the homeland, and to enforce nonimmigrant compliance with our immigration, customs, and criminal laws. Significant accomplishments in FY 2008 included:

- Expanding the Compliance Enforcement program by hiring additional special agents, program managers and support staff;
- Establishing a visa waiver enforcement program that applies sophisticated name analysis software to investigate violators that pose an elevated risk to national security; and
- Reducing the nation's vulnerability to exploitation of nonimmigrant visas by increasing compliance enforcement actions.

FY 2009 planned accomplishments include:

- Continuation of training for CEU agents and SEVP personnel on accessing SEVIS and US-VISIT information;
- Increasing staff to 155 FTEs to provide improved compliance enforcement through a comprehensive review of potential violator leads identified among foreign students and exchange visitors who have been authorized entry into the United States. The staff will also increase ICE's ability to pursue criminal violations, including nonimmigrant's smuggling and fraud, conducted by SEVIS certified schools and programs; and
- Coordinating expanded efforts with the new liaison and recertification units.

For FY 2010, SEVP and OI will further refine their compliance enforcement efforts. As the program further matures and the added FTEs increase CEU's flexibility and reach, it is expected that more leads will be investigated. The increased number of investigations will more fully meet ICE's goals of compliance with immigration law.

SEVIS II: Fundamental to the attainment of any DHS and ICE strategic objective to detect and deter threats to our homeland through terrorist exploitation of legitimate student entry pathways into the Homeland is SEVP's ability to collect information and track legitimate non-immigrant students and certified schools. This tracking can only be accomplished through the SEVIS system.

The current system does not adequately meet the needs of the national security, law enforcement, and educational institution communities, all of whom rely heavily on SEVIS data and its interoperability. The SEVIS II initiative supports the DHS Strategic Goal of Prevention, Objective 2.2, Enforce Trade and Immigration Laws. It will meet the needs of the intelligence and enforcement communities increasing the ability to track and monitor individuals; integrate seamlessly with other intelligence systems; and provide real-time critical individual based information. A newly configured and deployed SEVIS II system that is based on tracking and monitoring individuals rather than records, and that is highly interoperable with all of our stakeholders, would eliminate critical vulnerabilities.

In FY 2008, significant accomplishments included:

- Development of SEVIS II; and
- Digitalization of more than 8,000 SEVIS files.

FY 2009 planned accomplishments include:

- Developing a newly configured SEVIS II system that is based on tracking and monitoring individuals rather than records (SEVIS II will be highly interoperable with all of ICE's stakeholders eliminate critical vulnerabilities);
- Accommodating the use of biometric information to positively identify students and exchange visitors, inclusion of biometric identifiers.
- Improving queries quality via name checks and biological information;
- Providing primary end users (port of entry and departure, and investigators) with the ability to accomplish real-time verification of data;
- Enhanced search capability, and tracking and monitoring systems of other key national nation security and law enforcement agencies; and
- Coordinating expanded efforts with the new liaison and recertification units and the established compliance enforcement unit.

In FY 2010, SEVIS II will be fully deployed. SEVIS will be concurrently maintained, but is expected to be shut down permanently by mid-FY 2010. Although every effort will be made to minimize problems with the deployment of SEVIS II, it can be anticipated that there will be technical issues that will not be evident until the system is in use. SEVP will fully coordinate with relevant ICE and educational institution representatives to minimize the impact of any such problems.

School Recertification Program: The fee increase allowed for the hiring of 33 additional FTEs to provide a recertification program capability. The Enhanced Border Security and Visa Entry Reform Act of 2002 mandated that DHS conduct a recertification of certified educational institutions every two years. SEVP recertification is a review of an educational institution previously certified to affirm that the educational institutions remains eligible and is complying with regulatory recordkeeping, retention, and reporting requirements. The focus of recertification is past performance coupled with a review to ensure that the educational institution maintains its basic eligibility for initial certification. The process may include an on-site visit or review. Approximately 9,200 educational institutions have been certified by SEVP.

In FY 2008, significant accomplishments included:

- Preparation for recertification of all SEVIS certified schools; and
- Increased staffing for school compliance to identify and remove non-compliant schools.

FY 2009 planned accomplishments include:

- The hiring of 33 FTEs in order to provide a recertification program capability for SEVP;
- Coordinating expanded efforts with the new liaison unit and the already established compliance enforcement unit; and
- Coordinating with SEVP's stakeholders, to include the Department of State, to ensure timely and thorough recertification reviews.

For FY 2010, it is expected that the 33 FTEs for this unit will be refining their work processes and enabling thorough and timely recertification reviews of educational institutions.

Liaison Program: The SEVP Liaison Program purpose is to improve dialog and provide assistance between SEVP and the stakeholder communities it serves. Liaisons will proactively provide training as required, disseminate information on policy changes and conduct follow-up visits with stakeholders as needed. Liaisons will be fully trained in all aspects of the Student and Exchange Visitor Program

and will be central to ensuring communication between the program and its stakeholders. Liaisons will undergo a comprehensive training program prior to their assignment so that the program can work toward consistency in its policies and procedures. Through the liaisons, SEVP hopes to see improved data integrity in SEVIS. Liaisons will be co-located in ICE Special Agent In-Charge offices across the United States. They will provide assistance to the more than 9,000 schools approved by SEVP as well as stakeholders. The budget request to fund the hiring and deployment of the liaison representatives will enable SEVP to improve its ability to effectively ensure optimal compliance by the academic community with immigration law.

In FY 2008, significant accomplishments included:

- Refining Liaisons Roles and Responsibilities with stakeholders;
- Developing Business Process and Field Manual;
- Drafting Liaison Territories which are ready for review/approval; and
- Developing Liaison Training and automation support;

FY 2009 planned accomplishments include:

- Hiring 64 FTEs to establish a liaison function for SEVP. These positions and related support costs will provide support to educational institutions that desire to host foreign students and exchange visitors. By statute, these institutions require initial certification by SEVP and subsequent recertification every two years.
- Coordinating expanded efforts with the new liaison unit and the already established compliance enforcement unit.

For FY 2010, the 64 FTEs for this unit will have developed a fully functioning and robust liaison program that coordinates on a routine basis with other OI, ICE, DHS, and educational institution stakeholders.

PPA Mission Statement

The Student and Exchange Visitor Program (SEVP), which is a division of U.S. Immigration and Customs Enforcement (ICE) administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

Summary Justification and Explanation of Changes

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
Salaries and Benefits	\$13,482	\$32,334	\$48,811	\$16,477

Salaries and Benefits includes costs for 387 FTEs. Salaries and Benefits increase proportionally with FTEs.

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
Travel	\$390	\$1,437	\$1,437	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request has no changes from the previous year.

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
Transportation of Things	\$13	\$17	\$17	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request has no changes from the previous year.

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
GSA rent	\$137	\$17	\$17	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request has no changes from the previous year.

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
Other Rent	\$1	\$406	\$406	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request has no changes from the previous year.

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$20	\$1,084	\$1,084	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request has no changes from the previous year.

	Actuals	Enacted	Request	Change
Advisory and Assistance Services	\$16,081	\$11,428	\$11,428	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request has no changes from the previous year.

	FY 2008	FY 2009	FY 2010	2009 to 2010
	Actuals	Enacted	Request	Change
Other Services	\$5,967	\$10,623	\$10,623	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request has no changes from the previous year.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$175	\$907	\$907	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request has no changes from the previous year.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Operation & maintenance of facilities	\$14,656	\$0	\$0	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request has no changes from the previous year.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$8,263	\$21,116	\$21,116	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request has no changes from the previous year.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Supplies & materials	\$2,340	\$1,150	\$1,150	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request has no changes from the previous year.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Equipment	\$1,175	\$39,098	\$22,621	(\$16,477)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. In FY2010 no new positions will be established, thus modular cost in equipment are reduced.

	FY 2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Land & Structures	\$0	\$383	\$383	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2010 request has no changes from the previous year.

A. Mission and Description of U.S. Immigration and Customs Enforcement

U.S. Immigration and Customs Enforcement (ICE) is the largest investigative arm of the Department of Homeland Security (DHS). ICE's mission is to protect America and uphold public safety by targeting the people, money, and materials that support terrorists and criminal activities. ICE fulfills this mission by investigating violations of immigration and custom laws. The ICE organization is composed of law enforcement divisions and several support divisions. The four main operations are investigation, criminal alien enforcement, international enforcement, and detention and removal. In addition, ICE includes an Office of Intelligence, Principal Legal Advisor, Professional Responsibility, State and Local Coordination, and mission support entities.

The *Office of Investigations (OI)* enforces trade, immigration, and customs laws. OI investigates a wide range of criminal activities including: illegal immigration; weapons trafficking (including weapons of mass destruction and nuclear, biological, chemical, and radiological agents); narcotics and contraband smuggling; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices and intellectual property rights violations; child pornography; and child sex tourism.

Secure Communities – Comprehensive Identification and Removal of Criminal Aliens (SC/CIRCA) improves community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain, and remove criminal aliens from the United States. The program coordinates all ICE planning, operational, technical and fiscal activities devoted to criminal alien enforcement. SC/CIRCA revolutionizes immigration enforcement by facilitating information-sharing between law enforcement agencies and by applying risk-based methodologies to place resources in areas with the largest levels of high-threat criminal aliens.

The *Office of International Affairs (OIA)* enhances and promotes the ICE mission of protecting the United States by using an international, multi-faceted, law enforcement approach and partnering with foreign and domestic counterparts to combat criminal and terrorist activities.

The *Office of Detention and Removal Operations (DRO)* processes, detains, and removes criminal aliens, aliens residing illegally in the United States, and non-immigrants apprehended for infraction of immigration laws (including administrative violations). DRO is responsible for the safe and humane treatment of detained aliens while in ICE custody. This includes the safe and secure transportation from the point of apprehension through each phase of their immigration proceedings including removal of the alien from the United States. In addition to managing the detained alien population, the Criminal Alien Program (CAP) identifies criminal aliens who are incarcerated in Federal, State, and local facilities. CAP prepares criminal aliens for immigration proceedings and ensures that they are not released into the community. DRO also manages the ICE Fugitive Operations program that locates and captures aliens who have violated conditions of release and subsequently absconded.

Furthermore, the FY 2010 budget transfers FPS to the National Protection and Programs Directorate (NPPD). This transfer will allow Immigration and Customs Enforcement (ICE), which used to manage the FPS program, to focus on its law enforcement mission of protecting the American people by targeting the people, money, and materials that support terrorist and criminal activities relating to our nation's borders.

FPS should reside within NPPD, given NPPD's responsibility for leadership of the National Infrastructure Protection Plan. As the Sector-specific agency for the Government Facilities sector,

FPS has been an active critical infrastructure security partner with IP. FPS will be able to gain synergy by working alongside NPPD's Office of Infrastructure Protection (IP), and having FPS and IP in the same organization further solidifies NPPD as the Department's lead for critical infrastructure protection.

B. Major Activities and Key Strategic Issues

ICE continues to move forward and maintain focus on changing threats and the strategic issues facing our Nation, and is improving community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain and remove all criminal aliens held in custody.

Secure Communities/A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA)— In FY 2008, Congress provided ICE with \$200 million to “improve and modernize efforts to identify aliens convicted of a crime, sentenced to imprisonment, and who may be deportable, and remove them from the United States once they are judged deportable.” In the FY 2009 DHS Appropriations Act, Congress appropriated an additional \$150 million for SC/CIRCA to meet the program's goals. Congress further required ICE to utilize at least \$850 million of existing programs' resources “to identify aliens convicted of a crime, and who may be deportable, and to remove them from the United States once they are judged deportable.” In FY 2009, ICE expects to obligate over \$1.4 billion of funds provided by Congress toward achievement of the four stated SC/CIRCA goals.

On March 24, 2008, ICE submitted Secure Communities: A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA) to Congress. SC/CIRCA sets out a strategy to improve community safety by transforming the way the Federal Government cooperates with state and local law enforcement agencies to identify, detain, and remove all criminal aliens held in custody. The program seeks to work with current and new initiatives across ICE to enhance the effectiveness of the criminal alien enforcement process.

ICE has delineated four key strategic goals for the Secure Communities plan:

- **Strategic Goal 1** – Identify and process all criminal aliens amenable for removal while in federal, state, and local custody;
- **Strategic Goal 2** – Enhance current detention strategies to ensure no removable alien is released into the community due to a lack of detention space or an appropriate alternative to detention;
- **Strategic Goal 3** – Implement removal initiatives that shorten the time aliens remain in ICE custody prior to removal, thereby maximizing the use of detention resources and reducing cost; and
- **Strategic Goal 4** – Maximize cost effectiveness and long-term success through deterrence and reduced recidivism.

Central to transforming criminal alien enforcement processes is the application of risk-based methodologies. Using standards familiar to law enforcement, ICE defined three levels of criminal aliens, based on the National Crime Information Center (NCIC) high-level offense codes. These levels are used to assign an enforcement priority to those aliens arrested for crimes that pose the greatest risk to the public. These priorities are assigned after identification screenings of all who are arrested to

determine if they are criminal aliens, based on prior convictions and current charges. Prioritization of criminal aliens will allow ICE to allocate resources in the most effective and efficient manner.

Although ICE has made considerable progress over the past several years in identifying and removing criminal aliens through its Criminal Alien Program (CAP), a fundamental change in ICE's current approach is required to reach the goal of identifying and removing all aliens convicted of a crime. ICE currently screens all inmates referred to ICE who claim to be foreign-born at all federal and state prisons. In addition, any law enforcement agency can query the immigration status of an individual they encounter through ICE's Law Enforcement Support Center (LESC). CAP officers routinely visit or are dispatched to local jails requesting assistance and have contributed to the increased success of identifying and removing criminal aliens in custody.

In FY 2008, ICE identified and charged more than 221,000 aliens in jails for immigration violations – more than triple the number charged just two years ago. Leveraging integration technology that shares law enforcement data between federal, state and local law enforcement agencies, ICE is now able to expand coverage nationwide in a cost effective manner. Interoperability between the Federal Bureau of Investigation's (FBI's) Integrated Automated Fingerprint Identification System (IAFIS) and DHS' Automated Biometric Identification System (IDENT) will help ICE and local law enforcement officers positively identify criminal aliens in prisons and jails.

Key Accomplishments/Planned Accomplishments

In FY 2008, ICE:

- Identified and issued charging documents on over 221,000 criminal aliens, representing greater than a 34% increase compared to FY 2007;
- Removed over 110,000 criminal aliens, representing greater than an 8% increase compared to FY 2007;
- Reduced criminal alien detention times by 5 percent to 45.6 days compared to FY 2007;
- Collaborated with U.S. Attorneys to initiate prosecutions against more than 6,500 violent, recidivist criminal aliens for felony violation of United States immigration law;
- Deployed 28 operational CAP teams, expanding ICE screening of foreign born criminals at all federal, all state and 13 percent of local prisons and jails (the remaining local prisons and jails make inquiries regarding foreign born detainees through 24x7 ICE call-in numbers);
- Developed prioritization criteria and an operational approach to roll out nationwide criminal alien screening over the next three to four years through biometric arrest information sent by law enforcement agencies to the DOJ;
- Began outreach to state and local Law Enforcement Agencies (LEAs) regarding Secure Communities goals and plans;
- Issued several procurements to improve the operational efficiency of ICE operational processes that identify, prioritize and conduct enforcement action against removable criminal aliens;
- Expanded the use of Institutional Removal Programs (IRP) to a total of 14 federal facilities, and approximately 50 state and local jails and prisons, significantly reducing ICE detention times for most criminal aliens processed through this program;
- Implemented a Case Management Unit (CMU) to standardize and streamline all detained case management processes with the goal of reducing average ICE detention times;
- Deployed a modernized system replacing ICE's twenty-year old legacy mainframe detention and removal management system, improving operational efficiency; and

- Established an SC/CIRCA Program Management Office (PMO) reporting directly to the Deputy Assistant Secretary - Operations.

In FY 2009, ICE will use over \$1.15 billion from ICE's base appropriation and an estimated \$255 million in SC/CIRCA appropriations to:

- Maintain existing criminal alien enforcement efforts
- Continue outreach to the national law enforcement community to communicate SC/CIRCA goals and objectives and strengthen information sharing partnerships for identifying and removing criminal aliens;
- Deploy an additional 7 operational CAP teams to expand ICE screening for criminal aliens to additional local jails and prisons;
- Deploy biometric identification capability (integration of DOJ and DHS biometric databases) to 50+ priority nationwide jurisdictions. Deployments will cover over 20 percent of the estimated nationwide number of criminal alien arrests
- Expand ICE's operational capacity for completing threat assessments and alien status determinations on suspected criminal aliens by hiring 85 additional Law Enforcement Support Center (LESC) personnel and by improving IT systems supporting criminal alien identifications;
- Establish 24x7 operational response capability by reassigning current vacancies to hire 178 Interoperability Response Agents;
- Pilot methods to identify and apprehend at-large criminal aliens, whether fugitives or not, based upon threat to the community by hiring 26 enforcement agents;
- Aggressively prosecute violent, recidivist criminal aliens in coordination with U.S. Attorney offices, thus deterring removed criminal aliens from re-entering the country, by reassigning current vacancies to hire 62 additional Violent Criminal Alien Section (VCAS) agents;
- Increase ICE's capacity to process greater numbers of criminal alien removal cases by hiring 173 removal case management personnel;
- Procure Video Teleconferencing equipment for 170 priority locations to support Secure Communities, including additional Institutional Removal Programs at jails and prisons (where criminal aliens are processed for removal before entering ICE custody) and to expand the geographic area that CAP teams can cover when conducting interviews and other criminal alien screening/identification activities;
- Initiate development of systems to track the exact location of criminal aliens from the time they enter ICE custody until the time they are removed from the United States, improving officer safety and intelligence gathering efforts on detainees among other benefits;
- Initiate development of enterprise-wide bed space management and transportation management systems to make more efficient use of these limited and expensive ICE resources; and
- Add additional removal transportation capacity and related costs to support the removal of greater numbers of criminal aliens taken into ICE custody.

In FY 2010, SC/CIRCA will maintain expanded operational capacity funded in FY 2008 and 2009. Using approximately \$75 million of remaining funds from the \$150 million provided by Congress to SC/CIRCA through the FY 2009 Appropriation, ICE will:

- Continue moving toward nationwide identification, apprehension and removal of all Level 1 (those convicted of violent felonies and major drug crimes) criminal aliens in accordance with the SC/CIRCA strategic plan, program goals and program objectives by extending criminal alien biometric identification capabilities to over 140 counties containing over 50% of the

nation's estimated criminal alien population, to include all counties that touch the Southwest border;

- Increase the number of criminal aliens identified during FY 2010 to an estimated 450,000, more than doubling the number identified in FY 2008;
- Increase the number of violent Level 1 criminal aliens identified during FY 2010 to an estimated 38,000;
- Increase the number of Level 1 criminal aliens removed during FY 2010 to an estimated 13,000 (removal of Level 1 criminal aliens is expected to significantly lag identification due to extended incarceration sentences that many must serve prior to their removal); and
- Continue submitting a greater number of violent criminal aliens who repeatedly enter the United States illegally to U.S. Attorneys for aggressive prosecution under felony immigration charges.
- Work with other ICE programs to determine how existing activities and capacity can better support SC/CIRCA goals.

Investigations (OI) - ICE received \$1,965.5 million for Investigations activities in FY 2009:

- \$1,696.2 million in the Investigations budget activities within the Salaries and Expenses appropriation;
- \$54.2 million in the Intelligence PPA within the Salaries and Expenses appropriation;
- \$120.0 million in the Student Exchange Visitor Program (SEVP) account;
- \$64.3 million in the Immigration User Fee account; and
- \$30.8 million in the Automation account.

The Office of Investigations (OI) enforces customs and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. Investigations lead to the arrest and prosecution of perpetrators and/or result in the removal of individuals posing risks to national security or public safety. OI investigates illegal trafficking in weapons and procurement of sensitive U.S.-origin technology (including weapons of mass destruction); the smuggling of narcotics and other contraband; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices; identity and benefit fraud; child pornography; child sex tourism; employers that hire illegal and undocumented workers; and health and public safety dangers.

The five investigative components of OI use immigration and customs authorities to address vulnerabilities and prevent violations that threaten national security and public safety.

Key Accomplishments/Planned Accomplishments

In addition to ongoing activities, OI accomplished the following in FY 2008:

- initiated export enforcement programs dedicated to specific dual-use and military technology;
- initiated Operation TECH DEFENSE to identify and prosecute individuals, corporations and criminal organizations that unlawfully attempt to gain illegal entry into the United States to acquire export restricted information and technology and/or access to critical infrastructure facilities;
- established a visa waiver enforcement program that applies sophisticated name analysis software to investigate violators that pose an elevated risk to national security;
- activated the Bulk Cash Smuggling Center, within the LESC, to provide real time investigative and

logistical support to law enforcement agents encountering bulk cash smuggling and other money laundering activity;

- expanded Border Enforcement Security Task Forces (BESTs) to target violent criminal organizations along the Northern border;
- established an ICE Intellectual Property Rights (IPR) and IMAGE Center (I3), which allows IMAGE and IPR to conduct corporate outreach and house the DC SAC Office's Document and Benefit Fraud Task Forces (DBFTFs);
- continued existing efforts by the Cyber Crimes Center (C3) to investigate and coordinate cases involving intellectual property violations (to include pharmaceuticals) and illegal export violations occurring online;
- implemented Operation Guardian in collaboration with CBP, Food and Drug Administration and the Consumer Product Safety Commission to target, interdict, and investigate the importation of substandard, tainted and counterfeit products being imported into the United States from the People's Republic of China (PRC);
- in conjunction with the Office of International Affairs (OIA), formally launched "Operation Armas Cruzadas" in order to combat the smuggling of weapons from the United States into Mexico. As part of this initiative, DHS and Government of Mexico (GoM) agencies are partnered in bi-lateral weapons smuggling interdictions, investigations, and intelligence-sharing activities; and
- in conjunction with Secure Communities, participated in outreach efforts to local law enforcement regarding ICE's transformative initiative to identify removable criminal aliens through use of biometric information submitted by local law enforcement to the FBI at time of arrest.

In addition to ongoing activities, OI plans to accomplish the following in FY 2009:

- coordinate with the Secure Communities initiative to identify removable criminal aliens and research the severity of the subject's criminal history for prioritization of enforcement actions;
- implement Operation Stamp Out in collaboration with CBP, U.S. Postal Inspection Service to combat the rise in the importation and distribution of counterfeit U.S. Postal money orders, stamps, and meter stamps into the United States;
- undertake an initiative to exchange information and conduct joint investigations with the PRC;
- in coordination with CBP, implement HQ-initiated Fraud Investigative Strike Team Operations to ten (10) ports/ICE Offices;
- expand the ability of the C3 to address the increases in digital data forensics volumes, while developing new tools and methods to manage and improve the analysis of derived digital information;
- continue the roll-out of Operation TECH Defense, an initiative intended to disrupt and deny suspect non-immigrants access to sensitive U.S. technologies through either immigration or export enforcement actions;
- reduce vulnerabilities in U.S. critical infrastructure, unlawful acquisition of export restricted technology, and unlawful entry of unauthorized non-immigrants into the United States; and,
- expand Operation Guardian to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the importation of substandard, tainted and counterfeit products being imported into the United States;
- initiate the Armas Cruzadas Surge Operation consisting of a three month enforcement period that will utilize all available assets to conduct enforcement activities which will maximize weapons interdictions. These activities include targeting of known weapons proliferation networks and conducting roving southbound operations with CBP at the ports of entry (POEs);

- migrate the LESC's Alien Criminal Response Information Management (ACRIME) System from a FoxPro database to an Oracle database to further enhance system backup capabilities, improve scalability and availability, and ensure compliance with ICE IT architecture standards; and
- award a contract to gather requirements and document efforts to develop a system that will determine threat by utilizing data provided directly in the immigration status request, national security threat lists, and criminal history information provided by the National Crime Information Center (NCIC).

In FY 2010, OI will:

- expand Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the United States into Mexico to reduce the flow of weapons trafficking through U.S. borders;
- reduce the nation's vulnerability to exploitation of nonimmigrant visas/programs by increasing compliance enforcement actions;
- coordinate with CBP to expand the "security bond" initiative targeting the illegal diversion of commercial goods transported globally via the in-bond process;
- continue export enforcement programs dedicated to specific dual-use and military technology;
- expand training and targeting of potential violators in support of Operation TECH DEFENSE through the identification of sensitive technologies, the manufacturers of those technologies and determining whether the companies are compliant with immigration and export regulations and laws;
- develop additional commercial fraud based initiatives in coordination with CBP that focus on revenue protection and other import violations. Initiatives would include investigations of antidumping evasion, misclassified textiles, forced labor products, and restricted endangered species importations;
- build on the successful partnerships that have been created through the IMAGE program with exemplary businesses within the area of immigration compliance;
- conduct critical infrastructure and national security violation investigations that involve smuggling or trafficking of aliens or some other form of worker exploitation;
- further enhance national security violation investigations that involve smuggling or trafficking of aliens or some other form of worker exploitation;
- upgrade information technology to enhance trade-based money laundering and commercial fraud investigations;
- partner with the Department of Labor, Department of State, Social Security Administration, U.S. Postal Service, USCIS, and other federal state and local agencies to address document and benefit fraud and vulnerabilities in the immigration process;
- continue IPR Center outreach efforts both nationally and internationally;
- disrupt, dismantle, and eliminate vulnerabilities within internet financial sectors and services before terrorists and other criminal organizations can exploit them;
- continue asset forfeiture investigations by identifying, seizing, and forfeiting illegal proceeds;
- use early threat assessment efforts to identify recurring data availability and data quality issues to expand information sources to include state criminal history archives, prison release date sources, and statistical inferences (e.g., probable custody release dates based on severity of pending charges, criminal history, and holding jurisdiction);
- continue to review current operations to ensure resources are targeted based on risk;

- continue to develop plans that will provide continuity for critical ICE enforcement activities currently conducted at the LESC; and
continue to support the activities, goals, and plans of Secure Communities working with Federal, State and local law enforcement agencies.

International Affairs - ICE received \$140.5 million for International activities in FY 2009:

- \$138.9 million for International budget activities within the Salaries and Expenses appropriation; and
- \$1.6 million in the Intelligence PPA within the Salaries and Expenses appropriation

The Office of International Affairs (OIA) conducts criminal investigations of legal violations involving contraband smuggling, immigration violations, money laundering, arms/technology trafficking, child sexual exploitation (child pornography and child sex tourism), and cyber crimes overseas. OIA Attaché offices also acquire law enforcement intelligence and information; support other Department of Homeland Security (DHS) missions (e.g., DHS security initiatives and trade programs such as the Container Security Initiative (CSI), and the Trade Transparency Units (TTUs)); conduct international training; and act as the in-country ICE liaison with foreign governments and Embassy Staff.

The Attachés are responsible for the enforcement of health and safety issues, including tainted or prohibited foodstuffs, unsafe toys, and consumer products that are imported into the United States. OIA coordinates with foreign counterparts to share information under the bilateral agreements and Customs Mutual Assistance Agreements (CMAAs). The Office of International Affairs refers foreign leads to domestic ICE investigation offices and handles ICE investigative leads. The Attachés investigate and enforce laws for other Federal agencies that have a Memorandum of Understanding with DHS and any other matters as directed by the Secretary of DHS. OIA Attachés serve as Senior DHS representatives in some overseas locations.

In addition to supporting the goals of DHS, OIA's activities also support the goals set forth by the Department of State in the areas of regional stability, counter-terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

OIA also manages the Visa Security Program (VSP) which enhances national security by integrating law enforcement into the visa screening process, helping to identify not-yet-known criminal and/or terrorist applicants before they attempt to enter the United States. VSP enhances the security of visa issuance at high-risk overseas post by deploying highly skilled and experienced law enforcement officers who: conduct an in-depth investigative review of visa applications that raise security concerns; investigate concerns relating to visa fraud and other criminal activity which can exploit the visa system; and provide advice and training on security issues to Department of State (DOS) consular officers, thereby enhancing their ability to screen security risks as they adjudicate visas. VSP extends the U.S. borders overseas by preventing terrorists, criminals, and other ineligible applicants from receiving U.S. visas.

Key Accomplishments

In FY 2008, OIA:

- conducted joint operations to take down a Special Interest Alien (SIA) criminal facilitation network in Colombia, resulting in 10 high-profile U.S. extraditions and convictions;
- worked with the Department of Defense (DOD) to support efforts in the Global War Against Terrorism (GWAT) and worked to support operations in Kabul, Afghanistan and Baghdad, and Iraq in support of the U.S. Central Command (CENTCOM), U.S. Special Operations Command (SOCOM), and U.S. mission interests;
- expanded ICE OIA's presence at DOD Unified Combatant Commands (UCCs);
- established Senior ICE Representative positions at the Special Operations Command (SOCOM) and the European Command (EUCOM);
- expedited task force efforts to identify and investigate Politically Exposed Persons (PEPs) in coordination with foreign governments;
- expanded investigations impacting cross-border crime; dismantle multiple human and contraband smuggling organizations;
- assisted in the creation of additional Trade Transparency Units (TTUs) with interested foreign governments, and initiated vetted units in Mexico and Colombia;
- initiated a major financial investigation of alleged public corruption and money laundering offenses committed within the United States and Italy; ultimately resulting in the seizure and forfeiture of \$122.9 million;
- continued support and assistance to the U.S. Customs and Border Protection (CBP) Container Security Initiative (CSI) and all other DHS international programs;
- increased the number of formal partnerships with vetted foreign law enforcement units to eight. These units are located in Colombia, the Dominican Republic, Ecuador, El Salvador, Honduras, Mexico and Panama. The vetted unit in Colombia saw an increase in the number of seizure warrant applications by 471 percent, the number of assets seized by 994 percent, and the number of arrests for extradition by 280 percent;
- increased overseas deployment of visa security officers to three new posts: Casablanca, Morocco, Dhahran, Saudi Arabia, and Frankfurt, Germany;
- expanded ICE participation in the SAO process by establishing a pilot Security Advisory Opinion Unit (SAOU) within VSP;
- developed and refined the VSP/SAOU Tracking System with DOS - a web-based, globally accessible system that will provide the necessary analytical, reporting and data storage capabilities the program requires; and
- expanded VSP operations to 11 high-risk visa issuing posts where ICE Special Agents screened more than 748,500 visa applicants, conducted in-depth vetting of more than 311,000 applicants, recommended the refusal of 906 applicants, and generated 77 Watch List nominations.

In FY 2009, OIA will:

- initiate trans-national investigations in the areas of human trafficking, anti-smuggling, money laundering, child exploitation, fraud and sensitive technology investigations, as well as reduce threats associated with foreign nationals who pose a harm to the United States;
- open new Attaché offices in Ciudad Juarez, Hermosillo, and Monterrey, Mexico, and expand OIA's presence in Mexico to continue to work to combat the ongoing and increasing cross-border violence;
- deter, dismantle, and disrupt trans-national criminal organizations;
- in coordination with foreign governments, expedite task force efforts to identify and investigate "politically exposed persons" (PEPs);

- expand ICE OIA's presence at DOD Unified Combatant Commands (UCCs) prioritized where DOD and DHS/ICE priorities intersect;
- coordinate and provide logistical support for the Textile Production and Verification Team (TPVT) visits and investigate leads to determine transshipment violations;
- conduct bilateral and multilateral BCS operations;
- deploy three Assistant Attachés to overseas offices based on repatriation workload needs;
- provide eTD demonstrations, conduct negotiations, install the eTD application, and train employees of three candidate country governments;
- conduct one-on-one training to Parole Coordinators at each of the 26 domestic Special Agents in Charge offices to ensure the effective and efficient adjudication of significant public benefit paroles. SAC Parole Coordinators are the liaisons between each SAC Officer and the Law Enforcement Parole Branch (LEPB). The LEPB receives, vets, adjudicates, and coordinates all law enforcement paroles on behalf of DHS;
- expand the VSP by opening four new VSP offices in Amman, Jordan; Jakarta, Indonesia; Bogota, Columbia; and Sana'a, Yemen; and
- screen visa applicants, conduct in-depth vetting of applicants, recommend the refusal of applicants and generate Watch List nominations to prevent terrorists from entering the United States.

In FY 2010, OIA will:

- identify, disrupt and dismantle organizations involved in circumventing established laws and procedures designed to stem systemic vulnerabilities;
- continue to support goals set forth by DHS and the Department of State in the areas of regional stability, counter terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy;
- increase working relationships and coordination with DOD elements and other United States and foreign partners on the GWAT, and combat transnational criminal organizations;
- in coordination with foreign governments, expedite task force efforts to identify and investigate "politically exposed persons" (PEPs);
- increase coordination with host governments to remove aliens from the United States and reduce the time to secure the removal overseas;
- continue to coordinate TPVT visits, international EXBS and BCS training, and ILEA training of foreign law enforcement officials in a wide range of investigative areas;
- continue to support ICE and other DHS law enforcement related programs overseas; and
- participate in efforts to establish formal TTUs;
- continue to expand VSP activities at high-risk overseas locations; and
- screen visa applicants, conduct in-depth vetting of applicants, recommend the refusal of applicants and generate Watch List nominations to prevent terrorists from entering the United States.

Detention and Removals Operations (DRO) – In FY 2009 ICE received \$3,138.4 million for DRO activities:

- \$2,627.5 million in the five Detention and Removal budget activities within S&E;
- \$150.0 million for Secure Communities;
- \$215.0 million for Legal Proceedings;
- \$5.0 million in Construction appropriation;
- \$60.0 million in Breached Bond Detention Fund account;

- \$54.7 million in the Immigration User Fee account; and
- \$26.2 million in the Automation account.

Custody Operations provides safe, secure, and humane conditions of detention for aliens taken into custody or arrested by ICE and other law enforcement entities, such as the Office of the Border Patrol, and state, county, and local law enforcement jurisdictions within the United States.

ICE secures bed space capacity in numerous detention facilities, and monitors these facilities for compliance with National Detention Standards. These standards specify the living conditions appropriate for detainees and ensure that detainees are treated with dignity and respect, and that they receive the best possible care while they are housed at a facility.

The National Fugitive Operations Program (NFOP) is responsible for reducing the fugitive alien population in the United States. At the end of FY 2008, there was an estimated 557,761 fugitive aliens at large in the United States, according to the DRO Deportable Alien Control System (DACS). As of March 31, 2009, there were 551,246 fugitive aliens-at-large. ICE works to reduce the fugitive alien population by using Fugitive Operations Teams (FOTs). Also, ICE created the Fugitive Operation Support Center (FOSC) to enhance the efficiency and effectiveness of the NFOP. The FOSC reviews and updates ICE fugitive alien cases in the Enforce Alien Removal Module (EARM) provides comprehensive leads to the FOTs, closes cases as appropriate, and facilitates the overall efforts to arrest fugitives. As a component of the NFOP, the goal established for the FOSC is to eliminate 26,000 cases from the fugitive population each fiscal year.

The Criminal Alien Program (CAP) identifies criminal aliens incarcerated in federal, state, and local facilities and prepares them for immigration proceedings, ensuring that they are not released into the community. The identification and processing of incarcerated criminal aliens prior to their release into DRO's custody reduces the overall cost and burden to the federal government. CAP identifies criminal aliens through interviews at the facilities, matches those criminal aliens with a list of removal orders, and prepares to them for removal out of the country as soon as their criminal sentence is over. The program ensures the safety of our citizens as well as the national security of the United States by removing dangerous, often recidivist, criminal aliens before they engage in additional criminal activity.

National security and public safety are ICE's first priorities. To that end, ICE detains all aliens who pose a threat to community safety or national security, and those ICE is required to detain under the Nation's immigration laws. The Alternatives to Detention (ATD) Program was created to enable ICE to maintain current detention levels, while monitoring aliens who are likely to comply with immigration proceedings, without detention. ATD is comprised of two primary programs: Enhanced Supervision/Reporting (ESR) Program, and the Intensive Supervision Appearance Program (ISAP). Also funded within the ATD program is a separate Bond Management Unit.

The Transportation and Removal Program provides safe and secure transportation of aliens in ICE custody. It also prepares for and conducts removals from the United States, as ordered by an immigration judge. The Removal Management Division formulates all DRO transportation and removal policy, conducts transportation and removal planning, defines and projects transportation and removal requirements, and oversees and supports Field Office Directors' (FODs) execution of transportation and removal funding. The division carries out its responsibilities through four supporting units: (1) Travel Document Unit; (2) Removal Coordination Unit; (3) Flight Operations Unit located in Kansas City, Missouri; and (4) Case Management Unit, including oversight of the DRO Cuban Unit and Post Order Custody Review (POCR) operations.

Key Accomplishments/Planned Accomplishments

In FY 2008, ICE realized many successes in the different Detention and Removal programs.

In FY 2008, DRO Custody Operations implemented several technology-driven resources to achieve greater program management efficiency. These include:

- The development of a customized bed space forecast model based upon transportation routes, arrest forecasts, and historical length of detention data and case type;
- The development of a tracking system to track acquisition and procurement information to better align ICE components and easily track key projects. Under this new system, OAQ/DPAU stakeholders meet weekly to discuss acquisition and procurement projects, improving coordination between ICE Office of Acquisition Management and ICE DRO DMD.
- Institution of Special Response Teams (SRT) for field offices with dedicated Service Processing Centers (SPC) to ensure that each SPC has fully, operational well-trained SRT personnel. SRT have proven to be beneficial in responding to critical incidents, which poses a threat to the safety and security of the public, employees, detainees, or the integrity of the physical security at a facility. Additionally, SRTs can be used as a resource for law enforcement in support of national emergencies and security events.
- Staffing Assessment/Credential Audit: This is both an accomplishment and an initiative. The DRO/Division of Immigration Health Services (DIHS) has made significant progress in hiring staff and decreasing existing vacancies at ICE site facilities. DIHS also conducted an internal desk audit on credentialing, which determined that all personnel were licensed in all facilities. This is a significant accomplishment because it reduced the risk to DIHS and ICE of adverse medical events and/or better responses to significant medical events; and
- Staffing Fulfillment: The initiative to achieve full staffing is a basic and important component to DIHS. DIHS is in the process of executing a hiring plan, which includes realistic priorities and timelines that span a calendar year. This will allow DIHS to be able to accept future commitments without sacrificing quality healthcare and service.

In FY 2008, Fugitive Operations accomplished the following:

- There has been an approximately twelve percent increase in the total number of arrests made by ICE Fugitive Operations teams as compared to FY 2007;
- As of September 30, 2008, ICE's fugitive case backlog was 557,761 fugitive aliens, which is 36,995 fewer fugitives than the population recorded on October 1, 2007;
- By the end of FY 2008, 99 of the 104 funded Fugitive Operations teams (FOTs) were operational, conducting enforcement activities across the United States. Presently, all 24 DRO Field Offices have at least one operational FOT;
- In FY 2008, 25,938 fugitive aliens were arrested and another 8,219 non-fugitive aliens were arrested during FY 2008;
- Of the ICE fugitives arrested in FY 2008, 5,652 were criminal aliens. Of the non-fugitive arrests, 2,276 were criminal aliens; and
- In FY 2008, the FOOSC resolved 55,418 fugitive cases through various means assisting in the reduction of the fugitive backlog.

In FY 2008, the Criminal Alien Program saw the following results:

- CAP issued over 210,000 charging documents. This exceeds the FY 2007 total of 164,296;

- 6,988 cases were presented to the U.S. Attorney's office for criminal prosecution. Of those, 5,374 cases were accepted;
- ICE strategically allocated 300 CAP funded positions (30 CAP teams) nationwide based on the risk based assessment;
- Deployed over 90 Video Teleconferencing units including eight Bureau of Prison sites; and
- CAP assisted in the deployment and expansion of Interoperability under the Secure Communities plan in 2008. The Secure Communities plan was approved by ICE leadership and is currently being implemented as a multi-phased, risk-based approach to identify and remove all criminal aliens amenable to removal in jails and prisons throughout the United States. As the operational partner of Secure Communities, CAP provides the required manpower to ensure successful operation of Interoperability.

In FY 2008, the Alternatives to Detention Program made the following progress:

- ATD increased its full-service participant slots by 667 percent; ISAP's participant slots were expanded from 1,800 to 5,000 and ESR added an additional 7,000;
- ESR and ISAP enrollments increased by 447 percent from the previous fiscal year at the same point in time (1,747 to 7,802);
- Implemented the Electronic Verification Information Process (eVIP). eVIP is a partnership between DRO and the Department of State's (DOS) Post Liaison Division's Visa Office, to expedite receipt of electronic alien departure verification information. The eVIP notice serves as evidence of departure by an alien from the United States. DOS foreign offices scan and electronically transmit departure verification documents directly to the BMU at VD-Bond-Verifications@dhs.gov;
- Experienced tremendous success with its Backlogged Bond Action Team (BBAT). This team assists field offices with backlogged bond cases. The team's objective is to update all backlogged bond cases so each field office has an up-to-date bond docket. In FY 2008, the BBAT has generated over \$30,563,105 dollars in Breached Bonds. These funds once deposited into the Breached Bond Detention Fund are utilized to fund detention beds. In 2008, BBAT has breached 7,531 bonds and canceled 2,072 bonds. The cancellations and breaches result in a savings of interest that is paid on the bonds by ICE; and
- The BMU developed and implemented Uniform Bond Management Guidance. This guidance was distributed to field components in July of 2008 and provides important updated bond policies, procedures, and information.

In FY 2008, the Transportation and Removal Program did the following:

- DRO continued to engage other government agencies and embassies to accelerate travel documents issuance for aliens pending removal from the United States. DRO continued to develop and expand the eTD system and worked to encourage other foreign governments to use the system; the FOU operated seven charters outside of the Americas returning 495 alien passengers to Albania, Cambodia, Egypt, Indonesia, Jordan, Morocco, Nigeria, Pakistan, Philippines, Palestinian Authority, and Liberia while also supporting the policies of "catch and return" and increased interior enforcement operations. The FOU moved nearly 200,000 aliens, domestic and foreign; by increasing the number of ICE chartered aircraft and simultaneously augmenting JPATS aircraft.
- DRO implemented the Case Management Unit (CMU). The CMU implemented case management efficiencies, such as weekly and monthly reporting requirements and expanded field office site visits, to ensure field office compliance with regulations and procedures. The

CMU successfully developed and ensured successful implementation of the November 2007 policy entitled Parole of Aliens Found to have a ‘Credible Fear’ of Persecution or Torture.

- DRO implemented the “Weekly Inventory List of Detained Cases” (WILDC) report in March. Through the first quarter of FY 2009, CMU has reviewed 26,068 detained cases through the WILDC, resulting in the identification of deficient cases in EARM. DRO has also implemented the monthly report, which replaces the quarterly report for better quality control.

In FY 2009, DRO will continue to enhance its efforts and capitalize on increasing efficiencies and successes and will:

- Continue to support the ending “catch and release” at the northern and southern U.S. borders;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue its detention inspection program;
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities; and
- Support Secure Communities initiatives to identify and remove all criminal aliens amenable to removal in jails and prisons throughout the United States.

In FY 2009, Fugitive Operations will:

- Continue to conduct targeted fugitive alien operations to reduce the fugitive alien backlog as directed by Congress. Fugitive alien enforcement operations conducted by 104 FOTs will primarily target criminal aliens and those found to be a threat to community safety or national security;
- Through the use of technology and partnerships with law enforcement agencies, the FOSC will continue to enhance procedures to process and analyze EARM fugitive data;
- The FOSC Resolution Unit will continue to develop and augment procedures in an effort to analyze the nature and characteristics of the fugitive alien population. This effort will aid in reducing the reported number of fugitives by reconciling the records of those fugitive aliens who have left the country, adjusted their status, immigrated or were discovered incarcerated;
- As ICE’s focus on criminal alien identification and removal intensifies, work to ensure NFOP can support the Secure Communities Program’s targeting criminal aliens and fugitives; and
- The FOSC Leads Unit will continue to enhance and incorporate technologies such as the analysis of government and commercial databases to prepare leads on fugitive aliens for transmission to the field.

In FY 2009, the Criminal Alien Program will:

- Continue to strategically allocate seven CAP teams nationwide.
- Continue the deployment of VTC systems to CAP programs throughout the country.
- Work to increase the number of charging documents issued to individuals that are amenable to removal from the United States.
- Increase the number of criminal prosecutions presented to the U.S. Attorney’s Office.

In FY 2009, the Alternatives to Detention Program:

- Solicited a new contract¹, which should be awarded by July of 2009². The new contract will be similar to the current ISAP contract and will allow for staggered opening of ISAP programs nationwide as funding permits. The intention is to award the contract with initial offices beginning operations by September 2009. Expansion will continue into FY 2010 as dictated in the contract to reach coverage of all field and main sub-offices as funding permits during that year. The goal of this expansion is the successful transition of all current ESR, EM, and ISAP participant population to the new contract before September 20, 2009.
- Will continue the design and deployment of the eBONDS System. In FY 2008, BMU began working closely with OCIO and OAQ in aggressively pursuing the design, build, and deployment of the eBONDS Project. The eBonds application supports the Department of Homeland Security (DHS) bond management process and the Bond Management Information System (BMIS Web). The basic function of eBonds is to:
 - Reduce data entry costs by enabling customers to begin the bond process by providing the capability for surety companies to complete the I-352 Immigration Bond form using web-based technology; Provide the capability to analyze and report on bond metrics associated with bond management and reduce the time spent on manually fulfilling report requests from field users; and
 - Develop a workflow dashboard for surety companies to view the status of active and historical bond processing.
- Provide the ability to enroll and update:
 - User information – names, roles, permissions, and associated digital signatures – for use by a third party Surety;
 - Surety contact information, including – managing agent, tax identification number, address, and telephone number; and
 - Generate a PDF bond form documentation package, complete with a power of attorney form, I-352, and digital signature capability.

In FY 2009, Transportation and Removals will:

- Employ four ICE charter aircraft operating weekdays and Saturdays from San Antonio, Texas, (two aircraft) and Alexandria, Louisiana and Mesa, Arizona (one aircraft each) to support foreign removals;
- Use the San Antonio, Texas ICE chartered aircraft as a long-range platform capable of supporting special charter missions to South America, Eastern Europe, Africa, Middle East and Pacific Rim;
- Use JPATS contract aircraft to support shorter-range domestic movements with four airplanes—two each located in Alexandria, Louisiana and Phoenix, Arizona; and
- Place IEAs and Division of Immigration Health Services (DIHS) medical personnel on all DRO-managed aircraft, both foreign and domestic.

In FY 2010, Custody Operations will:

- Continue to support the ending “catch and release” at the northern and southern U.S. borders;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue to support any additional bed space requirements generated by Secure Communities;

1 The contract will be awarded through the means of “full and open” competition as required by the Competition in Contracting Act (CICA), which was enacted as Title VII of the Deficit Reduction Act of 1984, Public Law 98-369.

2 The ISAP contract is set to expire on June 20, 2009. The final option year was exercised on June 21, 2008.

- As ICE's focus on criminal alien identification and removal intensifies, work to ensure current resources can strategically be focused on those efforts as well as specific SC/CIRCA appropriations;
- Create the Bed Space Tracking and Transportation (BST&T) system to increase the process efficiency of locating available beds and transporting detainees;
- Continue its detention inspection program; and
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities.

In FY 2010, the Criminal Alien Program will:

- Continue to increase efforts to identify criminal aliens incarcerated in federal, state, and local facilities, and the additional personnel will help to ensure that these criminals are not released into the community while preparing for immigration proceedings;
- Continue to increase the number of criminal prosecutions of violent recidivist criminal aliens;
- Continue to further the advancement of the Secure Communities Plan within the law enforcement community across the United States;
- As ICE's focus on criminal alien identification and removal intensifies, work to ensure current resources can strategically be focused on those efforts as well as specific SC/CIRCA appropriations; and
- Develop new advancements and best practices to ensure full screenings of institutional facilities.

In FY 2010, Fugitive Operations will:

- Continue to conduct targeted fugitive alien operations to reduce the fugitive alien backlog as directed by Congress. Fugitive alien enforcement operations conducted by 104 FOTs will primarily target criminal aliens and those found to be a threat to community safety or national security;
- Through the use of technology and partnerships with law enforcement agencies, the FOSC will continue to enhance procedures to process and analyze EARM fugitive data;
- The FOSC Resolution Unit will continue to develop and augment procedures in an effort to analyze the nature and characteristics of the fugitive alien population. This effort will aid in reducing the reported number of fugitives by reconciling the records of those fugitive aliens who have left the country, adjusted their status, immigrated or were discovered incarcerated;
- As ICE's focus on criminal alien identification and removal intensifies, work to ensure NFOP can support the Secure Communities Program's targeting criminal aliens and fugitives; and
- The FOSC Leads Unit will continue to enhance and incorporate technologies such as the analysis of government and commercial databases to prepare leads on fugitive aliens for transmission to the field.

In FY 2010, Alternatives to Detention will:

- Conduct a feasibility study to implement "Kiosk-Type" technology nationwide. This initiative will assist the field office with the enormous task of supervising non-removable aliens who do not pose a risk to the community, by reducing face-to-face meetings with aliens to possibly save many man-hours to be used in other critical DRO mission areas; and
- Continue with the staggered opening of ISAP programs nationwide with the goal to increase coverage at 82 new locations and increase the participant capacity to 24,000.

In FY 2010, the Transportation and Removal Program will:

- Continue to expand CMU activities; and
- Develop a strategic air plan for DRO flight operations based on a mission needs statement, operational requirements document, concept of operations plan, and an acquisition strategy that supports increased enforcement activity, decreased detention time, and increased removal operations.

Automation and Modernization – In FY 2008, the ICE Automation Modernization account was expanded to include Atlas (IT Infrastructure and Tactical Communications) as well as the following information technology (IT) transformational initiatives: Detention and Removal Operations Modernization (DROM) and TECS Modernization. In FY 2009, the Automation Modernization account was further expanded to include the Modernization of Financial System project. In FY 2010, the Automation Modernization account will again expand to include other IT transformational initiatives: ICE Law Enforcement Systems Modernization (which includes the TECS Modernization project) and Electronic Health Record (eHR). Aligning all IT modernization initiatives under the Automation Modernization appropriation will help ICE standardize IT investment management and delivery.

The Automation Modernization account will allow ICE to improve information sharing with the Department of Homeland Security (DHS) and among partner organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

Key Accomplishments/Planned Accomplishments

FY 2008 – Projected Accomplishments

Atlas –IT Infrastructure -:

- Completed 4 Atlas sub-projects (Web Farm Upgrade, OCONUS Switch Upgrade, Streaming Video, and Hardware Refresh);
- Integrated 16 of 22 legacy systems into a single data warehouse, allowing ICE and its law enforcement partners to more easily share investigative and enforcement information;
- Worked with DHS OCIO and its integration partner to provide an ICE IT infrastructure footprint for use in the development of a planning and integration plan for the DHS Data Centers;
- Delivered the initial plan on the consolidation of DHS Data Centers;
- Replaced dated communications electronics at 51 foreign sites;
- Deployed streaming video to 70 major ICE offices nationwide;
- Deployed 2,582 printers and 12,941 desktop computers, completing an ICE-wide replacement of 18,314 desktops; and
- Securely retired and disposed of 24,530 legacy IT hardware items from ICE offices;
- Established a Single Sign-On framework for all ICE applications, including legacy mainframe systems.

DRO Modernization

- Expanded the Electronic Travel Document (eTD) system to be capable of processing up to 25 countries targeted to participate with the eTD program, as well as created travel document request packages in the system for all non-participating countries;

- Developed and deployed eTD application to three of the 25 targeted countries (El Salvador, Guatemala, and Honduras), significantly reducing the average time necessary to process travel documents;
- Deployed ENFORCE Alien Removals Module (EARM) to replace the Deportable Alien Control System (DACS), and retired DACS as the DRO system of record;
- Expanded data sharing and integration with external agencies with the deployment of EARM and implemented an enterprise reporting system for the DRO Executive Information Unit;
- Released Request for Quotations (RFQs) for Bed Space, Transportation and Tracking (BST&T) contract(s); and

Mobile IDENT/ENFORCE

:

- Developed portable IDENT to positively identify aliens, which is critical to the success of SBI interior enforcement initiatives and Temporary Workers Program (TWP) deployment;
- Upgraded services (including design, development, and deployment) of new and enhanced IT systems to build out the ENFORCE infrastructure necessary to support multiple law enforcement communities and initiatives (such as SBI), and facilitate integration efforts (such as the one between the Law Enforcement Service Center and the ICE Office of Investigations); and
- Processed aliens outside established ICE IDENT processing facilities, including jails, work sites, courts, and other locations requiring mobile capabilities.

TECS Modernization

- ICE expended \$2.0 million to upgrade services (including design, development, and deployment) of new and enhanced IT systems that were needed to build out the ENFORCE infrastructure necessary to support multiple law enforcement communities; and facilitate integration efforts such as the one between the Law Enforcement Service Center (LESC) and the ICE Office of Investigations.

FY 2009 – Projected Accomplishments

Modernization of Financial System)

- Develop ICE requirements in support of the DHS Transformation and System Consolidation (TASC) initiative for the following:
 - user access controls with DHS Enterprise Solution;
 - transitioning from client-server to web-based access by users;
 - financial reporting (both for migration of existing reports, development of new ones); and
 - user testing of the DHS Enterprise Solution.
- Conduct a GAP analysis showing discrepancy between current system processing and the DHS Enterprise Solution, and propose resolution of discrepancies;
- Develop detailed requirements to address functionality within the current Federal Financial Management System (FFMS) that will either be migrated to, or require customization within, the DHS Enterprise Solution;
- Determine interface requirements with various Consumer off-the Shelf applications that comprise the DHS Shared Baseline; and
- Acquire ICE FedTraveler Services to support standardizing electronic travel (e-Travel) processing throughout DHS.

DROM

- Implement biometric finger scanning with a combination of fixed and mobile devices to positively identify and track detainees remotely, improve officer safety, and enhance mission effectiveness;
- Track detainees inside ICE managed facilities through the use of Radio Frequency Identification (RFID) technology;
- Develop the Detainee Location Tracking (DLT) and Central Reservation System (CRS) modules of the Bed Space, Transportation, and Tracking (BST&T) Management System;
- Expand ICE Data Warehouse data capacity and reporting capability to support DRO, and expand web services to allow the eTD application to communicate with other internal or external applications;
- Expand EARM to include the ENFORCE Apprehension and Detention Module, Fugitive Case Management System (FCMS) and Alternatives to Detention Program (ATDP);
- Complete planning and requirements definition for a DROM Document Management System and the Electronic Detainee Visitor Log (eVisitor) application;

TECS Modernization

- This investment includes the following:
 - Perform Project Management Office support services (\$2.0M)
 - Gather and define requirements (\$1.5M)
 - Establish development environment (\$1.7M)
 - Perform design and development activities (\$8.0M)
 - Develop high-level TECS architecture and design (\$2.0M)
 - Provide Enterprise Data Warehouse and decision support services (.3M)
 - Perform Independent Verification and Validation services (.2M)
- Establish an initial planning capability by securing project management office support to manage requirements and develop the business case;
- Initiate and utilize results of business requirements analysis to conduct a formal Alternatives Analysis and lay down the foundation for program execution;
- Develop TECS architecture and ICE high-level design, and establish an investigative case management development, integration and testing environment;
- Develop and assess the alignment of the program to the DHS Enterprise Architecture;
- Develop the Mission Needs Statement; and
- Award a contract for TECS Modernization design and development.

Atlas – IT Infrastructure and Tactical Communications

- Acquire equipment for mobile communications system and hub upgrades, and acquire Project 25 (P25) compliant tactical communications equipment to modernize tactical communications systems in the first of 20 ICE regions (Georgia, North and South Carolina);
- Incorporate two additional data collection systems into one database, allowing ICE and its law enforcement partners to more easily share information;
- Deploy a framework to access 20 different ICE IT applications with a single sign-on;
- Analyze data center alternatives for lower cost options (to be facilitated by DHS);
- Replace the primary web hosting platform for DHS data centers, and build IT infrastructure to provide seamless communications across heterogeneous platforms;
- Upgrade obsolete and failing file & print servers at 100 ICE sites;
- Institute enterprise audit log management for all major ICE systems;
- Acquire, integrate, and deploy one mobile law enforcement communications system and one wireless communications kit for ICE emergency/crisis response and special operations; and

FY 2010 - Projected Accomplishments

DROM

- Transition EARM into Full Operating Capability (FOC) status;
- Conduct operational analysis for EARM;
- Deploy BST&T DLT and CRS Modules, and achieve Initial Operating Capability (IOC) status;
- Begin development and integration of the final BST&T Module, the Transportation Management System (TMS);
- Continue expanding the eTD system as Memoranda of Understanding (MOUs) are executed for target countries to use eTD for issuing electronic travel documents; and
- Award development contracts for the DRO Document Management System and eVisitor Log.

Electronic Health Records (eHR) System

- Award a contract for comprehensive certified EHR including several subsystems;
- Configure and develop interfaces, complete testing and beta testing, and initiate deployment of a eHR application to support ICE medical operations at DIHS-staffed detention facilities; and
- Initiate development and deployment of appropriate eHR capability to over 350 Intergovernmental Service Agreement (IGSA) and Contract Detention Facilities (CDF) housing ICE detainees.

ICE Law Enforcement Systems Modernization

- TECS Modernization – The completion the requirements definition phase and begin the design and development phase of specific projects. A development environment will be created to support the development efforts.
- Mobile IDENT – The development of the Mobil IDENT proto-type booking service and pilot the proto-type at three SAC offices for user acceptance and GAP analysis.
- ICEPIC - The hardware upgrade and migration to the enterprise data center along with the creation of the COOP for 24-7 support. The support of the national rollout to all SAC and RAC offices.
- ICE ACCESS - This initiative will provide requirements gathering with local and state agencies and the U.S. Department of Justice for gang information sharing and data integration. A design strategy will be delivered to plan for the design and development of an integrated solution for the following year.
- Law Enforcement Information Systems Sharing – The completion enhancements for the sharing of images and photos and the continue rollout to five additional information sharing partners.
- Border Enforcement Security Task (BEST) Force Expansion – This initiative accomplishments will include gathering and analysis of the requirements and design for the modernization of BEST information technology.
- Intelligence Support –The requirements gathering and design for moving the Data Analysis & Research for Trade Transparency (DARTT) system into the enterprise environment. The requirements and design for the modernization of Cyber Crimes Center systems and National Child Victim Identification System (NCVIS).
- International Affairs Modernization –The requirements gathering and design of the OIA systems including Parole Case Tracking System (PCTS), Visa Security System (VSP), World Customs Organization Information Sharing (WCO) and Human Resources Dashboard (HRD).
- Forensic Document Lab –The requirements and design for the modernization of the information technology infrastructure and moving into the enterprise environment.

Atlas IT Infrastructure

- Continue modernizing an additional 290 ICE sites with new file & print servers;

- Complete the integration of 22 data collection systems into one database, allowing ICE and its law enforcement partners to more easily share information;
- Deploy immediate security solutions to resolve immediate security vulnerabilities;
- Implement vulnerability scanning tools to quickly detect and respond to IT security breaches; and
- Oversee the migration of ICE IT assets from the Department of Justice Data Centers to the DHS Data Centers.

C. Resources Requested and Performance Impact

ICE’s total budget request for FY 2010 is \$5,762,800,000, which includes the Salaries and Expenses, Automation, and Construction accounts and Breached Bond, User Fee, and SEVP fee authority.

Enhancement Requests and Planned Achievements

ICE requests \$5,458,000,000 in discretionary resources including program enhancements in the following key areas:

- **Southwest Border Enforcement\$70.0M (176 FTE)**
This cross-program initiative is intended to increase national security by expanding activities to control our borders. This request includes funding to increase enforcement staffing, improve cooperative efforts with the Mexican government, and establish another Border Violence Intelligence Cell. At the highest level, this initiative helps prevent the movement of people, money, and materials that could harm the Nation and its people across the Southwest border.
- **Co-Location of ICE Facilities\$92.0M (13 FTE)**
This request funds the second year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in select metropolitan areas with the intended result being improved operational efficiencies and long-term cost savings.
- **Secure Communities\$39.1M (46 FTE)** This program aims to remove all Level 1 criminal aliens (those convicted of violent felonies and major drug crimes) from the United States. In order to achieve this goal, ICE requests funds to hire 80 new enforcement personnel who will identify suspected criminal aliens, determine subjects’ alien status, prioritize ICE enforcement actions against the highest threat removable criminal aliens, assist in the removal of apprehended criminal aliens, and to continue ongoing information technology investments that will improve efficiencies within ICE criminal alien identification, prioritization and removal processes.
- **Detention Facilities Inspection Group\$12.4M (25 FTE)**
The program increase will allow ICE to expand the number and scope of independent inspections on ICE detention facilities and will improve the welfare, safety, and living conditions of ICE detainees and the safety of ICE employees.
- **State and Local Law Enforcement Support.....\$11.6M (15 FTE)**

This request will provide funding for the Office of State and Local Coordination (OSLC) to oversee outreach activities for the ICE ACCESS programs. Funding allows for permanent staff for OSLC, continuation of ICE ACCESS, training and information technology assistance for participants in the ICE ACCESS programs, and detention bedspace resulting from enforcement.

- **Data Center Migration.....\$33.9 M (4 FTE)**
This request is targeted at migrating data center operations, active online data, and other IT assets from two Department of Justice (DOJ) data centers and multiple processing centers to two new DHS data centers while ensuring near continuous operations of mission-critical IT systems through contingency infrastructure, planning, and testing, to provide systems and data integrity that align with the DHS goal of ensuring that two new DHS Data Centers support fully redundant IT systems.
- **Atlas Infrastructure (\$9.0 million):** The request for Atlas Infrastructure will be used to plan, schedule develop, and implement the replacement of many legacy ICE local area networks; continue modernizing an additional 290 ICE sites with new file & print servers; complete the integration of 22 data collection systems into one database; and oversee the migration of ICE IT assets from the Department of Justice Data Centers to the DHS Data Centers.
- **DRO Modernization (\$22.0 million):** This request will be used to develop and deploy version one of the Detainee Location Tracking Module as part of the Bed Space and Transportation Management System, expand the ICE Data warehouse data capacity and reporting capability to support the DRO IT data, and expand Web Services to allow the Electronic Travel Document application to communicate with other internal or external applications.
- **Law Enforcement Systems Modernization (\$40.0 million):** This request funds a number of case management (including the TECS Modernization project), information sharing, and operational support service projects that will improve access to law enforcement information.
- **eHR (\$20.4 million):** This request will address the Division of Immigration Health Services infrastructure deficiencies and begin the design and development of an electronic health records system, which will allow real-time reporting of detainees' medical information.

D. Performance Highlights, Resources, and Alignment to Strategic Goals

Program: Automation Modernization						
Performance Goal: Provide timely delivery of mission IT services in direct support of the ICE mission, goals, objectives, and programs.						
DHS strategic objectives supported and % allocation of activities: 1.2 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	None	None	\$15,000	\$30,700	\$57,000	\$234,700
FTE	None	None	7	7	11	40

Performance Plan Measures

Measure: Percent of field offices with access to secure tactical communications						
Description of Measure: In the Atlas Tactical Communications project, ICE Field Directors and Special Agents operating from 17 Field Offices will receive new industry standard two - way radios for federal, state, and local law enforcement and public safety. Each of these radios will improve agent and officer safety and mission effectiveness by enabling them to speak to other federal, state, and local law enforcement officers and first responders with the simple touch of a button while participating in enforcement and emergency operations. Therefore, the deployment of each of these radios provides an accurate measure of progress towards providing planned operational benefits.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	Baseline	6%	41%
Actual:	None	None	None	None	N/A	N/A

Measure: Percent increase in ICE investigative and enforcement systems incorporated into Decision Support Systems						
Description of Measure: This measure indicates the extent which ICE law enforcement personnel have access to and can retrieve enforcement information from a single integrated - source of enforcement data. Integrated information will enable users to find relevant and timely information from the best sources, along with improving information search and indexing capabilities.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	8%	20%	36%	80%	90%
Actual:	None	22%	22%	73%	N/A	N/A

Measure: Percent of modernized information technology services available to users						
Description of Measure: Measures percent of progress toward IT modernization available to ICE users (e.g. E - mail services, desktop equipment refresh, and DHS Wide Area Network), which encompasses program modernization activities spanning seven years. This outcome is aligned directly with Atlas stated goals: establish a standard IT environment across ICE by ensuring conformance to the Homeland Security Enterprise Architecture (EA), which will facilitate communication; promote information sharing and collaboration by enabling ICE to increase resource sharing capabilities between ICE users and program areas throughout ICE and the DHS community; and enhance workforce productivity by building a technological foundation to empower the ICE staff with the tools necessary to achieve mission requirements.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	40%	59%	78%
Actual:	None	None	None	40%	N/A	N/A

Additional Measures

Measure: Percent of ICE investigative and enforcement personnel with access to Decision Support Systems.						
Description of Measure: At present, ICE personnel have to query a large number of databases to gain access to the law enforcement information they need. This measure will serve as an indicator of the attainment of the goal to increase workforce productivity by giving ICE personnel easy, complete access to ICE consolidated enforcement data. This measure will also help to verify, through increased usage, that the consolidated data mart Decision Support System is meeting the requirements of the ICE investigative and enforcement communities.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	63%	100%	100%
Actual:	None	None	None	80%	N/A	N/A

Measure: Percent of ICE personnel using the DHS standard Microsoft Outlook E-mail platform.						
Description of Measure: The Common Computing Environment E-mail Migration project segment enhances the ICE workforce productivity by building a technology foundation to empower ICE staff with the tools necessary to achieve mission requirements. This measure strengthens ICE's ability to communicate more effectively both internally and externally; helps to standardize interoperability with ICE enterprise applications, desktop programs, and E-mail archives for legacy E-mail systems; and helps to ensure that overall O&M costs are reduced by eliminating multiple vendor support for separate platforms and by eliminating unsupported vendor E-mail products.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	100%	100%	100%
Actual:	None	None	None	100%	N/A	N/A

Measure: Percent of ICE agents, officers, and technical staff trained to use tactical communication systems.						
Description of Measure: In the Atlas Tactical Communications project, an in-depth training course will be delivered to all ICE agents and officers using the new industry standard two-way radios for federal, state, and local law enforcement and public safety. The course will also be delivered to the technical staff that must maintain the new radios and associated tactical wireless communications infrastructure sites. The training course will include manuals, quick reference cards, and wireless coverage charts to enable the users to make optimum use of the new system. Historically, the successes of new system deployments have been increased with effective training. Therefore, the percent of agents, officers, and technical staff trained to use tactical communications provides an accurate measure of progress towards providing planned operational benefits.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	100%	100%	100%

Actual:	None	None	None	100%	N/A	N/A
----------------	------	------	------	------	-----	-----

Program: Detention and Removal Operations						
Performance Goal: Remove from the United States all aliens with a final order of removal.						
DHS strategic objectives supported and % allocation of activities: 1.2 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$1,585,739	\$1,749,457	\$2,525,090	\$2,758,701	\$3,105,339	\$3,331,290
FTE	4,798	5,140	6,735	7,795	8,361	8,551

Performance Plan Measures

Measure: Number of charging documents issued.						
Description of Measure: The Criminal Alien Program measures its performance by the number of charging documents issued. A charging document is the written instrument prepared to initiate removal proceedings on an alien.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	200,000	227,000	254,000
Actual:	None	None	None	221,085	N/A	N/A

Measure: Number of illegal aliens removed from the United States						
Description of Measure: This measure represents the total number of illegal aliens removed from the United States by the Detention and Removal program during the fiscal year. An illegal alien is someone who is in the United States in violation of immigration laws. Compulsory and confirmed movement of an inadmissible or deportable alien out of the United States based on an order of removal constitutes an alien removed.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	140,130	154,143	None	342,251	345,674
Actual:	None	185,944	226,677	245,546	N/A	N/A

Measure: Percent of detention facilities in compliance with the National Detention Standards						
Description of Measure: This measure gauges the percent of detention facilities used by the Detention and Removal Operations program that are in compliance with National Detention Standards. The National Detention Standards were originally issued in September 2000 to facilitate consistent conditions of confinement, access to legal representation, and safe and secure operations across the immigration detention system. The standards have been updated into a performance based format known as the Performance Based National Detention Standards. Through an aggressive inspections program, the program ensures facilities utilized to detain aliens in immigration proceedings or awaiting removal to their countries do so in accordance with the Performance Based National Detention Standards. Compliance with the standards provides the public with assurance that detainees in the program's custody are detained in safe and secure environment and under appropriate conditions of confinement.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

----------------	------	------	------	-----	-----	-----

Measure: Percent of illegal aliens removed from the U.S. based on the number of illegal aliens processed for immigration law violations during the same period						
Description of Measure: This measure reflects the percent of illegal aliens removed from the U.S. during a fiscal year compared to the number of illegal aliens processed for immigration law violations during the same time period. The term "removal" includes removals from the U.S. under all types of orders, including orders by immigration judges, expedited and voluntary removals, and stipulated removals, as well as returns of immigration violators to their country of origin prior to or as a result of the waiving of a hearing before an immigration judge. This measure reflects the impact of program activities to ensure those in the country illegally do not remain.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	None	68%	69%
Actual:	None	None	None	None	N/A	N/A

Additional Measures

Measure: Average cost to supervise aliens in the Intensive Supervision Appearance Program.						
Description of Measure: This measure indicates the average cost to supervise aliens in the Intensive Supervision Appearance Program (ISAP). The cost is determined by multiplying the average length of time aliens participate in ISAP by the cost per day to supervise each of those aliens.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	\$5,800	\$4,960	\$4,120
Actual:	None	None	None	\$4,680	N/A	N/A

Program: International Affairs						
Performance Goal: Reduce international criminal and terrorist activities by partnering with foreign and domestic counterparts.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Performance Plan Measures

Measure: Number of visa application requests denied due to recommendations from the Visa Security Program.						
Description of Measure: The Visa Security Program has three primary mission objectives to enhance national security and public safety; 1) by extending the border of the U.S. overseas, Visa Security Officers (VSOs) work proactively to identify and counteract threats before they reach the United States; 2) through proactive law enforcement work, VSOs identify the not - yet - known threats to homeland security; 3) by utilizing all available tools and authorities, VSOs maximize the law enforcement and counterterrorism value of the visa process, taking it beyond the visa decision to address the underlying threat that the visa applicant potentially represents. This measure captures the instances in which a VSO provides input, advice, or information during adjudication that results in a consular officer's decision to deny a visa to an ineligible applicant.						

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	762	924	942
Actual:	None	None	754	906	N/A	N/A

Measure: Percent of visa applications reviewed at high - risk visa adjudicating posts						
Description of Measure: This measure indicates the percent of visa applications that undergo review by an Immigration and Customs Enforcement (ICE) Special Agent compared to the total number of visa applications received at all high - risk visa adjudicating posts. Review of visa applications by the program is an added layer of defense in the adjudication of visa applications processed by the State Department to prevent potential terrorists or known criminals from obtaining visas for travel to the U.S. ICE, where posted, ensures that visa applicants are screened against DHS databases prior to Department of State visa issuance.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	None	21%	27%

Performance Plan Measures

Measure: Percent of closed investigations which have an enforcement consequence (arrest, indictment, conviction, seizure, fine, or penalty).						
Description of Measure: More effective immigration and customs enforcement will contribute to enhanced homeland security as well as to greater deterrence. One method for measuring this effectiveness is to determine the extent to which criminal investigations are completed successfully, i.e., closed with an enforcement consequence. However, although many criminal cases arise that are worth pursuing, the potential of an investigation is not known at its inception; therefore, it is to be expected that many cases will be closed each year without an enforcement consequence when it is determined that the investigation is no longer viable. In addition to getting criminals off the street, successful investigations also expose and remove, or contribute to the elimination of, vulnerabilities in various aspects of customs and immigration, i.e., the ways in						

which criminals manage to evade safeguards that are supposed to prevent their illegal activity, and areas in which such safeguards are lax or do not exist.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Baseline	38.5%	36.5%	36.6%	47%	48%
Actual:	37.9%	36.4%	35.8%	46.3%	N/A	N/A

Additional Measures

Measure: Dollar value of monetary instrument seizures derived from and/or used to support criminal activity						
Description of Measure: Dollar value of monetary instrument seizures derived from and/or used to support criminal activity. Directly measures the success of removing financial incentives for criminals and terrorists to operate.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	\$266M	\$366M	TBD
Actual:	None	None	None	\$367M	N/A	N/A

Measure: Percent of closed counter-terrorism/Joint Terrorism Task Force (JTTF) investigations which have an enforcement consequence (arrest, indictment, conviction, seizure, fine, or penalty).						
Description of Measure: More effective immigration/trade enforcement will contribute to enhanced homeland security as well as to greater deterrence. One method for measuring this effectiveness is to determine the extent to which counter-terrorism/JTTF investigations are completed successfully, i.e., closed with an enforcement consequence. However, although many counter-terrorism/JTTF cases arise that are worth pursuing, the potential of an investigation is not known at its inception; therefore, it is to be expected that many cases will be closed each year without an enforcement consequence when it is determined that the investigation is no longer viable. In addition to getting criminals off the street, successful investigations also expose and remove, or contribute to the elimination of, vulnerabilities in various aspects of customs and immigration, i.e., the ways in which criminals manage to evade safeguards that are supposed to prevent their illegal activity, and areas in which such safeguards are lax or do not exist.

¹FY 2008 actuals for the Aviation appropriation do not include funds from accounts pending closeout/reconciliation.

²FY 2009 Enacted includes (1) spread of \$20M in Implementation of 9/11 Act funding to Aviation Regulation & Enforcement, Rail Security Inspectors and Canines, Intelligence & Headquarters Administration; and (2) revised FY09 fee estimates.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

**Department of Homeland Security
Transportation Security Administration**

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2008	6/1/2008	Omnibus Conference Report; Senate Report	GAO Inbound Air Cargo	Currently in DHS clearance
2008	11/15/2008	Omnibus Conference Report	4th Quarter Air Cargo Statistics	TSA received DHS passbacks on 2/18/09. Target return date to DHS is 4/17/09.
2008	1/2/2009	Omnibus Conference Report; House Report	Pilot Program to Screen Airport Employees	Currently in DHS clearance
2009	12/1/2008	Omnibus Conference Report	Air Cargo Expenditure Plan	TSA drafting -- Target delivery date to DHS is 4/17/09
2009	5/15/2009	Omnibus Conference Report	2nd Quarter Screening Wait Times	TSA drafting -- Target delivery date to DHS is 5/1/09
2009	8/15/2009	Omnibus Conference Report	3rd Quarter Screening Wait Times	TSA drafting -- Target delivery date to DHS is 8/1/09
2009	11/15/2009	Omnibus Conference Report	4th Quarter Screening Wait Times	TSA drafting -- Target delivery date to DHS is 11/1/09
2009	2/16/2009	Omnibus Conference Report	1st Quarter FY 2008 FAMS Hiring	Currently in DHS clearance
2009	5/15/2009	Omnibus Conference Report	2nd Quarter FY 2008 FAMS Hiring	TSA drafting -- Target delivery date to DHS is 5/1/09
2009	8/15/2009	Omnibus Conference Report	3rd Quarter FY 2008 FAMS Hiring	TSA drafting -- Target delivery date to DHS is 8/1/09
2009	11/15/2009	Omnibus Conference Report	4th Quarter FY 2008 FAMS Hiring	TSA drafting -- Target delivery date to DHS is 11/1/09
2009	2/16/2009	Omnibus Conference Report	1st Quarter Recoveries and Obligations	Being combined with 2nd Quarter report -- Target delivery to DHS is 5/1/09
2009	5/15/2009	Omnibus Conference Report	2nd Quarter Recoveries and Obligations	TSA drafting -- Target delivery date to DHS is 5/1/09
2009	8/15/2009	Omnibus Conference Report	3rd Quarter Recoveries and Obligations	TSA drafting -- Target delivery date to DHS is 8/1/09
2009	11/15/2009	Omnibus Conference Report	4th Quarter Recoveries and Obligations	TSA drafting -- Target delivery date to DHS is 11/1/09

2009	2/16/2009	Omnibus Conference Report	1st Quarter Air Cargo Statistics	Congress has agreed to not require this report due to major policy changes that will affect reporting.
2009	5/15/2009	Omnibus Conference Report	2nd Quarter Air Cargo Statistics	TSA drafting -- Target delivery date to DHS is 5/1/09
2009	8/15/2009	Omnibus Conference Report	3rd Quarter Air Cargo Statistics	TSA drafting -- Target delivery date to DHS is 8/1/09
2009	11/15/2009	Omnibus Conference Report	4th Quarter Air Cargo Statistics	TSA drafting -- Target delivery date to DHS is 11/1/09
2009	2/16/2009	Omnibus Conference Report	1st Quarter Explosives Detection Systems Expenditure Plan Update	Being combined with 2nd Quarter report -- Target delivery to DHS is 5/1/09
2009	5/15/2009	Omnibus Conference Report	2nd Quarter Explosives Detection Systems Expenditure Plan Update	TSA drafting -- Target delivery date to DHS is 5/1/09
2009	8/15/2009	Omnibus Conference Report	3rd Quarter Explosives Detection Systems Expenditure Plan Update	TSA drafting -- Target delivery date to DHS is 8/1/09
2009	11/15/2009	Omnibus Conference Report	4th Quarter Explosives Detection Systems Expenditure Plan Update	TSA drafting -- Target delivery date to DHS is 11/1/09
2009	2/16/2009	Omnibus Conference Report	1st Quarter Checkpoint Support Expenditure Plan Update	TSA plans to combine 1st and 2nd quarter reports.
2009	5/15/2009	Omnibus Conference Report	2nd Quarter Checkpoint Support Expenditure Plan Update	TSA drafting -- Target delivery date to DHS is 5/1/09
2009	8/15/2009	Omnibus Conference Report	3rd Quarter Checkpoint Support Expenditure Plan Update	TSA drafting -- Target delivery date to DHS is 8/1/09
2009	11/15/2009	Omnibus Conference Report	4th Quarter Checkpoint Support Expenditure Plan Update	TSA drafting -- Target delivery date to DHS is 11/1/09
2005	4/15/2009	Omnibus Conference Report	FY 2008 Unclaimed Money at Airports	Currently in DHS clearance
2009	4/1/2009	Omnibus Conference Report -- General Provisions 544, 545	Unmanned Aerial Systems	TSA drafting -- Target delivery date to DHS is 6/19/09
2009	4/6/2009	Omnibus Conference Report	Screening Technology Maintenance and Utilities	Currently in DHS clearance
2009	4/6/2009	Omnibus Conference Report	Threat Containment Units	TSA drafting -- Target delivery date to DHS is 5/15/09
2009	12/1/2008	Omnibus Conference Report; Senate Report	Risk Assessment 60 Day Report	Committees will be briefed in the near future and have agreed to a final delivery date of January 2010
2009	4/6/2009	Omnibus Conference Report; Senate Report	Risk Assessment Annual Report	Committees will be briefed in the near future and have agreed to a final delivery date of January 2010
2009	4/6/2009	Omnibus Conference Report	General Aviation	Currently in DHS clearance
2009	4/6/2009	Omnibus Conference Report	VIPR	Currently in DHS clearance
2009	4/6/2009	Omnibus Conference Report	Vetting Infrastructure Enhancement	TSA drafting -- Target delivery date to DHS is 4/24/09

BUDGET REQUEST AND SUPPORTING INFORMATION

TRANSPORTATION SECURITY ADMINISTRATION AVIATION SECURITY APPROPRIATION

I. Appropriations Overview

A. Mission:

The Aviation and Transportation Security Act (ATSA), Public Law 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols. The 9/11 Bill further strengthens Aviation Security through its authorization of extensive Air Cargo screening.

The FY 2010 request represents a continuation of the important initiatives that commenced in FY 2008 and 2009, including annualization of the programs funded in 2008 and 2009 that were authorized in the 9/11 bill. The request also includes initiatives expanding the Bomb Appraisal Officer (BAO) workforce and accelerating electronic baggage screening, as well as providing for increased maintenance costs for screening technologies.

B. Budget Activities:

The Aviation Security appropriation includes two distinct components: Transportation Security Officer (TSO) Operations and Equipment and Aviation Direction and Enforcement.

TSO Operations and Equipment - TSO Operations and Equipment includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the TSO workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment to include explosives detection systems (EDS) and explosives trace detection machines (ETD), and related operational integration activities.

Aviation Direction and Enforcement - Aviation Direction and Enforcement includes activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports air cargo and airport/airline regulation compliance through inspections, international programs, and reimbursements provided to State and local law enforcement for support provided at

commercial airport checkpoints, as well as the airport management and direction staff and airport administrative support.

C. Budget Request Summary:

The Transportation Security Administration requests 54,655 positions, 49,757 FTE, and \$5,330,450,000 in discretionary funding for Aviation Security in FY 2010. The total adjustment-to-base is 36 FTE and (\$2,263,000). Program increases include 109 positions, 55 FTE, and \$591,800,000 to:

- Enhance aviation security by deploying additional Bomb Appraisal Officers to Category I, Category II, and Primary Hub airports. (109 positions, 55 FTE, and \$7,400,000)
- Accelerate the Electronic Baggage Screening Program at the Nation's airports. (0 positions, 0 FTE, and \$565,400,000)
- Fund increased maintenance costs associated with higher-than-projected quantities of security equipment purchased over the past several years and out of warranty costs for screening technology equipment at the airports. (0 positions, 0 FTE, and \$19,000,000)

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

(Dollars in thousands)

TRANSPORTATION SECURITY OFFICER (TSO) STAFFING AND OPERATIONS

PPA: SCREENING PARTNERSHIP PROGRAM

	Perm Pos	FTE	Amount
2008 Actual			\$148,495
2009 Enacted			151,272
2010 Adjustments-to-Base			(1,629)
2010 Current Services	149,643
2010 Program Change			
2010 Request	149,643
Total Change 2009-2010	(1,629)

The Transportation Security Administration requests \$149.6 million for this activity. This increase includes \$3.4 million for pay inflation and realigns \$5 million to Screener Training and Other.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Screening Partnership Program (SPP) allows an airport operator to provide screening services through a private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at equal or higher performance levels than federal TSOs. TSA developed the SPP based on two years of operational experience with the Private Screening Pilot Program (PP5), key lessons learned from evaluation studies, and input from internal subject matter experts and external stakeholders.

The original five PP5 airports – San Francisco International (SFO), Kansas City International (MCI), Greater Rochester International (ROC), Jackson Hole Airport (JAC), and Tupelo Regional (TUP) – elected to remain in the SPP with qualified contractors performing screening functions.

These additional airports have been awarded SPP contracts:

- Sioux Falls Joe Foss Field Regional Airport, SD (FSD)
- Key West International Airport (EYW)
- Marathon Key Airport, FL (MTH) – Ceased operations in FY08
- 34th Street Heliport in New York City, NY
- Charles Schulz – Sonoma County Airport, CA (STS)
- Gallup Municipal Airport in Gallup, NM (GUP) – Ceased operations in FY08
- Roswell Industrial Airport in Roswell, NM (ROW)

Significant accomplishments in FY 2008 include:

- Completed cost and performance studies on SPP Program and renegotiated contracts for an annual savings of approximately \$1 million.
- Increased the Behavior Detection Officer (BDO), Aviation Direct Access Screening Program (ADASP) and Travel Document Checker (TDC) FTE at SPP airports.
- Integrated the Airport Federalization process into the SPP program and built the first comprehensive Airport Federalization database.

FY 2009 planned accomplishments include:

- Implement new uniforms and Checkpoint Evolution training at all SPP airports.
- Review areas for innovation and increased latitude for private screening operations, as well as implement security requirements in existing contracts as changes are made to Standard Operating Procedures (SOP) or as new security programs are developed.

In FY 2010, TSA will continue its 2009 areas of emphasis.

PPA: SCREENER PERSONNEL, COMPENSATION, AND BENEFITS

	Perm		
	Pos	FTE	Amount
2008 Actual	48,659	45,118	2,528,077
2009 Enacted	50,187	45,643	2,716,014
2010 Adjustments-to-Base		0	67,196
2010 Current Services	50,187	45,643	2,783,210
2010 Program Change	109	55	5,365
2010 Request	50,296	45,698	2,788,575
Total Change 2009-2010	109	55	72,561

The Transportation Security Administration requests \$2.8 billion for this activity. This is an increase of \$72.6 million over FY 2009, of which \$67.2 million is for pay inflation and \$5.4 million is for the expansion of the BAO program (55 FTE).

CURRENT SERVICES PROGRAM DESCRIPTION

Passenger and baggage screening protects commercial air travelers by preventing dangerous or deadly objects that individuals are attempting to smuggle onto aircraft, either on their person or in their carry-on or checked baggage. The TSA screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. At the time of passenger check-in, TSOs use various types of electronic detection and imaging machines for this purpose, including X-ray machines, explosives trace detection equipment, walk-through metal detectors, whole-body imagers and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew and airport employees in conjunction with the use of behavior recognition techniques and the validation of travel documents.

TSO Workforce and Attrition

By law all TSOs, both private and federal, are required to be U.S. citizens, pass a background investigation, and have a high school diploma, a general equivalency diploma, or sufficient experience. They must undergo extensive training and be certified to screen passengers and use the detection machines. They are subject to periodic training and testing with a failure to pass any phase of training or a certification examination as grounds for employment termination.

TSA is evolving and enhancing its security measures by increasing the amount of flexibility and adaptability of its workforce, which is paramount in countering the constantly changing threats to the transportation system. TSOs are just one of the layers of security needed to thwart the threats to the aviation system. TSA has added more specialized security positions with different skill sets such as Bomb Appraisal Officers (BAOs), Travel Document Checkers (TDCs), and Behavioral Detection Officers (BDOs) to enhance the level of security provided and to move security beyond the checkpoint environment. These additional layers of security have proven to be successful in implementation. TSA has seen the benefits of these new positions in providing a career path for TSOs, which has had a direct impact on reducing attrition and enabling TSA to retain a more tenured TSO workforce and benefit from that screening expertise. TSA also established a TSO Referral system to attract TSO candidates and facilitate recruitment and increase retention. This program was based on an idea from TSA's employee-driven Idea Factory. In FY 2008, TSA had a record low attrition rate:

Attrition Type	Work Schedule	FY04	FY05	FY06	FY07	FY08	Change from FY 04 - FY08
Voluntary	Full-Time ONLY	13.6%	13.4%	12.6%	11.6%	10.8%	-20.59%
Voluntary	Part-Time ONLY	57.8%	44.1%	38.6%	37.4%	31.8%	-44.98%
Voluntary	TOTAL	18.0%	17.4%	16.5%	17.4%	15.8%	-12.22%

TSA determines and allocates FTE to the airports through a process referred to as the Staffing Allocation Model (SAM). This model is constantly refined to most effectively allocate and manage the TSO workforce. Through the efficient allocation of resources, TSA has been able to

reduce its overtime expenditures by approximately 40 percent since FY 2006, utilize ‘Split-Shifts’ rotations, and increase work hours dedicated for training.

The TSO budgeted FTE levels are broken down as follows:

TSO Budgeted FTE by Job title

Job title	Band	FY05 FTE	FY07 FTE	FY08 FTE	FY09 FTE*	FY10 FTE
TSOs	D, E	35,471	31,131	32,180	31,536	31,192
Lead TSOs	F	5,256	5,490	5,490	5,490	5,490
Supervisory TSOs	G	4,273	4,360	4,360	4,360	4,360
BDOs	F,G,H,I	-	589	2,011	2,860	3,204
BAOs	H, I	-	118	297	297	352
Managers	H, I	1,094	1,045	1,100	1,100	1,100
TOTAL		46,094	42,733	45,438	45,643	45,698

TSO FTE Allocated to Security Duties

Job Duty	FY05 FTE	FY07 FTE	FY08 FTE	FY09 FTE*	FY10 FTE
TDC	-	-	2,001	2,001	2,001
ADASP	-	726	1,279	1,654	1,654
BDOs	-	589	2,011	2,860	3,204
BAO	-	118	297	297	352
Checkpoint / Other	46,094	41,300	39,850	38,831	38,487
TOTAL	46,094	42,733	45,438	45,643	45,698

* TSO Workforce is composed of approximately 11,000 Part Time TSOs and 38,000 Full Time TSOs (of which over 3,000 are Split-Shift Employees). TSA has increased the use of part-time employees from 14 percent to 24 percent from FY 2006 to FY 2008, increasing overall efficiency. In FY 2008, TSA provided all part-time employees with full-time equivalent benefits and is one of the few federal agencies to offer this unique benefit.

Career Progression Program

This program enables widespread career growth and professional development opportunities for high-performing TSOs, while reducing attrition and adding additional security. As emerging threats are identified and new technical measures are implemented, this robust and scalable career path is essential to TSA’s mission goals and efforts to enhance aviation security. The career progression structure allows TSA to distinguish and retain the more experienced, top performing, and better trained TSOs. Test results have shown a positive correlation between longevity and performance, including detection ability, screening efficiency and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

Benefits of this program include:

- Providing for the promotions of TSOs to E Band, a TSO compensation scale above the existing entry-level D Band. TSOs are eligible based on a minimum of two year's experience, specific level of performance and additional training/duties.
- Increasing the number of available positions for specialized technical career tracks – Master and Expert Transportation Security Officers. Master and Expert TSOs are Behavior Detection Officers (BDO) or Security Training Instructors (STI) compensated at higher band levels. BDOs screen passengers by observation techniques (SPOT) to identify potentially high-risk individuals based on involuntary physical and physiological reactions. STIs perform training instruction based on national and local training programs.
- Deploying other new skill sets and training to TSOs which dramatically increased their abilities. Programs such as the Aviation Direct Access Screening Program (ADASP), Visible Intermodal Prevention and Response (VIPR) Program, SPOT, and the Travel Document Checker (TDC) program have enhanced TSOs' security expertise. TSOs are also eligible to apply for positions as BAOs, although the Explosive Ordinance Disposal (EOD) or civilian-equivalent training prerequisite of the program is met by few TSOs.
- Formally creating Coordination Center Officers. These TSOs assist with facilitating smooth communications and assist in analyzing information on threats and responding to crises. Coordination Center Officers also ensure directives from management are met in a timely and accurate fashion.

TSA firmly supports the notion of maintaining a smaller, more capable workforce. When a shift in security programs due to threats becomes necessary or if further efficiencies are realized, TSA will look towards appropriate security enhancements, such as training a larger proportion of the TSO workforce in behavior detection techniques.

Workforce Initiatives

Through the SAM process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, the increased use of part-time and split-shift employees, technology improvements and management practices. These gains led to the expansion of security initiatives, largely accomplished within existing resources, which have significantly strengthened air transportation security. The workforce initiatives include:

- Travel Document Checker (TDC) Program - This program ensures that only passengers with authentic boarding passes can access the sterile areas of airports and board aircraft. It also allows TSA to better control passenger flow in and around the checkpoints while allowing for Sensitive Security Information regarding threats, watch lists, false documents etc. to be made available to TSOs. TSA funded the expansion of this program to all airports in FY 2008 by utilizing both the efficiencies gained internally and using funds requested in the FY 2008 Budget. In FY 2009, TSA allocated 2,001 FTE for this program

- Screening of Passengers by Observation Techniques (SPOT) - This essential program adds an important layer of security in all areas of an airport. It provides a non-intrusive means of identifying potentially high-risk individuals who exhibit behaviors indicative of inordinate levels of stress, fear and/or deception, which could possibly suggest intentions of terrorism and/or criminal activity. SPOT is conducted by certified TSA Behavior Detection Officers. Through appropriations and the SAM allocation process, TSA has been able to dramatically increase the size of this program. TSA plans to have 3,204 FTE dedicated to performing SPOT in FY 2010.
- Bomb Appraisal Officer (BAO) Program - This program strengthens the security of the Nation's transportation systems by providing frequent interaction and formal training to TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. BAOs are highly skilled individuals who have undergone training in the disposal of explosive ordinance. This program provides preventative measures against IEDs while reducing costly airport delays and closures. The BAO Program currently operates at 113 airports. TSA is requesting an additional 109 BAOs (55 FTE) in FY 2010 to provide coverage at an additional 45 airports.
- Visible Intermodal Prevention and Response (VIPR) teams - These teams consist of TSOs, BDOs, Transportation Security Inspectors (TSIs) and Federal Air Marshals (FAMs). Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in multiple transportation sectors, including buses, mass transit and airports.
- Aviation Direct Access Screening Program (ADASP) – This is an enhanced layer of security in response to a possible threat posed by airport and aircraft operator employees or other individuals and vehicles entering or present within a Security Identification Display Area (SIDA), Air Operations Area (AOA), secured, or sterile area. The objective of ADASP is to establish uniform procedures and standards for TSOs to screen individuals, their accessible property and vehicles upon entering a direct access point screening location, and conduct visual inspections of aircraft with the following goals:
 - Screen and inspect for the presence of explosives, incendiaries, weapons, and other prohibited items, improper airport ID media, and items identified through specific intelligence information; and
 - Conduct screening on a random and unpredictable basis varying location, type of procedures and duration.

The ADASP program is measured in terms of effort, not individual positions. Through FY 2008 appropriations and by examining scheduling practices and using part-time employees, TSA was able to increase this program's resources to 1,654 FTE.

The Aviation Screening Assessment Program (ASAP) - This program measures TSO screening performance using realistic and standardized test scenarios to improve aviation security and achieve a national TSO assessment measurement. ASAP was launched nation-wide during the third quarter of FY07. The primary purpose of ASAP is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test

results provide critical information to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. Through continuous data analysis; recommendations and potential impacts will be provided to various stakeholders in the organization. A national baseline measurement was achieved by conducting a total of 11,400 assessments. Each ASAP cycle is six months long and the number of assessments required per cycle is based on the factors to be evaluated. A total of 6,600 assessments will be executed by the end of FY09.

Checkpoint Evolution

An effective security system must constantly adapt to the ever-changing security environment. TSA's process of upgrading the security effectiveness at checkpoints, which encompasses people, process, and technology, is called Checkpoint Evolution. This program is the most significant change in passenger screening since 9/11 and since the checkpoint was first established in the 1970's. TSA has taken a fresh look at checkpoint operations to see how security can be improved. TSA has used the knowledge gained from employee input and passenger feedback and evaluated readily deployable technology to develop the changes being piloted.

Air travelers will notice a new look at the checkpoint. The most significant aspect is the new checkpoint supports a team approach that is calmer and more conducive to smart security. The main point of the Checkpoint Evolution is not to provide the public with the tangible improvements, such as soothing lights and soft music. Rather, the goal is to improve security through better training, processes, and technology. A variety of measures, including self-select lanes that speed the process, wireless communications that facilitate discrete communication between Security Officers, and new passenger engagement training protocols, all contribute to the reduction of some of the noise and commotion thereby enhancing our security measures.

Beginning in FY 2008, every TSO working at a checkpoint underwent an extensive sixteen-hour re-training, bringing together the latest thinking from intelligence, explosives detection, and non-human factors that can affect security. One goal of the training was to empower TSOs to be less confined by Standard Operating Procedures (SOPs), but to focus their decision-making abilities on all possible risks and threats. The training entailed a passenger engagement component as well as sections on basic smuggling tactics, intelligence information and understanding the terrorist mindset.

Workers' Compensation

TSA continues to aggressively reduce U.S. Department of Labor Office of Workers' Compensation Program (OWCP) costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. The Office of Occupational Safety, Health and Environment (OSHE) provided field support to the nation's airports to develop their safety programs, and eleven safety courses aimed at injury prevention are posted on TSA's Online Learning Center. TSA implemented a national nurse case management program at 21 airports that has successfully assisted TSOs in returning to employment in a shorter time.

In addition, the President’s Safety, Health, and Return to Employment Initiative (SHARE) requires Federal agencies to reduce the Total Case Rate (TCR) and Lost Time Case Rate (LTCR) by three percent each Fiscal Year from the FY 2003 baseline. TSA has exceeded this goal by reducing the total number of TSO injuries and illnesses from 13,781 in FY 2005 to 2,333 in FY 2008, resulting in a 65.07 percent reduction in TCR to 10.15 per 200,000 work hours. In FY 2009, TSA continues to reduce the number of TSO injuries and illnesses.

	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009 Q1	Percent Change FY 2005 - FY 2008
Total Case Rate (TCR)	22.89	36.27	29.06	16.46	13.93	10.15	6.77	65.07
Lost Time Case Rate (LTCR)	--	--	12.89	8.94	7.19	5.14	3.29	60.12

These initiatives have led to a \$3.3 million decrease in OWCP costs between FY 2008 and FY 2009 (from \$58.8 million for FY 2008 to \$55.5 million for FY 2009). TSA anticipates that these efforts will mitigate injuries and further reduce costs in the out-years.

Accomplishments and Enhancements

Significant accomplishments for this PPA in FY 2008 include:

- Completed roll-out of the new TSO Uniforms and Badges. The new uniforms were changed to be more reflective of the critical nature of the TSOs’ work and high standards. TSOs wear the badge and uniforms as visual reminders of the team nature of security;
- Successfully conducted an airport employee screening pilot program at seven airports in accordance with the FY 2008 Appropriations Bill;
- Reduced wait times over 20 minutes. Over 99% of wait times are less than 20 minutes; and
- Tripled the number of IED Checkpoint drills.

FY 2009 planned accomplishments include:

- Completing Checkpoint Evolution training for over 50,000 employees;
- Utilizing advanced communication systems for TSOs throughout the airport; and
- Utilizing STIs for re-certification training. By eliminating contractor support and performing this essential function with TSOs, TSA will be able to focus its training resources more directly on TSOs.

In FY 2010, TSA will continue the proven security programs mentioned above and expand them to further enhance aviation security. TSA’s FY 2010 request includes an increase to the BAO Program. The addition of 109 BAOs (55 FTE) will provide coverage at 40% more airports, including all Cat X and I airports, and will provide a BAO in every hub-spoke airport system. The 109 BAOs will enable TSA to provide 40% more IED training to TSOs. The pilot programs indicated a 50% improvement in TSO capability to detect IEDs after training and frequent interaction with BAOs.

PPA: SCREENER TRAINING AND OTHER

	Perm Pos	FTE	Amount
2008 Actual		69	216,830
2009 Enacted	56	54	197,318
2010 Adjustments-to-Base			4,460
2010 Current Services	56	54	201,778
2010 Program Change			1,685
2010 Request	56	54	203,463
Total Change 2009-2010	6,145

The Transportation Security Administration requests \$203.5 million for this activity. This is an increase of \$6.2 million over FY 2009. The adjustment to base includes \$160 thousand for pay inflation and \$4.3 million for increased costs for bottle liquid scanner sensing elements and other consumables. The program increase is for this PPA's applicable portion of the 109 FTP/ 55 FTE increase to the BAO program.

CURRENT SERVICES PROGRAM DESCRIPTION

This activity provides the resources to support new and recurring training requirements for the TSO workforce, as well as other direct costs associated with TSO operations.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2010
TSO Training	\$106.2
Screeener Supplies/Janitorial/Uniforms	58.4
National Deployment Office	20.0
Environmental Program	12.1
Model Workplace Program	2.6
Tort Claims	4.1
Total	\$203.4

Transportation Security Officer (TSO) Training: TSO training is comprised of a compendium of courses that includes basic training for initial hires, On-the-Job Training (OJT), Lead and Supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA On-Line Learning Center (OLC).

TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure that a high level of instructional quality is maintained.

The following programs are funded through this activity:

- New Hire Training Program (NHTP): The bulk of the security training funding provides for classroom instruction on checkpoint procedures, including travel document checking. The checked baggage screening procedures module includes on-screen-resolution protocol (OSARP) training for all new hires depending upon the equipment in place at their duty location. NHTP provides web-based training, 40 hours of instructor-led training, and hands-on equipment-specific labs at the home/hub airport. To coincide with the introduction of emerging technologies into the mainstream passenger screening process, TSA develops and subsequently delivers training to support those technologies.

TSA continues to incorporate new and innovative adult learning techniques to improve and expand the TSOs skills and capabilities in screening processes. The use of various training tools such as distance learning, training labs and engagement training, will provide TSOs with increased hands-on training opportunities and the tools needed to improve their level of professional confidence. These tools help to cultivate a holistic view of aviation security and the critical role each TSO has in the security of the transportation system.

- Recurrent Training: All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, the recurrent courses are designed to keep the workforce up-to-date with procedural changes; new technologies introduced into the screening operations; equipment used by the TSOs in the performance of their duties; and, new threat items. This training is often delivered on a weekly basis and is used to target the TSOs' individual training needs (e.g. X-ray Image Interpretation). Recurrent training courses are also required for BDOs, BAOs and the TDCs programs.
- Checkpoint Evolution Training: This new checkpoint strategy incorporates an intelligence-based focus on the interaction and communication with passengers, enlisting them as active participants in the security process. Every TSO working at the checkpoint underwent re-training that consolidated the latest thinking in intelligence, explosive detection, and human factors that can affect security. This new training will make TSOs more analytical and less "check-list oriented." The existing NHTP and recurrent training curriculum will incorporate elements of this initiative as a theme focusing on four main elements: security-driven imperative to engage passengers; calming of the checkpoint to enhance early detection of hostile intent; increase of unpredictability; and reduction of congestion through passenger engagement at multiple points throughout their journey.

Currently, there are two instructor-lead training courses for checkpoint evolution. All TSA personnel are required to take the first course and all supervisory personnel (Lead TSOs and above) are required to complete the second course. This second course provides mid-level managers with skills necessary to help reinforce the training and provide guidance to TSOs. In FY 2010, the TSA will develop the next phase of training that will continue to promote the concept of critical thinking and to continue to instill the ideals of Coach and Engage.

- Behavior Detection Officer (BDO) Program: This curriculum provides training in behavior observation and analysis at the checkpoint for the purpose of identifying passengers exhibiting behaviors indicative of stress, fear and deception. This program, known as Screening Passengers by Observation Techniques (SPOT), is performed by BDOs at all major airports. The curriculum for this program will continue to be upgraded to include additional requirements in behavior detection and reflect new techniques in deception prevention.
- Bomb Appraisal Officer (BAO) Program: The need for Bomb Appraisal Officers in all major airports requires specialized security training for those individuals selected to perform this duty. These in-house explosives experts provide rapid response for advanced resolution of alarms and instruction to TSOs to better identify potential Improvised Explosive Devices (IED) and IED components.
- Security Training Instructor (STI): This training supports the creation of a permanent TSA in-house instructor certification program. In the past, TSOs performed instructor functions as a collateral duty under the TSA Approved Instructors (TAI) program. The STI program provides more stability and consistency in that these TSOs become virtually full-time instructors while creating a career progression opportunity. The STI will perform instructional duties 80% of their time and perform security screening duties the remaining 20%. In 2007, STIs provided Basic Screener Training (BST) to 40% of the newly hired TSOs, while the contractor provided 60%. The goal in FY 2010 is for the STIs to provide BST to 90 percent of all new hire TSOs.
- Supervisor Technical Training Course (STTC): The technical and leadership competence of Supervisory Transportation Security Officers (STSO) is a critical component of workforce effectiveness and retention. TSA developed and deployed a course to strengthen STSOs' technical and general supervisory skills and provide tools needed to successfully manage the daily responsibilities and challenges faced at the checkpoint and/or checked baggage screening locations. TSA is conducting STSO Train-the-Trainer courses to enable airports to provide ongoing training to their STSOs at their home airports. TSA plans to develop recurrent training to support the STTC. TSA is also developing a course for its Lead TSOs (LTSOs), as they also fulfill a critical role in the overall TSO management change.
- Performance Reviews: All TSOs, Lead and Supervisory TSOs must participate in an Annual Proficiency Review to ensure that they meet all of the qualifications and performance standards required to perform their duties as set forth under ATSA. TSOs will continue to be certified annually based on their overall annual performance as defined by the Performance Accountability and Standards System (PASS). In 2008, PASS Technical Proficiency testing focused on image recognition, proper screening techniques, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:
 - Measuring Image Proficiency -- One image quiz per year administered using the Test Administration System (TAS) software;
 - Measuring Practical Skills -- One Practical Skills Evaluation, including the detection of prohibited items, of all TSOs per year.

The performance review process changed in FY 2008 when it was restructured into a locally managed effort. In FY 2009, the over 40,000 TSOs requiring certification will be certified by TSA evaluators, as opposed to a contractor. In addition, an end-to-end paperless evaluation and reporting environment will be created as well as object recognition assessments that accommodate for the evolving technology deployed at airports. Results-based practical skills evaluations that focus on preventing prohibited item access to the sterile area will be implemented.

In FY 2010, performance reviews will continue to focus on major procedural violations and preventing prohibited items into the sterile area. This will use a menu-based approach allowing airports to choose from a series of real-life scenarios designed to accurately reflect checkpoint threats. Airport personnel will conduct remediation and "re-evaluation" as necessary to ensure that poor performers are able to attain the "Achieves Standard" level or higher. Those employees who fail are subject to termination.

Significant accomplishments for the Screener Training Program in FY 2008 include:

- Trained over 13,088 new TSO hires, 1,522 BDOs at 119 airports
- Trained and certified 424 STIs
- Certified BAOs for placement at 103 airports
- Replaced the TSO annual training plan with monthly recurrent training plans for all TSOs
- Conducted 18 train-the-trainer classes for Supervisor Technical Training Course (400 trained)
- Deployed over 1,250 Liquid Explosives Training Kits, over 1,250 Pat Down Training Kits, and 800 IED Component Display Boards

FY 2009 planned accomplishments include:

- Launching the new NHTP with built-in training options
- Training and certifying an additional 125 STIs
- Developing and implementing BDO recurrent training and BAO Certification course
- Certifying BAOs at remaining four airports
- Launching the Supervisor Technical Training Courses
- Developing and conducting IED Exercise Drills and Kits for checked baggage and checkpoint TSOs

In FY 2010, TSA will continue its focus on training to ensure its workforce is equipped with the necessary tools. TSA will provide new hire security training for approximately 6,500 new hire TSOs, train and certify an additional 75 STIs, develop recurrent training for the Supervisor Technical Training Courses, and fully implement training courses for Lead TSOs and training managers

TSA is constantly developing and updating training and training aids due to the ever-changing threat from terrorism and the terrorist adaptation to security and screening procedures, and will continue these efforts in FY 2010. Additionally, many of the existing IED Training Tool Sets will be due for rotation from the field for upgrading. The Liquid Explosives Training Kit distributed in FY 2008 will be expanded each year to include an increased number of liquid explosive stimulants as the intelligence community provides information on the terrorists'

technological advancements. As the terrorists broaden their attack methodologies and capabilities, much of the existing training, many of the training aids, and approximately 7,500 tool sets will have to be upgraded to address the evolving threat.

TSA employs a variety of automated training and testing tools to enhance TSO skills, including computer based courses, training videos, and Threat Image Projection – where new threats are flashed on the computer screen at checkpoints to test a TSO’s detection ability. TSA continues to use the latest cutting edge technologies to provide sophisticated scenario-based training. TSA also provides an on-going, up-to-date “Threat in the Spotlight” training specifically for TSOs and their supervisors that describes and shows actual pictures of threats found by TSOs at airports or from other intelligence resources. TSA is constantly researching and evaluating new training methodologies to better equip the TSO workforce.

TSA will test and evaluate the effectiveness of new screening technologies for passengers and baggage. TSA has begun testing Whole Body Imagers, including millimeter wave and x-ray backscatter; reduced-size EDS for use at checkpoints and possibly as a combined solution for checked baggage and checkpoint baggage screening; shoe and bottled liquid scanners; and advanced technology X-ray providing increased capabilities. As these new technological advances in screening are tested and implemented, new training modules will be developed and existing training updated to ensure TSOs are knowledgeable, skilled and prepared.

Supplies/ Janitorial/ Uniforms: Consumable supplies are critical materials used by TSOs to ensure consistently effective checked baggage security levels. These consumable supplies include: disposable gloves, sample swabs or traps, sample wands, daily calibration tokens, sticks or traps, moisture removers, filters, printer paper, and ribbons, reactant materials, special solutions, label seals to identify bags inspected by TSOs, TSA logo inspected tape to reseal cardboard boxes and packages after inspection, and baggage inserts to notify passengers that TSA has opened their bag for inspection and providing contact information in the event of a problem.

TSA began issuing bottled liquids scanning equipment to airports in FY 2007. This equipment requires a sensing element in order to detect traces of certain chemical agents that must be periodically replaced. TSA purchased an additional 200 Fido and/or Sabre 4000 units during FY 2008, which will increase the annual costs of these consumables. Subsequently, TSA has rebased \$2 million for this.

TSA continues to support janitorial services contracts for passenger checkpoint and baggage screening areas to ensure a safe, debris-free work environment for TSOs and convey a positive image of TSA work areas to the traveling public. TSA currently provides janitorial reimbursement at over 90 federalized airports and reimbursement requests are increasing at a rate of approximately 22 airports per year. Recent large airport requests for reimbursement and an increase in labor costs necessitates increased funding. Subsequently, TSA has rebased \$2 million for this.

In FY 2007, TSA changed the Transportation Security Officer uniform based on the recommendation of TSA’s National Advisory Council. A board was established to redesign the uniform based on input and research with changes made to improve fit, comfort, durability, safety, image, and add other elements including a new metal shield. TSA began the distribution

of the new uniforms to TSOs at the end of FY 2007 and completed the change-over on September 11th 2008. In FY 2010, TSA will continue to provide uniforms to new hires as well as provide replacement uniforms to all TSOs through the annual allowance program.

National Deployment Office (NDO): The NDO provides additional TSOs to airports for screening support for crisis response and recovery, seasonal demands, special events or other activities that require higher-than-current staffing levels. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of limited resources. The NDO's responsibilities include deploying TSOs, Transportation Security Inspectors (TSIs) and Behavior Detection Officers (BDOs) in support of Visible Intermodal Prevention and Response (VIPR) Teams. VIPR teams deploy to enhance and augment local transportation security operations in the non-aviation modes of rail, mass transit, bus and/or ferry modes. For disaster response operations, the NDO is responsible for deploying nine Transportation Security Advance Teams (TSAT), which include 126 personnel, and 24 Transportation Security Forward Teams (TSFT), which include 600 personnel. TSA continues to review methods for reducing costs associated with the NDO program.

Significant accomplishments for the NDO in FY 2008 include:

- Deployments - Conducted 218 independent deployments, deploying 5,114 personnel equaling 108,670 labor days of support. These deployments supported airports in the following areas:
 - ✓ Disaster response and recovery operations
 - ✓ Seasonal Support
 - ✓ Risk Mitigation Operations (VIPR)
 - ✓ Special Events (Republican National Convention & Democratic National Convention)
 - ✓ Equipment support
 - ✓ Pilot programs support
 - ✓ Training support
 - ✓ Hiring Shortfalls support
 - ✓ Expanded Air Service support
- Crisis Response Deployments - Conducted over 3,300 logistical personnel movements in support of Hurricane Gustav and Ike recovery operations.
 - ✓ Hurricane Gustav - Deployed 558 personnel and 2,928 labor days of support.
 - ✓ Hurricane Ike - Deployed 629 personnel and 6,346 labor days of support

In FY 2010, NDO will continue to support the movement of security operations personnel in support of the VIPR teams, security pilot programs, disaster response operations and other emerging operational requirements.

Environmental Program: This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as remove and dispose of hazardous and voluntarily abandoned property. With over 448 airports, it is not cost effective for each airport to individually handle hazardous material disposal. TSA's national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and Local environmental regulations and laws.

Significant accomplishments for Environmental Programs in FY 2008 include:

- Won the 2008 "Federal Electronics Challenge" (FEC) Gold Award. This award recognizes outstanding environmental stewardship in all three life cycle phases of electronics acquisition, energy efficient utilization, and disposal.
- Won the 2008 "Closing the Circle" (CTC) Award. This is a Presidential level award that recognizes outstanding achievements of Federal employees and their facilities for efforts, which resulted in significant contributions to, or have made a significant impact on, promoting environmental stewardship.
- Conducted TSA/EPA Regulatory workshops. These workshops were developed and executed in response to a number of EPA or State regulatory inspections executed in FY2007. In addition to providing training to TSA Environmental Management Coordinators, the workshops increased EPA and State regulatory inspector understanding of TSA's regulatory approach as well as provide an opportunity to develop a positive rapport with the EPA and state regulatory inspectors.

FY 2009 planned accomplishments include:

- Continue to implement and maintain the environmental management system and the disposal of hazardous materials and abandoned personal property collected by TSA at checkpoints.
- Complete the NEPA reviews of TSA emerging technologies and facilities.
- Establish a baseline to account for all personnel that use some form of environmentally-friendly transportation: public transportation, van and car pools (including slugging), bicycling or motorcycling, and commuter buses and trains.

In FY 2010, TSA will complete a comprehensive review of the Hazardous Materials Management Program training course to ensure compliance.

Model Workplace Program: The FY 2010 request for \$2.6 million provides funding for the Model Workplace Program Office which identifies and implements the best employment ideals and practices to make TSA an employer of choice. The cornerstone of the program is TSA's Integrated Conflict Management System (ICMS). The ICMS builds and sustains an environment in which issues, ideas, and concerns are raised and addressed, and conflict is managed effectively. The system provides skills, structure, and support to cooperatively solve problems necessary for good relationships, teamwork, and organizational effectiveness.

Significant accomplishments for Model Workplace Program in FY 2008 include:

- Developed and deployed standards for ICMS implementation for Level 1 and 2 (on a five level maturity scale), and integrated competencies into leadership, management and Checkpoint Evolution curriculum and training programs;
- Continued the management and facilitation of the National Advisory Council (NAC); and
- Continued expansion to 135 ICMS Coordinators nationwide.

FY 2009 planned accomplishments include:

- Issue a management directive to codify policy, guidance, and standards for the ICMS;
- Develop internal practitioners to continue the development of core competencies in conflict management and cooperative problem solving; and
- Expand the influence and span of the NAC by fully engaging the NAC Network in the gathering of ideas and sharing information.

In FY 2010, TSA will define Level 3 ICMS and deploy to all TSA locations.

Tort Claims: TSA currently screens over 50 million bags per month and over 35 million passengers per month. Occasionally, during the screening process, a screener may damage or misplace passengers' property. TSA reimburses passengers that have experienced loss or damage due to the negligence of a TSA employee.

PPA: CHECKPOINT SUPPORT

	Perm Pos	FTE	Amount
2008 Actual	10	5	23,585
2009 Enacted	41	40	250,000
2010 Adjustments-to-Base	(121,261)
2010 Current Services	41	40	128,739

2010 Request	41	40	128,739
Total Change 2009-2010	(121,261)

*The table above excludes ARRA funding of \$300 million provided in P.L. 111-5. The Transportation Security Administration requests \$129 million for Checkpoint Support activities, a decrease of \$121 million as a result of , non-recurring funds from the FY 2009 Enacted level and pay COLA

CURRENT SERVICES PROGRAM DESCRIPTION

The checkpoint support program provides the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening capabilities. This involves technologies, training, checkpoint reconfigurations, closed circuit television surveillance equipment, and safety and optimization services at approximately 2,200 passenger checkpoint lanes in our Nation's airports. TSA developed a strategic plan to enhance screening through

improved checkpoint technology which will refine passenger security for aviation. This initiative extends beyond the airport checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. Focus is on three key elements: improved explosive detection, enhanced hostile intent detection, and extended presence in the passenger journey.

Current technologies that have been deployed include Threat Image Protection (TIP) Ready X-Ray machines (TRX); enhanced walk-through metal detectors (WTMD) that screen persons for metallic weapons such as guns or knives; explosives trace detectors (ETD), which are used to test for explosive residue on selected carry-on items; bottled liquid scanners (BLS), which screen bottles to determine if they contain explosives or benign liquids; whole body imaging systems (WBI) consisting of Millimeter Wave, backscatter x-ray, and other technologies capable of providing images of threat objects on a person's body; and advanced technology systems (AT), which are X-ray systems with advanced visual detection capabilities, using multi-view capabilities or automated explosives detection capabilities.

AT and BLS are being deployed as a system to provide enhanced liquid threat detection capabilities. The national deployment strategy is primarily based on airport prioritization generated by the Office of Intelligence and implemented at 15 airports. A modified strategy was developed based on intelligence concerning liquid threats. The Passenger Screening Program (PSP) will rapidly deploy AT and BLS to those airports identified and then revert to the original national deployment plan to replace legacy equipment with more technologically advanced systems.

The TSA received American Recovery and Reinvestment Act (ARRA) funding to be used at the checkpoint in order to procure and install checkpoint explosives detection equipment. The TSA will use these funds to accelerate the large scale deployment of AT systems, Universal Conveyor Systems (UCS), BLS, WBI, and NextGen ETDs. By the end of FY 2010, enough AT and BLS will be procured to complete full operating capability (FOC) of these systems. ARRA procurements of WBI, UCS, and NextGen ETD will provide a significant percentage of coverage toward FOC of these systems.

FY 2008 significant accomplishments include:

- Conducted operational testing and evaluation of several new passenger screening technologies and process flow enhancement initiatives, including bottle liquid screening equipment, cast and prosthesis screening equipment, Automated Carry-on Explosives Detection Systems, WBI, AT Systems, Checkpoint Evolution initiatives, and document authentication devices.
- Procured and deployed AT Systems, WBI, Automated Carry-on Explosives Detection Systems, Standoff Detectors (SOD), and Cast and Prosthesis Imagers (CPI).

FY 2009 planned accomplishments include:

- Operational testing and evaluation in support of development of Qualified Product Lists for enhanced capability WBI, shoe scanner systems, AT carry-on baggage screening systems, and BLS.
- Operational evaluations of Credential Authentication Technology and Boarding Pass Scanning Systems.
- Continued evaluation of ETD technology to expand current list of qualified products; process optimization initiatives, and continued enhancement of testing and evaluation capabilities.
- Acceleration of the full operating capability (FOC) of AT, UCS, BLS, WBI, and ETD through usage of ARRA funds.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2010
Checkpoint Technology	\$100.1
Reconfiguration, Safety, and Optimization	15.2
Advanced Surveillance Program	6.3
Payroll	7.1
Total	\$128.7

Checkpoint Technology: This request includes \$100.1 million to procure and deploy improved technology systems to further extend explosives and prohibited item detection coverage at aviation checkpoints. It includes \$72 million to test, purchase, and install new screening equipment and update existing equipment. Funds will also be used for program, engineering, technical support and travel, original equipment manufacturer training, warehousing, consumables, and refurbishing equipment, to provide functionality and performance enhancements as well as for life-cycle replacements for units reaching the end of their useful life. Equipment purchases may include WBI, CPI, shoe scanner systems, credential authentication technologies, technology integration solutions, and additional units or upgrades to legacy equipment. This equipment will enable TSA to detect a greater range of threats more quickly and with greater accuracy than existing equipment. TSA piloted both millimeter wave and backscatter technology at Category X and I airports. TSA will be deploying additional WBI systems that will build off current capabilities such as auto detection algorithms, networking and multiplexing.

Technology	FOC	FY 09	ARRA	FY10 Planned Procurements	FY10	Total
Advanced Technology *	2325	62%	95%	0	95%	95%
Universal Conveyor Systems	2325	9%	20%	75	24%	24%
Bottled Liquids Scanners	1300	62%	100%	0	100%	100%
Credential Authentication Technology	878	46%	46%	400	91%	91%
Enhanced Metal Detectors - 2	1850	0%	0%	125	7%	7%
NextGen Explosives Trace Detectors	1500	13%	33%	100	40%	40%
Shoe Scanner	1300	0%	0%	100	8%	8%
Stand Off Detectors	351	9%	9%	20	15%	15%
Whole Body Imagers	878	25%	47%	75	56%	56%

* Percentage of Full Operating Capability (FOC) based on FY 2014 estimates. Quantity of AT units to be procured with FY10 Funds will meet current nationwide requirements.

Reconfiguration, Safety, and Optimization: The evolution of the airline industry and the need to deploy emerging technology fuels the requirement for reconfiguration, safety, and optimization funding. Funding of \$1.2 million will support the optimization and reconfiguration of additional lanes to accommodate any airport growth and maintain throughput at the busiest checkpoints. This effort will incorporate, as appropriate, alternative configurations that improve security and throughput while reducing congestion at “soft target” locations like airport lobbies. These enhancements may include remote screening centers, improved divestiture and reorganization zones, or special lanes for no/single carry-on baggage. Funding will also be used to complete safety projects to correct and/or mitigate existing safety hazards in public and non-public TSA screening areas that contribute to a significant number of on-the-job injuries among TSA employees.

Optimization is targeted at identifying expedited improvements that simultaneously address safety issues and improve operational efficiency while maintaining or enhancing transportation security. These initiatives may involve moving equipment, small scale construction, HVAC, and/or related mechanical and electrical work. Funds may also be used to purchase any ancillary equipment such as roller tables, lift carts and fatigue mats needed for a particular project.

Advanced Surveillance Program (formerly Electronic Surveillance Systems): The Advanced Surveillance Program (ASP) utilizes the existing infrastructure owned and operated by the transportation authority for remote monitoring, threat detection and assessment in a partnership agreement to provide enhanced situational awareness to local TSA. In FY 2010, \$6.3 million of funding is requested for these activities. These systems, collectively known as advanced surveillance systems, have proven to be a key component in the “best practices” of the security industry world-wide for many years. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control as well as first responders in the event of an incident or threat.

Payroll: The request provides \$7.1 million to support 49 full time positions.

PPA: EDS/ETD PROCUREMENT AND INSTALLATION

	Perm Pos	FTE	Amount*
2008 Actual	18	9	\$521,997
2009 Enacted	111	106	294,000
2010 Adjustments-to-Base	-4	-4	(2,809)
2010 Current Services	107	102	291,191
2010 Program Change			565,400
2010 Request	107	102	856,591
Total Change 2009-2010	-4	-4	562,591

* Excludes mandatory funding of \$250M

The table above excludes ARRA funding of \$700 million provided in P.L. 111-5. The Transportation Security Administration requests \$857 million for this activity. This includes a program increase of \$565 million.

PROGRAM DESCRIPTION:

TSA requests \$857 million to support the purchase and installation of in-line systems for airports selected in accordance with the EDS Strategic Plan. There has been steady progress in deploying systems at high-priority airports in the past several years.

In 2006, TSA developed a Strategic Plan for achieving optimal screening solutions at the top 250 commercial airports. Implementation of these optimal solutions will provide for decreased life cycle costs for the EDS program. This plan uses a top-down prioritization model to perform a systematic, comprehensive assessment of screening alternatives at airports balancing security and economic factors. These results feed into a deployment model that prioritizes allocation of available funds.

In-line EDS screening systems provide more reliable baggage delivery, greater efficiency, and increased flexibility to accommodate traffic growth. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for TSOs improve with in-line systems. Alarms can be resolved in quieter, dedicated spaces properly designed for the alarm resolution function. On-the-job injuries are reduced as a result of better-designed alarm resolution areas since fewer alarms mean fewer bags are lifted by TSOs. These are just some examples of the broad reaching benefits of in-line systems.

The FY 2010 request will be used to evaluate, select, deploy, and maintain the electronic baggage screening technology systems. The program is responsible for ensuring that 100% of all

checked baggage is screened with explosive detection system capability or a suitable alternative. The two primary technologies acquired and deployed under the Electronic Baggage Screening Program (EBSP) are Explosive Detection System (EDS) equipment and Explosives Trace Detection (ETD) devices. Continuous improvements are required to increase equipment reliability, reduce downtime, extend service life, and eliminate TSO safety hazards in order for EBSP to substantially improve the effectiveness and efficiency of the deployed screening equipment. TSA's activities related to purchasing and installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) operational testing and evaluation, 2) equipment purchase 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) equipment installation, integration, and multiplexing, 8) independent verification and validation testing, and 9) program support.

Program progress relative to EDS/ETD deployment and facility modifications

*FY 09 and ARRA funds include reduced size EDS purchase for current ETD-only airports.

Facility Modification Project Prioritization

Facility modification priorities necessarily occur after resources are allocated to other program commitments. First, the program must assign resources to previously committed multi-year agreements for facility modifications. This is followed by the purchase and installation of EDS equipment to support new airport terminals, to ensure security compliance, to fulfill existing airport agreements and to ensure equipment is available for new projects.

To prioritize facility modification projects, several factors are considered beyond the risk-based Airport Prioritization Model (APM) ranking, including the cost share the airport is willing to assume, the scoring of the airport's funding application, and the readiness of the airport to apply funding (i.e., schedule). In this process, TSA first runs a top-down model to generate the APM scores. The program concurrently reviews airport funding applications submitted. TSA then scores the additional factors and generates a prioritization list. The workflow figure that follows indicates how that process is conducted. Lastly, a factor for readiness is then applied to ensure that funds are directed to airports that are ready to apply them.

Process Overview

EDS

EDS is the main technology used in the checked baggage screening process. This equipment automates what was previously a manually-intensive baggage inspection, allowing faster bag throughput (up to 300 percent) and improved threat detection capabilities. EDS machines are the largest and most expensive security screening equipment in the TSA inventory.

Most of the currently deployed EDS technology developed prior to the Aviation and Transportation Security Act (ATSA) was based on standards set forth by Congress in the Aviation Security Improvement Act of 1990. Since large-scale deployment of EDS systems by TSA in 2002 and 2003, manufacturers have made improvements to lower alarm rates and increase throughput capacity for this equipment. The EDS program saw new technological introductions in the form of the Reveal CT-80, GE 9400 and 9800, and the L-3/Analogic. Newly entrant EDS machines and significant upgrades to existing EDS technology are constantly under development.

These technologies will offer a variety of enhancements that will improve screening capabilities, increase throughput, and reduce equipment footprint. In FY 2010, TSA will procure and deploy equipment offering significant improvements to screening efficiency.

ETD

ETD machines are used both as a primary screening method and a secondary screening method (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the program. ETDs are designed to detect explosives residue left on an item and/or bag. Since the enactment of the ATSA, TSA has implemented the 100 percent checked baggage screening requirement; however some solutions in place may not be sustainable as passenger loads increase. TSA continues its efforts to replace 100 percent ETD checked baggage screening solutions with EDS or reduced sized dual-use EDS where appropriate.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2010
Installation	\$886
Purchase of Checked Baggage Equipment	\$203
Payroll	\$17
Total	\$1,106

^{1/} Includes mandatory funding of \$250M

Installation: The FY 2010 request includes \$886 million to support the installation of electronic baggage screening equipment in our Nation's airports. Installation costs, along with purchase costs, are a component of the total cost of equipment deployment. This funding will cover the TSA cost share of approximately 28 airport facility modifications, to include Letters of Intent (LOI). The cost of installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) site survey and design, 2) site preparation/facility modification, 3) warehousing and shipping, 4) testing, and 5) program support.

The funding also supports the Security Technology Integrated Program (STIP). The STIP effort benefits EDS by: 1) providing enhanced security, 2) improving resource management, and 3)

assisting in decreasing operational costs by increasing equipment reliability and reducing downtime.

Installation also has funding for the Advanced Surveillance Program (ASP). ASP: 1) provides remote visibility into the baggage resolution and screening areas, 2) provides an additional layer of security into the locations that TSA screens checked baggage to reduce the risk of threats from being introduced into checked baggage, and 3) creates overall situational awareness to support oversight control for loss prevention.

Purchase: A total of \$203 million is requested in FY 2010 to support the purchase of 233 EDS for deployment in our nation's airports. The procurement will consist of medium throughput, high throughput, and reduced size EDS. Purchases in FY 2010 are planned to support projects where facility modifications will be completed from prior year funded projects and recapitalization of existing equipment as required.

Payroll: The request provides \$17 million to support 107 full time positions.

FY 2008 significant accomplishments include:

- Established a two-year Letter of Intent for PANYNJ (The Port Authority of New York and New Jersey) to complete in-line systems at Newark, LaGuardia, and John F. Kennedy airports.
- 23 additional in-line systems became operational in airports nationwide
- Purchase of 40 reduced-size EDS
- Certified and began deploying reduced-size EDS that achieves more than 200 bags per hour
- Conducted operational testing and evaluation of several checked baggage screening systems and process flow enhancement tools, including operational evaluations for Explosives Detection Systems; the GE ViewLink Remote Viewing Station; the CT Image Quality Toolkit; On-Screen Alarm Resolution Protocol (OSARP) revisions designed to leverage enhanced EDS capabilities, and checked baggage management tools.

FY 2009 planned accomplishments include:

- Certification of high volume EDS
- Procurement of EDS units in support of in-line systems
- Funding of facility modifications at 11 airports nationwide with appropriated FY09 funds
- Begin recapitalization process for life cycle replacement of EDS
- Top down/bottom up prioritization of projects across all program areas
- Testing and evaluation of several emerging EDS and baggage screening enhancement tools, including the High Speed, Medium Speed, Reduced Size, Dual Use and Stationary Gantry Fixed Source EDS systems;
- Operational evaluation of the Multiplexing upgrade; and improvements to checked baggage screening procedures utilizing combinations of Advanced Technology X-ray, Reduced Size EDS and Explosive Trace Detection protocols.
- Funding of facility modifications and EDS purchase and installation at an additional 16 airports nationwide with funding received in The American Recovery and Reinvestment Act of 2009

PPA: SCREENING TECHNOLOGY MAINTENANCE & UTILITIES

	Perm Pos	FTE	Amount
2008 Actual			\$263,415
2009 Enacted			305,625
2010 Adjustments-to-Base			2,000
2010 Current Services	307,625
2010 Program Change	19,000
2010 Request			326,625
Total Change 2009-2010	21,000

The Transportation Security Administration requests \$326.6 million for this activity. This is an increase of \$21 million over FY 2009. The program increase of \$19 million supports increases to maintenance costs for higher-than-projected quantities of security equipment. The adjustments-to-base is a \$2 million adjustment to accommodate increased reimbursements for the utility costs associated with TSA screening equipment.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components of this PPA.
(dollars in millions)

	FY 2010
Checked Baggage Equipment Maintenance	\$262.4
Checkpoint Equipment Maintenance	\$52.2
Utilities	\$8.0
Disposal	\$4.0
Total	\$326.6

This funding supports the maintenance and associated utilities of security technology equipment in our Nation’s airports. Maintenance is essential to preserve the operational capability of security technology equipment. Equipment failures can increase when maintenance is neglected or delayed. When equipment fails, Transportation Security Officers (TSO) are deprived from using their advanced technological capabilities for screening baggage and passengers to detect unauthorized weapons, explosives, incendiaries, and other destructive devices, items, or substances. Material availability of security screening equipment preserves airport efficiency and minimizes impact on the traveling public.

Once warranties expire (normally 12 months), all TSA checkpoint and checked baggage screening equipment requires maintenance throughout its life cycle. Most maintenance is performed by contractor Field Service Technicians (FST) working for Original Equipment Manufacturers (OEM) and a 3rd party Maintenance Service Provider (MSP). Preventive maintenance is performed according to the manufacturer’s recommended schedule (e.g. monthly, annually, etc). Corrective maintenance support is provided 24 hours a day, 7 days a week to perform unplanned corrective repairs in the field. Maintenance contracts include labor costs for

all preventive and corrective maintenance, as well as material costs for repair parts or consumables (e.g. ETD swabs).

FY 2008 significant accomplishments include:

- Provided preventative and corrective maintenance to over 10,000 pieces of security equipment.
- Created working group to establish management control procedures for TSA personnel located at airports to assist the Contracting Officer's Technical Representative (COTR) to verify that security equipment maintenance is performed in accordance with contract schedules.

FY 2009 planned accomplishments include:

- Measure EDS maintenance contract performance at the airport-level (vs. fleet wide) to better align with operational requirements.
- Implement management control procedures at airports to verify that security equipment maintenance is performed in accordance with contract schedules.
- Prepare solicitation packages for competitive re-bid of maintenance contracts that expire in FY 2010.

Checked Baggage Equipment Maintenance: This request includes \$262.4 million for preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems.

Below is a breakout of projected maintenance costs for baggage screening equipment:

Equipment	Quantity	Maintenance Cost
EDS		
CTX-2500	70	5,964,314
CTX-5500	489	44,469,361
CTX-9000	298	36,760,446
CTX-9400	90	7,880,180
CTX-9800	11	995,278
e6000	602	68,947,452
e6600	92	5,957,737
Reveal	227	12,671,178
Dual Use EDS	20	306,088
ETD		
400B	3,460	39,023,247
Itemiser-W	2,284	24,618,125
Consumables		4,209,088
Excepted Maintenance/Call Center/Environment Issues		7,589,121
Checked Baggage Equipment Maintenance		\$259,391,615
Support Services		3,008,385
Total FY10 Maintenance Requirement		\$262,400,000

Checkpoint Equipment Maintenance: This request includes \$52 million for the preventive and corrective maintenance activities required to maintain the operation of deployed passenger screening security equipment.

Below is a breakout of projected maintenance costs for passenger screening systems:

Equipment	Quantity	Maintenance Cost
ETD		
IonScan 400B	784	8,932,489
Itemiser-W	500	5,247,898
Next Generation	215	489,969
Consumables		1,073,523
EMD		
Ceia	1395	907,874

QinetiQ	60	778,449
Credential Authentication Technology		
TBD	577	800,443
Shoe Scanners		
TBD	120	385,538
Checkpoint Equipment Maintenance		
		\$ 50,582,794
Support Services		1,642,206
Total FY10 Checkpoint Maintenance Requirement		\$ 52,225,000

Utilities: This request includes \$8 million in utility payments associated with operation of security equipment and is a recurring cost borne by TSA.

Disposal: This request includes \$4.0 million to provide disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g. higher screening throughput), technological advancements (e.g. improved detection capability) or supportability problems (e.g. frequent failures) dictate the need for replacement. Sometimes equipment is

redeployed to satisfy screening requirements at other airports. Security equipment that is not redeployed is considered for disposal in accordance with the TSA National Disposal Plan and all applicable laws and regulations governing the disposal of hazardous materials. This budget includes funding to dispose excess security equipment through an agreement with the Defense Reutilization and Marketing Service (DRMS) to provide disposition/ disposal services, including hazardous property.

Cost reduction initiatives: TSA is pursuing several initiatives to reduce the unit price of equipment maintenance, including:

- Expansion of competition in the security equipment industry
- Competitive award of new maintenance contracts in FY 2009 and FY 2010
- Development of a Remote Maintenance Monitoring (RMM) capability
- Life cycle replacement of aging and unreliable machines
- Improved reliability and maintainability specifications for new security equipment
- Review of excess capacity for potential machine decommissioning

PPA: OPERATION INTEGRATION

	Perm		
	Pos	FTE	Amount
2008 Actual	24	17	\$23,734
2009 Enacted			21,481
2010 Adjustments-to-Base			0
2010 Current Services	21,481
2010 Program Change	0
2010 Request	21,481
Total Change 2009-2010

The Transportation Security Administration requests \$21.5 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION

TSA requests \$21.5 million to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational test and evaluation as part of the acquisition process for items procured by TSA, including Early Utility Assessments, Initial Operational Test and Evaluation, and Follow-on Operational Test and Evaluation over the project lifecycle;
- Operational test and evaluation in support of regulatory and policy decisions in areas such as air cargo;

- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development, process optimization and improvement, and workforce / vector characterizations; and
- Testing and evaluation capabilities development, to improve the quality and utility of evaluation products.

This program includes aviation security programs covering passenger, baggage, cargo, and airport infrastructure as well as a program addressing surface transportation protection. The following table provides the components of this PPA.

(dollars in millions)

	FY 2010
Passenger Screening	\$3.5
Checked Baggage	3.2
Cargo	3.1
Infrastructure	1.0
Surface	8.0
Test Capabilities	2.7
Total	\$21.5

FY 2008 significant accomplishments include:

- Conducted operational testing and evaluation of new and improved aviation checkpoint screening technologies, including bottled liquid screening equipment, cast and prosthesis scanning devices, computed-tomography Carry-on Explosives Detection Systems, millimeter-wave and x-ray backscatter whole body imager passenger screening equipment, Advanced Technology / Next Generation carry-on article screening systems, and boarding pass scanners / document authentication devices;
- Conducted operational testing and evaluation of several checked baggage screening systems and process flow enhancement tools, including operational evaluations for Explosives Detection Systems; the GE ViewLink Remote Viewing Station; and improved On-Screen Alarm Resolution Protocol (OSARP) revisions designed to leverage enhanced EDS capabilities;
- Conducted operational testing and evaluation of EDS and Explosives Trace Detection (ETD) systems to develop an initial list of cargo screening equipment;
- Conducted a cargo composition and vector characterization study to obtain information on the distribution and makeup of cargo transported on both commercial and all-cargo aircraft;
- Conducted field experimentation of a portal for detection of Vehicle-Borne Improvised Explosives Devices (VBIEDs) in trucks, buses and other large vehicles; and
- Established TSA's first cyber security program remedying vulnerabilities in pipeline Supervisory Control and Data Acquisition (SCADA) controls.

FY 2009 planned accomplishments include:

- Conduct integrated testing and evaluation in support of development of Qualified Product Lists for enhanced whole body imagers, Advanced Technology carry-on baggage screening systems with improved detection capabilities, and improved bottled liquid scanners;

- Conduct operational testing and evaluation of Credential Authentication Technology / Boarding Pass Scanning Systems;
- Continue integrated testing and evaluation of explosives trace detection systems and technologies, to expand the current list of qualified products;
- Conduct limited user testing in support of a concept demonstration involving aviation checkpoint shoe scanners;
- Conduct testing and evaluation in support of process optimization / process enhancement initiatives, including an EDS alarm resolution comparative study, alternative checked baggage ETD screening protocol, and conduct of the “primary position” whole body imager concept demonstration;
- Continue enhancement of testing and evaluation capabilities, including update and refinement of checkpoint and checked baggage common data standards, continued development of accredited threat surrogates for OT&E and training purposes through the threat surrogate working group, and development of the integrated testing and evaluation strategy paradigm, in support of TSA and DHS acquisition policy and procedures;
- Conduct operational test and evaluation of enhanced imagery EDS and other emerging explosives detection systems with enhanced capabilities, including advanced multiplexing capabilities, as well as the CT Image Quality Toolkit for assessing EDS image quality;
- Continue FY 2008 projects to evaluate current and emerging technologies and systems for air cargo screening, including continued characterization studies and counter-to-counter initiatives;
- Introduce new chemical/biological detection technologies into high vulnerability/high consequence facilities and conduct pilot testing; and
- Continue to develop and transition technologies for use in the mass transit and passenger rail environment including advanced suicide bomber detection and VBIED detection.

In FY 2010, assessments will continue on new technologies in support of passenger, baggage, cargo, and surface screening, as well as enhancing existing T&E capabilities. TSA will also continue to evaluate technologies planned for checkpoint, improvements to existing screening technologies, and products emerging from DHS Science and Technology’s R&D program.

PPA: AVIATION REGULATION

	Perm		
	Pos	FTE	Amount
2008 Actual	1,096	940	\$232,663
2009 Enacted	1,168	1,086	248,943

2010 Request	1,179	1,097	254,064
Total Change 2009-2010	11	11	5,121

TSA requests \$254.1 million for this activity. This is an increase of \$5.1 million

and includes \$1.9 million for general aviation and annualization of 9/11 funding and \$3.2 for pay inflation.

PROGRAM DESCRIPTION:

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and respond to security incidents. It also provides an international component to foster consistency in worldwide security requirements.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2010
Regulatory Inspections	\$104.2
International Programs	18.8
Repair Station Inspections	3.4
Airport Law Enforcement & Assessments	82.2
National Explosive Detection Canine Training Program	33.9
Transportation Sector Network Management	11.7
Total	\$254.1

Regulatory Inspections: The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of more than 450 U.S. airports, 550 foreign airports, and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 indirect air carriers operating in the U.S.

The following chart provides historical and current information on the total number of TSA Inspectors (TSIs):

TSA Inspectors

	Full Time Permanent Positions					
	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
TSI - Aviation Domestic ¹	601	681	657	778	755	755
TSI - Aviation Int'l	40	39	39	45	45	45
Total, Aviation Inspectors	641	720	696	823	800	800
TSI - Int'l Repair Stations	0	2	15	15	15	15
TSI - Cargo ²	100	225	300	535	535	535
TSI - Cargo Int'l			10	10	10	10
Total, Cargo	100	225	310	545	545	545
TSI - Surface ³	99	100	100	175	225	225
TOTAL	840	1,047	1,121	1,558	1,585	1,585

1/ Includes 46 FTP for Canine teams and 75 FTP for VIPR. In FY 09, 23 of 46 Canine handlers converted to FAMS.

2/ Includes 85 FTP for Canine teams and 150 FTP for Inspectors from the FY 07 Supplemental

3/ Includes 75 FTP for VIPR and 50 FTP for 9/11

TSIs have an essential role in formulating annual plans for local inspections. TSIs review the documentation and plans that have been approved by TSA and implemented in support of TSA regulatory mandate as well as records and files pertaining to criminal history records checks performed pursuant to Federal law. The inspectors also review records and files to ensure compliance of indirect air carriers, private passenger and/or cargo charters, airmen and aircrew with security requirements. The TSIs investigate incidents related to violations of TSA regulation, security directives, and approved security programs. Inspectors deliver technical briefings and assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among many other important security measures through visual and hands-on inspection as well as by walking the grounds and interacting with airport personnel. Based on these assessments inspectors will recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft. Inspectors must be well trained and knowledgeable in the principles of investigation and civil enforcement in order to assist the agency Chief Counsel in the preparation of formal enforcement actions against those who violate security requirements.

Significant accomplishments in FY 2008 include:

- Completed over 1,100 airport inspections to ensure compliance with current requirements as well as conducted follow up inspections to address previously identified compliance

issues. Also participated in 6,000 Aviation Screening Assessment Program (ASAP) tests, VIPR activities across all modes of transportation, Aviation Direct Access Screening Program (ADASP) activities at all airports.

- Conducted week-long full scale airport and aircraft operator inspections (Airport Strike) at Boston, Philadelphia, Denver, Seattle, Chicago O'Hare, Cincinnati, and Phoenix.
- Tested and deployed new technology (Sabre 4000/FIDO) for aircraft screening.
- Audited the SIDA badge accountability of all Category X and I airports.

FY 2009 planned accomplishments include:

- Conduct a baseline comprehensive inspection of all airports, aircraft operators, and foreign air carriers at domestic airports.
- Continue support of the ASAP, ADASP, VIPR and SIDA activities.
- Continue routine and random airport inspections, conduct follow up activities to resolve non-compliance issues and increase the frequency and number of airport/aircraft operator inspections at domestic airports.

TSIs will continue these efforts in FY 2010. Inspectors will continue to schedule, oversee, and record the TSA ASAP program, as well as actively participate in VIPR activities. Airport Strikes will be expanded in order to include more testing protocols as well as 100% audit of specific airport badging offices. Additional covert testing protocols will be done for testing of all regulated entities.

International Programs: TSA promotes alignment and consistency between the security requirements of the U.S. and foreign governments. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [e.g., International Civil Aviation Organization (ICAO), the Group of Eight (G8) Transportation Security Subgroup, the European Civil Aviation Conference (ECAC), the International Working Group on Land Transport Security, and the Asian Pacific Economic Cooperation (APEC)]. Through interaction with foreign officials at the bilateral, multilateral and regional levels, best practices in transportation security can be advanced to achieve our vision of a secure, global transportation system.

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- 23 TSA representatives responsible for liaison activity and representation with over 100 foreign governments;
- On-site liaison activity and representation in 19 foreign countries;
- Non-stop assessment activity by approximately 75 International Aviation Security Inspectors verifying security measures of U.S. and foreign air carriers and compliance with International Civil Aviation Organization standards at more than 500 foreign airports to include passenger and cargo;
- Assessment activity in the near future at nearly 700 foreign and 4,500 domestic repair stations;
- Active leadership within the regional and international community that comprises the world's transportation security expertise engaged in policy development; and
- An expanding capacity building program for nations needing assistance in order to meet international standards.

TSA Representatives (TSARs) serve as on-site coordinators for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs serve as principal advisors on transportation security affairs to U.S. Ambassadors and other embassy officials responsible for transportation issues to ensure the safety and security of the transportation system. TSA also supports the Department of State, Office of Foreign Missions, by assisting with the Escort Screening Courtesies program. A central point of contact is assigned to the Department of State to assist with facilitating the movement of dignitaries who either are eligible for escort privileges or to whom expedited screening courtesies are provided.

Locations of TSARs	No. TSARs	Locations of TSARs	No. TSARs
Amman	1	Manila	1
Athens	1	Mexico City	1
Bangkok	1	New Delhi	1
Beijing	1	Ottawa	1
Berlin	1	Paris	1
Brussels	1	Rome	1
Buenos Aries	1	Singapore	1
Caribbean (Miami)	3	Sydney	1
London	2	Tokyo	1
Madrid	1	Warsaw	1

During FY 2008, TSA implemented an expanding program of capacity building initiatives with those governments needing transportation security assistance. Through identification of threats and vulnerabilities in each country and internal coordination efforts, TSA is working with regional leaders to leverage existing resources for harmonization, training, assistance, and information exchange opportunities. The greatest emphasis is placed on Africa, Latin America and Asia Pacific, in light of the exponential increases in traffic from these regions to the United States and the concerns about security of U.S. passengers and goods. In FY 2009, TSA will staff three new TSAR positions – one each in Brasilia, Brazil; Johannesburg, South Africa; and Nassau, The Bahamas. These TSARs will address the increasing air traffic, harmonization and capacity building efforts, and potential risks noted in each region.

The Foreign Airport Assessment Program and Air Carrier Inspection Program at foreign airports differ significantly from domestic compliance operations. During airport assessments conducted in foreign countries, Transportation Security Specialists (TSSs) focus on application of International Standards and Recommended Practices (SARPs) defined by the International Civil Aviation Organization, to which nearly 190 countries are signatories. TSA is congressionally mandated under 49 U.S.C. 44907 to assess all airports from which there is service to/from the United States against these SARPs. A thorough foreign airport assessment requires approximately four weeks for completion. TSSs also inspect the operations of both domestic and foreign air carriers with U.S. service from these airports to insure compliance with TSA security directives and emergency amendments. Carrier inspections can occur up to two times annually with airport assessments occurring at least once every three years and more frequently according to risk based scheduling.

Locations of TSSs	No. TSSs
Miami	16
Dallas	10
LAX	8
Singapore	4
Frankfurt	17
HQ	1

TSA implements the Foreign Air Carrier Model Security Program (MSP), in accordance with 49 CFR Part 1546, which requires non-U.S. air carriers, landing or taking off in the United States, to adopt and carry out a security program for each scheduled and public operation meeting specific seating capacity and/or airport access criteria. Such non-U.S. air carriers are assigned an International Industry Representative (IIR). TSA IIRs coordinate the sharing of aviation security related requirements, intelligence, incidents; and/or threat information affecting passengers, air carriers, the United States, and civil aviation worldwide. In FY 2009, TSA will staff two new overseas IIRs positions in Beijing and Dubai, United Arab Emirates.

Significant accomplishments in FY 2008 include:

- Created a team to revise the Foreign Airport Assessment Program to reduce inefficiencies while enhancing the quality and usefulness of reports by streamlining the format to: (1) focus on substantive issues and provide analysis; and (2) allow for easy electronic transmission. Completed implementation of the team's recommendations in FY09.
- Conducted over 120 airport assessments and well over 800 air carrier assessments.
- Deployed inspectors to monitor aviation security compliance with TSA regulations, Security Directives, Emergency Amendments and ICAO Annex 17 Standards and Recommended Practices; and served as technical experts to assist the People's Republic of China (PRC) in protecting U.S. passengers traveling on all modes of transportation from acts of violence, terrorism, or unlawful acts of interference prior to, during, and after the Olympic Games.

Other planned accomplishments for FY 2009 include:

- Revising the Foreign Airport Assessment Program.
- Expanding outreach efforts to Latin America, Asia-Pacific, and the Middle East.
- Creating an air carrier startup policy and establish a formal pre-clearance support team.
- Expansion of explosives detection pilot programs based on threat reporting.

Repair Station Inspection Program: Mandated by Vision 100 (P.L. 108-176), this program serves to ensure the security of maintenance and repair work conducted on air carrier aircraft and components at foreign and domestic repair stations. This will be achieved through specific inspection activities including security reviews and audits, vulnerability assessments and surveys. This security measure is now a requirement for repair stations to retain their FAA certification (14 CFR Part 145).

The Repair Station Inspection program uses a risk-based methodology to schedule foreign airport assessments and foreign air carrier inspections. Currently, all air carriers are inspected once annually unless they have a high "Airport Vulnerability" rating. This rating is used to determine the frequency of assessment and inspection planning based on the outcome of threat, vulnerability and consequence analysis. This methodology allows TSA to efficiently utilize its workforce by visiting airports with a higher likelihood of being a target for criminal or terrorist acts, while taking into account analysis of the protective measures in place and the potential impact for loss.

In absence of a final rule, this program engages industry through a voluntary audit program. This voluntary program involves a three-tier approach for conducting audits:

- Scheduling visits using the risk-based prioritization in conjunction with TSA Foreign Airport Assessment Program.
- Outreach to U.S. Air Carriers to capture the foreign repair stations they contract.
- Contacting corporations having multi-station ownership for information on their foreign repair stations.

When the Implementing the 9/11 Commission Recommendations Act of 2007 (P.L. 110-53) authorization was enacted, it included language that set a deadline for DHS to publish the final rule 12 months from enactment. Provided that the final rule is not in place within this timeframe, FAA would not be permitted to certify any new foreign repair stations. To meet this deadline and prevent any losses to the industry, TSA has taken steps to publish the final rule in FY 2009 while concurrently expanding outreach efforts and inspection activities.

Significant accomplishments in FY 2008 include:

- Completion of 267 foreign air carrier inspections, 952 air carrier station inspections and 144 repair stations audits.
- 26 surveys completed in the Middle East.
- Creation of a repair station security inventory to capture current security posture and best practices. Researched, cataloged, and prioritized 4,900 repairs stations and developed a list of “best practices” to disseminate to repair stations.
- Development of an audit plan to implement upon publication of final rule.
- Development of regulation and standard security training.

FY 2009 planned accomplishments include:

- Publishing the final rule.
- Conducting 118 airport assessments and 300 foreign air carrier inspections.
- Collecting repair station profile data.
- Performing foreign repair station security audits to assess current security posture to meet the six month deadline expressed in P.L. 110-53.

In FY 2010, TSA will continue the full implementation of the repair station program to assess and inspect all repair stations both foreign and domestic.

Airport Law Enforcement & Assessments: In accordance with the Aviation and Transportation Security Act (ATSA) of 2001, TSA established reimbursable agreements with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports at screening points throughout the U.S for post 9/11 law enforcement hours. They ensure that a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints. In addition to these agreements, 80 airports have Assistant Federal Security Directors (AFSDs) for Law Enforcement to further coordinate TSA’s security efforts with local law enforcement.

Through the Cooperative Agreements process and adjusting allocations to account for prior year expenditures, TSA has been able to significantly increase the number of airports participating in the Law Enforcement Officer (LEO) program (271 in FY 2007 to 353 in FY 2008) while maintaining the existing level of base program resources. TSA has also instituted more effective program management and oversight to ensure that the resources awarded best meet the program's intended purpose of improving the level of security at our nation's airports.

In FY 2008, TSA funded 353 Cooperative Agreements that included the following LEO patrol and response hours:

Airport Category	Hours
Cat I	524,663
Cat II	465,587
Cat III	352,469
Cat IV	346,169
Cat X	666,154
Total	2,355,042

In FY 2009, TSA will continue to improve program efficiencies and maximize the use of available program funds by reviewing participant's actual annual expenditures and adjusting award levels accordingly. This review process will include site visits to a select number of airports during the course of the fiscal year, which will ensure appropriate use and expenditure of program funding by airport participants.

The FY 2010 Request continues the program at FY 2009 operating levels.

National Explosive Detection Canine Training Program (NEDCTP): TSA's NEDCTP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is comprised of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-sabotage program. The use of highly trained explosives detection canine teams is also a proven deterrent to terrorist activities directed towards transportation systems, and provides a timely and mobile response in support of the operations of facilities, rail stations, airports, passenger terminals, seaports, and surface carriers. Fostering partnerships throughout the Federal government, State and local law enforcement, and the international community is a key element of NEDCTP's mission.

Through cooperative agreements, TSA provides funding for training, certification and maintenance of the explosive detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs (up to \$50,000 annually per team). Local law enforcement agencies deploy these valuable canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

In FY 2008, the NEDCTP was expanded considerably. Additional funding was received to add another 92 teams to the highest risk airports and mass transit systems across the nation, of which, 46 will be TSA led teams. TSA currently has funding to support a total of 780 teams in the Aviation and Mass Transit sectors.

Funded Canine Teams					
<u>Funding Source</u>	<u>Legacy Aviation</u>	<u>Proprietary</u>		<u>Mass Transit</u>	<u>Total</u>
		<u>OSO</u>	<u>FAM</u>		
Base Funding	419			100	519
Supplemental	50	120			170
FY08 Enhancement	46	23	22		91
Total	515	143	22	100	780

Due to personnel needs, 1 FTE for the FAM Proprietary Teams is used to help manage the program

To meet its training targets, NEDTCP doubled the number of 12-student classes from nine to 18. As of December 31, 2008, 548 explosives detection canine teams were deployed nationwide in Aviation and Air Cargo, including TSA led teams.

In FY 2009, the NEDCTP will complete the training and deployment of the 92 teams that were funded in FY 2008. TSA plans to conduct a total of 15 training classes in FY 2009. Taking into account currently deployed teams and planned training efforts, TSA plans to have over 749 teams deployed in Aviation, Air Cargo, and Surface systems by the end of FY 2009.

The FY 2010 Request will continue the program at FY 2009 operating levels, while fulfilling the total number of expected teams in all Transportation sectors.

Transportation Security Network Management (TSNM) -- This program coordinates aviation security efforts with airlines, airports, and within the general aviation community.

Commercial Airlines

This activity both develops and reviews existing policy for modification or elimination based on the evolving threat to commercial airlines. The program provides regulatory oversight of commercial airlines including management of the Aircraft Operator Standard Security Program, the Private Charter Program, and associated Security Directives. The office includes 15 Principal Security Inspectors (PSIs) who provide the industry with supporting interpretations, clarification, and assessments of the regulations and the level of carrier compliance. The PSIs conduct over 250 comprehensive audits each fiscal year covering all mandated security requirements implemented system-wide by the airlines corporate offices, and included in the audits are reviews of security training programs provided to the flight deck, crew cabin, and ground security coordinators.

In FY 2010, the program plans to strengthen its relationship with the commercial airlines by providing stronger support on regulatory oversight, providing the industry with supporting interpretations, clarification and assessments of the regulations, and the level of carrier compliance. Additionally, as the number of commercial airlines increases, PSIs will increase the number of comprehensive audits, covering all security requirements.

Commercial Airports

The Commercial Airports activity builds meaningful relationships with the commercial airport industry and oversees the development of policies and programs that enhance security at the Nation's commercial airports. The program also ensures a robust communications system for relaying TSA guidance and information to transportation security stakeholders.

Building upon substantial work accomplished in FY 2008 and FY 2009, under the rubric "SIDA II", in FY 2010, the Division will focus on:

- Coordinating (with the Office of Transportation Threat Assessment & Credentialing) the development and implementation of consensus-based biometric identification and access control standards for domestic commercial airports
- Facilitating the implementation of methods and technologies to screen airport employees more effectively and efficiently

These two items summarize a series of actions that collectively will constitute major planned undertakings requiring technological acquisition and integration by airports, inter-agency interoperability and coordination at Federal, State and local levels, and extensive private sector outreach and information exchange.

Additionally, in FY 2010, the program will also:

- Hold a Commercial Airport Security Symposium to enhance private sector outreach and effectiveness, promote information exchange and support planned airport security initiatives. The Symposium will recur every other year.
- Take a larger role in coordinating the exchange of sensitive airport vulnerability information developed by the Federal Air Marshal Service (FAMS) and the Federal Bureau of Investigation (FBI), through the Joint Vulnerability Analysis (JVA) program
- Revise and reissue the "Recommended Security Guidelines for Airport Planning, Design and Construction" guidelines. The current version of the document was issued on June 15, 2006. Technology, procedures, policies, requirements, and capabilities have improved and continue to grow quickly in this field. The guidelines will be updated in FY 2010, for public release in early FY 2011.

General Aviation (GA)

The GA program is responsible for all types of aviation including corporate operators, recreational and private aircraft, charter operations, private and public use of general aviation airports, airmen, and airspace. TSNM serves as the 'one-stop' shop for all GA security matters and is responsible for all issues concerning GA security. The program works collaboratively

with industry and government stakeholders, and uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

In accordance with TSA/TSNM organizational goals and strategies, GA has developed specific strategies for FY 2009 and FY 2010 to reduce the likelihood that general aviation aircraft are used as a weapon or as a method to transport illicit materials and/or malefactors. Key activities supporting these strategies include:

- Establish Large Aircraft Security Program (LASP) rulemaking for all domestic registered aircraft in excess of 12,500 Maximum Gross Take-off Weight (MTOW)
- Develop security action items for Fixed Based Operators (FBO) and aircraft operators
- Update GA security guidelines
- Develop a vulnerability assessment tool for GA airports
- Continue to assess the feasibility of funding mechanism (Grant Program) to allocate resources to enhance security at GA airports and ensure a threat based, risk management and consequence analysis approach to compliment other TSA initiatives
- Further modify and enhance the Automatic Detection and Processing Terminal (ADAPT) tool to positively identify aircraft operation to, from, over, and within the National Airspace System (NAS)
- Develop a method/system that positively identifies pilots operating aircraft in flight and the beneficial operator of the aircraft.

These initiatives will continue into the future as the proposed rulemakings and programs take effect.

PPA: AIRPORT MANAGEMENT AND SUPPORT

	Perm		
	Pos	FTE	Amount
2008 Actual	2,198	1,971	\$635,730
2009 Enacted	2,243	2,064	401,666
2010 Adjustments-to-Base	31	29	46,408
2010 Current Services	2,274	2,093	448,074
2010 Program Change			350
2010 Request	2,274	2,093	448,424
Total Change 2009-2010	31	29	46,758

The Transportation Security Administration requests \$448.1 million for this activity. The requested level includes adjustments-to-base for increased costs of field rent, construction, and field vehicle expenses and the remainder for pay COLA.

CURRENT SERVICES PROGRAM DESCRIPTION

(dollars in millions)

	FY 2010
FSD Staff and HQ PC&B	\$251.4
FSD Staff Non PC&B	31.2
TSOC	28.3
Airport Parking and Transit Benefits	29.8
Airport Rent and Furniture	107.7
Total	\$448.4

Federal Security Directors Staff and Headquarters PC&B and Non PC&B: This funding supports the salaries and benefits of Federal Security Directors (FSDs) and their staff, as well as travel, training, and contract requirements to support the staff. In addition, there are headquarters positions that direct the policy, analysis, and administration of aviation screening. FSD and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for 7 spoke airports (Bedford-Hanscom, Barnstable, Martha's Vineyard, Nantucket, Provincetown, Westover and Worcester airports). FSD and staff travel frequently between the hubs and spoke airports. Funding of airport management and staff will provide the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

Airport management and staff have developed operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They will continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA will adapt to a dynamic and changing environment with industry accepted scheduling and modeling programs, such as the Sabre Streamline Suite of applications. These applications will allow TSA to efficiently determine and schedule the TSO workforce at the nation's diverse airports. By accurately predicting, executing and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

Transportation Security Operations Center (TSOC): The TSOC is located at TSA's Freedom Center in Northern Virginia. The TSOC serves as TSA's 24/7 command center for transportation security-related operations, incidents, and/or crises. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of command and action in the prevention of, and response to, terrorist-related incidents across transportation modes. The TSOC is co-located and closely aligned with TSA's Continuity of Operations (COOP) and Emergency Preparedness activities.

In FY 2008, TSA has worked to implement a common operating picture throughout TSA, improve information sharing, and support WebEOC as TSA's primary incident management tool. Emphasis has also been placed on operational outreach, to include the development of additional multi-modal entities.

The FY 2009 Request continues to improve upon TSOC's program capabilities and capacity through the effective and efficient use of existing base program resources.

The FY 2010 Request continues the program at FY 2009 operating levels.

Airport Parking and Transit Benefits: The Employee Parking Assistance Program (EPAP) provides parking, shuttle service, and fee collection for TSA employees participating in this program. The services required must be able to provide sufficient parking for TSA employees at the airport, provide parking spaces that are available on a 24 hour basis, provide shuttle service to and from the terminal and provide fee collection services from participants. Significant Employee Parking Assistance Program (EPAP) FY 2008 accomplishments include the following:

- Expansion of the requirement for full payment of parking costs for Dulles International Airport (IAD). Current TSO staffing level is 614, however the target is at minimum 725.
- Expansion of the requirement to extend full payment of parking costs to McCarran International Airport (LAS) for approximately 750 screeners.

FY 2009 planned accomplishments include:

- Conducting a pilot at two additional airports to see if parking benefits will reduce the attrition of the part-time workforce.

In FY 2010, the EPAP will continue to support collections and payments for the 26 airports that currently fall under the program.

Field Vehicles: The funding will be used to replace aged/high mileage vehicles. Since its inception, TSA has replaced a minimal number of vehicles; thus, there are a significant number of old/high mileage vehicles in service. Funding is required to maintain the TSA fleet of vehicles and provide transit benefits for field office employees. Significant accomplishments in FY 2008 include the continued efforts to increase percentage of alternative fuel vehicles and related fuel utilization.

FY 2009 planned accomplishments include continuing to improve acquisition planning to promote efficiency and ensure compliance with environmental and energy requirements and improving fleet information management.

FY 2010 planned accomplishments include reviewing and refining the accident program in order to ensure customer service, identify trends, and operational risks and increasing awareness of the transit benefits program and promote maximum participation.

Airport Rent and Furniture: Funding is requested for rent payments and furniture for TSA's field offices (including FSD and TSO staff locations). In FY 2008, the Chief Administrative Officer implemented the "Workplace 2008" initiative to develop options to more efficiently house new requirements within the existing footprint. TSA also continued the implementation of the real estate customer service model, which is based on field customer electronic surveys and feedback; and earned a "best-practices" agency award in DHS real estate services.

In FY 2009 and 2010, the Chief Administrative Officer plans to conclude its update of the program requirements for field space and furniture, involving field customers and Security Operations as prime stakeholders. While the aviation business model changes from external economic forces, TSA will remain agile and deploy its assets in the most economic manner in

reacting to the changes. TSA will be a valuable partner in the planning and design of security at airports through assistance with checkpoint redesigns and perimeter security. FSD and staff will continue to build relationships with airport officials, airlines, local law enforcement, and Joint Terrorism Task Force officials.

In support of its field operational programs, TSA must lease more than 3.5 million square feet of space with more than 700 assignments at 657 separate locations throughout the nation. The on-airport spaces are used for break-rooms, lockers, and training. The annual rent at airports set by the local airport authority is significantly higher than the increase in the Consumer Price Index. Field rent is expected to increase by 5.7 percent from FY 2009 to FY 2010.

PPA: FEDERAL FLIGHT DECK OFFICER (FFDO) AND FLIGHT CREW TRAINING

	Perm		
	Pos	FTE	Amount
2008 Actual	30	22	\$24,403
2009 Enacted	30	29	25,025
2010 Adjustments-to-Base			102
2010 Current Services	30	29	25,127
2010 Program Change			
2010 Request	30	29	25,127
Total Change 2009-2010	102

The Transportation Security Administration (TSA) requests \$25.1 million for this activity. This is an increase of \$102,000 to fund pay cost of living adjustments (COLA).

CURRENT SERVICES PROGRAM DESCRIPTION

The FFDO program was created by the Arming Pilots Against Terrorism Act of 2003 (APATA – P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft.

The Crew Member Self Defense (CMSD) Program was established via the Vision 100 – Century of Aviation Reauthorization Act (FAA Reauthorization Act) in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

In FY 2007, TSA began discussions with air carriers to conduct CMSD training at airlines’ training facilities to increase the opportunity for participation. Efforts continued in FY 2008 with the exportation of CMSD training to two additional air carrier facilities in addition to the classes offered through community colleges, resulting in the training of 1,190 crew members. Although TSA realized an increase in the number of crew members trained in 2008, there has not

been a significant increase in attendance rates considering the number of potential participants. Currently, TSA anticipates that approximately 800 crew members will participate in this voluntary program in FY 2009.

In FY 2008, TSA provided basic FFDO training to 1,582 new volunteers, conducted thousands of bi-annual firearms re-qualifications for active volunteers, and recertified (i.e. provided recurrent training) 751 FFDOs in their fourth and fifth years of deputation. Also, TSA distributed new DHS credentials, badge sets, and new holsters to participating FFDOs and conducted mandatory FFDO training on proper holster use. In addition, TSA awarded a contract for the establishment of a regional recurrent training facility in Dallas, TX enabling TSA to meet increased FFDO recurrent training requirements for 2009 and providing improved access to required training for volunteers living throughout the West and Midwestern regions of the United States. The Dallas FFDO Recurrent Training Facility is scheduled to become operational in June 2009.

In FY 2009, TSA estimates that basic FFDO training will be provided to approximately 1,500 new volunteers. Recurrent training (recertification) will be delivered for approximately 3,400 volunteers at the Atlantic City, New Jersey and Dallas, Texas facilities for FFDOs who are in their fourth and fifth year of service. The program will also provide required bi-annual firearms re-qualification training to FFDO program volunteers.

Starting in FY 2010, TSA plans to permanently transfer \$1.5 million from the CMSD program to the FFDO program in order to best meet the emerging requirement to provide recurrent training to the thousands of existing FFDOs who are reaching their fourth and fifth years within the program. This fund transfer will support the training of no less than 220 new FFDOs in FY 2010, which will cover the estimated yearly attrition rate and maintain the current population of FFDOs. TSA will also continue to examine its base resources and if possible, seek to continue growing the FFDO program.

In FY 2010, TSA will continue to provide Crew Member Self-Defense (CMSD) Training at currently operated facilities based on historic attendance and participation levels in addition to supporting the continuing FFDO program operations and requirements within the base levels provided in the PPA.

PPA: AIR CARGO

	Perm		
	Pos	FTE	Amount
2008 Actual	636	444	\$110,770
2009 Enacted	669	642	122,849
2010 Adjustments-to-Base			(14,731)
2010 Current Services	669	642	108,118
2010 Program Change			
2010 Request	669	642	108,118
Total Change 2009-2010	(14,731)

TSA requests \$108.1 million for this activity. The request includes non-recurring \$18 million received in FY 2009 for air cargo pilots and then provides funding for pay inflation and the realignment of to fund additional canine costs.

Safeguarding the nation's air cargo transportation system is a shared public and private sector responsibility. The Aviation and Transportation Security Act (ATSA) charges TSA with the enforcement of statutory and regulatory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air.

Section 1602 of the Implementing the Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), which amended 49 U.S.C. 44901(g)(1), requires TSA to:

- Establish a system to screen 50 percent of cargo transported on passenger aircraft by February 3, 2009, and 100 percent by August 3, 2010;
- Provide a level of security commensurate to that of passenger baggage; and
- Meet inspection benchmarks.

TSA has also been mandated to conduct Vulnerability Assessments at 27 Category X airports to assess security vulnerabilities at specific airports and system-wide.

TSA concluded that this mandate could not be achieved by relying solely on aircraft operators to conduct screening without creating significant delays and missed flights, which would impede the flow of commerce. Screening capacity at a single point in the supply chain is not sufficient enough to accomplish 100 percent screening. TSA has initiated the following to aid industry in achieving the 100 percent screening requirements:

- Narrow Body Aircraft Screening Amendment - Achieved October 1, 2008. This requires 100% screening of cargo placed on these aircraft used in passenger service and originating in the U.S. This covers 95 percent of passenger flights, 85 percent of passengers, and 25 percent of cargo on passenger flights that originate within the U.S.

- The Certified Cargo Screening Program (CCSP) – Allows screening of cargo early in the air cargo supply chain by a trusted, vetted and validated facility. TSA certifies and regulates shippers, indirect air carriers, and other entities as Certified Cargo Screening Facilities (CCSFs) to screen cargo prior to its being tendered for transport on passenger aircraft.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2010
Air Cargo Policy and Programs	\$26.0
Air Cargo Inspectors	62.2
Nat'l Explosive Detection Canine Training Prgm	19.9
Total	\$108.1

Air Cargo Policy and Programs: The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of 450 domestic airports, 300 air carriers, and approximately 4,100 indirect air carriers and shippers. An estimated 32 billion pounds of cargo is shipped within the United States by air annually. About 88 percent of this amount is transported via all-cargo aircraft; the remainder travels aboard passenger aircraft. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

TSA developed the philosophy behind the CCSP by working closely with the U.S and international agencies and associations to incorporate key aspects of commensurate security programs. Currently, air carriers have primary responsibility for air cargo screening. CCSP extends screening through the air cargo supply chain (i.e. shippers, manufacturers, and freight forwarders) thus reducing impediments to flow of commerce by encouraging screening at the point of entry into the supply chain (e.g. prior to consolidation).

Under the CCSP program, TSA will certify high-volume indirect air carriers (IAC), shippers and distribution centers to screen cargo before it leaves these facilities. The CCSP will ensure that industry shares the responsibility of screening air cargo across the supply chain. Screening air cargo early in the supply chain, rather than relying almost exclusively on air carriers to screen all the cargo at the airport prior to loading provides the greatest opportunity to ensure optimal security while not unduly impeding commerce.

Under the CCSP, facilities upstream in the air cargo supply chain such as shippers, manufacturers, warehousing entities, distributors, third party logistics companies, and Indirect Air Carriers (IACs) or other entities may apply to TSA to be designated as a Certified Cargo Screening Facility (CCSF). Aircraft operators that screen cargo off-airport must also become a CCSF in order to screen cargo for transport on passenger aircraft. These applicants must submit to TSA an application for certification of each facility, including an evaluation of the applicant's security measures by a TSA-approved validator.

Validation firms must apply to TSA for approval, must hold and carry out a TSA-approved security program, must have security coordinators to be the primary point of contact for security at the facility, and must ensure that individuals conducting assessments have professional qualifications, receive training, do not have conflicts of interest with facilities to be assessed, and conduct assessments impartially. TSA is developing an interim final rule and final rule to give regulatory framework to the 100 percent screening program. This rule requires security threat assessments for validators and their supervisors and for validation firm security coordinators and alternates.

As part of the CCSP, TSA is conducting an Indirect Air Carrier (IAC) Screening Technology Pilot (STP). Approximately 65 percent of passenger air cargo volume originates at 18 airports, and a significant amount is tendered by a concentrated number of large IACs at each airport. TSA's objectives of the STP are:

- To assist industry in achieving the screening requirements of the 9/11 Act by creating screening capacity at the IACs;
- To measure the effectiveness of select screening technologies on various commodity classes; and,
- To evaluate chain-of-custody procedures for screened cargo as it moves from the IAC to the air carrier.

TSA will authorize participating facilities to screen cargo using an appropriate mix of technologies and reimburse them up to \$375,000 per participating facility. Facilities must meet stringent security requirements and provide detailed reporting on cargo volumes screened and data on the effectiveness and efficiency of screening technologies.

IACs participating in the STP must:

- Have a facility located in one of the 18 major cargo gateways;
- Have a minimum annual volume of 200 consolidations (ULDs) tendered to passenger aircraft;
- CCSP facility security and chain of custody standards verified through an audit by TSA; and,
- Sign an Other Transactional Agreement (OTA) to receive funding from TSA

Air Cargo Inspectors: Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

TSA-approved security programs include (1) Aircraft Operators Standard Security Program (AOSSP), which applies to domestic passenger air carriers; (2) Indirect Air Carrier Standard Security Program (IACSSP), which applies to domestic indirect air carriers; (3) Domestic

Security Integration Program (DSIP), a voluntary program that applies to domestic all cargo carriers; (4) the Twelve-Five Program, which applies to certain operators of aircraft weighing 12,500 pounds or more in scheduled or charter service that carry passengers, cargo, or both; (5) Model Security Program applies to foreign passenger air carriers; and (6) All-Cargo International Security Procedures, which applies to each foreign air carrier engaged in the transportation of cargo to, from, within, or over-flying the U.S. in all-cargo aircraft with a maximum certified takeoff weight of 12,500 pounds or more.

TSA inspectors carry out planned and random inspections of foreign and domestic air carriers and indirect air carriers (IACs). In addition, inspectors conduct monthly cargo strikes at airports and IAC facilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

In FY 2007, TSA received additional funds through a supplemental appropriation to enhance these inspection activities by hiring 150 more inspectors dedicated specifically to air cargo. This brought the total inspector workforce to 450 FTP. In FY 2008, the program was able to leverage this expanded workforce to conduct an estimated 3,500 additional inspections. A small cadre of inspectors was used to conduct vulnerability assessments and provide assistance for certified shipper validations. During surge and periods of elevated threat, cargo inspectors supported and participated in VIPR activities.

International Cargo Inspections: In addition to domestic inspections, TSA has developed a program to ensure the security of inbound cargo from outside the U.S. Currently, screening international cargo poses unique challenges and constraints of the international air cargo environment. These constraints are due to limited control over foreign supply chain activities, scale of diversity among supply chains, and diplomatic considerations. While TSA does not plan to mirror the domestic mandate of 100% screening, a joint effort with CBP and its international partners is actively working to strengthen air cargo security through the development of a global air cargo security strategy. This strategy will include establishing a risk assessment regime using CBP's Automated Targeting System (ATS) and TSA's Vulnerability Assessment methodology.

Currently, TSA has ten International Cargo Transportation Security Inspectors deployed to four international field offices in Los Angeles, Dallas Fort Worth, Miami, and Frankfurt, Germany. These inspectors examine cargo operations at last points of departure to the U.S. to establish a baseline by which compliance can be measured.

National Explosive Detection Canine Training Program (NEDCTP): Canines provide a valuable tool to assist in the screening of air cargo. TSA has deployed 419 local law enforcement officer-led (LEO) canine teams at 77 airports. LEO teams spend approximately 25 percent of their time screening air cargo and associated facilities.

The FY 2007 Iraq War Supplemental provided funding for 170 additional canine teams, split between LEO canine teams and proprietary (Federal handler teams) led by TSA cargo inspectors dedicated to screening passenger air cargo at high volume IAC and air carrier facilities. There are currently 80 proprietary canine teams with plans to have a total of 85 proprietary canine teams. In addition, there are 49 LEO canine teams deployed as of January 21, 2009, with an additional team just graduating. Of the 170 teams, the remaining 35 teams may be filled with

additional state/local law enforcement teams based on demand, or may be shifted to proprietary handlers.

Significant accomplishments in FY 2008 include:

- Implemented the Certified Cargo Shipper Program (CCSP).
- Began implementation of the IAC Screening Technology Pilot in 18 major gateway cities where 65% of all cargo destined for passenger aircraft originates. Began procurement of equipment to test CCSP concepts and screening for high volume facilities.
- Processed approximately 170,000 Security Threat Assessments (STA) applications through the Indirect Air Carrier Management System (IACMS), conducted 10 vulnerability assessments of Category X airports, conducted over 37,000 inspections of foreign and domestic air carriers and indirect air carriers (IACs) and transitioned and vetted over 800,000 shipper profiles to the Known Shipper Management System (KSMS) – a system used to vet shippers of cargo on passenger aircraft.

In FY 2009, the Air Cargo Program will

- Publish the Certified Cargo Screening Program (CCSP) Interim Final Rule (IFR).
- Develop and deploy a third-party validator regime to support CCSP.
- Develop and implement the Air Cargo Data Management Systems (ACDMS) – critical to full deployment of the Certified Cargo Security Program (CCSP)
- Continue to work with international partners to harmonize air cargo security programs as well as other DHS agencies, specifically Customs and Border Protection (CBP), to leverage programs and systems to protect international inbound air cargo.

One hundred percent screening of all passenger air cargo will be in place by August 2010.

In FY 2010, the CCSP will be fully deployed. It is estimated that up to 15,000 individual shipping locations and over 250 IAC locations may be engaged in screening cargo. By accomplishing this earlier in the supply chain (before cargo arrives at airports), this program is expected to reduce congestion and potential delays for cargo handling at airports.

The shippers and IAC's engaged in the program will be approved by an estimated seventy five 3rd Party Validation companies (3PV's), who will be regulated by TSA. As part of the overall CCSP, an estimated 543,000 additional Security Threat Assessments (STAs) will have been processed for employees of shippers and 3PV's.

A full complement of 170 TSA canine teams will provide considerable screening capabilities for air cargo and account for a significant amount of the screening needed to achieve 100% screening of all passenger air cargo by 2010. With 450 fully trained and operational cargo inspectors, this program will accomplish a greater level of compliance inspections, including oversight of the Certified Cargo Screener Program.

Additional covert testing protocols will be done in order to include the testing of critical air cargo security measures. Cargo strikes will be expanded in order to include evaluation of new requirements.

PPA: IMPLEMENTING REQUIREMENTS OF P.L. 110-53

In FY 2008, Congress appropriated \$30.0 million to implement the provision of Public Law 110-53, the Implementing the 9/11 Commission Recommendations Act of 2007. These funds were distributed between four appropriations to support several program initiatives as directed by the FY 2008 appropriation language.

(dollars in millions)

Appropriation	FY 2008 Distribution
Aviation Security	\$1.2
Surface Transportation Security	14.8
Transportation Threat Assessment and Credentialing	10.1
Transportation Security Support	3.9
TOTAL	\$30.0

In FY 2009, Congress appropriated an additional \$20.0 million to conduct vulnerability assessments of high risk public transportation agencies, railroads, and over-the-road bus operators; conduct additional security exercises for public transportation, over-the-road bus, and railroad employees; hire additional surface transportation security inspectors; establish and implement an information sharing plan for transportation security and an Information Sharing and Analysis Center for transportation security; conduct security reviews of foreign repair stations; develop procedures and initial implementation of a law enforcement officer biometric credential; and improve security at general aviation airports. These funds were distributed between three appropriations to support these activities as follows:

Appropriation	FY 2009 Distribution
Aviation Security	\$3.7
Surface Transportation Security	8.8
Surface Inspectors	5.0
Transportation Security Support	2.5
TOTAL	\$20.0

This request includes base adjustments within the various appropriations for the continued support of these programs.

PPA: AIRPORT PERIMETER SECURITY

	Perm Pos	FTE	Amount
2008 Actual			\$7
2009 Enacted			\$4,000
2010 Adjustments-to-Base			(4,000)
2010 Current Services	0
2010 Program Change			
2010 Request	0
Total Change 2009-2010	(4,000)

The Transportation Security Administration does not request funding for this activity in FY 2010. Funds appropriated in FY 2009 were not requested.

FEE: AVIATION SECURITY CAPITAL FUND

	Perm Pos	FTE	Amount
2008 Actual	\$245,674
2009 Enacted	250,000
2010 Adjustments-to-Base	0
2010 Current Services	250,000
2010 Program Change			
2010 Request	250,000
Total Change 2009-2010	0

The Aviation Security Capital Fund was extended by the 9/11 Bill and is authorized through 2028.

CHECKPOINT SCREENING FUND

Checkpoint Screening Fund

	Perm		
	Pos	FTE	Amount
2008 Actual			\$187,356
2009 Enacted			
2010 Adjustments-to-Base			
2010 Current Services
2010 Program Change			
2010 Request
Total Change 2009-2010

The Transportation Security Administration does not request funding for this activity in FY 2010.

FEE: GENERAL AVIATION AT RONALD REAGAN NATIONAL AIRPORT (DCA)

	Perm		
	Pos	FTE	Amount
2008 Actual			\$20
2009 Enacted			120
2010 Adjustments-to-Base			(20)
2010 Current Services	100
2010 Program Change			
2010 Request	100
Total Change 2009-2010	(20)

This offsetting collection supports General Aviation flights into Reagan National (DCA) as provided by the Vision 100 Act. TSA levies a \$15 fee for each person onboard the flight for security threat assessments and flight authorization services. In addition, a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. These fee collections cover program costs associated with the legislated mandate requiring the establishment of a security program to allow General Aviation flights into and out of DCA.

FEE: INDIRECT AIR CARGO

	Perm Pos	FTE	Amount
2008 Actual	3	3	\$1,892
2009 Enacted	3	2	2,600
2010 Adjustments-to-Base			
2010 Current Services	3	2	2,600
2010 Program Change			
2010 Request	3	2	2,600
Total Change 2009-2010	0

This program change provides for the security fee collections supporting security threat assessments of security workers in the air cargo supply chain. TSA levies a \$28 per assessment fee to offset costs of the assessments and program management costs. The total FY 2010 collections from these fees are estimated to be \$2,600,000. This fee is collected in accordance with the Final Rule on Air Cargo Security Requirements and as authorized by the FY 2004 DHS Appropriations Act (Public Law 108-90).

FEE: CERTIFIED CARGO SCREENING PROGRAM

	Perm Pos	FTE	Amount
2008 Actual			\$0
2009 Enacted	0	0	0
2010 Adjustments-to-Base			5,200
2010 Current Services	0	0	5,200
2010 Program Change			
2010 Request	0	0	5,200
Total Change 2009-2010	5,200

This program change provides for the security fee collections to fund security threat assessments for the Certified Cargo Screening Program. The program will utilize existing shipping infrastructure to help TSA meet cargo screening mandates.

FEE: LARGE AIRCRAFT SECURITY PROGRAM

	Perm Pos	FTE	Amount
2008 Actual			\$0
2009 Enacted	0	0	0
2010 Adjustments-to-Base			1,600
2010 Current Services	0	0	1,600
2010 Program Change			
2010 Request	0	0	1,600
Total Change 2009-2010	1,600

This program change provides for the security fee collections to fund security threat assessments for the large aircraft security program. The Large Aircraft Security Program (LASP) Notice of Proposed Rulemaking (NPRM) would require all U.S. operators of aircraft over 12,500 maximum gross take-off weight (MTOW) to adopt and implement a TSA-approved security program. The comment period for this NPRM closed February 29, 2009. The rule is currently undergoing analysis by TSA with additional feedback from industry regarding alternatives to the rule's proposed requirements. The program would require all domestic registered aircraft in excess of the MTOW to adopt a security plan with TSA that includes security threat assessments of certain individuals.

FEE: SECURE IDENTIFICATION DISPLAY AREA CHECKS

	Perm Pos	FTE	Amount
2008 Actual			\$0
2009 Enacted	0	0	0
2010 Adjustments-to-Base			10,000
2010 Current Services	0	0	10,000
2010 Program Change			
2010 Request	0	0	10,000
Total Change 2009-2010	10,000

This program change provides for the security fee collections to fund security threat assessment required for certain airport and air carrier workers.

FEE: OTHER SECURITY THREAT ASSESSMENTS

	Perm		
	Pos	FTE	Amount
2008 Actual			\$0
2009 Enacted	0	0	0
2010 Adjustments-to-Base			100
2010 Current Services	0	0	100
2010 Program Change			
2010 Request	0	0	100
Total Change 2009-2010	100

This program change provides for the security fee collections to fund other various security threat assessment that are required for very small transportation populations not mentioned above.

IV. Program Justification of Changes.

**Department of Homeland Security
Transportation Security Administration
Aviation Security
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Bomb Appraisal Officers

Strategic Goal(s) & Objective(s): 3.1 Protect and Strengthen the resilience of the Nation’s critical infrastructure and key resources; Enhance preparedness protection, screening and risk mitigation

PPAs: Passenger and Baggage Screener PC&B
Screener Training and Other
Airport management and Support

Program Increase: Positions 109 FTE 55 Dollars \$7,400

Description of Item

Expand **Bomb Appraisal Officers** (BAO) Program by 109 FTP / 55 FTE and \$9 million. Includes \$5.365M for Screener PC&B, \$1.685 for Screener Training and other and \$.35M for Airport Management and \$1.6M in the Transportation Security Support Appropriation.

Justification

Bomb Appraisal Officers (BAOs) are highly skilled bomb technicians located within selected airports to provide a rapid response for advanced resolution of alarms at the passenger screening checkpoint and baggage screening areas. BAOs also provide expert training to Transportation Security Officers (TSOs) to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. TSA requests 109 FTP / 55 FTE and \$9 million for the expansion of the BAO program.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA supports DHS Objective 3.1: Protect and strengthen the resilience of the Nation's critical infrastructure and key resources, by focusing resources on the Transportation Security Officer (TSO) workforce, specifically through ensuring readiness in areas where the threat is greatest. TSA will accomplish this objective by dedicating resources to workforce expansion, workforce retention incentives, workforce succession planning and leadership training, and workplace infrastructure support.

TSA has identified the Bomb Appraisal Officer (BAO) program as a key area to expand. BAOs provide invaluable training to the employees on the front lines of Homeland Security on perhaps the most dangerous threat to aviation security - IEDs. The current allocation of 297 BAOs will provide approximately 93,000 hours of IED training to the TSO Workforce. The 109 requested BAOs will enable TSA to provide 40% more IED training to TSOs. The pilot programs indicated a 50% improvement in TSO capability to detect IEDs after training and frequent interaction with BAOs.

The additional 109 BAOs will provide coverage at 50% more airports, including all Category X, I, and II airports and will provide a BAO in every hub-spoke airport system. The BAO program has the added benefit to industry and the traveling public of preventing the costly disruption of airport terminal operations. BAOs respond to unresolved alarms at the checkpoint, obviating the need to disrupt terminal operations while waiting for local law enforcement and bomb squad response. TSA estimates that closed terminals cost industry \$61.37 per minute. In 2007 BAOs responded to 1,156 calls for advanced alarm resolutions, preventing 1,103 hours of potential terminal disruption. Using the \$61.37 per minute figure, this represented industry cost avoidance of approximately \$3.9M and a benefit to the traveling public that will grow along with the size of the BAO workforce.

BAOs will also provide frequent interaction with and formal training to TSOs to increase their ability to recognize potential IEDs and IED components. These preventative measures also reduce costly airport delays and closures. The goal is to increase the TSO pass rate of Aviation Screening Assessment Program Basic Test by one percent. BAOs will also provide advance resolution of suspect alarms to preclude LEO and Bomb Squad response with a plan of reducing alarm resolution time by 50% at airports without an organic Bomb Squad. In order to accurately gauge the success of this initiative, TSA will measure security effectiveness at Category X, I and II airports in two ways; one through gauging the enhanced security capability of the BAOs and the second by conducting IED Checkpoint Drills. By establishing targets for these measures, TSA will be able to determine on a bi-monthly basis the success of this initiative.

Program Increase 2: EDS/ETD Procurement and Installation

In order to meet the challenging demands of optimal systems deployment and stabilizing the recapitalization and system resizing requirements, the EBSP will require an increase in base funding. This helps achieve Strategic Plan Goals and Objectives 1, 2 and 3, “Protecting Our Nation from Dangerous People”, “Protecting Our Nation from Dangerous Goods” and “Protect Critical Infrastructure”.

PPA: EDS/ETD Procurement and Installation

Program Increase: Positions 0 FTE 0 Dollars \$565M

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars* (\$000)	Pos	FTE	Dollars* (\$000)	Pos	FTE	Dollars* (\$000)
Current Services Level	18	9	521,997	111	106	\$294,000	107	102	\$291,191
Program Increase									\$565,400
Total Request									\$856,591

* Excludes mandatory funding of \$250M

Description of Item

This is a \$565.4 million increase over FY 2009 to accelerate optimal solution deployments.

Justification

The Transportation Security Administration (TSA) requests \$565.4 million in FY10 for the acceleration of the Electronic Baggage Screening Program (EBSP) at the Nation’s airports. The funding will be used for facility modifications, recapitalization efforts, and to purchase and deploy electronic baggage screening technology systems. The program is responsible for ensuring that 100% of all checked baggage is screened with an in-line explosive detection capability system, or a suitable alternative.

Facility modifications are essential for adherence to this policy, as many airports do not currently have the capability to fund the necessary baggage handling systems to meet their optimal solution. The two primary technologies acquired and deployed under the EBSP are Explosive Detection System (EDS) equipment and Explosives Trace Detection (ETD) devices. Replacing machines that are nearing the end of their life cycle is also a priority of EBSP.

Impact on Performance (Relationship of Increase to Strategic Goals)

Accelerating the Electronic Baggage Screening Program supports DHS Goal 1: Protect our Nation from Dangerous People and Objective 1.3 Strengthen Screening of Travelers and Workers, as well as Goal 3: Protect Critical Infrastructure; Objective 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources Against All Threats.

This initiative will ensure that TSA can continue to meet its legislative mandate of screening 100% of checked baggage in a manner that is both timely and cost effective.

The most recent analysis of the baseline funding, published in the Baggage Screening Investment Study Report, indicated program completion in 2024. TSA estimates increased funding would reduce the timeline by one to two years.

Program Increase 3: Screening Technology Maintenance

Strategic Goal(s) & Objective(s): Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthen Screening of Travelers and Workers and Goal 3: Protect Critical Infrastructure; Objective 3.4: Protect Transportation Sectors.

PPA: Screening Technology Maintenance and Utilities

Investments in maintenance and logistics support are critical to preserve the operational capability of TSE, which supports the DHS Strategic Plan Goals and Objectives of “Protecting Our Nation from Dangerous People”, “Protecting Our Nation from Dangerous Goods” and “Protect Critical Infrastructure”.

Program Increase: Positions 0 FTE 0 Dollars \$19.0M

Funding Profile

	FY 2008. Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level			263,415			305,625			307,625
Program Increase									19,000
Total Request									326,625

Description of Item

This is an \$19 million increase over FY 2009 to maintain TSA’s screening technology equipment.

Justification

This increase is attributed to maintenance costs for higher-than-projected quantities of security equipment. The equipment purchased in FY 2009 will be out of warranty in FY 2010, thus requiring increased funding for maintenance. Tables 1 and 2 indicate the projected quantities and maintenance cost by type of security equipment. Table 3 provides the overall PPA breakout in FY10 incorporating this increase.

Total	\$326.6

Impact on Performance (Relationship of Increase to Strategic Goals)

Screening Technology and Maintenance supports DHS Goal 1: Protect our Nation from Dangerous People and Objective 1.3: Strengthen Screening of Travelers and Workers, as well as DHS Goal 3: Protect Critical Infrastructure and Objective 3.4: Protect Transportation Sectors. This initiative will ensure that both new and existing technologies are well maintained, so that airport checkpoint lanes can continue to operate at optimal capacity and will ensure that TSA can continue to meet its legislative mandate of screening 100% of checked baggage in a manner that is both timely and cost effective.

TSA is implementing a change in the service level agreement performance metric from Mean Down Time (MDT) at the fleet level to Operational Availability at the airport level. While the contractors have been largely successful in meeting contract MDT requirements, measuring MDT across the fleet population tends to reward good performance at large airports with large equipment installations, while smaller or more remote airports are given less priority. In order to address this inequity and provide better equipment availability at *every* airport, a contract modification is pending to change the performance metric from *fleet-wide* MDT to *airport-level* Operational Availability.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in Aviation Security
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$4,754,518,000] **\$5,310,850,000**, to remain available until September 30, [2010] **2011**, of which not to exceed \$10,000 shall be for official reception and representation expenses: *Provided*, That of the total amount made available under this heading, not to exceed [\$3,935,710,000] **\$4,475,117,000** shall be for screening operations [, of which \$621,106,000 shall be available for explosive detection systems]; and not to exceed [\$798,808,000] **\$835,733,000** shall be for aviation security direction and enforcement: [*Provided further*, That of the amount made available in the preceding proviso for explosives detection systems, \$294,000,000 shall be available for the purchase and installation of these systems, of which not less than \$84,500,000 shall be available for the purchase and installation of certified explosives detection systems at medium- and small-sized airports: *Provided further*, That the purchase of screening equipment for medium- and small-sized airports must be competitively awarded: *Provided further*, That any award to deploy explosives detection systems shall be based on risk, the airports current reliance on other screening solutions, lobby congestion resulting in increased security concerns, high injury rates, airport readiness, and increased cost effectiveness] *Provided further*, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That any funds collected and made available from aviation security fees pursuant to section 44940(i) of title 49, United States Code, may, notwithstanding paragraph (4) of such section 44940(i), be expended for the purpose of improving screening at airport screening checkpoints, which may include the purchase and utilization of emerging technology equipment; the refurbishment and replacement of current equipment; the installation of surveillance systems to monitor checkpoint activities; the modification of checkpoint infrastructure to support checkpoint reconfigurations; and the creation of additional checkpoints to screen aviation passengers and airport personnel: [*Provided further*, That of the amounts provided under this heading, \$20,000,000 may be transferred to the ``Surface Transportation Security'', ``Transportation Threat Assessment and Credentialing'', and ``Transportation Security Support'' appropriations in this Act for the purpose of implementing regulations and activities authorized in the Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53):] *Provided further*, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2009] **2010**, so as to result in a final fiscal year appropriation from the general fund estimated at not more than [\$2,434,518,000] **\$3,081,909,000**: *Provided further*, That security service fees collected in excess of the amount made available under this heading shall become available during fiscal year [2010] **2011**: ***Provided further, That notwithstanding section 44923 of title 49, United States Code, the share of the cost of the Federal Government for a project shall not exceed 90 percent, and all***

funding provided by section 44923(h) of title 49, United States Code, may be distributed in any manner deemed necessary to ensure aviation security: *Provided further,* That Members of the United States House of Representatives and United States Senate, including the leadership; and the heads of Federal agencies and commissions, including the Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General and Assistant Attorneys General and the United States attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget; shall not be exempt from Federal passenger and baggage screening. (*Department of Homeland Security Appropriations Act, 2009.*)

Explanation of Change:

No substantive changes proposed.

Total all IT and Non-IT Investments	\$965,530	\$584,400	1,594,930		

INITIATIVE #1

TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)

1. Project Description, Justification and Scope

The Electronic Baggage Screening Program (EBSP) implements a national checked-baggage screening system to protect against criminal and terrorist threats, while minimizing transportation industry and traveling public burdens. TSA provides life-cycle procurement, deployment, integration, and maintenance of security equipment at over 450 U.S. airports. This program includes: (1) maintaining first generation Explosives Detection Systems (EDS), and Explosives Trace Detection (ETD) devices deployed after 9/11; (2) improving efficiency and effectiveness by acquiring and deploying next generation inline explosive detection technology, and by relocating lobby equipment at some airports; and (3) Efforts to establish operational, functional, performance and integration requirements for TSA security screening equipment.

While the Congressionally-mandated requirement for 100 percent screening of aviation-checked baggage by electronic or other approved means has been achieved, the program must continue to research, evaluate, and deploy refinements to EDS and ETD technology and associated systems, that

allow for improvements in: (1) throughput (checked bags per hour), (2) false alarm rate, (3) system availability, and (4) total cost of ownership for baggage screening (cost per checked bag). Equipment must be also be relocated from airport lobby areas to baggage room areas.

The following programs are funded under EBSP:

a) Operation Integration (OI): TSA analyzes integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. The division conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA
- Operational test and evaluation in support of regulatory and policy decisions in areas such as air cargo
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization

b) Security Technology Integrated Program (STIP): STIP will be an agency wide system which enables TSA to move their established airport security system to the next generation of capability by connecting the myriad of transportation security equipment (TSE) to one network. STIP will establish a centralized enterprise data management system that will facilitate the exchange of information between TSE located at the nation’s airports and the people, who use, procure and service them. Functions that are performed manually today, such as collecting and storing TSO performance data, monitoring screening equipment status, and collecting checkpoint throughput and performance data, will be automated through this new system.

The Program will enhance security, improve resource management, and improve operational efficiency and effectiveness at the security checkpoints.

c) ASP: ASP partners with Transportation Authorities to leverage existing surveillance and detection systems at the transportation facilities to increase situational awareness and cooperative engagement in mitigating encountered threats.

2. Significant Changes

The President’s budget proposes a \$565M increase to accelerate the implementation of optimal EDS systems.

3. Project Schedule

	Fiscal Quarter and Year				Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)
	Work Initiated	Work Completed	Project Start	Project Complete

*Year maps to Section 3: Project Schedule, "Project Complete" column

6. Method of Performance

EBSP is a 20 year program. Expenditures are approved based on an overall strategic plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide.
- Number of airports with integrated in-line systems
- Cost per bag screened
- Number of false alarms on Electronic Detection Systems

**7. Related Annual Funding Requirements
(Dollars in Thousands)**

	FY 2010	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2009	FY 2010
EDS/ETD Purchase & Install	544,000	1,106,591
Screening Technology Maintenance & Utilities	266,700	262,400
Total	810,700	1,368,991

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (PL No. 107-71) which requires screening of checked baggage by EDS.

Initiative #2

TSA – PASSENGER SCREENING PROGRAM (PSP)

1. Project Description, Justification and Scope

The Passenger Screening Program provides the resources required to deploy and maintain passenger screening and carry-on baggage screening equipment and processes at approximately 2,200 passenger checkpoint lanes at airports nationwide, in order to minimize the risk of injury or death of people, or damage of property, due to acts of terrorism. The Passenger Screening Program’s role consists of the identification, evaluation, field testing, procuring, deploying, integrating, maintaining, disposing and replacing of existing and emerging technologies necessary to meet those requirements. The ever-changing threat environment necessitates investment in new and improved technology to increase threat detection capabilities needed to provide the traveling public with optimal security screening benefits.

After the attacks on 9/11, Congress directed TSA to screen all passengers and their carry-on articles for explosives and components of weapons of mass destruction, as well as other prohibited items. At the time, choices in technology were limited to legacy systems, namely metal detectors and basic x-ray equipment, all of which had significant shortfalls in the detection of explosives and non-metallic threats on people and in their carry-on articles. Since then, the Passenger Screening Program has replaced the legacy systems with Enhanced Metal Detectors and TIP Ready X-ray

systems, providing an expanded level of security and threat detection at the checkpoint. Explosives Trace Detector usage was expanded to more sites and higher quantities and recently, Bottled Liquids Scanners, Whole Body Imagers, and Advanced Technology Systems have been deployed, providing additional levels of explosives security at the checkpoints. The Passenger Screening Program continues evaluating and deploying the next generation of detection systems that address existing weaknesses in detection capabilities, detect new threats, and reduce false alarm rates.

2. Significant Changes

No significant changes in these programs will occur in FY 2010.

Total Project Expenditures	481.946	287.000	298.200	180.900	1248.046

**5. Cost Estimate Detail and Changes
(Dollars in Thousands)**

Description of Milestone		Initial Total Cost (\$mil)	Planned Total Cost (\$mil)	Actual Total Cost (\$mil)	Explanation of Difference Between Current and Previous Estimate
FY2002	Procurement and Deployment		21.980	0.000	Waiting for technology readiness, carryover spent next year
FY2003	Procurement and Deployment		0.000	28.000	Previous carryover spent in this fiscal year
FY2005	Procurement and Deployment		59.300	32.990	Expected technology did not meet specifications
FY2005	Operations and Support (Maintenance)		31.000	30.050	
FY2006	Procurement and Deployment		101.600	54.600	Expected portal procurements not made due to contractual obligations of vendor not being met
FY2006	Operations and Support (Maintenance)		35.000	34.720	
FY2007	Procurement and Deployment		115.070	186.666	Previous carryover spent in this fiscal year
FY2008	Procurement and Deployment		228.450	175.450	Budget authority delayed caused procurements to slip to following year
FY2008	Operations and Support (Maintenance)		37.000	45.000	Needed additional funds to cover accelerated deployments

6. Method of Performance

Expenditures are approved based on an overall strategic plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- Cost per passenger screened.
- Operational Availability of fielded screening systems
- Ratio of number of FTEs expended to passengers.

**7. Related Annual Funding Requirements
(Dollars in Thousands)**

	FY 2010	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2009	FY 2010
Checkpoint Support	250,000	128,739
Screening Technology Maintenance and Utilities	43,900	52,200
Total	293,900	180,939

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (P.L. 107-71) which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

Total, Screening Partnership Program	\$148,495	\$151,272	\$149,643	(\$1,629)
Full Time Equivalents	---	---	---	---

PPA Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at higher performance levels as federal TSOs.

Summary Justification and Explanation of Changes

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$40	\$42	\$42	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and Miscellaneous charge	\$2	\$3	\$3	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$0	\$713	\$713	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$148,453	\$150,514	\$148,885	(\$1,629)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 reflects built in increases for the airport screening services provided by the privatized screening contracts of \$3.371 million and the realignment of \$5 million to airport management.

PPA Mission Statement

Provides the ATSA-mandated and discretionary training to new TSO hires and the current TSO workforce. Provides all the operational support, such as consumables, uniforms, supplies, claims, checkpoint janitorial services, and checkpoint hazardous material disposal to maintain the TSO Workforce.

Summary Justification and Explanation of Changes

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$53	\$6,595	\$6,755	\$160

Salaries and benefits includes costs for 54 FTEs. The FY 2010 request reflects an increase of \$160,000 for pay annualization and pay inflation.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Travel	\$41,587	\$29,621	\$29,621	\$0

Travel includes all costs for full accommodations and fare for TSOs for required training and the cost of the travel and per diem for the National Deployment Force. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Transportation of Things	\$69	\$34	\$34	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Other Rent	\$23	\$15	\$15	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Communication, Utilities, and misc charges	\$351	\$242	\$242	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Printing	\$417	\$246	\$246	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. This object class includes expenditures for the reproduction and distribution of TSO training materials. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Advisory and Assistance Services	\$45,046	\$49,594	\$49,594	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources: private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Other Services	\$70,480	\$60,680	\$62,365	\$1,685

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Base funds support the continuance of contracts that provide logistical and programmatic support for TSO training and workforce career progression programs. These funds also provide for training courses sponsored by the Model Workplace program. The FY 2010 request includes a program increase of \$1.685 million for costs associated with 109 new Bomb Appraisal Officer positions.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Purchase from Government Accounts	\$3,359	\$3,227	\$3,227	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Operation & maintenance of facilities	\$4,535	\$5,097	\$5,097	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Operation & Maintenance of equipment	\$43	\$30	\$30	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Subsistence & Support of Persons	\$124	\$66	\$66	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Supplies & materials	\$43,301	\$35,443	\$39,743	\$4,300

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 request includes a base increase for consumables.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Equipment	\$6,555	\$5,901	\$5,901	\$0

This category is comprised primarily of training equipment used to demonstrate equipment use and to test the capabilities of TSOs. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Indemnity	\$902	\$527	\$527	\$0

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2010 Request has no change.

PPA Mission Statement

The Checkpoint Support PPA provides the resources required to deploy passenger screening, carry-on baggage screening and electronic surveillance equipment. This equipment is a vital component of TSA's efforts to secure our nation's air transportation. The FY 2010 request reflects support for the implementation of the evolving strategy to improve detection capability for weapons and explosives, and to further develop the capability to detect hostile intent.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$660	\$6,000	\$6,119	\$119

Salaries and Benefits provides funding to support 40 FTE and includes an increase for the annualization of 2009 and the proposed 2010 pay cost of living adjustments.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$284	\$828	\$1,576	\$748

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request reflects an increase of \$748,000 in travel costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	5	\$0	\$941	\$941

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request reflects a \$941,000 increase in transportation costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$0	\$1,759	\$403	(\$1,356)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request reflects a decrease of \$1,356,000 in rental payments

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and misc charges	\$14	\$0	\$0	\$0

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Funds are not requested in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$1	\$58,608	\$99,925	\$41,317

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request reflects an increase of \$41,317,000 which is associated with the implementation of Advanced Surveillance Systems. It also includes costs associated with the field testing of emerging technology screening equipment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$8,570	\$10,370	\$10,769	\$399

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. These expenditures consist primarily of program management support and contract support for reconfiguration of checkpoint equipment. The FY 2010 request reflects an increase of \$399,000 which will fund additional program management support.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$53	\$0	\$0	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Funds are not requested in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	(\$4,242)	\$0	\$0	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account. Funds are not requested in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Subsistence & Support of Persons	\$35	\$13,750	\$0	(\$13,750)

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. Funds are not requested in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$54	\$0	\$0	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Funds are not requested in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$18,151	\$158,685	\$9,006	(\$149,679)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request reflects a decrease of \$149,679,000, including \$120,317,000 non-recurring from the FY 2009 Enacted level. Funding will permit the continued acquisition and deployment of Advanced Technology Systems, Whole Body Imagers, Bottle Liquid Scanners, as well as the initial production of new emerging technologies to be purchased and field tested and other operational testing needed for the advancement of checkpoint security.

PPA Mission Statement

EDS/ETD Purchase and Installation is the purchase of electronic baggage screening equipment for deployment and the installation of electronic baggage screening equipment in our nations airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of our air transportation system.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$1,312	\$15,000	\$14,386	(\$614)

Salaries and Benefits provides funding to support 102 FTEs. The FY 2010 request reflects a decrease of \$614,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$106	\$2,935	\$8,860	\$5,925

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request reflects an increase of \$5,925,000 due to increases in per diem rates and transportation costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$0	\$1,733	\$5,231	\$3,498

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request reflects an increase of \$3,498,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charge	\$519	\$0	\$0	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Funds are not requested in FY 2010.

Total, Screening Technology Maint & Utilities	\$263,415	\$305,625	\$326,625	\$21,000
Full Time Equivalents	---	---	---	---

PPA Mission Statement

Screening Technology Maintenance and Utilities funds the maintenance and associated utilities of passenger and baggage screening equipment in our nation's airports. This funding is essential to ensure that all security screening equipment is operationally ready and supportable over its anticipated lifetime.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$38	\$50	\$195	\$145

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is a required part of program implementation allowing personnel to collect and evaluate information to develop requirements and monitor implementation of projects. The FY 2010 Request reflects an increase of \$145,000 to cover the cost of employee travel required to implement and monitor maintenance programs.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and misc charges	\$5,293	\$0	\$7,271	\$7,271

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request reflects an increase of \$7,271,000 for utilities for EDS/ETD checked baggage screening facilities including the cost of the base services and the cost of supplying utilities to newly installed equipment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$483	\$10,303	\$0	(\$10,303)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request reflects a decrease of \$10,303,000 due to a correction in object class reporting.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$233	\$25	\$2,425	\$2,400

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. This included contractual support for the Integrated Logistics Support program to sustain the Security Equipment deployed and utilized by TSA. The FY 2010 Request reflects an increase of \$2,400,000 to support costs of newly deployed equipment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$626	\$0	\$0	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Funds are not requested in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$256,736	\$295,247	\$310,913	\$15,666

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Maintenance costs increase from approximately 3% to about 15% of original purchase cost as equipment warranties expire. The FY 2010 request reflects an increase of \$15,666,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$6	\$0	\$5,821	\$5,821

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 Request reflects an increase of \$5,821,000 to support the additional requirements associated with newly deployed

PPA Mission Statement

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Salaries and Benefits	\$115,202	\$131,573	\$136,694	\$5,121

Salaries and benefits includes costs for 1,097 FTEs. The FY 2010 request reflects an increase of \$5,121 for pay annualization and pay inflation, as well as the annualized costs of 10 FTE to support efforts mandated under P.L. 110-53.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Travel	\$9,300	\$7,716	\$7,716	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Transportation of Things	\$304	\$84	\$84	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
GSA rent	\$529	\$491	\$491	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Communication, Utilities, & Misc. Charges	\$1,774	\$1,217	\$1,217	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Printing	\$28	\$17	\$17	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Other Services	\$11,863	\$14,710	\$14,710	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Purchase from Government Accounts	\$4,969	\$7,666	\$7,666	\$0

Purchases from Government Accounts include costs for purchases from other Government agencies or accounts that are not otherwise classified. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Subsistence & Support of Persons	\$175	\$72	\$72	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Supplies & materials	\$1,274	\$743	\$743	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Equipment	\$6,695	\$4,979	\$4,979	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Land & Structures	\$1,095	\$888	\$888	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Grants/Subsidies/Contributions	\$84,896	\$78,781	\$78,781	\$0

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. Funding supports reimbursable agreements for law enforcement officers as well as canine cooperative agreements. The FY 2010 Request has no change.

PPA Mission Statement

This PPA supports approximately 2,006 FTE at the airports and HQ, including the staff of the 153 Federal Security Directors (FSDs), the offices under Security Operations that direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at the TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front line operations of our TSOs.

PPA Mission Statement

TSA is mandated to provide the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircraft against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision making to defend the cockpit.

Summary Justification and Explanation of Changes

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change

Total, Air Cargo	\$110,770	\$122,849	\$108,118	(\$14,731)
Full Time Equivalents	444	642	642	0

^{1/} Negative due to decrease in prior year Undelivered Order Balance occurring in FY08 from accounting data corrections.

PPA Mission Statement

The Air Cargo program operates through compliance activities, regulatory efforts, outreach initiatives and technology implementation. TSA uses a threat-based risk management approach based on two threats: introduction of an explosive device on a passenger aircraft, and the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

Summary Justification and Explanation of Changes

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$45,430	\$71,467	\$73,236	\$1,769

Salaries and Benefits includes an increase for the annualization of 2009 and the proposed 2010 pay cost of living adjustments.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$4,812	\$1,923	\$1,923	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$680	\$771	\$771	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and Miscellaneous charges	\$85	\$12	\$12	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$6	\$1	\$1	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The printing provides educational materials, training aids, and regulatory guidance. The FY 2010 Request has no change.

	2008 Actuals	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$29,377	\$8,836	\$8,836	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. These services support the Air Cargo Systems development, operation, and support Known Shipper Management System, Indirect Air Carrier Management System and Air Cargo Risk Based Targeting. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Other Services	\$9,223	\$1,641	\$3,141	\$1,500

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 increase includes a realignment of funding to cover increased K-9 costs.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Purchase from Government Accounts	\$610	\$113	\$113	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Operation & Maintenance of equipment	\$2	\$2	\$2	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Supplies & materials	\$1,191	\$305	\$305	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 Request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Equipment	\$8,660	\$30,002	\$12,002	(\$18,000)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 decrease is a result of non-recurring funding provided in FY 2009 to expand technology pilots.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	Request	Change
Grants/Subsidies/Contributions	\$10,476	\$7,776	\$7,776	\$0

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. Funding supports reimbursable agreements for law enforcement officers as well as canine cooperative agreements. The FY 2010 Request has no change.

Department of Homeland Security
Airport Perimeter
Funding Schedule
(Dollars in Thousands)

PPA: Airport Perimeter	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Object Classes:				
21.0 Travel	\$7	\$20	\$0	(\$20)
25.1 Advisory & Assistance Services		3,980	0	(3,980)

Total, Airport Perimeter	\$7	\$4,000	\$0	(\$4,000)
Full Time Equivalents	---	---	---	---

PPA Mission Statement

This funding supports technologies that provide perimeter security capabilities or significantly enhance current technology based capabilities. Responsive projects may include perimeter sensors, intelligent camera systems, biometric devices, technologies to detect and track potential intruders, and communication capabilities to provide appropriate alarm and response notification. TSA will utilize the results of this project to continue to develop processes, procedures, technical requirements, and standards for perimeter security. There is no request for funds in FY 2010.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$7	\$20	\$0	(\$20)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Funds are not requested in FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$0	\$3,980	\$0	(\$3,980)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Funds are not requested in FY 2010.

BUDGET REQUEST AND SUPPORTING INFORMATION

TRANSPORTATION SECURITY ADMINISTRATION SURFACE TRANSPORTATION SECURITY

I. Appropriation Overview

A. Mission Statement for Surface Transportation Security:

TSA is mandated to protect the surface transportation system and ensure the freedom of movement for people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities optimizing resources in a risk-based approach to security. In addition to coordination, TSA provides surface inspectors and other screening and detection programs.

These combined efforts play an essential role in DHS' mission to prevent terrorist acts within the U.S., to reduce vulnerability to terrorism, and to minimize the damage from potential attacks. The surface domain includes:

- Approximately 775 million passengers traveling on buses each year and over 9 billion passenger trips on mass transit per year.
- Over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of Interstate highway and 114,700 miles of National Highway System roads); 582,000 bridges over 20 feet of span; 54 tunnels over 500 meters in length, and nearly 2.2 million miles of pipeline.
- Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- The Marine Transportation System (MTS) consisting of waterways, ports, and their connections as well as commercial and recreational vessels, vehicles, and system users such as importers and exporters. It is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals.

There is a very real ongoing threat to transportation security, including surface modes within the transportation sector network, as evidenced by the World Trade Center bombing in 1993 and the Murrah Building bombing in 1995, both of which occurred on U.S soil, as well as the bombings in Madrid in March 2004, London in July 2005 and Mumbai, India in 2006. Given these events and continued threat, TSA, its government partners, industry owners, and operators have increased their vigilance by continuing to exchange real time information and by focusing on threat detection and preparedness measures to improve security and resilience of the transportation system. In addition, TSA plays a pivotal role in the President's Executive Order to Strengthen Surface Transportation Security through the identification of security gaps, development of appropriate security guidelines, and requirements to mitigate these gaps. In August 2007, DHS was directed by the 9/11 Commission Act to take specific measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training and conducting exercise activities to reinforce the modal security plans.

B. Budget Activities:

This appropriation includes two major programs – Surface Transportation Security Operations and Staffing and Surface Transportation Security Rail Inspectors and Canines.

Surface Transportation Security Operations and Staffing - Provides coordination among all surface security stakeholders to implement a regulatory framework and administration policy, develop national security programs, identify best practices through pilot programs and evaluation of system assessments, and use this information to assess risk and assist with prioritization of security resources.

Surface Transportation Security Inspectors Rail and Canines - Employs a cadre of inspectors and canine teams to provide compliance, national program delivery, and outreach on security assets in the surface transportation system. They interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security. They also support TSA's Visible Intermodal Prevention and Response program (VIPR).

C. Budget Request Summary:

The Transportation Security Administration requests 734 positions, 545 FTE, and \$128,416,000 for FY 2010. The total adjustments-to-base is 23 FTE and \$8,335,000. The program increases include 338 positions, 169 FTE, and \$56,650,000 to:

- Annualize FY 2009 funding (non-pay) for the Implementation of the 9/11 Act (0 positions, 0 FTE, \$6,650,000)
- Support 15 new Visible Intermodal Prevention and Response (VIPR) teams to enhance surface transportation security (338 positions, 169 FTE, \$50,000,000).

III. Current Services Program Description by PPA

**Department of Homeland Security
Surface Transportation Security
Program Performance Justification**
(Dollars in Thousands)

PPA: SURFACE TRANSPORTATION SECURITY OPERATIONS AND STAFFING

	Perm		
	Pos	FTE	Amount
2008 Actual	198	131	25,039
2009 Enacted	171	160	33,711
2010 Adjustments-to-Base			1,932
2010 Current Services	171	160	35,643
2010 Program Change	0	0	6,650
2010 Request	171	160	42,293
Total Change 2009-2010			8,582

The Transportation Security Administration requests \$42.3 million for this activity to coordinate security efforts in non-aviation modes including pipelines, highway and motor carrier, maritime, mass transit, rail, and postal and shipping sectors. This is an increase from FY 2009 of \$480 thousand for pay inflation and \$8.1 million for annualization of Surface 9/11 initiatives. Funding for this PPA supports 171 FTP and 160 FTE.

PROGRAM DESCRIPTION:

TSA, in accordance with Aviation and Transportation Security Act (ATSA), is responsible for assessing the risk of terrorist attacks to all surface transportation modes, issuing regulations to improve modes' security, and enforcing those regulations to ensure that each transportation mode is protected. The objective of these efforts is to establish best practices and national standards, develop security plans and regulations, better assess security vulnerabilities, and identify needed security enhancements for surface transportation modes and related infrastructure. The key strategic plans and requirements documents driving TSA's security efforts are the Executive Order to Strengthen Surface Transportation, the National Strategy for Transportation Security, the National Infrastructure Protection Plan, 9/11 Commission Act of 2007 and the DHS Strategic Plan. Specific activities included in this PPA are:

Corporate Security Reviews: TSA conducts Corporate Security Reviews (CSRs) in multiple modes of transportation to establish baseline data against which to evaluate minimum-security standards and identify coverage gaps in reviewed systems. CSRs allow TSA and the system operators to develop first hand knowledge of security planning and execution at critical systems, establish communication between key security personnel, identify and share smart practices, and make recommendations for security improvements. In carrying out CSRs, teams of TSA modal experts evaluate and collect physical and operational preparedness information on critical assets, key point-of-contact lists, review emergency procedures and security plans, provide domain

awareness training, and provide an opportunity to share security practices. These on-site security reviews of transportation companies allow TSA to develop first-hand knowledge of security planning and execution at critical sites, establish communication with key security personnel, identify and provide security best practices, and make recommendations for security improvements.

Pipeline: As of August 2008, 77 CSRs on 93 natural gas and hazardous liquid transmission pipelines and natural gas distribution systems have been completed. CSRs will continue, with a goal of one major Pipeline System per month, or 12 total per fiscal year.

Highway: TSA continues to conduct CSRs to establish and reaffirm security baselines of all highway modal industries. As of August 2008, 113 CSRs on Highway transportation organizations have been completed. These include trucking companies, state Departments of Transportation (DOTs), transportation authorities, school districts (buses), and motor coach companies. CSRs will continue in 2009 at both previously unvisited owners and operators of transportation assets and at critical corporations where revisits are justified by high threat or vulnerability situations. TSA will conduct 12 CSRs per fiscal year.

Freight Rail: TSA conducts CSRs on Class I, II and III railroads to ensure security levels are maintained. Class I railroads are rail carriers with an annual operating revenue of \$319 million or more. Currently there are seven Class I carriers operating in the U.S. Class II railroads have annual operating revenues between \$25.5 million and \$319.2 million and Class III railroads have annual operating revenues less than \$25.5 million. There are over 400 Class II and III rail carriers operating in the U.S.

In FY 2008, two CSRs were conducted on Class II railroads. In FY 2009, TSA will conduct seven CSRs on Class I railroads, and in FY 2010, seven CSRs on Class II or Class III railroads will be conducted. The Freight Rail Division will use the results from the CSRs to develop standards for security plans.

High Threat Urban Area (HTUA) Vulnerability Assessments: TSA leads a team composed of Federal, State, and industry subject matter experts to conduct risk assessments of selected High Threat Urban Area (HTUA) rail corridors. These on-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA. Assessments lead to security enhancements and mitigation strategies to address the handling and protection of Toxic Inhalation Hazards (TIH) rail shipments through the HTUA. These assessments will continue in FY 2009 and FY 2010. TSA has completed assessments on nine rail corridors. TSA has restructured the program to allow for compressed assessments at the remaining 34 HTUA rail corridors, which began in FY 2008 and will continue through FY 2010.

Toxic Inhalation Hazard Transportation Risk Reduction: TSA has established a program to objectively measure the security risk associated with the rail transportation of Toxic Inhalation Hazard (TIH) materials through high threat urban areas. This program, established in cooperation with industry stakeholders, measures the reduction in dwell time and implementation of positive security measures by the rail carriers. The rail carriers have developed operating plans and TSA is measuring the level of risk reduction. This measurement is regularly reported to stakeholders. TSA plans to conduct 2,700 TIH Security Surveys in FY 2009, and 3,000 surveys in FY 2010.

Security Standards Development: Two initiatives ongoing in this area will continue in FY 2010. First, the Federal Government is engaging with the American Public Transportation Association (APTA) Security Standards Policy and Planning Committee to develop security standards. Security

professionals from the public transportation industry, business and research security partner representatives, and the Federal Government (DHS, TSA, Federal Emergency Management Agency (FEMA), Federal Transit Administration (FTA), and Federal Railroad Administration (FRA)) collaborate to develop consensus-based standards to enhance security in mass transit and passenger rail systems. Working groups focus on specific security areas and concerns, including mass transit and passenger rail facilities and operations. Working groups are also beginning efforts to develop standards for two additional areas: risk assessments and emergency drills and exercises. Federal participation in the consensus-based efforts is effected through the Government Coordinating Council/ Sector Coordinating Council (GCC/SCC) framework and Critical Infrastructure Protection Advisory Council (CIPAC) process. The approved standards are issued as "recommended practices" and supported by the APTA for voluntary adoption by the transit industry. As of June 2008, draft recommended practices have been developed and distributed for transit community concurrence for deployment of close circuit television, placement of trash receptacles, and security and emergency preparedness planning. Additional recommended practices in multiple areas are expected to follow within the next 6 – 12 months. Published standards in multiple areas will occur throughout FY 2010.

The second initiative focuses on the development of standards for security technologies. This joint Federal-transit community effort aims to develop consensus-based standards for security technologies suitable for mass transit and passenger rail environments. The DHS Standards Executive and the American National Standards Institute co-lead this initiative. A key ongoing initiative entails testing and standards development for blast resistant trash receptacles. Testing commenced in FY 2008. It is anticipated that this technical standard will be completed by the end of FY 2009.

Grant Oversight and Management: TSA provides subject matter expertise and programmatic support to the National Preparedness Division at FEMA to issue guidance, evaluate, and approve grant applications for bus, trucks, ports, mass transit, and passenger rail systems including ferry systems. Under TSA's leadership, the grants are awarded based on risk while working collaboratively with the transportation systems to ensure that the selected projects are focused on increasing security.

Programs

TSA also conducts pilots to develop technology solutions, identify best practices, and inform the standards setting process. Examples of TSA pilot programs expected to be ongoing in FY 2010 are:

Intermodal Security Training Exercise Program (I-STEP): Provides exercise technology, services, and tools to conduct and evaluate multi-modal transportation security training exercises. TSA has leveraged I-STEP to meet the requirements of the 9/11 Commission Report, by creating a security exercise program in the mass transit, freight rail, and over-the-road bus sectors (2008). Additionally TSA and the U.S. Coast Guard (USCG) collaborate on multi-port, intermodal, exercises on a "Regional" level in the maritime sector. I-STEP is aligned with all national guidance and directives on exercises including the National Incident Management System, the National Response Framework, and other preparedness directives. The continuation of this program will further enhance public transportation agencies' ability to prevent, mitigate, respond to, and recover from terrorist incidents in FY 2010.

Security Enhancement And Capability Augmentation Program (SEACAP): SEACAP will enhance the capability to deter, detect, and prevent explosives from being introduced as a weapon on ferries and in cruise line terminals. This program builds upon technology pilots already conducted in Cape May-Lewes Ferry, New Jersey; Golden Gate Ferry, San Francisco, California; Jamestown River Ferry, Virginia; Manhattan Cruise Terminal and Staten Island Ferry, New York; and the Galveston-Bolivar Ferry, Texas to provide a platform and programmatic infrastructure for improving current security screening for high capacity passenger vessel operations (ferry systems and cruise ship terminals). This program will continue to conduct baseline screening assessments and screening deployment exercises in additional high capacity passenger vessel operations in FY 2010.

Security Training, Operational Readiness and Maritime Community Awareness Program (STORMCAP): Through STORMCAP, TSA develops and disseminates enhanced security training, community awareness products and operational guidance to enhance maritime security. Products have included Security Awareness for Passenger Vessel Employees CD (2007); Vehicle-borne improvised explosive device (VBIED) Recognition/Response for Passenger Vessels and Terminals CD (2008); and the Maritime Screening Guide (2009). In FY10, this program will provide increasingly detailed levels of security awareness information and training for passengers and industry personnel.

Bus Command and Control: The system provides over-the-air vehicle disabling through restriction of fuel to the engine using a programmable series of steps and also a keyless driver authentication where operators have a unique numeric code that must be entered in order to start a bus or drive a bus idling for a designated amount of time. Alarms are sent wirelessly to a command or dispatch center if an unauthorized user attempts to operate the bus. A successful proof-of-concept took place in August 2006. The full field operational testing (FOT) of this system began in FY 2007 and will continue through FY 2010. When completed, the system is expected to be commercially available.

Layered Security Operational Test Bed: This collaborative security engagement initiative tests the effectiveness of operational and technological solutions applied in a layered approach at mass transit and passenger rail facilities. The effort commenced with the Port Authority Trans Hudson (PATH) interstate rail system in FY 2007. In December 2007, TSA facilitated a workshop with appropriate operating and security officials of the Port Authority and DHS Science and Technology Directorate (S&T) to assist the Authority in identifying operational and technological security requirements for its 5 year strategic plan. TSA will partner throughout FY 2009 to test technological and operational solutions to prevent terrorism in mass transit and passenger rail systems. Continued development and extension to other systems and diverse public transportation environments – rail terminals and stations, system infrastructure, bus terminals and stations – will occur throughout FY 2010.

Stakeholder Interface:

Transit. In cooperation with the FTA and DHS, TSA facilitated eight Connecting Communities forums for transit operators, Federal and local first responders, and security experts to address gaps in security related emergency response capabilities. In addition, bi-annual safety and security roundtables are conducted with the security chiefs and directors of the Nation's 50 largest transit systems. These forums engage the assembled expertise in a focused working group format to address and develop solutions for current security issues and concerns. Additionally, the law

enforcement chiefs and security directors of the 50 largest mass transit and passenger rail agencies join their Federal partners from TSA, DHS/FEMA, and FTA twice yearly in the semi-annual Transit Safety and Security Roundtables. Through this engagement, security professionals from the mass transit and passenger rail community and the Federal Government collaborate to advance effective programs and initiatives to enhance security. The focused effort over a 3 to 4-day period fosters the networking and information sharing, notably of smart security practices, that is essential to elevating security posture throughout the passenger rail and mass transit mode. Finally, TSA subject matter experts in mass transit and the Transit Security Grant Program (TSGP) engage with Regional Transit Security Working Groups in eight major metropolitan areas and Amtrak to define security priorities and complete cooperative agreements on the most effective use of Federal grant funds to enhance public transportation security through the implementation of security projects. TSA will continue this cooperative approach in these Tier 1 areas (New York, Boston, Washington, DC, Philadelphia, Chicago, Los Angeles, San Francisco, and Atlanta) throughout FY 2009 and FY 2010 with possible extension to locations in Tier 2 under the TSGP.

Pipeline. The International Pipeline Security Forums are an ongoing initiative conducted annually by the TSA Pipeline Security Division in conjunction with Natural Resources Canada. This 2-day conference enhances government and industry pipeline security domain awareness and provides opportunities for discussion of major pipeline security issues, both domestic and international. The approximate 150 - 200 people who usually attend include representatives and officials from the U.S. and Canadian governments, pipeline related associations, pipeline owners and operators from the U.S. and Canada, and representatives from the security, intelligence and law enforcement communities. The first International Pipeline Security Forum was held in Calgary, Alberta, Canada in FY 2006; the second was in Chicago, Illinois in FY 2007; the third was in Ottawa, Ontario, Canada in FY 2008, and the fourth is scheduled to be held in Salt Lake City, Utah in FY 2009. While the forum site for FY 2010 has not been identified, forum sites will continue to alternate between the U.S. and Canada.

Highways. In cooperation with Federal Motor Carrier Safety Administration (FMCSA), Customs and Border Protection (CBP), FEMA, General Services Administration (GSA), US Department of Education, and USCG, TSA is sponsoring a series of regional highway security conferences for Highway and Motor Carriers and infrastructure owners and operators. This series will be repeated at the request of these stakeholders. Additionally, quarterly tele-conferences and CIPAC meetings are held with each of the four highway modal industry groups of trucking, motorcoach, school bus and infrastructure. TSA works with DHS to sponsor and manage the Truck Security Grant program that promotes security awareness among truckers and other professional drivers. This program also supports the Highway Information Sharing and Analysis Center (ISAC) and will be continued through FY 2010.

Security Awareness. Security awareness training packages for operators have been developed for the pipeline, mass transit, freight rail and highway modes of transportation. Public awareness and education is also fostered through Transit Watch, Highway Watch, and other joint campaigns in transportation systems emphasizing the importance of vigilance and timely reporting of security concerns. TSA distributes security awareness information products to stakeholders through programs such as the HAZMAT Motor Carrier Security Self-Assessment Training Program, the School Transportation Security Awareness for the school transportation industry, and Operation Secure Transport for the motorcoach industry. TSA will continue to provide these stakeholder services in FY 2010.

PPA: SURFACE TRANSPORTATION SECURITY INSPECTORS AND CANINES

	Perm		
	Pos	FTE	Amount
2008 Actual	183	94	\$18,712
2009 Enacted	225	193	\$29,720
2010 Adjustments-to-Base	0	23	\$6,403
2010 Current Services	225	216	\$36,123
2010 Program Change	338	169	\$50,000
2010 Request	563	385	\$86,123
Total Change 2009-2010	338	192	\$56,403

The Transportation Security Administration requests \$86.1 million for FY 2010 to support the Surface Transportation Security Inspection Program (STSIP) and explosive detection canine programs. This is an increase from FY 2009 of \$6.4 million for pay inflation and annualization of Surface 9/11 initiatives. Funding for this PPA supports 563 FTPs and 385 FTEs, as well as 100 mass transit canine teams. The 338 additional positions in FY 2010 will be dedicated to 15 new Visible Intermodal Prevention and Response (VIPR) teams.

PROGRAM DESCRIPTION:

The Surface Transportation Security Inspection Program (STSIP) is a unique and critically important federal inspection program with expanding responsibilities in U.S. surface transportation security. With initial emphasis on freight railroads, mass transit and passenger rail, the STSIP has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

These inspectors are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 46 High Threat Urban Areas (HTUAs), as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to Toxic Inhalation Hazard (TIH) shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. STSI personnel continue to provide stakeholder liaison functions, situational awareness of security conditions and, during surface transportation incidents, convey valuable first-hand information to Federal Security Directors (FSDs), security, policy and intelligence offices, and TSA leadership.

Baseline Assessment for Security Enhancement (BASE) Program: In conjunction with FTA, TSA developed the BASE inspection program to integrate various security requirements and guidelines into a comprehensive assessment that offers an in-depth profile of the security posture of a mass transit or passenger rail system. The BASE program consists of updated Security and Emergency Management Action Items and TSA Security Directives. BASE reviews are conducted either as a stand-alone effort or in conjunction with State Safety Oversight (SSO) review of a rail systems' compliance with 49 CFR Part 659, which directs transit agencies to maintain a system security plan. The action items represent the core of this program, detailing 17 functional areas, including security program management and accountability, security and emergency response training, drills and exercises, public awareness, protective measures for Homeland Security Advisory System (HSAS) threat levels, physical security, personnel security, information sharing,

and information security. As of April 15, 2009, 104 BASE reviews have been conducted, of which 46 were on the Nation's top 50 Mass Transit Systems.

Results of these security assessments are a major driver for the mass transit security programs and resource allocations, most notably the Transit Security Grant Program (TSGP). The comprehensive BASE results comport well with self-assessments of the top 50 transit agencies' posture in the six Transit Security Fundamentals that are priorities under the TSGP program. TSA has integrated the assessment results funding priorities, and resourcing in new and innovative ways to use Federal funds to elevate security posture. The BASE results have also identified a number of "smart practices" which are being packaged in products useful for sharing throughout the mass transit and passenger rail community.

Security Analysis and Action Program (SAAP): The SAAP is a systematic examination of a regulated party's transportation operations. The purpose of the evaluation is to gather information, complete a full risk assessment to include threat, vulnerability, and consequences, identify smart practices, and benchmark transportation security operations against established security guidelines and recommendations. In particular, evaluations:

- Provide regulated parties with an objective view of possible security gaps and vulnerabilities in order to better manage risk of terrorist attack.
- Identify new security innovations and smart practices.
- Determine whether transportation security activities and related programs comport with TSA identified smart practices.
- Assess whether the measures implemented are suitable to achieve overall security objectives.

Generally, an analysis is conducted by a team of Surface Transportation Security Inspectors, but may include participants from other federal agencies, state and local authorities, and/or private stakeholders as appropriate. The STSI Program will increase the use of SAAP methodology in the mass transit and rail domain.

Assessments and Inspections: Upon the issuance of the rail and mass transit regulation under 49 CFR 1580, Surface Transportation Security Inspectors will conduct compliance inspections throughout the rail and mass transit domain. Inspectors will remain fully engaged with outreach, stakeholder relations, and enforcement/assessment activities in the systems throughout their regions to ensure awareness and compliance with applicable security directives, policies, and regulations. In addition to conducting system security evaluations, inspectors are responsible for:

- Threat and vulnerability inspections, reviews and assessments which are used to determine the capability of a potentially targeted transportation system/asset in order to reduce the risk from a specified threat;
- Conducting Security Action Item (SAI) assessments regarding TIH/railcars and shippers
- Providing Terrorist Activity Recognition and Reaction (TARR) training to public transit entities;

- Responding to surface transportation security incidents (i.e. train derailments, possible improvised explosive devices (IED), major truck accidents, etc.) to gather real-time, on-scene information;
- Responding to natural disaster incidents to assist surface transportation entities in their recovery efforts and provide FSDs with localized, surface transportation specific information/updates from these catastrophic events;
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event;
- Coordinating surface transportation security requirements for National Special Security Events; and,
- Planning and participating in TSA Visible Intermodal Prevention and Response (VIPR) deployments, on an increasing scale.

Inspectors previously conducted Corporate Security Reviews with primary focus on trucking, commercial drivers, motor coach/over-the-road buses and infrastructure.

In 2009, the STSIP will expand its assessment and inspection activities in the field to include Highway and Motor Carriers.

Visible Intermodal Prevention and Response (VIPR): The objective of VIPR deployments in mass transit and passenger rail systems is to augment capabilities that disrupt and deter potential terrorist activity and is advanced through a combination of intelligence-based and periodic random deployments for execution in timing, location, and types of activities. The nature of the activities and their unpredictability are essential to their deterrent effect as they maintain a dynamic and changing security program that will disrupt any observation, reconnaissance, and/or planning activities, thus precluding the detection and exploitation of patterns in security measures.

VIPR operations teams consist of TSA personnel that may include Transportation Security Inspectors (TSIs), Transportation Security Officers (TSOs), Federal Air Marshals (FAMs), Behavioral Detection Officers (BDOs), canine teams, and local and state law enforcement officers. Uniformed VIPR team members provide a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities bolster the system's efforts to prevent an adversary from orienting on and breaching a pattern in security activities. TSA partners with the transit agency's security professionals to provide parameters for visible anti-terrorism security activities.

Since the programs inception in December 2005, TSA has conducted more than 450 VIPR operations in mass transit and passenger rail properties. In FY 2008, of the 517 Surface VIPR operations, 300 operations were conducted in mass transit and 28 were conducted in freight rail.

By the end of the first quarter of FY 2009, there were 309 Surface VIPR operations.

Transit Security Grant Program (TSGP): In addition to the expanding inspection responsibilities, STSIs serve as panel members on the TSGP. STSIP will continue its long standing support of this activity in FY 2010 by reviewing project proposals, helping assess grant applications, and assisting in the development of the process by which the grants will be awarded.

National Explosive Detection Canine Team Program (NEDCTP): The NEDCTP supports the Nation's largest passenger transportation systems in mass transit and in FY 2009 is expanding into the maritime (ferry systems). This program in partnership with State and local law enforcement agencies, fulfills the need to provide effective, low-cost security measures within the mass

transit/commuter rail sector. These full-time teams are highly effective, rapidly deployable, and critical to the ability of the Nation's largest passenger transportation systems to preempt terrorist attacks by deterring, detecting, and preventing explosives from being introduced as weapons.

Through cooperative agreements, TSA provides funding for training, certification and maintenance of the explosive detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs (up to \$40,000 per team). Local law enforcement agencies deploy these valuable canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

TSA currently has funding to support a total of 780 teams in the Aviation and Mass Transit sectors. There are currently 82 mass transit teams deployed through out the Nation's most critical transit systems. In FY 2009, TSA plans to add additional teams, including maritime (i.e. ferry) teams, for a total of 100 teams.

Funded Canine Teams					
<u>Funding Source</u>	<u>Legacy Aviation</u>	<u>Proprietary</u>		<u>Mass Transit</u>	<u>Total</u>
		<u>OSO</u>	<u>FAM</u>		
Base Funding	419			100	519
Supplemental	50	120			170
FY08 Enhancement	46	23	22		91
Total	515	143	22	100	780

Due to personnel needs, 1 FTE for the FAM Proprietary Teams is used to help manage the program

The FY 2010 request will continue the program at FY 2009 operating levels.

IV. Program Justification of Changes

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security
Justification of Program Changes**

(Dollars in Thousands)

Program Increase 1: Surface Transportation Security 9/11 Annualization

Strategic Goal(s) & Objective(s):

- 1. Continue to Protect our Nation from Dangerous People
- 3.1 Protect and Strengthen the resilience of the Nation’s critical infrastructure and key resources; Enhance preparedness protection, screening and risk mitigation

PPA: Staffing and Operations

Program Increase:

Surface Transportation Security: Positions 0 FTE 0 Dollars \$6,650

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FT E	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase - Transportation Security Regulations, Strategies, Plan, development and review									3,850
Program Increase – Intermodal Security Training and Exercise Program (I-STEP)									2,000
Program Increase - Pipelines							0	0	800
Total Request									6,650

Description of Item

Regulations, Strategies, Plan Development and Review:

- Development of regulations and security plans to prevent, protect, respond, and recover from terrorist acts and other hazards. The regulations must then be implemented and disseminated to ensure thorough understanding and uniform and equitable enforcement throughout the country in Surface Transportation Modes.

I-STEP:

- Programmatic support and management of the Intermodal Security training Exercise program (I-STEP), to develop the Public Transportation Security Exercise Program requirements mandated by the 9/11 Commission Act under sections 1407, 1516, and 1533, through the TSNM I-STEP.

Pipeline:

- Rule development, compliance and enforcement of rules for pipelines based on the 9/11 Act.

Justification

This request provides funding to support Public Law 110-53 – 9/11 Implementation Bill, passed by Congress in August 2007. The bill significantly increased the regulatory burden on TSA. In addition, recent changes require a cost benefit analysis to be performed for all proposed regulations and recommendations to industry. The new Congressional mandates (9/11 Act) require additional FTE, program support, and new programs fulfill these operational requirements. Regulations, Strategies, Plan Development and Review, I-STEP, and Pipeline FTP funded in FY09 require annualization in FY 2010 to continue progress.

Impact on Performance (Relationship of Increase to Strategic Goals)

The enhancements requested within Surface Transportations Security, directly support the following DHS Strategic Goals:

Goal 3: Protect Critical Infrastructure;

Objective 3.1: Protect and strengthen the resilience of the Nation’s critical infrastructure and key resource against all threats.

The Transportation Security Administration (TSA) has primary responsibility for security in all transportation modes. The 9/11 Act included several new congressional mandates that intend to improve the Nation’s level of preparedness, reduce risks associated with terrorist and non terrorist events, and increase the security of our Nation’s critical infrastructure and key resources.

TSA has identified three broad categories of activity to address the requirements of the 9/11 Act. These are:

- Assessment of threats and risks to critical infrastructure
- Enforcement of compliance with security regulations ; and
- Development of infrastructure systems and tools.

3.1.1 Enhance preparedness, protection, screening, and risk mitigation within the 17 sectors of critical infrastructure, as defined in the National Infrastructure Protection Plan. Implement and update Sector Security Specific Plans

The Act mandates the development of regulations and security plans to prevent, protect, respond, and recover from terrorist acts and other hazards in the surface modes.

Program Increase 2: Surface Visible Intermodal Prevention and Response (VIPR)

Strategic Goal(s) & Objective(s):

3.4: Protect Transportation Sectors infrastructure and key resources:

PPA: Surface Transportation Security Inspectors and Canines

Program Increase:

Surface Transportation Security: Positions 338 FTE 169 Dollars \$50,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request

VIPR enhancement for Surface specific operations							338	169	\$50,000
Total Request							563	394	\$80,300

¹Current Services reflects total TSA funding for VIPR teams included in Aviation, FAMS, and Surface appropriations.

Description of Item

In FY 2010, TSA requests an enhancement of \$50.0 million and 338/169 FTE to support 15 new Visible Intermodal Prevention and Response (VIPR) teams that will deploy on both a risk-based and random basis within the surface transportation sector.

Justification:

VIPR teams provide a tool with unique capabilities for use within the transportation system. Deterrence is best achieved through development and implementation of a joint plan for periodic random, unpredictable deployment of varying force packages at differing times and locations. VIPR teams also augment security during periods of heightened threat as well as during special events, such as political conventions, major sporting events, and other forums of national or regional significance that raise security concerns.

The additional requested positions and associated resources will enable TSA to complete a nationwide footprint for conducting VIPR operations and enhance capability to:

- Deploy to cover high-risk infrastructure, address intelligence-driven threats or support special event operations within surface transportation sectors
- Supplement local passenger rail, cruise line and mass transit agency security capabilities in response to a specific intelligence-driven threat or incident.

This funding will also provide additional Full Time Equivalent (FTE) at the TSA Joint Coordination Center (JCC) and VIPR program management offices to facilitate the effective deployment and management of the additional VIPR teams.

Impact on Performance (Relationship of Increase to Strategic Goals)

The enhancements requested within Surface Transportations Security, directly support the following DHS Strategic Goals:

Goal 3: Protect Critical Infrastructure;

Objective 3.4: Protect Transportation Sectors

By deploying VIPR teams in mass transit and passenger rail systems, TSA's ability to disrupt and deter potential terrorist activity is enhanced. Through periodic risk-based and random deployments of cross-functional teams, TSA can quickly and effectively raise the level of security in any mode of transportation across the country.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in Surface Transportation Security
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing surface transportation security activities, [\$49,606,000] **\$128,416,000** to remain available until September 30, [2010] **2011**. (Department of Homeland Security Appropriations Act, 2009.)

Explanation of Changes:

No substantive changes proposed.

PPA Mission Statement

Surface Transportation Security Operations and Staffing is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Operations and Staffing office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$17,166	\$19,392	\$21,324	\$1,932

The FY 2010 increase reflects annualization, COLA.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Travel	\$961	\$1,944	\$1,697	(\$247)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2010 request decreases by \$247 to accurately reflect object classes.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and misc. charges	\$0	\$106	\$121	\$15

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. PDA and cell phone air time are the major items being charged to this object class. FY 2010 request sustains current services.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Printing	\$3	\$18	\$29	\$11

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. FY 2010 request sustains current services.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other Services	\$6,494	\$5,096	\$18,581	\$13,485

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail, Highway and Motor Carrier and Postal and Shipping. The FY 2010 increase reflects the annualization of FY 2009 programs funds for 9/11 initiatives.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$262	\$391	\$402	\$11

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials. FY 2010 request sustains current services.

PPA Mission Statement

TSA has been given the responsibility to ensure the compliance of security regulations and standards within the rail and mass transit modes. TSA will accomplish this with a cadre of 100 inspectors located at significant rail, mass transit, and transit centers across the United States.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Salaries and Benefits	\$9,872	\$19,871	\$76,274	\$56,403

Salaries and Benefits includes costs for 385 FTEs in FY 2010. The FY 2010 increase reflects annualization, COLA and the new VIPR teams.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Travel	\$1,237	\$761	\$469	(\$292)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. This funding will be used for local and extended travel to conduct a multitude of transit inspections program management. The FY 2010 request includes a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
GSA rent	\$210	\$470	\$214	(\$256)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request reflects a decrease of \$256 that reflects a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other Rent	\$29	\$20	\$17	(\$3)

Other rent includes all payments to a non -Federal source for rental space, land and structures. The FY 2010 request reflects a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous	\$125	\$240	\$155	(\$85)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. This funding will be used for communication equipment and service cost. The FY 2010 decrease includes a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Printing	\$3	\$2	\$2	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request sustains current services.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other Services	\$178	\$549	\$2,510	\$1,961

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 requested increase is support of the additional VIPR teams.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$64	\$215	\$70	(\$145)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. FY 2010 request reflects a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$346	\$491	\$421	(\$70)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request reflects a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Equipment	\$1,312	\$1,240	\$88	(\$1,152)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request reflects a technical adjustment to better reflect how funds are executed by Object Class.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Grants/Subsidies/Contributions	\$5,335	\$5,500	\$5,903	\$403

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. FY 2010 request reflects a technical adjustment to better reflect how funds are executed by Object Class.

BUDGET REQUEST AND SUPPORTING INFORMATION

TRANSPORTATION SECURITY ADMINISTRATION TRANSPORTATION THREAT ASSESSMENT AND CREDENTIALING

I. Appropriation Overview

A. Mission Statement for Transportation Threat Assessment and Credentialing:

The mission statement for this program is, “to reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of the threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation’s transportation system.”

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295)
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176)
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

These laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD-11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures.”

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated and integrated threat assessment environment. At the same time, implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

The Office of Transportation Threat Assessment and Credentialing (TTAC) within TSA supports this directive by consolidating the management of all vetting and credentialing programs within TSA. This office consists of the following screening programs: Secure Flight, Transportation

Worker Identification Credential (TWIC), Hazardous Materials Commercial Driver's License Endorsement Threat Assessment Program (HTAP), Alien Flight Student Program and Other Vetting Programs. The programs that comprise this appropriation are designed to enhance security for many components (air, land, sea) of the transportation sector and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

Through the Secure Flight program, TSA will receive passenger and certain non-traveler information, conduct watch list matching against the No Fly and Selectee portions of the Federal government's consolidated terrorist watch list, and transmit a boarding pass printing result back to aircraft operators to prevent terrorists from boarding aircraft. The Alien Flight Student Program conducts background and intelligence-based checks for ties to terrorism on aliens and other individuals who seek flight training. As part of the certification process, commercial truck drivers seeking to haul hazardous materials in the United States must be cleared through a background check conducted by the HTAP program. The TWIC program provides an identity management system for transportation workers requiring unescorted access to secure areas of the Nation's transportation system. The Other Vetting/Screening Administration and Operations Program contains the Crew Vetting Program with the other smaller vetting and credentialing programs to support the program management and operational costs. The overall purpose of these programs is to provide a structured method of assessing potential threats to the safety and security of the American public through the screening of workers and travelers throughout the transportation industry.

TTAC has grown tremendously since inception through the development and implementation of efficient, reliable, and cost-effective terrorist-related screening programs. TTAC currently vets and adjudicates approximately 400,000 cases a week by reviewing and assessing biographic information, and close to 25,000 cases a week based on biometric checks against criminal databases. Additionally, TTAC perpetually vets over 7 million people per day, adjudicates over 12,000 cases per week and responds to over 750 redress requests a week. In the midst of considerable program growth, TTAC has demonstrated cost-effectiveness and enhanced performance.

The Vetting Infrastructure Modernization project will develop a person-centric view across all modal programs in accordance with the DHS Credentialing Framework Initiative (CFI), and is critical to accomplishing key strategic goals that better secure the nation's transportation infrastructure. A person-centric view requires the ability to associate information about a person across organizations and encounters; and provide a needs-specific view of that information to a DHS decision-maker, ensuring that the information provided is appropriate to the context of the encounter and the decision being made. Modernization will:

- Enable a Universal Fee mechanism that will reduce duplicative background checks and fees for transportation workers,
- Provide capability to process new populations using existing enrollment and vetting infrastructure, and
- Ensure privacy and security as TSA continues to work towards further reducing the threat to national security or transportation security (a TTAC program performance goal) by individuals engaged in various aspects of the U.S. transportation system.

Since TSA cannot predict specific terrorist activity, the name-based threat assessment methodologies employed by the programs within TSA are a very important tool in the fight against terrorism that could quickly be leveraged to further protect the Nation's transportation system.

B. Budget Activities:

Secure Flight

This program moves airline passenger watch list matching, currently conducted by the airline industry, into one program managed and operated by the Federal government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of the airport, the Secure Flight program will use an automated process to match Secure Flight Passenger Data (SFPD) against records contained in the No Fly and Selectee portions of the Terrorist Screening Database (TSDB). Initially, the Secure Flight program will concentrate on airline passengers traveling on domestic flights within the U.S. and its territories. U.S. Customs and Border Protection (CBP) currently conducts watch list matching for passengers flying into and out of the U.S. through its Advance Passenger Information System (APIS). Per the Secure Flight Final Rule (effective December 29, 2008), both programs will work towards a transition plan for international flights to the Secure Flight program to ensure that domestic and international watch list matching is consistent and uniformly effective. Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. Secure Flight will gradually phase-in additional flights until all domestic and international flights (into or out of the U.S.) process passenger data against the TSDB. When fully implemented, Secure Flight will screen more than 2.5 million passengers daily.

Transportation Worker Identification Credential (TWIC)

TWIC establishes an integrated, credential-based, identity verification program through the use of biometric technology. In order to gain unescorted access to the secure areas within the Nation's transportation system, transportation workers who need access to these areas will be required to undergo a satisfactory security background check before they will be issued a TWIC card. The TWIC card is intended to work as an integrated part of any existing or newly-developed access control system deployed by the transportation sectors. TSA conducted a prototype of the TWIC program at 28 sites primarily focused in three geographic areas (Los Angeles and Long Beach, California; Wilmington, Delaware; Philadelphia, Pennsylvania; and Florida). The Prototype Phase concluded in June 2005, with sustained Prototype operations for a limited number of sites through March 2006. TSA and United States Coast Guard (USCG) have considered the lessons learned during Prototype in developing the TWIC process model and in writing the Notice of Proposed Rulemaking (NPRM) and Final Rule, which was issued on January 25, 2007. The TWIC enrollment process began October, 2007 and within 18 months, TSA enrolled more than 1.1 million workers including longshoremen, truckers, and port employees who require access into secure areas of U. S. Ports. On April 15, 2009, USCG began enforcing the TWIC requirement for workers who need unescorted access to secure areas of U.S. ports. Operational costs of the program are entirely funded from fee revenue.

Registered Traveler (RT)

On July 30, 2008, TSA announced in the Federal Register the conclusion of the last RT pilot program and the termination of the security threat assessment (STA) requirement and its associated fee. TSA will continue to work with private sector partners to ensure that the RT program will remain as an enhanced identity verification program that will allow passengers an expedited process through the lines of the passenger screening checkpoints at participating airports. As the costs and fee revenue associated with the STA will conclude in FY 2009, this PPA will no longer be necessary for FY 2010.

Hazardous Materials Endorsement Threat Assessment Program (HTAP)

The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment on anyone applying to obtain, renew, or transfer a hazardous materials endorsement (HME) on their state-issued commercial drivers license (CDL). The TSA security threat assessment includes a fingerprint-based criminal history records check (CHRC), a legal status check and a check against terrorist databases. The program also fulfills statutory requirements under the Safe Explosives Act. Operational since January 31, 2005, the program is entirely funded by fee revenue.

Alien Flight Student Program (AFSP)

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), the AFSP reviews and assesses biographic and biometric information of non-U.S. citizens or any other individual (specified by the Secretary of Homeland Security) applying for training in the operation of any aircraft (having a maximum certificated takeoff weight of more than 12,500 pounds) at FAA certified flight schools located both inside and outside the United States. These persons are subject to a security threat assessment based on background and terrorist-based checks. Since its transfer to TSA from the Federal Bureau of Investigation in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500. This action was taken to mitigate a critical security weakness in the legislation. On April 13, 2009, a notice in the Federal Register was published, allowing TSA the authority to charge recurrent flight school students for security threat assessments conducted by the agency.

Other Vetting/Screening Administration and Operations

This activity incorporates personnel and operational cost of vetting operations that are not a part of any of the programs described above, as well as TTAC administrative costs, such as the vetting infrastructure and other related information technology costs. These initiatives include:

- Crew Vetting Program
- Secure Identification Display Area (SIDA) checks
- Temporary Flight Restrictions Program
- Twelve-five and charter pilots checks
- DCA Access Standard Security Program

- Maryland-3 small airports checks
- Domestic and International Flight Waivers
- FAA certificate holder vetting

C. Budget Request Summary:

For FY 2010, the Transportation Security Administration requests, 250 FTE, \$191.9 million in appropriated funding and \$28 million in fee collection authority for these programs. The program increases include 22 positions, 11 FTE and \$70.6 million to:

- Annualize funding (non-pay) provided in FY 2008 to implement the 9/11 Act to continue development of a web-based enrollment system and integrate the security threat assessment process (0 FTP, 0 FTE and \$6,600,000);
- Enhance the vetting infrastructure to more effectively and efficiently perform vetting operations on vulnerable areas of the transportation system (22 FTP, 11 FTE, and \$64,000,000).

III. Current Services Program Description by PPA

Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing
Program Performance Justification

(Dollars in thousands)

PPA: SECURE FLIGHT

	Perm Pos	FTE	Amount
2008 Actual	65	51	\$71,488
2009 Enacted¹	113	86	82,211
2010 Adjustments-to-Base ¹	0	22	2,152
2010 Current Services	113	108	84,363
2010 Program Change	0	0	0
2010 Request	113	108	84,363
Total Change 2009-2010	0	22	2,152

¹Reflects a transition from contract resources to positions that perform inherently governmental functions

The Transportation Security Administration requests \$84.4 million for the Secure Flight program. The FTE increase reflects both the conversion of FY 2009 contractor resources as well as the additional FY 2009 FTP annualized in FY 2010. Pay cost of living adjustment is also included in the funding increase.

CURRENT SERVICES PROGRAM DESCRIPTION:

Secure Flight's mission is to enhance the security of domestic and international commercial air travel in the United States through the use of improved watch list matching. The program's goals are to:

- Identify known and suspected terrorists;
- Prevent individuals on the No Fly List from boarding an aircraft;
- Provide enhanced screening of individuals on the Selectee List to determine if they are permitted to board an aircraft;
- Facilitate passenger air travel; and
- Protect individuals' privacy.

Transitioning watch list matching to TSA will raise the baseline standard of the technology and automation used in the watch list matching process. Secure Flight will streamline the process and make watch list matching more consistent through the consolidation of this responsibility. This will also limit the distribution of the watch list, thereby minimizing the possibility for compromised watch list data. By bringing the watch list matching function into the Federal government, the DHS Traveler Redress Inquiry Program (TRIP) will be able to provide a more

consistent application of an integrated redress process for passengers who believe they have been misidentified as a threat. Further, the Secure Flight program will expedite law enforcement notification by reducing the time it takes to identify potential matches – from days to minutes. TSA is committed to engaging the individuals and organizations that will be affected by the Secure Flight program. TSA has adopted a strong security partner engagement approach that includes interactively communicating with key stakeholders, working closely with airlines through the deployment process, and providing materials for public awareness and education.

To date, Secure Flight has achieved the following accomplishments:

- The Secretary of Homeland Security certified on September 24, 2008 that the TSA Secure Flight Program had completed the 10 requirements set forth in Section 522(a) of the *DHS Appropriations Act, 2005* (Public Law 108-334). The Government Accountability Office (GAO) audited the Secure Flight program and briefed majority and minority staff of the House Senate Appropriations Subcommittees on Homeland Security, affirming that TSA has satisfied the critical issues and other conditions in order to begin initial operations.
- The Secure Flight Final Rule was published on October 28, 2008 and became effective on December 29, 2008.
- The proposed Secure Flight changes to the Aircraft Operator Standard Security Program and the Model Security Program were posted on November 7, 2008.
- Parallel testing with three aircraft operators was completed in December 2008 and the system was ready for initial operational capability on January 15, 2009.
- Secure flight received system accreditation and Authority to Operate (ATO) on January 7, 2009.
- The Secure Flight program received governance review board approvals at both TSA and DHS for initial operating capability (IOC). Commonly known as milestone decision point (MDP) 3, these approvals through business investment and enterprise architecture reviews gave the program the required approvals to begin initial production operations with aircraft operators.
- Secure Flight began a phased-in implementation with volunteer, domestic airlines on January 27, 2009 and will continue with a domestic implementation phase to begin in May 2009, followed by an international implementation phase.

Full implementation, including foreign air carriers, is slated to be complete in FY 2010. The most significant factor that poses a challenge to the program in meeting scheduled completion dates is the ability of aircraft operators to complete the required technical and operational changes. Presently, TSA remains on track to meet key Secure Flight milestones and remains committed to the implementation schedule.

PPA: OTHER VETTING PROGRAMS

2010 Request	113	98	107,636
Total Change 2009-2010	36	33	73,829

In FY 2009, TSA was given the authority to merge the Crew Vetting program into the Screening Administration and Operations. The Transportation Security Administration requests \$107.6 million to provide funding for Screening Administration and Operations. The request includes: (1) a program enhancement of 22 positions, 11 FTE and \$64.0 million to enhance the vetting infrastructure to more effectively and efficiently perform vetting operations; (2) an annualization of \$6.6 million in 9/11 funded activities; and (3) pay cost of living adjustments.

CURRENT SERVICES PROGRAM DESCRIPTION:

At the FY 2009 current services level, this PPA will provide funding for the administrative and operational needs of the following activities:

Crew Vetting Program: This program vets domestic and international airline crews entering, departing, or over-flying U.S. airspace against terrorist-related information to determine if they are a potential threat to the aviation system. The Crew Vetting program compares airline crew

lists against the FBI's Violent Gang, Terrorist Organization Files (VGTOF), TSA's No-Fly List and Selectee lists, and numerous other watch lists (including U.S. Marshal's Warrant Information Network data and Department of State's lost/stolen passport lists) to assess potential threats of terrorists posing as cleared aviation personnel. The program reviews approximately 2 million crewmembers annually.

Secure Identification Display Area (SIDA) checks: Pursuant to the Aviation and Transportation Security Act (ATSA), TSA vets SIDA employees and other aviation workers who have access to the secure areas of the Nation's airports. Security Threat Assessments (STAs) as well as a Criminal History Records checks are conducted for this population. The program reviews approximately 500,000 aviation workers annually.

15 Full-Time Equivalents associated with aviation vetting operations TTAC conducts vetting on multiple aviation programs including (Temporary Flight Restriction Program, DCA Access Standard Security Program, Twelve-Five and Private Charter Program, and the Maryland-3 Airports).

Temporary Flight Restriction Program checks: Pilots, crew members, and passengers on aircraft applying to fly within restricted airspace of the National Capital Regional Area or flying over major National events (Major League baseball stadiums, the Super Bowl, political conventions, etc.) must apply for waivers through the TSA Security Operations, Special Events Unit (49 USC 114). The names are received and a name-based check is conducted against various watch lists and against the National Crime Information Center database. The program reviews approximately 3,000 individuals annually.

DCA Access Standard Security Program (DASSP) checks: This program addresses the special aviation security needs of the National Capital Region. All pilots, Armed Security Officers (ASOs) crew security coordinators, and passengers flying into or out of Ronald Reagan National Airport (DCA) are required to undergo a background check. TSA reviews the results of both the name-based and fingerprint-based STAs and conducts adjudication as necessary. The program reviews approximately 3,000 individuals annually.

Twelve-Five and Private Charter Programs: The 12/5 and Private Charter Programs authorities stem from the final rules for Security Programs for Aircraft Weighing 12,500 pounds or more (49 CFR 1540 and 49 CFR 1544) which were adopted on June 24, 2002. Under these programs, pilots flying aircraft 12,500 pounds or greater must undergo a Criminal History Records Check (CHRC). The TSA reviews the results of these CHRCs and adjudicates them based on program criteria associated with the 28 Disqualifying Criminal Offenses and a review of the No Fly and Selectee lists. The program reviews approximately 5,000 pilots annually.

Maryland -3 Airports Program: Due to the proximity of three small Maryland airports to Washington, D.C., Federal Restricted Flight Zones, pilots and passengers must apply for permission to fly in and out of these airports (Aviation Transportation Security Act – P.L. 107-71). A fingerprint-based criminal history records check and checks against watch lists are conducted. TSA works directly with the pilot and/or their employer to address any issues related to the findings. The program reviews approximately 400 pilots annually.

Airspace Waivers: STAs consisting of name-based reviews are conducted on pilots and passengers of international inbound general aviation flights. TSA reviews the results of the name-based STAs and conducts adjudication as needed. The program is currently in pilot phase and reviews approximately 200,000 pilots annually.

Domestic and International Flight Waivers: Pilots, crewmembers, and passengers on aircraft (1) applying to fly within the restricted air space of the National Capital regional Area, fly over stadiums during nationwide sporting or other events (i.e., Major League Baseball, National Football League, political conventions) and (2) flying into the U.S. from foreign locations, overflights of U.S. airspace, and Ferry Flights to/from/within the U.S. must apply for waivers. A name-based STA is conducted and the results are reviewed and adjudicated, as necessary. Approximately 30,000 applicants are reviewed annually.

FAA Certificate Holder Program: A name-based STA will be performed on individuals who hold an airmen certificate and have access to air transportation infrastructure. The program is currently in the planning phase. This program contains the largest single population to be vetted to date by TSA. The FAA airmen registry population consists of approximately 3.9 million with 60,000 new domestic and foreign applicants annually.

The program accomplishments include:

- Definition and implementation of a refined end-to-end process for handling terrorism hits within TTAC screening programs across its TSA/DHS stakeholders; and
- Continuous vetting of over 8,000,000 distinct individuals in several critical sectors of credentialed or benefit-holding transportation sectors.
- More than 13,800,000 individuals on flight crew manifest submissions were vetted.
- Greater than 625,000 cases were manually adjudicated.
- Continued progress on Vetting Infrastructure Modernization to provide a repeatable, scalable solution to support current and future vetting requirements.
 - Continuing formal programmatic review, including the program documentation (e.g., Mission Needs Statement, Acquisition Plan and key milestone decision points),
 - Compiled business and technical requirements documentation, and
 - Completed an alternatives analysis of existing and potential capabilities, user interfaces and re-usability of existing technology infrastructure.

PPA: TRANSPORTATION WORKER IDENTIFICATION CREDENTIAL (TWIC) – Fee Authority and Appropriated Funding

TWIC (fee authority)

	Perm Pos	FTE	Amount
2008 Actual	15	11	\$25,411
2009 Enacted	15	15	31,700

2010 Request	21	21	9,000
Total Change 2009-2010	6	6	(22,700)

¹Reflects a decrease in fees collected after initial surge, and a transition from contracting resources to 6 positions that perform inherently governmental functions.

The Transportation Security Administration estimates fee collections of \$9.0 million for the Transportation Worker Identification Credential (TWIC) Program.

TWIC (appropriated)

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$1,419
2009 Enacted	0	0	0
2010 Adjustments-to-Base	0	0	0
2010 Current Services	0	0	0
2010 Program Change	0	0	0
2010 Request	0	0	0
Total Change 2009-2010	0	0	0

In FY 2008, TWIC received a two-year appropriation of \$8.1 million for a card reader pilot project. Unobligated funding was carried-over into FY 2009.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA), (P.L. 107-295). When fully implemented, the program will ensure that the identity of each TWIC holder has been verified; that a satisfactory security background check has been completed on that identity; and that each credential issued is positively linked to the rightful holder through the use of biometric technology.

The TWIC Program is being implemented in the maritime environment in accordance with the spirit and requirements of the Aviation and Transportation Security Act of 2001 (P.L. 107-71), and MTSA. The program will provide a common, consistent biometric credential at over 3,200 facilities and on over 10,000 vessels.

TWIC's personal identity verification standards and credential issuance closely adhere to those of Homeland Security Presidential Directive 12 (HSPD-12), and its implementing standard, Federal Information Processing Standard (FIPS) 201. The TWIC program is on the leading edge of newly released biometric standards and was first to adopt those common biometric standards in the Federal Government. Adhering to these standards will insure interoperability among physical access control systems that may incorporate different vendor products and technologies. TWIC specifically follows biometric standards of the American National Standards Institute (ANSI) for its pattern-based fingerprint format operational biometric.

The program continues to work with the National Institute of Standards and Technology (NIST) to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. Most recently, the program worked with a federal advisory committee, the Coast Guard's National Maritime Security Advisory Committee (NMSAC), to establish recommendations for contact-less biometric and credential readers that would enhance throughput and provide better durability. The NMSAC technology recommendations were published in the Federal Register and public comment was solicited. At the conclusion of the TWIC reader pilot, the program finalized the reader specifications, published a notice of availability in the Federal Register and posted the specification on the TSA website.

With \$8.1 million in appropriated funding provided by Congress in FY 2008, TSA will implement an access control technology pilot to test contact-less biometric technologies within the TWIC program. TWIC has developed a Test and Evaluation Master Plan which provides the overall test plan and operational concepts for this pilot. Of the \$8.1M appropriation, \$2.0 million is supporting the program administrative efforts for the pilot. This work will include: development of bench test protocols and test cards to evaluate readers for their capability to read TWICs; conducting functional and environmental reader testing; and, the implementation of the Integrated Test Agent (ITA) which will plan, conduct, and report on the pilot test. The remaining \$6.1 million will provide funding for work and test equipment at test participant facilities and vessels. This work will include: test equipment and software; the development of site-specific test plans and on-site data collection and coordination by the ITA; and travel necessary to support sites.

A Final Rule was issued on January 25, 2007 and addressed over 1,900 comments from the public. The final rule includes important changes from the prototype, such as the ability to provide a discount for Free and Secure Trade (FAST) card holders, documented merchant mariners, and truckers with Hazardous Material Endorsements. The TWIC blueprint was updated to align the system with the final rule. These key changes to the program had to be tested to ensure the TWIC technology systems met program requirements and could support nationwide deployment. The program began TWIC cardholder enrollment in the fall of 2007.

After establishing the first enrollment site in Wilmington, Delaware in the fall of 2007, TSA has used a phased-in approach, at each Captain of the Port (COTP) zone, to roll out the program across the nation. Over 150 fixed enrollment centers were established to complete initial enrollments of all maritime workers in 18 months. As of April 15, 2009, the United States Coast Guard (USCG) began enforcing nationwide the requirement to have a TWIC for all mariners and individuals requiring unescorted access to secure areas of facilities, vessels, and Outer Continental Shelf (OCS) facilities. However, the USCG is allowing workers, who have been approved for a TWIC and are waiting to obtain their card, to continue to work unescorted until May 14th at select ports.

TSA has enrolled (including pre-enrollments) approximately 1.1 million workers as of the April 15, 2009 compliance date. After completing the initial enrollment of all maritime workers, the program will move into a sustainment mode, and continue to support enrollment centers nationwide for new maritime workers, workers requiring a replacement card, and workers renewing their TWIC.

TSA and USCG work closely with the industry to expedite the enrollment process. They are working with maritime stakeholders, at the national and local levels, to provide program updates and promote awareness and support for the program. The TWIC deployment contractor has an extensive outreach effort which includes in-person meetings with local port stakeholders and targeted communications materials distributed at each port (well in advance of deployment). Additionally, the program has the TWIC Stakeholder Communications Committee, comprised of maritime stakeholders spanning unions, associations, and government. This group continues to provide invaluable feedback and recommendations that TSA and USCG act upon accordingly.

The TWIC Program has established applicant fees to sufficiently recover the cost of providing this security service. The standard TWIC Fee is \$132.50 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that have previously completed a comparable security threat assessment. The card replacement fee is \$60.00. The credential is valid for five years and revenue generated from these security fees will only be used to support the TWIC program.

PPA: Registered Traveler (RT) Program (fee authority)

	Perm Pos	FTE	Amount
2008 Actual	13	8	\$3,155
2009 Enacted	12	12	0
2010 Adjustments-to-Base	(12)	(12)	0
2010 Current Services	0	0	0
2010 Program Change	0	0	0
2010 Request	0	0	0
Total Change 2009-2010	(12)	(12)	0

On July 30, 2008, TSA announced in the Federal Register the conclusion of the last RT pilot program and the termination of the Security Threat Assessment (STA) requirement and its associated fee. TSA will continue to work with private sector partners to ensure that the RT program will remain as an enhanced identity verification program that will allow passengers an expedited process through the lines of the passenger screening checkpoints at participating airports. As the costs and fee revenue associated with the STA will conclude in FY 2009, this PPA will no longer be necessary for FY 2010.

PPA: HAZARDOUS MATERIALS CDL ENDORSEMENT PROGRAM (fee authority)

	Perm Pos	FTE	Amount
2008 Actual	17	15	\$11,664
2009 Enacted	17	17	15,000
2010 Adjustments-to-Base	0	0	0

2010 Program Change	0	0	0
2010 Request	17	17	15,000
Total Change 2009-2010	0	0	0

The Transportation Security Administration estimates fee collection of \$15.0 million in the Hazardous Material Commercial Driver's License (CDL) Endorsement Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TSA HME Threat Assessment Program (HTAP) is an important and key component of the DHS/TSA layered approach to transportation security. The program was established to fulfill the statutory requirements of both the USA PATRIOT and Safe Explosives Acts to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

As directed by Congress, TSA established fees to fund the HTAP threat assessment. The fee is comprised of three elements: 1) the cost for collecting and processing fingerprint and application information; 2) the fee the FBI charges to run the fingerprints against the criminal history records; and 3) a TSA program fee to cover costs to administer the program, including conducting the security threat assessments. Payment of the Federal fee is a requirement to undergo the TSA Security Threat Assessment.

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the security threat assessment process. TSA allowed States to elect to perform the biographic and biometric collection, or utilize a TSA-contracted agent to perform these functions on their behalf. Currently, 13 states collect the required biographic information and biometric data through their individually established and maintained programs and 37 states and the District of Columbia have elected to utilize the TSA-contracted agent. Additionally, drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has processed over 1,200,000 applications, and currently processes over 95 percent of applications in five days or less. The HTAP has a robust redress process, including appeals, waivers and Administrative Law Judge review. In FY 2009, the program is expected to conduct threat assessments on approximately 330,000 applicants, a continued increase from the program's inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. The request provides full funding from fee revenue to cover TSA's operational costs for this program.

TSA charges \$38 for the collection of information, \$17.25 for the FBI fingerprint-based CHRC, and \$34 for the TSA program fee for a total fee of \$89.25. The \$34 TSA program fee is charged to every applicant regardless of the state of issuance. Non-TSA Agent States charge various collection, processing and fingerprinting fees; the average total fee in non-TSA Agent States is approximately \$89.

PPA: ALIEN FLIGHT STUDENT PROGRAM (mandatory fee authority)

	Perm Pos	FTE	Amount
2008 Actual	6	6	\$3,891
2009 Enacted	6	6	4,000
2010 Adjustments-to-Base	0	0	0
2010 Current Services	6	6	4,000
2010 Program Change	0	0	0
2010 Request	6	6	4,000
Total Change 2009-2010	0	0	0

The Transportation Security Administration estimates \$4.0 million in fee collection authority for the Alien Flight Student Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Alien Flight Student Program (AFSP) conducts terrorist, immigration, and criminal-background checks on all alien flight students applying for all flight training in the U.S. or abroad at FAA certified flight training locations. Applicants include pilots/student pilots training on aircraft that are subject to a security threat assessment in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). Pilots identified as a “threat to aviation or national security” under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who pose a security threat. Prior to September 11th attacks, there were no systematic security checks performed on alien pilots who receive flight training at flight schools located either inside or outside the United States.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function of screening alien flight students who are applying for flight training at flight schools from the Attorney General to the Secretary of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the authority to establish a fee to offset costs of vetting aliens who apply for flight training. However, the language specifically excluding recurrent training from a security threat assessment was amended to include STAs on recurrent training candidates. As a result, a notice in the Federal Register was published on April 13, 2009, stating TSA will charge a fee to recurrent trainees beginning May 13, 2009.

AFSP processed 29,954 basic and 23,156 recurrent flight training applications, for a total of 53,110 applications in FY 2008. This is an increase of 6,985 total applications from FY 2007, or an increase of 15 percent. AFSP plans an approximate 4 percent increase in applications for FY 2009 and FY 2010, or approximately 55,250 applications in FY 2009 and 57,400 in FY 2010.

The program also began migrating 10-print fingerprints data to a common DHS platform, which will allow for the leveraging of program data to other DHS components. This effort is of particular interest to Immigration and Customs Enforcement’s Student and Exchange Visitor Information System and will enhance both programs’ capability to more closely monitor attendance and status of students in training.

AFSP currently collects a fee of \$130 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$17.25 for an FBI criminal history records check. AFSP will also collect a fee of \$70 per recurrent applicant beginning May 13, 2009. The fee includes extensive TSA international and domestic threat assessments and application processing.

IV. Program Justification of Changes

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment and Credentialing (TTAC)
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: 9/11 Annualization

Strategic Goal(s) & Objective(s):

1. Continue to Protect our Nation from Dangerous People
3.1 Protect and Strengthen the resilience of the Nation’s critical infrastructure and key resources; Enhance preparedness protection, screening and risk mitigation

PPA: Other Vetting

Program Increase: Positions 0 FTE 0 Dollars \$6,600

Funding Profile:

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							14	13	\$1,695
Program Increase – TTAC									
Other Vetting							-	-	\$6,600
Budget Request							14	13	\$8,295

Description of Item

- **TTAC:**
 - Other Vetting:
 - Funding to support TSA’s Other Vetting Program to continue the development of a means to accept web-based enrollments and to fully integrate this interface into the Security Threat Assessment (STA) process. Further this request provides funding to continue development of system requirements and specifications for biometric enrollment and credential standard for use in the Aviation Sector.

Justification

Transportation Threat Assessment & Credentialing (TTAC):

As a key layer in the counter-terrorism mission, TSA requests annualization of the 9/11 Act funding to maintain TTAC’s work to modernize the vetting infrastructure, including web-based enrollments, and allow TSA to effectively perform as the Department-wide provider of security threat assessment services. These funds will be used to support 13 full-time employees (14 full-

time positions) which sustain security threat assessment operations as well as the necessary hardware maintenance contracts and software licenses for the modernized system. Further, this request provides funding to continue development of system requirements and specifications for biometric enrollment and credential standard for use in the Aviation Sector.

The requested 9/11 annualization of \$6.6 million will meet mission critical objectives.

Program Increase 2: Vetting Infrastructure

Strategic Goal(s) & Objective(s):

Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthen Screening of Travelers and Workers

PPA: Other Vetting

Program Increase: Positions 22 FTE 11 Dollars \$64,000

Funding Profile:

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							20	19	\$13,902
Program Increase							22	11	\$64,000
Budget Request	29	14	\$8,500	77	65	\$50,807	42	30	\$77,902

Description of Item

TSA requests an increase of 22 positions, 11 FTE and \$64.0 million to continue implementation of the vetting operations infrastructure enhancement and stabilization project.

Justification

As a key layer in the terrorist prevention mission TSA provides Security Threat Assessments (STAs) of individual applicants for credential, license or access privilege to the Nation’s Transportation and other critical infrastructure. The assessment vetting includes the comparison of applicant biographic and biometric information against terrorism, criminal, and immigration watch lists and the subsequent referral and follow-up on individual matches. TSA conducts, on average, over 300 terrorism-related investigations each year. These investigations are triggered by a Vetting Match Report (VMR), a report generated when other vetting confirms a person's data matches any of the terrorism-related, government derogatory data-sets. The investigation results in a determination of whether a person poses a threat to national or transportation security.

Historically, TSA’s vetting programs have been developed as a result of statutory requirements or to rapidly respond to threat streams, leading to multiple implementations of the same or similar architectures and business processes. The modernization program will provide a more unified, modular, and maintainable architecture that will reduce the cost, risk, and time associated with implementing new capabilities, vetting new populations when necessary, improving the robust nature of the architecture, and on-going Operations and Maintenance.

The Vetting Infrastructure Modernization Program is designed to develop a person-centric view across all modal programs in accordance with the DHS Credentialing Framework Initiative (CFI), and is critical to accomplishing key strategic goals that better secure the nation’s transportation infrastructure. Modernization will enable a universal fee mechanism that will

reduce duplicative background checks and fees for transportation workers, provide capability to process new populations using existing enrollment and vetting infrastructure, and ensure privacy and security. This will be accomplished by consolidating enrollments, identity management services, customer relationship management, credentialing processes, vetting and adjudication and integrating program specific IT systems and business processes.

In late FY 2008, TSA initiated its vetting modernization effort to support more effective and efficient vetting. The goal of the modernization initiative is to eliminate existing vulnerabilities due to uncoordinated business processes, disconnected and duplicative systems, high system complexity, ad hoc and manual review and adjudication processes, and looking at one application and one individual at a time.

The effort is separated by key business functions into three phases:

1. Enterprise Enrollment,
2. Security Threat Assessment Knowledge Environment (STAKE), and
3. Universal Vetting.

TSA is finalizing a comprehensive set of business and technical requirements that span all three phases. These requirements will serve as the basis for directed enterprise architecture analysis, strategic procurement planning, market research/alternatives analysis, and more detailed cost estimations.

In FY 2009, the modernization program is engaged in programmatic review, including the program documentation (e.g., mission needs statement, acquisition plan and key milestone decision points), compiled business and technical requirements documentation, and completed an alternatives analysis of existing and potential capabilities, user interfaces and re-usability of existing technology infrastructure. Additionally, TSA expects to have completed connectivity with U.S. Visit IDENT to enable 1-n biographic matching capability.

In FY 2010, the program will stabilize infrastructure in support of continuity of operations and disaster recovery planning. These initiatives will support three pilots for enrollment, case processing and vetting, which will provide detailed data on user interface friendliness, level of customer investment, credentialing management service risks, work load and case load risks, accuracy, capacity, ability to ingest new populations and system robustness and risks. The primary system design and development will focus on system architecture and high availability, maintainability and upgradeability, and universal enrollment capability.

Specifically, in FY 2010, the Infrastructure Modernization efforts will be:

- Finalizing detailed Design Specifications
- Development of System Architecture
- Integration of Proof of Principle Pilot Capabilities
- Build-out of Full STA, Universal Vetting, and Access Capabilities
- Full System Capability Test / Evaluation with at least one new population

Universal Vetting is the core of the threat assessment infrastructure and is critical to the vetting process. This phase will enhance the current threat assessment process and allow for data to be

better analyzed as well as increase the ability to share information. The ability to share information is key since vetting operations interacts with numerous other systems such as: Treasury Enforcement Communication System (TECS), Systematic Alien Verification for Entitlements (SAVE), Automated Biometric Fingerprint Identification System (IDENT), and the FBI' Criminal Justice Information System (CJIS). It will also complete the migration of the threat assessment process from a sector specific credential/privilege view to a person-centric threat assessment management system.

The requested enhancement of 22 positions, 11 FTE, and \$64.0 million will meet mission critical objectives and stabilize the threat assessment capability.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA's goal with Other Vetting is to strengthen screening of travelers and workers in order to achieve a reduction in the risk of potential terrorists, instruments of terrorism, or other unlawful activities from threatening our transportation systems. Specifically, this initiative increases the screening of individuals accessing the Nation's transportation systems by modernizing the final, key piece of the critical threat assessment infrastructure - Vetting Operations. This stabilization and enhancement to the TSA infrastructure will enable cross-population analysis and provide fee alignment for individuals with multiple credentials. The ability to use the same infrastructure for all programs, rather than distinct, individual solutions, is expected to provide significant cost savings over the life of the system.

Additional performance impacts include developing:

- A person-centric threat assessment management system and processes, with a common approach for information collection, vetting, verification and use, based on assessment of the risks presented;
- The technical, interoperable capability to share a person-centric and aggregate needs-specific view, crossing all encounters across the Department and with other Federal Agencies, State, Local, and Tribal Governments, and private commercial entities engaged in screening and critical infrastructure protection activities; and
- Integrated Data Integrity and Information Assurance.

Performance Measure Name: "Ratio of False Positives to Total Names Processed"

This performance measure that TSA currently tracks is associated with the reliability of the TSA vetting infrastructure. This measure assesses how well the program is restricting access to people who do (or do not) present a threat to the nation's transportation system.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in
Transportation Threat Assessment and Credentialing
Appropriation Language**

For necessary expenses for the development and implementation of screening programs of the Office of Transportation Threat Assessment and Credentialing, [\$116,018,000] **\$191,999,000** available until September 30, [2010: *Provided*, That if the Assistant Secretary of Homeland Security (Transportation Security Administration) determines that the Secure Flight program does not need to check airline passenger names against the full terrorist watch list, the Assistant Secretary shall certify to the Committees on Appropriations of the Senate and the House of Representatives that no significant security risks are raised by screening airline passenger names only against a subset of the full terrorist watch list.] 2011. (Department of Homeland Security Appropriations Act, 2009.)

Explanation of Changes:

No substantive changes proposed.

Full Time Equivalents		51	86	108	22

^{1/} Reflects a transition from contract resources to 12 positions that perform inherently governmental functions.

PPA Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Salaries and Benefits	\$7,459	\$16,203	\$18,355	\$2,152

The increase provides for the annualization of the 2009 pay increase, the projected 2% FY 2010 pay increase, the additional 11 FTE, and the conversion of contract resources to inherently governmental positions.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Travel	\$60	\$91	\$93	\$2

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes an increase of \$2,000 for increased travel related to the roll out of the Secure Flight platform.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Transportation of Things	\$1	\$1	\$1	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other rent	\$6,057	\$7,736	\$7,890	\$154

Rent includes all payments to a GSA managed source for rental space, land, and structures. The FY 2010 request includes an increase of \$154,000 for increased rent related to the full rollout of the Secure Flight platform.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$16,970	\$18,571	\$18,413	(\$158)

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2010 request includes a decrease of \$158,000 for the conversion of contract resources into positions that perform inherently governmental functions.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other Services	\$17,086	\$11,874	\$11,292	(\$582)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Secure Flight program will be implemented and operated in regard to connectivity with air carriers and the processing of security checks. The FY 2010 request includes a decrease of \$582,000 or the conversion of contract resources into positions that perform inherently governmental functions..

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$5,066	\$2,312	\$2,358	\$46

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program. The FY 2010 increase of \$46,000 is a result of the roll out of the Secure Flight platform.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$3,522	\$5,931	\$6,080	\$149

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program. The FY 2010 request includes an increase of \$149,000 for increased O&M related to the roll out of the Secure Flight platform.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$131	\$216	\$220	\$4

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes an increase of \$4,000 for increased supplies and materials related to the roll out of the Secure Flight platform.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Equipment	\$13,742	\$19,276	\$19,661	\$385

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2010 request includes an increase of \$385,000 for planned hardware, software and equipment purchases for the roll out of the Secure Flight platform.

The FY 2009 Budget Request Change is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

PPA Mission Statement

The mission of the Crew Vetting Program is to mitigate risk by vetting airline crews entering, departing, or overflying U.S. airspace using computerized vetting and matching analysis that will assess potential threats of terrorists posing as cleared aviation or other transportation system personnel.

The FY 2009 Enacted & FY 2010 Request include the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations (SAO) Program, and does not include RAs for \$2M.

PPA Mission Statement

The mission of the Screening Administration and Operations is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Salaries and Benefits	\$1,940	\$8,369	\$12,998	\$4,629

The increase provides for the annualization of the 2009 pay increase, the projected 2% 2010 pay increase, and the additional 33 FTE.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Travel	\$132	\$119	\$230	\$111

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 increase of \$111,000 includes inflation and reflects increased travel needs for the Other Vetting/SAO Program.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Transportation of Things	\$8	\$42	\$81	\$39

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2010 increase of \$39,000 includes inflation and reflects an increase in transportation needs for the Other Vetting/SAO Program.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$24	\$45	\$21

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the vetting systems. The FY 2010 increase of \$21,000 includes inflation and reflects an increase for the Other Vetting/SAO Program.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$812	\$4,465	\$10,076	\$5,611

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations. The FY 2010 increase of \$5.611 million includes inflation and reflects an increase for the Other Vetting/SAO Program.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other Services	\$7,615	\$19,265	\$80,871	\$61,606

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the Alien Flight Student program. These contracts will also support SIDA, 12/5 Charter Pilots, MD-3 Airports and the Temporary Flight Restriction programs. The FY 2010 increase of \$61.606 million includes inflation and funding for contract support for IT planning, acquisition, and rollout and includes funding for contract support for vetting, inflation, service increases.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$68	\$291	\$560	\$269

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 increase of \$269,000 includes inflation and reflects an increase for the Other Vetting/SAO Program.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Equipment	\$219	\$1,232	\$2,775	\$1,543

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 increase of \$1.543 million includes inflation and reflects an increase for the Other Vetting/SAO Program.

PPA Mission Statement

The mission of the TWIC Program is to establish an integrated, credential-based, identity verification program through the use of biometric technology to grant workers unescorted access to secure areas within the nation's transportation system.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Salaries and Benefits	\$1,621	\$2,011	\$2,815	\$804

The increase provides for increased personnel costs and the conversion of contract resources to inherently governmental positions.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Travel	\$101	\$110	\$26	(\$84)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with maritime port operators and other TWIC program stakeholders. The decrease is a result of the completion of the initial surge in FY 2009, lower fee collections.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Transportation of Things	\$88	\$98	\$23	(\$75)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The decrease is a result of the completion of the initial surge in FY 2009, lower fee collections.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Advisory and Assistance Services	\$66	\$85	\$20	(\$65)

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the TWIC program. The decrease is a result of the completion of the initial surge in FY 2009, lower fee collections.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Other Services	\$20,165	\$25,003	\$5,082	(\$19,921)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will include the adjudication of cases where individuals are denied a TWIC card. The decrease is because after the initial enrollment surge, contractor staffing levels will be greatly decreased and Government personnel will complete the majority of vetting and adjudication services.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Purchase from Government Accounts	\$526	\$680	\$160	(\$520)

Includes contracts with federal agencies for background check services including the FBI for fingerprint based checks and/or name based checks for these vetting programs. The decrease is a result of the completion of the initial surge in FY 2009, lower fee collections.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Operation & Maintenance of equipment	\$284	\$387	\$91	(\$296)

Supports the operation and maintenance of information technology systems used for the TWIC program. The decrease is a result of the completion of the initial surge in FY 2009, lower fee collections.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Supplies & materials	\$7	\$13	\$3	(\$10)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The decrease is a result of the completion of the initial surge in FY 2009, and lower fee collections.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Equipment	\$2,553	\$3,313	\$780	(\$2,533)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the TWIC program outside of contracts for implementation and sustainment of the program. The decrease is a result of the completion of the initial surge in FY 2009, lower fee collections.

Total, HazMat CDL		11,664	15,000	15,000	0
Full Time Equivalents		15	17	17	0

PPA Mission Statement

The mission of the HazMat Program is to support public safety by ensuring that all commercial drivers transporting hazardous materials are thoroughly checked against terrorist and criminal databases and receive the appropriate endorsement from DHS.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$1,994	\$2,145	\$2,145	\$0

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Travel	\$27	\$51	\$64	\$13

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with state and local stakeholders in the HazMat CDL program.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$773	\$605	\$646	\$41

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the efficiency and effectiveness of the HazMat CDL program. The increase of \$41,000 is a result of increased advisory and assistance costs.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Other Services	\$6,607	\$9,894	\$9,703	(\$191)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the HazMat CDL program. The decrease of \$191,000 is a result of fewer contractual obligations.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$636	\$1,803	\$1,824	\$21

Supports the operation and maintenance of information technology systems used to process and store data on all HazMat CDL endorsement applications. The increase of \$21,000 is a result of increased O&M costs.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Equipment	\$127	\$502	\$618	\$116

This cost is for the purchase of equipment including: hardware and software, office machines, and communication devices needed to support the HazMat CDL program. The additional \$116,000 is due to increased equipment cost.

BUDGET REQUEST AND SUPPORTING INFORMATION

TRANSPORTATION SECURITY ADMINISTRATION TRANSPORTATION SECURITY SUPPORT

I. Appropriation Overview

A. Mission Statement for Transportation Security Support:

The Transportation Security Administration is an agency of over 50,000 personnel, with approximately \$7.1 billion in budget authority, substantial regulatory and law enforcement authority, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in Washington, D.C. and five strategically located Mission Support Centers (MSCs). TSA has developed and will maintain a flat organizational structure that emphasizes front-line service delivery with well-trained managers who are supported by an array of services from Washington, D.C. The MSCs also provide support to field personnel within a specified geographical area.

B. Budget Activities:

Intelligence - The Office of Intelligence (INTEL) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. INTEL also conducts strategic operational and tactical risk-based security planning. The Office utilizes the full suite of TSA intelligence capabilities.

HQ Administration - Headquarters Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, corporate training, performance management, facilities management, financial management, acquisition, protecting civil rights, managing the timely sharing, coordination, and protection of transportation security information, legal advice, internal conduct and audits, and providing a safe and healthful work environment for employees.

Human Capital Services - The Office of Human Capital Services (OHCS) includes all services that support the recruitment, assessment, servicing, and payroll of TSA's employees at headquarters, field, airports, and other locations. The Office maintains oversight of all human resources contractual activities, and provides advice and counsel to senior managers on personnel issues. In addition, OHCS administers mandated employee related programs such as, Employee Assistance Program, Drug Testing Program, and Employee Relations.

Information Technology - Information Technology provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support Headquarters and field corporate applications.

C. Budget Request Summary:

The Transportation Security Administration requests 1,493 positions, 1,397 FTE, and \$1,004,600,000 for Transportation Security Support in FY 2010.

The program increases include:

- Intelligence: 14 positions, 7 FTE, and \$1,500,000,
- Headquarters Administration: 17 positions, 9 FTE, and \$9,235,000,
- Human Capital Services: \$800,000, and
- Information Technology: \$17,115,000

III. Current Services Program Description by PPA

Department of Homeland Security
Transportation Security Support
Program Performance Justification
(Dollars in Thousands)

PPA: INTELLIGENCE

	Perm		
	Pos	FTE	Amount
2008 Actual	100	95	22,154
2009 Enacted	155	149	24,461
2010 Adjustments-to-Base	11	11	2,242
2010 Current Services	166	160	26,703
2010 Program Change	14	7	1,500
2010 Request	180	167	28,203
Total Change 2009-2010	25	18	3,742

The Transportation Security Administration requests \$28.2 million for the Intelligence program. The adjustments-to-base include 11 position and 11 FTE, \$184 thousand for pay annualization, \$284 thousand for pay inflation, \$142 thousand for annualization of 9/11 position, 11 positions, 11 FTE and \$1,632 thousand for realignments, and 14 positions, 7 FTE, and \$1.5 million to support enhanced intelligence activities.

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of Intelligence (INTEL) is the intelligence organization for TSA. It provides an organic capability to review, synthesize, and analyze transportation specific intelligence. It is the only Federal intelligence entity focused solely on the transportation sector. INTEL coordinates closely and shares information with DHS Intelligence & Analysis (DHS-I&A), the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office locates liaison officers at key IC and law enforcement agencies and Field Intelligence Officers (FIOs) at key transportation nodes.

INTEL is critical to TSA's overall risk-based security strategy. The products generated provide a threat framework to prioritize security resources. They are regularly used by the Federal Security Directors (FSDs), the transportation industry, and Federal Air Marshal Service (FAMS). It operates and maintains 24/7 intelligence capabilities at TSA Headquarters and the TSA Freedom Center to disseminate warnings and notifications of credible and immediate threats. INTEL assists in coordinating domestic and international civil aviation and other modal security intelligence activities with other government agencies.

In order to perform its mission, INTEL provides and maintains its Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, State & local law enforcement, field sites, and industry partners. One such system is the TSA Remote Access to Classified Enclaves (TRACE) solution which provides secure access to classified and unclassified threat information in a timely manner to multiple remote locations.

Significant accomplishments in FY 2008 include:

- Increasing the FIOs program was significant for INTEL and the Agency. These federal and contractor employees are working on the frontline providing the Federal Security Directors and the Transportation Security Officers with previously unavailable resources. The program grew from 6 FIO locations to 23 in FY 2008.
- Enhancing the INTEL Watch operations remains a priority for the TSA. Significant steps were taken to ensure professional support is provided to TSA Leadership and TSA stakeholders. One such step includes upgrading the level of support TSA has in the Watch by focusing its analysts on being “Hunters vs. Gathers” regarding threat information related to transportation. Supervisory INTEL staff received professional management training along with analytical writing for Watch staff.
- Creating a permanent Continuity of Operations (COOP) Special Compartmented Information Facility (SCIF) for the TSA is a priority. INTEL funded the facility construction and classified IT costs out of the existing budget to be co-located with DHS and TSA executive leadership. During COOP situations, this will provide ready access to classified information and communication between the Intelligence Community, DHS-I&A, and TSA leadership.

FY 2009 planned accomplishments include:

- Expand INTEL Watch Operations Support for the TSA Behavioral Detection Officers (BDO) program and Secure Flight for TSA HQ, Annapolis Junction (AJ) and Colorado Springs Operations Center (CSOC).
- Continue to strive to provide a robust and valued intelligence capability used to drive operations and enhance mission partnerships with the DHS Fusion Centers and support Intelligence Community integration.

FY 2010 planned accomplishments include:

- INTEL plans to increase the staffing level to allow for additional terrorist intelligence analytical support to the TSA field elements on a 24/7 basis. This increase in FTE will allow for greater capability and flexibility during crisis and recovery situations.

PPA: HEADQUARTERS ADMINISTRATION

	Perm Pos	FTE	Amount
2008 Actual	1,388	1,252	288,210
2009 Enacted	981	922	234,870
2010 Adjustments-to-Base	(45)	(43)	4,824
2010 Current Services	936	879	239,694
2010 Program Change	17	9	9,235
2010 Request	953	888	248,929
Total Change 2009-2010	(28)	(34)	14,059

The Transportation Security Administration requests \$248.9 million for this activity. The adjustments-to-base include \$1.3 million in pay annualization, \$1.9 million in pay inflation, \$2.4 million for annualization of 9/11 positions, \$4.7 million in adjustments, and reduction of 45 FTP, 43 FTE and \$5.5 million for realignments. Program increases include 15 FTP, 8 FTE, and \$7.7 million for background investigations, 2 FTP, 1 FTE, and \$1.3 million for DHS TRIP, and \$235 thousand for Bomb Appraisal Officer support.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components that make up this PPA.

	FY 2010 (\$ in Millions)
Personnel	\$128.7
Leadership	4.2
Internal Management and Controls	57.2
Workforce Support	16.4
Facilities Management & Physical Security	33.2
Total	\$239.7

Headquarters Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations.

Personnel: \$128.7 million in personnel costs are included in this PPA for the offices of the Assistant Secretary and Deputy Assistant Secretary, Inspection, Chief Counsel, Finance and Administration, Legislative Affairs, Acquisition, Special Counselor, Security, and Strategic Communications and Public Affairs.

Leadership: \$4.2 million in operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, develop and monitor performance metrics, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners.

Internal Management and Controls: \$57.2 million in operating expenses support the day-to-day management of a \$7.2 billion budget and over 50,000 personnel. Offices overseeing internal management and controls include:

- Inspection -- Continuously conducts covert testing to identify vulnerabilities in the transportation security system. Testing consists of introducing inert improvised explosive devices in carry-on and checked baggage. During core enhanced testing, teams test access to the Aviation Operations Area and aircraft, Security Identification Display Area, and access through the perimeter. Inspection has increased its efforts to identify employees violating Worker's Compensation provisions by referring cases for prosecution, as appropriate. Additionally, Inspection is implementing proactive initiatives to deter and prevent baggage theft and loss claims at airports throughout the country.
- Acquisition -- Provides TSA with subject matter expertise in the areas of acquisition, procurement and contracting, field office acquisition guidance, grants management, requirements development, and program management.
- Chief Financial Officer (CFO) -- Obtains the necessary resources to support TSA's critical mission and ensure the resources are used efficiently by providing effectual financial systems and robust internal controls over funds. Provide planning guidance to align TSA budget with DHS goals and objectives.
- Chief Administrative Officer (CAO) -- Reduces operational and financial risk by ensuring control of all sensitive and capitalized assets. This is an on-going initiative which provides policy, guidance, training, inventory support, information management, and compliance reporting.
- Chief Counsel -- Responsible for the delivery of legal services to all TSA mission areas, components, and staff, covering all substantive legal areas applicable to TSA. These include a comprehensive and inclusive array of services from legal and policy development, assistance in implementation of TSA authority, responsibility and advice, representation and advocacy, to decision making.
- Security -- Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, and effectively determining the pre-employment suitability of all TSA personnel, to include contractors.

Significant accomplishments in FY 2008 include:

- Inspection -- Conducted a significant number of inspections/tests, including:
 - 2,550 covert tests at airports; tests included core-enhanced tests, focused tests, and field tests of new advanced technology equipment, other transportation mode tests, and initiated extensive cargo testing;
 - 140 airport inspections to measure and evaluate efficiency and effectiveness of all operations and adherence to polices;
 - Seven inspections of Federal Air Marshal Service (FAMS) field offices and eight inspections of FAMS Headquarters office to evaluate operational program, procedures, and policies;
 - Risk assessments of TSA operations and executed 12 internal reviews to address potential weaknesses; and
 - Reviews of Workers' Compensation payments and claims agency-wide to identify fraud and/or employees eligible to return on duty.

- Acquisition -- Strengthened contract administration by:
 - Emphasizing oversight of the (Contracting Officer Technical Representative (COTR)) program;
 - Improved OMB Exhibit 300 submissions and ensured weaknesses were addressed, and enhanced quality assurance and contract oversight;
 - Implemented the recommendations of the Lean Six Sigma study to improve the procurement process -- Procurement Request Package Process and Proposal Evaluation Process; and
 - Formalized TSA's requirements process, which included drafting procedures, issuing policies, and provided guidance to vet, stabilize, and review mission needs and capabilities; implemented a successful transition from TSA's Acquisition Management System to the Federal Acquisition Regulation (FAR), that included training, communication, policy and guidance.
- Chief Administrative Officer --
 - Issued policies and guidance on inventory controls ensured accountability of TSA's sensitive capitalized property;
 - Undertook methods to further ensure a low loss, damaged, and destroyed property rate; and
 - Conducted approximately 150 inventory site visits.
- Chief Financial Officer --
 - Developed, presented, and defended TSA's annual budget requests (FY 2009/FY 2010) in meetings with the Department, the Office of Management and Budget (OMB), and Congress resulting in a budget of more than \$7.2 billion; and
 - Continued efforts to ensure a TSA-wide culture of fiscal and performance responsibility and accountability and to achieve an unqualified opinion on the FY 2008 balance sheet. These initiatives included: strengthening fiscal policies and procedures across TSA, providing financial training and tools for the TSA workforce, enhancing the management control program and testing of internal controls, and improving the quality and integrity of financial data.
- Chief Counsel --
 - Finalized regulations for Secure Flight, rail security, large aircraft and air cargo; completed Memorandum Of Understanding (MOU) with Merit System Protection Board (MSPB) with regard to whistleblower rights for TSOs;
 - Provided legal support for Checkpoint Evolution Initiative, which included new technology and passenger identification issues; provided cutting edge legal support for VIPR Program; provided legal advice and guidance to Acquisition prior to transition to Federal Acquisition Regulations (FAR); and
 - Transitioned one of two HQ organizational elements to E-Performance; provided substantive and technical assistance in drafting the 9/11 implementation bill (PL 110-53); and conducted legal review and influenced key changes to the European Union's aviation security system.
- Security --
 - Ensured a safe and secure workplace for TSA's employees by administering the physical, personnel, and internal security polices and procedures; and
 - Evaluated the pre-employment suitability of all TSA personnel and contractors.

FY 2009 planned accomplishments include:

- Inspection --
 - Increase number of team leads to increase covert tests at airports;
 - Conduct field tests of new advanced technology equipment, other transportation modes, 50 cargo tests, and 40 airport inspections; and
 - Pilot TSA HQ inspections, conduct risk assessments of TSA operations and execute 20 internal reviews, and reviews of Workers' Compensation.
- Acquisition --
 - Continue development of Acquisition workforce through the implementation of recruitment, retention and employee development plans, participation in the DHS Acquisition Professional Program, and implementation of a Program Manager Simulated "Boot Camp" Training program;
 - Continue process improvements identified through Lean Six Sigma efforts, formalize TSA Test & Evaluation (T&E) policy to include requirements for a program Test and Evaluation Master Plan (TEMP) and implement systematic reviews of test results as part of the Investment Review Board (IRB) process;
 - Implement a comprehensive contract policy plan and conduct oversight to ensure understanding and compliance with the revised policies and rules of the FAR; and
 - Initiate strategic sourcing efforts, including the development of a comprehensive plan for enterprise-wide requirements.
- Chief Administrative Officer --
 - Complete and reconcile the annual inventory of all capitalized and sensitive property (to include IT assets) with a loss, damage, or destruction (LDD) ratio of less than two percent and implement the corrective action plan for Property and Equipment Accounting;
 - Conduct approximately 200 inventory site visits;
 - Further utilize asset management control program to include software revision, administratively controlled property module, and more effective tracking of the local movement of TSA property; and
 - Enhance acquisition planning by improving program office outreach, using excess property as first source of supply, and improving accountability of new property by reviewing acquisition data.
- Chief Financial Officer --
 - Develop, present, and defend TSA's annual (FY 2010/FY2011) budget request in meetings with the Department, OMB, and Congress;
 - Continue efforts to provide planning and performance guidance, financial data, guidance, tools, and skills to TSA's workforce and decision makers to ensure financial integrity and accountability and performance reporting; and
 - Reduce material weaknesses and achieve an unqualified (clean) audit opinion on the FY 2009 Financial Statement.
- Chief Counsel --
 - Issue Regulations/rulemaking and provide legal support on Evolution of Security;
 - Provide legal support to implementation of 9/11 Bill (PL 110-53);
 - Provide legal advice and guidance to TSA clients on the following issues: transition to the FAR, transition to e-Performance and stratified rating system, transition of administration; and ensure Office of Global Strategies program execution; and

- Continue to provide aggressive litigation support to the agency before federal courts, Equal Employment Opportunity Commission (EEOC) and the Merit System Protection Board (MSPB).
- Security --
 - Continue to provide security services with additional improvements anticipated in background investigation cycle time and through the implementation of new security technologies aimed at reducing the risk of unauthorized access to airports and other TSA facilities.

FY 2010 Planned Accomplishments:

- Inspection --
 - Increase number of Team Leads and continue to conduct covert tests at airports and expand cargo testing by 50 percent;
 - Conduct 140 airport inspections to measure and evaluate the efficiency and effectiveness of all operations and adherence to policies;
 - Increase TSA HQ inspections and conduct risk assessments of TSA operations and execute 20 internal reviews to address potential weaknesses; and
 - Conduct reviews of Workers' Compensation payments and claims agency-wide.
- Acquisition --
 - Continue to participate in the DHS Acquisition Professional Career Program;
 - Strengthen contract oversight, including consistent file and process reviews of the end-to-end procurement process; and
 - Formulate TSA Acquisition Logistics guidance and policy, develop documentation requirements for the Integrated Logistics Support Plan, and implement the strategic sourcing plan.
- Chief Administrative Officer --
 - Complete and reconcile the annual inventory of all capitalized and sensitive property (to include IT assets);
 - Continue the corrective action plan for Property and Equipment Accounting; and
 - Implement Radio Frequency Identification (RFID) technology at HQ to identify, track, and protect capitalized and sensitive equipment.
- Chief Financial Officer --
 - Continue to present and obtain critical resources to support TSA's mission;
 - Ensure that improvements put into place over the past three years are firmly integrated into the day-to-day business processes throughout TSA by continuing testing of management controls, providing on-going training, and expanding financial reporting to provide enhanced analytical capabilities; and
 - Continue to sustain an unqualified (clean) audit opinion on the FY 2010 Financial Statements.
- Chief Counsel --
 - Provide substantive and technical legislative drafting assistance and advice to TSA leadership on hearings;
 - Provide strategic leadership to TSA on acquisitions, financial and other business related decisions key to fulfilling the Administration's priorities and congressional mandates;
 - Provide regulations/rulemaking on all aspects of transportation security; provide legal guidance to global transportation security laws and procedures; and
 - Continue to provide aggressive litigation support to the agency before federal courts, EEOC and MSPB.

- Security -- The FY 2010 request includes an additional \$7.7 million and 15 FTP/8 FTE for the processing of background investigations. Additional positions are urgently required to keep pace with agency hiring demands and to ensure the efficient and timely adjudication and investigation process mandated by the Intelligence Reform and Terrorism Prevention Act of 2004. The additional funding will allow Security to:
 - Conduct re-investigations of approximately 26,000 current employees who have been employed at TSA for at least five years and require periodic background re-investigations. TSA will re-investigate these employees through a three-year phased approach, the first year of which is anticipated to begin in FY 2010.
 - Reduce the processing time for the background investigation and thus, quicken the pace of the hiring process, clear re-investigation backlogs, and strengthen security through more thorough Minimum Background Investigations.

Workforce Support: \$16.4 million in operating expenses supports all aspects of sustaining approximately 50,000 employees and ensuring an excellent working climate and a safe and healthful environment while performing TSA's mission. In addition, these programs ensure fair and lawful treatment of employees and the public. Offices that provide workforce support include:

- Special Counselor (Civil Rights and Civil Liberties (CRCL), Ombudsman, Executive Secretariat, Sensitive Security Information Office (SSI), and Transportation Security Redress):
 - CRCL provides Equal Employment Opportunity education, complaint investigation and adjudication, and alternate dispute resolution;
 - Ombudsman provides neutral and confidential problem resolution services to employees and the public for issues involving TSA;
 - Executive Secretariat manages the preparation and coordination of TSA responses to DHS correspondence, requests for briefing materials for the Secretary and Deputy Secretary; congressional Questions for the Record, Reports to Congress, and responds to correspondence from Congress, security partners, and citizens. The Executive Secretariat also operates the TSA Contact Center (TCC) which responds to traveler inquiries and is the central point of contact for all non-media public inquiries and complaints;
 - Transportation Security Redress provides a forum for individuals identified as a threat or a potential threat to transportation security to appeal; and
 - SSI ensures that TSA complies with all laws and regulations regarding the recognition, identification, and safeguard of SSI.
- Chief Administrative Officer (Occupational Safety and Health (OSH), HQ Fleet Management, HQ Transit Benefits, and Information Management Programs):
 - OSH works to bring facilities into compliance, provide a safe and healthful working environment and reduce injuries and illness;
 - Fleet Management provides operational support by acquiring vehicles and fleet management services as well as administering the HQ parking and Executive transportation program;
 - Transit Benefits Program ensures that employees receive transit benefits; and
 - Information Management Programs provides for the economical and efficient management and release of official agency records, management directives, and official forms.

Significant accomplishments in FY 2008 include:

- Special Counselor --
 - Provided diversity training to the Senior Leadership Team and officials from TSA's Headquarters and field offices;
 - Expanded EEO outreach to Historically Black Colleges and Universities, Tribal Colleges and Universities, Hispanic Service Institutions, and other educational institutions;
 - Improved responsiveness to the traveling public redress inquiries;
 - Provided assistance to nearly 3,000 TSA employees needing confidential, informal, and neutral workplace problem resolution assistance, responding to 96 percent of initial employee calls within 24 hours;
 - Managed approximately 7,000 official agency documents and more than 940,000 contacts from the public;
 - Enhanced current TSA-wide SSI Awareness campaign to improve SSI identification, safeguarding, and sharing through training and SSI policies and procedures awareness and education programs; and
 - Developed Office of Audit Liaison Management Directive in line with DHS guidelines to streamline the process for delivering requested documents to GAO within 20 days as mandated by Congress.
- Chief Administrative Officer --
 - Opened the Health Unit at Headquarters to provide efficient and effective guidance on TSA-wide occupational health issues;
 - Enhanced the Safety Information System to include FAMS safety information and TSA/FAMS Workers' Compensation management processes;
 - Completed the formal occupational safety and health inspections of all TSA airport operational and administrative facilities;
 - Developed and hosted the TSA Collateral Duty Safety Officer (CDSO) in-service safety training workshop;
 - Continued efforts to increase percentage of alternative fuel vehicles and related fuel utilization to meet and exceed operational requirements; and
 - Initiated deployment of automated pay system for parking services; and
 - Piloted records management "tagging" effort in advance of electronic records management system (eRMS) implementation.

FY 2009 planned accomplishments include:

- Special Counselor --
 - Develop and refine information sharing methods and responsiveness to ensure that programs tracking passengers are consistent with civil rights laws and policies;
 - Hold an organization-wide Diversity Day to bring institutional focus to this important initiative and to help clarify and demonstrate the meaning of diversity at TSA;
 - Host quarterly nationwide employee conference calls to collect anonymous feedback on systemic workplace issues and report the results to TSA management;
 - Continue to streamline the process for delivering requested documents to GAO in a timely manner; and

- Continue current TSA-wide SSI Awareness campaign through improved guidance, targeted site visits, and an expanded training conference and implement the Controlled Unclassified Information (CUI) framework in conjunction with SSI.
- Chief Administrative Officer --
 - Meet the requirements of the Safety, Health and Return to Employment (SHARE) initiative by reducing the total injury case rates and lost time case rates by three percent, increase the timely filing of claims by five percent, and reduce the rate of lost production days due to injury by one percent;
 - Conduct the CDSO Occupational Safety and Health (OSHA) 6000 course tailored to TSA operational environments;
 - Complete the hazard analysis and baseline industrial hygiene surveys of all TSA airport operational and administrative environments;
 - Fully implement automated pay system for parking services;
 - Finalize the TSA eRMS pilot and begin deployment of the system; and
 - Continue to increase percentage of alternative fuel vehicles and related fuel utilization.

FY 2010 Planned Accomplishments:

- Special Counselor --
 - Further develop its Persons with Disability (PWD) and multi-cultural program to assist TSA in understanding the needs and concerns of a variety of cultures and groups when developing security screening processes and deploying emerging technologies;
 - Develop and implement training to raise employee awareness of workplace bullying;
 - Expand TSA's SSI education and awareness program and continue Controlled Unclassified Information (CUI) implementation; and
 - FY 2010 request includes 2 FTP, 1 FTE and \$1.3 million for DHS TRIP to enhance the hosting center support and the Redress Case Management System operation to provide a uniform and consistent one-stop DHS-wide process for handling redress issues and complaints.
- Chief Administrative Officer --
 - Expand the TSA Health Unit program and services as part of a pilot program to two regional areas (central and western);
 - Expand Safety Information System utilization to all TSA program offices;
 - Continue to increase the percentage of alternative fuel vehicles and related fuel utilization; and
 - Fully deploy the eRMS.

Facilities Management and Physical Security -- \$33.2 million is necessary for operating expenses managed by the Chief Administrative Officer including facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the Mission Support Centers (MSCs). The Franconia warehouse is used to stage TSA equipment prior to deployment, store special purpose consumables, and temporary storage of property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across transportation modes. They provide TSA field personnel with support within designated areas, located in San Francisco, CA; Atlanta, GA; Dearborn, MI; Philadelphia, PA; and Coppel, TX.

Significant accomplishments in FY 2008 included

- The continued co-location of TSA with the Federal Protective Services/Immigration and Custom Enforcement personnel at the Philadelphia MSC,
- Initiated the Transportation Systems Integration Facility project at DCA; and
- Started the design of the 12,500 square feet of un-built space at the Freedom Center in Herndon, VA.

FY 2009 planned accomplishments include the installation of energy saving lighting sensors and support furniture modification requests at TSA Headquarters in Arlington, VA.

FY 2010 planned accomplishments include continued support for tenant activity and mission critical requirements.

PPA: HUMAN CAPITAL SERVICES

	Perm Pos	FTE	Amount
2008 Actual	206,021
2009 Enacted	188	177	218,105
2010 Adjustments-to-Base	17	16	7,433
2010 Current Services	205	193	225,538
2010 Program Change	800
2010 Request	205	193	226,338
Total Change 2009-2010	17	16	8,233

Note: FY 2009 and FY 2010 reflect the consolidation of funds into the Human Capital Services PPA from the Headquarters Administration PPA and Human Resources Services PPA in Aviation Security.

The Transportation Security Administration requests \$226.3 million for Human Resources (HR) services for Headquarters and field offices. The adjustments-to-base include 17 FTP, 16 FTE, \$351 thousand for pay annualization, \$540 thousand for pay inflation, and \$6,542 thousand in realignments. Increases include \$800 thousand to support the Bomb Appraisal Officers.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components that make up this PPA.

	FY 2010 (\$ in millions)
Personnel	\$39.0
HR Services and Administration	54.9
Recruitment and Assessment	96.5
Other HR Services	23.4
Leadership Training & Development	11.7
Total	\$225.5

The Office of Human Capital Services (OHCS) maintains oversight of all human resources contractual activities, develops policies, guidance and programs that are used to identify and promote the best and most efficient HR practices allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

Personnel: \$39.0 million in personnel costs are included in this PPA to support all HR activities at headquarters.

Human Resources (HR) Services and Administration: The request includes \$54.9 million to provide HR Services to employees in the field and Headquarters. OHCS provides HR Services including recent and archived communications, comprehensive HR orientation for new field and Headquarters employees, and frequently asked questions about HR Services and how they can be used to best meet required human resources needs. Specific activities include: perform general human resource administration, recruit qualified applicants, extend employment offers and mail notification letters to new hires, maintain Official Personnel Folders (OPFs) and electronic Official Personnel Folders (eOPFs), process all employee actions, provide orientation to new employees, and perform time and attendance/payroll administration.

In FY 2008, OHCS eliminated the payroll error correction backlog while building a repeatable business process related to payroll that enables OHCS to perform manual corrections in a timely manner. OHCS improved business rules related to personnel action processing and reduced the cycle time to process a personnel action to six business days. The office also increased the use of performance metrics through the use of two major operational dashboards that highlight timeliness, accuracy, and aging of actions. The dashboards provide the end-to-end view of payroll and personnel processing operations.

Significant Accomplishments in FY 2008 include:

- Eliminated 40,000 leave errors;
- Developed and implemented enhancements to the electronic Standard Form 52 (eSF52) Tool which provides guidance to HR representatives to complete the form quickly and accurately;
- Processed on average 1,200 new employees per month;
- Designed and delivered training to field HR specialists;
- Processed an average of 4,000 personnel transactions per month;
- Processed an average of 4,000 benefit transactions per month; and
- Increased paperwork compliance to 98 percent by implementing an electronic orientation system which allows candidates to receive instruction on Federal benefits and complete the required forms electronically.

Recruitment and Assessment: The request includes \$96.5 million for the recruitment, assessment and servicing of TSA's Transportation Security Officers (TSOs) and other workforce at headquarters, field locations, and airports to ensure a qualified workforce is available to meet security requirements. The largest component of the workforce is the TSOs and local hiring practices support their recruitment and retention through the following:

- Computer Based Testing (CBT) (\$80/applicant);
- Medical exams/drug tests (\$550/test);
- HR specialists available to assist airports with local hiring assessments;
- Localized on-the-ground recruiters to attract TSO candidates;
- Airport local hiring help desk to answer airport questions and assist in resolving issues and problems;
- Recruitment Center availability for TSO applicants and candidates to contact for important information;
- Deployment and availability to all airports of a local hiring "Dashboard" to assist airports with candidate management;
- Management and maintenance of data systems and repositories to track and manage nationwide TSO candidate information (forms and fingerprints); and
- Local hiring training for airport staff in select locations.

Significant Accomplishments in FY 2008 include:

The move from centralized hiring of TSOs to decentralized localized hiring has created the efficiencies that enable base adjustments. Below are examples of these efficiencies:

- Placed hiring under complete airport control:
 - FSDs/staff now have ability to direct the entire process from Vacancy Announcement to Enter-on-Duty (EOD);
- Expanded hiring capacity (ability to hire at more airports at the same time):
 - Before: Hiring TSOs at 20 – 30 airports per pay period;
 - Now: Hiring TSOs at 70 – 100 airports per pay period, with capacity to hire at all airports simultaneously;
- Increased throughput (ability to hire more TSOs at the same time):
 - Before: 180 new hires per pay period;
 - Now: Demonstrated capacity for 1000+ new hires per pay period;
- Improved hiring cost efficiency:
 - Transitioned to fingerprint scan by American Association of Airport Executives;
 - Worked with the Office of Personnel Management to provide staff support;
- Implemented electronic New Hire Orientation, which allows candidates to receive instruction on Federal benefits and complete required forms for on-boarding prior to EOD. This enhancement has:
 - Reduced the cost of delivering required New Hire Orientation content, and
 - Improved the New Hire Orientation experience for new hires and airports.

Integrated Hiring Operations and Personnel (IHOP) Program: The IHOP Program is acquiring Federal HR services from a service provider with expertise and demonstrated experience in the areas of Federal Human Capital management, program management, business and financial management, and systems and process integration. The full range of HR operations can now be performed seamlessly in an end-to-end process supporting the entire life cycle of the TSA employee.

Through the IHOP Program, TSA aims to improve contract management and reduce administrative overhead by consolidating the three previously outsourced contracts into a single contract. Through contract consolidation, TSA expects to achieve financial and performance efficiencies that were previously difficult to realize. Additionally, TSA expects to improve contractor performance, customer service, and implement more innovative approaches in the delivery of human resource services. To assess the performance of the vendor, OHCS developed the IHOP Program Management Plans which include a Performance Evaluation Plan, Quality Assurance and Surveillance Plan, Risk Management Plan, Change Management Plan, and Communications Plan. In addition, OHCS developed knowledge transfer documentation including Current State Process Maps, Knowledge Transfer Catalogues, and Operational Context Summaries for all Human Capital functional areas to provide baseline of information to the IHOP vendor.

FY 2009 planned accomplishments include:

- Complete transition of services to the IHOP vendor;
- Identify Full Operational Metrics to evaluate the IHOP vendor performance as related to delivery of services and costs under the IHOP contract and establish baselines for each. Specific metrics include:
 - Rate of TSO hiring actions that are processed in compliance with Federal law and TSA business rules;
 - Rate of Management, Administrative and Professional competitive and non-competitive hiring actions that are processed within TSA established business rules;

- Rate of TSES certified applicants that meet the 90 day OPM deadline from date of application to date of certification;
 - Rate of personnel transactions processed according to Federal Regulations and Guidelines;
 - Rate of Helpdesk first call resolutions;
 - Annual cost of human resource services; and
 - Rate of overall customer satisfaction.
- In FY 2010, OHCS will review the service levels being delivered and the methodologies, tools, and staffing levels being employed by the IHOP vendor with the objective of identifying further opportunities for improvements in order to realize even greater program efficiencies and effectiveness.

Other Human Capital Services: The \$23.4 million is requested for benefits, mandatory programs, employee relations, and management of the Worker's Compensation program. The benefits include the Employee Assistance Program, LifeCare, flu vaccinations, and retirement assistance. Mandatory programs include drug and alcohol testing and Unemployment Compensation.

The Workers' Compensation Program oversees the Workers' Compensation chargeback from the Department of Labor and the Nurse Case Management Program. The Program established the Periodic Roll Initiative (PRI) in April 2007. The initiative is a joint effort with the Nurse Case Management team where all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees back to work when medically feasible.

FY 2008 accomplishments include:

- Reviewed and assessed the remaining 690 period roll cases. Each case was reviewed to determine, 1) if the employee is able to return to duty (full or limited), the case was medically resolved; or 2) the case required continued monitoring due to long term disability; and
- Resolved a total of 476 periodic roll claims, as of March 31, 2008, which represents 49 percent of the original claims noted at the beginning of this initiative. The projected annual salary savings equates to \$14.3 million, offset by increases in the federal salaries and the cost of medical care.

FY 2009 planned accomplishments include:

- Continue focused efforts to clear periodic roll cases while addressing new injury claims through medical management within the Nurse Case Management Program protocol.

In FY 2010, OHCS will continue to review and assess any remaining periodic roll cases and all newly added periodic roll cases.

Leadership Training and Development Program: \$11.7 million is requested for training and development of Headquarters and Field staff. OHCS works closely with TSA leadership to develop and administer programs to prepare for the future leadership needs of TSA by identifying current and future senior leadership requirements, preparing a pipeline of talented and motivated leaders at all levels who will be ready to take on new challenges and identifying the best external sources of recruitment when internal sources are insufficient to meet critical needs.

All TSA employees benefit from better-prepared, better-trained leaders who ensure that TSA accomplishes its important mission and advances the goal of becoming a highly effective and agile organization, and an employer of choice. The Succession Plan provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA.

Professional development training provides mission-related training that is either beneficial for an employee in his/her current job or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity.

FY 2008 accomplishments include:

- Completed all development activities for over 40 participants in the first Senior Leadership Development Program (SLDP1) and launched action learning as a leadership development tool for TSA. KEY SLDP1 METRICS: About half of SLDP1 participants have been promoted, many into target jobs, validating the succession value of the program.
- Conducted orientation and began development activities for 59 new SLDP2 participants;
- Launched SLDP3 as a formal TSES Candidate Development Program with 22 participants; AND
- Tested, piloted, and delivered two new courses for managers: *Leading from the Middle* and *Transition to Security Manager*, to provide managers with the concepts, tools and best practices for leading both people and operations more effectively.

FY 2009 planned accomplishments include:

- Implementation of a revised Mid-Level Development Program with defined program components, and accomplishment of needs assessment for purposes of program right-sizing and development of new learning tools;
- Completion of all program development activities for SLDP 2 and most activities for SLDP 3;
- Development of needs analysis and proposal for a new Executive Leadership Development Course (working title: *Strategic Leadership*); and
- Initial selection and development of participants for the TSA Career Resident Program and planning for possible nationwide rollout in FY 2010.

FY 2010 planned accomplishments include:

- Develop and test new learning tools for aspiring mid-level managers with new class Mid-Level Leadership Development Program (MLDP) participants;
- Begin evaluation and redesign analysis for *Transition to Security Manager* and *Leading from the Middle*;
- Launch *Strategic Leadership* for executive and other senior positions;
- Launch new phases of the SLDP and MLDP;
- Update succession plan, including identification/validation of critical positions, projection of near-term turnover, project ratio of internal to external selection, and evaluation of internal bench strength and external sources;
- Conduct national rollout of revised TSA Career Resident Program; and
- Establish a baseline for evaluating the training program;

- Offer at least 3,000 seats of cutting edge, synchronous e-learning to first line supervisors on supervisory topics such as leave, medical; FMLA; and charges and specifications;
- Develop and pilot test *Essential Leadership Skills for Lead Transportation Security Officers*. This development effort will include two course topics tentatively identified as:
 - *Supervisory Survival Skills Training*, and,
 - *Aspiring Leaders Training*;
- Complete construction and deploy a comprehensive e-learning and video production facility to facilitate training and communication originating with the Office of Human Capital Services.

PPA: INFORMATION TECHNOLOGY SUPPORT

	Perm Pos	FTE	Amount
2008 Actual	180,592
2009 Enacted	141	135	472,799
2010 Adjustments-to-Base	14	14	11,196
2010 Current Services	155	149	483,995
2010 Program Change	17,115
2010 President's Budget	155	149	501,110
Total Change 2009-2010	14	14	28,311

Note: FY 2009 and FY 2010 reflect the consolidation of IT funds from the Headquarters Administration and the Airport Management IT and Support PPAs.

The Transportation Security Administration requests \$501.1 million to support information technology (IT) for headquarters and field offices. This is an increase of \$28.3 million over FY 2009. Total adjustments-to-base of \$11.2 million consist of \$10.5 million to support TSA’s Electronic Time and Attendance System (eTAS), \$2.6 million for the DHS Working Capital Fund, \$208 thousand for pay annualization, \$320 thousand for pay COLA, and -\$2.5 million in realignments. Additionally, the adjustments-to-base include 14 FTP and 14 FTE. The 2010 program change of \$17.1 million includes \$11.4 million for DHS Data Center Migration, \$5.0 million for Whisper Communications, \$565 thousand for IT activities related to the expansion of TSA’s Bomb Appraisal Officer program, and \$150 thousand for 9/11 annualization.

DHS Data Center Migration

FY 2010 data center consolidation funding will be used to continue ongoing system and application migration to the two existing DHS Enterprise Data Centers. The Data Center consolidation efforts will standardize IT resource acquisitions across components, streamline maintenance and support contracts, resulting in an enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components of the PPA’s Current Services.

(dollars in millions)

	FY 2010
Core Information Technology Program	385.3
Personnel/Financial Management Systems	72.2
e-Government Operating Platform	2.5
IT Personnel	23.9
Total	483.9

Core Information Technology (IT) Program: A total of \$385.3 million supports the core IT program and telecommunications infrastructure for all of the TSA managed enterprise-wide IT services that assist in accomplishing TSA mission responsibilities. The fundamental IT capability has been supported through an information technology managed service (ITMS) contract since the inception of TSA. The managed services model offers the prospect of long-term cost efficiencies and the provision of state-of-the-art technologies for services and equipment.

FY 2008 significant accomplishments include:

- Award of contract for data center migration efforts aligned to DHS IT objectives;
- Transition and award of IT managed service contract to DHS Eagle Contract vendor;
- Score of 100 percent on the Federal Information Security Management Act (FISMA) security scorecard score for IT systems; and
- Migration of existing Security Operations Center (SOC) and SOC services to DHS Eagle Contract vendor.

FY 2009 planned accomplishments include:

- Starting the initial transition of all TSA data circuits to the GSA Networx Contract;
- Maintaining a balanced score card for Federal Information Security Management Act;
- Performing an in depth review of all systems security plans (SSP) to ensure compliance with all OMB mandates and FISMA; and
- Performing Information Systems Security Audits of 10 percent of TSA systems and Technical Vulnerability Audits of twelve Category X and I airports to maintain FISMA compliance.

TSA has FY 2010 planned objectives to support and enhance the current IT environment. TSA has evaluated its network, infrastructure, IT security, information sharing, applications development, and engineering support requirements to align existing capabilities with DHS strategic objectives. To accomplish this goal, TSA has aligned the managed service model with the existing DHS EAGLE contract to further improve mission support. The alignment will help deliver enhanced business-focused IT services and a more robust telecommunications infrastructure for all TSA employees. The funding will also assist TSA in developing an IT environment which promotes collaboration throughout TSA and the DHS component agencies. Enhancements to the IT environment include:

- Segmented refresh of network and infrastructure equipment;
- Optimizing the TSA application hosting environments; and
- Consolidation and redesign of network backbone.

The TSA IT infrastructure supports the technology assets of airport, headquarters, and TSA Freedom Center personnel. The user equipment requires a large wide area network to support the information needs of the TSA population. TSA will provide support for the large user base through robust IT engineering efforts, infrastructure operations, and enterprise application services. Resources are allocated for ongoing operations and maintenance for the TSA data centers, operation centers, failover resources, applications, operating platform management, database management, application systems, system performance monitoring, and configuration management. Support includes:

- National Help Desk; including software, licensing and software distribution support,
- Headquarters and Airport IT support,

- Security Incident Response,
- Checked baggage and passenger screening data,
- Performance management data analysis,
- Equipment maintenance and legacy systems support,
- Infrastructure Transformation - TSA participation in DHS One Infrastructure, and
- Technical architecture compliance and enterprise architecture-related support.

Additional funding in FY 2010 for Whisper Communications will support the purchase and deployment of approximately 700 secure multi-channel land mobile radios at checkpoints at Category X airports which serve 80 percent of the traveling public. The use of whisper communications will improve efficiency of operations, enhance current communications, and expedite the screening of passengers.

A primary objective for TSA is to provide limited failover capabilities in the event that IT systems at the primary Data Center, HQ server facility, or the Freedom Center server facility are lost or become inoperable for an extended period of time.

Federal Information Security Management Act (FISMA) compliance is a main objective of the TSA IT community. IT security will allocate resources to perform audit and assessment reviews to test the compliance of IT systems, including the physical review of sites that house TSA's IT systems. TSA IT security enhancements will allow the agency to continue to maintain full FISMA compliance. Certification and accreditation (C&A) management will develop, implement and enhance the continuous monitoring phase of the IT Security Life Cycle.

The growing needs of the TSA communication security (COMSEC) user base requires TSA to continually enhance secure communications to stakeholders and help desk capability. The service area includes the continued modernization of secure communication units as well as infrastructure protection which includes but is not limited to:

- Firewalls,
- Intrusion detection and prevention,
- Antivirus,
- Content monitoring, and
- Managed Security Services.

The Electronic Time and Attendance System (eTAS) project will streamline and automate the process currently utilized to support collection and data input of timecards and collection of performance metrics for the airport support staff. Current processes and available automation are legacy based, which make the continuance of the same functionality ineffective and cost prohibitive. This effort endeavors to eliminate paperwork, provide cost accounting, and provide management with the tools and resources needed to effectively evaluate cost alternatives with respect to FTE management and technological developments. In FY 2010, TSA will continue operations and maintenance of systems and leverage connectivity to expand automated processes.

The IT core program provides focused and efficient management practices and support services while seeking the achievement of contract results, not contract compliance, in meeting the IT mission solutions needs of TSA. In addition, the IT training program provides staff the necessary resources to improve the alignment of requirements in TSA business portfolios in support of the Agency mission.

Personnel/Financial Management Systems: This activity funds \$72.2 million of interagency agreements with Coast Guard and the U.S. Department of Agriculture for the use of their financial management, personnel, and payroll systems. This also funds reimbursements to the Department of Homeland Security for the costs of the Working Capital Fund, related to operational information management support functions.

e-Government Operating Platform (e-Gov OP): e-Gov OP is a \$2.5 million platform and analytical “toolbox” that facilitates the reporting and analysis of key performance data to support enterprise-wide performance reporting. This capability is enabled through a Microstrategy Business Intelligence application which processes data from multiple databases that is exposed through an information sharing environment supported by IT. This supports ad hoc and standard reports which can be automated and pushed to recipients. The TSA Monthly Objective Report and the Daily Service Performance & Safety Report are examples of key reports supported by this capability and are key elements in TSA’s performance management system.

IT Personnel: This PPA also includes \$23.9 million to support 155 FTP / 149 FTE. The IT personnel that support the Office of Information Technology consist of IT engineers, application developers, technical specialists, and associated support professionals. They provide the IT infrastructure and services to TSA Headquarters and field locations.

IV. Program Justification of Changes

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support
Justification of Program Changes**

(Dollars in Thousands)

Program Increase 1: International Threat Capability

Strategic Goal(s) & Objective(s): 1. Continue to Protect our Nation from Dangerous People, 3.1 Protect and Strengthen the resilience of the Nation’s critical infrastructure and key resources; Enhance preparedness protection, screening and risk mitigation

PPA: Intelligence

Program Increase: Positions 14 FTE 7 Dollars \$1,500

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase – Intel							14	7	1,500
Total Request							14	7	1,500

Description of Item

TSA requests \$1.5 million and 14 positions to enhance intelligence capabilities. The Office of Intelligence (INTEL) provides liaison with National Counterterrorism Center, Joint Terrorism Task Forces, and DHS HQ to better connect with the Intelligence Community and Law Enforcement. Additional intelligence staffing support is required at other locations to allow analysts to simultaneously maintain production responsibilities, improve modal knowledge base, and develop/maintain relationships. The requested positions will support field locations with intelligence expertise regarding threats to transportation. This will provide critical field elements with organic, intelligence expertise, to quickly identify and communicate potential threats to transportation.

Justification

INTEL receives numerous requests for information (RFIs) during the course of normal business. This program must increase the amount of dedicated staff to receive, track, and ensure completion of these requests up to the Top Secret/Sensitive Compartmented Information (TS/SCI) national security level. TSA Intel seeks to develop the Encounter Management Unit (EMU), the Behavior Detection Office (BDO) Support Team, and the Transportation Threat Assessment and Credential (TTAC) support teams staff into a premier, national-level operations center with flexible and seasoned intelligence experts who are quickly and accurately able to provide all necessary information. Intelligence

Analytical Tools will support the entire INTEL. These software and hardware solutions are absolutely essential for modern and effective intelligence data analysis. It is crucial to have specialized technology to provide pattern recognition, data point relationships, and timely feedback.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative directly supports DHS Strategic Goals 1 and 3 and the objectives under 1.3 and 3.4, and is essential to an overall risk-based security strategy. Funding this initiative will enhance the INTEL’s ability to provide timely analytical support to the Department and TSA leadership. Currently, the office operates with the expertise of its intelligence analysts, but without the specialized technology to provide pattern recognition, data point relationships, and timely feedback. The vulnerability in this is missed opportunities to quickly and effectively identify threat information. Additional resources in the form of analytic tools will greatly enhance the performance and the ability of INTEL’s staff in relating significant data points for better threat identification.

Increased funding will provide the INTEL the ability to hire additional full-time equivalent (FTE) employees to provide 24/7 intelligence support to the BDO, TDC, Selectee Management, and Credentialing efforts, allowing for accelerated response times regarding the resolution of BDO and credentialing issues. INTEL at present lacks adequate staffing to fully support this new requirement. Currently, the office operates with the FTE strategically located across the continental U.S. and significant transportation nodes; increased FTE will expand this coverage to critical field locations that are currently without this support, making intelligence information operational and getting it to those who need it in a timely fashion. The requested increase will enable the intelligence program to meet its planned milestones to expand the use of analysis to identify potential weaknesses in the transportation system and provide corresponding mitigation strategies.

The performance measure associated with these efforts is “Percent of customers satisfied with the intelligence products provided”. This measure shows the overall level of customer satisfaction with intelligence products produced and disseminated by INTEL to TSA leadership, field operators and program managers, regulated transport operators, and USG partners throughout TSA Headquarters, TSA field operations, the aviation industry, rail-based urban mass transit systems, and the maritime, highway, cargo/supply chain, and pipeline/energy sectors.

Performance Measure Name: Level of customer satisfaction with the intelligence products provided.

	2009	2010	2011	2012	2013	2014
Measure Type:						
Outcome:	Target	90%	90%	95%	95%	95%

Program Increase 2: 9/11 Annualization

Strategic Goal(s) & Objective(s):

1. Continue to Protect our Nation from Dangerous People
3.1 Protect and Strengthen the resilience of the Nation’s critical infrastructure and key resources;
Enhance preparedness protection, screening and risk mitigation

PPA: Information Technology

Program Increase: Positions _0_ FTE _0_ Dollars \$150

Program Increase – Information Technology							0	0	150
Total Request							155	149	484,145

Description of Item

- Information Technology (IT) Support: \$150 thousand for Headquarters and field offices.

Justification

This funding will support the additional Information Technology (IT) needs of the positions annualized in FY 2010 related to the 9/11 Commission Act. IT support will be provided through equipment purchases and services.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA supports DHS Objective 3.1: Protect and strengthen the resilience of the Nation’s critical infrastructure and key resources. The annualization of the 9/11 Commission Act funds enhances the protection of critical infrastructure through the development of regulations, increased risk assessments, and inspections.

Program Increase 3:Workforce Shaping and Sustainment

Strategic Goal(s) & Objective(s): 3.1 Protect and Strengthen the resilience of the Nation's critical infrastructure and key resources; Enhance preparedness protection, screening and risk mitigation

PPA:

Total Request	1,388	1,252	288,210	981	922	234,870	951	887	248,994

Description of Item

- Background Investigations: \$7.7 million and 15 FTP/8 FTE.
- Bomb Appraisal Officer Support: \$1.6 million

Justification

Background Investigations: The Office of Security provides this critical function to the TSA mission and increased demands throughout the program have far exceeded the current staff's ability to effectively manage the workload. Additional positions are urgently required to keep pace with agency hiring demands and to ensure the efficient and timely adjudication and investigation process mandated by the Intelligence Reform and Terrorism Prevention Act of 2004 (the Act). There are currently 26,000 employees who have been employed at TSA for at least five years. The background of these individuals must be re-investigated. TSA will re-investigate these employees in a three-year phased approach, the first of which will begin in FY10. Also, in accordance with DHS MD 11050.2, Executive Order 12829, and the Act, further requirements for security background investigations necessitate the addition of 14 FTP.

BAO Support: In support of program increase in Aviation Security appropriation. The Transportation Security Support appropriation provides services as shown above.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA supports DHS Objective 3.1: Protect and strengthen the resilience of the Nation's critical infrastructure and key resources, by focusing resources on the Transportation Security Officer (TSO) workforce, specifically through ensuring readiness in areas where the threat is greatest. TSA will accomplish this objective by dedicating resources to workforce expansion, workforce retention incentives, workforce succession planning and leadership training, and workplace infrastructure support.

Workplace Infrastructure and Support

Background Investigations: The funding ensures TSA meets the timeliness completion rate requirements of security eligibility determinations, as mandated by the Intelligence Reform Act of 2004, and it addresses workload pressures generated by increasing security policy, management, and physical security issues. The additional funding for this program will speed the hiring process, clear re-investigation backlogs, and strengthen security through more thorough Minimum Background Investigations.

Program Increase 4:

DHS TRIP

Strategic Goal(s) & Objective(s): Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthen Screening of Travelers and Workers

PPA: Headquarters Administration

Program Increase: Positions 2 FTE 1 Dollars \$1,300

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							990	950	248,335
Program Increase							2	1	1,300
Total Request							992	951	249,635

Description of Item

This request is for 2 FTP, 1 FTE, and \$1,300,000. The FY 2010 implementation plans for this expanded DHS Office of Appeals and Redress will include increased hosting center support, enhancements to the existing Redress Management System operation to make it useful to other components as well as to DHS Headquarters, creating efficiencies in the tracking of redress requests, communications outreach – reaching out to the traveling public through brochures and tear sheets to be distributed at airports and other U.S. ports of entry (border crossings, cruise ports) to inform them about DHS TRIP, IT security Certification and Accreditation, and process mapping of expanded redress activity expected as a result of new credentialing programs.

Justification

This initiative will support DHS’s Traveler Redress Inquiry Program (DHS-TRIP), TSA's Checkpoint of the Future, and the Terrorist Screening Center's Office of Redress. It will provide a fully resourced, responsive, and centralized processing system for travelers who seek inquiry and resolution on screening or credentialing difficulties encountered during air or ground travel. It supports a DHS-wide traveler redress program involving several DHS components resulting in a uniform and consistent one-stop department-wide process for handling homeland security redress issues and complaints.

Centralization of DHS-TRIP processing system for travelers will decrease customer response time; ensure the reliability and integrity of DHS and TSA redress decisions; will enable enhanced information-sharing to the traveling public; and, will build appropriate capacity and capability to meet or exceed anticipated future redress needs generated by such upcoming DHS/TSA programs as Secure Flight.

The additional funding will enhance the implementation of laws requiring a redress program. PL 110-53 (To Provide for the Implementation of the Recommendations of the National Commission on Terrorist Attacks upon the United States) directs the Secretary of DHS to establish the Office of Appeals and Redress. The Secretary of DHS in turn designated TSA the lead agent for DHS-TRIP, as

the DHS Office of Appeals and Redress. PL 108-458 Intelligence Reform and Terrorism Prevention Act of 2004 (Secure Flight/Secure Flight Redress) mandates that TSA establish a process for providing redress to those individuals who have been misidentified as a person on the Federal watch list as well as those who have been placed on the Federal watch list based on erroneous or outdated information. PL 107-71 Aviation and Transportation Security Act (Registered Traveler/Registered Traveler Redress) directs TSA to establish a redress process for those who have applied and been denied the right to participate in the Registered Traveler program.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative directly impacts the TSA Offices of Intelligence (OI) and Transportation Threat Assessment and Credentialing (TTAC) as well as the DHS Screening Coordination Office (DHS-SOC) by providing an implementation vehicle for the legally-mandated requirements of PL 110-53, PL 108-458, and PL 107-71.

Non-funding for this initiative will significantly decrease TSA's and DHS' capability to meet the mandates set forth in PL 110-53, PL 108-458, and PL 107-71; will significantly increase TSA's and DHS' security risks and vulnerabilities for the incidence of terrorist activity within the United States; will increase the incidence of Congressional and public complaint and adverse comment regarding privacy and civil rights and liberties; and will increase the risk of costly and time-consuming litigation against TSA and DHS.

This initiative relates directly to DHS Strategic Goals 1 and 3 and the objectives under 1.3 and 3.1. Funding this initiative will accelerate efforts to establish a government-wide traveler screening redress process to resolve questions if travelers are incorrectly selected for additional screening.

Program Increase 5:

Information Technology Sustainment

Strategic Goal(s) & Objective(s): Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthen Screening of Travelers and Workers and Goal 3: Protect Critical Infrastructure; Objective 3.4: Protect Transportation Sectors

PPA: Information Technology

Program Increase:

Transportation Security Support: Positions _0_ FTE _0_ Dollars \$16,400

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level – Information Technology	0	0	180,592	141	135	472,799	155	149	483,995
Program Increase – Information Technology							0	0	16,400
Total Request							155	149	500,395

Description of Item

TSA requests \$16.4 million and 0 FTP/FTE in FY 2010 for the IT Sustainment initiative. The requested increase will be used to protect the IT infrastructure required to enable the operation of an agency of over 50,000 personnel spanning more than 400 locations in accordance with the DHS Data Center Migration initiative. It will also be used to enhance the communications system and improve efficiency at the checkpoints through the use of Whisper Communications.

The individual items and funding levels are as follows:

- **Data Center Migration:**
 - \$11.4 million and 0 FTP/FTE for the DHS Data Center Migration
- **Whisper Communications:**
 - \$5.0 million and 0 FTP/FTE for Whisper Communications at the TSA Checkpoints

Justification

Data Center Migration

With the funding of \$11.4 million, TSA will migrate its infrastructure to a consolidated DHS data center. FY 2010 data center consolidation funding will be used to continue ongoing system and application migration to the two existing DHS Enterprise Data Centers. The Data Center consolidation efforts will standardize IT resource acquisitions across components, streamline maintenance and support contracts, resulting in an enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time. This site will ensure the continuation of operations of over 50,000 personnel at more than 400 locations.

Whisper Communications

With \$5.0 million, the Whisper Communications initiative will expand wireless capabilities at Category X airports which serve 80 percent of the traveling public. Funding will provide approximately 700 secure multi-channel land mobile radios to checkpoints to improve efficiency of operations and expedite the screening of passengers. The whisper communications will improve teamwork, reduce anxiety, and enhance operational effectiveness in the checkpoint environment.

The above items provide TSA a stable, secure, and reliable IT operating environment to enable and improve mission accomplishment.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Information Technology (IT) Sustainment supports DHS Goal 1: Protect our Nation from Dangerous People; Objective 1.3 Strengthen Screening of Travelers and Workers, as well as Goal 3: Protect our Nation from Dangerous People; Objective 3.4: Protect Transportation Sectors. TSA will continue to perform at optimal levels through necessary improvements to computer hardware, software, network infrastructure, and network security. Funding the data center migration will ensure that the TSA IT environment remains secure and fully operational so that the agency can fulfill its primary mission of protecting the Nation's transportation systems to ensure freedom of movement for people and commerce. Finally, checkpoint efficiency will increase by ensuring that Transportation Security Officers (TSOs) have enhanced communications capacity.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security Transportation Security Administration

Justification of Proposed Changes in Transportation Security Support Appropriation Language

For necessary expenses of the Transportation Security Administration related to providing transportation security support and intelligence pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$950,235,000] \$1,004,580,000, to remain available until September 30, [2010: Provided, That of the funds appropriated under this heading, \$20,000,000 may not be obligated for headquarters administration until the Secretary of Homeland Security submits to the Committees on Appropriations of the Senate and the House of Representatives detailed expenditure plans for checkpoint support and explosive detection systems refurbishment, procurement, and installations on an airport-by-airport basis for fiscal year 2009:: Provided further, That these plans shall be submitted no later than 60 days after the date of enactment of this Act.] 2011. (Department of Homeland Security Appropriations Act, 2009.)

Explanation of Changes:

TSA has complied with the provisions included in previous language.

PPA Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$12,301	\$18,900	\$21,961	\$3,061

Salaries and Benefits includes costs for 167 FTE. The FY 2010 request includes \$184,000 for pay annualization, \$284,000 for COLA and program increase of 7 FTE and \$898,000.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$324	\$350	\$390	\$40

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request has an increase of \$40,000 for program increase and inflation.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$4	\$3	\$3	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$9,317	\$5,061	\$5,684	\$623

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included in this category is contractual services for intelligence support. The FY 2010 request has an increase of \$623,000 for enhanced information sharing and encounter management and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$208	\$125	\$143	\$18

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request reflects an increase of \$18,000 for enhanced information sharing and encounter management

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$0	\$22	\$22	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request remains static.

PPA Mission Statement

TSA Headquarters Administration include such critical functions as Assistant Secretary and Deputy Assistant Secretary, Office of Inspection, Chief Counsel, Finance and Administration, Legislative Affairs Special Counselor, Acquisition, and Strategic Communications and Public Affairs. These services are essential for the effective and efficient operation of the Agency.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$173,349	\$128,453	\$129,825	\$1,372

Salaries and benefits includes costs for 888 FTEs. The FY 2010 request reflects an annualization of \$1,252,000 and pay inflation of \$1,927,000, and a base increase of 1 FTE and \$79,000. It also reflects a program decrease of 34 FTE.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$8,767	\$7,549	\$8,047	\$498

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request reflects an increase of \$498,000 for program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$253	\$145	\$145	(\$0)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA Rent	\$1,828	\$1,355	\$1,516	\$161

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request reflects an increase of \$161,000 due to inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$21,003	\$18,980	\$21,238	\$2,258

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2009 request reflects the realignment, non-pay inflation, and efficiency. The FY 2010 request reflects an increase of \$2,258,000 due to inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and Miscellaneous Charges	\$790	\$617	\$650	\$33

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request reflects an increase of \$33,000 due to the program increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$145	\$170	\$170	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$20,870	\$19,516	\$22,538	\$3,022

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request reflects an increase of \$3,022,000 due to program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$48,232	\$48,793	\$54,807	\$6,014

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2010 request reflects an increase of \$6,014,000 due to program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$7,717	\$6,825	\$7,237	\$412

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request reflects an increase \$412,000 due to program increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$1,023	\$886	\$991	\$105

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request reflects an increase of \$105,000 due to program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$18	\$16	\$16	(\$0)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$537	\$547	\$612	\$65

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request reflects an increase of \$65,000 due to inflation and program increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$2,066	\$1,000	\$1,119	\$119

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 request reflects an increase of \$119,000 due to program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$1,543	\$18	\$18	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request remains static.

PPA Mission Statement

Human Capital Services include all the activities that support the Office of Human Capital Services (OHCS) including the recruitment, assessment, servicing, and payroll of TSA's Transportation Security Officers and other workforce at headquarters, field locations, and airports, and personnel policies, programs and systems.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$0	\$35,983	\$38,986	\$3,003

Salaries and benefits includes costs for 193 FTEs. In FY 2009, the HR Services PPA in the Aviation Security Appropriation and funding of the Office of Human Capital in the HQ Administration, Transportation Security Support Appropriation were realigned into this PPA. The increase also reflects a pay annualization of \$351,000, a pay COLA of \$540,000.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$0	\$1,704	\$1,945	\$241

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request reflects an increase of \$241,000 for program increase and inflation.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$0	\$25	\$28	\$3

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request reflects an increase of \$3,000 for program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$0	\$14	\$14	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$0	\$173,930	\$178,662	\$4,732

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2010 request reflects an increase of \$4,732,000 for program increase and inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$0	\$6,228	\$6,480	\$252

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request reflects an increase of \$252,000 for program increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$0	\$3	\$3	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$0	\$218	\$220	\$2

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 request reflects an increase of \$2,000 for program increase and inflation.

PPA Mission Statement

Information Technology provides and maintains the IT and telecommunications infrastructure services and support for all of TSA. TSA will continue to enhance the effectiveness of its entire workforce through its IT core support. FY 2009 and FY 2010 reflect the consolidation of IT funds from the Headquarters Administration PPA and the Airport Management IT and Support PPA.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$0	\$21,338	\$23,947	\$2,609

Salaries and benefits includes costs for 149 FTEs. The FY 2010 request includes an increase of 14 FTE and \$2,609,000 attributed to realignments, pay annualization, and pay COLA.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$4	\$300	\$300	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request remains static.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$35	\$35	\$35	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA Rent	\$0	\$1,100	\$1,100	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and Misc. Charges	\$805	\$61,600	\$61,600	\$0

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	(\$3)	\$0	\$0	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$55,256	\$95,500	\$95,650	\$150

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes an increase of \$150,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$89,975	\$175,200	\$182,812	\$7,612

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes an increase of \$7,612,000 for the DHS Working Capital Fund and Data Center Migration.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$22,736	\$71,076	\$71,076	\$0

Purchases from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$6,909	\$30,000	\$42,375	\$12,375

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account. The FY 2010 request includes an increase of \$12,375,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$44	\$650	\$650	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Some software purchases and computer supplies are included in this object class. The FY 2010 request remains static.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$4,831	\$16,000	\$21,565	\$5,565

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes an increase of \$5,565,000.

BUDGET REQUEST AND SUPPORTING INFORMATION

TRANSPORTATION SECURITY ADMINISTRATION FEDERAL AIR MARSHAL SERVICE

I. Appropriation Overview

A. Mission Statement for Federal Air Marshal Service:

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals and other FAMS law enforcement resources in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, crew and other transportation modes within the Nation's general transportation systems.

B. Budget Activities:

Management and Administration (M&A)

The FAMS' mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS' M&A programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include FAMS participation in Joint Terrorism Task Force (JTTF) operations and investigations, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, logistics, and related services.

Travel and Training (T&T)

In order to maintain optimum readiness and perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. Federal Air Marshals (FAMs) must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this PPA funds FAMS' mission travel activities, which are an integral component to the international and domestic flight coverage activities which are core to the FAMS mission.

C. Budget Request Summary:

The Transportation Security Administration (TSA) requests \$860,111,000 in FY 2010, an increase of \$40,630,000 over FY 2009. The total adjustments-to-base are \$33,101,000 which includes a transfer of \$4,430,000 to the Transportation Security Support Appropriation for TSA's human resources contract. The program increase totals \$7,529,000 to:

- Annualize the FY 2009 Non-Pay Enhancement (\$5,429,000)
- Increase the operational base for the Mission Scheduling and Notification System in order to refresh/upgrade this system and maintain operational effectiveness. (\$2,100,000)

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security
Transportation Security Administration
Federal Air Marshal Service**

Summary of FY 2010 Budget Estimates by Program/Project Activity
(Dollars in Thousands)

Program/Project Activity	FY 2008 Actual		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010

III. Current Services Program Description by PPA

Department of Homeland Security
Transportation Security Administration
Federal Air Marshal Service
Program Performance Justification
(Dollars in thousands)

PPA: MANAGEMENT AND ADMINISTRATION

	Perm Pos	FTE	Amount
2008 Actual	\$677,770
2009 Enacted	\$725,081
2010 Adjustments-to-Base	0	0	\$33,101
2010 Current Services	0	0	\$758,182
2010 Program Change	\$4,387
2010 Request	0	0	\$762,569
Total Change 2009-2010	0	0	\$37,488

The Transportation Security Administration requests \$762.6 million for this activity. This includes an increase of \$15.5 million over FY 2009 for pay inflation, \$22.1 million in pay and non-pay resources to annualize FY 2009 enhancements, and \$4.4 million in proposed increases for the FAMS Mission Scheduling and Notification System (MSNS) and annualization of the non-pay FY 2009 enhancement. The request also includes a transfer of \$4.4 million to the Transportation Security Support Appropriation to centralize and streamline management of TSA's human resources contract.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Management & Administration (M&A) PPA funds the FAMS' payroll costs and supports all operational and infrastructure requirements with the exception of training and travel expenses. The vast majority of this PPA provides the salaries for FAMS and allows the workforce to provide the vital protective and enforcement services necessary for both domestic and international air travel.

The remaining balance of M&A supports the continuing development and maintenance of the Service's infrastructure, internal business processes, and strategic systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed below, M&A provides funding for workforce management activities (background investigations, security clearances, etc); information technology; leasing and maintenance of facilities in Washington DC area, Atlantic City, NJ, and twenty-one field offices and four Resident Agent in Charge (RAC) offices across the country; and program infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security.

Performance of the FAMS' mission requires a host of critical planning, operational and support programs to protect the public from the threat of a terrorist attack or other criminal activity. As a result, this PPA encompasses an array of vital operational and infrastructure components to include:

- Joint Terrorism Task Force (JTTF) participation and investigations
- The Tactical Information Sharing System (TISS) and MSNS
- Participation in and support of Visible Intermodal Prevention and Response (VIPR) team deployments targeting potential threats to aviation, rail, mass transit, and land-based transportation systems
- Workforce sustainment
- Logistics/Information Technology

During the course of operations, FAMS are continually deployed (24/7) using a comprehensive, risk-based strategy to protect key flights, both within the United States and in the international arena. MSNS, a sophisticated flight/mission scheduling and notification system allows for the assignment of FAMS to planned flights, while enabling the Service to quickly adapt mission tempo and flight selection/coverage to meet emerging threats.

Functionally integral with the Air-to-Ground Communications System, the TISS enables the collection, analysis, and dissemination of intelligence information observed by FAMS while conducting their daily duties. FAMS routinely submit Suspicious Incident Reports (SIRs) when they observe activities that fall below a predetermined threshold of an actionable incident. The FAMS' Transportation Information Branch (TIB) reviews these reports and uses the information to identify trends, patterns, or associations that may reveal circumstances or subjects that are deemed to be of interest to Department of Homeland Security (DHS) intelligence offices.

VIPR deployments are conducted in all modes of transportation to effectively detect, deter, defeat, and disrupt potential terrorist and/or criminal activity. VIPR operations are planned and implemented through a risk-based approach utilizing existing intelligence, empirical data, security, and threat based assessments and analysis. The operations consist of teams of TSA personnel including FAMS, Transportation Security Inspectors (TSIs), Transportation Security Officers (TSOs), Behavioral Detection Officers (BDOs), canine teams, and local and state law enforcement officers. In addition, VIPR deployments incorporate elements of randomness and are unpredictable in frequency, location, and duration. These resources are used to enhance TSA's overall ability to screen passengers, identify suspicious behavior, and act as a visible deterrent in multiple transportation sectors.

Of the 483 VIPR operations completed by TSA during the first quarter of FY 2009, approximately 60 percent were dedicated to the aviation domain, including air cargo, commercial aviation, and general aviation. The remaining VIPR operations were dedicated to the surface domain, including highways, freight rail, pipelines, mass transit, and maritime.

The following table provides the major component parts of the M&A PPA, with resources shown in millions of dollars.

	FY 2010
Payroll, Compensation and Benefits	\$659.2
Information Technology	42.9
Operations Infrastructure	56.1
Total	\$758.2

Payroll/OWCP -- \$659.2M: This component, which amounts to approximately 77 percent of the FAMS budget, covers all pay, compensation and benefits costs for the Service's FAM and civilian work force. The missions that FAMS perform every day support the Service's core capability and effort in achieving its goal of detecting, deterring, and preventing hostile acts within the aviation and transportation domains. Funding within this component includes resources for pay, compensation and benefits, overtime, Law Enforcement Availability Pay (LEAP), awards, workers' compensation, and a portion of the overall resources required for Permanent Change of Station (PCS) expenses. FAMS personnel are arrayed throughout the country and provide the manpower necessary to conduct the Service's full range of operations.

In FY 2008, the FAMS achieved an FTE utilization rate of 98 percent and plans to achieve 100 percent utilization rates for FYs 2009 and 2010.

Information Technology (IT) – \$42.9: The FAMS IT Systems are critical for providing the Service and individual FAMS with the vital automated tools, systems, and computer security technology necessary to ensure accomplishment of the FAMS mission.

In FY 2008, the FAMS initiated the technology refresh of personal data assistant (PDA) equipment, which are used by FAMS during mission status as a critical means of communication to share real time tactical information, and for business and administrative applications. TSA plans to complete the refresh in FY 2009. In FY 2009, the FAMS will also work to establish DHS One Net Connectivity, with plans in FY 2010 to migrate the Office of Law Enforcement (OLE) critical systems to the DHS Datacenter 2 in support of disaster recovery efforts.

In addition to funding a critical IT network needed for managing the FAMS enforcement and business operations, this PPA funds the Mission Scheduling and Notification System (MSNS), the core automated system used by the Service for planning, scheduling, and implementing FAMS flight coverage operations. The MSNS uses a risk-based process that selects from among over 28,000 daily U.S. commercial airline flights to prioritize deployments of thousands of FAMS worldwide. The MSNS is critical to the accomplishment of the FAMS' mission in as much as its loss, or even an extended interruption, would cause a deterioration of mission coverage noticeable to the airlines, the public, and our Nation's enemies.

Operations Infrastructure -- \$56.1M: The Operations Infrastructure component funds critical operations infrastructure activities including, but not limited to, Permanent Change of Station (PCS), rent and utilities, facility build out and maintenance, telecommunications, background investigations, and logistics management. In FY 2009, the FAMS will finalize the relocation of the Los Angeles Field Office to better and more efficiently support critical mission operations. In FY 2010, the FAMS plans to continue to provide current services level support for this critical program area.

PPA: TRAVEL AND TRAINING

	Perm Pos	FTE	Amount
2008 Actual	\$91,658
2009 Enacted	\$94,400
2010 Adjustments-to-Base	0	0	\$0
2010 Current Services	0	0	\$94,400
2010 Program Change\$3,142
2010 Request	0	0	\$97,542
Total Change 2009-2010	0	0	\$3,142

The Transportation Security Administration requests \$97.5 million for this activity in FY 2010. This includes \$3.1 million in non-pay resources to annualize FY 2009 enhancements.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the major component parts of the T&T PPA, with resources shown in millions of dollars.

	FY 2010
Travel	\$80.6
Training	13.8
Total	\$94.4

The Travel and Training (T&T) PPA supports the FAMS' core requirements for travel, travel-associated costs, and training. Through its training programs, the FAMS also provides effective learning environments and opportunities for its employees, utilizing current and relevant curricula and training methodologies to enable and challenge FAMS to perform their duties and responsibilities in a highly effective and efficient manner.

Travel -- \$80.6M: This component funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat and intelligence, consequence, and vulnerability.

In January 2009, the Government Accounting Office (GAO) released a public version of a report requested by members of Congress to examine (1) the FAMS's operational approach or "concept of operations" for covering flights, (2) to what extent this operational approach has been independently evaluated, and (3) the processes and initiatives the FAMS established to address workforce-related issues. GAO examined previous studies conducted by the Homeland Security Institute (HSI) that independently assessed the FAMS's operational approach and found it to be reasonable. GAO found the institute's evaluation methodology to be reasonable.

The FY 2009 appropriation increased mission travel to maintain priority coverage of international and domestic flights using available FTE. The FY 2010 request continues these levels within available resources.

Training -- \$13.8M: Upon entry into the FAMS Training program, FAM trainees undergo an intensive 15-week training program conducted at the Federal Law Enforcement Training Center (FLETC) in Artesia, New Mexico and at the FAMS Training Center in Atlantic City, New Jersey. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, FAMS undergo recurrent, in-service training to maintain their necessary skill base and meet firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any federal agency (85% or 285/300). For FY 2008, 99.8% of FAMS met their quarterly firearms qualification. The average rate of accuracy in FAMS' firearms re-qualification was 95.3% for FY 2008.

In FY 2008, the FAMS achieved Federal Law Enforcement Training Accreditation (FLETA) for the Federal Air Marshal Service Training Center (FAMSTC) and Federal Air Marshal Training Program II (FAMTPII) in Atlantic City, NJ. In FY 2009, the FAMS plans to achieve FLETA accreditation of the Federal Air Marshal Training Program I (FAMTPI) in Artesia, NM and the FAMS Instructor Development Program (IDP).

In FY 2008, the FAMS also initiated the procurement of an aircraft cabin training simulator that will reside inside an existing building at the FAMS Training Center (FAMSTC) located at the William J. Hughes Technical Center in Atlantic City, NJ. This simulator will replace the outdated L1011 and 727 airframes currently in use at the FAMSTC. The FAMS estimates that the simulator will be completed and operational by mid-FY 2010.

In addition in FY 2008, the FAMS also contracted with a fitness technology firm to conduct a validation study to define the related physical performance standards for the Federal Air Marshal SV-1801 job series. Upon completion of the project in early FY 2010, the contractor will recommend the minimum level of fitness status necessary to ensure safe and efficient job performance. This will include the development of a mandatory physical fitness standard applicable to all FAMS, regardless of age and gender.

In FY 2009, the Curriculum Review Conference (CRC) process and associated working group will be the vehicles that will facilitate change in training curriculum, addressing emerging personnel and mission requirements. The CRC after-action report will be used to modify and streamline relevant curricula and training methodologies thereby improving Federal Air Marshal Training Program-I and Federal Air Marshal Training Program-II course content and practical exercises. The CRC process supports the FLETA accreditation standards.

This PPA component also provides required professional training for FAMS technical professionals and support staff. Examples of professional/technical training include mandated annual explosives technical training for re-qualification and re-certification, mandated annual contracts/warrant officer training, mandated FAMS instructor training, leadership/management training, and professional/career development courses. In FY 2010, the FAMS plans to continue to provide current services level support for this critical program area.

Total Request							0	0	2,100

Description of Item

Management and Administration PPA:

- MSNS Refresh/Upgrade
 - \$2.1 million to refresh and upgrade all MSNS server and communication hardware systems for FAMS

Justification

MSNS Refresh/Upgrade

The purpose of MSNS is provide the critical, automated analytical tools and scheduling capabilities necessary for the Service to assess and prioritize flight selection, and to readily schedule and implement U.S. domestic and international flight coverage.

The MSNS was first purchased and implemented in 2002 as part of the initial stand-up of the FAMS. Most MSNS hardware will reach the end of its planned life cycle by FY 2010 and will no longer be in compliance with existing IT standards.

TSA requests \$2.1 million to initiate technology refreshment for MSNS. This investment would be dedicated to recapitalizing/updating priority MSNS hardware and associated software requirements in FY 2010 and FY 2011, and supporting an improved technology refreshment and sustainment cycle in the out years.

Failure to replace the necessary MSNS components could increase the likelihood of a system failure that would significantly disrupt FAMS flight scheduling operations and, by extension, the ability to readily protect priority international and domestic flights. Continuing to support the aging equipment could also make it more costly or impossible to implement new Commercial Off-the-Shelf (COTS) or customized software updates needed to keep pace with industry requirements, and to maintain system compliance with IT security protocols.

Impact on Performance (Relationship of Increase to Strategic Goals)

The enhancement requested for the MSNS Refresh/Upgrade directly supports DHS Strategic Goal 3.4: Protect Transportation Sectors.

By providing critical, automated analytical tools and scheduling capabilities the FAMS are able to assess and prioritize flight selection. A refreshed and upgraded MSNS ensures that the TSA IT environment remains secure and fully operational so that the agency can fulfill its primary mission of protecting priority international and domestic flights.

Program Increase 2: Annualization of FY09 Enhancement

Strategic Goal(s) & Objective(s): Goal 3: Protect Critical Infrastructure; Objective 3.4: Protect Transportation Sectors

PPA: Management and Administration (M&A)
Travel and Training (T&T)

Program Increase:

Federal Air Marshal Service: Positions 0 FTE 0 Dollars \$5,429

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Program Increase – M&A							0	0	2,287
Program Increase – T&T							0	0	3,142
Total Request							0	0	5,429

Description of Item

The FY 2010 request includes the annualization of non-pay for the FY 2009 enhancement.

Justification

This funding is critical to ensure the non-pay funding received in FY 2009 is annualized in FY 2010. Not receiving this funding would necessitate a reduction in the Federal Air Marshal Service (FAMS) FTE levels. This funding supports the necessary operational and travel/training expenses associated with the increased staffing levels the FAMS received in FY 2009. Cuts in flight protection would run directly counter to sustained intelligence trends indicating the continued interest of terror groups in targeting our nation’s aviation sector and reverse a sustained effort on the part of policy makers to sustain FAMS mission coverage capability.

Impact on Performance (Relationship of Increase to Strategic Goals)

The enhancement requested for the non-pay portion of the FY 2009 enhancement directly supports DHS Strategic Goal 3.4: Protect Transportation Sectors.

By maintaining coverage of targeted critical domestic and international flights selected using the FAMS’ risk-based Concept of Operations (CONOPS), FAMS is better able to detect, deter, and defeat terrorist or other criminal hostile acts targeting the Nation’s aviation and transportation domain. The FAMS’ ability to identify and deploy personnel on the highest risk flights reduces the overall risk of a terrorist or criminal hostile act occurring.

PPA Mission Statement

The Management and Administration (M&A) PPA funds the FAMS' staffing/payroll requirements, which include: salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements including the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems and explosives unit operations; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods, utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$591,440	\$624,399	\$659,200	\$34,801

The FY 2010 request includes \$37,531,000 for the annualization of the FY 2009 Budget Enhancement, the FY 2009 pay raise and the FY 2010 pay raise. The FY 2010 request also includes a decrease of \$2,730,000 and associated FTE as a result of the transfer of funding to the Transportation Security Support Appropriation for the funding of contract human resources services.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$206	\$6,267	\$267	(\$6,000)

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2010 request includes a decrease of \$6,000,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$2,057	\$2,661	\$3,361	\$700

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes an increase of \$700,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$13,282	\$13,839	\$14,339	\$500

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2010 request includes an increase of \$500,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and Miscellaneous charges	\$12,347	\$12,643	\$13,651	\$1,008

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electric, water usage, etc. The FY 2010 request includes an increase of \$1,008,000 for the annualization of the FY 2009 Budget Enhancement.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$9,961	\$26,876	\$12,076	(\$14,800)

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2010 request includes a decrease of \$14,800,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$17,119	\$15,235	\$23,946	\$8,711

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2010 request includes an increase of \$611,000 for the annualization of the FY 2009 Budget Enhancement. In addition, the FY 2010 request includes an increase of \$9,800,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

The FY 2010 request also includes a decrease of \$1,700,000 as a result of the transfer of funding to the Transportation Security Support Appropriation for the funding of contract human resources services.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$11,169	\$4,600	\$12,501	\$7,901

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2010 request includes an increase of \$21,000 for the annualization of the FY 2009 Budget Enhancement and an increase of \$7,880,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$292	\$1,533	\$1,900	\$367

Medical care includes payments to contracts for medical services, but excludes Federal employees who are reportable under OPM regulations as federal employees. The FAMS uses this series for a contract with Federal Occupational Health (FOH). The FY 2010 request includes an increase of \$367,000 for the annualization of the FY 2009 Budget Enhancement.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of Equipment	\$3,164	\$1,426	\$5,035	\$3,609

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2010 request includes an increase of \$9,000 for the annualization of the FY 2009 Budget Enhancement and an increase of \$1,500,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this change. In addition, the FY 2010 request includes an increase of \$2,100,000 for the MSNS refresh/upgrade enhancement.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Subsistence & Support of Persons	\$0	\$780	\$0	(\$780)

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal account for the board, lodging, and care of persons, including prisoners. This would be used by the FAMS only for full PCS moves. FAMS has consolidated the execution of PCS funding within Object Class 25.3. The FY 2010 request includes a decrease of \$780,000 to implement this change to better reflect costs by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & Materials	\$3,493	\$1,821	\$3,096	\$1,275

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2010 request includes an increase of \$75,000 for the annualization of the FY 2009 Budget Enhancement and an increase of \$1,200,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$7,082	\$7,614	\$7,810	\$196

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2010 request includes an increase of \$196,000 for the annualization of the FY 2009 Budget Enhancement.

PPA Mission Statement

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The Travel portion of the PPA supports the FAMS' requirements for mission travel (per diem, lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals' ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes.

T&T also supports the FAMS' comprehensive training requirements to include TP I (Basic Law Enforcement Training) and TP II (FAMS specific training) training of new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional & training gear, equipment and clothing. The T&T PPA also supports the required professional training for FAMS explosives technicians and for other professional development and career training as required.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$77,316	\$74,638	\$82,225	\$7,587

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance and site visits. The FY 2010 request includes an increase of \$2,587,000 for the annualization of the FY 2009 Budget Enhancement and an increase of \$5,000,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$5,363	\$12,784	\$8,232	(\$4,552)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC training costs, hotel lodging contracts for TP II training and field recurring range fees for Federal Air Marshals' quarterly requalifications. The FY 2010 request includes an increase of \$448,000 for the annualization of the FY 2009 Budget Enhancement and a decrease of \$5,000,000 for a technical adjustment to better reflect how funds are executed by object class. There is no program impact associated with this technical change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$3,014	\$5,102	\$5,209	\$107

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FAMS uses this object class series for ammunition, armory supplies and training supplies. The FY 2010 request includes an increase of \$107,000 for the annualization of the FY 2009 Budget Enhancement.

26.0	Supplies & materials	53	---	---	---
Total, Air to Ground		\$2,053	\$0	\$0	\$0
Full Time Equivalents		---	---	---	---

PPA Mission Statement

Air to Ground Communication System (AGCS) – The AGCS is a secure, wireless system being deployed and refined for use by Federal Air Marshals and other personnel (e.g., flight crews, other law enforcement) as an emergency in-flight air-to-ground communication system. This system provides an invaluable tool for alerting law enforcement and authorities of potential terrorist or criminal activities aboard aircraft and for otherwise improving in-flight safety. This obligation is from no-year funds provided through a previous appropriation.

A. Mission and Description of the Transportation Security Administration

U.S. transportation systems move billions of people and trillions of dollars worth of goods each year that are vital to the Nation's economic prosperity, global competitiveness, and national security. The Aviation and Transportation Security Act established the Transportation Security Administration (TSA) to protect these transportation systems and ensure the freedom of movement for people and commerce. The focus of TSA is to identify, prioritize, and mitigate risks, ultimately minimizing the impact of potential incidents. Information sharing among agencies and stakeholders – including intelligence information – is a cornerstone of the risk management model.

TSA has devoted its resources to strengthening the security of the U.S. transportation network. Working with state, local and regional partners, TSA oversees security for highways, railroads, buses, mass transit systems, ports and 450 U.S. airports. TSA has grown from a small cadre of employees to a dedicated workforce of approximately 52,000 people that protect every domestic commercial airport, strengthen the nation's surface transportation modes and work with international partners around the world.

TSA's specific responsibilities include:

- Ensuring a thorough and efficient screening of all aviation passengers and baggage;
- Promoting confidence by deploying Federal Air Marshals to detect, deter, and defeat hostile acts targeting air carriers, airports, passengers, and crews;
- Managing security risks of the surface transportation systems by establishing clear lines of communication and collaborative working relationships with federal, local and private stakeholders, providing support and programmatic direction, conducting on-site inspections, and developing security programs; and
- Developing and implementing more efficient, reliable, integrated, and cost effective terrorist-related screening programs.

B. Major Activities and Key Strategic Goals:

In FY 2009, TSA was appropriated \$6.99 billion in order to maintain its critical mission and expand such areas as the deployment of emerging technologies to screen airline passengers and carry-on baggage for explosives and weapons, increase Federal Air Marshal coverage of international flights, expand technology pilots for air cargo screening, and implement new regulations and activities authorized by the 9/11 Act. In addition, TSA received a supplemental of \$1 billion from the American Recovery and Reinvestment Act (ARRA), P.L. 111-5 to enhance checked baggage systems and checkpoint equipment.

TSA's major activities are represented by the following programs:

The Aviation Security program ensures the screening of every passenger and every bag boarding a commercial aircraft, including international travelers arriving in the United States before they meet a connecting flight. TSA employs a team of highly trained, professional, multi-skilled Transportation Security Officers (TSOs) that perform physical and behavioral screening to counter constantly changing threats and operate state-of-the-art screening equipment.

As part of its improved security measures, TSA is deploying its workforce where it can achieve the best security results most efficiently and with minimal hassle for travelers. These improvements have enabled TSA to add critical new security layers based on risk. The Travel Document Checker (TDC)

program is now operating at all airports with federalized security screening and enhances security by disrupting and detecting individuals who attempt to board an aircraft with fraudulent documents. Also, Behavior Detection Officers (BDOs) have been deployed at the Nation's busiest airports as part of the Screening Passengers by Observation Technique (SPOT) program. The SPOT program uses non-intrusive behavior observation and analysis techniques to identify potentially high-risk passengers based solely on their exhibited behavior. BDOs are trained to detect individuals exhibiting behaviors that indicate they may be a threat. The program is a derivative of other successful behavioral analysis programs that have been employed by law enforcement and security personnel both in the U.S. and around the world. Some of its law enforcement partners at the local and Federal level have asked TSA to provide training on this successful program since it can be used in multiple environments to detect different types of threats.

TSOs utilize multiple technologies to screen passengers, their carry-on baggage, and their checked baggage. Checked baggage screening devices and in-line systems will be installed in the Nation's airports. An in-line baggage screening system allows TSA to integrate the mini van-sized explosive detection systems, or EDS machines, normally seen in airport terminal lobbies, with an airport's behind-the-scenes baggage handling conveyor system. These systems rapidly move baggage from the counter, through screening areas where it is screened for explosives, and onto various departing aircraft, fully integrated into the airport's baggage handling system. In-line systems provide more reliable baggage delivery, greater efficiency, and increased flexibility for traffic growth while also decreasing life cycle costs for the EDS program.

TSA also plays a key role in air cargo security. Safeguarding the Nation's air cargo transportation system is a shared public and private sector responsibility. ATSA charges TSA with the enforcement of statutory and regulatory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air. The 9/11 Commission Act of 2007 (9/11 Act) requires TSA to (1) establish a system to screen 100 percent of cargo transported on passenger aircraft by August 2010; (2) provide a level of security commensurate to that of passenger baggage; and (3) meet inspection benchmarks. TSA met the goal of 50 percent screening for all outbound air cargo from U.S. airports in February 2009 and in FY2010 will focus its efforts to meet the 100% screening deadline.

TSA programs go beyond screening to secure transportation systems. Within TSA, the Office of Law Enforcement/ Federal Air Marshal Service (OLE/FAMS) program serves as the primary law enforcement entity. FAMS deploy on flights around the world and in the United States. While the primary mission of protecting air passengers and crew has not changed much over the years, Federal Air Marshals have an ever-expanding role in homeland security and work closely with other law enforcement agencies to accomplish their mission. Currently, air marshals staff several positions at different organizations such as the National Counterterrorism Center, the National Targeting Center, and on the FBI's Joint Terrorism Task Forces. They are also distributed among other law enforcement and homeland security liaison assignments during times of heightened alert or special national events.

OLE/FAMS have robust liaison relations with foreign air security partners and conduct training for foreign air marshals in relation to international terrorism. TSA continues to engage in an integrated global strategy to help deter terrorism worldwide, encourage the emergence of air marshal programs in other countries, and develop operational and training relationships with its international partners.

In FY 2008, TSA's mission coverage on critical international flights was accelerated amid heightened concerns about potential terrorism threats originating from Britain and other areas of Europe. In both

FY 2009 and FY 2010, TSA will continue to assign FAMs to targeted critical flights and maintain the international mission tempo using a risk-based methodology.

TSA's National Explosives Detection Canine Team Program (NEDTP) resides under OLE/FAMS. NEDTP prepares dogs and handlers to serve on the front lines of America's War on Terror. These very effective mobile teams can quickly locate and identify dangerous materials that may present a threat to transportation systems. By quickly ruling out the presence of dangerous materials in unattended packages, structures or vehicles, canine teams act to allow the free and efficient flow of commerce. Canines are deployed in all modes of transportation. TSA plans to have over 749 teams deployed in Aviation, Air Cargo, and Surface systems by the end of FY 2009, with the goal of reaching 780 teams in FY 2010.

The Surface Transportation Security program manages the security risk to the U.S. surface transportation system while ensuring people and commerce move freely. These systems include approximately 775 million passengers traveling on buses each year; over 9 billion passenger trips on mass transit per year; nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck); over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of Interstate highway and 114,700 miles of National Highway System roads); 582,000 bridges over 20 feet of span; 54 tunnels over 500 meters in length; and nearly 2.2 million miles of pipeline.

TSA and its partners have developed best practices, standards, and regulations to protect the transportation infrastructure through the continuing process of Corporate Security Reviews. TSA also issued a Notice of Proposed Rule Making for rail security that clarifies the agency's inspection authority, imposes security requirements for freight and passenger rail carriers transporting hazardous materials, and specifies reporting requirements for security concerns and incidents.

The High Threat Urban Areas (HTUA) initiative identifies urban areas where an airborne release of toxic inhalation hazards (TIH) chemicals from rail shipment could be catastrophic. HTUA vulnerability assessments will continue to be conducted in rail corridors. In FY 2009 and 2010, TSA is continuing inspections, monitoring and enforcing compliance with standards and regulations, along with designing and implementing vulnerability assessment models for all surface transportation modes.

The Surface Transportation Security Inspection Program (STSIP) is a unique and critically important Federal inspection and compliance program that is breaking new ground in U.S. surface transportation security. With initial emphasis on freight railroads and mass transit and passenger rail systems, the STSIP has set out to enhance security preparedness in an industry that is both vital to the economic well-being of America and is the largest transporter of passengers in the country. In FY 2009 and 2010, surface inspectors will continue to conduct on-site inspections to ensure compliance with security standards and guidelines, security directives, and security regulations. The STSIP will enhance information sharing, highlight best security practices, evaluate security system performance, and discover and assist in mitigating gaps and vulnerabilities in the industry's security systems.

The STSIP program will also continue its large presence on Visual Intermodal Prevention and Response (VIPR) teams. TSA continues to enhance security in all modes of transportation, through this program. VIPR teams consist of FAMs, Transportation Security Inspectors (TSI), TSOs, BDOs, and explosives detection canine teams. The VIPR teams are used to screen passengers, look for suspicious behavior and act as a visible deterrent in multiple transportation sectors, including buses, mass transit and airports.

The Transportation Threat Assessment and Credentialing (TTAC) program reduces the probability of a successful terrorist or other criminal attack to the transportation system through threat assessment methodologies that identify known or suspected terrorist threats working or seeking access to the Nation's transportation system. TSA serves as the Department lead for all name-based security threat assessments in addition to the background check and credentialing services for transportation industry workers and domestic passengers. Currently, TSA vets and adjudicates approximately 400,000 cases a week by reviewing and assessing biographic information, and close to 25,000 cases a week based on biometric checks against criminal databases. Additionally, the TTAC program perpetually vets over 7 million people per day, adjudicates over 12,000 cases per week and responds to over 750 redress requests a week.

On January 27, 2009, the TSA Secure Flight program began its year-long process of absorbing the matching of over two million domestic airline passengers daily to the No-Fly and Selectee subsets of the Terrorist Screening Database (Watch List). Previously air carriers were responsible for the screening of passengers against the Watch List. The Secure Flight program provides a consistent watch list matching process across all aircraft operators; allows for earlier law enforcement notification and coordination if necessary; and decreases the chance of compromised Watch List data due to its limited distribution. Through the consolidation of passenger pre-screening processes, the Secure Flight program will improve the Federal government's ability to prevent terrorists from boarding an aircraft. Watch List matching of passengers on foreign air carriers is also slated to be completed in FY 2010.

The Transportation Worker Identification Credential (TWIC) program establishes an integrated, credential-based, identity verification program through the use of biometric technology. In order to gain unescorted access to secure areas within the transportation system, workers are required to undergo a security background check before they are issued a TWIC card. The card is intended to be integrated into any existing or newly-developed access control system deployed by the transportation sectors. Other vetting programs include Hazardous Materials Commercial Driver's License Endorsement (HazMat CDL) and Alien Flight Student Program (AFSP). These programs enhance security across different transportation domains. The risk-analysis being performed is scalable for use in other sectors of this dynamic network and for other vetting populations should they be added.

Through its Vetting Infrastructure Modernization Program, TSA is strengthening its screening and credentialing framework and continues to work towards further reducing the threat to national security and transportation security. In FY 2010, TSA will continue the modernization efforts to enhance and stabilize the TTAC vetting infrastructure needed to vet populations that access the most critical transportation sectors. The resulting enhanced vetting infrastructure will eliminate existing vulnerabilities and will integrate an end-to-end capability using a universal enrollment and vetting process to conduct and manage identities, credentials and benefits, investigations, and security threat assessments for a growing population. This vetting enhancement will also allow for a universal fee process for TSA vetting programs.

The Transportation Security Support program provides the services that support the operational needs of TSA's extensive airport/field and headquarters personnel and infrastructure. The management and support of the organization is accomplished by staff in Washington, D.C., and five strategically located Mission Support Centers (MSCs). TSA has developed and will maintain a flat organizational structure that emphasizes front-line service delivery with well-trained managers supported by an array of services from Washington, D.C. This program contains four main components: Human Resource (HR) Services, Intelligence, Headquarters (HQ) Administration, and Information Technology (IT).

In an effort to improve contract management and reduce administrative overhead, TSA consolidated three previously human resource contracts into a single contract. This program, known as the Integrated Hiring Operations Program (IHOP), is expected to achieve financial and performance efficiencies through consolidation. In FY 2009, transition of services to the IHOP vendor will be complete. In FY 2010, TSA will review the service levels being delivered and the methodologies, tools, and staffing levels being employed by the IHOP vendor with the objective of identifying opportunities for improvements in order to realize even greater program efficiencies and effectiveness.

The Support program funds IT for headquarters and field offices as well as the core IT program and telecommunications infrastructure for all of the TSA managed enterprise-wide IT services. In FY 2010 DHS proposes consolidation of the DHS Enterprise Data Centers. This effort will standardize IT resource acquisitions across components and streamline maintenance and support contracts, resulting in an enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

Key Strategic Goals:

Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthen Screening of Travelers and Workers

TSA's mission is to ensure the safe flow of passengers and commerce within the United States by operating robust, overlapping layers of security throughout the Nation's transportation system. Through the application of threat assessment methodologies, TSA intends to identify known or suspected terrorist working or seeking access to the Nation's transportation system. TSA is the transportation community's source for timely, flexible and scalable security threat assessment services for airline passengers and domestic workers seeking access to critical transportation sectors. In the case of a potential match, TSA provides threat assessment information to law enforcement and operational security organizations to keep individuals who pose a threat from gaining access to the transportation systems.

Goal 2: Protect our Nation from dangerous goods; Objective 2.3: Prevent and detect chemical and explosive attacks

TSA works to prevent chemical and explosive attacks through programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security now include emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols. The 9/11 Act further strengthens TSA's ability to prevent and detect chemical and explosives attacks through its authorization of extensive Air Cargo screening.

Goal 3: Protect Critical Infrastructure; Objective 3.4: Protect Transportation Sectors

Enhancing screening through improved checkpoint technology will refine passenger security for aviation. This initiative extends beyond the airport Checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. Focus is on three key elements: improved explosives detection, enhanced hostile intent detection and extended presence in the passenger journey.

The transportation infrastructure is extraordinary in terms of its size and complexity. In cooperation with the transportation sectors, TSA has developed sector security and emergency action items to improve the security of mass transit. Through its partnership with American and Canadian railroads, TSA strives to reduce the risk posed by toxic inhalation materials transported by rail in the US, including chlorine and anhydrous ammonia. Infrastructure security depends upon the establishment and enforcement of regulations across all modes of transportation. Coordination among a vast array of partners is essential to ensure that threats across all modes are mitigated, not just transferred. TSA has several ongoing efforts (e.g. Surface, Air Cargo, Maritime, Mass Transit, Aviation Security, Federal Air Marshals, Crew Members, etc.) to develop indicators to better address risk reduction and the threats to the transportation system.

C. Resources Requested and Performance Impact

The Transportation Security Administration's FY 2010 budget request of \$7.5 billion reflects a total gross increase of \$804.8 million and 346 FTE for transportation security initiatives. Of the total request, \$743.8 million supports the annualization of 9/11 Commission Act (9/11) initiatives expended in FY 2008 and FY 2009; and funding for Workforce Shaping and Sustainment, Visible Intermodal Prevention and Response teams, Vetting Infrastructure, Explosives Detection Systems, Screening Technology Maintenance, Information Technology Sustainment, International Threat Capability, and Department of Homeland Security Traveler Redress Inquiry Program.

The FY 2010 base funding will support full deployment of additional highly skilled workforce that includes Behavior Detection Officers, Aviation Direct Access Screening Program, Travel Document Checkers, and Visible Intermodal Prevention and Response teams. Current services will also provide for acceleration of emergent technology and in-line systems and continued implementation of 9/11 critical initiatives that include Air Cargo and Security Regulations.

Major Program Increases:

- **Vetting Infrastructure Modernization** **\$64.0M (11 FTE)**
TSA requests \$64 million and 22 positions (11 FTE) to continue stabilizing and enhancing TSA's systems infrastructure and to work toward Universal Vetting. The Universal Vetting and fee rule will enable cross-population analysis, provide fee alignment for individuals with multiple credentials and increase the ability to share information across various systems. This request will enable TSA to efficiently and effectively conduct vetting operations on populations that access the most vulnerable areas of the transportation system.
- **International Threat Capability** **\$1.5M (7 FTE)**
TSA requests \$1.5 million and 14 positions (7 FTE) for Field Intelligence Officers (FIOs) to meet expanding intelligence demands and requirements at CAT X, CAT I airports and directly support FSD and Airport Senior Leadership needs for critical and current synthesized intelligence products regarding daily trends and threat assessments against local transportation stakeholders in the geographical location.
- **Travel Redress Inquiry Program** **\$1.3M (1 FTE)**

TSA requests \$1.3 million and 2 positions (1 FTE) to support the Department of Homeland Security Travel Redress Inquiry Program (DHS TRIP), TSA's Checkpoint of the Future, and the Terrorist Screening Center's Office of Redress. This funding will provide the necessary resources to fully resource, respond, and centralize the processing system for travelers who seek inquiry and resolution on screening or credentialing difficulties encountered during air or ground travel. It will implement a DHS-wide traveler redress program involving several DHS components resulting in a uniform and consistent one-stop department-wide process for handling homeland security redress issues and complaints.

Centralization of DHS TRIP processing system for travelers will decrease customer response time; ensure the reliability and integrity of DHS and TSA redress decisions; will enable enhanced information-sharing to the traveling public; and will build appropriate capacity and capability to meet or exceed anticipated future redress needs generated by such upcoming DHS/TSA programs as Secure Flight.

- **Workforce Shaping and Sustainment** **\$16.7M (63 FTE)**
TSA requests \$16.7 million and 63 FTE for Workforce Shaping and Sustainment to fund the following efforts:
 - **Bomb Appraisal Officers (BAOs)** – *\$9M and 109 BAOs (55 FTE)* to enhance aviation security by providing expertise in the recognition of and response to improvised explosive devices (IEDs). Additional BAOs will be deployed to uncovered Category I, Category II, and Primary Hub airports as well as to airports that currently have only one BAO assigned.
 - **Background Investigations** – *\$7.7M and 8 FTE* to conduct timely reinvestigations of TSA employees who have been employed for at least five years, increase the speed of the hiring process, and strengthen security through more thorough Minimum Background Investigations.

- **Explosives Detection Systems (EDS) Procurement and Installation** **\$565.4M (0 FTE)**
TSA requests \$565.4 million to accelerate the Electronic Baggage Screening Program (EBSP) at the Nation's airports to ensure 100% of all checked baggage is screened with an in-line explosive detection capability system, or a suitable alternative. This funding will support facility modifications, recapitalization efforts, and procurement and deployment of electronic baggage screening technology systems.

- **Screening Technology Maintenance** **\$19.0M (0 FTE)**
TSA requests \$19 million for increased maintenance costs associated with higher-than-projected quantities of security equipment purchased over the past several years, as well as equipment purchased in FY 2009, which will be out of warranty in FY 2010.

- **Information Technology Sustainment** **\$7.1M (0 FTE)**
TSA requests \$7.1 million to sustain information technology initiatives including screening:

- **Whisper Communications** – \$5M to provide additional Land Mobile Radios (LMRs) at the TSA checkpoints. Use of LMRs enhances communications between Transportation Security Officers with significantly less disruption to the passenger screening process.
- **Mission Scheduling and Notification System (MSNS)** – \$2.1M to refresh and upgrade critical analytical tools and scheduling system capabilities for the Federal Air Marshal Service. The MSNS provides the ability to assess and prioritize flight selection and to readily schedule and implement flight coverage.
- **Visible Intermodal Prevention and Response Teams \$50.0M (169 FTE)**
TSA requests \$50 million to support an additional 15 new Visible Intermodal Prevention and Response (VIPR) teams (338 positions/169 FTE) to enhance the security of the nation’s surface transportation modes. The VIPR operations dedicated to the surface domain include highways, freight rail, pipelines, mass transit, and maritime. VIPR operations consist of teams of TSA personnel including Transportation Security Inspectors (TSIs), canine teams, Transportation Security Officers (TSOs), Bomb Detection Officers (BDOs) and Federal Air Marshals (FAMs). These additional resources will enhance the program’s ability to screen passengers, look for suspicious behavior and act as a visible deterrent.

D. Performance Highlights, Resources and Alignment to Strategic Goals

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below.

Program: Aviation Security						
Performance Goal: Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved aviation security.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 65%, 2.3 - 30%, 3.4 - 5%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$5,211,456	\$4,722,436	\$5,367,844	\$5,308,741	\$4,990,913	\$5,580,450
FTE	52,135	45,476	47,259	48,897	49,666	49,757

*Excludes ARRA funding of \$300k and eight FTE for Checkpoint; \$700k and seven FTE for EDS/ETD.

Performance Plan Measures

Measure: Baggage security screening assessment results						
Description of Measure: This measure appraises the percent of the time Transportation Security Officers (TSOs) correctly detect threat items concealed in baggage using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are classified and are not releasable to the public at this time for security reasons.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	Classified	Classified	Classified	Classified	Classified
Actual:	None	Classified	Classified	Classified	N/A	N/A

Measure: Passenger security screening assessment results

Description of Measure: This performance measure appraises the percent of the time the Transportation Security Officers (TSOs) correctly detect threat items concealed in carry - on baggage or on a person using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are classified and are not releasable to the public at this time for security reasons.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Classified	Classified	Classified	Classified	Classified	Classified
Actual:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Percent of air carriers in compliance with leading security indicators						
Description of Measure: This measure identifies overall air carrier compliance with leading security indicators. A leading security indicator is a key indicator, that, when taken into account, may be predictive of the overall security posture of an air carrier (these critical indicators are derived from criteria based on factors like a single point of failure, operational vs. administrative, human factor related). The indicators are guided by security rules, regulations, and standards. Identifying compliance with the key indicators assesses air carrier vulnerabilities. Assessing air carrier vulnerabilities is part of an overall risk reduction process, as in measuring compliance with standards is a strong indicator of system security.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Baseline	None	96%	96%	97%	97%
Actual:	None	None	97.79%	96%	N/A	N/A

Measure: Percent of airports in compliance with leading security indicators						
Description of Measure: This measure identifies overall airport compliance with leading security indicators. A leading security indicator is a key indicator, that, when taken into account, may be predictive of the overall security posture of an airport (these critical indicators are derived from criteria based on factors like a single point of failure, operational vs. administrative, human factor related). The indicators are guided by security rules, regulations, and standards. Identifying compliance with the key indicators assesses airport vulnerabilities. Assessing airport vulnerabilities is part of an overall risk reduction process, as in measuring compliance with standards as a strong indicator of system security.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Baseline	None	98%	95%	96%	96%
Actual:	None	95.68	95.55%	95%	N/A	N/A

Additional Measures

Measure: Cost per bag screened						
Description of Measure: This measure will suggest the system - wide human resources cost of screening a bag based on activity based costing information at a sample of airports.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Classified	\$1.64	\$1.44	\$1.64	\$1.62	\$1.61
Actual:	None	\$1.64	\$1.44	1.44	N/A	N/A

Measure: Cost per passenger screened						
Description of Measure: This measure will suggest the system - wide human resources cost of screening a person based on the total salary and benefits costs of the TSO workforce and the number of people who pass completely through walk - through - metal - detectors at airport screening checkpoints.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Target:	None	\$1.89	\$1.97	\$1.89	\$1.87	\$1.85
Actual:	None	\$1.89	\$1.97	\$2.14	N/A	N/A

Measure: Improve protection of aircraft cockpits through requalification certification FFDOs.						
Description of Measure: Measures the total percentage of FFDOs who attended required bi - annual re - qualification firearm certification training. Note Re-qualifications are measured per calendar quarter and only reported at the end of each quarter.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	90%	90%	93.5%	94%	94.5%
Actual:	None	97.75%	93.2%	93.1%	N/A	N/A

Measure: Increase inspection of identified "elevated risk" air cargo on all air carriers.						
Description of Measure: This is a risk based approach to securing the safety of air cargo shipped on air carriers. The Air Cargo program aims to increase the inspection of elevated risk cargo to ensure that all cargo defined as elevated risk is screened at all airports (currently 100% of cargo shipped on air carriers is screened at the smaller category II through IV airports). Elevated risk is identified through 2006 TSA issued Security Directives (SD) and Emergency Amendments (EA).						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Baseline	100% Domestic	100% Cat II - IV; 100% Cat X - IV categories of elevated risk	100% Cat II - IV; 100% Cat X - IV categories of elevated risk	100% Cat II - IV; 100% Cat X - IV categories of elevated risk	100% Cat II - IV; 100% Cat X - IV categories of elevated risk
Actual:	0%	None	100%	100%	N/A	N/A

Measure: Level of machine effectiveness (this measure is classified)						
Description of Measure: This measure will indicate the performance of systems operating in the field that are tested at startup to determine ongoing ability to detect threat objects at acceptable levels.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Classified	Classified	Classified	Classified	Classified	Classified
Actual:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Level of machine effectiveness This performance measure is classified].						
Description of Measure: This measure indicates the performance of systems, which for EDS/ETD is the capacity to detect explosives in baggage at specified threat masses. We desire to have the performance of the equipment and/or systems to be certified in detecting the requisite threats (definition is classified). By meeting this certification, we ensure that the baggage is safe to be transported through aviation means. This is an annually reported measure.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	Classified	Classified	Classified	Classified	Classified
Actual:	None	None	Classified	Classified	N/A	N/A

Measure: Level of machine efficiency						
Description of Measure: This measure is the screening checkpoint capital cost per person screened with respect to walk - through metal detectors, carry on item x - ray machines, and explosives trace detection devices.						

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Measure: Level of machine reliability						
Description of Measure: This measure reflects the probability that the EDS equipment, when used under the intended conditions in an actual operational environment, will operate as certified (designed). The outcome of the measurement will help to determine maintenance parameters.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	Classified	Classified	Classified	Classified	Classified
Actual:	None	Classified	Classified	Classified	N/A	N/A

Measure: Level of public confidence in the ability of the flight crew to keep air travel secure and to defend the aircraft and passengers from individuals with hostile intentions (as measured on a scale of 1 - 5).						
Description of Measure: The annual Bureau of Transportation Statistics (BTS) Omnibus Survey is an annual household survey used to measure customer satisfaction and confidence of transportation systems. Participants are randomly selected by the Department of Transportation using a statistical model. The survey is administered to the American public, and response is voluntary. Selected participants who choose to provide feedback will provide insight into the public's confidence of transportation systems. The scores range from 1 to 5, with 5 representing total confidence. Confidence in the flight crew is an indication that the training program is improving aviation security by adding another layer of protection.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Actual:	3.17	3.17	3.17	3.34	N/A	N/A

Measure: Level of screeners scoring 85% or greater on annual performance recertification on the first attempt.						
Description of Measure: This measure tracks the percent of screeners who score achieves standards or better on the first attempt on Standard Operating Procedures Quizzes (SOPQ) one (1) and three (3) of the technical proficiency portion in the Performance Accountability and Standards System. To ensure that the screener workforce has the knowledge and skills needed to perform the screener function, ATSA requires TSA to conduct and document an annual proficiency review of each individual who is assigned screening duties. TSA implemented the Performance Accountability and Standards System (PASS), a performance management system that established a systematic, systemic, data - driven and integrated approach to managing and improving employee performance and is strongly linked to TSA's long- and short - term strategic plans, organizational goals, and desired performance results.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Measure: Percent reduction in the federal share of LEO costs provided by U.S. commercial						
---	--	--	--	--	--	--

airports.						
Description of Measure: Law Enforcement: Annual Measure GOAL: Reduce the reliance on federal funds for law enforcement support at the screening checkpoints through Reimbursement Agreements (RAs) with airports while increasing the number of airports with RAs. RAs are contracts for a negotiated rate of reimbursement for each fiscal year, executed on October 1. FY 2007 is the final option year of the current RAs						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Baseline	89%	85%	85%	75%	68%
Actual:	88%	89%	85%	80%	N/A	N/A

Measure: Percentage of screeners scoring above the national standard level of Threat Image Projection (TIP) performance						
Description of Measure: First sentence deleted. TSA established a standard level of TIP performance. The measure reflects the percentage of screeners performing above the standard. Transportation Security Officers (TSOs) receive ongoing training and performance assessments to ensure that their skills are being developed to address the variety of threats that may be presented. As threats change and evolve, the TIP program develops new images and training to address the expanded needs of the TSO workforce, allowing TSA to maintain a high level of screener performance that ensures aviation security. SSI: Sensitive Security Information assessments to ensure that their skills are being developed to address the variety of threats that may be presented. As threats change and evolve, the TIP program develops new images and training to address the expanded needs of the TSO workforce, allowing TSA to maintain a high level of screener performance that ensures aviation security. Performance Plan Measures

Measure: Average annual rate of accuracy in Federal Air Marshals' firearms re - qualification.						
Description of Measure: Federal law enforcement officer candidates must graduate from the Federal Law Enforcement Training Center (FLETC) with a score of 210 out of a possible 300 on FLETC's Practical Pistol Course (PPC). To graduate from Phase II of the Federal Air Marshal Training Program (FAMTP - II), a FAM candidate must achieve a higher standard, which is quantified as 255 out of 300 (85 percent) on the firearms proficiency course of fire. To remain a FAM, an employee must demonstrate the same standard of excellence by scoring at least 255 out of 300 on recurring quarterly tests. Precision requirements drive a FAM's ultimate ability to defeat an attempted attack.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	95%	95%	95%
Actual:	None	None	None	95.3%	N/A	N/A

Measure: Percent level in meeting Federal Air Marshal Service (FAMS) coverage target for each individual category of identified risk						
Description of Measure: This measure reflects the performance levels of Office of Law Enforcement, Federal Air Marshal Service (OLE/FAMS) coverage of targeted critical flights based upon impact (geographical location), vulnerability (aircraft destructive potential), threats, and intelligence relative to the availability of resources. Coverage is provided by specially trained armed law enforcement officers referred to as Federal Air Marshals (FAMs). These FAMs are deployed to fly missions noncommercial U.S. aircraft for both domestic and international flights that have been identified as Targeted Critical Flights under 10 individual risk categories that are found in the OLE/FAMS Concept of Operations. Coverage is provided using arise - based management approach for mission planning.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

---	--	--	--	--	--	--

carriers, airports, passengers, and crews.						
Description of Measure: As required by the Aviation and Transportation Security Act (PL 107 - 71), the Transportation Security Administration's Office of Law Enforcement and Federal Air Marshal Service places Federal Air Marshals on high - risk flights. This measure assesses whether these efforts improve the confidence of the U.S. public in the ability of this professional staff to defend aircraft and passengers against hostile acts. Respondents chose from one of five options to describe their confidence "in the ability of the Federal Air Marshals to defend an aircraft and its passengers from individuals with hostile intention:" 1) no confidence, 2) a small amount of confidence, 3) a moderate amount of confidence, 4) a great deal of confidence, or 5) total confidence). The percentage of responses to each option is then weighted to produce a score.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Performance Plan Measures

Measure: Percent of mass transit agencies that are in full compliance with industry agreed upon Security and Emergency Management Action Items to improve security						
Description of Measure: The program assesses and evaluates the security posture of the mass transit and passenger rail modes through the Baseline Assessment for Security Enhancement (BASE) program. Security assessments commenced during FY07 with a focus on the 50 largest mass transit and passenger rail agencies based on passenger volume, which carries 75% of mass transit rail volume. The BASE program assesses security posture in comprehensive Security and Emergency Management Action Items, including security plans, training, exercises, public awareness, and other specific security areas. The Action Items encompass activities and measures that are critical to an effective security program. Security Inspectors conduct the assessments in partnership with the mass transit and passenger rail agencies' security chiefs and directors. The results of the security assessments inform development of risk mitigation programs and resource allocations, most notably security grants.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	50%	40%	50%
Actual:	None	None	None	23%	N/A	N/A

Measure: Percent reduction in risk from toxic inhalation hazard bulk cargoes in rail transportation						
Description of Measure: The Toxic Inhalation Hazard (TIH) Risk Reduction Program strives to reduce the risk posed by TIH materials, the most toxic chemicals transported by rail in the U.S., including chlorine and anhydrous ammonia. Through a partnership with American and Canadian railroads, Transportation Security Administration (TSA) gathers railcar movement data, focusing on the time a loaded rail car is standing unattended in a DHS - designated High Threat Urban Area (HTUA). This period of time is referred to as "dwell time". The program uses a risk calculation comprised of four elements: 1) the amount of "dwell time" in hours; 2) the specific HTUA; 3) the Population Proximity Factor; and 4) whether the car is attended or unattended. The level of risk will be compared to the baseline risk level, which is calculated from the period prior to the adoption of TSA/Department of transportation issued Security Action Items developed to enhance the security of TIH shipments.

Actual:	None	None	None	56.3%	N/A	N/A

Additional Measures

Measure: Number of high risk Pipeline corporate systems on which Pipeline Corporate Security Reviews will be conducted						
Description of Measure: TSA is assessing and elevating the security posture of the pipeline mode through the Pipeline Corporate Security Reviews (PCSRs). The focus of the PCSRs is on the high consequence (based on energy throughput) corporate pipelines, which carry approximately 84 percent of the nation's energy throughput. The objectives of an onsite security review are to develop first hand knowledge of security planning and execution at critical pipeline systems, establish communication with key pipeline security personnel, and identify and share smart practices. TSA's Pipeline Division conducts PCSRs in partnership with the pipeline systems staff. As industry wide security gaps are identified through the PCSR process, the TSA pipeline security division develops programs to address gaps throughout the pipeline industry.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	25 (25%)	37 (37%)	53 (53%)
Actual:	None	None	None	25 (25%)	N/A	N/A

Measure: Number of rail inspections conducted per 1000 inspector hours.						
Description of Measure: Compliance/Surface: This measure illustrates the efficiency of inspection activities by quantifying the number of inspections conducted per inspector within a certain time frame. It is important to note that surface transportation inspection processes and requirements are continually evolving and maturing. As a result, this may require adjustments to future targets.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Measure: Percent of highway infrastructure systems that have undergone a Corporate Security Review (CSR)						
Description of Measure: TSA assesses security posture of state DOTs (and the District of Columbia) through the Highway and Motor Carrier Corporate Security Review Program (CSR). The Highway and Motor Carrier Division CSRs are "instructional" reviews that provide TSA with a general understanding of each state Department of Transportation's ability to protect its key						

physical and critical assets. During a CSR, teams of TSA modal experts evaluate and collect physical and operational preparedness information, critical assets, key point - of - contact lists, review emergency procedures and domain awareness training, and provide an opportunity to share smart practices. The on - site voluntary reviews serve to establish data against which to evaluate minimum security standards and identify coverage gaps within states to reduce risk.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Performance Plan Measures

Measure: Percent decrease in worker's compensation claims.

Description of Measure: This measure tracks improvements that have been made in reducing the amount of money that has been paid in worker's compensation. Traumatic Injury Leave is authorized when an employee sustains a work - related traumatic injury and the injured workers physician certifies that the employee is unable to work or TSA fails to provide limited duty work during the first 45 days following the injury. The percent decrease represents salary compensation paid to employees for lost time associated with traumatic injuries.

Measure: Level of customer satisfaction with user support resolution.						
Description of Measure: Portions of the TSS program tracks customer satisfaction metrics through follow - up SPOC field surveys that are based on a 5.0 Likert scale. These monthly metrics are a compilation of daily follow - up calls in response to user support issues. The questions include responses based on promptness, courteousness, technical service, and problem solving. Using a response of 1 as the lowest (customer dissatisfaction) and 5 as the highest (customer satisfaction), TSA is able to identify potential areas for improvement and areas where support is satisfactory.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	4.85	4.85	4.85	4.85	4.85
Actual:	None	4.85	4.88	4.85	N/A	N/A

Measure: Percent of customers utilizing the Transportation Security Intelligence Service Remote Access to Classified Enclaves (TRACE) intelligence sharing program.						
Description of Measure: This measure shows the percentage of total deployed TRACE systems that record a connection. The connectivity is based on the site fully authenticating through the TRACE network and opening a product while connected to the website.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	50%	50%	90%	92%	94%
Actual:	None	38%	22%	84%	N/A	N/A

Measure: Percentage of systems certified based on Federal Information System Management Act (FISMA), as accepted by DHS and accredited as designated by CIO.						
Description of Measure: This measure ensures that all IT systems are certified and able to provide quality support to the Nations transportation systems. A certified IT system undergoes a security accreditation, which is the official management decision given by a senior agency official to authorize operation of an information system and to explicitly accept the risk to agency operations, agency assets, or individuals based on the implementation of an agreed - upon set of security controls. (Note: In FY 2004, TSA had only seven operational IT systems. The certification effort became significantly more challenging in FY 2005, when the number of systems spiked up to 107. This resulted in TSA missing its target. The process has stabilized and the current and future year targets are valid.) This measure is reported based on FISMA year-end of July 31st as opposed to fiscal year-end of September 30th.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	100%	100%	100%	100%	100%
Actual:	None	100%	100%	100%	N/A	N/A

Measure: Reduce cost and schedule variance for information technology infrastructure projects.						
Description of Measure: This efficiency allows both Government and contractor Program Managers (PM) to have visibility into technical, cost, and schedule planning, performance, and progress of the contract effort. TSA's target is to achieve 75% programs meeting cost and schedule goals by less than 10% variance.						

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	99.99%	99.99%	99.99%	99.99%	99.99%
Actual:	None	99.99%	99.99%	99.99%	N/A	N/A

Program: Transportation Threat Assessment and Credentialing						
Performance Goal: Reduce the threat to national security or transportation security by individuals engaged in various aspects of the U.S. transportation systems.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Performance Plan Measures

Measure: Percent of individuals undergoing a Transportation Threat Assessment and Credentialing (TTAC) security threat assessment						
Description of Measure: This measure indicates the percent of Transportation Threat Assessment and Credentialing (TTAC) population receiving a Security Threat Assessment. Thorough vetting will decrease vulnerabilities of sensitive transportation systems by limiting access of potentially dangerous individuals who are identified by TTAC vetting and credentialing programs. The populations currently include international flight crews, aviation workers, hazardous material drivers, and non-U.S. citizens receiving flight instruction at Federal Aviation Administration certified flight schools in the U.S. and abroad. In the future, TTAC programs will also cover domestic airline passengers, surface, and maritime workers.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	100%	100%	100%	100%	100%
Actual:	None	100%	100%	100%	N/A	N/A

Additional Measures

Measure: Percent of all commercial airline domestic flight passengers vetted. (Secure Flight Only)						
Description of Measure: This is an indication of what percentage of commercial airline domestic flight passengers are being protected from potential terrorist activities.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	None	100%	100%
Actual:	None	None	None	None	N/A	N/A

Measure: Ratio of false positives to total names processed.						
Description of Measure: This measure assesses how well the program is restricting access to people who do (or do not) present a threat to the Nation's transportation system.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	Baseline	TBD	+/- .8%	+/- .6%	+/- .4%
Actual:	None	None	.58%	.55%	N/A	N/A

Measure: Security Threat Assessment (STA) cost per vetted individual.						
Description of Measure: This measure ensures that the cost of performing security threat assessments remains within acceptable levels.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Target:	None	\$15.56	\$15.00	\$14.50	\$14.00	\$13.75

Explanation of Changes:

Homeland Security activities includes the following programs: Migrant Interdiction, Ports, Waterways and Coastal Security and Defense Readiness.

Non-Homeland activities include the following programs: Search and Rescue, Marine Safety, Aids to Navigation, Ice Operations, Marine Environmental Protection, Living Marine Resources, Drug Interdiction and Other Law Enforcement.

Funds account for all scorekeeping adjustments

For comparability purposes, FY 2008 Operating Expenses excludes \$9.584M rescission of unobligated 2007 recurring balance from section 505 of P.L. 109-295 which was offset when allowed to be transferred to FY 2008, P.L. 110-161. Also, FY 2009 Operating Expenses Appropriation includes \$112M OIF Supplemental Appropriations pursuant to P.L. 110-329.

U. S. Coast Guard

Operating Expenses

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The Coast Guard requests \$6.556 billion and 48,550 FTE in FY 2010, increases of \$361.263 million and 666 FTE compared to the \$6.195 billion and 47,884 FTE enacted in FY 2009. The Coast Guard's Operating Expenses (OE) request seeks funding for the annualization of prior-year, part-year funding, pay and non-pay cost of living increases, and operating and maintenance funding for prior-year Administration and Congressional line items. The OE request supports all 11 statutorily mandated Coast Guard mission-programs, and in turn, these mission programs directly support the Coast Guard's role as the nation's principal Federal agency charged with ensuring America's maritime **safety and security** as well as the Department of Homeland Security's (DHS) strategic goals and objectives.

B. Budget Activities:

Operating Expenses provide direct support to all Coast Guard missions, including: Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

C. Budget Request Summary:

The Coast Guard requests \$6.556 billion and 48,550 FTE in FY 2010. Total adjustments-to-base are \$308,247 million and 576 FTE. In particular, new funding will support the mandatory pay increase (2.9% military and 2.0% civilian); GSA rent and security charge increases; emergency maintenance; increased costs for government services; IT inflation; and the operation, maintenance, and crewing of Deepwater assets.

Additionally, total funding continues support for operation and maintenance costs associated with non-Deepwater programs such as Response Boat-Medium, Interagency Operations Centers, Rescue 21, and the Nationwide Automatic Identification System (NAIS).

Program increases include 90 FTE and \$53.016 million to improve financial management oversight, and enhance marine safety and security operations.

Efficiencies amounting to \$88,412 million are identified to allow for the re-allocation of resources to critical DHS and Coast Guard priorities. These efficiencies include decommissioning four aircraft in accordance with the Deepwater Implementation Plan and terminating the Loran-C system.

Of the total 48,645 positions, 48,550 FTE, and \$6.556 billion requested in this budget, an increase of 194 positions, 666 FTE, and \$361.263 million is reflected in this account.

Base adjustments include:

- Annualizations of prior-year funding – \$85.920 million
- FY 2010 pay increase and annualization of FY 2009 pay raise for both military and civilian members – \$100.714 million
- Parity with DoD's military entitlement initiatives – \$80.520 million
- Operational Adjustment Increases (includes GSA rent and security charges, Emergency Maintenance, Government services, Long Range Identification and Tracking, Coast Guard Academy IT network, and IT inflation.– \$58.117 million
- Operating and Maintenance funds for new assets (to include follow-on costs related to Deepwater assets, Aids-to-Navigation Modernization, Response Boat-Medium, Interagency Operations Centers (Command 21), Rescue 21, Nationwide Automatic Identification System, and Sector Air Station Corpus Christi. – \$71.388 million

Program change decreases include:

- Termination of one-time costs – (\$32.689 million)
- Annualization of FY 2009 management efficiencies – (\$4.934 million)
- Decommissioning of three HU-25 Aircraft – (\$8.171 million)
- Decommissioning of one HC-130H Aircraft – (\$3.018 million)
- Operations Systems Center expansion project reduction – (\$3.600 million)
- Loran-C Termination – (\$36.000 million)

Program change increases include:

- Financial Management Oversight – \$20.000 million
- Marine Safety Program – \$7.500 million
- Armed Helicopters Initiative Enhancement – \$0.845 million
- Biometrics at Sea – \$1.183 million
- Seahawk Charleston Interagency Operations Ctr Sustainment – \$1.088 million
- Data Center migration - \$22.400 million

(Dollars in thousands)

PPA I: MILITARY PAY AND ALLOWANCES

	Perm Pos	FTE ¹	Amount
2008 Actual	40,492	40,710	3,002,361
2009 Enacted	41,427	41,359	3,073,520
2010 Adjustments-to-Base	(108)	374	166,424
2010 Current Services	41,319	41,733	3,239,944
2010 Program Change	84	42	4,917
2010 Request	41,403	41,775	3,244,861
Total Change 2009-2010	(24)	416	171,341

The Coast Guard's FY 2010 request is \$3.245 billion, an increase of \$171.341 million over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of FICA, Social Security credits, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI), medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. Pay estimates account for OMB published pay inflation factors for the fiscal year in question.

Significant accomplishments in FY 2008 include:

- Interdicted 2,419 illegal migrants.
- Seized and removed 153,855 lbs of cocaine and 4,995 lbs of marijuana.
- Responded to 7,676 calls for assistance and saved the lives of 1,605 distressed mariners.
- Fully-missionized three HC-130J
- Terminated the Helicopter Interdiction Squadron (HITRON) contract and began operating the Atlantic Aviation Deployment Center.

¹ The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

FY09 planned accomplishments include:

- Improved procurement management and oversight.
- Improved information sharing and investigative capabilities.
- Improved counter-intelligence capability.
- Operation of the HC-144A Ocean Sentry.
- Operation of four new Coastal Patrol Boats.
- Enhancements to the Rescue 21 National Distress Response System.

In FY 2010 an investment in active duty military personnel will ensure the service remains “Semper Paratus” (Always Ready). The service was founded as a military, multi-mission, maritime service and continues to be ready, aware and responsive across all of the Coast Guard’s 11 mission-programs. As the Nation’s maritime first responder, the Coast Guard must not only be effective in its daily operations, but must also remain ready for emergencies and contingencies; it must be aware of maritime conditions and activities in order to detect, deter and defeat threats early; and when called it must be responsive with the right capabilities at the right time.

As one of the Nation’s five Armed Services, dedicated Coast Guard personnel conduct missions that protect the public, the environment, and U. S. economic interests – in the Nation’s ports and waterways, along the coast, on international waters and in any maritime region required to support homeland security. The unique, multi-mission character of the Coast Guard requires personnel to serve as sailors, emergency responders, humanitarians, regulators, law enforcement personnel, stewards of the environment, and guardians of the coast – military, multi-mission, and maritime. Coast Guard forces are flexible, rapidly deployable, and able to respond to crises with a full range of capabilities. Coast Guard forces capitalize upon their multi-mission synergies to prevent maritime incidents, protect the U. S. Maritime Domain, and respond to and recover from incidents that may occur.

Requested new funding will support the anticipated FY 2010 pay raise and the basic allowance for housing increase for all military service members, while annualizing military average monthly end strength introduced in FY 2009. Additionally, the funding will support military personnel to:

- Address financial audit remediation.
- Increase Marine Safety capability and capacity.
- Operate a National Security Cutter (NSC) and Fast Response Cutter (FRC).
- Increase Coastal Patrol Boat (CPB) operations.

PPA II: CIVILIAN PAY AND BENEFITS

	Perm Pos	FTE	Amount
2008 Actual	6,924	6,313	603,859
2009 Enacted	7,024	6,525	648,346
2010 Adjustments-to-Base	123	202	45,654
2010 Current Services	7,147	6,727	694,000
2010 Program Change	95	48	5,594
2010 Request	7,242	6,775	699,594
Total Change 2009-2010	218	250	51,248

The Coast Guard’s FY 2010 request is \$699.594 million, an increase of \$51.248 million over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and entitlements for federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns, and federal junior fellows). Costs related to compensation are calculated using the Coast Guard’s Standard Personnel Cost (SPC) tables. These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI). Calculations for base pay are based upon position, location of position, and OMB economic assumptions for the fiscal year in question.

Significant accomplishments in FY 2008 include:

- Supported interdiction of 2,419 illegal migrants.
- Supported seizure and removal of 153,855 lbs of cocaine and 4,995 lbs of marijuana.
- Responded to 7,676 calls for assistance and saved the lives of 1,605 distressed mariners.
- Fully-missionized three HC-130J.
- Terminated the HITRON contract and began operating the Atlantic Aviation Deployment Center.

FY 2009 planned accomplishments include:

- Improved procurement management and oversight.
- Improved information sharing and investigative capabilities.
- Increased rule-making capacity.
- Enhancements to the Rescue 21 National Distress Response System.

In FY 2010, requested funding will provide dedicated civilian personnel who contribute daily to the Coast Guard’s 11 mission-programs. Civilian personnel stand side-by-side with military personnel to fulfill the roles of maritime first responders and help maintain daily mission effectiveness, prepare for emergencies and contingencies, and ensure Maritime Domain Awareness. These dedicated personnel support and conduct the missions that protect the public,

the environment, and U. S. economic interests – in the Nation’s ports and waterways, along the coast, on international waters, and in any maritime region required to support national security.

Funding requested will support the anticipated FY 2010 pay raise for all civilian personnel and annualize civilian FTE introduced in FY 2009. Additionally, the funding will allow civilian personnel to:

- Continue improving acquisition management and oversight.
- Address financial audit remediation.
- Increase Marine Safety capability and capacity.

PPA III: TRAINING AND RECRUITING

	Perm Pos	FTE	Amount
2008 Actual	190,858
2009 Enacted	197,993
2010 Adjustments-to-Base	6,724
2010 Current Services	204,717
2010 Program Change	1,253
2010 Request	205,970
Total Change 2009-2010	7,977

The Coast Guard’s FY 2010 request is \$205.970 million, an increase of \$7.977 million over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

The training and recruiting PPA provides funding for the Coast Guard’s professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy and Leadership Development Center.

Significant accomplishments in FY 2008 include:

- Accessing 4,690 recruits through recruit training; graduating 4,000 enlisted apprentices from our “A” schools; and commissioning 449 officers from the Coast Guard Academy, Officer Candidate School and Direct Commission Program.
- Training 1,645 members in advanced maritime law enforcement, 1,483 members in counter terrorism activities, 7,976 members in leadership skills, and providing 54,000 advanced Coast Guard classroom training courses.

Graduating 217 members from post-graduate schools to meet advanced training and knowledge requirements.

FY 2009 planned accomplishments include:

- Graduating 205 members from post-graduate schools to meet advanced training and knowledge requirements.

The FY 2010 request provides funding for all Coast Guard recruiting operations, given projected attrition and growth, to ensure sufficient numbers of qualified individuals for the military workforce. Coast Guard recruiting is a national endeavor. As such, recruiters cover broad

geographic areas with diverse socio-economic demographics to compete for the best qualified candidates.

Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is adequately resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. Training is provided by the Coast Guard, commercial providers, DoD, and other agencies. This training and education is usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

From entry-level personnel through senior leadership, the Coast Guard focuses its training resources to embed those competencies that will maximize operational capabilities. The FY 2010 budget will include an increase in the requirement for training related to Deepwater platforms. A portion of legacy platform training will be reduced, but the infrastructure and travel for this legacy training will be required for continuous operation of aging platforms.

PPA IV: OPERATING FUNDS AND UNIT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
2008 Actual	1,246,185
2009 Enacted	1,185,317
2010 Adjustments-to-Base	(52,528)
2010 Current Services	1,132,789
2010 Program Change	16,724
2010 Request	1,149,513
Total Change 2009-2010	(35,804)

The Coast Guard requests \$1.149 billion for this activity, a decrease of \$35.804 million from FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding to units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard’s Headquarters, Atlantic Area or Pacific Area Commanders. These include Maintenance Logistics Commands (MLCs), Integrated Support Commands (ISCs), High and Medium Endurance Cutters (WHECs/WMECs), Communication Stations, Maritime Safety and Security Teams (MSSTs), and Area Offices as applicable, for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. Maintenance of cutter hulls, mechanical systems, electrical equipment, and small boats; procurement of supplies and materials utilized for unit “housekeeping” and administration, spare parts, fuel, and energy; funding of personnel support programs; and other materials consumed all contribute directly to mission effectiveness.

Significant accomplishments in FY 2008 include:

- Achieved Full Operational Capability (FOC) for the Deployable Operations Group (DOG).
- Initiated a national assessment of the National Preparedness for Response Exercise Program (PREP), a robust preparedness exercise program in which oil facilities, tank vessels, freight ships, and hazardous material facilities exercise their associated response plans.
- Began operating three fully missionized HC-130J aircraft.
- Completed operational testing of three HC-144A Ocean Sentry aircraft.
- Terminated the HITRON contract and begin operating the Atlantic Area Aviation Deployment Center.

FY 2009 planned accomplishments include:

- Begin operating HC-144A aircraft numbers four through eight.
- Begin operating the Manned Covert Surveillance Aircraft.
- Augment watchstanders for Rescue 21.

The FY 2010 request will support the annualization of new operations introduced in FY 2009 and accounts for non-pay related inflation associated with maintenance and procurement of supplies and consumables. Follow-on funding is provided to operation and maintain 14 Response Boat-Mediums (RB-M), new Rescue 21 equipment, and Interagency Operations Centers (IOC).

The Coast Guard is participating in the Great Lakes Restoration Initiative, which is requested in the EPA budget. In FY 2010 we anticipate performing the following activities (EPA will fund an estimated \$6.85M):

- **Toxics** - The Coast Guard will work with National Park Service to remove dangerous goods and materials from Great Lakes light houses, including contaminated soils, lead based paints, asbestos, PCBs, and petroleum products. USCG will also create a system that will recover heavy oil from the sea floor, and develop detection and response techniques for oil spills in ice in fresh water.
- **Invasive Species** - The Coast Guard will coordinate with EPA, USFWS, and DOT-MARAD to fund the further development of up to five ballast water treatment systems suitable for fresh water ecosystems by supporting the use of laboratory and ship-board testing, verification of treatment technologies, and coordination with the maritime industry.
- **Accountability, Monitoring, Evaluation, Communication, and Partnerships** - Additional Initiative funding (not included above) will be provided by EPA through an interagency agreement to support participation in planning, coordination, development of measures and outcomes, and reporting on progress pertaining to the Initiative. Activities will include appropriate participation in the Interagency Task Force, Regional Working Group, Binational Executive Committee, Lakewide Management Plan forums, and Remedial Action Plan forums.

PPA V: CENTRALLY MANAGED ACCOUNTS

	Perm Pos	FTE	Amount
2008 Actual	250,281
2009 Enacted	263,702
2010 Adjustments-to-Base	65,318
2010 Current Services	329,020
2010 Program Change	24,051
2010 Request	353,071
Total Change 2009-2010	89,369

The Coast Guard requests \$353.071 million for this activity, an increase of \$89.369 million over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requested funding represents centrally managed accounts at Coast Guard and DHS Headquarters, which provide service to the entire Coast Guard. Larger central accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGDN), postal expenses, satellite communications, General Services Administration (GSA) rent, ammunition replenishment, and the DHS Working Capital Fund.

Significant accomplishments in FY 2008 include:

- Progress toward "e-Coast Guard" both for administration and operations, through the implementation of enhanced voice and data communications.
- Sustainment of critical ammunition stores to ensure mission effectiveness, particularly for Coast Guard boarding officer and cutter combat team proficiency.
- Increased access and capabilities associated with operational databases such as the Marine Information for Safety and Law Enforcement (MISLE) and the Abstract of Operations (AOPS) systems.

FY 2009 planned accomplishments include:

- New support infrastructure for the National Maritime Center (NMC), Deployable Operations Group (DOG), and expanded space for Coast Guard units in Corpus Christi, TX, Chicago, and Anchorage.

The FY 2010 request funds new leased facilities for the DOG, increased lease space for various units, radio frequency spectrum charge increases, and postal expense increases.

PPA VI: INTERMEDIATE AND DEPOT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
2008 Actual	816,121
2009 Enacted	826,047
2010 Adjustments-to-Base	76,655
2010 Current Services	902,702
2010 Program Change	477
2010 Request	903,179
Total Change 2009-2010	77,132

The Coast Guard requests \$903.179 million for this activity. This is an increase of \$77.132 million over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request provides service-wide funding for the Coast Guard’s base level operating expense (OE) funded maintenance for the service’s shore facilities, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using in-house maintenance and repair infrastructure in conjunction with contracted depot-level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine unit-level and depot-level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

The Coast Guard’s maintenance planning process involves every level of the organization including: (1) field level input provided in casualty, mishap, and annual unit engineering reports; (2) engineering/support provider input in the form of regional maintenance data/trend analysis, observations of experienced support/engineering personnel, and prioritization of issues/needs; and (3) Coast Guard Headquarters involvement in the collation of CG-wide data/trend analysis, input from the Atlantic and Pacific Area Commanders and their support providers, and development of corrective strategies.

FY 2008 accomplishments include:

- Program Depot Maintenance for: HC-130H (6); HH-60J (9); HH-65C (22); HU-25 (4).
- In addition to a continued effort to target deferred maintenance requirements, allocate funding to support diverse requirements including: mission-enabling shore facility projects; Aids-to-Navigation systems to support maritime mobility; Unaccompanied Personnel Housing (UPH); and maintaining standards necessary to execute Training Centers’ vital missions to sustain service excellence.
- Completed the following dry-docks: WYTL 65 (4); WPB 87 (17); WPB 110 (3); WLR/WLIC (9); WTGB 140 (2); WLM 175 (3); WLB 225 (5); WMEC 210/270 (1); WHEC 378 (3); WAGB 399 (1); and WIX 295 EAGLE.

FY 2009 planned accomplishments include:

- Major maintenance for legacy aircraft and cutters.

The FY 2010 request includes:

Aircraft. Includes service-wide funding to support the major maintenance and repair of Coast Guard aircraft not appropriated in the Coast Guard Acquisition, Construction and Improvements (AC&I) appropriation. This category includes: materials, services and supplies necessary for depot-level repair, maintenance, modification and overhaul of aircraft and aircraft equipment, including associated avionics; transportation of aircraft and aeronautical materials and equipment; and procurement and overhaul of aircraft ground handling and support equipment. Request also includes funding for general expenses related to inventory and engineering design, alteration and modification services in support of Coast Guard aircraft.

This funding request supports intermediate and depot-level aircraft repair. Coast Guard rotary wing aircraft are continuously rotated out of operational service to allow for programmed depot maintenance (PDM) at the Coast Guard Aircraft Repair and Supply Center (ARSC) in Elizabeth City, NC. This funding also provides for contractor support to conduct PDM on the service's HC-130Hs, as ARSC does not have this capacity. All PDM is based upon established service standards. The purpose of the aircraft PDM program is to (1) provide periodic inspection of areas of an aircraft which are not accessible without extensive disassembly, (2) perform heavy maintenance which is beyond the capability of operating units, and (3) incorporate changes and modifications which are too extensive to perform at the operating unit level.

Vessels. Includes service-wide funding to support the major maintenance and repair of Coast Guard vessels not appropriated in the Coast Guard AC&I appropriation. In particular, funding requested will support the procurement, installation, replacement and support of standard hull, mechanical, electrical and electronic systems. Request also includes funding for general expenses related to inventory and engineering design, alteration and modification services in support of Coast Guard vessels.

Coast Guard vessels are regularly scheduled for programmed depot maintenance based upon established class maintenance plans (CMP). In addition to ship repair work provided by the Coast Guard Yard in Curtis Bay, MD, the Coast Guard routinely uses ship repair facilities/contractors to complete depot level maintenance via competitive contracts. The Coast Guard manages vessel base OE legacy asset maintenance funding using Standard Support Levels (SSLs) established for each vessel class of asset at the time of asset acquisition and adjusted annually for inflation. Actual expenditures vary from the SSL as the Coast Guard's maintenance managers shift resources to deal with their most immediate fleet maintenance challenges, often using funds from another vessel's SSL or outside sources to ensure availability of the most critical Coast Guard assets.

Shore Infrastructure. Includes service-wide funding for depot-level, nonrecurring facility maintenance to ensure the safety and integrity of the shore infrastructure, maximize facility economic life, and avoid large recapitalization expenses. This request includes funding for repairs, rebuilding, renovation, alterations, improvement and other services provided by the Coast Guard's Civil Engineering program not appropriated in the Coast Guard's AC&I appropriation. This category includes support of: Coast Guard-owned land; buildings (e.g. replacement of roofs and mechanical systems); and structures (e.g. repairs to waterfront, communications and navigation system towers, roads and runways). It also includes: support for fixed Aids to Navigation (AtoN) structures (ashore and offshore); major non-consumable equipment used to support the shore plant (e.g. emergency generators, fuel systems, and pressure vessels). This shore OE funding also supports the Coast Guard's Unaccompanied Personnel Housing (i.e. barracks), family housing, clinics, and morale/well-being and recreational facilities.

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Coast Guard
Operating Expenses
Program Performance Justification
(Dollars in thousands)

Increases **\$396,659**

A. Annualization of Prior Year Funding**\$85,920**

Strategic Goal(s) & Objectives: 1.1, 2, 3, 4.1, 5.5

PPA Breakdown - Annualization of Prior Year Funding		Total (\$000)
PPA I: Military Personnel (519 FTE)		
	Military Pay and Allowances	36,122
	Military Health Care	3,873
PPA II: Civilian Personnel (102 FTE)		
	Civilian Pay and Allowances	11,242
PPA III: Training and Recruiting		
	Training and Education	4,401
	Recruiting and Training Centers	1,019
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	607

Total	519	102	85,920

B. Mandatory Personnel Entitlements

1. Annualization of FY 2009 Pay Raise.....\$29,241

Strategic Goal(s) & Objectives: 5.1

PPA Breakdown - Annualization of FY 2009 Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	22,885
	Permanent Change of Station	166
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	6,190
		29,241

Request one quarter funding to annualize the FY 2009 military (3.9%) and civilian (3.9%) pay raise.

2. FY 2010 Pay Increase\$71,473

Strategic Goal(s) & Objectives: 5.1

PPA Breakdown - FY 2010 Pay Increase		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	51,107
	Permanent Change of Station	371
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	19,995
		71,473

Request funds the FY 2010 military (2.9%) and civilian (2.0%) pay raise.

3. Military Entitlements (DoD Parity)\$80,520

Strategic Goal(s) & Objectives: 5.1

PPA Breakdown - Military Entitlements (DoD Parity)		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances (Basic Allowance for Housing)	28,395
	Military Health Care	21,310
	Permanent Change of Station	30,534
PPA V: Centrally Managed Accounts		
	Central Accounts	281
		80,520

Provides funding to maintain current services and ensure parity of military pay and allowances with the Department of Defense (DoD). The request includes funding for Basic Allowance for Housing (BAH), which is scheduled to take effect on January 01, 2010, childcare benefits for Coast Guard members, and Permanent Change of Station (PCS) costs above non-pay inflation. Approximately 12-15% of the increase in PCS funding is a direct result of the Families First Initiative that is consistent with DoD benefits.

C. Non-Pay Adjustments

1. Operational Adjustments

Strategic Goal(s) & Objectives: 1.1, 2, 3, 4.1

a) GSA Rent and Security Charges Increase\$10,019

PPA Breakdown - GSA Rent and Security Charges Increase		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	10,019
		10,019

This request funds additional GSA lease space requirements and offsets costs exceeding non-pay inflation. The GSA Rent account is a demand account that reflects costs resulting from occupancy agreements established with GSA to meet specific shore facility requirements. The GSA Rent account is a “bill” that must be paid. Facility space requirements include administrative office space and other unique space such as waterfront facilities and hanger space. This request incorporates costs for new facilities in FY 2010 including a space to house the Deployable Operations Group (DOG), and increases include additional space requirements to house new personnel at Dellums Federal Building in Oakland, CA, the Port of Anchorage, AK, Sector Jacksonville, FL, and MSU Pittsburgh, PA.

Security Charges on GSA Facilities is a demand account that reflects the costs from occupancy agreements established with GSA to meet specific shore facility security requirements. This request provides funding to address GSA security rates that are increasing beyond the cost of living adjustment (forecasted by GSA/OMB) and new security requirements. Requested levels are based on estimates provided by GSA/DHS. The two components of this request are basic service charges and building-specific charges. Basic service charges include control center dispatch and alarm monitoring, criminal investigations, protective activities, security assessments, and occupant emergency plan development. Building-specific charges include contract guard costs and other services directly related to building security such as repairing and maintaining security systems, magnetometers, and other countermeasures.

b) Depot Level (4X) and Emergency Maintenance\$35,000

PPA Breakdown - Depot Level (4X) and Emergency Maintenance		Total (\$000)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	35,000
		35,000

Rising maintenance costs and increasing casualty rates have led to increased deferred maintenance and parts shortages. The funding would support one-time funding to restore a severe aviation spare parts shortage. Adequate aircraft readiness is premised upon an aviation supply-shortage rate of 5% or less. Existing funding shortages have driven that rate above 8%, which negatively impacts aircraft

availability. Aviation spare parts funding will enable the Coast Guard to restore inventory to a target supply level that will allow legacy aircraft to achieve 71% aircraft availability.

c) Government Services Increase\$8,798

PPA Breakdown - Government Services Increase		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	8,798
		8,798

Provides funding for enhanced services necessary in three communications segments: radio frequency, postal, and satellite communications. This funding will be used to offset annual increases and reimburse the National Telecommunication and Information Administration (NTIA), Office of Spectrum Management, for increased operating expenses incurred through the management of approximately 17,000 radio frequency assignments. The payment of this fee allows the Coast Guard to maintain frequency authority on its assigned frequencies. This request will also fund anticipated postal increases.

d) Long Range Identification and Tracking.....\$3,500

PPA Breakdown - Long Range Identification and Tracking		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	993
PPA V: Centrally Managed Accounts		
	Central Accounts	2,507
		3,500

Provides operating and maintenance funding for Long Range Identification and Tracking System (LRIT), which will provide a critical layer to the overall Maritime Domain Awareness tactical picture. LRIT is an information system designed to collect position reports from all U.S. flagged vessels subject to the International Convention for the Safety of Life at Sea (SOLAS) regulation V/19-1, Long Range Identification and Tracking, including all U.S. flagged vessels 300 gross tons and larger traveling internationally. The International Maritime Organization (IMO) LRIT system was designed to collect vessel position information from IMO member state ships which are subject to SOLAS. This system will allow the Coast Guard to monitor any IMO member state ships bound for the United States or traveling within 1000 miles of the coast.

As part of the regulation, the United States Government is responsible for operating and maintaining an LRIT National Data Center (NDC), which is connected to a worldwide network of other NDCs through a central router or switch called the International Data Exchange (IDE). The NDC's primary function is to send position report messages of U.S. flagged vessels to other contracting governments in accordance with LRIT rules.

e) Coast Guard Academy IT Network\$800

PPA Breakdown - Coast Guard Academy IT Network		Total (\$000)
PPA III: Training and Recruiting		
	Recruiting and Training Centers	800
		800

This request provides funding for the Coast Guard Academy’s (CGA) .edu network, a network not currently supported by existing computer funding allowances. The CGA IT infrastructure directly supports training and educating the corps of cadets and is a prerequisite for currency and relevancy in academia. Maintaining, administering, and troubleshooting a dual network IT infrastructure requires an increase to the technical support allowance at CGA.

D. Operating and Maintenance Funds for New Assets

1. Shore Facility Follow-On\$7,086

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.1

PPA Breakdown - Shore Facility Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	40
	Pacific Area	337
	1st District	371
	8th District	434
	Headquarters Directorates	325
	Headquarters Units	50
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	5,529
		7,086

This request provides funding to operate and maintain acquisition, construction and improvement (AC&I) shore facility projects scheduled for completion prior to FY 2010. Funding is required for daily operating costs for energy, utility services, routine repairs, and housekeeping. Funding also supports major non-recurring maintenance and repairs (e.g., rebuilding, improvement, rehabilitation, etc.) anticipated throughout the life of the facility. Facilities include:

- Construct Sector NOLA Facilities, New Orleans, LA.
- Acquired BRAC Facilities at Massachusetts Military Reservation (MMR)
- Construct Addition Telecommunication and Information Systems Command (TISCOM-TSD)
- Purchase Three Housing Units
- Title X DoD Navy Transfer

2. Response Boat - Medium (RB-M) Maintenance Follow-On\$1,065

Strategic Goal(s) & Objectives: 1.1, 2, 3

PPA Breakdown - Response Boat - Medium (RB-M) Maintenance Follow-On		Total (\$000)
PPA I: Military Personnel (6 FTP, 3 FTE)		
	Military Pay and Allowances	182
	Military Health Care	23
	Permanent Change of Station	38
PPA III: Training and Recruiting		
	Training and Education	33
	Recruiting and Training Centers	5
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	4
	8th District	2
	9th District	4
	Headquarters Directorates	571
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	24
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	122
	Vessel Maintenance	56
		1,065

Provides funding for FY 2010 maintenance and energy costs associated with delivery of 22 RB-Ms (hulls #19 thru #40). This request also includes electronics support personnel and associated Personal Protective Equipment funding to support the platform's operation.

The RB-M project provides a standard platform to replace the aging 41-foot Utility Boat fleet, which has reached the end of its useful service life. The RB-M will also replace other medium-sized Non-Standard Boats located at multi-mission shore stations. Increased boat capacity directly supports the Ports, Waterways, and Coastal Security mission and enhances the Coast Guard's Search and Rescue and Maritime Law Enforcement missions.

This new platform will significantly increase operational capability and improve crew health and safety. Additional funding is required for the RB-M maintenance, repair, and operational costs.

3. Rescue 21 Follow-On\$12,279

Strategic Goal(s) & Objectives: 3.2, 4.1

PPA Breakdown - Rescue 21 Follow-On		Total (\$000)
PPA I: Military Personnel (8 FTP, 5 FTE)		
	Military Pay and Allowances	407
	Military Health Care	31
	Permanent Change of Station	80
PPA II: Civilian Personnel (12 FTP, 6 FTE)		
	Civilian Pay and Allowances	784
PPA III: Training and Recruiting		
	Training and Education	38
	Recruiting and Training Centers	8
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(844)
	Pacific Area	(843)
	Headquarters Directorates	12,085
	Headquarters Units	98
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	96
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	338
		12,279

Provides follow-on funding for the third installment of the National Distress and Response System Modernization Project (Rescue 21). Rescue 21 is the Coast Guard's primary system to perform the functional tasks of command, control, and communications in the inland and coastal zones for Coast Guard operations including search and rescue and homeland security activities. Rescue 21 will meet safety requirements for growing marine traffic, as well as the International Convention for the Safety of Life at Sea (SOLAS) standards. Rescue 21 also provides modernized command and control capabilities and improved Maritime Domain Awareness (MDA), both critical to the performance of the Coast Guard's homeland security operations.

The Rescue 21 system reached Initial Operating Capability (IOC) in December 2005. Four Low Rate Initial Production (LRIP) locations were operational in Calendar Year 2006. Eleven more locations became operational in FY 2008, which includes the relocation of two IOC commands (SFO Eastern Shore and SFO Atlantic City) to their parent commands, (Sector Hampton Roads and Sector Delaware Bay respectively). Five more locations will be added in FY 2009, bringing the total to 21 operational locations (of the 39 planned).

This follow-on funding supports five distinct cost categories which sustain Rescue 21: Equipment O&M, Circuit Connectivity, Property & Power, Training, and Technology Refresh.

4. Nationwide Automatic Identification System (NAIS) Follow-On\$2,000

Strategic Goal(s) & Objectives: 1.1, 3.1, 3.2

PPA Breakdown - Nationwide Automatic Identification System (NAIS) Follow-On		Total (\$000)
PPA II: Civilian Personnel (2 FTP, 1 FTE)		
	Civilian Pay and Allowances	107
PPA III: Training and Recruiting		
	Training and Education	20
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	1,672
	Headquarters Units	3
PPA V: Centrally Managed Accounts		
	Central Accounts	10
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	188
		2,000

Provides funding for network operation and maintenance service for the Nationwide Automatic Information System (NAIS) including:

- Increased bandwidth and IT security protocols;
- AIS inter-and-intra-governmental data sharing;
- Satellite data;
- Technology refresh (hardware and software) to conform with updated international standards.

NAIS will be operating in a receive-only mode in 55 critical ports and nine coastal areas. Automatic Information System data is validated, stored, and transferred from Sector Command Centers to a central data processing center. This information will feed the maritime Common Operational Picture (COP) as well as intelligence community partners in support of the National Strategy for Maritime Security and its eight supporting plans.

The Maritime Transportation Security Act of 2002 (46 USC 70013) directed DHS to implement a persistent maritime surveillance system to collect, integrate, and analyze information concerning certain vessels operating within, or bound for waters subject to the jurisdiction of the United States. NAIS supports this Congressional requirement and serves as a centerpiece to the Coast Guard and DHS' effort to build Maritime Domain Awareness (MDA). This initiative also contributes to the successful execution of the National Strategy for Maritime Security, Homeland Security Presidential Directive (HSPD-13).

The NAIS project fills MDA gaps by collecting vessel position data and furnishing this information to the COP and other display tools. This information enhances port/coastal surveillance and may be fused with data from other sources and shared with other agencies for global maritime intelligence integration.

5. Sector Air Station Corpus Christi Facility Follow-On.....\$2,400

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.1

PPA Breakdown - Sector Air Station Corpus Christi Facility Follow-On		Total (\$000)
PPA I: Military Personnel (26 FTP, 13 FTE)		
	Military Pay and Allowances	842
	Military Health Care	101
	Permanent Change of Station	178
PPA III: Training and Recruiting		
	Training and Education	142
	Recruiting and Training Centers	20
PPA IV: Operating Funds and Unit Level Maintenance		
	8th District	903
	Headquarters Directorates	7
	Other Activities	2
PPA V: Centrally Managed Accounts		
	Central Accounts	26
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	179
		2,400

Coast Guard Sector and Air Station Corpus Christi is located in a 60-year old, WWII-era Navy seaplane facility at Naval Air Station Corpus Christi. This facility is poorly sited, functionally inadequate and well past its service life. The Coast Guard contracted with GSA to partner with Corpus Christi International Airport for a new, build-to-lease facility that will co-locate the Air Station and the Sector Command. This initiative will provide funding for personnel and equipment requirements to operate a dining facility. Staffing the dining facility with Coast Guard personnel will help improve the sea-to-shore rotation schedule for the Food Service Specialist (FS) rating.

6. Surface and Air Asset Follow-On.....\$46,558

Strategic Goal(s) & Objectives: 1.1, 2, 3.1, 3.2, 4.1

PPA Breakdown - Surface and Air Asset Follow-On		Total (\$000)
PPA I: Military Personnel (320 FTP, 163 FTE)		
	Military Pay and Allowances	10,783
	Military Health Care	1,179
	Permanent Change of Station	2,633
PPA II: Civilian Personnel (40 FTP, 20 FTE)		
	Civilian Pay and Allowances	2,138
PPA III: Training and Recruiting		
	Training and Education	6,814
	Recruiting and Training Centers	1,731
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	1,163
	Pacific Area	271
	1st District	1
	7th District	957
	9th District	1
	13th District	1
	14th District	1
	Headquarters Directorates	3,111
	Headquarters Units	47
	Other Activities	24
PPA V: Centrally Managed Accounts		
	Central Accounts	3,568
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	11,763
	Electronics Maintenance	222
	Civil/Ocean Engineering and Shore Facility Maintenance	150
		46,558

CASA HC-144A Aircraft Follow-On: The Coast Guard intends to acquire 36 HC-144A Maritime Patrol Aircraft by FY 2020. This initiative will provide funding for Personnel and Operations & Maintenance for three new HC-144A aircraft being added to the Coast Guard’s inventory in FY09, ultimately providing additional programmed flight hours in support of maritime domain awareness. In addition, this proposal will fund the operation of Commercial Satellite Communications (COMSATCOM) equipment for current HC-144A aircraft, providing full operational capability and global coverage of high speed data and voice connectivity.

Armed Helicopters Enhancement (Critical Recapitalization): This proposal provides recurring funds to recapitalize Airborne Use of Force (AUF) Kit “A” equipment for 22 HH-65C helicopters fleet wide as well as the two Tactics Training Boats (TTB’s) assigned to HITRON. Airborne use of force is frequently the sole means to stop go-fasts involved in illegal activities. This initiative allows full use of

the increased capability achieved as a result of the transition from the MH-68A to the MH-65C, increasing deployments of the highly successful HITRON initiative by 120%. When the Coast Guard's Armed Helicopter for Homeland Security initiative is completed, the service will have a total of 91 HH-60J and HH-65C helicopters outfitted with Kit "A" equipment, enabling rapid installation of requisite weapons, gun mounts and protective equipment via a "plug and play" methodology. The Coast Guard's other 46 helicopters will be AUF configured (i.e. Kit "A" + Kit "B" = weapons, gun mounts, PPE, and armory support) and located at units surrounding strategic ports. Maintaining standard configuration throughout the Coast Guard's helicopter fleet provides continuity of training and maintenance and allows trained AUF aircrews and full Kit "B" equipment to rapidly deploy throughout the nation in anticipation or response to National Security events or other situations requiring AUF capability.

HC-130J Missionization Follow-On: Provides critical operation and sparing to support operations of six missionized HC-130J aircraft. Missionized HC-130J aircraft have entered operational service and require mission sparing to maintain a high level of operational availability and meet programmed flight hour targets.

WMSL Crew Charlie Phase II (WMSL 752): Provides personnel and funding for the second phase of the crew designated to accept the third National Security Cutter (NSC), scheduled for delivery in 2011. Advanced arrival of crew is necessary to attend required pre-arrival training prior to accepting delivery of the cutter.

NSC SCIF Follow-On: Provides personnel and funding to staff, operate, maintain, and refresh the first two National Security Cutter's (NSC) Sensitive Compartmented Information Facilities (SCIF). Both SCIF installs will occur during their respective Post-Shakedown Availabilities (PSA) in 2010 and 2011. This request includes operations and maintenance (O&M) to support the operations for the SCIFs installed onboard USCGC BERTHOLF & USCGC WAESCHE and provides intelligence training funding for NSC SCIF personnel.

Oversight Alameda - WMSL Logistics: Provides the necessary resources to support USCGC's BERTHOLF & WAESCHE when these cutters transition from the interim support period to long-term support in FY 2010. Hull, Mechanical and Electrical (HM&E) sustainment through the interim support period is expected to rely heavily on contracted logistics support services. As the CG transitions to full, long-term support in FY 2010, a permanent organic logistics support infrastructure is required.

FRC Crews 2 thru 6 (Miami): Provides personnel to operate and maintain the second through sixth Fast Response Cutters (FRC), scheduled for delivery in 2010 and 2011. Advance arrival of the crews is critical to ensure appropriate training is conducted prior to delivery.

FRC Shore Support (Miami): Provides phase one of FRC shore-side maintenance personnel needed to support the scheduled FY 2010 delivery of the lead ship. Assigned billets will support six clustered FRCs in Miami, FL. Phase one establishes the initial support level for the first three FRCs.

E. Base Re-Allocations (Non-Add)

1. Military FTP and FTE Transfer to Civilian.....[\$8,072]

PPA Breakdown - Military FTP and FTE Transfer to Civilian		Total (\$000)
PPA I: Military Personnel (-79 FTP, -79 FTE)		
	Military Pay and Allowances	(7,098)
	Military Health Care	(613)
	Permanent Change of Station	(253)
PPA II: Civilian Personnel (79 FTP, 79 FTE)		
	Civilian Pay and Allowances	8,072
PPA III: Training and Recruiting		
	Training and Education	(108)
		0

Request the transfer of 79 military FTP/FTE to civilian FTP/FTE. This request is based upon the conversion of military positions to civilian positions. These conversions are in accordance with GAO guidance to change military positions funded in PPA I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Allowances).

2. PPA Funding Technical Transfers (\$74.889 million base re-allocation)[\$74,889]

PPA Breakdown - PPA Funding Technical Transfers (\$74.889 million base re-allocation)		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	(279)
	Military Health Care	(5,473)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	(1,770)
PPA III: Training and Recruiting		
	Training and Education	119
	Recruiting and Training Centers	831
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(400)
	Pacific Area	(84)
	1st District	(19)
	Headquarters Directorates	(64,064)
PPA V: Centrally Managed Accounts		
	Central Accounts	44,080
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	5,270
	Electronics Maintenance	20,134
	Civil/Ocean Engineering and Shore Facility Maintenance	(2,800)
	Vessel Maintenance	4,455
		0

Request recurring technical base adjustments to move funding to the appropriate PPA for compliance with Coast Guard financial policy. All requested adjustments retain the original intent and purpose of the funding appropriated; however, the PPA to properly execute these items is different than originally appropriated.

Requested adjustments include movement of funding to the Military Pay and Allowances PPA (PPA 1) for clergy support for the Coast Guard and movement of the budget authority for support of the Coast Guard’s training centers from the Operating Funds and Unit Level Maintenance PPA (PPA 4) to the Training and Recruiting PPA (PPA 3).

Request also includes transferring and centralizing maintenance funds into Depot Level Maintenance PPA (PPA 6) to be used by the C4IT Support Center for National Security Cutter sustainment and the Surface Force Logistics Center for C-144A sustainment initiatives. Funding for service-wide support contracts is also transferred to the Centrally Managed Accounts PPA (PPA 5).

All of the requested transfers are consistent with Coast Guard policy, the intent/purpose or the appropriated funding and will better allow the Coast Guard to execute its budget authority.

Decreases **(\$88,412)**

A. Termination of One Time Costs **(\$32,689)**

PPA Breakdown - Termination of One-Time Costs		Total (\$000)
PPA I: Military Personnel		
	Permanent Change of Station	(5,215)
PPA III: Training and Recruiting		
	Training and Education	(5,563)
	Recruiting and Training Centers	(2,175)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(155)
	1st District	(29)
	5th District	(48)
	7th District	(248)
	8th District	(399)
	9th District	(29)
	11th District	(39)
	13th District	(35)
	14th District	(19)
	17th District	(41)
	Headquarters Directorates	(13,989)
	Headquarters Units	(220)
PPA V: Centrally Managed Accounts		
	Central Accounts	(2,731)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(200)
	Civil/Ocean Engineering and Shore Facility Maintenance	(447)
	Vessel Maintenance	(1,107)
		(32,689)

This line item reflects FY 2010 savings associated with the termination of one-time costs for program start-up and exit transactions funded in FY 2009.

FY 2009 Line Items	Non-Recurring Amount (\$000)
Intra-Government Services	(156)
Inland Rivertenders' Emergency Subsystem Sustainment	(26)
Air Station Cape Cod (ASCC) Operations Follow-On	(68)
Response Boat - Medium (RB-M) Maintenance Follow-On	(33)
Coastal Patrol Boat Follow-On	(2,039)
Rescue 21 Follow-On	(823)
Nationwide Automatic Identification System (NAIS) Follow-On	(66)
Defense Messaging System Follow-On	(220)

Increased Operational Hours for Coastal Patrol Boats	(1,098)
Aviation Mission Hour Gap	(596)
Total	(32,689)

B. Management and Technology Efficiencies

1. Annualization of FY 2009 Management and Technology Efficiencies(\$4,934)

PPA Breakdown - Annualization of FY 2009 Management and Technology Efficiencies		Total (\$000)
PPA I: Military Personnel (-19 FTE)		
	Military Pay and Allowances	(1,337)
	Military Health Care	(144)
	Permanent Change of Station	(566)
PPA II: Civilian Personnel (-3 FTE)		
	Civilian Pay and Allowances	(208)
PPA III: Training and Recruiting		
	Training and Education	(59)
	Recruiting and Training Centers	(76)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(8)
	Headquarters Directorates	(719)
	Other Activities	(3)
PPA V: Centrally Managed Accounts		
	Central Accounts	(27)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(1,787)
		(4,934)

This line item annualizes FY 2009 part-year reductions from various asset decommissionings.

FY 2009 Line Items	FTE (Mil)	FTE (Civ)	Recurring Amount Annualized (\$000)
Air Station Cape Cod (ASCC) Operations Follow-On	0	(3)	(224)
Decommission USCGC BLACKBERRY	0	0	(17)
Decommission Two (2) HU-25 Aircraft	(19)	0	(4,257)
Decommission Four (4) HC-130H Aircraft	0	0	(227)
Decommission Two (2) PC-179 Patrol Boats	0	0	(209)
Total	(19)	(3)	(4,934)

2. Decommission Three HU-25 Aircraft (\$8,171)

PPA Breakdown - Decommission Three HU-25 Aircraft		Total (\$000)
PPA I: Military Personnel (-78 FTP, -39 FTE)		
	Military Pay and Allowances	(2,567)
	Military Health Care	(303)
	Permanent Change of Station	299
PPA III: Training and Recruiting		
	Training and Education	(242)
	Recruiting and Training Centers	(63)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	(254)
	Headquarters Directorates	(1,419)
	Other Activities	(6)
PPA V: Centrally Managed Accounts		
	Central Accounts	(73)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(3,543)
		(8,171)

In accordance with the Deepwater Implementation Plan, the total number of HU-25 aircraft in the U.S. Coast Guard’s inventory will decrease from 20 to zero between FY 2009 and FY 2014. This initiative will decommission aircraft three through five from the original fleet of 20 HU-25 aircraft. Decommissioning three HU-25 aircraft represents a loss of 2,400 flight hours per year (800 flight hours per aircraft). This flight hour deficit will be mitigated with the introduction of HC-144A aircraft in the Coast Guard’s inventory.

3. Decommission One HC-130H Aircraft(\$3,018)

PPA Breakdown - Decommission One HC-130H Aircraft		Total (\$000)
PPA I: Military Personnel (-28 FTP, -14 FTE)		
	Military Pay and Allowances	(891)
	Military Health Care	(109)
	Permanent Change of Station	115
PPA III: Training and Recruiting		
	Training and Education	(150)
	Recruiting and Training Centers	(15)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	(123)
	Headquarters Directorates	(852)
	Other Activities	(2)
PPA V: Centrally Managed Accounts		
	Central Accounts	(24)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(967)
		(3,018)

In accordance with the Deepwater Implementation Plan, the total number of HC-130H aircraft in the U.S. Coast Guard’s inventory will decrease from 27 to 16 between FY 2009 and FY 2016. This initiative will decommission the fifth of 11 HC-130H aircraft identified for decommissioning.

4. Operations System Center Expansion Project Reduction(\$3,600)

PPA Breakdown - Operations System Center Expansion Project Reduction		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	(3,600)
		(3,600)

Reduction of one-time funding in FY 2009 for unrequested initiative.

5. LORAN-C Termination(\$36,000)

PPA Breakdown - LORAN-C Termination		Total (\$000)
PPA I: Military Personnel (-283 FTP, -178 FTE)		
	Military Pay and Allowances	(18,598)
	Military Health Care	(2,197)
	Permanent Change of Station	413
PPA II: Civilian Personnel (-10 FTP, -3 FTE)		
	Civilian Pay and Allowances	(896)
PPA III: Training and Recruiting		
	Training and Education	(459)
	Recruiting and Training Centers	(347)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(131)
	5th District	(70)
	7th District	(56)
	8th District	(461)
	9th District	(123)
	11th District	(257)
	13th District	(133)
	17th District	(1,404)
	Headquarters Directorates	(6,777)
	Headquarters Units	(608)
	Other Activities	(29)
PPA V: Centrally Managed Accounts		
	Central Accounts	(387)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(1,666)
	Civil/Ocean Engineering and Shore Facility Maintenance	(1,814)
		(36,000)

As a result of technological advancements over the last 20 years and the emergence of the U.S. Global Positioning System (GPS), Loran-C is no longer required by the armed forces, the transportation sector, or the nation’s security interests, and is used only by a small segment of the population. The Loran-C system was not established as, nor was it intended to be, a viable systemic backup for GPS. Consequently, consistent with the Administration’s pledge to eliminate unnecessary federal programs and systems, Federal broadcast of the Loran-C signal will be terminated in Fiscal Year 2010. Termination of Loran-C will result in \$36 million of savings in FY2010 and \$190 million over five years.

After satisfying domestic and international notification obligations, the Coast Guard will terminate transmission of the Loran-C signal and systematically close, harden, and de-staff its 24 Loran-C stations and associated support units. In total, 293 FTP associated with Loran-C will be eliminated during the fiscal year with military personnel reassigned to other priority missions.

IV. Program Justification of Changes

**Department of Homeland Security
U. S. Coast Guard
Operating Expenses
Justification of Program Changes
(Dollars in thousands)**

Program Changes **\$53,016**

A. Financial Management Oversight**\$20,000**

Strategic Goal(s) & Objectives: 4.1, 5.2

PPA Breakdown - Financial Management Oversight		Total (\$000)
PPA I: Military Personnel (23 FTP, 12 FTE)		
	Military Pay and Allowances	1,122
	Military Health Care	89
	Permanent Change of Station	204
PPA II: Civilian Personnel (63 FTP, 32 FTE)		
	Civilian Pay and Allowances	3,810
PPA III: Training and Recruiting		
	Training and Education	390
	Recruiting and Training Centers	21
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	6
	Pacific Area	8
	Headquarters Directorates	13,873
	Headquarters Units	24
	Other Activities	5
PPA V: Centrally Managed Accounts		
	Central Accounts	448
		20,000

Description of Item

Provides needed resources to support critical modernization of the Coast Guard’s financial management structure, which includes processes, internal controls, information technology (IT) systems, and human resources as essential pillars of the control environment. The goals of this transformation are to improve the Service’s ability to link mission performance to budget and ensure compliance with the DHS Financial Accountability Act by creating an environment for a sustainable clean audit opinion on annual financial statements. To reach this goal, a methodical approach which examines and strengthens the internal control regime, the building block to assuring sound financial management practices and reporting, will be employed. Personnel from this initiative will build in-house financial management and internal control capability throughout the Service and enhance the management faculty at the Coast Guard Academy to improve the accounting and financial management fields of study.

Justification

Fiscal constraints in the 1990's forced the Coast Guard to streamline its financial management competencies. At the time, financial management was not deemed a core competency for the execution of the service's missions. As such, the Coast Guard now lacks the breadth of expertise in key specialties to make and maintain the significant organizational change required to comply with governmental financial management initiatives.

Financial auditors have identified seven material weaknesses in the Coast Guard's policies, processes, procedures, and IT systems, which inhibit operational efficiency, federal compliance, and financial reporting accuracy. The Coast Guard has developed a Financial Strategy for Transformation and Audit Readiness (FSTAR), which contains detailed plans to remediate internal controls. In addition, the Coast Guard is expanding FSTAR diligently to include plans to support financial statement assertions. Given the reduced capacity of financial management expertise, the Coast Guard requires significant resources to execute FSTAR and rebuild a strong financial management organization with reengineered processes and integrated IT systems.

Performance Impact

By modernizing Coast Guard financial management structure, workforce, and systems, this initiative will support the Department of Homeland Security's effort to achieve an unqualified opinion on its consolidated financial statements as required by the Chief Financial Officer's Act. Failure to fund this request will inhibit the Coast Guard's ability to obtain a clean audit.

B. Enhance Maritime Safety and Security

1. Marine Safety Program.....\$7,500

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.1, 4.2

PPA Breakdown - Marine Safety Program		Total (\$000)
PPA I: Military Personnel (44 FTP, 22 FTE)		
	Military Pay and Allowances	2,192
	Military Health Care	171
	Permanent Change of Station	327
PPA II: Civilian Personnel (30 FTP, 15 FTE)		
	Civilian Pay and Allowances	1,677
PPA III: Training and Recruiting		
	Training and Education	235
	Recruiting and Training Centers	506
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	6
	5th District	6
	7th District	3
	8th District	61
	9th District	19
	11th District	3
	13th District	6
	14th District	2
	17th District	2
	Headquarters Directorates	1,623
	Other Activities	4
PPA V: Centrally Managed Accounts		
	Central Accounts	438
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	219
		7,500

Description of Item

Marine Safety is a critical, statutorily mandated Coast Guard mission. In 2007, the Coast Guard developed the Marine Safety Enhancement Plan (MSEP), which was designed to address identified deficiencies and performance gaps, and provide a roadmap for the execution of a multi-year effort to enhance its ability to effectively carry out this mission. Complete implementation of the MSEP requires additional resources to build the Coast Guard’s capacity to keep pace with maritime industry growth, adjust to Marine Transportation System complexities, and expand its level of technical expertise for development of design and engineering standards.

Justification

The resources provided through this fiscal year 2010 initiative allows the Coast Guard to continue to build out increased capacity and capability needs expressed in the Marine Safety Improvement Plan provided to the Congress by the Commandant. It continues filling the long term gaps between workforce size and industry growth while systematically expanding inspection and investigation personnel in a methodology designed to create a sustainable, highly competent professional workforce. Funding will:

- Allow assignment of 25 Apprentice Marine Inspectors at field units (New York, NY, Hampton Roads, VA, Jacksonville, FL, Galveston, TX, Morgan City, LA, Port Arthur, TX, New Orleans, LA, Houston, TX, Corpus Christi, TX, Seattle, WA, and Los Angeles, CA) to facilitate development of a more effective career progression for marine inspectors and sustainable work force.
- Establish civilian Senior Marine Inspector Training Officers in 7 Feeder Ports (Jacksonville, FL, Galveston, TX, Port Arthur, TX, Houma, LA, Corpus Christi, TX, San Francisco, CA, and Honolulu, HI) to improve long term continuity, facilitate the professional development of junior field personnel, and enhance marine inspector competency.
- Expand or establish Investigating Officer capacity at a dozen Sectors.
- Enhance Coast Guard engineering capacity for standards development and review, as well as increasing engineering graduate school opportunities.
- Complete staffing for National Centers of Expertise (NCOEs) for Towing Vessel (Paducah, KY), Offshore Vessel (Morgan City, LA), LNG Vessel (Port Arthur, TX), Suspension & Revocation (Martinsburg, WV), Investigations (New Orleans, LA), Steam (Duluth, MN) and Vintage Vessels (Duluth, MN) to enhance service delivery and public outreach capacity for existing NCOEs.
- Enhance baseline qualification training in resident courses for Marine Inspectors and Investigators by increasing class capacity and number of courses at the Marine Safety School in Yorktown, VA.

Performance Impact

Failure to fund this request will have a significant adverse impact on the Service's continuing efforts to expand its marine inspection and investigating capacity and establish the training infrastructure and career progression necessary to ensure a sustainable highly competent workforce capable of meeting current and future demands of a growing maritime industry. Without addressing known performance gaps, building competency, and developing an effective workforce model, the Coast Guard will continue to fall further behind industry growth, not have the engineering capacity to keep pace with technological advances, and likely result in diminished service to industry, delays to commerce, and reduction of public safety.

2. Armed Helicopters Enhancement\$845

Strategic Goal(s) & Objectives: 1.1, 2.4, 3.1

PPA Breakdown - Armed Helicopters Enhancement		Total (\$000)
PPA I: Military Personnel (14 FTP, 7 FTE)		
	Military Pay and Allowances	433
	Military Health Care	54
	Permanent Change of Station	109
PPA III: Training and Recruiting		
	Training and Education	77
	Recruiting and Training Centers	12
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	129
	Headquarters Directorates	4
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	26
		845

Description of Item

This initiative supports the increased capability of the Coast Guard’s Helicopter Interdiction Squadron (HITRON), located in Jacksonville, FL. In 2006, the Commandant authorized the establishment of the Area Deployment Center (ADC) and the transition from eight leased MH-68A helicopters to ten MH-65C helicopters. Prior to this transition, this unit was limited to CD/PWCS missions and provided 1,000 Days Deployed At Sea (DDAS) and Days Away from Home Station (DAHS). The personnel and funding in this initiative will support the training and qualification of HITRON aircrews to perform multiple missions while increasing their AUF-capable DDAS and DAHS from 1,000 to 1,450 days, an increase of 450 AUF-capable DDAS/DAHS.

Justification

This initiative will enhance the effectiveness of the maritime law enforcement mission, specifically drug interdiction, by providing additional support assets required by HITRON helicopters and aircrews to meet operational demands. The addition of Tactics Training Boat (TTB) operators and Aerial Gunners are prerequisites for HITRON aircrews to conduct multi-mission operations and increase their AUF-capable DDAS and DAHS from 1,000 to 1,450.

Performance Impact

This additional capability will significantly improve the Coast Guard’s ability to deter drug trafficking, maritime threats, and will play a vital role in establishing an integrated, interoperable border security system. Failure to fund this initiative will sub-optimize the effectiveness of the AUF-equipped helicopters and will ultimately increase the risk of illicit drugs and dangerous people entering the United States.

3. Biometrics at Sea.....\$1,183

Strategic Goal(s) & Objectives: 1.1, 1.3

PPA Breakdown - Biometrics at Sea		Total (\$000)
PPA I: Military Personnel (2 FTP, 1 FTE)		
	Military Pay and Allowances	105
	Military Health Care	8
	Permanent Change of Station	16
PPA II: Civilian Personnel (2 FTP, 1 FTE)		
	Civilian Pay and Allowances	107
PPA III: Training and Recruiting		
	Training and Education	8
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	59
	Headquarters Units	561
PPA V: Centrally Managed Accounts		
	Central Accounts	319
		1,183

Description of Item

This initiative supports operating costs of the Biometrics-At-Sea System (BASS) on approximately 18 Coast Guard cutters operating primarily in the Mona Pass and Florida Straights. The requested funds will provide design and engineering of data capture devices, program support, training, Enterprise Architecture integration, Federal Information Security Management Act (FISMA) certification, and a 2-3 year equipment refresh cycle.

Justification

The BASS provides Coast Guard personnel with the ability to identify dangerous individuals documented in the United States Visitor and Immigration Status Indicator Technology (US-VISIT) database including known felons, those under deportation orders, or on a terrorist watchlist. With a nearly 75% reduction in undocumented migrant flow from the Dominican Republic, the BASS pilot program demonstrated the effectiveness of the system in deterring attempts by undocumented migrants to enter the United States illegally. In addition, it provides Coast Guard law enforcement personnel the capability to identify, detain and ultimately deliver consequences to those engaged in criminal activity such as human smuggling. This initiative will transition the BASS from a pilot program to a program of record and establish the necessary program management and technical support for future expansion to other operational assets including high endurance and medium endurance cutters and Deployable Specialized Forces.

Performance Impact

As of January 2009, Coast Guard personnel captured biometric data on approximately 2,400 undocumented migrants resulting in over 230 criminal convictions. BASS prevented repatriation of these individuals to their respective countries without punishment or deterrence from making future attempts. Failure to fund this initiative will increase the risk of dangerous individuals entering the country illegally and eliminate a proven deterrent to illegal migrant recidivism.

4. Seahawk Charleston Interagency Operations Center Sustainment.....\$1,088

Strategic Goal(s) & Objectives: 1.1, 2, 3, 5.1, 5.5

PPA Breakdown - Seahawk Charleston Interagency Operations Center Sustainment		Total (\$000)
PPA I: Military Personnel (1 FTP, 1 FTE)		
	Military Pay and Allowances	72
	Military Health Care	4
	Permanent Change of Station	11
PPA III: Training and Recruiting		
	Training and Education	4
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	66
	7th District	43
	Headquarters Units	210
PPA V: Centrally Managed Accounts		
	Central Accounts	420
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	258
		1,088

Description of Item

Provides funding for administrative services, facility support, information and communications system hardware maintenance and software licensing and support to continue operation of Project Seahawk in Charleston, SC. Seahawk is a multi-agency coordination center originally established and administered by the Department of Justice (DOJ) to provide a collaborative, Unified Command-based work environment bringing together the cooperative and complimentary capabilities of an Intelligence Cell, the FBI’s Joint Terrorism Task Force, Coast Guard, Customs and Border Protection (CBP), Immigration and Customs Enforcement, and other Federal, state, and local agencies to improve Maritime Domain Awareness and coordinate vessel and inter-modal transportation screening and targeting in the Port of Charleston. Seahawk has proven to be a successful interagency operation center model since 2003. DOJ intends to fund Seahawk through FY09. DHS, with the Coast Guard as Executive Agent, will assume responsibility for the administration of Seahawk in FY10.

Justification

The Port of Charleston is the 5th largest container port in the United States and the trans-shipment point for over 2 million containers and over \$53 billion in cargo. The Charleston customs district is the sixth largest in the country and the port itself makes up approximately 16% of the State of South Carolina’s total economy. Project Seahawk provides tactical level unity of effort and creates synergies among the interagency to coordinate vessel boardings by CBP and Coast Guard boarding teams, fusion of intelligence with vessel arrival schedules to inform threat and risk-based targeting, and coordination of inter-modal and multi-jurisdictional screening activities among Federal, State and local government agencies. The SeaHawk Task Force vets over 2,100 vessels and conducts 400 joint boardings per year. New national requirements for vessel screening will require SeaHawk to conduct an additional 200 boarding per year.

Seahawk has also developed innovative information technologies including the Seahawk portal – an information integration portal capable of consuming and populating a wide range of information and intelligence databases – and the multi-function Seahawk Wireless Network which is an expandable, multi-frequency network capable of supporting operational, sensor and communications data transfer. Without the coordinated operations and increased information sharing among Federal, State and local agencies, the Coast Guard and its interagency port partners would operate independently.

Performance Impact

This initiative supports the operation of Project Seahawk and will allow DHS to continue to realize the benefits already delivered by the project in mitigating terror-related risk, including WMD/Terrorist transfer and direct attack/exploitation of critical infrastructure and key assets by:

- Maintaining a unity of effort among interagency partners through integrated planning and collaboration with Sector operations;
- Maintaining a “goal line defense” layered security system;
- Monitoring critical infrastructure and security zones 24/7; and
- Maintaining a proactive security posture and deterrent to illegal activity.

Failure to fully fund this initiative will result in reduced coordination and the disbanding of the multi-agency center. Additionally, port partners may return to independent, uncoordinated operations and innovative IT systems will be discontinued.

C. Data Center Migration\$22,400

Strategic Goal(s) & Objectives:

PPA Breakdown - Data Center Migration		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	22,400
		22,400

Description of Item

FY 2010 data center development funding will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2010. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers

- Migration of Coast Guard hardware, systems/applications to occupy rack space at the DHS Data Centers.

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Operating Expenses
Appropriation Language

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; for purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and for repairs and service-life replacements, not to exceed a total of \$26,000,000; minor shore construction projects not exceeding [\$1,000,000] **\$1,000,000** in total cost at any location; payments pursuant to section 156 of Public Law 97-377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [\$6,194,925,000] **\$6,556,188,000**, of which \$340,000,000 shall be for defense-related activities; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which not to exceed \$20,000 shall be for official reception and representation expenses: Provided further, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from yacht owners and credited to this appropriation:

Explanation of Changes:

Removed: [Provided, That none of the funds made available by this or any other Act shall be available for administrative expenses in connection with shipping commissioners in the United States]. The designation and duties of the “shipping commissioner,” which was formerly codified, has been repealed, and is therefore largely undefined. The vast majority of the duties and responsibilities of the “shipping commissioner” were transferred to “ship masters.” A reasonable construction of the appropriation provision is that Congress does not intend for Coast Guard appropriations to be available for the expenses of a former position that has, with one exception, been repealed.

[Provided further, That amounts not to exceed 5 percent of the total amount appropriated under this heading may be transferred to the “Acquisition, Construction, and Improvements” appropriation, to be available under the terms and conditions applicable to that appropriation, and to be available for personnel compensation and benefits and related costs to adjust personnel assignment to accelerate management and oversight of new or existing projects without detrimentally affecting the management and oversight of other projects: Provided further, That the amount made available for “Personnel, Compensation, and Benefits” in the “Acquisition, Construction, and Improvements” Appropriation shall not be increased by more than 10 percent by such transfers: Provided further, That the Committees on Appropriations of the Senate and the House of Representatives shall be notified of each transfer within 10 days after it is executed. (Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009.)]

B. FY 2009 to FY 2010 Budget

*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year. 168 FTE/FTP Public Health Service (PHS) officers were removed from this presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimburseable FTE arrangement with the Coast Guard.

**The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

**The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

* 168 FTE/FTP Public Health Service (PHS) officers were removed from the FY 2009 enacted presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimburseable FTE arrangement with the Coast Guard.

PPA Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate our 43,310 military personnel as they serve as the Nation's First Responder across all of the Coast Guard's 11 missions.

Summary Justification and Explanation of Changes

Salaries and Benefits

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 2,371,229	\$ 2,538,407	\$ 2,662,563	\$ 124,156

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2010 request includes funding for the proposed pay raise (currently predicted at 2.9% for military and 2.0% for civilians), medical benefits, other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the annualization of FTE introduced in FY 2009, as well as personnel for acquisition management and oversight, marine inspections, operation of the CASA HC-144A aircraft, and the first two National Security Cutters.

Travel

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 111,781	\$ 110,931	\$ 110,519	\$ (412)

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects increases from inflation and an increase in the number of personnel required to support marine inspections, the CASA HC-144A aircraft, and the first two National Security Cutters.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 5,302	\$ 45,145	\$ 75,017	\$ 29,872

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2010 request reflects increases from inflation and an increase in the number of personnel required to support marine inspections, the CASA HC-144A aircraft, and the first two National Security Cutters.

Other rent

Medical care

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	228,217	\$	300,184	\$	318,188	\$	18,004

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The FY 2010 request includes an adjustment for medical cost increases due to inflation and the increase in FTE.

Operation and maintenance of equipment

	2008		2009		2010		2009 to 2010

PPA Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e. g. Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and "Non-Ceiling" (NC) employees (e. g. cooperative education students, student aids, summer interns and federal junior fellows) and civilian employees not otherwise covered by other PPAs.

Summary Justification and Explanation of Changes

Salaries and Benefits

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 585,907	\$ 644,927	\$ 695,990	\$ 51,063

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2010 request includes funding for the proposed pay raise (currently predicted at 2.0%), medical benefits, other mandatory personnel entitlements. This is the result of additional personnel for acquisitions management and oversight, marine inspections, and financial management specialists.

Travel

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 926	\$ 331	\$ 358	\$ 27

Requested funds cover the travel costs of Coast Guard civilian employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects an increase from inflation, as well as an increase in the number of personnel for acquisitions management and oversight, marine inspections, and financial management specialists.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 2,557	\$ 3,088	\$ 3,246	\$ 158

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of civilian personnel's household goods in conjunction with the acceptance of a new position. The FY 2010 increase is the result of additional personnel for acquisitions management and oversight, marine inspections, and financial management specialists.

PPA Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. "Formal training and education" is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks. Requested funding will ensure a level of capabilities and competencies commensurate with the response posture the Coast Guard has displayed in recent years, such as operational response to Hurricane Katrina, Operation Iraqi Freedom, 9/11 terrorist attacks and other events requiring a rapid response capability.

Summary Justification and Explanation of Changes

Salaries and Benefits

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 86	\$ 127	\$ 127	\$ -

The FY 2010 request has no change.

Travel

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 39,510	\$ 37,031	\$ 36,794	\$ (237)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Increases in travel in FY 2010 are derived from additional training requirements resulting from additional personnel for HC-144A operations, marine inspectors and financial management.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 815	\$ 970	\$ 970	\$ -

The FY 2010 request has no change.

The FY 2010 request has no change.

Printing and reproduction

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 339	\$ 448	\$ 448	\$ -

The FY 2010 request has no change.

Advisory and assistance services

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 26	\$ 2,373	\$ 2,555	\$ 182

Advisory and assistance services include services acquired by contract from non-federal sources (e.g. private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2010 increase is primarily the result of additional personnel for HC-144A operations, marine inspectors and financial management.

Other services

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 60,187	\$ 86,038	\$ 88,138	\$ 2,100

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2010 increase is due to technical adjustments, HC-144A operations, marine inspectors, and financial management personnel.

Purchases of goods & svcs. from gov't accounts

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 9,029	\$ 10,477	\$ 15,848	\$ 5,371

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2010 increase is primarily the result of additional personnel for HC-144A operations, marine inspectors and financial management.

Operation & maintenance of facilities

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	3,522	\$	4,782	\$	4,845	\$	63

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2010 decrease is the result management efficiencies and a portions of the FY09 pay raise.

Research and development

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	502	\$	-	\$	-	\$	-

The FY 2010 request has no change.

Medical care

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	36,795	\$	19	\$	19	\$	-

The FY 2010 request has no change.

Operation and maintenance of equipment

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	135	\$	2,939	\$	3,888	\$	949

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats, and aircraft) and supporting systems. The FY 2010 request reflects funding increases to support the operation of the Coast Guard Academy IT network.

Subsistence and support of persons

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	1,774	\$	924	\$	924	\$	-

The FY 2010 request has no change.

Supplies and materials

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 22,099	\$	24,410	\$	25,170	\$	760

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2010 increase supports additional marine inspectors, HC-144A operations, and the annualization of FY 2009 funding.

Equipment

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 1,448	\$	11,521	\$	10,310	\$	(1,211)

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2010 request includes training requirements related to the operation of HC-144A aircraft and surface Deepwater assets, and funds technical adjustments.

Land and structures

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 4	\$	37	\$	37	\$	-

The FY 2010 request has no change.

PPA Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders. These include Maintenance and Logistics Commands (MLCs), Integrated Support Commands (ISCs), High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Polar Icebreakers, Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs) and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, parts and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

Summary Justification and Explanation of Changes

Salaries and Benefits

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 11,658	\$	5,069	\$	5,069	\$	-

The FY 2010 request has no change.

Travel

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 165,665	\$	96,470	\$	98,020	\$	1,550

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Travel increases in FY 2010 support Seahawk IOC sustainment and the decommissioning of HU-25 aircraft.

Transportation of things

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 29,740	\$	16,589	\$	16,568	\$	(21)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2010 request reflects an decrease in funding due to the termination of one-time FY 2009 costs.

GSA rent

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 39	\$	4,137	\$	4,179	\$	42

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request decreases due to the termination of one-time FY 2009 costs.

Other rent

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	14,070	\$	5,239	\$	5,549	\$	310

Other rent includes all payments to a non-federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The decrease in FY 2010 is due to the termination of one-time FY 2009 costs.

Communication, utilities, and misc charges

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	101,578	\$	210,642	\$	145,467	\$	(65,175)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The decrease is primarily the result of the termination of the Loran-C system.

Printing and reproduction

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	5,648	\$	4,165	\$	4,167	\$	2

The FY 2010 request shows a minor increase for this object class.

Advisory and assistance services

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	60,381	\$	70,706	\$	84,901	\$	14,195

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2010 increase is due to the financial management oversight increase.

Other services

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	281,606	\$	211,953	\$	216,434	\$	4,481

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2010 request reflects an increase due to marine safety, NAIS, HC-144A operations, and Seahawk IOC sustainment.

Purchases of goods & svcs. from gov't accounts

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	62,990	\$	29,224	\$	28,467	\$	(757)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The decrease in FY 2010 is due to the termination of one-time FY 2009 costs.

Operation & maintenance of facilities

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	47,529	\$	37,574	\$	34,231	\$	(3,343)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2010 decrease is due the termination of the Loran-C system.

Operation and maintenance of equipment

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	45,200	\$	93,682	\$	110,387	\$	16,705

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats, and aircraft) and supporting systems. The FY 2010 increase is due to follow-on costs for Rescue 21 and annualization of FY 2009 funding.

Subsistence and support of persons

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	-	\$	1,305	\$	157	\$	(1,148)

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. Specifically, funding supports berthing and subsistence of Coast Guard personnel in support of temporary assigned duty (TAD). The FY 2010 decrease is due to termination of FY 2009 one-time costs.

Supplies and materials

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 382,845	\$ 329,240	\$ 331,359	\$ 2,119

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2010 increase supports follow-on funding for Shore Infrastructure and HC-144A aircraft.

Equipment

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 35,405	\$ 65,099	\$ 61,571	\$ (3,528)

This object class covers the purchase of capitalized and non-capitalized assets. The decrease is the result of the termination of the Loran-C system.

Land and structures

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 463	\$ 2,346	\$ 1,110	\$ (1,236)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2010 decrease is the result of Rescue 21 decreases.

Insurance claims and indemnity

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 1,368	\$ 1,877	\$ 1,877	\$ -

The FY 2010 request has no change.

PPA Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request ensures critical support elements are provided to the workforce, allowing them to execute their roles in supporting Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc) and operational gear (ammunition) are all part of those critical support requirements.

Summary Justification and Explanation of Changes

Travel

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 601	\$ 426	\$ 426	\$ -

The FY 2010 request has no change.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 433	\$ 797	\$ 797	\$ -

The FY 2010 request has no change.

GSA rent

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 70,291	\$ 93,523	\$ 102,475	\$ 8,952

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The majority of FY 2010 increases are a result of changes in GSA rental costs and additional space requirements.

Communication, utilities, and misc charges

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 68,585	\$ 58,205	\$ 112,425	\$ 54,220

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Increases in FY 2010 are due to Government Services increases for communications and postal services as well as technical budget adjustments.

Printing and reproduction

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	-	\$	30	\$	30	\$	-

The FY 2010 request has no change.

Advisory and assistance services

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	1,070	\$	2,221	\$	571	\$	(1,650)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2010 request is reduced due to the termination of an FY 2009 earmark.

Other services

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	73,523	\$	43,837	\$	68,141	\$	24,304

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2010 increase includes the DHS data center migration.

Purchases of goods & svcs. from gov't accounts

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	256	\$	2,723	\$	3,043	\$	320

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g. MIPR). The FY 2010 request provides funding for the Coast Guard to reimburse the National Telecommunications and Information Administration (NTIA), Office of Spectrum Management, for increased operating expenses for the management of approximately 17,000 radio frequency assignments.

Operation & maintenance of facilities

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
\$	148	\$	8	\$	8	\$	-

The FY 2010 request has no change.

Operation and maintenance of equipment

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change	
	\$	4,194	\$	5,040	\$	7,362	\$	2,322

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats, and aircraft) and supporting systems. The FY 2010 request includes the annualization of FY 2009 funding and equipment costs associated with Long Range Identification and Tracking and child care.

Subsistence and support of persons

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change	
	\$	-	\$	1,216	\$	1,216	\$	-

PPA Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft and aircraft equipment.

Summary Justification and Explanation of Changes

Travel

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 17,632	\$ 7,402	\$ 7,413	\$ 11

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2010 increase is due to costs associated with NAIS follow-on.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 3,682	\$ 3,056	\$ 3,058	\$ 2

The FY 2010 request shows a minor increase for this object class.

Other rent

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 296	\$ 4,573	\$ 5,555	\$ 982

The FY 2010 increase includes rental costs associated with NAIS follow-on.

Communication, utilities, and misc charges

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 4,807	\$ 17,233	\$ 37,922	\$ 20,689

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The FY 2010 increase is due to Sector Air Station Corpus Christi follow-on and a technical budget adjustment.

Printing and reproduction

2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
\$ 76	\$ 108	\$ 108	\$ -

The FY 2010 request has no change.

Advisory and assistance services

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	58,471	\$	31,209	\$	31,609	\$	400

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. FY 2010 increase is due to shore infrastructure follow-on.

Other services

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	78,587	\$	47,526	\$	49,073	\$	1,547

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2010 increase is due to the annualization of part-year FY 2009 funding.

Purchases of goods & svcs. from gov't accounts

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	4,061	\$	-	\$	-	\$	-

The FY 2010 request has no change.

Operation & maintenance of facilities

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	126,684	\$	219,960	\$	204,349	\$	(15,611)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2009 decrease is due to the termination of the Loran-C system.

Research and development

	2008		2009		2010		2009 to 2010
	Actual		Enacted		Request		Change
\$	-	\$	2,550	\$	2,550	\$	-

The FY 2010 request has no change.

Operation and maintenance of equipment

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 347,100	\$	369,240	\$	410,136	\$	40,896

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats and aircraft) and supporting systems. The FY 2010 increase supports funding to restore critical aviation parts shortages.

Subsistence and support of persons

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 109	\$	4	\$	4	\$	-

The FY 2010 request has no change.

Supplies and materials

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 83,494	\$	22,348	\$	25,059	\$	2,711

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2010 increase is due to shore infrastructure and HC-144A aircraft follow-on.

Equipment

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 60,735	\$	97,943	\$	109,270	\$	11,327

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2010 request includes the procurement of equipment for HC-144A aircraft and equipment to support armed helicopter requirements.

Land and structures

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 30,387	\$	2,895	\$	17,073	\$	14,178

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2010 increase is due to the costs associated with divesting property and terminating the Loran-C system.

U. S. Coast Guard
Environmental Compliance and Restoration

I. Appropriation Overview

A. Mission Statement for Environmental Compliance and Restoration:

The Coast Guard requests \$13.198 million and 24 FTE in FY 2010, an increase of \$198.000 thousand over the FY 2009 enacted. Environmental Compliance and Restoration (EC&R) provides for environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities . It is also engineering remedies on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination and environmental damage. The EC&R funding request supports all of the Coast Guard's 11 statutorily mandated mission-programs. These mission-programs, in turn, directly support the Coast Guard's role as the principal Federal agency charged with ensuring maritime safety, security and stewardship.

EC&R funding ensures the Coast Guard maintains a leadership role in environmental stewardship with partners. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. Moreover, Coast Guard EC&R funding supports site investigation and remediation activities at older shore facilities slated for property divestiture or transfer. This predominantly involves divestiture of lighthouses under authority of the National Historic Lighthouse Preservation Act.

B. Budget Activities:

Environmental Compliance and Restoration activities support conventional missions including Marine Environmental Protection (MEP).

C. Budget Request Summary:

The Coast Guard requests 25 positions, 24 FTE, and \$13.198 million in FY 2010 to provide for environmental remediation and restoration of Coast Guard facilities, including Kodiak, AK; Elizabeth City, NC; and Baltimore, MD.

PPA I: ENVIRONMENTAL COMPLIANCE AND RESTORATION

	Perm Pos	FTE	Amount
2008 Actual	25	23	12,420
2009 Enacted	25	24	13,000
2010 Adjustments-to-Base	198
2010 Current Services	25	24	13,198
2010 Program Change
2010 Request	25	24	13,198
Total Change 2009-2010	198

The Coast Guard requests \$13.198 million for this activity. This is an increase of \$198.000 thousand over the FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Coast Guard Authorization Act of 1989 (P.L. 101-225) created the Coast Guard Environmental Compliance and Restoration (EC&R) Program and Appropriation. The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at all current and former Coast Guard facilities. It involves completing projects, which include the identification, investigation, and cleanup of contamination from hazardous substances and pollutants, and hard engineering fixes (i.e., physical changes) to Coast Guard buildings and structures, for the purpose of complying with environmental laws to prevent contamination or preclude an environmental liability from developing.

FY 2008 accomplishments included:

- Continued environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination or preclude environmental damage from developing.
- Commenced 78 projects including site investigation and remediation activities at older shore facilities slated for property divestiture or transfer actions; primarily

divestiture of lighthouses in support of the National Historic Lighthouse Preservation Act.

FY 2009 planned accomplishments include:

- Fund Environmental Compliance and Restoration costs incurred as a result of decommissioning (1) 65' WLI (BLACKBERRY). Costs are calculated for disposal through transfer to Department of Transportation's Maritime Administration reefing (i.e., sinking at sea), or ship-breaking (i.e., scrapping) which require the vessels to be thoroughly cleaned of all materials that could be released into the natural environment.

FY 2010 planned accomplishments include:

- Continue environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination or preclude environmental damage from developing. Funding these projects will significantly reduce Coast Guard's ninety-nine project backlog for the EC&R program.
- Perform comprehensive environmental investigations and clean-up actions to include former Long Range Navigation Stations (LORAN Stations) and remediation of a leaking underground fuel storage tank at Air Station Borinquen, Puerto Rico.
- Fund Environmental Compliance and Restoration costs incurred as a result of the ongoing decommissioning process for eight (8) 123-foot WPB class cutters. Decommissioning costs are calculated for disposal through transfer to MARAD, reefing (i.e., sinking at sea), or ship-breaking (i.e., scrapping) which require the vessels to be thoroughly cleaned of all hazardous materials that could be released into the natural environment.

IV. Program Justification of Changes

Not Applicable

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Environmental Compliance and Restoration
Appropriation Language**

For necessary expenses to carry out the environmental compliance and restoration functions of the Coast Guard under chapter 19 of title 14, United States Code, [\$13,000,000] **\$13,198,000**, to remain available until expended. (*Department of Homeland Security Appropriations Act, 2009*).

Explanation of Changes:

No substantive changes proposed.

PPA Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination or preclude environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at older shore facilities slated for property divestiture or transfer actions; this primarily includes divestiture of lighthouses in support of the National Historic Lighthouse Preservation Act.

Summary Justification and Explanation of Changes

Salaries and Benefits

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	2,825	\$	2,902	\$	3,100	\$	198

Salaries and Benefits include costs for 24 FTE. The FY 2010 request includes an increase to account for inflation and planned internal personnel reprogramming issues.

Travel

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	89	\$	130	\$	94	\$	(36)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 decrease is the result of management efficiencies within the program.

Other services

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	9,031	\$	13,191	\$	9,504	\$	(3,687)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Change is due to increase in environmental remediation expenses. The FY 2010 decrease is the result of management efficiencies within the program.

Purchases of goods & svcs. from gov't accounts

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	58	\$	85	\$	61	\$	(24)

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies.

Operation & maintenance of facilities

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	299	\$	437	\$	315	\$	(122)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities.

Operation and maintenance of equipment

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	2	\$	3	\$	2	\$	(1)

Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Supplies and materials

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	116	\$	169	\$	122	\$	(47)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

U. S. Coast Guard
Reserve Training

I. Appropriation Overview

A. Mission Statement for Reserve Training:

The Coast Guard requests \$133.632 million and 536 FTE in FY 2010, an increase of \$3.131 million over FY 2009 enacted. As the principal federal agency charged with maritime safety, security and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external risks and threats. Reserve Training is critical to enabling the Coast Guard to fulfill objectives associated with its 11 Coast Guard mission-programs. The Reserve Training appropriation provides trained units and qualified personnel for service in times of war or national emergency. Moreover, the Coast Guard Reserve may be called upon to provide units and personnel to augment active Coast Guard forces during times of crisis domestically or worldwide.

B. Budget Activities:

Reserve forces contribute to all Coast Guard missions, including Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

C. Budget Request Summary:

The Coast Guard requests 536 positions, 536 FTE, and \$133.632 million in FY 2010. This request provides necessary resources for the training, operation and administration of the Coast Guard Reserve Program while ensuring Reserve Component response readiness. The total program change and base adjustment is \$3.131 million.

2010 Program Change
			102,151
2010 Request	536	536	
Total Change 2009-2010	3,131

The Coast Guard requests \$102.151 million for this activity. This is an increase of \$3.131 million over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request for Pay, Benefits and Allowances funds costs associated with salaries, benefits and other compensation for both full-time staffs supporting members of the Coast Guard's Selected Reserve, as well as for reservists who participate in training activities. The Coast Guard Reserve is the Coast Guard's surge-capacity military workforce and provides a cost-effective method of augmenting response to major contingencies, such as natural and man-made disasters, maritime homeland security, national security and other events.

The Coast Guard Reserve is a cornerstone of service readiness and pivotal to the success of daily mission execution. The Coast Guard Reserve was an invaluable contributor to the national responses to Hurricanes Katrina and Rita, and continues to support DoD's Overseas Contingency Operations with deployed service to Operation Enduring Freedom and Operation Iraqi Freedom. Our Reservists provide an outstanding return on investment by providing valuable augmentation of the active duty workforce through Inactive Duty Training and Active Duty Training periods.

Our request for funding supports 536 FTE representing both military and civilian members who manage all recruiting, formal training, personnel and resource/program oversight. No additional FTE are requested.

Significant accomplishments in FY 2008 include:

- Played an integral role during supplemental-funded contingency operations for DoD's Overseas Contingency Operations, Operation Iraqi Freedom and Operation Enduring Freedom. These reservists will serve in the United States and overseas.
- Participated as crewmembers at eleven Coast Guard units on the Great Lakes in support of "Operation Summerstock" to augment search and rescue capabilities during the high operational tempo of the summer months.
- Mobilized over 800 reservists, who served on active duty under involuntary and voluntary Active Duty Special Work (ADSW) orders in support of contingency operations. They performed functions such as seaport security, standing watches in command centers, law enforcement operations, anti-terrorism/force protection missions, inspections of commercial vessels, domestic military out-load (MOL) security, and others.
- Served on 18 Disaster Area Response Teams of active duty and reserve members in response to serious flooding in several Midwestern states.
- Deployed more than 4,000 man-days of support under Title 14 authority to respond to Hurricanes Gustav and Ike.
- Activated over 260 reservists under voluntary ADSW in support of non-contingency operations within numerous mission areas throughout the Coast Guard.

FY 2009 projected accomplishments include:

- Continue to serve an integral role during supplemental-funded contingency operations DoD's Overseas Contingency Operations, Operation Iraqi Freedom and Operation Enduring Freedom, with over 680 reservists mobilized on involuntary and voluntary Active Duty Special Work (ADSW) orders in support of contingency operations.
- Continued support to seaport security, standing watches in command centers, law enforcement operations, anti-terrorism/force protection missions, inspections of commercial vessels, and domestic military out-load (MOL) security.
- Continued response to provide search and rescue capability and relief for natural disasters. Reservists continue to serve on active duty in the Midwestern and Gulf states for post-disaster support.
- 2009 participation as crewmembers at eleven Coast Guard units on the Great Lakes in support of "Operation Summerstock" to augment search and rescue capabilities during the high operational tempo of the summer months.
- Increase full-time support to Commanders in the field for the training and personal readiness of reserve personnel.

FY 2010 projected accomplishments include:

- Continue to serve an integral role during supplemental-funded contingency operations for DoD's Overseas Contingency Operations, Operation Iraqi Freedom and Operation Enduring Freedom.
- Train additional reservists for deployable expeditionary support and to provide safety and security teams for deployment within the United States.

- Train for mobilization to support national security and disaster response.
- Support DHS HQ Operations, AFRICOM, and DOG operations.
- Further increase full-time support to Commanders in the field for the training and personal readiness of reserve personnel.

PPA II: OPERATIONS, MAINTENANCE AND ADMINISTRATION

	Perm		
	Pos	FTE	Amount
2008 Actual	30,030
2009 Enacted	31,481
2010 Adjustments to Base
2010 Current Services	31,481
2010 Program Change
2010 Request	31,481
Total Change 2009-2010

The Coast Guard requests \$31.481 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request for Operations, Maintenance and Administration funds the costs of services and facilities to train reservists, administer the Reserve program and portion of organizational costs shared by the Reserve Training appropriation operation and maintenance. For example, reservists attend many of the same classroom-based training sessions as members of the active component, and the Reserve Training appropriation provides funding for the reservists for overhead and course-specific costs. Similar Reserve Training cost sharing applies in other arenas as well.

By providing funding for enterprise-wide services used by reservists, the Reserve Training appropriation ensures equipment and facilities necessary to attract and maintain a high-caliber reserve force without eroding the resource base of the active duty military workforce. Coast Guard reservists serve in multiple mission areas as boarding officers, small boat coxswains, contingency planners and marine inspectors. The Coast Guard Reserve is an extraordinary force multiplier upon which our nation can confidently rely in times of exceptional need, embodying the very essence of the Coast Guard's motto: Semper Paratus (Always Ready).

Significant accomplishments in FY 2008 include:

- Maintained readiness and honed their mobilization skills through classroom training, mobilization exercises and on-the-job training alongside their active duty counterparts during routine and emergency operations. Over 85 percent of our 8,100 member Selected Reserve Force are assigned to operational Coast Guard shore units.
- Mobilized, trained, and maintained skills required to support defense operations throughout the world. The remaining 15 percent of our 8,100 member Selected Reserve Force are assigned to deployable PSUs, Naval Coastal Warfare Squadrons and Naval Coastal Warfare groups.
- Implemented organizational structure and business practices to optimally deliver training, readiness and operational support.
- Enhanced the mobilization/activation process with improved management and tracking tools.

- Improved reservists' access to education with the addition of 120 new distance-learning courses eligible for Reserve Retirement Points.

FY 2009 projected accomplishments include:

- Continue to maintain readiness and hone mobilization skills through training and exercises during routine and emergency operations.
- Continue to mobilize, train and maintain skills required to support defense operations throughout the world.
- Continue to optimize the delivery of training, readiness and operational support.
- Develop a methodology for measuring training capacity.
- Improve reserve readiness in the field by realigning 202 full-time support positions for more direct support to the operational commands where reservists are assigned and trained.
- Increase the number of Reserve Program Administrators to provide full-time support to reserve force training and support.
- Improve mobilization and demobilization processes for reservists by ensuring enhanced reserve-specific functionality in Coast Guard administrative systems.
- Develop and provide training to full-time support personnel who will be supporting reserve readiness training and administration at operational commands.

FY 2010 projected accomplishments include:

- Continue to maintain readiness and hone mobilization skills through training and exercises during routine and emergency operations.
- Continue to mobilize, train and maintain skills required to support defense operations throughout the world.
- Continue to optimize the delivery of training, readiness and operational support.
- Continue to improve reserve readiness in the field by providing additional full-time support positions to increase direct support to the operational commands where reservists are assigned and trained.
- Develop and provide training to full-time support personnel who will be supporting reserve readiness training and administration at operational commands.
- Continue to improve reserve readiness and training with further development of formal and on-line training for the full corps of full-time support personnel supporting reserve readiness throughout the Coast Guard.
- Improve efficiency of reserve specific functions in Coast Guard data and personnel management systems.

*The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year.

**The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

PPA Mission Statement

This PPA request funds expenses for compensation of active duty military service members and civilian personnel who support the Reserve Training program. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses. Requested funding will compensate our 536 full-time personnel.

Summary Justification and Explanation of Changes

Salaries and Benefits

	2008 Actual		2009 Enacted		2010 Request		2009 to 2010 Change
	\$ 96,264	\$	99,020	\$	102,151	\$	3,131

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. This includes costs for 536 FTE. The increase in the FY 2010 request is due to the proposed pay raise (2.0% civ and 2.9% mil).

U. S. Coast Guard

Acquisition, Construction and Improvements

I. Appropriation Overview

A. Mission Statement for Acquisition, Construction and Improvements:

The Administration requests \$1.384 billion in FY 2010, a decrease of \$91.000 million from the FY 2009 enacted level of \$1.475 billion. The Acquisition, Construction and Improvements (AC&I) appropriation funds the acquisition of new capital assets, construction of required facilities and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, shore facilities and other equipment, such as computer and other systems.

The AC&I funding request supports all statutorily-mandated Coast Guard mission-programs. These mission-programs in turn directly support the Coast Guard's role as the nation's principal Federal agency responsible for maritime **safety, security, and stewardship**.

B. Budget Activities:

This funding supports all Coast Guard missions, including Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

C. Budget Request Summary:

The Coast Guard requests \$1.384 billion in FY 2010 to support the following projects:

- Response Boat-Medium - \$103.000 million
- Integrated Deepwater Systems - \$1.051 billion
- Rescue 21 - \$117.000 million
- High Frequency recapitalization - \$2.500 million
- Shore facilities and aids to navigation - \$10.000 million
- AC&I personnel related support - \$100.000 million

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Coast Guard
Acquisition, Construction and Improvements
Program Performance Justification
(Dollars in thousands)

PPA I: VESSELS AND CRITICAL INFRASTRUCTURE PROJECTS

	Perm Pos	FTE	Amount
2008 Actual	\$52,314
2009 Enacted	113,000
2010 Adjustments-to-Base
2010 Current Services	113,000
2010 Program Change	-10,000
2010 Request	103,000
Total Change 2009-2010	-10,000

The table above excludes ARRA funding of \$10.000 million provided in P.L. 111-5. The Coast Guard requests \$103.000 million. This is a decrease of \$10.000 million below the FY 2009 enacted.

PROGRAM DESCRIPTION:

Primary operational resource supported: Surface assets, Command and Control

Funding supports the initial acquisition, development or construction of any cutter or boat class. It also supports the improvement, renovation, upgrade, replacement or alteration of these cutter and boat classes. Our primary project for this funding in FY 2010 is the Response Boat-Medium (RB-M) project.

Response Boat-Medium (RB-M)

Significant accomplishments in FY 2008 include:

- Ordered 18 RB-Ms (hulls #13-30)
- Delivered the first three RB-Ms that were ordered Q4 FY 2006 with prior funding
- Commenced Operational Test and Evaluation (OT&E) on the first three RB-Ms
- Second production facility opened by contractor in Green Bay, Wisconsin, establishing of production capacity to meet a production rate of 30 boats per year by the end of FY2010

FY 2009 planned accomplishments include:

- Ordering 36 RB-Ms (hulls #31-66)
- Delivery of an additional 11 RB-Ms ordered with prior funding and support for a total of 14 delivered RB-Ms
- Delivery of the first RB-M from the second production facility in Green Bay in Q4 FY 2009
- Continuation of Operational Test and Evaluation (OT&E) focused on the first six RB-Ms purchased with prior funding
- Logistics element development and fielding (had been deferred in prior years in order to place sufficient boat orders to initiate the contractor opening the second production facility)

FY2010 planned accomplishments include:

- Ordering 30 RB-Ms (hulls #67-96)
- Delivery of an additional 15 RB-Ms ordered with prior year funding and support of a total of 28 delivered RB-Ms
- Completion of OT&E, enter full production, and attain Initial Operating Capability with delivery of the first RB-M following a full production decision

PPA II: AIRCRAFT

	Perm Pos	FTE	Amount
2008 Actual	6,680
2009 Enacted
2010 Adjustments-to-Base
2010 Current Services
2010 Program Change
2010 Request
Total Change 2009-2010

The Coast Guard does not request any funding for this activity in FY 2010.

PPA III: INTEGRATED DEEPWATER SYSTEMS

	Perm Pos	FTE	Amount
2008 Actual	724,018
2009 Enacted	1,033,994
2010 Adjustments-to-Base
2010 Current Services	1,033,994
2010 Program Change	17,486
2010 Request	1,051,480
Total Change 2009-2010	17,486

The table above excludes supplemental funding in 2008 of \$9.430 million (P.L.110-161). The Coast Guard requests \$1.051 billion for this activity. This is an increase of \$17.486 million above the FY 2009 enacted.

PROGRAM DESCRIPTION:

Primary operational resource supported: All

To continue to address America's 21st century maritime threats and challenges, the Coast Guard initiated the Integrated Deepwater System (IDS) program, the largest and most innovative acquisition in Coast Guard history. IDS comprises new cutters and their associated small boats, upgraded legacy cutters, a new fixed-wing manned aircraft fleet, an upgraded helicopters, and both cutter-based and land-based unmanned air vehicles. All of these highly capable assets will be linked with state-of-the-art Command, Control, Communications and Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems, and will be supported by an integrated logistics regime. IDS is comprised of three separate sub-categories:

- Aircraft
- Surface
- Other

FY 2008 Significant accomplishments include:

- Maritime Patrol Aircraft (MPA) – formally accepted the platform’s Mission System Pallet (MSP); funded (a) production of MPA #9 through #11, (b) five (5) MSPs, including their missionization and initial sparing.
- HC-130H – completed SELEX surface search radar installation on three (3) aircraft, began Avionics Phase I effort through NAVAIR and installed nineteen (19) out of twenty-six DF430s (direction finders) .
- HC-130J – formally accepted first missionized aircraft, completed Developmental Test & Evaluation (DT&E); accepted delivery of missionized aircraft #2 & #3. Placed aircraft #4 on contract.
- HH-60 – completed prototype to accomplish a service-life extension that refurbishes the airframe, wiring, and components; add new radar and C4ISR suite; and installs an integrated cockpit.
- HH-65 – continued efforts to provide a service-life extension which refurbishes the airframe, tail drive shaft and fenestron anti-torque device; strengthens landing gear; adds new radar and new C4ISR suite; and installs an integrated cockpit.

SURFACE

- Awarded contract for the Sentinel Class (FRC-B) Patrol Boat
- Began construction of NSC #3
- Purchased Long Lead Time Material (LLTM) for NSC #4
- Completed Mission Effectiveness Project (MEP) for seven Medium Endurance Cutters (WMEC) and five Patrol Boats (WPB)

OTHER

- Logistics Shore
 - Installed LIMS at facilities where LIMS use is required, including Naval Engineering Support Unit (NESU) Boston, NESU Honolulu, Engineering Support Unit (ESU) Honolulu, ATC Mobile, Coast Guard Air Station (CGAS) Savannah, CGAS New Orleans, CGAS Miami, CGAS Cape Cod, CGAS, Borinquen, CGAS Barbers Point and CGAS Elizabeth City
- Facilities
 - Constructed the OCCS building to support the new NSCs in Alameda, CA and the FRC office/storage building in Miami, FL

FY 2009 planned accomplishments include:

AIRCRAFT

- MPA – Fund production of (a) MPA #12 and three (3) MSPs; and (b) their missionization and initial sparing; accept MPAs #6, #7, and #8. Initial Operational Capability (IOC) for this asset will be achieved.

- HH-65 – continue a service-life extension to refurbish the airframe, wiring and components; adds new radar and new C4ISR suite; and install an integrated cockpit
- HH-60 – continue a service-life extension to refurbish the airframe, wiring, and components; add new radar and new C4ISR suite; and install an integrated cockpit
- HC-130H – continue avionics modernization and center wing box replacement to extend fleet service life
- HC-130J – complete missionization of aircraft #4 and negotiate missionization of aircraft #5 and #6; fly first avionics upgrade prototype aircraft
- UAS – perform pre-acquisition analysis to determine best strategy to meet critical mission requirements

SURFACE

- Award three (FRC #2- #4) follow-on FRC-B Low Rate Initial Production hulls
- Complete MEP for five WMECs and three WPBs

OTHER

- Continue installation of LIMS systems at facilities where LIMS as required, including NESU Boston, NESU Honolulu, ESU Honolulu, Aviation Technical Training Center (ATTC) Mobile, CG Air Station (CGAS) Savannah, CGAS New Orleans, CGAS Miami, CGAS Cape Cod, CGAS, Borinquen, CGAS Barbers Point and CGAS Elizabeth City
- Phase II construction of the Off-Cycle Crew Support (OCCS) building to support NSCs in Alameda, CA; facility upgrades at the first three FRC-B homeports; facility upgrades at the second NSC homeport; environmental assessments of Deepwater homeports and aviation sites; and detailed engineering evaluations.

FY 2010 planned accomplishments include:

AIRCRAFT

- MPA – funds production of MPA #13 and #14, three (3) MSPs, initial spares, and a flight training simulator
- HH-65 – continue a service-life extension to refurbish the airframe, wiring and components; adds new radar and C4ISR suite; and install an integrated cockpit
- HH-60 – continue a service-life extension to refurbish the airframe, wiring, and components; add new radar and C4ISR suite; and install an integrated cockpit
- HC-130H – continue avionics modernization and center wing box replacement to extend fleet service life
- HC-130J – complete missionization of aircraft #5 and purchase crashworthy observer seats.
-

SURFACE

- Award contract for Production of NSC #4
- Award contract for FRC-B Full Rate Production hulls #5-8
- OPC – Develop Concepts of Operations (CONOPS) and Operational Requirements Document (ORD)
- Complete MEP for five WMECs and three WPBs

OTHER

- Continue installation of LIMS systems at facilities where LIMS as required
- Begin work on MPA Hanger for CGAS Cape Cod.
- Continue to support NSCs with facility upgrades in Alameda, CA and at the second NSC homeport; facility upgrades at the first three FRC-B homeports; construction of an FRC trainer at Yorktown, VA; environmental assessments of Deepwater homeports and aviation sites; and detailed engineering evaluations.

PPA IV: OTHER EQUIPMENT

	Perm Pos	FTE	Amount
2008 Actual	\$116,512
2009 Enacted	89,174
2010 Adjustments-to-Base
2010 Current Services	89,174
2010 Program Change	30,326
2010 Request	119,500
Total Change 2009-2010	30,326

The table above excludes supplemental funding in 2008 of \$210.000 thousand (P.L.110-161). The Coast Guard requests \$119.500 million for this activity. This is a \$30.326 million increase above the FY 2009 enacted.

PROGRAM DESCRIPTION:

Primary operational resource supported: Command, Control, Communications, Computers and Information Technology

Funding procures hardware and software, including the initial acquisition, development or construction of any system, software or equipment costing over \$1 million per usable segment or item, or \$10 million total project cost. It also includes the improvement, renovation, upgrade, replacement or alteration of equipment or hardware that exceeds \$1 million per usable segment or item, or \$10 million total project cost, regardless of the cost per site.

Rescue 21

FY 2008 accomplishments include:

- Delivered 11 Full Rate Production Sectors: Rescue 21 is operational in 16 of 39 Sectors and is standing watch and saving lives along 22,292 miles of U.S. coastline
- Received approval of APB (Rev 5) adjusting system cost and schedule baselines to more accurately reflect actual system deployment results; no changes to Key Performance Parameters
- Deployed Disaster Recovery capability in Gulf Coast for Hurricanes Gustav and Ike allowing Sector New Orleans to stand the watch from OSC Martinsburg, WV, and restoring damaged critical communications links to keep the system operational
- Continued work in Alaska: development of project plan, surveys of proposed new sites, and initial development of testing lab

FY 2009 planned accomplishments include:

- Deployment of four additional Sectors for a total of 28,016 miles in 20 of 39 Sectors
- Continue work on 12 remaining Full Rate Production Sectors
- Begin work on Western Rivers: proof of concept and development of prototype
- Begin deployment of Vessels Subsystem: deploy UHF radios to 125 vessels
- Continue work in Alaska: including completion of Acquisition Plan, research and testing to develop components and configurations for the standard Remote Fixed Facility (tower) and Sector Command Center console

FY 2010 planned accomplishments include:

- Deployment of seven additional Sectors for a total of 36,429 miles in 27 of 39 Sectors
- Continue work on seven remaining Full Rate Production Sectors
- Begin deployment of Western Rivers Subsystem
- Continue deployment of Vessels Subsystem: deploy UHF radios to 300 vessels
- Continue work in Alaska: deployment of limited interim capabilities with deployment of full capabilities to follow in FY 2011

High Frequency (HF) Recapitalization

FY 2008 accomplishments include:

- Purchased and install 12 HF transmitters (\$200K per transmitter).

FY 2009 planned accomplishments include:

- Purchase and install 12 additional HF transmitters (\$200K per transmitter).

FY 2010 planned accomplishments include:

- Purchase and install 12 additional HF transmitters (\$200K per transmitter)).

2010 Request	10,000
Total Change 2009-2010	-58,000

The table above excludes supplemental funding in 2008 of \$276.760 million (P.L.110-161) and excludes ARRA funding in 2009 of \$88.000 million (P.L. 111-5). The Coast Guard requests \$10.000 million for this activity. This is a decrease of \$58.000 million below the FY 2009 enacted.

PROGRAM DESCRIPTION:

Primary operational resource supported: Shore units and Aids-to-Navigation (ATON)

The AC&I shore facilities and ATON capital investment program provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, ATON, and related equipment.

FY 2008 accomplishments include:

- Constructed duty berthing and boat maintenance bay at Station Washington
- Rebuilt multi-purpose facility and waterfront at Base Galveston Phase II.
- Began a Rescue Swimmer Training Facility at Aviation Technical Training Center (ATTC) Elizabeth City, NC.
- Constructed a consolidated Station Marquette, MI facility.
- Constructed eight additional housing units at Cordova, AK
- Began facility renovations at Sector Buffalo
- Aids to Navigation work at the following sites: Delaware Bay and River, DE; Sharps Island Light, MD; Edgewater, PA; Lake St. Clair, MI.

FY 2009 planned accomplishments include:

- Complete initial survey and design for nine facilities/purposes.
- Commence Phase III of the Cordova, Alaska housing project which will complete 6 duplex units (12 housing units).
- Commence the recapitalization of Chase Hall's North Annex A.
- Commence the renovation of the run way lighting at Air Station Cape Cod (Massachusetts Military Reservation).
- Commence construction of the addition to the TISCOM Telecommunications Systems Directorate (TSD) building.
- Purchase housing for Station Montauk, NY.
- Commence construction of a 23,000 GSF consolidated Station, Aids to Navigation Team (ANT) and Coastal Patrol Boat (CPB) facilities for Station Cape May.
- Complete Phase II of the Rescue Swimmer Training Facility at Aviation Technical Training Center (ATTC), Elizabeth City, NC project by providing the Modular Egress Training Simulator (dunker); dunker tank; enclosure with deck space, mechanical support space; classrooms and labs.
- Aids To Navigation work at the following sites: Pleasant River, ME, Port Canaveral and Port Manatee, FL, Mobile, AL, Gulfport, MS, Port Charles, LA, Anaheim Bay and Mission Bay, CA, Puget Sound, WA, and Sumner Strait, AK.

FY 2010 planned accomplishments include:

- Complete initial survey and design for seven facilities/purposes
- Aids To Navigation work at the following sites: Port Canaveral, FL – Outbound Ranges; Belle Pass/Port Fuchon, LA – Inbound Ranges ; Anaheim Bay Ranges, CA; Anaheim Bay, CA – Buoys to Beacons; Napa River, CA; Sacramento/San Joaquin Rivers, CA; Houston Ship Channel Ranges, TX; St. Mary's River, MI – Buoys to Beacons; Mobile Channel Ranges, AL.

The Coast Guard requests \$100.000 million for this activity. This is an increase of \$7.170 million above the FY 2009 enacted.

PROGRAM DESCRIPTION:

Primary operational resource supported: All

Acquisition, Construction and Improvements (AC&I) has a specific annual appropriation to fund “personnel compensation and benefits and related costs. Annual AC&I personnel compensation appropriation, rather than the multi-year project funds, must be used to fund all AC&I related personnel costs. The primary initiatives include contract support for financial management services, contracting support services, training and workforce certification. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Acquisition, Construction, and Improvements
Appropriation Language**

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law; [~~\$1,494,576,000~~]**\$1,383,980,000** of which \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which [~~\$113,000,000~~]**\$103,000,000** shall be available until September 30, [~~2013~~]**2014**, to acquire, repair, renovate, or improve vessels, small boats, and related equipment; of which [~~\$89,174,000~~]**\$119,500,000** shall be available until September 30, [~~2011~~]**2012**, for other equipment; of which [~~\$68,000,000~~]**\$10,000,000** shall be available until September 30, [~~2011~~]**2012**, for shore facilities and aids to navigation facilities,[including \$3,000,000 for Sector Buffalo and \$15,000,000 for the Rescue Swimmer Training Facility;] of which [~~\$92,830,000~~]**\$100,000,000** shall be available for personnel compensation and benefits and related costs;[of which \$97,578,000 shall be available until expended for a new Coast Guard and Department of Homeland Security headquarters;]and of which [~~\$1,033,994,000~~]**\$1,051,480,000** shall be available until September 30, [~~2013~~]**2014**, for the Integrated Deepwater Systems program:[*Provided*, That of the funds made available for the Integrated Deepwater Systems program, \$244,550,000 is for aircraft and \$571,003,000 is for surface ships: *Provided further*, That \$350,000,000 of the funds provided for the Integrated Deepwater Systems program may not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive directly from the Coast Guard and approve a plan for expenditure that—

- (1) defines activities, milestones, yearly costs, and life cycle costs for each new procurement of a major asset, including an independent cost estimate for each;
- (2) identifies life cycle staffing and training needs of Coast Guard project managers and procurement and contract staff;
- (3) identifies competition to be conducted in, and summarizes the approved acquisition strategy for, each procurement;
- (4) includes a certification by the Chief Human Capital Officer of the Department of Homeland Security that current human capital capabilities are sufficient to execute the expenditure plan;
- (5) includes an explanation of each procurement that involves an indefinite delivery/indefinite quantity contract and explains the need for such contract;
- (6) identifies individual project balances by fiscal year, including planned carryover into fiscal year 2010 by project;
- (7) identifies operational gaps by asset and explains how funds provided in this Act address the shortfalls between current operational capabilities and requirements;

(8) includes a listing of all open Government Accountability Office and Office of Inspector General recommendations related to the program and the status of Coast Guard actions to address the recommendations, including milestones for fully addressing them;

(9) includes a certification by the Chief Procurement Officer of the Department that the program has been reviewed and approved in accordance with the investment management process of the Department, and that the process fulfills all capital planning and investment control requirements and reviews established by the Office of Management and Budget, including Circular A-11, part 7;

(10) identifies use of the Defense Contract Audit Agency;

(11) includes a certification by the head of contracting activity for the Coast Guard and the Chief Procurement Officer of the Department that the plans for the program comply with the Federal acquisition rules, requirements, guidelines, and practices, and a description of the actions being taken to address areas of non-compliance, the risks associated with them along with plans for addressing these risks, and the status of their implementation;

(12) identifies the use of independent validation and verification; and

(13) is reviewed by the Government Accountability Office:

Provided further, That no funding may be obligated for low rate initial production or initial production of any Integrated Deepwater Systems program asset until Coast Guard revises its Major Systems Acquisition Manual procedures to require a formal design review prior to the authorization of low rate initial production or initial production: *Provided further*, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives, in conjunction with the President's fiscal year 2010 budget, a review of the Revised Deepwater Implementation Plan that identifies any changes to the plan for the fiscal year; an annual performance comparison of Integrated Deepwater Systems program assets to pre-Deepwater legacy assets; a status report of legacy assets; a detailed explanation of how the costs of legacy assets are being accounted for within the Integrated Deepwater Systems program; and the earned value management system gold card data for each Integrated Deepwater Systems program asset: *Provided further*, That the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives a comprehensive review of the Revised Deepwater Implementation Plan every 5 years, beginning in fiscal year 2011, that includes a complete projection of the acquisition costs and schedule for the duration of the plan through fiscal year 2027: *Provided further*, That the Secretary shall annually submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted under section 1105(a) of title 31, United States Code, a future-years capital investment plan for the Coast Guard that identifies for each capital budget line item—

(1) the proposed appropriation included in that budget;

(2) the total estimated cost of completion;

(3) projected funding levels for each fiscal year for the next 5 fiscal years or until project completion, whichever is earlier;

(4) an estimated completion date at the projected funding levels; and

(5) changes, if any, in the total estimated cost of completion or estimated completion date from previous future-years capital investment plans submitted to the Committees on Appropriations of the Senate and the House of Representatives:

Provided further, That the Secretary shall ensure that amounts specified in the future-years capital investment plan are consistent to the maximum extent practicable with proposed

appropriations necessary to support the programs, projects, and activities of the Coast Guard in the President's budget as submitted under section 1105(a) of title 31, United States Code, for that fiscal year: *Provided further*, That any inconsistencies between the capital investment plan and proposed appropriations shall be identified and justified: *Provided further*, That subsections (a), and (b) of section 6402 of the U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (Public Law 110– 28) shall apply to fiscal year 2009: *Provided further*, That notwithstanding section 503 of this Act, amounts transferred from the "Operating Expenses" appropriation for personnel compensation and benefits and related costs to adjust personnel assignment to accelerate management and oversight of new or existing projects may be transferred to the "Operating Expenses" appropriation to be merged with that appropriation, to be available under the same terms and conditions for which that appropriation is available, when no longer required for project acceleration or oversight, or to otherwise adjust personnel assignment: *Provided further*, That the Committees on Appropriations of the Senate and the House of Representatives shall be notified of each transfer within 30 days after it is executed.] (*Department of Homeland Security Appropriations Act, 2009.*)

[(INCLUDING TRANSFER OF FUNDS)]

[For an additional amount for "Acquisition, Construction, and Improvements" for necessary expenses related to the consequences of 2008 natural disasters and flooding, \$300,000,000, to remain available until expended: *Provided*, That notwithstanding the transfer limitation contained in section 503 of division E of Public Law 110–161, such funding may be transferred to other Coast Guard appropriations after notification as required in accordance with such section: *Provided further*, That a plan listing all facilities to be reconstructed and restored, with associated costs, shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives.]

[From unobligated balances of prior year appropriations made available for Coast Guard "Acquisition, Construction, and Improvements", \$20,000,000 are rescinded: *Provided*, That no funds shall be rescinded from prior year appropriations provided for the National Security Cutter or the Maritime Patrol Aircraft: *Provided further*, That the Coast Guard shall submit notification in accordance with section 503 of this Act listing projects for which funding will be rescinded.]

*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year. 168 FTE/FTP Public Health Service (PHS) officers were removed from this presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimburseable FTE arrangement with the Coast Guard.

**The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

**U. S. Coast Guard Justification
Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Response Boat - Medium (RB-M)

\$103,000

Project Description, Justification and Scope

This funding supports logistics development and places 30 production boats on order.

In total, the Response Boat - Medium (RB-M) project will procure 180 new small boats to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with assets more capable of meeting the Coast Guard's multi-mission operational requirements, including Search and Rescue; Marine Safety; Marine Environmental Protection; Living Marine Resources; Ports, Waterways, and Coastal Security; and Defense Readiness.

The legacy 41' UTB, built by the Coast Guard from 1973 to 1980, is a key asset for multi-mission, station-based Coast Guard operations within coastal zones. The 41' UTB entered service in 1973, replacing the 40' UTB that began service in 1951. Although designed specifically for Search and Rescue (SAR) missions, the 41' UTBs have been employed as multi-mission assets. Now at the end of their service lives, the 41' UTBs are experiencing rising maintenance costs and declining readiness levels resulting in loss of mission performance and effectiveness.

Coast Guard missions have changed markedly since the 41' UTB was built, especially since the tragic events of September 11, 2001. The RB-M offers a number of opportunities for improvements over the existing fleet of 41' UTBs and other non-standard boats in performance, crew efficiency and operational availability. Program requirements and extensive field commander input indicate a need for an RB-M that is substantially faster than the 41' UTB to support new homeland security operations (i.e. 40+ knots vs. 26 knots). Such capability will also improve multi-mission effectiveness for Search and Rescue, Undocumented Migrant Interdiction, Illegal Drug Interdiction, Other Law Enforcement, Ports, Waterways, and Coastal Security (PWCS) and Defense Readiness missions.

Integrated navigation and sensors, compliant with modern international radio-telephone standards provide the RB-M better search capability that further improves mission effectiveness. Interoperability of the RB-M with Rescue 21 equipment enhances overall command and control as well as crew safety in coastal zones. Moreover, crew efficiency will be improved in a number of areas relating to human factors and engineering. For example,

- Self righting capability provides improved survivability in heavy weather
- Self-fendering allows more efficient boarding and towing operations
- Improved survivor recovery arrangement improves crew effectiveness
- Secure seating for each crewmember in an environmentally controlled cabin enables greater mission endurance with less crew fatigue

Methods to achieve the above include emphasizing the ability to maintain and replace RB-M components quickly and providing improved depot level maintenance support. Further efficiencies are gained by providing maintenance relief vessels to substitute for station boats during major maintenance

Response Boat - Medium (RB-M)

\$103,000

and casualty repairs. The RB-M is also being built to dimensions that will allow for commercial overland transportation to support deployed surge operations, and technical data will be formatted to support the ongoing organizational logistics transformation.

The RB-M Acquisition Strategy is two-phased: Phase I - full and open competitive Request For Proposal (RFP), selected three contractors to build test boats, followed by developmental testing and evaluation to validate RB-M requirements. Phase II - competitive RFP limited to the three Phase I contractors for production and logistics support for approximately 180 boats that meet the Coast Guard's multi-mission requirements.

The RFP for the test boats was released August 9, 2002 and contracts for three test boats were awarded on May 2, 2003. The test boats were delivered October 29, 2003. The Coast Guard conducted extensive in-water developmental testing and evaluation after accepting the Phase I test boats. Personnel from Coast Guard multi-mission stations who operate and maintain small boats on a daily basis participated in the in-water testing. The Naval Surface Warfare Center Carderock Division – Combatant Craft Department – conducted the technical analysis of the data gathered from the acceptance, performance, mission effectiveness and supportability testing. The evaluation results were used to validate government requirements and verify industry's ability to meet those requirements using non-developmental state of the market technology at a reasonable price. Select portions of the Phase I test results were also furnished to the Phase I contractors for additional research and development, and for use in developing their Phase II proposals.

CONTRACTOR

On June 21, 2006, the Response Boat – Medium (RB-M) contract for the second procurement phase for design, construction, outfit and delivery of the RB-M system, was awarded to Marinette Marine Corporation (MMC) of Marinette, Wisconsin. Marinette Marine's primary subcontractor for design and construction of the initial RB-Ms is Kvichak Marine Industries (KMI) in Kent, Washington. When in full production RB-Ms will be delivered from both the MMC Green Bay, Wisconsin facility and the Kvichak Marine Kent, Washington facility.

KEY EVENTS

Significant accomplishments in FY 2008 include:

- Ordered 18 RB-Ms (hulls #13-30)
- Received first three RB-Ms that were ordered Q4 FY 2006 with prior funding
- Commenced Operational Test and Evaluation (OT&E) on the first three RB-Ms
- Opened second production facility in Green Bay, Wisconsin supporting establishment of production capacity to meet a production rate of 30 boats per year by the end of FY2010

FY 2009 planned accomplishments include:

- Order 36 RB-Ms (hulls #31-66)
- Receive additional 10 RB-Ms ordered with prior funding and support for a total of 13 delivered RB-Ms
- Receive the first RB-M from the second production facility in Green Bay in Q4 FY 2009

Response Boat - Medium (RB-M)

\$103,000

- Continue Operational Test and Evaluation (OT&E) focused on the first six RB-Ms purchased with prior funding
- Develop and field logistics system elements deferred in prior years to support placing sufficient boat orders to initiate the contractor opening the second production facility

FY 2010 planned accomplishments include:

- Order 30 RB-Ms (hulls #67- 96)
- Receive additional 15 RB-Ms ordered with prior year funding and support of a total of 28 delivered RB-Ms
- Complete OT&E, enter full production, and attain Initial Operating Capability with delivery of the first RB-M following a full production decision
- Reach a full production rate of 30 boats per year by the end of the fiscal year

Significant Changes

The FY 2008 appropriation supported ordering 18 RB-Ms bringing the total number of boats on order to 30. This order provided the incentive for the contractor to expand production capacity by opening a second production facility in Green Bay, Wisconsin to complement the production capacity established at the sub-contractor’s facility in Kent, Washington. Opening the Green Bay facility in FY 2008 supports reaching a full production capacity of 30 boats per year by the end of FY 2010 and allows the planned 180 RB-Ms to be placed on order prior to the contract expiration in FY 2014.

With delivery of the first six RB-Ms in FYs 2008 and 2009 the boats needed to complete OT&E have been acquired. OT&E will continue throughout FY 2009 with targeted completion in Q1 FY 2010. Units identified to receive the first six RB-Ms were selected to provide the most diverse operational and environmental conditions possible to ensure OT&E was representative of all conditions the RB-M would encounter once fully deployed. Subsequent delivery locations will be established based on demonstrated performance of the RB-M during OT&E. The first twelve RB-Ms have or will be delivered to the following stations:

Delivery Date	Hull#	Location	Status
Apr 2008	45601	Station Little Creek, Virginia	Delivered
Aug 2008	45602	Station Cape Disappointment, Washington	Delivered
Sep 2008	45603	Station Key West, Florida	Delivered
Oct 2008	45604	Station Milwaukee, Wisconsin	Delivered
Dec 2008	45605	Station New York, New York	Delivered
Jan 2009	45606	Station Port Aransas, Texas	Delivered
Feb 2009	45607	Boat Forces Center, Yorktown, Virginia	Delivered
Mar 2009	45608	Station Boston, Massachusetts	Delivered
May 2009	45609	Station San Juan, Puerto Rico	
Jul 2009	45610	Station New York, New York	
Jul 2009	45611	Station Port Aransas, Texas	
Aug 2009	45612	Station New York, New York	
Sep 2009	45613	TBD

Method of Performance

The RB-M Project Management Team is committed to using an Earned Value Management System (EVMS) that meets ANSI/EIA Standard 748. During the Capability Development and Demonstration Phase of the acquisition process an earned value management framework was implemented for effective project management and controls. The RB-M Project is applying the lessons learned from other agency acquisition programs and using those insights in managing the cost, schedule, and technical performance

U. S. Coast Guard - FY 2010 Congressional Budget Submission

Response Boat - Medium (RB-M)

\$103,000

during the project life cycle. The RB-M Project has hired Booz Allen Hamilton to provide earned value consulting expertise. Working with Booz Allen Hamilton, the RB-M Project has implemented ANSI 748-A compliant earned value requirements incorporating earned value management.

The Project also requires Integrated Baseline Reviews (IBR). The first IBR was held jointly with the contractor in November 2006 to provide a mutual understanding of risks inherent in contractors' performance plans and underlying management control systems. Subsequent IBR's are held after each delivery order is placed. The IBR provides a forum for mutual understanding of risks inherent in contracts' performance plans and underlying management control systems. The IBR and EVMS are essential elements of the RB-M Project's risk management approach. The IBRs address the integrated master schedule (IMS), integrated master plan (IMP), and include discussions with contractor control account managers (CAM) to ensure alignment between the contractor and the Government. The most recent IBR was held in January 2009 to review and establish the production and delivery schedule for RB-Ms #13-30.

Budget Allocation to Mission-Program

HC-144 Maritime Patrol Aircraft (MPA)

\$175,000

Project Description, Justification and Scope

This request funds two (2) Maritime Patrol Aircraft (MPA) HC-144As, #13 & #14, three (3) Mission System Pallets (MSP), one (1) Aircraft Flight Simulator for training, and initial sparring, repair parts and associated infrastructure. These funds will address the Coast Guard's MPA flight hour gap by providing 2,400 additional MPA hours every year.

CAPABILITY ACQUIRED/MAINTAINED:

The HC-144A will be equipped with communication, navigation and surveillance systems allowing the aircraft to operate worldwide within the range of its performance parameters, in civilian and military airspace, in support of its Congressionally-mandated missions.

Purchased in compliance with the Buy American Act, the HC-144A is the perfect complement for the Coast Guard fleet of long-range, heavy-lift HC-130 aircraft. Its high-efficiency turbo prop design allows extended surveillance and quick response capability. The sophisticated surface search radar can detect targets of interest from over 100 miles away. Once closer to the target of interest, the Infrared/Electro-Optical (IR/EO) sensor can further classify and identify it in virtually all weather conditions, allowing the Coast Guard to quickly locate high interest vessels and mariners in distress.

The state-of-the-art cockpit design provides pilots with superior situational awareness, reduced workload and increased safety, allowing them to better concentrate on the mission. Human factors engineering is also evident in the mission system pallet that controls the tactical workstation. Systems operators can collect, compile, and transfer vital information in real time to operational commanders on ship or on shore hundreds of miles from the aircraft. Satellite radios provide for clear and uninterrupted voice and data exchange, and advanced electronic support measures that can automatically detect friendly/unknown vessels and their 'fingerprints' add another layer of defense to the homeland security mission.

The HC-144A also provides great mission flexibility. The hydraulically-operated rear ramp allows for easy roll-on/roll-off provisions. This quick-change feature allows ground crews to re-configure the aircraft from maritime patrol to medical evacuation to passenger/freight transport. Its medium size and high-lift wing design allow take-off and landing on short, unpaved landing areas, further enhancing the Coast Guard's abilities to aid first responders in all types of national, state and local emergencies.

HC-144 Maritime Patrol Aircraft (MPA)

\$175,000

PERFORMANCE:

The HC-144A is a transport and surveillance, fixed-wing aircraft that will be used to perform Search and Rescue (SAR) missions, enforce laws and treaties, including illegal drug interdiction, marine environmental protection, military readiness, homeland security and International Ice Patrol missions, as well as cargo and personnel transport. It can perform aerial delivery of SAR equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. As the medium-range maritime patrol aircraft, the Ocean Sentry delivers maritime domain awareness essential to achieving mission success in the following Congressionally-mandated missions:

MARITIME SAFETY:

- Search and Rescue (SAR) – The Ocean Sentry will be outfitted with a capable C4ISR suite that includes a multi-mode surface and air search radar (MMR), Electro Optical (EO) device, and an Infrared (IR) sensor to find and observe a wide range of targets. The aircraft will have a line-of-bearing indicator and distress call monitoring on various distress frequencies. It will also be equipped with search windows and the crew will be outfitted with night vision devices to further enhance their ability to detect, classify, and identify targets. With a rear cargo loading ramp that can be opened in-flight, the Ocean Sentry is capable of aerial delivery of equipment (i.e. life rafts, communications kits, and de-watering pumps) and personnel. With an endurance of 10.7 hours, the Ocean Sentry can also serve as an On-Scene Commander platform, guiding and assisting rotary wing assets.
- Marine Safety – International Ice Patrol (IIP) – Although the Ocean Sentry does not have the extended range of the C-130 aircraft, it can remain airborne for over 10 hours, and, utilizing the same sensors described above, will be able to detect and relay the location of icebergs in support of the IIP mission.

MARITIME SECURITY:

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, will be employed to provide surveillance, detection, classification and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, and INMARSAT, the Ocean Sentry will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and Common Operating Picture (COP) through a networked Command and Control (C2) system that provides for data sharing via INMARSAT.
- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be utilized to support the DRUG mission. Through effective use of the CTP/COP, the Ocean Sentry will be able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.
- Other Law Enforcement (OLE) – The use of all sensors and communications equipment will be utilized for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased maritime domain awareness.

PROTECTION OF NATURAL RESOURCES:

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – In conjunction with visual surveillance, the Ocean Sentry C4ISR suite will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-

U. S. Coast Guard - FY 2010 Congressional Budget Submission

HC-144 Maritime Patrol Aircraft (MPA)

\$175,000

covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

- MEP – Lightering Zone Enforcement (LZE) – Similarly, LZE is not a primary mission for the Ocean Sentry, but it is capable of monitoring Lightering Zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The Ocean Sentry will employ all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR. In addition to the sensors and communications capabilities already described, the Ocean Sentry will also be equipped with an Automatic Identification System (AIS) to monitor surface vessels. The AIS information collected will include the ship’s name, position, course, and speed. The use of AIS will make the job of vessel identification more efficient, permitting the Ocean Sentry to remain at altitude instead of having to make a low pass to visually identify a vessel.

NATIONAL DEFENSE:

- Defense Readiness - The Ocean Sentry plays a minimal role in national defense missions but can provide support through surveillance and transport roles to the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

OTHER:

- Non-IDS Aviation Demand (NDAD) – The Ocean Sentry supports NDAD primarily in a logistics transport role.

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
MPA Aircraft #13 and #14 – Production	2	\$77,300
Mission System Pallets (MSP)	3	\$22,100

Significant Changes

The procurement of one (1) MPA flight simulator has been added to the project requirements for FY 2010, resulting in a decrease of one aircraft in the initial Program quantity of MPA. This change to the MPA spend plan accelerates the establishment of the flight simulator, minimizing the Coast Guard's

<u>Funding Requirement Description</u>	<u>FY 2010 Cost Estimate</u>
<u>Construction / Acquisition</u>	
Maritime Patrol Aircraft (MPA) (2)	77,300
Mission System Pallet (MSP) (3)	22,100
Flight Simulator (1)	36,500
Aircraft and MSP Logistics and Spare Parts	34,600
Program Management and System Engineering	4,500
FY 2010 Cost Estimate Project Total:	175,000

Method of Performance

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

HH-60 Conversion and Sustainment Projects

\$45,900

Project Description, Justification and Scope

This request continues to fund multiple conversion and sustainment projects for the Coast Guard's fleet of 42 HH-60J Jayhawk, Medium Range Recovery (MRR) helicopters. Project descriptions are as follows:

1. HH-60T Avionics Upgrade – Funds replacement/modernization of obsolete HH-60J avionics suite, aircraft electrical wiring, and connectors to resolve and prevent discrepancies. Upgrades are to include five new Multi Functional Display (MFD) screens that increase pilots' situational awareness, digital radar, Traffic Collision Avoidance System (TCAS), traditional display of primary flight instruments on the Pilot's Flight Display (PFD), radar altimeter and verbal low altitude to enhance safety during night hovering, and improved Search and Rescue (SAR) software (hoist camera images).
2. HH-60J Service Life Extension Project (SLEP) (Re-Wire) – Required when each aircraft is inducted into the Programmed Depot Maintenance (PDM) cycle. It will replace legacy electrical wiring/connectors not addressed by the avionics upgrade in order to maintain structural and electrical integrity (remove Navy weapons systems wiring).
3. HH-60J Radar/ Electro Optical/Infra-Red (EO/IR) sensor – Funds replacement of the HH-60J RDR-1300 monochrome weather-search radar with a Multimode Radar (MMR) and an enhanced EO/IR sensor common to Deepwater helicopter platforms. These systems will allow for common operational picture/maritime domain awareness data exchange capabilities.
4. HH-60J Engine Sustainment – Funds a targeted standardized configuration of Auxiliary Power Units (APU) and Hydro-Mechanical Units and will address obsolescence/support issues associated with the Digital Electronic Control Unit in order to achieve an increase to the projected mean time between engine failures. Project phase also initiates a performance-based logistics support system and recapitalization of high-time engines that are beyond their economic overhaul limit.

CAPABILITY ACQUIRED/MAINTAINED:

The Sikorsky HH-60J Jayhawk is the Coast Guard's medium-range recovery helicopter. Two T700-GE-401C engines, each rated at around 1600 shaft horsepower, provide adequate power for a gross takeoff weight of 22,000 pounds. The HH-60J is very well-suited for operations in challenging weather conditions. A flight management and navigation system provides the aircrews with Global Positioning System (GPS) navigation and some auto-pilot capabilities. All-weather operation is rounded out with a weather radar and an effective anti-ice system that allows cold weather operation in the Northeast U.S. and Alaska. The aircraft is also equipped with night-vision compatible displays that allow aircrews to complete missions in almost zero-light conditions.

The HH-60J is larger and more powerful than the Coast Guard's HH-65 helicopter. Because of the extended-capacity fuel tanks, the HH-60J is often called upon for SAR missions far offshore. It is capable of flying up to 300 miles offshore, staying on scene for approximately 45 minutes, picking up

HH-60 Conversion and Sustainment Projects

\$45,900

six or more survivors, and then returning to shore with adequate fuel to divert to another landing area if required. All weather flight capabilities are provided by a basic flight-management system.

A complete replacement of the HH-60J avionics system is currently underway at the Coast Guard Aviation Logistics Center (ALC), Elizabeth City, NC. Taking advantage of the U.S. Army and U.S. Navy Common Avionics Architecture System (CAAS) cockpit, the HH-60J will receive the same capabilities as U.S. Special Forces and presidential HH-60 aircraft. The CAAS cockpit will integrate state-of-the-market technology, upgrading flight-management, navigation, and automatic-pilot features. It will also increase operational availability and reduce maintenance and supply costs. Another project involves installation of an upgraded multi-mode radar and EO/IR sensors that will provide the HH-60J with a common command, control and surveillance system to integrate with the Coast Guard's Common Operating Picture (COP).

The HH-60J has provided support for national special security events. The Coast Guard has begun a project to install Airborne Use of Force (AUF) on its HH-60 helicopters. The Deepwater program will provide the funding and management to configure the entire HH-60 fleet to support armed use of force missions. Because of its power and size, the HH-60J is the ideal aircraft to provide law enforcement personnel with a platform from which they can rapidly deploy to potentially hostile vessels by rappelling down ropes from the helicopter.

PERFORMANCE:

Once converted, there will be 42 HH-60Js located within the continental United States and Alaska providing support to the following Congressionally-mandated missions:

MARITIME SAFETY:

- Search and Rescue (SAR) – The HH-60J will be outfitted with a capable C4ISR suite that includes a multi-mode surface and air search radar (MMR), and EO/IR sensor to find and observe a wide range of targets. The aircraft will have a line-of-bearing indicator and distress call monitoring on various distress frequencies. It will also be equipped with Global Positioning System (GPS) and the crew will be outfitted with night vision devices to further enhance the crew's ability to detect, classify, and identify targets.
- Marine Safety – International Ice Patrol (IIP) – Although the HH-60J does not have the extended range of a fixed-wing aircraft, utilizing the same sensors described above, it will be able to detect and relay the location of icebergs while based on a cutter in support of the important International Ice Patrol mission.

MARITIME SECURITY:

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, will be employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, the HH-60J will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and COP through a networked Command and Control (C2) system that provides data sharing capability.
- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be used to support the DRUG mission. Through effective use of

HH-60 Conversion and Sustainment Projects \$45,900

the CTP/COP, the HH-60J will be able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – All sensors and communications equipment will be used for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased maritime domain awareness.

PROTECTION OF NATURAL RESOURCES:

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – Visual surveillance and the C4ISR suite on the HH-60J will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

- MEP – Lightering Zone Enforcement (LZE) – The HH-60J is capable of monitoring lightering zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The HH-60J will employ all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

NATIONAL DEFENSE:

- Defense Readiness – The HH-60J plays a minimal role in national defense missions but can provide support through surveillance and transport roles to the following areas:
 - Port Operations, Security, and Defense (POSD)
 - General Defense Operations (GDO)
 - Peacetime Military Engagement (PME)
 - Maritime Intercept Operations (MIO)
 - Environmental Defense Operations (EDO)

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

Method of Performance

The method of performance metrics have changed significantly due to the shift of the Lead System Integrator (LSI) responsibility from the IDS Prime Contractor to the U.S. Coast Guard. The USCG will now manage all H60 MRR system integration issues internally. An Earned Value Management System (EVMS) is currently being developed for use at ALC. As outlined in the MRR and Avionics Program Management Plans, and until such time an EVMS is established at ALC, the Project Manager will use a mixture of monthly financial and project status reports, as well as weekly conference calls and project management staff meetings to measure project performance.

HH-65 Conversion and Sustainment Projects

\$38,000

Project Description, Justification and Scope

This request continues to fund the Phase II (Obsolete Component Modernization) and Phase III (Automatic Flight Control System and cockpit modernization, Integrated Deepwater System Capability Enhancements) conversions to the Coast Guard's current fleet of 102 HH-65

helicopters to the Multi-Mission Cutter Helicopter (MCH). The modernization effort includes a service life extension, where obsolete components are replaced with modernized and more capable sub-systems, including a new integrated cockpit and C4ISR suite.

CAPABILITY ACQUIRED/MAINTAINED:

The Eurocopter HH-65 Dolphin is the Coast Guard's short-range recovery helicopter. Under Phase I of the HH-65 conversion, 95 HH-65 "B" models were re-engined and designated HH-65C. Under the Airborne Use of Force (AUF) project, the HH-65C received upgrades to the communications sub-systems to provide interoperability with other Homeland Security Components and local response agencies. Additionally, the aircraft were configured and pre-wired to allow for the installation and removal of special AUF mission equipment (e.g., weapons, armor, EO/IR, HUD). The AUF modified aircraft are designated as MH-65C.

Phase II of the conversion builds upon the MH-65C configuration to modernize many of the aging and obsolete sub-systems and components, including the Omni-Directional Air Data System (OADS) and aircraft gyros that began with non-recurring engineering (NRE) efforts in FY 2007. Phase III of the conversion consists of a modernized all-glass Common Avionics Architecture System (CAAS) cockpit that capitalizes on commonality with the HH-60T cockpit upgrade, modernizes the aging Automatic Flight Control System (AFCS), and adds enhanced Integrated Deepwater System (IDS) capabilities, such as Common Operating Picture (COP) interface and sensor integration.

The HH-65 is primarily constructed of composite structures that provide reduced weight, increased strength and better resistance to corrosion. One of the most recognizable features of the HH-65 is its unique shrouded tail rotor, called a Fenestron. The HH-65 incorporates a sophisticated flight-management system that allows all-weather operation, precise navigation, and automatic-pilot features. If desired, the pilot can select a function that will mark a position in open water, calculate the best flight profile, and automatically fly the helicopter to a 50-foot hover over the desired position. This is an essential and critical safety feature at night and in inclement weather. Phase III of the conversion efforts modernizes the aging AFCS with a new digital system that enhances this capability, and adds to crew safety.

During FY 2008, the Coast Guard's IDS will have replaced the engines on all the HH-65s executed under Phase I of the conversion project. The new Turbomeca 2C2 engine system provides aircrews with

HH-65 Conversion and Sustainment Projects

\$38,000

a 40% increase in engine power, while eliminating safety and reliability issues associated with the existing engines. Concurrently, the Airborne Use of Force (AUF) package is being deployed that converts the HH-65C into the MH-65C. This package includes an automatic weapon, and aircrew protection and communications systems that are compatible with local, state, and federal law enforcement and other first responders. Phase II and Phase III of the conversion are also concurrent projects and build upon the MH-65C upgrades to modernize aging obsolete sub-systems and components and provide enhanced operational capabilities, including COP interface and sensor integration.

When these projects are completed, the upgraded HH-65 will be referred to as the Multi-Mission Cutter Helicopter or MCH. It will be a much more capable asset with increased aircraft performance, state-of-the-market avionics and surveillance equipment, and provisions for weapons.

PERFORMANCE:

The MCH will be primarily based at shore units located on each coastline, including the Great Lakes region, Alaska, Hawaii, and Puerto Rico. Due to its size and weight, the HH-65 will easily integrate with the National Security Cutter (NSC) and Offshore Patrol Cutters (OPC), enhancing the operational capabilities of these assets in support of the following Congressionally-mandated missions:

MARITIME SAFETY:

- Search and Rescue – The MCH will be outfitted with a capable C4ISR suite that includes a multi-mode radar (MMR) and Electro Optical Infrared (EO/IR) sensor to find and observe a wide range of targets. The aircraft will have a DF-430 UHF/VHF/FM Radio Direction Finder, Distress Call Monitoring on various distress frequencies, and a Global Positioning System (GPS). The crew will be outfitted with night vision devices to further enhance the crew's ability to detect, classify, and identify targets.

- Marine Safety – International Ice Patrol (IIP): Although the MCH does not have the extended range of a fixed-wing aircraft, it can use the same sensors described above to detect and relay the location of icebergs while deployed aboard a NSC or OPC in support of the important International Ice Patrol mission.

MARITIME SECURITY:

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the Search and Rescue mission above, will be employed to provide surveillance, detection, classification and identification in the Undocumented MIO mission. With multiple communications, including UHF, VHF, HF, and MILSATCOM, the MCH will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and Common Operating Picture (COP) through a networked Command and Control (C2) system that provides for data sharing.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support Undocumented MIO will also be used to support the DRUG mission. Through effective use of the CTP/COP, the MCH will be able to intercept as well as direct Coast Guard surface assets to intercept and prosecute suspect vessels. Additionally, armed MCH aircraft will be capable of employing airborne use of force tactics to interdict and prosecute non-compliant suspect trafficking vessels.

HH-65 Conversion and Sustainment Projects

\$38,000

• Other Law Enforcement (OLE) – All sensors and communications equipment will be used for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased Maritime Domain Awareness.

PROTECTION OF NATURAL RESOURCES:

• Marine Environmental Protection (MEP) – Visual surveillance and the C4ISR suite on the MCH will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.

• Living Marine Resources Enforcement (LMR) – The MCH will employ all sensors (MMR, EO/IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

• MEP - Lightering Zone Enforcement (LZE) – The MCH is capable of monitoring Lightering Zones for oil and other hazardous chemical discharges.

NATIONAL DEFENSE:

The MCH plays a role in National Defense Missions by providing armed escort and surveillance as well as support for transport roles in the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)

Method of Performance

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTO). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

HC-130H Conversion and Sustainment Projects

\$45,300

Project Description, Justification and Scope

This request funds the following replacement/sustainment projects for the Coast Guard HC-130H “Hercules” aircraft:

- 1) Avionics Modernization
- 2) Center Wing Box (CWB) Replacement
- 3) SELEX Surface Search Radar

The HC-130H is the Coast Guard’s long-range surveillance (LRS) aircraft. This four-engine, turbo-prop aircraft is used extensively throughout the United States, the Pacific, and the Caribbean in support of search and rescue, homeland security, law enforcement, pollution prevention, logistics, personnel transport and ice patrol missions.

FY 2010 funding will continue the development of the new digital cockpit, with multi-function displays that would provide aircrews with increased situational awareness and reduced cockpit workload. Additionally, funding will provide four replacement center wing boxes, which is critical for extending service life, as well as additional HC-130H replacement activities.

CAPABILITY ACQUIRED/MAINTAINED:

The HC-130H is powered by four Allison T56-A15 engines driving Hamilton Standard four-bladed propellers. When all fuel tanks are filled, the aircraft is capable of extended range (>2600 miles in low-altitude flight). With reduced fuel loads, the aircraft can carry a 40,000 pound payload. A large cargo compartment area, easily accessed through a large rear ramp, can accommodate a wide range of cargo. The aircraft’s high-lift capability allows takeoff and landings from short, unimproved runways.

To keep the HC-130H fleet in service, upgrades to the avionics, sensors and fuselage are required. The avionics suite on the HC-130H has been in service since the aircraft were delivered in the early 1980s. A digital cockpit with multi-function displays and reliable engine and propeller indicators will provide aircrews with increased situational awareness and reduced cockpit workload, benefits critical for long range operations.

PERFORMANCE:

With its flight-management and sensor systems, the HC-130H is a very capable maritime patrol aircraft, equipped with a powerful surface search radar that can detect surface targets from over 50 miles away. Once closer to a target, the sensor operator uses the Forward-Looking Infrared Radar (FLIR) and Electro Optical (EO) sensor to classify and identify the target, even in night or low-light conditions. A flight-management system that includes an automatic-pilot and precise Global Positioning System (GPS) navigation equipment allows the pilot to concentrate on the details of the mission while being ensured of pinpoint accuracy of position and the position of the target vessels. Large scanner windows on either

HC-130H Conversion and Sustainment Projects

\$45,300

side of the cargo compartment provide aerial observers with a bird's eye view of the search areas during visual conditions. The HC-130H supports the following Congressionally-mandated missions:

MARITIME SAFETY:

- Search and Rescue (SAR) – The HC-130H has a C4ISR suite that includes a multi-mode surface and air search radar (MMR), EO device, and Infrared (IR) sensor to find and observe a wide range of targets. The aircraft has a line-of-bearing indicator and distress call monitoring on various distress frequencies. It is also equipped with search windows and the crew has night vision devices to further enhance their ability to detect, classify, and identify targets.

- Marine Safety – International Ice Patrol (IIP) – A side-looking radar installed on the aircraft maps the location and movement of ice flows and icebergs. This information is calculated and transmitted to commercial vessels to increase maritime safety during the winter and spring months in the North Atlantic regions.

MARITIME SECURITY:

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, is employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, the HC-130H can share important information with other operational units and command centers.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that support undocumented MIO are also utilized to support the DRUG mission. With its interoperable communications suite, the HC-130H can direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – All sensors and communications equipment are used for the OLE mission.

PROTECTION OF NATURAL RESOURCES:

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – Visual surveillance and the side-looking radar on the HC-130H are employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water.

- MEP – Lightering Zone Enforcement (LZE) – The HC-130H is capable of monitoring lightering zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The HC-130H employs all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

NATIONAL DEFENSE:

- Defense Readiness – The HC-130H provides support in National Defense missions through surveillance and transport capability in the following areas:

- Port Operations, Security, and Defense (POSD)

U. S. Coast Guard - FY 2010 Congressional Budget Submission

HC-130H Conversion and Sustainment Projects \$45,300

- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
HC-130H Avionics I Integration & Hardware	N/A	\$19,000
HC-130H Center Wing Box (CWB)	4 Installations (Including kit)	\$24,000
SELEX Pre-Planned Product Improvement		\$2,300
	Total	\$45,300

Method of Performance

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

HC-130J Missionization

\$1,300

Project Description, Justification and Scope

The Coast Guard has six HC-130J aircraft in its inventory. All aircraft are conducting operational missions, with the exception of aircraft undergoing the missionization process. This request funds crashworthy observer seats for the fleet of six aircraft to improve the safety and capability of the observer station onboard each aircraft.

The HC-130J is the Coast Guard's long-range surveillance (LRS) aircraft. Various versions of this four-engine, turbo-prop aircraft are used extensively throughout the United States, the Pacific Ocean and the Caribbean Sea in support of search and rescue, homeland security, law enforcement, pollution prevention, logistics and personnel transport.

CAPABILITY ACQUIRED/MAINTAINED:

The C-130J Missionization project will configure the aircraft with equipment to enhance the performance of Coast Guard operational missions. The C-130J Missionization project leverages the technology developed by Integrated Coast Guard Systems for the CASA CN235 Maritime Patrol Aircraft (MPA). The missionization suite includes surface search radar, a Forward-Looking Infrared (FLIR)/Electro Optical (EO) sensor, and satellite and emergency response radios, all controlled through a flight-deck mounted operator station.

The Coast Guard's C-130J is based on the robust C-130 series aircraft design, but new engines, propellers, avionics and cargo handling equipment quickly set this new aircraft apart from its predecessor. The C-130J will assume the duties of the C-130H, which include search and rescue, homeland security, pollution prevention, logistics and personnel transport.

With its Allison AE2100 engines and Dowty six-bladed propellers, the C-130J boasts advanced performance over the H model by a 20 percent increase in speed, a 40 percent increase in range and a 40 percent higher cruising altitude. It can climb higher and faster than the H model, yet takeoff and land on shorter runways.

A completely redesigned cockpit with an integrated digital flight management system allows the C-130J to be operated by a two-person flight deck crew as compared to the four to five person crew of the H model. Dual heads up displays provide pilots with essential flight information and increase safety during low-level maneuvers, including takeoffs and landings in reduced visibility. A high-resolution ground mapping radar, integrated with on-board Global Positioning System (GPS) and inertial navigation system, provides aircrews with precise navigation and situational awareness. An enhanced cargo handling system provides loadmasters with the ability to automatically calculate weight and balance data and quickly change cargo compartment configuration to accommodate different payloads.

PERFORMANCE:

With its flight management and sensor systems, the C-130J will be a very capable maritime patrol aircraft. It will be equipped with a powerful surface search radar, capable of detecting surface targets over 50 miles away. Once closer to the target, the sensor operator will use the FLIR/EO sensor to classify and identify the target, even in night or very low-light conditions. A flight management system

HC-130J Missionization

\$1,300

that includes an automatic-pilot and precise GPS navigation equipment allows the pilot to concentrate on the details of the mission, while being ensured of pinpoint accuracy of his position and the position of the target vessels. The C-130J supports the following strategic goals and mission programs:

MARITIME SAFETY:

- Search and Rescue – The C-130J will be outfitted with a very capable Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) suite that includes a multi-mode surface and air search radar (MMR), Electro-Optical (EO) device, and Infrared (IR) sensor to find and observe a wide range of targets. The aircraft will have a Line of Bearing indicator and Distress Call Monitoring on various distress frequencies.

MARITIME LAW ENFORCEMENT:

- Illegal Migrant Interdiction Operations – The C4ISR suite, including the same sensors described in the Search and Rescue mission, will be employed to provide surveillance, detection, classification, and identification in this mission-program. With multiple communications, including UHF/VHF, HF, the C-130J will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and Common Operational Picture (COP) through a networked Command and Control (C2) system that provides for data sharing.

- Illegal Drug Interdiction – The same sensors and communications equipment that will support undocumented migrant interdictions will also be utilized to support the counter drug mission. Through effective use of the CTP/COP, the C-130J will be able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Living Marine Resources (LMR) Enforcement – The C-130J will employ all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMRE.

- General Law Enforcement (GLE) – All sensors and communications equipment will be used for the GLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased Maritime Domain Awareness.

MARITIME SAFETY AND ENVIRONMENTAL PROTECTION:

- Marine Environmental Protection (MEP) – Visual surveillance and the C4ISR suite on the C-130J will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The Common Operational Picture (COP) provides the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.

- Ports, Waterways, and Coastal Security (PWCS) – The C-130J will be able to conduct thorough and sustained surveillance of an assigned area of operations, and dispatch appropriate assets to investigate any threat to security. The C-130J will participate in maritime interdiction operations, provide outer-harbor security, conduct search and rescue, and other operations in support of PWCS. The primary objective is to ensure that port and harbor areas are maintained free of threats and to support re-supply of

U. S. Coast Guard - FY 2010 Congressional Budget Submission

HC-130J Missionization **\$1,300**

other deployed forces. The protection of logistics in support of contingency operations is of the highest priority.

NATIONAL DEFENSE – The HC-130J provides support in National Defense missions through surveillance and transport capability in the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

National Security Cutter (NSC)

\$281,480

Project Description, Justification and Scope

This request completes funding for the production of National Security Cutters (NSC) #4. Full funding of the NSC #4 production contract could not be accomplished in FY09 due to detrimental global and regional economic conditions affecting the cost of NSC #4 and other NSC Class costs. Impacts included the declining value of the U. S. dollar relative to foreign currency, commodity escalation and persistent Gulf Coast labor market impacts.

CAPABILITY ACQUIRED/MAINTAINED:

The NSC is a surface component of the Integrated Deepwater System (IDS) that will be capable of an extended on-scene presence, long transits and forward deployment. It will be equipped with communication, navigation and surveillance systems that allow the cutter and its deployed air and boat assets to operate worldwide within the range of its performance parameters, and conduct a daily search of potentially 56,000 square miles of ocean in support of all Congressionally-mandated missions.

The NSC is the largest of the new IDS surface assets (418') with vastly improved capabilities over the legacy 378' High Endurance Cutter, and will be the most sophisticated and capable cutter the Coast Guard has ever operated. It will have a range of approximately 12,000 nautical miles (NM) and an underway endurance of 60 days. The NSC manning concept is innovative in decoupling the ship's operational tempo from the personnel tempo, enabling the vessel to deploy 230 days away from homeport annually while maintaining the current personnel tempo of 185 days underway (i.e., a 24% increase in ship annual operating days compared to the 378' High Endurance Cutter). The cutter will be capable of patrolling alone or with multiple U.S. Coast Guard vessels, U.S. Navy vessels, or vessels from other nations' navies or coast guards.

The NSC will conduct scheduled and unscheduled patrols employing a robust command and control capability for the task unit commander or on-scene commander. The cutter will be capable of performing all maritime DHS missions, defense operations with the U.S. Navy, such as Ports, Waterways and Coastal Security, as well as maritime intercept operations, port operations, security and defense operations, and peacetime military engagements. When engaged in these missions, the NSC will be capable of detecting, classifying, and tracking surface Targets of Interest (TOI) in sizes ranging from makeshift rafts to large commercial vessels, and air TOIs as small as single-engine civil aircraft.

The NSC's capabilities include the ability to:

- Provide anti-terrorism/force protection;
- Carry and deploy multiple airframes;
- Carry and deploy multiple Short Range Prosecutor (SRP) and Long Range Interceptor (LRI) cutter boats;
- Conduct boat and flight operations in higher sea states due to improved sea-keeping capability;
- Support the full range of Coast Guard missions and intelligence element operations through greatly improved intelligence gathering and C4ISR capabilities, including use of a Sensitive Compartmented Information Facility (SCIF), all of which enhance the NSC's self-defense capabilities and facilitate operations with networked DHS, DoD, and national assets;

National Security Cutter (NSC)

\$281,480

- Maintain presence and perform limited command and control operations in contaminated environments for up to 36 hours;
- Operate with U.S. Navy battle groups with a maximum sustained speed of 28 knots.

PERFORMANCE:

The NSC is a major contributor to overall Deepwater system performance, particularly when operating at the hub of a cutter/small boat/aircraft force package. NSC intelligence collection, analysis and dissemination, and C4ISR capabilities improve system responsiveness and help to prevent security incidents from developing. NSCs will serve as the hub of multi-unit, multi-mission operations and will be essential to achieving success in the missions:

MARITIME SAFETY:

• Search and Rescue (SAR) – The NSC will permit the search for and location of mariners in distress, enabling their recovery from positions of peril; provision of medical advice, assistance, or evacuation; and when necessary, provide them safe transport to shore-side locations. The NSC will also be able to support recovery or control of damage to distressed vessels and other property by controlling or terminating flooding, fighting fires, dewatering, providing mechanical assistance, and towing stricken vessels. The NSC will have stern ramps and a side davit to rapidly launch and retrieve small boats. The NSC will have a Rescue Access Station to embark and load a non-stern ramp capable boat, to deploy a rescue swimmer, and to pick survivors from the water. With a sustained presence, the NSC can also serve as a platform for an on-scene commander guiding and assisting rotary wing assets.

MARITIME LAW ENFORCEMENT:

• Undocumented Migrant Interdiction Operations – The NSC C4ISR suite will be employed to provide surveillance, detection, classification, and identification in the undocumented migrant interdiction mission. Through sustained on-scene presence, the NSC will also have the capability of prosecuting Targets of Interest (TOI), including interdiction, embarkation, and disembarkation, as well as allowing for rescue of a large number of people when an unseaworthy or overloaded craft sinks or capsizes. These rescue situations require the ability to retain persons onboard (sheltering, feeding, and providing basic sanitation and medical services; as well as administrative processing and ensuring security for all concerned).

• Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented migrant interdiction operations will also be used for the DRUG mission. Through effective use of the Common Operating Picture (COP), Multi-mission Cutter Helicopter (MCH) aircraft, and the Long Range Interceptor (LRI)/small boats, the NSC will be able to intercept and prosecute suspect vessels.

• Other Law Enforcement (OLE) – The NSC will conduct proactive patrols as well as reactive response to intelligence information, using all sensors and communications equipment to fulfill this mission. Sharing information and data through the use of the Command and Control (C2) system and the COP will result in increased maritime domain awareness. The NSC will have both active and passive sensors to detect and track vessels or aircraft engaged in, or suspected of, illegal activities. It will identify, classify and sort TOIs. After interdicting suspicious vessels, it will enable at-sea boardings and performance of custodial functions associated with seizing vessels or making at-sea arrests.

National Security Cutter (NSC)

\$281,480

- Foreign Vessel Inspection – The NSC will conduct surveillance of all operating areas. The installed Automatic Identification System (AIS) will permit rapid identification of foreign vessels, allowing the NSC to inspect foreign vessels at sea for compliance with applicable marine safety requirements and regulators.

PROTECTION OF NATURAL RESOURCES:

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – The NSC will be able to detect maritime pollution in the U.S. Exclusive Economic Zone (EEZ), based on verification of the type of material in the water, evidence gathering, and documentation. It will allow response to 29 CFR 1910.120 Hazardous Material accidents. Additionally, the NSC will conduct surveillance operations to detect significant discharges of oil or hazardous substances for subsequent monitoring, mitigation, and removal actions. The COP will provide the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.

- Lightering Zone Enforcement (LZE) – The NSC will survey maritime petroleum cargo lightering zones and lightering operations, enabling the conduct of boardings to enforce applicable lightering regulations.

- Living Marine Resources Enforcement (LMR) – The NSC will aid enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The cutter will be able to provide sustained presence throughout the U.S. EEZ and along its boundary, as well as in international maritime areas of interest to the U.S. It will allow for at-sea boardings and inspections to deter illegal or unauthorized LMR activity to document violations and, if directed, arrest and seize vessels engaged in LMR violations. The NSC will also be equipped with AIS to monitor surface vessels that will provide a ship's name, position, course, and speed, and facilitate the job of vessel identification.

NATIONAL DEFENSE:

- Defense Readiness – The NSC's defense and security-related capabilities and extreme range and endurance makes it particularly well-suited for deployments overseas and in regions where it can disrupt security incidents well before they threaten U.S. coastlines.

- Port Operations, Security, and Defense (POSD) – The NSC will enable the conduct of thorough and sustained surveillance of an assigned area of operations, allowing dispatch of appropriate assets to investigate any threat to security. The NSC will engage in maritime interdiction operations, provide outer-harbor security, escort high-value assets, and conduct SAR and other operations in support of the POSD mission. The primary objective is to ensure that port and harbor areas are maintained free of threats and to support re-supply of other deployed forces. The protection of logistics in support of contingency operations is one of the NSC's highest priorities.

- General Defense Operations (GDO) – The NSC will integrate with the DOD over the full range of maritime operations including surveillance, visit, board, search, seize and unit defense. It will be capable of operating worldwide with sustained presence resulting from its capability for underway replenishment, including Aircraft Vertical Replenishment. The cutter will provide hard-kill of subsonic anti-ship cruise missiles with Close-in-Weapon-Systems, and soft-kill capability, reduced radar cross-section, reduced infrared signature, and electronic sensor capability. The NSC will

National Security Cutter (NSC)

\$281,480

employ the 57 mm gun weapons system with optical and infrared fire control to achieve mission kill on high-speed patrol craft beyond intermediate caliber effective range. The NSC will be able to provide berthing and logistics support for additional personnel deployed for defense operations. The NSC will also have the ability to maintain station for an aircraft carrier conducting flight operations and to take station on, maneuver around, and escort commercial shipping steaming at operational speed. The cutter will have the ability to launch, recover and fuel U.S. Navy and NATO Vertical Take-Off and Landing (VTOL) aircraft, including armed helicopters.

- Peacetime Military Engagement (PME) – The NSC will engage in military activities involving other nations to promote and maintain the security environment in peacetime, including nation-building activities. It will be able to maintain forward presence, render humanitarian assistance, conduct professional exchanges, and participate in combined operations, training, exercises and other military or diplomatic activities. The PME mission may involve long transits and extended operations with deployments of two to four months, for which the NSC will be well-suited.

- Maritime Intercept Operations (MIO) – The NSC will conduct thorough and sustained surveillance of an assigned area of responsibility and detect and intercept all shipping, operating either independently or integrated with DOD and other agency assets. Additionally, the cutter will be able to dispatch trained boarding or inspection teams, providing for their logistics, support, transportation and protection.

- Environmental Defense Operations (EDO) – The NSC will be able to detect potential threats to the physical environment and investigate those threats. The cutter will conduct operations to mitigate known environmental harm and intercept persons suspected of causing such harm, including mitigation of environmental exploitation designed to disrupt defense operations.

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
NSC #4 Production	1	\$281,480
	Total	\$281,480

FUNDING HISTORY:

Method of Performance

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly cost performance reports. The iPursuit program also allows for extensive insight into the data used to generate cost performance reports. For example, it can provide a breakdown of cost and schedule variances by work breakdown structure (WBS).

Offshore Patrol Cutter (OPC)

\$9,800

Project Description, Justification and Scope

This request supports continued initial acquisition work for the Offshore Patrol Cutter (OPC) to replace the Coast Guard's deteriorating Medium Endurance Cutter (WMEC) fleet, including the following: completion of the Alternatives Analysis; preparation of the Performance Specification (P-Spec), Configuration Management Plan, Independent Total Ownership Cost Estimate, Environmental Management Plan and Life Cycle Cost Reduction Plan; as well as conducting Risk Reduction Technical Studies. This request will also allow preparation of the first phase of the Concept/Preliminary Design efforts needed to support solicitation for a Request for Proposal (RFP). This is a critical phase for the project, because it will provide valid acquisition and total ownership costs and aid in reducing the technical risks associated with achieving requirements. Specific performance requirements will be finalized, with plans in place to manage any configuration changes, in order to permit the Coast Guard to properly oversee all aspects of the design as the project progresses. The concept/preliminary design studies will be solicited from industry, allowing the Coast Guard to reach DHS Milestone 2 (Alternative Selection) during FY 2011 in support of a first ship delivery in FY 2018.

The OPC will be procured using guidance from the Coast Guard's *Blueprint for Acquisition Reform* and the project is following the DHS major systems acquisition process. Under this process, the OPC reached DHS Milestone 1 (Project Authorization) in January, 2008 and has entered the Concept & Technology Development phase. Available funding, including the FY 2009 appropriation, will allow for the following activities: preparation of the Concept of Operations (CONOPS), Operational Requirements Document (ORD), Project Management Plan (PMP), Acquisition Plan (AP), Integrated Logistics System (ILS) Plan, and Technology Plan, requirements validation, and initiation of an Alternatives Analysis. This work will define and validate required OPC capabilities, ascertain if they are achievable, and begin to examine alternative solutions for the OPC design. A recommended method of acquisition will also be developed, followed by a clear and rigorous plan to manage the project.

CAPABILITY ACQUIRED/MAINTAINED:

The OPC is the second largest cutter among the new Integrated Deepwater System (IDS) assets and will conduct critical patrols within assigned operating areas. A fleet of 25 vessels, the OPC will eventually replace and greatly enhance the current capability of the Coast Guard Medium Endurance Cutter (WMEC) fleet. The OPC will provide a robust command and control capability for duties as Commander Task Unit (CTU) and On-Scene Commander (OSC), through a sophisticated Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) suite. Inherent capabilities that are a vast improvement over legacy major cutters include multiple airframe capability, Over-the-Horizon (OTH) cutter boat deployment, and improved sea keeping that will permit flight and small boat operations in higher sea states than currently possible.

The Deepwater Implementation Plan includes additional capabilities that reflect the increased post-9/11 security requirements, many of which will be present in the OPC. Intelligence collection/information sharing systems being considered in the OPC design include a sophisticated Shipboard Sensitive Compartmentalized Information Facility (S/SCIF), Specific Emitter Information (SEI) sensors and increased data exchange bandwidth. The OPC's Deepwater and DoD interoperability capabilities can be enhanced with DHS and local responder-interoperable radio communications. Under the prevailing

Offshore Patrol Cutter (OPC)

\$9,800

design, the OPC flight deck extension would accommodate all variants of DHS and DoD HH-60 helicopters to provide enhanced interoperability with interagency and inter-service counterterrorism teams. The OPC would be fully integrated with the National Distress Response System modernization program, known as RESCUE 21, to provide port commanders with both real-time tracking of the OPC and seamless Common Operational Picture (COP)-Maritime Domain Awareness (MDA) data-sharing, including the Automatic Identification System (AIS). The maritime security capabilities allow the cutter's weapons and command and control suite to be upgraded and hardened to better survive potential terrorist incidents and process increased data flow. This will include a medium caliber deck gun (57mm) that will provide the ability to engage/stop rogue merchant vessels far from shore. Increased OPC speed can improve response and reaction capability. Increased transit speed would allow for more time on station protecting port approaches.

PERFORMANCE:

The OPC will be a major contributor to overall Integrated Deepwater System (IDS) performance, particularly when operating as the nucleus of a cutter/small boat/aircraft force package. Intelligence collection, analysis and dissemination, and C4ISR capabilities will improve system responsiveness and help to prevent and mitigate security threats. As a multi-mission platform, the OPC will be able to perform all required missions, capable of steaming long transit distances and maintaining an extended on-scene presence, due to an integrated logistics system. These characteristics are well-suited for maritime homeland security roles as well as for performing the full spectrum of law enforcement missions (living marine resources, drug interdiction, and migrant interdiction) and search and rescue operations.

MARITIME SAFETY:

- Search and Rescue (SAR) – The OPC will be able to search for and locate distressed mariners and recover them from positions of peril, provide medical advice, assistance, or evacuation, and when necessary, provide subjects safe transport to shore side locations. The OPC will also be able to support recovery or control of damage to distressed vessels and other property by controlling or terminating flooding, fighting fires, dewatering, providing mechanical assistance, and towing stricken vessels. The OPC will have a stern ramp to rapidly launch and retrieve small boats. With a sustained presence, the OPC can also serve as an OSC platform, guiding and assisting rotary wing assets.

MARITIME SECURITY:

- Undocumented Migrant Interdiction (MIO) – The OPC C4ISR suite will be employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. Through a sustained on-scene presence, the OPC will also have the capability of prosecuting Targets of Interest (TOI), including interdiction, embarkation, and disembarkation, and rescuing a large number of people when an unseaworthy or overloaded craft sinks or capsizes. These rescue situations require administrative processing and the ability to retain persons onboard (sheltering, feeding, and to provide basic sanitation and medical services, as well as security for all concerned).

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be used for the DRUG mission. Through effective use of the COP, MCH aircraft, and the LRI/small boats, the OPC will be able to intercept and prosecute suspect vessels.

Offshore Patrol Cutter (OPC)

\$9,800

• Other Law Enforcement (OLE) – The OPC will conduct proactive patrols as well as reactive response to intelligence information, using all sensors and communications equipment to fulfill this mission. Sharing information and data through the use of the C2 system and the COP will result in increased MDA. The OPC will have both active and passive sensors to detect and track vessels or aircraft engaged in, or suspected of, illegal activities. It will identify, classify and sort TOIs. After interdicting suspicious vessels, it will permit at-sea boardings and ease performance of custodial functions associated with seizing vessels or making at-sea arrests.

PROTECTION OF NATURAL RESOURCES:

• Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – The OPC will be able to detect maritime pollution in the U.S. Exclusive Economic Zone (EEZ), based on verification of the type of material in the water, evidence gathering, and documentation. It will enable response to 29 CFR 1910.120 Hazardous Material accidents. Additionally, the OPC will conduct surveillance operations to detect significant discharges of oil or hazardous substances for subsequent monitoring, mitigation, and removal actions. The COP will provide the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

• MEP – Lightering Zone Enforcement (LZE) – The OPC sensors will survey maritime petroleum cargo lightering zones and lightering operations, enabling boardings to enforce applicable lightering regulations.

• Living Marine Resources Enforcement (LMR) – The OPC will enable enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection in domestic and international waters. The cutter will be able to provide sustained presence throughout the U.S. EEZ and along its boundary, as well as in international areas of interest to the U.S. It will allow the conduct of at-sea boardings and inspections to deter illegal or unauthorized LMR activity, permit documentation of violations, and enable arrest and seizure of vessels engaged in LMR violations if directed. The OPC will also be equipped with AIS to monitor surface vessels. The information will provide a ship's name, position, course and speed, and will make the job of vessel identification easier.

NATIONAL DEFENSE:

• Defense Readiness – The OPC's planned defense and security-related capabilities and extended range and endurance make it well-suited for deployments offshore from U.S. coastlines.

– General Defense Operations (GDO) – The OPC will be able to integrate with the DOD in coordinated maritime operations, including surveillance, visit, board, search, seize and unit defense. The OPC will employ the 57 mm gun weapons system with optical and infrared fire control to achieve mission kill on high-speed patrol craft at intermediate-caliber effective range.

– Peacetime Military Engagement (PME) – The OPC will be able to participate in military activities involving other nations to promote and maintain the security environment in peacetime, including nation-building activities. It will be able to maintain a forward presence; permit rendering of humanitarian assistance; conduct professional exchanges; and participate in combined operations, training, exercises, and other military activities. The PME mission may involve long transits and extended operations with deployments of two to four months, for which the OPC will be well-suited.

Offshore Patrol Cutter (OPC)

\$9,800

- Environmental Defense Operations (EDO) – The OPC sensors will be able to detect potential threats to the physical environment to assist DoD with mitigation of environmental exploitation designed to disrupt defense operations.

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)

Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Fast Response Cutter (FRC)

\$243,000

Project Description, Justification and Scope

This request funds production of FRC-B hulls #5 - #8, associated contract line items (spares, training, warranty, supply support, builders risk insurance), and project management costs. The Coast Guard continues to have a critical need for replacement patrol boats and the FRC-B will help meet that need. The FRC-B was developed as a mitigation strategy due to the critical shortfall of patrol boat mission hours. For FY 2010 and beyond, the FRC-B acquisition strategy is structured with annual options for procurement of four or six cutters. The schedule provides for the lead cutter delivery in FY 2011 and the 12th cutter by the end of FY 2013.

CAPABILITY ACQUIRED/MAINTAINED:

Patrol boats are a critical Coast Guard response and prosecution asset for all mission areas, and are an integral component to our suite of capabilities. The FRC-B will provide valuable new capabilities not found on the legacy 110' WPB, an enhanced command, control, communications, intelligence, surveillance and reconnaissance (C4ISR) suite, and an improved quality of life. The FRC-B will also have enhanced maritime security capabilities that will support homeland security and homeland defense through increased speed and mission effectiveness. The FRC-B will be capable of reaching speeds of approximately 28 knots, providing enhanced response and reaction capability. The FRC-B will also have critical DHS and DOD communications interoperability improvements, including Military Satellite Communications (MILSATCOM), and local first responder-interoperable radio communications. Where increased weapons capability and deterrence are required, the main gun of the FRC-B will be used to enhance mission execution.

PERFORMANCE:

The FRC-B sustains a critical part of Coast Guard missions and will be a maritime security workhorse, patrolling in both coastal and high seas areas. Improved interoperability, C4ISR, common operating picture (COP), and sensors enhance surveillance and identification performance over existing capabilities of the legacy 110' patrol boat. With its high readiness, speed, adaptability, and endurance, the FRC-B will respond quickly and effectively to emerging security and safety issues, essential to achieving mission success in the following Congressionally-mandated missions:

MARITIME SAFETY:

- Search and Rescue (SAR) – The FRC-B will enable the ability to search for and locate distressed mariners and recover them from positions of peril, provide medical assistance or evacuation, and provide safe transport. The FRC-B will enable the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels. The FRC-B will allow commanders to integrate, coordinate and assist a large number of SAR assets during surge events during weather anomalies (such as hurricanes or gale-force winds), ocean liner rescue operations, and downed airline rescue operations.

MARITIME SECURITY:

- Undocumented Migrant Interdiction (MIO) – The FRC-B will enable the ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, rescue administrative processing, and retention onboard. Targets include slow-moving

Fast Response Cutter (FRC)

\$243,000

rafts, small sailing vessels, small sport fishing vessels, high-speed, “go fast” type vessels, and small motor freighters attempting to make the voyage to the United States, Puerto Rico, or other U.S. territories. The FRC-B will be capable of patrolling areas where suspected illegal migration may occur, dispatching boarding teams to suspect vessels and subsequently escorting them to their final disposition. When conducting interdiction operations, both proactive and reactive, the FRC-B will be capable of a sustained presence and have the capability to rescue and shelter a large number of people in the event that the typical unseaworthy or overloaded craft sinks or capsizes during the attempted voyage. This capability will be facilitated by using rope ladders and/or cargo nets on one side of the cutter. The FRC-B will be capable of embarking a large number of migrants for at least one day, providing physical security, food, water, sanitation, basic medical services, shelter (separate from the ship’s crew), and enable administrative processing.

- **Illegal Drug Interdiction (DRUG)** – The FRC-B will have the capability to conduct illegal drug interdiction, including surveillance, visible deterrence in areas where the possibility of contraband smuggling exists, response to intelligence information and known incidents of drug smuggling, and the ability to dispatch a boarding team. The cutter will be able to intercept and take possession of contraband and the smuggling vessel, allowing the crew to arrest, detain, and transport suspects for further transfer ashore. The FRC-B will possess the capability for integration and interoperability in communications, speed, sensors, and endurance with DOD and other government agencies. The cutter will have an approximate 28 knot speed capability for rapid interdiction of suspected targets of interest, and be equipped with a deck-mounted gun and small arms.
- **Other Law Enforcement (OLE)** – The FRC-B will enable enforcement of laws additional to those inherent in the primary mission areas of migrant interdiction, illegal drug interdiction, environmental defense, lightering zone enforcement, living marine resources enforcement and maritime pollution enforcement. This capability will include proactive patrols as well as reactive response to intelligence information. The sensors will be effective both day and night, and in all weather and sea conditions. The FRC-B will enable conduct of at-sea boardings and, if necessary, taking possession of a suspect vessel and escorting or towing it to port. The cutter will have an integrated architecture of surveillance sensors, operational databases, decision support systems, and communication equipment to collect, process, and disseminate operational information to other Coast Guard units, as well as other agencies in a timely manner.
- **Protecting the U.S. Exclusive Economic Zone (EEZ) from foreign encroachment** – The FRC-B will have the capability of conducting surveillance of foreign vessels in operating areas and the ability to conduct at-sea boardings.

PROTECTION OF NATURAL RESOURCES:

- **Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response** – The FRC-B will be capable of conducting surveillance and inspection operations to detect significant discharges of oil, hazardous substances, debris, and ballast water for subsequent monitoring, mitigation, and removal actions in the U.S. EEZ. These operations involve verification of type of material in the water, evidence gathering and documentation, and are limited to visual determination of the type of pollutant, thickness, and extent, day or night and in moderate weather conditions.

Fast Response Cutter (FRC)

\$243,000

- Lightering Zone Enforcement (LZE) – The FRC-B will have the capability to survey lightering zones and lightering operations and conduct boardings as necessary.
- Living Marine Resources (LMR) – The FRC-B will enable enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The FRC-B will have the capability of a sustained presence within the U.S. EEZ, enabling at-sea boardings and inspections to deter illegal or unauthorized activity by documenting violations. The FRC-B may take possession of a suspect vessel and then escort or tow it to port, allowing the crew to arrest, detain, and transport suspects for further transfer ashore.

NATIONAL DEFENSE:

- Defense Readiness – The FRC-B will be designed to provide support to the DOD in a variety of roles and missions. The FRC-B will have the capability to integrate with the DOD in the full range of maritime operations, including surveillance, visit, board, search, seize, and unit defense. The FRC-B will conduct national defense maritime operations worldwide in low threat environments.

FRC-B support for national defense missions will be provided through the following six mission areas:

- General Defense Operations (GDO)
- Maritime Interception Operations (MIO)
- Coastal Sea Control Operations (CSCO)
- Military Environmental Response Operations (MERO)
- Theatre Security Cooperation (TSC)

Representative activities that the FRC-B will conduct in support of national defense include:

- Limited military sealift and commercial shipping escort
- Limited combat search and rescue
- Surveillance and interdiction
- Visit, board, search and seizure
- Force protection of military shipping at U.S. seaports of embarkation and overseas ports of debarkation

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
Exercise Contract Option 2	4	\$243,000
- First full rate production multi-cutter option buy (FRC-B hulls #5-8)		
	Total	\$243,000

IDS Small Boats

\$3,000

Project Description, Justification and Scope

This request funds production of one Long Range Interceptors (LRI #3) and one Short Range Prosecutors (SRP #10).

CAPABILITY ACQUIRED/MAINTAINED:

The LRI is a 35-foot cutter small boat carried by each National Security Cutter (NSC) and Offshore Patrol Cutter (OPC). The LRI provides enhanced capabilities, compared to the legacy cutter boats, such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter. The LRI

can operate beyond sight of the cutter (over the horizon) to deploy boarding parties, pursue and interdict targets of interest, and perform Search and Rescue operations.

The SRP is an approximately-25-foot cutter small boat that has similar capabilities to the LRI. The SRP will be carried by the NSC, the OPC, and potentially the Fast Response Cutter (FRC) Deepwater surface platforms.

PERFORMANCE:

Integrated Deepwater System (IDS) patrol boats are discussed in terms of “force packages” under the NSC and greatly facilitate achieving mission success in the Congressionally-mandated missions. IDS small boats allow a cutter to conduct search and rescue operations, such as removing migrants from an overloaded boat, and law enforcement operations, such as placing a boarding team on a high interest vessel. The LRI provides significantly improved performance over existing cutter small boats based on increased speed, increased passenger (boarding team) carrying capacity, communications, endurance and range. By operating beyond the line of sight of the cutter, the LRI acts as a significant force multiplier, enabling improved identification and prosecution of targets of interest.

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
LRI #3	1	\$2,500
SRP #10	1	\$500
	Total	\$3,000

FUNDING HISTORY:

	FY	TOTAL
Design SRP/Start construction of SRP-1 through SRP-2	2002	\$945
Construct SRP-3 through SRP-8*	2003	\$2,710
SRP Mods and LRI FAT Tech Support;	2004	\$1,408

U. S. Coast Guard - FY 2010 Congressional Budget Submission

IDS Small Boats **\$3,000**

LRI-1 Partial Production and Deployment		
Design LRI/Construction of LRI-1 starts; SRP Mods, Repairs, and Studies	2005	\$2,300
Complete construction of LRI-1; BCA for Follow-On LRI Procurements	2006	\$693
SRP-9 Proposal Prep Repricing, Acquisition Planning for LRI & SRP Program restarts	2007	\$1,188
Acquisition Planning for LRI & SRP Program restarts and Launch and recovery interface studies	2008	\$2,700
Engineering and Production of LRI-2 and SRP-9	2009	\$2,400
	Total	\$14,344

Funding History is the funding available for this item based on past appropriations, rescissions, and other changes.

* SRPs #1-8 were built for the 123' WPBs.

CONTRACTOR:

SRP #1-8: Lead: Zodiac of North America, Stevensville, MD

Production Subcontractor: Adrenalin Marine, Ferndale, WA

Assembly Subcontractor: Zodiac Hurricane Technologies, Delta, British Columbia, Canada

LRI #1: Willard Marine. Anaheim, California

KEY EVENTS:

Method of Performance

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the various Delivery Task Orders (DTOs). The Dekker Trakker software program that meets ANSI/EIA Standard 748 is being used by the Deepwater Program. Dekker Trakker is the tool that is used by the Systems Integrator to resource load schedules, track progress and record expenses. An additional Earned Value viewing tool also being used is Dekker iPursuit which is the viewing tool that allows Deepwater personnel to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data that was used to generate the Cost Performance Reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

Medium Endurance Cutter Sustainment

\$31,100

Project Description, Justification and Scope

This request funds the Mission Effectiveness Project (MEP) for 270' and 210' Medium Endurance Cutters (WMEC). The project includes replacing major sub-systems, such as small boat davits, oily water separators, air conditioning and refrigeration plants, and evaporators. The main propulsion control and monitoring systems will also be upgraded. This work will be performed by the Coast Guard's skilled workforce at the Coast Guard Yard, Curtis Bay, MD. Long Lead Time Material (LLTM) for 270' WMECs will be procured to ensure that subsequent MEP availabilities maintain schedule.

The 270' WMEC cutter class MEP is a two-phase project totaling \$14M per cutter (estimated at approximately \$6.5-7.5M per phase). The 210' WMEC Cutter Class MEP is a single-phase project totaling \$5.6-6.5M per cutter.

CAPABILITY ACQUIRED/MAINTAINED:

This funding will improve the overall mission effectiveness of the 270' and 210' WMEC cutter classes until they are replaced with appropriately capable assets through the Deepwater program. Each 270' and 210' WMEC provides 185 days of mission performance; a loss of that capability puts achievement of long-term DHS performance goals at risk. Additionally, the WMEC Mission Effectiveness Project will improve the cutter's operating and cost performance by replacing equipment that has the highest failure rate with more reliable equipment.

PERFORMANCE:

Mission Level Performance: With the capabilities previously described, the 270' and 210' WMECs will be used to achieve success in the following mission areas:

- Search & Rescue
- Defense Readiness
- Ports, Waterways and Coastal Security
- Illegal Drug Interdiction
- Undocumented Migrants
- Living Marine Resources

System Level Total Ownership Cost: Replacing obsolete equipment will result in greater standardization, capability, and reliability across the two cutter classes. Each cutter will complete the program with new equipment and improved logistical support that will allow for the continued operation of the current WMEC fleet in a more economical manner until their IDS counterparts are delivered.

Medium Endurance Cutter Sustainment

\$31,100

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
270' WMEC Mission Effectiveness Project Phase I	2	\$11,000
270' MEP Long Lead Time Material (LLTM)	Lot	\$4,000
210' WMEC Mission Effectiveness Project	3	\$16,100

Deliver 270' Phase One WMEC Mission Effectiveness Project Vessel – ESCANABA	2010

Significant Changes

Revised cost estimates have been made since the previous budget submission. Estimates were reduced for the 270' cutters due to some advance work being performed that alleviates MEP requirements; estimates were increased on the 210' cutters due to conditions-found assessments on the remaining cutters.

**U. S. Coast Guard Justification
Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Patrol Boat Sustainment **\$23,000**

Project Description, Justification and Scope

This request funds the Mission Effectiveness Project (MEP) for three 110' Island Class Patrol Boats (WPB). The project includes replacing significant areas of hull plate and internal structures as well as major sub-systems, such as the ship service generators, power distribution system, air conditioning & refrigeration plants, water makers, fire suppression system, and fire alarm system. The main propulsion control and monitoring systems will also be upgraded. This work will be performed by two shifts of the Coast Guard's skilled workforce at the Coast Guard Yard, Curtis Bay, MD. Long Lead Time Material (LLTM) for 110' WPBs will be procured to ensure subsequent MEP availabilities maintain schedule.

The 110' WPB Cutter Class MEP is a single phase, 9-month project totaling \$7.0M to \$9.0M in FY 2006 dollars per cutter, depending on the material condition of the hull.

CAPABILITY ACQUIRED/MAINTAINED:

This funding will dramatically improve the overall mission effectiveness of the 110' WPB cutter class until it is replaced with appropriately capable assets through the Deepwater program. Each 110' WPB provides 104 days of mission performance; a loss of that capability puts achievement of long-term DHS performance goals at risk. Additionally, the WPB MEP will improve the cutter's operating and cost performance by replacing equipment that has the highest failure rate with more reliable equipment that is more easily maintained and supported.

PERFORMANCE:

Mission Level Performance: With the capabilities previously described, the 110' WPBs will be used to achieve success in the following mission areas:

- Search & Rescue
- Defense Readiness
- Ports, Waterways and Coastal Security
- Illegal Drug Interdiction
- Undocumented Migrants
- Living Marine Resources

System Level Total Ownership Cost: Replacing obsolete equipment will result in greater standardization, capability, and reliability across the two cutter classes. Each cutter will complete the program with new equipment and improved logistical support that will allow for the continued operation of the current WPB fleet in a more economical manner until their IDS counterparts are delivered.

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2010:

Government Program Management **\$45,000**

Project Description, Justification and Scope

This request provides funding for government program management and oversight. Program management funds provide support for government administration, technical reviews, technology analysis, performance monitoring Program, Operational Test and Evaluation, and Transition and Risk Management.

CAPABILITY ACQUIRED/MAINTAINED:

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. This requires sound management policies and the processes needed for implementation them. Specifically, program management funds provide the Coast Guard with the capability to protect the government's interests during the acquisition process and ensure contractors and suppliers deliver required products and services meeting prescribed terms and conditions. The Coast Guard accomplishes this management and oversight through staff located at the Program Management Office and at other contractor/government sites. Personnel working on CG-9 Acquisition Directorate projects include a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs. This request funds the support contractors that assist the government personnel in providing oversight to acquisition projects. These contractors perform specific, well-defined tasks that are not inherently governmental.

Technology is constantly changing and several technology refreshes or upgrades are planned over the projected life cycle of the Coast Guard Acquisition Projects. Government program management personnel analyze the capability and applicability of these replacement technologies. Support contractors assist this effort and gather and assemble data into the government-designated format to aid informed government decision-making.

Government program management funding also supports performance monitoring of all contracts. This is accomplished through the use of a variety of tools such as the Earned Value Management System (EVMS), periodic reports to DHS and Congress, and use of the Acquisition Performance Management System (APMS). EVMS permits the Coast Guard to closely follow cost and schedule performance of the projects by asset, while the reports and APMS data allow for periodic internal and external reviews of program cost, schedule, and performance criteria.

APMS provides web-based reporting of program performance in all aspects on a near real-time basis, depending upon the particular metric used. In addition, risk management provides the Coast Guard the opportunity to forecast future performance of various assets and the operational performance of the Acquisition Directorate projects from a "what if" perspective. This important analysis is aided by the development of various scenarios by experienced government employees and support contractors based on multiple past acquisition programs as well as operational experience and forecasts.

Government program management funding also supports the Operational Tests and Evaluation (OT&E) done with the U.S. Navy's Commander Operational Test and Evaluation Forces (COMPOPTEVFOR) for the execution of project operational testing. While Developmental Test and Evaluation (DT&E) is

Government Program Management

\$45,000

the responsibility of the contractor, OT&E is an inherently governmental responsibility. The U.S. Navy's testing organization, COMOPTEVFOR, serves as the technical advisor to Coast Guard and is responsible for overseeing and contributing to the conduct of tests for the early involvement, review, and assessment of system and asset operational performance. Modeling is one of the methodologies used to monitor system-level performance. Government program management funding is used to fund designated modeling activities. Modeling is also used as a means to assess different alternatives as well as to assess the impact on system-level performance to determine the best mix of asset capability to meet mission objectives.

Government program management funding supports the transition of the assets to the Coast Guard. The government staff serves a liaison during the transition period between the prime contractor's delivery of an asset when it is ready for operational testing up through the time the asset is transferred to the operational user and the Coast Guard support community.

The Government Accountability Office (GAO) and Congress have both expressed a desire for the Coast Guard to provide more government oversight of the Coast Guard Acquisition as well as assume greater systems integration responsibility. This increase in oversight and integration will be accomplished by increasing the number of government personnel (not funded within this request) and increasing the use of third party independent analysis. In addition, the Coast Guard's Acquisition Directorate (CG-9) is developing a government competency in systems engineering for integrating multiple assets and C4ISR systems into the operations of the Coast Guard to support the acquisition projects under CG-9.

New initiatives have been implemented to improve the investment/acquisition metrics and ensure appropriate internal controls are in place while complying with increasingly complex financial management controls and processes. As an example, all CG-9 program/project managers have developed annual project performance plans detailing key events and success criteria for assessing risk and performance against approved documents and plans. The analysis of these plans are funded by the government program management request.

This funding request also funds administrative, travel and training costs directly associated with government personnel working on the acquisition projects in the CG-9 Acquisition Directorate.

Finally, government program management funding is used to ensure the Coast Guard is responsive to various Congressional, GAO and DHS-IG requests for information. This important function keeps these entities informed as they conduct appropriate oversight of the Coast Guard Acquisition and requires sufficient funding to ensure that accurate information is provided to these organizations in a timely manner.

U. S. Coast Guard - FY 2010 Congressional Budget Submission

Government Program Management **\$45,000**

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
Government Program Management	Job	\$45,000

FUNDING HISTORY

	FY	TOTAL (\$K)
Government Program Management	2002	\$28,985
	2003	\$27,818
	2004	\$33,521
	2005	\$38,000
	2006	\$38,114
	2007	\$45,675
	2008	\$50,475
	2009	\$58,000
	Total	\$320,588

Funding history is the funding available for this item based on past appropriations, rescissions, and other changes.

Significant Changes

The primary reason for the decrease between FY2009 and FY2010 is due to the additional 65 AC&I personnel (funded by “Direct Personnel Costs”) positions authorized for FY2009. These personnel will be hired throughout FY2009 and will be able to absorb the Program Management work and oversight in FY2010.

Project Schedule

<u>Project Description</u>	Dates by Fiscal Year & Quarter				Total Estimate Cost

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification
Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Systems Engineering and Integration **\$35,000**

Project Description, Justification and Scope

This request impacts every aspect of the Coast Guard enterprise—encompassing the integration of human-capital management; information technology; capital investment planning for air and surface platforms; logistics; command, control, and computers; intelligence, surveillance, and reconnaissance; and, most importantly, the fleet operator. Systems engineering and integration includes the following activities:

- Systems Engineering
 - System architecture development,
 - Operational performance analysis,
 - Cost reduction efforts, and
 - Enterprise level requirements management
- Enterprise level system integration;
- Interface management;
- Configuration management;
- Technical data management;
- Technical assessment; and
- Decision analysis.

CAPABILITY ACQUIRED/MAINTAINED:

Systems engineering and integration is essential for interoperability at the unit, system and organizational levels, both internal and external to the Coast Guard. Effective systems integration ensures systems can operate together, while minimizing the cost of asset acquisition, operations and maintenance, and the risk inherent in a comprehensive and complex acquisition program. Additionally, systems engineering and integration maximizes the ability of assets to interoperate with each other and with those of other agencies (i.e., DHS, DoD, other government agencies, and state and local responders).

The Coast Guard is fielding an integrated system of aviation, cutter and shore assets that are interoperable through a comprehensive C4ISR detection and communications structure. Without systems engineering and integration, these assets and sub-systems would be implemented in an inefficient and ineffective manner. One example demonstrating the need for systems engineering and integration involves the delivery of upgraded capabilities to legacy cutters, including a Classified Local Area Network (CLAN), upgraded INMARSAT B satellite communications, Automatic Identification System (AIS), and law enforcement radios, providing significantly increased capabilities and Maritime Domain Awareness to the legacy cutters. Systems engineering and integration applied to these upgrades emphasized a system-wide view of the project, resulting in recognition of corresponding upgrades to be accomplished at shore-side command centers. This approach to integration ensures the cutters can send and receive important operational information, further improving Maritime Domain Awareness and Operational Performance. Failure to utilize systems engineering and integration could have potentially resulted in upgrading the cutters alone, marginalizing the benefits of the C4ISR upgrades.

System engineering evaluations are performed across the system, subsystem, and component levels to analyze products and capabilities for both interoperability and system commonality. These efforts

Systems Engineering and Integration \$35,000

culminate in the ability to determine and document predicted total system performance for numerous configurations and scenarios. Systems engineering has the responsibility for the overall technical configuration-development process.

PERFORMANCE:

Systems engineering and integration is essential to improving operational performance of all Coast Guard assets and directly supports mission success in all Congressionally-mandated missions. Systems engineering and integration also provides identification of possible cost reduction approaches.

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)
Systems Engineering and Integration	Job	\$35,000

FUNDING HISTORY	FY	TOTAL (\$K)
Overall Contractor Management of the Systems Engineering Process	2002	\$63,330
	2003	\$45,626
	2004	\$42,105
	2005	\$43,000
	2006	\$36,403
	2007	\$34,517
	2008	\$35,145
	Total	\$300,126

Funding History is the funding available for this item based on past appropriations, rescissions, and other changes.

CONTRACTOR:

Various and TBD.

Type of Contract: Various including time and materials, firm-fix price, and cost-plus fee contracts.

Contract options: Various

Note: The Coast Guard is assuming increased system integrator responsibilities for all IDS assets as a part of an effort to improved overall acquisition management effectiveness. The Coast Guard anticipates that a portion of funding will be redirected, as needed, to third party systems integration and management contracts other than ICGS to improve program oversight and effectiveness.

KEY EVENTS:

System Increment 1 – Integrated Product Environment	FY 2002
System Increment 2 – Initial Integrated Product & Process Development Team Training	2003
System Increment 3 – System Architecture Plan	2004
Prime Contractor’s Program Management, Systems Engineering and Integration Transfer	2005-2007

U. S. Coast Guard - FY 2010 Congressional Budget Submission

Systems Engineering and Integration

\$35,000

Significant Changes

The revised funding request from the prior budget submission reflects the Coast Guard's assumption of the lead systems integrator role from ICGS. Greater responsibilities associated with the new role have resulted in increased costs needed for external expertise while the government grows an adequate number of in-house personnel to effectively manage complex platform and asset integration.

C4ISR

\$35,000

Project Description, Justification and Scope

This request funds design and development of the Common Operating Picture as part of the Command, Control, Communications, Computer, Intelligence, Surveillance, and Reconnaissance (C4ISR) system. The C4ISR system is designed to provide critical information and knowledge to field commanders allowing them to most efficiently and effectively exercise authority, while directing and monitoring assigned across the range of Coast Guard missions. C4ISR system is designed to include:

- Collecting operational and intelligence information and data; process and integrate the data into operationally-valued and assured information; and analyze, evaluate, and/or interpret the available operational and intelligence information into actionable knowledge to enhance maritime domain and situational awareness within maritime areas of the U.S. This process is specifically focused on preventing terrorist or other illegal acts such as drug smuggling, while simultaneously assisting mariners in distress or aiding maritime shipping;
- Systematically enabling persistent surveillance required to maintain the operational and commercial viability of the U.S. maritime domain, consisting of ports, waterways and coastal areas on and above the water's surface by visual, audio, electronic, photographic, or other means; and
- Obtaining, by technical sensor and intelligence methods and visual observation, information about the activities and possible threats from terrorists and other criminal activities, while concurrently observing and assisting legitimate users in U.S. ports, waterways and coastal regions.

C4ISR is the eyes, ears and cognitive recognition system allowing the Coast Guard to see, hear, comprehend and communicate what is happening in America's maritime regions. This is accomplished using modern electronic components, such as interoperable radio and satellite communication systems and improved optical/radar sensors, that can improve sightings in total darkness and detect maritime targets in all weather conditions. In addition, it uses an interoperable network to bring all operational and intelligence data together, transforming the data into a Common Operating Picture (COP). The FY 2010 request continues to fund improvements to C4ISR, enabling earlier awareness, alerting and queuing of events through the more effective gathering of terrorism-related information, analysis and coordination, leading to the appropriate response—all critical to detecting, deterring, and defeating terrorists and other criminals.

When Deepwater's C4ISR modernization and recapitalization is complete, cutters and aircraft will no longer operate as relatively independent platforms with limited awareness in the maritime region as they do today. Instead, a wide variety of ships, sensors, and intelligence sources will provide information to these platforms, enabling them to significantly contribute to the COP shared with DHS and DoD command and control systems.

This request is for one of the three C4ISR elements: Part 1 - the Common Operating Picture (COP). Once complete, the Coast Guard will have the capabilities needed to process rapidly growing amounts of operations and intelligence data from the C4ISR system. The C4ISR elements contain the following breakdown of funding:

C4ISR

\$35,000

Common Operating Picture (COP) - \$35,000. This work completes segment 2 of four incremental additions to the core C4ISR software design, development, and deployment completed in Increments 1. Assets receive increased functionality through incremental design, development and deployment.

COP Implementation Plan

The C4ISR Implementation Plan provides for a core C4ISR design for all assets, which will increase software reuse, minimize training and maintenance costs, and increase interoperability between Coast Guard assets. Furthermore, Segment 2 improves the Coast Guard's overall surveillance, detection, classification, and identification capabilities, which will increase the mission performance in all areas.

The C4ISR design is being developed and fielded in a sequence of four increments of which each is a generation of software. Each C4ISR increment will result in a considerable improvement in the functionality of the standard command and control (C2) system used aboard legacy and newly-acquired cutters, aircraft and shore assets, as well as sensor functionality improvements. These enhancements include mission support and decision aids, general mission tools, Search and Rescue (SAR) planning capabilities, maritime law enforcement case management tool enhancements, case files data storage, target of interest doctrine, emission control, self defense coordinator, intelligence systems that can "fingerprint" and identify a vessel, and self-defense capabilities for the National Security Cutters (NSC) deploying with U.S. Navy battle groups. Moreover, Segment 3 will begin to develop interfaces with other Coast Guard systems, improving interoperability. These systems are acquired and managed under the Integrated C4ISR Program Office in the Coast Guard's newly reformed Acquisition Directorate.

Functionality, funding is included to partially fund the Coast Guard's Command and Control Center (C2CEN) assistance in the design and testing of C4ISR systems acquired by the Acquisition Directorate. This includes funding for the inherently governmental responsibility to ensure safety and security of the system required in order to operate the system. Examples of operations enabled through C & A include connection to SIPRNET, CGDN +, DHS One Net, record message communications, MILSATCOM communications, LINK-11 connection, COP connection with DoD and DHS, and many other capabilities. Without this funding, the C4ISR system is not certified and accredited and therefore cannot be used operationally.

KEY EVENTS:

COP Increment 1 Completion	FY 2008
COP Segment 2 Acceptance	2011
Complete Legacy Cutter Upgrades	2021

Significant Changes

Administrative correction made to funding history. There was a change in the C4ISR funding plan primarily focused on the Certification and Accreditation (C&A) costs. Over the last three years, the Coast Guard and DoD have gained a better understanding of the costs associated with ensuring newly-developed systems, and the data that resides in the systems, are not vulnerable to internal and external attacks. These costs are being applied towards maintaining the systems security posture to ensure national security information is not compromised. Specifically, the cost is associated with maintaining a network security posture consistent with national policy established by the National Security Agency and DoD.

The Coast Guard will begin transitioning more of the C4ISR system integration, testing, and support activities to C2CEN vice the MDAC. This provides the Coast Guard with more visibility into the development and support process of the Integrated Deepwater System C² systems. Since 2007, the Coast Guard has increased oversight of the software development process, implementation of information assurance policies, and support of the Coast Guard C4ISR system.

Deepwater Logistics

\$37,700

Project Description, Justification and Scope

This request funds continued development of logistics for Deepwater Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems and the Coast Guard Logistics Information Management System (CG-LIMS) to support the delivery of Deepwater ships, aircraft, and information systems, as well as current Coast Guard cutters, aircraft, and shore sites converted into or modernized as end-state assets. The funding request includes three significant aspects of logistics in one budget item: 1) Integrated Logistics Support (ILS), 2) CG-LIMS development, and 3) facilities upgrades (in preparation of receiving new and modernized assets).

Integrated Logistics Support (ILS) - \$3,700K will ensure that logistics plans are executed to keep logistics support synchronized with the overall C4ISR design and deployment to Deepwater assets. This will ensure the Coast Guard has sufficient spares, training, and logistics support to sustain C4ISR systems deployed on new assets. The overall intensive and time-sensitive system support development effort is necessary for the successful fielding of assets and achievement of targeted operational effectiveness goals.

CG-LIMS - \$6,000K will be used for continued CG-LIMS development and deployment to facilities/assets where CG-LIMS use is required. These sites include USCG aviation, surface, and C4 operating assets and support facilities.

Facilities for New Deepwater Assets - \$28,000K will fund construction of a new hangar to accommodate four Maritime Patrol Aircraft (MPA) at Air Station Cape Cod, MA and perform environmental and engineering site work other projects.

Logistics support includes the following functional elements: 1) maintenance; 2) maintenance facilities; 3) manpower considerations for the assets, such as the design of controls for engineers on ships and flight controls on aircraft; 4) supply support, in terms of sparing and associated analysis; 5) special equipment used for maintaining, testing and calibrating the cutters, aircraft; and C4ISR systems; 6) providing the technical data related to operating and maintaining the assets; 7) all aspects of training and training tools; 8) computer support for the asset (not associated with software and computer support being developed with C4ISR); 9) all of the physical movement and care of the parts, equipment components and supplies, which includes packaging, handling, storage and transportation; and 10) design interface with regard to all of these elements in initial design, including developing engineering changes, technical refreshes, and/or upgrades.

Logistics support will be facilitated through an enterprise-wide information system tool called CG-LIMS, which requires software development, configuration, and installation at specific Coast Guard units with the need for access. Another significant component of logistics is the physical facilities and infrastructure preparation necessary for home sites and support infrastructures for these assets. These facilities fall into two categories: 1) current Coast Guard or other existing facilities that are modified to be used for the new and/or converted assets, such as lengthening the pier for a longer ship and associated additional power supply requirements; and 2) newly-acquired facilities, including land and the associated buildings for crew offices, training buildings, and hangars that will be the new homes to the

Deepwater Logistics

\$37,700

Deepwater ships, aircraft, and their crews. Completion of the regulatory environmental studies and preparations are also required.

CG-LIMS is intended to automatically collect and process logistics data so that the software can be used to project support requirements and maintain a configuration baseline for the asset. This will relieve the Coast Guard workforce of the hard work associated with current keying-in of millions of individual data items. Also, CG-LIMS will interface with the Coast Guard's Learning Management System, which will schedule, track and distribute all training and training requirements for Coast Guard personnel. With its ability to bring the right information to the right people at the right time, CG-LIMS is expected to enhance productivity for the personnel involved in logistics, and provide operationally relevant information to Coast Guard operators and maintainers. Eventually, Coast Guard crews will have maintenance support technologies to provide step-by-step, computer-generated instructions, and 24-hour expert assistance made available through remote support services. Increased availability and reliability of Coast Guard cutters and aircraft will result in more operational time for these assets. Improved cost management will be an important feature that this investment in CG-LIMS will provide:

- Improving logistics operations, rules, tools and processes to reduce costs through adoption and institutionalization of best public and private sector business practices;
- Significantly improving inventory accuracy;
- Reducing costs by eliminating inventory at multiple locations; and
- Improving customer support by collaborating with private industry to develop effective support arrangements (such as service support agreements and other agreements).

Logistics planning and implementation keeps the Coast Guard operating more reliably toward mission achievement while progressing towards logistics transformation goals, maintaining configuration control of assets, and accomplishing CFO management requirements. Using CG-LIMS to bring data together and transforming the data into useable information as an electronic status system will demonstrate part availability anywhere in the Coast Guard. That knowledge will permit total asset visibility throughout the Coast Guard to determine who has the part, and auto-generate the shipping documents to transfer that item to the unit that needs the part. CG-LIMS will also collect and analyze maintenance record data to show frequency of use and frequency of failure for spares and repair parts, improving overall management of maintenance resources.

These logistics improvements will allow the Coast Guard to manage facilities with fewer personnel engaged in logistics activities, keep less "safety stocks" (increased commonality between equipment sets across asset classes), maintain better inventory accuracy (less inventory means money saved), and remove inefficiencies that result in delays that prevent critical assets from being ready to operate. In addition, this information will be available at higher levels in the organization to determine asset or class-wide equipment problems.

CG-LIMS and the logistics infrastructure can significantly contribute to CFO Act compliance within the Deepwater program. Some functionality related to CFO Act compliance includes:

- Provide unique asset identifier in order to include all costs incurred and track total acquisition/contracting cost.

Deepwater Logistics

\$37,700

- Track the asset identifier to the specific document used to acquire the asset; i.e. purchase order, task order, etc.
- Record beginning balances (on-hand), acquisition, withdrawals (dispositions), and calculate ending balances (on-hand) expressed in dollar values and physical units.
- Record item identification, classification (i.e., nomenclature, quantity, description, Federal stock classification or Nation Stock Number), initial cost, and subsequent costs related to acquisition (i.e., holding/handling cost).
- Record the condition of inventory.
- Record changes in value of inventory, supplies and materials due to changes in condition or other impacting circumstances.
- Record whether material received is hazardous, classified, requires special handling, requires special packaging, requires munitions list controls, requires trade security controls or has shelf life.
- Provide edits (controls) to prevent duplicate entries and reduce the likelihood of creating erroneous inventory documents/records, thereby ensuring the integrity of data recorded in the system.
- Permit only authorized users to enter, modify, or otherwise alter inventory records.
- Enable and account for the transfer of responsibility for inventory from one authorized manager to another authorized manager, ensuring that sufficient information is transferred to provide an audit trail at the gaining management activity.

CAPABILITY ACQUIRED/MAINTAINED:

Establishing a responsive ILS system will provide benefits in reduced life cycle costs and increased operational effectiveness. To achieve these goals, the Coast Guard must continue with a two-part development approach: 1) integrating enterprise-wide processes across lines of maintenance, supply support, technical data, support and test equipment, computer support, facilities, and transportation to assist in moving the Coast Guard towards an efficient centralized business model; 2) incorporating sound Human Systems Integration (HSI) processes, which include manpower, personnel, training, human factors engineering, and system safety, to significantly improve human performance and reduce operational costs.

The C4ISR equipment support includes training and maintenance analyses and the full suite of support products for both operators and maintainers. Ensuring adequate C4ISR logistics support preserves and protects this substantial investment. Performing complex reliability, maintainability and availability analyses are necessary to measure and baseline C4ISR supportability goals. Analyzing C4ISR systems/equipment and developing technical refresh plans will ensure the Coast Guard's ability to upgrade assets to maintain operational effectiveness while utilizing a deliberate budget agenda. Establishing and maintaining accurate baselines are crucial for configuration control and for exercising effective and efficient equipment and supply chain management.

Investing in CG-LIMS is central to our enterprise-wide system. CG-LIMS can provide the ability, using collected data, to bring the right information to the right people at the right time. It is intended to streamline parts ordering and management, facilitate maintenance functions, sustain configuration control, and provide an innovative training delivery system. Interconnected processes accessed via an on-line support infrastructure will improve each IDS unit's operational effectiveness by providing responsive maintenance support, establishing and maintaining inventory levels, automatically ordering

Deepwater Logistics

\$37,700

parts, while at the same time remaining CFO compliant. This ensures that each asset remains available for its planned operational hours. This same feature also can be configured to manage Total Ownership Costs (TOC) as the inventory tracking system determines equipment and spare parts usage rates and determines efficient inventory levels. For example, logisticians will be able to quickly forecast support requirements and trends and reduce single point failures. Designers will be able to introduce proven state-of-the-market technology, assess design trade-offs, and use concurrent engineering to improve reliability and maintainability for each new asset. The data also supports a “remove-and-replace” concept for components and modules which will simplify repair tasks.

The Maritime Patrol Aircraft (MPA) is 10 feet taller than the HU25 Falcon jet it is replacing, and has twice the hangar footprint. As a result of the huge size increase, some legacy shore facilities are unable to accommodate the height and/or wingspan of the new HC144A Ocean Sentry, and new hangars are required to house the new aircraft.

Environmental and engineering studies are necessary to comply with the legal requirements of the National Environmental Policy Act (NEPA).

PERFORMANCE:

ILS is essential to achieving mission success and life cycle supportability in all missions. With the proper support infrastructure in place, prospective Deepwater assets will be able to perform as designed and maintain their operational capabilities for entire scheduled service life.

The new MPA hangar at Cape Cod, MA will prevent aircraft having to be staged outside in a geographic area with historically severe weather and precipitation, contrary to current USCG policy, and avoids operational impacts due to mission delays and personnel impacts due to icing and/or snow, as well as significantly increased maintenance and corrosion control requirements and costs.

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2010:

ITEM	QUANTITY	TOTAL (\$K)

CONTRACTOR for ILS

Integrated Coast Guard System (ICGS), Washington, DC

Type of Contract: Indefinite Delivery, Indefinite Quantity with award terms

Contract options: 5-year base completed June 2007 with 43-month subsequent award term period through Jan 2011

SUBCONTRACTORS

Integrated Logistics Support - Business Process Development:

MA&D - Crew Modeling, Boulder, CO

Mincom - ILS Process Re-engineering, Englewood, CO

NGDMS – HIS, Reston, VA

LM Technical Services – Process Integration, Cherry Hill, NJ

Pittiglio Rabin Todin & McGrath (PRTM) - Supply Chain Logistic, Washington, DC

Prosoft – Training, Virginia Beach, VA

Sigmon - ILS Process Re-engineering, Norfolk, VA

C4ISR Support:

EADS GmbH - NSC Air Search Radar, Ulm, Germany

FLIR Systems - Various EO/FLIR, Portland, OR

L3 Communications - Integrated COMMS Int/Ext., Camden, NJ

LM Eagan - MPA Mission Pallet, Eagan, MN

LM IS&S - Intel, Enterprise SATCOM / INTEL, Valley Forge, PA

LM Technical Services - C4 Installs, Tech Docs, Provisioning, Sustainment, Cherry Hill, NJ

Deepwater Logistics

\$37,700

Sierra Nevada - Surface UCARS, Sparks, NV

LMS Support:

LM Technical Services – LIMS Integration, Cherry Hill, NJ

Spectrum - Learning Mgt. System, Vienna, VA

Sum Total (Docent) - Learning Mgt. System, Mountain View, CA

CG-LIMS Development:

LM Technical Services – LIMS Integration, Cherry Hill, NJ

Dimension Technology Solutions - LIMS Interface, Boulder, CO

Mincom - LIMS Software, Englewood, CO

CG-LIMS Development:

QSS Group Incorporated

All Shore Facility projects are executed and managed within the Coast Guard by the Facility Design and Construction Centers (FDCCs) at Norfolk, VA and Seattle, WA. Each project is awarded to an Architectural/Engineering (A/E) firm and/or a construction contractor for completion.

Method of Performance

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly cost performance reports. The iPursuit program also allows for extensive insight into the data used to generate cost performance reports. For example, it can provide a breakdown of cost and schedule variances by work breakdown structure (WBS).

**U. S. Coast Guard Justification
Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Technology Obsolescence Prevention (TOP) **\$1,900**

Project Description, Justification and Scope

This request funds efforts to prevent technological obsolescence, which results from the evolution of technology as newer technologies appear and older ones cease to be used. For example, new media for storing digital information rapidly replaces older media and reading devices for these older media are increasingly no longer available. Newer versions of software constantly render older versions obsolete and the hardware required by this software also changes over time. Consequently, information which relies on obsolete technologies becomes inaccessible. While maintaining obsolete technologies might be the only option in limited circumstances, because of the associated need to keep every version of every piece of software and hardware, operating systems, and manuals, as well as personnel with relevant skills, it is not generally considered to be a feasible alternative over time.

In general, Technology Obsolescence Prevention (TOP) supports Integrated Deepwater Systems (IDS) assets for the 40-year duration of the program based upon pre-planned replacement rates. For example, if a computer were placed in service in 2005, it would be replaced in 2010. The replacement is chosen based on the same requirements as the original equipment. The cost allocated is the original cost plus an inflation factor for 2010. This cost is allocated every five years until an asset is either disposed of or the end of the IDS contract period is reached.

TOP Replacement Periods

EQUIPMENT DESCRIPTION:

Computers and Networking Equipment
Sensors and Weapon Systems
Communications Equipment
Software

REPLACEMENT PERIOD:

5 Years
15 to 20 Years
10 to 15 Years
5 Years

CAPABILITY ACQUIRED/MAINTAINED:

To maintain systems that provide satellite connectivity onboard 270' IDS legacy cutters, TOP will replace cutter commercial satellite communications systems.

PERFORMANCE:

TOP minimizes or eliminates the impact that hardware/software obsolescence can have on performance. TOP maintains the IDS technology performance level with indifference to changes at the hardware/software level.

Rescue 21

\$117,000

Project Description, Justification and Scope

This request funds (a) completion of California and New England Sectors, (b) continuation of Alaska, Great Lakes, Hawaii, Guam, Puerto Rico, vessels, and Western Rivers as well as (c) other system changes.

The Rescue 21 project (formerly the National Distress and Response System Modernization Project or NDRSMP) replaces the U.S. Coast Guard's legacy National Distress and Response System (NDRS), which enhances the U.S. Coast Guard's mission execution through improved communications, command and control capabilities in the coastal zone. The basic NDRS components include radios, transceivers, towers for antennas, and an interconnecting network. It is the foundation for coastal Search and Rescue (SAR), and is a critical enabler of efficient and effective command and control for all missions in coastal zones.

Benefits of Rescue 21 include:

- Eliminates many existing communication coverage gaps ("dead zones") while ensuring continuous, enhanced VHF-FM marine radio coverage out to 20 nautical miles from shore within the coastal zone;
- Features digital voice recording capability with immediate playback, improving the ability to review and resolve garbled or unclear transmissions - critical to search and rescue planning and response;
- Provides improved direction finding capability for more timely response to mariners in distress and an ability to distinguish "hoax" calls from actual distress calls;
- Increases the number of voice channels from one to five, allowing watch standers to conduct multiple operations, while offering protected (secure) communications for homeland security missions when needed;
- Enhances Maritime Domain Awareness (MDA) by maintaining communications with mariners, and facilitating the timely flow of information between the Coast Guard and other government and law enforcement agencies; and
- Supports DHS Goal 4: Build a nimble, effective emergency response system and a culture of preparedness.

FY 2010 will specifically accomplish the following work:

Rescue 21 Ground Subsystem (GSS) Deployment (partial) – Full Rate Production (FRP) Group II, Group III, Alaska, Western Rivers, and Vessel Subsystem (partial)

- Completes California and New England Sectors
 - Humboldt Bay, San Francisco, and Los Angeles/Long Beach
 - Northern and Southeast New England
- Continues Great Lakes Sectors and Sectors Outside Continental U.S. Islands

Rescue 21

\$117,000

- Lake Michigan; Sault Ste Marie, MI; Detroit, MI; Buffalo, NY
- Hawaii; Guam; San Juan, Puerto Rico
- Continues Alaska and Western Rivers Sectors
 - Juneau, Anchorage
 - Upper Mississippi, Ohio Valley, Lower Mississippi
- Continues Rescue 21 Vessel Subsystem (VSS) Deployment
 - Installation of UHF communications capabilities on Coast Guard vessels and small boats. The Coast Guard’s various classes of response boats (including 41 ft, 47 ft, 87 ft, 110 ft, and Response Boat-Small (RB-S)) and buoy tender vessels (140 ft, 175 ft, 225 ft) will be outfitted with these capabilities during FY 2009 through FY 2012. The schedule of Rescue 21 VSS installations is being coordinated with ongoing technology refresh programs, where possible, to reduce installation costs.
- Continues Rescue 21 Ground Subsystem Back-up Communications
 - Provides back-up communications for the Rescue 21 system between the Remote Fixed Facility and the Sector; eliminates the great majority of downtime from telecommunications provider and network outages.

At the end of FY 2008, Rescue 21 is operational in 16 of 39 Sectors and is standing watch and saving lives along 22,292 miles of U.S. coastline at the following Sectors/Groups:

- | | | |
|----------------------------------|----------------------|--------------------|
| – New York, NY | – Miami, FL | – Port Angeles, WA |
| – Long Island NY/CT | – Key West, FL | – Seattle, WA |
| – Delaware Bay ¹ | – St. Petersburg, FL | – Astoria, OR |
| – Baltimore, MD | – Mobile, AL | – Portland, OR |
| – Hampton Roads, VA ² | – New Orleans, LA | – North Bend, OR |
| – Jacksonville, FL | | |

¹ incorporated Initial Operating Capability Region Atlantic City, NJ

² incorporated Initial Operating Capability Region Eastern Shore, VA

At the end of FY 2009, the following additional Sectors are scheduled to be operational, for a total of 28,016 miles of Rescue 21 coastline coverage:

- | | |
|------------------|------------------|
| – Boston, MA | – Charleston, SC |
| – North Carolina | – Galveston, TX |

At the end of FY 2010, the following additional Sectors/Groups are scheduled to be operational, for a total of 36,429 miles of Rescue 21 coastline coverage:

- | | | |
|-------------------------|---------------------|------------------------------|
| – Northern New England | – Humboldt Bay, CA | – Los Angeles/Long Beach, CA |
| – Southeast New England | – San Francisco, CA | – San Diego, CA |
| – Corpus Christi, TX | | |

Production Contractor:

- General Dynamics C4 Systems (GDC4S) of Scottsdale, AZ is the Rescue 21 Phase II Contractor. The Phase II contract is a delivery order based Indefinite Delivery, Indefinite Quantity (IDIQ) contract with award term incentives. The contract has a base period of six years, plus two four-year

Rescue 21

\$117,000

award terms and one five-year award term. GDC4S is responsible for complete system maintenance and operates a 24/7 Customer Care Center (CCC) to respond to system discrepancies.

Subcontractors:

- Motorola, Inc. (Schaumburg, IL) - Radio subsystems
- Consolidate Analysts Centers, Federal, Inc (CACI) (Manassas, VA) - Direction finding subsystems
- General Dynamics Information Technology (GDIT) (Needham, MA) -Remote fixed facilities planning team member and construction management
- Stanley Associates, Inc. (Charleston, SC) - Fixed facility infrastructure and cutover
- Chelton Inc. (Lewisville, TX) - Co-site interference mitigation subsystems
- CellXion (Bossier City, LA) – RFF shelters
- MWH Americas, Inc. (Farmington Hills, MI) – Environmental services, planning team member
- Rhode & Schwarz (Columbia, MD) - Direction finding subsystems
- Western Maritime (San Diego, CA) – Direction finding calibration vessel testing

Significant Changes

In May 2008, DHS approved a revision to the project's Acquisition Program Baseline (APB), adjusting the project's cost and schedule baselines to more accurately reflect actual system deployment results experienced during the project's Low Rate Initial Production (LRIP) and initial Full Rate Production (FRP) phases. This APB revision contained no changes to Rescue 21 Key Performance Parameters (KPP). During the 2008 Atlantic hurricane season, the Rescue 21 system's Disaster Recovery (DR) capability was deployed in the U.S. Gulf Coast. In advance of Hurricane Gustav, the communications watch at Coast Guard Sector New Orleans was shifted to OSC Martinsburg, WV, enabling Sector personnel to safely evacuate the area, while ensuring the Rescue 21 system remained available for the Coast Guard to receive and respond to maritime distress calls. In the aftermath of Hurricane Ike, again in Sector New Orleans, two Communications Recovery Packages (CRP) were deployed to restore critical communications that were damaged by the storm. These CRPs ensured the Sector's Rescue 21 communications coverage remained operational, despite widespread commercial electrical and network storm damage along the Gulf Coast.

As of the end of Fiscal Year 2008, 16 of 39 Rescue 21 Sectors (Coast Guard Sectors Long Island Sound; New York, NY; Delaware Bay; Baltimore, MD; Hampton Roads, VA; Jacksonville, FL; Miami, FL; Key West, FL; St. Petersburg, FL; Mobile, AL; New Orleans, LA; Seattle, WA; Portland, OR; and Groups Port Angeles, WA; Astoria, OR; and North Bend, OR) have been accepted by the Coast Guard and are operational. Rescue 21 is deployed at 41% of Coast Guard Sectors and standing watch and saving lives along 22,292 miles of U.S. coastline.

**U. S. Coast Guard Justification
Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

High Frequency (HF) Modernization and Recapitalization **\$2,500**

Project Description, Justification and Scope

This request will fund the purchase and installation of 12 HF transmitters (\$200K per transmitter.)

This initiative recapitalizes the Coast Guard's High Frequency (HF) communications system, including replacement of 88 twenty-five-year-old, unserviceable, shore-side, high power HF transmitters. This request will fund the recapitalization of the HF communications system as part of a multi-year installation schedule. As a signatory nation of the International Safety of Life At Sea (SOLAS) treaty, the United States is required to continuously monitor several HF emergency and distress channels to respond to at-sea emergencies and requests for assistance, and to provide warnings to ships relating to "...gales, storms, and tropical storms" by radio messages. This information is provided by the Coast Guard via HF transmitters in the form of text and fax messages.

Existing HF transmitters are available for operational use only 72% of the time due to the frequency of failure, far from meeting the 95% industry standard of availability. Maintenance of the existing HF system is not viable as spare parts are no longer manufactured for these obsolete radios. Excessive system downtime and subsequent lack of adequate HF communications coverage prevents the Coast Guard from consistently meeting United States SOLAS obligations. Without continued system recapitalization, the U.S. Coast Guard will be unable to meet SOLAS mandates regarding HF communications, at which time existing transmitters are predicted to completely fail based on current casualty trends.

Satellite communication (SATCOM) systems cannot accomplish or replace many HF requirements. Moreover, not all Coast Guard vessels and aircraft have SATCOM capability, and satellite coverage is not available in all Coast Guard operating areas. Replacement of shore-side, high power HF radios will improve effectiveness through increased system reliability, throughput, and reduced operating and maintenance costs. It will also increase interoperability with international commercial maritime and distress systems, SOLAS and non-SOLAS vessels, and DHS, DoD, allied and other government assets, thus contributing to the integrated, interoperable maritime security screening system envisioned in the Maritime Strategy for Homeland Security.

These transmitters will be purchased from and installed by Rockwell Collins via existing U.S. Customs and Border Protection or U.S. Air Force contracts to ensure full interoperability with other government operated HF networks.

Significant Changes

There are no significant changes from the previous budget submission.

U. S. Coast Guard - FY 2010 Congressional Budget Submission

High Frequency (HF) Modernization and Recapitalization **\$2,500**

Cost Estimate Detail & Changes

<u>Funding Requirement Description</u>	<u>FY 2010 Cost Estimate</u>
<u>Construction / Acquisition</u>	
Full Operating Capability (for 12 installs at 3 sites)	2,500
FY 2010 Cost Estimate Project Total:	2,500

Method of Performance

Contract oversight for the procurement of these radios lies with Customs and Border Protection (CBP) or the U.S. Air Force; the Coast Guard procures these radios from CBP through these contracts.

Performance of the new transmitters will be measured by the success rate of HF communications. Two basic measures are used: 1) the ability to make a transmission (is the transmitter working), and 2) feedback from the maritime public on whether or not the transmission was received.

FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Survey and Design - Shore Operational and Support Projects \$6,000

Project Description, Justification and Scope

The Coast Guard's FY 2010 Survey and Design (S&D) budget request includes survey and design funding essential to future year Acquisition, Construction and Improvement (AC&I) shore projects.

Funding will support planning and engineering studies, project design, master plans, appraisals, real property requirements and other architectural/engineering efforts. Completing proper planning and design helps to ensure AC&I projects are properly assessed, planned and prioritized prior to seeking project appropriations. The projects supported by this request contribute to the long-range plans and support of operational units. Specifically, this funding is requested to complete initial S&D for the following facilities/purposes:

- CG Academy Chase Hall Barracks Phase IV (Annex B)
- Consolidate Sector Buffalo
- Replace Training Center Petaluma Water Main
- Station Cape Disappointment Firing Range Upgrade
- Air Station Sitka Recapitalize Housing
- ISC Honolulu Recapitalize UPH
- Station Port Angeles Covered Mooring

Significant Changes

There are no changes to the previous budget submission.

Waterways ATON Infrastructure

\$4,000

Project Description, Justification and Scope

This funding would support improvements to the aids to navigation system in waterways that are integral arteries of numerous ports, including those classified as militarily or economically sensitive (MES) ports, those classified as either Tier I, II, or III ports and those among the top 25 leading ports (in terms of handling gross tonnage) in the United States. Waterways infrastructure projects require an annual base funding level to respond to requirements from expanded U.S. Army Corps of Engineers (ACOE) activity, replacing aging/damaged aids to navigation structures, and improvements in the nation's aids to navigation system. Lack of sufficient aids to navigation infrastructure or failure of existing aids to navigation infrastructure in any of these waterways will negatively impact the roles of the U.S. Coast Guard Strategy; Maritime Safety, Maritime Security, and Maritime Stewardship.

This \$4M request will help fund the backlog of short range aids (SRA) improvement projects that are critical to safe and efficient maritime transportation. The funding will go toward the following projects: Port Canaveral, FL (construction funding for outbound ranges), Houston, TX Ship Channel Ranges (Survey and Design (S&D) funding for two sets of ranges), Mobile Bay, AL (establish entrance ranges), St Mary's River, MI (S&D funding for multiple buoy to ice resistant structure (IRS) project), Anaheim Bay, CA (Day/Night range conversion), and multiple buoy to structure projects in Anaheim Bay, CA, Napa River, CA and Sacramento/San Joaquin Rivers, CA.

Significant Changes

There is no significant change from the previous budget submission.

AC&I Core

\$500

Project Description, Justification and Scope

This funding is necessary to cover costs associated with project overhead activities for major acquisition projects. The primary initiatives include contractor support services, records storage and training. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act and OMB Circular A-76.

Significant Changes

There is no significant change from the previous budget submission.

**U. S. Coast Guard Justification
Acquisition, Construction & Improvements
FY 2010 Congressional Budget Submission
(Dollars in Thousands)**

Direct Personnel Costs **\$99,500**

Project Description, Justification and Scope

This request funds the salaries, compensation and support costs (including annual pay raise and COLA) for personnel who manage, execute and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program. The requested funding level will support a total of 735 FTE (+50 FTE from the FY2009 enacted level). The personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, on budget and in compliance with performance requirements.

Significant Changes

The \$7.2 million increase from FY09 enacted level reflects an increase of 50 FTE for the AC&I personnel account.

Summary Justification and Explanation of Changes

Travel

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 566	\$ 1,301	\$ 1,114	\$ (187)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the Response Boat - Medium Project. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 92	\$ 211	\$ 181	\$ (30)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other rent

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 143	\$ 328	\$ 281	\$ (47)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Communication, utilities, and misc charges

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 133	\$ 305	\$ 262	\$ (44)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and cutters, utility costs, including shore facility utilities, cutter and boat fuel requirements, and postal costs. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Advisory and assistance services

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	13,983	\$	32,148	\$	27,531	\$	(4,618)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other services

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	11,780	\$	27,083	\$	23,192	\$	(3,890)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Research and development

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	21	\$	48	\$	41	\$	(7)

Change results from the continued execution of FY 2009 appropriated project funding. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Supplies and materials

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	6,649	\$	15,287	\$	13,091	\$	(2,196)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Equipment

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
	\$ 12,263	\$	28,194	\$	24,144	\$	(4,050)

This object class covers the purchase of capitalized and non-capitalized assets. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Land and structures

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
	\$ 6,686	\$	15,371	\$	13,163	\$	(2,208)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Summary Justification and Explanation of Changes

Travel

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 7,829	\$ 13,737	\$ 11,371	\$ (2,367)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 1,269	\$ 2,226	\$ 1,843	\$ (384)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other rent

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 1,975	\$ 3,465	\$ 2,868	\$ (597)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Communication, utilities, and misc charges

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 1,838	\$ 3,225	\$ 2,670	\$ (556)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Advisory and assistance services

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	193,521	\$	339,552	\$	281,048	\$	(58,503)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other services

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	163,027	\$	286,046	\$	236,762	\$	(49,285)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Research and development

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	286	\$	503	\$	416	\$	(87)

Change results from the continued execution of FY 2009 appropriated project funding. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Supplies and materials

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	92,023	\$	161,463	\$	133,644	\$	(27,819)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Equipment

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 169,718	\$ 297,787	\$ 246,484	\$ (51,302)

This object class covers the purchase of capitalized and non-capitalized assets. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Land and structures

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 92,527	\$ 162,348	\$ 134,376	\$ (27,972)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Summary Justification and Explanation of Changes

Travel

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 1,260	\$ 1,996	\$ 1,292	\$ (704)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Transportation of things

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 204	\$ 323	\$ 209	\$ (114)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other rent

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 318	\$ 503	\$ 326	\$ (177)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Communication, utilities, and misc charges

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 296	\$ 469	\$ 303	\$ (165)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Advisory and assistance services

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 31,143	\$ 49,332	\$ 31,941	\$ (17,391)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other services

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	26,235	\$	41,558	\$	26,908	\$	(14,650)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Research and development

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	46	\$	73	\$	47	\$	(26)

Change results from the continued execution of FY 2009 appropriated project funding. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Supplies and materials

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	14,809	\$	23,458	\$	15,189	\$	(8,270)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Summary Justification and Explanation of Changes

Travel

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 1,402	\$ 821	\$ 108	\$ (713)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 227	\$ 133	\$ 18	\$ (116)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other rent

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 354	\$ 207	\$ 27	\$ (180)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Communication, utilities, and misc charges

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 329	\$ 193	\$ 25	\$ (167)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Advisory and assistance services

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 34,664	\$ 20,303	\$ 2,673	\$ (17,630)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other services

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
\$	29,201	\$	17,104	\$	2,252	\$	(14,852)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Research and development

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
\$	51	\$	30	\$	4	\$	(26)

Change results from the continued execution of FY 2009 appropriated project funding. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Supplies and materials

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
\$	16,483	\$	9,654	\$	1,271	\$	(8,383)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Equipment

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
\$	30,400	\$	17,806	\$	2,344	\$	(15,462)

This object class covers the purchase of capitalized and non-capitalized assets. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Land and structures

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
\$	16,573	\$	9,707	\$	1,278	\$	(8,429)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Full Time Equivalents		652	685	735	50

Summary Justification and Explanation of Changes

Salaries and Benefits

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 69,863	\$ 78,737	\$ 88,747	\$ 10,010

Currently, all salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation, whereas 97 percent of the Coast Guard's personnel is funded from the OE appropriation. AC&I has a specific annual appropriation to fund "personnel compensation and benefits and related costs." Annual AC&I personnel compensation appropriation, rather than the multi-year project funds, must be used to fund all AC&I related personnel costs.

Travel

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 131	\$ 152	\$ 122	\$ (31)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 21	\$ 25	\$ 20	\$ (5)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves.

Other rent

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 33	\$ 38	\$ 31	\$ (8)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.).

Communication, utilities, and misc charges

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 31	\$ 36	\$ 29	\$ (7)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs.

Advisory and assistance services

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 3,244	\$ 3,767	\$ 3,008	\$ (759)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Other services

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 2,733	\$ 3,173	\$ 2,534	\$ (639)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Research and development

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 5	\$ 6	\$ 4	\$ (1)

Change results from the continued execution of FY 2009 appropriated project funding. Reduced funding in FY 2010 is a result of shifts in project funding and their progress.

Supplies and materials

2008	2009	2010	2009 - 2010
Actual	Enacted	Request	Change
\$ 1,543	\$ 1,791	\$ 1,430	\$ (361)

U. S. Coast Guard
Alteration of Bridges

I. Appropriation Overview

A. Mission Statement for Alteration of Bridges:

The Coast Guard is not requesting new funding for Alteration of Bridges in FY 2010. Alteration of unreasonably obstructive bridges ensures navigational safety and freedom of mobility to facilitate commerce, emergency response and U.S. Government operations by providing sufficient clearances for the type of vessels that transit beneath bridges. Activities funded by this account reduce the risk of fatalities and collisions, prevent longer transit times, protect regional and national economies and facilitate response capabilities for emergency vessels and government vessels of the United States. They also deter increased waterway and highway/railway closures due to accidents.

B. Budget Activities:

Funding in this account supports the Coast Guard's Aids to Navigation mission.

C. Budget Request Summary:

The Coast Guard is not requesting funding for Alteration of Bridges in FY 2010.

Program Performance Justification
(Dollars in Thousands)**

PPA I: ALTERATION OF BRIDGES

	Perm Pos	FTE	Amount
2008 Actual	\$17,326
2009 Enacted	\$16,000
2010 Adjustments-to-Base	(\$16,000)
2010 Current Services
2010 Program Change
2010 Request
Total Change 2009-2010	(\$16,000)

*The table above excludes ARRA funding of \$142.000 million provided in P.L. 111-5. The Coast Guard does not request any funding for this activity in FY 2010.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Alteration of Bridges program funds the Federal government's share of the costs for altering or removing bridges determined to be unreasonable obstructions to navigation. Under the Federal-Aid to Highways Program, unreasonably obstructive highway bridges may be eligible for funding. Under the Truman-Hobbs Act of 1940 (33 U.S.C. 511-523), the Federal government shares, with the bridge owner, the cost of altering railroad and publicly-owned highway bridges obstructing the free movement of vessel traffic.

FY2008 Accomplishments:

- Galveston Bridge across the Gulf Intracoastal Waterway in Galveston, Texas: Completed the final design, environmental documentation, and acquire necessary permits.
- CSXT Railroad Bridge across the Mobile River in Mobile, Alabama: Completed the Value Engineering redesign/modification to improve value or reduce the cost of the project.
- Canadian Pacific Railroad Bridge across the Upper Mississippi River at Lacrosse, Wisconsin: Continued design phase.
- The Coast Guard has deemed 30 bridges as potentially unreasonable obstructions to navigation. These bridges will require a Truman-Hobbs eligibility detailed investigation to definitively determine whether they are unreasonably obstructive.

FY2009 Accomplishments:

- CSXT Railroad Bridge across the Mobile River in Mobile, Alabama: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- EJ&E Railroad Bridge across Illinois Waterways in Divine, Illinois: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- Burlington Northern Santa Fe Railroad Bridge across the Upper Mississippi River in Burlington, Iowa: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- Galveston Railroad Bridge across the Gulf Intracoastal Waterway in Galveston, Texas: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- Canadian Pacific Railroad Bridge across the Upper Mississippi River in Lacrosse, Wisconsin: Completed 80% of the design of the new bridge.

The Coast Guard has deemed 32 bridges as potentially unreasonable obstructions to navigation. These bridges will require a Truman-Hobbs eligibility detailed investigation to definitively determine whether they are unreasonably obstructive.

The Alteration of Bridges, under the American Recovery and Reinvestment Act (ARRA) of 2009 received \$142,000,000 for “construction ready” bridge alteration projects. The proposed projects to receive ARRA fund are described in the ARRA Expenditure Report available at www.dhs.gov/recovery.

IV. Program Justification of Changes

Not Applicable

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U.S. Coast Guard
Justification of Proposed Changes in Alteration of bridges
Appropriation Language**

[For necessary expenses for alteration or removal of obstructive bridges, as authorized by section 6 of the Truman-Hobbs Act (33 U.S.C. 516), \$16,000,000, to remain available until expended: *Provided*, that of the amounts made available under this heading, \$2,000,000 shall be for the Burlington Northern Railroad Bridge in Burlington, Iowa; \$2,000,000 shall be for the Canadian Pacific Railway Bridge in La Crosse, Wisconsin; \$2,000,00 shall be for the Chelsea Street Bridge in Chelsea, Massachusetts; \$2,000,000 shall be for the Elgin, Joliet, and Eastern Railway Company Bridge in Morris, Illinois; \$4,000,000 shall be for the Fourteen Mile Bridge in Mobile, Alabama; and \$4,000,000 shall be for the Galveston Causeway Bridge in Galveston, Texas.] (*Department of Homeland Security Appropriations Act, 2009*).

PPA Mission Statement

The alteration of unreasonably obstructive bridges ensures navigational safety and freedom of mobility to facilitate commerce, emergency response and U.S. Government operations, by providing sufficient clearances for the type of vessels that transit through the bridge. This appropriation reduces the risk of fatalities and allisions, prevents longer transit times, negative impact on regional and national economies, negative impact on response capabilities for emergency vessels and government vessels of the United States, and avoids increased waterway and highway/railway closures due to accidents.

Summary Justification and Explanation of Changes

U. S. Coast Guard
Research, Development, Test and Evaluation

I. Appropriation Overview

A. Mission Statement for Research, Development, Test and Evaluation:

The Coast Guard requests \$19.745 million and 101 FTE in FY 2010, an increase of \$1.745 million over the \$18.000 million enacted in FY 2009. Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through targeted capabilities and partnerships with the Department of Homeland Security (DHS), Department of Defense (DoD) and other organizations. The RDT&E funding requested supports all 11 statutorily-mandated Coast Guard mission programs and offers risk-reduction expertise and services in the pre-acquisition process across all major and non-major acquisition projects. These mission-programs in turn directly support the Coast Guard's role as the principal Federal agency for ensuring maritime safety, security and environmental stewardship.

B. Budget Activities:

RDT&E projects provide a direct benefit to all Coast Guard missions, including: Search and Rescue (SAR), Marine Safety, Aids to Navigation (AtoN), Ice Operations, Marine Environmental Protection (MEP), Living Marine Resources (LMR), Drug Interdiction, Migrant Interdiction, Other Law Enforcement, Ports, Waterways and Coastal Security (PWCS), and Defense Readiness.

C. Budget Request Summary:

The Coast Guard requests \$19.745 million in FY 2010 to develop technologies and systems to improve operational presence and response, as well as perform technology assessments to inform the early stages of the acquisition process. Specific projects include: developing new technologies for the detection and recovery of oil and hazardous materials from the sea floor; developing ballast water treatment methodologies; providing data-sharing and information security technologies to support adaptive force packages; and developing advanced analytical techniques to support the acquisition process. In addition, funding supports program operations and maintenance costs (e.g., salaries, facility rent, utilities) at the Coast Guard Research and Development Center and the R & D Program's continued collaboration and participation with the research community. Healthy partnerships with other government, academic, and private research entities enable the Coast Guard to leverage research and development resources and foster synergies in scientific fields pertinent to the Service's missions.

2010 Program Change
2010 Request	101	101	19,745
Total Change 2009-2010	1,745

The Coast Guard requests \$19.745 million for this activity. This reflects a \$1.745 million increase over FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Coast Guard RDT&E Program supports all Coast Guard missions through the development of technologies and systems which improve operational presence and response, ultimately enhancing mission execution. In addition, the integration of the RDT&E Program into the Coast Guard Acquisitions Directorate infuses in-house expertise into the pre-acquisition process to reduce risk across all major and non-major acquisition projects.

FY 2009 funding for the RDT&E Program is grouped into two categories: Coast Guard Mission Research and Operations & Maintenance (e.g., salaries, facility rent, utilities). The RDT&E Program will examine R&D solutions for performance gaps in spill prevention, preparedness and incident management, aquatic nuisance species control, search and rescue capability, and boarding team communications.

With FY 2010 funding, the Coast Guard RDT&E Program will conduct research and development in the following areas: net-centric data sharing and information security for inter-agency maritime domain awareness information; portable port security deterrence and detection systems for air, surface, and underwater attack scenarios; improved boarding team member and support unit communication and connectivity technologies; and assessing capability, human-factors, and technological challenges associated with operations in extremely cold weather climates. In addition, the Coast Guard RDT&E Program will conduct legacy mission projects in the following areas: Search and Rescue,

Marine Safety, Aids to Navigation, Aquatic Nuisance Species and Oil and Hazardous Material Spill Response.

FY 2008 accomplishments

- Deployed second phase of at-sea biometric identification system using next generation equipment in support of the Migrant Interdiction mission.
- Provided useable guidance to Headquarters program managers concerning methods to improve Mass Rescue Operations (MRO) response.
- Developed new equipment to detect and recover non-buoyant submerged oils that have been spilled into waterways.
- Conducted study to research the use of unmanned aerial systems (UAS) in conjunction with the National Security Cutter (NSC).
- Developed and tested ballast water treatment methodologies that can be used in lieu of ballast water exchange to reduce the number of incidental introductions of aquatic nuisance species into U.S. waters during normal ship operations.

Projects Planned for FY 2009

Marine Safety

- Search and Rescue (SAR) Technology
Develop and improve rescue technologies such as victim treatment protocols, emergency beacon reliability, and multiple person rescue methodologies. Research the efficacy of regulatory versus guidance-based restrictions for vessel operations in extremely hazardous conditions.
- Aids to Navigation (AtoN)
Define Western Rivers' AtoN requirements, evaluate alternative floating-aid concepts, and explore the use of virtual AtoN. This research will identify the impact of evolving AtoN requirements and advancing technology on the potential inland-river replacement fleet.

Protection of Natural Resources

- Oil Spill Response
Continue research to identify and develop technologies to detect heavy oil on the sea floor and develop systems and operational processes to address performance gaps in heavy, viscous oil recovery. This includes both emulsified oils floating on the surface and oils heavier than water that sink to the bottom. New initiatives will address the challenges posed by the underwater environment including: poor visibility, tracking oil spill movement, colder temperatures, and limited containment methods and technologies. Several prototype detection systems will be tested and evaluated.

- Aquatic Nuisance Species Control
Develop a means to ascertain the efficacy of Ballast Water Exchange regulations. Develop and test ballast water treatment methodologies to be used in lieu of ballast water exchange to reduce the number of incidental introductions of aquatic nuisance species into U.S. waters during normal ship operations.

Homeland Security

- Command Centers
Develop and assess operational concepts to support the sector command center, taking into account how variability and command center needs will affect future systems.
- Improved Maritime Domain Awareness (MDA)
Provide technologies (e.g. biometrics, wireless boarding team connectivity) to support adaptive force packages. Investigate net-centric data sharing and security for MDA information across agency boundaries to support publish-and-subscribe data sharing in a future need-to-share environment.
- Port Security and Law Enforcement
Develop tools to support boarding teams, compel compliance of people and vessels and understand how new explosive detection technologies can be employed in the maritime environment.

Pre-Acquisition Support

- Technology Assessment
Apply the RDT&E Program's resident expertise to the pre-acquisition phase of Coast Guard acquisition projects to determine technology maturity and application. Pre-acquisition functions include: market surveys, gap analysis, business case development, user wants & needs generation, requirements validation, cost analysis, modeling & simulation, prototyping & field testing, trade-off studies, human factors analysis, alternatives analyses, proposal review, and technology readiness assessments. This pre-acquisition activity assists in the identification of acquisition risk and the development of a methodology for managing it. Use the Mosaic system, a requirements generation tool developed by the Research and Development Center, to support Coast Guard resource allocation analysis.
- Modeling & Simulation (M&S)
Adapt the RDT&E Program's resident M&S expertise to the many on-going acquisition projects and develop, adapt, and/or maintain effective, agile M&S tools to support the decision-making processes of operational sponsors and acquisition project managers. M&S reduces the cost of design, development, testing and evaluation throughout the acquisition cycle by harnessing software to perform labor-intensive tasks, freeing resources which would otherwise be

required. M&S aids the sponsor in the development of the proper asset mix and improves and validates user requirements.

- Heartland Waterway Vessel (HWV)
Continue joint research venture between DHS S&T, industry, and the Coast Guard to investigate the viability and applicability of emerging technologies, such as, alternative propulsion, emission reduction and other “green” technologies, and modular design that could be incorporated into future designs for modernization of the inland-river and Great Lakes cutter fleets.
- Polar Research
Investigate the Polar environment and the capability, human factors, and technological challenges associated with operations in extremely cold weather climates. Analyze the peculiarities of performing Coast Guard missions in such climates and develop new technologies and/or modify existing technologies to address the disparities between normal and extremely cold climate operations. Research findings will support the generation of Coast Guard capability requirements and inform the acquisition and management of resources to sustain operations in the Arctic. To the extent possible, the R&D Program will collaborate with DHS S&T Universities Program and the Center of Excellence for Maritime, Island, and Extreme/Remote Environment Security.

Projects Planned for FY 2010

Marine Safety

- Search and Rescue (SAR) Technology
Continue development of rescue technologies and research application and effectiveness of existing and future Coast Guard sensors to SAR in operational situations and conditions. Develop a sensor performance prediction tool to help determine the effectiveness of a search for an object or person.
- Aids to Navigation (AtoN)
Continue to research alternative floating-aid concepts and explore the use of virtual AtoN to meet Western Rivers’ requirements. Evaluate the impact of advancing technology on evolving AtoN requirements and on the potential inland-river replacement fleet.

Protection of Natural Resources

- Oil Spill Response
Continue research to develop systems and operational processes to address performance gaps in heavy, viscous oil detection and recovery. Regardless of whether the oil is on the surface, neutrally buoyant in the water column or sitting on the bottom, the ability to recover heavy, viscous oil prior to its impact on the coastline remains an elusive capability. The underwater environment poses major

problems including poor visibility, difficulty tracking oil spill movement, colder temperatures, limited containment methods and technologies and the electric or mechanical recovery equipment compatibility with water.

- Aquatic Nuisance Species Control
Continue to develop a means to ascertain the efficacy of Ballast Water Exchange regulations. Further develop and test ballast water treatment methodologies to be used in lieu of ballast water exchange to reduce the number of incidental introductions of aquatic nuisance species into U.S. waters during normal ship operations.

Homeland Security

- Improved Maritime Domain Awareness (MDA)
Provide technologies (e.g. biometrics, wireless boarding team connectivity) to support adaptive force packages. Investigate net-centric data sharing and security for MDA information across agency boundaries to support publish-and-subscribe data sharing in a future need-to-share environment.
- Command Centers
Develop and assess operational concepts to support command center interoperability initiatives, especially in the areas of decision support and information dissemination.
- Port Security and Law Enforcement
Develop tools to support boarding teams, compel compliance of people and vessels and understand how new explosive detection technologies can be employed in the maritime environment.

Pre-Acquisition Support

- Technology Assessment
Continue to apply the RDT&E Program's resident expertise to the pre-acquisition phase of Coast Guard acquisition projects to determine technology maturity and application. Identify and develop methodology for managing acquisition risk. Employ the Mosaic system, a requirements generation tool developed by the Research and Development Center, to support Coast Guard resource allocation analysis.
- Modeling & Simulation (M&S)
Adapt the RDT&E Program's resident M&S expertise to the many on-going acquisition projects and develop, adapt, and/or maintain effective, agile M&S tools to support the decision-making processes of operational sponsors and acquisition project managers. M&S reduces the cost of design, development, testing and evaluation throughout the acquisition cycle by harnessing software to perform labor-intensive tasks, freeing resources which would otherwise be

required. M&S aids in the development of the proper asset mix and improves and validates user requirements.

- Heartland Waterway Vessel (HWV)
Continue joint research venture between S&T, the Coast Guard, and industry to investigate viability and applicability of emerging technologies, such as alternative propulsion, emission reduction and other “green” technologies, and modular design that could be incorporated into future designs for modernization of the inland-river and Great Lakes cutter fleets.

- Polar Research
Support the development of Concept of Operations (CONOP) for cold weather climates. Research findings will support the generation of Coast Guard capability requirements and inform the acquisition and management of resources to sustain operations in the Arctic.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Research, Development, Test and Evaluation
Appropriation Language**

For necessary expenses for applied scientific research, development, test, and evaluation; and for maintenance, rehabilitation, lease, and operation of facilities and equipment; as authorized by law; [\$18,000,000] **\$19,745,000** to remain available until expended, of which \$500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Spill Pollution Act of 1990 (33 U.S.C. 2712(a)(5)): *Provided*, that there may be credited to and used for the purposes of this appropriation funds received from State and local governments, other public authorities, private sources, and foreign countries, for expenses incurred for research, development, test and evaluation. (*Department of Homeland Security Appropriations Act, 2009.*)

Explanation of Changes:

No substantive changes proposed.

PPA Mission Statement

Research, Development, Test and Evaluation (RDT&E) will allow the Coast Guard to maintain its non-homeland security research and development capability, while also partnering and leveraging initiatives identified by the Department of Homeland Security (DHS) and the Department of Defense (DOD) for efforts beneficial to the Coast Guard, DHS, and DOD for homeland security missions.

Summary Justification and Explanation of Changes

Salaries and Benefits

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
	\$ 10,278	\$	11,526	\$	11,955	\$	429

FY 2010 request includes funding for the proposed pay raise (2.9% for military and 2.0% for civilians), medical benefits, other mandatory personnel entitlements.

Travel

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
	\$ 1,812	\$	2,335	\$	1,196	\$	(1,139)

This line item includes costs associated with project-related travel. Decreased funding in FY 2010 is a result of shifts in project funding and their progress and alignment with departmental efficiency initiatives.

Lease of Vehicles

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
	\$ 7	\$	17	\$	6	\$	(11)

Lease of Vehicles includes all costs related to the vehicle such as fuel. Decreased funding in FY 2010 is a result of shifts in project funding and their progress.

Transportation of things

	2008 Actual		2009 Enacted		2010 Request		2009 - 2010 Change
	\$ 71	\$	170	\$	63	\$	(107)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of RDT&E projects. Decreased in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

GSA rent

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	-	\$	915	\$	1,116	\$	201

Increased funding in FY 2010 is a result of the Research and Development Center's move from Groton, CT to a GSA lease in New London, CT.

Other rent

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	483	\$	238	\$	-	\$	(238)

Decreased funding in FY 2010 is a result of the Research and Development Center's move from Groton, CT to a GSA lease in New London, CT scheduled for March 2009 and funding requirements associated with the Fire Safety Detachment in Mobile, AL.

Communication, utilities, and misc charges

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	59	\$	306	\$	252	\$	(54)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Decreased funding in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

Advisory and Assistance

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	1,825	\$	4,367	\$	1,410	\$	(2,957)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Decreased funding in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

Research and development

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	3,009	\$	9,032	\$	2,149	\$	(6,883)

Change results from the continued execution of FY 2008 appropriated project funding. Decreased funding in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

Operation and maintenance of equipment

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	13	\$	31	\$	11	\$	(20)

Decreased funding in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

Supplies and materials

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	1,141	\$	2,730	\$	1,025	\$	(1,705)

Decreased funding in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

Equipment

	2008		2009		2010		2009 - 2010
	Actual		Enacted		Request		Change
\$	400	\$	957	\$	562	\$	(395)

This object class covers the purchase of R&D materials for technology demonstrations, testing and evaluations and their progress.

U. S. Coast Guard
Medicare-Eligible Retiree Healthcare Fund Contribution

I. Appropriation Overview

A. Mission Statement for the Healthcare Fund Contribution:

The Coast Guard requests \$266.006 million in FY 2010 an increase of \$8.701 million over the \$257.305 million requested in the FY 2009 enacted. The Medicare-Eligible Retiree Healthcare Fund Contribution (HFC) will provide funding to maintain the cost of accruing the military Medicare-eligible health benefit contributions to the Department of Defense Medicare-Eligible Retiree Healthcare Fund. Contributions are for future Medicare-eligible retirees currently serving on active duty in the Coast Guard, as well as retiree dependents and their potential survivors. The authority for the Coast Guard to make this payment on an annual basis was provided in P. L. 108-375, the 2005 Defense Appropriations Act. While this expenditure requires no annual action by Congress, it is counted as discretionary spending.

B. Budget Activities:

Although there are no budget activities directly related to providing this benefit to Active Duty personnel and their dependents, it ensures the personal well-being of every uniformed member of the Coast Guard.

C. Budget Request Summary:

The Coast Guard estimate of \$266.006 million will be paid to the DoD Medicare-Eligible Retiree Healthcare Fund in FY 2010 to support the benefits outlined above. The total adjustment to the base is \$8.701 million.

U. S. Coast Guard
Retired Pay

I. Appropriation Overview

A. Mission Statement for Retired Pay:

The Coast Guard requests \$1.361 billion in FY 2010, an increase of \$124.500 million over the \$1.237 billion FY 2009 enacted. Retired Pay (RP) will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and other retired personnel entitlements identified under National Defense Authorization Acts. This includes payments for medical care of retired personnel and their dependents.

B. Budget Activities:

Although there are no budget activities directly related to providing this benefit to active duty personnel and their dependents, it sustains commitments to Coast Guard retirees and their dependents.

C. Budget Request Summary:

The Coast Guard requests \$1.361 billion in FY 2010 to support the benefits outlined above. The Coast Guard also requests that any FY 2010 funding remain available until expended. This is consistent with the enacted Consolidated Appropriations Act of 2009 (P.L. 110-329). The Retired Pay appropriation is scored as a mandatory appropriation in the budget process.

Total Change 2009-2010	124,500

The Coast Guard requests \$1.361 billion for this activity. This is an increase of \$124.500 million over the FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

Retired Pay (RP) will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans and other retired personnel entitlements identified under the National Defense Authorization Act. It also provides payments for medical care of retired personnel and their dependents.

PPA Mission Statement

Retired Pay (RP) will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payments for career status bonuses, concurrent receipts and combat related special compensation identified under the National Defense Authorization Act.

Summary Justification and Explanation of Changes

Salaries and Benefits

2008	2009	2010	2009-2010
Actual	Enacted	Request	Change
\$ 976,000	\$ 1,045,047	\$ 1,142,847	\$ 97,800

Requested increase accounts for cost-of-living adjustments for all retirement and most survivor annuities as well as entitlement benefits authorized by the National Defense Authorization Act.

Medical care

2008	2009	2010	2009-2010
Actual	Enacted	Request	Change
\$ 188,480	\$ 222,347	\$ 218,398	\$ (3,949)

Decrease accounts for slightly lower projections for medical benefits. Once a member becomes eligible for Medicare, the Medicare-Eligible Retiree Health Care Fund (HFC) is responsible for these benefits.

U. S. Coast Guard
Boating Safety

I. Appropriation Overview.

A. Mission Statement for Boating Safety:

The Coast Guard anticipates a program level of \$130.589 million and 8 FTE in FY 2010, which is a decrease of \$2.963 million under the FY 2009 Enacted Budget of \$133.552 million. The Boating Safety (BS) program is designed, through preventive means, to minimize the loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's continuing and enduring role to ensure maritime safety while promoting safe and enjoyable use of public U.S. waterways.

In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e. FY10 funding will be a percentage of FY09 trust fund receipts), as well as a portion of the funds drawn out of the Boat Safety Account of the trust fund.

B. Budget Activities:

Boat Safety supports our Marine Safety mission and the Coast Guard's enduring maritime safety role.

C. Budget Request Summary:

The FY 2010 budget provides the anticipated amount that would be available from the trust fund for boating safety based on current estimates of FY 2009 trust fund receipts from the Office of Tax Analysis at the Department of the Treasury (adjusted to reflect amendments of current law enacted in P.L. 109-59). The estimated total distribution from the trust fund for boating safety in FY 2010 is \$130.589 million. Of that amount, \$5.500 million is available for use by the Coast Guard to coordinate and execute new and enhanced National RBS Program activities. The balance is authorized for the State RBS Federal Financial Assistance Program established by 46 U.S.C. 13101, et seq., minus not more than five percent for national boating safety activities of national non-profit public service organizations, and not more than two percent for Coast Guard expense to administer State RBS programs. This represents a \$2.963 million decrease from the FY 2009 enacted.

Budget authority for personnel to conduct investigations and activities related to State recreational boating safety programs is not provided by regular, annual Coast Guard

appropriations. It is available or transferred to the Coast Guard from trust accounts in the Department of Treasury. While these amounts are available until expended, they are limited in purpose and amount.

Total Change 2009-2010	-2,963

The Coast Guard requests \$130.589 million for this activity. This is a decrease of \$2.963 million from the FY 2009 enacted.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Boating Safety program is designed, through preventive means, to minimize the loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats in order to maximize safe use and enjoyment of public U.S. waterways. The program directly supports the Coast Guard's continuing and enduring role to ensure maritime safety. In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Amendments Act of 2005 (Subtitle A, Title X, P.L. 109-74), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e. FY09 funding will be a percentage of FY08 trust fund receipts), and a portion of the funds drawn out of the Boat Safety Account of the Trust Fund.

Significant accomplishments in FY 2008 include:

- Achieved the target performance goal of 4,112 casualties or fewer through the following measures:

- Conducted observation studies that measure life jacket utilization and initiatives to measure the effectiveness of awareness campaigns in increasing life jacket wear rates in specific targeted areas of the country.
- Conducted national outreach efforts in conjunction with states and the National Safe Boating Council to promote life jacket wear.
- Completed special test of the effectiveness of marketing strategies to increase voluntary life jacket usage in the Delta Region of California, in conjunction with the National Safe Boating Council, Boat U.S., the State of California, our marketing contractor (PCI) and John Snowe, Inc. (a grantee who is measuring the life jacket wear rates). If these strategies are not significantly successful, report this to the National Boating Safety Advisory Council (NBSAC) and consider initiating mandatory requirements for life jacket usage in high risk scenarios (i.e., operating boats less than 21 feet in length).
- Increased boating safety law enforcement, education and search and rescue efforts by the States through availability of additional recreational boating safety grant funds.
- Conducted approximately 2,000 recreational boat manufacturer factory visits to check compliance with manufacturing standards, thereby enhancing compliance and safety.
- Tested approximately 50 new recreational boats for compliance with flotation and capacity regulations, thereby enhancing compliance and safety.
- Revised and updated boat accident reporting requirements and related forms.
- Progressed in adopting regulations that: (1) require installation and wear of emergency cut-off devices (mechanical or wireless) on vessels under a certain length; (2) require operators to turn off the vessel when a swimmer in the water is in close proximity to the stern of the vessel; (3) revise and update requirements for state numbering systems and boat accident reporting.

FY 2009 planned accomplishments include:

- Achieve the target performance goal of 4,132 casualties or fewer through the following measures:
- Conduct national observation studies that measure life jacket wear.
- Measure the effectiveness of a U.S. Army Corps of Engineers project to mandate life jacket wear by all boaters aboard certain sized boats on USACE waters in southwest Pennsylvania and northern Mississippi. If this project results in a substantial increase in life jacket wear, and if the 2008 voluntary wear project in California is unsuccessful, work with National Boating Safety Advisory Council to consider initiating mandatory requirements for life jacket usage in high risk areas (i.e., operating boats less than 21 feet in length).
- Conduct national survey on recreational boating. Among other vital information, the survey will provide a participation rate denominator to utilize when measuring the performance goals of the National Recreational Boating Safety Program. That denominator will be exposure casualty hours, whereby the number of casualties will be compared in a ratio basis to the number of hours that people participate in boating activity and are exposed to risk.

- Increase boating safety law enforcement, education and search and rescue efforts by the States through availability of additional recreational boating safety grant funds. Particularly, work to have the Sport Fish Restoration and Boating Trust Fund reauthorized and to enhance parity to the funding provided to the National Recreational Boating Safety Program.
- Focus on assuring manufacturer compliance with boat construction standards (i.e., identifying boats and manufacturers whose boats are involved in accidents where carbon monoxide, flotation, capacity, or fuel systems are causal factors).
- Progress in promulgating regulations that: (1) require life jacket wear in high-risk recreational boating activities if voluntary measures fail to achieve an acceptable wear rate; (2) require installation and wear of emergency cut-off devices (mechanical or wireless) on vessels under a certain length; (3) require operators to turn off the vessel when a swimmer in the water is in close proximity to the stern of the vessel; (4) revise and update requirements for state numbering systems and boat accident reporting.
- Begin a Boating Under the Influence (BUI) initiative to reduce the number of casualties where the use of alcohol by a boat's occupants was a causal factor in an accident.
- Begin an operator compliance initiative to reduce deaths due to navigation rules violations (i.e., Reckless/Negligent Operation, Excessive Speed, Improper Lookout, Operator Inattention, and Rules of the Road).
- Development and implementation of State program approval systems (i.e., adequate enforcement/sufficient patrol, adequate education, numbering system, casualty reporting system).
- If marketing measures prove effective, continuation of additional elements of the national outreach and awareness initiative, "Boat Responsibly!".

FY 2010 funds requested will support:

- The target performance goal of 4,145 casualties or fewer through the following measures:
- Conduct national observation studies that measure life jacket wear.
- Continue to measure effectiveness of a U.S. Army Corps of Engineers project to mandate life jacket wear by all boaters aboard certain sized boats on USACE waters in SW Pennsylvania and northern Mississippi. If this project results in a substantial increase in life jacket wear, and if the 2009 voluntary wear project in California is unsuccessful, work with National Boating Safety Advisory Council to consider initiating mandatory requirements for life jacket usage in high risk areas (i.e., operating boats less than 21 feet in length).
- Continue the Boating Under the Influence (BUI) initiative to reduce the number of casualties where the use of alcohol by a boat's occupants was a cause of the accident.
- Conduct an operator compliance outreach initiative to reduce deaths due to navigation rules violations (i.e., Reckless/Negligent Operation, Excessive Speed, Improper Lookout, Operator Inattention, and Rules of the Road).

- Implement and monitor State program approval systems (i.e., adequate enforcement/sufficient patrol, adequate education, numbering system, casualty reporting system).
- Focus on assuring manufacturer compliance with boat construction standards (i.e., identifying boats and manufacturers whose boats are involved in accidents where carbon monoxide, flotation, capacity, or fuel systems are causal factors).
- Progress in promulgating regulations that: (1) require life jacket wear in high-risk recreational boating activities if voluntary measures fail to achieve an acceptable wear rate; (2) if enacted by proposed authorizing legislation, mandate recreational vessel operator education requirements; (3) require installation and wear of emergency cut-off devices (mechanical or wireless) on vessels under a certain length; (4) require operators to turn off the vessel when a swimmer in the water is in close proximity to the stern of the vessel; (5) revise and update requirements for state numbering systems and boat accident reporting.
- If marketing measures prove effective, continuation of additional elements of the national outreach and awareness initiative, “Boat Responsibly!”.

PPA Mission Statement

The Boating Safety program is designed, through preventive means, to minimize the loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats in order to maximize safe use and enjoyment of public U.S. waterways. The program directly supports the Coast Guard's continuing and enduring role to ensure maritime safety. In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e. FY10 funding will be a percentage of FY09 trust fund receipts), and a portion of the funds drawn out of the Boat Safety Account of the trust fund.

Summary Justification and Explanation of Changes

Salaries and Benefits

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 889	\$ 986	\$ 1,027	\$ 41

The FY 2010 request includes funding for the proposed pay raise (2.0% for civilians), medical benefits, other mandatory personnel entitlements.

Travel

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 220	\$ 217	\$ 135	\$ (82)

Transportation funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Decreased funding in FY 2010 is a result of less Coast Guard personnel traveling for the Recreational Boating Safety Program (RBS) activities.

Transportation of things

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 2	\$ 3	\$ 2	\$ (1)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Decreased funding in FY 2010 is a result of shifts in project funding for technology demonstrations, testing and evaluations and their progress.

Advisory and assistance services

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 874	\$ 541	\$ 520	\$ (21)

Decreased funding in FY 2010 request for advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

Other Services

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 8,876	\$ 14,137	\$ 9,580	\$ (4,557)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Decreased funding in FY 2010 will result in reduced RBS Program activities.

Supplies and materials

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 504	\$ 250	\$ 155	\$ (95)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Decreased funding in FY 2010 is a result of reduced supplies and materials for the National Recreational Boating Safety (RBS) Program activities.

Grants, Subsidies and Contributions

2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
\$ 98,534	\$ 163,507	\$ 119,170	\$ (44,337)

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e. FY10 funding will be a percentage of FY09 trust fund receipts), and a portion of the funds drawn out of the Boat Safety Account of the trust fund.

U. S. Coast Guard
Oil Spill Liability Trust Fund

I. Trust Fund Account Overview

A. Mission Statement for Oil Spill Liability Trust Fund:

The Coast Guard projects \$91.000 million for federal response costs, compensation to claimants suffering damages related to oil spills, and annual funding for the Oil Spill Recovery Institute in FY 2010. This is a decrease of \$58.095 million from the FY 2009 enacted level of \$149.095 million.

The Oil Spill Liability Trust Fund provides a source of funds for federal response to oil spills under section 311 of the Clean Water Act. In accordance with sections 1012(a)(1) and 6002 of the Oil Pollution Act of 1990 (OPA 90), the President may make available up to \$50.000 million annually from the Trust Fund for Clean Water Act response to oil spills or threats.

OPA 90 provides in section 1012(a)(4) that the Trust Fund is available to compensate claims for removal costs and damages resulting from oil spills, or substantial threats of a spill, into navigable waters of the U.S, the adjoining shorelines and the waters of the exclusive economic zone. Government entities, the private sector or the general public may submit claims for: uncompensated removal costs; damage to real or personal property; loss of profits and earning capacity; loss of government revenues; and increased cost of public services resulting from an oil spill.

Federal, state, and Indian tribe trustees may also present claims for natural resource damages. Claimants may include otherwise liable OPA 90 responsible parties if they can establish an OPA 90 defense to liability, i.e. that the spill or costs and damages were caused solely by an “act of God,” “act of war” or “sole fault of a third party.” OPA 90 also provides that responsible parties (RPs) are liable up to express limits, with unlimited liability in some exceptional circumstances. RPs may also submit limit-of-liability claims, in which the RP demonstrates that the OPA 90 liability limit applies and the RP seeks reimbursement for costs and damages paid or incurred in excess of the applicable limit .

Pursuant to OPA 90 section 5006 interest on certain amounts in the Trust Fund derived from legacy transfers from the defunct Trans-Alaska Pipeline Liability Fund are paid annually to the Prince William Sound Oil Spill Recovery Institute by the Coast Guard National Pollution Funds Center.

B. Budget Activities:

The trust fund directly supports our Marine Environmental Protection mission.

C. Budget Request Summary:

The Coast Guard estimates that expenditures from the Oil Spill Liability Trust Fund will total \$91.000 million in FY 2010, a decrease of \$58.095 million under the FY 2009 enacted level. These estimated expenditures consist of a \$50.000 million expenditure transfer for Federal oil spill response, an estimated \$1.100 million payment to the Oil Spill Recovery Institute, and \$39.900 million for payment of oil spill removal costs and damages claims, including natural resource damages claims.

Program Performance Justification
(Dollars in Thousands)**

PPA I: OIL SPILL LIABILITY TRUST FUND

	Perm Pos	FTE	Amount
2008 Actual	91,069
2009 Enacted	149,095
2010 Adjustments-to-Base			(58,095)
2010 Current Services	91,000
2010 Program Change
2010 Request	91,000
Total Change 2009-2010	(58,095)

The Coast Guard requests \$91.000 million for this activity. This is a decrease of \$58.095 million from the FY 2009 enacted level.

CURRENT SERVICES PROGRAM DESCRIPTION:

- Title I of the Oil Pollution Act of 1990 (OPA), as amended, provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.
- OPA section 5006(b) directs the NPFC to make annual payments to the Prince William Sound Oil Spill Recovery Institute of the interest on a portion of the OSLTF balance.

Accomplishments for FY 2008 include:

- Provided funding for federal response to 500 oil spills at a cost of \$64.548 million.
- Paid an estimated \$1.095 million to the Oil Spill Recovery Institute.
- Paid \$25.426 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

Planned accomplishments for FY 2009 include:

- Provide funding for federal response to 500 oil spills at a cost of \$50.000 million.
- Pay an estimated \$1.100 million to the Oil Spill Recovery Institute.

- Pay \$97.995 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

Planned accomplishments for FY 2010 include:

- Provide funding for federal response to 500 oil spills at a cost of \$50.000 million.
- Pay an estimated \$1.100 million to the Oil Spill Recovery Institute.
- Pay \$39.900 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

PPA Mission Statement

The Oil Spill Recovery fund will provide a source of funds for removal costs and damages resulting from oil spills, or the substantial threat of a spill, into navigable waters of the U.S. In accordance with the provisions of the Oil Pollution Act of 1990, the President may make available up to \$50 million annually from the Fund for oil spill removal activities. The Fund also pays all valid claims for removal costs and damages resulting from oil spills.

U. S. Coast Guard
Miscellaneous Funds

I. General Gift Fund Overview

A. Mission Statement for General Gift Fund

The Coast Guard General Gift Fund is authorized under Section 2601 of Title 10 USC provisions for such funds within the Department of Defense and the Coast Guard. The General Gift Fund is a vehicle that authorizes the Commandant of the Coast Guard to accept gifts and donations for the benefit of activities such as museums, chapels, and other organizations under the jurisdiction of the Coast Guard. A recent change also authorizes the Coast Guard to accept gifts to be used for the benefit of service members who are wounded, injured or taken ill while in the line of duty, as well as for those members' dependents and survivors. The Coast Guard estimates \$80.000 thousand in bequests in FY 2010.

B. Budget Activities:

The General Gift Fund enables the Coast Guard to accept gifts and donations which are deposited into the General Treasury. These gifts and donations are devised and bequests to support the Coast Guard, its institutions, and its qualifying service members and dependents.

C. Budget Bequest Summary:

The Coast Guard estimates \$80.000 thousand in bequests from various sources to the General Gift Fund in FY 2010.

II. Yard Fund Overview

A. Mission Statement for Yard Fund

The Yard Fund is a revolving account supported by the Coast Guard's Operating Expenses (OE) and Acquisition, Construction & Improvements (AC&I) appropriations to pay for FTE and materials required for Coast Guard projects and work orders completed by the Coast Guard Yard, located in Curtis Bay, Maryland.

B. Budget Activities:

Through their completion of mission-essential logistics and engineering support (e.g., cutter drydocking), Coast Guard Yard personnel contribute to all Coast Guard missions: Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

II. Supply Fund Overview

A. Mission Statement for Supply Fund

The Supply Fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from the sale of goods.

B. Budget Activities:

The Supply Fund enables the Coast Guard to fund the cost of uniforms, commissary provisions, stores, material, and fuel.

C. Budget Request Summary:

Not applicable.

III. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

A. MISSION AND DESCRIPTION

The U. S. Coast Guard is the principal Federal agency responsible for maritime **safety, security and stewardship**. As such, we help protect vital U.S. economic and security interests throughout the maritime environment including the personal safety and security of the maritime public, our natural and economic resources, and the integrity of our maritime borders. We are trained to address all threats and all hazards, in a manner consistent with the law and in alignment with the Department of Homeland Security's (DHS) goals and objectives, throughout the maritime domain including in U.S. ports and inland waterways, along the coasts, on the high seas and in other regions where our maritime equities are at stake.

The Coast Guard delivers value to the public through its roles and missions that provide maritime **safety, security and stewardship**. These roles and missions are *enduring* – long-standing responsibilities accrued over two centuries of service.

<u>Major Commands:</u>	
Atlantic Command – Portsmouth, VA	
Pacific Command – Alameda, CA	
1 st District – Boston, MA	
5 th District – Portsmouth, VA	
7 th District – Miami, FL	
8 th District – New Orleans, LA	
9 th District – Cleveland, OH	
11 th District – Alameda, CA	
13 th District – Seattle, WA	
14 th District – Honolulu, HI	
17 th District – Juneau, AK	
Coast Guard Headquarters – Washington, D.C.	
<u>Employees:</u>	
Military	41,775
Civilian	6,775
Selected Reserves	8,100
Auxiliary	28,986
<u>Major Assets:</u>	
Major Cutters	42
Patrol Boats	112
Icebreakers	13
Buoy Tenders	76
Helicopters	144
Fixed Wing Aircraft	59
Boats	1,700

Since the terrorist attacks of September 11th and Hurricane Katrina our missions have taken on new dimensions and significance:

- Our enduring efforts and expertise in marine safety reinforce new initiatives and standards for vessel and facility security.
- Our waterways management capacity and expertise are essential to maritime preparedness and port resilience, poised to rapidly restore commerce and economic stability after an attack or disaster.
- Our efforts with Ports, Waterways and Coastal Security systemically couple with supporting Coast Guard missions and operations to enhance Maritime Domain Awareness (MDA) and reinforce our layered defense against terrorism and other threats and hazards.
- Our missions to protect the marine environment and resources are complemented by our safety and security missions; ensuring access to our waters and resources is balanced and sustainable.
- Our enforcement of laws and treaties protects the nation's maritime borders from drugs, contraband, weapons, illegal immigration and terrorist mobility and exploitation.
- In moments of national crisis the Coast Guard serves as the lead Maritime Operational Threat Response (MOTR) Forces component for DHS and readily and seamlessly operates with other military forces, as well as Federal, state and local partners and stakeholders.

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

- In moments of international crisis, the Coast Guard can flow unique and complementary war-fighting and capacity-building capabilities to the Department of Defense and the Department of State.
- As a member of the Intelligence Community (IC), and in support of the National Strategy for Maritime Security, the Coast Guard collects, fuses and shares critical intelligence, data and information through the Global Maritime Intelligence Integration (GMII) and Global Maritime Situational Awareness (GMSA) programs.
- Most importantly, our multi-mission flexibility ensures all Coast Guard forces can respond to incidents of national significance, scaling quickly up to a Katrina and/or a 9/11-level response when our nation is in peril.

There are eleven specific statutorily-mandated Coast Guard mission-programs outlining the Coast Guard’s primary roles of safety, security and stewardship.¹ While each of the Coast Guard’s mission-programs has a direct linkage to one of these three roles, many also overlap to support others. Table 1 below shows the primary alignment of Coast Guard mission-programs with these roles.

B. MAJOR ACTIVITIES AND KEY STRATEGIC ISSUES

Major Activities and Performance

Table 1

Protecting America’s Maritime Interests

¹ The term “mission-program” is used by the Coast Guard to identify one of its 11 statutorily mandated missions that guide Coast Guard budget presentations as well as strategic planning, programming and performance.

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

Aids to Navigation (AtoN): In FY 2008, our AtoN mission-program achieved the 98.3% Federal Short-Range Aids to Navigation Signal Availability rate for reliable visual aids to navigation systems. Our Inland River Buoy and Construction Tenders and our AtoN teams played a critical role opening waterways to commerce after major flooding events throughout Mississippi River System. The events disturbed over 2,200 miles of Federal waterways, displaced more than 3,500 buoys, and destroyed over 330 fixed AtoN structures. We also played a critical part in rapidly restoring the Houston Ship Channel and other Gulf ports to full operation after Hurricanes Ike and Gustav closed the ports and caused more than 1,200 AtoN discrepancies.

In FY 2009, we continue to decrease our backlog for waterways short-range aids (SRA) improvements and focus on projects that are critical to safe and efficient maritime transportation. Funding for this program improves transportation safety on U.S. waterways through new construction, improvements or refurbishment of existing infrastructure. Waterway infrastructure projects respond to requirements from expanded U.S. Army Corps of Engineers (ACOE) activity or replace critical aging/damaged AtoN structures. Our program is improving the Nation's AtoN system and safeguarding maritime commerce.

Defense Readiness: In FY 2008, our defense readiness mission-program is well below 100% readiness – declining readiness and training levels in our aging legacy fleet limited asset availability to Combatant Commanders. Although the Coast Guard's readiness level increased slightly, we expect this trend will not improve dramatically until we begin fielding Deepwater assets. In FY 2009 and FY 2010, Coast Guard assets and personnel will continue to deploy and provide support to DoD commands. The Coast Guard provides Combatant Commanders with resources and platform capabilities that can join forces with regional partners and provide maritime law enforcement and other expertise and capability throughout multiple areas of responsibility. The Coast Guard serves as a force provider to Combatant Commanders in support of overseas contingency operations, OPERATION IRAQI FREEDOM, OPERATION ENDURING FREEDOM, and other planned military operations.

Drug Interdiction: In FY 2008, our drug interdiction mission-program exceeded its performance target, seizing a record 367,926 pounds of cocaine despite a significant shift in conveyance methods, namely the introduction of Self-Propelled Semi-Submersibles (SPSS). We continue to leverage international, inter-department and inter-agency cooperation and coordination, such as the deployment of Coast Guard Law Enforcement and Airborne Use of Force detachments aboard U.S. Navy and allied warships, to maximize enforcement effectiveness. In FY 2009, the Coast Guard transitioned to a new measure, the Consolidated Counter-Drug Database, to assess cocaine flow rate, allowing for a more timely evaluation of Coast Guard illegal drug interdiction performance. In FY 2010, our enforcement efforts will continue to improve when the full capacity and capability of the Atlantic Area Deployment Center's ten MH-65C helicopters are reached through the addition of required training and standardization resources.

Domestic Ice Operations: In FY 2008, our ice operations mission-program successfully met its performance target by providing ice breaking services that resulted in no critical waterways closure days on the Great Lakes and the average total economic value of cargo transported on the Great Lakes during that period was \$2.5 billion. The Coast Guard has long maintained an icebreaking capability in

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

the Great Lakes and in northeastern ports and waterways in support of national interests. America's waterways support commerce that in some regions face the challenge of shortened seasons due to ice coverage. Currently, the Coast Guard's domestic icebreaking program supports 11 distinct trade routes and breaks ice jams, providing flood control as an ancillary public benefit. Thus far in FY 2009, commercial traffic was down 30% for December 2008 as compared to last year. However, demand for Coast Guard icebreaking services remains high because fewer transits in waterways, such as the St. Mary's River, fosters track refreezing between transits. The trend in icebreaking hours thus far indicates the Coast Guard could exceed the 6,100 hours needed to meet the mission last year. The Coast Guard's assets for Domestic Icebreaking (WTGB 140' Icebreaking Tug and WYTL 65' Small Harbor Tug) are at or past their estimated service life and are experiencing unexpected maintenance, leading to increased operational cost and lost operational days. As such, during FY2009 and 2010 the Coast Guard will assess the best and most effective ways to meet current and future needs of communities reliant upon year-round waterborne commerce.

Living Marine Resources (Domestic Fisheries) and Other Law Enforcement (Foreign Fisheries): In FY 2008, the Coast Guard did not meet its performance target for our foreign and domestic fisheries mission-program but did meet the performance target in foreign fishery enforcement efforts. The Coast Guard was notably successful in detecting 81 incursions by foreign fishing vessels into the U.S. Exclusive Economic Zone (EEZ). The Coast Guard also participated in the 2008 multi-national High Seas Drift Net (HSDN) enforcement campaign, Operation North Pacific Watch where the Coast Guard interdicted two Chinese-flagged HSDN vessels and facilitated their seizure by Chinese officials. In FY 2008, the Coast Guard leveraged enhanced coordination with agency partners and increased use of available maritime domain awareness tools but fell short of domestic fisheries targets. In FY 2009 and 2010, performance in both mission-programs will be temporarily affected by the reduction in available patrol boats as these assets are taken out of service to undergo Mission Effectiveness Program enhancements. These effects are short-term set-backs that will provide more sustained long-term performance as the legacy patrol boats return to service. Moreover, as new Maritime Patrol Aircraft become operational, these assets provide added capabilities that will contribute to this and other missions.

Marine Environmental Protection (MEP): In FY 2008, the Coast Guard did meet its performance target for the MEP mission-program. The Coast Guard developed and executed a Concept of Operations for implementation of the National Response Framework, the national all-hazards, incident management, and emergency response architecture. The Coast Guard also incorporated lessons learned from the M/V COSCO BUSAN Incident Specific Preparedness Report (ISPR) into an approved policy that better aligns response planning at local, state and Federal levels. In FY 2009 and 2010, the Coast Guard is developing a national mandatory Ballast Water Management (BWM) program towards the implementation of a discharge standard. The purpose of the BWM program is to prevent new aquatic species which may be dangerous or harmful to the environment from entering U.S. and international waterways.

Marine Safety: In FY 2008, the Coast Guard Marine Safety mission-program met its performance targets for a decline in Commercial Mariner Safety and Recreational Boating Safety but not for Commercial Passenger Safety. The Coast Guard's Marine Safety program ensures the safe operation and navigation of over 20,000 U.S. and foreign flagged vessels, inspects over 70,000 domestic vessels annually, and carries out over 11,000 port state control (foreign vessel) examinations annually. In FY

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

2008 nearly 400,000 people successfully completed approved boating safety courses, improving mariner competency which is attributable to reducing death and injuries in the Boating Safety community. In FY 2008, the Coast Guard established two Centers of Expertise to improve competency and enhance communication with the maritime industry. In FY 2009 and 2010, the Coast Guard continues to reduce maritime casualties and improve service to mariners, industry and public. In FY 2009 the Coast Guard intends to hire marine inspectors and investigators to address industry growth, improve inspector training, and bolster career paths for personnel with marine science and engineering backgrounds.

Ports, Waterways, and Coastal Security (PWCS): In FY 2008, Coast Guard PWCS mission-program did meet its performance target. This is attributable to improvements in regime and marine domain awareness activities, security and response operations led a reduction in terrorism-related maritime risk the Coast Guard is able to influence. The Coast Guard's International Port Security (IPS) program helped reduce risk to the U.S. by verifying effective anti-terrorism measures are in place in foreign ports and imposing conditions of entry requiring vessels to take additional security actions in cases where measure are lacking. The IPS Program has conducted visits in over 500 ports in more than 135 countries. Conditions of entry have been imposed on vessels arriving from seven countries as a result of these countries' inadequate security standards.

Undocumented Migrant Interdiction: In FY 2008, the Coast Guard saw a 32% decrease in the number of known migrants attempting to enter the U.S. via maritime routes when compared to FY 2007. In FY 2008 the Coast Guard doubled-crew its 110-ft patrol boats in the Seventh District (Florida and the Caribbean) to increase its patrol boat hours. The resulting increase in performance will be sustained in FY 2009 by the continued roll-out of at-sea biometric identification capability to enable better processing of repeat migrant offenders, the continuation of double crewing 110-ft patrol boats in the Seventh District and improved border surveillance capability through integration and cooperation with other DHS components and their programs such as Customs and Border Protection's Secure Border Initiative (SBI). Since the maritime biometric identification proof-of-concept began in the Mona Pass in November of 2006, the Coast Guard has observed a 40 percent reduction in the flow of migrants from the Dominican Republic. Continued progress on the Deepwater Mission Effectiveness Project (MEP) for WMEC's and WPB's is delivering upgraded operational and communications capabilities on legacy assets necessary for all mission responsibilities. The Coast Guard expects to improve interdiction of undocumented migrants through performance improvements gained with additional asset availability during the expected Initial Operational Capability standup of the Response Boat, Medium (RB - M).

Search and Rescue (SAR): In FY 2008, the SAR mission-program did not meet its performance target. The significant drop in cases closely mirrors the economic downturn and may be a result of fewer mariners on the water. In FY 2008, the ability to detect and locate persons in distress was enhanced through technology improvements such as Rescue 21 that now covers 23,149 miles of the Nation's coastline. In FY 2008, SAR mission performance benefited from the installation of improved technologies, such as the 406 mega-Hertz direction finders on more aircraft and Digital Selective Calling capability onboard additional Cutters and small boats. To further capitalize on improved capabilities available in the field the addition of SAR and exercise planning into HSPD-8's National Maritime Security Plan will provide the professional expertise necessary to boost national SAR

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

performance. These efforts will carry into FY 2009, during which the majority of SAR related technology upgrades will be completed resulting in an expected improvement in performance.

Key Strategic Issues

The President's FY 2010 Budget Request maintains a mission-focused Coast Guard capable of answering the Nation's call. Events such as the 9/11 terrorist attacks and Hurricane Katrina, Gustav, and Ike demonstrated the emergence of a complex threat situation and our nation's growing vulnerability. While the U.S. capacity to save lives in the aftermath of these tragedies was exceptional, more can be done to prepare for and respond to the next major disaster. The Coast Guard faces the following five major challenges:

Recapitalizing Aging Infrastructure: The Coast Guard faces an increasing need to replace aging shore infrastructure, vessels and aircraft. The cost of maintaining and operating the Coast Guard's assets is continually increasing, while operational availability is decreasing. In addition to the vessels and aircraft, the vital shore infrastructure required to maintain our front line assets is in critical need of renovation to avoid negative operational impacts. Finally, housing shortages and lack of adequate barracks affect quality of life for our service members. Ultimately, the future operational success of the Coast Guard is dependant upon successful execution of a recapitalization plan that addresses not only the front line assets but the support and shore infrastructure as well.

Enhancing Marine Safety and Security: Coast Guard partnerships with maritime industry enable the continual improvement of integrated safety and security programs. The goal in preventing or responding to a major safety or security incident in our ports and waterways is the same; save lives, property and protect the environment. We recognized the threat posed to our nation by al-Qaeda and other radical extremists and took substantial action to help fortify our ports, waterways, coastal areas and maritime infrastructure. With maritime security needs better addressed, we are again continuing our long-standing efforts to enhance marine safety. Specifically, among other initiatives, we are hiring additional marine inspectors and investigating officers, improving inspector training and competency. This is the continuation of a long-term effort to ensure our regulatory functions meet the needs of the maritime community while providing for the safety of commercial transport in the maritime domain.

Improve Command and Control: The maritime environment continues to grow in complexity in a flatter, more economically interdependent global marketplace. To meet this challenge, the Coast Guard faces a critical need to update its command and control capability to better identify and classify potential threats in the maritime realm in a real-time environment. Offshore sensors and joint-service personnel to staff command and intelligence centers enhance our capability to protect crucial coastal resources and port infrastructure. Information sharing and secure communications capability improves Coast Guard's ability to identify potential terrorists while still at-sea. Maritime Domain Awareness projects such as Long Range Identification and Tracking leverage technology, increase the flow of information and unify efforts across all levels of government. Lessons-learned and expanded capabilities identified through cooperative efforts such as the Joint Harbor Operations Centers with the U.S. Navy (i.e., including the newly established facility in Seattle, WA) and Project SeaHawk with the Departments of Justice and State as well as local authorities from Charleston, SC; demonstrate the benefits of expanding information-sharing and interagency command center operations nationwide. Such interagency efforts address the requirements of the SAFE Port Act to provide operational

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

commanders and National-level decision-makers with a continuous flow of port-level information and will tie-in with the DHS Common Operating Picture (COP) to provide increased command and control capability at all levels of government.

Data Center Migration: The data center migration funding will be used to continue ongoing system and application migration to the two existing DHS Enterprise Data Centers. The Data Center consolidation efforts will standardize IT resource acquisitions across components, streamline maintenance and support contracts, resulting in an enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time. The funding will also support the transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers.

Modernize Business Practices: Achieving excellence in financial management is critical to the Coast Guard's ability to support and sustain mission execution. The Coast Guard's strategic approach to financial management transformation has four over-arching objectives: hardening the control environment, improving organizational competency and capability, modernizing budget formulation and execution, and memorializing the governance structure. Meeting these objectives will improve financial processes, systems, and internal control mechanisms significantly, while reducing the workload on front-line units. Coast Guard leadership is firmly committed to resolving its material weaknesses through financial management transformation, transparency and good stewardship of taxpayer dollars.

C. RESOURCES REQUESTED AND PERFORMANCE IMPACT

The Coast Guard continues modernizing its command and control structures, support systems and business intelligence practices to make it more agile and responsive to the Nation's threats and challenges in the 21st century. This strategic modernization is funded primarily from within our base in FY 2007 through FY 2010.

The Coast Guard will complete implementation of the Headquarters office of the Deputy Commandant for Mission Support (DCMS). DCMS consolidates the responsibilities for developing and overseeing policies and programs for Coast Guard human resources management, acquisitions, engineering and logistics support of operating forces and shore infrastructure; as well as the technical aspects of the information systems utilized to carry out Coast Guard operations. This enables more effective acquisition governance and oversight while mitigating current challenges with programs such as Deepwater. DCMS utilizes standardized maintenance processes and lead to strict configuration control across the enterprise, providing single-point accountability for life-cycle management of assets and human resource management. In turn, DCMS will further relieve operational commands of support obligations, enabling them to fully focus on Coast Guard mission execution.

In addition, the Coast Guard will continue to improve fiscal business practices with the addition of \$20M to enhance financial management competencies and capacities. The Coast Guard's strategic service-wide modernization will improve global resource allocation, force generation, and overall risk management, and enhance the Service's unity of effort within the Department of Homeland Security and at all levels of government. It will result in stronger Headquarters and Field alignment, improved readiness management, and greatly enhanced mission execution across all Coast Guard operations.

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

The Coast Guard also intends to create efficiencies that shift resources to support new Deepwater assets scheduled for delivery in FY 2010. These efficiencies are proposed to include the termination of FY 2009 one-time \$32.7 million costs and the decommissioning of four Coast Guard aircraft at a savings of \$11.2 million and 53 FTEs. In addition, the Coast Guard will terminate the Loran-C system, saving \$36 million and 181 FTEs. Replacing legacy assets with more capable Deepwater cutters and aircraft will improve overall performance levels.

D. HOW COAST GUARD PROGRAMS AND THEIR PERFORMANCE GOALS ALIGN TO AND SUPPORT THE DHS GOALS AND OBJECTIVES

The 11 Coast Guard mission-programs and their long-term performance goals are listed below, followed by the DHS strategic objective(s) they support.

Aids to Navigation – The Coast Guard’s long-term goal is to eliminate collisions, allisions and groundings by vessels on our Nation’s oceans and waterways. A resilient Aids to Navigation program ensures the rapid recovery of the maritime transportation system following attacks or disasters.

Goal 3 – Protect Critical Infrastructure

Objective 3.4 – Protect Transportation Sectors.

Goal 4 – Strengthen Our Nation’s Preparedness and Emergency Response Capabilities

Objective 4.2: Strengthen Response and Recovery.

Defense Readiness – The Coast Guard’s long-term goal is to improve our national security and military strategies by ensuring assets are at the level of readiness required by the Combatant Commander.

Goal 1 –Protect the Nation from Dangerous People

Objective 1.1: Achieve Effective Control of Our Borders.

Goal 3 – Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources.

Goal 4 – Build a nimble, effective emergency response system and a culture of preparedness

Objective 4.1: Ensure Preparedness.

Drug Interdiction – The Coast Guard’s long-term goal is to reduce the flow of illegal drugs entering the U.S. via non-commercial maritime shipping sources.

Goal 1 –Protect the Nation from Dangerous People

Objective 1.1: Achieve Effective Control of Our Borders.

Ice Operations – The Coast Guard’s long-term goal is to maintain operational channels for navigation, limiting channel closures to two days (during average winters) and eight days (during severe winters).

Goal 3 – Protect Critical Infrastructure

Objective 3.4 – Protect Transportation Sectors.

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

Living Marine Resources (LMR) – The Coast Guard’s long-term goal is to improve fisheries regulation compliance on our Nation’s oceans.

Goal 3 – Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources.

Marine Environmental Protection (MEP) – The Coast Guard’s long-term goal is to eliminate oil spills and chemical discharge incidents.

Goal 3 – Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources.

Goal 4 – Build a nimble, effective emergency response system and a culture of preparedness

Objective 4.1: Ensure Preparedness.

Objective 4.2: Strengthen Response and Recovery.

Marine Safety – The Coast Guard’s long-term goal is to eliminate maritime fatalities and injuries on our Nation’s oceans and waterways.

Goal 3 – Protect Critical Infrastructure

Objective 3.4 – Protect Transportation Sectors.

Undocumented Migrant Interdiction – The Coast Guard’s long-term goal is to eliminate the flow of undocumented migrants via maritime routes to the U.S.

Goal 1 –Protect the Nation from Dangerous People

Objective 1.1: Achieve Effective Control of Our Borders.

Other Law Enforcement – The Coast Guard’s long-term goal is to reduce the number of vessel incursions into the United States Exclusive Economic Zone (EEZ).

Goal 1 –Protect the Nation from Dangerous People

Objective 1.1: Achieve Effective Control of Our Borders.

Ports, Waterways, and Coastal Security (PWCS) – The Coast Guard’s long-term goal is to reduce homeland security risk in the maritime domain.

Goal 1 –Protect the Nation from Dangerous People

Objective 1.1: Achieve Effective Control of Our Borders.

Goal 2 –Protect the Nation from Dangerous Goods

Objective 2.1: Prevent and Detect Radiological/Nuclear Attacks.

Objective 2.2: Prevent, Detect, and Protect Against Biological Attacks.

Goal 3 – Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources.

Objective 3.4 – Protect Transportation Sectors.

Search and Rescue – The Coast Guard’s long-term goal is to save mariners in imminent danger on our Nation’s oceans and waterways.

Goal 4 – Build a nimble, effective emergency response system and a culture of preparedness

Objective 4.2: Strengthen Response and Recovery.

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

E. PERFORMANCE-BASED BUDGET HIGHLIGHTS BY PROGRAM

The Coast Guard's Mission Cost Model (MCM) is a flexible and agile tool that enables the Coast Guard to use historical expenditures to allocate direct, indirect and support costs across mission-programs and strategic goals and objectives. Historical cost trends are then used to predict general future year mission cost allocations. As a result, greater transparency is possible between resources consumed and results achieved by our mission-programs. The MCM's performance based budget projection is key to the Coast Guard's budget process as well as other related macro-level policies and initiatives, such as the President's Management Agenda (PMA) initiative of Budget and Performance Integration, the OMB Program Assessment Rating Tool (PART) reviews, and the Government Performance and Results Act. The following tables provide program-specific information that shows the relationship between budgetary funding and personnel resources, and the lead outcome performance goals that have been established for each of the Coast Guard's 11 mission-programs.

Program: Defense Readiness						
Performance Goal: Improve our national security and military strategies by ensuring assets are at the level of readiness required by the combatant commander.						
DHS strategic objectives supported and % allocation of activities: 1.1 - 99%, 3.1 - 1%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$612,554	\$509,691	\$803,950	\$664,384	\$720,198	\$705,750
FTE	2,942	2,076	2,087	2,103	2,143	2,177

Performance Plan Measures

Measure: Defense readiness of patrol boats.						
Description of Measure: This measure is the percent of time that the number of units called for in combatant commander operational plans are ready at Status of Resources and Training Systems (SORTS) category 2 or better.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	100%	100%	100%	100%	22.8%
Actual:	None	100%	100%	95%	N/A	N/A

Measure: Defense readiness of Port Security Units (PSUs).						
Description of Measure: This measure is the percent of time that the number of units called for in combatant commander operational plans are ready at Status of Resources and Training Systems category 2 or better.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	100%	100%	100%	100%	75%
Actual:	None	less than 1%	4.52%	24.45%	N/A	N/A

Measure: Percent of time that U.S. Coast Guard assets included in the Combatant Commander Operational Plans are ready at a Status of Resources and Training System (SORTS) rating of 2 or better.						
Description of Measure: Through the Defense Readiness program, the Coast Guard is prepared						

**U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT**

to provide core competencies such as Maritime Interception Operations; Port Operations Security and Defense; Military Environmental Response Operations; Peacetime Engagement; Coastal Sea Control Operations; and Theater Security Cooperation when requested by the Department of Defense. Selected Coast Guard forces participate in the Navy Status of Readiness and Training System assessment program and participate in combatant commander operations.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Performance Plan Measures

Measure: Cocaine Removal Rate / Operating Expenses of the Drug Interdiction Program						
Description of Measure: "Removal Rate" is the percentage of cocaine shipped through maritime routes that was intended to enter the U.S., but did not because of the efforts of the U.S. Coast						

**U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT**

Guard. The Cocaine Removal Rate reflects the amount of cocaine lost to the smuggler through seizures (documented in the DEA administered Federal - wide Drug Seizure System), jettison, burning, and other non - recoverable events (vetted through the Inter Agency Consolidated Counter - Drug Database) divided by the non - commercial maritime cocaine flow through the transit zone (documented in Defense Intelligence Agency's annual Interagency Assessment of Cocaine Movement report). Operating expenses of the Drug Interdiction Program are the actual OE expenditures, as calculated through the Coast Guard's Mission Cost model, of the Drug Interdiction program. This measure shows the rate of cocaine removed per 100 million dollars of program operating expenditures.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	3.2% Removal Rate per 100 Million of program Operationa l Expenditur es	3.6% Removal Rate per 100 Million of program Operationa l Expenditur es	3.7% Removal Rate per 100 Million of program Operationa l Expenditur es	3.2% Removal Rate per 100 Million of program Operationa l Expenditur es	3.2% Removal Rate per 100 Million of program Operationa l Expenditur es
Actual:	None	None	2.4%	not available until late summer 09	N/A	N/A

Measure: Metric Tons of Cocaine Removed						
Description of Measure: Metric tons of cocaine seized by the Coast Guard, and cocaine jettisoned, scuttled, or destroyed by smugglers as a result of Coast Guard law enforcement action.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	130	130	134	138
Actual:	None	None	161.7	166.9 Metric Tons	N/A	N/A

Measure: Percent Non - Commercial Maritime Conveyance						
Description of Measure: The percent of world cocaine flow toward the U.S. by Non - Commercial Maritime conveyance. As noted by the Office of National Drug Control Policy's 2007 strategy, four consecutive record - setting years of illicit drug seizures in the transit zone have forced narcotics traffickers to adjust from well - established routes and methods to those they believe will be less susceptible to interdiction. Therefore, a downward trend in this measure would reflect success of enforcement efforts within the areas that the Coast Guard influences in the transit zone.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Performance Plan Measures

Measure: Percent of U. S. Coast Guard boardings at sea in which no significant violations are detected when domestic fisheries regulations apply						
Description of Measure: This measure reflects the percent of boardings at sea by the U.S. Coast Guard during which no significant violations of domestic fisheries regulations are detected. The Living Marine Resources (LMR) program's mission is to provide at - sea enforcement that advance national goals for the conservation and management of living marine resources (LMR) and their environments through enforcement of federal regulations that provide stewardship of living marine resources and their environments. The Coast Guard is the lead federal agency for "at - sea" enforcement of U.S. fisheries and marine protected species regulations. The LMR program's primary focus is to compel compliance with federal fisheries and other LMR regulations on domestic fishing vessels.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

FTE	3,065	2,467	2,547	2,630	2,630	2,670

Performance Plan Measures

Measure: Percent of undocumented migrants who attempt to enter the U.S. via maritime routes that are interdicted						
Description of Measure: The Coast Guard has been charged through Executive Orders and Presidential Decision Directive to enforce the Immigration and Nationality Act. Performance is measured by the percent of undocumented migrants of all nationalities who are interdicted while attempting to enter the U.S., its possessions, or territories via maritime routes. The measure is computed by dividing the number of successful landings by the number of migrants who attempt illegal immigration. Subtracting this percentage from 100% gives the migrant interdiction rate. Migrant interdictions and landings are reported by Coast Guard units and other law enforcement agencies.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Measure: High capacity passenger vessel required escort rate						
Description of Measure: This measure is the accomplishment rate of required escorts of high capacity passenger vessels.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	100% of required escorts	100% of required escorts	100%	100%	100%
Actual:	None	59%	58%	58%	N/A	N/A

Measure: Percent reduction in the maritime terrorism risk over which the U.S. Coast Guard has influence						
Description of Measure: This is a risk - based outcome measure that begins with an assessment (by maritime security representatives) of likely high - consequence maritime terrorist attack scenarios. Threat, vulnerability, and consequence levels are estimated for each scenario, which generates a proxy (index) value of "raw risk" that exists in the maritime domain. Next, Coast Guard interventions (security and response operations, regime and awareness activities) for the fiscal year are scored against the scenarios with regard to the decreases in threat, vulnerability and consequence that each has been estimated to have afforded. (The analysis then focuses on those areas within the Coast Guard's roles and strategic mandates.) The resulting measure is a proxy measure of performance.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	Full implementation of planned activities geared towards lowering the risk due to terrorism in the maritime domain.	14%	15%	15%	21%	28%
Actual:	3.4%	17%	15%	20%	N/A	N/A

Measure: Percent risk reduction for the transfer of a terrorist meta - scenario.						
Description of Measure: This measure is an estimate of the percent of terrorist - related maritime risk reduction in the transfer of a terrorist(s) through the maritime domain (as a percent of the risk that the Coast Guard has the ability to impact). This is a risk - based measure that involves the scoring (by maritime security representatives) with respect to threat, vulnerability and consequence of the transfer of a terrorist(s) into the United States with intent and capability to carry out terror attacks within the United States where vessels en route from foreign countries are						

U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT

used as a means of conveyance. Such scoring generates an index of "raw risk" that exists in the maritime domain. Next, Coast Guard incremental interventions (awareness, operational and regulatory - based) that have taken place throughout the fiscal year are scored with regard to the effectiveness that each has been estimated to have afforded.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	21%	21%	29%
Actual:	None	None	21%	29%	N/A	N/A

Measure: Percent risk reduction for the transfer of a weapon of mass destruction meta - scenario.

Description of Measure: This measure is an estimate of the percent of terrorist - related maritime risk reduction in the transfer of a Weapon of Mass Destruction (WMD)/ materials into the United States through the maritime domain (as a percent of the risk that the Coast Guard has the ability to impact). This is a risk - based measure that involves the scoring (by maritime security representatives) with respect to threat, vulnerability and consequence of the transfer of a WMD/materials into the United States to support ongoing terrorist operations where vessels en route from foreign countries are used as a means of conveyance. Scoring generates an index of "raw risk" that exists in the maritime domain. Coast Guard incremental interventions (awareness, operational and regulatory - based) that have taken place throughout the fiscal year are scored with regard to the effectiveness that each has been estimated to have afforded.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	4%	3%	12%
Actual:	None	None	4%	12%	N/A	N/A

Measure: Risk reduction due to consequence management.

Description of Measure: This measure indicates the estimated percent of terrorist - related maritime risk reduction due to consequence management (as a percent of the risk that the Coast Guard has the ability to impact.) This is a risk - based outcome measure that involves the scoring (by maritime security representatives) of likely high - consequence maritime terrorist attack scenarios with respect to threat, vulnerability, and consequence. Scoring generates an index of "raw risk" that exists in the maritime domain. Coast Guard incremental interventions (both operational and regulatory - based) that have occurred throughout the fiscal year are scored against the attack scenarios with regard to the percent decrease in threat, vulnerability and consequence that each has been estimated to have afforded. The resultant measure shows the change in "raw risk" (due, in large part, to things outside of the Coast Guard's ability to control) and the reduction in total risk the Coast Guard estimates that it has affected.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	4.2%	4.1%	6%	6%	5%
Actual:	None	6%	4.2	5%	N/A	N/A

Additional Measures

Measure: MTSA Annual Required Inspection Rate

Description of Measure: This measure is the percent of required annual MTSA security plan compliance inspections conducted (for inspected vessels only)

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Program: Search and Rescue (SAR)

Performance Goal: Save people in imminent danger on our Nations oceans and waterways.

DHS strategic objectives supported and % allocation of activities: 4.2 - 100%

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$910,887	\$832,089	\$922,769	\$961,030	\$1,110,923	\$945,620
FTE	4,136	4,652	4,720	4,786	4,781	4,852

Performance Plan Measures

Measure: Percent of people in imminent danger saved in the maritime environment

Description of Measure: The percentage of people who were in imminent danger on the oceans and other waterways, and whose lives were saved by the Coast Guard. The number of lives lost before and after the Coast Guard is notified, and the number of persons missing at the conclusion of search operations are factored into this percentage. Several factors compound the difficulty of

**U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT**

successful responses, including untimely notification to the USCG of distress, incorrect reporting of the distress site location, severe weather conditions at the distress site, and distance to the scene. The number of lives saved is the best outcome measure for search and rescue because it includes lives lost before and after the USCG is notified and persons missing, thereby encouraging the USCG to invest in supporting systems, like awareness or communication systems and safe boater programs, that increase the possibility that a search and rescue mission will end with lives saved.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	76%	76%	76%
Actual:	None	None	None	76.8%	N/A	N/A

Additional Measures

Measure: % Lives Saved/Operating Expenses of the SAR Program

Description of Measure: This measure shows the percent of lives saved divided by the operating expenses of the SAR Program. Targets are based on outcome measure targets divided by projected OE funding per the Fiscal Year 2009 - 2014 RAP.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	.09% lives saved / 1 million	.16% lives saved / 1 million	.15% lives saved / 1 million	.16% lives saved / 1 million	.16% lives saved / 1 million
Actual:	None	.13% lives saved / 1 million	.09% lives saved / 1 million	.12%	N/A	N/A

Measure: Percent of mariners in imminent danger saved.

Description of Measure: The percentage of mariners who were in imminent danger on our Nations oceans and waterways, and whose lives were saved by the Coast Guard. The number of lives lost before and after the Coast Guard is notified is factored into this percentage. Several factors compound the difficulty of successful responses, including untimely notification to the USCG of distress, incorrect reporting of the distress site location, severe weather conditions at the distress site, and distance to the scene. The number of lives saved is the best outcome measure for search and rescue because it includes lives lost both before and after the USCG is notified and persons missing, thereby encouraging the USCG to invest in supporting systems, like awareness or communication systems and safe boater programs, that increase the possibility that a search and rescue mission will end with lives saved.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	86% lives saved	86%	86%	87%	87%	87%
Actual:	86.10%	85.27%	85.4%	83.5%	N/A	N/A

Measure: Percent of property "in danger of loss" saved.

Description of Measure: Prevent the loss of at least 80% of the property that is at risk of destruction. To calculate this measure we use the equation: $PS / (PL+PS)$ Where: PS = "property saved" and PL = "property lost" as defined and input into the Marine Information for Safety and Law Enforcement (MISLE) database.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	80%	80%	80%	80%
Actual:	None	None	None	will be	N/A	N/A

**U. S. COAST GUARD
Fiscal Year 2010
STRATEGIC CONTEXT**

				available FY09		
--	--	--	--	-------------------	--	--

Measure: Percent of Search and Rescue assets on scene within two hours.						
Description of Measure: Time on scene is calculated from time of notification of the Coast Guard until the time of arrival on scene of an SRU, based on moderate environmental conditions which allow for operation of the SRUs at their top cruise speeds, and including 30 minutes of preparation time (i.e. a total of 90 minutes from underway to on scene) that provides for underway preparations such as engine warm - ups, completion of underway checklist, risk management checks, and mission planning. The measure is calculated by dividing the number of times any one response unit on a SAR sortie arrives on scene within 90 minutes of notification by the number of times any one response unit on a SAR sortie arrives on scene within 90 minutes of notification plus the number of times anyone response unit on a SAR sortie arrives on scene more than 90 minutes after notification.

FTE	6,985	7,526	7,621	7,617	7,502	7,615

Performance Plan Measures

Measure: Federal Short - Range Aids to Navigation Availability						
Description of Measure: This measure indicates the hours that short range Aids to Navigation are available. The aid availability rate is based on an international measurement standard established by the International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA) (Recommendation O 130) in December 2004. A short range Aid to Navigation is counted as not being available from the initial time a discrepancy is reported until the time the discrepancy is corrected. Aids to Navigation prevent adverse navigation outcomes that can result in disruptions to maritime commerce.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	97.5	97.5	97.5	97.5

Performance Plan Measures

Measure: Number of days critical waterways are closed due to ice						
Description of Measure: This measure is an indicator of Coast Guard Icebreaking impact on preventing disruptions to maritime commerce due to ice. The measure tallies the annual number of days critical Great Lakes waterways are closed with the St. Marys River as the reference point. A closure is a period of 24 or more hours during which a waterway is closed by a Vessel Traffic Service or Captain of the Port, or blocked by a beset vessel. Closure day targets are negotiated with Great Lakes Marine Transportation System stakeholders, and are relative to winter severity. Those standards are 2 days in an average winter, and 8 days in a severe winter.

iii. Status of Congressional Requested Studies, Reports, and Evaluation

**Department of Homeland Security
United States Secret Service**

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2008	At least quarterly	Report – 110-497, Div. E. page 53.	The Secret Service is directed to brief the Committees on Appropriations at least quarterly on its budget execution, specifically detailing any modifications to appropriated program, project and activity levels.	This information is provided to the Department monthly and is then submitted to the Committees on Appropriations.
2008	1-Jan-09	Report – 110-497, Div. E. page 53.	The Secret Service is directed to brief the Committees on Appropriations before January 1, 2009 on the number of agency employees who exceed \$35,000 in annual overtime payments during fiscal year 2008.	This briefing has been completed.
2008	Provide as part of the fiscal year 2009 budget justification	Report – 110-497, Div. E. page 54.	The Secret Service is directed to explain to the Committees on Appropriations as part of its fiscal year 2009 budget justification the allocation of mail screening responsibilities and budgetary resources between the Secret Service and the Executive Office of the President, as detailed in the House report.	An explanation has been provided to the Committees on Appropriations.
2008	Provide as part of the fiscal year 2009 budget justification	Report – 110-497, Div. E. page 54.	The Committees on Appropriations direct the Secret Service to submit a report, developed jointly with the relevant agencies and delivered concurrently with the fiscal year 2009 budget, on the agency’s plan for improving the security and aesthetic conditions of E Street, as detailed in the House report.	The report was submitted to the Committees on Appropriations on May 6, 2008.
2008	Within 90 days of passage of the House Bill on FY 2008 appropriations	Report – 110-497, Div. E. page 54.	The Secret Service is directed to provide a briefing to the Committees on Appropriations on Federal costs incurred by fiscal year since 1997 for all Secret Service-requested helicopter deployments, as detailed in the House report.	Members of the House Appropriations Committee staff were briefed on January 29, 2008. Members of the Senate Appropriations Committee staff were invited to this briefing but chose not to attend.

BUDGET REQUEST AND SUPPORTING INFORMATION

UNITED STATES SECRET SERVICE SALARIES AND EXPENSES

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses

The United States Secret Service (USSS) performs two critical homeland security missions: protection and criminal investigations. USSS protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, Foreign Missions and other designated buildings within the Washington, DC area; and designs, coordinates, and implements operational security plans for designated National Special Security Events (NSSEs). The USSS investigates violations of laws relating to counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation's financial, banking, and telecommunications infrastructure; and provides critical forensic support for associated investigations of cases involving missing and exploited children.

In order to accomplish both its protective and investigative missions, the USSS has offices located throughout the United States and in 22 foreign countries. The Service is requesting that \$1,485,609,000 in discretionary funding be provided to support this dual mission. Included in this budget is funding for 7,055 FTE comprised primarily of special agents, uniformed officers, and support personnel.

B. Budget Activities

Protection

In FY 2008, the Secret Service provided protection to 116 heads of state/government, and 58 spouses, as well as domestic protectees at the 63rd United Nations General Assembly in New York City. The Secret Service continues to constantly adapt security plans to meet the protective needs for the ever-changing number of protectees and to mitigate emerging threats.

In addition, the Secret Service successfully provided protection to protectees during more than 7,535 foreign and domestic travel stops during FY 2008.

Protection of Persons and Facilities - The primary purpose of the Secret Service's domestic protection activity is to protect our nation's leaders. To accomplish this, this program operates to ensure protectees' personal safety, and to protect the buildings and grounds where these individuals reside and work (e.g., the White House Complex and the Vice President's residence). Since the September 11, 2001 attacks, there has been a significant increase in the number of protectees receiving varying levels of protection from the Secret Service. Currently, the Service

provides protection to 32 protectees: 24 permanent protectees are authorized under 18 USC § 3056; 8 provisional protectees are authorized pursuant to Presidential Memoranda. The Secretary of the Department of Homeland Security (DHS) is being protected, and is included in the above totals. Also, the Secretary of the Treasury, on a reimbursable basis is receiving protection. The Service estimates that 7,904,400 hours of protection for persons and facilities will be worked during FY 2010.

Part of the protection of persons and facilities program is the protection of foreign heads-of-state/government visiting the United States. Foreign dignitary protection includes: 1) protection for visiting heads-of-state/government and their spouses, as well as other distinguished visitors to the U.S. as directed by the President; and 2) external security for foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas consistent with statute). The Secret Service provides protection to these individuals and foreign missions by strategically placing human and physical assets (agents, tactical support, technical security, explosives detection and weapons-of-mass destruction detection and countermeasures) at these foreign missions and using these assets during foreign dignitary visits to the United States. All efforts are directed toward ensuring that foreign dignitaries and foreign missions receive the optimal level of protection.

The foreign dignitaries who visit the U.S. often are high-profile individuals and deemed to have medium to high threat levels. Today's environment necessitates the implementation of complex security operations that involve multiple jurisdictions and functions.

The Service has the sole statutory authority to provide a dedicated police presence and response to foreign embassies, chanceries and residences. When a "surge" in protective responsibilities in this area occurs, the Secret Service turns to other entities (i.e., Metropolitan Police Department) for assistance in dealing with such issues as demonstration control. Currently, the Secret Service protects 534 missions located in the Washington, DC area.

Protective Intelligence Activities - The Service's protective intelligence program is responsible for overseeing the investigation and evaluation of all protective intelligence subjects and for the receipt, analysis, and dissemination of all protective intelligence information. This mission is accomplished by the review, coordination, control and referral of information about individuals, groups and activities that pose a potential threat to persons and property protected by the Secret Service.

National Special Security Events (NSSEs) - By statute and Presidential Decision Directive-62 (PDD-62), the Secret Service is designated as the lead agency for designing, coordinating, and implementing operational security plans for NSSEs. As with campaign events, special agents coordinate with the military and federal, state, county, local, and international law enforcement organizations to ensure the success of security operations for NSSEs.

The Secret Service plans and implements security designs for designated NSSEs to ensure the physical protection of the President, the public and other Secret Service protectees who participate in NSSEs.

The events of September 11th, 2001 demonstrated that our adversaries are capable of attacking our nation on a grand scale and employing extensive research and surveillance methodologies,

acquiring substantial skills and instruction, and striking their targets without warning. Funding to protect our leaders and communities is critical.

Presidential Candidate/Nominee Protection – The Secret Service provides protection to major presidential and vice presidential candidates. It also provides protection to their spouses within 120 days of a general presidential election. Protective details are activated only after established criteria are considered. Campaign protection is a mandatory workload increase, and funding is needed for these presidential campaigns three out of every four fiscal years. The Service has no base budget funding for this activity. All campaign funding is non-recurred from the base budget following a presidential campaign and inauguration.

White House Mail Screening - The Secret Service screens White House mail to ensure it is free of harmful toxins or other dangerous materials.

Due to discoveries of anthrax being mailed in letters to political leaders as well as to members of the press, the Secret Service initiated a program to provide additional screening for mail destined for the White House Complex. This program is indicative of the close partnership the Service maintains with the White House regarding the implementation of security measures. Mail is now being delivered to a facility where it is put through a series of tests and is analyzed to ascertain if any chemical, biological, radiological contamination or explosive material is present. Currently, additional shifts are required due to significant increase in mail volume.

Headquarters, Management and Administration: The Headquarters, Management and Administration program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, and relocation and travel services. It exercises accountability over the collection and disposition of the Secret Service's financial resources and examines and processes documents for payment of contracts, purchase orders, invoices and recurring expenses, including reservations and payments for travel and relocation services. Administration also provides management and program analysis support to all operational and administrative programs involving studies of organizational structuring, workflow efficiencies, and staffing allocations. It maintains organization charts and functional responsibility statements for all Secret Service offices. In addition, it establishes, develops, implements, and manages the strategic planning process for the Secret Service and coordinates Secret Service participation in all DHS and government-wide management improvement and evaluation programs. These tasks serve to assist the Service's leadership in formulating the vision and direction of the Secret Service.

This program also purchases goods via procurement services within the scope of the law and provides value-added procurement solutions to ensure that government assets and resources are managed wisely.

The program promotes fairness, consistency, and efficiency in the utilization of staffing, scheduling, and travel logistics through the Service's Logistics Resource Center. It analyzes staffing needs and travel logistics alternatives to provide for more informed decision-making by balancing cost considerations with operational needs.

The Administrative Operations Division (AOD) plans, develops, and administers policies and procedures, and performs related activities for a variety of real and personal property

management areas in support of the USSS Headquarters and field elements. AOD functions include space and facilities management, personal property and supply management, vehicle fleet management, mail distribution and screening and printing management. AOD acts as the single acquisition agent between the USSS and the General Services Administration (GSA) and the Department of State (DOS) for the acquisition, construction and renovation of USSS owned or leased real property.

In addition, AOD organizes and coordinates facilities and property management support activities in support of the Secret Service's protective activities and designated NSSes; manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites; plans, develops, and administers policies and procedures for environmental management, energy conservation and other related programs for the USSS; and provides building maintenance management and general repairs and limited labor services support to all Headquarters offices.

Rowley Training Center - This program encompasses personnel at the Service's James J. Rowley Training Center (JJRTC), including instructors, tactical and weapons systems specialists, curricula design staff, computer and web-based faculty/technicians, executive training advisors, administrative support, and maintenance staff. The Service has a separate appropriation, the Acquisition, Construction, Improvements and Related Expenses account which is used to maintain the facility.

The Service's current Strategic Plan provides the following primary objectives with regard to future mission-driven training protocols:

- Enhance JJRTC to provide an academic environment that promotes in-depth critical thinking and innovative strategies in the areas of physical protection, site event security, threat/risk assessments, protection intelligence/counterterrorism techniques, emergency preparedness, criminal investigations, protection of critical financial infrastructure, and executive/management development.
- Maximize training opportunities by using emerging technologies, such as 3-D modeling, computer-generated simulation training, and distance learning.
- Develop and implement training programs consistent with the Secret Service's core mission for federal, state, and local law enforcement partners in the areas of electronic crimes, counterterrorism/protection, cyber/counterfeit investigations, threat/risk assessment, and operational security for National Special Security Events.
- Establish partnerships with academic institutions and professional associations to assess, confirm, and ensure innovative training methodologies.

The Rowley Training Center supports both protection and criminal investigation missions, the two critical homeland security missions mandated for the Secret Service.

Domestic Field Operations - In order to accomplish its investigative responsibilities, the Secret Service maintains a network of 142 field offices nationwide. Agents assigned to these domestic offices are responsible for investigating violations of laws relating to counterfeiting of

obligations and securities of the United States (currency, treasury checks, etc.), and to financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, computer fraud, as well as investigating computer-based attacks on our nation's financial, banking, and telecommunications infrastructure.

International Field Administration and Operations - The Secret Service maintains a total of 22 foreign field offices and one domicile office in 18 countries. Similar to their domestic counterparts, agents assigned to these offices are responsible for investigating violations of criminal statutes falling under the Secret Service's investigative mission. Because they do not have arrest authority, agents liaise with their foreign law enforcement counterparts in order to meet their investigative responsibilities. Additionally, these agents augment any protective mission falling within their geographic area of responsibility. Relationships established in foreign countries from conducting criminal investigations greatly enhance the Secret Service's ability to provide a safe and secure environment for the people it protects while they travel overseas.

Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF) - In response to the emerging trends involving the use of computers and their peripheral devices, the Secret Service established the Electronic Crimes Special Agent Program, or ECSAP. Special Agents involved with the ECSAP are computer investigative specialists, qualified to conduct examinations on many types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, and other electronic media. Currently, more than 1,200 special agents have received at least one of the three levels of ECSAP training.

In addition to the ECSAP, the Secret Service has established a domestic network of 24 Electronic Crimes Task Forces (ECTFs). The concept of the ECTF model is truly unique since it brings together not only federal, state and local law enforcement officials from a specific region, but also prosecutors, as well as individuals from private industry and academia. These task forces provide a productive framework and collaborative crime-fighting environment in which the resources of its participants are combined to effectively and efficiently make a significant impact in preventing and detecting electronic crimes.

Support for Missing and Exploited Children – Funding for missing and exploited children includes a \$6,000,000 grant and \$2,366,000 for Secret Service forensic and related support of investigations involving missing and exploited children.

C. Budget Request Summary

The U.S. Secret Service requests 7,057 positions, 7,055 FTE, and \$1,485,609,000 for FY 2010; an increase of \$76,880,000 and 249 FTE from the FY 2009 enacted budget. This level of funding is required for and includes the following:

- Additional program increases for information integration and transformation (\$33,960,000, 3 FTE), cyber infrastructure protection (\$2,000,000) and protective countermeasures (\$4,040,000).

- Adjustments to the base include increases for 2nd year funding for positions to be hired in FY 2009 (\$883,000, 33 FTE), 2nd year funding for the positions to be hired in FY 2009 (\$40,000,000, 213 FTE) via Omnibus (P.L. 111-8), expected cost increases (\$33,679,000), and decreases for non-recurred funding for White House mail facility equipment (-\$11,600,000), and the 2008 Presidential Campaign (-\$26,082,000).

2010 Request	4,335	4,335	\$853,700
Total Change 2009-2010	163	123	\$12,238

*The table above excludes FY 2009 Omnibus funding of \$100 million provided in P.L. 111-8. USSS requests \$853.7 million and 4,335 FTE for this activity. This is an increase of \$12.2 million from the FY 2009 enacted budget.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Service is authorized by law to protect:

- 1) The President, the Vice President, (or other individuals next in order of succession to the Office of the President), the President-elect and Vice President-elect;
- 2) The immediate families of the above individuals;
- 3) Former Presidents and their spouses for their lifetimes, except when the spouse remarries; (In 1997, legislation was passed limiting Secret Service protection to former Presidents for a period of not more than 10 years from the date the former President leaves office and applies to all former Presidents after President Clinton.) and former Vice Presidents for up to 6 months after term expiration;
- 4) Children of former presidents until age 16;
- 5) Visiting heads-of-state/government and their spouses traveling with them, other distinguished foreign visitors to the United States, and official representatives of the United States performing special missions abroad; and
- 6) Major Presidential and Vice Presidential candidates. Protection is also provided for their spouses within 120 days of a general presidential election.

The functional organization of the Secret Service accommodates its dual mission; permanent protective details dedicated to protection, as well as a worldwide network of field offices to carry out their investigative responsibilities. However, these field offices are not only responsible for investigations but also routinely provide agents to support the protective mission. That is, agents assigned to these offices spend significant time traveling away from their field office augmenting the Secret Service's permanent and temporary protective details. This is a very efficient way to provide protection, as it allows for additional resources when protective mission requirements demand them. Also, agents trained to be good investigators come with these skills when doing protection which is important to the success of the protection mission.

The Secret Service provides protection in two ways; one for permanent protectees and the other for temporary protectees. Permanent protectees, such as the President and the First Lady, have details of special agents assigned to them with additional support, as needed, from field special agents. Temporary protectees, such as candidates and foreign dignitaries, have details of special agents on temporary assignment from Secret Service field offices. The Secret Service does not discuss methods or means in any detail; however, generally speaking, an advance team surveys each site to be visited. From these surveys, the team members determine staffing, equipment requirements, and the location of hospitals and evacuation routes for emergencies. Fire, rescue, and other public service personnel in the community are alerted. A command post is established with full communications facilities. The assistance of the military, federal, state, county, and local law enforcement organizations is a vital part of the entire security operation.

Before the protectee's arrival, the lead advance agent coordinates the security planning with all law enforcement representatives participating in the visit. Personnel are posted and are alerted to specific problems associated with the visit. Intelligence information is discussed, identification specified, and emergency options outlined. Prior to the arrival of the protectee, checkpoints are established and access to the secured area is limited.

PPA: Protection of Persons and Facilities

	Perm Pos.	FTE	Amount
2008 Actual	3,514	3,348	\$706,598
2009 Enacted	3,800	3,601	\$705,918
2010 Adjustments-to-Base	0	199	\$49,603
2010 Current Services	3,800	3,800	\$755,522
2010 Program Change	0	0	\$4,040
2010 Request	3,800	3,800	\$759,561
Total Change 2009-2010	0	199	\$53,644

*The table above excludes Omnibus funding of \$100 million provided in P.L. 111-8. The Secret Service requests \$759.6 million and 3,800 FTE for this activity. This is an increase of \$53.6 million to the FY 2009 enacted budget. This includes adjustments to the base of \$49.6 million for position annualization, other cost increases and a program change of \$4 million to fund Uniformed Division modernization efforts.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service secures the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. The Service also secures the physical safety of visiting heads-of-state/government, and their spouses, and other distinguished visitors to the United States as directed by the President. In addition, USSS provides external security to foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas, consistent with statute).

In order to protect our nation's leaders, the Secret Service operates to ensure protectees' physical safety and to protect the buildings and grounds where they reside and work. The requested amount addresses the strategic challenges facing the Service including terrorists' sustained motivation to attack U.S. interests (including its leaders) and the increasing technological sophistication of the threat environment.

Uniformed Division

The USSS Uniformed Division (UD) began as the White House Police, and was originally created as a separate and distinct organization by Public Law 67-300, approved September 14, 1922. The White House Police came under the direct supervision of USSS in 1930. The mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involves duties in connection with the protection of the Executive Mansion and grounds in the District of Columbia; any building in which White House offices are located; and the President and members of his immediate family.

The members of the UD assigned to the White House Branch perform many functions that thrust them into the public light. These officers process thousands of staff members, other workers, members of the press and those individuals with appointments into the White House Complex on a daily basis. Officers assigned to this Branch provide protection to the White House Complex through the effective use of fixed posts, foot beats, bicycle patrols and police cruisers. Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise to our mission on a daily basis in and around the White House Complex. The Special Operations Section of the UD is an additional unit responsible for tours of the White House Mansion and for the coordination of special events such as the Easter Egg Roll, Presidential Receptions, and Inaugural events. The White House Vehicle Inspection Team and the Counter Surveillance Unit also help achieve the UD goal of providing a safe and protected environment.

The Uniformed Division provides a safe and secure environment for the President, his immediate family, the Vice President, their staff members and myriad other White House employees that work there each day. In addition to these responsibilities, personnel assigned to the White House Branch perform similar functions at the Treasury Building, the New Executive Office Building, the Eisenhower Executive Office Building, and other locations which house Presidential Offices. In addition to the White House Branch, other publicly visible components of the UD are the Naval Observatory Branch and Foreign Missions Branch.

Significant accomplishments in FY 2008 included the following:

- Provided protection to protectees while they made over 7,535 domestic and foreign travel stops.

- Provided protection to 116 foreign heads-of-state/government at the 63rd United Nations General Assembly.
- Completed the design, planning, and construction of the Joint Operations Center (JOC), relocated to USSS Headquarters.

Significant accomplishments in FY 2009 include the following:

- Continue to provide protection to protectees while they make domestic and foreign stops.
- Provide protection to foreign heads-of-state/government at the 64th United Nations General Assembly.
- Open operations at the newly relocated JOC in August 2009.
- Continue to implement operational security for designated NSSEs.

Significant planned accomplishments in FY 2010 include the following:

- Continue to provide protection for the President and Vice President, their families, visiting heads-of-state/governments, other designated individuals, the White House and other buildings within the Washington, DC area.
- Continue to implement operational security for designated NSSEs.

2010 Request	535	535	\$67,824
Total Change 2009-2010	0	44	\$8,063

*The table above excludes Omnibus funding of \$100 million provided in P.L. 111-8. The Secret Service requests \$67.8 million and 535 FTE for this activity. This is an increase of \$8.1 million to the FY 2009 enacted budget. Adjustments to the base include position annualization and other cost increases.

CURRENT SERVICES PROGRAM DESCRIPTION:

Subjects (individuals and groups) and activities that pose threats to protectees and protected events are investigated. The Secret Service analyzes threats, investigates threats, and conducts intelligence advances in order to minimize the risk of harm to protected persons, property, and events. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasingly technological sophistication of the threat environment.

PPA: National Special Security Events

	Perm Pos.	FTE	Amount
2008 Actual	0	0	\$1,000

2010 Request	0	0	\$1,000
Total Change 2009-2010			

The Secret Service requests continued funding of \$1 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service plans and implements security designs for designated National Special Security Events (NSSEs). In addition, the Secret Service ensures the physical protection of the President, the public, and other Service protectees who participate in NSSEs.

Security at NSSEs is strategically crucial to homeland security in that NSSEs, by definition, involve persons, institutions, and landmarks that are integral to the governance of the nation, vital to national and/or global economic stability, or symbolically important to American citizens. The requested amount provides funding for the design, planning, and implementation of operational security plans for NSSEs.

PPA: Presidential Candidate/Nominee Protection

	Perm Pos.	FTE	Amount
2008 Actual	250	375	\$112,416
2009 Enacted	120	120	\$41,082
Non-Recur (2008 Campaign)	0	0	(\$26,082)
Campaign Labor Adjustment	(120)	(120)	(\$15,000)
2010 Current Services	\$0	\$0	\$0

2010 Request	\$0	\$0	\$0
Total Change 2009-2010	(120)	(120)	(\$41,082)

The Secret Service requests \$0 for FY 2010. This is a decrease of \$41.1 million from the FY 2009 enacted budget. \$26.1 million is non-recurred from the base budget for the 2008 Presidential Campaign. In addition, this request shifts \$15 million and 120 FTE to the investigative activity as no staffing requirements remain in FY 2010 for presidential candidate/nominee protection.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2007, equipment required for candidate protective details was purchased, the Secret Service began to shift required staffing resources, and candidate/nominee protection began for the 2008 Presidential Campaign. Secret Service personnel traveled to Washington, DC to receive candidate/nominee protective detail and operations training needed to mitigate myriad threats. The Service sent instructors to regional training centers to provide protective detail support training. The Service also trained 2,000 Transportation Security Administration and Immigration and Customs Enforcement agents to assist with campaign protection support.

Significant accomplishments in FY 2008 included the following:

- Began candidate/nominee protection earlier than for any previous presidential campaign.
- Provided protection to qualifying presidential candidates/nominees, their spouses, and children.
- Provided security at the major political conventions and debates.
- Screened over 1,785,000 people through magnetometers at political events and conventions.
- Provided security for over 1,600 campaign trips encompassing more than 5,900 sites.

Significant planned accomplishments in FY 2009 include the following:

- Provided protection of candidates/nominees, spouses and children during the final portion of campaigning.
- Provided protection of the post-election President and Vice President-elect along with security for the Inaugural events.

PPA: White House Mail Screening

	Perm		
	Pos.	FTE	Amount
2008 Actual	0	0	\$16,252

Total Change 2009-2010	0	0	(\$8,386)

The Secret Service requests \$25.3 million for FY 2010. This is a decrease of \$8.4 million from the FY 2009 enacted budget. Adjustments to the base include a \$3.2 million increase for GSA rent and a decrease of \$11.6 million for non-recurred funding for White House mail facility equipment.

CURRENT SERVICES PROGRAM DESCRIPTION:

Due to the heightened potential of biological and chemical threats, the Secret Service implemented a security program to screen all incoming mail, equipment, supplies, and agricultural products destined for the White House Complex. The goal of this security enhancement is to identify lethal threats at a remote location away from the White House Complex, and contain, mitigate, and investigate any vulnerability posed by these threats.

At the present time, the Secret Service is utilizing temporary facilities and personnel provided by the U.S. Army to assist in the screening. Once the mail and other items are transported to the screening facility by the Executive Office of the President (EOP), security personnel and technical specialists at the facility utilize strict protocols to sample the mail for contamination and monitor the environment for potentially hazardous substances. Any items containing unknown substances are subjected to analysis at an on-site laboratory and are quarantined at the facility until any potential hazards have been positively identified and subjected to appropriate mitigation procedures. Following a determination that the screened items pose no security risks to the White House Complex and Secret Service protectees, they are released to the EOP for administrative processing and distribution.

The Secret Service and GSA have received funding to design and construct a permanent White House Mail facility. In March of 2008, the groundbreaking ceremony for this facility was held to mark the commencement of construction on the new facility. The Secret Service continues to work with GSA, the design-build construction team, and numerous technical experts to ensure that the new building meets all safety and operational requirements.

Significant accomplishments in FY 2008 included the following:

- Held periodic construction coordination and design meetings with Balfour Beatty Construction, GSA, Edgewood Chemical Biological Center, and technical consultants.
- Broke ground for the new White House mail facility on March 14, 2008.
- Developed personnel requirements for facility management staff and identified critical knowledge, skills, and abilities for each position.
- Under the oversight of the Secret Service and GSA, contractors completed the underground support structure, installed underground piping and electrical services, and poured the majority of the first floor concrete for the new facility.

Significant planned accomplishments in FY 2009 include the following:

- Complete construction of building's structural components and install the building's primary electrical and mechanical systems.
- Procure all government-furnished, contractor-installed equipment.
- Install and perform on-site checks of nuclear, biological, chemical (NBC) filtration units and screening systems.
- Procure chemical, biological, radiological, nuclear and explosives (CBRNE) detection equipment.
- Procure laboratory equipment.
- Perform an assessment of incident response capabilities, develop incident response agreements, and devise facility internal incident response procedures.
- Develop facility standard operating procedures.

- Develop interagency agreements for secondary support (i.e., mask fit testing, waste disposal, second-tier laboratory support, etc.).
- Develop a materials tracking system for facility waste to meet local environmental standards.

Significant planned accomplishments in FY 2010 include the following:

- Complete building commissioning and system checkouts.
- Certify all chemical and biological processing fume hoods.
- Install CBRNE detection equipment and verify operations.
- Install laboratory analysis equipment and develop laboratory protocols.
- Implement a materials tracking system.
- Finalize interagency agreements/contracts for secondary support.
- Develop incident response agreements and conduct facility incident response exercises.
- Validate and finalize facility operating procedures.
- Transition operations from the temporary location to the new facility.

ADMINISTRATION

PPA: Headquarters, Management and Administration

	Perm		
	Pos.	FTE	Amount
2008 Actual	328	340	\$180,895
2009 Enacted	328	328	\$182,104
2010 Adjustments-to-Base	0	0	\$4,981
2010 Current Services	328	328	\$187,085
2010 Program Changes	5	3	\$33,960
2010 Request	333	331	\$221,045
Total Change 2009-2010	5	3	\$38,941

USSS requests \$221 million and 331 FTE for this activity. This is an increase of \$38.9 million to the FY 2009 enacted budget. This includes adjustments to the base of \$5 million for position annualization and other cost increases. Program changes include an additional \$33.96 million and 3 FTE to fund information integration and transformation initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION:

Administration is responsible for:

- (1) Tracking, monitoring, executing, and reporting the financial activities of the Secret Service;
- (2) Improving the efficiency and productivity of personnel;
- (3) Conducting analyses of program objectives and strategies to examine operational and cost factors impacting the continued viability of ongoing activities and the feasibility of proposed initiatives;
- (4) Procuring quality goods and services in a timely fashion; and

- (5) Administering the design, construction, acquisition, assignment, maintenance, and disposal of Service properties.

Administrative Operations Division (AOD):

The AOD plans, develops and administers policies and procedures and performs related activities for a variety of real and personal property management areas in support of the USSS Headquarters and field offices.

AOD functions include Protective and Investigative Facilities Management; JJRTC Facilities Management; Mail and Print Operations Management; Property Management; Warehouse and Disposal Management; Fleet Management; and Financial Programs Management.

AOD acts as the primary acquisition agent between the Secret Service and GSA; Department of State; the U.S. Army Corps of Engineers and other Federal Government and Department of Defense organizations for the acquisition, construction and renovation of Secret Service owned or leased real property.

AOD organizes and coordinates facilities and property management activities in support of the Secret Service's protective missions as well as designated NSSEs; and manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites. AOD provides building maintenance management, general repairs, engineering, architectural and design services, as well as labor services in support of all USSS Memorial Headquarters Directorates and Divisions.

Significant accomplishments in FY 2008 included the following:

- Opened new office in Beijing, China.
- Performed scheduled and necessary upgrades to USSS Headquarters building.
- Completed the Annual Physical Inventory within the prescribed timeframe of three months.
- Initiated preparation and delivery of operational support and resources for Campaign 2008 and required facility infrastructure in Colorado and Minnesota through coordination with GSA, United States Navy, United States Air Force, and United States Postal Service..
- Supported the preparation and support of security for campaign protectees' residences.
- Coordinated safe mail screening program for USSS Headquarters' and key protectees.

Significant planned accomplishments in FY 2009 include the following:

- Continue division support for the close-out of Campaign 2008 and UN General Assembly (UNGA-63) major event support sites.
- Establish and close out residence Command Posts for selected protectees impacted by the transition of the Administrations.
- Initiate site preparation and provide operational support resources for the Inauguration and G-20 Economic Summit major event support site

- Support the transition site renovations for Former President Bush and Former Vice President Cheney sites, as well as the close-out of residential security sites for campaign candidates Senator McCain and Governor Palin.

Significant planned accomplishments in FY 2010 include the following:

- Initiate planning and preparation to provide major event infrastructure support for the next annual UN General Assembly (UNGA-64) and other events as announced.

Enterprise Financial Systems Division (EFS):

The Enterprise Financial Systems (EFS) Division is responsible for systems development in specific business areas including core financial accounting and reporting; travel and relocation management; property management; and procurement management. EFS develops appropriate interfaces between these and other administrative systems, as EFS supports system users through training, communications, user procedures, and technical support services.

Significant accomplishments in FY 2008 included the following:

- Provided system support for closing the financial books within required DHS timeframes.
- Provided 100% system availability during the Democratic and Republican National Conventions and the United Nations General Assembly #63.
- Improved customer satisfaction by improving system integration, streamlining business processes.

Significant planned accomplishments in FY 2009 include the following:

- Support the implementation of a web-based time and labor distribution system.

Significant planned accomplishments in FY 2010 include the following:

- Provide the infrastructure to integrate time and labor with the enterprise financial application. This will support the improved financial reporting required by Congress, the Office of Management and Budget and the Secret Service.

Management and Organization Division (MNO)

MNO continued to actively participate in DHS planning and performance measurement processes, including (DHS) Strategic Plan revision, Risk Steering Committee Tier III (and associated working group) meetings, Performance Improvement Officer Council meetings, and the Performance Team working group and associated activities. MNO continued to coordinate Secret Service submission of timely responses to quarterly reporting requirements for the President's Management Agenda (PMA), and facilitated the Service's achievement of scores above the DHS average throughout FY 2008. MNO contributed to managing organizational change initiatives by continuously monitoring and coordinating the regular update and publication of official Secret Service policy directives.

Significant accomplishments in FY 2008 include the following:

- Designed and completed a Gap Analysis of the Secret Service's five major lines of business, which identified the current state of operations, the desired future state, and the gaps that need to be filled in order to achieve the desired future state. This tool will serve as a key factor in identifying the priorities for future budget requests.
- Actively participated in working groups of the DHS Risk Steering Committee.
- Conducted comprehensive reviews and updates of policy and procedure to fulfill external accreditation requirements. Success of these efforts contributed to renewal of accreditation of Forensic Services Division laboratory facilities by the American Society of Crime Lab Directors (ASCLD); and reaccreditation of the Rowley Training Center by the Federal Law Enforcement Training Accreditation (FLETA) organization.
- Improved accessibility of forms by converting them to a format available to all USSS employees via the Secret Service intranet.
- Completed an assessment of records storage capabilities to maintain federally-mandated records storage protocols.

Significant planned accomplishments in FY 2009 include the following:

- Continue to refine the conceptual framework, formal process, and required resources for conducting meaningful program evaluations.
- Implement and institutionalize a new process for developing a Secret Service Concept of Operations (CONOPS), integral to the strategic planning process.
- Reconfigure MNO's current process for data transfer between Secret Service IT systems, in order to realize increased efficiency and substantial cost savings.
- Continue to participate in the activities of the DHS Risk Steering Committee, including development of the DHS Risk Assessment Process for Informed Decision-making (RAPID) tool.
- Modify hard copy distribution protocols for agency directives and forms, and greater reliance on intranet-based libraries, in order to achieve greater efficiency in printing and reproduction.
- Take steps to ensure Records Management in the Secret Service is understood and tools are in place to facilitate effective and efficient records management, in order to pave the way for deployment of an Enterprise Records Management System (ERMS) to help manage records electronically.

TRAINING

PPA: Rowley Training Center

	Perm Pos.	FTE	Amount
2008 Actual	273	272	\$54,349
2009 Enacted	273	272	\$53,189
2010 Adjustments-to-Base	0	0	\$1,171
2010 Current Services	273	273	\$54,360
2010 Program Change	0	0	\$0
2010 Request	273	273	\$54,360
Total Change 2009-2010	0	0	\$1,171

*The table above excludes Omnibus funding of \$100 million provided in P.L. 111-8. The Secret Service requests \$54.4 million and 273 FTE for this activity. This is an increase of \$1.2 million from the FY 2009 enacted budget. Adjustments to the base include position annualization and other cost increases.

CURRENT SERVICES PROGRAM DESCRIPTION:

The James J. Rowley Training Center (JJRTC) is responsible for:

- (1) Developing, administering, and coordinating training programs for Secret Service employees, and for other federal law enforcement agencies and law enforcement officials from various state and local police departments;
- (2) Providing all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel;
- (3) Providing training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components;
- (4) Providing specialized operational training for the Service's tactical elements (counter-assault, counter-sniper, and emergency response teams), which include the core components of the protective methodology;
- (5) Evaluating, selecting, and training all Secret Service explosive detection canines/tactical canines;
- (6) Administering and coordinating fitness, control tactics, vehicle operation training, emergency medicine, and water safety programs;
- (7) Conducting research and testing of munitions, and related equipment technology; and
- (8) Administering the acquisition, storage, maintenance, and issuance of firearms, operational weapons and ammunition to all Secret Service personnel.

Significant accomplishments in FY 2008 included the following:

- Provided all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel.
- Provided training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components.
- Provided training for in-service personnel in preparation for the 2008 Presidential Campaign.

Significant planned accomplishments in FY 2009 include the following:

- Continue to provide all basic and in-service training and specialized operational skills training for special agents, Uniformed Division officers, special officers, and other professional personnel.
- Continue to provide training for executive, supervisory, administrative, cyber/IT solutions, and foreign language training for all Service components.
- Substantially increase in-service training to Secret Service Field Offices on a regional basis. This initiative will provide a substantial increase in the number of available training opportunities to Secret Service employees and allow for enhanced training with other local, state and federal law enforcement agencies.

Significant planned accomplishments in FY 2010 include the following:

- Continue to provide all basic and in-service training and specialized operational skills training for special agents, Uniformed Division officers, special officers, and other professional personnel.
- Continue to provide training for executive, supervisory, administrative, cyber/IT solutions, and foreign language training for all Service components.
- Substantially increase in-service training to Secret Service Field Offices on a regional basis. This initiative will provide a substantial increase in the number available training opportunities to Secret Service employees and allow for enhanced training with other local, state and federal law enforcement agencies.

INVESTIGATIONS

	Perm Pos.	FTE	Amount
2008 Actual	1,859	1,730	\$301,800
2009 Enacted	1,996	1,993	\$331,974
2010 Adjustments-to-Base	0	3	\$7,530
Campaign Labor Adjustment	120	120	\$15,000
2010 Current Services	2,116	2,116	\$354,504
2010 Program Change	0	0	\$2,000
2010 Request	2,116	2,116	\$356,504
Total Change 2009-2010	120	123	\$24,530

USSS requests \$356.5 million and 2,116 FTE for this activity. This is an increase of \$24.5 million from the FY 2009 enacted budget.

CURRENT SERVICES PROGRAM DESCRIPTION:

The functional organization of the Secret Service accommodates its dual mission; permanent protective details dedicated to protection, as well as a worldwide network of field offices to carry out the investigative responsibilities. However, these field offices are not only responsible for investigations but also routinely provide agents to support the protective mission. That is,

agents assigned to these offices spend significant time traveling away from their field office augmenting the Secret Service's permanent and temporary protective details. This is a very efficient way to provide protection as it allows for additional resources when protective mission requirements demand them. Also, agents trained to be good investigators come with these skills when doing protection which is important to the success of the protection mission.

The Secret Service is mandated by statute and executive order to carry out criminal investigations. The Secret Service was established as a law enforcement agency in 1865, with an original mandate to investigate the counterfeiting of U.S. currency. This activity:

- (1) Exercises broad investigative jurisdiction over a wide variety of financial crimes;
- (2) Has a long history of protecting American consumers and industry from financial fraud;
- (3) Has primary authority for the investigation of access device fraud, including credit and debit card fraud, and parallel authority with other law enforcement agencies in identity crime cases.
- (4) Has experienced an expansion of its investigative mission since the early 1990s to include concurrent jurisdiction with the United States Department of Justice (DOJ) for financial institution fraud; and
- (5) Has assumed additional responsibilities relative to computer crime as the Internet and use of personal computers became mainstream, and economies of scale made this technology affordable to even the most common criminals.

The combination of the information revolution and the effects of globalization have caused the investigative mission of the Secret Service to change dramatically. As a result, the Secret Service has evolved into an agency that is recognized worldwide for its expertise in investigating all types of financial crimes; and its efforts to detect, investigate and prevent financial crimes are aggressive, innovative, and comprehensive.

PPA: Domestic Field Office Operations

	Perm <u>Pos.</u>	<u>FTE</u>	<u>Amount</u>
2008 Actual	1,480	1,358	\$223,371

2010 Program Change	<u>0</u>	<u>0</u>	<u>\$0</u>
2010 Request	1,705	1,705	\$260,892
Total Change 2009-2010	108	108	\$19,120

The Secret Service requests \$260.9 million and 1,705 FTE for this activity. This is an increase of \$19.1 million from the FY 2009 enacted budget. Adjustments to the base include position annualization and cost increases. \$13.5 million and 108 FTE are reallocated to this program from Presidential Candidate/Nominee Protection for the 2008 Presidential Campaign.

CURRENT SERVICES PROGRAM DESCRIPTION:

USSS investigates violations of laws relating to counterfeiting of obligations and securities of the United States, and financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, money laundering and electronic crimes. Domestic field resources are focused on achieving the DHS strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context which addresses the spread of the Internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

Significant accomplishments in FY 2008 included the following:

- **Financial Crimes Investigations:**

- In early July 2008, fraud investigators with a major U.S. financial institution passed information to the Orlando Field Office regarding a possible “Ponzi” or pyramid scheme operation. Examination of bank records revealed suspicious transactions similar to fraudulent activity identified in previous investigations involving digital advertising ventures.

Investigation by Orlando agents revealed the subject company was engaging in questionable business practices that operated on a pyramid scheme principle. The basis of fraud in a pyramid scheme derives from the need to generate continuous investment input from new customers in order to meet the rates of return promised to earlier investors. Subsequent undercover operations conducted by Orlando agents acting as new investors provided agents an inside view of the subject business’ operations which revealed no true attempts to establish legitimate business relationships or transactions.

Based on this evidence, Orlando agents moved quickly to target and seize potential profits and/or proceeds derived from violations of Title 18, United States Code, Section 1343 (Wire Fraud). On August 5, 2008, Orlando and Tallahassee agents executed a series of federal search and seizure warrants on business locations, residences, and bank accounts linked to a “Ponzi.” Pursuant to the seizure proceedings, agents have identified and frozen assets currently exceeding \$93.5 million. The Secret Service is currently coordinating with DOJ to identify victims that may be entitled to a portion of the seized proceeds.

Indictments in this case are pending.

- **Data Breach/Network Intrusion Investigations:**

- Agents of the Pittsburgh Field Office launched an undercover Internet-based investigation targeting online suspects involved in various illegal activities to include the purchase, sale, and exploitation of various financial instruments and personnel identification information and documents.

In conjunction with this investigation, Pittsburgh agents were able to establish an online relationship with an individual known to them as “Iceman.” Iceman was

associated with Internet sites known for illegal carding activity, and he was identified as the owner and administrator of CardersMarket, a notorious carding website. In furtherance of the investigation, undercover agents and confidential informants under the control of the Secret Service conducted online transactions with Iceman and purchased stolen access device numbers.

In coordination with the Service’s Criminal Investigations Division (CID), the Pittsburgh Field Office was able to identify Iceman as Max Butler of San Francisco, California. On September 5, 2007, agents from Pittsburgh, San Francisco, CID, and Computer Emergency Response Team (CERT) executed arrest and search warrants upon Butler and his residence, recovering a voluminous amount of evidence tied to his illegal activities. Due to extensive encryption utilized by Butler, this evidence was initially beyond the reach of law enforcement.

Subsequent efforts by agents and personnel assigned to CERT led to the decryption of Butler’s files. Computer forensics revealed Butler’s extensive hacking activities targeted over 35 banks, 40 corporations, and 100 point of sale platforms. Additional analysis uncovered various malware, child pornography, and 1.6 million stolen credit card numbers.

Significant planned accomplishments in FY 2009 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2010 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

PPA: International Field Administration and Operations

	Perm		
	Pos.	FTE	Amount
2008 Actual	70	76	\$26,364
2009 Enacted	74	73	\$30,000
2010 Adjustments-to-Base	0	1	\$705
2010 Current Services	74	74	\$30,705
2010 Program Change	0	0	\$0
2010 Request	74	74	\$30,705
Total Change 2009-2010	0	1	\$705

The Secret Service requests \$30.7 million and 74 FTE for this activity. This is an increase of \$.7 million to the FY 2009 enacted budget. Adjustments to the base include position annualization and other cost increases.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service provides a comprehensive, internationally coordinated response to new threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving DHS' strategic objective of economic security (e.g. combating foreign counterfeiting of U.S. currency). The requested amount funds 22 international offices in 18 countries in a strategic context of the worldwide spread of the Internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization.

Significant accomplishments in FY 2008 included the following:

- The The San Diego, Miami, and Boston Field Offices, in close coordination with the Headquarters Divisions, initiated an investigation that eventually led to the identification and indictment of perpetrators involved in the hacking of nine major U.S. retailers and the theft and sale of more than 40 million credit and debit card numbers. The defendants in this case are from Estonia, the People's Republic of China, Belarus, and the United States.

This three-year investigation revealed that the eleven defendants successfully obtained the credit and debit card numbers by "wardriving" and hacking into the wireless computer networks of nine major retailers. Once inside the networks, they installed "sniffer" programs that would capture card numbers, as well as password and account information, as they moved through the retailers' credit and debit processing networks.

After they collected the data, the conspirators concealed the data in encrypted computer servers that they controlled in Eastern Europe and the United States. They sold some of the credit and debit card numbers, via the Internet, to other criminals in the United States and Eastern Europe. The stolen numbers were "cashed out" by encoding card numbers on the magnetic strips of blank cards. The defendants then used these cards to withdraw tens of thousands of dollars at a time from ATMs. The defendants were able to conceal and launder their fraudulent proceeds by using anonymous Internet-based currencies both within the United States and abroad, and by channeling funds through bank accounts in Eastern Europe.

As a result of this investigation, on August 5, 2008, the defendants were charged with computer fraud, wire fraud, access device fraud, aggravated identity theft, and conspiracy.

This case is the largest and most complex case of its type in U.S. history and achieves the Department of Homeland Security's strategic objective of protecting our nation's critical financial infrastructure from transnational criminal groups.

It is notable to report that in using the estimation methodology of limiting each credit card to a potential value of \$500 per instrument, it can be estimated that the Secret Service prevented the potential loss of \$20 billion dollars. When looking at the ratio of our appropriation for cyber investigations to the amount of loss prevented to the public, the return on investigation/investment of taxpayer dollars is significant.

Significant planned accomplishments in FY 2009 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2010 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

PPA: Electronic Crimes Special Agent Program/Electronic Crimes Task Forces

	Perm		
	<u>Pos.</u>	<u>FTE</u>	<u>Amount</u>
2008 Actual	289	276	\$43,961
2009 Enacted	305	303	\$51,836
2010 Adjustments-to-Base	0	2	\$1,205
Campaign Labor Adjustment	12	12	\$1,500
2010 Current Services	317	317	\$54,541
2010 Program Change	0	0	\$2,000
2010 Request	317	317	\$56,541
Total Change 2009-2010	12	14	\$4,705

The Secret Service requests \$56.5 million and 317 FTE for this activity. This is an increase of \$4.7 million to the FY 2009 enacted budget. Adjustments to the base include position annualization and other cost increases. \$1.5 million and 12 FTE are reallocated to this program from Presidential Candidate/Nominee Protection for the 2008 Presidential Campaign. Program changes include an additional \$2 million to fund Electronic Crimes Task Forces (ECTF).

CURRENT SERVICES PROGRAM DESCRIPTION:

Through the Electronic Crimes Special Agent Program (ECSAP), the Service trains special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through Electronic Crimes Task Forces (ECTF), the Service forms partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTFs combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in a strategic environment characterized by a rise in electronic financial transactions and associated criminal activity.

Significant accomplishments in FY 2008 included the following:

- Electronic Crimes Special Agent Program (ECSAP):

This program seeks to mitigate vulnerabilities to the nation's infrastructure and sensitive communications networks by training special agents and state/local law enforcement partners on computers, PDAs, telecommunications devices, and other electronic media to obtain forensic data and investigative leads on organized criminal groups operating domestically and abroad, using new technologies. The Secret Service has been instrumental in the establishment of the National Computer Forensic Institute (NCFI) in Hoover, AL. This facility has enabled USSS to train state and local law enforcement officials, district attorney's, and judges in computer forensic and judicial strategies.

Since opening on May 19, 2008, the National Computer Forensic Institute has provided the following training to our law enforcement partners:

- Three Basic Investigation of Computer Crimes (BICEP) classes; 67 state and local law enforcement officials attended these classes.
- Three Network Intrusion (NITRO) classes; 48 state and local law enforcement officials attended these classes.
- Two Basic Recovery of Computer Evidence (BCERT) classes; 48 state and local law enforcement officials attended these classes.
- One Advanced Forensics Training (AFT) class; 24 state and local law enforcement officials attended this class.
- Two classes for prosecutors (CFC-P); 48 state and local prosecutors attended.
- One class for judges (CFC-J); 24 state and local judges attended.
- From May 19, 2008 to August 28, 2008, the USSS held 12 classes, trained 259 state and local police officials, prosecutors, and judges from 43 states.

Significant planned accomplishments in FY 2009 include the following:

- Complete ECSAP training for 180 new agents.
- Continue to expand the training provided by the NCFI to our state and local partners.
- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2010 include the following:

- Continue to foster exceptional relationships with other federal, state, and local law enforcement agencies by building on proven investigative techniques and expanding methodologies that have already been developed and deployed.
- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

PPA: Support for Missing and Exploited Children

	Perm

2010 Request	20	20	\$8,366
Total Change 2009-2010	0	0	\$0

The Secret Service requests \$8.4 million and 20 FTE for FY 2010.

CURRENT SERVICES PROGRAM DESCRIPTION:

Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U.S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds for activities related to the investigations of missing and exploited children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

Description of Item

In order to meet its protective and investigative mission tempo, USSS must completely transform its information infrastructure. The network and mainframe system used today struggles to support basic operations, and is incapable of handling emerging “real-time” mission intelligence and decision-support requirements. Current systems are functionally unable to meet a host of new information policy mandates from DHS and the Office of the Director of National Intelligence (ODNI). The current infrastructure is incompatible with current federal guidelines for information sharing, enterprise architecture, and privacy protection, and cannot be configured to support the growing technology requirements of the agency. USSS’ protective and investigative missions will be functionally unable to respond to the increasing volume of threats without additional investment.

The information integration and transformation program will establish a new Secret Service Information Technology (IT) infrastructure. This new infrastructure is necessary in order for the Secret Service to address four critical vulnerabilities which constitute major mission threats:

- Mission Threat 1: Inability to understand & counteract cyber-terrorist attacks.
- Mission Threat 2: Inability to communicate during a crisis.
- Mission Threat 3: Insufficient network security & successful hacker attack.
- Mission Threat 4: Secure investigations compromised by stolen information.

History has indicated that these issues cannot be addressed by program realignment or incremental change. The stark reality is that the without a major infrastructure overhaul, Secret Service faces the prospect of near-term mission failure and must execute a major information technology transformation to ensure the agency's ability to fulfill its mission.

To meet this challenge, USSS has conducted across-the-board requirements analyses and program reviews within internal offices to ensure replacement systems will be right-sized and scalable for future years. The plan addresses inequities in a rational and programmatic approach that will leverage DHS resources and partner capabilities. Currently, the diagram of this analysis is Secret Service architecture sensitive and under security classification review. The information integration and transformation request includes four primary components to address the mission threats faced by the Secret Service:

- Build multiple-level security into the new infrastructure.
- Enable the enterprise to meet new information-sharing mandates.
- Enable the resources to conduct secure investigations.
- Ensure parity with critical White House communications systems.

The systems planned for the infrastructure transformation program will also bring the Secret Service into compliance with a wide variety of Presidential, national, and DHS cyber-related mandates and initiatives.

This transformation effort includes replacing the brittle and outmoded mainframe IT system with a modern, web-server-based environment. Such an agile, mission-centric, integrated IT environment will provide the Secret Service with a flexible platform for a cost-effective, service oriented architecture and web services implementation. The new architecture will enable across-the-board, multi-level security and will eliminate technology-related issues that prevent USSS from exchanging terrorist intelligence and critical information with DHS, the intelligence community, and law enforcement communities.

The new infrastructure will provide secure communications for inter-agency protective operations and investigations. Most importantly, the infrastructure will close a dangerous gap in interoperability with the Presidential communications systems of the White House Communications Agency (WHCA) and White House Executive Office of the President (WHEOP).

Justification

Database Architecture & Maintenance - \$ 4.0 million

Achieving the commitments in the National Security Strategy (NSS) requires a fundamental change in the way information technology is provided and managed by USSS. The Service cannot transform its data operations to support the DHS Enterprise Data Management Directive 103.01 and the Homeland Security Act 2002 by merely maintaining the status quo. The

Service's data environment is fragile and cannot sustain the tempo of current or future operational missions.

Data engineering and architecture will augment data competencies and tools to improve information sharing across a multitude of domains. This will include making data more visible, accessible, understandable, trusted, and interoperable. The Service must implement user tools or capabilities that act as directed information retrieval tools and information filters for the special agents. These enablers will discover, interpret, and sort the data according to designated parameters to eliminate unwanted data and present high-priority data first. Funding will be used to procure contract services to perform data discovery, data asset interoperability assessments, data security marking, and establish context metadata and pedigree metadata, resulting in improved data quality.

Information Assurance - \$ 2.4 million

Achieving the commitments in the NSS requires a fundamental change in the way information technology is protected and secured by USSS. The Service cannot transform its information operations to support the Congressional and DHS Information Assurance (IA) initiatives by maintaining the status quo. The Service is vulnerable and at risk for professional-grade cyber attacks while our ability to share multi-level information across the enterprise is minimal. Also, the following additional requirements recognize the importance of information security to the economic and national security interests of the United States. Title III of the E-Government Act, Federal Information Security Management Act (FISMA), HSPD-12 Common Identification Standard for Federal Employees and Contractors, HSPD-7 Protection of Critical Infrastructure, and Federal Information Processing Standard 140-2 certification emphasize the need for USSS to develop, document, and implement an enterprise program to provide information security for the systems that support the missions of the USSS.

With this funding, the Service's IA program will enable a dynamic, information-sharing environment that delivers secure information at the right time, to the right recipient, and in the right format under every circumstance. This environment must be securely managed and protected enterprise-wide from threats posed by adversaries. Providing enterprise-wide protection of the dynamic information-sharing environment requires a cohesive, integrated approach to IA that will provide policies, procedures, technologies, and training. Funding will be used to procure contract services and tools.

Information Technology Infrastructure - \$ 14.86 million, 5 positions (3 FTE)

The Service's infrastructure framework is in a degraded state and adversely impacting critical operational missions. This request includes funding for five additional professional positions.

The Service's information technology infrastructure (ITI) program will provide rapid network access to the right information at the right time in a form that is immediately useful, thus giving the Service mission critical operations information and decision superiority. The information technology infrastructure will be re-engineered to include the development of requirements, guidelines, and new programs and technologies as an immediate and critical need. Network and server competencies will be strengthened by adding commercial services and the government staff will be trained and educated to support the transformation.

This funding request includes the operations/maintenance of data center functions to include servers, networks, U.S. and foreign circuits, wide area network (WAN) connectivity, network operating system software, network and information security monitoring systems, technology refresh, and update and/or replacement of legacy/aging equipment or software. In addition, the request includes optimization and performance monitoring, such as establishing and baselining infrastructure performance, establishing periodic reporting for identifying and reacting to trends, changes and issues, and training ITI staff to build competencies in IT performance management.

Cyber Security - \$ 6.4 million

Achieving the President's National Cyber Security Strategy requires a fundamental change in the way the Secret Service is protected and secured. The Service must transform its cyber operations to support Presidential, Congressional and DHS cyber initiatives. Additionally, Title III of the E-Government Act, Federal Information Security Management Act (FISMA), HSPD-23 Cyber Initiative, and FIPS 140-2 certification, require USSS to develop, document, and implement an enterprise cyber program.

With this funding, the Service's cyber program will enable a proactive, cyber defense environment that provides situational awareness, command and control, defensive mechanisms and information assurance policies and processes. This environment will provide enterprise-wide protection through the dynamic information-sharing environment of the DHS and ODNI cyber programs. It will be a cohesive, integrated approach to cyber defense that will provide policies, procedures, technologies, and training across all Secret Service directorates.

Cross Domain Application/Data Environment (Multi-Level Security) - \$ 6.3 million

The Cross-Domain Application/Data Environment project is the solution to respond to the NSS and meet the DHS goals and policies that require a secure mission environment while interoperating in a sensitive business environment. This project is a multi-year project that will consist of a major acquisition process, systems engineering, architecture, design, development, test and evaluation, deployment, maintenance, and sustainment. Contractor services will be utilized to design, test, pilot, deploy, and establish maintenance. This multi-level secured cross-domain IT application and data environment will provide the Service with the most efficient and effective means to perform mission critical operations.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding this initiative will have a significant impact on the dual mission of USSS. With the requested funding, USSS will be able to implement a secure, redundant national security communication and coordination infrastructure to support information sharing across diverse security domains, including relevant federal, state, local, and tribal stakeholders. The Service will maintain its ability to ensure the continuity of government operations, including the protection of government personnel, facilities, national/international leaders, and the nation's communications infrastructure.

USSS also requires full funding to re-establish a security quality assurance program, and ensure full compliance with the relevant DHS and National Security Directives. Moreover, the absence of full funding impedes the Service's ability to become compliant with policies and statutes from ODNI and FISMA.

Without the requested funding, the agency will be unable to investigate and guard against cyber attacks, unable to improve cyber security response to attacks, and unable to protect its communications systems and networks that support both the investigative and protective mission.

This cross-cutting initiative will directly impact protective and investigative performance measures including – the *Percentage of Instances Protectees Arrive and Depart Safely (Campaign, Domestic, and Foreign Dignitary Protectees)*, the *Volume of Intelligence Assessed (classified information)*, *Financial Crimes Loss Prevented (Through a Criminal Investigation and by the Secret Service Electronic Crimes Task Forces)* and *Counterfeit Passed as the Percent of Amount of Genuine U.S. Currency in Circulation*.

Domestic/ Foreign/ Campaign Protection

Percentage of Instances Protectees Arrive and Depart Safely. The percentage of travel stops where protectees arrive and depart safely.

The performance target is always 100 percent. Anything under 100 percent is unacceptable. Securing protectees is the ultimate priority of the Secret Service. As a rule, risk and the level of effort required to provide security increase dramatically when a protectee is traveling. In the years between 2003 and 2008 the White House Communications Agency (WHCA) modernized their telecommunications infrastructure by transitioning to Internet Protocol (IP) for all Voice, Radio, Satellite, Video, Secure Voice, Secure Video, and Wireless communications. This transformation revolutionized WHCA's overall communications capacity and agility while rendering Secret Service systems and devices incompatible with the IP capability. The Secret Service instituted a temporary and partial solution to address this incompatibility.

This initiative requires funding to modernize Secret Service communications systems in order to maintain parity and interoperability with the White House Communications Agency. By enabling seamless communications with WHCA, Special Agent's and Uniformed Division Officers will be able to focus on the mission of ensuring the safety of protectees without the distraction of technical issues. Less time expended resolving technical issues or not receiving timely information increases the possibility of harm to a protectee which in turn can prevent the attainment of the performance target of 100 percent protection.

Protective Intelligence - Assessments

Volume of Intelligence Assessed (classified information). The amount and results of intelligence assessed by USSS; results are classified and provided to qualified evaluators upon request.

Secret Service's classified activities are sharply limited due to network incompatibilities and fundamental access constraints as Secret Service does not have a multi-level secure network and cannot connect. The levels of intelligence assessment and collaboration between the agency and DHS, as well as the greater intelligence community, will increase exponentially once multi-level secure information systems are in place.

Infrastructure Investigations – Electronic Crimes

Financial Crimes Loss Prevented. Actual direct dollar loss prevented by Secret Service's Electronic Crimes Task Forces' (ECTFs) investigations and cases closed.

The USA PATRIOT Act of 2001 mandates that the Service develop a network of ECTFs through out the United States. This measure reports the actual dollar loss involved in the Secret Service's ECTFs' investigations and cases closed. USSS must transform its information infrastructure to keep pace with the evolution of these crimes and their migration into transnational cyber attacks with targeted impact in the financial sectors.

Counterfeit Passed as the Percent of Amount of Genuine U.S. Currency in Circulation. The dollar value of counterfeit notes passed on the public, reported as a percent of genuine currency. (Calculated by dividing dollar amount of counterfeit notes passed by dollar value of genuine currency in circulation.)

This measure is an indicator of the proportion of counterfeit currency relative to the amount of genuine U.S. Currency in circulation, and reflects efforts to reduce financial losses to the public attributable to counterfeit currency. The Information Integration & Transformation Program allows the Secret Service to rapidly exchange critical information with others in the law enforcement community and intelligence community regarding various criminal activities such as counterfeiting of United States currency. The tracking of such activity and the rapid sharing of this type of information will provide the nexus to prevent further counterfeit activity.

Program Increase 2: Cyber Infrastructure Protection Program

Strategic Goal(s) & Objective(s): 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources

PPA: Electronic Crimes Special Agent Program and Electronic Crimes Task Forces

Program Increase: Positions 0 FTE 0 Dollars \$2,000

Funding Profile: FY 2008 \$43,961; FY 2009 \$51,836

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request

Description of Item

Electronic Crimes Task Force (ECTF) Initiative - \$ 5.12 million

The Secret Service has established 24 Electronic Crimes Task Forces to combine the resources of academia; the private sector; and local, state, and federal law enforcement agencies to combat computer-based threats to our financial payment systems and critical infrastructures. Additionally, the combined resources allow ECTFs to identify and address potential cyber vulnerabilities before the criminal element exploits them. This proactive approach has successfully prevented cyber attacks that otherwise would have resulted in large-scale financial losses to U.S. financial institutions and the disruption of our financial critical infrastructures.

Currently, the ECTFs provide support, resources, and personnel to investigate criminal cases that have significant economic or community impact; involve organized criminal groups (national and transnational); or the utilization of schemes involving new technology. Funding for the ECTF program will increase the Secret Services’ ability to prevent, detect, and investigate various forms of computer related crimes, including attacks specifically targeting our financial institutions.

Quarterly Meetings

Each ECTF will conduct quarterly meetings of task members, including state and local partners, within their respective districts to provide cyber-crime prevention information and a venue for community outreach.

Electronic Crimes Task Forces Tabletop Exercises

The ECTF Program, in coordination with the Information Analysis and Infrastructure Protection Directorate, and the local, state and private sector coordinators of DHS, will conduct two tabletop exercises. These tabletop exercises are designed to test the emergency response of

agencies and entities entrusted to protect and secure critical infrastructure. The tabletop exercises will also serve to further refine best practices within these sectors and build on the public-private partnership initiative fostered within the ECTF Program.

ECTF Operational Funding

Each ECTF will require funding to cover expenses related to cell phones and overtime for ECTF law enforcement members, major case funding, funding for joint operations, critical needs, training, and specialized equipment used for electronic investigations.

Equipment Costs

Currently, seven of the established ECTFs lack video conferencing equipment. Requested funding will provide this equipment to ensure that ECTFs have the necessary tools to fulfill their mission.

ECTF Online Reporting & Collaboration

Statistical reporting for the ECTF Program is accomplished through the use of an online reporting system. Much of the ECTF collaborative efforts also take place online through several web applications. This request would cover the cost of replacing servers on a two year replacement cycle, Certification and Accreditation and a maintenance contract. These costs are currently covered by TEOAF Funding. These online reporting collaboration tools are key elements to the continued success in meeting the mandates of the Patriot Act. The reporting systems and web applications in conjunction with the database constitute an IT “system” by DHS standards.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funding will enhance the Secret Service’s ability to forestall and counter cyber attacks on financial and communications networks, protect against and prosecute incidences of cyber fraud, identity theft, and digital counterfeiting, and to conduct investigative and prosecutorial activities relating to the exploitation of e-currencies and related U.S. payments systems. The additional funding is also critical to ensuring that USSS is able to counter attacks on the cyber infrastructure that underpins the physical security of protectees and NSSEs.

The program will directly support the achievement of the long-term performance goals of Secret Service investigative programs, and the achievement of the DHS Strategic Goals and Objectives as the cross-cutting effects of the program will enhance multiple infrastructure and financial investigations. Additionally, this initiative affects a variety of outcome measures as it enhances the ability to prevent passing of counterfeit currency and provides essential tools for protecting the Nation’s economic infrastructure by reducing losses attributable to financial and electronic crimes.

Specifically, this initiative will directly impact the following outcome performance measures – *Financial Crimes Loss Prevented (Through a Criminal Investigation and by the Secret Service Electronic Crimes Task Forces)* and *Counterfeit Passed as the Percent of Amount of Genuine U.S. Currency in Circulation*.

Infrastructure Investigations – Electronic Crimes

Financial Crimes Loss Prevented. Actual direct dollar loss prevented by the Secret Service's Electronic Crimes Task Forces' investigations and cases closed.

The USA PATRIOT Act mandates that the Secret Service develop a network of ECTFs through out the United States. This measure reports the actual dollar loss involved in the Secret Service's ECTFs' investigations and cases closed. This initiative requires funding to: broaden outreach to law enforcement partners through meetings and exercises; purchase of necessary equipment; provide for personnel costs; and, support an online reporting system. To protect the Nation's financial systems and fulfill our mandated mission, funding will support the attainment of our performance targets by providing pertinent information to law enforcement partners and testing emergency response capabilities through exercises and updated reporting systems.

Infrastructure Investigations – Counterfeit Currency

Counterfeit Passed as the Percent of Amount of Genuine U.S. Currency in Circulation. The dollar value of counterfeit notes passed on the public reported as a percent of genuine currency. (Calculated by dividing dollar amount of counterfeit notes passed by dollar value of genuine currency in circulation.)

This measure is an indicator of the proportion of counterfeit currency relative to the amount of genuine U.S. Currency in circulation, and reflects efforts to reduce financial losses to the public attributable to counterfeit currency. Due to the increased availability of computer hardware and software and the decrease in the cost of digital technologies, counterfeiters can attain high quality notes and produce these notes faster than ever before. Funding is necessary to protect the nation's financial systems and critical infrastructure from an influx of counterfeit currency by having the necessary tools to prevent these crimes. Funding for this initiative will enable the Secret Service to increase its capability to impede and prevent counterfeit notes passed on the public.

Program Increase 3:

Protective Countermeasures

Description of Item

Uniformed Division Modernization

This program increase is contingent upon authorizing legislation that includes a restructuring of the pay chart for the United States Secret Service Uniformed Division and is part of a larger modernization of the Uniformed Divisions legal authorities which are currently derived from both District of Columbia and United States code. Once the legislation has been enacted, the Secret Service will require an additional \$4,040,000 appropriation to implement the pay chart restructuring.

The USSS Uniformed Division (UD) began as the White House Police, and was originally created as a separate and distinct organization by Public Law 67-300, approved September 14, 1922. The White House Police came under the direct supervision of the Secret Service in 1930. The mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involves duties in connection with the protection of the Executive Mansion and grounds in the District of Columbia; any building in which White House offices are located; and the President and members of his immediate family.

The members of the UD assigned to the White House Branch perform many functions that thrust them into the public light. These officers process thousands of staff members, other workers, members of the press and those individuals with appointments into the White House Complex on a daily basis. Officers assigned to this Branch provide protection to the White House Complex through the effective use of fixed posts, foot beats, bicycle patrols and police cruisers. Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise to our mission on a daily basis in and around the White House Complex. The Special Operations Section of the UD is an additional unit responsible for tours of the White House Mansion and for the coordination of special events such as the Easter Egg

Roll, Presidential Receptions and Inaugural events. The White House Vehicle Inspection Team and the Counter Surveillance Unit also help achieve the UD goal of providing a safe and protected environment.

The Uniformed Division provides a safe and secure environment for the President of the United States, his immediate family, the Vice President, their staff members and myriad other White House employees that work in the White House Complex each day. In addition to these responsibilities, personnel assigned to the White House Branch perform similar functions at the Treasury Building, the New Executive Office Building, the Eisenhower Executive Office Building and other locations which house Presidential Offices. In addition to the White House Branch, other publicly visible components of the UD are the Naval Observatory Branch and Foreign Missions Branch.

Despite being part of a federal agency, many of the Secret Service's Uniformed Division's (UD) governing authorities are housed in the District of Columbia Code. The combination of being both federal employees and subject to District of Columbia work environment regulations makes administering UD pay and benefits overly cumbersome and complex, specifically in the realm of compensation related provisions within the Fair Labor Standards Act (FLSA). Furthermore, UD faces ongoing recruiting and retention challenges, in part because of their current pay structure and their inability to make use of certain hiring flexibilities such as offering higher starting salaries to applicants who have prior state or local law enforcement experience. There are also anomalies in the current salary table that need to be addressed—some Sergeant Technicians are promoted to Lieutenant, yet actually receive a pay cut, and there is a haphazard distribution of pay increases across both ranks and steps.

The FY 2010 budget proposal for the Secret Service contains draft legislation, “The Uniformed Division Modernization Act of 2010”. If enacted it will:

- Move the bulk of governing authorities from UD pay and compensation issues out of the District of Columbia Code and into Title 5 of the United States Code resulting in:
 - simplified administration of overtime ensuring that UD personnel are compensated for all time worked
 - greater flexibility in hiring personnel at higher steps due to their prior law enforcement experience
 - increased scheduling capabilities
- Create a new salary table for Uniformed Division personnel that establishes consistent rank and step increases. The proposed salary table:
 - is a restructure utilizing principles OPM uses to design pay charts across the government.
 - provides most personnel with a pay increase, but targets the most junior officers to establish a hiring and retention incentive
 - reduces the number of years necessary to reach the final step in any grade
 - rectifies all of the anomalies in the current salary table

Every effort has been made during this process to draft the language in such a way as to preserve all existing authorities and benefits for UD members that are specified within the DC code. The following list details the specific effects of enacting the draft legislation:

A. Treatment of Overtime and Roll Call Hours

There are several disparities between the District of Columbia Code and Title 5 of the United States Code. Currently the USSS calculates overtime under both authorities and pays the higher of the two. Additionally, there are discrepancies in the calculation of actual time worked. Under the District of Columbia Code, officers are not paid for Roll Call, the briefing they receive before they go to their posts. However, because they are federal employees, they may be compensated for their time spent in roll call if they accumulate 85.5 hours of regular time and overtime in a given pay period (the roll call hours are allowed to be included in this calculation). Conversely, if they take sick or annual leave during that pay period they will not be compensated for any roll call time. This system is extremely confusing and antiquated and has led to a perception of unfairness among the officers of the Uniformed Division. Under the proposed authorizing legislation Uniformed Division Officers will simply be paid for all of the time they work.

B. Superior Qualifications

In order to help with recruiting efforts, the current draft language gives the Secret Service the authority to hire new officers at a higher step, but not a higher rank, than is allowed under the current system, if they have relevant superior qualifications and/or experience. So an applicant with several years of relevant law enforcement experience could be hired as a LE-1 step 3 or step 4, for example.

C. Scheduling Flexibility

The Uniformed Division performs a unique mission that requires continuous coverage of all permanent posts at mandated sites while also having to constantly deploy to provide security to protectees when they travel. Currently the DC code restricts UD to only being able to schedule officers for 5 fixed 8 hour shifts per week instead of employing more creative scheduling techniques matching the uniqueness of their mission. Moving into Title 5 of the US Code would help provide that flexibility which could potentially lead to decreased overtime and increased morale.

D. Salary Reform

The current draft language compresses the existing chart from 14 steps to 13 steps, and allows an officer to reach his or her final step in 22 years, instead of the 30 years it takes on the existing chart. The step increments are also smoothed out making it like most other Federal Government pay charts, the dollar increase between each step of a given rank is equal, and the increases for promotion are consistent across the chart.

The estimated cost of this proposal is \$3.64 million for pay and benefits, plus \$400,000 in implementation costs related to National Finance Center programming changes, for a total discretionary cost in FY 2010 of \$4.04 million, with estimated FY 2011 costs of \$8 million.

E. Step Progression

The current draft language adjusts the step progression process to allow officers to reach their final step in 22 years, rather than the current 30 years.

Justification

The Secret Service's Uniformed Division is currently operating under antiquated legal authorities, which cause significant problems and perceptions of unfairness amongst the officers.

The Uniformed Division also has stricter suitability requirements (Top Secret clearance, polygraph exam) than other police forces which lengthens the hiring process and often causes applicants to withdraw their Secret Service application if they are offered employment elsewhere.

These factors are significantly affecting the Service's ability to recruit and retain the quality personnel necessary to effectively carry out our mandated mission, resulting in an inability to reach authorized staffing levels, as can be seen in the following chart:

	2005	2006	2007	2008
Authorized Personnel	1,419	1,419	1,419	1,419
On Board at FY Close	1,380	1,333	1,319	1,286
Personnel Deficit	39	86	100	133

This table actually understates the problem in that at any given time, approximately 96 of the on-board personnel are actually new recruits who are still in training, and are not available for use in meeting mission demands. The inability to reach full staffing has been a result of a variety of factors that have made it more difficult to recruit new personnel, as well as to retain those already on board. The staffing shortfall has continued to increase despite new recruitment initiatives, and is resulting in the Uniformed Division incurring additional overtime costs that would not be required at or near full staffing.

The combination of the salary and legal authorities reform provisions, should have a positive impact from a recruiting and retention standpoint". The combined impact of all of these factors may even be sufficient to allow the Uniformed Division to reach its authorized staffing level by the end of FY 2011.

The draft legislation in "The Uniformed Division Modernization Act of 2010," if enacted, would move the bulk of the governing authorities for the Uniformed Division pay and compensation issues out of the District of Columbia Code and into Title 5 of the United States Code, while preserving existing authorities and benefits for the Uniformed Division members. It would create a new salary table for Uniformed Division members that establishes consistent rank and step increases, provide for faster step progression, and give the Uniformed Division new hiring flexibilities.

These reforms would greatly assist the Uniformed Division in meeting its ongoing recruiting and retention challenges, and would simplify the administration of pay and benefits for the Uniformed Division members.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funding supports achievement of the DHS Strategic Objectives 3.1: Protect and strengthen the resilience of the Nation's critical infrastructure and key resources and 3.2: Ensure Continuity of Government Communications and Operations.

If received, this funding will allow program managers to direct the appropriate amount of human capital to greatly enhance the safety and security of Secret Service protectees and facilities. Funding for this initiative will reduce hardships and morale issues associated with Uniformed Division Officers working an inordinate amount of overtime due to the mission requirements needed to meet the performance measure target. The Secret Service always strives to achieve 100 percent for each of its protection measures, as it has no other option than to have uncompromised performance in its protection of the President, Vice President, and other protectees.

Specifically, this initiative will directly impact the following outcome performance measures – *the Percentage of Instances Protectees Arrive and Depart Safely, Percentage of Time Incident Free Protection is Provided to Persons Inside the White House Complex and Vice President's Residence, and the Percentage of National Special Security Events Successfully Completed.*

Protection

Percentage of Instances in which Protectees Arrive and Depart Safely. Percentage of travel stops where the protectee arrives and departs safely.

Protectee security is the ultimate priority for the Secret Service. The level of effort required to provide security increases dramatically when a protectee is traveling. The performance target is always 100% security for protectees.

Percentage of Time Incident Free Protection is Provided to Persons Inside the White House Complex and Vice President's Residence. Percentage of persons (protectees, staff/employees, guests, and the public) who receive incident-free protection while inside the White House Complex or the Vice President's Residence.

An incident is defined as someone who is assaulted or receives an injury from an attack with a prohibited weapon while inside the White House Complex or Vice President's Residence. The performance target is always 100% security for protectees.

Percentage of National Special Security Events Successfully Completed. This measure is a percentage of the total number of NSSEs completed in a Fiscal Year that were successful.

A successfully completed NSSE is one where once an event has commenced, a security incident(s) inside the Secret Service-protected venue did not preclude the event's agenda from proceeding to its scheduled conclusion.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Secret Service
Justification of Proposed Changes in Salaries and Expenses
Appropriation Language**

For necessary expenses of the United States Secret Service, including purchase of not to exceed [675] 652 vehicles for police-type use, of which [645] 652 shall be for replacement only, and hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees where a protective assignment during the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty; conduct of and participation in firearms matches; presentation of awards; travel of United States Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act; research and development; grants to conduct behavioral research in support of protective research and operations; and payment in advance for commercial accommodations as may be necessary to perform protective functions; [\$1,410,621,000]\$1,485,609,000; of which not to exceed \$25,000 shall be for official reception and representation expenses; of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations; of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; and of which \$6,000,000 shall be for a grant for activities related to the investigations of missing and exploited children and shall remain available until expended: Provided, That up to \$18,000,000 provided for protective travel shall remain available until September 30, [2010]2011: Provided further, that up to \$1,000,000 for National Special Security Events shall remain available until expended: Provided further, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities, as defined in section 105 of title 5, United States Code, receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year: **Provided further, that none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes:** Provided further, that none of the funds appropriated to the United States Secret Service by this Act or by previous appropriations Acts may be made available for the protection of the head of a Federal agency other than the Secretary of Homeland Security: Provided further, that the Director of the United States Secret Service may enter into an agreement to perform such service on a fully reimbursable basis. (Department of Homeland Security Appropriations Act, 2009)

Explanation of Changes

[675] **652** – No substantive changes proposed.

[645] **652** – No substantive changes proposed.

\$1,485,609,000– No substantive changes proposed.

[2010] **2011** – No substantive changes proposed.

Authorization Cites

The Secret Service is established in 18 U.S.C. 3056 and 3 U.S.C. 202. 18 U.S.C. 1029 and 1030 specifically authorize the Service to investigate offenses under those sections

PPA Mission Statement

Protection of Persons and Facilities - Ensure the safety and security of national leaders, visiting heads of state and government and other designated protectees. Safeguard the White House Complex, the Vice President's residence, foreign missions in the Washington, DC area and other high profile sites.

Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes our nation's leaders, other high profile persons and designated sites. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing complexity and technological sophistication of the threat environment.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$516,757	\$541,466	\$610,305	\$68,839

Salaries and benefits includes funding for 3,800 FTE, including \$2,870,000 for funding of 2nd year annualized costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and full performance cost for staffing of the President Bush post-presidency detail. The FY 2010 request also includes \$22,658,000 to cover the annualized cost of an additional 224 positions hired with the Omnibus Supplemental (PL 111-8), \$3,640,000 for Uniformed Division pay restructuring, \$25,000,000 for object class realignment, and an increase of \$14,671,000 to cover increased payroll costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Benefits for Former Personnel	120	\$0	\$0	\$0

Benefits for former officers and employees or their survivors that are based (at least in part) on the length of service to the Federal Government.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$62,230	\$57,398	\$61,703	\$4,305

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with federal travel regulations. The FY 2010 request includes \$195,000 for funding of 2nd year annualized costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and full performance cost for staffing of the President Bush post-presidency detail. The FY 2010 request also includes \$4,110,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$2,276	\$756	\$1,423	\$667

Transportation of things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things. The FY 2010 request also includes \$667,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA Rent	\$34,439	\$30,966	\$31,020	\$54

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent-related services. The FY 2010 request includes \$1,183,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8), a \$2,000,000 reduction for object class realignment, and an increase of \$871,000 to cover expected cost increases.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and Misc. Charges	\$10,785	\$10,932	\$11,809	\$877

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes \$110,000 for funding of 2nd year annualized costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and completing staffing requirements for the President Bush post-presidency detail. The FY 2010 request also includes \$767,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$140	\$68	\$76	\$8

Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities. The FY 2010 request includes a \$20,000 reduction in non-recurring costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and completing staffing requirements for the President Bush post-presidency detail. The FY 2010 request also includes \$28,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$34,922	\$26,609	\$16,177	(\$10,432)

Other services include contractual services from federal and non-federal sources. The FY 2010 request includes a reduction of \$634,000 for non-recurring costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and completing staffing requirements for the President Bush post-presidency detail. The FY 2010 request also includes \$1,802,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8), \$400,000 for Uniformed Division pay restructuring, and a \$12,000,000 reduction for object

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies and Materials	\$8,124	\$8,285	\$7,001	(\$1,284)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes \$44,000 for 2nd year annualized costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and completing staffing requirements for the President Bush post-presidency detail. The FY 2010 request also includes \$672,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8), and a \$2,000,000 reduction for object class realignment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$32,845	\$22,369	\$15,978	(\$6,391)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes a reduction of \$1,757,000 for non-recurring costs associated with positions hired in FY 2009 for enhanced protection for White House protectees and completing staffing requirements for the President Bush post-presidency detail. The FY 2010 request also includes \$1,366,000 to cover the annualized cost of 224 positions hired with the Omnibus Supplemental (PL 111-8), and a \$6,000,000 reduction for object class realignment to more closely reflect actual outlays.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Land and Structures	\$4,041	\$7,003	\$4,003	(\$3,000)

Land and structures includes the costs of land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract. The FY 2010 request includes a \$3,000,000 reduction for object class realignment to more closely reflect actual outlays.

PPA Mission Statement

National Special Security Events - Effectively lead and manage the planning, coordination and implementation of operational security plans at designated NSSEs. Ensure the physical protection of the President, the public, and other Secret Service protectees who participate in NSSEs.

NSSE resources directly support the DHS strategic goal to protect critical infrastructure, which includes events of symbolic importance to American citizens. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever these specially designated events take place. The requested amount ensures NSSE security measures continue to evolve at an appropriate pace to meet the challenges of an increasingly complex threat environment.

PPA Mission Statement

Presidential Candidate Nominee Protection - Ensure the safety and security of Presidential and Vice Presidential candidates, nominees and spouses.

Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes candidates seeking our nation's highest offices. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing technological sophistication of the threat environment.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$56,138	\$20,948	\$0	(\$20,948)

Salaries and benefits includes funding for 0 FTE. The FY 2010 request includes a reduction of \$5,948,000 for non-recurring costs relative to the 2008 Presidential Campaign, a resource shift of (\$13,500,000) and (108) FTE to domestic field operations, and (\$1,500,000) and (12) FTE to ECSAP/ECTF.

	2008	2009	2010	2009 to 2010

Rowley Training Center - Strengthen the agency's ability to develop and retain a highly specialized and dedicated workforce to fulfill mission-critical requirements.

Rowley Training Center resources support the DHS strategic goal to protect critical infrastructure by ensuring the USSS workforce is continuously prepared to meet the challenges of the investigative and protective missions. The requested amount will ensure that the Service's most important resource - its employees - have the knowledge and skills and abilities to execute the investigative and protective missions. In a strategic context of threat, the Service must ensure that its workforce planning and development practices outpace the threat environment.

PPA Mission Statement

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field office resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems within our borders. The requested amount funds field offices nationwide in a strategic context that includes advances in photographic and printing device technologies and the spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies increases, field resources must continue to demonstrate agility in combating criminal efforts.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$180,006	\$190,009	\$208,814	\$18,805

Salaries and benefits includes funding for 1,705 FTE. The FY 2010 request includes a resource shift of \$13,500,000 and 108 FTE from Presidential Candidate/Nominee Protection for the 2008 Presidential Campaign and an increase of \$5,305,000 to cover increased payroll costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA Rent	\$23,180	\$23,777	\$24,092	\$315

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent-related services. The FY 2010 request includes \$315,000 to cover expected cost increases.

PPA Mission Statement

International Field Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational financial crimes.

International field office administration and operations resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems from threats originating abroad. The requested amount funds field offices in 18 countries in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet, other consumer-friendly technologies and dollarization (when a developing country replaces its national currency with the U.S. dollar). These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, field resources must continue to demonstrate agility in combating criminal efforts.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$12,583	\$12,436	\$13,242	\$806

Salaries and benefits includes funding for 74 FTE. The FY2010 request includes \$183,000 for 2nd year annualized costs associated with four positions hired in FY 2009. The FY 2010 request includes an increase of \$623,000 to cover increased payroll costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$1,679	\$2,416	\$2,428	\$12

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with federal travel regulations. The FY 2010 request includes \$12,000 to cover the annualized cost of four positions hired in FY 2009.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA Rent	\$0	\$375	\$421	\$46

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent-related services. The FY 2010 request includes \$9,000 to cover the annualized cost of four positions hired in FY 2009 and \$37,000 to cover expected cost increases.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$3,353	\$904	\$905	\$1

Other rent includes all payments to a non-federal source for rental of space, land, and structures. The FY 2010 request includes \$1,000 to cover the annualized cost of four positions hired in FY 2009.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$6,464	\$11,040	\$10,995	(\$45)

Other services include contractual services with federal and non-federal sources. The FY 2010 request includes a reduction of \$45,000 for non-recurring costs related to four positions hired in FY 2009.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies and Materials	\$190	\$213	\$223	\$10

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes \$10,000 to cover the annualized cost of four positions hired in FY 2009.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$813	\$435	\$311	(\$124)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes a reduction of \$124,000 for non-recurring costs related to the four positions hired in FY 2009.

PPA Mission Statement

Electronic Crimes Special Agent Program (ECSAP) - Develop and deploy personnel trained specifically to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment, to investigate complex electronic crimes and develop strong cases for prosecution. Electronic Crimes Task Forces (ECTFs) - Form and expand partnerships to reinforce strategic alliances among law enforcement, academia and private industry to prevent, detect, investigate and mitigate the effects of electronic crimes on our nation's financial infrastructure.

ECSAP and ECTF resources directly support the DHS strategic goal to protect critical infrastructure, which includes reducing losses resulting from electronic crimes perpetrated against our nation's financial infrastructure. The ECSAP and ECTFs combat those who seek to defraud U.S. financial institutions, private industry or individuals through electronic or digital media. The requested amount funds the ECSAP and ECTF entities in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, the ECSAP and ECTF ensure the Service remains on the cutting edge of electronic crime investigations, and that it maintains liaisons with critical partners and stakeholders.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

PPA Mission Statement

Support for Missing and Exploited Children - Provides grant funding and forensic support for cases involving missing and exploited children. Forensic support includes polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

BUDGET REQUEST AND SUPPORTING INFORMATION

UNITED STATES SECRET SERVICE **Acquisition, Construction, Improvements, and Related Expenses**

I. Appropriation Overview

A. Mission Statement for Acquisition, Construction, Improvements, and Related Expenses:

The United States Secret Service performs two critical homeland security missions: protection and criminal investigations. The Secret Service protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, foreign missions, and other designated buildings within the Washington, DC area; and designs, coordinates, and implements operational security plans for designated National Special Security Events. The Secret Service investigates violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; and to crimes involving computer-based attacks on our Nation's financial, banking, and telecommunications infrastructure. In order to accomplish both its protective and investigative missions, the Secret Service has offices located throughout the United States and in 15 foreign countries. The employees of the Secret Service are special agents, uniformed officers, and support personnel.

B. Budget Activities:

James J. Rowley Training Center (JJRTC)

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the Service's JJRTC which provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

C. Budget Request Summary:

- The U.S. Secret Service requests \$3,975,000 to maintain the JJRTC located in Beltsville, Maryland; this is a decrease of \$250,000 from the FY 2009 enacted budget.

Acquisition, Construction, Improvements, and Related Expenses
Program Performance Justification
(Dollars in Thousands)

PPA: ACQUISITION, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES
James J. Rowley Training Center (JJRTC)

	Perm		
	<u>Pos.</u>	<u>FTE</u>	<u>Amount</u>
2008 Actual	0	0	\$4,672
2009 Enacted	0	0	\$4,225
2010 Adjustments-to-Base	0	0	(250)
2010 Current Services	0	0	\$3,975
2010 Request	0	0	\$3,975
Total Change 2009-2010	0	0	(250)

* The table above excludes the omnibus funding of \$12.730 million provided by P.L. 111-8. The United States Secret Service requests \$3.975 million for this activity. This is a decrease of \$.250 million from the FY 2009 Enacted Budget, reflecting non-recurring funding for a noise abatement study.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the JJRTC. This facility provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

IV. Program Justification of Changes

Not applicable.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Secret Service
Justification of Proposed Changes in
Acquisition, Construction, Improvements, and Related Expenses
Appropriation Language**

For necessary expenses for acquisition, construction, repair, alteration, and improvement of facilities, [\$4,225,000] **\$3,975,000** to remain available until expended.

Explanation of Changes

[\$4,225,000] **\$3,975,000** – Funding for noise abatement study is non-recurred (\$250,000).

I. STRATEGIC CONTEXT FOR THE FY 2010-2014 BUDGET

A. Mission and Description of the United States Secret Service

The United States Secret Service (USSS) performs two critical homeland security missions: protection and criminal investigations. The USSS protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, Foreign Missions, and other designated buildings within the Washington, DC area; and designs, coordinates, and implements operational security plans for designated National Special Security Events (NSSE). USSS investigates violations of laws relating to counterfeiting of obligations and securities of the United States; financial crimes, such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation's financial, banking, and telecommunications infrastructure; and provides critical forensic support for investigations involving missing and exploited children.

In order to accomplish both its protective and investigative missions, the Secret Service has offices located throughout the United States and in 22 foreign countries. The Secret Service employs special agents, uniformed officers, and support personnel.

B. Major Activities and Key Strategic Issues

Protection

In FY 2008, the Service provided incident-free protection to all designated protectees in travel status and within protected facilities. Candidate protective details, provided protection to qualifying presidential candidates/nominees. The Service provided protection and security operations at NSSEs including major political conventions, Presidential campaign debates, and the 63rd United Nations General Assembly. The Service also continued relocation efforts for its Joint Operations Center (JOC).

In FY 2009, the Service will continue to provide incident-free protection to all designated protectees in travel status and within protected facilities. The Service will provide protection and security operations at NSSEs, as well as provide appropriate equipment and staffing for enhanced protection services for White House protectees. Beginning in January 2009, the Service activated a detail fully-equipped and operational for the protection of Former President and Mrs. George W. Bush. Additionally, the Service is providing protection for the Former Vice President and his wife for six months, in accordance with the Former Vice President Protection Act of 2008.

Both President Obama and Vice President Biden have publicly announced that they will maintain extensive domestic and international travel schedules, particularly this year. While the exact details of this travel are unknown, the Service is planning for the additional demands on protection associated with such travel. The international, domestic and individual threat environment for Secret Service-protected individuals, venues, and infrastructure was elevated throughout the 2008 Presidential Campaign and transition. These trends remain high, and the Service is hiring and training additional staff to evaluate the increased volume of threat information received. In addition, the Service is increasing the number of Counter Assault Teams to ensure coverage for the President and his family, while maintaining coverage for former President George W. Bush. The Service is also making adjustments to provide additional Counter Surveillance Unit support to the President and Vice President, and their immediate family members as appropriate.

In FY 2010, the Service will continue to provide incident-free protection to all designated protectees in travel status and within protected facilities, including the White House. The Service will also provide protection and security operations at NSSEs.

Investigations

In terms of protecting the nation's financial infrastructure, Secret Service Field Offices continue to provide training and equipment to identify and address cyber vulnerabilities before the criminal element is able to exploit them. In FY 2008, Secret Service agents trained in the Electronic Crimes Special Agent Program (ECSAP) conducted numerous federal cyber crime investigations and assisted state and local law enforcement agencies in similar investigations, including computer forensic examinations of their backlogged cases. Also in FY 2008, the collaborative efforts and resources of our Electronic Crimes Task Forces (ECTFs) were invaluable in successfully preventing cyber attacks that otherwise would have resulted in large-scale financial losses to U.S.-based companies, or disruptions of critical infrastructures.

In FY 2009, the training, equipment and resources of ECSAP-trained special agents and ECTFs will continue strengthening cyber investigations to lessen the number of victims impacted by cyber crimes, and will mitigate fraud losses to U.S. businesses and financial institutions.

In FY 2010, in addition to identifying and mitigating electronic crimes, ECTFs will engage in exercises to test the emergency response of entities entrusted to protect and secure critical infrastructure. Through the Financial Crimes Task Forces (FCTFs) the Secret Service will maximize the resources of the law enforcement community and the private sector in an effort to combat threats to our financial payment systems, including credit and debit card fraud, mortgage fraud, and other financial fraud schemes.

Infrastructure

Major challenges impacting the Secret Service's ability to maintain a state of increased preparedness and accomplish its mission in the current and predicted threat environments include terrorists' continued motivation to attack U.S. interests (including its leaders and the economy), and the constantly evolving technological sophistication of the threat environment. The Secret Service relies on technology to support the special agents, Uniformed Division officers, and administrative, professional, and technical staffs performing the dual mission. The information technology infrastructure cannot sustain the tempo of current operations. The funds requested in this budget will help the Secret Service address this while the protecting national leaders and the nation's critical financial infrastructure.

C. Resources Requested and Performance Impact

The proposed FY 2010 budget totals \$1,485,609,000 for the Salaries and Expenses appropriation and \$3,975,000 for the Acquisition, Construction, Improvements, and Related Expenses appropriation. Funding will be used to maintain current levels of program operations, provide funding for adjustments to the base, and fund Uniformed Division pay restructuring, enhance Electronic Crimes Task Forces, increased funding for support and information integration and technology transformation efforts.

Current Services

Currently the Secret Service is redeploying and managing existing baseline resources to augment its current capabilities in cyber information infrastructure, cyber infrastructure protection and protective countermeasures. The agency is leveraging external and Departmental resources, as well as conducting a disciplined assessment of needs to find program efficiencies. At present, budget allocations are closely aligned with the Secret Service goals and objectives, and the agency is working with near-term reviews to continue with a sharpened focus.

Program Increases

Adjustments-to-the-Base

The Secret Service is a labor-intensive operation, and it is vital that each program has all necessary resources to remain fully operational. This funding will cover increasing payroll and other personnel-related costs. This funding will allow program managers to direct an appropriate level of human and financial capital to continue the Secret Service's dual mission of protection and investigations.

The number of protectees receiving varying levels of protection from the Secret Service has significantly increased since September 11, 2001. Furthermore, the methods utilized to attack U.S. economic interests are becoming more sophisticated, and investigative cases are becoming more complicated. Secret Service personnel are performing critical tasks on a daily basis to provide security for all protectees, as well as to work to combat, disrupt and prevent financial and electronic crimes. These activities directly support DHS Goal 3: Protect Critical Infrastructure, and also have a direct impact on Secret Service protection and investigation-related performance measures.

Information Integration and Transformation Program

This funding will be used to improve the Service's infrastructure framework which is currently in a degraded state and adversely impacting critical operational missions. This includes the operations/maintenance of data center operations, to include servers, networks, U.S. and foreign circuits, wide area network (WAN) connectivity, network operating system software, network and information security monitoring systems, technology refresh, and update and/or replacement of legacy/aging equipment or software. In addition, the funding includes optimization and performance monitoring such as establishing and base-lining infrastructure performance, establishing periodic reporting for identifying and reacting to trends, changes and issues, and training staff to build competencies in information technology performance management. This also includes funding for five professional positions. The information technology infrastructure will be re-engineered to include the development of requirements, guidelines, and new programs and technologies as an immediate and critical need. Network and server competencies will be strengthened by adding commercial services, and the staff will be trained and educated to support the transformation.

This funding also supports a dynamic, information-sharing environment that delivers secure information at the right time, to the right recipient, and in the right format under every circumstance. This environment must be securely managed and protected enterprise-wide from threats posed by adversaries. Without this information assurance, the Service is vulnerable and at risk for professional-grade cyber attacks while the ability to share multi-level information across the enterprise is minimized.

In addition, this funding allows for a cross-domain application multi-level security project necessary to meet the National Security Strategy (NSS) and DHS goals and policies requiring a secure mission environment while operating in a sensitive business environment. This project will consist of a major acquisition process, systems engineering, architecture, design, development, test and evaluation, deployment, maintenance, sustainment, hardware and software to implement digital rights management, digital signatures, and data classification management. This multi-level secured cross-domain IT application and data environment will provide the Service with the most efficient and effective means to perform mission critical operations.

This funding will support engineering and architecture activities to modernize the Secret Service database architecture to provide a higher rate of availability, and to optimize performance, scalability and disaster recovery capabilities to meet current and future needs. This is necessary to support investigative and legal litigation cases which require high data accuracy, and faster reporting in a web accessible format. This includes upgrades to database hardware and software supporting over 300 WEB applications and databases. The new database architecture will provide improved application and database performance, fewer outages, support continuity of operations through robust backup and recovery procedures, redundancy of infrastructure supporting critical database, and support DHS Enterprise Data Management Directive 103.01. The applications developed based on these new technologies and standards will provide enhanced application abilities and improved efficiencies in processes, and enable information sharing within the Secret Service and with other DHS and federal agencies.

Also, this funding enables a proactive, cyber defense environment that provides situational awareness, command and control, defensive mechanisms and information assurance policies and processes. This environment will provide enterprise-wide protection through the dynamic information-sharing environment of the Department of Homeland Security and the Director of National Intelligence cyber programs. It will be a cohesive, integrated approach to cyber defense that will provide policies, procedures, technologies, and training across all Secret Service directorates.

This cross-cutting initiative will directly impact protective and investigative performance measures including – the *Percentage of Instances Protectees Arrive and Depart Safely (Campaign, Domestic, and Foreign Dignitary Protectees)*, the *Volume of Intelligence Assessed (classified information)*, *Financial Crimes Loss Prevented (Through a Criminal Investigation and by the Secret Service Electronic Crimes Task Forces)* and *Counterfeit Passed as the Percent of the Amount of Genuine U.S. Currency in Circulation*.

Cyber Infrastructure Protection Program

Through this program, the Secret Service will fund the operational costs of the Electronic Crimes Task Forces (ECTFs) and DHS-mandated Certification and Accreditation (C&A) of the Secret Service online reporting system. In recent years, the combination of the information revolution and the effects of globalization have caused the investigative mission of the Secret Service to evolve. The advent of technology and the Internet has created a transnational “cyber criminal” and the Secret Service has observed a marked increase in the quantity, quality, and complexity of cyber cases targeting U.S. financial institutions and critical infrastructure. Crimes are transnational in nature and are intertwined with the illicit use of computers. To protect our critical financial infrastructure from the constant threats and attacks launched by transnational organized criminal groups, the Secret Service has adopted a multi-faceted, multi-pronged approach to aggressively address this issue. The Secret Service has successfully dismantled some of the largest known cyber criminal organizations by combining partnering resources and expertise. ECTFs partner with state and local law enforcement, prosecutors, private

sector interests and academia to prevent cyber-crime and identify theft. The work of the ECTFs is critical to protecting the nation's financial infrastructure. The ECTFs prioritize investigative cases involving electronic crimes that have any one of the following criteria: significant economic or community impact; involvement of organized criminal groups involving multiple districts or transnational organizations; or utilization of schemes involving new technology.

Specifically, this initiative will directly impact the following outcome performance measures – *Financial Crimes Loss Prevented (Through a Criminal Investigation and by the Secret Service Electronic Crimes Task Forces) and Counterfeit Passed as the Percent of Amount of Genuine U.S. Currency in Circulation.*

Protective Countermeasures Program

This funding supports draft legislation in “The Uniformed Division Modernization Act of 2010” which, if enacted, would move the bulk of the governing authorities for UD pay and compensation issues out of the District of Columbia Code and into Title 5 of the United States Code, while preserving existing authorities and benefits for UD members. It would create a new salary table for Uniformed Division members that establish consistent rank and step increases, provide for faster step progression, and give UD new hiring flexibilities.

These reforms would greatly assist UD in meeting its ongoing recruiting and retention challenges, and would simplify the administration of pay and benefits for UD members.

Specifically, this initiative will directly impact the following outcome performance measures – *the Percentage of Instances Protectees Arrive and Depart Safely, Percentage of Time Incident Free Protection is Provided to Persons Inside the White House Complex and Vice President's Residence, and the Percentage of National Special Security Events Successfully Completed.*

D. How Secret Service Programs and Performance Goals Align to and Support DHS Goals and Objectives.

Domestic Protectees program performance goal - Protect our nation's leaders and other protectees.

Goal 3 – Protect critical infrastructure

Objective 3.2 – Ensure continuity of government communications and operations.

Foreign Protectees and Foreign Missions program performance goal - Protect visiting world leaders

Goal 3 – Protect critical infrastructure

Objective 3.2 – Ensure continuity of government communications and

Protective Intelligence program performance goal - Reduce threats posed by global terrorists and other adversaries.

Goal 3 – Protect critical infrastructure

Objective 3.2 – Ensure continuity of government communications and operations.

Financial Investigations program performance goal - Reduce losses to the public attributable to counterfeit currency, other financial crimes, and identity theft crimes that are under the jurisdiction of the Secret Service, which threaten the integrity of our currency and the reliability of financial payment systems worldwide.

Goal 3 – Protect critical infrastructure

Objective 3.1 – Protect and strengthen the resilience of the nation's critical infrastructure and key resources.

Infrastructure Investigations program performance goal - Reduce losses to the public attributable to electronic crimes and crimes under the jurisdiction of the Secret Service that threaten the integrity and reliability of the critical infrastructure of the country.

Goal 3 – Protect critical infrastructure

Objective 3.1 – Protect and strengthen the resilience of the nation's critical infrastructure and key resources.

Campaign Protection program performance goal - Protect our Presidential and Vice Presidential Candidates and Nominees.

Goal 3 – Protect critical infrastructure

Objective 3.2 – Ensure continuity of government communications and operations.

E. Performance Based Budget Highlights by Program

Performance Budget Highlights by Program
 USSS
 2010 Congressional

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below. For many of the programs, more performance information may be found on the OMB web site Expectmore.gov (program names may differ slightly from those used in this document).

Program: Campaign Protection						
Performance Goal: Protect our Presidential and Vice Presidential Candidates and Nominees.						
DHS strategic objectives supported and % allocation of activities: 3.2 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$24,500	\$0	\$33,650	\$85,250	\$41,082	\$0
FTE	120	0	74	250	120	0

Performance Plan Measures

Measure: Percent of instances protectees arrive and depart safely (campaign protectees)						
Description of Measure: The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest - quality protection the Secret Service demands for all protectees. This measure represents the percent of travel stops where the protectee safely arrives and departs. The performance target is always 100%. Anything under 100% is unacceptable.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	100%	N/A	N/A	100%	100%	N/A
Actual:	100%	N/A	100%	100%	N/A	N/A

Program: Domestic Protectees (DP)						
Performance Goal: Protect our Nation's leaders and other protectees.						
DHS strategic objectives supported and % allocation of activities: 3.2 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$792,670	\$830,560	\$859,669	\$910,127	\$954,465	\$1,019,532
FTE	3,358	3,374	3,440	3,491	3,523	3,778

Performance Plan Measures

Measure: Percent of instances protectees arrive and depart safely (domestic protectees)						
Description of Measure: The percent of travel stops where our Nation's leaders and other protectees arrive and depart safely. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest - quality protection the Secret Service demands for all protectees. The performance target is always 100%. Anything under 100% is unacceptable.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	100%	100%	100%	100%	100%	100%
Actual:	100%	100%	100%	100%	N/A	N/A

Program: Financial Investigations (FI)						
Performance Goal: Reduce losses to the public attributable to counterfeit currency, other financial crimes, and identity theft crimes that are under the jurisdiction of the Secret Service, which threaten the integrity of our currency and the reliability of financial payment systems worldwide.						
DHS strategic objectives supported and % allocation of activities: 3.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$315,794	\$341,612	\$345,329	\$334,371	\$361,583	\$388,536
FTE	1,684	1,796	1,726	1,573	1,693	1,803

Performance Plan Measures

Measure: Counterfeit passed as a percent of the amount of genuine currency in circulation						
Description of Measure: The dollar value of counterfeit notes passed on the public reported as a percent of dollars of genuine currency. This measure is calculated by dividing the dollar value of counterfeit notes passed by the dollar value of genuine currency in circulation. This measure is an indicator of the proportion of counterfeit currency relative to the amount of genuine U.S. Currency in circulation, and reflects our efforts to reduce financial losses to the public attributable to counterfeit currency.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	<.01%	<.01%	<.0098%	<.0096%
Actual:	None	None	.0079%	0.0086%	N/A	N/A

Measure: Financial crimes loss prevented through a criminal investigation (in billions).						
Description of Measure: An estimate of the direct dollar loss to the public that was prevented due to Secret Service intervention or interruption of a criminal venture through a criminal investigation. This estimate is based on the likely amount of financial crime that would have occurred had the offender not been identified nor the criminal enterprise disrupted, and reflects the Secret Service's efforts to reduce financial losses to the public attributable to financial crimes. The Investigative program provides manpower on a temporary basis to support protective assignments; a role that is both purposeful and efficient. Field agents provide a "surge capacity" of protective manpower, without which the Secret Service could not accomplish its protective mandate in a cost - effective manner. Although these temporary assignments occur every year, they increase significantly during a presidential campaign requiring the Secret Service to decrease its investigative performance measure targets in campaign years.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	\$1.5	\$1.5	\$1.5	\$1.0	\$1.8	\$1.9
Actual:	\$1.8	\$1.23	\$3.9	\$1.96	N/A	N/A

Program: Foreign Protectees and Foreign Missions (FP/FM)						
Performance Goal: Protect visiting world leaders.						
DHS strategic objectives supported and % allocation of activities: 3.2 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$124,807	\$129,134	\$130,781	\$136,012	\$140,495	\$145,704
FTE	659	659	659	659	659	719

Performance Plan Measures

Measure: Percent of instances protectees arrive and depart safely (Foreign Dignitaries)						
Description of Measure: The percent of travel stops where visiting world leader protectees safely arrive and depart. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest - quality protection the Secret Service demands for all protectees. The performance target is always 100%. Anything under 100% is unacceptable.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	100%	100%	100%	100%	100%	100%
Actual:	100%	100%	100%	100%	N/A	N/A

Program: Infrastructure Investigations						
Performance Goal: Reduce losses to the public attributable to electronic crimes and crimes under the jurisdiction of the Secret Service that threaten the integrity and reliability of the critical infrastructure of the country.						
DHS strategic objectives supported and % allocation of activities: 3.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$49,172	\$50,958	\$54,140	\$54,794	\$62,995	\$68,867
FTE	254	289	300	277	291	305

Performance Plan Measures

Measure: Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).						
Description of Measure: An estimate of the direct dollar loss to the public prevented due to investigations by Secret Service ECTFs throughout the United States, which were established pursuant to the USA PATRIOT Act. The estimate is based on the likely amount of electronic financial crime that would have occurred had the offender not been identified nor the criminal enterprise disrupted. It reflects the Secret Service's efforts to reduce financial losses to the public attributable to electronic crimes. The Investigative program provides manpower on a temporary basis to support protective assignments; a role that is both purposeful and efficient. Field agents provide a "surge capacity" of protective manpower, without which the Secret Service could not accomplish its protective mandate in a cost - effective manner. Although these temporary assignments occur every year, they increase during a presidential campaign requiring the Secret Service to decrease its performance measure targets in campaign years.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	\$150	\$150	\$150	\$150	\$300	\$310
Actual:	\$556.2	\$315.9	\$355.1	\$410.9	N/A	N/A

Program: Protective Intelligence (PI)						
Performance Goal: Reduce threats posed by global terrorists and other adversaries.						
DHS strategic objectives supported and % allocation of activities: 3.2 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$68,857	\$71,225	\$73,548	\$74,942	\$77,334	\$86,945
FTE	441	446	450	450	450	450

Performance Plan Measures

Measure: Number of Protective Intelligence cases completed.						
Description of Measure: The total number of intelligence cases completed by agents assigned to field operations. These cases generally represent an assessment of individuals or groups who have threatened a protectee of the Secret Service.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	4,000	4,000	3,300	4,200	4,000	4,000
Actual:	4,614	4,164	3,631	3,036	N/A	N/A

BUDGET REQUEST AND SUPPORTING INFORMATION

National Protection and Programs Directorate Management and Administration

I. Appropriation Overview

A. Mission Statement:

Programs funded through the National Protection and Program Directorate (NPPD) Management and Administration (M&A) Appropriation contribute to the NPPD goal of advancing the Department's risk reduction mission. Reducing risk requires an integrated approach that encompasses both physical and virtual threats and their associated human elements. NPPD reduces the risk of attack against the Nation by protecting¹ critical physical and cyber infrastructure, guarding against threats posed by foreign travelers to the country, and by standardizing the Department's approach to the analysis and management of potential risks to the Nation.

B. Budget Activities

The M&A appropriation major program activities include Directorate Administration and Risk Management and Analysis.

Directorate Administration. NPPD Directorate Administration includes the Office of the Under Secretary, which includes: (1) Resource Administration, (2) Budget and Financial Administration, (3) Information Management, (4) Communications and Public Affairs, and (5) Office of Information Technology.

Risk Management and Analysis (RMA). RMA conducts strategic integrated risk analysis and develops the DHS Integrated Risk Framework.

C. Budget Request Summary

NPPD requests 129 positions/FTE and \$44,577,000 in the FY 2010 request, an increase of 40 positions, 54 FTE and a decrease of \$ 6,773,000 from FY 2009 enacted budget of 89 positions, 75 FTE, and \$51,350,000.

¹ The term "protect" means reducing the vulnerability of critical infrastructure or key resources in order to deter, mitigate, or neutralize terrorist attacks. (HSPD-7)

Adjustments-to-Base

1. Annualization of 24 prior year positions: \$1,890,000
2. Annualization of the calendar year 2009 pay increase of 3.9%: \$101,000
3. Calendar year 2010 Pay increase of 2.0%: \$155,000
4. GSA Rent Increase: \$387,000 because of NPPD facility increases and non-pay inflation moved to GSA Rent.
5. Increase to Working Capital Fund: \$1,435,000
6. Transfer to the Office of Executive Secretary for Secretary travel: (\$12,000)
7. Transfer to the Infrastructure Protection and Information Security appropriation for rent and facilities cost: (\$10,729,000)
8. NPPD is offsetting the funding for 40 federal positions from program funds within the Office of the Under Secretary and Risk Management and Analysis. The table below summarizes the \$5,320,000 in offsets by PPA

	Total Positions	FY 2010 Program Funding	FY 2010 Salaries Funding	Net Budget Change
Directorate Administration	26	\$ (3,458)	\$ 3,458	\$ -
RMA	14	\$ (1,862)	\$ 1,862	
Total	40	(5,320)	5,320	\$ -

II. Summary of FY 2010 Budget Estimates by PPA

**Department of Homeland Security
National Protection and Programs Directorate
Management and Administration**

Summary of FY 2010 Budget Estimates by Program/Project Activity
(Dollars in Thousands)

Program/Project Activity	FY 2008 Actuals		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE *	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Directorate Administration	35	35,668	64	41,850	104	34,682	40	(7,168)	---	---	40	(7,168)

* Includes 40 additional Federal personnel. The salaries and benefits funding is offset by a decrease to program/contract funds.

III. Current Services Program Description by PPA

**Department of Homeland Security
National Protection and Programs Directorate
Management and Administration
Program Performance Justification**
(Dollars in thousands)

PPA: Directorate Administration

	Perm Pos	FTE	Amount
FY 2008 Actuals	54	35	\$ 35,668
FY 2009 Enacted	78	64	\$ 41,850
2010 Adjustments to Base*	26	40	\$ (7,168)
2010 Current Services	104	104	\$ 34,682
2010 Program Change	0	0	\$ -
FY 2010 Request	104	104	\$ 34,682
Total Change 2009-2010	26	40	\$ (7,168)

* Includes 26 Federal positions funded from program funds.

The National Protection and Programs Directorate requests \$34,682,000, 104 positions/FTE for Directorate Administration. The request represents a decrease of \$7,168,000 and an increase of 26 positions and 40 FTE over the FY 2009 enacted. Adjustments-to-base include \$219,000 for pay inflation; annualization of \$1,890,000 for 24 positions received in FY 2009, 26 positions funded from program dollars, an increase of \$1,435,000 for working capital fund increases, an increase of \$216,000 for GSA rent, \$10,729,000 transferred to the Infrastructure Protection and Information Security appropriation for facilities and rent and \$187,000 transferred to the Office Risk Management and Analysis for facilities and rent and \$12,000 transferred to the Office of the Secretary.

CURRENT SERVICES PROGRAM DESCRIPTION:

Office of the Under Secretary

The Office of the Under Secretary provides Directorate leadership and management; coordinates Directorate activities throughout the Department; and serves as an advocate for protection across all governmental sectors, protection stakeholders, and citizens. The Office of the Under Secretary consists of the Under Secretary, Deputy Under Secretary, Chief of Staff, as well as legal and administrative support.

Office of Budget and Financial Administration

The Office of Budget and Financial Administration (OBFA) supports the NPPD mission by providing financial management information, oversight, and fiscal services and policies. The OBFA consists of the following activities and elements:

- *Budget Formulation.* Reviews the current state of programs and projects, and assesses activities against the desired future direction, and builds and justifies funding requests to resource mission needs.
- *Budget Execution.* Responsible for the workflow and funds control process to ensure that resources are available when needed, do not exceed authorized levels, are used in accordance with law and congressional intent, and are recorded and reported on in accordance with federal accounting principles and guidelines.
- *Strategic Planning and Performance Management.* Fulfills internal and external performance management requirements, including the collection, analysis, and monitoring of performance data.
- *Accounting Operations.* Responsible for the overall accounting operations of NPPD and ensures that NPPD meets financial and accounting requirements in support of the DHS' centralized financial management program.
- *Financial Systems Reporting and Internal Controls.* Serves as the liaison to the Immigration and Customs Enforcement and DHS centralized CFO offices - supporting work related to financial systems, financial reporting and internal control programs.
- *Acquisition Operations.* Responsible for reviewing and monitoring NPPD's acquisition documents and ensuring compliance with Federal and DHS acquisition regulations. Tasks include reviewing and tracking of NPPD contracts and small purchases, providing procedural guidance and support to NPPD staff, administering the purchase card program, and supporting investment review. This office also serves as a liaison to the DHS procurement office.

FY 2008 Accomplishments

- Provided day-to-day fiscal services and financial operations including funds approval, prompt payment of invoices, payroll reconciliations and projections.
- Supported the development of the DHS Strategic Plan. Also, supported the DHS Performance Improvement Council and the DHS Performance Working Group.
- Conducted appropriations law training across the Directorate in conjunction with the DHS Office of General Counsel.
- Managed travel and purchase cards.
- Developed the FY 2009 President's Budget Request and Congressional Briefings.

FY 2009 Planned Accomplishments

- Provide day-to-day fiscal services and financial operations including funds approval, prompt payment of invoices, payroll reconciliations and projections.
- Initiate an NPPD Internal Controls Program. In accordance with OMB Circular A-123, conduct assessments of internal controls on Funds Control and Budgetary Resource Management.

- Review and process for completion un-liquidated obligations from NPPD forerunner organizations: the Information Analysis and Infrastructure Protection Directorate and Preparedness Directorate.
- Implement web-based invoice consolidation payment system.
- Institute and track Directorate operating and procurement fiscal plans.
- Work with DHS CFO to define the requirements of the next generation financial and procurement system.
- Prepare the FY 2010 budget submission and supporting documentation.
- Conduct appropriation law training with DHS OGC.
- Transition to user-friendly web-based FedTraveler system.

FY 2010 Planned Accomplishments

- Design and conduct assessments of internal controls over program operations.
- Strengthen performance measures and the performance management process. Evaluate performance measures to ensure the measures align with strategic goals and objectives and that the data collected is relevant and informative to decision makers. Collect and analyze data more effectively to inform corrective actions and program/activity changes that minimize risk.
- Enhance investment portfolio management and prioritization through the development of and adherence to an NPPD Investment Review Process. Support investments by communicating the Department's investment review guidance, assisting in compliance, and facilitating investments through the Department's Investment Review Process.
- Strengthen the Directorate knowledge base of program management techniques to enhance status reporting and to reduce program/project risk.

Office of Resource Administration

The Office of Resource Administration (ORA) provides operational services for human capital planning, facilities and property, security, and emergency plans and continuity. The ORA consists of the following activities and elements:

- *Human Capital.* Responsible for recruiting, tracking staff levels by office and maintaining records of NPPD personnel.
- *Training.* Coordinates all of the mandatory and voluntary training requirements of the Directorate, the Department, and the Government.
- *Facilities.* Responsible for facilities property and logistics support, facility space planning, rent, procurement and oversight of facilities support services and COOP activities.
- *Assets and Property.* Records Directorate property, manages the fleet of GSA owned vehicles, and documents property records as well as disposal.

- *Security.* Implements all of the National Security Information (NSI) programs, Controlled Unclassified Information (CUI), and Sensitive Security Information (SSI) programs. Security also procures the armed guards and escort services for NPPD facilities, physical access control and key control for NPPD facilities, and ensure NPPD facilities' intrusion detection systems and security access control mechanisms are maintained and up-to-date.
- *Emergency Plans and Continuity.* Coordinates NPPD Continuity of Operations (COOP) plans, emergency preparedness and continuity of operations, occupant evacuation plans, Pandemic Influenza plans and the Incident Management plans for the Directorate.
- *Exercise Program.* Plans exercises and coordinates NPPD participation in Departmental or government-wide exercises.

FY 2008 Accomplishments

- Instituted a hiring tiger team to streamline the hiring process, as well as recruitment and advertising positions.
- Acquired and managed space to meet the requirements of a growing staff level.
- Acquired and managed the vehicle fleet for several NPPD programs expanding field operations.
- Tracked and managed NPPD employee mandatory training.
- Participated in DHS COOP exercises.

FY 2009 Planned Accomplishments

- Fill vacant and new positions to within 75% of positions authorized.
- Continue to manage staffing level growth along with the associated need for space, equipment, and vehicles.
- Implement and establish a full service training program in conjunction with the Department's Training Branch.
- Manage the Directorate Table of Organization, which lays out how personnel are aligned within the Directorate and staffing levels to assist in Workforce Planning.
- Participate in DHS COOP exercises.

FY 2010 Planned Accomplishments

- Continue to support long range facilities planning efforts, including participating in the planning efforts for the eventual move to the St. Elizabeth's campus.
- Hire new positions requested in FY 2010.
- Participate in DHS COOP exercises.

Information Technology Division

The Information Technology Division is responsible for developing, maintaining, and facilitating the implementation of sound and integrated information technology architecture. Responsibilities include:

- Enterprise Architecture alignment and planning,
- Capital Planning and Investment Control (CPIC) support,
- Engineering support services including engineering and liaison services,
- IT portfolio management; technical specification development,
- Administration and use of Project Management Information Systems (PMIS),
- Integrated Project Team (IPT) customer support,
- IT policy, governance and process development,
- And ensuring that performance based management principles are used for acquiring IT.

FY 2008 Accomplishments

- Delivered IT services via a Project Management Office in direct support of the NPPD mission, goals, objectives, and programs for major systems.
- Ensured project execution according to the standards of the System Development Lifecycle (SDLC) for all NPPD IT investments and projects, ensuring mission requirements are met and are cost-effective.
- Managed and ensured Earned Value periodic reporting for IT investments quarterly.
- Developed and maintained NPPD Enterprise Architecture (EA) alignment with the Department EA.
- Supported NPPD IT transformation and investment funding prioritization and allocation by delivering advanced decision support to leadership.
- Managed and administered NPPD IT resources and assets.
- Developed and maintained a Directorate Information Security Program that is fully aligned with the Department, including development and enforcement of Security policy, COMSEC Management, DAA/ISSM/ISSO training.
- Implemented a Scanning and Wireless Tool Kit and modernized other IT security operations.
- Performed Privacy Impact Assessments and Privacy Threshold Analyses.
- Ensured Directorate Section 508 compliance through review of all IT purchases and Section 508 grievances filed with the Civil Rights and Liberties Office. Additionally, ensured all new programs are Section 508 compliant.

FY 2009 Planned Accomplishments

- Implement 2 factor authentications via HSPD-12 cards for both logical (network) and physical (work sites) access.
- Deliver IT services via a Project Management Office in direct support of the NPPD mission, goals, objectives, and programs for major systems.

- Develop and maintain NPPD Enterprise Architecture (EA) alignment with the Department EA.
- Support NPPD IT transformation and investment funding prioritization and allocation by delivering advanced decision support to leadership.
- Develop and maintain a Directorate Information Security Program that is fully aligned with the Department, including development and enforcement of Security policy, COMSEC Management, DAA/ISSM/ISSO training.
- Develop and implement a robust IT support model for NPPD Remote (Field) offices to ensure IT capabilities are implemented and maintained for programs with remote personnel.
- Support the IT component of NPPD facility build-outs.

FY 2010 Planned Accomplishments

- Support IT services via a Project Management Office in direct support of the NPPD mission, goals, objectives, and programs for major systems.
- Ensure project execution according to the standards of the System Development Lifecycle (SDLC) for all NPPD IT investments and projects, ensuring mission requirements are met and are cost-effective.
- Manage and ensure Earned Value periodic reporting for IT investments quarterly.
- Maintain NPPD IT transformation and investment funding prioritization and allocation by delivering advanced decision support to leadership.
- Manage and administer NPPD IT resources and assets.
- Continue to maintain a Directorate Information Security Program that is fully aligned with the Department, including development and enforcement of Security policy, COMSEC Management, DAA/ISSM/ISSO training.
- Perform Privacy Impact Assessments and Privacy Threshold Analyses.
- Ensure Directorate Section 508 compliance through review of all IT purchases and Section 508 grievances filed with the Civil Rights and Liberties Office. Additionally, ensure all new programs are Section 508 compliant.

Office of Communications and Public Affairs

Office of Communications and Public Affairs (OCPA) is the nexus for all NPPD communications, outreach, and awareness. OCPA is comprised of three branches: Internal Communications, External Communications, and Strategic Communications.

OCPA plays a lead role in developing and approving all correspondence and messaging that is intended for public or private outreach or distribution. OCPA develops communications strategies and action plans to promote Directorate programs and activities. OCPA develops and posts content for all directorate and Component pages on the Intranet site (DHSOnline.gov) and on the department's external website (DHS.gov).

FY 2008 Accomplishments

- Stood up the Office of Communications and Public Affairs

FY 2009 Planned Accomplishments

- Launch the NPPD Info Center to serve as the primary portal for NPPD-specific information and cross-component coordination
- Produce and distribute a variety of electronic products to improve communication with internal and external audiences. Products include:
 - Daily News Clips (NPPD/DHS-related media coverage)
 - Daily Report (public speaking events, interviews, etc.)
 - “Weekly Update” Newsletter (NPPD/DHS news and announcements)

FY 2010 Planned Accomplishments

- Launch iShare information sharing resource through Internal Communications branch. iShare will enable the NPPD workforce to blog/post about directorate issues and events, as well as directly engage the Directorate’s leadership team
- Create NPPD Speakers Bureau through the External Communications branch. The Speakers Bureau will serve as a clearinghouse to review external public speaking requests and make recommendations on participating of NPPD leadership and subject matter experts
- Establish a series of topical monthly Leadership Forums based on issues raised by the workforce led by NPPD leadership

Office of Information Management

The Office of Information Management is responsible for managing and improving external communications for NPPD. Information Management is comprised of the Executive Secretariat, Freedom of Information Act (FOIA)/Privacy, and the Audit Liaison function.

- *Executive Secretariat.* Serves as the central processing point for formal documents and taskers sent to/from NPPD.
- *Freedom of Information Act (FOIA)/Privacy.* Works in concert with the Department Privacy Office, which serves as the steward of *Section 222*, the responsibilities of the Chief Privacy Officer, of the Homeland Security Act, the Privacy Act of 1974, the Freedom of Information Act, the E-Government Act of 2002 and the numerous laws, Executive Orders, court decisions and Departmental policies that protect the collection, use and disclosure of personal and Departmental information.
- *Audit Liaison Function.* Serves as a liaison among external Departmental offices, the Government Accountability Office (GAO), Office of the Inspector General (OIG) and NPPD offices for all audit activities undertaken by either the GAO or

OIG. Activities include entrance/exit conferences, fieldwork, release of draft and final reports, and recommendation follow-up.

FY 2008 Accomplishments

- Planned, developed, and implemented operating policies, procedures, and guidelines for the preparation and routing of correspondence for signature of NPPD senior executives or Department officials.
- Reviewed and completed NPPD Reports to Congress.
- Managed NPPD correspondence; Responded to White House requests, Congressional Questions for the Record and others.
- Received and processed FOIA requests submitted for information held by NPPD and provide guidance to NPPD personnel responsible for assisting with FOIA document and information requests.
- Built privacy protections into NPPD programs and systems.
- Provided policies and procedures for NPPD for responding to and implementing recommendations in audit reports issued by the Office of Inspector General (OIG) and the General Accounting Office (GAO).

FY 2009 Planned Accomplishments

- Manage NPPD responses to OIG/GAO requests and track progress on open recommendations and ensure closure.
- Implement a tool for the assignment, monitoring, reviewing, and editing of correspondence, action and information memoranda, congressional reports, White House requests, Congressional Questions for the Record, and other material.
- Ensure timely review and completion of NPPD Reports to Congress.
- Receive and process FOIA requests for information held by NPPD and provide guidance to NPPD personnel responsible for assisting with FOIA document and information requests.
- Continue working to build privacy protections into NPPD programs and systems.

FY 2010 Planned Accomplishments

- Assign, monitor, review, edit, and manage correspondence, action and information memoranda, congressional reports, White House requests, Congressional Questions for the Record, and other material.
- Ensure timely review and completion of NPPD Reports to Congress.
- Receive and process FOIA requests for information held by NPPD and provide guidance to NPPD personnel responsible for assisting with FOIA document and information requests.
- Ensure privacy protections are maintained in NPPD programs and systems.

PPA: Risk Management and Analysis (RMA)

	Perm Pos	FTE	Amount
FY 2008 Actuals	11	5	\$ 9,052
FY 2009 Enacted	11	11	\$ 9,500
2010 Adjustments to Base*	14	14	\$ 395
2010 Current Services	25	25	\$ 9,895
2010 Program Change	0	0	\$ -
FY 2010 Request	25	25	\$ 9,895
Total Change 2009-2010	14	14	\$ 395

* Includes 14 Federal positions funded from program funds.

In FY 2010, the National Protection and Programs Directorate requests \$9,895,000 and 25 positions/FTE for RMA. The FY 2010 Request represents an increase of \$395,000 from the FY 2009 enacted budget of \$9,500,000. The FY 2010 Request includes an adjustment-to-base of \$37,000 for pay inflation, \$171,000 for GSA rent, 14 positions funded from program funds, and a transfer of \$187,000 from the Administration PPA for rent and facilities.

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Strategy for Homeland Security states that the Department must apply a risk-based framework across all homeland security efforts in order to identify and assess potential hazards and their downstream effects, determine what levels of relative risk are acceptable, and prioritize and allocate resources among all homeland security partners, both public and private, to prevent, protect against, and respond to and recover from all manner of incidents.² The homeland security mission is complex, and resources are constrained. The Department will use qualitative and quantitative risk assessments to inform resource decisions.³

The Department's approach to risk-informed decision making has matured considerably over the past five years and will continue to evolve as new analytic approaches are developed to deal with the complexities and uncertainties inherent in many of the risks for which DHS holds responsibility. Despite considerable progress, there is much that remains to be done. To advance these efforts, RMA has established two objectives:

² The National Strategy for Homeland Security, October 2007, page 41.

³ The National Strategy for Homeland Security, October 2007, page 41.

Establish and institutionalize a DHS Integrated Risk Management Framework. An Integrated Risk Management (IRM) Framework will consist of the doctrine, processes, and guidelines that will enable risk-informed decision making across DHS at the strategic, operational and tactical levels. It describes enterprise-wide processes by which information about risk is gathered, aggregated, analyzed, communicated, and used to strategically prioritize efforts.

Conduct strategic, integrated risk analysis. Risk analysis should leverage the various risk assessments being conducted within and outside the Department. Such analysis assists DHS leadership in prioritizing activities across DHS' diverse mission sets. The analysis is built upon scalable and flexible structures to leverage the risk management capabilities of the Department's component offices. Analysis is designed and data is collected and analyzed in a way that diverse and divergent efforts can be combined, if needed, to create usable analysis to address strategic problems.

FY 2008 Accomplishments

- Managed and led the administration and operation of a Department Risk Steering Committee (RSC). The Steering Committee is a cooperative body formed to ensure that risk management is carried out consistently throughout the Department.
- Implemented a Department lexicon development program for risk by establishing an RSC Lexicon Working Group (RLWG). The RLWG constructed the core of the DHS Risk Lexicon, which consists of approximately 80 words and terms.
- Completed the first prototype for the Risk Assessment Process for Informed Decision Making (RAPID). RAPID supports strategic policy and budgetary decision making, by assessing risk, evaluating risk reduction effects of DHS programs, and evaluating alternative resource allocation strategies.
- Through the RSC Risk Analytical Guidelines Working Group, RMA identified a collection of risk management principles and standards to analyze and assess for distribution.
- RMA drafted a risk management annex (Annex B) for the Integrated Planning System. In addition, RMA participated in the development of the National Homeland Security Plan. It further elevates risk management as essential to implementing the Nation's Homeland Security Strategy in support of Homeland Security Presidential Directive 8, Annex 1, which called for a new approach to homeland security planning as well as a Plan to implement the National Homeland Security Strategy.
- Completed first draft of the Interim DHS Integrated Risk Management Framework. The IRMF provides a foundation for developing follow-on policy, doctrine and guidance that will institutionalize integrated risk management in the Department. The IRMF outlines a vision, objectives, principles and a process for integrated risk management within DHS, and identifies how the Department will achieve integrated risk management by developing and maturing governance, processes, training, and accountability methods.

- Scoped and framed the Homeland Security National Risk Assessment (HSNRA). Departmental leadership requires current and/or projected future risk information in a timely and structured manner in order to meet the Nation's requirement for a strategic, risk-based decision support tool assessing risks to homeland security from all hazards now and in the future (potentially 5-10 years out).

FY 2009 Planned Accomplishments

- Establish a working group to conduct an assessment of the requirements and resources available, complete a methodological background and implications document, complete a requirements document, and complete an execution plan for the HSNRA. The HSNRA will serve as a comprehensive assessment of risk, leveraging existing risk assessments that empower leaders to make informed decisions to optimize the nation's security. It will show the potential for risk reduction to inform strategies, policies, planning venues, and operations across the homeland security enterprise.
- Incorporate the RAPID I prototype results to refine the methodology, broaden the scope, and prepare for application to inform the DHS's annual Planning, Programming, Budgeting, and Execution (PPBE) cycle of resource allocation decisions, including the FY 2011-2015 Integrated Planning Guidance (IPG) and the process for developing Resource Allocation Plans (RAPs) and Resource Allocation Decisions (RADs). Initiate execution of RAPID II as well as detailed assessments within the chemical and biological threat spectrum to inform the July 2009 IPG by: 1) providing an analysis of DHS chem./bio programs based on risk reduction across the DHS mission space, 2) evaluating the degree to which DHS chem./bio programs are currently managing the homeland security risk, 3) identifying gaps, and 4) recommending strategies for better allocating resources to manage risk.
- The development and adoption of a series of DHS Risk Management Analytical Guidelines. The Guidelines will serve as primers for DHS risk analysis practitioners on tactics, techniques, and procedures related to homeland security risk management that align with the DHS risk management process and principles. Structured training founded on the Guidelines will ensure DHS risk practitioners are approaching homeland security risk management activities in a consistent manner, thereby promoting continued integration of risk management activities over the longer term.
- Establish an RSC working group to assess and develop an implementation schedule for the IRMF.
- Conduct maintenance and continue to develop the Department's risk lexicon.
- Assess and develop a risk management training curriculum for RSC members, senior leadership, and RMA personnel.
- Lead the Protect and Defend sub-objective for the National Implementation Plan Global War on Terrorism (NIP GWOT) to address the development of sound risk management, risk assessment, and risk mitigation practices to reduce

vulnerabilities among all USG partners. Establish Interagency Risk Steering Committee.

- Support the Department's input into the Homeland Security Management System, including the Department's Quadrennial Homeland Security Review and the SRPP.
- Draft concept of operations (CONOPs) for DHS Operational Risk Management Cell. The Cell will assist in the Department's deliberate planning process and provide risk analysis to the Senior Leadership Group during incident management.
- Draft CONOPs for State and local Fusion Center Risk Analysis Model and technical support.
- Provide general risk analytic expertise and support to DHS components and HQ elements as requested.

FY 2010 Planned Accomplishments

- Produce initial Homeland Security National Risk Assessment analytical results to compare risks and risk management potential; to support a collective view of national homeland security risks; and to produce custom-tailored products from national assessments to meet information requirements of decision makers
- Institute and further refine the DHS IRMF.
- Continue to develop the Department's risk lexicon.
- Develop, implement, and institute a professional risk management training curriculum for RSC members.
- Produce analytical guidelines to form the core of curriculum development to support the formalized training and education of homeland security risk practitioners. They will be reviewed and updated on an annual basis to ensure they remain an accurate reflection of, and relevant to, DHS risk management practice. In addition, new topics may be added and existing topics redefined as homeland security risk management practices evolve.
- Assist the DHS Operations Directorate with the assessment of the DHS Operational Risk Management Cell CONOPs; establish initial capability.
- Continue to establish and formalize capability to provide technical assistance and support for DHS components and other homeland security stakeholders.
- Assist the DHS Intelligence Analysis (I&A) with the assessment of the CONOPs for State and local Fusion Center Risk Analysis Model and provide technical support; establish initial capability.
- Provide general risk analytic expertise and support to DHS components and HQ elements as requested.
- Support the Department's input into the Homeland Security Management System.
- Lead the Protect and Defend sub-objective for the NIP GWOT to address the development of sound risk management, risk assessment, and risk mitigation practices to reduce vulnerabilities among all USG partners.

- Continue the development and adoption of DHS Risk Management Analytical Guidelines to serve as primers for DHS risk analysis practitioners on tactics, techniques, and procedures related to homeland security risk.
- Incorporate the RAPID II results to refine the methodology, broaden the scope, and prepare for application to inform the DHS's annual PPBE cycle of resource allocation decisions, including the FY 2012-2016 IPG and the process for developing RAP and RAD documents. Initiate execution of RAPID III as well as detailed assessments to inform the July 2009 IPG.

PPA Mission Statement

The National Protection and Programs Directorate (NPPD) Directorate Administration includes the Office of the Under Secretary, the Office of Resource Administration, the Office of Budget and Financial Management, the Office of Information Management, the Office of Communications and Public Affairs, and the Office of Information Technology.

Summary Justification and Explanation of Changes

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Salaries and Benefits	\$4,970	\$8,833	\$14,400	\$5,567

The FY10 Request includes \$14,400,000 for salaries and benefits for 104 FTE, which represents a \$5,567,000 increase over FY2009. This increase includes \$219,000 for pay inflation, \$1,890,000 for annualization of 24 prior-year positions, and \$3,458,000 for 26 positions as part of the Federal Staffing realignment.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Travel	\$148	\$255	\$243	(\$12)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY10 Request includes a transfer of \$12,000 to OSEM.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
GSA rent	\$0	\$0	\$1,651	\$1,651

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY10 Request includes increase of \$1,435,000 for GSA Rent increases through WCF and \$216,000 for an increase to GSA rent.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Other Rent	\$6,164	\$10,033	\$0	(\$10,033)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. There is a decrease of \$10,033 in Other rent in FY 2010 from the year prior transferred to IPIS and RMA

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	\$458	\$409	\$409	\$0

Communications, Utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. There is no increase in Communication, Utilities, and miscellaneous charges in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$19,136	\$18,995	\$14,654	(\$4,341)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY10 requests includes reduction of \$3,458,000 for the Federal Staffing realignment to fund 26 additional positions and a transfer of \$883,000 to IPIS and RMA for facilities / security support contracts.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Other Services	\$2,580	\$510	\$510	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is no increase in Other Services in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$2,208	\$2,810	\$2,810	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. There no increase in Purchases from Government Accounts in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Supplies & materials	\$4	\$5	\$5	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is no increase in Supplies & Materials in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Salaries and Benefits	\$601	\$1,503	\$3,402	\$1,899

The FY 2010 request includes \$3,402,000 for salaries and benefits for 24 FTE. The FY10 Request includes an increase of \$37,000 for pay inflation and \$1,862,000 for Federal Staffing realignment of 14 FTE.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Travel	\$13	\$35	\$35	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. There is no increase in Travel in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
GSA rent	\$0	\$0	\$358	\$358

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. This includes a transfer of \$187,000 from NPPD Administration and an increase of \$171,000 in rent cost.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	\$49	\$48	\$48	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. There is no increase in Communications, Utilities, and miscellaneous charges in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$3,100	\$7,700	\$5,838	(\$1,862)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY10 Request includes an offset of \$1,862,000 for Federal Staffing realignment of 14 positions.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Other Services	\$4,350	\$0	\$0	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is no increase in Other services in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$901	\$164	\$164	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. There is no increase in Purchases from Government Accounts in FY 2010 from the year prior.

	FY 2008 Actuals	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Supplies & materials	\$38	\$50	\$50	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is no increase in Supplies and materials in FY 2010 from the year prior.

BUDGET REQUEST AND SUPPORTING INFORMATION

National Protection and Programs Directorate Infrastructure Protection and Information Security

I. Appropriation Overview

A. Mission Statement for Infrastructure Protection and Information Security

Infrastructure Protection

The Office of Infrastructure Protection leads the coordinated national effort to reduce risk to our critical infrastructure and key resources posed by acts of terrorism and enables national preparedness, timely response, and rapid recovery in the event of an attack, natural disaster, or other emergency.

Identification and Analysis. The Information and Analysis mission area includes projects and activities that support identification of the Nation's critical infrastructure and key resources, assessment of critical infrastructure and key resource vulnerabilities, consequences and risks. These activities provide a comprehensive inventory of the Nation's critical infrastructure and key resource assets. The program collects vulnerability and consequence information required to produce comprehensive asset and system risk analyses. They enable analysis of infrastructure interdependencies and cascading effects through strategic and tactical risk analysis for critical infrastructure and key resource protection, simulation and modeling, and intelligence fusion with information from practical field assessments.

Coordination and Information Sharing. The Coordination and Information Sharing mission area includes projects and activities that maximize the ability of government and private sector security partners at all levels to assess risks, coordinate programs and processes, and execute risk-mitigation programs and activities. Coordination and Information Sharing is responsible for executing the National Infrastructure Protection Plan. These activities foster information sharing and coordination between individual sector governance structures as well as facilitating development of security partner governance and coordination structures and models.

Mitigation Programs. The Mitigation Programs mission area includes voluntary and regulatory projects and activities, which enable security partners to identify and mitigate vulnerabilities, implement protective measures, and increase preparedness for facilities, systems, and surrounding communities. They support public awareness efforts; facilitate the sharing of critical infrastructure and key resource protection-related best practices and lessons learned; and enable infrastructure protection planning, readiness, and incident management.

Infrastructure Protection derives its mission from the following statutes and regulations:

- Homeland Security Act of 2002;
- Intelligence Reform and Terrorism Prevention Act of 2004;
- Homeland Security Presidential Directive-7;
- Section 550 of the Fiscal Year 2007 Homeland Security Appropriations Act, “Critical Infrastructure Identification, Prioritization, and Protection;”
- Homeland Security Presidential Directive-19, “Combating Terrorist Use of Explosives in the United States;” and

- Other Executive Orders, Homeland Security Presidential Directives and National Security Presidential Directives.

Cyber Security and Communications

The Office of Cyber Security and Communications reduces risk to the Nation's communication and information technology infrastructures, enables timely response and recovery of these infrastructures under all circumstances, and coordinates national security and emergency preparedness communications planning and provision for the Federal Government. The Office of Cyber Security and Communications includes: *the National Cyber Security Division, the Office of Emergency Communications, and the National Communications System.*

National Cyber Security Division. The National Cyber Security Division partners with private sector, government, military, and intelligence stakeholders to conduct risk assessments and mitigate vulnerabilities and threats to information technology assets and activities affecting the operation of the civilian government critical cyber infrastructures. The National Cyber Security Division provides cyber threat and vulnerability analysis, early warning, and incident response assistance for public and private sector constituents. In addition, the National Cyber Security Division is the executive agent for many of the mandates under the Comprehensive National Cybersecurity Initiative.

Office of Emergency Communications. The Office of Emergency Communications supports and promotes the ability of emergency response providers and government officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters. The Office of Emergency Communications works to ensure, accelerate, and attain interoperable emergency communications nationwide.

The National Communications System is comprised of the following programs: *Priority Telecommunications Service, Critical Infrastructure Protection, Programs to Study and Enhance Telecommunications, and Next Generation Network.*

Priority Telecommunications Service. The Priority Telecommunications Service program provides specially designed telecommunications services to the national security and emergency preparedness user community during natural or man-made disasters when conventional communications services are ineffective. These telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, assist with Continuity of Operations and Government.

Critical Infrastructure Protection. The Critical Infrastructure Protection program ensures the continued availability of national security and emergency preparedness telecommunications services under all circumstances, including emergency, attack, recovery, and reconstitution. The program includes: National Coordinating Center Operations; Critical Infrastructure Protection Operations; Plans and Policy; Training and Exercises; Network Security Information Exchanges; and Telecommunications Service Priority.

Programs to Study and Enhance Telecommunications. The Programs to Study and Enhance Telecommunications program develops models and conducts technical analyses of public communications infrastructures and equipment, identifies vulnerabilities in new communications technologies to Telecommunication Electromagnetic Disruptive Effects, and works with the international communications industry consensus standards organizations to ensure that evolving

commercial standards address the technical requirements of national security and emergency preparedness communications.

Next Generation Networks. The Next Generation Networks program is a technology initiative to maintain and migrate legacy priority voice telecommunications features, and to apply priority to data applications, as the public switched network evolves to next generation networks.

B. Budget Activities

Infrastructure Protection

In FY 2010, NPPD requests \$333,303,000 for Infrastructure Protection, including 725 FTP/688 FTE. This represents an increase of \$19,503,000 over the FY 2009 enacted budget of \$313,800,000.

Identification and Analysis. In FY 2010, NPPD requests \$86,610,000, for the Identification and Analysis program, including 130 positions/FTE. This represents an increase of \$6,007,000 over the FY 2009 enacted budget of \$80,603,000. These funds support the vulnerability assessments, infrastructure sector analysis, and infrastructure data management and visualization.

Coordination and Information Sharing. In FY 2010, NPPD requests \$50,582,000 for the Coordination and Information Sharing program, including 89 positions/FTE. This represents a decrease of \$11,785,000 from the FY 2009 enacted budget of \$62,367,000. These funds support the coordination and management of the National Infrastructure Protection Plan, management of Critical Infrastructure and Key Resources Partnerships, and Infrastructure Protection's Management and Planning projects.

Mitigation Programs. In FY 2010, NPPD requests \$196,111,000, for the Mitigation Programs, including 506 positions and 469 FTE. This represents an increase of \$25,281,000 over the FY 2009 enacted budget of \$170,830,000. These funds support the coordination and management of the DHS' regulatory authority over high-risk chemical facilities; ammonium nitrate; bombing prevention activities; protective security advisor support; Sector-Specific Agency responsibilities; and incident management, contingency, and readiness activities.

Cyber Security and Communications

In FY 2010, NPPD requests \$584,863,000 for Cyber Security and Communications, including 419 positions and 343 FTE. This represents an increase of \$91,750,000 over the FY 2009 enacted budget of \$493,113,000.

National Cyber Security Division. NPPD requests \$400,654,000, for the National Cyber Security Division, including 260 positions / 186 FTE. This represents an increase of \$87,154,000 over the FY 2009 enacted budget of \$313,500,00. These funds support NPPD's role in the Comprehensive National Cybersecurity Initiative and the other cybersecurity activities of National Cyber Security Division's branches: United States Computer Emergency Readiness Team Operations; Federal Network Security; Network Security Deployment; Global Cyber Security Management; Critical Infrastructure Cyber Protections and Awareness; and Plans, Programs, Policies, and Administration.

Office of Emergency Communications. In FY 2010, NPPD requests \$44,060,000 for the Office of Emergency Communications, including 52 positions/FTE. This represents an increase of \$5,760,000

over the FY 2009 enacted budget of \$38,300,000. These funds will support and promote the ability of emergency response providers and Federal Officials to continue to communicate in the event of natural disasters, acts of terrorism, or other manmade disasters, and to ensure, accelerate, and attain interoperable emergency communications nationwide.

Within the National Communications System:

Priority Telecommunications Service. In FY 2010, NPPD requests \$56,773,000 for the Priority Telecommunications Service, including 41 positions/FTE. This represents a decrease of \$1,967,000 from the FY 2009 enacted budget of \$58,740,000. These funds support the operation of the Government Emergency Telecommunications System, Wireless Priority Service, Special Routing Agreement Service, Industry-Government and Interagency Processes, and support for the Office of the Assistant Secretary for Cyber Security.

Programs to Study and Enhance Telecommunications. In FY 2010, NPPD requests \$19,274,000 for Programs to Study and Enhance Telecommunications, including 28 positions/FTE. This represents an increase of \$4,174,000 over the FY 2009 enacted budget of \$15,100,000. These funds support modeling, simulation, technology assessments, National Security and Emergency Preparedness standards, and vulnerability assessments on advanced technologies and converged networks.

Critical Infrastructure Protection Programs. In FY 2010, NPPD requests \$13,852,000 for the Critical Infrastructure Protection programs, including 38 positions and 36 FTE. This represents an increase of \$2,592,000 over the FY 2009 enacted budget of \$11,260,000. These funds support National Coordinating Center; Critical Infrastructure Protection operations, planning, policy; training and exercises; network security information exchange, and the Telecommunications Service Priority program.

Next Generation Networks. In FY 2010, NPPD requests \$50,250,000 for the Next Generation Networks, the same level of funding as the FY 2009 enacted budget. These funds support the transition of national security and emergency preparedness communications systems from the public switch networks to the next generation networks.

National Command and Coordination Capability. In FY 2010, NPPD requests no funding, positions, or FTE for the National Command and Coordination Capability. This represents a decrease of \$5,963,000 and 9 FTE and 16 positions from the FY 2009 enacted budget.

C. Budget Request Summary

In FY 2010, NPPD requests 1,144 positions/1,031 FTE, and \$918,166,000 for Infrastructure Protection and Information Security. This represents an increase of 419 positions and 395 FTE and \$111,253,000 over the FY 2009 enacted budget of \$806,913,000. The position and FTE amounts include 348 additional Federal positions funded through offsets from program/contract dollars.

The Department has identified critical enhancements to existing programs and prioritized new undertakings to accomplish the NPPD mission. The summaries of changes follow.

Adjustments-to-Base

1. Annualization for 82 FTE for positions received in FY 2009 (54 Infrastructure Protection, 23 National Cyber Security Division, and 5 Office of Emergency Communications): \$11,137,000
2. Annualization of the calendar year 2009 pay increase: \$ 832,000
3. Calendar year 2010 pay increase: \$1,279,000
4. Transfer from the NPPD Management and Administration Appropriation for rent and facilities: \$10,729,000
5. NPPD is offsetting the funding for 348 Federal positions and 275 FTE from program funds. The table below summarizes the \$35,786,000 in offsets by PPA.

FY 2010 Offsets for Additional Federal Positions

PPA	Total FTE	Total Positions	FY 2010 Program Funding	FY 2010 Salaries Funding	Net Budget Change
Identification & Analysis	47	47	\$ (5,092)	\$ 5,092	\$ -
Coordination and Information Sharing	6	6	\$ (798)	\$ 798	\$ -
Mitigation Programs	172	187	\$ (22,876)	\$ 22,876	\$ -
National Cyber Security Division	42	100	\$ (5,956)	\$ 5,956	\$ -
Priority Telecommunications Service	1	1	\$ (133)	\$ 133	\$ -
Programs to Study & Enhance Telecommunications	2	2	\$ (266)	\$ 266	\$ -
Critical Infrastructure Protection	0	0	0	0	\$ -
Next Generation Networks	0	0	0	0	\$ -
National Command & Coordination Capability	0	0	0	0	\$ -
Office of Emergency Communications	5	5	\$ (665)	\$ 665	\$ -
Total	275	348	\$ (35,786)	\$ 35,786	\$ -

Program Enhancements

1. *Vulnerability Assessments, Identification and Analysis.* An increase of \$3,000,000 provides for the capability to conduct New Nuclear Reactor Security Consultations in coordination with the Nuclear Regulator Commission as required by The Energy Policy Act of 2005. Additionally, Vulnerability Assessments are piloting 5 Regional Resiliency Assessment Program pilot projects to provide State and local stakeholders with a comprehensive understanding of a region's vulnerabilities and resiliency while providing critical risk based information on how to apply the most cost effective protective measures to the most vulnerable assets within the region.
2. *Infrastructure Security Compliance, Mitigation Programs.* An increase of \$19,000,000, 23 FTE/45 positions is requested for Chemical Site Security and Ammonium Nitrate to enhance current inspection capabilities through the hiring, training, equipping and housing of additional inspectors. Funding will also support completing and publishing final Ammonium Nitrate regulations to prevent the use of Ammonium Nitrate in an act of terrorism.
3. *Bombing Prevention, Mitigation Programs.* An increase of \$4,200,000 provides an enhanced and coordinated national bombing prevention and improvised explosive device security effort. This funding will provide the resources to enhance national awareness, facilitate multi-jurisdiction planning, and conduct additional capabilities assessments for 50 explosives detection canine units, 32 bomb squads, 30 Special Weapons and Tactics (SWAT) teams, and 20 dive teams in high risk urban areas across the nation.
4. *Cyber Security Coordination, National Cyber Security Division.* An increase of \$13,000,000 provides for national cybersecurity coordination as part of the national cybersecurity response system to secure government cyberspace.

5. *United States Computer Emergency Readiness Team Operations, National Cyber Security Division.* An increase of \$16,128,000, 11 FTE/22 positions will enhance analytical and response capabilities to handle an increased number of cyber threats. The funding increase will enhance United States Computer Emergency Readiness Team's capabilities to refine the delivery of its core products and services; improve existing cyber interagency processes and the generation of new customer service support activities for collaborative environments across the .gov community; and enhance human capital strategies across all United States Computer Emergency Readiness Team programmatic pillars, with emphasis on training cyber analysts, managers, and cyber incident responders to fulfill its mission.
6. *Federal Network Security, National Cyber Security Division.* An increase of \$4,700,000 will improve Federal Network Security's ability to manage the reduction and consolidation efforts of external Federal ports, enabling the National Cybersecurity Protection System to effectively monitor and alert on suspicious activity occurring across the Federal enterprise. The Federal Network Security office also will conduct Trusted Internet Connection compliance assessments of Trusted Internet Connection Access Providers; expand the Trusted Internet Connection compliance assessment program by identifying and adding required capability checks to the compliance catalog; and improve the monitoring of Federal cybersecurity policies implementation by providing day-to-day coordination, oversight, guidance, and the tracking of Office of Management and Budget security policy progress.
7. *Network Security Deployment, National Cyber Security Division.* An increase of \$40,490,000, 4 FTE/8 positions will enhance the development and performance of cybersecurity technologies to counter on-going, real world national cyber threats and apply effective risk mitigation strategies to detect and deter threats in support of the Comprehensive National Cybersecurity Initiative. It will reduce the potential alerts pool by an additional 15 percent by automatically filtering out false positives. It also will decrease the average delivery time to the customers of alert summary data reports. Funding will support the ability to aggregate and correlate identified events at deployed locations up to an additional 20 percent and will enhance the ability to deploy the appropriate subscriber identity module tool to automatically aggregate and correlate events, significantly increasing the volume of events analyzed. The increase also provides continued improvements to Block 3.0 of the National Cybersecurity Protection System.
8. *Global Cyber Security Management, National Cyber Security Division.* An increase of \$800,000 will enhance the development of trained professionals to support the Nation's cybersecurity needs, thus preparing the information technology workforce to meet current and future cybersecurity challenges. It will strengthen the Nation's pool of educated information assurance and information technology professionals by focusing resources on improving cybersecurity education, increasing the efficiency of existing cybersecurity training programs, and promoting cybersecurity workforce development.
9. *Critical Infrastructure Cyber Protection & Awareness, National Cyber Security Division.* An increase of \$15,000,000, 1 FTE/2 positions will enhance the Control Systems Security, Cyber Exercises and Critical Infrastructure Protection-Cyber Security programs. Funding will be used to: conduct 50 Site Assistance Visits across the 18 critical infrastructure and key resources sectors to identify vulnerabilities in Industrial Control Systems; implement the Coordination Strategy for Securing Control Systems and the Control Systems Security Protection Framework; and develop sector-specific, regional, and state-level risks mitigation activities, based on Information Technology Risk Assessment and cross sector cybersecurity studies, strategies and plans of action which can implemented across all sectors.

10. *Programs to Study and Enhance Telecommunications*. An increase of \$1,592,000 and 1 position/FTE for a classified program.
11. *Continuity Communications Architecture, Programs to Study and Enhance Telecommunications*. An increase of \$2,500,000 is requested to develop a continuity communications architecture to ensure, under all conditions, federal executive branch cross-department and agency communications. Developing the architecture will identify existing continuity communication capabilities, shortfalls or gaps, and develop technical requirements to improve the overall continuity communications posture. Implementation will ensure agencies can execute primary mission essential functions in support of the 8 national essential functions.
12. *Regional Communications Coordinators, Critical Infrastructure Protection*. An increase of \$2,500,000 and 9 positions/7 FTE is requested to deploy one Regional Communications Coordinator in each of the 10 Federal Regions. The coordinators will support planning, preparedness and response activities with the private and public sectors associated with Emergency Support Function #2 – Communications of the National Response Framework. Regional Communications Coordinators will work closely with Federal, State, and local regional personnel, as well as with the full range of private communications industry (e.g. wireline, wireless, cable, satellite and broadcast) regional representatives to develop and implement national security and emergency preparedness communications, to include plans, procedures, training, exercises and response to incidents.
13. *Office of Emergency Communications*. An increase of \$3,829,000 will advance implementation of the National Emergency Communications Plan by performing 100 site visits to validate progress against National Emergency Communications Plan goals, providing additional support to lower achieving urban areas, and conducting Statewide Communication Interoperability Plan workshops.

Program Decreases

1. *National Infrastructure Simulation and Analysis Center, Identification and Analysis*. Includes a \$4,000,000 reduction to Infrastructure Sector Analysis project for the National Infrastructure Simulation and Analysis Center.
2. *National Infrastructure Protection Plan and Critical Infrastructure and Key Resources Partnerships, Coordination and Information Sharing*. Includes a \$11,000,000 reduction to the National Infrastructure Protection Plan Management and Critical Infrastructure and Key Resources Partnerships projects.
3. *Philadelphia Critical Infrastructure Monitoring, Mitigation Programs*. Includes a \$2,000,000 reduction to Philadelphia infrastructure monitoring project.
4. *Protection of Underground Critical Infrastructure, Mitigation Programs*. Includes of \$3,000,000 reduction to the protection of underground critical infrastructure.
5. *Improvised Explosive Device Geospatial Monitoring Tool, Mitigation Programs*. Includes a \$1,000,000 reduction to the Improvised Explosive Device Geospatial Monitoring Tool.
6. *University of Texas at San Antonio Community Cyber Security Maturity Model, National Cybersecurity Division*. Includes a \$3,500,000 reduction to the University of Texas San Antonio Community Cyber Security Maturity Model.

7. *Cyber system protection, analysis and protection program at Idaho National Laboratory, National Cybersecurity Division.* Includes a \$4,000,000 reduction to the Idaho National Laboratory program for cyber system protection, analysis and protection.
8. *Wireless Priority Service, Priority Telecommunications Service.* Includes a \$5,000,000 reduction for the Wireless Priority Service.
9. *National Command and Coordination Capability.* Includes a \$5,963,000 reduction for the termination of the National Command and Coordination Capability.

II. Summary of the FY 2010 Budget Estimates by Program/Project/Activity (PPA)

* Includes 275 additional Federal Staffing realignment FTE

** In FY 2008, \$3,831,000 and 1FTE/2 positions were appropriated for National Command and Coordination Capability in the Priority Telecommunications Service PPA

FY 2009 to FY 2010 Budget Structure Changes

In FY 2010, the IPIS PPA structure is the same as the FY 2009 enacted structure in P.L. 110-329; however, NPPD is requesting a realignment of some Infrastructure Protection projects and activities across the Infrastructure Protection PPAs, and a restructuring of projects and activities within the National Cyber Security Division and Office of Emergency Communications PPAs. The FY 2009 enacted budget for realigned activities was restated to reflect the FY 2010 budget request structure for comparison purposes. Detailed crosswalks are provided for FY 2009 to reflect both the enacted structure and the requested structure.

Infrastructure Protection

Infrastructure Protection Personnel: At the beginning of FY 2009, Infrastructure Protection evaluated budgeted Federal staffing levels within its various missions based on maturing program capabilities and emerging requirements. The FY 2010 budget request reflects Infrastructure Protection's realignment of the 440 FY 2009 enacted positions, a request for 240 additional Federal personnel funded through an offset from program/contract funds, and an enhancement of 45 positions in FY 2010. Overall Infrastructure Protection is requesting 725 positions in FY 2010 (an increase of 285 positions over FY 2009 enacted); however, based on the realignment, positions within the projects may increase or decrease from FY 2009.

Identification and Analysis: The FY 2009 project Infrastructure Information Collection and Visualization has been broken into Infrastructure Visualization, Information Data Management, and Infrastructure Information Collection projects. Infrastructure Information Collection and Visualization was divided into these three projects to better address the increased magnitude and scope of the activities. As part of this realignment, Infrastructure Protection requests that the Protected Critical Infrastructure Information activity be moved to the Infrastructure Data Management project from the Coordination and Information Sharing PPA.

National Cyber Security Division

The National Cyber Security Division requests a change in its FY 2010 budget structure to better align appropriated resources to its responsibilities and expanded mission under the Comprehensive National Cybersecurity Initiative. The updated structure provides increased visibility and transparency into how the National Cyber Security Division is executing its mission requirements. The previous budget structure was comprised of: United States Computer Emergency Readiness Team, Strategic Initiatives, Outreach and Awareness, and Planning and Programs. Under this realignment, the National Cyber Security Division's six branches are: United States Computer Emergency Readiness Team Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Plans, Programs, Policies and Administration. A more detailed crosswalk of this restructuring is provided on page IPIS-43.

Office of Emergency Communications

The Office of Emergency Communications requests a change in budget structure to better align appropriated resources to five service offerings: 1) Coordination, 2) Demonstration Projects, 3) Grants, 4) Policy, and 5) Technical Assistance. The Office of Emergency Communications believes that optimal mission success will be reached through a service offering model while maintaining organizational structure. A more detailed crosswalk of this restructuring is provided on page IPIS-115.

III. Current Services Program Description by PPA

**Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Program Performance Justification
(Dollars in thousands)**

PPA: IDENTIFICATION AND ANALYSIS

	Perm Pos	FTE	Amount
FY 2008 Actual	73	48	\$ 61,775
FY 2009 Enacted	83	83	\$ 80,603
2010 Adjustments-to-Base	47	47	\$ 7,007
2010 Current Services	130	130	\$ 87,610
2010 Program Change	0	0	\$ (1,000)
FY 2010 Request	130	130	\$ 86,610
Total Change 2009-2010	47	47	\$ 6,007

In FY 2010, NPPD requests \$86,610,000 for Identification and Analysis, including 130 positions / FTE. This represents an increase of \$6,007,000 over the FY 2009 enacted budget of \$80,603,000. These funds support NPPD's Vulnerability Assessment, Infrastructure Sector Analysis, Infrastructure Visualization, Infrastructure Data Management, and Infrastructure Information Collection projects.

The FY 2010 request includes adjustments-to-base for pay inflation of \$284,000 and 47 additional Federal positions offset by \$5,092,000 in program/contract dollars. In FY 2010, Infrastructure Protection requests that \$6,723,000 for the Protected Critical Infrastructure Information Program to be moved to the Infrastructure Data Management Project from the Coordination and Information Sharing PPA. Program changes include an increase of \$3,000,000 for the Vulnerability Assessments project and a decrease of \$4,000,000 for the National Infrastructure Simulation and Analysis Center within the Infrastructure Sector Analysis project.

CURRENT SERVICES PROGRAM DESCRIPTION

Identification & Analysis	FY 2009 Enacted	FY 2010 Request
Personnel Costs	\$ 11,127	\$ 16,503
Program Costs	\$ 69,476	\$ 70,107
Total Costs	\$ 80,603	\$ 86,610

The Information and Analysis mission area includes projects and activities that support identification of the Nation's critical infrastructure and key resources, assessment of critical infrastructure and key resource vulnerabilities, consequences and risks. These activities provide a comprehensive inventory of the Nation's critical infrastructure and key resource assets. The program collects vulnerability and consequence information required to produce comprehensive asset and system risk analyses. They enable analysis of infrastructure interdependencies and cascading effects through strategic and tactical

risk analysis for critical infrastructure and key resource protection, simulation and modeling, and intelligence fusion with information from practical field assessments. This information enables analysis of interdependencies and cascading effects. Identification and Analysis' five projects include: Vulnerability Assessments, Infrastructure Sector Analysis, Infrastructure Visualization, Infrastructure Data Management, and Infrastructure Information Collection.

Vulnerability Assessments

\$ thousands	Activity	FY 2009			FY 2010			Change		
		FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
	Salaries & Benefits	33	33	\$4,424	16	16	\$2,275	-17	-17	-\$2,149
	<i>Vulnerability Assessments</i>			\$18,985			\$24,246			\$5,261
	Program Costs			\$18,985			\$24,246			\$5,261
	Total	33	33	\$23,409	16	16	\$26,521	-17	-17	\$3,112

The Vulnerability Assessments project is an Infrastructure Protection-led collaborative effort between the Federal, State, local, and private sectors to identify vulnerabilities and enhance the security of the Nation's Tier 1 and Tier 2 critical infrastructure and key resources. The project fulfills Homeland Security Presidential Directive 7 by coordinating efforts among Federal, State, and local governments and the private sector to protect the Nation's critical infrastructure and key resources, as well as supporting implementation of the National Infrastructure Protection Plan and the National Response Framework.

Current efforts cover the spectrum of field teams conducting single Site Assistance Visits and Buffer Zone Plans to larger-scale assessments of systems and regions via interagency Comprehensive Reviews and the Regional Resiliency Assessment Program. The Computer-Based Assessment Tool complements these assessment tools by integrating assessment data with geospatial video providing planners with a computer-based, cross-platform tool that enables informed decisions and quicker incident response. Additionally, the Energy Policy Act of 2005 requires Infrastructure Protection to perform security consultation for Nuclear Regulatory Commission new nuclear reactor license applications.

Infrastructure Sector Analysis

\$ thousands	Activity	FY 2009			FY 2010			Change		
		FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
	Salaries & Benefits	22	22	\$2,949	42	42	\$4,525	20	20	\$1,576
	<i>HITRAC</i>			\$11,800			\$10,299			-\$1,501
	<i>NISAC</i>			\$20,000			\$16,000			-\$4,000
	Program Costs			\$31,800			\$26,299			-\$5,501
	Total	22	22	\$34,749	42	42	\$30,824	20	20	-\$3,925

The Infrastructure Sector Analysis project provides the integrated capability to conduct comprehensive, timely, actionable, and risk-informed assessments, modeling, simulation, and analysis to advance the Nation's understanding of the dynamic risk landscape impacting critical infrastructure and key resources. The Infrastructure Sector Analysis project, through the Homeland Infrastructure Threat and Risk Analysis Center and the National Infrastructure Simulation and Analysis Center analyzes and monitors risks to the Nation's infrastructure and provides key public and private sector decision-makers with risk-informed analytic products that influence the prioritization of risk-reduction strategies. In addition to analytic products, Infrastructure Sector Analysis also develops and deploys methodologies, tools, and technologies that enable National Infrastructure Protection Plan implementation and other risk mitigation activities at the Federal, State, local, Tribal, and Territorial government and private-sector levels.

Infrastructure Visualization

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	5	5	\$670	19	19	\$2,550	14	14	\$1,880
<i>Infrastructure Visualization</i>			\$4,997			\$3,135			-\$1,862
Program Costs			\$4,997			\$3,135			-\$1,862
Total	5	5	\$5,667	19	19	\$5,685	14	14	\$18

The Infrastructure Visualization project provides access to infrastructure information, geospatial tools, technologies, and methodologies to support planning, preparedness, and protection efforts and situational awareness. Infrastructure Visualization provides near real-time situational awareness of the Nation's infrastructure status, critical infrastructure and key resources incident management information, and access to geospatial and information management tools. Critical infrastructure and key resources situational awareness is enhanced through the production of related geospatial products that support various operational activities of the Protective Security Advisors, Chemical Inspectors, Infrastructure Liaison Officers, and the Office of Infrastructure Protection's contingency planning and incident management, as well as other organizations internal and external to DHS that require display or mapping of the Nation's infrastructure.

Infrastructure Data Management

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted*	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	8	8	\$1,074	27	27	\$3,628	19	19	\$2,554
<i>Infrastructure Data Management</i>			\$6,723			\$4,196			-\$2,527
Program Costs			\$6,723			\$4,196			-\$2,527
Total	8	8	\$7,797	27	27	\$7,824	19	19	\$27

*FY 2009 includes \$6,723 for the Protected Critical Infrastructure Information activity that was enacted in the Coordination and Information Sharing PPA for comparison purposes.

The Infrastructure Data Management project establishes common and consistent standards in the collection, visualization, and protection of infrastructure data. Infrastructure Data Management provides leadership for the infrastructure data domain of the DHS enterprise data model and National Information Exchange Model, identifies infrastructure data gaps, prioritizes customer data requests, locates data to satisfy requests for information, and provides protection and geospatial data services to a wide range of customers and stakeholders. The Infrastructure Data Management Project takes a leadership role in engaging the infrastructure data community to better assess data needs, develop data standards, and assess data quality through customer feedback and collaboration with the Department's Electronic Data Management Office and National Information Exchange Model. Another critical component of the Infrastructure Data Management Project is the protection of infrastructure data, especially data voluntarily shared with DHS by the private sector. The Office of Infrastructure Protection takes the protection of this data very seriously and has established and maintained Protected Critical Infrastructure Information procedures to protect it from disclosure under the Freedom of Information Act and similar State and local disclosure laws, and from use in civil litigation and regulatory proceedings in accordance with the Critical Infrastructure Information Act of 2002 and its implementing regulation (6 Code of Federal Regulations Part 29 dated September 1, 2006).

Infrastructure Information Collection Project

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	15	15	\$2,010	26	26	\$3,525	11	11	\$1,515
<i>Infrastructure Information Collection Project</i>			\$13,694			\$12,231			-\$1,463
Program Costs			\$13,694			\$12,231			-\$1,463
Total	15	15	\$15,704	26	26	\$15,756	11	11	\$52

The Infrastructure Information Collection Project standardizes information collection management to provide quantifiable, risk-related infrastructure information and provides data standards to ensure common and consistent information for efficient information sharing. The project also provides a common information collection, maintenance, and update process and a processing capability to fuse and disseminate information to infrastructure protection partners internal and external to DHS. The Infrastructure Information Collection Project will develop an integrated collection process that focuses collection of information on vetted and prioritized requirements from Federal, State, local, Territorial, and Tribal stakeholders, as well as private sector entities. The collection strategy will decrease reliance on the long-term purchase or licensing of commercial data and focus on utilizing an integrated distributed architecture to integrate existing government-owned information that can be used long term.

FY 2008 Identification and Analysis Accomplishments

- Conducted multi-asset assessment on 72 assets in the Lower Manhattan Security Initiative and 32 assets in the District of Columbia Metroplex Initiative.
- Conducted over 40 vulnerability assessments utilizing extensive National Infrastructure Simulation and Analysis Center modeling. As a result, the first system-based Comprehensive Review methodology was developed, providing Federal, State, local and private sector stakeholders with the first ever systems-based vulnerability identification and analysis.
- Conducted over 300 vulnerability assessments on Tier 1 and Tier 2 critical infrastructure and key resource assets, National Special Security Events, other special events, and specially directed facilities. These included Site Assistance Visits, Buffer Zone Protection Plans, Comprehensive Reviews, and New Nuclear Reactor assessments.
- Led the interagency vulnerability assessment of the Liquefied Natural Gas System in Trinidad and Tobago with the Departments of Energy, Defense, State, and the U.S. Coast Guard. The final assessment report, briefed by the interagency team to the Government of Trinidad and Tobago in May 2008, included identified vulnerabilities, best practices, and recommended protective measures vulnerabilities.
- Produced the National Critical Infrastructure and Key Resources Terrorism Risk Profile, a nationwide cross-sector assessment of risks to the Nation's critical infrastructure and key resources, including risks from cyber attacks and developed 2008 Strategic Homeland Infrastructure Risk Assessment report. Submitted National Critical Infrastructure and Key Resources Terrorism Risk Profile and State Risk Profiles for inclusion in the National Critical Infrastructure and Key Resources Protection Annual Report and provided Sector Terrorism Risk Profiles for review and release to Critical Infrastructure and Key Resources partners.
- Launched the New York State Infrastructure Risk Analysis Partnership Program through the Homeland Infrastructure Threat and Risk Analysis Center in coordination with the New York State Office of Homeland Security in order to assist the State with building the capability to develop a State Risk Profile, as part of the Infrastructure Risk Analysis Partnership Program initiative.

- Provided operational incident support through the National Infrastructure Simulation and Analysis Center activities during Midwest flooding in June 2008. Examined potential economic losses, outlined affected infrastructure, and projected overall national-level cascading impacts due to floods. Prioritized restoration of infrastructures that may be affected by Hurricane Dolly in July 2008 and conducted analysis of potential cross-border (U.S./Mexico) infrastructure impacts to critical infrastructure and key resources due to hurricanes.
- Initiated a number of efforts with Sector partners to build risk and vulnerability assessment tools that are vital to DHS efforts to execute cross-sector, comparative risk assessments. These projects included the Vulnerability Identification Self-Assessment Tool for the Commercial Facilities Sector; Risk Assessment Methodology – Water Sector; Food and Agriculture Sector Criticality and Assessment Tool version 2.0; Risk Assessment Methodology – Dams tool; and the voluntary chemical risk assessment pilot project for the Chemical Sector.
- Implemented DHS Earth at the unclassified level to view event and threat information, such as suspicious activity reports, wildfire perimeters, and hurricane tracks, in relation to the Nation’s critical infrastructure and key resources in real time. This capability provided users with a robust, three-dimensional visualization capability for situational awareness.
- Trained over 1,800 Protected Critical Infrastructure Information authorized users. Developed the Program Administrative Support System to deliver authorized Protected Critical Infrastructure Information user training and to manage the authorized user community. Accredited the Department of Defense and 10 States to be able to access, use, and store Protected Critical Infrastructure Information through a Memorandum of Agreement, training, and a Standard Operating Procedure, and established six new DHS information sharing partnerships that incorporated Protected Critical Infrastructure Information protections.
- Enhanced and expanded the Constellation/Automated Critical Assessment Management System information technology architecture, allowing users across all 56 U.S. States and territories faster and more reliable access, more secure and redundant Constellation/Automated Critical Assessment Management System data protection, and a means to execute live, continuous critical infrastructure and key resource asset data transfer among and between the Constellation/Automated Critical Assessment Management System and approved, authorized commercial and non-Federal systems and data stores.
- Established a robust and multi-faceted State and local critical infrastructure protection and Constellation/Automated Critical Assessment Management System training program by leveraging the National Guard Bureau and U.S. Army Research, Development, and Engineering Command to implement the Critical Infrastructure and Key Resources Asset Protection Technical Assistance Program, “Train-the-Trainer” course, and Constellation/Automated Critical Assessment Management System Web-based user training. The Critical Infrastructure and Key Resources Asset Protection Technical Assistance Program provides instruction on implementing the National Infrastructure Protection Plan at the State and local level.

FY 2009 Identification and Analysis Planned Accomplishments

- Develop a pre-construction assessment methodology, which can be utilized in the design phase of new critical infrastructure and key resource construction. This methodology will assess the vulnerabilities of the design, annotate the protective measures needed to mitigate vulnerabilities, and include a cost analysis of enacting those protective measures.
- Expand the focus of vulnerability assessments from primarily individual assets to emphasis on critical infrastructure and key resource “clusters,” regions, and systems in major metropolitan areas, identified through application of risk-based criteria. In pilot year FY 2009, conduct the

Regional Resiliency Assessment Program on the Chicago Financial District, Tennessee Valley Authority, Raleigh-Durham Research Triangle, New York City Bridges, and New Jersey Turnpike Exit 14 Corridor.

- Expand the National Guard Vulnerability Assessment Program to increase the number of nationwide critical infrastructure and key resource vulnerability assessments and Regional Resiliency Assessment Program conducted.
- Expand Critical Infrastructure Red Team work, expanding to four additional sectors in 2009. In each of the four targeted sectors, Critical Infrastructure Red Team will work with the Sector-Specific Agencies, and the respective owners/operators, to enhance their awareness of operationally validated vulnerabilities, improve protective postures against these vulnerabilities, and identify those required capabilities where Federal assistance is needed, such as DHS Science & Technology development, law enforcement grants, and exercise coordination
- Develop an enhanced Tier1/Tier 2 program, identifying and prioritizing nationally significant assets. Work with partners to provide prioritization and analysis during incident response. Begin work to expand program by working with stakeholders to nominate assets and systems for individual Sector, State, and Territory Lists.
- Produce the FY 2009 Critical Foreign Dependencies List and Executive Report for FY 2009, a comprehensive inventory of infrastructure located outside the United States that if disrupted or destroyed, would lead to loss of life in the United States, or critically affect the Nation's economic, industrial, or defensive capabilities.
- Complete deployment of the Integrated Common Analytical Viewer NextGen on the Homeland Security Data Network to allow users to view classified information and perform rapid threat impact assessments.
- Initiate development of Web-based training for the Integrated Common Analytical Viewer tool suite to significantly enhance, increase and inform the user base through a more cost-effective method.
- Enhance the Tier1/Tier 2 Data Call application to improve the quality of the data received during the annual Infrastructure Protection Data Call. The enhancements will allow users to categorize the infrastructure and resources they submit as single assets, systems, and clusters; such distinctions will assist data analysts with researching the interdependencies between assets and asset groups.
- Establish the Infrastructure Data Taxonomy application, which will improve the delineation of infrastructure attributes of interest and foster ongoing feedback from end users. The application includes a mapping function that crosswalks different versions of the infrastructure taxonomy to quickly highlight areas of change between the versions.
- Develop an Infrastructure Data Catalog that will enable a single point approach to accessing infrastructure data. The Data Catalog will provide infrastructure data users with a common reference guide to critical infrastructure and key resource information, allowing users to request additional infrastructure information to fulfill a specific need.
- Increase Protected Critical Infrastructure Information accredited entities by two Federal agencies and 10 States and establish new information sharing partnerships that incorporate Protected Critical Infrastructure Information protections.
- Complete Initial Operating Capability of the Integrated Data Warehouse to enable compilation and dissemination of information to infrastructure protection.

- Achieve Initial Operating Capability for the official use only and Secret Infrastructure Information Collection System development and test subsystem to create an environment to store prioritized data for use by homeland security partners.
- Enhance infrastructure protection and Constellation/Automated Critical Assessment Management System training by deploying the Virtual Critical Infrastructure and Key Resources Asset Protection Technical Assistance Program course, which will dramatically lower training costs for the Infrastructure Information Collection Division and for State and local partners by leveraging distributed learning technology. This enhanced training will enable the Constellation/Automated Critical Assessment Management System Project Office to train an estimated 1,400 new users during FY 2009.
- Complete efforts to build risk and vulnerability assessment tools vital to DHS efforts to execute National Comparative Risk Assessment. Completed tools will include the Risk Self-Assessment Tool for the Commercial Facilities Sector, the Risk Assessment Methodology – Water tool, enhancement of the Security and Emergency Management System tool for the Water Sector, the Food and Agriculture Sector Criticality and Assessment Tool version 2.0 for the Food/Agriculture Sector, the Risk Assessment Methodology – Dams tool for the Dams Sector, and the voluntary chemical risk assessment pilot project for the Chemical Sector.

FY 2010 Identification and Analysis Planned Accomplishments

- Conduct approximately 315 vulnerability assessments (Site Assistance Visits, Buffer Zone Protection Plans, and Regional Resiliency Assessment Programs) on Tier1/Tier 2 assets, special events projects and as directed by leadership, utilizing the National Guard in coordination and collaboration with Federal, State, local, and private sector partners. Assessment results will be utilized to influence facility security; direct DHS grant dollars to address equipment gaps in local law enforcement; and identify trends across sectors.
- Conduct approximately 12 New Nuclear Reactor Security Consultations that independently identify vulnerabilities at new reactor sites which the Nuclear Regulatory Commission can incorporate into overall security evaluation and identify mitigating protective measures.
- Conduct Regional Resiliency Assessment on the Detroit International Transportation Hub, Colonial Pipeline (Atlanta Hub), Louisiana Highway 1 (LA1), Port of Long Beach, Las Vegas Strip, and Henry Hub Pipeline in Louisiana.
- Refine the methodologies and processes used to develop the National Critical Foreign Dependencies List and Executive Report. Work with Federal and public/private sector partners to develop a comprehensive inventory of infrastructure located outside the United States that if disrupted or destroyed, would lead to loss of life in the United States, or critically affect the Nation's economic, industrial, or defensive capabilities. Complete risk and risk-informed assessments as necessary for assets and systems found on the National Critical Foreign Dependencies List.
- Evaluate gaps in incident response products; continually work towards building an improved set of self-initiated analytical products that anticipate IP's incident-related information requirements. For example, ensure that a prioritized list of critical infrastructure and key resources can be immediately provided to leadership after an event has occurred.
- Codify the Infrastructure Data Collection management process to support the gathering, storage, and distribution of the infrastructure information that is required to fulfill the Infrastructure Protection mission.
- Work with Infrastructure Data Taxonomy stakeholders to mature the infrastructure attributes of interest found within the taxonomy, and solicit feedback for developing the next version of the

taxonomy. Collect customer requirements to further enhance the robustness of the Infrastructure Data Catalog.

- Train 1,000 new users to handle and use Protected Critical Infrastructure Information to avoid unauthorized disclosures.
- Achieve Initial Operating Capability for the Secret Infrastructure Information Collection System Production Subsystem to expand the infrastructure data accessible and distributed to the regional homeland security community, integrating numerous data sets into the Infrastructure Information Collection System to improve execution of national risk management for critical infrastructure and key resources.
- Achieve Full Operating Capability for Constellation/Automated Critical Assessment Management System Continuity of Operations systems and train an estimated 1,500 State and local officials on building and implementing critical infrastructure protection plans on the use of the Constellation/Automated Critical Assessment Management System.
- Complete efforts to build additional risk and vulnerability assessment tools for the Emergency Services, Transportation, and Government Facilities, Public Health sectors vital to DHS efforts to execute National Comparative Risk Assessment.

FY 2010 Request	89	89	\$ 50,582
Total Change 2009-2010	6	6	\$ (11,785)

In FY 2010, NPPD requests \$50,582,000 for the Coordination and Information Sharing program, including 89 positions / FTE. This represents a decrease of \$11,785,000 from the FY 2009 enacted budget of \$62,367,000. These funds support the coordination and management of the National Infrastructure Protection Plan, management of CIKR Partnerships, and Infrastructure Protection's Management and Planning projects.

The FY 2010 request includes adjustments-to-base of \$232,000 for pay inflation; an increase of \$5,706,000 for facilities and rent transferred from NPPD Management and Administration; and 6 additional Federal positions offset by \$798,000 in program/contract dollars. In FY 2010, Infrastructure Protection requests that \$6,723,000 for the Protected Critical Infrastructure Information Program be transferred to the Identification and Analysis PPA. Program changes include a decrease of \$11,000,000 to the National Infrastructure Protection Plan Management and Critical Infrastructure and Key Resources Partnership projects.

CURRENT SERVICES PROGRAM DESCRIPTION

Coordination and Information Sharing	FY 2009 Enacted	FY 2010 Request
Personnel Costs	\$ 9,063	\$ 10,093
Program Costs	\$ 53,304	\$ 40,489
Total Costs	\$ 62,367	\$ 50,582

The Coordination and Information Sharing mission area includes projects and activities that maximize the ability of government and private sector security partners at all levels to assess risks, coordinate programs and processes, and execute risk-mitigation programs and activities. Coordination and Information Sharing is responsible for executing the National Infrastructure Protection Plan. These activities foster information sharing and coordination between individual sector governance structures as well as facilitating development of security partner governance and coordination structures and models. Building security partnerships represents the foundation of the coordination and information sharing efforts and is divided into three projects: National Infrastructure Protection Plan Management, Critical Infrastructure and Key Resources Partnerships, and Management, Planning, and Administration.

National Infrastructure Protection Plan Management

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	20	20	\$2,714	24	24	\$3,315	4	4	\$601
<i>NIPP Program Management</i>			\$9,553			\$4,021			-\$5,532
<i>NIPP SSA Support</i>			\$3,710			\$3,710			\$0
Program Costs			\$13,263			\$7,731			-\$5,532
Total	20	20	\$15,977	24	24	\$11,046	4	4	-\$4,931

Infrastructure Protection’s National Infrastructure Protection Plan Management project has the responsibility of interacting with public and private entities to ensure that, collectively, all parties work continuously to enhance critical infrastructure and key resources protection across a growing number of sector security partners. Within Infrastructure Protection, National Infrastructure Protection Plan Management has responsibility for the day-to-day National Infrastructure Protection Plan management processes and implementation efforts, such as tracking milestones set in the National Infrastructure Protection Plan and the Sector-Specific Plans. The project provides the direct support and operational and strategic framework to the Sector-Specific Agencies for collaboration, development, implementation, and maintenance of these national approaches to information sharing and critical infrastructure and key resources protection. National Infrastructure Protection Plan Management works with the Sector-Specific Agencies and their security partners to ensure the achievement of two main goals: keeping the critical infrastructure and key resources sectors current on all critical infrastructure and key resources protection issues and support the sectors as they work toward milestones set out in the National Infrastructure Protection Plan, Sector-Specific Plans, and Sector Critical Infrastructure and Key Resources Protection Annual Reports (Sector Annual Reports).

The National Infrastructure Protection Plan Program Management office is operationally designed to accomplish three implementation efforts: outreach, training, and education. The National Infrastructure Protection Plan Program Management office deepens relationships and broadens participation with government and private sector security partners; supports implementation of the National Infrastructure Protection Plan risk-based approach; influences decision-makers regarding budget, policy, and risk management; and encourages critical infrastructure and key resources protective security advocates.

Critical Infrastructure and Key Resources Partnerships

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	20	20	\$2,648	26	26	\$3,514	6	6	\$866
<i>Sector Partnerships</i>			\$12,640			\$5,842			-\$6,798
<i>Information Sharing Environment (ISE)</i>			\$15,322			\$15,322			\$0
Program Costs			\$27,962			\$21,164			-\$6,798
Total	20	20	\$30,610	26	26	\$24,678	6	6	-\$5,932

The Critical Infrastructure and Key Resources Partnerships project builds, sustains, and ensures the effective coordination and operations of the comprehensive network of structures, mechanisms, and processes that engage all critical infrastructure and key resources stakeholders across the Nation. It enables systematic and sustainable communication, coordination, and information exchange among those partners. The resourcing of the partnerships structures and their operations is organized through Sector Partnerships activities and Critical Infrastructure and Key Resources Information Sharing Environment activities.

Collaboration, coordination, trusted relationships, and an effective and efficient Critical Infrastructure and Key Resources Information Sharing Environment are interdependent. Critical infrastructure and key resources stakeholders fall into four general categories: critical infrastructure and key resources owners and operators; Federal agencies and their National and international partners; State, local, Tribal and Territorial governments and their regional and local critical infrastructure and key resources partners; and subject matter experts.

Information sharing enables effective coordination and communication within the partnerships, and is a critical enabler for risk management activities that strengthen the security and resiliency of the Nation’s critical infrastructure and key resources. Implementation and unification of these necessary elements creates an effective and efficient Information Sharing Environment for the critical infrastructure and key resources stakeholders.

Management, Planning and Administration

\$ thousands	FY 2009			FY 2010			Change			
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	43	43	\$3,701	39	39	\$3,264	-4	-4	-\$437	
<i>Management, Planning, and Administration</i>			\$5,356			\$11,594			\$6,238	
Program Costs			\$5,356			\$11,594			\$6,238	
Total	43	43	\$9,057	39	39	\$14,858	-4	-4	\$5,801	

The Management, Planning and Administration project is a key enabler of all of Infrastructure Protection’s programmatic actions. It encompasses a number of planning, policy, and programmatic areas, including human resource management, professional development, budget formulation and execution, investment planning, acquisition strategy, personnel and facility security, logistics and executive secretariat support, Government Accountability Office and DHS Inspector General facilitation and support, policy development and evaluation, legislative analysis, and International Partnership Coordination.

Integrating Infrastructure Protection’s activities on a strategic, organizational, and project level represents a core competency for Infrastructure Protection. Management, Planning and Administration focuses on maturing and improving Infrastructure Protection’s strategic planning and its business and administrative processes. These functions support project management and execution as well as long-term investment planning and decision making for efficient and effective project execution. An integrated planning and performance capability ensures that Infrastructure Protection’s planning and communication and outreach efforts include Federal, State, local, Tribal, and Territorial governments; the private sector; and international security partners.

In FY 2010, \$5,706,000 for facilities and rent was transferred to Management, Planning and Administration from the NPPD Management and Administration appropriation. This transfer for rent and facilities will address facilities and rent requirements across all three Infrastructure Protection PPAs (Identification and Analysis, Coordination and Information Sharing, Mitigation Programs).

FY 2008 Coordination and Information Sharing Accomplishments

- Launched National Infrastructure Protection Plan Channel on DHS Lessons Learned Information Sharing Site. The Channel provides a mechanism for public and private sector security partners to access and share National Infrastructure Protection Plan related information across sectors.

- Developed the overarching National Infrastructure Protection Plan Outreach and Awareness Strategy, designed to reach Federal, State, local, Tribal, and Territorial governments as well as private sector security partners and the interested public.
- Created the State and Regional Critical Infrastructure and Key Resources Protection Guide. This guide bridges the gap between National level and State/regional level critical infrastructure and key resources protection planning and implementation. It serves as a key resource for new Homeland Security Advisors and other homeland security officials.
- Completed integration of the State, Local, Tribal and Territorial Government Coordinating Council into the full cycle of National Infrastructure Protection Plan planning and reporting. This included full incorporation of the State, Local, Tribal and Territorial Government Coordinating Council into the Critical Infrastructure Partnership Advisory Council and coordination with the Sector Coordinating Councils and Government Coordinating Councils. The State, Local, Tribal and Territorial Government Coordinating Council has completed their first full comment and input into the National Infrastructure Protection Plan Sector-Specific Plans and review of the National Annual Report. It formally established member liaisons to the Sector Coordinating Council/Government Coordinating Council of each sector.
- Established a full spectrum partnership with the FBI on the shared mission of critical infrastructure and key resources protection. The FBI complements DHS' authorities, competencies, and responsibilities for critical infrastructure and key resources protection. Several initiatives have been established to execute joint activities such as site risk assessment and the Bombing Prevention Project. This activity also expands the reach into the community of critical infrastructure and key resources owners and operators through jointly sponsored critical infrastructure and key resources related programs with groups such as InfraGuard. This partnership, established through a Memorandum of Agreement, implements a channel and process through which additional protection initiatives can be coordinated more systematically and efficiently for both agencies.
- Completed a Critical Infrastructure and Key Resources Sector Information Sharing Maturity Model and completed a pilot of the model with the Dams Sector. These core interactions include: alert, notifications, and warnings; document management, suspicious activity reporting, incident coordination and communication, and steady state situational awareness activities.
- Implemented the U.S./Canada comprehensive cross-border initiative on critical infrastructure and key resources related risk management and incident management.
- Developed an integrated program management process, which links strategic planning, programming, and budgeting processes to reporting and evaluation processes.
- Consolidated mission support for Infrastructure Protection administrative support and watch desks, maximizing time and resources.
- Developed a Human Resources management tool that provides a transparent Infrastructure Protection organizational structure, allowing Infrastructure Protection to improve the way it manages, tracks, and fills open positions. Through the use of this tool, Infrastructure Protection is able to analyze and reduce the amount of time it takes to get qualified people in place to meet its mission.
- Lead Critical Energy Infrastructure Protection Initiative in G8 Law Enforcement Practitioners and Counter-Terrorism Practitioners forum.
- Initiated Chemical Infrastructure Protection Project in G8 Law Enforcement Practitioners and Counter-Terrorism Practitioners forum.

- Conducted Critical Infrastructure Protection awareness outreach to Governments of Brazil and Argentina.
- Coordinated with Government of Mexico on vulnerability assessments of critical dams along the U.S. Southern Border.
- Conducted vulnerability assessments with Trinidad & Tobago critical Liquefied Natural Gas facilities in coordination with Department of Energy and U.S. Coast Guard.
- Developed the Critical Foreign Dependencies Initiative cataloguing global critical infrastructure that would impact the U.S. in terms of loss of life or an impact on the U.S. economy.

FY 2009 Coordination and Information Sharing Planned Accomplishments

- Complete the triennial rewrite of the National Infrastructure Protection Plan and reissue to ensure continued alignment and currency of the National Infrastructure Protection Plan and Sector Specific Plans. Increase emphasis on the collaboration between the public and private sector through the triennial review process.
- In coordination with the Sector-Specific Agencies and private sector partners, develop metrics to assess the progress of implementing the National Infrastructure Protection Plan risk management framework and value of critical infrastructure and key resources protection efforts. Develop guidance for and coordinate the Sector Critical Infrastructure and Key Resources Protection Annual Reports. Analyze sector and other annual reports to develop the National Critical Infrastructure and Key Resources Protection Annual Report. Coordinate writing and printing of National Annual Report, and ensure delivery to the Executive Office of the President and Congress.
- Coordinate with Regional Consortium Coordinating Council and facilitate interactions with Sector-Specific Agencies to establish strong relationships between the sectors and this newest part of the sector partnership model. This new council builds further links with critical infrastructure and key resources owners and operators, enabling more robust implementation of the National Infrastructure Protection Plan and the Sector-Specific Plans.
- Institutionalize processes to ensure the expanded capability of the Sector-Specific Agencies to identify/evaluate gaps in strategic planning and risk reduction programs, allowing resources to be allocated where they offer the greatest benefit.
- Develop and deliver National Infrastructure Protection Plan related critical infrastructure and key resources courses to include web-based awareness level training on the Critical Infrastructure and Key Resources Sectors and the Critical Infrastructure and Key Resources Support Annex to the National Response Framework; classroom-based courses to help government and private sector security partners implement critical infrastructure and key resources program management activities; and others as appropriate.
- Establish processes and mechanisms, equivalent to the Critical Infrastructure and Key Resources Sector Information Sharing Maturity Model, to support effective coordination and communication among regional critical infrastructure and key resources relevant coalitions, Federal agencies, and the National critical infrastructure and key resources sectors.
- Pilot deployment of the State, Local, Tribal and Territorial Government Coordinating Council recommended critical infrastructure and key resources support capability within State Fusion Centers.
- Operate Critical Infrastructure Warning Information Network at 100% reliability and fully integrate its capabilities with Homeland Security Information Network for Critical Sectors capabilities to make more efficient use of network resources.

- Initiate a Professional Development program that defines educational-level and training requirements for Infrastructure Protection staff at all levels.
- Provide an integrated and comprehensive suite of processes, procedures, and methods related to all procurements and financial activities.
- Complete the beta cross-border initiative on critical infrastructure and key resources related risk management and incident management with the State of Michigan and Canadian Federal, local, and provincial authorities.

FY 2010 Coordination and Information Sharing Planned Accomplishments

- In coordination with the Sector Specific Agencies and private sector partners, refine metrics to assess the progress of implementing the National Infrastructure Protection Plan risk management framework and value of critical infrastructure and key resources protection efforts. Develop guidance for and coordinate the Sector Critical Infrastructure and Key Resources Protection Annual Reports. Analyze sector and other annual reports to develop the National Critical Infrastructure and Key Resources Protection Annual Report.
- Coordinate the development of an enhanced framework for State, local, and Tribal critical infrastructure and key resources program engagement with the Grant Programs Directorate risk-based processes and assessments.
- Expand participation of State, local, Tribal and Territorial government representatives in the activities of the State, Local, Tribal and Territorial Government Coordinating Council and its working groups' deliberations and recommendations.
- Move the Information Sharing Maturity Model into full operations for Critical Infrastructure and Key Resources Regional Coalitions, thereby incorporating them into the Critical Infrastructure and Key Resources Information Sharing Environment which will support effective coordination and communication among regional critical infrastructure and key resources relevant coalitions, Federal agencies, and the National critical infrastructure and key resources sectors.
- Identify and resolve critical policy and legal issues related to information sharing with international partners.
- Collect and complete annual report on critical infrastructure and key resources information sharing metrics to measure progress on implementation of the Critical Infrastructure and Key Resources Information Sharing Environment and to identify gaps that may need to be addressed.
- Develop retention and recruiting strategy to ensure high quality candidates are successfully hired and on-boarded at Infrastructure Protection.
- Create an Infrastructure Protection knowledge repository, policies, and operating procedures to improve communication and information sharing across Infrastructure Protection.
- Develop a communication strategy to improve collaboration across Infrastructure Protection divisions and projects.

**Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Program Performance Justification
(Dollars in thousands)**

PPA: MITIGATION PROGRAMS

	Perm Pos	FTE	Amount
FY 2008 Actuals	174	135	\$ 120,512
FY 2009 Enacted	274	220	\$ 170,830
2010 Adjustments-to-Base	187	226	\$ 8,081
2010 Current Services	461	446	\$ 178,911
2010 Program Change	45	23	\$ 17,200
FY 2010 Request	506	469	\$ 196,111
Total Change 2009-2010	232	249	\$ 25,281

In FY 2010, NPPD requests \$196,111,000, for the Mitigation Programs, including 506 positions and 469 FTE. This represents an increase of \$25,281,000 over the FY 2009 enacted budget of \$170,830,000. These funds support the coordination and management of the DHS' regulatory authority over high risk chemical facilities, bombing prevention, protective security advisors, Sector-Specific Agency responsibilities, and incident management, contingency and readiness activities.

The FY 2010 request includes adjustments-to-base for annualization of 54 FTE for \$7,357,000; pay inflation of \$724,000; 187 positions and 172 FTE additional Federal positions offset by \$22,876,000 in program/contract dollars. Program changes include an increase of \$19,000,000 and 23 FTE and 45 positions for Infrastructure Security Compliance; an increase of \$4,200,000 for the Office of Bombing Prevention; a decrease of \$2,000,000 for Philadelphia Critical Infrastructure Protection; a decrease of \$3,000,000 for protection of Critical Underground Infrastructure; and a decrease of \$1,000,000 for an Improvised Explosive Device Geospatial Mapping Tool.

CURRENT SERVICES PROGRAM DESCRIPTION

Mitigation Programs	FY 2009 Enacted	FY 2010 Request
Personnel Costs	\$ 30,939.00	\$ 64,509.29
Program Costs	\$ 139,891.00	\$ 131,602.00
Total Costs	\$ 170,830	\$ 196,111

Mitigation Programs utilizes measures designed to prevent, deter, and mitigate threat to critical infrastructure and key resources, and enable timely, efficient response and restoration in a post-event situation for all hazards. Mitigation programs help security partners to identify and mitigate vulnerabilities, implement protective measures, and increase preparedness for facilities, systems, and surrounding communities. They also support public awareness efforts and facilitate the sharing of critical infrastructure and key resources protection-related best practices and lessons learned. Additionally, they enable Infrastructure Protection planning, readiness and incident management capabilities. Mitigation Programs is divided into five projects: Infrastructure Coordination and Incident

Management, Infrastructure Security Compliance, Protective Security Advisors, Sector-Specific Agency Management, and Bombing Prevention.

Infrastructure Coordination and Incident Management

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	24	24	\$3,217	42	42	\$5,693	18	18	\$2,476
<i>NICC</i>			\$20,039			\$18,501			-\$1,538
<i>Contingency Planning</i>			\$3,379			\$2,976			-\$403
<i>Readiness</i>			\$3,126			\$2,673			-\$453
Program Costs			\$26,544			\$24,150			-\$2,394
Total	24	24	\$29,761	42	42	\$29,843	18	18	\$82

Guided by the National Infrastructure Protection Plan and the National Response Framework, the Infrastructure Coordination and Incident Management project provides the structures, mechanisms, facilities, and personnel needed to plan and execute a coordinated, interoperable, critical infrastructure and key resources focused response to emerging and no-notice incidents. The project provides Infrastructure Protection’s capability to respond to the full range of incidents by providing situational awareness, coordinating operational activities and developing recommended courses of action to government and private sector critical infrastructure and key resources partners. Infrastructure Protection’s incident management capability reduces risk to critical infrastructure and key resources sectors from impending or occurring incidents, enables more rapid recovery of damaged critical infrastructure and key resource assets and networks, and mitigates the impact of critical infrastructure and key resources degradation on the safety and quality of life of the American people.

Successful execution requires that the project conduct the necessary planning to ensure capability to respond to the full range of incidents, and provide a readiness program to ensure planned responses are validated, exercised, and ready to execute. During steady-state, the project must maintain operational capability to develop and share situational awareness, conduct information sharing including alert and warning, and prepare for increased operational demands of incident response. During incident response, the project must have the capability to operationalize established relationships, maintain situational awareness, share information, analyze data, develop recommended actions and protective measures, contribute to national reporting, and distribute key information and decision products.

Infrastructure Security Compliance

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	78	123	\$11,219	246	268	\$33,495	168	145	\$22,276
<i>Infrastructure Security Compliance Activity</i>			\$61,781			\$55,481			-\$6,300
<i>Ammonium Nitrate Regulatory Initiative Activity</i>			\$5,000			\$14,387			\$9,387
Program Costs			\$66,781			\$69,868			\$3,087
Total	78	123	\$78,000	246	268	\$103,363	168	145	\$25,363

The Infrastructure Security Compliance Project is being implemented in response to the DHS Appropriations Act of 2007 (Public Law 109-295), which provides DHS with the authority to regulate chemical facilities nationwide that present a high level of security risk, with priority on highest risk facilities. The statutory requirements which Infrastructure Security Compliance Project implements are contained in the Chemical Facility Anti-Terrorism Standards (6 C.F.R. Part 27), and additional requirements are being added to the Infrastructure Security Compliance Project in response to Section 563 of the 2008 Consolidated Appropriations Act, Subtitle J – Secure Handling of Ammonium Nitrate

(“Section 563”).Section 563 amends the Homeland Security Act of 2002 and provides the DHS with the authority to “regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility...to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.”

In addition to providing oversight and incentives to the risk-reduction activities of individual high-risk chemical facilities, Infrastructure Security Compliance Project applies a holistic view to managing the security of the Nation’s chemical facility infrastructure to ensure that risks are managed across the Nation. This will ensure that risks are neither shifted between individual facilities, among surrounding communities, between States and regions, nor shifted to non-facility assets (i.e. chemical transportation and shipping infrastructure). Infrastructure Security Compliance Project engages with voluntary critical infrastructure and key resources protection efforts, to include the Chemical Sector-Specific Agency and related forums (e.g., Government Coordinating Council) to ensure leveraging of, and coordination with, Homeland Security Presidential Directive-7-driven efforts, when appropriate.

The Department is currently reviewing over 5500 submitted Security Vulnerability Assessments (SVA) and expects to review and evaluate approximately 6500 facility SVAs. The SVA is used to assess a facility’s security measures and vulnerability to attack. The results are utilized to designate certain facilities as high risk and being placed in a final tier or being determined not to be of high risk and thus currently excluded from the current regulations. Final tiering determinations and subsequent industry notifications will begin in the summer of 2009 for the higher risk tiers, Tiers 1 and 2.

A critical part of the CFATS process is the on-site inspections of high-risk chemical facilities by the Department’s Infrastructure Security Compliance Inspector cadre. Inspections are conducted to verify compliance at a facility with respect to the site’s Site Security Plan (SSP) and the Risk Base Performance Standards. SSP captures specific security measures the facility has or will implement to meet the Risk Based Performance Measures (RBPS) based on the facility’s specific tier, security issues, and other circumstances. Upon completion of the SSP by a regulated facility, it will be reviewed by the Department. Submitted SSPs will either be accepted by the Department and subject to on-site compliance inspections, or returned to the submitting facility with recommendations and requirements for improvement before the returned SSP will be reconsidered for acceptance.

The Department also is responsible for the regulation of the sale, transfer, and purchase of ammonium nitrate, under the Secure Handling of Ammonium Nitrate Act. Currently, the Department is proceeding quickly with its initial development of a rule to regulate AN, and will release a Notice of Proposed Rulemaking for public comment. This is being supported by the initial scoping of desired capabilities of the necessary Departmental systems needed to support the program and the information/data collection and analysis required to successfully regulate AN, and will ultimately be defined by the requirements of the promulgated rule.

Protective Security Advisors

\$ thousands	FY 2009			FY 2010			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	95	100	\$12,871	107	107	\$14,805	12	7	\$1,934
<i>Protective Security Advisors</i>			\$13,755			\$12,824			-\$931
Program Costs			\$13,755			\$12,824			-\$931
Total	95	100	\$26,626	107	107	\$27,629	12	7	\$1,003

The Protective Security Advisor project was established in 2004 by DHS to increase representation and coordination at the Federal, State, local, Tribal and territorial levels. The Protective Security Advisors

provide a local perspective to the National risk picture and serve as DHS' on-site critical infrastructure and vulnerability assessment specialists. In this capacity, Protective Security Advisors serve as a vital channel of communication for government officials and private sector critical infrastructure and key resources owners and operators to communicate with DHS.

The Protective Security Advisor project supports Infrastructure Protection's mission to build and sustain effective critical infrastructure and key resources partnerships and coordination mechanisms; understand and share risk and information about terrorist threats and other hazards to our Nation's critical infrastructure and key resources; provide a foundation for continuously improving critical infrastructure and key resources preparedness; and build and implement a sustainable, national critical infrastructure and key resources risk-management program.

Sector-Specific Agency Management

\$ thousands	FY 2009			FY 2010			Change			
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits		19	19	\$2,547	54	69	\$7,267	35	50	\$4,720
SSA Management				\$17,896			\$13,241			-\$4,655
SSA Government Facilities				\$2,000			\$0			-\$2,000
Program Costs				\$19,896			\$13,241			-\$6,655
Total		19	19	\$22,443	54	69	\$20,508	35	50	-\$1,935

The Sector-Specific Agency Management project has been established to execute Sector Specific Agency functions for six of the 18 critical infrastructure and key resources sectors: Chemical, Commercial Facilities, Critical Manufacturing, Dams, Emergency Services, and Commercial Nuclear Reactors, Materials, and Waste (Nuclear). In addition, the Sector-Specific Agency Management project serves as the Program Management Office for the Interagency Security Committee, a Federal body created to enhance the security of non-military Federal facilities (DHS [Infrastructure Protection] serves as Chair of the Interagency Security Committee). Lastly, the Sector-Specific Agency Management project is charged with providing Sector Specialist functions for the Government Facilities and National Monuments & Icons Sectors.

The Sector-Specific Agency Management project's fundamental mission is to achieve cohesive and coordinated risk reduction across its assigned critical infrastructure and key resources sectors. The Sector-Specific Agency Management project ensures that critical infrastructure and key resources sector security efforts are aligned and coordinated, and that security resources are leveraged to maximum effect across the six critical infrastructure and key resources sectors. Where capability gaps are found and risk is identified, the Sector-Specific Agency Management project partners with the private sector and Federal, State, local, tribal, territorial, and regional government organizations to build capacity and mitigate risk. The Sector-Specific Agency Management project works with sector partners to align priorities, goals, and strategic planning efforts; facilitate the development and implementation of risk mitigation initiatives; coordinate education, training, and security exercises; ensure that security information is communicated efficiently and effectively; support critical infrastructure and key resources research and development efforts; work with partners to address international critical infrastructure and key resources issues; and perform important incident management functions for situational awareness.

Bombing Prevention

\$ thousands	FY 2009			FY 2010			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	4	8	\$1,085	20	20	\$3,249	16	12	\$2,164
<i>Bombing Prevention</i>			\$8,915			\$11,519			\$2,604
<i>IED Geospatial Analysis</i>			\$1,000			\$0			-\$1,000
<i>Underground Critical Infrastructure</i>			\$3,000			\$0			-\$3,000
Program Costs			\$12,915			\$11,519			-\$1,396
Total	4	8	\$14,000	20	20	\$14,768	16	12	\$768

The Bombing Prevention project is the DHS lead agent for homeland security activities that include strategic coordination, capabilities analysis, and information sharing to combat the improvised explosive device threat to the Homeland. Homeland Security Presidential Directive-19, the Homeland Security Presidential Directive-19 *Implementation Plan* and the National Strategy for Combating Terrorist Use of Explosives in the United States placed new and significant responsibilities on Bombing Prevention, including:

- Coordination of national and intergovernmental bombing prevention efforts; including DHS support to the Homeland Security Presidential Directive-19 *Implementation Plan* and the required establishment of a Joint Program Office.
- Increasing information sharing on terrorists tactics and procedures for terrorist use of explosives with State, local, tribal, territorial, and private sector security partners;
- Conducting gap analyses to improve bombing prevention capabilities of State and local law enforcement protecting high consequence critical infrastructure and key resources from terrorist use of explosives.

The Bombing Prevention project, over the next several years, is required to implement a coordinated and responsive set of national programs to combat the threat of terrorist use of explosives in the U.S., in accordance with Homeland Security Presidential Directive-19 and HSPD-19 *Implementation Plan*. Bombing Prevention would expand its partnership and services to State and local law enforcement, first responders, the private sector, and the public, as well as integrate information and capabilities from its Federal Government partners and international allies if more resources were available.

FY 2008 Mitigation Programs Accomplishments

- Executed incident management operations during real-world and exercise incidents, including the 2008 hurricane season, Exercise Cyber Storm II, Top Officials Exercise 4, and National Level Exercise 2-08. During both real-world and exercise events, Infrastructure Coordination and Incident Management activities enhanced situational awareness and decision-making at the National and incident levels.
- Executed the Infrastructure Protection Continuity of Operations Implementation Plan during National Level Exercise 2-08; tested leadership tracking, crisis communication and Infrastructure Protection Continuity of Operations readiness response capabilities; successfully utilized the “Communicator” and National Infrastructure Coordinating Center notification systems.
- Registered over 43,000 facilities for access to the Chemical Security Assessment Tool suite of tools (e.g., Top-Screen, Security Vulnerability Assessment, Sector Specific Plan), and completed Top-Screens for over 32,000 facilities.
- Sent initial notification letters to all non-exempt facilities that completed Top-Screens by May 21, 2008, informing them as to whether or not the facility was preliminarily determined to be high-risk.

- Analyzed the 32,000 Top-Screens submitted to date of which approximately 7,000 have been initially determined to be high-risk and have been assigned to risk-based tiers (Tiers 1-4). Those 7,000 facilities must now complete and submit a Chemical Security Assessment Tool Security Vulnerability Assessment.
- Developed an Ammonium Nitrate Advance Notice of Proposed Rulemaking to solicit comments on the best methods for implementing the requirements of Section 563.
- Led DHS efforts in the verification and validation of Tier1/Tier 2 critical infrastructure and key resources and served as a knowledge base for all high-priority critical infrastructure and key resources and related interdependencies in State or district.
- Supported the development of the National risk picture by identifying, assessing, monitoring, and helping to minimize risk to State and local critical infrastructure and key resources.
- Trained and qualified 40 percent of Protective Security Advisors to perform Infrastructure Liaison duties in a Federal Joint Field Office in support of the Principle Federal Official and emergency support functions lead agencies, and to serve, when needed, as the “on-scene” Infrastructure Protection representative within State and local Emergency Operations Centers coordinating the response to potential or suspected terrorist attacks or other incidents. Performed Infrastructure Liaison duties in a Joint Field Office in support of the Principle Federal Official and emergency support functions lead agencies during incidents including the recent California Wildfires, Mid-West Floods, and Hurricanes Dolly, Ike and Gustav.
- Provided protective measures and Common Characteristics and Vulnerabilities, Potential Indicators of Terrorist Attack, and Protective Measures reports to facility owners and operators in preparation for incidents by Protective Security Advisors during steady state operations.
- Developed the Enhanced Critical Infrastructure Protection vulnerability assessment methodology and asset vulnerability weighting process to identify asset by asset and cross sector vulnerabilities, trends, and areas of focus. Conducted Enhanced Critical Infrastructure Protection vulnerability assessments on the Nation’s most critical infrastructure, to include all Tier 1 and 400 Tier 2 assets.
- Created Critical Infrastructure and Key Resources Vulnerability Baseline Program (being piloted in the Nuclear Sector) to establish a formalized rigorous information collection and analysis process for analyzing sector-wide consequence and vulnerability information.
- Applied information sharing and communications experiences, and knowledge gained in other Sector-Specific Agency Management sectors to the new Critical Manufacturing Sector, facilitating stand-up of the sector and enabling the sector to immediately work towards establishing effective coordination mechanisms and protective programs.
- Provided Sector-Specific Agencies with the first generation Sector-Specific Agency Concept of Operations and associated resource requirements. This will serve as the foundation for continuous improvement activities across Sector-Specific Agency Management sectors and enhances overall Infrastructure Protection capabilities in steady state protection, incident management, and risk management.
- Developed robust sector-specific incident management procedures and protocols to support each Infrastructure Protection Sector-Specific Agency’s responsibilities during an incident to include maintaining situational awareness; conducting analyses and assessments; sector-wide information sharing; and rapid responses to leadership Requests for Information.
- Coordinated regular threat briefings for Sector-Specific Agency Management sectors to increase threat awareness and to provide sector-specific context to threat information as mapped against

vulnerabilities and consequences. Conducted in partnership with DHS Office of Intelligence and Analysis.

- Served as the lead DHS representative during Homeland Security Presidential Directive-19 Report drafting; worked as co-chair with the Department of Justice's Federal Bureau of Investigation to formulate the DRAFT National Strategy for Combating Terrorist Use of Explosives in the United States Implementation Plan, required by the Homeland Security Presidential Directive-19 Report.
- Developed Multi-Jurisdiction Improvised Explosive Device Security Plans for the Detroit, Houston, and Oklahoma City metropolitan areas. The improvised explosive device security plan outlines specific bombing prevention actions that reduce vulnerability and mitigate risk within a multi-jurisdiction area against the primary terrorist attack method.
- Provided a uniform analysis of bomb squads, explosives detection canine teams, dive teams, and specialized weapons and tactics capabilities throughout the United States using a task-based methodology. This methodology measures readiness, equipment, training, and assets required for effective response to improvised explosive device threats. Integrated in the National Capabilities Analysis Database, this information provides a snapshot of national improvised explosive device preparedness that informs resource allocation and capability enhancements. This analysis was used for a congressionally mandated report on the capabilities of United States bombing prevention units.
- Provided improvised explosive device subject matter expert support to approximately 260 vulnerability assessments.
- Sponsored the delivery of 26 improvised explosive device Awareness Workshop training courses, 62 Surveillance Detection Courses, and 28 Soft Target Awareness Courses.

FY 2009 Mitigation Programs Planned Accomplishments

- Integrate the private sector into the Infrastructure Protection incident management planning process, including coordinated planning, readiness, and incident management execution activities. Establish routine Information Sharing and Analysis Center presence at National Infrastructure Coordinating Center watch. Develop concept for Sector Coordinating Council/Partnership for Critical Infrastructure Security presence in Incident Management Cell when activated.
- Complete integration of the 24x7 watch and Incident Management Cell into a single operational construct as elements of the National Infrastructure Coordinating Center to improve incident management response and information sharing.
- Lead the cross-divisional effort to train and socialize the Infrastructure Protection incident management process with Federal, State, local, and industry partners.
- Establish regularly scheduled training, drilling and team-building events for Infrastructure Protection incident management personnel, including Infrastructure Protection Incident Management Cell surge teams, to facilitate rapid activation of Incident Management Cell and transition to incident management activities during no-notice incidents.
- Review Site Security Plans and begin limited inspections of Tier 1-4 facilities, with priority on Tier 1 and Tier 2 facilities as site security plans are completed.
- Coordinate DHS regulatory authorities related to the chemical sector with other DHS and Federal agencies.
- Develop rulemaking to regulate the sale and transfer of Ammonium Nitrate.

- Deploy 10 additional Protective Security Advisors to States currently without a Protective Security Advisor located within its boundaries. Field-deployed Protective Security Advisors will be located in Federal Government offices situated to best facilitate information exchange with State homeland security officials currently without a Protective Security Advisor. This will enable stronger relationships between DHS and the State and local governments, and critical infrastructure and key resource owners and operators.
- Train 70 percent of Protective Security Advisors to perform Infrastructure Liaison duties in a Federal Joint Field Office in support of the PFO and emergency support functions lead agencies with critical infrastructure and key resource analysis during incidents.
- Enhance bombing prevention (TRIPwire) capability to include additional partner content-providing organizations, and expand TRIPwire user base to 7,500 registered users, to include select private sector security and international partners through TRIPwire Community Gateway. Provide TRIPwire Community Gateway to 18 sectors and the TRIPwire Field Tool to better support the user community with increased utility and portability.
- Conduct capability assessments for over 150 of the Nation's public safety bomb squads, explosives detection canine units, specialized weapons and tactics teams, and dive teams using National Capabilities Analysis Database and develop a systematic methodology for coordinating closing identified gaps with interagency partners.
- Develop a list of priority cities for canine detection capabilities assessments; standardize curriculum package for canine explosive detection training; complete capability assessments of canine explosive detection in over 10% of selected high risk urban areas; and complete a national strategy for explosive detection canines. Additionally, the Bombing Prevention Project will continue support in the development of consensus-based best practices through the Scientific Working Group on Dog and Orthogonal Detector Guidelines and co-lead the Homeland Security Presidential Directive-19 effort to produce National canine certification and training standards.
- Sponsor and deliver 28 one-day improvised explosive device Awareness Workshop training courses, 70 three-day Surveillance Detection Courses, and 30 four-day Soft Target Awareness Courses for State and local law enforcement and private sector security partners; conduct six National Bombing Prevention and Awareness Campaign events in major metropolitan areas. Assess campaign progress and effectiveness.
- Develop 10 Multi-jurisdictional Improvised Explosive Device Security Plans in support of FEMA's Regional Catastrophic Preparedness Grant Program and the Regional Resiliency Assessment Program.
- Establish Critical Manufacturing Sector Government Coordinating Council and complete Sector-Specific Plan to enable effective sector coordination, information sharing, and implementation of comprehensive public-private sector security programs.
- Complete Draft Physical Security Criteria for Federal Facilities for Interagency Security Committee to enhance security at all non-military Federal facilities.
- Complete testing and development of the Voluntary Chemical Risk Assessment Tool, allowing chemical owners/operators to efficiently and accurately carry out an all-hazards risk assessment of their facilities.
- Conduct the 2009 Dams Sector Exercise Series: Columbia River Basin to develop an Integrated Regional Strategy to improve disaster resilience and preparedness for the Tri-Cities area of Washington State.

- Complete Nuclear and Chemical Sector Vulnerability Baseline Program and begin expansion to other sectors. This process develops a prioritized Baseline portfolio of the sector-wide risk landscape to guide decision making and measure the success of risk mitigation efforts.
- Develop a single voluntary Web-based Security Awareness Training tool that can be used by critical infrastructure and key resources employees in the Commercial Facilities, Critical Manufacturing, Dams, Emergency Services, and Nuclear Sectors to increase security awareness nationwide.

FY 2010 Mitigation Programs Planned Accomplishments

- Integrate critical infrastructure and key resources private sector incident management processes and information flow beyond Infrastructure Protection, including the National Operations Center, NPPD, FEMA, and the Sector-Specific Agencies, to fully realize benefits of critical infrastructure and key resources incident-specific information sharing in protection and restoration of critical infrastructure and key resources during incidents.
- Establish unscheduled drilling and exercise events for National Infrastructure Coordinating Center Incident Management Cell surge teams to facilitate rapid activation of Incident Management Cell during no-notice incidents.
- Expand the quality and quantity of collaborative incident management relationships with key critical infrastructure and key resources partners including the Sector Specific Agencies, private sector, and State/Local/Regional Fusion Centers.
- Evaluate Infrastructure Protection Readiness related training and exercise programs to ensure that programs and resources are adequate to produce qualified and sufficient Incident Response staff and surge teams.
- Complete all CONPLANs and Tactical Plans for 15 National Scenarios.
- Plan and pilot initial efforts for implementing annual review, assessment, and inspection cycle with Tier 1 facilities, biannual efforts with Tier 2 facilities, and initial efforts with Tier 3 and 4 facilities.
- Plan a phased approach to address Ammonium Nitrate (Section 563 requirements) reporting requirements by adjustment of the Chemical Security Assessment Tool as necessary (develop portal for Ammonium Nitrate registrations).
- Implement the Enhanced Critical Infrastructure Protection assessment methodology/ Infrastructure Survey Tool across all sectors. This methodology will be implemented across all sectors enabling a complete comparison of all asset vulnerabilities and will enable the ability to fully identify the most vulnerable sectors and security areas of concern across all 18 critical infrastructure and key resources sectors.
- Complete Critical Manufacturing, Commercial Facilities, and Dams Sector Vulnerability Baseline Program to establish a formalized rigorous information collection and analysis process for analyzing consequence and vulnerability information to identify systemic, sector-wide security issues and priorities. This process analyzes the overarching sector landscape to develop a prioritized baseline portfolio to guide decision making, programmatic resource allocation, and to measure success.
- Implement capabilities-based risk and prioritization program in Emergency Services Sector as a proof of concept that can be expanded to identify key Sector capability gaps and to guide prevention, protection, response and recovery programs to close gaps.
- Complete a full review and revision of all six Sector-Specific Agencies Management Project Sector-Specific Plans according to changing risk environment and new priorities. The review will be undertaken in close coordination with sector partners.

- Implement the National Dams Security Performance Program to assess and track status, trends, and gaps regarding sector-wide implementation of security and protection programs.
- Develop protective measures guide for owners/operators in Media, Public Assembly, Real Estate and Resorts sub-sectors of Commercial Facilities Sector. Guides will assist in planning and managing security at sub-sector, and will be based on successful Sports League Guide.
- Access partner provided content based upon expanded bombing prevention (TRIPwire) user base, including select private sector security and international partners through TRIPwire Community Gateway. Prototype the TRIPwire Field Tool to better support user community with increased utility and portability.
- Validate efforts of previous findings and complete assessments for 25% of the explosives detection canine units in UASI Tier I cities.
- Develop 12 Multi-jurisdictional Improvised Explosive Device Security Plans in support of FEMA's Regional Catastrophic Preparedness Grant Program and the Regional Resiliency Assessment Program.

Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Program Performance Justification
(Dollars in thousands)

PPA: NATIONAL CYBER SECURITY DIVISION

	Perm Pos	FTE	Amount
FY 2008 Actuals	83	32	\$ 153,542
FY 2009 Enacted	128	105	\$ 313,500
2010 Adjustments-to-Base	100	65	\$ 4,536
2010 Current Services	228	170	\$ 318,036
2010 Program Change	32	16	\$ 82,618
FY 2010 Request	260	186	\$ 400,654
Total Change 2009-2010	132	81	\$ 87,154

NPPD requests \$400,654,000 for the National Cyber Security Division, including 260 positions and 186 FTE. This represents a net increase of \$87,154,000 over the FY 2009 enacted budget of \$313,500,000. These funds support NPPD's role in the Comprehensive National Cybersecurity Initiative and the other cybersecurity activities of National Cyber Security Division's branches: United States Computer Emergency Readiness Team Operations; Federal Network Security; Network Security Deployment; Global Cyber Security Management; Critical Infrastructure Cyber Protections and Awareness; and Plans, Programs, Policies, and Administration.

The FY 2010 request includes adjustments-to-base for annualization of \$3,105,000 for 23 positions received in FY 2009; pay inflation of \$373,000; 100 additional Federal positions offset by \$5,956,000 in program/contract dollars; and an increase of \$1,058,000 for facilities and rent transferred from the NPPD Management and Administration appropriation. Program changes include an increase of \$13,000,000 for Cybersecurity Coordination; a increase of \$16,128,000 for US-CERT Operations; an increase of \$4,700,000 for Federal Network Security; an increase of \$800,000 for Global Cybersecurity Management; an increase of \$15,000,000 for Critical Infrastructure Cyber Protection and Awareness; a decrease of \$4,000,000 for a cyber system protection and analysis program at Idaho National Laboratory; and a \$3,500,000 decrease for the University of Texas at San Antonio Community Cyber Security Maturity Model. The FY 2010 request includes a \$40,490,000 increase for Network Security Deployment, including a \$10,000,000 increase for data center consolidation which will be used to continue ongoing system and application migration to the two existing DHS Enterprise Data Centers. The Data Center consolidation efforts will standardize IT resource acquisitions across components, streamline maintenance and support contracts, resulting in an enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

CURRENT SERVICES PROGRAM DESCRIPTION

National Cyber Security Division	FY 2009 Enacted	FY 2010 Request
Personnel Costs	\$ 14,623.00	\$ 26,222.28
Program Costs	\$ 298,877.00	\$ 374,432.00
Total Costs	\$ 313,500	\$ 400,654

America's information technology infrastructures, including the Internet, telecommunication networks, and computer systems are increasingly being targeted for exploitation and disruption. Because America's critical cyber infrastructures are under constant attack, the National Cyber Security Division was created to enhance federal cyber readiness; analyze cyber threats and vulnerabilities; disseminate threat warning information; and coordinate incident response activities. The National Cyber Security Division mission operates under authorities derived from the Homeland Security Act of 2002, the Federal Information Security Management Act of 2002, the 2003 White House - *National Strategy to Secure Cyberspace*, and Homeland Security Presidential Directive-7, *Critical Infrastructure Identification, Prioritization and Protection*.

Subsequently, the National Security Presidential Directive-54/Homeland Security Presidential Directive-23 formalized a series of efforts known collectively as the Comprehensive National Cybersecurity Initiative. National Cyber Security Division is the Federal Executive Agent in carrying out many of the Comprehensive National Cybersecurity Initiative mandates. The Comprehensive National Cybersecurity Initiative is a multi-year plan that builds on previous efforts to individually secure federal cyber networks; guides inter-Departmental roles and responsibilities; lays out a phased 12 initiative strategy to mitigate risk; and fosters partnerships between public and private sector domains. DHS' approach to implementing the Comprehensive National Cybersecurity Initiative is leading to a fundamental shift in the way public and private industry cybersecurity is viewed.

To respond to National Security Presidential Directive-54/Homeland Security Presidential Directive-23 mandates, DHS vetted, and consequently established, the National Cybersecurity Protection Program and National Cybersecurity Protection System. The National Cybersecurity Protection Program encompasses the people, activities, processes, and technologies necessary to enable DHS to execute its critical cyber mission of defending, protecting, and reducing the vulnerability of Federal networks, and is comprehensively executed through National Cyber Security Division's six branches. The National Cybersecurity Protection System is the hardware, software, and other components being procured to support the implementation of the Comprehensive National Cybersecurity Initiative established under the National Security Presidential Directive-54/Homeland Security Presidential Directive-23.

The National Cyber Security Division mission is to work collaboratively with public, private and international entities to protect and secure the Nation's cyber assets. This broad mission gives the National Cyber Security Division a pivotal role in providing cyber analysis, intrusion detection and warning, intrusion prevention, information sharing, vulnerability reduction, and incident response. The National Cyber Security Division works in coordination with public and private sectors to promote the security, resilience, and reliability of the Nation's cyber infrastructure. Moreover, the National Cyber Security Division coordinates public and private sector cyber preparedness activities and aids in the preparation for, response to and recovery from catastrophic incidents that would degrade or overwhelm our national cyber systems.

The National Cyber Security Division develops capabilities to prepare for and respond to catastrophic incidents that could degrade or overwhelm network and cyber critical infrastructure and key resources assets that comprise the Nation's information technology infrastructures. Comprehensive National Cybersecurity Initiative funds enable the National Cyber Security Division to reduce vulnerabilities and mitigate threats, thus ensuring that cyber intrusions and disruptions are infrequent and cause minimal damage to public and private sector networks.

To date, the National Cyber Security Division has leveraged its current investments in people and technology to provide baseline capabilities to secure the federal domain and support key initiatives in the following mission areas:

- Alert, Warning, and Analysis activities use a standardized, repeatable, and reliable methodology to assess the severity of cyber activity reported through a myriad of sources to assess the threat to the Nation's cyber infrastructures in order to publish alerts and warnings on vulnerabilities, incidents, and exploits through established programs and mechanisms.
- Coordination and Collaboration activities receive information on cyber activity affecting the Nation's cyber infrastructure and coordinate with Federal Departments and Agencies, private industry, and other key stakeholders to develop situational awareness. Under this current structure, in order to complete this mission, a reliance on coordination and collaboration with a number of communities of interest is critically important.
- Response and Assistance activities provide advice to federal civilian government communities of interest during malicious cyber activity. This includes releasing products that contain mitigation strategies or assisting other departments in incident response, and analysis of malware and digital media.
- Protect and Detect activities develop and deploy "Einstein 1.0" provides basic technologies to detect cyber activity within the .gov domain and assist with the protection of the federal departments' external Internet connection points.

As the Nation's cyber risks increase in scope and severity, it is critical that investments are commensurately expanded in the National Cyber Security Division. Funding enables the National Cyber Security Division to support current baseline operations in areas such as technology, process, and people, allowing the National Cyber Security Division to expand mission area efforts across the Federal Government.

The National Cyber Security Division programs ensure that the statutory and derivative responsibilities underlying the Comprehensive National Cybersecurity Initiative for protecting the Nation's cyber infrastructure are effectively executed. Planned activities will facilitate DHS' ability to close capability gaps in mission-critical areas and enhance the National Cyber Security Division's ability to support cybersecurity statutory mandates.

The National Cyber Security Division requests a change in its FY 2010 budget structure to better align appropriated resources in its current services programs and activities. The old budget structure was comprised of: US-CERT, Strategic Initiatives, Outreach and Awareness, and Planning and Programs. Under this realignment, the National Cyber Security Division will request funding based on its organizational structure. The National Cyber Security Division consists of six branches: United States Computer Emergency Readiness Team Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Plans, Programs, Policies and Administration. The updated structure allows the

National Cyber Security Division to fulfill its expanded mission requirements in a transparent and efficient manner. The project/activity budgets are restated in the new structure in FY 2009 for comparison purposes to the FY 2010 request.

The United States Computer Emergency Readiness Team leads a public-private partnership to protect and defend the Nation's cyber infrastructure. The United States Computer Emergency Readiness Team coordinates and facilitates information sharing with federal civilian agencies, defense and intelligence

agencies, state and local governments, private sector partners, infrastructure owners and operators, international allies, and the public to collect and disseminate cybersecurity threat and attack information.

To fulfill its mission, the United States Computer Emergency Readiness Team disseminates threat, vulnerability, risk, analysis, and mitigation strategies, and works with partner organizations to continually update information assurance policies and technologies to defend the Federal computer network space. Through monitoring, communications, and coordination activities, the United States Computer Emergency Readiness Team provides timely and accurate cyber threat mitigation guidance and serves as the focal point for collaborative cyber awareness, mitigation, and reduction for threats and vulnerabilities.

The United States Computer Emergency Readiness Team is striving to fulfill the Comprehensive National Cybersecurity Initiative mission under the National Security Presidential Directive-54/Homeland Security Presidential Directive-23, with a particular focus on partnering in the Federal community. Challenges continue to evolve as threats and vulnerabilities grow in complexity. Investments in new technology deployments demand new thinking on how to leverage all resources in the following areas:

- Refining and enhancing delivery of core cyber products and services.
- Improving the existing interagency process to generate a new, more expansive customer services community and collaborative environment across the .gov community.
- Fulfilling human capital requirements across all United States Computer Emergency Readiness Team programmatic pillars, with emphasis on trained analysts and managers.
- Increasing organizational capital through development of advanced standard operating procedures and concepts of operations.
- Developing precise, actionable metric programs to measure and enhance the United States Computer Emergency Readiness Team's performance and accountability.
- Supporting the United States Computer Emergency Readiness Team programmatic goals through targeted external communication and public relations efforts to stakeholders across the Federal government, State and local governments, and the private sector.

The United States Computer Emergency Readiness Team's strategic goals fall under the following six programmatic pillars.

- Governance/Synchronization: Deliver ability to set priorities, allocate resources, and ensure successful completion of milestones.
- Detection: Actions taken to identify threat activity.
- Threat: Connect the community to cyber risk activity that customers would not any otherwise have the means/ability to gain/obtain and maintain on their own.
- Vulnerability: Connect the community with the authoritative vulnerability and malware repository and prioritize risk activity.
- Mitigation: Analyzing threat activity and devising timely and accurate ways of providing solutions to contain and resolve risks.
- Reflection: Mature capability to execute information assurance mission.

It is through these pillars that the United States Computer Emergency Readiness Team will provide its public and private sector customers with value, new products, services, and improved security, while adapting to an ever-changing threat environment.

To assist the Nation in protecting its infrastructure and information against the evolving threats and cyber attacks, the United States Computer Emergency Readiness Team has expanded its 24-hour early watch and warning center operations to help government and industry analyze and respond to cyber threats and vulnerabilities. The Department is investing in additional personnel, processes, and systems to support the expansion of the United States Computer Emergency Readiness Team Watch Center.

To expand its capabilities, the United States Computer Emergency Readiness Team will leverage technology from the concurrent deployment of Block 2 sensors across the Federal government, which will enable the United States Computer Emergency Readiness Team to identify malicious traffic with a combination of flow- and signature-based detection. The United States Computer Emergency Readiness Team will then be able to analyze patterns of malicious code, mitigate cyber threats, and stop or reduce intrusion events.

To provide near real-time response, the United States Computer Emergency Readiness Team will use traffic flow analysis, intrusion detection tools, partner organization vulnerability data, intelligence information, commercial vulnerability data feeds, and open source mechanisms. The United States Computer Emergency Readiness Team will analyze network traffic to identify emerging threats and detect and respond to cyber attacks in near real time as possible. The United States Computer Emergency Readiness Team bulletins will serve to notify public and private stakeholders of cyber incidents so that the stakeholder community can then find the infected machine and mitigate the intrusion.

To successfully complete its mission, the United States Computer Emergency Readiness Team must rely on coordination and collaboration with a number of communities of interest. The United States Computer Emergency Readiness Team coordinates and facilitates information sharing with federal agencies, defense and intelligence agencies, state and local governments, private sector partners, infrastructure owners and operators, international allies, and the public to collect and disseminate cybersecurity threat and attack information, including timely and accurate mitigation guidance.

To respond to cyber attacks, the United States Computer Emergency Readiness Team must provide timely technical assistance to its communities of interest in a wide range of cyber activities from routine to catastrophic. Timely and precise cyber analysis allows for rapid escalation methodologies to effectively allocate resources for response. As a result, the United States Computer Emergency Readiness Team employs sets of tools to effectively identify, analyze, prioritize and communicate emerging vulnerabilities and threats. These tools allow the United States Computer Emergency Readiness Team to relay cybersecurity alerts and warnings to its communities of interest.

To support partners and stakeholders, the United States Computer Emergency Readiness Team is doubling efforts to improve its customer service relationships with departments and agencies. It envisions this new environment as a seamless protected community, in which departments and agencies are responsible for protecting their cyber infrastructures. In addition to trained analysts, the United States Computer Emergency Readiness Team's new Joint Agency Cyber Knowledge Exchange shifts the focus internally by ensuring that Departments and Agencies have the appropriate technical information to detect and defend their networks from threat. Through weekly meetings and ongoing information exchanges, the United States Computer Emergency Readiness Team provides information on detection and mitigation risk strategies to protect the United States Government systems. Such initiatives allow the United States Computer Emergency Readiness Team Operations to protect the community as a whole and assist Departments and Agencies in protecting their own systems.

National Computer Forensics Institute is an advanced, modern training facility operated by the U.S. Secret Service for electronic crime investigators in Hoover, Alabama. The training is modeled on the current U.S. Secret Service Electronic Crimes Special Agent Program curriculum, and provides training in three major areas of electronic crimes: Level I Basic Electronic Crimes Investigation Program; Level II Network Intrusion Investigation; and Level III Computer Forensics. National Cyber Security Division will provide \$4 million to support the National Computer Forensics Institute in FY 2010.

FY 2008 United States Computer Emergency Readiness Team Operations Accomplishments:

- Developed plans to fully establish a national cyber analysis and warning capability, emphasizing expansion of human capital to ensure that alerts, warnings, bulletins, and other publications remain targeted, actionable, and timely.
- Built initial capability to detect, analyze, and respond to multiple, simultaneous national-level cyber events.
- Provided a standardized platform for incident reporting across the Federal civilian government, which utilizes the United States Computer Emergency Readiness Team's new incident tracking mechanism, resulting in an enhanced and streamlined capability to produce immediate actionable information, allowing for more detail as additional facts emerge.
- Expanded the National Vulnerability Database and helped establish a national baseline of specific standards to enable automated vulnerability management, measurement, and policy compliance evaluation.
- Provided the ability to detect, respond to, and send notice of cyber incidents using analysis tools.
- Created new and expanded United States Computer Emergency Readiness Team Concept of Operations procedures to define Personal Identifiable Information reporting requirements.
- Developed lessons learned from incidents and cyber exercises, including Cyber Storm II.
- Increased staffing for the 24x7 Security Operations Center to provide capability for in-depth incident tracking, detecting, and mitigating, in able to fulfill around the clock analysis and fusion support.
- Hosted Chief Information Security Officer meetings to facilitate lessons learned, Federal Information Systems Management Act Score Improvement Strategies, and Cyber Protection Strategies.
- Held Government Forum of Incident Response and Security Teams annual conference to educate the various levels of the Government Forum of Incident Response and Security Teams community on incident response activities.
- Identified and incorporated technical and functional requirements from other cyber initiatives.
- Enhanced the frequency and quantity of information being published to the National Cyber Alert System and to the Current Activity Really Simple Syndication feeds and mailing list.
- Redesigned and provided new graphic interface on the United States Computer Emergency Readiness Team website to better visualize cybersecurity trends and allow users to navigate more easily.
- Enhanced the Incident Reporting Form to allow Departments and Agencies to report incidents with greater ease.
- Established new cyber stakeholder relationships in order to publish information through new channels including constituent newsletters, websites, and reports.
- Enhanced the United States Computer Emergency Readiness Team Portal features to offer additional tools for situational awareness.

- Created new information products specific to the intelligence community to be published on the Homeland Security Data Network website and eventually the Joint Worldwide Intelligence Communications System website.
- Annually verified, updated, and confirmed the alert systems and Standard Operating Procedures for the United States Computer Emergency Readiness Team Operations.

FY 2009 United States Computer Emergency Readiness Team Operations Planned Accomplishments:

- Develop a plan to outline a staff mentoring program that will be targeted to maximize staff capabilities.
- Evaluate the United States Computer Emergency Readiness Team Operations' Classification program and develop an Action Plan so that the United States Computer Emergency Readiness Team Operations is better able to share mitigating actions.
- Improve the release of actionable information by establishing a Joint Agency Cyber Knowledge Exchange Program to provide Federal agency Security Operations Centers with information on the cyber threats to their networks as well as mitigation techniques for protection.
- Solicit feedback from stakeholders on a quarterly basis to enhance products and thus better meet the needs of each sector. As part of this endeavor, the United States Computer Emergency Readiness Team Operations will improve the accuracy of its distribution lists for each product.
- Improve relationships with industry to more quickly validate vulnerabilities and develop mitigation strategies to enhance and strengthen its relationships with its industry partners to validate vulnerabilities and develop mitigation strategies in a much shorter time period. As a key component of this effort, the United States Computer Emergency Readiness Team will actively collaborate with the Information Technology Information Sharing and Analysis Center in order to create more actionable products allowing the recipients to take immediate mitigation steps.
- Further develop and enhance the United States Computer Emergency Readiness Team Alert Level process to ensure threat descriptions and risk thresholds are appropriate and that the process for working with stakeholders and releasing cyber notifications is thoroughly socialized and refined with the stakeholders.
- Develop a plan and supporting procedures to enhance "Fly Away" Team capabilities.
- Lead the effort for the Information Technology Security Service Provider implementation to support working level discussions and activities to promote trusted information exchange on cybersecurity events.
- Collaborate with private sector stakeholders from the information technology and communications sectors and co-draft a sector specific Concept of Operations to serve as an appendix to the United States Computer Emergency Readiness Team Operations Concept of Operations.
- Expand the Chief Information Security Officer Forum to fully coordinate with top level leadership at each department and agency and provide situational awareness of pertinent cybersecurity information.
- Design and implement a single, integrated quality assurance training initiative to baseline business processes, formally integrate process requirements, and identify priority processes to refine critical capability gaps.
- Establish operating routines to support senior staff, external expectations, and communications, including strategic plans, roadmaps, and balanced scorecard initiatives.

FY 2010 United States Computer Emergency Readiness Team Operations Planned Accomplishments:

- Support deployment of Block 2 to Cabinet and high-priority departments and agencies across the Federal enterprise in parallel with the reduction of external network connections across the Federal government.
- Support operations and provide resources to monitor, analyze, and mitigate activity detected by Block 2 technology.
- Establish a better understanding of network assets and traffic patterns throughout the Federal Enterprise through the Joint Agency Cyber Knowledge Exchange program and Domain Name System log analysis.
- Better utilize the Government Forum of Incident Response and Security Teams to disseminate information quickly to Federal, State, and local governments.
- Develop a Federal Department and Agency partnership program to assign United States Computer Emergency Readiness Team personnel to work with specific .gov partners, thus creating a more specialized, customer service-focused program.
- Enhance the capability to provide timely warnings and notifications by sharing information on daily and weekly calls with National Security Agency, National Technical Operations Center, Intelligence Community-Incident Response Center, Defense Cyber Crime Center and National Counterintelligence Joint Task Force, and Joint Task Force for Global Network Operations.
- Integrate customer feedback into quality assurance and other process improvement initiatives, and comprehensively overhaul plans, procedures, and Concept of Operation to include feedback from process improvement initiatives and strategic trends in cybersecurity technology and policy.
- Analyze existing Federal Information Security Management Act processes to reflect on information assurance policies and requirements to improve guidance and requirements based on current threats and vulnerabilities. Continue to implement policies and requirements while moving toward Federal Information Security Management Act implementation to accommodate additional cyber defense processes.
- Expand agency advocate program to additional departments and agencies .
- Develop more comprehensive internal metrics to measure progress toward cybersecurity goals and objectives.
- Advance capabilities of the United States Computer Emergency Readiness Team to oversee individual Department/Agency Certification & Accreditation packages to gain an increased view of system security postures.

Federal Network Security Branch

\$ thousands	Activity	FY 2009			FY 2010			Change		
		FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits		9	9	\$1,246	14	20	\$1,933	5	11	\$687
	<i>Federal Information Systems</i>			\$2,600			\$2,600			\$0
	<i>Trusted Internet Connection</i>			\$2,881			\$5,062			\$2,181
	<i>Compliance & Oversight</i>			\$7,232			\$8,875			\$1,643
	<i>Infrastructure Security Management</i>			\$1,000			\$1,221			\$221
	Program Costs			\$13,713			\$17,758			\$4,045
	Total	9	9	\$14,959	14	20	\$19,691	5	11	\$4,732

Federal Network Security utilizes a holistic approach to Federal government network security that enables Federal partners to address cybersecurity challenges in a manner that maximizes value and minimizes risks associated with technology and security investments. It addresses common challenges faced by the Federal enterprise and designs, implements, and maintains solutions that address these challenges.

Federal Network Security provides the Federal enterprise with leadership, direction and day-to-day operations support for improving effectiveness and consistency of information systems security across the Federal enterprise. Its purpose is to analyze current conditions in all Federal government sectors, determine immediate and root causes of information security vulnerabilities and gaps, and to provide leadership and direction for mitigating risk due to determined vulnerabilities and gaps.

Each Federal partner will maintain responsibility for their operations and the security of their internal network. The Federal Network Security mission is to reduce duplication of individual Federal partner efforts, provide enhanced capabilities for small Federal partners, and increases the baseline security of Federal Government networks. It also assists Federal partners with implementation and compliance management of information systems security policies and guidelines to ensure long-term prevention of attacks against the Federal enterprise.

In addition, Federal Network Security activities provide the capability to enable long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by across the Federal enterprise. Design, implementation, and maintenance of evolving security solutions that address the aggregate needs of the Federal enterprise is leading to substantial improvements in Federal government information system security effectiveness and consistency will occur.

The Federal Network Security branch is organized into four sections: *Federal Information Systems Security, Trusted Internet Connections Initiative, Compliance and Oversight, and Security Management*. Existing efforts and processes are also leveraged within the Information Systems Security Line of Business.

Federal Information Systems Security

Federal Information Systems Security evaluates existing capabilities within the Federal enterprise based upon defined requirements. It establishes mechanisms for Federal partners to deploy standardized tools and services at a reduced cost, paving the way for a collaborative environment that enables sharing of best practices and common security challenges and shortfalls. Based upon defined requirements, Federal Information Security Systems monitors implementation and operation of Shared Service Centers and evaluates existing capabilities within the Federal government. It also supports the Federal Systems Security Governance Board by identifying common information security needs and solutions across the Federal enterprise.

FY 2008 Federal Information Systems Security Accomplishments:

- Finalized certification and accreditation requirements for Statement of Capability and Statement of Work.
- Defined common performance metrics and created standard Memorandum of Understanding and Service Level Agreement templates for Shared Service Centers.
- Achieved cross-agency concurrence of Situational Awareness Incident Response Tier I requirements and established and implemented a SmartBUY Federal government-wide procurement.
- Finalized role-based training requirements for Situational Awareness and Incident Response Tier II in order to identify Shared Service Providers.

FY 2009 Federal Information Systems Security Planned Accomplishments:

- Define, advise, assess, and designate Federal enterprise-wide Shared Service Centers with Federal partners.
- Award a Federal enterprise-wide acquisition in order to provide Situational Awareness and Incident Response Tier I products and services with the General Services Administration to a.
- Define and advise commercial Shared Service Center for Certification and Accreditation services with the General Services Administration to a.
- Define technical requirements for Situational Awareness and Incident Response Tier II products and services Collaborate with Federal partners.

FY 2010 Federal Information Systems Security Planned Accomplishments:

- Identify common solutions for information systems security that will reduce cost through shared services, providing benefits and cost efficiencies by eliminating duplication, increasing expertise through specialization, freeing-up resources for mission specific requirements, and other tailored security requirements.
- Strengthen the Federal government's information systems security through adherence to the management and reporting regulations of the Federal Information Security Management Act which will result in improved effectiveness and consistency in securing Federal government information systems.
- Support key components of the governance structure to improve information security decision making by providing a model for initiating, managing, and maintaining an approach for a range of security needs in a dynamic security environment. Elevate decision-making for common activities of information systems security from local programs to an enterprise level that ensures consistency and strengthens information systems security government-wide.

Trusted Internet Connections Initiative

The Trusted Internet Connections Initiative seeks to optimize network security services into a common solution for the Federal government and facilitate the reduction of external connections, including Internet points of presence. The reduction of external connections will have a number of benefits for the Federal government, particularly when coupled with other security measures, and will allow for the establishment of a central oversight and compliance function.

While the Office of Management and Budget maintains oversight of the overall effort of the Trusted Internet Connections Initiative, implementation relies on the technical expertise of the Federal Network Security branch to synchronize the efforts of all participating Federal partners. Through the Trusted Internet Connections Initiative, Federal Network Security will monitor and oversee Federal partners' transition to becoming a Trusted Internet Connection Access Provider, and consequently manage their baseline information systems security requirements. Additionally, the Trusted Internet Connections Initiative will facilitate the roll out of the National Cybersecurity Protection System intrusion detection system across the Federal enterprise. This will provide improved situational awareness, earlier identification of malicious activity, and a more comprehensive network defense.

FY 2008 Trusted Internet Connections Initiative Accomplishments:

- Conducted Plan of Action and Milestones collection and analysis.
- Developed Trusted Internet Connections Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Access Provider selection criteria.
- Identified capable Trusted Internet Connection Access Provider candidates.

- Assessed Federal enterprise network reduction and consolidation in order to establish a baseline inventory of existing external connections.

FY 2009 Trusted Internet Connections Initiative Planned Accomplishments:

- Establish a baseline inventory of existing external connections and complete Initial Operating Capability Assessment for Trusted Internet Connection Access Providers.
- Oversee Office of Management and Budget designated Trusted Internet Connection Access Providers implementation of technical requirements.
- Bundle Trusted Internet Connection compliant managed security services through the NETWORX contract vehicle with General Services Administration.
- Monitor Federal partner transition to Trusted Internet Connection compliant, managed security services through the NETWORX contract vehicle.
- Establish a process to annually review and update the Trusted Internet Connection Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Architecture documentation.

FY 2010 Trusted Internet Connections Initiative Planned Accomplishments:

- Manage continued Federal enterprise reduction and consolidation efforts of external connections, enabling efficient monitoring and alerting on suspicious activity occurring across the Federal enterprise.
- Conduct a combined feasibility study and cost-benefit analysis on the optimization of reducing Trusted Internet Connection access points. Explore at least two options for optimization in order to determine the extent to which consolidation efforts will continue to yield cost-effective optimization of Federal security and the point of diminishing returns on investment.
- Analyze and update the Trusted Internet Connection Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Architecture to remain aligned with Federal security strategy, address identified solution gaps; provide Federal agencies clear guidance for the migration of existing infrastructure; and implementation of new capabilities in a manner consistent with the overall Federal security strategy.
- Align NETWORX requirements and coordinate with the General Services Administration to adapt the NETWORX contract vehicle to meet applicable Internet Connections/ Trusted Internet Connection Access Points Technical and Information Systems Security Requirements, in order to continue to provide Federal partners a cost effective solution for the implementation of capabilities necessary to comply with the overall Federal security strategy.

Compliance and Oversight

The Compliance and Oversight section oversees activities to ensure that implementation efforts across the Federal enterprise are in compliance with information technology security policy directives and statutes. It provides a Federal enterprise-level perspective to the customer base on information systems security trends and approaches, and can also offer recommendations on process improvements.

Trusted Internet Connection Compliance Validations at Trusted Internet Connection location sites and Security Operations Centers are conducted by the Compliance and Oversight section. The Compliance and Oversight section develops and manages a compliance program capable of monitoring, evaluating, and enforcing ongoing compliance with Federal information technology security directives and initiatives. As part of the process, the Compliance and Oversight section collects and distributes best

practices information relating to lessons learned with the goal of improving Federal partners' compliance rates.

The Compliance and Oversight section also collaborates with Federal partners to create metrics that will verify Trusted Internet Connection Access Providers compliance to the Trusted Internet Connection technical requirements and the Security Operations Centers' Computer Network Defense Security Program. This results in a Trusted Internet Connection Access Providers security program that monitors, evaluates, and enforces ongoing compliance with Trusted Internet Connection technical requirements.

FY 2008 Compliance and Oversight Accomplishments:

- Developed, drafted, and socialized the Compliance and Oversight section strategic work plan.
- Developed process guidelines and Statements of Purpose for the Compliance and Oversight programmatic elements.

FY 2009 Compliance and Oversight Planned Accomplishments:

- Create Trusted Internet Connection compliance assessments teams and establish follow-on contract for assessment team resources.
- Develop assessment metrics to measure long-term compliance of Trusted Internet Connection Access Providers.
- Conduct and evaluate eight Trusted Internet Connection Access Providers using Trusted Internet Connection compliance assessments, utilizing developed metrics and to recommend changes to policy or architecture.

FY 2010 Compliance and Oversight Planned Accomplishments:

- Perform Trusted Internet Connection compliance assessments to ensure agencies have the appropriate operational capabilities in place to meet the Trusted Internet Connection Initiative objectives.
- Map Trusted Internet Connection compliance assessment criteria to other common Federal and industry compliance, audit, and certification criteria to allow parties engaged in the assessment process to leverage existing documentation to satisfy checks and eliminate unnecessary duplication of effort.
- Expand Trusted Internet Connection compliance assessment capabilities to support Comprehensive National Cybersecurity Initiative implementation by identifying and adding required capability checks to the compliance catalog, creating a broader compliance program of which the Trusted Internet Connection compliance assessment are a subset

Security Management
