

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Delete Language from Section 503:

SEC. 503. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2009] 2010, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that: (1) creates a new program, project, or activity; (2) eliminates a program, project, office, or activity; *or* (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress; **(4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or the House of Representatives for a different purpose; or (5) contracts out any function or activity for which funding levels were requested for Federal full-time equivalents in the object classification tables contained in the fiscal year] 2009 [Budget Appendix for the Department of Homeland Security, as modified by the explanatory statement accompanying this Act],** unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds. (b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2009] 2010, or provided from any accounts in the Treasury of the United States derived by the collection of fees or proceeds available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as approved by the Congress; or (3) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress, unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds. (c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: *Provided*, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer. **[(d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations after June 30, except in extraordinary circumstances that imminently threaten the safety of human life or the protection of property.]** **([e]d) Within 90 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a report listing all dollar amounts specified in this Act [and accompanying explanatory statement that are identified in the detailed funding**

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

table at the end of the explanatory statement accompanying this Act or any other amounts specified in this Act or accompanying explanatory statement: *Provided*, That such dollar amounts specified in this Act and accompanying explanatory statement shall be subject to the conditions and requirements of subsections (a), (b), and (c) of this section].

Explanation: For item (4), language is proposed for deletion to eliminate potential inconsistencies in reconciling House Reports, Senate Reports and the Joint Explanatory Statement. For item (5), language is proposed for deletion to eliminate the restrictions on contracting out functions for which funds have been appropriated for Federal FTEs. Circumstances may warrant from time to time that contracting out functions can be prudent and judicious use of federal funding resources. Item (d) is proposed for deletion to provide the Department with greater flexibility with respect to timing of potential reprogrammings.

Proposal to Delete Language from Section 510:

SEC. 510. Sections [519,] 520, [522,] 528, [530,] and 531 of the Department of Homeland Security Appropriations Act, 2008 (division E of Public Law 110-161; 121 Stat. 2072, 2073, 2074, 2082) shall apply with respect to funds made available in this Act in the same manner as such sections applied to funds made available in that Act.

The sections proposed for deletion are outlined below:

SEC. 519. None of the funds made available in this Act may be used by any person other than the Privacy Officer appointed under section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142) to alter, direct that changes be made to, delay, or prohibit the transmission to Congress of any report prepared under paragraph (6) of such section.

Explanation: This provision is proposed for deletion as it is inconsistent with the President's constitutional authority to coordinate and supervise all replies and comments from the Executive Branch to Congress.

SEC. 522. Section 525(d) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 120 Stat. 1382) shall apply to fiscal year 2008.

Explanation: This provision is proposed for deletion because the management directive has been modified.

SEC. 530. None of the funds made available in this Act maybe used in contravention of section 303 of the Energy Policy Act of 1992 (42 U.S.C. 13212).

Explanation: This provision is proposed for deletion because it is already required by codified law.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Delete *Old* Section 512:

[SEC. 512. (a) None of the funds provided by this or previous appropriations Acts may be obligated for deployment or implementation, on other than a test basis, of the Secure Flight program or any other follow-on or successor passenger prescreening program, until the Secretary of Homeland Security certifies, and the Government Accountability Office reports, to the Committees on Appropriations of the Senate and the House of Representatives, that all ten of the conditions contained in paragraphs (1) through (10) of section 522(a) of Public Law 108-334 (118 Stat. 1319) have been successfully met. (b) The report required by subsection (a) shall be submitted within 90 days after the Secretary provides the requisite certification, and periodically thereafter, if necessary, until the Government Accountability Office confirms that all ten conditions have been successfully met. (c) Within 90 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a detailed plan that describes: (1) the dates for achieving key milestones, including the date or timeframes that the Secretary will certify the program under subsection (a); and (2) the methodology to be followed to support the Secretary's certification, as required under subsection (a). (d) During the testing phase permitted by subsection (a), no information gathered from passengers, foreign or domestic air carriers, or reservation systems may be used to screen aviation passengers, or delay or deny boarding to such passengers, except in instances where passenger names are matched to a Government watch list. (e) None of the funds provided in this or previous appropriations Acts may be utilized to develop or test algorithms assigning risk to passengers whose names are not on Government watch lists. (f) None of the funds provided in this or any other Act may be used for data or a database that is obtained from remains under the control of a non-Federal entity: *Provided*, That this restriction shall not apply to Passenger Name Record data obtained from air carriers.]

Explanation: This provision is proposed for deletion as it restricts the Department's flexibility to execute this program in an effective and efficient manner. The Department has completed rebaselining the cost, schedule and performance goals of the program and plans to satisfy the GAO requirements in 2009.

Proposal to Delete *Old* Section 513:

[SEC. 513. None of the funds made available in this Act may be used to amend the oath of allegiance required by section 337 of the Immigration and Nationality Act (8 U.S.C. 1448).]

Explanation: DHS has stated in the past that the Executive Branch should continue to be responsible for the actual language of the Oath of Renunciation and Allegiance. Through the Immigration and Nationality Act, Congress has already provided a clear mandate on the necessary content and substance of the Oath.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Delete *Old* Section 515:

[SEC. 515.(a) The Secretary of Homeland Security shall research, develop, and procure new technologies to inspect and screen air cargo carried on passenger aircraft by the earliest date possible. (b) Existing checked baggage explosive detection equipment and screeners shall be utilized to screen air cargo carried on passenger aircraft to the greatest extent practicable at each airport until technologies developed under subsection (a) are available. (c) The Assistant Secretary of Homeland Security (Transportation Security Administration) shall work with air carriers and airports to ensure that the screening of cargo carried on passenger aircraft, as defined in section 44901(g)(5) of title 49, United States Code, increases incrementally each quarter. (d) Not later than 45 days after the end of each quarter, the Assistant Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives a report on air cargo inspection statistics by airport and air carrier detailing the incremental progress being made to meet the requirements of section 44901(g)(2) of title 49, United States Code.]

Explanation: This provision is proposed for deletion because screening air cargo is already a high priority for the Department. The Department will provide the required information regardless of this provision.

Proposal to Delete *Old* Section 516:

[SEC. 516. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration "Aviation Security", "Administration" and "Transportation Security Support" for fiscal years 2004, 2005, 2006, and 2007 that are recovered or deobligated shall be available only for the procurement or installation of explosives detection systems, for air cargo, baggage, and checkpoint screening systems, subject to notification: *Provided*, That quarterly reports shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives on any funds that are recovered or deobligated.]

Explanation: This provision is proposed for deletion in an effort to provide greater flexibility in the use of appropriated resources and to consider the most pressing needs in the Department's efforts to protect the Homeland.

Proposal to Delete *Old* Section 517:

[SEC. 517. Any funds appropriated to United States Coast Guard, "Acquisition, Construction, and Improvements" for fiscal years 2002, 2003, 2004, 2005, and 2006 for the 110-123 foot patrol boat conversion that are recovered, collected, or otherwise received as the result of negotiation, mediation, or litigation, shall be available until expended for the Replacement Patrol Boat (FRC-B) program.]

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Explanation: This provision has appeared in the last several appropriations acts and previous appropriations acts provide sufficient authority to extend funds for the Replacement Patrol Boat program.

Proposal to Delete Old Section 518:

[SEC. 518. (a)(1) Except as provided in paragraph (2), none of the funds provided in this or any other Act shall be available to commence or continue operations of the National Applications Office until— (A) the Secretary certifies in fiscal year 2009 that: (i) National Applications Office programs comply with all existing laws, including all applicable privacy and civil liberties standards; and, (ii) that clear definitions of all proposed domains are established and are auditable; (B) the Comptroller General of the United States notifies the Committees on Appropriations of the Senate and the House of Representatives and the Secretary that the Comptroller has reviewed such certification; and (C) the Secretary notifies the Committees of all funds to be expended on the National Applications Office pursuant to section 503 of this Act. (2) Paragraph (1) shall not apply with respect to any use of funds for activities substantially similar to such activities conducted by the Department of the Interior as set forth in the 1975 charter for the Civil Applications Committee under the provisions of law codified at section 31 of title 43, United States Code. (b) The Inspector General shall provide to the Committees on Appropriations of the Senate and the House of Representatives, starting six months after the date of enactment of this Act, and quarterly thereafter, a classified report containing a review of the data collected by the National Applications Office, including a description of the collection purposes and the legal authority under which the collection activities were authorized: *Provided*, That the report shall also include a listing of all data collection activities carried out on behalf of the National Applications Office by any component of the National Guard. (c) None of the funds provided in this or any other Act shall be available to commence operations of the National Immigration Information Sharing Operation until the Secretary certifies that such program complies with all existing laws, including all applicable privacy and civil liberties standards, the Comptroller General of the United States notifies the Committees on Appropriations of the Senate and the House of Representatives and the Secretary that the Comptroller has reviewed such certification, and the Secretary notifies the Committees on Appropriations of the Senate and the House of Representatives of all funds to be expended on the National Immigration Information Sharing Operation pursuant to section 503.]

Explanation: This was a one time provision and all of the requirements in the section were completed.

Proposal to Delete Old Section 522:

[SEC. 522. (a) None of the funds provided by this or any other Act may be obligated for the development, testing, deployment, or operation of any portion of a human resources management system authorized by 5 U.S.C. 9701(a), or by regulations

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

prescribed pursuant to such section, for an employee as defined in 5 U.S.C. 7103(a)(2). (b) The Secretary of Homeland Security shall collaborate with employee representatives in the manner prescribed in 5 U.S.C. 9701(e), in the planning, testing, and development of any portion of a human resources management system that is developed, tested, or deployed for persons excluded from the definition of employee as that term is defined in 5 U.S.C. 7103(a)(2).]

Explanation: The department has withdrawn its coverage under 5 U.S.C. 9701 and therefore this provision is unnecessary.

Proposal to Delete Old Section 526:

[SEC. 526. None of the funds provided by this or previous appropriations Acts shall be used to fund any position designated as a Principal Federal Official for any Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.) declared disasters or emergencies.]

Explanation: This provision restricts the Secretary's ability to manage disaster response.

Proposal to Delete Old Section 529:

[SEC. 529. None of the funds provided in this Act shall be available to carry out section 872 of Public Law 107-296.]

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility in carrying out its requirements for protecting the Homeland.

Proposal to Delete Old Section 530:

[SEC. 530. None of the funds provided in this Act under the heading "Office of the Chief Information Officer" shall be used for data center development other than for the National Center for Critical Information Processing and Storage until the Chief Information Officer certifies that the National Center for Critical Information Processing and Storage is fully utilized as the Department's primary data storage center at the highest capacity throughout the fiscal year.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Delete *Old* Section 531:

[SEC. 531. None of the funds in this Act shall be used to reduce the United States Coast Guard's Operations Systems Center mission or its government-employed or contract staff levels.]

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility in carrying out its requirements for protecting the Homeland and in the use of appropriated resources.

Proposal to Delete Language from *Old* Section 537:

SEC. [537]526. Section 831 of the Homeland Security Act of 2002 (6 U.S.C. 391) is amended— (1) in subsection (a), by striking "Until September 30, [2008] 2009," and inserting "Until September 30, [2009] 201. and subject to subsection (d)," [;] [(2) by redesignating subsection (d) as subsection (e); and] [(3) by inserting after subsection (c) the following:]["(d) **ADDITIONAL REQUIREMENTS.—**] ["(1) **IN GENERAL.—**The authority of the Secretary under this section shall terminate September 30, 2009, unless before that date the Secretary—] ["(A) issues policy guidance detailing the appropriate use of that authority; and] ["(B) provides training to each employee that is authorized to exercise that authority.] ["(2) **REPORT.—**The Secretary shall provide an annual report to the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Homeland Security and type="deleted">Governmental Affairs of the Senate, and the Committee on Homeland Security of the House of Representatives detailing the projects for which the authority granted by subsection (a) was used, the rationale for its use, the funds spent using that authority, the outcome of each project for which that authority was used, and the results of any audits of such projects."].

Explanation: This provision extends the department's Cooperative Research and Development Authority through fiscal year 2010. In addition, the department recommends striking all language after "subject to subsection (d). All subsequent language has amended the Homeland Security Act, which is permanent legislation and is therefore unnecessary.

Proposal to Delete *Old* Section 539:

[SEC. 539. (a) Notwithstanding any other provision of this Act, except as provided in subsection (b), and 30 days after the date that the President determines whether to declare a major disaster because of an event and any appeal is completed, the Administrator shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Homeland Security of the House of Representatives, the Committee on Transportation and Infrastructure of the House of Representatives, the Committees on Appropriations of the Senate and

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

the House of Representatives, and publish on the website of the Federal Emergency Management Agency, a report regarding that decision, which shall summarize damage assessment information used to determine whether to declare a major disaster.(b) The Administrator may redact from a report under subsection (a) any data that the Administrator determines would compromise national security. (c) In this section— (1) the term "Administrator" means the Administrator of the Federal Emergency Management Agency; and (2) the term "major disaster" has the meaning given that term in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Proposal to Delete and Insert Language in Old Section 540:

SEC. [540]528. Notwithstanding any other provision of law, *in the current fiscal year or a subsequent fiscal year*, should the Secretary of Homeland Security determine that the National Bio and Agro-defense Facility be located at a site other than Plum Island, New York, the Secretary shall liquidate the Plum Island asset by directing the Administrator of General Services to sell through public sale all real and related personal property and transportation assets which support Plum Island operations, subject to such terms and conditions as necessary to protect government interests and meet program requirements: *Provided*, That the [gross] proceeds of such sale shall be deposited as offsetting collections into the Department of Homeland Security Science and Technology "Research, Development, Acquisition, and Operations" account and, subject to appropriation, shall be available until expended, for site acquisition, construction, and costs related to the construction of the National Bio and Agro-defense Facility, including the costs associated with the sale, including due diligence requirements, necessary environmental remediation at Plum Island, and reimbursement of expenses incurred by the General Services Administration [**which shall not exceed 1 percent of the sale price**]: *Provided further*, That after the completion of construction and environmental remediation, the unexpended balances of funds appropriated for costs in the preceding proviso shall be available for transfer to the appropriate account for design and construction of a consolidated Department of Homeland Security Headquarters project, excluding daily operations and maintenance costs, notwithstanding section 503 of this Act, and the Committees on Appropriations of the Senate and the House of Representatives shall be notified 15 days prior to such transfer.

Explanation: Proposed deletions alleviate fiscal law concerns and allow GSA to operate in advance of determining the actual price for of the proposed sale.

Proposal to Delete Old Section 541:

[SEC. 541. Any official that is required by this Act to report or certify to the Committees on Appropriations of the Senate and the House of Representatives may

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

not delegate such authority to perform that act unless specifically authorized herein.]

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility on the use of its appropriated resources

Proposal to Delete Old Section 543:

[SEC. 543. Section 520 of Public Law 108-90 (6 U.S.C. 469) is amended— (1) by inserting "(a)FEES.—" before "For fiscal year 2004 and thereafter"; and (2) by adding at the end the following: "(b)RECURRENT TRAINING OF ALIENS IN OPERATION OF AIRCRAFT.— "(1) PROCESS FOR REVIEWING THREAT ASSESSMENTS.—Notwithstanding section 44939(e) of title 49, United States Code, the Secretary shall establish a process to ensure that an alien (as defined in section 101(a)(3) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(3)) applying for recurrent training in the operation of any aircraft is properly identified and has not, since the time of any prior threat assessment conducted pursuant to section 44939(a) of such title, become a risk to aviation or national security. "(2) INTERRUPTION OF TRAINING. If the Secretary determines, in carrying out the process established under paragraph (1), that an alien is a present risk to aviation or national security, the Secretary shall immediately notify the person providing the training of the determination and that person shall not provide the training or if such training has commenced that person shall immediately terminate the training. "(3) FEES.—The Secretary may charge reasonable fees under subsection (a) for providing credentialing and background investigations for aliens in connection with the process for recurrent training established under paragraph (1). Such fees shall be promulgated by notice in the Federal Register.".]

Explanation: This provision is no longer required as the U.S. code has been amended with the changes included in the provision.

Proposal to Delete Old Section 545:

[SEC. 545. If the Assistant Secretary of Homeland Security (Transportation Security Administration) determines that an airport does not need to participate in the basic pilot program, the Assistant Secretary shall certify to the Committees on Appropriations of the Senate and the House of Representatives that no security risks will result by such non-participation.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Delete *Old* Section 546:

[SEC. 546. Notwithstanding any other provision of law, and not later than 30 days after the date of submission of a request for a single payment, the President shall provide a single payment for any eligible costs under section 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172) for any police station, fire station, or criminal justice facility that was damaged by Hurricane Katrina of 2005 or Hurricane Rita of 2005: *Provided*, That the President shall not reduce the amount of assistance provided under section 406(c)(1) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172(c)(1)) for such facilities: *Provided further*, That nothing in the previous proviso may be construed to alter the appeal or review process relating to assistance provided under section 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172): *Provided further*, That the President shall not reduce the amount of assistance provided to a local government under section 406(d) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172(d)) more than once for each such type of facility for which that local government is receiving assistance under section 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act relating to Hurricane Katrina of 2005 or Hurricane Rita of 2005.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Proposal to Delete *Old* Section 547:

[SEC. 547. For grants to States pursuant to section 204(a) of the REAL ID Act of 2005 (division B of Public Law 109-13), \$50,000,000, to remain available until expended. In addition, for developing an information sharing and verification capability with States to support implementation of the REAL ID Act, \$50,000,000, to remain available until expended: *Provided*, That none of the funds provided in this section for development of the information sharing and verification system shall be available to create any new system of records from the data accessible by such information technology system, or to create any means of access by Federal agencies to such information technology system other than to fulfill responsibilities pursuant to the REAL ID Act of 2005.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Proposal to Delete *Old* Section 548:

[SEC. 548. Notwithstanding any other provision of law, the Federal Emergency Management Agency shall reimburse Jones County and Harrison County in the State of Mississippi under section 407 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5173) for unreimbursed costs relating to the

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

removal of debris that were incurred by such counties as a result of Hurricane Katrina in 2005.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Proposal to Delete Old Section 549:

[SEC. 549. From the unobligated balances of prior year appropriations made available for Transportation Security Administration, \$31,000,000 are rescinded: *Provided*, That the Transportation Security Administration shall not rescind any unobligated balances from the following programs: screener partnership program; explosives detection systems; checkpoint support; aviation regulation and other enforcement; air cargo; and air cargo research and development.]

Explanation: This provision is proposed for deletion because funds were subject to a one-time rescission.

Proposal to Delete Old Section 550:

[SEC. 550. From the unobligated balances of prior year appropriations made available for "Analysis and Operations", \$21,373,000 are rescinded.]

Explanation: This provision is proposed for deletion because funds were subject to a one-time rescission.

Proposal to Delete Old Section 551:

[SEC. 551. From unobligated balances of prior year appropriations made available for Coast Guard "Acquisition, Construction, and Improvements", \$20,000,000 are rescinded: *Provided*, That no funds shall be rescinded from prior year appropriations provided for the National Security Cutter or the Maritime Patrol Aircraft: *Provided further*, That the Coast Guard shall submit notification in accordance with section 503 of this Act listing projects for which funding will be rescinded.]

Explanation: This provision is proposed for deletion because funds were subject to a one-time rescission.

Proposal to Delete Old Section 552:

[SEC. 552. For fiscal year 2008, funds made available for Federal

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Emergency Management Agency "National Predisaster Mitigation Fund" shall be provided as detailed in the explanatory statement accompanying Public Law 110-161.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

Proposal to Add New Section 532:

SEC. 532. For Fiscal Year 2010 and hereinafter, the Secretary may provide to personnel appointed or assigned to serve abroad, allowances and benefits similar to those provided under chapter 9 of title I of the Foreign Service Act of 1990 (22 U.S.C. 4081 et seq.) .

Explanation: This provision provides that department personnel will receive that same allowances that other executive branch employees receive when assigned abroad.

Proposal to Add New Section 533:

SEC. 533. Notwithstanding any other provision of law, the Secretary of Homeland Security, acting through the Commandant of the Coast Guard, may sell any real and personal property under the administrative control of the Coast Guard and used for the Loran system, by directing the Administrator of General Services to sell such real and personal property, subject to such terms and conditions that the Secretary believes to be necessary to protect government interests and program requirements of the Coast Guard: Provided, That the proceeds, less the costs of sale incurred by the General Services Administration, shall be deposited as offsetting collections into the Coast Guard Environmental Compliance and Restoration account and, subject to appropriation, shall be available until expended for environmental compliance and restoration purposes associated with the Loran system, for the demolition of improvements on such real property, and for the costs associated with the sale of such real and personal property, including due diligence requirements, necessary environmental remediation, and reimbursement of expenses incurred by the General Services Administration: Provided further, That after the completion of such activities, the unexpended balances shall be available for any other environmental compliance and restoration activities of the Coast Guard.

Explanation: This provision allows the Coast Guard to retain proceeds from the sale of the LORAN system.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Add New Section 534:

SEC. 534. *Sections 143 and 144 of division A of the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009 (Public Law 110-329; 122 Stat. 3580 et seq.), as amended by section 101 of Division J of Public Law 111-8, are further amended by striking "September 30, 2009" and inserting "September 30, 2012".*

Explanation: The provision extends both the authorization for the Basic Pilot program, currently called “E-Verify”, and the EB- 5 Immigrant Investor Pilot Program for three years beyond the current expiration date of September 30, 2009.

SEC. 535. *Sections 286(v)(2)(A), (B), and (C) of the Immigration and Nationality Act, as amended (8 U.S.C. 1356(v)(2)(B)) are amended to read as follows: "(A) Secretary of State — One-third of the amounts deposited into the Fraud Prevention and Detection Account shall remain available to the Secretary of State until expended for programs and activities (i) to increase the number of consular and diplomatic security personnel assigned primarily to the function of preventing and detecting fraud by applicants for visas described in subparagraph (H)(i), (H)(ii), or (L) of section 101(a)(15) of this Act;(ii) otherwise to prevent and detect visa fraud, including fraud by applicants for visas described in subparagraph (H)(i), (H)(ii), or (L) of section 101(a)(15), as well as the purchase, lease, construction, and staffing of facilities for the processing of these classes of visa, in consultation with the Secretary of Homeland Security as appropriate; and (iii) upon request by the Secretary of Homeland Security, to assist such Secretary in carrying out the fraud prevention and detection programs and activities described in subparagraph (B). "(B) Secretary of Homeland Security — One-third of the amounts deposited into the Fraud Prevention and Detection Account shall remain available to the Secretary of Homeland Security until expended for programs and activities to prevent and detect immigration benefit fraud, including but not limited to fraud with respect to petitions under paragraph (1) or (2)(A) of section 214(c) to grant an alien nonimmigrant status described in subparagraphs (H) or (L) of section 101(a)(15). "(C) Secretary of Labor — One-third of the amounts deposited into the Fraud Prevention and Detection Account shall remain available to the Secretary of Labor until expended for wage and hour enforcement programs and activities otherwise authorized to be conducted by the Secretary of Labor that focus on industries likely to employ nonimmigrants, including but not limited to enforcement programs and activities described in section 212(n), and enforcement programs and activities related to section 214(c)(14)(A)(i).*

Explanation: The proposal describes and clarifies the permitted uses of Fraud Account fees for the Departments of State, Labor, and DHS. For DHS, the proposal would change current law to permit Fraud Account funding to be used to combat any type of fraud, not just fraud limited to H and L nonimmigrant categories. This would give DHS enhanced flexibility to “follow the fraud” across immigration benefit product lines.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Add New Section 536:

SEC. 536. Temporary Protected Status Fee Clarification. (a) In general. Section 244 of the Immigration and Nationality Act (8 U.S.C. 1254a), as amended, is further amended in subsection (c)(1)(B) by:(1) striking the second sentence; and (2) striking in the third sentence "a separate, additional fee" and inserting in lieu thereof: "separate, additional fees for reregistration, for fingerprinting or other biometric services regardless of whether such services may relate to an initial or renewed registration for temporary protected status, and". (b) Effective date. The amendment made by this section is effective as of the date of enactment of Pub. L. No. 102-232.

Explanation: The provision removes the current statutorily-set registration fee of \$50 on Temporary Protected Status (TPS) applicants to permit USCIS to match future fees to estimated actual cost. The provision also clarifies the law on biometric fees assessed on past and current applicants. It also supports the Administration's overall goal to reform immigration fees and ensure that fees are set at the level to recover costs for providing a specific benefit.

Proposal to Add New Section 537:

SEC. 537. Notwithstanding any other provision of law in the current fiscal year or subsequent fiscal years, should the Secretary of Homeland Security determine that specific Immigration and Customs Enforcement Service Processing Centers, or other ICE-owned detention facilities, no longer meet the mission need, the Secretary is authorized to dispose of individual Service Processing Centers, or other ICE owned detention facilities, by directing the Administrator of General Services to sell all real and related personal property which support Service Processing Center, or other ICE-owned detention facilities, operations, subject to such terms and conditions as necessary to protect government interests and meet program requirements: Provided, That the proceeds, net of the costs of sale incurred by the General Services Administration and Immigration and Customs Enforcement shall be deposited as offsetting collections into a separate account that shall be available, subject to appropriation, until expended for other real property capital asset needs of existing Immigration and Customs Enforcement assets, excluding daily operations and maintenance costs, as the Secretary deems appropriate.

Explanation: ICE is studying the feasibility of disposing of the government owned detention facilities. In addition, ICE has resource requirements associated with projects to co-locate their field operations. This language permits the Department to apply proceeds from the disposal of detention facilities to co-location project costs subject to appropriation.

Department of Homeland Security
Title V – FY 2010 Explanation of Changes - General Provisions

Proposal to Add New Section 538:

SEC. 538. *Section 550 of Pub. L. No. 109-295 is amended in subsection (b) by deleting from the last proviso "three years after the date of enactment of this Act" and inserting in lieu thereof "October 4, 2010".*

Explanation: Extends the Department's chemical security regulatory authorities in the referenced statute to October 4, 2010.

Proposal to Add New Section 539:

SEC. 539. *For Fiscal Year 2010 and thereafter, the Secretary of Homeland Security may collect fees from any non-Federal participant in a conference, seminar, exhibition, symposium, or similar meeting conducted by the Department of Homeland Security in advance of the conference, either directly or by contract, and those fees shall be credited to the appropriation or account from which the costs of the conference, seminar, exhibition, symposium, or similar meeting are paid and shall be available to pay the costs of the Department of Homeland Security with respect to the conference or to reimburse the Department for costs incurred with respect to the conference. In the event the total amount of fees collected with respect to a conference exceeds the actual costs of the Department of Homeland Security with respect to the conference, the amount of such excess shall be deposited into the Treasury as miscellaneous receipts. (Department of Homeland Security Appropriations Act, 2009.)*

Explanation: This provision allows the department to retain conference fees and deposit those fees back into the appropriation responsible for the account. This authority is the same authority that the Department of Defense has.

FY 2010 Budget Overview

	FY 2008 Revised Enacted ¹	FY 2009 Enacted ²	FY 2010 Pres. Budget	FY 2010 +/- FY 2009
	\$000	\$000	\$000	\$000
Net Discretionary:	\$ 35,065,701	\$ 40,056,930	\$ 42,713,922	\$ 2,656,992
Discretionary Fees:	2,923,150	3,166,019	3,072,030	(93,989)
<i>Less rescission of prior year carryover: ³</i>	<i>(124,985)</i>	<i>(61,373)</i>	-	<i>61,373</i>
Gross Discretionary	37,863,867	43,161,576	45,785,952	2,624,376
Mandatory, Fee, Trust Funds:	9,465,797	9,320,643	9,329,275	8,632
Total Budget Authority:	\$ 47,329,664	\$ 52,482,219	\$ 55,115,227	\$ 2,633,008
Supplemental: ⁴	\$ 15,129,607	\$ 2,967,000	-	\$ (2,967,000)

1/ FY 2008 revised enacted reflects net reprogramming/transfer adjustments for CBP (\$2.6 million); TSA (-\$10.5 million); USSS (\$34.0 million); NPPD (-\$5.6 million); OHA (\$1.9 million); FEMA (-\$23.0 million); US CIS (\$282.167 million); FLETC (\$5.636 million) FEMA - DRF to OIG (\$16 million). Reflects technical adjustments to revise fee estimates for TSA Aviation Security - General Aviation Fee (\$.050 million); TSA Aviation Security - Passenger & Aviation Security Infrastructure Fee (\$96.025 million); TSA Transportation Threat Assessment and Credentialing - Registered Traveler (-\$31.601million); TSA Transportation Threat Assessment and Credentialing - Transportation Worker Identification Credentials (\$37.9 million); TSA Transportation Threat Assessment and Credentialing - HAZMAT (-\$1.0 million); TSA Transportation Threat Assessment and Credentialing - Alien Flight School (\$1.0 million); and FEMA - Radiological Emergency Preparedness (\$-.492 million). Pursuant to P.L. 110-161 reflects a scorekeeping adjustment for rescissions of prior year unobligated balances from USCG - AC&I (-\$137.264 million) and a rescission of current-year appropriations for USM (-\$5.0 million).

2/ FY 2009 enacted reflects technical adjustments to revise fee estimates for TSA - Transportation Threat and Credentialing - Registered Traveler (-\$10.0 million), TSA - Transportation Threat and Credentialing - Transportation Worker Identification Credentials (\$22.7 million); TSA - Transportation Threat and Credentialing - HAZMAT (-\$3.0 million); TSA - Transportation Threat and Credentialing - Alien Flight School (\$1.0 million). Reflects USCG realignment of Operating Expenses funding and Pursuant to P.L. 110-53 reflects TSA realignment of funds for 9/11 Commission Act implementation (\$3.675 million - Aviation Security, 13.825 million - Surface, \$2.5 million - Support). Reflects a scorekeeping adjustment for a rescission of prior year unobligated balances from USCG - AC&I (-\$20.0 million).

3/ Pursuant to P.L. 110-161, reflects rescission of prior year unobligated balances: FY 2008 - Counter-Terrorism Fund (-\$8.480 million); TSA (-\$4.5 million); Analysis and Operations (-\$8.7 million); FEMA - Disaster Relief Fund (-\$20.0 million); USCG - Operating Expenses (-\$9.584 million); CBP (-\$2.003 million); US CIS (-\$.672 million); FEMA (-\$2.919 million); ICE (-\$.137 million); FLETC (-\$.334 million); OSEM (-\$4.211 million); USM (-\$.444 million); CFO (-\$.380 million); CIO (-\$.493 million); DNDO (-\$.368 million); OHA (-\$.045 million); OIG (-\$.032 million); NPPD (-\$1.995 million); S&T (-\$.217 million).

Pursuant to P.L. 110-161, reflects rescission of start-up balances : FY 2008 - CBP (-\$25.621 million); FEMA (-\$14.257 million); Departmental Operations (\$12.084 million); Working Capital Fund (-\$2.509 million).

Pursuant to P.L. 110-329, Reflects rescission of prior year unobligated balances: FY 2009 - Analysis and Operations (-\$21.373 million); TSA (-\$31.0 million); FEMA - Cerro Grande (-\$9.0 million).

4/ In order to obtain comparable figures, Total Budget Authority excludes:

- FY 2008 supplemental funding pursuant to P.L. 110-161: CBP (\$1.531 billion); ICE (\$526.9 million); USCG (\$166.1 million);
- NPPD (\$275.0 million); FEMA (\$3.030 billion); US CIS (\$80.0 million); FLETC (\$21.0 million).
- FY 2008 supplemental funding pursuant to P.L. 110-252: USCG (\$222.607 million); FEMA (\$897.0 million).
- FY 2008 supplemental funding pursuant to P.L. 110-329: OIG (\$8.0 million); USCG (\$300.0 million); FEMA (\$8.072 billion).
- FY 2009 supplemental funding pursuant to P.L. 110-252: USCG (\$112 million).
- FY 2009 supplemental funding pursuant to P.L. 111-5: USM (\$200 million); CBP (\$680 million); ICE (\$20 million); TSA (\$1.0 Billion); USCG (\$240 million); FEMA (\$610 million); OIG (\$5 million).
- FY 2009 supplemental funding pursuant to P.L. 111-8: USSS (\$100 million).

BUDGET REQUEST AND SUPPORTING INFORMATION

DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

I. Appropriation Overview

A. Mission Statement for Appropriation Name:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) supports the Department and all of its components by providing leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions, and oversight to all entities within the Department. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

B. Budget Activities:

OSEM is a separate appropriation within Departmental Management and Operations that provides resources for ten separate Programs, Projects and Activities (PPAs) including: Executive Leadership and Direction, Stakeholder Relations, Office of Policy, Office of Public Affairs, Office of Legislative Affairs, Office of the General Counsel, Office for Civil Rights and Civil Liberties, Office of the Citizenship and Immigration Ombudsman, Privacy Officer, and the Office of Counternarcotics Enforcement. Below are brief descriptive summaries of the ten PPAs.

Executive Leadership and Direction: Executive Leadership and Direction consolidates the Immediate Office of the Secretary, the Immediate Office of the Deputy Secretary, the Office of the Chief of Staff, and the Office of the Executive Secretary into a single PPA. DHS proposes to consolidate these four PPAs because they jointly provide executive direction and directly support the Secretary.

Stakeholder Relations: Stakeholder Relations consolidates the Office for State and Local Law Enforcement, the Private Sector Coordination Office, and the Office of Intergovernmental Programs. These offices have programs that share a common goal: to communicate and coordinate with organizations external to DHS and the Federal government.

Office of Policy: The Office of Policy's responsibilities include the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. This Office strengthens the Department's ability to maintain policy and operational readiness needed to protect the Homeland by providing a centralized coordination point for developing and communicating policies across the multiple internal and external components of the Homeland Security network. In addition to DHS, the Office of Policy also interacts with other government entities, international counterparts, academics and private stakeholders.

Office of Public Affairs: The Office of Public Affairs is responsible for managing external and internal communications. The Office of Public Affairs responds to national media inquiries, maintain and update the Department's website, write speeches for principals and coordinate speaking events for Department officials. The Office of Public Affairs also develops and manages various public education programs including the Ready Campaign to increase citizen preparedness. The Office fosters strategic communication throughout the Department and with external stakeholders. It manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. It also oversees the Department's employee communication activities, which include an all employee newsletter, town hall meetings between management and employees, and an intranet site. Finally, its incident communications program guides overall federal incident communication activity and coordinates with state, local, and international partners to ensure accurate and timely information to the public during a crisis.

Office of Legislative Affairs: The Office of Legislative Affairs serves as the Secretary's principal liaison with Capital Hill and other governmental entities by fostering relationships with Members of Congress and staff to precipitate legislative support for the Departmental programs, policies and initiatives that promote a more secure nation.

Office of the General Counsel: The General Counsel is responsible for ensuring implementation of the Department's statutory responsibilities and policies as set forth by the Administration, the Secretary, and other senior officials within the Department. The General Counsel is the Department's chief legal officer and principal legal advisor to the Secretary of Homeland Security and, as such, has final authority and responsibility for legal policy determinations within the Department and its components. The General Counsel, and the attorneys engaged in the practice of law on behalf of DHS who report to the General Counsel from throughout the Department, are responsible for ensuring that legal compliance is achieved in every aspect of the Department's work. The office provides legal counsel for all Departmental offices, (other than those specifically excluded by regulation or directive), determines the Department's position to provide effective legal services involving claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums.

Office for Civil Rights and Civil Liberties: The responsibility of the Office for Civil Rights and Civil Liberties is to protect civil rights and civil liberties of our citizens, provide policy advice on civil rights and civil liberties issues, and to serve as an information and communication channel to the public on these issues. This office is tasked with reviewing and assessing information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and by officials of the Department. The Office is responsible for overseeing the Departmental Equal Employment Opportunity programs.

Citizenship and Immigration Services Ombudsman: The statutory mission of the Citizenship and Immigration Services (CIS) Ombudsman is to assist individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), to identify individual and employee problem areas within USCIS and propose changes to mitigate identified problems.

Privacy Office: The DHS Privacy Office is the first statutorily mandated Privacy Office within the Federal government. The Privacy Office protects the collection, use, and disclosure of personally identifiable information (PII) and Departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy and disclosure

policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs and systems, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act.

Office of Counternarcotics Enforcement: As the principal advisor to the Secretary on counterdrug matters, the Counternarcotics Enforcement Director reviews and evaluates the effectiveness of DHS counterdrug activities. The Office of Counternarcotics Enforcement coordinates Departmental policy and operations within the Department, other Federal departments and agencies and State and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department fulfill its responsibilities to stop the entry of illegal drugs into the United States. The Office of Counternarcotics Enforcement also works closely with DHS intelligence and law enforcement entities to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force construct.

C. Budget Request Summary:

The Office of the Secretary and Executive Management requests 709 positions, 678 FTE, and \$160,760,000 for the FY 2010 request. This represents an increase of 84 positions, 80 FTE, and \$37,304,000 over the FY 2009 Enacted Budget of 625 positions, 598 FTE, and \$123,456,000.

Of the requested increase, 31 positions, 53 FTE, and \$20,007,000 are requested for adjustments to the base and 53 positions, 27 FTE, and \$17,297,000 are requested for program changes.

Base adjustments include:

- Transfer of funds from various components for the Secretary's Travel (\$395,000; 0 FTE);
- Adjustment to Base of funds for the Deputy Secretary's Travel (\$370,000; 0 FTE)
- Transfer of the Office of Intergovernmental Programs from FEMA (\$2,000,000; 17 FTE);
- Annualization of prior year part year funding (\$5,453,000; 26 FTE);
- FY 2010 pay raise and annualization of 2009 pay raise (\$1,922,000; 0 FTE);
- Non-pay inflation, including GSA rent and payments to the Working Capital Fund (\$7,250,000; 0 FTE); and
- One-time adjustment to fully fund base FTE (\$2,617,000; 0 FTE).

Within the base adjustments, this appropriation request seeks to realign and consolidate four PPAs into a single PPA, entitled: Executive Leadership and Direction. Executive Leadership and Direction consolidates the Immediate Office of the Secretary, the Immediate Office of the Deputy Secretary, the Office of the Chief of Staff, and the Office of the Executive Secretary. This PPA provides executive direction to the Department and directly supports the Secretary.

Also, this appropriation request seeks to establish a new PPA for Stakeholder Relations. Stakeholder Relations consists of the Office for State and Local Law Enforcement, the Private Sector Coordination Office, and the Office of Intergovernmental Programs. The Federal Emergency Management Agency

will transfer 17 positions, 17 FTE, and \$2,000,000 for the Office of Intergovernmental Programs (IGP) to the Stakeholder Relations.

Requested program change increases in FY 2010 include:

- Office of Policy (\$15,000,000; 25 positions; 13 FTE); and
- Office for Civil Rights and Civil Liberties (\$2,297,000; 28 positions; 14 FTE).

III. Current Services Program Description by PPA

**Department of Homeland Security
Departmental Management and Operations
Office of the Secretary and Executive Management
Program Performance Justification**
(Dollars in thousands)

PPA: EXECUTIVE LEADERSHIP AND DIRECTION

	Perm Pos	FTE	Amount
2008 Actual	72	62	\$11,678
2009 Enacted	71	85	14,681
2010 Adjustments-to-Base	0	0	3,129
2010 Current Services	71	82	17,810
2010 Program Change	0	0	0
2010 Request	71	85	17,810
Total Change 2009-2010	0	0	0

OSEM requests \$17.8 million for this activity. This is an increase of \$3.1 million over FY 2009 Enacted for adjustments-to-base including: pay inflation, fully funding base FTE and transfer of travel funds from other components.

CURRENT SERVICES PROGRAM DESCRIPTION:

Executive Leadership and Direction consolidates the Immediate Office of the Secretary, the Immediate Office of the Deputy Secretary, the Office of the Chief of Staff, and the Office of the Executive Secretary into a single PPA. DHS proposes to consolidate these four PPAs because they jointly provide executive direction and directly support the Secretary.

Immediate Office of the Secretary: The Secretary is appointed by the President and confirmed by the Senate to lead the Department of Homeland Security (DHS) and act as the principal adviser to the President on homeland security matters. The Secretary ensures a coordinated national effort to prevent terrorist attacks in the United States, reduce vulnerability of the United States to terrorism, and minimize the damage, as well as recover from attacks that do occur. The Secretary is a member of the Homeland Security Council. He serves as the principal spokesperson for the administration when testifying before the House Homeland Security Committee and the Senate Homeland Security and Government Affairs Committee.

In FY 2008, the Immediate Office of the Secretary continued to provide the strategic vision and leadership to the Department necessary to maintain focus on the Secretary's 5 Goals: Protect our Nation from dangerous people; Protect our Nation from dangerous goods; Protect critical infrastructure; Strengthen our Nation's preparedness and emergency response capabilities; and Strengthen and unify DHS operations and management. In FY 2009, the Immediate Office of the Secretary lead the Department's first transition to a new Presidential administration.

Immediate Office of the Deputy Secretary: The Immediate Office of the Deputy Secretary supports the Secretary by providing leadership to the Department. This office focuses on internal management and direction to ensure efficient and effective operation of the Department. The Deputy Secretary's

role is to provide internal oversight to all Departmental operations, which allows the Secretary to focus on external matters concerning DHS.

Office of the Chief of Staff: The Chief of Staff oversees DHS activities, assists the Deputy in managing DHS operations, and supports the Secretary in achieving the Department’s goals. In FY 2008, the Office of the Chief of Staff was integral to assisting the Secretary in directing the Department’s resources toward accomplishing the Secretary’s 5 Goals.

Office of the Executive Secretary: The Office of the Executive Secretary provides direct support to the Secretary, Deputy Secretary, and Chief of Staff, including:

- Secretary’s and Deputy Secretary’s correspondence and decision documents;
- Department’s official relationship with the White House and interagency;
- Secretary’s and Deputy Secretary’s classified and unclassified briefing books;
- Administrative and budget support to all offices within Executive Leadership and Direction;
- Manages the Secretary’s scheduling and advance support;
- Provides communications support while the Secretary and Deputy Secretary are on travel;
- Authorization of Questions for the Record; and
- DHS Lexicon project.

Significant accomplishments in FY 2008 include:

- Assumed responsibility for the Secretary’s morning operations and intelligence brief;
- Began providing full service budget, administrative, and human capital support to the Office of the Secretary and the Office of the Chief of Staff;
- Made major improvements in the quality of support provided to the Secretary’s communication team; and
- Provided significant cross-training of career staff in preparation for the 2009 change in Administration.

FY 2009 planned accomplishments include:

- Lead the transition to the new Administration for the Office of the Secretary;
- Assume responsibility for the Department’s reports and testimony clearance; and
- Expand the Department’s Lexicon project.

The FY 2010 plan is to continue to improve business processes for the Department, thus laying a solid foundation for the future.

PPA: STAKEHOLDER RELATIONS

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$0
2009 Enacted	0	0	0
2010 Adjustments-to-Base	17	17	2,800
2010 Current Services	17	17	2,800
2010 Program Change	0	0	0
2010 Request	17	17	2,800
Total Change 2009-2010	17	17	2,800

OSEM requests \$2.8 million for this activity. As this is a new PPA, this is an increase of \$2.8 million over FY 2009 Enacted. \$2.0 million is transferred from existing programs within OSEM and FEMA-OMA appropriations. The remaining \$0.8 million increase is to fund ongoing maintenance operations of critical IT infrastructure capabilities in the DHS Working Capital Fund.

CURRENT SERVICES PROGRAM DESCRIPTION:

The programs within Stakeholder Relations share a common goal: to communicate and coordinate with organizations external to DHS and the Federal government.

Office for State and Local Law Enforcement (SLLE): Section 2006 of the 9/11 Act established the Assistant Secretary for SLLE and set forth his duties and responsibilities, including: 1) to lead the coordination of Department-wide policies relating to the role of State and local law enforcement, and 2) to serve as a liaison between State, local, and tribal law enforcement agencies and the Department. In accordance with this mission, SLLE provides a central point of contact within DHS for communication and coordination of law enforcement policies and issues, especially as they relate to grant programs and terrorism prevention efforts. Prior to the 9/11 Act, law enforcement organizations feared their concerns would take a back seat to emergency responders. SLLE is able to address these concerns by conducting outreach, both within the Department and with major law enforcement organizations, sheriffs, police departments, and other law enforcement organizations. SLLE ensures that their needs and priorities are met, and that they are being used effectively as a partner in preventing, preparing for, protecting against, and responding to acts of terrorism, natural disasters, and other man-made disasters within the United States.

Significant accomplishments in FY 2008 include:

- Established the SLLE office after almost one-third of the year was complete;
- Served as a liaison between law enforcement agencies across the Nation and DHS; and,
- Completed the Law Enforcement Deployment Team (LEDT) report.

Planned accomplishments in FY 2009 and FY 2010 include:

- Continue outreach to all major national law enforcement entities, as well as many smaller organizations.

Private Sector Coordination Office (PSO): Charged with providing America's private sector with a direct line of communication to the Department, PSO works directly with individual businesses and through trade associations and other non-governmental organizations to foster dialogue between the private sector and DHS.

PSO functions include:

- Advising the Secretary on the impact of DHS policies, regulations, processes, and actions on the private sector;
- Creating and fostering strategic communications with the private sector to enhance the primary mission of the Department: to protect the American homeland;
- Creating and managing private sector advisory councils composed of representatives of industries and associations designated by the Secretary to:
 - (a) Advise the Secretary on private sector products, applications, and solutions as they relate to homeland security challenges; and
 - (b) Advise the Secretary on homeland security policies, regulations, processes and actions that affect participating industries and associations;

- Working with Federal laboratories, federally funded research and development centers, other federally funded organizations, academia, and the private sector to develop innovative approaches to address homeland security challenges to produce and deploy the best available technologies for homeland security missions;
- Promoting public-private partnerships to provide collaboration and mutual support to address homeland security challenges;
- Assisting in the development and promotion of private sector best practices to secure critical infrastructure;
- Coordinating industry efforts regarding Department functions to identify private sector resources that could be effective in supplementing government efforts to prevent or respond to a terrorist attack; and,
- Consulting with various DHS elements and the Department of Commerce on matters of concern to the private sector, including travel and tourism industries.

Significant accomplishments in FY 2008 include:

- Continued private sector outreach and coordination;
- Participation in Model Ports creation and rollout;
- Creation and completion of the Loaned Executive Management Directive; and,
- Hurricane preparation and response private sector coordination.

FY 2009 planned accomplishments include:

- Continue private sector outreach and coordination; and,
- Enhance and streamline private sector disaster preparation and response coordination.

For FY 2010, the goal is to surpass the successes of FY 2008 and FY 2009 and increase the outreach of the office further, consistent with an increase in demand for services.

Office of Intergovernmental Programs (IGP): The mission of IGP is to act both as an advocate for the State, local, tribal and territorial officials within DHS and to operate as the primary liaison between those officials and the Secretary and senior DHS leadership.

The stakeholder community consists of over 500,000 non-Federal elected and appointed officials within the United States, including governors, Homeland Security Advisors, mayors, county executives, State legislators, leadership of the 562 Federally recognized Indian tribes, law enforcement officials, emergency managers, and the national associations that represent these officials.

IGP manages communications and coordinates activities across the spectrum of issues, initiatives, and programs confronting all 22 agencies and components of the Department. No other DHS entity is charged with this Department-wide function. It also includes coordination with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House, to provide for coordinated interaction with non-Federal government officials.

FY 2008 Accomplishments

- Supported the coalition among Border States on the Western Hemisphere Travel Initiative (WHTI). IGP will continue discussions with Governors and leadership of Border States as well as tribal leaders on WHTI and other border issues.
- Communicated the Department guidance on the Border Fence and Real ID requirements to state, local, territorial, and tribal officials.

- Advised the Department on strategies, processes, procedures and other developments at the State, local, tribal and territorial levels.
- Advocated for the policy positions taken by State, local, tribal, and territorial officials and the resources needed to carry out Departmental policy decisions.
- Coordinated timely, consistent, and accurate Departmental messages and information to our State, local, tribal and territorial officials.

FY 2009 Planned Accomplishments

- Support the Border Governor's and other leadership of the Border States as well as tribal officials and communicate the requirements of WHTI and continue discussions on Border Fence issues.
- Create and coordinate a Department tribal policy and enhance the role of tribal governments at DHS.
- Inform the State, local, tribal, and territorial officials on a regular basis of the Department's progress and efforts on transition planning for the incoming Administration.
- Communicate the Department guidance on priority efforts such as Real ID requirements and Fusion Centers to state, local, territorial, and tribal officials.
- Advocate for the policy positions taken by State, local, tribal, and territorial officials and the resources needed to carry out Departmental policy decisions.
- Coordinate timely, consistent and accurate Departmental guidance, information and policies to our State, local, tribal and territorial officials.

FY 2010 Planned Accomplishments

- Communicate the new Administration's potential changes to the Department and priorities to state, local, territorial, and tribal officials.
- Advise the Department on strategies, processes, procedures and other developments at the State, local, tribal and territorial levels. This includes preparation of a newly elected State and local officials on the roles and functions of the Department.
- Advocate for the policy positions taken by State, local, tribal, and territorial officials and the resources needed to carry out Departmental policy decisions.
- Coordinate timely, consistent and accurate Departmental guidance, information and policies to our State, local, tribal and territorial officials.

PPA: OFFICE OF POLICY

	Perm Pos	FTE	Amount
2008 Actual	174	174	\$34,380
2009 Enacted	194	182	43,263
2010 Adjustments-to-Base	8	13	3,301
2010 Current Services	202	195	46,564
2010 Program Change	25	13	15,000
2010 Request	227	208	61,564
Total Change 2009-2010	33	26	18,301

OSEM requests \$61.5 million for this activity. This request is an increase of \$18.3 million over FY 2009 Enacted. The \$3.3 million increase in base is a result of ATB increases for pay and prior part year funding for 9 FTE offset by transfers to Executive Leadership and Direction for the Secretary’s travel and for the transfer of functions and resources for responsibilities associated with the Policy Coordinator Committee. The \$15 million in program increases is to establish the DHS Integrated Requirements Process and Maritime Transportation.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Policy (Policy) was created in FY 2006 and has since been responsible for strengthening homeland security by developing and coordinating Department-wide policies, planning, and programs in order to better coordinate/integrate the Department’s prevention, protection, and response and recovery missions. The Office of Policy acts as lead coordinator of Department-wide policies, programs, and planning which will ensure consistency and integration of missions throughout the entire Department. Policy provides a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department’s ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. The Office of Policy is tasked with bridging multiple headquarters’ components and operating agencies to improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. The Office of Policy creates a single point of contact for internal and external stakeholders that allow for streamlined policy management for the Department.

2008 Actual	43	34	\$7,694
2009 Enacted	43	43	5,991
2010 Adjustments-to-Base	0	0	548
2010 Current Services	43	43	6,539
2010 Program Change	0	0	0
2010 Request	43	43	6,539
Total Change 2009-2010	0	0	548

OSEM requests \$6.5 million for this activity. The \$0.54 million increase to the base is a net result of ATB increases for pay inflation, offset by a transfer to Executive Leadership and Direction for the Secretary’s travel and ongoing maintenance operations of critical IT infrastructure capabilities in the DHS Working Capital Fund.

CURRENT SERVICES PROGRAM DESCRIPTION:

The DHS Office of Public Affairs is comprised of 11 major functional areas. They are the Ready Campaign, media relations, incident communications, intelligence and operations communications, strategic communications, employee communications, public liaison, finance and administration, planning and technical operations, web content, and multimedia liaison.

Significant accomplishments in FY 2008 include:

Incident Communications

- Successfully coordinated incident communications with the U.S. Secret Service for the Democratic and Republican national conventions, as well as incident communications plans for the presidential inauguration.
- Finalized and deployed the new Emergency Support Function (ESF) 15 Standard Operating Procedure after thorough interagency review and comment.
- Continued the successful News and Terrorism Workshop program, which provides training to public and information officials in high-risk cities around the country.
- Worked with the White House Homeland Security Council and Department of Energy to develop “public-friendly” non-technical plume maps that would form the basis for evacuation and public guidance during nuclear, radiological and HAZMAT incidents.
- Successfully completed several regional and national level exercises, including Cyber Storm II in March 2008, and a Continuity of Operations (COOP) National Level Exercise in May 2008.
- Continued to train senior career DHS employees on incident communications and the function of the National Joint Information Center (NJIC) at DHS Headquarters in preparation for the 2009 Presidential transition.

Strategic Communications

- Launched a year-long campaign to internally and externally commemorate the Department’s fifth anniversary, starting in March 2008.
- Successfully coordinated inter-departmental rollouts for several DHS policy initiatives. These involve stakeholder outreach, Congressional notifications, subject matter expert briefings, and planning and coordinating public events.

- Developed and maintained relationships with think tank policy experts, key third party decision makers, and stakeholders involved in DHS initiatives. This includes daily/weekly outreach and information dissemination, and coordination with international partners.

Web Communications

- Continued the successful operation of the DHS Leadership Journal, which was launched in September 2007 and was the second public blog maintained by a Cabinet level department.

FY 2009 planned accomplishments include:

- Continue day-to-day operations of press operations and response to national and local media inquiries, strategic communications, public liaison and outreach, writing speeches for department senior officials, internal communications, internet and website operation.
- Conduct planning, preparation, and consistent coordination for all incident communications activities and Emergency Support Functions – 15 responsibilities.
- Support the new administration and their goals.

FY 2010 plan is to continue to run programs that support the new administration policy on public awareness and outreach, preparedness, and internal and external communications.

PPA: OFFICE OF LEGISLATIVE AFFAIRS

	Perm Pos	FTE	Amount

2009 Enacted	48	36	4,997
2010 Adjustments-to-Base	0	0	2,100
2010 Current Services	48	36	7,097
2010 Program Change	0	0	0
2010 Request	48	36	7,097
Total Change 2009-2010	0	0	2,100

OSEM requests \$7.1 million for this activity. This request is an increase of \$2.1 million over FY 2009 Enacted. The \$2.1 million ATB increase is the net result of ATB increases for pay, ongoing maintenance operations of critical IT infrastructure in the Working Capital fund and offset by transfers to Executive Leadership and Direction for the Secretary’s travel and transfer of functions and resources for responsibilities associated with the Congressional Actions Section.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Legislative Affairs (OLA) serves as the Secretary’s principal liaison with Capitol Hill and other government entities. The Office fosters working relationships with Members of Congress and staff to engender legislative support for the Department of Homeland Security programs, policies and initiatives that will facilitate the unified national effort to secure America.

Significant accomplishments in FY 2008 include:

- Attended, successfully coordinated, and developed material for 131 hearings; 32 hearings included multiple DHS witnesses.
- Assisted in preparing witnesses for oral testimony at 173 hearings.

- Attended, coordinated, and managed a total of 1,864 legislative briefings.

FY 2009 planned accomplishments are:

- Increase the number of hearings that we attend, coordinate and develop material for.
- Increase our number of witnesses we assist in preparation of oral testimony.
- Increase the total number of legislative briefings we attend, coordinate and manage in advance of a hearing

For FY 2010 plan is to continue to increase the number of hearing and briefings presented to the Congress.

PPA: OFFICE OF THE GENERAL COUNSEL

	Perm Pos	FTE	Amount

2010 Program Change	0	0	0
2010 Request	101	101	24,028
Total Change 2009-2010	0	10	3,914

OSEM requests \$24 million for this activity. This request is an increase of \$3.9 million over FY 2009 Enacted. The \$3.9 million ATB increase is the net result of ATB increases for pay and prior year part year funding for 10 FTE offset by transfers to Executive Leadership and Direction for the Secretary’s travel and transfer of functions and resources for responsibilities associated with the Congressional Actions Section.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the General Counsel is responsible for all legal activities within the Department to ensure full implementation of the Department’s statutory responsibilities and all policies set forth by the Secretary and all officials of the Department. The Office of the General Counsel provides legal counsel for all DHS offices (except those specifically excluded by regulation or directive), determines the Department’s position in order to provide effective legal services dealing with claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums.

Significant accomplishments in FY 2008 include:

- Continued to provide legal advice and support to a burgeoning client base, including exponential growth in Department elements devoted to cyber security and chemical facility security. Directed significant litigation matters, including coordination with Department of Justice, providing strategic guidance for component counsel offices, and coordinating departmental litigation management.
- Directed the Department's rulemaking activities, coordinated review of proposed regulations, and ensured that all regulatory actions presented to the Secretary complied with constitutional and statutory restrictions and mandates. Produced a variety of significant regulations and significant guidance materials across a range of subjects.

- Supported the Secretary in efforts to implement border security initiatives, particularly the fence construction effort, which involved a number of complex legal issues. Provided advice on emergency/incident management activities, including international information exchange, international agreements and arrangements, foreign investment and national security reviews.
- Increased the size and scope of honors attorney program in an effort to make it the cornerstone for entry-level attorney hiring by the Department. This program offers highly qualified third-year law students; graduate law students, and judicial law clerks the opportunity to start their legal career by addressing some of the most critical and controversial issues facing our nation today.

FY 2009 planned accomplishments include:

- Increase dedication of resources to enable more effective management of the Department in the areas of acquisition and procurement activities; labor and employment matters; appropriations and fiscal law issues; general tort and related claims; and environmental issues.
- Continue efforts to further refine and strengthen the Department's rulemaking activities, ensuring that all regulatory actions presented to the Secretary comply with constitutional and statutory restrictions and mandates.
- Continue to expand and improve the honors attorney entry level hiring program and the summer law intern program.
- Develop additional expertise in U.S. immigration laws, including deportation and removal, arrest and detention, national security, and immigration and federal court litigation.
- Expand administrative support and managerial services and professional assistance to attorneys in an effort to more effectively coordinate the administrative and management functions of the Office of the General Counsel and its component legal offices.

For FY 2010, the goal is to obtain and maintain optimal staffing levels for all legal divisions, anticipating modest growth consistent with an increase in client demand for services and implement an electronic case and document management system.

PPA: OFFICE FOR CIVIL RIGHTS AND CIVIL LIBERTIES

	Perm Pos	FTE	Amount
2008 Actual	75	47	\$14,597

2010 Current Services	85	85	19,807
2010 Program Change	28	14	2,297
2010 Request	113	99	22,104
Total Change 2009-2010	28	19	4,687

OSEM requests \$22.1 million for this activity. This is an increase of \$4.7 million over FY 2009 Enacted. The \$2.3 million ATB increase is for pay, prior year part year funding of 5 FTE, and fully funding base FTE. The \$2.3 million program change increases is for hiring additional EEO Specialists, Program Analysts, Training Advisors, Review and Compliance Analysts and Investigators, and Program Management Analysts to fulfill critical staffing needs.

CURRENT SERVICES PROGRAM DESCRIPTION:

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to review and assess information regarding abuses of civil rights, civil liberties, and profiling on the basis of race, ethnicity, or religion by employees and officials of the Department. CRCL makes available to the public information on the responsibilities and functions of, and how to contact the Officer for Civil Rights and Civil Liberties. CRCL assists the Secretary, directorates, and offices of the Department to develop, implement, and periodically review Department policies and procedures to ensure that protection of civil rights and civil liberties, and that all are appropriately incorporated into Department programs and activities. CRCL oversees compliance with constitutional, statutory, regulatory, policy, and other requirements relating to the civil rights and civil liberties of individuals affected by the programs and activities of the Department. CRCL coordinates with the Department Privacy Officer and ensure that programs, policies, and procedures involving civil rights, civil liberties, and privacy considerations are addressed in an integrated and comprehensive manner. CRCL ensures that Congress receives appropriate reports regarding such programs, policies, and procedures. CRCL investigate complaints and information indicating possible abuses of civil rights or civil liberties. The Office for Civil Rights and Civil Liberties is also responsible for overseeing the Department's equal employment opportunity programs, and for bringing all civil rights-related issues under the jurisdiction of one Headquarters office.

Significant accomplishments in FY 2008 include:

- Developed Civil Liberties Impact Assessments: In accordance with the Implementing Recommendations of the 9/11 Commission Act of 2007, CRCL developed a process for conducting the first government civil liberties impact assessments for certain Departmental programs. These Impact Assessments help to ensure civil liberties are considered as the Department develops or implements laws, regulations, policies, procedures, or guidelines related to efforts to protect the nation against terrorism.
- CRCL resolved civil rights and civil liberties complaints filed by members of the public: CRCL's Review and Compliance Unit receives and investigates, or assigns to components for investigation, complaints alleging abuses of civil rights, civil liberties or racial, ethnic or religious profiling by employees and officials of the Department. The Unit received 157 new complaints in FY 2008, which raised issues in the areas of abuse of authority/color of law, conditions of detention, discrimination (race, disability, national origin), due process/administrative processing, profiling (race, religion), treatment, unaccompanied minors and watch lists. The Unit investigates allegations of medical mistreatment of detainees in DHS custody. Through the work of the Unit, the Department has made revisions to programs and policies in the areas of interpreter services, conditions of detention for ICE detainees and unaccompanied minors, searches of persons who are denied entry into the United States treatment, redress for travelers affected by watch lists, and screening procedures and their effect on the religious rights of the traveling public.
- Effectively processed Equal Employment Opportunity (EEO) Complaints: The EEO Program continued to implement process improvements for complaint adjudication including issuance of Department of Homeland Security final actions on complaints of discrimination. In FY 2008, CRCL received 920 requests for final action and issued 766 decisions.

FY 2009 planned accomplishments include:

- Continue and increase Civil Liberties Impact Assessments (CLIA): In FY 2009, CRCL will hire five full-time staff to conduct proactive CLIA's, replacing staff pulled from other projects in FY 2008. CRCL will mature the cooperative process used to conduct statutorily mandated CLIA's and develop relationships with DHS components to incorporate CLIA's into the regular

development process of agency programs and initiatives. CRCL will also establish a process for providing public access to the CLIAs without jeopardizing the cooperative relationship that CRCL must have with components and DHS leadership.

- Expansion of Engagement with Communities: In FY 2009, CRCL will hire two new full-time staff to expand the ongoing engagement with key ethnic and religious communities who express an interest in DHS policies and programs. With these new staff, CRCL will add four to six new cities and regions to its roster of regular roundtable discussions with American Arab, Muslim, Sikh, and South Asian community leaders currently held in Detroit, Los Angeles, Chicago, Houston, Washington and Boston. CRCL will also increase its dialogue with young people from these communities by holding three youth roundtables.
- Automation of Diversity Management Data and Reports: In FY 2009, CRCL will rollout a new database application providing the capability to mine, manipulate and report workforce demographic data relating to recruitment, development, advancement, and retention. This information technology solution will enable CRCL and component EEO offices to immediately access updated workforce diversity information to ensure equal employment opportunity.

In FY 2010, CRCL plans to:

- Redress Procedures and Governance: CRCL expects to serve a role in determining policies and procedures for new areas of redress related to developing DHS programs like E -Verify, REAL-ID, and any new or modified travel screening initiatives. Working with other components and Department leadership, CRCL will establish a governance structure and working groups to create procedures for centralized redress for new DHS initiatives.
- Expansion of the Civil Liberties Institute: In FY 2010, CRCL will expand its efforts to provide high quality, Department-wide training on issues at the intersection of homeland security and civil rights and civil liberties. In addition to increasing its offerings of training produced by CRCL that are related to Equal Employment Opportunity and the various policy focus areas addressed by the CRCL Programs Division, CRCL will improve the integration of civil rights and civil liberties issues into the standard training offered by other DHS components. The CRCL training is primarily designed for Department personnel in all components, especially those involved in law enforcement, with a secondary audience of external nonprofits, state and local governments and the public at large.
- Functional Integration: In FY 2010, CRCL will deploy rotational Civil Rights and Civil Liberties subject matter experts to liaison between 10 key DHS components and CRCL. These CRCL Liaisons will be a key element for integrating and managing Civil Rights, Civil Liberties and EEO functions throughout DHS. They will help alert CRCL leadership of new programs, policies, procedures and actions taken by components and provide regular feedback and training to components about ways to better observe and protect civil rights and civil liberties. They will also serve on and help manage the Civil Rights, Civil Liberties and EEO Councils created by the Officer as an advisory board responsible for cooperatively reviewing, evaluating, and recommending methods of implementation within specific civil rights, civil liberties and EEO functions.

2010 Request	36	36	6,935
Total Change 2009-2010	6	6	464

OSEM requests \$6.9 million for this activity. This is an increase of \$0.5 million over FY 2009 Enacted. The \$0.5 million ATB increase is for pay and ongoing maintenance operations of critical IT infrastructure in the Working Capital fund.

CURRENT SERVICES PROGRAM DESCRIPTION:

The statutory mission of the Citizenship and Immigration Services Ombudsman (CISOMB) is to assist individuals in resolving problems with United States Citizenship and Immigration Services (USCIS), identify individual and employee problem areas within USCIS, and propose changes to mitigate identified problems.

Significant accomplishments in FY 2008 include:

- **Virtual Ombudsman:** Established the Virtual Ombudsman System (VOS), which supports the Ombudsman’s statutory mandate to assist individuals and employers who experience problems with USCIS and propose changes to mitigate such problems. The VOS will enable CISOMB to fulfill its statutory mandate by: (1) Streamlining and standardizing the process by which individuals and employers contact the Ombudsman by deploying an Internet-based portal that links directly to data fields that currently are captured in a workflow template managed by CISOMB staff; (2) Enabling individuals and employers to provide consent for information release through an electronic signature, instead of an original ink signature that requires the submission and retention of paper correspondence; (3) Centralizing management of correspondence in all forms (paper, facsimile, email, etc.) in a single electronic management tool; (4) Providing functionality and control to CISOMB for data analysis as well as the creation and generation of various data reports requested by the Ombudsman to fulfill mission requirements; and, (5) Allowing for the collection and analysis of information obtained from meetings with stakeholders and USCIS. This project was developed as a three (3) phase process.
- **Ombudsman Outreach:** The Ombudsman Outreach program increased in scope requiring additional visits to Community Based Organizations, Non Government Organizations, Federal agencies, and state and local governments to share program successes and answer questions about the implementation of the Virtual Ombudsman. This resulted in the staff developing a better understanding of how operations are conducted in the “field” to process the large number of applicants USCIS has to manage. Many of these “Outreach” visits produced recommendations used for the development of the FY 2008 Annual report.
- **Continued Study of USCIS Services and Immigration Reform (CIR):** The Ombudsman commissioned a study in FY 2008 with the Homeland Security Institute to analyze USCIS’ ability to effectively provide services and benefits should immigration reform legislation be enacted by studying the process for enrolling and issuing evidence of status to the population of illegal immigrants in the United States.

FY 2009 planned accomplishments include:

- Virtual Ombudsman: The implementation Phase 2 of the Virtual Ombudsman System (VOS) supporting the Ombudsman's statutory mandate to assist individuals and employers who experience problems with USCIS and propose changes to mitigate such problems will be taken.
- Ombudsman Outreach: The Ombudsman Outreach program will increase in scope as a result of the Virtual Ombudsman System deployment and the need to address Community Based Organizations (CBO), Non Government Organizations (NGO), and Federal, state, local and governments. An increase in inquiries is anticipated, which will require additional visits to CBOs, NGOs, Federal agencies, and state and local governments to share program successes and answer questions about the Virtual Ombudsman System, as it matures.
- Staffing: The Ombudsman will increase staff from 30 FTE to 34 FTE to counter the expected workload increase generated by the deployment of the Virtual Ombudsman System and the possibility of CIR being passed in FY 2009. This increase is planned for the 4th quarter of FY 2009 to manage the expected increase in case inquiries generated by VOS.
- Annual Report: A refined and more focused Annual Report will be developed using data and analysis from the Virtual Ombudsman System and the expansion of the Outreach Program to further analyze USCIS business practices and procedures, gather data and develop verifiable recommendations for USCIS, and share "best practices" discovered during the CISOMB outreach visits with Federal and state governments. The Ombudsman will review the serious and pervasive problems identified in the Annual Report to Congress, to make recommendations and propose administrative changes to mitigate systemic problems to: (1) ensure national security and the integrity of the legal immigration system; (2) improve efficiencies and customer service in administering citizenship and immigration services, and (3) assist individuals and employers with the problems they have in dealing with USCIS.
- Continued Study of USCIS Services and Immigration Reform (CIR): The Ombudsman will continue to analyze USCIS' ability to effectively provide services and benefits should immigration reform legislation be enacted in FY 2009 by studying the process for enrolling and issuing evidence of status to the population of illegal immigrants in the United States. The CISOMB plans to reach out to as many entities that resources will allow to market its Virtual Ombudsman to assist entities in working with the legislation enacted in CIR.

In FY 2010, Citizenship and Immigration Services Ombudsman plan includes:

- Virtual Ombudsman System: Continued implementation of Phase three of the Virtual Ombudsman System (VOS) supporting the Ombudsman's statutory mandate to assist individuals and employers who experience problems with USCIS, and propose changes to mitigate such problems will be taken.
- Ombudsman Outreach: The Ombudsman Outreach program will increase in scope as a result of the Virtual Ombudsman System deployment and anticipated immigration reform. An increase in inquiries is expected that will require additional visits to Community Based Organizations, Non Government Organizations, Federal agencies, and state and local governments to share program successes and answer questions about the Virtual Ombudsman System as it matures and to address problems with the implementation of CIR by USCIS.
- Staffing: The Ombudsman will increase staff from 34 FTE to 36 FTE to counter the expected workload increase generated by the deployment of the Virtual Ombudsman System. This increase is planned for the 3rd quarter of FY 2010 to manage the expected increase in case inquiries generated by the system and workload requirements generated by the CIR, as it is progressively implemented.

OSEM requests \$7.9 million for this activity. This is an increase of \$1.2 million over FY 2009 Enacted. The \$1.2 million ATB increase is for pay and prior year part year funding for 2 FTE and ongoing maintenance operations of critical IT infrastructure in the Working Capital fund.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Privacy Office is responsible for protecting the Department’s collection, use, and disclosure of personally identifiable information (PII). Our mission – to support the Department’s mission while at all times maintaining respect for the individual – is achieved by oversight, compliance review, education and training, and enforcement of the Privacy Act, the Privacy Impact Assessment requirements under the Homeland Security Act and the E- Government Act, and the Freedom of Information Act, as well as by demonstrating and encouraging awareness of and commitment to sound privacy policy and practice as currently accepted in the United States and internationally. Our mission of ensuring appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and to implement the policies of the Department to defend and protect the individual rights, liberties, and information interests of our citizens. The Privacy Office has primary responsibility for privacy and FOIA policy, including:

- Assuring that the use of technologies sustains, and does not erode, privacy protections relating to the use, collection, and disclosure of personal information;
- Assuring that personal information contained in Privacy Act systems of records is handled in full compliance with fair information practices as set out in the Privacy Act of 1974;
- Evaluating legislative and regulatory proposals involving collection, use, and disclosure of personal information by the Federal government;
- Conducting a privacy impact assessment of proposed rules of the Department or that of the Department on the privacy of personal information, including the type of personal information collected and the number of people affected; and
- Preparing a report to Congress on an annual basis on activities of the Department that affect privacy including complaints of privacy violations, implementation of the Privacy Act of 1974, internal controls, and other matters.

Significant accomplishments in FY 2008 include:

- Compliance Documentation:
 - Privacy Threshold Analysis (PTA) – conducted 300 PTAs during FY 2008.
 - Privacy Impact Assessments (PIAs) – conducted 56 PIAs. Significant systems included.
 - System of Record Notices (SORNs) – published 13 SORNs.
- Compliance Guidance:
 - Published SORN Guidance including a consolidated library of acceptable routine uses.

- Privacy Act e(3) Statement Guidance
- Privacy Compliance Workshop – Privacy Office held a workshop on PIAs and SORNs on May 23, 2008.
- Held quarterly PIA training for DHS personnel who will draft privacy compliance documents.
- Public Workshops
 - CCTV: Developing Privacy Best Practices—December 17-18, 2008, Arlington, VA
 - Implementing Privacy Protections in Government Data Mining—July 24-25, 2008, Washington, DC.
- Privacy Policy
 - *Handbook for Safeguarding PII at DHS and Rules for Handling PII at DHS.* (expected to be finalized by end of FY 2008)
 - Use of SSNs—The Privacy Office conducted a review of all systems that collect or use Social Security Numbers (SSN) at DHS as part of its ongoing effort to eliminate unnecessary collection and use of SSNs.
- Reports
 - Annual Report – Required under Section 222 of the Homeland Security Act.
 - Data Mining Letter Report – February 11, 2008. Required under Section 804 of the 9/11 Commission Act, the *Federal Agency Data Mining Reporting Act of 2007*.
 - Section 803 Reports – Section 803 of the 9/11 Commission Act requires the Privacy Office to submit quarterly reports on the activities of the Privacy Office.

FY 2009 planned accomplishments include: FOIA backlog reduction, increased customer service, go-live with online training modules, implement new FOIA/PA regulations and Management Directive, increase consistency on disclosure processing DHS-wide, and greater departmental visibility. Additionally, continue to provide outreach and privacy training to DHS components.

In FY 2010, the Privacy Office activities will continue to carry out duties imposed by the Privacy Office by P.L. 110-53. The Office expects to provide seven annual reports to Congress in addition to the Annual Report to Congress, pursuant to Section 222 of the Homeland Security Act; quarterly reports to Congress and others on the status of privacy activities at the Department; five mandated Privacy Impact Assessments (PIA's); provide training in support of Fusion Centers for Intelligence and Analysis employees and support the efforts of Fusion Centers to provide training to state and local employees; provide privacy training for the Department's Office of the Inspector General staff; execute privacy investigations, as needed; and provide additional support for the Information Sharing Environment.

OSEM requests \$3.9 million for this activity. This request is an increase of \$0.2 million over FY 2009 Enacted. The \$0.2 million ATB increase is for pay increases and ongoing maintenance operations of critical IT infrastructure in the Working Capital fund.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Counternarcotics Enforcement (CNE) has two statutorily established (Title 6 U.S.C §458) primary missions that support the Nation's drug control program and the statutory mission of the Department of Homeland Security:

- To stop the entry of illegal drugs into the United States; and,
- To track and sever the connections between drug trafficking and terrorism.

The CNE coordinates policy and operations within DHS and between the Department and other Federal departments and agencies, and between the Department and State and local agencies with respect to stopping the entry of illegal drugs into the United States. It ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States. The CNE also works closely with DHS intelligence and law enforcement entities to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force construct.

Significant accomplishments in FY 2008 include:

- Spearheaded an Interagency Drug-Terror Nexus Project: CNE executed its statutory authority to track and sever connections between illegal drug trafficking and terrorism within the Federal Bureau of Investigation's (FBI) Joint Terrorism Task Force (JTTF) construct. CNE spearheaded an interagency assessment of the connections between illegal drug trafficking and terrorism – a project which has focused on how drug proceeds overlap into other criminal areas such as money laundering and bulk cash smuggling.
- Completed a Bulk Cash Smuggling Study: CNE developed a research project that focused on the fundamentals of U.S. currency movement within Mexico. Specifically, the study was designed to improve the Department's counterdrug law enforcement and intelligence components' baseline understanding of bulk currency smuggling related to transnational crime and drug trafficking.
- Initiated a Biennial Update to the National Southwest Border Counternarcotics Strategy and Implementation Plan: CNE and the Department of Justice's Office of the Deputy Attorney General (ODAG) were tasked by the International Drug Control Policy Coordinating Committee to serve as Executive Agents for completing a Congressionally-mandated update to the National Southwest Border Counternarcotics Strategy Implementation Plan. This update is critical, since narcotics smuggling in the Southwest Border region remains a significant security vulnerability that requires increased national-level attention and unity of effort.
- Strengthened Counterdrug Efforts with Mexico: CNE played a prominent role in U.S. efforts to increase bilateral and multilateral cooperation with the Government of Mexico on security issues, including those related to the smuggling of illegal drugs and bulk currency. CNE collaborated with the International Drug Control and the Mexico/Central America Policy Coordinating Committees to support U.S.-Mexico efforts to increase mutual counterdrug cooperation and support.
- Contributed to Southwest Border Violence Operations Plan: CNE contributed to the Secretary's Draft Department Guidance Statement (DGS), which directs the development of a DHS

Southwest Border Violence Operations Plan (OPLAN) that could be executed in the event there is a significant escalation in violence along the Southwest Border that exceeds the capabilities of the Department's assets in that region. CNE is now included in the list of Southwest Border Operations Planning Team (SWB OPT) participants and will be required to provide detailed staff to support the development, coordination and execution of this Plan.

FY 2009 planned accomplishments include:

- Expand Drug-Terror Nexus Collection Networks: CNE will work within the construct of the Law Enforcement Shared Mission Community in pulling together various law enforcement and intelligence entities at the Federal, state, tribal, and local levels. CNE will use the Homeland Security Information Network to solicit participation in improving collection plans, relative to drug-terror links, in an effort to promote a "shared approach" to mitigate this evolving threat.
- Lead DHS Efforts to Support the Merida Initiative: This is the President's proposed multi-year security cooperation program, which will provide Mexico and Central America with over \$1.4 billion in additional resources and training to combat the threats of drug trafficking, transnational crime, and terrorism in the Western Hemisphere.
- Improve the Department's Counternarcotics Operations: The CNE Director, who chairs the DHS Counternarcotics Coordinating Council, will use this venue to 1) consider and address counternarcotics issues affecting DHS; 2) address the adequacy of resources for narcotics interdiction efforts; 3) assist in the development, coordination, and implementation of counternarcotics strategies, policies, and doctrine; 4) assist in counternarcotics resource identification and allocation throughout DHS; and 5) identify and address areas where greater cooperation among DHS components can better achieve our national drug control objectives.
- Sustain DHS Counternarcotics Operations in the Eastern Pacific: In 2009, all DHS resources and personnel must withdraw from the Manta, Ecuador Forward Operating Location (FOL), which has served as a forward staging base for long-range maritime aerial surveillance flights into the Eastern Pacific. CNE will collaborate with the Departments of State and Defense, as well as with DHS components, to minimize the impact on the Department's forward deployed counternarcotics operations of this FOL closure.

FY 2010 goals include maintaining current services and executing the CNE Director's following seven congressionally-mandated responsibilities:

- Coordinate policy and operations within the Department, between the Department and other Federal departments and agencies, and between the Department and State and local agencies with respect to stopping the entry of illegal drugs into the United States,
- Ensure the adequacy of resources within the Department for stopping the entry of illegal drugs into the United States;
- Recommend the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States;
- Within the Joint Terrorism Task Force (JTTF) construct, track and sever connections between illegal drug trafficking and terrorism;
- Be a representative of the Department on all task forces, committees or other entities, whose purpose is to coordinate the counternarcotics enforcement activities of the Department and other Federal, State or local agencies;
- Annual Budget Report to Congress: Submit a review and evaluation of any request by the President for funds for the Department. This report shall 1) identify any request for funds that affects or may affect the counternarcotics activities of the Department; 2) describe with peculiarity how such requested funds would be or could be expended in furtherance of

- counternarcotics activities; and 3) compare such requests with requests for expenditures and amounts appropriated by Congress in the previous fiscal year;
- Annual Activity Report to Congress: Submit an annual review and evaluation of the Department’s counternarcotics activities for previous fiscal year. This report shall 1) describe the Department’s counternarcotics activities and the results of those activities; 2) state whether those activities were sufficient to meet the Department’s responsibility to stop the entry of illegal drugs into the United States; and 4) recommend, where appropriate, changes to those activities to improve the Department’s counternarcotics performance.

III. Current Services Program Description by PPA

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Secretary and Executive Management
 Program Performance Justification
 (Dollars in thousands)**

Transfers to and from Other Accounts \$2,395

Strategic Goal(s) & Objectives: 5.1

**Transfer from Various Components to Executive Leadership and Direction
 for Secretary’s and Deputy Secretary’s Travel\$395**

PPA Breakdown – Secretary’s Travel	FTE	Total (\$000)
Executive Leadership and Direction		
Immediate Office of the Secretary	0	\$395
		\$395

Currently, budgetary components pay a portion of the government aircraft cost for the component personnel who travel with the Secretary. It is not a fixed cost, but is based on the total cost of the flight divided by the number of passengers on a particular flight. Based on the bills from US Coast Guard (USCG), Federal Aviation Administration (FAA), and Military-Air (Mil-Air), components reimburse the Immediate Office of the Secretary via an Inter/Intra-Agency Agreement for its usage of the government aircraft. This process is an administrative burden for all components involved and is time consuming and inefficient.

Transferring funds from components to the Secretary’s office in the FY 2010 budget will allow the Immediate Office of the Secretary to cover all travel expenses on the government aircraft. This will eliminate the need for components to reimburse the Immediate Office of the Secretary for travel with the Secretary on government aircraft. This will be a much more efficient process.

**Transfer from Federal Emergency Management Agency to Stakeholder Relations
 for Office of Intergovernmental Programs\$2,000**

PPA Breakdown – Office of Intergovernmental Programs	FTE	Total (\$000)
Stakeholder Relations		
Office of Intergovernmental Programs	17	\$2,000
	17	\$2,000

The programs within Stakeholder Relations share a common goal: to communicate and coordinate with organizations external to DHS and the Federal government. The mission of Office of Intergovernmental Programs (IGP) is to act both as an advocate for the State, local, tribal and territorial officials within DHS and to operate as the primary liaison between those officials and the Secretary and senior DHS leadership.

IGP manages communications and coordinates activities across the spectrum of issues, initiatives, and programs confronting all 22 agencies and components of the Department. No other DHS entity is charged with this Department-wide function. It also includes coordination with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House, to provide for coordinated interaction with non-Federal government officials.

Increases **\$17,244**

Strategic Goal(s) & Objectives: 5.1

Annualization of Prior Year Funding.....\$5,453

PPA Breakdown - Annualization of Prior Year Funding	FTE	Total (\$000)
Office of Policy	9	1,643
Office of the General Counsel	10	2,550
Office for Civil Rights and Civil Liberties	5	730
Privacy Office	2	530
	26	5,453

Certain projects and programs for which resources were first provided in FY 2009 were funded for only part of the year. Additional funding and Full-Time Equivalents (FTE) are required to provide full year resources.

Annualization of FY 2009 Pay Raise.....\$666

PPA Breakdown - Annualization of FY 2009 Pay Raise	Total (\$000)

OSEM reimburses the Working Capital Fund (WCF), which is a fully reimbursable fund that finances a full range of administrative support services to DHS, for services provided. This centrally managed account provides department-wide functions such as finance, budget and accounting support, information technology, and personnel administration. Centralizing administrative support functions has enabled DHS to achieve economies of scale, reducing costs and increasing operational efficiencies, and has allowed DHS components to focus on and accomplish their goals. WCF allocates costs based on various algorithms, depending on the service provided. This request for additional funds is associated with operating costs in these WCF activities that are increasing more rapidly than the COLA. Request levels are based on estimates provided by the WCF, and determined by actual usage costs (including inflation). The \$1.1 million estimate reflects the \$642,000 increase provided by the WCF plus an estimated \$800,000 increase in WCF costs (based on average WCF costs/FTE) for the transfer in of the Office of Intergovernmental Programs into Stakeholder Relations.

Working Capital Fund Cost Increases \$5,808

PPA Breakdown – Working Capital Fund	Total (\$000)

Citizenship and Immigration Services Ombudsman	289
Privacy Office	318
Office of Counternarcotics Enforcement	104
	5,808

OSEM reimburses the Working Capital Fund (WCF), which is a fully reimbursable fund that finances a full range of administrative support services to DHS, for services provided. This centrally managed account provides department-wide functions such as finance, budget and accounting support, information technology, and personnel administration. Centralizing administrative support functions has enabled DHS to achieve economies of scale, reducing costs and increasing operational efficiencies, and has allowed DHS components to focus on and accomplish their goals. WCF allocates costs based on various algorithms, depending on the service provided. This request for additional funds is associated with operating costs in these WCF activities that are increasing more rapidly than the COLA. Request levels are based on estimates provided by the WCF, and determined by actual usage costs (including inflation). The \$5.8 million estimate reflects increase for equipment refresh of outdated hardware, and to fund ongoing maintenance and operations of critical IT infrastructure capabilities.

Fully Funding Base FTE\$2,617

PPA Breakdown – Fully Funding Base FTE	Total (\$000)
Executive Leadership and Direction	
Immediate Office of the Secretary	422
Immediate Office of the Deputy Secretary	22
Office of the Executive Secretary	250
Office of Legislative Affairs	1,355
Office for Civil Rights and Civil Liberties	568
	2,617

This request increases the base to fully fund the authorized base FTE level. Part of the reason why these activities cannot maintain FTE at the authorized level is that the base for personnel compensation and benefits (PC&B) was not sufficiently funded in prior years. To prevent the need for requesting

reprogramming funds in FY 2010 as a result of anticipated shortfall in PC&B costs, OSEM requests a base increase to fully fund base FTE to the authorized level.

Executive Leadership and Direction: FTE assigned to the offices within this activity directly support the Secretary. The majority are predominantly senior personnel who provide advice and counsel to the Secretary. Fully funding all FTE authorized in this activity will ensure that the Secretary has access to this counsel.

Office of Legislative Affairs: The Office of Legislative Affairs (OLA) performs a complex service that facilitates and contributes to the mission of DHS by: (1) Advising the Secretary and other DHS officials on all matters relating to DHS's interactions with Congress; (2) Serving as a Congressional liaison; and, (3) Responding to Congressional inquiries. As the focal point for interactions between DHS and Congress, OLA requires an adequate, professional staff that can assist OLA in providing DHS executives direction and coordination for all communications and relationships between the Department and Congress. Inadequately funding all FTE authorized in this activity will require a reduction in OLA staff and operations, adversely affect essential functions, quality of life in the workplace, and morale. OLA's ability to perform its role will be severely limited. The negative impact on the Secretary, Deputy Secretary, and senior leadership of the Department and their relations with Congress will have consequences across DHS.

Office for Civil Rights and Civil Liberties (CRCL): *The Implementing Recommendations of the 9/11 Commission Act of 2007* (Pub. L. 110-53) specifically authorizes CRCL to conduct civil liberties impact assessments. Within CRCL, the Programs Division is responsible for conducting civil liberties impact assessments. Due to the increased workload created by the 9-11 Act mandates, the Programs Division began shifting the workload of existing staff in FY 2008, and received five additional staff positions in the FY 2009 budget for creating the Civil Liberties Impact Assessment (CLIA) program. The CLIA program is designed to ensure DHS policies and procedures comply with Constitutional, statutory, regulatory, and other legal and policy requirements, and adhere to the DHS's statutory mission to ensure that civil liberties are not diminished by programs aimed at securing the homeland.

Fully funding FY 2010 base FTE would allow the CRCL Programs Division to continue the CLIA Program. This would provide the division the ability to conduct congressionally mandated and proactive civil liberties impact assessments, which provide the Department a vital tool for identifying and making recommendations about potential civil liberties concerns early in the life cycle of DHS programs, policies and procedure implementation. Departmental programs, policies and procedures can potentially impact the rights and liberties of U.S. persons and must continue to receive the specialized review of CRCL through its CLIA Program.

IV. Program Justification of Changes

**Department of Homeland Security
 Departmental Management and Operations
 Office of Secretary and Executive Management
 Justification of Program Changes
 (Dollars in Thousands)**

Program Increase 1: Office of Policy

Strategic Goal(s) & Objective(s): Continually improve the manner in which we do our business.

PPA Breakdown	Positions	FTE	Total (\$000)
Office of Policy			
Integrated Requirements Process (IRP) Division	10	5	\$5,000
Intermodal Security Coordination Office	15	8	\$10,000
	25	13	\$15,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							202	185	\$46,564
Program Increase							25	13	15,000
Budget Request	174	174	\$34,380	194	182	\$43,263	227	198	\$61,564

Description of Item

The Office of Policy requests 227 positions, 198 FTE, and \$61,564,000 for FY 2010. This request is an increase of 33 positions, 26 FTE, and \$18,301,000 over the FY 2009 Enacted of 194 positions, 182 FTE and \$43,263,000. The total adjustment to base reduces the Office of Policy by 8 positions, 13 FTE, and \$3,301,000, as described in the Current Services section of this request (See page OSEM-11). Program increases include 25 positions, 13 FTE, and \$15,000,000 for the following:

- **Integrated Resource Process** will be the proposed mechanism to accomplish the FY 2010-FY 2014 Integrated Planning Guidance (IPG) of identifying capabilities needed across components to accomplish the department’s strategic objectives and common requirements from those capabilities. (10 positions, 5 FTE, \$5,000,000)
- **Intermodal Security Coordination Office** within DHS Policy will support integrated planning between DHS and the Department of Transportation in the area of maritime transportation, as well as in other homeland security mission areas. The Intermodal Security Coordination Office will develop a strategic plan and metrics to guide development and modernization of intermodal freight infrastructure that links coastal and inland ports to highways and rail networks; an assessment of intermodal freight infrastructure needs and capability gaps; and recommendations to address the needs and capability gaps. The recommendations to address intermodal freight infrastructure needs and capability gaps will be incorporated into DHS’ 5-year programming and budgeting guidance, and tracked to ensure they are achieved (15 positions, 8 FTE, \$10,000,000)

Justification

- **Integrated Resource Program** – Since its inception in 2003, the Department of Homeland Security has operated without an effective requirements process to highlight capability shortfalls and redundancies – crucial information when planning future activities and deciding between subsequent resource allocation alternatives. The DHS Integrated Requirements Process (IRP) will establish tangible Department-wide targets and goals to help integrate DHS components' efforts and ensure that the Department fulfills its homeland security mission. The IRP is designed to integrate the Department's resource allocation and investment processes and ensure that both of these processes address the most critical homeland security needs or capability gaps.
- **Intermodal Security Coordination Office** - The Intermodal Security Coordination Office (ISCO) within DHS Policy will support integrated planning between DHS and DoT in the area of maritime transportation, as well as in other homeland security mission areas. The first deliverables for this office in FY 2010 will be as follows: 1) A strategic plan and strategic metrics to guide development and modernization of intermodal freight infrastructure linking coastal and inland ports to highways and rail networks; 2) Intermodal freight infrastructure needs and capability gaps; and, 3) Recommendations to address the needs and capability gaps. The recommendations to address intermodal freight infrastructure needs and capability gaps will be incorporated into DHS's 5-year programming and budgeting guidance as appropriate, and tracked to ensure they are achieved. Similar recommendations for DoT will also be provided to DoT for disposition within their programming and budgeting process. In following FYs, the ISCO will continue to coordinate the modernization of freight infrastructure, as well as developing strategic plans and metrics and identifying capability gaps for other areas within the Security functional area, e.g. the security of critical infrastructure and key resources.

Impact on Performance

- **Integrated Resource Plan** - will directly address the FY 2010-FY 2014 IPG goal to “lead cross- Departmental efforts to identify and define capabilities and requirements for our key mission areas and priorities.” This process will help DHS achieve its priorities and strategic objectives by developing well-justified, properly reviewed and researched, and measurable strategic requirements linked to DHS strategic objectives. These strategic requirements will provide the needed foundation for program outcome measures, goals and performance levels. Without this new process, DHS will continue to lack such strategic requirements and the Department's lower-level program measures will continue to lack concrete and defensible ties to DHS strategic objectives.
- **Intermodal Security Coordination Office** - will directly address the following objectives of the DHS Strategic Plan for FY 2008-2013: 3.4 Protect Transportation Sectors, 3.1 Protect and Strengthen the Resilience of the Nation's Critical Infrastructure and Key Resources. Beginning with maritime and intermodal transportation, the office will identify critical needs and capability gaps at the interagency level, and provide programming and budgeting recommendations to address those gaps for both DHS and DoT. This office will leverage the resources of the two departments and allow for a dedicated and sustained interagency effort to perform this important function.

Program Increase 2: Civil Rights and Civil Liberties

Strategic Goal(s) & Objective(s): Continually improve the manner in which we conduct our business

PPA Breakdown		Positions	FTE	Total (\$000)
Office for Civil Rights and Civil Liberties				
Staffing Increases		28	14	\$2,297
		28	14	\$2,297

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							85	85	\$19,807
Program Increase							28	14	2,297
Budget Request	75	47	\$14,597	85	80	\$17,417	113	99	\$22,104

Description of Item

The Office for Civil Rights and Civil Liberties requests 113 positions, 99 FTE, and \$22,104,000 for FY 2010. This request is 28 positions, 19 FTE, and \$4,687,000 over the FY 2009 Enacted of 85 positions, 80 FTE, and \$17,417,000. The total adjustment to base is 5 FTE and \$2,390,000. The program increase includes 28 positions, 14 FTE, and \$2,297,000 for additional personnel.

Justification

- EEO Programs – The request provides additional positions for the Department’s EEO Program to expand efforts to eliminate real and perceived barriers that impede free and open competition in the workplace. There are functional integration initiatives directed in Delegation 19002, Delegation to the Officer for Civil Rights and Civil Liberties to integrate and manage Civil Rights, Civil Liberties and Equal Employment Opportunity Programs dated February 4, 2008. The overall business premise is to reduce redundancies and “touch points” where errors and processing inefficiencies occur, yielding lower overall maintenance fees and/or cost avoidance. Functional integration will reduce the number of “moving parts,” thus reducing the cost of overall ownership. CRCL receives an average of 90 new cases each month from DHS components, Equal Employment Opportunity Commission (EEOC) Administrative Judges, and the EEOC Office of Federal Operations. With a backlog of 385 cases these FTE’s will reduce the backlog of all the department’s EEO cases and address new and ongoing cases. (9 positions, 4 FTE, and \$712,000)
- CRCL Programs – The CRCL Programs section is tasked with reviewing operations of State and local fusion centers and establishing guidelines for civil liberties policies. The Office requests 3 additional positions, 2 FTE and \$268,000 to fulfill various responsibilities mandated in the Recommendations of the 9/11 Commission Act of 2007, Public Law 110-53: Specific language from the Public Law is as follows:

Department of Homeland Security State, Local, and Regional Fusion Center Initiative, Sec. 511(a). Assist the Secretary in appropriately considering privacy and civil liberties concerns when such officials are proposing, developing, or implementing laws, regulations, policies, procedures, or guidelines related to effort to protect the Nation against terrorism. *Privacy and Civil Liberties Officers, Sec. 803(a).* Periodically investigate and review department policies, procedures, guidelines, and related laws and their implementation to ensure the department is adequately considering privacy and civil liberties in its actions. *Privacy and Civil Liberties Officers, Sec. 803(a).* Assess the impact or likely impact of the implementation of a data mining activity on the civil

liberties of individuals. *Federal Agency Data Mining Reporting, Sec. 804(c)(2)(E)*. (3 positions, 2 FTE, and \$268,000)

- CRCL Training – Further, P.L.110-53, mandates that the Office for Civil Rights and Civil Liberties develop and administer several training programs. Specifically, the Act requires CRCL to: Provide privacy and civil liberties training all officers, intelligence analysts, and private sector representatives in State, local, regional, and tribal Fusion Centers. The Office requests 2 positions, 1 FTE and \$138,000 to fulfill these responsibilities. The specific language is provided below:

Department of Homeland Security State, Local, and Regional Fusion Center Initiative, Sec. 511(a). Provide privacy and civil liberties training for all Information Sharing Fellows. *Homeland Security Information Sharing Fellows Program, Sec.512(a)*. Civil rights and civil liberties requires training for local law enforcement agencies and other emergency response providers in rural areas as part of the Rural Policing Institute. *Rural Policing Institute, Sec. 513(a)* Provide privacy and civil liberties training for all detailees of the Interagency Threat Assessment and Coordination Group. *Interagency Threat Assessment and Coordination Group, Sec. 521(a)*. To fulfill these responsibilities the Office requests (2 positions, 1 FTE, and \$138,000)

- Review and Compliance Unit – The Review and Compliance Unit (RCU) is responsible for responding in a timely manner to emerging issues and complaints. The RCU carries out the congressionally mandated function of investigating complaints from the public alleging civil rights and civil liberties abuses by the Department. Recommendations made as result of CRCL investigations serve to address and rectify issues that have the potential to distract from homeland security priorities. (6 positions, 3 FTE, and \$519,000)
- CRCL Program management section is tasked with providing DHS senior leadership with advice on issues at the intersection of homeland security and civil rights and civil liberties. CRCL fulfills this role through its Programs Division, which reviews and helps to shape DHS programs, policies, reports, regulations, and other activities. CRCL’s work spans a wide variety of issues, from disability and immigration policy to community engagement and information sharing. This staffing structure will more fully support management of The Office for Civil Rights and Civil Liberties. (8 positions, 4 FTE, and \$660,000)

Impact on Performance

- On August 3, 2007, President Bush signed Implementing Recommendations of the 9/11 Commission Act of 2007, P. L. 110-53. The Act has a substantial impact on the responsibilities and reporting requirements of the Office for Civil Rights and Civil Liberties. The additional resources will allow the Office for Civil Rights and Civil Liberties to respond more quickly to issues of national interest could adversely affect the confidence placed in the Office by the public including non-governmental organizations that monitor the protection of civil rights and civil liberties in the United States. Additionally, the Department’s EEO Program expansion will reduce real and perceived barriers that impede free and open competition in the workplace. The functional integration initiatives directed in Delegation 19002, Delegation to the Officer for Civil Rights and Civil Liberties to integrate and manage Civil Rights, Civil Liberties and Equal Employment Opportunity Programs dated February 4, 2008. The provided funding for the directed initiative for the department’s consolidation of EEO programs through functional integration will help achieve the initiative programs cost savings.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Departmental Management and Operations
Justification of Proposed Changes in Appropriation Name
Appropriation Language**

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, [\$123,456,000]**\$160,760,000**: *Provided*, That not to exceed \$60,000 shall be for official reception and representation expenses, of which \$20,000 shall be made available to the Office of Policy solely to host Visa Waiver Program negotiations in Washington, DC.

Explanation of Changes:

Not applicable.

Explanation of Increase/Decrease.

Office of Policy: In FY 2008 the Office of Policy initiated the DHS Fellows Program. The entire program included 29 Fellows, with just under half of those funded by other DHS components. The large increase from 2008 to 2009 for Policy is due to the fact that Fellows begin their program approximately mid-year, and continue for a full year in the following FY. Additionally, FY 09 includes an estimate for a new Fellows class, but at about half the total amount of the original class. FY 2010 estimates a full year for the smaller FY 2009 class and a half year for the 2010 class.

Note: FY 2008 Actuals and FY 2009 Estimates are updated from the President's Budget Submission.

PPA Mission Statement

Executive Leadership and Direction consolidates the Immediate Office of the Secretary, the Immediate Office of the Deputy Secretary, the Office of the Chief of Staff, and the Office of the Executive Secretary into a single PPA. These four PPAs are consolidated because they jointly provide executive direction and directly support the Secretary.

The Office of the Secretary provides central leadership, management, and direction for the entire Department of Homeland Security. This Office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of DHS to the President, to Congress, and to the general public.

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Department. This Office focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new Department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

The mission of the Office of the Executive Secretary is to establish effective and proficient protocols in the processing of all internal communication, decision management, briefings, liaison activity between the Department and its components, and external correspondence for the Immediate Office of the Secretary and all directorates.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$6,662	\$9,220	\$10,566	\$1,346

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2010 request includes funding for the proposed pay raise (currently predicted at 2%), benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the full funding of base FTE that were underfunded in prior years. Executive Leadership and Direction's authorized FTE level remains at 85 FTE in FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$1,593	\$1,333	\$2,246	\$913

Requested funds cover the travel costs of Executive Leadership and Direction's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects increases for from various component for the Secretary's Travel, and a adjustment to base for the Office of the Deputy Secretary's travel.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$1,133	\$1,023	\$967	(\$56)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request reflects a decrease as a result of updates to the occupancy agreements. GSA Rent is paid centrally by Working Capital Fund (WCF); Executive Leadership and Direction fully reimburses the WCF its share of the GSA Rent based on the estimated FY 2010 assessment provided by the WCF activity.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charge	\$66	\$151	\$151	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request has no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$29	\$58	\$58	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request has no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$416	\$884	\$884	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request has no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$197	\$222	\$222	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request has no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$958	\$1,563	\$2,489	\$926

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2010 request reflects a increase which is the result of increases IT related activities within the WCF and a realignment of funds from this object class to travel to cover the transfer of funds from the Office of the Chief of Staff to the Immediate Office of the Secretary for the Secretary's travel.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Medical Care	\$4	\$8	\$8	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$294	\$203	\$203	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request has no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Equipment	\$86	\$16	\$16	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request has no change.

Total, Executive Leadership and Direction		\$0	\$0	\$2,800	\$2,800
Full Time Equivalents		---	---	17	17

PPA Mission Statement

The offices within Stakeholder Relations have programs that share a common goal: to communicate and coordinate with organizations external to DHS and the Federal government.

The mission of the Office for State and Local Law Enforcement (SLLE) is: 1) to lead the coordination of Department-wide policies relating to the role of State and local law enforcement, and 2) to serve as a liaison between State, local, and tribal law enforcement agencies and the Department. In accordance with this mission, SLLE provides a central point of contact within DHS for communication and coordination of law enforcement policies and issues, especially as they relate to grant programs and terrorism prevention efforts.

The Private Sector Coordination Office (PSO) is charged with providing America's private sector with a direct line of communication to the Department. PSO works directly with individual businesses and through trade associations and other non-governmental organizations to foster dialogue between the private sector and DHS. PSO functions include: advising the Secretary on the impact of DHS policies, regulations, processes, and actions on the private sector and promoting public-private partnerships to address homeland security challenges.

The mission of the Office of Intergovernmental Programs (IGP) is to act as an advocate for the State, local, tribal and territorial officials within DHS and to operate as the primary liaison between those officials and the Secretary and senior DHS leadership. IGP facilitates an integrated national approach to homeland security across a broad spectrum of issues confronting DHS by ensuring, coordinating, and advancing Federal interaction with State, local, tribal, and territorial governments.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$0	\$0	\$2,000	\$2,000

Salaries and Benefits fund for compensation directly related to duties performed for OPA by Federal civilian employees. The FY 2010 request reflects the transfers of personnel compensation, benefits, and other mandatory personnel entitlements for the Office of Intergovernmental Programs from FEMA. Stakeholder Relations' authorized FTE level increases from 0 FTE to 38 FTE in FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$0	\$0	\$30	\$30

Requested funds cover the travel costs of Stakeholder Relations' Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects increases for transfers of the Office of Intergovernmental Programs from FEMA.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$0	\$0	\$34	\$34

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request reflects increases for transfers of the Office of Policy and the transfer of the Office of Intergovernmental Programs from FEMA.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$0	\$0	\$736	\$736

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2010 request reflects increases for transfers of Office of Intergovernmental Programs.

PPA Mission Statement

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning, which will ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and it strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges multiple, headquarter components and operating agencies will improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It will also create a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

The Policy Directorate brings together the Office of International Affairs, Homeland Security Advisory Council, Office of Immigration Statistics, and expands the Border and Transportation Security Police Office to include all aspects of the Department. It also creates a Strategic Planning Office.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$22,666	\$22,365	\$33,296	\$10,931

Salaries and Benefits fund for compensation directly related to duties performed for the Office of Policy by Federal civilian employees. The FY 2010 request includes funding for the proposed pay raise (currently predicted at 2%), benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the annualization of FTE introduced in FY 2009, as well as new personnel for the Office of Policy's IRP Division, and PSCO. All associated FTE and resources are transferred as well. This request has a net effect of increasing the Office of Policy's authorized FTE level from 185 FTE to 190 FTE in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$1,701	\$1,682	\$1,640	(\$42)

Requested funds cover the travel costs of the Office of Policy's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects a decrease associated with transfers to Executive Leadership and Direction for the Secretary's Travel.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$81	\$91	\$91	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of furniture and other household goods associated with permanent change of station moves. The FY 2010 request reflects no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$654	\$2,391	\$2,970	\$579

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2010. GSA Rent is paid centrally by Working Capital Fund (WCF); the Office of Policy fully reimburses the WCF its share of the GSA Rent based on the estimated FY 2010 assessment provided by the WCF activity.

	Actual	Enacted	Request	Change
Other Rent	\$87	\$26	\$26	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request has no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous char	\$9	\$4	\$177	\$173

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request reflects a increase due to program increases..

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$20	\$100	\$115	\$15

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request reflects an increase related to program increases

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$3,614	\$5,390	\$9,918	\$4,528

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes an increase for program increases for the Office of Policy's IRP Division and PSCO

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$836	\$1,505	\$1,571	\$66

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes increases for non-pay inflation, and program increases.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$3,135	\$9,009	\$10,501	\$1,492

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2010 request reflects a net increase that includes increases for program increases and non-pay inflation Offset by a decrease in activities within the WCF

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & maintenance of facilities	\$41	\$0	\$40	\$40

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$20	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$244	\$288	\$421	\$133

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request reflects a net decrease that includes an increase for program increases for the IRP Division and PSCP.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$151	\$412	\$798	\$386

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request reflects increases for program increases associated with the IRP Division and PSCO.

PPA Mission Statement

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. The Department's organizational identity, including the Homeland Security seal and wordmark, was designed and implemented by the Office of Public Affairs. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with state, local, and international partners to ensure accuracy and timely information to the public during a crisis.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$4,114	\$4,234	\$4,341	\$107

Salaries and Benefits fund for compensation directly related to duties performed for OPA by Federal civilian employees. The FY 2010 request includes funding for the proposed pay raise (currently predicted at 2%), benefits, and other mandatory personnel entitlements and program increases. OPA's authorized FTE level remains at 43 FTE in FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$266	\$400	\$167	(\$233)

Requested funds cover the travel costs of OPA's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects an decrease in travel cost due to transfer of \$233K to Secretary's office.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$280	\$648	\$753	\$105

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2010. GSA Rent is paid centrally by Working Capital Fund (WCF); OPA fully reimburses the WCF its share of the GSA Rent based on the estimated FY 2010 assessment provided by the WCF activity.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$3	\$3	\$3	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$2,209	\$28	\$28	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request reflects no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$94	\$0	\$0	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as contracts related to the Ready Campaign. The FY 2010 request reflects no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$469	\$643	\$1,212	\$569

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2010 request reflects an increase resulting increases to IT related activities within the WCF.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$5	\$5	\$5	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$85	\$10	\$10	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$91	\$20	\$20	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request has no change.

PPA Mission Statement

The Office of Legislative Affairs (OLA) is responsible for the development and advancement of the Department's legislative agenda. This includes the establishment and maintenance of constructive congressional relations, the development of Departmental protocols for interaction with Congress and contributing to the distribution and communication of the Department's strategic message.

Specifically, OLA coordinates and develops material for congressional hearings to include creating briefing books and editing written testimony. OLA assists with witness preparation of oral testimony, including coordinating and scheduling policy and subject-focused pre-briefing prior to the hearing date. They also coordinate and manage legislative briefings in advance of a hearing. The briefings provide the policy landscape, possible questions and answers, information on other witnesses, and other last minute insights. Additionally, OLA staff coordinates and tracks deliverables which result from hearings, including questions for the record. Further, OLA is responsible for all congressional mail sent to the DHS. This involves recording and tracking correspondence, assigning due dates, ensuring letters are answered in a timely manner and proofing and editing all correspondence for the Assistant Secretary's signature.

OLA interacts with each directorate to monitor and manage the volume of correspondence to facilitate and expedite responses on high profile topics when needed. DHS has an Enterprise Correspondence Tracking (ECT) System in place to assist with providing a consistent and timely response to these requests for information. This computer-based system will streamline the correspondence process and gain insight into topics where consistent answers are critical. OLA will be heavily involved in this initiative to better track and respond to requests for information. Funding also supports OLA's preparation of Departmental witnesses to appear before congressional hearings. With over 80 congressional committees and subcommittees claiming jurisdiction over some portion of the DHS, the volume of congressional hearings has been extremely high since the creation of DHS. Numerous positions in DHS also require Senate confirmation, which includes additional paperwork, pre- and post-hearings questions, staff level interviews, and a hearing before at least one Committee of Jurisdiction.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$4,188	\$3,300	\$4,819	\$1,519

Salaries and Benefits fund for compensation directly related to duties performed for OLA by Federal civilian employees. The FY 2010 request includes funding for the proposed pay raise (currently predicted at 2%), benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the full funding of base FTE that were underfunded in prior years. These increases are offset slightly by the transfer of the Congressional Actions Section functions, 1 FTE, and associated resources to Executive Leadership and Direction. This request has a net effect of decreasing OLA's authorized FTE level from 48 FTE to 47 FTE in FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$204	\$200	\$181	(\$19)

Requested funds cover the travel costs of OLA's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects an increase from inflation.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$3	\$0	\$0	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of furniture and other household goods associated with permanent change of station moves. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$0	\$466	\$448	(\$18)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request reflects a decrease as a result of updates to the occupancy agreements. GSA Rent is paid centrally by Working Capital Fund (WCF); OLA fully reimburses the WCF its share of the GSA Rent based on the estimated FY 2010 assessment provided by the WCF activity.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Rent	\$14	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$1	\$1	\$1	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$48	\$4	\$4	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$193	\$29	\$29	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$469	\$927	\$1,545	\$618

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2010 request includes an increase for activities within the WCF.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Medical Care	\$6	\$6	\$6	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$70	\$46	\$46	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request reflects no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Equipment	\$5	\$18	\$18	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request reflects no change.

PPA Mission Statement

The Office of the General Counsel (OGC) provides legal counsel for all DHS offices (except those specifically excluded by regulation or directive), determines the Department's position in order to provide effective legal services dealing with claims, with protests, with litigation, and with alternative dispute resolution, and represents the Department in all legal forums.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$11,371	\$14,694	\$17,582	\$2,888

Salaries and Benefits fund for compensation directly related to duties performed for OGC by Federal civilian employees. The FY 2010 request includes funding for 2% pay raise, benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the annualization of 10 FTE introduced in FY 2009. These increases are offset slightly by the transfer of the Congressional Actions Section functions, 3 FTE, and associated resources to Executive Leadership and Direction. This request has a net effect of increasing OGC's authorized FTE level from 91 FTE to 98 FTE in FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$203	\$250	\$250	\$0

PPA Mission Statement

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall:

“Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.”

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$6,343	\$10,772	\$14,090	\$3,318

Salaries and Benefits fund for compensation directly related to duties performed for CRCL by Federal civilian employees. The FY 2010 request includes funding for a 2% pay raise, benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the annualization of FTE introduced in FY 2009, fully funding base FTE that were underfunded in prior years, as well as new personnel for CRCL's EEO Programs, CRCL Programs, CRCL Training, Review and Compliance Unit, and Review and Compliance Headquarters Program Management. This request increases CRCL's authorized FTE level from 85 FTE to 99 FTE in FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$228	\$215	\$271	\$56

Requested funds cover the travel costs of CRCL's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects increases from inflation and the number of personnel required to support CRCL's EEO Programs, CRCL Programs, CRCL Training, Review and Compliance Unit, and Review and Compliance Headquarters Program Management.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$624	\$1,837	\$2,052	\$215

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2010. GSA Rent is paid centrally by Working Capital Fund (WCF); CRCL fully reimburses the WCF its share of the GSA Rent based on the estimated FY 2010 assessment provided by the WCF activity.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Rent	\$17	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Communication, Utilities, and miscellaneous charges \$0 \$5 \$5 \$0
 Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Printing \$6 \$37 \$37 \$0
 Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request reflects no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Advisory and Assistance Services \$2,299 \$1,494 \$1,494 \$0
 Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request reflects no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Other Services \$1,195 \$1,268 \$1,356 \$88
 Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes increases for program increases.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Purchase from Government Accounts \$3,100 \$1,517 \$2,409 \$892
 Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2010 request includes an increase for activities within the WCF, anticipated contractual increases associated with program increases..

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Medical Care \$1 \$0 \$0 \$0
 Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Operation & Maintenance of equipment \$43 \$0 \$0 \$0
 Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Subsistence & Support of Persons \$0 \$0 \$0 \$0
 Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Supplies & materials \$185 \$106 \$134 \$28
 Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request reflects increases for program increases.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Equipment \$162 \$166 \$256 \$90
 Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request reflects increases for program increases.

PPA Mission Statement

The mission of the Citizenship and Immigration Services Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Services, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

CISOMB's goals include: (1) The reduction of backlog of immigration benefits, as these backlogs are both the source of numerous opportunities for fraud and resulting threats to national security, as well as a frustration to the immigration customer; (2) the enhancement of customer services to promote the flow of commerce, increase economic activity and promote family unity; and, (3) the streamlining of the immigration process to improve efficiencies, so that USCIS resources can be effectively utilized.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$2,138	\$3,277	\$3,359	\$82
Salaries and Benefits fund for compensation directly related to duties performed for the CISOMB by Federal civilian employees. The FY 2010 request includes funding for the proposed 2% pay raise, benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through an increase in FTE as a result of a reduction in reliance on contractors. This request increases CISOMB's authorized FTE level from 30 FTE to 36 FTE in FY 2010.				

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$126	\$85	\$85	\$0
Requested funds cover the travel costs of CISOMB's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2010 request reflects no change.				

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$38	\$56	\$56	\$0
Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of furniture and other household goods associated with permanent change of station moves. The FY 2010 request includes an increase for non-pay inflation.				

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$106	\$339	\$327	(\$12)
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request reflects a decrease as a result of updates to the occupancy agreements. GSA Rent is paid centrally by Working Capital Fund (WCF); CISOMB fully reimburses the WCF its share of the GSA Rent based on the estimated FY 2010 assessment provided by the WCF activity.				

	2008	2009	2010	2009 to 2010

PPA Mission Statement

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens.

Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider – and the framework for considering – the privacy impact of their technology decisions.

The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$2,507	\$5,045	\$5,686	\$641

Salaries and Benefits fund for compensation directly related to duties performed for the Office of Privacy by Federal civilian employees. The FY 2010 request includes funding for a 2% pay raise, benefits, and other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the annualization of FTE introduced in FY 2009, as well as new personnel for Privacy's FOIA, International Policy and Outreach, Investigations, Review and Analysis, and Training programs. This request increases Privacy's authorized FTE level from 36 FTE to 44 FTE in FY 2010.

A. Mission and Description of the Office of the Secretary and Executive Management

The Office of the Secretary and Executive Management (OSEM) supports the Department of Homeland Security (DHS) and all of its components by bolstering core management and policy and by facilitating operational integration. This enables the Department to prevent and deter terrorist attacks, protect against and respond to threats and hazards to our nation, ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce. OSEM establishes and implements policy, obtains resources, and provides oversight to all entities within the Department to meet these missions. It is the responsibility of the OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

B. Major Activities and Key Strategic Issues

OSEM includes 12 separate offices that individually report to the Secretary. These offices include: the Immediate Office of the Secretary; the Office of the Deputy Secretary; the Office of the Chief of Staff; the Office of Policy; the Office of the Executive Secretary; the Office of Public Affairs; the Office of Legislative Affairs; the Office of the General Counsel; the Office for Civil Rights and Civil Liberties; the Office of Citizenship and Immigration Ombudsman; the Privacy Office, and the Office of Counternarcotics Enforcement.

Immediate Office of the Secretary: The Office of the Secretary is requesting \$5,061,000 (12 FTE) in FY 2010 to continue to provide leadership, management and direction, and oversight for all of the Department's components. The Secretary serves as the top representative of the Department of Homeland Security to the President, to the Congress, and to the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department by focusing on internal management and direction. This role ensures that the Department will operate efficiently and effectively when carrying out its mission. In FY 2010, the Office is requesting \$1,810,000 (6 FTE) to continue to provide internal oversight to all Department operations, allowing the Secretary to focus his attention on more external matters concerning the Department of Homeland Security.

Chief of Staff: The Chief of Staff is responsible for the coordination of all Department agencies, directorates, and offices. This office is responsible for the budget, information technology, and personnel functions, as well as COOP (Continuity of Operations), as they relate to the Immediate Office of the Secretary. In FY 2010, the Office is requesting \$2,595,000 (12 FTE) to continue to streamline, coordinate, and deliver initiatives and policies that will ensure our safety, response capacity, and our freedoms.

Office of Policy: The Office of Policy is responsible for the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. The Office includes the Screening Coordination Office, which works to improve DHS screening operations. In FY 2010, the Office of Policy is requesting \$61,564,000 (208 FTE) to continue its efforts, which strengthen the Department's ability to maintain policy and operational readiness necessary to protect the Homeland by providing a centralized

coordination point for developing and communicating policies across the multiple internal and external components of the Homeland Security network. The Office of Policy also interacts with other government entities, international counterparts, academics and private stakeholders.

Office of Executive Secretary: The Office of the Executive Secretary's mission is to support the Office of the Secretary in the Homeland Security mission of leading a unified national effort to secure America. Through the accurate and timely dissemination of information and written communications throughout DHS and with homeland security partners, the Executive Secretary supports all of DHS' strategic goals. In FY 2010, the Executive Secretary is requesting \$8,344,000 (55 FTE) to continue to assist the Office of the Secretary by developing, implementing, and managing business processes for written communications, briefing book materials for the Secretary and Deputy Secretary, and all White House and interagency actions. The funding requested will enable the Office to meet the Department's increasing requirements and facilitate communications among all the DHS components, thereby encouraging a unified national effort to secure America.

Office of Public Affairs: The Office of Public Affairs is responsible for oversight and management of all external and internal communications for the Department of Homeland Security. On a daily basis, the Office responds to national media inquiries, maintains and updates the Department's website, writes speeches for principals, and coordinates speaking events for Department officials across the country. Public Affairs also develops and manages various public education programs including the Ready Campaign to increase citizen preparedness. In FY 2010, the Office of Public Affairs is requesting \$6,539,000 (43 FTE) to continue to: foster strategic communication throughout the department and with external stakeholders; manage the Department's organizational identity program, which includes usage of the DHS seal and related guidelines; oversee the Department's employee communication activities; and guide overall Federal incident communication activity and coordinate with state, local, and international partners to ensure accurate and timely information to the public during a crisis

Office of Legislative Affairs: The Office of Legislative Affairs serves as the primary liaison to members of Congress and their staffs, the White House and Executive Branch, and to other Federal agencies and governmental entities that have roles in assuring national security. The Office responds to inquiries from Congress and the White House; notifies Congress about Department initiatives, policies, and programs; and keeps other governmental bodies informed concerning Homeland Security measures that affect their operations and Department actions in jointly undertaken security endeavors. In FY 2010, the Office of Legislative Affairs is requesting \$7,097,000 (36 FTE) to continue to provide timely information about Homeland Security and national security issues to members of Congress, the White House and Executive Branch, and to other Federal agencies and governmental entities. The Office will also continue to precipitate legislative support for the Departmental programs, policies and initiatives that promote a more secure nation.

Office of the General Counsel: The Office of the General Counsel is responsible for ensuring the implementation of the Department's statutory responsibilities and policies as set forth by the Administration, the Secretary, and all officials within the Department. The Office also provides legal counsel for all Departmental offices (other than those specifically excluded by regulation or directive), determines the Department's position to provide effective legal services involving

claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums. In FY 2010, General Counsel is requesting \$24,028,000 (101 FTE) to continue to: serve as chief legal advisor to the Secretary and as chief legal officer for the Department; ensure that the Department's efforts to secure the Nation are consistent with civil rights and liberties of all citizen; integrate approximately 1,700 lawyers into an effective, client-oriented, full-service legal team; assist in policy and operational initiative planning; coordinate with Homeland Security Council and counterparts throughout the Executive Branch; and communicate and coordinate with each component of DHS on legal matters that affect the DHS mission.

Office for Civil Rights and Civil Liberties: The Office for Civil Rights and Civil Liberties is responsible for protecting civil rights and civil liberties, providing policy advice to Departmental leadership on civil rights and civil liberties issues, and serving as an information and communication channel to the public on these issues. The Office is also responsible for overseeing the Departmental Equal Employment Opportunity (EEO) programs, and in FY 2007, it implemented a more effective processing mechanism for EEO complaints. In FY 2008, the Office continued engagement with American Arab, Muslim, Sikh, South Asian, and other ethnic and religious communities. The Office also plans to implement new training products. In FY 2010, Civil Rights and Civil Liberties is requesting \$22,104,000 (99 FTE) to fund increased staffing needs.

Citizenship and Immigration Services Ombudsman: The Citizenship and Immigration Services Ombudsman assists individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), identifies individual and employee problems areas within USCIS, and proposes changes to mitigate identified problems. In FY 2008, the Office completed the fourth Annual Report to Congress, which addressed 15 pervasive and serious problems and included 25 recommendations for change. In FY 2008, the Ombudsman gathered information and feedback from USCIS customers and stakeholders in an effort to improve the process for resolving problems individuals and employers face with USCIS. In FY 2010, the Office is requesting \$6,935,000 (36 FTE) to continue to initiate and expand activities to promote interagency cooperation and holistic approaches to immigration. With this in mind, Ombudsman plans to establish a Virtual Ombudsman's Office to provide for online case problem submission, improved analysis and reporting capabilities, and an electronic interface with customers and stakeholders as another avenue to share concerns and solutions.

Privacy Officer: The DHS Privacy Officer is the first statutorily mandated Privacy Officer within the Federal government. The Office ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect the individual rights, liberties, and information interests of U.S. citizens. The Privacy Office has oversight of all privacy policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs, as specified in the E-Government Act of 2002 and Section 222 of the Homeland Security Act. In FY 2010, the Privacy Office is requesting \$7,971,000 (36 FTE) to continue to protect the collection, use, and disclosure of personally identifiable information (PII) and Departmental information.

Office of Counternarcotics Enforcement: The Office of Counternarcotics Enforcement coordinates policy within the Department, and with other Federal, state, and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department fulfill its responsibilities to stop the entry of illegal drugs into the United States. In FY 2007, Counternarcotics Enforcement worked with other components in the Department to develop a comprehensive package of policy initiatives, including the Southwest Border Counternarcotics Strategy, a Northern Border and Maritime border strategy, and an international bulk cash smuggling report. In FY 2008, the Office continued the Drug-Terror Nexus Project by reaching out to intelligence agencies and operators to ensure the rapid gathering and dissemination of intelligence. In FY 2010, Counternarcotics Enforcement is requesting \$3,912,000 (17 FTE) to continue to expand outreach to the counterdrug law enforcement community and facilitate information sharing through departmental and inter-agency working groups. The Office will also work to increase involvement in counterdrug issues related to Afghanistan and Southwest Asia. Additionally, Counternarcotics Enforcement will continue to be involved in the performance measurement system of DHS counterdrug agencies.

C. Resources Requested and Performance Impact

The Department is requesting for the OSEM a total of \$160,760,000 for 708 positions and 678 FTE in FY 2010, representing an increase of 84 positions, 80 FTE, and \$37,304,000, over the FY 2009 Enacted budget of \$123,456,000. The FY 2010 request includes adjustments to base of \$20,007,000 and program increases of \$17,297,000.

Program increases include:

- 25 positions, 13 FTE and \$15,000,000 for the Office of Policy;
- 28 positions, 14 FTE and \$2,297,000 for the Office for Civil Rights and Civil Liberties;

D. How OSEM Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

OSEM provides leadership, direction, and management to the Department. The Office establishes and implements policy, obtains resources, and provides oversight to all entities within the Department. It is the responsibility of OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. OSEM programs support the following DHS goal:

Goal Five: Strengthen and Unify DHS Operations and Management.

E. Performance Based Budget Highlights by Program ¹

The OSEM FYHSP performance goal, performance measure, budget, and FTE are:

Program: Office of the Secretary and Executive Management						
Performance Goal: Provide comprehensive leadership, oversight, and support to all components and improve the efficiency and effectiveness of the Department and its business and management services.						
Objective 5.1 Strengthen and Unify DHS Operations and Management- 71.5% allocation						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$82,700	\$125,858	\$95,336	\$97,353	\$127,229	\$160,760
FTE	361	375	469	542	599	599

Measure: Percent of DHS strategic objectives with programs that meet their associated performance targets.						
Description of Measure: This measure is defined as the total number of Department of Homeland Security (DHS) strategic objectives with programs that meet their associated performance targets. Performance data is tabulated against the 33 strategic objectives of the DHS Strategic Plan. DHS gauges its success in meeting its mission through implementation of the DHS Strategic Plan. The Strategic Plan includes strategic goals and objectives as well as strategies and programs that describe what the Department does and what the Department will accomplish. Each program is linked to the DHS strategic goals and objectives and has specific performance measures. DHS demonstrates the value and outcomes of its services through the results of program performance metrics. The performance outcomes of DHS programs essentially tell how the Department is impacting citizens, stakeholders, and customers and meeting its mission.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Budget Request and Supporting Information

Office of the Federal Coordinator for Gulf Coast Rebuilding

I. Appropriation Overview

A. Mission Statement for the Gulf Coast Rebuilding Office:

Executive Order 13390, as amended, created the Gulf Coast Rebuilding Office and designated a Coordinator of Federal support for the recovery and rebuilding of the Gulf Coast Region. The Coordinator is responsible for working with Federal, State and local officials to identify the priority needs for long-term rebuilding; communicating those needs to the decision makers in Washington, DC; and advising the President on the most effective, integrated and fiscally responsible Federal strategies for support of Gulf Coast recovery.

B. Budget Activities:

The Office of the Federal Coordinator for Gulf Coast Rebuilding coordinates the long-term Federal rebuilding efforts by working with State and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region, such as: restoring long-term safety and security, renewing economic activity, and revitalizing communities.

The following is a list of major activities accomplished by the Office of the Federal Coordinator for Gulf Coast Rebuilding:

- Since the 2005 hurricanes, Louisiana has stressed that its top priority is rebuilding and strengthening its hurricane protection system. OFCGCR has worked with all partners, including the Corps of Engineers, to ensure that this is accomplished. The OFCGCR worked alongside the Corps and with the State of Louisiana to ensure that all agreements, including one providing 30 year repayment terms, were executed. The Corps is presently on schedule to provide 100-year hurricane protection to the greater New Orleans area.
- Facilitated the streamlining of compliance with HUD environmental and historic preservation requirements for approximately 4000 properties held by the Louisiana Land Trust (LLT) and the New Orleans Redevelopment Authority.
- Convened roundtable of experts, local officials, and local stakeholders to provide ideas to meet the affordable rental housing needs on the Gulf Coast.

C. Budget Request Summary:

The Office of the Federal Coordinator for Gulf Coast Rebuilding requests 14 positions, 10 FTE, and \$2.0 million for FY 2010. This request anticipates that a new executive order will further amend Executive Order 13390 and extend the term of this office through FY 2010. This appropriation request seeks to fully fund the Office of the Federal Coordinator program through FY 2010. Therefore, this request is an increase of 1 FTE and \$0.1 million above the FY 2009 enacted level of 14 positions, 9 FTE, and \$1.9 million.

III. Current Services Program Description by Organization

Office of the Federal Coordinator for Gulf Coast Rebuilding Program Performance Justification

(Dollars in thousands)

OFFICE OF THE FEDERAL COORDINATOR FOR GULF COAST REBUILDING

	Perm Pos	FTE	Amount
2008 Actual	9	9	2,440
2009 President's Budget	14	9	1,900
2010 Adjustments-to-Base	0	1	100
2010 Current Services	14	10	2,000
2010 Program Change	0	0	0
2010 Request	14	10	2,000
Total Change 2009-2010	0	1	100

The Office of the Federal Coordinator for Gulf Coast Rebuilding requests 14 positions, 10 FTE, and \$2.000 million to fully fund this activity in FY 2010. This office is due to close on February 28, 2009, in accordance with Executive Order 13390, as amended by Executive Order 13463. OFCGCR anticipates that a new executive order will further amend Executive Order 13390 and extend the term of the office to the end of FY 2010.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Federal Coordinator for Gulf Coast Rebuilding (OFC) coordinates the long-term Federal rebuilding efforts by working with Federal, State and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region, such as: restoring long-term safety and security, renewing economic activity, and revitalizing communities.

The Coordinator is responsible for working with the Federal, State and local officials to identify the priority needs for long-term rebuilding; communicating those needs to the decision makers in Washington, DC; and advising the President on the most effective integrated and fiscally responsible Federal strategies for support of Gulf Coast recovery.

The President created the Gulf Coast Rebuilding Office and designated a Coordinator of Federal support for the recovery and rebuilding of the Gulf Coast Region by Executive Order 13390 on November 1, 2005. Since the 2005 hurricanes, Louisiana has stressed that its top priority is rebuilding and strengthening its hurricane protection system. OFC has worked with all partners, including the Corps of Engineers, to ensure that this is accomplished. To date, the President has worked with Congress to secure more than \$7.0 billion for repair and restoration of floodwalls and levees and has committed to seeking up to \$7.4 billion in additional funding for greater New Orleans hurricane protection. In addition, OFC worked with the Louisiana delegation and other members of Congress, consistent with Administration policy priorities, to ensure that Louisiana and other Gulf States received a share of oil and gas drilling royalties, which are, in Louisiana, dedicated to hurricane protection.

IV. Program Justification of Changes

**Department of Homeland Security
Office of the Federal Coordinator for Gulf Coast Rebuilding
Justification of Program Changes
(Dollars in Thousands)**

*Office of the Federal Coordinator for Gulf Coast Rebuilding does not have any program increases for the FY 2010 CJ Submission.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Office of the Federal Coordinator for Gulf Coast Rebuilding
Appropriation Language**

For necessary expenses of the Office of the Federal Coordinator for Gulf Coast Rebuilding,
[\$1,900,000] **\$2,000,000.**

Explanation:

The proposed change to this legislative language anticipates that Executive Order 13390, as amended, will be further amended to extend the term of the Office of the Federal Coordinator for Gulf Coast Rebuilding through FY 2010.

Office of the Federal Coordinator for Gulf Coast Rebuilding Mission Statement

The Office of the Federal Coordinator for Gulf Coast Rebuilding coordinates the long-term Federal rebuilding efforts by working with Federal, State, and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region such as restoring long-term safety and security, renewing economic activity and revitalizing communities. Liasse between Federal, State and local officials and advise the President and his senior leadership on the most effective, integrated, and fiscally responsible Federal strategies for supporting a full and vibrant recovery.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Salaries and Benefits	\$1,480	\$1,625	\$1,821	\$196

Salaries and Benefits includes costs for 10 FTE. The FY 2010 request includes an increase of 2.0 percent increase in personnel compensation.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Travel	\$293	\$65	\$65	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2010 increase has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Other Rent	\$427	\$96	\$0	(\$96)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. In FY 2010 OFCGCR will need to pay the Working Capital Fund for services received

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Communication, Utilities, and miscellaneous char	\$7	\$0	\$0	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Printing	\$0	\$0	\$0	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Advisory and Assistance Services	\$16	\$25	\$25	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Other Services	\$28	\$30	\$30	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Purchase from Government Accounts	\$170	\$48	\$48	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Medical Care	\$2	\$2	\$2	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Supplies & materials	\$16	\$7	\$7	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request has no change.

	2008	2009	2010	2009 to 2010
	Actuals	Enacted	President's Budget	Change
Equipment	\$1	\$2	\$2	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request has no change.

BUDGET REQUEST AND SUPPORTING INFORMATION

DEPARTMENTAL MANAGEMENT AND OPERATIONS UNDER SECRETARY FOR MANAGEMENT

I. Appropriation Overview

A. Mission Statement for Under Secretary of Management

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department of Homeland Security to lead the unified national effort to secure America.

The DHS Management Directorate provides the business framework that enables the Department of Homeland Security to achieve its mission. It does so by providing policy, guidance, operational oversight and support, and innovate solutions for the management needs of the entire Department.

B. Management Offices:

Immediate Office of Under Secretary of Management (OUSM)

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services providing leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Office of the Chief Administrative Officer (OCAO)

Administrative Services establishes policy and procedures as well as provides both departmental leadership and oversight for all functional areas managed by the DHS Chief Administrative Officer (CAO) and Component Chief Administrative Officers. Functional areas include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, business continuity and emergency preparedness, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics. In addition, OCAO also provides the day to day operational support for departmental headquarters and the other components (I&A, Operations and S&T).

DHS Headquarters Project

Although the physical limitations of the NAC render it unsuitable as the permanent DHS headquarters, we plan to retain this property to house certain mission support functions that will not relocate to the new Consolidated DHS Headquarters Campus currently at St. Elizabeth's. Accordingly, DHS will need to continue to invest in this property to sustain our operational capabilities while St. Elizabeth's is developed and leverage those investments as we realign the overall real estate portfolio to support DHS operations and integration.

DHS Consolidated Headquarters Project

The DHS Consolidated Headquarters Project is in accordance with the DHS National Capital Region Housing Master Plan signed by the Secretary and submitted to the Congress 25 October 2006 as required by Public Law 109-295 (FY-07 Homeland Security Appropriations Act). The project will consolidate executive program leadership of the Department in a secure setting for policy, management and operational coordination to facilitate the incident management functions and command and control capabilities. The Plan also proposes to reduce the total number of locations housing DHS and component headquarters facilities, which currently stands at over 40 locations and 70 buildings scattered throughout the National Capital Region (NCR) for more efficient management.

Office of the Chief Human Capital Officer

The Office of the Chief Human Capital Officer (OCHCO) establishes policy and procedures as well as provides both departmental leadership and oversight for all Human Capital functional areas. OCHCO is organizationally structured into six functional areas (Policy & Programs; Learning & Development; Executive Resources; Human Capital Business Systems; Headquarters Human Resources Management Services; and Business Support and Operations) and is responsible for developing policy and procedures for these areas, as well as providing oversight, guidance and leadership within the Department.

Office of the Chief Procurement Officer

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The OCPO activities include:

Acquisition Support and Oversight

- **Acquisition Workforce:** Responsible for facilitating centralized hiring of the acquisition workforce including the Acquisition Professional Career Program for initial entry into select acquisition career fields and strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce.
- **Operations Support:** Principal liaison for the acquisition community and assist components to accomplish their varied missions.
- **Acquisition Oversight:** Responsible for developing and implementing a DHS acquisition oversight strategy in accordance with MD 0784 and implementing internal controls in accordance with A-123 for DHS's acquisition function.
- **Program Management:** Responsible for providing support to program managers DHS-wide and assisting in the development of a DHS-wide acquisition management system.

Strategic Initiatives

- **Acquisition Policy and Legislation:** Responsible for developing DHS acquisition regulations and policies, developing proposed acquisition legislation, and responding to proposed acquisition related legislation.

- **Competitive Sourcing and Privatization:** Responsible for the Department's implementation of the Federal Activities Inventory Reform (FAIR) Act of 1998, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative.
- **Strategic Sourcing and Acquisition Systems:** Responsible for managing the DHS strategic sourcing program; developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

Office of Small and Disadvantaged Business Utilization (OSDBU)

- In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program. While this office works closely with the Chief Procurement Officer, it reports directly to the Deputy Secretary.

Office of Security

The mission of the Office of Security is to secure the Department so the Department can secure the homeland. The Office of Security implements security programs that safeguard DHS personnel, property, facilities, and information. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. Additionally, the office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

C. Budget Request Summary:

The Under Secretary for Management requests 699 positions, 602 FTE, and \$337,990,000 for the FY 2010 Request. The total adjustments-to-base is 4 positions, 43 FTE, and \$6,842,000. The program increases include 184 positions, 93 FTE, and \$139,355,000 to:

- Implement the Departmental Enterprise Records Management System. (3 positions, 2 FTE, and \$3,100,000)
- Support the consolidation of mission support elements not re-locating to the St. Elizabeth's Campus. (0 positions, 0 FTE, and \$75,000,000)
- Support the Right-sizing of Human Capital programs. (8 positions, 4 FTE, and \$3,255,000)
- Continue the Department-wide Acquisition Intern Program. (100 positions, 50 FTE, and \$7,000,000)
- Support increased needs for Select Acquisition Transactions. (24 positions, 12 FTE, and \$9,000,000)
- Implement Acquisition Policy and Oversight for DHS' acquisition programs. (20 positions, 10 FTE, and \$9,000,000)
- Meet increased Departmental personnel security adjudication needs. (9 positions, 5 FTE, and \$3,000,000)
- Support staffing for the Special Access Program Control Office (SAPCO). (20 positions, 10 FTE, and \$5,000,000)
- Meet the requirements for HSPD-12 Card Issuance. (0 positions, 0 FTE, and \$25,000,000)

III. Current Services Program Description by Organization

Department of Homeland Security
Departmental Management and Operations
Under Secretary for Management
Program Performance Justification
 (Dollars in thousands)

IMMEDIATE OFFICE, US/M

	Perm Pos	FTE	Amount
2008 Actual	9	8	\$2,525
2009 Enacted	13	13	2,654
2010 Adjustments-to-Base	0	0	210
2010 Current Services	13	13	2,864
2010 Program Change	0	0	0
2010 Request	13	13	2,864
Total Change 2009-2010	0	0	210

Under Secretary for Management requests \$2.864 million for this activity. This is an increase of \$210 thousand over the FY 2009 level.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services and provide leadership and oversight for all departmental management functions, which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

OFFICE OF CHIEF ADMINISTRATIVE OFFICER

	Perm Pos	FTE	Amount
2008 Actual	54	54	\$37,648
2009 Enacted	83	73	44,427
2010 Adjustments-to-Base	1	5	-4,036
2010 Current Services	84	78	40,391
2010 Program Change	3	2	3,100
2010 Request	87	80	43,491
Total Change 2009-2010	4	7	-936

Under Secretary for Management requests \$43.491 million for this activity. This is a decrease of \$936 thousand below the FY 2009 level.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Chief Administrative Officer (OCAO) is responsible for asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics for the Department as well as consolidating and optimizing the same. OCAO is also responsible for the Executive Service Center that supports the Office of the Secretary and Executive Offices.

DHS HEADQUARTERS PROJECT

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$4,485
2009 Enacted	0	0	6,000
2010 Adjustments-to-Base	0	0	0
2010 Current Services	0	0	6,000
2010 Program Change	0	0	0
2010 Request	0	0	6,000
Total Change 2009-2010	0	0	0

Under Secretary for Management requests \$6.0 million for this activity. This request maintains the FY 2009 level.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Nebraska Avenue Complex (NAC) is the headquarters facility for DHS, and presence at the Complex continues to expand as well as at other locations to meet current demands. Although the physical limitations of the NAC render it unsuitable as the permanent DHS headquarters, we must sustain our operational capabilities at the NAC for effective mission execution until the new consolidated headquarters at St. Elizabeth's is constructed. We will leverage current services investments for future use of the NAC to house certain mission support functions that do not relocate to St. Elizabeth's.

DHS CONSOLIDATED HEADQUARTERS PROJECT

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$0
2009 Enacted	0	0	0
2010 Adjustments-to-Base	0	0	0
2010 Current Services	0	0	0
2010 Program Change	0	0	75,000
2010 Request	0	0	75,000
Total Change 2009-2010	0	0	75,000

Under Secretary for Management requests \$75.0 million for this activity. This is an increase of \$75.0 million over the FY 2009 level.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Department of Homeland Security (DHS) National Capital Region (NCR) Housing Master Plan was developed to provide the strategic vision for facilities that support a unified department, organizational structure, operations and culture. Funds for Phase 1 of the St. Elizabeth’s Campus portion of the DHS NCR Housing Master Plan were appropriated to the U.S. Coast Guard (\$98 million) in FY 2009 and were provided in the American Recovery and Reinvestment Act (ARRA) (\$200 million to DHS and \$450 million to the General Services Administration (GSA). While St. Elizabeth’s will accommodate the main Department and Component headquarters mission execution functions, it does not have the capacity to accommodate all of the DHS mission support functions. As a result, the DHS NCR Housing Master Plan proposes to consolidate and realign the remaining functions that are currently dispersed throughout the NCR in 40 locations to support functional integration, improve effectiveness and efficient management of the real estate portfolio.

OFFICE OF THE CHIEF HUMAN CAPITAL OFFICER

	Perm Pos	FTE	Amount
2008 Actual	50	44	\$21,844
2009 Enacted	82	79	38,827
2010 Adjustments-to-Base	3	6	2,322
2010 Current Services	85	85	41,149
2010 Program Change	8	4	3,255
2010 Request	93	89	44,404
Total Change 2009-2010	11	10	5,577

Under Secretary for Management requests \$44.4 million for this activity. This is an increase of \$5.6 million and 10 FTE over the FY 2009 level.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department’s human capital. In FY 2009, the OCHCO issued the FY 2009 – 2013 Human Capital Strategic Plan which includes four cross-cutting enterprise goals that address the human capital environment challenges and will help DHS to realize its human capital vision. In the development of the Plan, the CHCO adopted a Human Capital Planning Framework (framework) that provides a collaborative and structured approach to understanding the human capital landscape at DHS as well the development of goals and an implementation plan that are achievable, realistic and focused on strategic priorities. The alignment of the four cross-cutting enterprise goals to OCHCO programs and budgets is outlined in the table below with a description and status of the programs immediately following:

Alignment of Human Capital Enterprise Goals to OCHCO Programs and Budgets	
Human Capital Strategic Goals	Programs/Budgets
Goal 1: Talent Acquisition and Retention - Become a premier employer that attracts and retains high quality, diverse talent by investing in employees through continuous learning and cross-Component career opportunities. DHS is a culture where every employee can maximize his/her potential.	Workforce Planning Recruitment Service Excellence Salaries and Expenses Human Resources Information Technology
Goal 2: Diversity - Enhance diversity at all levels throughout DHS to better reflect the composition of the Nation so that our workforce will provide the widest range of solutions, ideas, perspectives, opportunities and decisions to protect and secure America.	Recruitment Diversity Veteran's Outreach Salaries and Expenses Human Resources Information Technology
Goal 3: Employee Learning and Development – Build enterprise-wide capabilities and systems that provide training, education and professional development opportunities that enable “Team DHS” to meet strategic, operational and tactical mission requirements.	Learning and Development Salaries and Expenses Human Resources Information Technology
Goal 4: Policy - Implement consistent but flexible enterprise-wide human capital policies, programs and practices to strengthen and unify DHS operations and management.	Workforce Planning Service Excellence Performance Culture Accountability Strategic Planning Program Management Salaries and Expenses Human Resources Information Technology

- **Salaries and Expenses:** The primary purpose of this budget is to provide funding to support personnel who are responsible for the management and oversight of Department-wide Human Capital programs and resources, to include, salaries and benefits, associated expenses such as travel, training, supplies, and shared service costs (i.e., rent, information technology, procurement, etc.).
- **Talent Management:** The purpose of this functional area is to support the workforce planning initiative to determine current and future staff needs, analyze turnover and attrition and use exit surveys to determine who is leaving the Department and why; and funding to support continued development of recruitment and diversity events to fill critical positions as well as provide opportunities to enhance retention across the Department.
 - **Workforce Planning:** Strategic workforce planning addresses two critical needs: (1) aligning an organization’s human capital program with its current and emerging mission

and programmatic goals and (2) developing long-term strategies for acquiring, developing, and retaining staff to achieve programmatic goals.

- During FY 2010, DHS will conduct competency reassessments for DHS-specific mission critical occupations (e.g. CIS, ICE, and FLETC) and government-wide mission critical occupations (e.g. IT, Acquisition, Human Resources and Leadership) and should include additional baseline competency assessments mission critical occupations. As a result of these assessments, gap closure plans and improvement plans with specific training and development interventions (e.g. online courses, classroom courses, details, rotations, etc) will be developed and implemented accordingly.
- Performance targets include consistent application of DHS Workforce Planning Guidance across Components/Offices/Directorates to ensure targeted training recruitment and compensation strategies are deployed DHS-wide. Identified competency gaps have planned training and development interventions to close gaps. Succession/Transition planning will be conducted to identify additional critical positions which need to be filled in a timely manner so as not to adversely impact the DHS mission.
- **Diversity and Recruitment and Veteran's Outreach:** The Department is committed to creating a diverse and multi-cultural organization and has made the strong commitment to workforce diversity by making recruitment and diversity a primary goal for fiscal years 2009 to 2013. While the Department has made progress during the first 5 years of its existence, the Department recognizes that improvements in the areas of diversity and recruiting a talented and skilled workforce remain a priority.
 - DHS has designated its Management Council as the de facto DHS Diversity Council. This Council is composed of top-level officials from every Component and chaired by the Under Secretary for Management. The OCHCO and the Office of Civil Rights and Civil Liberties serve as ex officio advisors. The Council meets quarterly to find ways to improve diversity across all occupations within DHS by focusing on recruitment, retention and development opportunities.
 - The Diversity Council adopted the DHS Diversity Strategy in March 2008. Through the Diversity Strategy, the Department is actively establishing formal partnerships with organizations, such as the Black Executive Exchange Program (BEEP), National Association of Hispanic Federal Executives (NAHFE) and the African American Federal Executive Association (AAFEA), to increase the Department's outreach to diverse audiences. Other goals of the Diversity Strategy include:
 - Establishing an external Diversity Outreach Advisory Forum of interested stakeholders to guide and inform DHS' diversity outreach plans and efforts
 - Prototyping diversity management training for managers and executives
 - Reviewing Senior Executive Service (SES) hiring procedures to identify potential practices and procedures, which would integrate attention to diversity in our processes
 - Issuing specific guidance to hold executives accountable for the "Diversity Advocate" competency in their performance plans

- The Department is also committed to hiring more veterans. To assist veterans seeking to continue their service to America by working for DHS, the OCHCO has created a one-stop web page with resources for veterans seeking employment. In addition, OCHCO established a Veterans Outreach Forum of external stakeholders to advise DHS on veterans outreach initiatives to increase veteran representation within DHS.
- **Performance Culture:** The purpose of this functional area is to analyze results of the Federal Human Capital Survey, implement and monitor Department and Component action plans in response to the survey; enhance a DHS-wide culture of high performance that promotes consistent cascading of organizational objectives down from formal strategic goals to individual employee performance work plans; deliver the annual Secretary’s Recognition and Award Ceremony; strengthen involvement of employee organizations and unions in the formulation of policies that impact employees; and ultimately strengthen morale and encourage common values across the Department through strong leadership support, communication, and mission accomplishment.
 - The results of the 2008 Federal Human Capital Survey (FHCS) show that DHS faces significant challenges with employee satisfaction in the areas of job satisfaction, talent management, leadership and knowledge management, and results-oriented performance culture. In FY 2010, the Department will continue to invest in numerous initiatives designed to improve upon the deficiencies and challenges identified in the surveys, including a cross-Component DHS Survey Engagement Team and working groups to lead the way and share best practices. These activities align with stated goals and activities outlined in the Future Years Homeland Security Program (FYHSP) and include:
 - Holding focus groups to determine the root causes of employee dissatisfaction;
 - Expediting hiring efforts to attract and onboard new employees more efficiently;
 - Building career ladders to provide career mobility for more positions throughout the Department;
 - Enhancing leadership training to improve the skills and flexibility of our leaders;
 - Increasing communication efforts to inform employees of key issues affecting their careers;
 - Continuing to rollout the Performance Management Program to provide consistency and build greater accountability for performance, recognition, and mission accomplishment.
- **Learning and Development:** The DHS Learning and Development Strategy (Strategy) calls for the centralization and consolidation of several DHS employee learning and professional development opportunities. This consolidation and centralization enhances consistency of training content, fosters a DHS mission-focused culture, and promotes cost savings. The Strategy includes design, development, delivery and evaluation of DHS employee learning and professional development opportunities. The overall goal of the Strategy is to grow a cadre of future leaders and offer programs and individual courses that cultivate awareness and understanding of the Department and the various missions and organizations that function together to accomplish the DHS mission. The Strategy’s initiatives are divided into four “strategic pillars” within the DHS University System and include: (1) the Preparedness Center; (2) the Leadership Institute; (3) the

Homeland Security Academy; and (4) the Center for Academic and Interagency Outreach. Through these four pillars, the following developmental programs and courses are offered:

- **Leadership development at the entry and mid-grade level:** Numerous classroom leadership development programs for non-supervisory GS10s and below and GS11s-13s have been designed, developed and delivered.
- **DHS Fellows program:** The DHS Fellows Program has already had three cohorts attend the nine-month-long program since January 2007. This program is run in concert with the Partnership for Public Service and aims to: (1) increase leadership skills and contribute to the DHS's succession planning efforts and (2) professionally develop individuals from throughout DHS who serve in key positions. Beginning in FY 2009, the Program is serving as a "feeder" for the DHS Senior Executive Service Candidate Development Programs.
- **Executive Order 13434 (National Security Professional Development):** The Department of Homeland Security as a whole, and this office in particular, are leading the interagency effort to develop a Training, Education and Professional Development program for National Security Professionals in order to obtain a baseline of professional knowledge, skills and abilities for effective intergovernmental coordination and actions during times of crisis—whether manmade or natural.
- **Rotations and mentoring programs:** In the 2007 Appropriations bill, Congress mandated that the Secretary of Homeland Security provide for a senior rotations program within DHS and this office has produced the DHS Management Directive for both Rotation and Mentoring Programs and is the OCHCO focal point for their implementation. Title 5CFR-412 mandates that Senior Executive Service (SES) Candidate Development Programs (CDPs) have rotation programs. This office is responsible for the implementation and oversight of the SES CDPs and is currently working with the Transportation Security Administration (TSA), Customs and Border Protection (CBP), and United States Secret Service (USSS) on the development and implementation of their mission-specific SES CDPs. The SES CDPs at the TSA, CBP, and USSS align with the SES CDP program offered by Leadership Institute at Department level. The Component programs are geared to the needs of employees in mission-critical occupational specialties within these Components. Employees in mission support occupational specialties within these Components are included in the department level SES CDP.
- **Federally mandated training:** DHS is in the process of standardization of its federally mandated training programs and courses by designing, developing and delivering these training programs and courses in both online and in-residence versions as needed. The standardization of programs and courses will provide offsets to the components and offices within DHS. The standard federally mandated training programs provided include: IT Security Awareness, Ethics, Anti-Discrimination/Prevention of Sexual Harassment, Constitution Day, No Fear/Whistleblower/ Thrift Savings Plan, Privacy Act, Freedom of Information Act, Equal Employment Opportunity, Information Resource Management, Critical Infrastructure Protection, Workplace Safety, GSA Smart Pay, and Customer Assistance.

- **DHS 101 program:** The DHS 101 orientation and familiarization program has been established within the Department and offered in two venues – in residence for the National Capital Region, and on-line in order to reach a nation-wide DHS workforce.
- **Service Excellence:** The purpose of this functional area is to continue to improve the HR Operational Services throughout the Department. The better our services are in terms of quality, timeliness, and consistency, the better our employees will understand and welcome the processes and their impact on the quality of work-life at DHS. Streamlining the hiring process and identifying best practices directly address one of the key Human Resource concerns expressed by employees in the Federal Human Capital Survey. In an effort to address these concerns, the OCHCO plans to:
 - Increase the skill and proficiency levels of Human Resources (HR) staff with development in critical new skills and continuing professional development in technical skills;
 - Extend the deployment of various automated HR systems eventually to include all components and enhance self service approaches;
 - Continue activities that focus on HR transactional process improvement and implement identified best practices throughout the Department based upon customer feedback, component experiences, and monitoring of Service Level Agreements; and
 - Continue exploring and expanding the feasibility of establishing other ‘shared services’ and/or ‘centers of excellence’ approaches to delivery of HR services, support, and products throughout the Department and deploy as appropriate.
- **Accountability:** The purpose of this program is to ensure that Human Capital Management Systems within the Department are assessed and measured in the areas of mission alignment, effectiveness, and efficiency; and that the systems are compliant with merit system principles, prohibited personnel practices, and current laws, rules and regulations.
 - Department-wide Human Resource Operational Audit (HROA) and Delegated Examining Unit (DEU) reviews are being conducted across the Department. The OCHCO is currently in the second year of a three year audit cycle. The reviews ensure legal and regulatory compliance, provide mechanisms for sharing best practices, and provide an immediate forum to strategize corrective actions used to overcome human capital management system barriers and program deficiencies. The Department plans to continue to conduct approximately 10-12 HROA and DEU reviews, issue reports of findings, and track follow-up activities on an annual basis.
 - The DHS Human Capital Accountability Program establishes a formal comprehensive and integrated set of human capital goals and objectives that detail the policy and program priorities and initiatives consistent with the Department’s strategic plans and annual performance goals. These goals address each of the Human Capital Assessment and Accountability Framework systems including; strategic alignment, leadership and knowledge management, results-oriented performance culture, talent management, and accountability. The HCAAF evolved from a set of Human Capital standards, issued by the Office of Personnel Management (OPM) in 2002, which were developed through a collaborative effort among OPM, the Office of Management and Budget (OMB), and the Government Accountability Office (GAO).

- **Human Resources Information Technology (HRIT):** The mission of the HRIT program is to merge and modernize the DHS HRIT infrastructure to provide flexibility and the management information that will allow DHS to continuously evolve in response to changing business, legislative and economic drivers. Consolidation will fulfill the critical need for complete visibility of all Department employees thereby enabling executives to strategically manage the workforce while supporting the Department's mission.
 - The HRIT program includes five operating enterprise solutions: TALENTLink (Recruitment), EmpowHR (Personnel), webTA (Time & Attendance), eOPF (Electronic Personnel Folders), and NFC Corporate (Payroll/Personnel). The program will expand enterprise application coverage through ongoing deployments and increase HR capabilities in order to achieve the following benefits within the Department:
 - Increase workforce productivity. Optimal mission support will result from efficient HR operations and business processes.
 - Improve leadership and operations. Modernized HR systems will greatly assist in filling vacancies within the Department and provide visibility for strategic decision-making.
 - Improve Human Capital information. Real-time, trusted and enterprise-wide human capital information is readily accessed and analyzed through a centralized business intelligence function and state of the art data integration and reporting tool.
 - Reduce risk for HRIT-led migrations. Supported by seasoned leadership with extensive experience in systems migrations, HRIT will build upon the successes and maturity gained through each subsequent migration.
 - Achieve cost savings and/or cost avoidance. Reduced maintenance costs, single vendor reliance and the vast commitment of internal resources now dedicated to the maintenance of outdated, highly customized, software will be realized through the HRIT Program.
 - In addition to expanding coverage of the operational enterprise solutions, the HRIT program will continue to conduct assessments to identify capability gaps. The gaps will result in increasing operational systems' capabilities through upgrades, or acquiring and implementing new enterprise solutions. It is expected the HRIT program will implement a new enterprise performance management system in FY2010.
 - **Strategic Planning and Program Management:** The purpose of this functional area is two-fold: (1) ensures implementation of the 2009-2013 DHS Human Capital Strategic Plan so that human capital goals are achieved and the Five-Year Human Capital Vision is realized; and (2) embeds the rigor of a mature program management operation into the day-to-day activities of the OCHCO, which would also expand program reviews to include internal controls management, risk analysis and mitigation, and contract performance/management.

OFFICE OF THE CHIEF PROCUREMENT OFFICER

	Perm Pos	FTE	Amount
2008 Actual	174	92	\$31,366

Total Change 2009-2010	144	98	32,035

Under Secretary for Management requests \$71.038 million and 282 FTE for this activity. This is an increase of \$32.035 million and 98 FTE over FY 2009.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Chief Procurement Officer (OCPO) establishes the acquisition regulations, policies and procedures for DHS. It oversees the department's acquisitions and acquisition programs and assists the acquisition community with implementing difficult or complex acquisitions to reduce risk and ensure success. The Office of the Chief Procurement Officer has implemented a centrally funded and managed Acquisition Professional Career Program modeled after the highly successful Navy Intern Program. This program features three, single year rotations through various components and provides the participants with all the experience and training they need to become journeyman level acquisition professionals.

OCPO strategically sources common items across DHS to create more efficient procurements, manages DHS' competitive sourcing actions, and reports externally on DHS' progress. OCPO is also responsible for acquisition workforce planning, centralized acquisition workforce recruitment and training; and manages the acquisition professional career program.

OFFICE OF SECURITY

Under Secretary for Management requests \$95.193 million for this activity. This is an increase of \$34.311 million and 22 FTE over FY 2009.

CURRENT SERVICES PROGRAM DESCRIPTION:

The mission of the Office of Security (OS) is to lead a collaborative security program to safeguard the Department's personnel, information, and property so the Department may secure the Homeland.

Today's complex security environment demands that security operations be effectively structured and integrated into all DHS operations. OS implements department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. Priority initiatives include expediting background investigations and granting security clearances; conducting facility security risk assessments; providing security education and awareness training; and issuing guidance on topics ranging from installing physical security equipment to handling classified information. Additionally, the OS investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

The OS integrates all security disciplines in a manner that increases efficiency and enhances the overall security of the Department. The Office has seven divisions that work together to create an environment that promotes best practices and shares accountability. These divisions are:

- The Administrative Security Division - develops, implements, and oversees policies, programs and standards necessary to safeguard classified and sensitive but unclassified information;
- The Counterintelligence and Investigations Division - protects DHS personnel, information and property from foreign intelligence services, terrorists, and criminals. This division also identifies, analyzes, and defends against espionage directed at DHS and conducts investigations of crimes committed against DHS personnel, property and facilities;
- The Special Security Programs Division - manages the DHS Sensitive Compartmented Information (SCI) and Special Access Programs.
- The Physical Security Division - protects DHS personnel, controls access to DHS Headquarters facilities, and safeguards against damage and theft;
- The Personnel Security Division - ensures the highest levels of confidence in DHS employee and contractor trustworthiness, loyalty, integrity, and reliability. The division conducts background investigations, makes suitability and security clearance eligibility determinations and provides oversight of personnel security policy throughout the Department;
- The Training and Operations Security Division - ensures that all DHS employees are trained to recognize and defend against threats of the Department's personnel, information, and property;
- The Operations Division- provides an accurate account of the budget, both classified and non classified. This division ensures coordination of security related budget issues with the DHS Budget Office (Office of the Financial Officer), the Office of National Director of Intelligence (IDNI), the Office of Management and Budget (OMB), the House Appropriations Committee (HAC), and the Senate Appropriations Committee (SAC). The Operations Division also completes procurement actions, which require market research and evaluations so that the government can achieve the best value and executes reimbursable agreements with other government agencies.

Description of Item:

The Department of Homeland Security (DHS) National Capital Region (NCR) Housing Master Plan was developed to provide the strategic vision for facilities that support a unified department, organizational structure, operations and culture. The Plan was submitted to the Congress October 25, 2006 as required by Public Law 109-295. The plan outlines priorities of implementation and addresses the mission fragmentation caused by the Headquarters (HQ) elements being located in over 40 locations throughout the NCR. To meet current demands and component projected needs in FY 2010 for headquarters facilities, the department will require about 8 million gross square feet (GSF) of office space in the NCR. This need has the potential to further increase to 10 million GSF by 2015 based on component estimates of growth across program areas. Actual growth needs will be addressed in a future budget submission. Funds for Phase 1 of the St. Elizabeth’s Campus portion of the DHS NCR Housing Master Plan were provided in the FY 2009 DHS Appropriation and the American Recovery and Reinvestment Act (ARRA). While St. Elizabeth’s will accommodate the main Department and Component HQ mission execution functions, it does not have the capacity to accommodate all of the DHS mission support functions. As a result, the DHS NCR Housing Master Plan proposes to consolidate and realign the remaining functions that are currently dispersed throughout the NCR to support functional integration, improve effectiveness and efficient management of the real estate portfolio.

Justification

The Department of Homeland Security (DHS) mission is to lead a unified national effort to secure America. Yet the Department's legacy facilities are dispersed throughout the National Capital Region (NCR) with sub-optimal security protections and negatively impacting critical communication, coordination, and cooperation across DHS Components.

The Department will consolidate the mission execution functions of executive leadership, operations coordination, policy development and program management in an Interagency Security Committee (ISC) Level 5 secure campus setting at St. Elizabeths. The remaining mission support functions not locating at St. Elizabeth's should also be consolidated in facilities also meeting the ISC criteria based on occupancy levels and mission criticality to reduce the risk of compromising the Department's ability to support all prevention and response activities. Consolidation will reduce the Department's overall homeland security risk by increasing the security posture for the department's assets, enhancing incident prevention, increasing interdiction of plots against the United States, and while improving overall response capability. Consolidation will also lower the total number of locations that house DHS Components to as few as possible to reduce fragmenting of component business units; and will standardize the work environment and to improve communications, coordination and cooperation across all DHS Headquarters units. Consolidating locations aims to foster a "one-DHS" culture and will optimize our prevention and response capabilities across the spectrum of operations.

This is a one time opportunity

Funding is required in the FY 2010 budget because more than 82 percent of the existing leases are expiring before FY 2015 and it may prove beneficial to replace the large volume of expiring leases in an overall consolidation in the current depressed real estate market. This is an opportunity to efficiently consolidate the DHS HQ that allows for coordinated action to procure new leased space and replace the numerous lease locations that we currently occupy. If we do not consolidate into few locations, the components will be required to recompute current leases in a less coordinated manner and at a higher overall cost than implementing the consolidation plan. The Master Plan envisions a reduction in the total number of locations from 40 down to less than 10 and a reversal of the current 70 percent leased, 30 percent federally owned distribution of real property holdings. Federal ownership provides lower total ownership costs, however complete reliance on federal ownership is not feasible due to the growth and maturing nature of the department and the need to quickly provide surge capability for new and/or expanded programs.

DHS currently has approximately 25 space requests pending with the General Services Administration (GSA) to accommodate existing requirements within the NCR that already exceed the capacities of the department's real estate portfolio. These requests coupled with the existing 40 locations have the potential to further exacerbate the challenges to the effective and efficient management of the portfolio in support of operations and integration. Without consolidation, as organizations mature and new program requirements develop, space requests will continue to be addressed with limited opportunities for strategic realignments and leveraging of existing locations.

The status quo will continue to impact the effective communications, coordination and cooperation among the headquarters and components due to the increasingly scattered nature of the portfolio. Consolidation will also contribute to a reduction in facility operation and maintenance costs and provide quality of life features and other amenities to attract and retain the best professional workforce. Consolidation will assist in developing a culture of success for DHS to achieve its mission.

Impact on Performance (Relationship of Increase to Strategic Goals)

Without the requested funds, it will be more difficult for DHS to operate as an integrated organization and responses to natural disasters or terrorist attacks will not be as coordinated, efficient as our facilities will not be aligned to support effective mission execution. Additionally, the current dispersed inventory of leased space cannot be consolidated and before FY 2015, 82 percent of the existing leases will need to be renewed or replaced without the benefits of strategically realigning the real estate portfolio to support operations and yield more effective and efficient management.. Instead of reducing the number of locations, buildings and the proximity of components to each other, the net result will be an expansion of buildings, and locations with increased dispersion. Implementation of the DHS National Capital Region (NCR) Housing Master Plan will not be achieved unless the current disintegrated legacy housing approach is corrected to allow the establishment of a common identity, supporting teamwork and a unified culture.

Funding the Mission Support Consolidation will contribute to the department more effectively achieving its mission and directly supports the Department's Organizational Excellence Strategic Goal and facilitates the Awareness, Prevention, Protection, Response and Recovery Strategic Goals through the creation of a real estate portfolio anchored by a consolidated headquarters campus at St. Elizabeth's, focused on mission execution. The funding will allow the realignment of mission support activities that will further improve and enhance organizational efficiencies and functional integration. The Department identified implementation of the DHS National Capital Region Housing Master Plan and the creation of a unified departmental headquarters as one of the top initiatives critical to establishing a common identity, supporting teamwork and a unified culture. The consolidation of off-St. Elizabeth's campus mission support functions has the potential to achieve over \$300 million Net Present Value (NPV) savings/cost avoidances through collocation of similar functions that will facilitate increased cooperation and coordination while at the same time reducing expense for items such as travel, shuttle service and mail delivery locations,, elimination of redundancies/increasing shared services and right sizing the real estate portfolio.

Program Increase 2: Enterprise Records Management System

Strategic Goal(s) and Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of the Chief Administrative Office

Program Increase: Positions 3 FTE 2 Dollars \$3,100

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							3	2	\$3,100
Total Request	0	0	\$0	0	0	\$0	3	2	\$3,100

Description of Item

The \$3.1 million requested will provide a base implementation of a Department-wide Enterprise Records Management System (ERMS) application that will connect and manage information contained within multiple information management systems and will streamline document and email management across components and DHS headquarters operations. The ERMS system will manage all records management lifecycle through the creation, version control, user access, retention and proper disposal of the Departments records.

The ERMS system will give the Department the capability to significantly improve its ability to identify, maintain, and access needed information quickly and efficiently dispose of the rest. Duplication of records and activities toward creating and managing those records across the Department and its Components will be considerably reduced or eliminated. This should result in extensive cost savings, improved business process efficiencies, increased regulatory compliance, and reduced litigation.

Justification

Information is one of the most important assets that DHS has toward accomplishing its mission. The efficient, effective, and proper management of information is the epicenter of mission success and a solid records management program is the epicenters core. Nearly 100 percent of all DHS documents and records created by DHS headquarters, components, and field operations originate electronically and is managed through some type of information system. In addition, DHS has 51 different web portals from 12 components that generate electronic records internally and by the general public. The current paper driven records management process is incomplete, labor intensive, highly inefficient, and does not meet organizational needs. Cohabiting paper-driven process with modern technologies invalidates gained efficiencies, effectiveness, and economies of scale.

A Department-wide ERMS system will manage documents and records by streamlining the process that best fits the existing business need, reduces or eliminates duplication of information, and thereby

preventing outdated information misdirecting mission activities and resources. ERMS will provide for streamlining of information, uniformity of information handling, and standardization of records management throughout the Department. ERMS will also enable information sharing more effectively and efficiently throughout the Department and provide effective email management for all DHS users reducing the necessity for server space and reduce hardware and service costs.

The implementation of an electronic records system to manage records is necessary to ensure that DHS personnel have access to timely, accurate, and sufficient information for making day-to-day and critical decisions. Records and information management is a critical contributing factor in DHS continuity. In emergency situations, electronic access to critical information and documents necessary for action and decision-making is a key component. Without such access, business continuity could be further impeded or disrupted and critical time lost to unnecessary inefficiency.

The implementation cost of ERMS across the organization is estimated to be approximately \$17.3M over the five year period FY 2010 through FY 2014. Successful implementation of a system will result in future cost avoidance resulting from work process efficiencies gained through standardization of non-standard practices and the electronic records transfer of key documents. In addition gained work efficiencies will result in redirecting resources toward other critical mission needs. Based on measurable returns, it is estimated that with full implementation, DHS would gain efficiencies and associated cost avoidance ranging from \$26M to \$65M.

The Department of Homeland Security (DHS), Management Directorate, Administrative Services, Records Management (RM) program requires Support Services to continue forward momentum in building and strengthening the programs across the department. RM has completed its initial foundation activities and is now transitioning into an integrated program which will involve deployment of an Electronic Records Management System (ERMS). A Contractor is requested to provide technical, engineering and management services support to complete program planning, testing, selection, training and support change management in preparation of a pilot project and possible sustain the pilot members into an Operations and Maintenance (O&M) status.

Impact on Performance (Relationship of Increase to Strategic Goals)

The implementation of ERMS will mitigate the loss of mission essential and critical knowledge for department-wide operations and component specific missions. Information is the backbone of mission success. ERMS increases the efficiencies and effectiveness of information and records management and information sharing providing standardization and uniformity across the department. This increased efficiency and effectiveness within DHS operations and management strengthens the department's ability to achieve its mission and mitigates information risk during emergencies and continuity of operations.

The current paper driven, incomplete and non-standardized records management process commingled with technology driven requirements and information generation has limited DHS' ability to effectively execute mission and mission support functions. Further, the lack of compliance with records management requirements has exposed DHS to liability under FOIA and other legal requirements.

Program Increase 3: Right-Sizing Human Capital Programs

Strategic Goal(s) & Objective(s): Goal 5: Strengthen and Unify DHS Operations and Management

Organization: Office of the Chief Human Capital Officer

Program Increase: Positions 8 FTE 4 Dollars \$3,255

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							8	4	\$ 3,255
Total Request	0	0	\$0	0	0	\$0	8	4	\$ 3,255

Description of Item

The Office of the Chief Human Capital Officer is requesting \$3.3 million for eight additional positions to meet the demands and needs of a growing Department and additional funding to pay for Working Capital Fund Shared service costs.

Justification

As defined by the FY 2009-2013 DHS Human Capital Strategic Plan, the four enterprise cross-cutting goals are to: (1) become a premier employer that attracts and retains high quality and diverse talent; (2) increase diversity at all levels throughout DHS to better reflect the composition of the nation; (3) build enterprise-wide capabilities and systems that provide employee training, education and professional development opportunities; and (4) implement consistent but flexible human capital policies, programs and practices. Accordingly, the OCHCO must now tailor and expand its competencies and staffing levels to meet the increased demands and priorities of a six-year-old department. In addition, as the Department has grown in size and complexity, the need for providing suitable human resource, learning and development programs and policy has expanded.

Based on the results of the FY 2008 Federal Human Capital Survey (FHCS), out of the 37 federal agencies surveyed, DHS ranked:

- 33rd on job satisfaction
- 34th on talent management
- 35th on leadership and knowledge management
- 35th on results-oriented performance culture

Overall, DHS employees continue to like the work they do, strongly believe that the work they do is important, know how their work relates to the agency’s goals and priorities, work together to get their jobs done and are committed to their work. However, improvement is still needed in recognizing high performers, rewarding creativity and innovation, providing personal empowerment with respect to work processes, ensuring that pay raises and promotions are based on merit, and dealing with poor performers.

Within this request, the OCHCO seeks to: (1) appropriately fund its Working Capital Fund (WCF) shared service expenses; and (2) increase its authorized federal staff positions by eight. Within DHS Headquarters, WCF shared service costs have increased by 50% for OCHCO since FY 2007. These expenses include basic services such as rent, information technology seat costs, information technology infrastructure services, financial services, procurement services, human capital services, transit services, transit subsidies, mail-room service, health clinic services, eGov initiatives, employee assistance services, Flexible Spending Account (FSA) administration, subscription services, and the like. WCF shared service expenses have increased beyond standard inflation rates, and as a result, the WCF shared service expenses are under funded.

The FY 2010 federal staff positions being requested are summarized in the table below:

FY 2010 Positions Requested	
<i>Function</i>	<i>Number of Positions</i>
Accountability	2
Policy	4
Recruiting/Diversity	1
Budget Planning & Execution	1
TOTAL	8

Additional detail for the eight federal staff positions are as follows:

- Policy (4 positions) – Human Resource Specialists (GS-201-14). ***Implement consistent yet flexible enterprise-wide human capital policies, programs, and practices to strengthen and unify DHS operations and management.*** Specific duties will be to develop, implement, and evaluate corporate policy for: (1) Classification; (2) Staffing; (3) Compensation; and (4) Benefits. Currently the OCHCO is not staffed appropriately to ensure that human capital policies are developed and implemented in a manner that would enable functional integration of human capital programs across components.
- Accountability (2 positions) – Human Resource Specialists (GS-201-14). ***Drive continuous business improvements of HC programs, sharing and leveraging best practices, reciprocal information-sharing and marketing, and institutionalizing standards and metrics through the Accountability Program.*** Specific duties will be to assess Department-wide HC Programs for effectiveness, efficiency, and compliance with merit system principles, laws, and regulations. The DHS Human Capital Accountability Program establishes a formal system to ensure human capital management programs and activities support the mission and goals of the Department and are regularly assessed to determine levels of efficiency, effectiveness, and

compliance with merit system principles, laws, and regulations. This program requires appropriate levels of staff.

- Recruitment and Diversity (1 position) – Human Resource Specialist (GS-201-13/14). ***Enhance diversity at all levels throughout DHS to better reflect the composition of the Nation...*** Specific duties will be to manage outreach activities such as: (1) Diversity Recruitment; (2) Partnerships with Diversity Stakeholder Associations; (3) Diversity Advisory Forum; and others. The Department is under significant congressional pressures to improve the diversity of the senior executive leadership cadre within the Department. Based on March 2008 congressional findings, the Department is expected to sharply boost its efforts toward diversity.
- Budget Planning and Execution (1 position) – Program Analyst (GS-343-12/13). ***Ensure that OCHCO budgets are appropriately formulated and executed in accordance with federal financial regulation.*** Specific duties will be to draft budgetary exhibits for formulation, certify availability of funds, conduct monthly reconciliations, and report budgetary status. These activities support all OCHCO program requirements designed to address the human capital priorities of the Department.

Performance Impact:

An August 2006 audit report by the U.S. Office of Personnel Management (DHS HROA Audit Report FY 2006) documented the following: Employees recognize that HR staffing shortages and heavy workloads discourage proactive partnering and consulting efforts. The staffing levels of the OCHCO have been relatively flat since the 2006 report. Appropriate OCHCO staffing levels are required if the Department is to effectively develop and sustain programs to address the morale of its workforce; embed diversity into the culture; and provide the necessary infrastructure to address key workforce management challenges.

Program Increase 4: **DHS-Wide Acquisition Workforce Intern Program**

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of the Chief Procurement Officer

Program Increase: Positions 100 FTE 50 Dollars \$7,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							100	100	\$15,273
Program Increase							100	50	\$ 7,000
Total Request	66	33	\$5,100	100	83	\$13,505	200	150	\$22,273

Description of Item

This program supports the President's initiative to reform federal procurement and to achieve better business outcomes. The Acquisition Intern Program also supports the Secretary's initiative to integrate the Department. This centralized intern program builds affinity with DHS as a whole as the interns rotate through three DHS operational acquisition organizations. The Department-wide Acquisition Intern Program established in FY 2008 is a three year program. The FY 2009 budget requested funding for the second year of this program continuing funding for the FY 2008 interns and added 34 new interns to begin the three year program. The 2010 request continues to grow the career field with the anticipation of 100 positions (50FTE) and \$7.0 million for the FY 2010 Intern class.

Currently there is a shortage in many of the acquisition career fields especially in the area of contracting. In addition, more than 25 percent of DHS' contracting workforce will be eligible to retire within the next three years. In an effort to combat the severe staffing shortage, the Department began a centrally funded Department-wide DHS Acquisition Intern Program in FY 2008. This allows for the recruitment of college graduates who will receive an appropriate amount of training over three years.

Justification

The base funding of \$14.3 million covers start up and operating costs for the Acquisition Professional Career Program (APCP). In FY 08, 66 positions (33 FTE) and \$5.1 million were authorized. This provided funding for recruitment, selection, salaries and benefits and the initial training for the selected interns. In FY 2009, an additional 34 positions (17 FTE) and \$3.1 million was authorized above the base amount of \$10.2 million. There are currently 48 interns in the second year of the program, 16 on board for their first year, and an additional 36 will begin the program before the end of FY 2009. The FY 2010 base funding covers the recruitment, selection, salaries and benefits, classroom training, on-the-job training, and associated travel of the program's participants. This funding supports the planned expansion of the program to its planned 3 year end strength of 300 participants by FY 2011, graduating 100 specialists annually.

Impact on Performance (Relationship of Increase to Strategic Goals)

With this funding, DHS will be able to adequately staff the various acquisition organizations. As a result, the programs will be less vulnerable to cost overruns, schedule delays, and decreased performance. The APCP is designed to operate efficiently with a throughput of 100 interns per year which equates to a total of 300 participants in the three year program. The budget request directly addresses the critical shortage in acquisition professionals. In just the contracts career field, 25 percent of DHS's 1200 contracting professionals are retirement eligible, 37 percent will be eligible within the next five years and 60 percent will be eligible within ten years. It takes a minimum of four years for an individual to gain the experience and training to independently perform the required duties for major contract actions. The funding provides for an adequately staffed, qualified acquisition workforce, allowing DHS to effectively and efficiently acquire the more than \$18 billion (more than a third of the Departments budget) in goods and services vital to mission performance. The funding will also address the DHS IG and GAO recommendation to correctly staff critical acquisition positions.

Program Increase 5: **Select Acquisitions Transactions**

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of the Chief Procurement Officer

Program Increase: Positions 24 FTE 12 Dollars \$9,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							24	12	\$9,000
Total Request	0	0	0	0	0	0	24	12	\$9,000

Description of Item

The Office of Selective Acquisitions (OSA), a new contracting component within the Office of the Chief Procurement Officer (OCPO), is chartered to provide contracting and business support to DHS classified programs.

Justification

Currently, DHS had no way to properly protect sensitive information throughout the acquisition process. OSA will provide that capability and provide contracts personnel who have the appropriate clearances to understand the requirements and see the deliverables for these programs. This is a new office that is being created in FY 2010, there is no base level funding for the initiative. The Office of the Chief Procurement Officer requested 24 positions (12 FTE) and \$9.0 million to establish an office to provide contracting support for DHS's classified programs. Approximately \$4.0 million of the request is associated with the salaries and benefits for 24 FTP (12 FTE). The remainder of the requested funding (\$5.0 million) constructs the secure infrastructure and procures the secure equipment required to process classified contracting actions.

Impact on Performance (Relationship of Increase to Strategic Goals)

While OSA is located within OCPO, it provides contracting services that benefit the entire department. OSA will protect sensitive data in the acquisition process and support the directive to award contracts on a firm fixed priced basis using competitive processes. While awarding classified contracts cannot be as transparent as unclassified procurements, OSA will maximize visibility without sacrificing security.

By executing classified contracts within a secure infrastructure, OSA will prevent DHS classified programs from being vulnerable to compromise. Critical DHS initiatives, including Cyber Security,

Intelligence and Analysis programs, and Domestic Nuclear Domestic Office (DNDO) programs, can be subject to improper execution or compromise if they are implemented in an unclassified environment. The funding will provide for the building out a minimum level (Sensitive Compartmented Information Facility (SCIF) area to house the 24 Contracting Officers/Contracting Specialists with a “storage area” for secure documents as this infrastructure does not currently exist anywhere within DHS. This will also provide for information technology modifications, secure telephones and GSA approved safes. This new office within OCPO fills a significant gap at DHS. Tailored business support for classified programs, consolidated under Management, will ensure the integrity of the process and unify and strengthen DHS operations and management.

Program Increase 6: Acquisition Program Management Division

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of the Chief Procurement Officer

Program Increase: Positions 20 FTE 10 Dollars \$9,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							18	18	4,653
Program Increase							20	10	\$9,000
Total Request	0	0	0	18	9	\$3,100	38	28	\$13,653

Description of Item

The Acquisition Program Management Division (APMD), located in the Office of the Chief Procurement Officer (OCPO), provides the acquisition policy and oversight for DHS’ acquisition programs. The FY 2010 budget request (\$9million) includes 20 additional governmental positions (10 FTE). While APMD is in the OCPO, it provides a service to all of the acquisition programs throughout the Department and assists in the OMB oversight of the cost, schedule and performance of the government’s major programs. These positions with the associated funding allow the Acquisition Program Management Division (APMD) to expand its oversight and support services to cover the entire portfolio of DHS’s major acquisition programs and initiatives.

Justification

Specifically, the APMD team creates the DHS process for review and analysis of each major program, provides support and assistance for programs before they become over budget or behind schedule and creates a structure to ensure that DHS acquires the correct capability to meet its mission. The team provides non-advocate assessments to DHS leadership in support of critical investment and acquisition decisions, performs oversight of program execution (conceptualization, initiation, design, development, test, contracting, production, deployment, logistics support, modification, and disposal), performs detailed reviews of major programs, provides advise and council to program management offices, and establishes acquisition policies and procedures.

OCPO requires these additional positions and funding to ensure that the Acquisition Program Management Division is fully staffed to execute its role of improving departmental acquisition performance while providing effective departmental governance and focused support to DHS's acquisition initiatives. Additionally, the FY 2010 request begins the implementation of sound and credible Life Cycle Cost Estimating best practices within DHS acquisition programs. These services will directly result in more accurate budget projections and reduced program cost overruns.

Approximately \$4.0 million of the request supports the salaries, benefits and expenses for the 20 requested additional government positions (10 FTE). The remainder of the funds provides critical unique acquisition support from Systems Engineering and Development Institute (SEDI), and Studies and Analyses Institute (SAI), Federally Funded Research and Development Centers (FFRDC) analysts. The additional resources will provide for the annual review of more than 30 of the Department's approximately 67 major programs, which are the fundamental mechanism by which DHS leadership exercises its acquisition governance responsibilities, and are required by the Department's acquisition policy. The review these programs, and the provision of the comprehensive support services detailed below to programs, will prevent the continuation of the unsatisfactory Departmental acquisition governance and overall performance noted in multiple GAO reports, DHS IG reports, and Congressional hearings.

Impact on Performance (Relationship of Increase to Strategic Goals)

This funding fully implements the Department wide Acquisition Program Management governance structure of systems, supplies, and services to synergize, strengthen, and unify all of DHS's operations and management functions. DHS currently has roughly 50 major acquisition programs that represent a Department investment of over \$55.0 billion in acquisition cost and \$86.0 billion in life cycle cost. This funding completes a team of highly experienced and specialized experts to proactively manage the acquisition portfolio. The similar function performed within the Department of Defense is staffed with more than 600 people; however, DHS requires only a 10th of the staffing and support due to the reduced number of major programs and the proposed streamline structure for program management.

The Division ensures that the Department's mission critical acquisition programs meet DHS mission requirements, progress as planned, and satisfy statutory and regulatory requirements in an efficient and effective manner. This team is vital in ensuring that the Department is a good steward of taxpayer dollars.

Program Increase 7: Personnel Security Adjudication Team

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of Chief Security Officer

Program Increase: Positions 9 FTE 5 Dollars \$3,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars	Pos	FTE	Dollars	Pos	FTE	Dollars

			(\$000)			(\$000)			(\$000)
Current Services Level							23	23	11,493
Program Increase							9	5	3,000
Total Request	23	23	10,029	23	23	11,239	32	28	14,493

Description of Item

The Office of Security (OS) requests 12 positions, 6 FTE and \$3 million to create a Personnel Security Adjudication Team. The resource breakout includes \$1 million for positions and \$2 million in additional funding for background investigations.

Justification

OS will create a DHS Personnel Security Adjudication Team for deployment across the Department to address background investigations and adjudicative surges in response to critical Department hiring requirements. The adjudication team will be stationed at Headquarters, but will be available to provide adjudication services to the Department and will be temporarily assigned to components. This team will provide expert assets capabilities during extraordinary program demands, as well as trained personnel to adjudicate clearance cases across the Department.

DHS Headquarters has experienced a surge in Federal employee hiring and contract changes which resulted in an influx of contract personnel. This surge in hiring creates a backlog in the personnel security clearance process leading to delays in the hiring of Federal employees or postponement of contractor reporting dates. The requested \$2.0 million increase will provide the necessary funding to cover the increased number of background investigations for the security clearance and suitability purposes.

The Personnel Security Adjudication Team duties when assigned to a component would be to adjudicate the sudden increase of background investigations created by the mandates or disasters.

The Personnel Security Adjudication Team duties when not assigned to a component for surge help would be to assist DHS Headquarters Personnel Security Division (PSD) adjudicate the ever increasing volume of completed background investigations. The Team would adjudicate contractor investigations, suitability, national security, HSPD-12, state, local and private sector investigations, and reinvestigations.

Impact on Performance (Relationship of Increase to Strategic Goals)

In FY 2010 OS has no available programmatic performance change to cover the cost of this proposed increase. OS needs these resources to maintain expected performance outcome within the PSD.

Program Increase 8: Special Access Program Control Office (SAPCO) Staffing

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of Chief Security Officer

Program Increase: Positions 20 FTE 10 Dollars \$5,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars	Pos	FTE	Dollars	Pos	FTE	Dollars

			(\$000)			(\$000)			(\$000)
Current Services Level							0	0	\$0
Program Increase							20	10	5,000
Total Request	0	0	\$0	0	0	\$0	20	10	\$5,000

Description of Item

The Office of Security (OS) requests 20 positions, 10 FTE and \$5.0 million to create a Special Access Program Control Office (SAPCO) and to expand Sensitive Compartmented Information (SCI) Oversight.

Justification

OS requests \$2.0 million for the 20 positions, \$2.0 million for a SAPCO IT systems, and \$1.0 million for office space.

The objective of the Special Access Program Control Office (SAPCO) is to develop and implement procedures for Special Access Program (SAP) governance across the Department and its Components and to provide security management oversight for DHS SAPs. Funding identified in FY 2010 will provide OS the necessary personnel to adequately staff the office and the physical resources required to effectively carry out its assigned mission. This initiative will also ensure that the Departmental SCI compliance activities are controlled and managed in an objective and independent way and assume responsibility for the Directorate Security Officers currently under the control of S&T, DNDO and I&A.

It is imperative that DHS protect SAP and SCI programs within the Department. SAP and SCI performance impact is associated with the increased workload created by the operational needs of Department. If a SAP is created in the Department or a component, then OS must have the technology and personnel to protect this program. If the Department or component generates or uses SCI, then once again OS must have the resources to protect this information. DHS SAP and SCI functions are driven by the development of programs designed to protect the homeland. Without these resources, OS will be unable to protect the programs designed to protect the homeland.

This funding initiative also provides for the implementation of a secure information technology (IT) solution for the SAPCO. This IT system would be accredited for multilevel processing of SAP information ‘at the desk-top’ and provide connectivity between DHS Headquarters, its Components, and other Executive Branch departments and agencies that intend to partner in the DHS mission. System development will be coordinated with the Office of the Chief Information Officer, and will fit into the current IT infrastructure.

Impact on Performance (Relationship of Increase to Strategic Goals)

OS requires the requested funding to conduct this critical security function. Without these resources, OS will not be able to manage the DHS SAP and SCI functions across DHS.

Program Increase 9: HSPD-12 Card Issuance

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Organization: Office of Chief Security Officer

Program Increase: Positions 0 FTE 0 Dollars \$25,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	25,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$25,000

Description of Item

The Office of Security (OS) requests \$25.0 million for the HSPD-12 Card Issuance Program.

Justification

Funds are needed to demonstrate a unified and collaborative DHS-wide effort through a component supported, centrally managed deployment approach to HSPD-12. This will help gain significant economies of scale, reducing overall program cost, through the use of shared resources and coordinated planning across components and will establish a performance based acquisition strategy that enables the Department to meet DHS and OMB milestones and timelines.

OMB has mandated the implementation of HSPD-12, requiring the issuance of smartcards to all Federal employees and contractors. The DHS deadline is October 2010. DHS cannot meet this goal without the FY 2010 requested increase of \$25.0 million. In addition to meeting the Presidential Directive mandate, implementation of HSPD-12 is critical to improving the DHS physical and cyber security posture. The smartcards will enable:

1. Assured personal identification;
2. Increased physical security; and
3. Securing of DHS networks, systems and data through smartcard logical access

The requested funds will be used to provide enterprise PKI certificates, procure enrollment / card issuance work stations, card stock, and required support for the issuance of over 300,000 smartcards by October 2010.

Impact on Performance (Relationship of Increase to Strategic Goals)

Fully implementing HSPD-12 will allow DHS to close existing and emerging threat avenues for physical and cyber attack and secure DHS critical facilities, networks, systems and data, which hinder and delay DHS's ability to secure the homeland from man-made threats and hazards.

Completion of smartcard issuance efforts will provide the infrastructure and baseline technology to support other DHS security programs. The security features of the smartcard will improve access control for DHS facilities and IT systems. The smartcard will enable DHS to more easily detect and prevent unauthorized access and to identify fraudulent or expired credentials. Additionally, implementation of the smartcard and related technologies will benefit DHS by:

- Establishing a platform for identity and access management using three factors to validate a person's identity: something you have (e.g., a token - DHS Personal Identity Verification (PIV) card); something you know (such as a PIN or password), and something that physically identifies you (e.g., a biometric, fingerprints);
- Improving physical security of DHS facilities by enabling real-time authentication of credentials and security clearances; and
- Improving DHS' preparedness and emergency response capability by identifying first responders and armed law enforcement officers.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security
Departmental Management and Operations
Justification of Proposed Changes in Under Secretary for Management
Appropriation Language

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), [\$191,793,000]\$337,990,000, of which not to exceed \$3,000 shall be for official reception and representation expenses: *Provided*, That of the total amount, \$6,000,000 shall remain available until expended solely for the alteration and improvement of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations at the Nebraska Avenue Complex; and \$17,131,000 shall remain available until expended for the Human Resources Information Technology program.

PPA Mission Statement

The Immediate Office of the Under Secretary of Management (OUSM) ensures the Under Secretary for Management (USM) offices function effectively and efficiently in support of both the Department as a whole and the USM offices itself. The requested funding will allow the OUSM to manage the workload of the USM offices, respond quickly to queries from within and outside the Department, and further our efforts for functional integration.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$1,465	\$1,489	\$1,706	\$217

The FY 2010 request includes an increase of salaries and benefits of \$217,000 which represents the annualization of the 2009 pay raise at 3.9 percent and calculates the 2010 pay raise at 2.0 percent. The OUSM personnel ensures the management integration and transformation process, as well as the transition process for the efficient consolidation of functions and personnel in the Department.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Travel	\$24	\$4	\$12	\$8

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. FY2010 increase is due to anticipated mission critical travel.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
GSA rent	\$107	\$262	\$266	\$4

GSA Rent is estimated at \$266,000 and includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Printing	\$1	\$1	\$1	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$603	\$456	\$443	(\$13)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The resources for FY 2010 support the management integration and transformation process, as well as the transition process.

	2008	2009	2010	2009 - 2010
	Actual	President's Budget	Request	Change
Purchase from Government Accounts	\$230	\$431	\$425	(\$6)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified, as well as cost reimbursements for the Working Capital Fund (WCF). The FY2010 request is \$6,000 less than FY2009 due to a reduction in services requested.

	Actual	President's Budget	Request	Change
Medical Care	\$1	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2008	2009	2010	2009 - 2010
	Actual	President's Budget	Request	Change
Supplies & materials	\$10	\$11	\$11	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

PPA Mission Statement

To streamline departmental administrative functions and create a unified Department of Homeland Security, we will continue to find, design, renovate, improve, and secure a minimum number of DHS Headquarters facilities. The St. Elizabeth's project will consolidate executive program leadership of the Department in a secure setting for policy, management and operational coordination to facilitate the incident management functions and command and control capabilities. It will foster a "one-DHS" culture and enhance the flow/fusion of information while optimizing our prevention and response capabilities across the spectrum of operations.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 - 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$0	\$0	\$75,000	\$75,000

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FY2010 request required to lease and complete the tenant and security improvements for Phase 1, and 50% of phase 2, of the Mission Support Consolidation in a leased commercial office building.

PPA Mission Statement

The OCPO reports directly to the Under Secretary for Management, and is responsible for overall management, administration and oversight assistance, strategic sourcing and competitive sourcing programs. Functions of the OCPO include: Acquisition Policy; Competitive Sourcing and Privatization: Responsible for the Department's implementation of the Federal Activities Inventory Reform, Circular A-76, and the President's Management Agenda (PMA) Competitive Sourcing Initiative; Strategic Sourcing and Acquisitions Systems: Responsible for managing the DHS strategic sourcing program and acquisition systems and data management.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Salaries and Benefits	\$12,573	\$24,447	\$49,753	\$25,306

Salaries and Benefits (29% of salaries) includes costs for 282 FTEs. This represents an increase of 98 FTE over the FY2009 request. The FY 2010 request annualizes 26 OCPO FTE, an additional 10 FTE for the Acquisition Program Management Division; an additional 50 FTE for the Acquisition Workforce Intern Program, and an additional 12 FTE for Select Acquisition Transactions.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Travel	236	290	\$290	\$0

Travel costs for FY2010 represent travel for formal training for interns and other program requirements including Investment Review Boards (IRBs), policy and oversight reviews, and professional and continuing educational training requirements for the

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
GSA rent	927	2,400	\$3,000	\$600

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services on approximately 50,000 sq ft of space in two buildings. We do not anticipate the addition of any new space for the 98 FTE, however, we do anticipate an inflationary increase in rental costs due to the annual increase in rental rates and reduction in the rental subsidy from the Office of Chief Administrative Office

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Printing	33	25	\$34	\$9

We expect to realize some savings in printing costs as the CAO leverages these expenses throughout USM. Printing is now centralized and controlled through CAO and one of the Secretary's efficiency initiatives.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Advisory and Assistance Services	273	2,377	\$3,397	\$1,020

Most of the the advisory and assistance services will be provided by federally funded research and development contracts. These FFRDS provide unique technical guidances, testing and support to the acquisition governance process. The increase in funding is associated with the expansion of the Acquisition Program Management Division (APMD) which initially stood up October 2009. Also, APMD had access to working capital funds during FY 09, but this funding is not available during FY 10 or ..

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Other Services	15,684	6,914	\$7,493	\$579

Most of the other services are associated with training the entire DHS acquisition workforce composed of more than 1,300 professionals. These funds cover developing unique DHS courses and attending commercially available courses that the work force requires to meet certification. DHS centrally manages and funds this activity to promote efficiency and avoid duplicative effort by the DHS Components.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Purchase from Government Accounts	1,331	2,163	\$2,862	\$699

The purchases from other government accounts are interagency agreements primarily with the Defense Acquisition University for acquisition training and for support from OPM to assist in hiring interns into the acquisition intern program.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Medical Care	16	---	---	\$0

OCPO does not have any direct medical care costs.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Operation & Maintenance of equipment	---	39	\$39	\$0

These funds will directly support the maintenance and repair of printers within OCPO and purchase of equipment required to process all of DHS classified contracting actions including unique computers, secure internet/intranet, telecommunication devices and other equipment.

	2008 Actual	2009 Enacted	2010 Request	2009 - 2010 Change
Supplies & materials	260	268	\$300	\$32

Supplies funded to support the DHS purchase card program and to initially support increase in personnel from the FY2009 enacted level. This include office supplies, furniture and fixtures as we modernize existing facilities to fit the additional personnel within the same limited space.

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. .

PPA Mission Statement

The mission of the Office of Security is to secure the Department so the Department can secure the homeland. The Office of Security implements security programs that safeguard DHS personnel, property, facilities, and information. The Office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. Additionally, the Office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

Summary Justification and Explanation of Changes

F. Digest Tables by FYHSP Programs.....	USM - 7

A. Mission and Description of the Under Secretary for Management (USM)

The Office of the Under Secretary for Management delivers quality administrative support services and provides both leadership and oversight for all departmental management functions: information technology; budget and financial management; procurement and acquisition; human capital; and administrative services. The USM delivers departmental customer services, while eliminating redundancies and reducing support costs, with the objective of improving the effective and efficient delivery of business and management services throughout the Department.

The Under Secretary for Management includes the following offices: the Immediate Office for Under Secretary for Management (USM), the Office of the Chief Administrative Officer (CAO), the DHS Consolidated Headquarters Project, the Office of the Chief Human Capital Officer (OHC), the Office of the Chief Procurement Officer (CPO), and the Office of the Chief Security Officer (OS).

B. Major Activities and Key Strategic Issues

In FY 2008, the Under Secretary for Management obligated \$153,025 (309 FTE). This funding supports the necessary functions of leading, directing, and managing the Department. In addition to providing leadership to the Department, the Under Secretary for Management is responsible for the major activities associated with budgeting, appropriations, expenditure of funds, accounting and finance, procurement, human resources and personnel, information technology systems, facilities, property, equipment and other material resources, and the identification and tracking of performance measures aligned with the mission and goals of the Department.

Immediate Office of the Under Secretary for Management: This office obligated \$2,525,000 (8 FTE) in FY 2008 and received \$2,654,000 (13 FTE) in FY 2009 to enable continued management and oversight of Directorate operations and activities. The office requests \$2,864,000 (13 FTE) in FY 2010 to focus on continued functional integration in numerous areas across the Department, and the effort to respond as a Directorate to internal requirements.

Office of the Chief Administrative Officer (OCAO): The Chief Administrative Officer is responsible for a wide variety of activities such as mail screening and delivery, courier services, shuttle and sedan drivers, personal property internal controls, facilities and space planning, occupational health and safety, environmental programs, records and forms management, directives and printing, as well as the Executive Service Center. While these activities work to coordinate and direct these functions across the Department, the office is also responsible for providing operating support for these functions at the headquarters (HQ), where most of the current resources are used.

Historically, the CAO has assigned any increases in staffing into the program areas. As a result, the existing program offices are strained in performing their functions by attempting to perform various administrative and program support duties that provide internal support and coordination. The staff requested will cover a broad range of programs and activities to support overall accountability and performance.

FY 2008 Accomplishments: Funding obligated for FY 2008 was \$37,648,000 (54 FTE). These resources enabled CAO to support HQ operations and start up Organizational Elements, as well as maintain the DHS HQ emergency preparedness program.

FY 2009 Planned Accomplishments: Funding enacted for FY 2009 is \$44,427,000 (73 FTE). Administrative Services will bolster the Headquarters Administrative Operation Support Services in order to better align CAO's organizational structure with DHS Headquarters operations and start up components. CAO will also measure performance for all Administrative Services functions for all components.

FY 2010 Projected Accomplishments: The FY 2010 request is for \$43,491,000 (80 FTE). This will fund current services, including support for shared services, mail screening and delivery for DHS Headquarters, occupational health and safety, and environmental programs. This funding also supports the Enterprise Records Management System initiative.

DHS Headquarters Project: The Headquarters Project supports continued operations at all DHS Headquarters locations, including the Nebraska Avenue Complex.

FY 2008 Accomplishments: Funding obligated for FY 2008 was \$4,485,000. These resources supported Headquarters facilities requirements at multiple locations, including the completion of occupancy plans for the Nebraska Avenue Complex (NAC) and remaining work on security upgrades. This included: security improvements and minor alterations at DHS HQ facilities; planning and initial cost for consolidation of back office functions and organizations; and planning and initial costs for establishing a permanent HQ facility.

FY 2009 Planned Accomplishments: Funding received for FY 2009 is \$6,000,000. CAO will continue to work with GSA to maintain all Headquarters facilities, including the Nebraska Avenue Complex (NAC). Maintaining the NAC will enable the Department to relocate and consolidate those functions that are not scheduled to relocate to St. Elizabeths, ultimately achieving cost savings and further integrating operations.

FY 2010 Projected Accomplishments: The FY 2010 request is for \$6,000,000. This will support continued maintenance for all Headquarters facilities, including the Nebraska Avenue Complex (NAC). CAO plans to make necessary upgrades to mechanical systems, complete necessary building renovations, and make other system improvements.

HS Consolidated Headquarters Project: Although the Department will maintain a presence at the Nebraska Avenue Complex, the facility is not sufficient to support all of the Department's needs. For this reason, the Department plans to secure and strengthen operations by unifying core headquarters facilities with those of operating components. GSA has identified the St. Elizabeths West Campus as the only site available in the National Capital Region to meet the Department's minimum consolidation needs and time requirements. Consolidating will achieve the following objectives: improve mission effectiveness; promote a unified DHS organization; increase organizational efficiency; size the real estate portfolio to accurately fit the mission of DHS; reduce real estate occupancy costs.

Funding for FY 2008 and FY2009 is \$0. CAO worked with GSA to rebase line the construction profile and provided timely information regarding the project to Department and Congressional leadership. CAO also continued design of the first phase of the St. Elizabeths project.

FY 2010 Projected Accomplishments: The FY 2010 program request is for \$75,000,000 (0 FTE). CAO will maintain current leases and provide mission support for the consolidation of DHS Headquarters in line with the St. Elizabeth's West Campus development project.

Office of Human Capital: The Office of Human Capital (OHC) provides overall management and administration of the Department's human resources-related operations. OHC is organized around four major areas (Talent Management & Accountability; Workforce Relations & Performance Culture; Learning & Development; and Recruiting, Staffing and Services) and is responsible for establishing policy and procedures for these areas, as well as providing oversight, guidance and leadership within the Department.

FY 2008 Accomplishments: Funding obligated for FY 2008 was \$21,844,000 (44 FTE). These funds supported activities that began in FY 2006 and enabled OHC to begin implementing the FY 2007-2008 Human Capital Operational Plan (HC Plan), which focuses on five key priorities designed to improve the Department's ability to hire and retain the talent needed to achieve its vital mission. In support of the HC Plan, OHC accomplished much in FY 2008, including: adopting a Department-wide hiring model to increase hiring efficiencies; developing a DHS corporate recruitment strategy; and working with the Partnership for Public Service to create consistent and effective job postings, a corporate brand and tailored marketing language; completed training for over 14,500 supervisors, managers and executives on performance leadership; implementing plans to aggressively address weaknesses indicated by the Federal Human Capital Survey; and deploying the DHS Performance Management Program to approximately 16,000 supervisors, managers and employees.

FY 2009 Planned Accomplishments: Funding received for FY 2009 is \$38,827,000 (79 FTE). These funds will allow OHC to continue ongoing policy and program requirements in each of its four major areas (Talent Management & Accountability; Workforce Relations & Performance Culture; Learning & Development; and Recruiting, Staffing and Services), including the continued implementation of critical HC Plan initiatives. Specifically, OHC will be able to: deploy an enterprise-wide e-Recruitment solution, streamline hiring procedures and implement approved action steps; assess the skill level of employees in mission critical occupations, determine gaps, and institute hiring and retention initiatives; conduct robust diversity outreach activities; provide training for managers and HR professionals on hiring and retention flexibilities; continue leadership succession planning and transition planning efforts; establish targeted DHS recruitment initiatives to attract students, mid-career professionals, senior professionals and veterans; assist the remaining 92,500 non-bargaining (NBU) employees with their transition to the DHS Performance Management Program; continue to respond to organizational weaknesses identified through employee surveys and focus groups; continue building a DHS University system; continue promoting improvements in service excellence, process improvement, metrics and analysis, etc. in order to pursue organizational efficiency and cost avoidance; and assess weaknesses in HR programs across DHS and identify violations through Human Resource Operational Audit and Delegated Examining reviews Department-wide.

FY 2010 Projected Accomplishments: In FY 2010, OHC requests \$44,404,000 (89 FTE). OHC will use this funding to continue to support the Learning and Development Strategy, which seeks to train the workforce through the Preparedness Center, the Leadership Institute, the Homeland Security Academy, and the Center for Academic and Interagency Outreach. OHC will also use requested funding to support the Right-sizing of Human Capital programs. Furthermore, DHS will

invest in diversity, recruitment, and retention programs to ensure the Department has the workforce it needs to achieve its mission.

Chief Procurement Office: The Office of Procurement (CPO) is responsible for the overall management, administration, and oversight of department-wide acquisitions, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The office is responsible for developing DHS acquisition regulations and policies; workforce planning; and oversight and performance management of the CPO infrastructure.

FY 2008 Accomplishments: Funding obligated for FY 2008 was \$31,366,000 (92 FTE). With these resources, CPO implemented the DHS Acquisition Oversight Program and increased support to procurement operations to implement more efficient procurement operations and strategic sourcing teams.

FY 2009 Planned Accomplishments: Funding received for FY 2009 is \$39,003,000 (184 FTE). CPO will build the DHS acquisition workforce, including the DHS Acquisition Workforce Intern Program, and establish an acquisition system whereby each requirement has a well defined mission and a management team.

FY 2010 Projected Accomplishments: CPO requests \$71,038,000 (282 FTE) in FY 2010. CPO plans to continue and grow the Acquisition Workforce Intern Program, implement Acquisition Policy and Oversight for DHS' acquisition programs, support increased needs for Selective Acquisition Transactions, and assume responsibility for Investment Review across the Department.

Office of Security: The mission of the Office of Security (OS) is to lead a collaborative security program to safeguard the Department's personnel, information, and property so the Department may secure the Homeland. Today's complex security environment demands that security operations be effectively structured and integrated into all DHS operations. OS implements department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. Priority initiatives include expediting background investigations and granting security clearances; conducting facility security risk assessments; providing security education and awareness training; and issuing guidance on topics ranging from installing physical security equipment to handling classified information. Additionally, the OS investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

FY 2008 Accomplishments: Funding obligated for FY 2008 was \$55,157,000 (111 FTE). With these resources, OS continued to streamline the personnel security process significantly reducing the average turnaround time for background investigations. OS also implemented Computer Based Training (CBT) covering several security areas, and provided security awareness training to state and local officials.

FY 2009 Planned Accomplishments: Funding received for FY 2009 funding is \$60,882,000 (117 FTE). OS will provide security support at State and Local Fusion Centers to ensure that data shared with state and local partners remains secure. OS will also continue to fully implement HSPD-12, to initiate a transition from a startup to operational mode, and identify and establish minimum security requirements for Federal facilities.

FY 2010 Projected Accomplishments: OS requests \$95,193,000 (138 FTE) for FY 2010. OS plans to bolster its personnel adjudication team to meet increased Departmental needs, support staffing for a Special Access Program Control Office (SAPCO), and continue current services.

C. Resources Requested and Performance Impact

In FY 2010, the Under Secretary for Management requests 699 positions, 602 FTE, and \$337,990,000 for the FY 2010 Request. The total adjustments-to-base is 4 positions, 43 FTE, and \$6,842,000. The program increases include 184 positions, 93 FTE, and \$139,355,000.

Major Changes within the Base level

CAO is transferring \$10,800,000 to OPS for Continuity of Operations oversight. USM is also transferring \$9,000 to the Office of the Secretary and Executive Management for the Secretary's travel.

Increments over current service level

DHS Consolidated Headquarters Project: The FY 2010 request of \$75,000,000 (0 FTE) provides the base level funding to support the DHS Consolidated HQ campus at St. Elizabeth's.

DHS Enterprise Records Management System: The FY2010 request of \$3,100,000 (2 FTE) provides the base level funding to support the implementation of the Enterprise Records Management System.

Office of Human Capital: The FY 2010 request includes an additional \$3,255,000 (4 FTE) to support the initiation of the Right-sizing of Human Capital programs.

Chief Procurement Office: The FY 2010 request includes an additional \$7,000,000 (50 FTE) to continue the DHS Acquisition Workforce Intern Program to recruit, train, certify, and retain an appropriate workforce of acquisition professionals. The CPO also requests \$9,000,000 (12 FTE) to implement Acquisition Policy and Oversight for DHS' acquisition programs, and \$9,000,000 (10 FTE) to support increased needs for Select Acquisition Transactions.

Office of Security (OS): The FY 2010 request includes \$3,000,000 (5 FTE) to bolster its personnel adjudication team to meet increased Departmental needs, \$5,000,000 (10 FTE) to support staffing for a Special Access Program Control Office (SAPCO), and \$25,000,000 (0 FTE) for HSPD-12 Card Issuance program.

D. How USM and Its Performance Goals Align to and Support the DHS Goals and Objectives.

The Under Secretary for Management and its performance goal is followed by the DHS goal it supports.

Under Secretary for Management – Consolidate support services under the control of the Department of Homeland Security in order to maximize management efficiencies and ensure continuity of services in the near term.

Goal 5 – Strengthen and Unify DHS Operations and Management

Strategic Objective 5.1- Improve Department Governance and Management

E. Performance Based Budget Highlights by Program

For each major program, the performance goal, main performance measure/s, indicators, budget including allocation of non-programmatic overhead, and FTE are shown below.

Program: Departmental Management and Operations						
Performance Goal: Provide comprehensive leadership, oversight, and support to all components and improve the efficiency and effectiveness of the Department and its business and management services.						
DHS strategic objectives supported and % allocation of activities: 5.1 Improve Department Governance and Performance, 100% Allocation						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$147,853	\$167,147	\$149,540	\$153,025	\$191,793	\$337,990
FTE	173	265	283	309	466	602

Performance Plan Measures

Measure: Attrition rate for career Senior Executive Service personnel						
Description of Measure: This measure reflects the number of career Senior Executive Service who depart from the Department of Homeland Security due to retirements, transfers, resignations, and deaths. The Senior Executive Service plays a critical role as a central coordinating point between the Government's political leadership which sets the political agenda and the line workers who implement it. Managing the attrition rate for the Senior Executive Service is critical to maintaining a cadre of qualified leaders.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	11.5%	10.5%	10%
Actual:	None	None	None	11%	N/A	N/A

Measure: Number of civilian employees serving in the DHS interagency and intradepartmental Rotation Training Program						
Description of Measure: This measure counts the number of Department of Homeland Security (DHS) Federal civilian employees who are serving in various rotational assignments as part of their career development program. The measure captures the extent to which a cadre of future leaders is being developed with a unified culture of "Team DHS" and broad exposure to the various missions, goals, and responsibilities of the organization. It is expected that serving in Rotational Assignments will enable future Department leaders to lead a more unified and collaborative effort to secure America.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	265	530	795
Actual:	None	None	None	None	N/A	N/A

Measure: Percent of civilian employees in designated positions that are qualified as National Security Professionals						
Description of Measure: This measure reflects the percent of civilian Federal employees within the Department of Homeland Security serving in National Security Professional designated positions that have completed baseline (Level 1) Awareness training. National Security Professionals fill mission - essential/critical duty positions due to their involvement in incidents of regional and national significance, and are responsible for developing national security strategies, creating plans to implement those strategies, and executing common missions in						

support of national objectives. By completing Awareness training, these individuals gain a basic exposure to a variety of key topics to prepare them to understand the authorities, missions, requirement, capabilities and operations associated with preparing for and responding to an emergency.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	None	30%	60%
Actual:	None	None	None	None	N/A	N/A

Measure: Percent of favorable responses by DHS employees on the annual employee survey

Description of Measure: This measure reflects the average percent of positive responses to the 39 questions which make up the four Human Capital Assessment and Accountability Framework Indices (HCAAF) on the annual employee survey. The U.S. Office of Personnel Management (OPM) has determined the make up of the four HCAAF Indices as: Leadership and Knowledge Management; Results - Oriented Performance Culture; Talent Management; and Job Satisfaction. Employee surveys are conducted annually to gauge employees' perceptions on whether they are effectively led and managed, if they have opportunities to grow professionally and advance in their careers, and if their contributions are valued and recognized. The OPM conducts this survey during even - numbered years and the identical survey is administered by the DHS during the odd - numbered years. The survey results are used by DHS agency managers to address human capital management issues and improve agency performance in these areas.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	50%	51%	52%
Actual:	None	None	None	50%	N/A	N/A

Measure: Percent of DHS workforce (employees and contractors) with advanced identification cards

Description of Measure: This measure indicates the percent of Department of Homeland Security federal employees and contractors that have been issued Personal Identify Verification cards with advanced features. Advanced identification cards are outfitted with a microchip that stores personal information, including biometric data (such as fingerprints) that can be read automatically by a card reader to check information against a database. If a match is verified and the person has been granted appropriate permissions, the person is permitted entry into a government facility and/or can log on to a computer workstation. This effort is being undertaken to comply with Homeland Security Presidential Directive - 12 (HSPD - 12) in order to ensure that government facilities and sensitive information stored in them are secure.

Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	New	20%	63%
Actual:	None	None	None	None	N/A	N/A

BUDGET REQUEST AND SUPPORTING INFORMATION

DEPARTMENT OF HOMELAND SECURITY DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE CHIEF FINANCIAL OFFICER

I. Appropriation Overview

A. Mission Statement for the Office of the Chief Financial Officer (OCFO):

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

The DHS OCFO goals are:

1. To provide greater visibility into DHS' financial activity, through timely, accurate, and useful financial related data.
2. To improve systems and processes eventually leading to sustainable clean audit opinions.
3. To provide reasonable assurance about our internal controls over financial reporting.
4. To provide efficient financial management services.
5. To integrate the budget process with the policy and planning process.
6. To support the Under Secretary for Management and business line chiefs by supporting integration and standardization of our resource management systems.

B. Budget Activities:

Under the OCFO, the following Divisions fulfill these functions:

Program Analysis and Evaluation (PA&E):

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to United States homeland security objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;
- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs;
- Oversee preparation of the DHS performance plan and other performance reporting;
- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Program Improvement Officer (PIO) in order to supervise performance management activities; provide advice on program performance goals, convene responsible parties to assess and improve program performance, and guide the use of performance measures in personnel performance appraisals;
- Provide leadership in developing and promoting improved analytical tools and methods for analyzing homeland security planning and the allocation of resources;

- Establish policies for, and oversee the integration of, the planning, programming, and budgeting system of the Department; and
- Coordinate with and support the Office of Policy on DHS long-term strategic planning.

Budget:

- Responsible for the Departmental budget, appropriations, and expenditures of funds;
- Coordinate with PA&E to formulate annual budget submissions, assure these properly reflect the requirements of DHS, and assist in the presentation and defense of submissions to OMB and Congress;
- Assist PA&E with preparation of the FYHSP;
- Coordinate and review budget execution for each component and appropriation, at the macro level; conduct spend plan and execution reviews; and act on requests for modifications;
- Conduct special studies and analyses of execution of financial plans and recommends reprogrammings necessary for effective funds utilization;
- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Administer funds not specifically allotted to other component of DHS, such as the Pandemic Influenza Supplemental;
- Coordinate with the Office of Legislative Affairs in preparing for Congressional hearings;
- Track status of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of budget-related materials among the components and in accordance with OMB or Congressional guidance;
- Manage and coordinate Components entering their budgets into the President's electronic on-line MAX (budget preparation) data system;
- Analyze and review pending legislation, reports to Congress, testimony, and other documents for budgetary impact; and
- Coordinate and review apportionments, reappropriations, and allotments for all appropriations across all components.

Office of Financial Operations:

- Oversee all aspects of Budget Formulation and Execution for all Title I offices under the DHS appropriation (OSEM and USM);
- Oversee all aspects of Budget Formulation and Execution for OCFO;
- Coordinate and review apportionments, reappropriations, and allotments for OSEM, USM, and OCFO offices;
- Invoice, IPAC and travel processing;
- General Ledger management for Title I accounts;
- Management and oversight of the Working Capital Fund (WCF) DHS wide;
- Coordinate WCF Governance Board meetings;
- Accounting and financial reporting for all Title I accounts;
- Management of the DHS headquarters Bankcard program;
- Assurance of internal controls to include, developing Mission Action Plans, implementing internal controls, risk assessments and compliance activities;
- Perform internal audits and audit follow-up;
- Oversight of interagency agreements;
- Provide management and oversight of financial systems;
- Review content and coordinate Congressional briefings for OSEM, USM, and OCFO offices;

- Analyze and review pending legislation, reports to Congress, testimony, and other documents for budgetary impact for all Title I offices;
- Funds certification for purchase requisitions, training forms, and travel authorizations; and
- Perform payroll reconciliation and reclassifications for OSEM, USM, and OCFO offices.

Office of Financial Management:

- Responsible for the development and oversight of Departmental financial management policy; coordination of government-wide financial management initiatives in the Department;
- Prepare the Department's consolidated financial statements and other required financial information due to OMB and Treasury, including the Annual Financial Report at year end;
- Provide guidance and oversight to DHS components on accounting and financial reporting requirements, and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report;
- Administers the DHS Bankcard (purchase, travel, and fleet) Program, develops and documents bankcard policy, provides training and establishes and maintains internal control to provide reasonable assurance that the goals and objectives of the Bankcard Program are met and safeguards against fraudulent, improper, abuse, and untimely payment are identified on a timely basis and appropriate corrective action is taken.

Resource Management Transformation Office (RMTO):

- Manage system transformation projects to increase efficiencies, data reliability and financial transparency across DHS;
- Lead the effort to consolidate financial management systems with a focus on standardizing and centralizing business processes, moving to a single OMB-compliant accounting system, facilitating clean audit opinions and utilizing business intelligence tools to yield timely and accurate financial data;
- Serve as the program management office (PMO) providing day-to-day project management and communications with stakeholders for the following DHS initiatives:
 1. Transformation and Systems Consolidation (TASC)
 2. E-Gov Travel Implementation
 3. Business Intelligence/DHS Treasury Information Executive Repository (DHSTIER)

Departmental Audit Liaison:

- Coordinate the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings;
- Track audit recommendations and the Department's implementation of those recommendations;
- Provide oversight and guidance to component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

Internal Control Management Office:

- Implement the Federal Managers' Financial Integrity Act and its guidelines, OMB Circular A-123, *Management's Responsibility for Internal Control*; the Chief Financial Officers Act; the DHS Financial Accountability Act;
- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;

- Direct the Department’s efforts to implement the Improper Payments Information Act;
- Issue guidance on, and coordinate preparation of, the Secretary’s year-end Internal Control Assurance Statements;
- Conduct reviews of key financial processes to ensure internal controls are operating effectively, with the goal of identifying weaknesses before they become problems.

Grants Policy and Oversight Division:

- Represent DHS on the government-wide CFO Council Grants Policy Committee and other committees that set government-wide grant management policy;
- Represent DHS on government-wide OMB A-133 audit initiatives, ensure compliance, and track implementation of corrective actions for audit findings and review/process recommendations and management decisions for the thousands of audits submitted annually;
- Draft, communicate, and implement DHS grant policy, and notify components of statutory/regulatory changes through Grant Alerts;
- Establish standards “Terms and Conditions” for DHS assistance awards and provide guidance for and oversight for the use of “Special Terms and Conditions” associated with assistance awards;
- Collect and maintain grants and assistance award data, monitor close-out status, and assist DHS component grants awarding offices in closing out delinquent assistance awards;
- Analyze requirements, research, and draft responses to OMB and Congressional inquiries, Questions for the Record, and reports related to DHS grants;
- Assist DHS component grants management staff, through policy and guidance, on appropriate action to address customer service inquiries and requests;
- Develop and maintain training for DHS component grants management staff, and ensure DHS component-developed training is compliant with government-wide and DHS requirements;
- Manage and ensure that the integrity of the DHS’ grants and other assistance awards information submitted to the government-wide web sites, e.g. Catalog of Federal Domestic Assistance, Grants.gov, Federal Funding Accountability and Transparency Act, Federal Assistance Award Data System, is in compliance with the e-Gov initiatives’ requirements;
- Advise senior DHS leadership on DHS and government-wide statutes, regulations, OMB circulars, and Executive Orders related to grants management activities.

Workforce Development Division:

- Provide the training and tools to support excellence in personal performance, career path development, and to execute talent management initiatives to recruit the next generation of OCFO leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS;
- Create a pipeline of strong candidates for senior financial management leadership roles at DHS, specifically the CFO and Deputy CFO positions.

C. Budget Request Summary:

The OCFO requests 183 positions, 173 FTE, and \$65,530,000 for FY 2010. The total adjustments-to-base are 24 FTE and \$4.800 million. The program increases include 20 positions, 10 FTE, and \$5.495 million to improve financial accountability for the Department.

2010 Program Change	20	10	5,495
2010 Request	183	173	65,530
Total Change 2009-2010	20	34	10,295

The Office of the Chief Financial Officer (OCFO) requests \$65,530 million. This is an increase of \$10.295 million over FY 2009 for pay and non-pay inflation as well as program increases in OCFO to improve financial accountability.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Chief Financial Officer (OCFO) has made significant progress leading improvement to financial management at DHS.

In FY 2008, the OCFO:

- Institutionalized the DHS CFO New Hire Orientation and the CFO Mentorship Program across the DHS financial management community;
- Developed a comprehensive, web-based DHS Financial Management Policy Manual;
- Issued a second edition of the DHS Internal Control Playbook that presents DHS' multi-year plan to assess internal control over financial reporting, and includes corrective action plans with measurable, achievable milestones to remediate material weaknesses and other significant conditions. For the first time, Mission Action Plans to integrate corrective actions for operational areas were included in the Playbook;
- Progressed from a statement of no assurance in internal controls by the Secretary to the President and Congress in FY 2005, to an assurance on the design effectiveness of internal controls in FY 2008;
- Provided department-wide corrective action oversight to reduce from 16 to 13, the number of Component conditions that contributed to material weakness conditions;
- Delivered 1,780 Questions for the Record (QFRs) to Congress within one month;
- Established the Program Review Board (PRB), chaired by the Deputy Secretary and composed of senior career leadership of each Component, which institutionalized an analytically-based, open and transparent Program and Budget Review process;
- Produced the first ever Highlights Report and Annual Performance Report which summarized performance and financial information for DHS. These reports were recognized as greatly enhancing the delivery of performance and accountability information to the American public by the Mercatus Center at George Mason University, which ranked DHS number 5 among the 24 Federal Agencies in their 9th Annual Performance Report Scorecard;
- Managed and processed approximately 225 GAO audits; and

- Initiated legislative change proposal to allow Working Capital Funds to be carried over and establish reprogramming thresholds.

In FY 2009, the OCFO plans to:

- Continue refining and expanding DHS financial management community human capital initiatives (New Hire Orientation, CFO Mentorship Program, Financial Management Fellowship) to improve human capital capabilities and build a common culture;
- Expand and refine the DHS Financial Management Policy Manual, and publish a printed version;
- Continue regular internal assurance audits to identify vulnerabilities to waste, fraud, and abuse, and develop and strengthen internal controls;
- Build the Department's grants management and oversight function to issue policy, conduct audits mandated by the *Single Audit Act*, and monitor DHS grants and assistance awards of approximately \$20 billion;
- Provide leadership and analytical support for the Quadrennial Homeland Security Review (QHSR);
- Implement the Budget Formulation Execution Manager (BFEM) pilot at the Department level. BFEM supports internal budget decision-making, production of agency submissions to OMB, Congressional Justifications (CJs), and other documents through a web-based platform that includes a central repository for all numbers and narrative text;
- Establish and stand up the Office of Financial Operations;
- Establish and stand up the Working Capital Fund (WCF) Governance Board;
- Perform an in-depth review of all WCF activities; and
- Implement E-travel for DHS headquarters.

In FY 2010, the OCFO plans to:

- Continue regular internal assurance audits to identify vulnerabilities to waste, fraud, and abuse, and develop and strengthen internal controls;
- Conduct approximately seven independent program reviews in order to evaluate and assess issues such as true costs and benefits of programs within the Department;
- Improve the Department's processes for the verification and validation of performance measurement information;
- Enable the Secretary to sign an assurance statement to the President and Congress on the operating effectiveness of DHS internal controls over financial reporting;
- Complete CFO business intelligence dashboard including robust ad hoc capability and budget execution reports at the PPA level;
- Full implementation of the Budget Formulation Execution Manager throughout the DHS financial management community. BFEM improves the efficiency and effectiveness of agency and central processes for formulating and executing the Federal Budget;
- Develop and publish standardized criteria for the WCF.

IV. Program Justification of Changes

**Department of Homeland Security
Departmental Operations and Management
Office of the Chief Financial Officer
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Improve Financial Accountability

Strategic Goal(s) & Objective(s): Strengthen and Unify DHS Operations and Management

Program Increase: Positions 20 FTE 10 Dollars \$5,495

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							20	10	\$5,495
Total Request							20	10	\$5,495

Description of Item

This program increase provides 20 Positions (10 FTE) and \$5.495 million for increased staffing in Budget, Office of Financial Management, and Internal Control Divisions of OCFO. This increased funding will also enable the OCFO to meet the demands of reviewing and conducting independent analysis for the majority of programs within DHS.

Justification

The increase of 20 Positions (10 FTE) is requested to improve financial accountability within the Department. The most pressing needs for additional FTE in the OCFO are:

- 1) Office of Financial Management – The increase is requested to develop a Department-wide management assurance team that will proactively identify and correct emerging financial management, reporting, and internal control issues throughout DHS. Also, continued progress in the financial audit will require additional staff to prepare potentially two sets of financial statements (DHS-all and civilian components-only), while the scope of financial audits will be increasing at the same time.
- 2) Internal Control – OMB Circular A-123 requires agencies to establish strong internal controls over operations. Resources are requested to identify and strengthen internal controls in programs, both at Headquarters and component levels. By using an integrated internal control framework to assess the risk of a program in not meeting its goals and objectives and to focus on vulnerable programs, the Department will be able to better address and remedy GAO/IG high risk and management challenge areas.
- 3) Budget Division – The request will allow the Budget Division to increase staffing and provide a more thorough analysis of components' requests and execution of their appropriations, better integrate the budget and planning processes, as well as to develop and implement improved strategies to support DHS leadership, OMB and appropriators.

- 4) Funding is also requested for the Office of Program Analysis and Evaluation (PA&E) to support a series of external evaluations of programs to be conducted periodically by Federally Funded Research and Development Centers or other independent parties outside the Department. External reviews, above and beyond internal evaluation alone, will systematically improve DHS programs by ensuring that they accomplish their intended purpose and by contributing to a better understanding of true program costs and benefits. Congressional interest and support for conducting independent peer reviewed evaluations is keen. Incorporating external evaluations as an ongoing learning and management tool will help to improve the operations of the Department, resource allocation decision making, and audit effectiveness.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested program increase supports DHS Strategic Goal 5 – Strengthen and Unify DHS Operations and Management.

By improving financial management in the Department, the OFCO supports the accountability, efficiency, and economy of all DHS components and enabling maximum direction of resources toward the Homeland Security mission.

Currently, the Department manages 68 publicly reported programs across all Components. DHS is requesting resources for PA&E to contract for independent analysis conducted by objective external entities, a cornerstone of analytical work in similar PA&E organizations such as the Department of Defense. Absent this funding, program information provided to Department leadership, the Administration, and Congress on key analytical issues and the ability to assess the impact of these programs may be limited.

Mission Statement

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department’s budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department’s mission are obtained, allocated, and expended in accordance with the Department’s priorities and relevant law and policies.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$14,838	\$20,162	\$25,062	\$4,900

Salaries and Benefits includes costs for 173 FTEs. The FY 2010 request includes an increase of \$302,000 for the proposed January 2010 increase in personnel compensation, \$197,000 in annualization for the proposed January 2009 increase in personnel compensation, \$2,508,000 for the annualization of prior year funding, and a program increase of \$1,893,000 to improve financial accountability.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$272	\$370	\$398	\$28

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes \$28,000 for OCFO's initiative to improve financial accountability.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$4	\$0	\$0	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services related to the transportation of things. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$584	\$2,219	\$2,219	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$190	\$216	\$216	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes no change.

	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$10,571	\$26,648	\$30,014	\$3,366

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes a program increase of \$3,366,000 to improve financial accountability.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$581	\$515	\$597	\$82

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes an increase of \$82,000 for OCFO's initiative to improve financial accountability.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$3,274	\$4,150	\$5,947	\$1,797

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes increases of \$1.793 million for adjustments to the Working Capital Fund and \$4,000 for OCFO's initiative to improve financial accountability.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$194	\$264	\$279	\$15

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes a program increase of \$15,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$282	\$313	\$385	\$72

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes a program increase of \$72,000.

A. Mission and Description of Component.....	OCFO-1
B. Major Activities and Key Strategic Goals.....	OCFO-1
C. Resources Requested and Performance Impact.....	OCFO-1
D. How Programs and their Performance Goals Align to and Support DHS Goals and Objectives.....	OCFO-2
E. Performance Based Budget Highlights by Program.....	OCFO-3
F. Digest Tables by FYHSP Programs.....	OCFO-4

A. Mission and Description of the Office of the Chief Financial Officer (OCFO)

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

The OCFO has nine divisions: Budget; Program Analysis and Evaluation; Office of Financial Operations; Financial Management and Policy; Resource Management Transformation (Financial Systems); Internal Control Management; Grants Policy and Oversight; Departmental Audit Liaison and Workforce Development. The FY 2010 budget request has resources for 183 positions, primarily in the following occupational series: budget analyst, management and program analyst, staff accountant, systems accountant; financial analyst; and auditor.

B. Major Activities and Key Strategic Goals

The OCFO received an appropriation of \$55.235 million for FY 2009. The OCFO is using these funds to ensure that resources needed to accomplish the DHS missions are obtained and expended in accordance with law, OMB guidance, and Congressional intent. Further, the OCFO is improving DHS financial management practices and strengthening internal controls to ensure that DHS is an effective steward of public resources.

In FY 2009, the OCFO is expanding human capital improvement initiatives for the DHS financial management community; developing and publishing a comprehensive DHS financial management policy manual; providing assurance through regular internal audits of key financial management processes, implementing actions to remediate financial statement audit and internal control material weaknesses; and continuing to lead the Department's resource management systems transformation by migrating DHS components to robust, integrated systems that produce useful management information.

In FY 2010, the OCFO will further these efforts and will refine and expand DHS financial management community human capital initiatives that strengthen our organizational culture and identity; update the financial management policy manual and improve consistency of handling financial transactions and processes across the DHS enterprise; eliminate many internal control and financial audit weaknesses; migrate more DHS components to modern resource management systems, enable improved decisionmaking through business intelligence tools; and continue identifying vulnerabilities to fraud, waste, and abuse through internal assurance reviews and developing and strengthening internal controls to prevent fraud, waste, and abuse. Further OCFO will continue to build the Department's grants management and oversight function to issue policy, conduct audits mandated by the *Single Audit Act*, and monitor DHS grants and assistance awards of approximately \$20 billion; and provide leadership and analytical support for the Quadrennial Homeland Security Review (QHSR).

C. Resources Requested and Performance Impact

Major changes within the base level: The budget request for FY 2010 for the Office of the Chief Financial Officer contains the following major changes within base level:

- Pay inflation, Annualization of prior year funding, and Annualization of the 2009 pay increase of \$3.007 million.
- An increase of \$1.793 million for services through the DHS Working Capital Fund.

Increments over current service level: The budget request for FY 2010 for the Office of the Chief Financial Officer contains the following increments over current services level:

- An increase of 20 Positions (10 FTE) and \$2.495 million for increased staffing in Budget, Office of Financial Management, and Internal Control Divisions of the Office of the Chief Financial Officer (OCFO). This increased funding will also enable the OCFO to meet the demands of reviewing and conducting independent analysis for the majority of programs within DHS.
- An increase of \$3.000 million for the Office of Program Analysis and Evaluation. This increase in funding will support a series of external evaluations of programs to be conducted periodically by Federally Funded Research and Development Centers or other independent parties outside the Department. External reviews, above and beyond internal evaluation alone, will systematically improve DHS programs by ensuring that they accomplish their intended purpose and by contributing to a better understanding of true program costs and benefits. Congressional interest and support for conducting independent peer reviewed evaluations is keen. This was evident in a one-time appropriation to DHS science and Technology in 2008, used to evaluate programs such as Air Cargo Security, National Command and Coordination Capability (NCCC), the National Biosurveillance Integration Center, and Pandemic Influenza. The Office of Program Analysis and Evaluation coordinated application of those funds at the Homeland Security Institute to assess effectiveness and identify recommendations. As a result the studies provided independent assessment of Transportation Security Administration (TSA) ability to meet 100% screening requirements (PL 110-53) for air cargo on passenger planes by August 2010, and informed a DHS decision to pause NCCC funding pending more specific end user requirements determination and capability assessment. Incorporating external evaluations as an ongoing learning and management tool will help to improve the operations of the Department, resource allocation decision making, and audit effectiveness.

D. Program Performance Highlights, Resources, and Alignment to Strategic Goals

OFCO performance goal – Develop and maintain a Department-wide financial system that produces financial data that is timely, reliable, and useful to decision makers; strengthen accountability by ensuring that internal controls are in place across the Department and oversight reviews are conducted. OCFO supports the following DHS goal:

Goal 5 – Strengthen and Unify DHS Operations and Management

E. Performance Based Budget Highlights by Program¹

The CFO FYHSP performance goal, performance measure, budget, and FTE are:

Program: Office of the Chief Financial Officer						
Performance Goal: Develop and maintain a Department - wide financial system that produces financial data that is timely, reliable, and useful to decision makers; strengthen accountability by ensuring that internal controls are in place across the Department and oversight reviews are conducted.						
DHS strategic objectives supported and % allocation of activities: 5.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$13,000	\$19,211	\$26,000	\$31,300	\$55,235	\$65,530
FTE	71	87	97	120	139	173

Measure: Number of internal control processes recently tested for effectiveness.						
Description of Measure: The measure indicates the number of tests completed to gauge the effectiveness of our financial management processes, in order to ensure internal controls prevent waste, fraud and abuse.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	>22	>40	>40
Actual:	None	None	22	N/A	N/A	N/A

Measure: Total instances of material weakness conditions identified by the independent auditor in their report on the DHS financial statements.						
Description of Measure: The number reported is the total instances of material weakness conditions in both the DHS Office of Financial Management and DHS components. A material weakness is a deficiency significant enough to be reported outside the agency.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	N/A	25	<16	<12	<12
Actual:	None	36	16	N/A	N/A	N/A

¹ In this section, FY 2007 is based on revised enacted vie actual obligations.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Information Officer

I. Appropriation Overview

A. Mission Statement for Appropriation Name:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (CIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department.

Under the leadership of the CIO, IT will enable the transformation of the Department into a performance based and integrated organization by providing effective technologies and systems. This transformation will align information-delivery resources into appropriate functions to achieve DHS' missions. To that end, the CIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently communicate, process, retrieve, deliver, and share information
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure
- A clear set of performance metrics and efficient business processes
- IT standards and frameworks that provide for integration
- A single, consistent IT governance model
- Continued improvements in cyber security
- A mature and fully detailed Enterprise Architecture
- The alignment of acquisition for IT goods and services to the department's goals

B. Budget Activities:

The CIO a myriad of Information Technology related services and support throughout DHS. The Office is divided into four major programs as follows:

Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides technology management, shared services, acquisition strategy and executive leadership support to all offices within the CIO.

Department-wide Technology Investments

Information Technology Services – A program that supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture; and the integration of the following: the Department’s financial management system activities; the information technology framework for the Department’s Human Resources System; geospatial technologies; and information sharing.

Security Activities – A set of programs that provide for the integration and protection of sensitive and collateral DHS information.

Homeland Secure Data Network (HSDN) – HSDN provides the primary means for data and information exchange, messaging, and collaboration with specific and controlled interconnections to the intelligence community and federal law enforcement resources at a SECRET-classified level within the civilian side of Federal government for DHS, Federal, and state and local Government.

C. Budget Request Summary:

The CIO requests \$338,393,000, 94 positions, and 94 FTE, for the FY 2010 Budget. The total net adjustment-to-base is a decrease of \$22,276,000 and 0 FTEs. This adjustment-to-base includes a transfer of \$313,000 to the Office of the Secretary and Executive Management (OSEM) for the Secretary’s travel, a 2010 pay inflation increase of \$450,000, annualization of 2009 pay raise, a Working Capital Fund net increase of \$481,000, GSA Rent decrease of \$730,000 and a decrease for one time funding for the National Center for Critical Information Processing and Storage for \$22.3 million. CIO requests an increase of \$88.5 million for the following program changes in the FY 2010 Budget:

- An increase of \$58.8 million for the DHS Data Center consolidation effort. This funding will be utilized as a contribution into the newly proposed Data Center Consolidation WCF activity in order to maximize efficiency for the procurement of services
- An increase of \$23.0 million for the Information Security and Infrastructure program to enhance network security, internet gateway, and initiate single sign on capability
- An increase of \$6.7 million for the Communications Security (COMSEC) program, which will enhance secure communications within DHS and with its stakeholders

 3) \$10.8M transferred from CIO accounts in FY2008

III. Current Services Program Description by PPA

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer
Program Performance Justification
(Dollars in thousands)

PPA: Salaries and Expenses

	Perm Pos	FTE	Amount
2008 Actual	91	70	\$76,559
2009 Enacted	94	94	86,928
2010 Adjustments-to-Base	0	0	(16)
2010 Current Services	94	94	86,912
2010 Program Change	0	0	0
2010 President's Budget	94	94	86,912
Total Change 2009-2010	0	0	(16)

The Office of the Chief Information Officer requests \$86.9 million for this activity, a decrease of \$16,000 over FY 2009 Enacted. The adjustments-to-base are for pay inflation, the transfer of annual funding to OSEM in support of the Secretary's travel requirements, and a reduction in funding for payment of Working Capital Fund services.

CURRENT SERVICES PROGRAM DESCRIPTION:

DHS Information Security Program

The DHS Information Security Program provides oversight to ensure a secure and trusted computing environment that enables the Department to effectively share information in support of its mission. It also works to ensure compliance with the Federal Information Security Management Act (FISMA) and National Institute of Standards and Technology (NIST) security policies and requirements. The services of the program are to develop and document departmental information security requirements, develop enterprise security management tools, and oversee the implementation of information security for the information and systems that support the operations of the Department. Specifically, the program provides:

Security Policy – Establishes and implements DHS information security policies and guidance to ensure the protection of DHS information resources, and incorporates new information security requirements and best practices promulgated by Congress, the Office of Management and Budget (OMB), Homeland Security Presidential Directives (HSPDs), and NIST.

Security Architecture - Supports information sharing and interoperability by integrating information security architecture with DHS Enterprise Architecture (EA), System Life Cycle, Capital Planning Investment Control (CPIC), and acquisition processes. Security Architecture works to develop enterprise procedures for dealing with cyber attacks, incidents, and newly discovered vulnerabilities (including patch management). Additionally, Security Architecture assesses technologies that show the greatest promise for enhancing information sharing and security and that can be scaled for enterprise application.

Compliance and Oversight – Comprises the management and oversight of the IT system inventory, the certification and accreditation (C&A) process, Plans of Action and Milestones (POA&M), FISMA reporting, the implementation of security management tools, and visits to assist with component compliance. The program also includes oversight of weakness remediation to resolve IT security weaknesses. This activity supports security metrics verification and enhancements to security tools to integrate functionality to improve FISMA compliance management and reporting.

DHS IT Security Awareness, Training, and Education - Ensures that all Federal regulations, OMB, and NIST guidance relating to IT Security Training are complied with. It supports the standardization of security content development within the Department. The IT Security Training Program provides IT Security Awareness, role-based IT security training for personnel with significant security responsibilities, and provides role-based training to improve reporting for FISMA and related metrics.

FY 2008 Accomplishments

- Maintained full FISMA compliance for each of 700+ systems in the Department's inventory;
- Completed implementation of the plan to retire all financial systems security weaknesses;
- Developed security templates and technical security compliance checklists to support the review and compliance checks for SDLC/Centers of Excellence (COE)/technical reference model (TRM) insertions;
- Updated Security Policy and Architecture Guidance to address new operational requirements, advancing technology, and identify, report, and remediate known and new cyber threats, as well as, adapting new information security best practices; and
- Completed a rigorous review and analysis of the standards, products and services contained in the Technical Reference Model to ensure compliance with the Security Architecture Guidance

FY 2009 Planned Accomplishments

- Maintain full FISMA compliance for each of 700+ systems in the Department's inventory;
- Implement a standardized operational review methodology to ensure compliance with network and technical guidance;
- Standardize the Department's security operations activities;
- Monitor and report DHS Components' progress on completing system accreditations and resolving weaknesses identified in the Components' respective POA&Ms; and
- Complete a rigorous review of the Enterprise Infrastructure and Architecture to ensure compliance with the Security Architecture Guidance

FY 2010 Planned Accomplishments

- Improve the Department's classified cyber threat information processing capability and improve the analytical capability to better understand and respond to sophisticated threats;
- Conduct in-depth Technical Reviews for at least 20 percent of the Department's IT systems to assess quality assurance and validate compliance with DHS security requirements;
- Continue to upgrade the DHS IT system inventory, which includes aligning investments to IT systems;
- Implement weakness remediation plan for operational systems by focusing on effective POA&M management;
- Continue to enhance and maintain security management tools for FISMA compliance management and reporting;
- Monitor and report DHS component's progress with completing system accreditations and resolving weaknesses identified in the component's POA&M; and
- Prepare and distribute quarterly POA&M status reports and annual FISMA report to OMB

Infrastructure Operations and Applications Operations & Maintenance

Infrastructure Operations (IO): IO program capabilities provide network, e-mail, internet, intranet, telecommunications infrastructure and end-user services including desktop computing, telecommunications, cell phones, Blackberry devices, printers, and peripheral equipment to users in the DHS Headquarters Offices.

IO responds to changes that include increases in Headquarters personnel, moves and consolidations of office space, renovations of facilities, and the expansion of mission applications. IO also responds to infrastructure changes during periods of emergency, infrastructure disruption, and disasters by performing IT Contingency, IT Disaster, and business continuity planning as well as IT/communications support to those situations requiring a FEMA response. In addition, IO also provides two alternate sites with necessary IT/communications capabilities to support emergency operations during periods of activation by the President or Secretary for Continuity of Operations.

DHS' mission requires high performance standards for multiple data, voice and video network environments (sensitive but unclassified (SBU), Secret, and Top Secret/Sensitive Compartmented Information) with higher than normal levels of redundancy and continuous support. The IT infrastructure is comparable to the Department of Defense (DOD) in its scope, complexity and need for uninterrupted service. In the event of a national security emergency, the infrastructure must have the resiliency and capacity to provide uninterrupted operations to ensure that DHS maintains the ability to coordinate actions to protect the homeland.

This program also provides IT Continuity Management which includes: performing periodic risk, interdependency and business impact assessments; developing recovery strategies, writing business resumption, incident response and escalation, and network/system specific contingency plans; and conducting test, training, and exercise of plans and capabilities to ensure the continuation of services and capabilities. Continuity of Operations (COOP) responsibilities include the IT/communications services and support of the components, preparation of exercises with more than 60 departments and agencies participating in efforts to test and improve their ability to perform essential government functions during threats and emergencies, and developing supporting capabilities and plans within the Office of the CIO.

Applications Operations & Maintenance (AO&M): Plans, builds, maintains, and ensures continuity of support for the web hosting environment so that it remains immediately available. AO&M supports the ongoing maintenance and operations of these critical applications, and optimizes the cost effective delivery of these services. These funds include the operation and maintenance of systems and applications that support the DHS Headquarters and other DHS Components, including DHS.gov, Ready/List.gov, DHS Online, and DHS Interactive.

Infrastructure efforts support the design and implementation of reliable IT infrastructure to maintain mission critical functions.

FY 2008 Accomplishments

- Initiated replacement of all IT hardware assets per National Capital Area (NCA)-developed replacement periods (e.g., wireless devices – 18 to 24 months, personal equipment – 36 months, and server/network equipment – 48 to 60 months); and
- Completed the migration of DHS HQ data center to Stennis Data Center to reduce data center operations cost across the department

FY 2009 Planned Accomplishments

- Consolidate web physical infrastructure to include Storage Area Network, backup and database licenses to reduce licensing and operational cost; and
- Deploy applications to second data center to achieve full availability and reliability to support COOP requirements

FY 2010 Planned Accomplishments

- Fully deploy an Internet Protocol Version 6.0 (IPv6)-compliant network infrastructure as directed by Executive Office of the President, OMB Office of E-Government and Information Technology Memorandum, “Transition Planning for Internet Protocol Version 6 (IPv6),” dated August 2, 2005; and
- Maintain and exercise CIO COOP Implementation Plan, maintain and test operational plans, and focus on enterprise-wide continuous process improvement of IT Disaster Recovery

Information Technology Security: The Information Technology Security program organizes mandated requirements and “best practices” to ensure security controls and measures are functional, active and assessed with respect to the business mission and acceptable level of risk acceptance. The program leverages DHS security stakeholder relationships with an application of Federal security policies, guidelines, and directives to partner with Chief Information Security Officer (CISOs) and Information Systems Security Manager (ISSMs) throughout the HQ DHS enterprise in refining the DHS security mission. The successful implementation of this program, as a whole, is absolutely essential and critical to protect sensitive and classified information, meet mandated security requirements, and ensure the Department of Homeland Security is practicing due diligence in protecting such information.

The key strategies to achieve this are as follows:

- **Policy Adherence** – The IT Security Program promotes compliance in all areas of the DHS IT infrastructure. The current DHS standards (4300 series and others) provide the backbone to the program; therefore, enforcing the use and compliance to these standards not only ensures a standard security posture but it also assists in mitigating unnecessary risk.
- **Key Stakeholder Collaboration** – The IT Security Program relies upon vigorous partnership and collaborations throughout the DHS CIO organization and its affiliates to execute security controls and enforce security standards. Coordination within the organization is critical to the program.
- **Best Practices Familiarity** - The strategies, policies and methodologies of the IT Security Program are based on industry best practices as well as federally-mandated standards.

The IT Security Program’s mission is to promulgate the IT security policies, execute the DHS Security Program to meet FISMA compliance, and provide oversight of DHS cyber-infrastructure integration. It also provides Certification & Accreditation and Information Systems Security Officer services, including project-specific security integration services, FISMA reporting, and security policy development. Specifically, the program addresses security plans and reports; identifies the personnel and approach needed for the DHS HQ to meet the requirements of FISMA and DHS Management Directive (MD) 4300.1; respond to congressional and audit requests, and enable situational awareness of DHS HQ information security posture.

FY 2008 Accomplishments

- Achieved Authority to Operate regarding system reaccreditation of SCI enclave;
- Achieved Authority to Operate for five DHS HQ systems; and

- Combined the Terminal Area Forecast (TAF), FISMA inventory of the Enterprise (previously an “F” grade) and Headquarters Services (previously a “B” grade) Divisions, and achieved an overall FISMA score grade of “A” for the DHS HQ IT Infrastructure

FY 2009 Planned Accomplishments

- Acquire a suite of security applications product to better assess the security posture of the HQ IT infrastructure; and
- Issue or expound upon existing DHS and Federal policies regarding IT security

FY 2010 Planned Accomplishments

- Baseline the security suites to provide the best scope from a defense and depth perspective of the HQ IT Infrastructure

Security Awareness and Training: Capabilities include reviewing current DHS security training process, procedures, and content for accuracy and relevance, and issuing recommendations where improvements can be made.

FY 2008 Accomplishments

- Postured a Security Awareness protocol, in partnership with the Office of Security, for all Information Technology Security Office (ITSO) personnel with a special emphasis on those whose duties entail working in a classified environment

FY 2009 Planned Accomplishments

- Fortify existing security awareness materials with the ability to tailor from a role-based perspective

FY 2010 Planned Accomplishments

- Continue the process of fortifying or constructing security awareness materials to refine the strategy of risk avoidance through improved training

Security Compliance and Oversight: Compliance with information security laws, guidance, regulations, and policies is a necessary part of any security program. A mix of information security practitioners, such as engineers, policy developers and certification and accreditation (C&A) professionals that have the necessary skills to review processes and procedures in the areas of National Security Agency Red Team-Blue Team exercises, compliance audits, C&A, and Service Level Agreements (SLAs) are engaged to action and report findings back to the CISO.

FY 2008 Accomplishments

- Mitigated findings derived from NSA Blue Team assessment of SCI enclave;
- Achieved Authority to Operate regarding system reaccreditation of SCI enclave;
- Completed eight Certification and Accreditation Packages; and
- Initiated a NSA Blue Team Assessment of Unclassified enclave

FY 2009 Planned Accomplishments

- Mitigate all findings derived from Blue Team Assessment of Unclassified enclave

FY 2010 Planned Accomplishments

- Initiate and remedy a new iteration of Blue Team Assessment for one or more of the enclaves within the ITSO umbrella

Incident Response Team: Tracks and mitigates incidents involving the unintentional release (spillage) of secure IT information, as well as, deviations from Rules of Behavior use of DHS IT systems and equipment; and provides recommendations for closure to the HQ CISO and tracks and reports incidents via the DHS Security Operations Center (SOC) Portal.

FY 2008 Accomplishments

- Mitigated 664, or 80%, of security incidents to closure with approval from the HQ CISO

FY 2009 Planned Accomplishments

- Remedy 100 percent of identified security incidents to closure with approval from the HQ CISO

FY 2010 Planned Accomplishments

- Remedy 100 percent of identified security incidents to closure with approval from the HQ CISO

Information Assurance Team: Mission involves detecting, reporting, and responding to cyber threats. It entails testing the security of customers' systems, providing Operations Security (OPSEC) assistance, and evaluating commercial software and hardware against nationally set standards to better meet the department's IA needs.

FY 2008 Accomplishments

- Provided hundreds of security assessments for Privileged Access Requests (PARs) and additional computer hardware and application integration requests. Security assessments and results were based on the DoD's defense-in-depth IT security strategy. The new strategy and protocol for providing assessments resulted in improved workflow and security determination in the approval or denial of PAR requests. It also determined the need for system accreditation or reaccreditation

FY 2009 Planned Accomplishments

- Position an IA Lead at each of the Data Centers utilized by DHS to ensure compliance and situational awareness; and
- Create a testing lab to test security solutions or identify issues with a proposed implementation

FY 2010 Planned Accomplishments

- Using the testing environment implemented in FY 2009, collaborate with other Divisions of ITSO to evaluate security issues and solutions for a proposed rollout within the HQ IT Infrastructure

Headquarters Operations Center: The Headquarters Services Division (HSD) within the CIO determined that the creation of a central facility for CIO network and security monitoring would alleviate many historical support issues and allow for efficient growth of the Department of Homeland Security's network infrastructure. This central facility was completed in April 2008 at the Nebraska Avenue Complex (NAC) and is commonly referred to as the Headquarters Operation Center (or the HOC). The IT security aspects of the HOC are supported by resources and oversight of the Information Security Division's personnel and provide Initial Operation Capability with three security personnel. This portion of the HOC mission is called the Security Management Center (SMC) and includes efforts to:

- Reduce the IT infrastructure vulnerabilities;
- Protect confidentiality and data integrity to ensure privacy and security;
- Identify and assess the vulnerability of key, critical infrastructure assets;
- Develop timely, actionable information from intelligence and vulnerability assessments;
- Provide capabilities to detect and prevent terrorism and other illegal activities;

- Insure the continuity of essential functions in the event of disaster; and
- Strengthen nationwide recovery plans and capabilities

The SMC is responsible for assuring delivery and maintenance of available, confidential and high integrity IT and telecommunications services. In addition, the SMC is responsible for managing the configuration, operation, monitoring and maintenance of security devices deployed around the enterprise and responding to security events for all three DHS network enclaves. During subsequent phases of the HOC project, the contractor personnel will be replaced by Customs and Border Protection (CBP) personnel.

FY 2008 Accomplishments

- Achieved Initial Operating Capability (IOC) of the HOC

FY 2009 Planned Accomplishments

- Achieve Full Operating Capability of the HOC; and
- Replace contractor personnel with CBP personnel to perform security monitoring with the HOC

FY 2010 Planned Accomplishments

- Review and update the applications and vehicle for retaining CBP to perform security monitoring within the HOC

IT Business Process Re-engineering: The IT infrastructure business vision is to realize breakthrough improvements in the delivery of information technology enterprise solutions and infrastructure services and products. In pursuit of this vision, the ITSO is working to re-engineer business processes to integrate management, review and verification methods and tools. Management may continue to plan and succeed with complex change while continuing to run the operations of the ITSO and achieve higher quality, better results and lower costs for DHS HQ and Component customers.

FY 2008 Accomplishments

- Significantly improved National Capital Region Working Capital Fund (NCRIO) customer costs in all cost categories;
- Validated FY 2007 actual customer costs by contract and Contract line item number (CLIN) for 63 contracts;
- Completed true up of FY 2008 customer costs by contract and CLIN; and
- Provided updated, corrected billing statements that validated significantly lower FY 2008 bills for the following component customers: Domestic Nuclear Detection Office (DNDO), Science and Technology Directorate (S&T), Nuclear Protection and Programs Directorate (NPPD), Federal Emergency Management Agency (FEMA), and analysis and operations. Coordinated a \$12 million refund to these and other Customers of the NCRIO

FY 2009 Planned Accomplishments

- Review cost drivers for the (NCRIO) to recommend improved means for controlling the costs of produced or furnished IT goods and services;
- Research governance issues related to implementation of a NCR Management/Cost System;
- Identify if contract' cost structures can be modified to support NCR WCF cost categories;
- Prepare Work Breakdown System (WBS) and implement in Contract CLIN structure; and
- Implement updated NCRIO Business Plans, Concept of Operations, and Customer Coordination Plans

FY 2010 Planned Accomplishments

- Implement management/cost system for the NCRIO;
- Implement WBS connected to consumption factors and financial system accounting data;
- Ensure availability of data sources to support usage analysis at each cost category;
- Integrate a NCRIO management/cost system with Performance Based Budgeting; and
- Support a NCRIO management/cost system with appropriate Governing structure, decision-making board, and processes

Infrastructure Transformation Program (ITP) Operations

The Infrastructure Transformation Program (ITP) was established in FY 2004 as part of on-going efforts to optimize DHS' IT infrastructure and increase the Department's effectiveness and efficiency. The ITP Operations funding offsets operations and maintenance expenses related to previously funded ITP investments.

ITP is led by the CIO and each project ("Domain") is led by a Component acting as a Steward. The ITP Operations funding will offset increased operations and maintenance charges incurred while transforming and migrating seven wide area networks, consolidating component legacy data centers, and centralizing email, video, and help desk services.

ITP Operations funding pays for the cost of data center capabilities not recovered from Component charge-backs to off-set the gap in funding during the period of initial operating capability (IOC) for data center services. Any funds remaining at the end of the fiscal year not expended on O&M will be used to support data center migration efforts.

FY 2008 Accomplishments

- Supported operations and maintenance expenditures related to ITP investments (e.g. Data Center, Email and Network)

FY 2009 Planned Accomplishments

- Support operations and maintenance expenditures related to ITP investments (e.g. Data Center, Email and Network); and
- Ensure capability readiness and migrate legacy data center systems to the DHS Data Centers

FY 2010 Planned Accomplishments

- Support operations and maintenance expenditures related to ITP investments (e.g. Data Center, Email and Network); and
- Ensure capability readiness and migrate legacy data center systems to the DHS Data Centers

Applied Technology & Research Services

Under this program, DHS utilizes three IT research and advisory services contracts for use by IT personnel in DHS. The three services provide IT personnel with world-class IT knowledge resource to select and manage technology and participate in development of standards for DHS specific applications.

FY 2008 Accomplishments

- Awarded three IT Research and Advisory Services contracts to support IT management decisions on selecting and management of technology, and participation in development of standards

FY 2009 Planned Accomplishments

- Increase the usage of enterprise research services by 25 percent above prior year usage; and

- Develop DHS integrated IT Test Facility concept

FY 2010 Planned Accomplishments

- Increase the usage of enterprise research services by 25 percent above prior year usage; and
- Implement a DHS integrated IT Test Facility concept

PPA: Information Technology Services

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$56,082
2009 Enacted	0	0	44,945
2010 Adjustments-to-Base	0	0	(228)
2010 Current Services	0	0	44,717
2010 Program Change	0	0	6,700
2010 President's Budget	0	0	51,417
Total Change 2009-2010	0	0	6,472

The Office of the CIO requests \$51.417 million for Information Technology Services, an increase of \$6.5 million over FY 2009 Enacted. The adjustment-to-base is a result of a reduction in funding for payment of Working Capital Fund services. The FY 2010 program increase is requested for the COMSEC program in its effort to enhance secure communications within DHS and its stakeholders.

CURRENT SERVICES PROGRAM DESCRIPTION:

Geospatial Management Office (GMO)

The Geospatial Management Office (GMO) provides oversight and guidance to DHS component organizations for geospatial policy and technology matters and serves as the central point of coordination for the maturing geospatial investment across the Department. The GMO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities. DHS requires coordinated, and in some cases consolidated, enterprise geospatial solutions for emergency management, law enforcement, and other homeland security mission objectives, to assure efficient and cost effective shared use of geospatial assets. The GMO is also a participant on and thought leader for the coordination of the OMB Geospatial Line of Business (LoB) initiative across the Federal geospatial community of interest.

FY 2008 Accomplishments

- Migrated 85 percent of DHS Component's (National Program and Protection Directorate (NPPD), Federal Emergency Management Agency (FEMA), Transportation Security Administration (TSA), Custom Borders Protection (CBP), Immigration Citizenship Enforcement (ICE), Intelligence and Analysis (I&A), United States Coast Guard (USCG), and United States Secret Service (USSS)), geospatial software (over 5,800 licenses) into our enterprise-wide Environmental Systems Research Institute (ESRI) SmartBuy investment, realizing cost savings of over \$4 million;
- Stood up initial geospatial data warehouse capability within the DHS Enterprise Architecture and DHS' National Center for Critical Information Processing and Storage (NCCIPS) Data Center at Stennis, Mississippi; supported mission critical programs which included the Infrastructure Information Collection Program, the National Biological Integration System, the National Operations Center (NOC) Common Operating Picture (COP), and the FEMA National Response Coordinating Council, which avoided additional costs through sharing of a common geospatial infrastructure;
- Supported the NOC's standardizing an interoperable COP technology, the National Infrastructure Coordination Center (NICC), and the National Response Coordination Center (NRCC), and formalized this architecture as part of the DHS Enterprise Architecture through the technology insertion process;
- Continued migration of DHS Common Operating Data (COD) to non-licensed geospatial products saving \$3.6 million; and

- Enhanced existing geospatial grant guidance and implemented a quality assurance program

FY 2009 Planned Accomplishments

- Demonstrate cost avoidance benefits from applying portfolio management principles to geospatial investments of the DHS enterprise of at least \$10 million;
- Migrate 95 percent of DHS Component's geospatial software into our enterprise-wide Environmental Systems Research Institute (ESRI) SmartBuy investment, resulting in incremental and sustainable growth with associated cost savings for the Department of over \$4.3 million. In addition, review new GSA SmartBuy solicitation (March 6, 2009) to determine further potential cost efficiencies for the Department;
- Implement shared enterprise services for streaming video, imagery feature and map services, avoiding costs of individual component implementations while increasing DHS interoperability to support disaster response and other missions;
- Consolidate two component geospatial applications to the target DHS geospatial information infrastructure (GII) target architecture, avoiding O&M costs for stand alone systems;
- Establish a Geospatial Concept of Operations to support the National Response Framework and improve DHS emergency response effectiveness;
- Operationalize a capability to provide GPS interference reports to all Federal partners to support law enforcement, intelligence and operational missions of DHS and comply with DHS responsibilities under NSPD-39;
- Provide standards, guidance and recommendations for geospatial grants; and
- Build upon eGov Geospatial LoB in a coordinated approach to assess and prioritize tasks and data initiatives that support the mission objectives of the Department

FY 2010 Planned Accomplishments

- Demonstrate cost avoidance benefits from applying portfolio management principles to geospatial investments of the DHS enterprise of at least \$10 million;
- Complete migration of DHS Component's geospatial software into our enterprise-wide Environmental Systems Research Institute (ESRI) SmartBuy investment, projecting cost savings for the Department of over \$4.8 million, representing an O&M phase of support and allowing for targeted expansion (5x) of select Component usage (e.g. ICE), with corresponding cost savings;
- Implement shared enterprise services for geocoding, map sharing, and user defined operational pictures (UDOP), avoiding costs of individual component implementations while increasing DHS interoperability to support disaster response and other missions;
- Consolidate three component geospatial applications to the target DHS geospatial information infrastructure (GII) target architecture, avoiding O&M costs for stand alone systems;
- Extend the Geospatial Concept of Operations to reflect requirements of a catastrophic disaster;
- Provide standards, guidance and recommendations for geospatial grants; and
- Build upon eGov Geospatial LoB to access, produce, maintain, and utilize geospatial data to ensure and continue sustainable participation from Federal partners, and extend participation to State, Local and Tribal partners and the commercial stakeholder community

Enterprise Architecture (EA)

Enterprise Architecture supports a "blueprint" for systematically and completely defining DHS' baseline environment, target environment, and transition plan to a common IT environment. This program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. It ensures the essential evolution of information systems and the development of a common environment.

FY 2008 Accomplishments

- Demonstrated benefits from the DHS EA process for costs avoidance and/or efficiency improvements of more than \$93 million;
- Established Target Architectures for 21 mission critical areas;
- Updated DHS EA Transition strategy to include new programs for use during OMB E-300 reviews
- The Enterprise Architecture Information Repository was made operational and updated to include the data asset catalog information;
- Developed a draft Performance Reference Model (PRM) to measure the performance of major IT investments and their contribution to program performance; and
- OMB rated the Homeland Security Enterprise Architecture “Green” which denotes that DHS has met all the requirements of OMB

FY 2009 Planned Accomplishments

- Demonstrate benefits from the DHS EA process for costs avoidance and/or efficiency improvements for at least \$30 million;
- Use the Homeland Security Enterprise Architecture (HLS EA) to guide the Strategic Requirements Planning Process (SRPP), the new Management Directive on acquisition management policy, the Integrated Planning Guidance (IPG) FY-11-15 and the Quadrennial Homeland Security Review (QHSR) process;
- Reduce the number of unique products and services in the Technical Reference Model (TRM) by 10 percent from baseline established first quarter FY 2009;
- Document, by the end of FY 2009, transition to the DHS target architecture for 25 percent of all Data Center needs and 75 percent of all network needs;
- Conduct four critical design or production readiness reviews of major IT programs;
- Finalize Performance Reference Model (PRM) and associated governance process implementation;
- Continue to demonstrate benefits from the DHS EA process for costs avoidance and/or efficiency improvements; and
- Develop Segment Architectures for 2 of the 10 functional areas of the HLS EA. (accomplished)

FY 2010 Planned Accomplishments

- Demonstrate benefits from the DHS EA process for costs avoidance and/or efficiency improvements for at least \$30 million;
- Incorporate results of the QHSR and the SRPP into the re-validation process for the mission/business architecture;
- Develop Segment Architectures for 4 of the 10 functional areas of the HLS EA;
- Document, by the end of FY 2010, transition to the DHS target architecture for 65 percent of all Data Center needs and 95 percent of all network needs;
- Conduct four critical design or production readiness reviews of major IT programs; and
- Implement the Performance Reference Model (PRM) governance process with the DHS Performance Improvement Office

Enterprise Data Management

The Enterprise Data Management program provides the Enterprise Architecture Data Reference Model for the understanding of data assets within and across the Department. The Enterprise Data Management Office (EDMO) establishes the guidance and oversight to DHS for data policy, data management, and data stewardship. This program supports the development of the Department-wide roadmap for data to improve mission effectiveness and efficiency, eliminating existing stovepipe data systems, and increasing interoperability and information sharing. The Data Reference Model (DRM) is a key governance tool to assure that mission needs drive technology investments. Additionally, through the use of the DRM, the EDMO is expected to recommend realignment of IT investments or

acquisitions through the identification of targets at an estimated reduction of \$10 million in annual IT costs by reducing the systems under maintenance or driving common requirements for the development of centralized services.

The EDMO's program plans integrate information sharing requirements and enable access across all levels of government, first responders, and stakeholders in the private sector through the use of National Information Exchange Model (NIEM), development of Information Exchange Package Document (IEPD) guidelines, and collaboration with DHS Components and external partners for IEPD development.

FY 2008 Accomplishments

- Developed the initial data asset inventory baseline, using segment architectures, to allow for use of this baseline in the IT Investment Review process. This allows data to drive the alignment of the systems that support the mission within the Enterprise Architecture. Milestones and deliverables include:
 - Drafted Stewardship Framework and Data Management Plan Template as guiding and prescriptive documents for data management maturity;
 - Stewardship pilots: data workshops were executed for law enforcement, intelligence, immigration and screening;
 - Continued development of the DRM portion of the Homeland Security Enterprise Architecture (4 EA), which included:
 - Refined the as-is Data Asset Catalog baseline which now includes 630 assets and is estimated at 52 percent complete (out of a total 1200 potential assets, as of (August 30, 2008) as well as associated relationships to the HLS EA systems inventory and data objects;
 - Completed the Data Architecture Repository Design Document which will increase the level of information sharing by providing a centralized web-based repository to facilitate the search and discovery of Department mission information;
 - Developed the Standard Data Insertion Package template as well as the submission of Data Standard ISO 3166 (Country Codes) which was endorsed by the Data Management Working Group (DMWG) for acceptance as the preferred standard for Information Exchanges, Statistics and Systems development; and
 - Set the data architecture target for Core Biographic Data Elements and Person-Centric View Initiative
 - Continued development and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges, such as (but not limited to):
 - Terrorist Watch list Person Data Exchange Standard (TWPDES) in support of the Terrorist Screening Center;
 - Exercise Scheduling and Improvement Plan in support of FEMA activities;
 - Federal Motor Carrier Safety Administration (FMCSA) in support of CBP vehicle border crossing;
 - Person Center Query and Employee Verification (verify) in support of USCIS Person screening efforts;
 - Development of Assets and Case Tracking System in support of the sharing of ENFORCE data between ICE and CBP Border Enforcement and Management systems;
 - Core Biographic Person Identity Data Elements in support of biographic identity-related information exchange;
 - Established NIEM Blue Team (subject matter expert working group) which developed guidance on domain management and documented DHS NIEM Tool requirements; and

- NIEM Blue Team is driving a DHS Enterprise SOA Message Header initiative that is bridging the Department's SOA Technical Framework with NIEM Bipeds through collaboration with DHS SOA-experts; the resulting architecture will lead to greater interoperability between DHS Enterprise Service Buses (ESBs) including NIEM exchanges and all other levels of the DHS messaging framework

FY 2009 Planned Accomplishments

- Develop the initial data asset inventory baseline to allow for use of this baseline in the IT Investment Review process. This allows data to drive the alignment of the systems that support the mission within the Enterprise Architecture. Milestones and deliverables include:
 - Demonstrate cost avoidance of \$18M in the reduction of new development through discovery and re-use of existing assets, by use of the Data Asset Repository (DAR) and the data asset catalogue which contains the DHS data asset baseline;
 - Continued development and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges or Domains, such as (but not limited to):
 - Integration of Maritime domain community into NIEM in support of HSPD 13-driven Maritime Domain Awareness (MDA) information-sharing between USCG, Navy, CBP, and other Federal, state, local and international allies;
 - Developed the Core Biographic Person Data Elements information exchange within the Person Screening functional areas in support of the DHS Screening Coordination Office (SCO); and
 - Developed the NIEM-based person biometrics interoperability between major Federal agencies and DHS with the augmentation of the Terrorist Watchlist Person Data Element Standards into the US VISIT IDENT information exchange
 - Continue development and maintenance of the DRM portion of the HLS EA. Deliver the Data Reference Model 3.0 (to be completed by September 2009). The DRM 3.0 will be used to evaluate IT investment reviews as part of the Enterprise Architecture review process. Activities include:
 - Refinement of the as-is data inventory base line with a minimum of 75 percent of all DHS enterprise data assets described in the HLS EA;
 - Advancement of the to-be target data architecture including the development of at least 2 mission based Logical Data Models identified by the EA Transition Strategy;
 - Identification and adoption of international or industry data standards into EA, with an expected volume of 20 data standard insertions as part of the target data architecture; and
 - Support an anticipated 200 IT investment acquisition reviews as part of the Enterprise Architecture oversight process
 - Continue the development and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges, such as (but not limited to):
 - NIEM Adoption: add approximately 10 to 15 total DHS programs using NIEM;
 - NIEM Training: implement new modularized training with tracks for executives, program managers, architects and IEPD developers;
 - NIEM Tools: support the development of new NIEM tools capabilities to support rapid-development, to increase quality and sophistication of IEPDs, and to reduce implementation costs;
 - NIEM Governance: charter and establish fully-operational governance bodies to support NIEM domain stewardship, management, and outreach capabilities; integrate governance processes with the national NIEM versioning architecture; and

- NIEM Blue Team: increase the capabilities of the NIEM Blue Team to address IEPD vetting processes, to enable self-governance, and to elevate NIEM leadership at DHS components

FY 2010 Planned Accomplishments

- Continued enhancement of data asset inventory, using segment architectures, to allow for use in the IT Investment Review process. The DRM 4.0 will be used to evaluate IT investment reviews as part of the Enterprise Architecture review process. This allows data to drive the alignment of the systems that support the mission within the Enterprise Architecture. Milestones and deliverables include:
 - Demonstrate cost avoidance of \$6.0 million in the reduction of new development through discovery and re-use of existing assets, by use of the Data Asset Repository (DAR) and the data asset catalogue which contains the DHS data asset baseline;
 - Continued development of the DRM portion of the Enterprise Architecture. Deliver the Data Reference Model 4.0 (to be completed by September 2010), which includes:
 - Refinement of the as-is data inventory base line with a minimum of 90 percent of all DHS enterprise data assets described in the HLS EA;
 - Advancement of the to-be target data architecture including the development of two mission based Logical Data Models identified by the EA Transition Strategy;
 - Identification and adoption of international or industry data standards into EA, with an expected volume of 20 data standard insertions as part of the target data architecture; and
 - Support an anticipated 200 IT investment acquisition reviews as part of the Enterprise Architecture oversight process
 - Continue development, refinement and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges such as (but not limited to):
 - Critical Infrastructure and Risk exchanges in support of Infrastructure Protection;
 - Biological Survey and Health reporting for DHS National Biosurveillance Integration System (NBIS) program;
 - Instant Response in support of the National Incident Management System (NIMS) program;
 - Information exchanges in support of DHS Case Management Portfolio priorities;
 - Intelligence community information exchanges addressing multi-level security information exchanges; and
 - NIEM Adoption: approximately 50 to 75 total DHS programs using NIEM

Enterprise Application Delivery (EAD)

EAD is an initiative that leverages the capabilities and resources of three distinct IT operations: Application Delivery (AD); Enterprise Portal (EP); and Solutions Engineering (SE). These services establish a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. EAD engineers and oversees implementation of the DHS Enterprise Application Architecture Roadmap for systematically and completely defining DHS' baseline environment, target environment, and the transition plan in accordance with Information Technology Integration and Management (MD 0007.1.)

The Enterprise Portal is the Department's primary gateway for DHS employees, stakeholders, and citizens to share information in compliance with the expectations established in the President's Management Agenda. Through this initiative, DHS will be positioned to offer an innovative, customer-focused, and interoperable web infrastructure enabling secure access to information, services, and applications. The standards-based web environment will be deployed in the DHS common infrastructure environment, leveraging DHS OneNet and the DHS Data Center services, and will be fully integrated with the Department's Single Sign-on (SSO) solution.

FY 2008 Accomplishments

- Oversaw the consolidation of identified Internet web sites onto the FEMA Interwoven platform to reduce operational costs;
- Planned the Single Sign-On integration with the DHS Portal Environment;
- Planned the transition of departmental portals to the next generation in order to improve performance and integrate Single Sign-On for user authentication; and
- Upgraded the Executive Correspondence Tracking system (ECT) infrastructure and application software to incorporate web services to facilitate service integration with other DHS systems and scalability to additional users

FY 2009 Planned Accomplishments

- Stabilize and enhance the ECT infrastructure to improve system performance and deploy new capabilities to DHS users. Leverage ECT as the Department go-to product to deploy this system to other components in order to reduce operational cost and realize savings through shared service;
- Provide system enhancement to the project management tool to provide a centralized view of tracking cost, schedule, performance, risk/issues and provide accurate and timely reporting; and
- Deploy enterprise portal environment via MS Sharepoint portal for internal collaboration and information sharing

FY 2010 Planned Accomplishments

- Consolidate operational maintenance of DHS.gov and Ready/List.gov website to reduce operational cost; and
- Enhance web infrastructure to accelerate web application delivery across the Department to improve end user experience

Program Management Support

This initiative plans and executes an effective resource allocation program to support the Department's IT investments. Its activities include:

- Establish and maintain an integrated IT Portfolio Management initiative across the department to directly support the IT investment management processes established by MD 0007.1 and Acquisition Directive 102.01 (AD102.01). Under this program DHS is continually improving its budgeting, acquisition and investment review processes and decision forums based upon enterprise and information technology services portfolio-based views of its investments. This effort includes collaborating with the Enterprise Architecture Office and Business or Functional managers to establish functional and technical architectural targets and transition plans for each portfolio. It also concerns measuring the performance of each portfolio and continuously improving the balance of investments within each portfolio to effectively and efficiently meet departmental goals and objectives;
- Execute an IT Services portfolio management governance process by ensuring that data and business case analyses are available to the CIO to make critical decisions regarding IT investment trade-offs and prioritization;
- Align budget dollars to eliminate duplication and execute portfolio transitions aligned to the DHS Enterprise Architecture;
- Develop and execute an IT acquisition strategy to achieve the transition of legacy technologies to those in the DHS Enterprise Architecture;
- Align investment performance objectives with budget program performance objectives, measure compliance, and enforce remediation plans using the next generation Periodic Reporting System (nPRS), additional tools in development such as the System for Management Analysis and

Resource Tracking (SMART), and participation in Enterprise Architecture and Acquisition Review Board proceedings;

- Formulate and execute IT policy, including annual development of an IT Strategic Plan integrated with the DHS Strategic Plan, improvements in System Life Cycle management, Paperwork Reduction Act (PRA) monitoring and implementation, Information Quality compliance and assessment, IT workforce development, and Congressional, Government Accountability Office (GAO), and OMB liaison requirements; and
- Sponsor and manage the development of improved enterprise acquisition and performance management tools to support Headquarters and Component programmatic decisions

FY2008 Accomplishments

IT Acquisition Review

- Implemented MD 0007.1 for DHS IT Acquisitions;
- Processed 331 requests worth approximately \$3.89 billion which represents a 38.5 percent increase in request volume over FY2007;
- Reduced ITAR cycle time by 23.4 percent for aligned requests and reduced misaligned requests 88.6 percent over FY2007 results through a combination of outreach efforts and new guidance documents;
- Focused effort to resolve Conditions resulted in a 69 percent reduction of “Overdue” post-approval conditions over FY07 figures; and
- Validated 95 percent alignment of ITAR requests to budgeted DHS CPIC Investments.

IT Capital Planning and Investment Control

- Improved overall OMB score of DHS investments from 29 to 34 (15 percent) for the 53 investments with OMB pass-back scores;
- Increased the percent of investments with passing scores of 32 or more from 23 percent to 70 percent;
- Increased the percent of investments with passing scores of 31 or more from 30 percent to 80 percent;
- Percentage of certified Program Managers (PMs) increased from 49 percent to 62 percent;
- Removed 77 percent of DHS FY2008 3rd quarter Exhibit 300s from the OMB Management Watch List; and
- Achieved 75 percent of Level One investments within 10 percent of planned cost and schedule

IT Strategic Planning and Budgeting

- In cooperation with the CIO, Component CIOs and OCFO, succeeded in gaining senior management approval for more than \$500 million in additional IT funds in the FY2010-2014 Resource Allocation Decision (RAD) for data center consolidation, cyber security and migration to OneNet;
- Performed assessments of alternate performance measurement approaches for both Earned Value Management for acquisition programs with appropriate types of contracts and Operations Analyses for programs in the operations and maintenance or sustainment life cycle phase;
- Worked collaboratively with ITSO, developed funding strategy for enterprise data center and network consolidation initiatives (in support of FY10 RAD);
- Reviewed 100 percent of Component’s RAPs; resulting in over \$2 billion in funding recommendations; and
- Increased percentage of all investments reporting EVM from 70 to 81 (16 percent increase)

IT Portfolio Management

- Completed pilot of new Periodic Reporting System (nPRS), involving Level 1 programs from CBP and USCG and obtained approval from PMC/CPO/CIO to initiate full production release of nPRS in Q1 2009;
- Reviewed 100percent of IT Acquisitions that aligned to established IT Portfolios;
- Developed enterprise portal consolidation/integration strategy. Established HSIN Next Generation to serve as the baseline platform for the DHS Collaboration and SBU Portal;
- Completed an IAA and MOU for funding of the FEMA led Disaster Management e-Gov Initiative and DMIS/OPEN related efforts. Completed DMIS/OPEN transition to the Stennis Data Center;
- Developed business case and justification for establishing enterprise alerts and warning target; and
- Completed nPRS pilot with CBP and USCG

IT Acquisition Management

- Submitted CIO analysis for 50 percent of DHS investment reviews at IRB Level; and
- Established EBMO are a corporate partner in reviews of investment compliance with the DHS Enterprise Architecture and programmatic review requirements

FY2009 Planned Accomplishments

IT Acquisition Review

- Implement automated ITAR business process solution;
- Processed 145 requests worth approximately \$2.2 billion;
- Represents a 33.6 percent increase in request volume over FY2008;
- Extend outreach efforts and refine guidance to achieve a 10 percent ITAR cycle time reduction over FY2008 for aligned requests; and
- Validate 98 percent alignment of ITAR requests to budgeted DHS CPIC Investments

IT Capital Planning and Investment Control

- Reduce the number of investments on the MWL and HRL by 25 percent; and
- Achieve a 10 percent improvement from FY2008 in number of investments performing within 10 percent of planned cost and schedule

Periodic Reporting and Program Analyses

- Compile, QC, and continually improve nPRS monthly report submissions;
- Compile, QC, and improve PoPS submissions;
- Provide outreach efforts to improve communication and achieve high level of customer satisfaction in the use of nPRS; and
- Improve compliance with EBMO external reports (High Risk, EVM, PMA eGov)

IT Strategic Planning and Budgeting

- Conduct Budget Review of all Level 1, 2 and 3 IT investments; providing leadership recommendations on all IT over-guidance requests;
- Develop, publish, and implement an IT Strategic Plan integrated and consistent with the DHS Strategic Plan. The IT Strategic Plan will be developed in close coordination with the Components;
- Develop, publish and begin implementing a DHS IT Integrated Planning Guidance (IPG) document for use in developing the BY 2011 budget submission;
- Develop Standard Operating Procedure to manage departmental IT Budget Review;
- Develop guidelines for collection of cost/schedule/performance metrics for investments in the O&M phase;
- Develop guidelines for collection of cost/schedule/performance metrics in the DME phase, particularly using tools other than EVM; and

- Establish Robust Communications Plan to Support IT Budget

IT Portfolio Management

- Develop the DHS IT Strategic Plan, which will be utilized to develop the DHS FY11-15 Integrated Planning Guidance;
- Though integrated governance policies, ensure 100 percent alignment of new investments/acquisitions to established targets;
- Transition 70 percent of SBU collaboration platforms to target (HSIN).
- In coordination with EA, co-develop segment architectures and transition plans for DHS priority segments; provide 100 percent IT investment data for analysis;
- Develop draft Incident management segment architecture for review by operators in FY2010; and
- Leveraging SMART, conduct portfolio analysis across Screening, LE and Infrastructure to impact JRC, ARB and PRB decisions

EBMO Technical Services

- Complete SMART Phase 1 Iteration 1 ,or the prototype version of the System for Management Analyses and Resource Tracking (SMART) to provide a Business Intelligence (BI) and information integration capability for tracking the performance of DHS planning, programming, budgeting, and execution of DHS investments;
- Complete technical efforts to deploy the IT Acquisition Review (ITAR) automated solution;
- Establish IT governance structure for DHS data center operations;
- Implement nPRS systems and upgrades, including the Probability of Project Success capability;
- Maintain IMS and nPRS; and
- Define SELC foundation

IT Acquisition Management

- Improve performance of Level 1 and 2 IT investments by 10 percent;
- Implement SMART IOC to support 10 percent of departmental ARBs;
- Submit CIO analysis for 80 percent of DHS investment reviews at the ARB level;
- Pilot Acquisition Reporting Process and show impact on CIO IT Investments;
- Develop CCB guidance process and related documentation process for nPRS;
- Provide better Customer Service by piloting the first Communications Plan for nPRS/SMART; and
- In partnership with OCIO/COS and OCPO, develop IT Acquisition standard for inclusion into recruitment, training and retention documentation

FY2010 Planned Accomplishments

IT Acquisition Review

- Implement automated ITAR (ITAR online) business process solution Phase II;
- Extend outreach efforts and refine guidance to achieve a 15 percent ITAR cycle time reduction over FY2009 for aligned requests;
- Validate 98 percent alignment of ITAR requests to budgeted DHS CPIC Investments; and
- Development and Rollout to Components of ITAR Maturity Model

IT Capital Planning and Investment Control

- Develop automated capability leveraging SMART to analyze 100 percent of level 1 and 2 investments and 50 percent of level three investments;
- Reduce by 25 percent the number of DHS investments on the Management Watch List and High Risk lists over FY2009;
- Align DHS IT Budget to 50 percent of IT Targets;

- Conduct Budget Review of all level 1, 2 and three IT investments; providing leadership IT funding recommendations on all IT over-guidance requests; and
- Improve scores on OMB 300 business cases

Periodic Reporting and Program Analyses

- Compile, QC, and continually improve nPRS monthly report submissions;
- Compile, QC, and improve PoPS submissions;
- Provide outreach efforts to improve communication and achieve high level of customer satisfaction in the use of nPRS; and
- Improve compliance with EBMO external reports (High Risk, EVM, PMA eGov)

IT Strategic Planning and Budgeting

- Secure 50 percent of requested FY2010 and FY2011 over-guidance funding for OCIO for Infrastructure and Cybersecurity;
- In partnership with ITSO and IT Portfolio management, establish and implement an Integrated Funding Model for DHS data centers;
- Secure 90 percent of OCIO FY2011 data sharing and NIEM funds requested;
- Increase by 10 percent the number of required investments reporting performance management data. Data for DME projects will be collected on a monthly basis, while data for steady state projects will be collected on a quarterly basis;
- Implement Earned Value and OA Guidance; and
- Integrate the budget process into other EBMO processes

EBMO Technical Services

- Complete SMART Phase 2 operating the prototype version of the System for Management Analyses and Resource Tracking (SMART) to provide a Business Intelligence (BI) and information integration capability for tracking the performance of DHS planning, programming, budgeting, and execution of DHS investments and developing the design of the production version;
- Refine and mature an IT governance structure for DHS IT Services;
- Maintain IMS and nPRS; and
- Improve the SELC foundation

IT Portfolio Management

- Though integrated governance policies, ensure 100 percent alignment of new investments/acquisitions to established targets;
- Transition 70 percent of SBU collaboration platforms to target (HSIN); and
- Implement FOC of performance management and business intelligence capability that will assist in making informed management decisions

IT Acquisition Management

- Submit CIO analysis for 100% of DHS investment reviews at the ARB level;
- Improve performance of Level 1 and 2 investments by 20 percent over FY2009;
- Implement SMART IOC to support 25 percent of departmental ARB;
- Submit CIO analysis for 90 percent of DHS investment reviews at the ARB level;
- Continue Acquisition Reporting Process and show impact on CIO IT Investments;
- Continually improve the CCB guidance process and related documentation process for nPRS and SMART;
- Provide Customer Service by supporting the Communications Plan for nPRS/SMART; and
- Partner with OCIO/COS and OCPO, concerning IT Acquisition standards for inclusion into recruitment, training and retention documentation

Information Management Office

The Information Management Office (IMO) provides enterprise-level information management support services across the Department of Homeland Security. The IMO is successfully working with the Office of Management and Budget (OMB) and various external stakeholders to ensure the Department remains in compliance with E-Government (E-Gov), Paperwork Reduction Act (PRA), and Information Quality (IQ) federal mandates and regulations.

FY2008 Accomplishments

Paperwork Reduction Act Program Management Office

- Achieved 100 percent compliance with Paperwork Reduction Act;
- Provided Program Management Support for the Paperwork Reduction Act (PRA) and ensured Departmental compliance;
- Developed and launched the Paperwork Reduction Act (PRA) website; and
- Submitted DHS Information Collection Budget and achieved 10 percent reduction in public burden

E-Government Program Management Office

- Completed 98 percent of FY2008 E-Gov implementation plan and PMA milestones;
- Completed 98 percent of FY2008 E-Gov milestones (NCS 3-10 & GMLoB); and
- Moved to Yellow/Green for entire E-Gov scorecard

Information Quality Program Management Office

- Provided support and guidance for Information Quality and ensured that the Department remains in compliance; and
- Developed and launched the Information Quality website

FY2009 Planned Accomplishments

Paperwork Reduction Act Program Management Office

- Maintain 100 percent departmental compliance to Paperwork Reduction Act; and
- Provide Program Management Support for PRA compliance throughout the Department and ensure the Department maintains “zero violations”

E-Government Program Management Office

- Complete 100 percent eGov implementation plan and PMA milestones;
- Improve E-Gov PMO procedures and processes - Complete eGov technical assessment and reflect impact on DHS programs;
- Establish Government –wide eGov Working Group sponsored by DHS;
- Support Enterprise Architecture targets and enterprise transitions through eGov initiatives; and
- Move to and maintain Green on the PMA Scorecard for Status and Progress at the end of FY2009

Information Quality Program Management Office

- Maintain 100 percent Departmental compliance with Information Quality Act; and
- Implement Information Quality guidance and reflect improvement in information quality

FY2010 Planned Accomplishments

Paperwork Reduction Act Program Management Office

- Continue to provide Program Management Support for PRA compliance throughout the Department and ensure the Department maintains “zero violations”;
- Maintain 100 percent departmental compliance to Paperwork Reduction Act;
- Ensure Departmental information collection budget is submitted and remains within projection; and
- Ensure information collection requests are renewed or discontinued within guidance

E-Government Program Management Office

- Continuously improve the E-Gov Implementation process based on lessons learned from prior years and industry’s best practices;
- Maintain “green” score on the PMA Scorecard for Status and Progress through FY 2010;
- Improve the management of Level 1 investments;
- Integrate eGov process effectively with the DHS Enterprise Architecture (EA), IT Security, Earned Value Management (EVM), and Capital Planning and Investment Control (CPIC) efforts to form an effective overarching IT governance strategy to assist with maximizing value from each decision; and
- Complete 100 percent eGov implementation plan and PMA milestones

Information Quality Program Management Office

- Establish Information Quality PMO;
- Publish Information Quality (IQ) documents on the internal and external site;
- Develop CCB framework for addressing IQ discrepancies; and
- Maintain 100 percent departmental compliance to Information Quality Act

Cyber Identity and Credentialing (Smartcard)

Cyber Identity management includes the electronic matching of the appropriate users to the data, systems, and business transactions to which they require access. Cyber Identity management supports three of the Secretary’s five goals for the Department: Protect our Nation from Dangerous People; Protect the Critical Infrastructure; and Strengthen and Unify DHS Operations and Management. Each of these goals has need of strong electronic (cyber) identity management in order to ascertain who has access to information, networks and systems. Homeland Security Presidential Directive (HSPD-12) requires the issuance of a “secure and reliable form of identification” based on sound criteria for verifying an individual’s identity, is strongly resistant to identity fraud, tampering, counterfeiting and terrorist exploitation that can be rapidly authenticated electronically to all employees and contractors. The prescribed identification credential is a smartcard. Smartcard technology coupled with the required Public Key Infrastructure (PKI) provides a high assurance token to be used as the basis for logical access to Departmental Information Technology systems, supports enablement of Single Sign on (SSO) solutions, Attribute Based Access Control (ABAC) solutions and federated access control solutions. Combined, Smartcards, SSO, ABAC, and federated access control solution technologies offer high-security, and efficient user access to the Department’s information systems while allowing information sharing to our outward facing partners – other Federal Agencies, State, Local and Tribal governments.

FY 2008 Accomplishments

- Completed and awarded contract to support enterprise issuance of HSPD-12 smartcards;
- Established the central Identity Management System (IDMS) and Card Management System (CMS) to support the DHS enterprise issuance of the Smartcard;
- Interfaced IDMS and CMS to the DHS provided PKI Certificate Authority (CA) to support DHS Personal Identity Verification (PIV) Smartcard;
- Began the issuance of Smartcards to DHS employees in the National Capital Region; and
- Developed the requirements and implementation methodology to use Smartcards for logical access for the DHS enterprise

FY 2009 Planned Accomplishments

- Develop requirements, methodology, and begin implementation of two-factor logical access using smartcards; and
- Support the issuance of Smartcards for all new DHS employees and contractors

FY 2010 Planned Accomplishments

- Complete issuance of HSPD-12 Smartcards for all DHS employees and contractors; and
- Implement mandatory usage of HSPD-12 Smartcards for logical access

Communications Security (COMSEC)

The Homeland Security Central Office of Record (COR) was established to meet the national security policies associated with providing accounting, safeguarding and management control over classified communications security keying material and equipment.

The DHS COR provides COMSEC accounting services in accordance with established National Security Agency (NSA) policies and directives. This process includes processing incoming and outgoing transactions, destruction reports, and maintaining a consolidated database detailing the location and quantity of COMSEC material and key, updates DHS COMSEC accounting policies and COMSEC training.

The COMSEC program provides keying material and technical support to the Transportation Security Agency (TSA) Trace system, the DHS NOC, and Intelligence and Analysis (I&A) to protect classified communications. The COMSEC program provides a variety of COMSEC equipment and technical support to secure all the classified communications within the Department to protect the dissemination of intelligence information.

FY 2008 Accomplishments

- Provided updated COMSEC security policies and procedures annually for use by the Components and performed 60 Audits of COMSEC accounts;
- Procured 5 Taclane KG-175D to be used as training aids during the DHS COR COMSEC Equipment Training Class;
- Procured 302 KSV-21 Enhance Crypto Cards to replace the KOV-14 cards currently in use with the Secure Telephone Equipment (STE);
- Procured 20 Secure Mobile Environment Portable Electronic Devices (SME PEDs) for DHS Senior Management;
- Procured two power supplies for KIV-7M Dual Commercial Ancillary Model 3030 Dual Unit Housing with two power supplies for training during the DHS COR COMSEC Equipment Class;
- Procured 145 KSV-21 Enhance Crypto Cards (ECC) to replace the KOV-14 cards currently in use with the Secure Telephone Equipment (STE);
- Procured two KG-200 and two KG-201 for testing on the HSDN (Homeland Secure Data Network);
- Received 630 cards from NSA for component distribution as needed;
- Received 500 SDS data transfer devices from the Marines for component distribution as needed;
- Destroyed 2,000 obsolete items to include STU III's; and
- Trained 240 students in Simple Key Loader (SKL), Custodian and Administrator courses

FY 2009 Planned Accomplishments

- Develop modernization plan and transition all current voice communications using STU IIIs and STEs to new and enhanced cryptographic systems; this entails over 10,000 secure phones;

- Procure new COMSEC equipment to replace obsolete COMSEC equipment six months before the decertification dates;
- Train additional students in equipment and custodian administration courses;
- Field Enhanced Crypto Cards (ECC) by December 2009;
- Provide updated COMSEC security policies and procedures annually for use by the Components and perform audits of COMSEC accounts;
- Establish an interagency agreement with Tobyhanna Army Depot for equipment maintenance and repair;
- Conduct 100 percent inventory of COR #25 Account; and
- Develop curriculum for refresher custodian & supervisor courses

FY 2010 Planned Accomplishments

- Replace KG-175 IT data encryption devices and train users on new equipment;
- Present new Business Case to DHS Management for Regionalization of the COMSEC support structure which will close the 105 current accounts and consolidate to 15 accounts. This will save 180 positions in DHS for other duties as the current 250 full and part time COMSEC personnel are replaced with 70 full time personnel saving training, travel and audit funds and reducing account management costs. Identify locations of Regional support offices and obtain funding for FYs 2011 and 2012;
- Study use of Voice Over Internet Protocol (VOIP) secure phones for use on HSDN in lieu of the 6,500 STEs in use for classified communications;
- Procure SME PEDS to rest of DHS and business partners;
- Develop plan for an infrastructure to support the transition of DHS accounts from EKMS to the NSA mandated "Key Management Infrastructure (KMI)". This 5 to 7 year project will transition and replace all of the DHS Communications Security Infrastructure;
- Procure new COMSEC equipment to replace obsolete COMSEC equipment 18 months before the decertification dates;
- Recruit and train new Regional staff to assume COMSEC support Functions;
- Provide updated COMSEC security policies and procedures annually for use by the Components and perform audits of COMSEC accounts; and
- Develop Electronic Key Management System (EKMS) Operation and Maintenance (O&M) contract

PPA: Security Activities

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$97,527
2009 Enacted	0	0	92,623
2010 Adjustments-to-Base	0	0	(22,020)
2010 Current Services	0	0	70,603
2010 Program Change	0	0	81,800
2010 President's Budget	0	0	152,403
Total Change 2009-2010	0	0	59,780

The Office of the Chief Information Officer requests \$152.4 million for this activity, an increase of \$59.8 million over FY 2009 Enacted. The net adjustment-to-base is for a reduction of one time funding for NCCIPS and anticipated increased payments of Working Capital Fund services. The CIO is requesting in program funding of \$58.800 million for the DHS Data Center consolidation effort and \$23.000 million for the Information Security and Infrastructure program to enhance network security, internet gateway, and initiate single sign on capability.

CURRENT SERVICES PROGRAM DESCRIPTION:

WATCH LIST

The Watch List program supports the sharing of information included within the Watch List database and accomplishes the technical integration required to interoperable share these data in a secure manner with key DHS and other entities. The Watch List Technical Integration program accomplished its intended goal at the end of FY 2008.

FY 2008 Accomplishment

- Completed implementation of the Watch List Service

FY 2009 -2010 Planned Accomplishment

- Provide Operation and Maintenance Support to Watch List Service

Information Security and Infrastructure

The Information Security & Infrastructure (ISI) appropriation supports investment and investment-related Operations and Maintenance (O&M) and O&M for the capabilities developed in the Enterprise Services Division (ESD) of the IT Services Office (ITSO). Specifically, the ISI appropriation funds development of capabilities in Network Services, ADEX/Email Services, and supports the management and oversight of the ITP.

Network Services

The Steward for the Network Services project is Customs and Border Protection (CBP). Network Services will provide a reliable, resilient and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations. The core of the unified environment will be consolidating all legacy networks to one enterprise-wide, integrated network called "OneNet." Major services provided by Network Services include:

- DHS OneNet - Wide Area Network (WAN) Services
- Network and Security Operations Centers
- Traffic Modeling and Data Analysis
- IP Address Administration

- Network Management
- Access Controls

OneNet will be comprised of two independent Multi-Protocol Label Switching (MPLS) networks, each provided by a separate vendor. Through physical line redundancy and first-tier vendor carrier delivery, the WAN systematically provides continuity and network availability. DHS sites will be connected to the WAN via two physical connections, each terminating at a different vendor's MPLS network. Key features of the MPLS-based network employed by OneNet include increased flexibility, scalability and security, as well as a lower total cost of ownership.

The Network Operations Centers/Security Operations Centers (NOC/SOC) will centrally oversee DHS' infrastructure systems and network components. Incident response and detection is coordinated and escalated by the NOC/SOC within the network security and computing services groups depending on the nature of the breach or failure. This aids in availability management and capacity management by providing respective service groups with collected monitoring data.

Transitioning DHS Network Services (Legacy and OneNet) to General Services Administration's (GSA) Network Contract will achieve greater network functionality and telecommunications capabilities than possible under the previous GSA contract vehicle.

FY 2008 Accomplishments

- Five FEMA sites in Washington, DC migrated to the DHS Washington Metropolitan Network, thus joining the OneNet;
- Moved six of 10 major components to the new Trusted Internet Connection (TIC). USSS, OIG, HQ, CIS, ICE and FLETC now have the greatly enhanced protection offered by the TIC and monitor internet traffic. This is a major step in OneNet consolidation and great progress towards OMB's TIC goals;
- Established OneNet connectivity at DHS Data Center 2 (DC2);
- Moved ICE, CIS, FLETC, and DHS HQ legacy public-facing Domain Name System (DNS) to DHS Data Center 1 (DC1). All Component DNS can now be efficiently managed; and
- Established a Remote Security Authorization (RSA) Infrastructure at DC1. Implemented the RSA Deployment Manager to provide an enterprise-wide SecureID solution for all Components

FY 2009 Planned Accomplishments

- SOC Engineering Tool Set Implementation and Monitoring;
- Implement Enterprise Anti-Virus Services;
- Wireless/Satellite Integration;
- Performance Analysis & Management;
- Maintain Network Port Security;
- Integrate voice over IP and video conferencing capabilities using the OneNet infrastructure as a transport vehicle;
- Migrating all DHS Component Internet, remote access, extranet, and application hosting services at designated TIC locations;
- Transitioning all high availability Component sites to Networkx;
- Maintain existing Network Operations Center (NOC)/Security Operation Centers capability.
- Maintain Internet and Extranet Gateways;
- Update and maintain Infrastructure Information Repository (IIR); and
- Support transition to IPv6

FY 2010 Planned Accomplishments

- Network Services - Transition Component Network Operations and the consolidation of major large program networks such as HSDN to OneNet Operations and Administration;
- Engineering Enhancements & Upgrades; and
- IPv4 Alignment Support

Active Directory and Exchange (ADEX)/Email Services

The Steward for ADEX/Email Services is the US Coast Guard (USCG). Email and active directory services will provide more effective communication between and within DHS. Consolidate legacy email systems being used throughout the various agencies within DHS to implement a standard DHS intranet for efficient and rapid communication dissemination across all DHS entities. ADEX/Email Services will allow personnel to gain access to critical business communications and are designed to deliver greater security, availability, and reliability.

Major services provided by the ADEX/Email Services program include:

- Consolidated DHS-wide Global Address List (GAL)
- Standard email naming convention
- Delivery and management of a DHS-wide active directory
- Delivery of a DHS-wide email platform

FY 2008 Accomplishments

- Achieved Secretary's goal of having one enterprise, trusted email system with a common address list, allowing users to access contract information for all individuals with in the Department quickly and easily;
- Worked with counterparts at DOJ to establish a process for using Exchange mail to meet National Audit and Registration Agency policy concerning official records management;
- Implemented anti-spoofing filters and managed exception requests for the Directory Services and Email System (DSES);
- Installed hardware and created a lab at the Telecommunications and Information Systems Command (TISCOM) to emulate the IOC (Initial Operating Capability) and FOC (Final Operating Capability) environments for active directory, email centralization, and email archiving;
- Installed hardware and necessary software at the Stennis data center for the IOC active directory, email centralization, and email archiving;
- Simulated email archiving boundaries and developed an engineered solution for IOC for email archiving; and
- Completed testing of technologies and performance baseline for IOC

FY 2009 Planned Accomplishments

- Maintain at least 99.9 percent LAN availability 24 x 7 except for periods of scheduled downtime;
- Perform annual security auditing and vulnerability testing to maintain the system within DHS security guidelines and standards as defined by the DSES Information System Security Manager (ISSM) and Designated Accrediting Authority (DAA) of DHS OneNet;
- Develop and supply metrics for network usage to allow for potential DSES bandwidth increases;
- Enhance and improve the anti-spam and anti-phishing capabilities;
- Purchase and install data in motion forensic software to protect against classified and personally identifiable information (PII) spillage; and
- Transitioning DHS e-mail gateways to the DHS TIC locations at both data centers

FY 2010 Planned Accomplishments

- Maintain at least 99.9 percent LAN availability 24 x 7 except for periods of scheduled downtime;

- Perform annual security auditing and vulnerability testing to maintain the system within DHS security guidelines and standards as defined by the DSES Information System Security Manager (ISSM) and Designated Accrediting Authority (DAA) of DHS OneNet; and
- Assess the need for and provide system and application software upgrades as mandated by DHS security requirements

National Center for Critical Information Processing and Storage

NCCIPS funding is used by DC1, located in Stennis, Mississippi, for a data services center for critical infrastructure information, including development, operations and maintenance, and power upgrades, thereby reducing unnecessary and duplicative investments by the government. Integrating the multiple centers and infrastructure to the primary and secondary NCCIPS data centers will present significant opportunities for cost saving and provide the best investment for DHS critical information requirements. NCCIPS funds will be used to utilize DC1 at the highest capacity throughout the fiscal year.

FY 2008 Accomplishments

- Completed major power assessment for required component provisioning at DC1;
- Identified areas for power-provisioning to optimize current power levels and interim and long-term solutions, including developing a Memorandum of Understanding with NASA for power sharing and construction of a new power station; and
- Awarded operations and maintenance services contract for DC1 services support

FY 2009 Planned Accomplishments

- Continue with power upgrades through Phase IB which include diesel fuel supply upgrades for Zone A/B and G/H;
- Initiated projects to implement interim and long term power solutions; and
- Complete interim power solutions at DC1 to support migration progress and make progress on long term/final solution

FY 2010 Planned Accomplishments

- Complete power upgrades at DC1 to fully meet Tier III standards by acquiring and installing an additional generator, uninterrupted power supply, chiller, computer room air conditioner, and power distribution units; and
- Continue power upgrade for Phases II and III, including electrical upgrades

Data Center Development

Two enterprise-wide data centers will consolidate the Department's seventeen existing data centers. Data Center Services will provide management and control of data center hardware, operating systems software, and environmental systems. Both data centers will have the ability to continuously synchronize applications based upon mission requirements, so either facility can seamlessly take over in the event of a disaster. The DHS Data Center capabilities will provide the personnel and tools to manage service delivery and support activities.

Major services provided by Data Center Services include:

- Capacity management
- Availability management
- System management and administration
- Hardware/software maintenance
- Facility monitoring, management, and security
- Disaster recovery management and testing

The Data Center Development appropriation provides funding to consolidate and assist migrating data center environments to two enterprise-wide DHS Data Centers. The program will focus on continuing to build capabilities at both DHS Data Centers.

FY 2008 Accomplishments

- Received additional space at DC2, bringing the total to 60,000 plus square feet of raised floor space;
- Completed DHS Infrastructure Information Repository Update, DHS Secure Wireless Access Prototype project, and iCAV(NPPD) relocation at DC1;
- Complete migration of HSDN backup capabilities to DC1; and
- Completed major Ashburn data center migration to DC1

FY 2009 Planned Accomplishments

- Began Federal Emergency Management Agency (FEMA) discovery efforts for migration to DC2;
- Establish disaster recovery capability between the two DHS Data Centers in support of DHS Strategic Goal 3.2 to ensure continuity of government communications and operations;
- Complete TSA and DOJ hosted (CIS, ICE, US-VISIT, OIA) component migrations into DC2; and
- Conduct HSDN migration to DC2 and then synchronize HSDN services between DC1 and DC2

FY 2010 Planned Accomplishments

- Complete major component data center migrations into the two DHS Data Centers; and
- Fully address component disaster recovery within the two data centers

Wireless Program

The Office of the Chief Information Officer requests \$0 million for this activity. This section is provided to show current accomplishments being attained through the execution of prior year carryover funding. The carryover funding for FY2009 is \$2.6 million. The program transferred to the Office of Emergency Communications within the National Protection and Programs Directorate (NPPD) in FY 2007.

FY 2008 Accomplishments

- DHS Wireless Services successfully led and met the March 26, 2008 deadline for transitioning all DHS systems out of the 1710-1755 MHz frequency band;
- Developed and finalized FY 2009-FY 2010 Wireless Services objectives, goals, and spend plans;
- Coordinated interoperable and emergency communications for disasters and tropical storms (e.g., Iowa floods, Dolly, Gustav, Hanna, Ike) with FEMA and Components;
- Supported SBInet Spectrum needs in the Southwest Border –Arizona (e.g., TUS-1, AJO-1); and
- Funded ICE and CBP wireless O&M activities and National Telecommunications and Information Administration (NTIA) Spectrum fees

FY 2009 Planned Accomplishments

- Develop consolidated DHS Wireless Spend Plans to document within-guidance and program increase funding requirements for the Department through FY 2014;
- Complete restoration of Component (i.e. ICE, CBP) capabilities lost due to the 1710-1755 MHz AWS transition;
- Ensure Alignment of wireless investments with DHS policy guidelines and Enterprise Architecture—per DHS MD 4100; and
- Provide Spectrum support to Component missions and continue to participate in National Telecommunications Information Administration (NTIA) committees including Interdepartmental Radio Advisory Committee (IRAC), Frequency Assignment Subcommittee (FAS), Spectrum Planning Subcommittee (SPS), Emergency Planning Subcommittee (EPS) and Technical Subcommittee (TSC) to represent the spectrum interests of DHS

FY 2010 Planned Accomplishments

- Develop and provide input to the annual DHS Strategic Spectrum Plan for FY 2010;
- Develop Common Architecture View of DHS wireless infrastructure through integration of Component inventories to identify sharing opportunities and system vulnerabilities—per DepSec guidance;
- Lead coordination of wireless programs across the department to maximize DHS investments through the sharing of spectrum, infrastructure, and other resources—per DepSec guidance; and
- Promote integration of DHS Wireless systems onto a common OneNet backbone—per CIO guidance

PPA: Homeland Secure Data Network

	Perm Pos	FTE	Amount
2008 Actual	0	0	\$26,038
2009 Enacted	0	0	47,673
2010 Adjustments-to-Base	0	0	(12)
2010 Current Services	0	0	47,661
2010 Program Change	0	0	...
2010 President's Budget	0	0	47,661
Total Change 2009-2010	0	0	(12)

The Office of the Chief Information Officer requests \$47.611 million for this activity, a decrease of \$12,000 over FY 2009 Enacted. The adjustment-to-base is a reduction in funding for payment of Working Capital Fund services.

Homeland Secure Data Network (HSDN)

HSDN is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State government and supporting entities. With HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and DHS partners.

- HSDN has established 112 sites composed of some 1,940 seats;
- HSDN has approximately 4,854 established end user accounts who currently logon and exchange information across HSDN in performing their daily mission requirements; and
- HSDN currently operates its system-wide core capabilities and infrastructure consisting of its Network Operating Center (NOC), Secure Operating Center (SOC), four-tiered helpdesk, first data center, and system-wide telecommunications backbone on 24-hour operations in support of the mission requirements of its established end users

FY 2008 Accomplishments

- Established and maintained periodic HSDN program self-assessment and evaluation through the DHS established Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness;
- Established support to the mission requirements of DHS component organizations and its homeland security partners staying abreast of and identifying applicable advancing information and applied technologies capable of improving data gathering, fusion, analysis, intelligence gathering and dissemination at a SECRET-classified level;
- Supported NCCC effort as a key member of the NCCC working group, developed NCCC overall architecture and government furnished equipment re-use, and developed a pilot plan for SME-PED and deployed a SME-PED test environment;
- Identified a DTECH Closed Storage solution that fits in a standard Mosler safe drawer, collaborated with L3 to address and correct talon short-comings (failover, multiple sign-ons, and lack of Firefly keys), coupled solution with a Thin Client laptop capability. Completed the integration of the DTECH Closed storage solution and successfully deployed the first 5 units;
- Completed the integration of the L3 Talon to provide a low cost HSDN solution (Successfully deployed the Talon solution to DOT CMC site);
- Successfully deployed 31 new sites (including 4 other government agency sites – Nuclear Regulatory Commission (3 sites) and Department of Energy (1 site)) and includes 2 HSDN sites to support the Democratic and Republican National Conventions;

- Successfully implemented a solution to provide connectivity for the TSA Trace system to HSDN (provides Secret Internet Protocol Router Network (SIPRNet) connectivity and provides Trace users HSDN email);
- Completed the Info Work Space Pilot implementation for the I&A;
- Successfully transitioned the I&A web hosting application into the HSDN DMZ infrastructure;
- Completed the transition from the Coast Guard High Assurance Guard (HAG) to DISA HAG; and
- Supported the national COOP exercise in May

FY 2009 Planned Accomplishments

- Complete critical refreshment of one third of the established system-wide core infrastructure and site-specific aging HSDN equipment;
- Complete annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness;
- Transition of Level 3 circuits to OneNet (83 sites);
- Transition the Primary HSDN Data Center from the Fair Lakes facility to the EDS facility at Clarksville, VA;
- Relocate HSDN NOC / SOC functions to DHS NCA Bldg 100 SMC / NMC; and
- HSDN Deployment to 198 new sites, in addition to the 52 new sites included in the O&M baseline (250 total new sites in FY 2009) with the potential for an additional 150 sites for a total of 400 new sites deployments in FY 2009)

FY 2010 Planned Accomplishments

- Complete annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness;
- Continue tech refresh of site-specific aging equipment; and
- Continue build out of HSDN

IV. Program Justification of Changes

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Information Officer
 Justification of Program Changes**
 (Dollars in Thousands)

Program Increase 1: COMSEC Modernization

Strategic Goal(s) & Objective(s): Goal 1: Protect Our Nation from Dangerous People
Goal 3: Protect Critical Infrastructure
Goal 4: Strengthen Our Nation’s Preparedness and Emergency Response Capabilities
Objective 1.1: Achieve Effective Control of Our Borders
3.1: Protect and Strengthen the resilience of the Nation’s Critical Infrastructure and Key Resources
4.1: Ensure Preparedness
4.2: Strengthen Response and Recovery

PPA: Information Technology Services

Program Increase: Positions 0 FTE 0 Dollars \$6,700

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							\$1,322
Program Increase							6,700
Total Request	\$1,490	\$1,351	\$8,022

Description of Item

Communications Security (COMSEC) supports the Department’s activities for acquisition and fielding of replacement communications security equipment, and technical training for equipment installers, maintainers, users, and custodians. The program provides for equipment upgrades that will allow the Department to comply with National Security Policies and ensure a viable and integrated program that enables the Department to communicate securely internally and externally to federal, state and local government entities. This initiative establishes regional technical training on new COMSEC equipment used to secure transmission of the Department’s classified National Security, Terrorist Threat and Intelligence Information.

The Homeland Security Central Office of Record (COR) was established under MD 4300B to administer the National Security Policies required providing accounting, safeguarding and management control over Type 1 COMSEC keying material and equipment. The COR provides consolidated COMSEC accounting services, training and assists in providing acquisition and maintenance of COMSEC equipment for the Department. The DHS COR develops and publishes policy and

procedures for the operation and use of Type 1 COMSEC equipment and cryptographic keying material within DHS and insures compliance with Departmental and National security policies and procedures.

Justification

The COMSEC program requests recurring funding for this enhanced capability in order to replace equipment that has a useful life of 3 to 5 years. The recurring funds will also cover the operations and maintenance costs of existing and new COMSEC equipment to fully support the Department's approach to increase information sharing in a secure environment with other government agencies, state, local, private partners, and stakeholders.

Directive/Mandate:

1. NCSC 1, National Policy for the Safeguarding and Control of Communications Security Material states: "The Heads of Departments and Agencies are responsible for implementing within their Department or Agency the provision of National COMSEC Directives and Instructions. Section I Policy paragraph 2 states:" ...there shall be established within each Department and Agency holding COMSEC cryptographic keying material a COMSEC Material Control System into which all COMSEC cryptographic keying Material shall be placed. Other COMSEC material may be placed in the COMSEC Material Control System or any other material control system which provides the requisite degree of security, accounting, modification and management control."

2. National Security Directive 42 (NSD-42) National Policy for the Security of National Security Telecommunications and Information systems. "Paragraph 2a, "Policies. US Government national security systems shall be secured by such means as are necessary, to prevent compromises denials or exploitations."

Decertification of Equipment (\$4.5 million) The National Security Agency (NSA) has decertified 13 types (more than 15,000 separate units) of COMSEC equipment over the last two years. As part of this de-certification process, NSA has established December 31, 2009 as a "last day of use" for these items. After that date NSA will not guarantee the security of the information being protected. The requested funding will cover the cost of replacing the more than 15,000 pieces of de-certified equipment, as well as associated user training, installation and disposal.

Fielding and Custodian Training (\$500,000) Additional funding is needed to field the proposed new equipment and train users on the operation and installation of the equipment. If approved, these funds will be used to destroy the old equipment, install the new equipment and train the custodians on the new equipment. The installation of the new security equipment on all DHS Classified network is a significant change to the network topology and will require all DHS Classified networks to redo their Certification and Accreditations (C&A).

Operations and Maintenance (\$1.7 million). Additional funding is needed to cover operations and maintenance of existing COMSEC devices that have a 5 year life span.

Impact on Performance (Relationship of Increase to Strategic Goals)

COMSEC Supports the Secretary's Priorities:

1. Continue to protect our nation from dangerous people:

The COMSEC program provides keying material and technical support to the TSA Trace system and the National Command and Coordination Capability (NCCC) program. COMSEC key and equipment is also used by the DHS NOC, CBP, ICE, CIS, NPPD and I&A to protect classified communications used to transport Intelligence information within DHS and to our business partners. The COMSEC program provides a variety of COMSEC equipment and technical support to secure all the classified communications within the Department to protect the dissemination of Intelligence information on dangerous people and their activities.

3. Protect Critical Infrastructure:

The COMSEC program provides the security for voice and data communications to The NCCC program, State and Local Governments, State EOCs and Fusion Centers to enable the passing of classified threat information.

4. Strengthen Our Nation's Preparedness and Emergency Response Capabilities:

The COMSEC program supports the FEMA Mobile Emergency Response Systems and FEMA Regions with COMSEC key and equipment to protect all means of communications including satellite, voice data and paper encryption schemes. The program provides keying material, COMSEC equipment, maintenance support and training on encryption equipment to Users and COMSEC support personnel. Technical guidance on procurements and systems design of COMSEC equipment for new networks also provided to support this goal.

Program Increase 2: Information Security and Infrastructure
Network Security/Internet Gateway/Single Sign On

Strategic Goal(s) & Objective(s): Goal 5: Strengthen and Unify DHS Operations and Management
Objective 5.1: Improve Department Governance and Performance

PPA: Security Activities

Program Increase: Positions 0 FTE 0 Dollars \$23,000

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							\$44,653
Program Increase							23,000
Total Request	\$26,641	\$44,653	\$67,653

Description of Item

Network Security Enhancements (\$10.4 million): This funding will mitigate high risk areas within the DHS firewall. This request will establish critical Policy Enforcement Points across the DHS Network, improve DHS Security Operation Center capabilities (i.e., remediation, forensics), and establish robust classified facilities with highly skilled analysts. Network Security Enhancements will identify all internet connections for remediation by migrating legacy connections behind the DHS Trusted Internet Connections (TICs).

Internet Gateway Enhancements (\$8.4 million): Additional funding will mitigate high risk areas for DHS at the perimeter. This request will implement a High Assurance Guard to support mission requirements for accessing social networking sites and establish the DHS Email Disaster Recovery capability where 100 percent of all email traffic behind the two DHS TICs.

Single Sign-On (SSO) Capability (\$4.2 million): Increased FY 2010 funding will be utilized to initiate the application integration efforts and kick-off of the Single Sign-On project. This funding will leverage best of breed technologies to improve operator timely, secure access to mission applications for DHS employees and, Federal, State, Local and Private Sector Partners. This implementation will be closely aligned with the Homeland Security Presidential Directive (HPSD) 12: Policy for a Common Identification Standard for Federal Employees and Contractors. Specifically, funding will establish an implementation team to oversee and execute the application integration and establishment of the core infrastructures for AppAuth, eAuth, the SSO Gateway, and Service Oriented Architecture required under the SSO project. By implementing SSO, DHS computer users will be able to log-in to their systems with only a single set of credentials in order to access multiple applications, minimizing the need for a user to log-in multiple times for different applications.

Justification

The above priorities support DHS’s ability to develop a unified Defense-in-Depth response and implement sustainable enterprise controls to facilitate safe and secure information sharing within and across appropriate mission boundaries.

This funding will protect the DHS network from the risk for privacy and security concerns as well as the risk that sensitive component data may be compromised. Single sign-on funding, will provide valuable security and auditing measures to support the complex information technology infrastructure across DHS.

Impact on Performance (Relationship of Increase to Strategic Goals)

This increase supports DHS Strategic Goal 3: Protect Critical Infrastructure, Strategic Objective 3.3 Improve Cyber Security. The Department is aligning infrastructure cyber security under a comprehensive, IT security strategy that maintains an appropriate set of common enterprise controls to facilitate information sharing within and across all appropriate mission boundaries.

This increase also directly support DHS's Strategic Goal 5: Strengthen and Unify DHS Operations and Management, Strategic Objective 5.1 Improve Department Governance and Performance by implementing a comprehensive, defense-in-depth IT security strategy that maintains an appropriate set of common enterprise controls to facilitate information sharing within and across all appropriate mission boundaries.

Program Increase 3:

Data Center Development
Consolidate to Secure Data Center Environment

Strategic Goal(s) & Objective(s): Goal 5: Strengthen and Unify DHS Operations and Management
Objective 5.1: Improve Department Governance and Performance

PPA: Security Activities

Program Increase: Positions 0 FTE 0 Dollars \$58,800

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							\$23,988
Program Increase							\$58,800
Total Request	\$28,504	\$23,830	\$82,788

Description of Item

Data Center Development (DCD) funding supports unifying IT infrastructure by continuing to migrate twenty-four legacy data centers into two large-scale, secure and scalable data center facilities for the Department of Homeland Security (DHS) Enterprise (DC1 and DC2). DCD funds essential infrastructure and support services for two enterprise-wide DHS Data Centers to meet current and anticipated data service requirements.

A key to success is DHS integrating the legacy workforce, processes, and systems into a unified organization. Consistent with this need, the DHS Chief Information Officer (CIO) established a vision to achieve an objective to centrally manage services, including Information Technology (IT). The “One Infrastructure” vision requires a common IT infrastructure across all DHS. This will improve information sharing via an enterprise-wide, consolidated IT infrastructure, supporting all of DHS’s strategic goals and business objectives: awareness, prevention, protection, response, recovery, services and organizational excellence.

In support of this mission, DHS launched the Data Center Services project to coordinate and oversee the provision of services and facilities for the collocation/consolidation of numerous disparate computing facilities that currently support all DHS Components. The project’s strategic vision is to reduce the number of existing data centers to two secure, geographically diverse locations to minimize infrastructure while enhancing the disaster recovery posture of the Department. This funding directly supports the objectives of the Data Center Services project by providing critical services required at the DHS Data Centers.

Justification

Increased funding in FY 2010 will focus on further migration activity of Component systems, applications and disaster recovery to the DHS Enterprise Data Centers for central DHS management. FY 2010 funding will provide essential data center capability enhancements and support services to facilitate Components migrations from legacy Component data centers into the DHS Data Centers. This includes essential power upgrades required to enable DC1 to be able to reach full capacity

Benefits derived from consolidation are enhanced IT security posture, improved information sharing with stakeholders, reduced security vulnerabilities and improved monitoring capability. Collocation and consolidation will provide a number of benefits over the environments that currently exist within the disparate Component computing facilities. Reducing the overall computing asset footprint will result in reduced system maintenance, management, and administration costs, while a merging of existing operations and maintenance contracts will increase operational efficiency overall. The Data Center consolidation efforts will standardize IT resource acquisitions across Components, as well as streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. The previous, non-unified networking structure made communication and information exchange across the Department enterprise arduous, thereby inhibiting mission success and timeliness. The consolidated environment will also position DHS to take maximum advantage of emerging technologies such as utility computing, virtualization and cloud computing; further improving the efficiency of the DHS infrastructure environment. The FY2010 program increase will be utilized as a contribution into the newly proposed Data Center Consolidation WCF activity in order to maximize efficiency for the procurement of services.

Impact on Performance (Relationship of Increase to Strategic Goals)

Data Center Development funding supports the migration of Component data center environments to two enterprise-wide DHS data centers. This action directly relates to DHS Strategic Goal 3: Protect Critical Infrastructure, Strategic Objective 3.2 to Ensure Continuity of Government Communications and Operations and DHS Strategic Goal 5: Strengthen and Unify DHS Operations and Management, Strategic Objective 5.1 Improve Department Governance and Performance. By establishing two enterprise data centers, DHS has established the capabilities to integrate, consolidate, and transform the individual Component Infrastructures into a single, world-class IT infrastructure capable of supporting the significant demands required of an organization of more than 210,000 employees along with the information sharing requirement of Federal, State, local and tribal business partners.

Without the requested increased funding, DC1 will not be able leverage the existing raised floor space, due to a lack of power caused by limited facilities infrastructure. Furthermore, Component migration schedules will be impacted, elongating DHS' current risk of operating disparate information systems thereby forcing the Department to continue to accept cyber security threats this consolidated effort is focused on addressing.

Furthermore, Components will continue to operate stovepipe information systems and not benefit from a cost-effective, integrated IT infrastructure to optimize information sharing and achieve DHS goals. Furthermore, migration efforts to enterprise facilities will be severely hampered because the Department and Components will have to find offsets in existing O&M budgets to provide the necessary infrastructure required to continue Component migrations.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Departmental Management and Operations
Justification of Proposed Changes in the Office of the Chief Information Officer
Appropriation Language**

For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments, [\$272,169,000] **\$338,393,000**; of which [\$86,928,000] **\$86,912,000** shall be available for salaries and expenses; and of which [\$185,241,000] **\$251,481,000** shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security, to remain available until expended.

PPA Mission Statement

A crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$9,659	\$17,675	\$19,323	\$1,648

Salaries and Benefits includes costs for 94 FTEs. The FY 2010 Request includes an increase for the proposed January 2010 pay raise, annualization of the FY2009 pay increase, and reallocation of Special Services Pay from HSDN to the S&E PPA.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$658	\$320	\$307	(\$13)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY2010 request includes a decrease of \$13,000 due to a decrease for mission critical travel only.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$2,757	\$3,412	\$2,053	(\$1,359)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 Request includes a decrease of \$1,359,000 in anticipated rent costs.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Rent	\$20	\$15	\$20	\$5

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	\$9	\$18,967	\$110	(\$18,857)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request includes a decrease of \$18,857,000 due to prioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$6	\$36	\$35	(\$1)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 Request includes a decrease of \$1,000 due to less than anticipated costs for printing.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$20,085	\$17,521	\$20,421	\$2,900

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request includes an increase of \$2,900,000 to meet program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$456	\$4,423	\$3,804	(\$619)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 Request includes a decrease of \$619,000 due to reprioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$30,058	\$15,103	\$30,127	\$15,024

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request includes an increase of \$15,024,000 due to proper allocation of resources to fund Working Capital Fund activities

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & maintenance of facilities	\$0	\$0	\$1,839	\$1,839

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$1,839,000 for DHS data center operations and maintenance requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Research and Development	\$767	\$400	\$284	(\$116)

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2010 Request includes a decrease of \$116,000 due to reallocation of resources to meet program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$5,485	\$587	\$4,109	\$3,522

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$3,522,000 to adjust due to anticipated IAA agreements with DISA and FEMA, and IT security for the infrastructure.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$394	\$225	\$415	\$190

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 Request includes an increase of \$190,000 for higher than previously anticipated supply and material costs.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Equipment	\$6,069	\$8,219	\$4,040	(\$4,179)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request includes a decrease of \$4,179,000 to reprioritize program and mission requirements resulting in a reallocation of funding.

3) FY2009 Total includes carryover funding in the amount of \$37,851. The enacted amount for FY2009 is \$44,945.

PPA Mission Statement

A program which supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department's Human Resources System (including MaxHR), geospatial technologies, and information sharing.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$39	\$50	\$93	\$43

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2010 Request includes an increase of \$43,000 as a result of reallocating funds to fulfill program requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$0	\$0	\$8	\$8

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 Request is an increase of \$8,000 over the FY2009 enacted due to the Defense Courier costs associated with the COMSEC program.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$834	\$1,776	\$1,540	(\$236)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 Request includes a decrease of \$236,000 in anticipated rent costs.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	\$0	\$62	\$0	(\$62)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request includes a decrease of \$62,000 due to prioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$0	\$0	\$5	\$5

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 Request includes an increase of \$5,000 due to training media and documents associated with the COMSEC program.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$38,904	\$44,020	\$27,288	(\$16,732)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request includes a decrease of \$16,732,000 due to prioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$1,941	\$12,325	\$6,331	(\$5,994)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 Request includes a decrease of \$5,994,000 due to reprioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$4,527	\$13,992	\$5,176	(\$8,816)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request includes a decrease of \$8,816,000 due to a reduced allocation for payment of Working Capital Fund activities and prioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & maintenance of facilities	\$0	\$250	\$1,624	\$1,374

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$1,374,000 for continuity of maintenance requirements associated with the Cyber Identity and Credentialing program.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Medical Care	\$0	\$2	\$0	(\$2)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2010 Request includes a decrease of \$2,000 for payment of Federal Occupational Health charges.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$3,083	\$2,114	\$2,603	\$489

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$489,000 due to maintenance of IT and COMSEC equipment, as well as a program increase for COMSEC equipment upgrades and support.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$20	\$53	\$20	(\$33)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 Request includes a decrease of \$33,000 for less than previously anticipated supply and material costs.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$6,734	\$5,921	\$4,500	(\$1,421)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request is for lifecycle replacement of COMSEC equipment and includes a decrease of \$1,421,000 due to reprioritization of program and mission requirements resulting in a reallocation of funding.

Communication, Utilities, and miscellaneous charges	\$0	\$3,443	\$0	(\$3,443)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request includes a decrease of \$3,443,000 due to prioritization of program and mission requirements to accurately reflect charges.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$19,922	\$56,708	\$34,411	(\$22,297)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request includes a decrease of \$22,297,000 due to prioritization of program and mission requirements.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$12	\$1,061	\$1,483	\$422

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 Request includes an increase of \$422,000 due to the component data center migration and disaster recovery program increase, and information sharing and exchange technical support associated with the Federal Integration and Watchlist program.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$6,441	\$10,368	\$12,867	\$2,499

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request includes an increase of \$2,499,000 due to proper allocation of resources to fund Working Capital Fund activities.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$21,519	\$20,008	\$7,207	(\$12,801)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes a decrease of \$12,801,000 due to mission and priority requirements.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$3,657	\$29,165	\$65,040	\$35,875

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$35,875,000 due to Data Center consolidation efforts.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$34,683	\$16,966	\$29,804	\$12,838

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request includes an increase of \$12,838,000 due to data center circuits, and program increases for network security, internet gateway, and single sign on capability enhancements.

Note: 1) FY2009 Rent allocation revised based on CIO's approved methodology. Offset provided to 25.7 'Operation & Maintenance of equipment'
2) FY2009 Total includes carryover funding in the amount of \$6,906. The enacted amount of for FY2009 is \$47,673.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$0	\$1,062	\$0	(\$1,062)

There is no request for funding associated with this object class. The reduction of FY2010 funding is a result of reallocating resources to fund higher priority items.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$0	\$35	\$0	(\$35)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2010 Request includes a decrease of \$35,000 as a result of a lack of travel being anticipated. requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$61	\$96	\$244	\$148

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 Request includes an increase of \$148,000 in anticipated rent costs.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	\$0	\$299	\$0	(\$299)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 Request includes a decrease of \$299,000 due to prioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Printing	\$0	\$15	\$0	(\$15)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 Request includes a decrease of \$15,000 due to less than anticipated costs for printing.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$1,308	\$4,137	\$0	(\$4,137)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request includes a decrease of \$4,137,000 due to prioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$2	\$278	\$3	(\$275)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 Request includes a decrease of \$275,000 due to reprioritization of program and mission requirements.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$24,550	\$1,680	\$8,540	\$6,860

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request includes an increase of \$6,860,000 due to anticipated IAAs with Coast Guard and GSA FEDSIM for HSDN O&M.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$115	\$32,951	\$26,898	(\$6,053)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes a decrease of \$6,053,000 from FY2009. The funding shown will be used for HSDN O&M.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$0	\$25	\$0	(\$25)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 Request includes a decrease of \$25,000 due to prioritization of program and mission requirements. Routine supply costs will be paid for by the 'Salaries and Expenses' account

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Equipment	\$2	\$14,000	\$11,976	(\$2,024)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request includes a decrease of \$2,024,000 due to reprioritization of program and mission requirements resulting in a reallocation of funding. The amount shown for FY2010 will be used for HSDN asset refresh.

C. Resources Requested and Performance Impact.....	OCIO-3
D. Performance Highlights, Resources, and Alignment to Strategic Goals.....	OCIO-4
E. Digest Tables by FYHSP Programs	OCIO-5

A. Mission and Description of Component

The Department of Homeland Security (DHS) Office of the Chief Information Officer (CIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department.

Under the leadership of the CIO, IT will enable the transformation of the Department into a performance based and integrated organization by providing effective technologies and systems. This transformation will align information-delivery resources into appropriate functions to achieve DHS' missions and strategic goals. To that end, the CIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently communicate, process, retrieve, deliver, and share information
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure
- A clear set of performance metrics and efficient business processes
- IT standards and frameworks that provide for integration
- A single, consistent IT governance model
- Continued Improvements in cyber security
- A mature and fully detailed Enterprise Architecture
- The alignment of acquisition for IT goods and services to the department's goals

B. Major Activities and DHS IT Strategic Goals

The Office of the Chief Information Officer provides a myriad of Information Technology related services and support throughout the Department of Homeland Security. The CIO program is divided into five major subprograms as follows:

Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides technology management, shared services, acquisition strategy and executive leadership support to all offices within the CIO. In prior years, the DHS OCIO successfully maintained full Federal Information Security Management Act (FISMA) compliance for more than 700 DHS IT systems; provided governance, oversight, and implementation of DHS security policies to ensure the protection of IT resources; and provided security architecture support to ensure acquisitions are in compliance with the DHS Enterprise Architecture. The sub program also provides operations and maintenance support to legacy, as well as, newly defined Infrastructure investments. In FY2010, the Salaries and Expenses sub program will project to build upon these efforts by improving the Department's classified cyber threat information processing capability; implement the DHS security incident forensic analysis capability; annually review 107 websites and multiple IT applications to ensure all are accessible to DHS employees with disabilities; and provide operations and maintenance support to Infrastructure investments such as the Department's Data Center migration plan. The DHS OCIO's immediate

and long term goal is to protect our IT resources from cyber threats and foster information sharing across the Department. These initiatives fully support the Department's strategic goal to strengthen and unify DHS operations and management.

Department-wide Technology Investments

Information Technology Services – A program that supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, and the integration of the following: the Department's financial management system activities; IT systems accessibility; Infrastructure Services; IT Policy and Management; Capital Plan Investment Control; geospatial technologies; and information sharing. In FY2010, the DHS OCIO will have ten portfolio segment architectures complete or in process; Screening, Securing; Incident Management, Benefits Administration, Domain Awareness, Information Sharing, Enterprise IT Services (infrastructure), Enterprise Business Services (HRIT, Financial Management), and Enterprise Mission Services; will annually review and align \$6 billion of IT investments to portfolios and provide budget recommendations to the Program Review Board (PRB); annually review 20 Level One and 18 Level Two IT programs for alignment to IT Strategy, Enterprise Architecture, Portfolio requirements and IT Security; and annually review \$4 billion in IT procurements to align with IT Strategy, Enterprise Architecture, Portfolio requirements and IT Security. The Information Technology Services sub program will provide a greater information sharing capability through the setting of Data Standards in alignment with segment architectures and Federal-wide standards such as the National Information Exchange Model (NIEM). The DHS OCIO's immediate and long term goal is to manage and govern IT acquisitions and their alignment with the Enterprise Architecture and promote information sharing across the Department through the setting of Data Standards. These initiatives fully support the Department's strategic goal to strengthen and unify DHS operations and management.

Security Activities – A set of programs that provide for the integration and protection of sensitive and collateral DHS information. In FY2010, the DHS OCIO will continue its efforts to consolidate disparate data centers into two DHS Data Centers; establish Disaster Recovery capability for primary DHS systems; consolidate multiple disparate networks into DHS OneNet; manage infrastructure support to include network services, data center services and application support for 15 enterprise applications; establish Trusted Internet Connection (TIC) capability and move all traffic behind the TIC; and Implement Single Sign-On and HSPD-12 initiatives. The DHS OCIO's immediate and long term goal is to protect our IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department. These initiatives fully support the Department's strategic goal to strengthen and unify DHS operations and management.

Homeland Secure Data Network (HSDN) – HSDN provides the primary means for data and information exchange, messaging, and collaboration with specific and controlled interconnections to the intelligence community and federal law enforcement resources at a SECRET-classified level within the civil side of Federal government for DHS Component Organizations, Federal, and State and Local Government. In FY2010, the DHS OCIO will deploy Secret network connectivity to multiple field sites and establish Disaster Recovery capability. The DHS OCIO's immediate and long term goal is to foster information sharing across the Department, intelligence community; and federal, state, and local law enforcement resources through trusted connectivity. These initiatives fully support the Department's strategic goal to strengthen and unify DHS operations and management.

DHS IT Strategic Goals

The Department of Homeland Security (DHS) Office of the Chief Information Officer (CIO), in coordination with other Component CIOs, is responsible for efficiently and effectively managing and governing the Department's resources for IT investments. In order to comply with Component's IT mission requirements and ensuring alignment with the Department's Strategic Goals and Objectives, the CIO Community has provided the following IT Strategic Goals:

1. Establish secure IT infrastructure capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation and recovery capabilities.
2. Strengthen and unify the Department's ability to share information with federal, state, local and tribal partners
3. Effectively manage IT capabilities and implement cross-departmental IT portfolios that enhance mission and business performance
4. Develop and implement a comprehensive approach to IT employee recruitment, development, retention and recognition to ensure excellence in IT delivery across the Department.

C. Resources Requested and Performance Impact

Current Services:

The Office of the Chief Information Officer is requesting \$249,893,000; 94 positions, 94 FTEs in Current Services for FY2010. The total adjustment to base reflects a decrease of \$22,276,000 over the FY2009 Enacted. The net decrease in current services includes FY 2009 annualization and FY 2010 payroll increases, a transfer to the Office of the Secretary Executive Management for executive travel requirements, increased Working Capital Fund costs, a decrease in the estimated payment for GSA Rent, and a decrease in one time funding for the National Center Critical Information Processing and Storage (NCCIPS). In FY2010, the DHS OCIO will continue to provide governance, management, and oversight over the Department's IT portfolios, capital planning, and strategic planning and budgeting for IT acquisitions, to ensure alignment with DHS Strategic Goals, DHS OCIO IT Strategic Goals, and the Enterprise Architecture. The DHS OCIO will continue to promulgate and implement DHS IT Security policy, governance, and security architecture guidance for all Departmental IT acquisitions and continue to deliver and improve Infrastructure services. The DHS OCIO will also continue its efforts to consolidate multiple data centers, networks, and services to comply with the One DHS, One Infrastructure policy. The DHS OCIO is committed to fully supporting the Department's Strategic Goal to Strengthen and Unify DHS Operations and Management.

Program Increases:

The Office of the Chief Information Officer is requesting a total of \$88.5 million and 0 FTEs in over guidance program increases for FY2010. Each over guidance program increase is as follows:

- **Data Center Consolidation (\$58.8 million)-** Increased funding in FY 2010 will focus on further migration activity of Component systems, applications and disaster recovery to the DHS Enterprise Data Centers for central DHS management. FY 2010 funding will provide essential data center capability enhancements and support services to facilitate Components

migrations from legacy Component data centers into the DHS Data Centers. Collocation and consolidation will provide a number of benefits over the environments that currently exist within the disparate Component computing facilities. Reducing the overall computing asset footprint will result in reduced system maintenance, management, and administration costs, while a merging of existing operations and maintenance contracts will further reduce overhead and administrative costs. The previous, non-unified networking structure made communication and information exchange across the Department enterprise arduous and costly, thereby inhibiting mission success and timeliness. The Data Center consolidation efforts will standardize IT resource acquisitions across Components, as well as streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced IT security posture, improved information sharing with stakeholders, and enhanced operational efficiencies over time. This activity will be managed through the DHS Working Capital Fund.

- **COMSEC Modernization (\$6.7 million)**- increases the capability of secure communications throughout the Department by the de-certification and replacement of 15,000 separate units, fielding and custodial training, and operations and maintenance of existing COMSEC equipment. This program increase will allow the Department to comply with the National Security Directive 42 (NSD-42) National Policy for the Security of National Security Telecommunications and Information systems and the NCSC 1, National Policy for the Safeguarding and Control of Communications Security Material.
- **Information Security and Infrastructure (\$23.0 million)**- the increase in program funding will enhance network security through the mitigation of high risk areas within the DHS firewall, mitigate high risk areas on the perimeter via the Internet Gateway, and begin the initiation of the single sign on capability. These initiatives provide an improvement to the DHS network infrastructure based on the Defense-in-Depth Strategy Framework developed by the U.S. Department of Defense.

D. Performance Highlights, Resources, and Alignment to Strategic Goals

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below.

Program: Office of the Chief Information Officer						
Performance Goal: Provide world class information technology leadership and guidance to components and stakeholders enabling them to efficiently and effectively achieve their vision, mission and goals.						
DHS strategic objectives supported and % allocation of activities: 5.1 Improve Department Governance and Performance, 100% Allocation						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$275,270	\$294,257	\$349,013	\$295,200	\$272,169	\$338,393
FTE	78	78	84	91	94	94

Performance Plan Measures

Measure: Percent of major information technology systems with full Federal Information

Security Management Act Compliance						
Description of Measure: Information security is vital to U.S. economic and national security interests. This measure assesses the percent of the Department's major Information Technology (IT) systems in the operations and maintenance phase that meet all Federal Information Security Management Act (FISMA) requirements. FISMA requires that agencies develop, document, and implement an agency - wide program to protect information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction. Major IT systems are defined as: important to the mission of the agency; for financial management obligating more than 500,000 annually; having significant program or policy implications; high executive visibility, high development, operating, or maintenance costs; funded through other than direct appropriations; or defined as major by the agency's capital planning and investment control process. The targets reflect that there are always systems in a life - cycle transition phase.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	None	90%	90%
Actual:	None	None	None	None	N/A	N/A

Measure: Percent of major investments currently aligned to the Agency Enterprise Architecture.						
Description of Measure: This measure assesses how many of the Department's major (Level 1 and 2) investments are aligned with the Department of Homeland Security's Enterprise Architecture. Enterprise Architecture is a blueprint for describing the enterprise and is one tool for managing change within the Department of Homeland Security. Enterprise Architecture ensures that all investments are aligned to strategic goals and the target Enterprise Architecture for achieving those goals. Investment programs that align to the target architecture for the Department are given authority to proceed with their implementation. Investment programs determined not to align with the target architecture are provided recommendations on how to enhance their alignment before proceeding forward. The Enterprise Architecture alignment is important for improving mission effectiveness and operational efficiency while ensuring that all investments are not creating unnecessary redundancies.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	None	25%	40%

BUDGET REQUEST AND SUPPORTING INFORMATION

ANALYSIS AND OPERATIONS ANALYSIS AND OPERATIONS APPROPRIATION

I. Appropriation Overview

A. Mission Statement for Analysis and Operations:

The Analysis and Operations appropriation provides resources for the support of the Office of Intelligence and Analysis and the Office of Operations Coordination. Even though these two offices are different and distinct in their missions, they work together and with other DHS components to support the Department's mission of protecting the homeland. The mission of Intelligence & Analysis is to provide homeland security intelligence to the Secretary, other government officials, and our State, Local, and Private Sector partners. The mission of the Office of Operations Coordination is to integrate DHS and interagency planning and operations coordination in order to prevent, protect, respond to, and recover from terrorist threats/attacks or threats from other man-made or natural disasters.

B. Budget Activities:

Office of Intelligence and Analysis (I&A) - As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the nation's intelligence apparatus and DHS components and other State, Local, and Private Sector (SLP) partners. I&A ensures that information is gathered from all relevant DHS field operations and other SLP partners and that this information is shared with appropriate stakeholders to produce accurate, timely and actionable analytical intelligence products and services. The Under Secretary for Intelligence and Analysis (U/SIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT), responsible for managing the entire DHS Intelligence Enterprise, and the Department's Chief Information Sharing Officer, responsible for implementing the objectives of the Program Manager – Information Sharing Environment (PM-ISE) within DHS.

Office of Operations Coordination and Planning (OPS) - OPS plays a pivotal role in DHS' mission to lead the unified national effort to secure America by facilitating the Secretary's responsibilities across the full spectrum of incident management (prevention, protection, response and recovery). OPS provides situational awareness, assessments and operations coordination for the DHS Secretary and facilitates operational information sharing with all DHS components, as well as for Federal, State, local, tribal, private sector and international partners. In support of the Secretary's role as principal Federal official for domestic incident management, OPS develops and coordinates Departmental and interagency strategic-level operations plans.

C. Budget Request Summary:

The Analysis and Operations account requests 783 positions, 699 FTE and \$357,345,000 for FY 2010. Details regarding the program increases can be found in the classified annex.

BUDGET REQUEST AND SUPPORTING INFORMATION

OFFICE OF INSPECTOR GENERAL AUDIT, INSPECTIONS AND INVESTIGATIONS PROGRAM

I. Appropriation Overview

The Department of Homeland Security (DHS), Office of Inspector General (OIG) was established by the *Homeland Security Act 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The Inspector General (IG) has a dual reporting responsibility, to the Secretary of Homeland Security and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. For fiscal year (FY) 2010, the OIG is requesting 662 positions, 632 full time equivalent (FTE) and \$127.9 million. The request includes 25 FTE and \$4.8 million for adjustments-to-base, and 30 FTE and \$8.5 million for program increases. In addition to the program increase, the request includes a base increase of \$16.0 million to continue its disaster oversight efforts.

A. Mission Statement for the Office of Inspector General:

The OIG aspires to aid the Department in continuously improving its management and program operations, and inspire innovation in its offices and within the Inspector General community.

The OIG conducts and supervises audits, inspections, special reviews, and investigations of the Department's programs and operations, including program and financial management, contract and grant activity, and disaster relief efforts. The OIG conducts these reviews to offer recommendations for improving the economy, efficiency, and effectiveness of the Department's operations and activities, when necessary; and to deter, identify, and address fraud, waste, and abuse. The OIG annually publishes a schedule of audits, inspections, and investigations that will assist the Department in fulfilling its mission and goals, and report its findings to the Secretary, the Congress, and the public, when appropriate.

B. Budget Activities:

Audit, Inspections and Investigations Program - The OIG has one budget activity which consists of the following components:

Executive Office: The Executive Office consists of the IG, the Deputy IG, an executive assistant, and support staff. It provides executive leadership to the OIG. The office has 4 FTEs.

Office of Congressional and Media Affairs: The Office of Congressional and Media Affairs serves as primary liaison to members of Congress and their staffs, the White House and Executive Branch, the media, and other federal agencies and governmental entities involved in securing the Nation. The office's staff responds to inquiries from the Congress, the White House, and the media; notifies Congress about OIG initiatives, policies, and programs; and informs other governmental entities about OIG measures that affect their operations and activities. It also provides advice to the IG and supports OIG staff as they address congressional, White House, and media inquiries. The office has 5 FTEs.

Office of Counsel to the Inspector General: The Office of Counsel provides legal advice to the IG and other management officials; supports audits, inspections, and investigations by ensuring that applicable laws and regulations are followed; serves as the OIG's designated ethics office; manages the OIG's *Freedom of Information Act* and *Privacy Act* responsibilities; furnishes attorney services for the issuance and enforcement of OIG subpoenas; and provides legal advice on OIG operations. The office has 14 FTEs.

Office of Audits: The Office of Audits conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. Audits evaluate whether established goals and objectives are achieved and resources are used economically and efficiently; whether intended and realized results are consistent with laws, regulations, and good business practice; and determine whether financial accountability is achieved and the financial statements are not materially misstated. The office has 165 FTEs.

Office of Emergency Management: The Office of Emergency Management (EMO) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. The office is an independent and objective means of keeping the Congress, the Secretary, the Administrator of the FEMA and other federal disaster relief agencies fully informed on problems and deficiencies relating to disaster operations and assistance programs, and progress regarding corrective actions. EMO's focus is weighted heavily against prevention, including reviewing internal controls, and monitoring and advising DHS and FEMA officials on contracts, grants, and purchase transactions before they are approved. This allows the office to stay current on all disaster relief operations and provide on-the-spot advice on internal controls and precedent-setting decisions. The office coordinates with other Federal Offices of Inspector General, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 75 FTEs supplemented by temporary and term employees as needed to cover disaster surges, including a continued presence in the Gulf Coast area.

Office of Inspections: The Office of Inspections provides the IG with a means to analyze programs quickly and to evaluate operational efficiency and vulnerability. This work includes special review of sensitive issues that arise suddenly and congressional requests for studies that require immediate attention. Inspections may examine any area of the Department, plus it is the lead OIG office for reporting on DHS intelligence, international affairs, civil rights and civil liberties, and science and technology. Inspections reports use a variety of study methods and evaluate techniques to develop recommendations for DHS; and the reports are released to DHS, Congress, and the public. The office has 41 FTEs.

Office of Information Technology Audits: The Office of Information Technology conducts audits and evaluations of DHS' information management, cyber infrastructure, and systems integration activities. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. In addition, it evaluates the systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office also assesses DHS' information security program as mandated by the *Federal Information Security Management Act* (FISMA). In addition, the office provides technical forensics assistance to OIG offices in support of OIG's fraud prevention and detection programs. The office has 43 FTEs.

Office of Investigations: The Office of Investigations conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, grantees, and programs. These investigations can result in criminal prosecutions, fines, civil monetary penalties, administrative sanctions, and personnel actions. Additionally, the Office of Investigations monitors the investigative activity of DHS'

various internal affairs offices. This office has 189 FTEs along with temporary employees dedicated to disaster recovery efforts.

Office of Administration: The Office of Administration provides critical administrative support functions, including OIG strategic planning; development and implementation of administrative directives; the OIG's information and office automation systems; budget formulation and execution; correspondence; printing and distribution of OIG reports; and oversight of the personnel, procurement, travel, and accounting services provided to the OIG on a reimbursable basis by the Bureau of Public Debt. The office also prepares the OIG's annual performance plans and the semiannual reports to the Congress. The office has 41 FTEs.

C. Budget Request Summary

The OIG is requesting 662 positions, 632 FTE and \$127.9 million for FY 2010. The program increases include 60 positions, 30 FTE and \$8.5 million. The adjustments-to-base are for 25 FTE and \$4.8 million and include a base increase of \$16.0 million for Emergency Management Oversight disaster relief activities.

2010 President's Budget	662	632	127,874
Total Change 2009-2010	60	55	29,361

1 Includes actual obligations associated with the transfer from the Disaster Relief Fund.

2 Excludes ARRA funding of \$5.0M and \$16.0M transfer from the Disaster Relief Fund.

* The table above excludes AARA funding of \$5.0 million provided in P.L. 111-5. For FY 2010, the Office of Inspector General (OIG) requests \$127.9 million for this activity. This reflects an increase of \$4.8 million over FY 2009 for pay inflation and other adjustments-to-base, a base increase of \$16.0 million to continue its disaster oversight efforts, as well as a total program increase of \$8.5 million to provide additional staff. The additional staff will perform oversight responsibilities and assist DHS in achieving its strategic goal of "organizational excellence." Specifically, \$5.1 million program increase associated with personnel support, \$2.4 million towards training to include requirements of Public Law 110-40, *The Inspector General Reform Act of 2008*, and \$1.0 million for GSA rent and facility-related costs.

CURRENT SERVICES PROGRAM DESCRIPTION:

Specifically, the OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;
- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG's;

- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation strategies;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and
- Report violations of federal criminal law to the U.S. Attorney General.

Significant accomplishments in FY 2008 include:

- The OIG issued 99 management reports (audits and inspections) and 25 financial assistance grant reports. The OIG processed 52 reports on DHS programs that were issued by other organizations. As a result of these efforts, \$140.7 million of questioned costs were identified, of which \$89.6 million were determined to be unsupported. In addition, \$37.6 million were recovered as a result of identifying disallowed costs identified from current and prior year reports and identifying \$4.9 million of funds that could have been put to better use.
- DHS management concurred with 96 percent of the recommendations of OIG, an increase of two percent over 2007.
- OIG investigations resulted in 904 reports issued, 426 arrests, 470 indictments, 402 convictions, and 33 personnel actions. OIG investigators closed 1,056 investigations and 15,415 complaints.
- Additionally, investigative recoveries, fines, restitutions, and cost savings totaled \$52.9 million.

FY 2009 planned accomplishments include:

- The Office of Audit's plans include issuing an increased number of program and financial audits and will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.
- The Office of Emergency Management Oversight will continue the disaster oversight activities focusing on internal controls, grant and contract audits, and performance reviews, for all FEMA programs and operations.
- The Office of Inspections continued reviews with emphasizes on DHS operations involving intelligence information management to include a review of the Homeland Security Infrastructure Threat and Risk Analysis Center, Science and Technology Directorate programs, and overseas operations.
- The Office of Information Technology continues a series of reviews and evaluations on the Department's progress in establishing a cost-effective and secure information technology infrastructure.
- The Office of Investigations plans continue assessment of operations to ensure all efforts address protecting the integrity of the Department of Homeland Security. Additionally, Investigations is also supporting the Hurricane Katrina Task Force (HKTF) by increasing the FEMA investigative caseloads.

Anticipated FY 2010 performance is described below:

The Office of Audits plans to issue 65 program and financial audits during FY 2010. The OIG anticipates that it will complete approximately 20 of the FY 2009 carryover audits in FY 2010 and 45 new program and financial reports. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.

The Office Information Technology Audits (IT) will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. Specifically, IT will assess the progress DHS is making in consolidating its myriad networks and implementing a standard IT platform across the Department. In addition, IT will evaluate the effectiveness of DHS' program for modernizing its immigration systems and to implement a border security system; DHS' programs to protect privacy; and DHS' efforts to protect the Nation's cyber infrastructure. Furthermore, IT will conduct a series of reviews addressing the security aspects of telework, web servers, consolidated data centers, and the Automated Commercial Environment (ACE) and Secure Flight programs. Finally, the IT office will assess DHS' effort to address significant deficiencies identified in the IT security program by ensuring that progress is made in developing components' plans of action and milestones; ensuring that security policies and procedures are implemented department-wide; and ensuring that all systems are adequately certified and accredited.

The Office of Inspections (ISP) ISP is the lead OIG unit for reporting on DHS intelligence, international affairs, civil rights and civil liberties, and science and technology. ISP's international efforts will build upon the OIG's 2008 report *Management of Department of Homeland Security International Activities and Interests (OIG-08-71)* by evaluating the quality of management direction and control exercised overseas at the component level. ISP will continue to meet regularly with the DHS Office of Civil Rights and Civil Liberties and stakeholders to identify areas warranting review. Planned reviews include whether DHS components properly process unaccompanied juvenile aliens. ISP will review the Science and Technology Directorate on, whether selected acquisitions complied with federal regulations and will assess the appropriateness of the directorate's acquisition structure. In addition, ISP plans to evaluate the effectiveness of mission communications among Federal Air Marshals (FAMS) and the comprehensiveness of management controls to prevent immigration adjudicators from issuing fraudulent benefits. ISP will also review the quality of DHS coordination among departments and components regarding employment verification programs and regarding infrastructure protection in the petroleum and natural gas subsectors.

The Office of Investigations and its field office staff members will continue to protect the personnel, property, and integrity of DHS by vigorously investigating allegations of serious criminal, civil, and administrative wrongdoing involving DHS personnel, programs and operations.

The Office of Investigations will continue to maintain effective liaison and joint investigations with the Immigration and Customs Enforcement (ICE), Office of Professional Responsibility; the U.S. Coast Guard (USCG), Investigative Service; the Transportation Security Administration (TSA), Office of Inspections; the United States Secret Service (USSS), Office of Professional Responsibility; the U.S. Customs and Border Protection (CBP), Office of Internal Affairs; and U.S. Citizenship and Immigration Services (CIS), Office of Security and Investigations; and the other various non-law enforcement components within the DHS. Investigations will also liaison with law enforcement and non-law enforcement entities outside of DHS. In addition, Investigations will continue to exercise its authorized oversight function by reviewing the internal inspection divisions of ICE, USCG, FAMS, the Federal Protective Service (FPS), and CIS.

In FY 2010, the Office of Investigations, Inspections Division will conduct internal inspections of the following OIG Investigations offices: the Miami Field Office, including the San Juan Resident Office and Orlando Sub-Office; the Atlanta Field Office, including the Hattiesburg, Biloxi, and Mobile Sub-Offices; the San Diego Field Office, including the Los Angeles and El Centro Resident Offices; the Chicago Field Office including the Detroit Resident Office; the El Paso Field Office; and the San Francisco Field Office, including the Seattle Resident Office.

The Office of Investigations, Inspections Division, Hotline and Correspondence Unit will continue to maintain and improve its systems for receiving, routing, and responding to thousands of routine complaints and communications each year, as well as congressional and other official correspondence.

The Office of Investigations, Federal Emergency Management Agency Support Unit will maintain liaison with FEMA and continue to support the National Center for Disaster Fraud by improving information access and communications, and maintaining a steady flow of investigative cases, prosecutions, and recoupment's by the Baton Rouge, Biloxi, Hattiesburg, and Mobile Sub-Offices and other field offices nationwide.

The Office of Emergency Management Oversight (EMO) EMO will maintain a presence at FEMA field offices in the Gulf Coast to provide oversight and technical assistance to FEMA and state and local officials, as well as to monitor the implementation of FEMA's mitigation programs. The EMO office coordinates with other Federal Offices of Inspector General, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. EMO is prepared to deploy experienced staff to FEMA's operation centers, joint field offices, and transitional recovery offices to provide assistance and oversight during a significant natural or man-made disaster.

EMO provides an independent and objective means of keeping Congress, the Secretary of Homeland Security, the Administrator of FEMA and other Federal disaster relief agencies fully informed of problems and deficiencies relating to disaster operations and assistance programs and the progress regarding corrective actions. These reports are valuable to both the Office of Management and Budget (OMB) and the Congress in making budget and program decisions.

IV. Program Justification of Changes

**Department of Homeland Security
Office of Inspector General
Audit, Inspection and Investigations
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Personnel Support

Strategic Goal(s) & Objective(s): 5.0 - Strengthen and Unify DHS Operations and Management
PPA: Audit, Inspections and Investigations

Program Increase: Positions 60 FTE 30 Dollars \$5,100

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							60	30	5,100
Total Request							60	30	5,100

Description of Item

The FY 2010 program requests reflect an increase of \$5.1 million for personnel support for 60 new positions. The program increase reflects the resources that are required to enable the OIG to perform its oversight responsibilities, as well as assist DHS in achieving its strategic goal of “organizational excellence.”

Justification

The FY 2010 budget requests funding for additional resources for staffing requirements for the OIG oversight activities relating to several DHS issues on immigration and border security, transportation security, critical infrastructure protection, federal and state/local intelligence sharing, Secure Border Initiative(SBI), and acquisition strategies. The request provides the OIG an additional 60 positions and 30 FTEs. These resources will provide the required staff to support our ever-increasing investigative and oversight functions. The country faces a massive challenge in its effort to achieve security and stability along its borders. Since September 11, 2001, the federal government has increased funding for border security and doubled the size of the Border Patrol from approximately 9,000 agents to 20,000 agents. There is a positive relationship between the increased critical border patrol infrastructure activities and the increased OIG investigative oversight activities to prevent risk management issues in these programs and operations.

The additional resources will enable the Office of Audits to conduct new audits annually (of varying complexity), covering several aspects of immigration and border control. Priority will be given to the Secure Border Initiative (SBI), acquisition strategies, funding and eventual implementation planning. In addition to this, the application and security of biometric data obtained through US-VISIT and how the components and intelligence elements use this data needs critical analysis. Plus, increased reviews and evaluations of the policies and procedures associated with the apprehension, detention, and removal of illegal immigrants will intensify the workload as these policies change, are legislated, or become controversial through implementation.

The Office of Audits will also be capable of conducting in-house grant audits of state grantees and local government sub-grantees. The Office of Audits will conduct audits annually of science and technology preparedness programs and development grants awarded to university based researchers and private industry for nuclear and biological detections, surveillance, scanning, and counter measure initiatives. In addition, the Office of Audits will conduct audits of cross component initiatives such as interoperable commoditization and intelligence sharing, and a follow-on audit to the audit of the National Response Plan. Furthermore, Audits will also review the Department's systems and internal controls over financial reporting and follow-up on over 1,000 open recommendations that its office and others have issued to the Department concerning these and other programs.

The increase in staffing will better position the Office of Investigations to assist in supporting the Department's integrated planning guidance (IPG) of strengthening border security and interior enforcement. These resources provided to the current investigative field offices will facilitate the expeditious resolution of the overwhelming number of incoming allegations of criminal conduct and or egregious administrative misconduct on the part of DHS employees, contractors, and grantees. The Office of Investigations will thereby, be able to investigate more of the allegations that they previously delegated to component internal affairs offices.

The additional resources will also allow the Office of Information Technology Audits to perform security reviews of select DHS components in their entirety and address major information technology (IT) issues facing the Department in the various stages of development and implementation. This manner of review would give the component head, the DHS Chief Information Officer (CIO), and Secretary a comprehensive assessment of the security posture of those components tested, such as Transportation Security Administration (TSA), Custom and Border Protection (CBP), United States Coast Guard (USCG), United States Secret Service (USSS), etc. Further, these reviews would be linked directly to the Department's IPG priority of strengthening intelligence and enhancing information sharing with its partners. The primary priority supporting the IPG would be information interoperability across DHS. The Department is making progress in developing and implementing an agency-wide information security program that addresses the needs of over 200,000 employees assigned to hundreds of different sites.

The Office of Inspections (ISP) will evaluate operational efficiency and vulnerability to expand examining the role of DHS in intelligence fusion centers and several aspects of terrorist watch list management, including potential vulnerabilities in Secure Flight. ISP will examine the DHS Traveler Redress Inquiry Program, which permits travelers to seek resolution for difficulties such as denial of airline boarding or border crossing. ISP's efforts in international affairs include an assessment of visa security issues and the first in a series of reports evaluating the management of DHS overseas operations. ISP will review the Science and Technology Directorate's processes for selecting and managing research and development programs.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional resources that the OIG is requesting reflect the highest priorities and vision for the Office over the next five years. The request has a direct correlation to the achievement of DHS' goal to "strengthen and unify DHS operations and management." The resources should increase the number of reports that the OIG is able to produce and its ability to provide a greater number of departmental managers with recommendations to ensure that their programs/activities are operating in the most economical, efficient, and effective manner possible. The additional resources will also

enable the OIG to enhance its ability to follow-up, on a regular basis, on the substantial number of open recommendations that the OIG and others have issued to the Department.

IV. Program Justification of Changes

**Department of Homeland Security
Office of Inspector General
Audit, Inspection and Investigations
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: GSA Rent and Facility-Related Costs

Strategic Goal(s) & Objective(s): 5.0 - Strengthen and Unify DHS Operations and Management
PPA: Audit, Inspections and Investigations

Program Increase: Positions 0 FTE 0 Dollars \$1,049

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							-	-	1,049
Total Request									1,049

Description of Item

The OIG requests \$1.0 million in program resources for General Services Administration (GSA) rent and facility-related costs. The FY 2010 request funds an accumulated increase of GSA rent, guard services, maintenance and management of buildings, commercially leased parking, utilities, and other miscellaneous space related costs.

Justification

The OIG conducts its mission-critical work through its workforce. The OIG is headquartered in Washington, D.C. and includes field offices strategically located throughout the country. Approximately 47 percent of the OIG’s workforce is located in the Washington, DC headquarters office with the other 53 percent of its workforce located across the nation and Puerto Rico.

The OIG’s on-board position level grew significantly during FY 2008 – an increase of 40 positions over the previous fiscal year. During FY 2009, the OIG will consolidate the Office of Investigations, Washington Field Office (WFO) in Northern Virginia within headquarters. The relocation of the WFO within headquarters will result in a more effective and efficient operation for the Office of Investigations.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in the on-board position level together with the decision to relocate the Washington Field Office within headquarters resulted in a permanent requirement to acquire additional space at OIG’s headquarters in Washington, D.C. The \$1.0 million program increase is required to meet the OIG’s commitment to GSA for rent and for the additional facility-related costs.

Audit, Inspection and Investigations
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 3: Training

Strategic Goal(s) & Objective(s): 5.0 - Strengthen and Unify DHS Operations and Management
PPA: Audit, Inspections and Investigations

Program Increase: Positions 0 FTE 0 Dollars \$2,390

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							-	-	2,390
Total Request									2,390

Description of Item

The program increase will enable the OIG to continue growth of professionals to excel in their fields. In addition to mandatory and essential training courses needed for the OIG personnel, these funds will also be used for the President’s Council on Integrity and Efficiency.

Justification

The FY 2010 budget requests funding of \$2.4 million to facilitate the OIG 's personnel professional educational training requirements and the Council of the Inspectors General on Integrity and Efficiency (CIGIE) under the mandatory requirements of the Inspector General Reform Act of 2008, P.L. 110-40 [H.R. 928]. The Inspector General Act requires Office of Inspectors General to adhere to the Generally Accepted Government Auditing Standards (GAGAS) promulgated by the Government Accountability Office. Similarly, evaluations and investigations are done in adherence with professional standards adopted by the President’s Council on Integrity and Efficiency and the Executive Council on Integrity and Efficiency. Additionally, the OIG investigation personnel must complete required training programs, annual training and specialized technology and investigative training. Moreover, the requested resources will help the OIG properly train new comers as well as experienced professional staff to enable them to perform at top efficiency. The OIG will maintain the Agency’s quality and flexibility of human resources and ensure that staff maximizes the professional skills needed to grow with job requirements.

Impact on Performance (Relationship of Increase to Strategic Goals)

The OIG has made every effort to continue to provide staff the required training opportunities while minimizing costs by introducing more group classes and online training sessions, including for the cross training of employees. Despite these efforts, with the continuous change in technology, the OIG needs to ensure that its employees stay current with their skill levels. The overall staff development goal is to improve performance through structured training, professional development, and career development efforts. Moreover, the OIG is committed to achieving increased productivity and therefore would like to provide its employees the opportunity to learn and contribute efficiently at the workplace. The OIG also hopes to achieve higher staff motivation, increased performance levels, boost in the retention of its employees, and enable further the contribution to organizational value. The \$2.4 million represents the continuation of professional, technological, and investigative educational training requirements.

A. Mission and Description of the Office of Inspector General

The Homeland Security Act of 2002 provided for the establishment of the Office of Inspector General (OIG) to ensure independent and objective audits, inspections, and investigations of the operations of the Department of Homeland Security (DHS).

An Inspector General (IG), who is appointed by the President and confirmed by the Senate, reports directly to both the Secretary of DHS and the Congress. Barring narrow and exceptional circumstances, the IG may inspect, audit, or investigate anyone in the Department, or any program or operation of the Department. To ensure the IG's independence and objectivity, the OIG has its own budget, contracting, and personnel authority, separate from that of the Department. Such authority enhances the OIG's ability to promote economy, efficiency, and effectiveness within the Department, and to prevent and detect fraud, waste, and abuse in the Department's programs and operations.

Specifically, the OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;
- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG's;
- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation strategies;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and
- Report violations of federal criminal law to the U.S. Attorney General.

For FY 2010, the OIG is requesting 662 positions of which 632 full-time equivalents (FTEs). Approximately 48 percent of these FTEs will be located in the Washington, D.C. headquarters office. The remainder will be located in 27 field offices in the following locations: Atlanta, Bellingham, Boston, Buffalo, Chicago, Denver, Detroit, Denton/Dallas, Del Rio, El Centro, El Segundo, Los Angeles, El Paso, Houston, Jersey City/New York, Laredo, McAllen, Marlton/Philadelphia, Miami, Orlando, San Diego, Oakland/San Francisco, San Juan, Seattle, St. Thomas, Tucson, Yuma, and Northern Virginia (Washington Field Office). In addition, there are temporary field offices dedicated to disaster oversight operations.

In FY 2010 approximately 54 percent of OIG employees are professional staff to function in the areas of audit, inspection and emergency oversight; approximately 34 percent of employees are criminal investigators and approximately 12 percent of employees are in executive and administrative management support capacities.

B. Major Activities and Key Strategic Goals

In the FY 2008 report of management challenges, the OIG identified the following as the most serious management challenges facing DHS:

- Catastrophic Disaster Response and Recovery;
- Acquisition and Contract Management;
- Grants Management;
- Financial Management;
- Information Technology Management;
- Infrastructure Protection;
- Border Security;
- Transportation Security;
- Trade Operations and Security.

In addition to keeping with the priorities of both the Secretary and the Congress, we will focus attention on DHS' "non-homeland" missions. Particular attention will be given to the United States Coast Guard's (USCG) "non-homeland" mission, as mandated by the *Homeland Security Act*, and to disaster response and recovery activities.

These programs and functions are not an all-inclusive inventory of the Department's activities. Rather, they represent those activities that are the core of the Department's mission and strategic objectives. By answering certain fundamental questions within each of these program and functional areas, we will determine how well the Department is performing and will be able to recommend ways to improve the efficacy of the Department's programs and operations.

We will strive to have a consultative and collaborative working relationship with senior management of DHS while at the same time providing constructive and objective information to promote DHS management decision making and accountability.

The OIG has a dual reporting responsibility, to the Congress as well as to the Secretary. During the reporting period, the OIG continued its active engagement with Congress through numerous meetings, briefings, and dialogues with members and staff of the Department's authorizing and appropriations committees and subcommittees on a range of issues relating to our work and that of the DHS. The OIG's statements for the record and the reports cited in the congressional testimony are available on the OIG website at www.dhs.gov.

C. Resources Requested and Performance Impact

The Office of Inspector General provides an objective, third party assessment to ensure integrity, prevention and detection, and ferreting out of waste, fraud and abuse in DHS programs and operations. These activities result in financial savings and recoveries associated with the identification of fraud, waste, and abuse. The avoidance of fraud, waste, and abuse clearly contributes to the DHS goal of achieving organizational excellence, in addition to all other DHS strategic goals, while also providing the various DHS components and Congress with the assurances that DHS resources are being used as intended.

The proposed FY 2010 budget request totals \$127,874,000 to maintain ongoing activities that will mitigate potential risk management vulnerabilities and provide oversight of critical department-wide initiatives and programs while incorporating the Secretary's priorities to protect our Nation from dangerous people, and to protect our Nation from dangerous goods. Major changes to the base funding include \$16,000,000 for Emergency Management Oversight disaster relief activities. This base increase reflects a funding level activity that in previous years was transferred from the Federal Emergency Management Agency (FEMA) Disaster Relief Fund to the OIG in support of Emergency Management Oversight efforts. The FY 2010 requested funding will be used to maintain current levels of program operations, support 60 additional positions, and for adjustments to the base and pay annualization.

Current services:

The Office of Audits plans to issue 65 program and financial audits during FY 2010. The OIG anticipates that it will complete approximately 20 of the FY 2009 carryover audits in FY 2010 and 45 new program and financial reports. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.

The Office Information Technology Audits (IT) will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. Specifically, IT will assess the progress DHS is making in consolidating its myriad networks and implementing a standard IT platform across the Department. In addition, IT will evaluate the effectiveness of DHS' program for modernizing its immigration systems and to implement a border security system; DHS' programs to protect privacy; and DHS' efforts to protect the Nation's cyber infrastructure. Furthermore, IT will conduct a series of reviews addressing the security aspects of telework, web servers, consolidated data centers, and the Automated Commercial Environment (ACE) and Secure Flight programs. Finally, the IT office will assess DHS' effort to address significant deficiencies identified in the IT security program by ensuring that progress is made in developing components' plans of action and milestones; ensuring that security policies and procedures are implemented department-wide; and ensuring that all systems are adequately certified and accredited.

The Office of Inspections (ISP) emphasizes special reviews of sensitive issues that arise suddenly and congressional requests for studies that require immediate attention. Inspectors may examine any area of the Department, plus ISP is the lead OIG unit for reporting on DHS intelligence, international affairs, civil rights and civil liberties, and science and technology. With respect to intelligence, ISP reports quarterly to the President's Intelligence Oversight Board on the Department's compliance with Executive Orders 12333 and 13462 regarding intelligence on U.S. persons. ISP's international efforts will build upon the OIG's 2008 report *Management of Department of Homeland Security International Activities and Interests (OIG-08-71)* by evaluating the quality of management direction and control exercised overseas at the component level. In the area of civil rights and civil liberties, ISP will continue to meet regularly with the DHS Office of Civil Rights and Civil Liberties and stakeholders to identify areas warranting review. Planned reviews include whether DHS components properly process unaccompanied juvenile aliens. Finally, regarding the Science and Technology Directorate, ISP will review whether selected acquisitions complied with federal regulations and will assess the appropriateness of the directorate's acquisition structure. In addition to these specialty areas, ISP plans to evaluate the effectiveness of mission communications among Federal Air Marshals (FAMS) and the

comprehensiveness of management controls to prevent immigration adjudicators from issuing fraudulent benefits. ISP will also review the quality of DHS coordination among departments and components regarding employment verification programs and regarding infrastructure protection in the petroleum and natural gas subsectors.

The Office of Investigations and its field office staff members will continue to protect the personnel, property, and integrity of DHS by vigorously investigating allegations of serious criminal, civil, and administrative wrongdoing involving DHS personnel, programs and operations.

The Office of Investigations will continue to maintain effective liaison and joint investigations with the Immigration and Customs Enforcement (ICE), Office of Professional Responsibility; the U.S. Coast Guard (USCG), Investigative Service; the Transportation Security Administration (TSA), Office of Inspections; the United States Secret Service (USSS), Office of Professional Responsibility; the U.S. Customs and Border Protection (CBP), Office of Internal Affairs; and U.S. Citizenship and Immigration Services (CIS), Office of Security and Investigations; and the other various non-law enforcement components within the DHS. Investigations will also liaison with law enforcement and non-law enforcement entities outside of DHS. In addition, Investigations will continue to exercise its authorized oversight function by reviewing the internal inspection divisions of ICE, USCG, FAMS, the Federal Protective Service (FPS), and CIS.

In FY 2010, the Office of Investigations, Inspections Division will conduct internal inspections of the following OIG Investigations offices: the Miami Field Office, including the San Juan Resident Office and Orlando Sub-Office; the Atlanta Field Office, including the Hattiesburg, Biloxi, and Mobile Sub-Offices; the San Diego Field Office, including the Los Angeles and El Centro Resident Offices; the Chicago Field Office including the Detroit Resident Office; the El Paso Field Office; and the San Francisco Field Office, including the Seattle Resident Office.

The Office of Investigations, Inspections Division, Hotline and Correspondence Unit will continue to maintain and improve its systems for receiving, routing, and responding to thousands of routine complaints and communications each year, as well as congressional and other official correspondence.

The Office of Investigations, Federal Emergency Management Agency Support Unit will maintain liaison with FEMA and continue to support the National Center for Disaster Fraud by improving information access and communications, and maintaining a steady flow of investigative cases, prosecutions, and recoupment's by the Baton Rouge, Biloxi, Hattiesburg, and Mobile Sub-Offices and other field offices nationwide.

The Office of Emergency Management Oversight (EMO) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. There are normally 40 to 60 Presidential disaster declarations each year and hundreds of open disasters. The office will continue its proactive and aggressive disaster oversight activities working with FEMA to ensure accountability and identify and resolve potential problems before they occur. It is critical that the OIG maintain sufficient funding levels and staff to oversee these efforts as EMO provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. EMO will focus on internal controls, grant and contract audits, performance reviews, congressional requests, and special projects covering all FEMA programs and operations.

EMO will maintain a presence at FEMA field offices in the Gulf Coast to provide oversight and technical assistance to FEMA and state and local officials, as well as to monitor the implementation of FEMA's mitigation programs. The EMO office coordinates with other Federal Offices of Inspector General, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. EMO is prepared to deploy experienced staff to FEMA's operation centers, joint field offices, and transitional recovery offices to provide assistance and oversight during a significant natural or man-made disaster.

EMO provides an independent and objective means of keeping Congress, the Secretary of Homeland Security, the Administrator of FEMA and other Federal disaster relief agencies fully informed of problems and deficiencies relating to disaster operations and assistance programs and the progress regarding corrective actions. These reports are valuable to both the Office of Management and Budget (OMB) and the Congress in making budget and program decisions.

Program increases:

The FY 2010 program requests reflect an increase of \$8.5 million comprised of \$5.1 million for personnel support for 60 new positions, \$2.4 million for training to include requirements under the Inspector General Reform Act of 2008, PL110-40-[H.R. 928], \$1.0 million for General Services Administration (GSA) rent and facility related costs.

Personnel Support

The FY 2010 budget requests funding for additional resources for staffing requirements for the OIG oversight activities relating to several DHS issues on immigration and border security, transportation security, critical infrastructure protection, federal and state/local intelligence sharing, Secure Border Initiative(SBI), and acquisition strategies. The request provides the OIG an additional 60 positions and 30 FTEs. These resources will provide the required staff to support our ever-increasing investigative and oversight functions. The country faces a massive challenge in its effort to achieve security and stability along its borders. Since September 11, 2001, the federal government has increased funding for border security and doubled the size of the Border Patrol from approximately 9,000 agents to 20,000 agents. There is a positive relationship between the increased critical border patrol infrastructure activities and the increased OIG investigative oversight activities to prevent risk management issues in these programs and operations.

The additional resources will enable the Office of Audits to conduct new audits annually (of varying complexity), covering several aspects of immigration and border control. Priority will be given to the Secure Border Initiative (SBI), acquisition strategies, funding and eventual implementation planning. In addition to this, the application and security of biometric data obtained through US-VISIT and how the components and intelligence elements use this data needs critical analysis. Plus, increased reviews and evaluations of the policies and procedures associated with the apprehension, detention, and removal of illegal immigrants will intensify the workload as these policies change, are legislated, or become controversial through implementation.

The Office of Audits will also be capable of conducting in-house grant audits of state grantees and local government sub-grantees. The Office of Audits will conduct audits annually of science and technology preparedness programs and development grants awarded to university based researchers and private industry for nuclear and biological detections, surveillance, scanning, and

counter measure initiatives. In addition, the Office of Audits will conduct audits of cross component initiatives such as interoperable commoditization and intelligence sharing, and a follow-on audit to the audit of the National Response Plan. Furthermore, Audits will also review the Department's systems and internal controls over financial reporting and follow-up on over 1,000 open recommendations that its office and others have issued to the Department concerning these and other programs.

The increase in staffing will better position the Office of Investigations to assist in supporting the Department's integrated planning guidance (IPG) of strengthening border security and interior enforcement. These resources provided to the current investigative field offices will facilitate the expeditious resolution of the overwhelming number of incoming allegations of criminal conduct and or egregious administrative misconduct on the part of DHS employees, contractors, and grantees. The Office of Investigations will thereby, be able to investigate more of the allegations that they previously delegated to component internal affairs offices.

The additional resources will also allow the Office of Information Technology Audits to perform security reviews of select DHS components in their entirety and address major information technology (IT) issues facing the Department in the various stages of development and implementation. This manner of review would give the component head, the DHS Chief Information Officer (CIO), and Secretary a comprehensive assessment of the security posture of those components tested, such as Transportation Security Administration (TSA), Custom and Border Protection (CBP), United States Coast Guard (USCG), United States Secret Service (USSS), etc. Further, these reviews would be linked directly to the Department's IPG priority of strengthening intelligence and enhancing information sharing with its partners. The primary priority supporting the IPG would be information interoperability across DHS. The Department is making progress in developing and implementing an agency-wide information security program that addresses the needs of over 200,000 employees assigned to hundreds of different sites.

The Office of Inspections (ISP) will evaluate operational efficiency and vulnerability to expand examining the role of DHS in intelligence fusion centers and several aspects of terrorist watch list management, including potential vulnerabilities in Secure Flight. ISP will examine the DHS Traveler Redress Inquiry Program, which permits travelers to seek resolution for difficulties such as denial of airline boarding or border crossing. ISP's efforts in international affairs include an assessment of visa security issues and the first in a series of reports evaluating the management of DHS overseas operations. ISP will review the Science and Technology Directorate's processes for selecting and managing research and development programs.

Training

The FY 2010 budget request funding of \$2.4 million to facilitate the OIG's personnel professional educational training requirements and the Council of the Inspectors General on Integrity and Efficiency (CIGIE) under the mandatory requirements of the Inspector General Reform Act of 2008, P.L. 110-40 [H.R. 928]. The Inspector General Act requires Office of Inspectors General to adhere to the Generally Accepted Government Auditing Standards (GAGAS) promulgated by the Government Accountability Office (GAO). Similarly, evaluations and investigations are done in adherence with professional standards adopted by the President's Council on Integrity and Efficiency and the Executive Council on Integrity and Efficiency. Additionally, the OIG investigation personnel must complete required training programs, annual training and specialized

technology and investigative training. Moreover, the requested resources will help the OIG properly train new comers as well as experienced professional staff to enable them to perform at top efficiency. The OIG will maintain the Agency's quality and flexibility of human resources and ensure that staff maximizes the professional skills needed to grow with job requirements.

The OIG has made every effort to continue to provide staff the required training opportunities while minimizing costs by introducing more group classes and online training sessions, including for the cross training of employees. Despite these efforts, with the continuous change in technology, the OIG needs to ensure that its employees stay current with their skill levels. The overall staff development goal is to improve performance through structured training, professional development, and career development efforts. Moreover, the OIG is committed in achieving increased productivity and therefore would like to provide its employees the opportunity to learn and contribute efficiently at the workplace. The OIG also hopes to achieve higher staff motivation, increased performance levels, boost in the retention of its employees, and enable further the contribution to organizational value. The \$2.4 million represents the continuation of professional, technological, and investigative educational training requirements.

GSA Rent and Related Facility Costs

The OIG requests \$1.0 million in program resources for General Services Administration (GSA) rent and facility-related costs. The FY 2010 request funds an accumulated increase of GSA rent, guard services, maintenance and management of buildings, commercially leased parking, utilities, and other miscellaneous space related costs.

The OIG conducts its mission-critical work through its workforce. The OIG is headquartered in Washington, D.C. and includes field offices strategically located throughout the country. Approximately 48 percent of the OIG's workforce is located in the Washington, DC headquarters office with the other 52 percent of its workforce located across the nation and Puerto Rico.

The OIG's on-board position level grew significantly during FY 2008 – an increase of 40 positions over the previous fiscal year. During FY 2009, the OIG will consolidate the Office of Investigations, Washington Field Office (WFO) in Northern Virginia within headquarters. The relocation of the WFO within headquarters will result in a more effective and efficient operation for the Office of Investigations. The increase in the on-board position level together with the decision to relocate the Washington Field Office within headquarters resulted in a permanent requirement to acquire additional space at OIG's headquarters in Washington, D.C. The \$1.0 million program increase is required to meet the OIG's commitment to GSA for rent and for the additional facility-related costs.

D. Performance Highlights, Resources, and Alignment to Strategic Goals

“For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below.”

Performance Budget Highlights by Program

OIG
2010 Congressional

Program: Audit, Inspections, and Investigations Program						
Performance Goal: Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services.						
DHS strategic objectives supported and % allocation of activities: 5.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$97,317	\$84,187	\$102,685	\$116,711	\$114,513	\$127,874
FTE	502	540	545	551	577	632

Performance Plan Measures

Measure: Percent of recommendations made by the Office of Inspector General (OIG) that are accepted by the Department of Homeland Security.						
Description of Measure: The OIG audits and inspects programs for fraud, waste, and abuse. OIG also reviews programs to promote economy, efficiency, and effectiveness. The criteria used to select programs for audit or inspection includes: statutory and regulatory requirements; adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; etc. Where appropriate, OIG audit and inspection reports include recommendations which, if accepted and implemented, will improve the respective program. This measure reflects the percent of recommendations made by the OIG that are accepted and implemented by DHS. The OIG tracks the recommendations that are issued until they have been implemented.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	75%	79%	85%	85%	85%	85%
Actual:	93%	91%	91%	96%	N/A	N/A

Measure: Percent of substantiated investigations that are accepted for criminal, civil, or administrative action.						
Description of Measure: The measure reports on the number of substantiated investigations that are accepted for criminal, civil, or administrative action in comparison to all substantiated investigations that the DHS Office of Inspector General (OIG) conducts during the fiscal year. This measure demonstrates a portion of the impact that OIG investigations have on DHS operations, as well as operations of the entire federal government.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	75%	75%	75%
Actual:	None	None	None	87%	N/A	N/A

E. Digest Tables by Future Year Homeland Security Program (FYHSP) Program

iii. Status of Congressional Requested Studies, Reports, and Evaluation

Fiscal Year	Due Date to Congress	Reference/Citation	Requirement	Status
2008	August 3, 2008	Implementing Recommendations of the 9/11 Commission Act of 2007 P.L. 110-53, Section 1523	Northern Border Railroad Passenger Report: A report on the current system for screening passengers and baggage on passenger railroad service between the United States and Canada, which includes an assessment of the current preclearance program; status on a bilateral protocol with Canada that would allow the preclearance of passengers; a description of the legislative, regulatory, budgetary, or policy barriers within the U.S. Government to providing prescreened passenger lists for railroad; and civil liberties and privacy impact statements.	03/03/09: Report was transmitted to Congress.
2008	November 14, 2008	FY 2008 Appropriations Act Omnibus Report 110-497, Div. E, Title II, pg 20; House Report 109-79, Title II, pg 31; Senate Report 109-83, Title II, pg 28	Qrtly: Automated Commercial Environment (4th Quarter FY 08): Of the funds recommended, not less than \$321,690,000 is available for the development of ACE. As requested, this funding is available for ACE only upon the submission of a comprehensive plan from the Secretary of Homeland Security for the ACE program.	02/27/09: Report was transmitted to Congress.
2008	November 30, 2008	FY 2008 Appropriations Act Omnibus Report 110-497, Div. E, p. 18; Senate Report 110-84, Title II, p. 32	Annual AD/CVD, Past Due Collections, and Unliquidated Entries Report – FY 2008: The Committees on Appropriations direct CBP to continue to work with all relevant U.S. departments and agencies to increase duty collections, and to provide an annual report, within 30 days of each year's distributions under CDSOA, which summarizes CBP's efforts to collect past due amounts and increase current and future collections. CBP is also directed to provide the amounts of antidumping (AD) and countervailing duties (CVD) held by CBP in its Clearing Account for unliquidated entries as of October 1,2006 (and, now, as of October 1,2007), segregated by case number and Department of Commerce period of review.	03/18/09: Report was transmitted to Congress.
2008	December 26, 2008	FY 2008 Appropriations Act P.L 110-161, Division E, Title VI, Section 605, p. 254	Port of Entry Technology Demonstration Program: Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security a report on the activities carried out at each demonstration site under the technology demonstration program established under this section.	03/11/09: Report was transmitted to Congress.
2009	December 29, 2008	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 589 House Report 110-862, Title II, p. 45 Senate Report 110-396, Title II, p. 35	BSFIT Expenditure Plan: To ensure that a foundation for effective investment is in place, a track record of performance is established, and a balanced approach is taken to address all threats along the borders, \$400,000,000 is unavailable for obligation until the Committee has received and approved an expenditure plan.	03/04/09: Report was transmitted to Congress.

Fiscal Year	Due Date to Congress	Reference/Citation	Requirement	Status
2009	December 29, 2008	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 590 House Report 110-862, Title II, p. 46	Alternative Analysis for Effective Control of the Border: To be included in the FY09 BSFIT expenditure plan, Congress directs CBP to identify and evaluate alternatives proposed by stakeholders as potential substitutes for tactical infrastructure, thus minimizing the impact of fencing.	This reporting requirement has been included in BSFIT Expenditure Plan
2009	December 29, 2008	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 590 House Report 110-862, Title II, p. 47	Consultation with Federal Agencies and Local Communities: The Committee is aware of the Department's documented outreach efforts with organizations, local government officials and landowners . . . To support such consultation, the Committee directs CBP, as part of the alternative analysis in the 2009 [BSFIT] expenditure plan, to identify and evaluate alternatives proposed by stakeholders as potential substitutes for tactical infrastructure.	This reporting requirement has been included in BSFIT Expenditure Plan
2009	December 29, 2008	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 591 House Report 110-862, Title II, p. 47	Tactical Communications: The Commissioner is directed to provide a plan, within 90 days of the date of enactment of this Act, detailing the staffing, equipment, and funding necessary to complete the build out of the Border Patrol Tactical Communications program by the end of fiscal year 2013.	04/05/09: Report was transmitted to OMB for review.
2009	January 1, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 35	International Registered Traveler (Global Entry): The Committee directs CBP to report on its findings from the pilot airports, with recommendations for funding and staffing a permanent program, not later than January 1, 2009.	02/11/09: Report was transmitted to Congress.
2009	January 8, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 41	TECS Modernization Expenditure Plan: The Committee directs CBP to submit a detailed expenditures plan not later than January 8, 2009.	03/05/09: Report was transmitted to Congress.
2009	January 8, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 44	Border Interoperability Demonstration Project: The Committee directs the Secretary to report by January 8, 2009, on the Department's plans for use of this funding, including selection of participating communities and a timetable for conducting the pilots.	This reporting requirement was reassigned to DHS Office of Emergency Communications, because the Border Interoperability Demonstration Project falls under their jurisdiction. Accordingly, \$30 million of BSFIT appropriations has been reassigned to DHS OEC, in keeping with the legislative mandate. This is no longer a CBP reporting requirement.
2009	January 8, 2009	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 592 House Report 110-862, Title II, p. 48	Unmanned Aircraft Systems: The Committee directs CBP to provide a comprehensive report on the plans for deployment of the UAS, to include: the concept of operations for the border and coastal regions, and international operations, if relevant a detailed report on operational costs, to include staffing and maintenance basing and range of deployment of UAS mission performance statistics and status of FAA certification and approval for national airspace operations. The report should be submitted not later than January 8, 2009.	03/05/09: Report was transmitted to Congress.

Fiscal Year	Due Date to Congress	Reference/Citation	Requirement	Status
2009	1/8/2009 Monthly Report	FY 2009 Appropriations Act House Report 110-862, Title II, p. 44	Operations and Support: The Committee recommends the funding level of \$410 million to make certain that the program does not lack basic operational resources despite the fact that the Department provided inadequate information to justify it. To ensure these funds are necessary, the Committee directs CBP to provide a detailed report on operations and support to obligations and expenditures on a monthly basis, beginning January 8, 2009. The first such report shall include all obligations and expenditures to date.	CBP is submitting this report to DHS for transmission to Congress on a monthly basis.
2009	January 16, 2008	FY 2009 Appropriations Act Senate Rpt 110-396, Title II, p 33	Qrtly: Automated Commercial Environment (1st Quarter FY 09): The Committee directs that CBP continue to provide the level of detail within the ACE expenditure plan as required in previous years.	03/09/09: Report was transmitted to Congress.
2009	1/30/2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 31 and 42	SBI Quarterly Report: The Committee directs the Department to continue its Secure Border Initiative status reports on a quarterly, versus the current bi-monthly, schedule. The report should include an update on Northern Border <i>SBI</i> investments.	03/27/09: 1 st Quarter report was transmitted to Congress.
2009	January 30, 2009	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 586 House Report 110-862, Title II, p. 31	Staffing Resources Report: CBP is directed to brief the Committees not later than January 30, 2009, on how incentives such as pay adjustments could be used to recruit and retain Border Patrol agents and CBP Officers with language fluency skills, as outlined in the House report..	03/05/09: Although no longer a reporting requirement according to the final appropriations bill, CBP submitted a report to Congress on hiring and retention incentives; the report provided good insight in CBP's programs and ongoing efforts to maintain a healthy workforce.
2008	January 30, 2009	FY 2008 Appropriations Act P.L 110-161, Division E, Title VI, Section 604, p. 253	National Land Border Security Plan: Not later than January 31 of every other year, the Secretary, acting through the Commissioner, shall prepare a National Land Border Security Plan and submit such plan to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the Senate Committee on the Judiciary, the House Committee on Transportation and Infrastructure, the House Committee on Homeland Security, and the House Committee on the Judiciary.	The reporting requirements for section 604 (this report) and 603 (POE Infrastructure Assessment Study) will be combined into one report. 03/18/09: Report was transmitted to OMB for review.
2008	January 30, 2009	FY 2008 Appropriations Act P.L 110-161, Division E, Title VI, Section 603, p. 252	Port of Entry Infrastructure Assessment Study: Not later than January 31 of every other year, the Commissioner, in consultation with the Administrator of General Services shall submit an updated assessment of land port of entry infrastructure needs to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security.	The reporting requirements for section 603 (this report) and 604 (National Land Border Security Plan) will be combined into one report. 03/18/09: Report was transmitted to OMB for review
2009	February 1, 2009	FY 2009 Appropriations Act Joint Explanatory Statement for P.L. 110-329, p. 589	Container Security Devices: The bill includes language directing the Commissioner to submit to the Committees, not later than 120 days after the date of enactment of this Act, the results of operational field testing of container security devices and a plan for implementation and deployment of such devices, as applicable, in high risk trade lanes.	03/05/09: Report was transmitted to Congress.

Fiscal Year	Due Date to Congress	Reference/Citation	Requirement	Status
2009	February 16, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 39	Project Seahawk: The Committee directs CBP to report not later than February 16, 2009, on the impact of Project SeaHawk to date, and to include details of how the project will be funded and supported beyond fiscal year 2009.	03/16/09: Report was transmitted to DHS for review.
2000	March 31, 2009	Tariff Suspension and Trade Act of 2000 P.L. 106-476, Chapter 3, section 1443	Dog and Cat Fur Protection Act: Annual report on CBP's efforts to enforce the provisions of the Dog and Cat Protection Act of 2000, which prohibit the importation of products made with dog and cat fur.	03/06/09: Report was transmitted to Congress.
2007	April 10, 2009	Security and Accountability for Every Port Act of 2006 P.L. 109-367, Section 232	Full-Scale Implementation of Pilot Scanning System: A report submitted every six months on the status of the costs and the efforts of CBP's full-scale deployment to scan, using non-intrusive imaging equipment and radiation detection equipment, all containers entering the United States before such containers arrive in the United States as soon as possible.	03/19/09: Report was transmitted to DHS for review.
2009	April 30, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 31 and 42	SBI Quarterly Report: The Committee directs the Department to continue its Secure Border Initiative status reports on a quarterly, versus the current bi-monthly, schedule. The report should include an update on Northern Border <i>SBI</i> investments.	04/16/09: Report is in CBP review.
2007	May 1, 2009	Security and Accountability for Every Port of 2006 P.L. 109-347 Section 235	Report on Pilot Program to Improve the Safety of Empty Containers: A report on the one-year pilot program to assess the risk posed by and improve the security of empty containers at U.S. seaports to ensure the safe and secure delivery of cargo and prevent potential acts of terrorism involving such containers.	03/17/09: Report was transmitted to DHS for review.
2009	May 5, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 36	US-VISIT Function Support: The Committee directs CBP to provide a detailed report on the prior year budget for this support, by account, purpose and fiscal year, with the fiscal year 2010 budget submission.	The requested report will follow the Status of Congressionally requested studies, reports and evaluation.
2009	May 5, 2009,	FY 2009 Appropriations Act House Report 110-862, Title II, p. 50 Senate Report 110-396, Title II, p. 39	Land Ports of Entry Modernization: In addition to GSA facilities, the 43 land ports of entry owned by and maintained by CBP require significant recapitalization, which CBP estimates could cost \$150,000,000. The Committee includes \$10,000,000, as requested, to begin this recapitalization, and directs CBP to submit a detailed plan for modernizing all 43 ports of entry with its 2010 budget request	The report is being updated.
2009	May 5, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 38	Unaccompanied Alien Children: The committee directs CBP to implement periodic training for CBP staff dealing with unaccompanied children. Directs CBP to submit report with FY10 budget on results of the Border Patrol Self Inspection Program.	The requested report will follow the Status of Congressionally requested studies, reports and evaluation.
2009	May 5, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 33	Internal Affairs Performance Data: The Committee urges CBP to increase efforts to eliminate such backlogs, and directs CBP to include performance data on internal affairs productivity, including time required from intake to final disposition for cases, in the fiscal year 2010 budget request.	The Internal Affairs performance data was added to the current services discussion for Internal Affairs.

Fiscal Year	Due Date to Congress	Reference/Citation	Requirement	Status
2009	May 5, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 38	Air and Marine Facilities Upgrades: The Committee is disappointed by the apparent lack of support for a continued commitment to upgrade the many outdated and ill sized air and marine facilities. The Committee encourages the Department to include additional funding for these facilities in the 2010 budget request.	The enhancements in the FY 2010 President's budget submission focus on addressing other critical areas of meeting future challenges and fulfilling our mission of securing America.
2009	May 5, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 39	Border Facilities Construction Backlog: Committee encourages administration to include funds in its 2010 request to address infrastructure requirements at Sault Ste. Marie International Bridge and Columbus and Santa Teresa ports of entry.	Funding for these requirements are not included in the FY 2010 President's Budget submission.
2009	May 5, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 30	Customs Revenue Staffing Shortfalls: CBP is encouraged to include in its FY10 budget submission a plan to address the significant shortfalls in all of these positions	CBP currently exceeds the required FY 2003 staffing levels. The enhancements included in the FY 2010 President's Budget submission will focus on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America while facilitating legitimate trade.
2009	May 5, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 28	Vehicle Replacement: DHS is directed to include with its fiscal year 2010 budget submission a plan to replace at least 20 percent of the CBP vehicle fleet annually, as well as the funding needed to execute the plan, as specified in the Senate report.	CBP has made progress in addressing fleet management responsibilities; however, CBP will not be able to achieve the replacement rate of 20%. The enhancements in the FY 2010 President's budget submission focus on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America.
2009	May 5, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 37	Northern Border Air Branches: The Committee encourages the Department to include in the fiscal year 2010 budget funding to expand the hours of operation at these air branches.	The enhancements in the FY 2010 President's budget submission focus on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America.
2009	May 5, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 26	Passenger Screening at Airports: The Committee is convinced that growth in the U.S. economy depends in no small measure on international travel and encourages inclusion of funds in the fiscal year 2010 budget request for robust staffing increases at both land and air ports of entry.	The enhancements in the FY 2010 President's budget submission for on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America.
2009	May 5, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 38	Carrizo Cane – FY 2009: The Committee directs CBP to submit, with its fiscal year 2010 budget request, a comprehensive plan to eradicate <i>Arundo donax</i> and other invasive plants that inhibit security efforts along the U.S.-Mexico border, including in Eagle Pass and other Texas border areas not now included in the pilot programs.	This reporting requirement was to be submitted in the FY 2010 Budget Submission; however, it is too long to be included. This reporting requirement will be sent to Congress as a separate report, with the same due date of May 5, 2009. 03/11/2009: Report is in OMB Review.
2009	May 5, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 37	Textile Transshipment Enforcement – FY 2009: The Committee directs CBP to submit report with FY10 budget on execution of 5-year plan.	This reporting requirement was to be submitted in the FY 2010 Budget Submission; however, it is too long to be included. This reporting requirement will be sent to Congress as a separate report, with the same due date of May 5, 2009. 02/20/09: Report was transmitted to Congress.
2009	May 15, 2009	FY 2009 Appropriations Act Senate Rpt 110-396, Title II, p 33	Qrtly: Automated Commercial Environment (2nd Quarter FY 09): The Committee directs that CBP continue to provide the level of detail within the ACE expenditure plan as required in previous years.	04/16/09: Report is in CBP Review

Fiscal Year	Due Date to Congress	Reference/Citation	Requirement	Status
2009	Funding dependant upon submission	FY 2009 Appropriations Act House Report 110-862, Title II, p. 33	Intelligence Staffing: The Committee directs that no funding may be obligated for the operation of the Analytical Framework for Intelligence Officers until the Commissioner certifies that this Framework complies with all applicable laws, including section 552a of title 5, U.S. Code, and other laws protecting privacy, and such certification is reviewed by OIG.	02/04/09: Report was transmitted to Congress.
2009	Funding dependant upon submission	FY 2009 Appropriations Act House Report 110-862, Title II, p. 37	Automated Targeting System – Passenger: No funding shall be obligated for the enhancement of Automated Targeting Systems-Passenger until the Commissioner certifies that such enhancement complies with all applicable laws, including section 552a of title 5 U.S. Code, and other laws protecting privacy, and such certification has been reviewed by OIG.	03/24/09: Report was transmitted to Congress.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection **Salaries and Expenses**

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses:

For more than five years, U.S. Customs and Border Protection (CBP) has made great strides toward securing America's borders, protecting trade and travel, and ensuring the vitality of our economy. With the creation of CBP, for the first time in our nation's history, responsibility for securing, controlling and managing the U.S. border is consolidated within a single agency. As America's frontline border agency, CBP employs over 50,000 highly trained and professional personnel, resources, and expertise and law enforcement authorities to discharge our mission. CBP is responsible for protecting the sovereign borders of the United States at and between official ports of entry. CBP is on the frontline protecting the American public against terrorists and instruments of terror and protects economic security by regulating and facilitating the lawful movement of goods and persons across U.S. borders. CBP performs these missions with vigilance, integrity and professionalism.

CBP is responsible for ensuring that all persons and cargo enter the United States legally and safely through official ports of entry. CBP officers (CBPO) prevent cross-border smuggling of contraband such as controlled substances, weapons of mass destruction, and illegal or diseased plants and animals. CBP ensures that travelers and immigrants present appropriate documentation. CBP works to prevent the illegal export of U.S. currency or other monetary instruments, stolen goods such as vehicles, and strategically sensitive technologies.

CBP carries out its mission without restricting the flow of legitimate trade and travel so important to our nation's economy. Accordingly, CBP has a dual mission – to prevent terrorists and their weapons of mass destruction from entering the U.S. and to facilitate legitimate trade and travel. CBP has found that by using advance information, risk management and technology, and by partnering with other nations and private industry, these goals need not be mutually exclusive.

In support of this mission, CBP has instituted various programs and initiatives such as the Secure Border Initiative (SBI), a comprehensive multi-year plan to secure America's borders and reduce illegal migration, the Cargo Security Initiative (CSI), a program intended to help increase security for containerized cargo shipped to the United States from around the world and Customs Trade Partnership Against Terrorist (C-TPAT), a joint government-business initiative to build cooperative relationships that strengthen overall supply chain and border security.

CBP's primary field occupations include CBP officers, Border Patrol agents, pilots, marine officers, import and entry specialists, and agricultural specialists. Its field organization is

focused around 20 Border Patrol Sectors with 34 border patrol checkpoints and 93 tactical checkpoints between the ports of entry, 143 stations and substations, 20 field offices and 327 associated ports of entry, of which 15 are pre-clearance stations. Personnel use a mix of non-intrusive technology such as large-scale X-rays and radiation portal monitors, targeting systems, air and marine assets, and other forms of automation to ensure the identification and apprehension of high-risk travelers and trade and the facilitation of legitimate traffic into the United States.

Mission Statement

We are the guardians of our Nation's borders.

We are America's frontline.

We safeguard the American homeland at and beyond our borders.

We protect the American public against terrorists and the instruments of terror.

We steadfastly enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel.

We serve the American public with vigilance, integrity, and professionalism.

Core Values

Vigilance: Vigilance is how we ensure the safety of all Americans. We are continuously watchful and alert to deter, detect, and prevent threats to our Nation. We demonstrate courage and valor in the protection of our Nation.

Service to Country: Service to Country is embodied in the work we do. We are dedicated to defending and upholding the Constitution of the United States. The American people have entrusted us to protect the homeland and defend liberty.

Integrity: Integrity is our cornerstone. We are guided by the highest ethical and moral principles. Our actions bring honor to our agency and ourselves.

B. Budget Activities:

Headquarter Management and Administration

Headquarters Management and Administration provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Border Security Inspections and Trade Facilitation at the Ports of Entry

The Inspections, Trade, and Travel Facilitation at the Ports of Entry program facilitates the flow of legitimate travel and trade across U.S. borders while ensuring that threats to the United States are not allowed entry. CBP accomplishes this by using technology, intelligence, risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists' instruments of terror and contraband from entering the U.S. while facilitating the legal flow of people and trade by deploying CBP officers to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the U.S. CBP has extended its zone of security beyond its physical borders through the use of bilateral and private-sector partnerships, targeting, and scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy, and has created "one face at the border," a unified, recognizable presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

Border Security and Control Between the Ports of Entry

The primary purpose of the Border Security and Control Between the Ports of Entry program is to establish and maintain effective control of U.S. borders by detecting, responding to, and interdicting border penetrations. A national strategy that consists of five objectives has been established to achieve the mission of this program: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the ports of entry; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas. The National Border Patrol Strategy requires increasing national security by augmenting enforcement resources along the northern and southern border. The proper balance in the deployment of personnel, equipment, intelligence, support, technology, and infrastructure is critical. Reducing vulnerability to the entry of terrorists, illegal aliens and drugs by increasing personnel and resources, is the key to the successful implementation of this strategy.

CBP Air and Marine – Salaries

CBP Air and Marine Salaries support a staff of over 1,800 air interdiction officers/pilots, marine enforcement officers, operational support, and administrative positions. It provides funding to enhance skills and expertise to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

C. Budget Request Summary:

CBP Salaries and Expense requests 48,354 positions, 48,158 FTEs, and \$7,623,068 for FY 2010. Program increases include 394 positions and 198 FTEs:

Data Center Migrations – An increase of \$38.6 million, managed through the Working Capital Fund, is requested to provide a standardize information technology (IT) resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

Combating Firearms/Currency Smuggling Southwest Border - An increase of \$26.1 million is requested to provide CBP with an enhanced capability to combat southbound firearms and currency smugglers through additional personnel at and between the port of entry and along the southern border, as well as continuing to expand and maintain the Licensed Plate Reader (LPR) program to help establish and maintain effective control of the border. This will fund 44 Border Patrol agents and 8 support staff for the Office of Border Patrol; and 65 Customs and Border Protection officers and 8 support staff for the Office of Field Operations to expand the capacity to effectively combat firearms and currency smuggling. The LPR program reads the plate as vehicles pass through the ports of entry and automatically queries the TECS database for law enforcement information. This information is then passed to the officers. As vehicles approach the southern border LPRs will be strategically positioned to capture approaching vehicles. Placement of LPRs along the southern border will be based upon current and developing intelligence.

Law Enforcement Enhanced Retirement - An increase of \$25 million is requested to provide enhanced retirement benefits to CBPOs. Public Law 110-161 established special retirement provisions for CBP officers, similar to the retirement coverage for law enforcement officers and firefighters. The enhanced retirement package became effective on July 6, 2008, covering 19,865 employees. Funding was included in the FY 2008 and FY 2009 appropriations for this purpose, but an additional \$25 million is required in FY 2010 (for a total of \$225 million) as the final increment that will fully fund the new retirement coverage. CBPOs are accountable for ensuring the security of our Nation and are required to complete law enforcement training, including: firearms, arrest techniques, defensive tactics and officer safety and survival. CBPOs face the same risks and challenges as law enforcement personnel in other organizations.

Western Hemisphere Travel Initiative (WHTI) - An increase of \$20.9 million is requested to continue maintaining and operating the WHTI program that supports Departmental efforts to facilitate the efficient movement of people at the land border POEs. WHTI provides a tool to conduct the necessary authentication at the time of crossing and it also accelerates the verification process mandated by law to the extent possible with Radio Frequency Identification (RFID) Technology and communications technology.

Air and Marine (A&M) Personnel - An increase of \$19.1 million is requested to hire 68 pilots, 20 marine, and 56 support personnel. These positions are necessary for A&M to achieve maximum compliance with strategic goals and objectives and to support Border Patrol agents on the ground. During FY 2010, A&M plans to continue the expansion of its capabilities across the northern and coastal border and place heavy emphasis on the maritime requirements along the southeast/Caribbean borders. These positions will help Air and Marine to effectively achieve CBP's strategic goals.

Import Safety and Trade Enforcement – An increase of \$9.3 million is requested to hire a total of 103 positions to include 12 scientists, 1 paralegal, 34 international trade specialists, 32 auditors, 10 attorneys, 3 import specialists and 11 support personnel to implement the Action Plan on Import Safety developed in response to Executive Order 13439. Additional staffing is also needed to carry out commercial operations and to adequately staff priority trade areas as proposed in the Office of Trade Resource Allocation Model (RAM). The increase of personnel will offer an optimal mix of trade activities and resources that allow CBP to meet the growing demand in trade volume; meet CBP's mission of enforcing trade laws and collecting revenue; achieve executive management goals and objectives for the trade mission; align activities with the appropriate skill levels; leverage efficient gains from technology process improvements, and combat risks inherent in priority trade areas.

Cyber Security - An increase of \$5 million is requested to provide continuous Top Secret/Sensitive Compartmented Information (TS/SCI) and collateral classified processing capabilities within a "Focused Operations" branch that will provide tactical cyber intelligence of ongoing threats to CBP and DHS while also providing skilled forensics experts capable of staffing a DHS/CBP Digital Media Analysis lab to identify and attribute cyber attacks.

Global Advanced Passenger Information (API)/Passenger Name Record (PNR) – An increase of \$3 million is requested to continue API/PNR in two key security partner countries (including continuing the program for a country previously identified in FY 2008); and to implement the program in one additional key country resulting in the deployment of three countries by the end of FY 2010. Funding will also support start up costs, acquisition of hardware and software, recurring information technology costs, training and travel expenses.

Analyze and Employ Information and Intelligence - An increase of \$2.8 million is requested to hire a total of 20 CBPOs and two mission support positions. The 20 CBPOs would be evenly split between the passenger and cargo facilities of the National Targeting Center (NTC), providing additional operational and analytical support, which is needed in both environments. The increased staffing levels will also ensure that NTC continues to provide CBP personnel with immediate responses to targeting and research inquiries.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

The table above excludes American Recovery and Reinvestment Act (ARRA; P.L. 111-5) funding of \$60.0 million

CBP requests \$1.0 billion for Headquarters Management and Administration. This is a decrease of \$248.7 million under FY 2009 Enacted. The request includes:

- an increase of \$48.0 million for FY 2009 pay annualization and \$6.0 million for pay inflation.
- transfer out of \$307.7 million to the new proposed Facility Management account
- program increases of \$38.7 million for the Data Center Migration and \$5.0 million for Cyber Security

CURRENT SERVICES PROGRAM DESCRIPTION:

Headquarters Management and Administration provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Headquarters Management and Administration is comprised of two main groupings: "Policy, Direction and Human Capital," and "Technology and National Support."

Policy, Direction and Human Capital

Office of the Commissioner

The Office of the Commissioner includes the Commissioner's direct staff and 4 offices:

Office of Intelligence and Operations Coordination (OIOC)

OIOC provides CBP decision-makers with 24/7 Total Situational Awareness of All Crimes/All Threats/All Hazards that occur within CBP's Area of Operations, and coordinates cross-cutting operations. OIOC is comprised of five divisions; the Analysis and Targeting Division (ATD), the Intelligence and Situational Awareness Division (I&SA), the Field Coordination Division, the Incident Management and Operations Coordination (IMOC) and the Mission Support Division.

ATD effectively assesses and reports on the threats CBP faces. Responsibilities include reviewing current trends, patterns and intelligence to identify actionable items for incorporation into our automated targeting systems. ATD supports the primary CBP mission of detecting, identifying, and preventing terrorists and terrorist weapons from entering the U.S. to safeguard the homeland.

I&SA ensures CBP-wide situational awareness through effective management of the Commissioner's Situation Room and the National Intelligence Watch, providing daily intelligence and operations briefings to the Commissioner and his leadership. I&SA is responsible for managing CBP intelligence requirements and developing and implementing intelligence collection management policies and processes.

The Field Coordination Division provides support to the field and advances CBP's objective to becoming an intelligence driven organization through development and coordination with inter- and intra- agency centers to ensure horizontal and vertical flow of intelligence information.

IMOC contributes towards the effectiveness of the CBP mission and preparedness efforts through the coordination of multi-component and inter/intra-agency operational activities including technical standards, contingency planning and training, through exercises and readiness assessments.

The Mission Support Division provides OIOC with Mission Support and leads the OIOC Strategic Planning and Tasking Programs, as well as the CBP Information Sharing Program.

Office of Chief Counsel

The Chief Counsel is the chief legal officer of CBP and reports to the General Counsel of the Department of Homeland Security through the Assistant General Counsel. The Chief Counsel serves as the Ethics Officer for the organization and is the principal legal advisor to the Commissioner of CBP and its officers. The Office of the Chief Counsel provides legal advice to, and legal representation of, CBP officers in matters relating to the activities and functions of CBP. The Office is also responsible for reviewing proposed actions to ensure compliance with legal requirements, preparing formal legal opinions, preparing or reviewing responses in all court actions, civil or criminal, involving CBP, and developing, implementing, and evaluating

nationwide programs, policies, and procedures within its functional areas. The Office of the Chief Counsel has both a Headquarters and a field structure. The Headquarters office is located in Washington, D.C. and its activities are divided broadly into three functional areas under the supervision of Associate Chief Counsels: Ethics, Labor and Employment; Enforcement; and Trade and Finance. The field structure consists of Associate and Assistant Chief Counsels located in major cities across the United States who advise CBP field managers in their geographic areas

Office of Policy and Planning (OPP)

The Office of Policy and Planning provides leadership, direction, and advice regarding CBP's overall policy development and implementation; assists and works on behalf of the Commissioner and Deputy Commissioner in defining and advancing CBP priorities through the effective development, review, and implementation of key policy initiatives in coordination with other CBP offices, DHS, and other governmental agencies. OPP serves as the principle advisor to the Commissioner and other senior officials on CBP's strategic planning and, in coordination with Office of Finance and Office of Information Technology, on the integration of strategic-level planning and performance with resource allocation. OPP has developed and is responsible for implementing CBP's Strategic Management Framework (SMF), which is intended to fully integrate CBP's investment management, resource management and program management process and ensure that resources are used to maximize the return on investment on CBP's mission focused goals. The SMF includes four major types of deliverables for which OPP has oversight responsibility: the CBP Strategic Plan, cross-cutting strategy documents, executive level strategic implementation plans, and quarterly progress reviews. As the designated liaison to Government Accountability Office (GAO) and the Department of Homeland Security (DHS) Office of Inspector General (OIG) for audits and inspections, OPP also serves as the primary audit coordination and liaison point for all audits and inspection work carried out in CBP.

Office of Equal Opportunity

The Office of Equal Opportunity is responsible for ensuring compliance with civil rights statutes and regulations. The Office ensures equal opportunity for all U.S. Customs and Border Protection employees, applicants for employment, members of the trade and traveling public without regard to race, color, religion, sex, age, national origin, or physical and mental disability. The Office provides program leadership in the formulation, implementation, and evaluation of policies and programs in the areas of dispute resolution; complaints processing; and compliance, analysis and special programs.

Office of Internal Affairs (IA)

The Office of Internal Affairs exercises oversight authority for all aspects of CBP operations, personnel, and facilities. IA is responsible for ensuring compliance with all bureau-wide programs and policies relating to corruption, misconduct, or mismanagement; investigating misconduct by CBP employees; and executing the internal security, integrity, management self-inspection program and operational field testing. IA also conducts pre-employment polygraph testing on a strategic selection of applicants, in support of CBP law enforcement hiring. In addition, IA conducts personnel security investigations; educates employees concerning integrity responsibilities; evaluates physical security threats to CBP facilities, and sensitive information; and inspects CBP operations and processes for managerial effectiveness and improvements.

As a result of additional staffing resources being approved in the FY 2008 budget, CBP successfully eradicated approximately 856 of the 880 opened cases involving CBP employees that were transferred at the inception from DHS Office of Inspector General and the ICE Office of Professional Responsibility (OPR).

Office of Human Resources (HRM)

The Office of Human Resources is responsible for ensuring effective delivery of the following services: recruiting, providing employee services and benefits, processing personnel actions, improving business processes, and facilitating workforce effectiveness. HRM promotes and enables mission accomplishments through human capital planning and utilization, strategic leadership with regard to CBP employees, labor-management relations, training and employee safety.

Office of Training and Development (OTD)

The Office of Training and Development is responsible for centralized leadership and direction of all CBP training programs. OTD ensures that all training efforts meet the needs of a diverse and dispersed workforce. OTD establishes standards and policies for designing, developing, delivering, and evaluating training. OTD directly executes career development programs, basic and advanced training to all occupations, management and executive development programs, and develops and implements the annual training plan for the agency.

Office of International Affairs and Trade Relations (INATR)

The Office of International Affairs is responsible for coordinating and supporting foreign initiatives, programs and activities within CBP. INATR strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, immigration, capacity building, and facilitating legitimate trade. INATR focuses on international cooperation and strengthening multi- and bi-lateral relationships to achieve international agreements and joint efforts that both facilitate and secure legitimate trade and travel. INATR promotes expansion of the World Customs Organization (WCO) Framework of Standards for supply chain security and facilitation by providing targeted countries with training and advisory support through programs such as Capacity Building and Export Control and Border Security (EXBS). Additionally, INATR identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA provides in-country advisory support for broad-based customs reform and modernization and ensures CBP is represented at overseas posts and influencing policy throughout the world.

Office of Congressional Affairs

The Office of Congressional Affairs is responsible for advising CBP managers on legislative and congressional matters and for assisting members of Congress and their staffs in understanding current and proposed CBP programs.

Office of Public Affairs (OPA)

The Office of Public Affairs communicates CBP's mission and operations. OPA continually informs the agency's chief stakeholders, the American public, through media outreach and public information campaigns conducted via media events, news releases, video and photography, as

well as the public Web site CBP.gov, informational brochures, and a national customer service call center to address public questions/complaints. OPA also provides continual information to the CBP work force through the CBPnet intranet site, the weekly e-mailed news compilation Frontline News, and through mass e-mails. A quarterly magazine, Frontline, is mailed to CBP personnel and other stakeholders throughout the nation. OPA acts as a conduit for information to and guidance from the Department of Homeland Security.

Technology and National Support

Office of Information and Technology (OIT)

The Office of Information and Technology provides integrated, comprehensive technical support to carry out the mission of CBP, as well as the Department of Homeland Security. OIT is responsible for developing, acquiring, testing, and maintaining existing technology and engineering new technology solutions; for managing the CBP Modernization Program; for overseeing the forensic and scientific analyses in the CBP laboratory system; for designing, developing, maintaining and training personnel on CBP's automated systems; for overseeing the tactical wireless radio program; and for ensuring the reliable performance of our infrastructure. OIT also manages the computer security program; establishes automated interfaces between CBP, trade participants, and other government agencies; and provides reference library and electronic information resources.

Enterprise Data Management & Engineering (EDME)

Enterprise Data Management & Engineering provides innovative Information Technology (IT) services and solutions to Office of Information and Technology (OIT), Customs and Border Protection and the Department of Homeland Security customers. EDME engineers enterprise solutions providing optimal IT data integrity and accessibility that ensures performance quality, reliability and 24x7 IT systems availability which supports the protection of our borders and the facilitation of legitimate trade. In this capacity, EDME uses industry and government best practices to integrate business and technical solutions across the OIT enterprise. EDME provides its DHS and CBP customers with financial guidance, enterprise architecture design and management, systems engineering, data center operations and services, strategic planning, security program management, technology evaluation and integration, audit coordination, and enterprise process management. As a service and mentoring organization, EDME works collaboratively with its DHS and CBP customers to provide innovative technology services and solutions through teamwork and technical excellence.

Enterprise Networks & Technology Support (ENTS)

Enterprise Networks & Technology Support is responsible for enterprise architecture, design and management of CBP network infrastructures, including the shared departmental DHS OneNet. ENTS provides operational day-to-day technology support to all CBP field locations, technology training, enterprise-wide area network, security operations and helpdesk services. ENTS provides 24x7 local area network, wireless, surveillance and detection technology support to all CBP field offices, performs field outreach, manages field modernization projects and oversees all field deployments. ENTS is aggressively working to modernize CBP Field locations deploying a common

wireless communications infrastructure and a consistent desktop configuration across all of CBP, while improving network diversity and survivability.

Targeting and Analysis Systems Program Office (TASPO)

The Targeting and Analysis Systems Program Office is responsible for enhancing, administering, and maintaining selectivity and targeting systems and related systems that help secure the supply chain and support CBP's layered defense strategy for international cargo and passengers. TASPO systems include the Automated Targeting System (ATS), an Intranet-based enforcement and decision support tool that is the cornerstone for all CBP's targeting efforts. In addition to ATS, TASPO has developed and maintains other systems, including Cargo Enforcement Reporting and Tracking System (CERTS), Customs Automated Operations System (CAOS), Customs-Trade Partnership Against Terrorism (C-TPAT), and Port Radiation Inspection, Detection & Evaluation System (PRIDE). TASPO also supports CBP operational units like the National Targeting Center (NTC), Passenger Analysis Units (PAUs), Advanced Targeting Units (ATUs), Office of Intelligence, and other analytical groups within the government.

Cargo Systems Program Office (CSPO)

The Cargo Systems Program Office is responsible for the development, maintenance, and deployment of systems (such as the new Automated Commercial Environment, the Automated Commercial System, and the Automated Export System) and interfaces that support CBP, participating government agencies, and the trade community requirements concerning the importation, exportation, and control of merchandise shipments.

Passenger Systems Program Office (PSPO)

The Passenger Systems Program Office provides application development and continued operational support of all passenger and immigration management systems hosted by CBP. PSPO integrates TECS, formerly known as Treasury Enforcement Communication System, the Advanced Passenger Information System (APIS), and other systems with US VISIT.

Border Enforcement and Management Systems Program Office (BEMSPO)

The Border Enforcement and Management Systems Program Office responsibilities include system development for the full systems life cycle from planning through deployment of all Border Enforcement and Mission Support systems. BEMSPO provides concentrated support of Border Enforcement Systems for the Office of Border Patrol, the Office of Field Operations, and the Office of Air and Marine. BEMSPO also supports Management Systems solutions for the Office of Finance, the Office of Internal Affairs, the Office of Human Resource Management and the Office of Training and Development. Some of the systems supported include ENFORCE; Border Patrol Enforcement and Tracking System (BPETS); iCAD; Enterprise GeoSpatial Information System; Customs Overtime Scheduling System (COSS); Systems, Applications and Processes (SAP); CBP.gov; and CBP.net.

Laboratories and Scientific Services

Laboratories and Scientific Services is the Forensic/Scientific arm of the CBP providing forensic and scientific testing in the area of Trade Enforcement, Weapons of Mass Destruction, Intellectual Property Rights, and Narcotics Enforcement. Each of the eight field laboratories operates a mobile laboratory that is used at the borders for on-site emergency response and programmatic on-site border security operations. A specially trained laboratory forensic "jump" team that can be activated at a moments notice provides crime scene investigation, documentation, and testing for cases involving possible terrorist activity. In addition, CBP's scientists are rotated to the front-line of many of the busiest ports to provide on-site operational support, analysis, training, and response to alerts from CBP's sophisticated Non-Intrusive Inspection and Radiation Portal Monitor technologies.

Workforce Management Group (WMG)

The Workforce Management Group is responsible for providing administrative, organizational, and management support to the managers and personnel of the Office of Information and Technology (OIT). WMG's various functional areas include logistics and space management, physical security, reviewing and tracking Background Investigations (BI) packages, and Human Resource activities relating to staffing, awards, Performance Management System, Labor & Employee Relations (LER), Workers' Compensation Program, and Human Capital. In addition, the WMG supports various special projects such as audits relative to WMG, data calls, budget activities, communications, Web Content Administration, and developing & preparing OIT Executive Performance Plans.

Financial Management Group (FMG)

The Financial Management Group formulates and executes budgets and coordinates property management for OIT. FMG supports the CBP's Investment Management Process (IMP) and the approval process of CBP information technology investment and funding approvals through the Department of Homeland Security investment review process. FMG also coordinates CBP IT acquisition plans through the DHS CIO acquisition approval process. FMG works closely with all OIT organizations to ensure sound fiscal management of OIT resources, to coordinate budgets, and to participate in all programs, projects, and budget reviews.

Office of Finance (OF)

The Office of Finance provides high quality, cost-efficient financial management services through customer involvement and modern, integrated financial systems, in support of CBP's goal of developing and promoting more effective and efficient methods to obtain and manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders. OF is responsible for acquiring and effectively managing the assets needed to accomplish CBP's frontline mission. This includes centralized requirements, planning and implementation of CBP's mail, uniform, personal property and fleet management programs. It also includes a consolidated facilities program account which allows the agency to strategically and consistently manage its complex facilities portfolio.

PPA: INSPECTIONS, TRADE & TRAVEL FACILITATIONS AT THE POEs

	Perm. Pos.	FTE	Amount
2008 Actual	17,072	15,933	2,053,161
2009 Enacted	18,753	17,904	2,093,988
2010 Adjustment to Base	-	849	84,875
2010 Current Services	18,753	18,753	2,178,863
2010 Program Change	176	89	76,347
2010 Request	18,929	18,842	2,255,210
Total Change 2009-2010	176	938	161,222

CBP requests \$2.3 billion for Border Security Inspections and Trade Facilitation at POE's. This is an increase of \$161.2 million over FY 2009 Enacted. The request includes:

- decrease of \$34.6 million for non-recurring costs for WHTI, Global Entry and 2010 Olympics
- an increase of \$125.3 million for pay annualization and \$24.7 million for pay inflation.
- transfer out of \$30.5 million to the new proposed Facilities Management account.
- program increases of \$9.3 million for Import Safety & Trade Enforcement, \$20.9 million for WHTI, \$3.0 million for API/PNR, \$18.1 million for the At the POEs portion of Combating Southbound and Currency Smuggling, and \$25.0 million for CBPO Law Enforcement Enhanced Retirement.

CURRENT SERVICES PROGRAM DESCRIPTION:

The CBP officer is multi-disciplined and performs the full range of inspection, intelligence analysis, examination, and law enforcement activities relating to arrival and departure of persons, conveyances, and merchandise at ports of entry. The officer's primary responsibility is to identify potential terrorists and instruments of terror and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities are to prevent the entry of terrorists and instruments of terror, harmful pests and diseases, illegal drugs and contraband, illegal aliens, and importations/exportations contrary to law and trade agreements, from entering/exiting the United States. The officer interprets the laws and regulations of a broad range of Federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances.

Specific programs under Border Security Inspections and Trade Facilitation at the ports of entry are covered below:

Western Hemisphere Travel Initiative

Section 7209 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA; P.L. 108-458 as amended) directs the Secretary of Homeland Security, in consultation with the Secretary of State, to develop and implement a plan to require U.S. citizens (and non-U.S. citizens) to present a passport or other authorized travel document that denotes identity and citizenship when entering the United States. Consistent with the Consolidated Appropriations

Act of 2008, DHS will be making the investments to prepare for implementation of this secure document requirement at land and sea border ports of entry by June 1, 2009.

By June 1, 2009, CBP will complete the implementation to the 39 high volume ports of entry that support 95 percent of the land border traffic utilizing Radio Frequency Identification (RFID) technology and IT infrastructure to read, validate, and process Passport Cards issued by the Department of State and other WHTI compliant RFID-enabled documents such as the Enhanced Driver's License. Final operational test and evaluation will be completed. Throughout FY 2009 the 39 implemented ports will be supported under a robust operations and maintenance program to ensure ongoing optimal performance. CBP will also continue implementation of the new primary processing application at additional small land border ports of entry.

This new WHTI land border application fully interfaces with the trusted traveler database in order to allow "flex" lanes at the POEs, enabling lanes to be used as trusted traveler, RFID only, or standard vehicle primary lanes based on the operational needs of the individual port of entry. When a member in one of the trusted traveler programs (NEXUS, SENTRI, FAST) utilizes their RFID enabled card in the Trusted Traveler Lane, it automatically captures and satisfies WHTI document requirements, thus enhancing CBP's ability to manage traffic flow at the land borders. Additionally, this new application supports the Enhanced Driver's License Project for the States and the Native American Tribal Enrollment Project in terms of developing the requirements and supports the technical interfaces necessary.

Electronic System for Travel Authorization (ESTA)

Section 711 of the Implementing the Recommendations of the 9/11 Commission Act of 2007 (911 Act; P.L 110-53), provides for the expansion and enhancement of the Visa Waiver Program (VWP). Pursuant to the 911 Act, DHS and CBP are required to provide an automated electronic travel authorization process to screen VWP travelers prior to travel to the United States. CBP, in coordination with the Department of State, has developed the Electronic System for Travel Authorization (ESTA), a program which allows CBP to screen applicants in advance of travel to determine their eligibility to travel to the United States under the VWP.

Originally, 27 nations were members of the VWP. On November 17, 2008, seven additional nations became members of the VWP. Those nations are: Czech Republic; Estonia; Hungary; Latvia; Lithuania; Slovakia; and South Korea. Malta was added to the VWP on December 30, 2008. ESTA gives VWP travelers advanced authorization to travel to the U.S. and allows CBP to pre-vet VWP travelers, providing another tool for CBP to further secure U.S. borders by pushing the zone of security outward.

In FY 2009, the ESTA program is projected to process over 17 million ESTA applications submitted by VWP travelers. Of these, advance travel authorization will be denied to an estimated 0.2% of the applicants.

Immigration Advisory Program (IAP)

Under the Immigration Advisory Program (IAP), CBP deploys officers overseas (London-Heathrow, Amsterdam, Warsaw, Tokyo, Frankfurt, Seoul, Madrid, London-Gatwick, and Manchester) to support CBP's goal of enhancing the security of air travel by preventing terrorists

from boarding commercial aircraft destined for the U.S. and reducing the number of improperly documented passengers traveling from or through a country to the United States. IAP provides information to host countries, or appropriate authorities, regarding travelers of interest. It focuses on high-risk persons through the use of current targeting and passenger analysis information or an assessment of the passenger's travel documentation. The goal of these efforts is the interdiction and apprehension of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens, and the disruption of attempts to enter the U.S. with fraudulent documents. Since IAP does not have any authority in the host country to take such action, the program works with the host country's immigration and/or control authority and the air carrier who will take the appropriate action to prevent the person from boarding the flight to the United States.

In FY 2008, with nine IAP locations operational, IAP officers assisted foreign governments and airline personnel in preventing 2,292 persons from boarding flights for the U.S., discovered 63 fraud cases, identified 63 terrorist targets, and saved the airlines \$3,875,875 in fines.

Fraudulent Document Analysis Unit (FDAU)

The FDAU serves as the repository and central location for analysis of fraudulent documents seized by CBP officers nationwide. The mission of the FDAU is to remove fraudulent travel documents from circulation and to prevent the use of these documents by mala fide travelers attempting to enter the United States.

The FDAU manages the Carrier Liaison Program. The mission of the Carrier Liaison Program is to enhance border security by increasing commercial carrier effectiveness in identifying improperly documented passengers destined to the United States. The FDAU also manages the CBP Fraud Prevention Program. The goal of the Fraud Prevention Program is to increase fraudulent document interceptions through sharing of information within and outside of CBP. CBP officers have been designated as Fraud Prevention Officers, and have been tasked with sharing information regarding document fraud and fraud trends, for creating reports on fraudulent document use, for conducting document examination training, and for working closely with headquarters on matters related to document examination and document fraud.

As the central repository and point of analysis for fraudulent documents seized by CBP, the FDAU provides training and training material regarding fraudulent document use. The FDAU has worked with the CBP Academy and the Advanced Training Center (ATC) to update their document training programs. Training material and exemplars are provided to other DHS entities such as the Border Patrol, Transportation Security Administration (TSA), Citizenship and Immigration Services (USCIS), and the U.S. Coast Guard (USCG).

Admissibility Review Office (ARO)

The Admissibility Review Office provides CBP with a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility relative to the exercise of discretion of inadmissible aliens under the Immigration and Nationality Act (INA). The ARO works extensively with the Department of State (DOS) and other agencies to determine whether inadmissible aliens may be permitted to travel as non-immigrants with waivers. They review applications submitted by aliens who have been determined by CBP

officers or consular officers to be ineligible to be admitted to the United States because of one or more grounds of inadmissibility under section 212(a) of the INA. In Fiscal Year 2008, the ARO completed 14,278 waiver decisions. The ARO plans to complete 15,500 cases in FY 2009 and 16,275 in FY 2010.

The ARO currently processes and adjudicates all nonimmigrant waivers of inadmissibility recommended by DOS consular officers worldwide. It also adjudicates all nonimmigrant temporary and permanent waiver applications, Form I-192 and Form I-212 within the jurisdiction of CBP.

Canine Enforcement Program (CEP)

The Canine Enforcement Program plays a crucial role in CBP's anti-terrorism and interdiction efforts. The CEP remains a major component in CBP's ability to interdict illegal narcotics, concealed humans, prohibited agriculture products, explosives, firearms, and undeclared currency while facilitating legitimate trade and travel.

Through CEP, CBP has established and deployed world-class detector dogs programs to augment existing technology while establishing cutting edge detection capabilities. Under these programs, the agency now provides a higher level of security and detection capability while emphasizing a seamless conduit between existing technology and the proven capabilities of detector dogs. The CEP will continue to advance and develop the anti-terrorism aspects of our mission while maintaining the traditional roles of narcotics interdiction. The Office of Field Operations canine teams are strategically assigned to ports of entry around the United States, and have been located at pre-clearance stations abroad. As their core mission, CBP officers use specially trained detector dogs in an interdiction role at our nation's ports of entry. The Canine Enforcement Program is also involved in specialized detection programs aimed at combating terrorist threats at our nation's borders, international airports, and seaports.

In FY 2009, the Office of Field Operations has 626 CBP canine officers: 228 Narcotics Detection Teams, 15 Currency Detection Teams and 238 Narcotics/Human Smuggling Detection Teams, 115 Agricultural Teams, and 23 Explosive Detection Teams.

Office of International Trade (OT)

OT is responsible for developing the national CBP trade policy and programs that facilitate legitimate trade and enforce our trade laws. OT is able to leverage a diverse array of skill sets to develop a comprehensive trade strategy and action plans, focused on results-driven strategic initiatives addressing trade facilitation, administration and enforcement issues. By promoting trade facilitation through partnership programs, OT streamlines the flow of legitimate shipments and fosters corporate self-governance as a means of achieving compliance with trade laws and regulations. OT also directs national enforcement responses through effective targeting of goods crossing the border as well as strict, swift punitive actions against companies participating in predatory trade practices, including textile transshipment and intellectual property rights infringement. A risk-based audit program is used to respond to allegations of commercial fraud and to conduct corporate reviews of internal controls to ensure importers comply with trade laws and regulations. Finally, OT provides the legal tools such as all regulations, Federal Register

notices, binding rulings and decisions, informed compliance publications, to support and promote facilitation and enforcement of our trade and border security requirements.

OT administers the Trade Agreements Program, Textile Enforcement and Operations Program, the Antidumping Countervailing Duty (AD/CVD) Program, the Intellectual Property Rights (IPR) Enforcement Program and leads CBP's efforts on import safety. In addition, OT provides technical assistance and training to United States Trade Representative (USTR), international organizations, and foreign governments to further support our trade and border security policies.

Within OT are Regulatory Audit and the Commercial Targeting and Enforcement Division. Regulatory Audit conducts audits in a variety of complex trade areas which identify additional revenue, enforce compliance with intellectual property rights laws, trade agreements, supply chain security issues and product safety concerns. Regulatory Audit also provides technical audit support to Immigration and Customs Enforcement (ICE) in money laundering cases, illegal and harmful agriculture imports, visa fraud and a variety of other issues. The Commercial Targeting and Enforcement Division mission is to develop enforcement strategies to address non-compliance in priority trade areas, to improve upon and develop innovative methods by which this effort will be accomplished, to measure agency performance in key trade and security program areas, and to provide source data for agency statistics.

Agriculture Programs and Trade Liaison

CBP's Agriculture Programs and Trade Liaison (APTL) office provides leadership, expertise, and innovation to defend the United States from the threats of bio and agro-terrorism. APTL also is responsible for meeting the traditional goals of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases. The specific activities conducted by CBP's APTL fall into five general areas:

1. Agro/Bio-Terror Countermeasures (ABTC) Program mission is to prevent ag/bio-terrorist, their equipment, and weapons from entering into the United States. In partnership with scientific, regulatory, intelligence, and law enforcement agencies, the program seeks to assess risks and obtain information to guide the development and implementation of specific targeting and inspection systems to better protect our people, agriculture, food, and economy from ag/bio-terror attacks.
2. The Agriculture Operational Oversight (AOO) office is responsible for improving oversight of the agricultural mission across all CBP field offices by ensuring a more consistent application of agriculture inspection policy across all ports of entry. The office is the primary point of contact for all stakeholder-related issues and the implementation of the Joint Agency Task Force Implementation Action Plans to include coordination with the Animal & Plant Health Inspection Service, Department of Agriculture, Department of Homeland Security, and our agriculture industry stakeholders.
3. Agricultural Policy provides policy, planning, and guidance for CBP agriculture inspection programs in order to prevent the intentional and unintentional introduction of plant and animal pests and diseases.

4. Agricultural Safeguarding is responsible for the development, clarification, and interpretation of agricultural oversight policy and procedures. In addition, Agricultural Safeguarding is responsible for the application strategies for maritime cargo, air cargo, land border cargo, passenger processing (air, maritime, land border), and trade facilitation and related operations.
5. The Fines, Penalties & Forfeitures (FPF) Division is responsible for oversight and policy initiation of all aspects of the Seized Property Process to ensure proper management control and accountability of all property seized by the law enforcement officers within the Office of Field Operations of CBP. The division also adjudicates carrier fines assessed under the Immigration and Nationality Act, all Customs cases under the Tariff Act and manages the FPF officers, paralegal, and Seized Property Specialists. The adjudication includes oversight of both administrative and judicial actions related to violations of law of carrier fines referred to headquarters for initiation as well as providing guidance to the field on carrier fines issues.
6. The Trade Operations Division manages the core functions related to the entry of merchandise, processing of drawback claims, and manages the Entry and Import Specialists. Some of the programs that the division is responsible for include: the Reconciliation Prototype, Remote Location Filing, Import Specialist Discrepancy Add (ISDA) input, Protests, and the Port Account Management Program. The division is responsible for, identifying resource levels, communicating national policy to the field, providing oversight, collections, broker account management, broker compliance, drawback and liquidation.

Air/Sea Cargo Security Verification Program

The Air/Sea Cargo Security Verification Program establishes maritime and air cargo policy. The program's primary focus is to secure cargo against terrorists and the transport of terrorist weapons within the cargo arena, to coordinate the maritime/air programs with other law enforcement agencies, and to ensure the maximization of efforts in these environments. The program provides a critical component in the facilitation and coordination among other law enforcement agencies of combined anti-terrorism efforts while ensuring the facilitation of trade continues with minimal effect on our economy.

In the maritime environment, CBP has the lead for cargo security controls and measures to mitigate the risk of suspect shipments arriving from or departing to foreign destinations. These efforts support the CBP Cargo Security Strategy and other DHS initiatives such as implementation of the SAFE Port Act of 2006 (P.L. 109-347), and the 9/11 Act. CBP works in collaboration with DHS and its component agencies, such as the USCG, on cargo and port security matters. CBP and USCG have developed joint protocols for maritime operations, including the development of response matrices and joint protocols in the event of an incident of national significance. Further, CBP and USCG routinely conduct joint operations such as law enforcement vessel boardings, targeting efforts, and maritime cargo enforcement operations. Additionally, CBP continues to work with TSA and the USCG in an effort to facilitate the enforcement of the Transportation Worker Identification Credential. Lastly, CBP and USCG

endeavor to address business resumption and recovery efforts under the Homeland Security Presidential Directive 13 and collaboratively address industry and trade issues through specific cargo and maritime federal advisory committees.

In the air environment, CBP is strengthening air cargo security measures by updating its national advance targeting unit efforts in support of the CBP International Air Cargo Security Strategy and DHS's National Strategy for Aviation Security. Currently, CBP is working to effectuate enhanced security protocols in the air cargo environment to ensure that high risk cargo is identified for examination and is not released without proper CBP authorization. Additionally, CBP is working with TSA and the DHS Screening Coordination Office to strengthen access control protocols in the air cargo and passenger environments. Lastly, the CBP Office of Port Security is working with CBP Field Offices to identify operational issues and to maximize efforts in the air cargo security environment and other modes of transportation.

FY 2008 accomplishments include:

- Implemented ESTA and made it available to the VWP traveling public. Since the initial release on August 1, 2008, additional releases have been made to incorporate new functionality and accommodate the addition of the eight new VWP member nations.
- Conducted two pilots at IAP sites to test the feasibility of establishing permanent operations at those locations. As mandated in the IRTPA, CBP has identified 50 locations as presenting potential for permanent IAP operations; and
- Initiated implementation of the WHTI end-to-end solution at high volume land ports of entry.

FY 2009 goals include:

- Completing rollout of WHTI infrastructure and technology to all remaining high volume land ports of entry and begin deployment of facilitative technology to remaining lower volume ports of entry;
- Completing implementation of the ESTA system and website in multiple languages to accommodate all VWP countries; and
- Enhancing the Trusted Traveler Programs and Global Enrollment System.

FY 2010 goals include:

- Transitioning the ESTA system and website to an Operations and Maintenance (O&M) mode and achieving all service related performance goals;
- Delivering a traffic management system to the high volume land ports of entry, completing deployment of WHTI facilitative technology to low volume land ports of entry, maintaining a secure border at the land ports of entry while facilitating legitimate trade and travel, and extending WHTI facilitative technology to other environments such as pedestrian processing, ferries, and rail; and
- Expanding Global Entry to other designated airports.

PPA: HARBOR MAINTENANCE FEE (HMF) COLLECTION

	Perm. Pos.	FTE	Amount
2008 Actual	3,093
2009 Enacted	3,154
2010 Adjustment to Base	72
2010 Current Services	3,226
2010 Program Change	0
2010 Request	3,226
Total Change 2009-2010	72

CBP requests \$ 3.2 million for Harbor Maintenance Fee Collection. This is an increase of \$0.07 million over the FY 2009 Enacted Budget. The request includes:

- increase of \$28,000 for pay annualization
- increase of \$44,000 for 2010 pay increase

CURRENT SERVICES PROGRAM DESCRIPTION:

The Harbor Maintenance Fee is an Army Corps of Engineers (COE) fee, which is collected for the operation and maintenance, as well as improvements, of U.S. channels and harbors. CBP is reimbursed for a portion of the costs associated with the collection of the fee for COE.

PPA: INTERNATIONAL CARGO SCREENING

	Perm. Pos.	FTE	Amount
2008 Actual	189	173	145,884
2009 Enacted	189	189	149,450
2010 Adjustment to Base	-	-	15,971
2010 Current Services	189	189	165,421
2010 Program Change	-	-	0
2010 Request	189	189	165,421
Total Change 2009-2010	-	-	15,971

CBP requests \$ 165.4 million for International Cargo Screening. This is an increase of \$ 16.0 million from the FY 2009 Enacted Budget. The request includes:

- increase of \$ 15,500,000 for Secure Freight base funding adjustment
- increase of \$ 351,000 for pay annualization,
- increase of \$ 541,000 for 2010 pay raise
- transfer out of \$ 421,000 to the new Facilities Management Account

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA includes Container Security Initiative (CSI) operations, which consist of 58 foreign ports, and Secure Freight Initiative (SFI), which is the next phase of CSI. The CSI/SFI program will continue its mission to prevent terrorists and terrorist weapons from entering the U.S. while also facilitating the flow of legitimate trade.

Today, CSI is the only multinational program in the world actually protecting the primary system of global trade – maritime containerized shipping – from being exploited or disrupted by international terrorists. In FY 2009, CSI continues operating in 58 ports and screening over 86 percent of the volume of maritime containers destined to the U.S.

The core elements of CSI are:

- Identify high-risk containers—CBP uses automated targeting tools to identify containers that pose a potential risk of terrorism, based on advance shipping information and strategic intelligence.
- Screen and evaluate containers before they are shipped—Containers are screened as early in the supply chain as possible, generally at the last port of lading.
- Use technology to scan high-risk containers to ensure that scanning can be done rapidly without impeding the movement of trade—this technology includes large-scale X-ray, gamma ray machines, and/or radiation detection devices.

Through the CSI program, CBP deploys multi-disciplined teams that include CBP officers, Intelligence Analysts, and ICE agents to selected foreign seaports throughout the world to protect the U.S. and its citizens from potential terrorist attacks in the maritime cargo environment and to help secure the primary system of international trade. CSI helps to secure an indispensable link in the chain of global trade: maritime containerized shipping. Since CSI was unveiled in January 2002, it has become a part of our government's strategy to secure the nation from the potential terrorist threat using maritime cargo containers. CSI will continue fostering partnerships with other countries and our trading partners in order to inspect all high-risk containers before they are loaded on board vessels to the United States. CBP will ensure effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP will also encourage interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports. The following is a comprehensive listing of the 58 CSI operational ports.

In the Americas and Caribbean:

- Montreal, Vancouver, and Halifax, Canada
- Santos, Brazil
- Buenos Aires, Argentina
- Puerto Cortes, Honduras
- Caucedo, Dominican Republic
- Kingston, Jamaica

- Freeport, Bahamas
- Cartagena, Columbia
- Balboa, Manzanillo, and Colon, Panama

In Europe:

- Antwerp and Zeebrugge, Belgium
- Le Havre and Marseilles, France
- Bremerhaven and Hamburg, Germany
- Piraeus, Greece
- Geona, La Spezia, Livorno, Gioia Tauro, and Naples, Italy
- Rotterdam, Netherlands
- Gothenburg, Sweden
- Felixstowe, Southampton, Liverpool, Thamesport, and Tilbury, United Kingdom
- Lisbon, Portugal
- Algeciras, Valencia, and Barcelona, Spain

In Asia and the Middle East:

- Shanghai, Shenzhen, and Hong Kong, China
- Ports of Kaoshung and Chi-Lung
- Tokyo, Kobe, Yokohoma, and Nagoya, Japan
- Pusan, Korea
- Quasim, Pakistan
- Port Klang and Tanjung Pelepas, Malaysia
- Singapore
- Laem Chabang, Thailand
- Colombo, Sri Lanka
- Dubai, United Arab Emirates (UAE)
- Port Salalah, Oman
- Ashdod and Haifa, Israel

In Africa:

- Durban, South Africa
- Port Alexandria, Egypt

Secure Freight Initiative (SFI)

The Secure Freight Initiative incorporates a three-pronged approach to enhance supply chain security that includes the International Container Security (ICS) program, the development of a regulation to require additional data elements for improved high-risk targeting, known as Security Filing (10+2), and initiatives to identify and acquire technology enhancements to strengthen cargo scanning and cargo risk assessment capabilities.

The ICS program uses an integrated scanning system, consisting of radiation portal monitors (RPM) and non-intrusive inspection (NII) imaging systems provided by CBP, to scan containers as they move through foreign ports. Through optical character recognition technology, data from these systems are integrated and provided to CBP officers, who determine if the container should be referred to the host nation for secondary examination prior to lading. For the CBP officers,

ICS provides additional data points that are used in conjunction with advanced manifest data, such as 24-hour rule information, Customs-Trade Partnership Against Terrorism information, and the Automated Targeting System to assess the risk of each container coming to the United States.

On October 12, 2007, CBP met the legislative requirements mandate by the SAFE Port Act, which requires DHS to establish a pilot program in three foreign ports that couples NII and RPM to scan all US-bound containers laden in those ports for radioactive and nuclear material. The SFI's ICS program is fully operational and is currently scanning 100% of U.S. bound containers laden in:

- Port of Qasim (Pakistan)
- Puerto Cortes (Honduras)
- Port of Southampton (UK)

CBP is going beyond the legislative mandate and has deployed SFI operations on a limited basis to three additional locations that will provide diverse environments with unique challenges, such as high volume and transshipment ports. These three additional SFI locations are:

- Modern Terminal (Hong Kong)
- Port of Salalah (Oman)
- Gamman Terminal (Busan, Korea)

CBP has developed a strategic direction for the SFI program, which focuses on identifying high-risk trade corridors where the implementation of SFI would mitigate the risk associated with the potential introduction of Weapons of Mass Effect into the United States by way of maritime containerized cargo. Future deployments of SFI at foreign seaports will focus on those trade corridors through which high-risk containerized cargo destined to the U.S. transits or originates. These deployments will provide additional data for risk targeting and strengthen the DHS layered, risk-based enforcement strategy in the maritime containerized cargo environment.

The Security Filing (10+2) project, as mandated by Section 203 of the SAFE Port Act, requires DHS to develop a regulation that requires additional data elements for improved high-risk targeting, including appropriate security elements of entry data to be provided as advanced information prior to vessel lading.

This new requirement, known as the "Importer Security Filing and Additional Carrier Requirements" or simply "10+2" will significantly increase the scope and accuracy of information gathered on the goods, conveyances, and entities involved in the shipment of cargo to the U.S. When fully implemented, the importer will be responsible for supplying CBP with 10 trade data elements 24 hours prior to lading while the ocean carrier will be required to provide their vessel stow plans and container status messages.

FY 2008 accomplishments include:

- Incorporated and institutionalized the use of SFI data (e.g. radiospectrography and NII images) into domestic targeting protocols;

- Responded to Security Filing (10+2) notice of proposed rule making comments and developed a phased implementation plan; and
- Reviewed current and potential new CSI locations for strategic importance to secure the U.S. and the global supply chain.

FY 2009 goals include:

- Expanding deployment of ICS to at least one additional location;
- Increasing the capacity at the SFI limited operation locations/ports;
- Phasing implementation of Secure Filing (10+2) regulations;
- Continuing to transition CSI TDY personnel to permanent status and place resources at the National Targeting Center – Cargo (NTC-C) in order to support overseas activity; and
- Continuing to monitor container traffic through CSI ports to ensure staffing needs are met, to include the possible reduction of Officers deployed overseas in those areas that warrant such a reduction.

FY 2010 goals include:

- As permitted, expanding SFI to an additional 9 locations, focusing on high-risk trade corridors;
- Fully incorporating Secure Filing (10+2) data into the Automated Targeting System;
- Continuing to transition CSI TDY personnel to permanent status and review the transitioning of CSI personnel to the NTC-C in order to support overseas activity; and
- Continuing to monitor container traffic through CSI ports to ensure staffing needs are met, to include the possible reduction of officers deployed overseas in those areas that warrant such a reduction.

PPA: OTHER INTERNATIONAL PROGRAMS

	Perm. Pos.	FTE	Amount
2008 Actual	101	101	15,292
2009 Enacted	101	101	10,984
2010 Adjustment to Base	-	-	197
2010 Current Services	101	101	11,181
2010 Program Change	-	-	0
2010 Request	101	101	11,181
Total Change 2009-2010	-	-	197

CBP requests \$ 11.2 million for Other International Programs. This is an increase of \$ 197,000 over the FY 2009 Enacted Budget. The request includes:

- increase of \$ 78,000 for pay annualization
- increase of \$ 119,000 for 2010 pay increase

CURRENT SERVICES PROGRAM DESCRIPTION:

The goal of Other International Programs is to establish international partnerships that promote security and facilitation of international travel and trade. In this arena, CBP implements international programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation and customs and immigration laws. Other International Programs is the conduit for CBP's participation in the World Customs Organization (WCO) and in regional bodies such as the Asia-Pacific Economic Cooperation (APEC) forum; support for the negotiation of bilateral and multilateral agreements, conventions and treaties; and high-level meetings with foreign administrations. Other International Programs key objectives are:

- Identify and drive CBP's international strategy;
- Internationalize CBP's programs and initiatives;
- Manage the international agreements process for CBP;
- Advance CBP policy agenda and international initiatives in international fora;
- Develop and maintain strategic international relationships

FY 2008 accomplishments include:

- Identified and pursued opportunities for cooperation with foreign governments and international organizations on issues such as the mutual recognition of customs-trade programs and "single window" data systems for international trade and customs information;
- Developed protocols related to the issuance and use of APEC Business Travel Cards in accordance with U.S. commitments; and
- Assessed the deployment of overseas personnel based on CBP mission needs and cooperation with foreign governments of strategic importance.

FY 2009 goals include:

- Continue to identify and pursue opportunities for cooperation with foreign governments and international organizations on issues such as the mutual recognition of customs-trade programs and "single window" data systems for international trade and customs information;
- Manage and maintain dialogues with foreign governments where Mutual Recognition of each other's industry partnership programs is in progress;
- Increase awareness of the Electronic System of Travel Authorization (ESTA) and other CBP initiatives and programs by facilitating and participating in international conferences and meetings; and
- Continue to provide support services to CBP overseas personnel to fully sustain CBP's global activities and presence.

FY 2010 goals include:

- Pursue international partnerships to share best practices, exchange information, and promote the facilitation of secure travel and trade;
- Support implementation of the WCO Framework; and

- Implement initiatives in support of an international immigration strategy to identify and interdict high risk travelers.

PPA: CUSTOMS-TRADE PARTNERSHIP AGAINST TERRORISM (C-TPAT)

	Perm. Pos.	FTE	Amount
2008 Actual	207	182	57,402
2009 Enacted	207	207	64,496
2010 Adjustment to Base	-	-	(1,884)
2010 Current Services	207	207	62,612
2010 Program Change	-	-	0
2010 Request	207	207	62,612
Total Change 2009-2010	-	-	(1,884)

CBP requests \$ 62.6 million for C-TPAT. This is a decrease of \$1.9 million from the FY 2009 Enacted Budget. The request includes:

- increase of \$ 322,000 for pay annualization
- increase of \$ 496,000 for pay inflation
- transfer out of \$ 2,702,000 to the new Facilities Management Account

CURRENT SERVICES PROGRAM DESCRIPTION:

The C-TPAT program is CBP’s premier trade security program. The purpose of C-TPAT is to partner with the trade community for the purpose of securing the U.S. and international supply chains from possible intrusion by terrorist organizations. C-TPAT requires the trade community participant to document and validate their supply chain security procedures in relation to existing C-TPAT criteria or guidelines as applicable. C-TPAT company participants develop an internal validation process to ensure the existence of security measures documented in their Supply Chain Security Profile and in any supplemental information provided to CBP. As a part of the C-TPAT process, C-TPAT Supply Chain Security Specialists (SCSS) and the C-TPAT participants will jointly conduct a validation of the company’s supply chain security procedures. The validation process is essential to verifying the company’s commitment to C-TPAT.

C-TPAT’s Supply Chain Security Specialists conduct C-TPAT validations, identify supply chain security vulnerabilities, and work to monitor company initiatives that address those vulnerabilities. Validations conducted by Supply Chain Security Specialists serve to determine the accuracy and effectiveness of companies’ security profiles as applied to their foreign and domestic supply chains.

To better secure and facilitate the flow of goods into the United States, CBP will continue to ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented. CBP will also continue to work with C-TPAT

partners to further finalize minimum applicable supply chain security criteria and security best practices. C-TPAT teams travel around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. They also ensure that best practices and procedures used are reliable, accurate, effective and meet the agreed upon security standards. CBP will continue providing tools and creating incentives for the private sector to join C-TPAT, which is a prerequisite for the Free and Secure Trade (FAST) program and other CBP expedited processing programs.

FY 2008, accomplishments include:

- Completed additional mutual recognition agreements with two foreign Customs administrations (Canada and Jordan);
- Ensured compliance with the requirements of the Safe Port Act, such as reviewing and certifying security profiles within 90 days of submission and conducting validations within 1 year of certification and revalidations within 3-years of the initial validation;
- Concluded a pilot to assess the feasibility of having 3rd party entities gather validation information on CBP's behalf to determine compliance with program criteria; and
- Conducted 2 joint validation exercises for the first time with the General Administration of Customs of the People's Republic of China resulting in 18 validations of C-TPAT members' supply chains originating in China.

FY 2009, goals include:

- Ensuring compliance with the requirements of the Safe Port Act, such as reviewing and certifying security profiles within 90 days of submission and conducting validations within 1 year of certification and revalidations within 3-years of the initial validation;
- Continuing to assess the feasibility of an export component to the C-TPAT program and start implementation as permitted;
- Completing additional mutual recognition agreements with two foreign Customs counterparts; and
- Creating a new enrollment sector for Third Party Logistics Providers (3PL) involved in the international movement of cargo and begin accepting and processing applications for companies eligible to participate in the program under this new sector.

FY 2010, goals include:

- Ensuring compliance with the requirements of the Safe Port Act, such as reviewing and certifying security profiles within 90 days of submission and conducting validations within 1 year of certification and revalidations within 3-years of the initial validation;
- Maintaining 90 percent or higher compliance rates for C-TPAT members in terms of the ratio of suspensions/removals to overall number of certified/validated partners; and
- Completing an additional mutual recognition agreement with a foreign Customs counterpart.

PPA: TRUSTED TRAVELER PROGRAM (TTP)

	Perm. Pos.	FTE	Amount
2008 Actual	11,186
2009 Enacted	11,274
2010 Adjustment to Base
2010 Current Services	11,274
2010 Program Change
2010 Request	11,274
Total Change 2009-2010	---

- CBP requests to change the FAST/NEXUS/SENTRI PPA title to the Trusted Traveler Program (TTP) to provide a better representation of the program.
- CBP requests \$11.3 million for Trusted Traveler Program (TTP). There is no change from the FY 2009 Enacted Budget.

CURRENT SERVICES PROGRAM DESCRIPTION:

Trusted Traveler Programs

Since the terrorist attacks of September 11th, 2001, CBP has placed great emphasis on developing and expanding TTP for passengers and commercial truck drivers at the land borders with Canada and Mexico and developing similar programs for international air passengers. TTP help to identify low-risk, pre-vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint based checks of law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer. Currently, CBP TTP has four programs – NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and Global Entry.

NEXUS Highway and Air

The NEXUS Highway and NEXUS Air programs are combined into one NEXUS program with air and highway components. NEXUS is a joint US/Canada enrollment program at the northern border land ports of entry and all Canadian preclearance ports that identifies, through a complete background check and fingerprinting, low-risk travelers. Once an applicant is identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID) enabled card that is specific to the traveler. The RFID-enabled card allows the traveler to utilize the NEXUS dedicated lane, which is a specific primary lane at the land border port of entry that can only be used by NEXUS enrollees. The use of the NEXUS lane facilitates the movement of low-risk travelers. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes; and CBP uses iris scans to identify low risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel but must report to a preclearance site to have the iris scan process performed. The future WHTI lane expansions will have NEXUS and SENTRI RFID capabilities. CBP had 236,530 NEXUS

Highway and Air members in FY 2008. In FY 2009, CBP plans to have 350,000 members in this program.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI) is an enrollment program at the southern land border ports of entry that identifies low-risk travelers, through a complete background check, fingerprinting, and an in person interview with a CBP officer. Once enrolled in the SENTRI program, travelers are given an RFID enabled SENTRI card that is specific to the traveler. The RFID card allows the traveler to utilize the SENTRI dedicated lane, which is a specific primary lane at designated Southern land border ports of entry that can only be used by SENTRI members. The use of the SENTRI lane and RFID technology facilitates the movement of these low-risk travelers. The SENTRI program is located at nine southern border locations - Nogales, Arizona (1); Calexico (1) Otay Mesa (1) and San Ysidro (1), California; and Brownsville (1), Hidalgo (1), Laredo (1) and El Paso (2), Texas. The future WHTI lane expansions will have NEXUS and SENTRI RFID capabilities. CBP had 179,000 SENTRI members in FY 2008. In FY 2009 CBP, plans to have 210,000 members in this program.

Free and Secure Trade (FAST)

Free and Secure Trade is the cargo equivalent to facilitative programs in the passenger environment such as SENTRI and NEXUS. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the Customs-Trade Partnership Against Terrorism program, are entitled to expedited clearance at the port of entry. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections where they are needed most – high-risk commerce. CBP had 94,500 FAST members in FY 2008. In FY 2009, CBP plans to have 95,000 members in this program.

Global Entry

Global Entry is a program operated by CBP to allow for the expedited clearance of pre-approved low-risk air travelers into the United States. Through the use of automated kiosks placed in the Federal Inspection Services (FIS) area of each identified airport, a pre-vetted, enrolled traveler is able to conduct the Passport Control Inspection without having to see a CBP officer. This program would mostly benefit those frequent travelers who travel internationally 4 or more times a year.

CBP launched Global Entry as a pilot in June 2008. Currently, Global Entry is available at JFK International Airport, Houston G. Bush International Airport, Dulles International Airport, Chicago O'Hare International Airport, Atlanta Hartsfield International Airport, Los Angeles International Airport, and Miami International Airport. CBP had 3,100 participants in Global Entry in FY 2008 and projects to have 13,500 members in FY 2009. Also, in FY 2009, CBP expects to begin operating a joint pilot with the Government of the Netherlands that will allow qualified U.S. citizens to join Privium, the Dutch equivalent to Global Entry, and allow Dutch citizens to join Global Entry. Participants in this pilot must pass each nation's security vetting requirements.

Global Enrollment System (GES)

CBP has developed a Global Enrollment System for all CBP TTP to be operational on the CBP national network. The GES has integrated the independent CBP enrollment and validation processes into a single solution, and provides a more efficient platform to share data and perform real-time watch list and lookout checks.

The GES also reduces the redundancy of maintaining several application processes, and allows for a quicker and more accurate applications process. A single online, paperless application process has been developed by CBP to support the GES and will allow a traveler to apply to multiple programs online. The on-line application Global On-Line Enrollment System (GOES) currently supports the SENTRI and NEXUS programs and the Global Entry pilot. It is envisioned that once GES is fully operational, CBP will have a single TTP in which a person will only have to apply one time, pay one fee, and be registered in all modes of travel.

FY 2008 accomplishments include:

- Provided enrollment for FAST Driver through GOES and GES;
- Added iris scan equipment to all NEXUS and some FAST enrollment centers; and
- Set up selected FAST enrollment centers to support both NEXUS and FAST.

FY 2009 goals include:

- Enrolling a total of 350,000 people in NEXUS;
- Enrolling a total of 210,000 people in SENTRI; and
- Facilitating NEXUS and SENTRI enrollees into Global Entry.

FY 2010 goals include:

- Fully integrating FAST and the Automated Commercial Environment (ACE);
- Implementing bi-lateral international air trusted traveler programs with additional countries; and
- Ensuring that all lanes at the 39 busiest southern land border ports of entry be GEN2 RFID enabled so that the lanes can be considered flex lanes, which will allow them to be designated as TTP lanes as needs warrant.

PPA: INSPECTION AND DETECTION TECHNOLOGY

	Perm. Pos.	FTE	Amount
2008 Actual	94,651
2009 Enacted	145,944
2010 Adjustment to Base	(2,381)
2010 Current Services	143,563
2010 Program Change	0
2010 Request	143,563
Total Change 2009-2010	(2,381)

The table above excludes ARRA funding of \$100.0 million.

CBP requests \$ 143.6 million for Inspection and Detection Technology. This is a decrease of \$2,381,000 from the FY 2009 Enacted Budget. The request includes:

- Non-recur of \$ 1,700,000 for Project SeaHawk
- transfer out of \$ 681,000 to the new Facilities Management Account

CURRENT SERVICES PROGRAM DESCRIPTION

As trade increases, CBP's reliance on Non-Intrusive Inspection (NII) technology, the cornerstone of CBP's multi-layered strategy to secure the borders, becomes more and more critical. In conjunction with CBP's many other initiatives Customs-Trade Partnership Against Terrorism (C-TPAT), Automated Targeting System (ATS), National Targeting Center (NTC), Container Security Initiative (CSI), NII technology which includes Radiation Portal Monitors (RPM) allows us to concentrate our efforts on high risk cargo while facilitating legitimate cargo, trade and travelers.

CBP has long recognized an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to increase substantially the likelihood that a nuclear or radiological weapon, weapons grade material, contraband, or illegal aliens being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of commercial traffic, while maintaining the flow of legitimate trade, cargo and travelers.

NII systems currently deployed to our nation's land, sea, and airports of entry include large-scale X-ray and gamma-ray imaging systems, handheld detection, and RPM technologies. This PPA provides funds for operations and maintenance of: (a) the 211 large scale NII systems that were deployed by the end of FY 2008, (b) 3,404 small scale NIIs, 1,683 Radiation Isotope Identifier Devices (RIIDs) and 18,268 Personal Radiation Detectors (PRDs) and (c) 1,127 radiation portal monitors (RPM) that were deployed by the end of FY 2008.

The Operation and Maintenance (O&M) funds requested will ensure that deployed NII technologies meet the expected operational requirements of CBP as well as requirements surrounding the Federal Information Systems Management Act (FISMA; P.L. 107-347). Additionally, these funds will ensure mandated security and vendor upgrades are installed while providing CBP with the means to dispose of obsolete NII systems as mandated by federal regulations. Lastly, these funds will provide maintenance support at approximately 600 locations throughout the U.S. and its territories.

FY 2008 accomplishments include:

- Tested and deployed 18 new (additional) large-scale NII systems purchased in FY 2007;
- Upgraded 8 large-scale NII systems; and
- Maintained 100% inspection percentage of targeted containers and cargo.

FY 2009 goals include:

- Testing and deploying 28 remaining new (additional) and replacement large-scale NII systems purchased in FY 2007;
- Purchasing, testing, and deploying approximately 20 baggage X-ray units, 10 tool trucks, 10 X-ray vans, 100 busters, 60 laser range finders, and 80 fiberscopes to replace outdated technologies; and
- Operating and maintaining NII technologies at 74 of the 327 U.S. ports of entry, 16 of the 16 U.S. mail facilities that process international mail, and 75 of 75 international airports.

FY 2010 goals include:

- Purchasing 12 new large scale NII systems to replace outdated technologies.
- Purchasing 5 new (additional) large scale NII systems for 7 of the 52 new/expanded ports of entry; and
- Purchasing approximately 600 small scale NII and handheld technologies to replace outdated technologies and to reduce existing shortages.

PPA: SYSTEMS FOR TARGETING

	Perm. Pos.	FTE	Amount
2008 Actual	8	8	26,831
2009 Enacted	8	8	32,550
2010 Adjustment to Base	-	-	10
2010 Current Services	8	8	32,560
2010 Program Change	-	-	---
2010 Request	8	8	32,560
Total Change 2009-2010	-	-	10

CBP requests \$32.6 million for Systems for Targeting. This is an increase of \$10 thousand above FY 2009 Enacted Budget. The request includes:

- increase of \$4,000 for pay annualization
- increase of \$6,000 for pay inflation

CURRENT SERVICES PROGRAM DESCRIPTION:

At the core of CBP’s ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law-abiding travelers and commerce to move without unnecessary delay. Recent legislation and regulatory action, such as the Trade Act of 2002 (P.L. 107-210), the 24-hour rule, the Aviation and Transportation Security Act of 2001 (P.L. 107-71), the Enhanced Border Security and Visa Entry Reform Act of 2002 (P.L. 107-173), the IRTPA, and the SAFE Port Act, have made it mandatory to provide advance information about conveyances, travelers and goods arriving in the United States. CBP uses computer technology and rule-based software to analyze the data provided on conveyances, travelers, and shipments

arriving in the United States. CBP applies its targeting methods against the data to determine which conveyances, travelers or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this analysis is the Automated Targeting System (ATS). The Automated Commercial System (ACS), the Advance Passenger Information System (APIS), the Border Crossing Information System (BCIS), the Non-Immigrant Information System (NIIS), the Arrival and Departure Information System (ADIS) and associated databases provide CBP officers (including those stationed overseas at Preclearance stations, Container Security Initiative ports, and Immigration Advisory Program locations) with advance notice of conveyances, travelers and goods arriving at U.S. ports of entry, allowing them to cross-check the passenger, crew and cargo manifests against subject lookouts including those contained in the Terrorist Identities Datamart Environment (TIDE), TECS, and the National Crime Information Center (NCIC). CBP also uses ATS to analyze data in the Automated Export System (AES) on shipments leaving the United States, as well as information from the Advance Passenger Information System on travelers departing the United States. The ATS Passenger module also uses Passenger Name Record (PNR) data from commercial airlines on arriving and departing passengers to identify high-risk travelers and to facilitate persons posing little to no risk.

ATS enhances the APIS, BCIS, NIIS, ADIS, TECS, ACS, and AES data by running rules developed by CBP's subject matter experts to identify conveyances, travelers and shipments with high-risk travel patterns. ATS also allows CBP officers to conduct advanced queries of these and other government databases to reveal new threat patterns.

Currently, ATS consists of six modules that focus on exports, imports, passengers and crews (airline passengers and crew on international flights, passengers and crew on sea carriers), private vehicles crossing at land borders, and import trends over time. The six modules are: ATS-Inbound, which serves as the primary decision support tool for inbound targeting of cargo; ATS-Outbound, which is used for targeting outbound cargo and assists in identifying exports which pose a high risk of containing goods requiring specific export licenses, narcotics, or other contraband; ATS-Passenger (ATS-P), which is used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure; ATS-Land (ATS-L) provides analysis and rules-based risk assessment of private passenger vehicles crossing the nation's borders; ATS-Trend Analysis and Analytical Selectivity improves CBP's ability to examine, locate, and target for action violators of United States laws, treaties, quotas, and policies regarding international trade; and ATS-International provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities.

FY 2008 accomplishments include:

- Ability to complete vehicle inspection records in Land Secondary Inspection Records (IO04) via ATS-L;
- Incorporation of ATS-L Analysis Tools filtering relating to license plate reader errors/inaccurate license plate corrections;
- Automated a variety of reports in ATS-L for users to execute, including Effectiveness Reports, Vehicle Crossing Reports, Weekly Drug Reports, and Shift Generator Reports;
- Enhancements to ATS-L were developed to include a Vehicle Concealment Guide and additional job aids to help assist officers in the detection of male fide documents and non factory compartments in vehicles;
- Improved parsing in ATS-P for telephone numbers in Passenger Name Record (PNR) data;
- Enhanced query capabilities in ATS-P for non-immigrant visa information;
- Developed rules in ATS-P to counter specific threats posed by terrorist and human smuggling organizations;
- Implementation in ATS-N of new Air Threshold Weight Set – AIR3;
- Creation of in-bond weight set – IBND1;
- Development of new sea mode threshold security weight set – OCN6; and
- Creation of Advanced Automated Targeting Systems International (ATS-I) interface and joint targeting concepts for the European Union (EU).

FY 2009 goals include:

- Develop ATS-L rules targeting trusted traveler participants and vehicles;
- Develop new targeting methodologies and efforts in support of the Western Hemisphere Travel Initiative;
- Review and evaluate stand alone tools and programs for the purpose of automating and incorporating into ATS-L;
- Addition of new ATS-L Analysis Tool (the Associates Tool);
- Deploy ATS-L at the U.S. Border Patrol checkpoints;
- Deploy the ATS-L Personal Data Assistants (PDAs) (wireless technology) to an additional four (4) land ports of entry (for a total of 10 ports of entry);
- Research of new equipment for portable ATS-L document readers;
- Automate the Trusted Traveler applicant screening process to allow for immediate analysis and rule based assessment;
- Development of targeting rules in ATS-P to counter threats posed by drug trafficking organizations (DTOs) and currency smugglers;
- Research and incorporate additional link analysis and visualization tools for all ATS modules to depict and entities of interest and identify associations;
- Continue phased rollout in ATS-N of User Defined Roles (UDR) to remaining national and local users;
- Initiate pilot of weight set functionality in ATS-N to allow creation and update of national and local weight sets;
- Deploy Conveyance Details page and Arriving Person “hotlist” in ATS-N Truck mode on national basis;
- Implement Vessel Summary page and Stow Plan viewer in ATS-N Ocean mode and

- Continue upgrades and enhancements in the ATS cargo modules to support US Postal Service (USPS) targeting efforts.

FY 2010 goals include:

- Deploy User Defined Rules nationally;
- Continue to develop the USPS Inbound Targeting Program to include mapping of external postal data from outside data sources;
- Deploy Targeting Framework at all CBP targeting units in the field locations; Development of ATS-L targeting specific rules to interdict terrorist suspects, weapons of mass effect, contraband, human smuggling, agriculture, and currency violations;
- Deploy ATS-L to the U.S. Border Patrol checkpoints;
- Expanded deployment of ATS-L PDAs (wireless technology) that includes document reader Machine Readable Zone (MRZ) capabilities;
- Incorporation of other federal government agency data into the ATS Targeting Framework to ensure real time situational awareness;
- Expand the encounter management, analytical and reporting capabilities of the ATS Targeting Framework System;
- Continue to develop, improve, and implement ATS-P Threshold Targeting rules and protocols incorporating actionable intelligence to identify high-risk travelers prior to arrival or departure; and
- Continue to expand the number and quality of Threshold Targeting lookouts generated from joint targeting opportunities with other federal, state, local, and foreign agencies.

PPA: NATIONAL TARGETING CENTER (NTC)

	Perm. Pos.	FTE	Amount
2008 Actual	131	120	25,346
2009 Enacted	131	131	24,481
2010 Adjustment to Base	-	-	-974
2010 Current Services	131	131	23,507
2010 Program Change	22	11	2,848
2010 Request	153	142	26,355
Total Change 2009-2010	22	11	1,874

CBP requests \$26.4 million for the National Targeting Center. This is an increase of \$1.9 thousand over FY 2009 Enacted Budget. The request includes:

- increase of \$153,000 for pay annualization
- increase of \$235,000 for pay inflation
- increase of \$2,848,000 as a program increase to Analyze and Employ Information and Intelligence
- transfer out of \$1,362,000 to the new proposed Facilities Management Account

CURRENT SERVICES PROGRAM DESCRIPTION:

The priority mission of CBP's National Targeting Center (NTC) is to provide around-the-clock tactical targeting and analytical research support for CBP antiterrorism efforts. CBP officers, Border Patrol agents, and Field Analysis Specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments primarily staff the NTC. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw intelligence in support of CBP's mission to detect and prevent terrorists and terrorist weapons from entering the United States. In FY 2007, NTC Cargo (NTC-C) and NTC Passenger (NTC-P) operations were officially divided. The NTC-C staff moved to a new NTC-C facility in May of 2007.

In addition to using existing databases and information to identify potential targets, the NTC-P also develops tactical targets from raw intelligence in support of CBP's mission to detect and prevent terrorists and terrorist weapons from entering the United States. The NTC-P continues to utilize Terrorist Identities Datamart Environment (TIDE) in researching all possible TECS B10 lookouts encountered at ports of entry (POE's). Through the TIDE/Visa Revocation Unit (TVR), the NTC-P consults with both the Terrorist Screening Center (TSC) and the Terrorist Screening Operations Unit (TSOU) in determining identity and a course of action, thus providing guidance to the POE.

The NTC-C Cargo Unit (CU) provides cargo research and analysis on positive TIDE passengers, responds to research requests from CBP domestic and Container Security Initiative ports, and conducts cargo research for NTC-P and NTC-C liaisons. Additionally, the CU conducts national cargo sweeps in the Automated Targeting System, supports Intelligence Driven Special Operations (IDSOs), and conducts Weapons of Mass Destruction/Weapons of Mass Effect (WMD/WME), agro-terrorism, and bio-terrorism rules development. The NTC-C will continue to provide support to CBP's CSI and Secure Freight Initiative. The NTC-C has dedicated staff to support and coordinate the International Container Scanning (ICS) component of SFI. The program utilizes remote technology to facilitate real time scanning and monitoring of cargo/containers destined to the United States from select foreign ports. Targeting decisions are made based on container images, radiation alarm profiles, and cargo descriptions provided from overseas.

FY 2008 accomplishments include:

- Coordinated and delivered the document assessment tool (DAT) to the land border environment. The NTC-P supported the expansion of the DAT program with targeting and analysis related to DAT document alert responses developed at the ports of entry;
- Coordinated and supported ESTA vetting;
- Expanded the NTC-C to continue remote targeting and CSI support roles. The remote targeting expansion for FY 2008 will include Haifa and Ashdod, Israel; and
- Expanded the NTC's ability to identify watch-listed individuals who are connected to businesses and cargo shipments and to disseminate quality research products and lookouts.

FY 2009 goals include:

- Enhancing NTC-P’s automated systems in an effort to identify passengers with possible ties to terrorist activities;
- Expanding the NTC-C support and coordination of the ICS component of SFI by increasing the number of ports in which NTC-C utilizes remote location technology to facilitate real time scanning and monitoring of cargo/containers destined for the U. S. from selected foreign ports; and
- Enhancing research efficiency of positive TIDE matches to identify possible links between terrorist related passenger events.

FY 2010 goals include:

- Continuing to foster relationships with the intelligence community both internal and external to DHS to insure current trends and threats are addressed by NTC-P targeting; and
- NTC-P’s TVR Unit will continue to maintain a close working relationship with members of the TIDE community including the National Counter Terrorism Center (NCTC), the TSC, and the TSOU in an effort to prevent terrorist threats to our national security. In addition, the TIDE Unit in a joint effort with the TIDE community will review policies and procedures to streamline the WATCHLIST vetting process.

PPA: AT THE PORTS TRAINING

	Perm. Pos.	FTE	Amount
2008 Actual	26,980
2009 Enacted	24,778
2010 Adjustment to Base
2010 Current Services	24,778
2010 Program Change
2010 Request	24,778
Total Change 2009-2010

CBP requests \$24.8 million for At the Ports Training. There is no change from the FY 2009 Enacted Budget.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides CBP with a comprehensive and accurate needs assessment of all standard, core, and recurring training. The NTP provides CBP’s headquarters and field managers an opportunity to advance the Secure Border Initiative by bringing the workforce together to train. The NTP also emphasizes CBP’s anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of

specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

CBP Field Operations Academy

The CBP Field Operations Academy is located at the Federal Law Enforcement Training Center in Glynco, Georgia. The Academy is responsible for the development and delivery of basic, mid, and advanced-level training programs for mission critical occupations (e.g., CBP officers, Agriculture Specialists, Import Specialists, and Entry Specialists). This training represents key components of the goal to combat terrorism, improve border security, improve inspection and control, and facilitate trade.

OTD/Use of Force Policy (UFPD)

The OTD/Use of Force Policy Division is responsible for the development, articulation and implementation of CBP use of force policy and related equipment. The OTD/UFPD seeks to research, evaluate, and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. The OTD/UFPD has developed appropriate controls, standards, training, best practices, and policies in order to enhance the safety and performance of approximately 18,000 Customs and Border Protection (CBP) officers.

OTD/Leadership and Organization Development (OTD/LODD)

The OTD/Leadership and Organization Development Division designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The OTD/LODD provides core and advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs.

OTD/Border Enforcement Training (OTD/BETD)

The OTD/Border Enforcement Training Division primarily engages in anticipating, identifying, initiating, and analyzing occupation specific training needs of CBP's approximately 36,000 uniformed workforce, and producing customer focused training portfolios that facilitate border enforcement readiness.

The fight against terrorism remains the top priority for CBP. In support of that primary mission, OTD will continue to oversee the anti-terrorism training program ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along our borders.

OTD/Workforce Development (OTD/WFDD)

The OTD/Workforce Development Division partners with CBP offices to identify, articulate, and address the training needs of CBP's non-uniformed personnel. WFDD works to provide a comprehensive suite of training programs in support of CBP customer office priorities through the development and maintenance of detailed customer profiles including information on training projects and funding, active courses, and workforce demographics.

Focus areas of training include trade training (training for Import Specialists, Entry Specialists, Drawback Specialists, Regulatory Auditors, International Trade Specialists, other revenue positions, and attorneys), information technology, intelligence and operations coordination training, training for international assignments, cross-occupational training, project/program management certification, and CBP Tuition Assistance Program (TAP).

OTD/HQ Other Training

OTD/Headquarters sponsors other basic and specialized training programs for various occupations within CBP. These training programs, including Canine Office of Field Operations training, are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

PPA: BORDER SECURITY AND CONTROL BETWEEN THE POE’S

	Perm. Pos.	FTE	Amount
2008 Actual	20,144	16,891	3,031,697
2009 Enacted	22,787	21,466	3,426,455
2010 Adjustment to Base	(39)	1,282	70,529
2010 Current Services	22,748	22,748	3,496,984
2010 Program Change	52	26	8,024
2010 Request	22,800	22,774	3,505,008
Total Change 2009-2010	13	1,308	78,553

CBP requests \$3.5 billion for Border Security and Control between the POE’s. This is an increase of \$78.6 million over FY 2009 Enacted Budget. The request includes:

- increase of \$24.0 million for pay annualization, and \$36.9 million for pay and non-pay inflation
- decreases of \$56.5 million non-recurring costs for relocations, radios, and vehicles, and \$83.9 million transferred to the Facilities Management account
- increase of \$129.6 million for annualization of FY 2008 initiative for additional 3,000 BP agents and 366 operational support and mission support personnel
- increase of \$38.8 million for annualization of 2,200 BP agents and 424 operational support and mission support personnel and 17 facilities management support positions
- program increases of \$8.0 million for 44 BP agents and 8 operational support and mission support personnel for Combating Southbound Firearms and Currency Smuggling
- decrease of \$18.4 million (39 positions/FTE) to reflect the permanent realignment of funds from this PPA to the Air and Marine Salaries PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Border Patrol Strategy articulates one clear, strategic mission for the Border Patrol: To establish and maintain control of the border of the U.S. between the ports of entry. The strategic goal includes interdicting illegal aliens, smugglers, narcotics and other contraband

entering the U.S. Since the terrorist attacks of September 11, 2001, preventing terrorists and terrorist weapons from entering the U.S. was added to the Border Patrol's strategic goal.

The Border Patrol developed five objectives to support the national strategy. Each objective further identifies the intended mission outcome and focus of the Border Patrol's operational planning and execution. The objectives are: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the ports of entry; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas. The National Border Patrol Strategy ensures that the Border Patrol deploys the appropriate mix of resources and employs appropriate tactics with the end state objective of consistently being able to detect, identify and classify, respond and resolve all illegal entries.

The Secure Border Initiative (SBI) is a comprehensive approach to immigration enforcement and directly supports the National Border Patrol Strategy. The SBI focuses broadly on two major enforcement themes – border control and immigration enforcement within the U.S. Fully controlling the border requires preventing illegal immigration, as well as security breaches, while interior immigration enforcement focuses on locating and removing aliens who are present in the U.S. in violation of U.S. law. Both the border control and interior enforcement strategies are developed to ensure that all enforcement efforts are prioritized based on the two overarching priorities of SBI – national security and public safety.

Achieving full control of the border and effectively enforcing the law within U.S. borders requires *a transformation in the way these issues have been viewed*. Specifically, it requires integrating additional staff, new technology, and enhanced infrastructure investment, as well as a new regime of regulations and legislative proposals. In developing the SBI, DHS is taking an integrated systems approach to the problem. The entire immigration enforcement system requires review, beginning with the gathering of immigration-specific intelligence and the detection of illegal border crossings, followed by apprehension, processing, transportation, and detection of the alien, and ending with the alien's removal from the U.S. A systematic approach will deploy all of these tools in stages, allowing each stage to build on the success of the earlier stages.

The SBI unified border control strategy encompasses both the northern and southern land borders and the interdiction of cross-border violations between the ports of entry and at the official ports of entry. The three main goals are:

- Detect and respond to all cross-border crime
- End “Catch and Release” of Non-Mexican Illegal Aliens
- Deter cross-border crime

Through the strategy, CBP will funnel all traffic to the U.S. through ports of entry where there is a greater level of control. The border environment is extremely complex, encompassing rural, urban and remote areas, as well as extreme climate variations and terrain. Therefore, any

strategy must be flexible and capable of being implemented in a manner that best suits individual needs and requirements.

The Border Patrol's National Strategy is based on deploying the appropriate mix of resources – personnel, tactical infrastructure and technology – to gain control of the border. A significant Border Patrol initiative is to reach a staffing level of 20,019 Border Patrol agents by September 30, 2009. To support the increase in Border Patrol agents, CBP will hire an appropriate number of operational and mission support personnel and it will upgrade its facilities to ensure the new personnel are adequately supported. CBP also plans to significantly add to its inventory of permanent tactical infrastructure and technology deployments on the border. In FY 2009, CBP will continue to deploy resources developed through CBP's *SBI*net program. The new resources will include technology solutions, such as sensors and cameras, to increase the Border Patrol's ability to detect illegal entries and to provide greater situational awareness. In addition, *SBI*net will provide new tactical infrastructure, such as fences and vehicle barriers, to further enhance the Border Patrol's ability to secure the border.

The Border Patrol establishes and maintains effective partnerships, formal and informal, with other federal, state and local law enforcement agencies, as well as other federal agencies that have an interest in the border regions. Further, the Border Patrol maintains international partnerships to enhance border security primarily with agencies of the governments of Mexico and Canada. A number of these partnerships are described below.

Operation Arizona Denial

Operation Arizona Denial 2008-2009 is designed to provide a level of deterrence that will incrementally bring and maintain effective control to prioritized areas of the border within the Tucson Sector. The purpose of the operation is to augment the Tucson Sector in the continued expansion of increased levels of effective control and to support the mission of anti-terrorism. When achieved, each prioritized area will serve as a base from which to expand effective control. As priorities advance, resources, such as *SBI*net, tactical infrastructure enhancements, and station manpower enhancements, will be in place to ensure that achieved gains are sustained.

Arizona Denial General Enforcement Strategy represents a four-faceted approach

- 1) Break Smuggling Cycle
- 2) Operational Coordination
- 3) Intelligence Fusion
- 4) Focused Enhanced Enforcement Operations

Break Smuggling Cycle

Four programs will be utilized to separate illegal aliens who have been granted voluntary return from the smuggling organizations that are waiting for them upon that return. These programs include the Arizona Denial Prosecutions Initiative (ADPI), the Alien Transfer and Exit Program (ATEP), and the Interior Repatriation Program.

- 1) Nogales Processing Center
- 2) Prosecutions-Based Initiative (Operation Streamline)

Zero-Tolerance Prosecutions – 40-100 per day

- 3) Alien Transfer Exit Program
- 4) Coordinate with Yuma, Arizona, and San Diego, California to exchange 100 aliens per day. Priority: drivers, guides, and recidivists not amenable to prosecution.

Operational Coordination

Create partnerships with law enforcement agencies and other stakeholders to coordinate enforcement efforts in support of sector operations.

Intelligence Fusion

Bring CBP and partner agency intelligence personnel together in a single center where information can be fused, analyzed, and used to create tactical and operational intelligence driven operations.

Focus Enhanced Enforcement Operations

Rather than being spread throughout the sector, resource enhancements will be focused in support of operations in a priority area. Each individual enforcement assignment, operation, and initiative will be used to address one or more of six prioritized border areas of focus.

- Focus Operations:
 - Operation Corkscrew
 - Operation Arrowhead
 - Operation Lightning Strike
- Traffic checkpoint Operations
 - Operational on SR)-82, SR-85, SR-86, FR-15, Interstate19 and Arivaca Road.

Operation Arizona Denial provides the roadmap that establishes station and sector priorities for operational execution.

Operation Streamline

Operation Streamline is a zero-tolerance, prosecution-based deterrence initiative that attaches a penalty to the act of illegally entering the U.S. Operation Streamline was envisioned to address three components: arrest, prosecution, and removal. Under the concept of the Operation, the sector's Chief Patrol Agent designates a specific geographic area as a zero-tolerance zone and focuses his resources to ensure a high probability of apprehension and criminal prosecution.

With the cooperation of the U.S. Attorney's Office and the U.S. Marshals Service, virtually all undocumented aliens apprehended within the designated geographic location are criminally prosecuted for their illegal entry under 8 USC 1325. The deterrent effect of this program has had pronounced results on the number of aliens attempting illegal entry/re-entry. By reducing the volume of illegal entries, the Border Patrol has greater flexibility to focus resources on apprehending terrorists, terrorist weapons, and smugglers of humans, drugs, and other contraband illegally entering the U.S.

Operation Streamline has proven to be beneficial and is a key component to achieving significant ground and effective control of the border. Operation Streamline has been showcased to both federal and state Senators and Representatives, along with the public, as a best practice and effective utilization of existing resources.

Special Operations Group (SOG)

SOG is under the direction of the Border Patrol's Special Operations Division (SOD), and has three component units: Border Patrol Tactical Unit (BORTAC), Border Patrol Search, Trauma and Rescue (BORSTAR), and the National Special Response Team (NSRT) – each responsible for a different skill set, but often working in close coordination with each other to adequately address an all threats mission profile.

Recently, the Border Patrol established, and continues to build upon, the SOG Headquarters element with full deployment capability on Biggs Army Airfield (AAF), El Paso, Texas. Agents assigned to this office are routinely deployed throughout the U.S. in support of the Border Patrol National Strategy and are at the ready to address Emergency Support Functions (ESFs), as outlined in the National Response Framework.

BORTAC remains CBP's premier tactical response team. BORTAC is summoned for difficult and high-risk missions – both nationally and internationally. In FY 2008, BORTAC became part of SOG. BORTAC has updated and restructured its facilities at Biggs Army Airfield in El Paso, Texas, as it transitioned into the SOG national facility. BORTAC added a new classroom facility, as well as an office complex at Biggs AAF to accommodate the newly formed SOG. There was an addition of a new classroom and there is currently construction of a new rappel tower, obstacle course, and live fire multi-building training complex located at McGregor Range, New Mexico. BORTAC trained its active personnel on their Mission Essential Tasks List and hosted numerous advanced skills training sessions for both NSRT and BORTAC agents. BORTAC has preformed joint SOG missions and worked in conjunction with the multiple local, state and federal law enforcement agencies in both training and operational environments. In the future, BORTAC will continue to train its members to improve its readiness for response to threats of national security.

BORSTAR is comprised of Border Patrol agents with specialized skills and training. In addition to proficiently conducting the primary duties of a Border Patrol Agent, BORSTAR agents have advanced training in search and rescue, emergency medical treatment, rope rescue, water rescue, incident command management, communications, and tactical medical interventions.

BORSTAR provides rapid response to search and rescue (SAR) requests and medical calls involving Border Patrol agents, civilians, and illegal aliens throughout the operational areas of the Border Patrol.

Furthermore, BORSTAR provides a search, rescue, and medical response to acts of terrorism, potential terrorism, and natural disasters throughout the U.S. These duties are often in conjunction with local, county, state, federal, and international entities.

In the future, BORTAC will continue to train its members to improve its readiness for response to threats of national security. BORTAC will continue to improve its facilities to prepare for the influx of the full time operators and growth in the SOG national facility.

The possibility of widespread bio-terrorism and other pandemic perils remains a paramount concern for CBP and other federal, state, and municipal entities. Border Patrol is a major participant/facilitator in the CBP Continuity of Operations Plan (COOP) and will continue to build on established partnerships in an effort to rapidly respond and mitigate the impact of a catastrophic incident, be it an act of terrorism or a natural disaster.

Border Patrol, in coordination with the Office of Intelligence and Operations Coordination, has established Law Enforcement Technical Collection Centers (LETCS) to improve intelligence collection and dissemination capabilities among the 20 sectors that comprise the field headquarters element. The best practices established will streamline and standardize the methodologies used to collect, analyze, and disseminate actionable intelligence.

Interstate 19 (I-19) Checkpoint

The Border Patrol is tasked with securing the Nation's borders between the ports of entry using a multi-tiered enforcement strategy. A major component of this strategy includes the strategic placement of checkpoints in tactical locations that contributes significantly to gaining effective control of the Nation's borders.

Interstate 19 is the major route of egress from the Nogales Area of Operation, and this causes the majority of illegal traffic that enters outside downtown Nogales, Arizona to funnel into the I-19 corridor, which makes it a natural "choke point". The I-19 checkpoint (third tier) is currently equipped as a temporary checkpoint despite remaining at a fixed location and is slated to become a permanent checkpoint. However, despite the current lack of permanent infrastructure, the I-19 checkpoint effectively removes the highway as a route of egress from the border. This gives agents a credible opportunity to identify and apprehend illegal aliens and narcotics smugglers as they attempt to transit through, or circumvent the checkpoint.

Border Patrol International Liaison Unit (ILU)

The mission of the International Liaison Unit is to create and maintain positive working relationships and to foster alliances with foreign counterparts in order to increase border security. The alliances established will maintain open communications and mutual respect with and between foreign and domestic law enforcement counterparts. The ILU builds partnerships and enhances border security awareness in support of the National Border Patrol Strategy.

In March 2008, representatives from San Diego, El Centro, Yuma, Tucson, El Paso, Marfa, Del Rio, Laredo, Rio Grande Valley and Border Patrol met in Dallas, Texas, for an ILU Performance Measure Workshop. The workshop was convened to establish and review the policy and standard operating procedure, identify goals and objectives, and link them to strategic goals and objectives of the National Border Patrol Strategy. It was also established to standardize the Liaison Program. The workshop resulted in a written policy for the ILU.

The ILU strategic goals are:

1. Establish, develop and maintain effective relationships of trust and confidence with individuals representing their foreign government agencies;
2. Identify and develop common law enforcement objectives with foreign governments to combat border crime;
3. Cultivate and reinforce commitment with foreign and domestic law enforcement communities;
4. Develop and maintain information sharing with foreign and domestic law enforcement agencies.
5. Agents serving under the ILU focus and engage in activities that complement and support current operations and enforcement strategies.
6. The strategies of the ILU are in direct support of the Border Patrol Mission and National Strategy, with strategic links to the following objectives:
 - a. Establish essential probability of apprehending terrorist and their weapons as they attempt to illegally enter the U.S. between the ports of entry;
 - b. Deter illegal entries through improved enforcement;
 - c. Apprehend and deter smugglers of people, narcotics and other contraband;
 - d. Reduce crime in border communities and consequently improve the quality of life and economic vitality.

The ILU also paved the way to programs like the Operation Against Smugglers Initiative on Safety and Security (OASISS). In March 2005, the U.S. and Mexico agreed to establish a bilateral, standardized prosecution program. The product of that agreement was OASISS. The OASISS program was developed to address the increasing amount of alien smugglers across the southwest border. The program allows for alien smugglers apprehended in the U.S. to be prosecuted by the Government of Mexico. This program is very effective in areas along the southwest border that are affected by guidelines that make it difficult to prosecute certain alien smuggling cases. In FY 2007, 268 OASISS cases were generated, with 254 cases being accepted by the Government of Mexico. As of the middle of May, 794 cases were generated, and the Government of Mexico had accepted over 704 of those cases. OASISS has proven to be an invaluable tool to the Border Patrol. It also rewards the efforts of the agents by giving them another tool to be able to put criminals behind bars.

The liaison efforts with Mexican authorities that have occurred and continue to take place along the southwest border have essentially bridged the communication gap between the U.S. and Mexico. This is an extraordinary accomplishment when one considers the economic vitality of the region and the political sensitivities between the two countries. In light of the newly established policy and standard operating procedures guiding the ILU program, it is expected that the program will flourish as it strengthens relationships with foreign governments.

Forward Operating Bases (FOBs)

Use of Forward Operating Bases began to address remote crossing points that have historically been very difficult for agents to patrol due to the vast distances and the time involved to access these areas. FOBs have proven to be very beneficial to the detection and deterrence of illegal

entries in the areas in which they have been deployed and are now utilized in areas wherever the Border Patrol has a need to extend its reach.

The use of FOBs directly supports the Border Patrol's mission of gaining, maintaining and expanding effective control of the Nation's borders. As the Border Patrol continues to gain control of the border, illegal migration activities and smuggler tactics shift in an attempt to identify and exploit vulnerabilities in border security measures, particularly in the more remote areas of the border. Strategically placed FOBs afford a distinct advantage in that they provide a cost effective, secure staging facility that allows agents to be forward deployed in close proximity to the border – thereby improving Border Patrol's capability to rapidly respond to and counter these shifts in illicit cross-border traffic.

Surge Operations

The Border Patrol authorizes the implementation of surge operations to maintain or gain effective control of the border through improved enforcement. The Border Patrol's strategy for implementing surge operations across the southwest border is based on threats, risks, vulnerabilities, and the resources of partner agencies. These operations increase the probability of apprehending terrorists who are attempting to illegally enter the U.S. between the ports of entry, as well as their weapons. They also assist in the reduction of crime in border communities. Surge operations are implemented to proactively address intelligence, seasonal migration, and smuggling trends.

Border Patrol National Native American Program

The mission of the Border Patrol National Native American Program is to facilitate new partnerships, improve relationships, and increase trust throughout the Native American Indian tribes that have a nexus to the U.S. border. The program champions partnerships between tribal law enforcement, various Native American organizations, and the Border Patrol to support the national strategy. The Border Patrol National Native American Program is operational in twelve of the Border Patrol sectors. The program acts as a conduit between the Border Patrol and tribal, local, state and federal law enforcement agencies, as well as tribal councils located along both the Southwest and northern borders.

The program was designed to support ongoing enforcement operations within the respective agencies, while enhancing the liaison between them. As the relationship solidified, contact and responses to illicit activity along the borders has increased, allowing for joint law enforcement support for both Border Patrol and Tribal Law enforcement. Routine communication and liaison between some sectors and Tribal Council officials has led to enhancing the security and safety of the agents who are working in dangerous areas along the border. Through the Border Patrol National Native American Program, information-sharing efforts have allowed the Border Patrol sectors to conduct All-Terrain Vehicle training, search and rescue training, advanced four-wheel-drive training, and vehicle stops.

The Border Patrol National Native American Program is working to standardize policies and procedures and is proactively developing performance measures for the program to evaluate and measure the effectiveness of its initiatives.

Conclusion

In FY 2010, the Border Patrol will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. The Border Patrol will continue to plan for an appropriate mix of additional resources to achieve its strategic goal. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. The Border Patrol will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

Significant Accomplishments in FY 2008 include:

- Brought an additional 158 miles of border under effective control between October 1, 2007, and September 30, 2008, by deploying the right mix of new resources and enhancing enforcement operations through intelligence activities.
- Hired 2,576 new Border Patrol agents.
- Coordinated and implemented initiatives to gain and maintain control of the border:
 - Utilized existing traffic checkpoints and deployed tactical checkpoints as part of a defense-in-depth strategy
 - Maintained Border Intelligence Centers (BICS), which serve as a critical tactical intelligence resource center that has 24-hour availability to support the Border Patrol mission along the Nation's border
 - Maintained the Border Patrol International Liaison Unit (ILU) to create and maintain positive working relations and develop alliances with foreign counterparts
 - Maintained the Border Security Evaluation Team (BSET) with a purpose to serve as a mechanism for the northern Border Patrol sectors to evaluate the level of border security within the outlying border regions of their respective sectors
 - Maintained the Integrated Border Enforcement Team (IBET), which consists of five core agencies with law enforcement responsibilities within the border area that share information and intelligence, and work coordinated operations and share resources to maximize border enforcement efficiency and effectiveness
 - Continued with Operations "Red Bull" and "Uniforce", which have strategic goals to integrate the federal, state, and local law enforcement efforts that are focused on cross-country, over-the-road smuggling into a coordinated multi-agency, multi-jurisdictional law enforcement effort with a common objective.
- Sustained established "Best Practices"
 - Operation Against Smugglers Initiative on Safety and Security (OASISS), through bi-national cooperation with the Government of Mexico, prosecutes smugglers and guides who do not meet the prosecution thresholds in the U.S. Engaging the Government of Mexico in border efforts like OASISS assists CBP in more swiftly gaining control of the border.

- Operation Streamline is a progressive enforcement effort in the Del Rio, Laredo, and Yuma Sectors that combines intensive prosecution with expeditious removal. The effort is a collaboration between personnel and resources from CBP's Office of Border Patrol and Office of the Chief Counsel, as well as the U.S. Attorney's Office, ICE's Office of Detention and Removal (DRO), the U.S. Federal courts, the Executive Office for Immigration Review, and the U.S. Marshals Service.
- Operational Requirements Budget Based Planning (ORBBP) - the tool used by the Border Patrol to implement the National Border Patrol Strategy. It is a rigorous and comprehensive methodology that takes a risk-based approach in determining resource requirements, deployments, and operational tactics. ORBBP is a dynamic process that recognizes the ever-changing border security environment and examines all factors, current and future, internal and external, affecting border security. It ensures that the Border Patrol engages the appropriate resources and tactics against current and projected threats and vulnerabilities. Using this methodology, the Border Patrol met or exceeded all of its performance targets for FY 2008 through strategic placement of resources.

FY 2009 planned accomplishments include:

- Hired an additional 936 agents in the first quarter of FY 2009 for a total of 18,331 agents on board as of December 31, 2008, which met the Presidential mandate of having at least 18,319 agents on board by the end of the 2008 calendar year;
- Hiring an additional 1,688 agents in the second, third and fourth quarters to reach a total of 20,019 agents by the end of the fiscal year;
- Bringing an additional 58 miles of border under control, for a total of 815 miles of border under control;
- Relocating 482 Border Patrol Agents from the southwest border to the northern border based on operational requirements and threat assessments by utilizing a wide variety of staffing mechanisms such as interns, Resident Agent programs, reinstating of former employees, full-paid moves for hard-to-fill locations, and the new Voluntary Relocation Program (VRP). This program is a comprehensive approach to meeting the goal of providing the northern border sectors with the necessary manpower resources to quickly mitigate threats to the homeland along the northern border.

The Border Patrol anticipates FY 2009 to be a year of unprecedented growth and accomplishment. Several factors will contribute to the successes anticipated. In addition to the efforts already outlined, new strategies and methodologies will be adopted to ensure that continues to be a proactive, intelligence-driven law enforcement operation.

A new initiative to establish a Director for the Special Operations Division is being pursued. The rationale behind this initiative focuses on increasing the response, operational, and training capabilities of the Special Operations Divisions within the Office of Border Patrol. The goal is to provide a highly mobile, rapid response capability to react to specific terrorist threats or incidents of national significance, and to provide operational support to the sector Chiefs.

FY 2010 planned accomplishments include:

- Maintaining effective control of 815 miles of border;
- Hiring 2,000 new Border Patrol agents to backfill attrition;
- Adding 367 Border Patrol agents to the northern border in order to achieve the goal of 2,212 agents assigned to the northern border by the end of FY 2010;
- Continuing to provide the Ground Transportation Contract capability along the southwest border, which frees up Border Patrol Agents and ICE/DRO personnel to perform their enforcement duties as opposed to enforcement support roles;
- Hiring 44 additional Border Patrol agents in support of the southbound initiative to combat firearms and currency smuggling.

PPA: BETWEEN THE PORTS TRAINING

TRAINING	Perm. Pos.	FTE	Amount
2008 Actual	130	76	50,630
2009 Enacted	130	130	74,815
2010 Adjustment to Base	-	-	(23,064)
2010 Current Services	130	130	51,751
2010 Program Change	-	-	0
2010 Request	130	130	51,751
Total Change 2009-2010	-	-	(23,064)

CBP requests \$ 51.8 million for Between the Ports Training. This is a decrease of \$23 million from the FY 2009 Enacted Budget. The request includes:

- Non-recur of \$ 22,100,000 for Training for Border Patrol
- transfer out of \$ 964,000 to the new Facilities Management Account

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides the CBP’s national leadership with a comprehensive and accurate needs assessment of all standard, core, and recurring training. The NTP provides CBP’s headquarters and field managers an opportunity to advance the Secure Border Initiative by bringing the workforce together to train. The NTP emphasizes CBP’s anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training, such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

Border Patrol Academy

The Border Patrol Academy identifies and provides core operational training for Border Patrol agents to accomplish their mission of protecting the boundaries of the U.S. The Border Patrol Academy is currently located in Artesia, New Mexico. Basic training for Border Patrol agents is provided at Artesia. Advanced-level training and instructor training is held at Charleston and is also conducted in field locations.

OTD/Use of Force Policy Division (UFPD)

OTD/UFPD is responsible for the development, articulation, and implementation of CBP use of force policy and the related equipment. OTD/UFPD seeks to research, evaluate and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. OTD/UFPD has developed appropriate controls, standards, training, best practices, and policies in order to enhance the safety and performance of approximately 14,900 Border Patrol agents.

OTD/Leadership and Organization Development Division (OTD/LODD)

OTD/LODD designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. OTD/LODD provides core and advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs.

OTD/Border Enforcement Training Division (OTD/BETD)

OTD/BETD primarily engages in anticipating, identifying, initiating, and analyzing occupation specific training needs of CBP's approximately 33,500 uniformed workforce, and producing customer focused training portfolios that facilitate border enforcement readiness.

The fight against terrorism remains the top priority for CBP. In support of that primary mission, OTD will continue to oversee the anti-terrorism training program ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along the Nation's borders.

Border Patrol Agent Training

Training courses focus on technical, intelligence, or specialized training for Border Patrol agents. Training courses include: Border Patrol Technical Course for Supervisors; Border Patrol Agent-In-Charge (PAIC) Intel Course; Emergency Medical Technician Certification; BORSTAR training; and Canine training.

Other Training

OTD/Headquarters sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

PPA: AIR AND MARINE OPERATIONS – SALARIES

	Perm. Pos.	FTE	Amount
2008 Actual	1,662	1,366	\$262,148
2009 Enacted	1,801	1,732	271,679
2010 Adjustment to Base	70	139	18,835
2010 Current Services	1,871	1,871	290,514
2010 Program Change	144	72	19,115
2010 Request	2,015	1,943	\$309,629
Total Change 2009-2010	214	211	37,950

CBP requests \$309.6 million for Air and Marine Operations. The request is \$38.0 million over FY 2009 Enacted Budget. The request includes:

- \$ 2.1 million increase for pay annualization
- \$ 3.1 million increase for pay inflation
- \$ 6.2 million increase for marine units annualization
- \$18.4 million increase for 39 FTE realigned from Border Patrol salaries
- \$ 6.3 million decrease for non-pay inflation
- \$ 4.7 million transferred out to the new Facilities Management account
- \$19.1 million increase program increase for Air and Marine staffing to support 144 positions

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP Air and Marine (A&M) secures the borders against terrorists, acts of terrorism, drug smuggling, and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP A&M maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP A&M partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support, and support to other agencies. In fulfilling the priority mission of CBP to protect the borders, CBP Air and Marine’s geographical mission has a strong focus along the southern border, with a recent expansion of coverage on the northern border.

IV. Program Justification of Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expense
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Data Center Migration

Strategic Goal(s) & Objective(s):

DHS Goal 3: Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources

Objective 3.3: Improve Cyber Security

CBP Strategic Goal 1: Secure our Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel;

Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel; and Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders; Objective 2.1: Through the use of accurate advance information and modernized systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports.

PPA: Headquarters Management and Administration

Program Increase: Positions: 0 FTEs: 0 Dollars: \$38,650

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$38,650
Budget Request	0	0	\$0	0	0	\$0	0	0	\$38,650

Description of Item

CBP requests \$38.65 million for data center migration (development) funding that will be used for the continuation of system and application migration to the two (Stennis and EDS) DHS Enterprise Data Centers for central DHS management in FY 2010.

Resources for the Data Center Migration will establish and transition the following services to EDS:

Project	Implementation FY 2010
Email	\$11,000
Project Server	\$500
Sharepoint	\$1,300
Worklenz	\$25
EDS Storage Replication	\$5,000
Project Management	\$4,000
Oracle RAC & Grid with Active	
Data Guard	\$5,525
Stennis LAN Upgrade	\$7,000
SAP	\$4,300
Total	\$38,650

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

The data center migration includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers
- Migration of CBP hardware, systems/applications to occupy rack space at the DHS Data Centers.

Impact on Performance (Relationship of Increase to Strategic Goals)

If funding is not provided, CBP will not have the additional capability to operate critical systems in multiple geographic locations during times of peace and national crisis, replicate and perform maintenance without impacting the mission, reduce our dependency on legacy architectures, or make our data more readily available to DHS and our intelligence partners.

Migration of CBP production systems in FY10 to the DHS Stennis and EDS Data Centers will enable DHS to fulfill its mission, strategic goals and business objectives to create “One Network, One Infrastructure, and One DHS.” Lack of migration will inflict a negative impact on CBP’s ability to address DHS OIG findings related to CBP’s disaster recovery posture, as outlined in *Disaster Recovery Planning for DHS Information Systems Needs Improvement*, OIG-IT-04-003, dated February 2005.

In alignment with DHS departmental goals to consolidate all component Data Centers into the Stennis and EDS Data Centers, CBP plans to continue our transition leadership role to migrate all systems in FY10. This will help us to modernize and advance existing services, thus improving data and information sharing, as well as interoperability.

Description of Item

CBP requests \$10 million to expand CBP’s License Plate Reader (LPR) Program to 58 outbound lanes on the southern border at the ports of entry (POE). An additional \$16.1 million is requested to hire 65 CBP officers, 44 Border Patrol agents and 16 support staff for this initiative that will also be dedicated to the outbound program and be deployed at and between the ports of entry.

(Dollars in thousands)

Personnel Cost (CBP officers, Border Patrol agents, support personnel)	\$ 16,132
Deployment of LPR to remaining 58 outbound lanes	\$ 10,000
Total	\$ 26,132

Justification

The post 9/11 emphasis has been primarily on in-bound passengers and cargo. However, with the increased threat to the United States as a result of the recent outbreak of violence along the southern border, CBP has begun to revamp its outbound strategies and activities for both passengers/travelers and for cargo. The primary focus is on mitigating the illegal export of firearms and currency from the United States into Mexico that are contributing to the violence, and to mitigate drug smuggling.

CBP's strategy to mitigate the border violence is to dedicate staff to conduct outbound inspections at and between the ports of entry and to interdict the smuggled currency and firearms that are contributing to violence and strengthening the drug cartels that perpetrate the drug trade and the violence. The expansion of the LPR Program on the southern border will assist CBP officers and Border Patrol agents in identifying anomalies in the travel patterns of southbound vehicles that are often indicative of persons trying to avoid detection for illegal behavior.

For FY 2010, the Office of Border Patrol is requesting \$8.0 million for 52 (44 agents and 8 support staff) positions to be dedicated to "Combating Southbound Firearms and Currency Smuggling."

Potential deployments of these enhancements will be in the positions of Border Patrol agents, canine teams, lead Border Patrol agents, intelligence agents and intelligence analysts. All positions will be assigned in a manner designed to increase the efficiency and the focus of CBP's southbound operations, to include increasing the presence of Border Patrol Agents assigned to Immigration and Customs Enforcement's Border Enforcement Security Task Force (BEST). Additionally, increasing agents assigned to the Border Patrol LETC program will provide CBP the ability to execute intelligence driven law enforcement actions.

For FY 2010, the Office of Field Operations (OFO) is requesting \$ 8.1 million for 73 (65 Customs and Border Protection officers and 8 support staff) positions to be dedicated to "Combating Southbound Firearms and Currency Smuggling." These positions will be used to establish dedicated outbound enforcement teams along the southwest border, which will provide the OFO with the capability to conduct sustained and recurring outbound enforcement activities. Presently, OFO conducts short term operations as resources allow.

Seizure data over the past two years demonstrate an increasing threat for weapons and currency smuggling outbound to Mexico. In FY 2007, OFO initiated 353 southwest seizures totaling \$13.7 million in currency. This increased in FY 2008 to 450 outbound currency seizures, totaling \$12.5 million in currency. Similarly, OFO seized 316 weapons in FY 2007 and 257 weapons in FY 2008.

The LPR program will support CBP's focus on "Combating Sound Bound Firearms and Currency Smuggling." The LPR is a tool that consists of cameras and sensors that captures an image of a vehicle's license plate, converts the image to text showing the state/province of origin and the alphanumeric characters, formats the data, and sends a primary vehicle query to TECS. The LPR tool automatically locates, reads, and communicates personal vehicle license plate information to the TECS system. TECS then automatically queries its database for law enforcement information associated with that license plate and provides the CBP officer or the Border Patrol agent with the response information.

The deployment of LPRs will provide for rapid accurate querying of the license plates through TECS and enable the interception of suspect vehicles, including terrorist-related vehicles, for which lookout records have been established. Furthermore, LPRs will improve the selectivity of low and high risk vehicles and people, while expediting the clearance process there for expediting low-risk travelers while making it easier for officers/agents to select and target high-risk vehicles.

Currently, there are a total of 416 LPRs installed, 358 LPR inbound primary inspection lanes, 52 outbound traffic lanes, and 3 commercial lanes installed at northern and southern border POEs. In addition to the LPRs installed at the POEs, there are also 3 LPR lanes installed at the Federal Law Enforcement Training Center (FLETC) in Glynco, GA. As it relates to LPRs being installed at Border Patrol (BP) checkpoints, there is one BP pilot site currently in progress at the Laredo: C-29 Checkpoint.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP's outbound program align to DHS Strategic Goal: Protecting our Nation from Dangerous People and Goods; CBP Strategic Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel; Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of appropriate mix of infrastructure, technology and personnel; Strategic Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders; and Objective 2.1: Through the use of accurate advance information and modernized systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports.

CBP and the United States have an interest in mitigating the border violence on the southern border. With the resources requested, CBP will be able to begin focusing on its outbound mission. By applying these resources with a targeted emphasis to the outbound program along the southern border, CBP will greatly enhance its ability to intercept firearms and currency being smuggled into Mexico. This will help mitigate some of the violence that has engulfed the U.S. – Mexican border region. Further, by focusing and unifying our efforts and by increasing our operational efficiency, CBP will be better positioned to continue facilitating tourism and trade while enforcing the laws which protect our Nation.

Program Increase 3: Law Enforcement Enhanced Retirement

Strategic Goal(s) & Objective(s):

DHS Strategic Goal: Strengthen and Unify DHS Operations and Management

CBP: Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders
Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel.

PPA: Border Security Inspections, Trade and Travel Facilitation at Ports of Entry (POEs)

Program Increase: Positions 0 FTE 0 Dollars \$25,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$200,000
Program Increase							0	0	\$25,000
Total Request	0	0	\$50,000	0	0	\$200,000	0	0	\$225,000

Description of Item

CBP requests \$25.0 million to partially fund the enhanced retirement benefit for Customs and Border Protection officers (CBPOs), which were provided by section 535 of the Consolidated Appropriations Act, 2008. This provision extended to CBPOs similar retirement benefits as are provided for law enforcement officers (LEO) in other organizations. This enhanced retirement package for CBPOs became effective on July 6, 2008, covering 19,865 officers:

- Who hold a position within the GS-1895 job series, or any future reclassification of this position;
- Whose duties include activities relating to the arrival and departure of persons, conveyances, and merchandise at Ports of Entry and
- Those employees within DHS who transfer directly to secondary supervisory or administrative positions after performing the above CBPO duties for a period of at least 3 years.

Justification

The law enforcement nature of CBP's homeland security mission demands the highest caliber of law enforcement professionals. CBPOs routinely make arrests, seize contraband, interact with dangerous travelers wanted for criminal acts, and perform actions that are physically demanding and strenuous. Further, CBPOs are held accountable for ensuring the security of our Nation and are required to complete law enforcement training, including: Firearms, Arrest Techniques, Defensive Tactics, and Officer Safety and Survival. CBPOs face the same risks and challenges as law enforcement personnel in other organizations.

The decisions that CBPOs make may have serious implications and may have grave security ramifications. In FY 2008, CBPOs:

- Inspected over 396.7 million travelers and more than 121 million cars, trucks, buses, trains, vessels and aircraft at 327 ports of entry – each inspection potentially places officers in harm's way and exposes them to dangerous individuals and situations;
- Seized more than 938,000 pounds of narcotics and arrested 26,000 persons wanted by various law enforcement agencies – potentially placing CBPOs in direct contact with dangerous criminals wanted for crimes nationwide such as rape, assault, drug trafficking, and murder;
- Intercepted 6,867 smuggled aliens, 27,887 fraudulent documents, processed over 224,000 inadmissible aliens (includes: Visa Waiver Refusals, Expedited Removal, Stowaways, Crew Detentions, Refused/Withdrawals, Voluntary Return), and processed 913 national security/ terrorist intercepts.

Impact on Performance (Relationship of Increase to Strategic Goals)

LEO retirement benefits align to DHS Strategic Goal: Strengthen and Unify DHS Operations and Management; CBP Strategic Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders; and Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology and personnel.

Through the extension of similar LEO retirement benefits to CBPOs, CBP will be able to recruit top employees while building a more effective and vigorous workforce for the future. Further, it will help CBP retain the highest caliber of employees. It will reduce CBP's vulnerability to the loss of its workforce by providing generous benefits that are on par with other LEOs.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expense
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 4: Western Hemisphere Travel Initiative (WHTI)

Strategic Goal(s) & Objective(s):

DHS Strategic Goal: Protecting our Nation from Dangerous People

CBP: Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders
Objective 2.1: Through the use of accurate advance information and modernized systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports

PPA: Border Security Inspections, Trade and Travel Facilitation at Ports of Entry (POEs)

Program Increase: Positions 0 FTE 0 Dollars \$20,900

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							294	294	124,036
Program Increase							0	0	20,900
Total Request	205	103	\$225,000	294	250	\$139,973	294	294	144,936

Description of Item

CBP requests \$20.9 million for the continued support of the Western Hemisphere Travel Initiative (WHTI). The funding breakout follows (dollars in thousands):

Program Management (Contract Support)	\$ 2,000
Communications, Education, and Outreach Communication	\$ 2,000
Audits for Enhanced Driver's License (EDL) States, Tribal Entities and Time & Motion Studies coupled with Process Improvement Analyses	\$ 3,000
Deployment of WHTI Technology to Dual Use Lanes/Different Booth Configurations	\$ 10,000
Technical Solutions/Process Improvements for Pedestrians and Travelers Using Other Modes of Transportation	\$ 3,900
Total	\$ 20,900

Justification

WHTI is mandated by Section 7209 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA; P.L. 108-458, as amended) and requires all travelers to present acceptable travel documents that WHTI will verify at the time of crossing. WHTI benefits CBP by providing a tool to conduct the necessary verification of identity and citizenship at the time of crossing. It benefits the traveling public by accelerating the verification process mandated by law to the extent possible with Radio Frequency Identification (RFID) Technology and communications technology.

As of mid-March 2009, 21 of the top 39 POEs were completed, accounting for 75 percent of the lanes that will be completed at land border ports of entry and over 80 percent of the total land border traffic in the nation. On the northern border, 82 lanes of a total of 162 lanes have been deployed and on the southern border, 206 lanes of a total of 223 lanes have been deployed. Three lanes will be deployed at the Federal Law Enforcement Training Center.

21 Ports Of Entry (POEs)			
Blaine, WA	Buffalo, NY	Brownsville, TX	Calexico East, CA
Calexico West, CA	Columbus, NM	Detroit, MI	Douglas, AZ
Eagle Pass, TX	El Paso, TX	Fabens, TX	Hidalgo, TX
Laredo, TX	Nogales, AZ	Otay Mesa, CA	Progreso, TX
Point Roberts, WA	Rio Grande City, TX	San Luis, AZ	San Ysidro, CA
Tecate, CA			

The proposed investment for FY 2010 will support the following elements:

- Program Management (Contract Support): The expanded requirements that have been identified for the expansion to the top 46 sites, additional reporting requirements and oversight reviews throughout 2010, plus review of additional ports for installation of WHTI technology requires continued program management support.
- Communications, Education and Outreach Communication: The Winter Olympic Games and Winter Paralympics Games will be held in British Columbia in early 2010. These high-profile events will require targeted communications to ensure that travelers are fully aware of the new WHTI document requirements, especially RFID-enabled documents, which are designed to facilitate the movement of the Olympic event traveler with minimal wait times.
- Audits for Enhanced Driver's License (EDL) states, tribal entities, and time and motion studies coupled with Process Improvement Analyses: audits of states' and tribal entities' processes for the issuance of WHTI-compliant travel documents, EDLs and Enhanced Tribal Cards (ETCs) are essential to verify adherence to signed business plans and Memoranda of Agreement and ensure the integrity of the issuance process. The wait time studies are necessary to gauge the effectiveness of the WHTI program implementation. They will determine if the facilitative technology deployed by WHTI has improved the flow of border crossings at the land border ports of entry. In addition, they will also be used to identify additional areas for improvement in the border crossing process.

- **Deployment of WHTI Technology to Dual Use Lanes/Different Booth Configurations:** The deployment of WHTI technology revealed that various mitigation strategies can be employed to reduce wait times at the border. These strategies include the deployment of WHTI technology to dual use lanes – commercial lanes that are also used to process passenger traffic during off-peak commercial hours. The implementation of stacked booths (multiple booths serving a single lane) requires the deployment of additional technology to ensure the smooth movement of travelers.
- **Technical Solution/Process Improvements for Pedestrian and Travelers Using Other Modes of Transportation:** During FY2008 approximately 288.7 million individuals entered the U.S. through a land border port of entry. Of this total, approximately 68.8 million pedestrians entered the U.S. in other than a private vehicle. All of these individuals are subject to the WHTI document requirements. To date, the WHTI program has focused on the majority of travelers who enter the U.S. in private vehicles. The WHTI program needs to begin assessing current processes for verifying the individuals arriving at the land border via other modes of transportation and make process improvements where practical. The experience gained by deploying RFID technology to land border ports of entry will enable the WHTI program to look at other modes, such as pedestrian, and apply process reengineering and/or deployment of improved technology to ensure document compliance as well as facilitate the border crossing experience.

Impact on Performance (Relationship of Increase to Strategic Goals)

WHTI aligns to DHS Strategic Goal DHS Strategic Goal: Protecting our Nation from Dangerous People; CBP Strategic Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders; and Objective 2.1: Through the use of accurate advance information and modernized systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports.

By providing the requested funding, Congress will ensure an adequate funding level to maintain and operate the WHTI program that supports Departmental efforts to facilitate the efficient movement of people at the land border POEs. Without this funding, the WHTI equipment, technology, and infrastructure installed in FY 2008 and FY 2009 will eventually fail and need to be serviced, replaced, or upgraded. Any delays in promptly attending to malfunctioning equipment will result in service disruptions and delays at the POE for busy travelers and commuters already using congested land border POEs.

*\$19,115 reflects the amount after the realignment of \$.885M in rent associated with new positions, which will be reflected in the new Facilities Management account, Rent PPA.

Description of Item

CBP Air and Marine (A&M) is requesting an additional 88 law enforcement and 56 support positions to support the headquarters, northern, coastal and the southeast/caribbean borders in Fiscal Year 2010. The CBP Strategic Plan, which supports the Secure Border Initiative (SBI) as well as traditional CBP mission sets, establishes a staffing objective that will effectively provide adequate staffing at headquarters and field locations as CBP expands support for border security operations.

Justification

These positions are necessary for A&M to achieve maximum compliance with strategic goals and objectives and to enhance A&M's efforts to expand and improve patrols and surveillance to detect, deter and prevent illegal entry into the United States. During FY 2010, A&M plans to continue the expansion of its capabilities across the northern and coastal borders and place heavy emphasis on the maritime requirements along the southeast/Caribbean borders.

Impact on Performance (Relationship of Increase to Strategic Goals)

The hiring of additional personnel supports DHS Strategic Goal: Protecting our Nation from Dangerous People; CBP Strategic Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel; and Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel.

*\$9,340 reflects the amount after the realignment of \$.660M in rent associated with new positions, which will be reflected in the new Facilities Management account, Rent PPA.

Description of Item

CBP is requesting \$9.3 million to hire 12 scientists, 1 paralegal, 34 international trade specialists, 32 auditors, 10 attorneys, 3 import specialists and 11 support personnel to implement the Action Plan on Import Safety developed in response to Executive Order 13439. This executive order establishes an interagency working group for Import Safety to increase staffing levels needed to carry out commercial operations and adequately staff priority trade areas as proposed in the Office of International Trade (OT) Resource Allocation Model (RAM). The increase of personnel will offer an optimal mix of trade activities and resources that allow CBP to meet the

growing demand in trade volume, meet CBP's mission of enforcing trade laws and collecting revenue, achieve executive management goals and objectives for the trade mission, align activities with the appropriate skill levels, leverage efficient gains from technology process improvements, and combat risks inherent in priority trade areas.

Funding Breakout:

Salaries (103 positions)	\$8,102
Targeting & Analysis	\$844
Equipment	<u>\$394</u>
Total	\$9,340

Justification

The OT is responsible for the implementation of specific recommendations contained in the Import Safety Action Plan initiated by Executive Order 13439. Support for this budget initiative is essential for CBP to be able to identify and target critical points in the import life cycle where product risks are greatest and increase the number of auditors and scientists to protect consumers from health and safety risks.

Pursuant to Section 403 of the SAFE Port Act, OT has developed a proposed Resource Allocation Model which defines the optimal staffing levels needed to carry out commercial operations and to adequately staff priority trade areas. These personnel will participate in the development of best practices and trade partnerships, enforcement targeting, technology enhancements to include the acceleration of ACE/ITDS, scientific testing, intelligence gathering, and audit capabilities to better protect against unsafe foods, agriculture and consumer goods while facilitating legitimate trade.

The goal of CBP's trade mission is to facilitate legitimate trade while protecting the American economy from unfair trade practices and illicit commercial enterprises. The commercial trade process is highly complex and diverse. Arrays of skills are required to achieve efficient flow of international trade while enforcing hundreds of trade laws. OT's current priority trade areas include; intellectual property rights, import safety, revenue, dumping, agriculture, penalties, and textiles. In the priority trade areas there are a variety of activities performed on a daily basis to strategically plan, analyze and target, examine and interdict, collect revenue, assess penalties, and write regulations.

The international trade environment is highly complex, growing at record pace, and is ever changing and evolving. As the agency charged with enforcing international trade laws, collecting revenue, and facilitating lawful trade, CBP needs the flexibility to adequately confront these challenges. The growing workload, caused by factors such as the increasing volume of trade, a growing number of entities involved in trade, and an increasing number of trade agreements, affects the amount and nature of human resources required to effectively perform CBP's trade operations. The positions identified in this request are those required in order to meet these demands. FY 2008 was a year of record highs for some import measures, including import value, which reached an all time high of \$2.3 trillion in FY 2008.

In addition to the explosive growth of trade, CBP has experienced a tremendous growth in the number of entities involved in the importing process. However, analysis of current FY 2009 data points to imports dropping about 30%, to a low of \$1.6 trillion by year end due to the impact of the global downturn. Despite this decline, CBP still expects to process entries from over 750,000 importers this year. The volume challenges CBP's import specialists, customs auditors, account managers, and attorneys who identify importers' noncompliance with customs laws and regulations.

Impact on Performance (Relationship of Increase to Strategic Goals)

Approximately \$2.3 trillion of imported products entered the United States economy in FY 2008. As the sole border enforcement agency, CBP has the responsibility to keep unsafe products out of this country. Much attention has been given to import safety issues with the recent events of the adulterated melamine, toothpaste, and toys, to name a few. Executive Order 13439 required the executive branch to develop recommendations to improve import safety. Fourteen recommendations and 50 action steps were published in response to this Executive Order. CBP is accountable for implementation of more than half of these recommendations and action steps. CBP's workload is also impacted by increases in free trade agreements and other international agreements to which the United States is a party. Since January 2001, the United States has increased the number of free trade agreements and special trade programs from 3 to 17.

Program Increase 7: Cyber Security

Strategic Goal(s) & Objective(s):

DHS Strategic Goal: Protect Critical Infrastructure

CBP: Goal 1: Secure our Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel
Strategic Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel

PPA: Headquarters Management and Administration

Program Increase: Positions: 0 FTEs: 0 Dollars: \$5,000

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$5,000
Budget Request	0	0	\$0	0	0	\$0	0	0	\$5,000

Description of Item

CBP requests \$5 million for Cyber Security to provide continuous Top Secret/Sensitive Compartmented Information (TS/SCI) and collateral classified processing capabilities to form a “Focused Operations” branch providing tactical cyber intelligence, Digital Media Analysis and Vulnerability Assessments of ongoing threats to the DHS and CBP environment. The operational initiatives and their estimated costs appear in the table below:

Security Operations - includes TS/SCI & CC	2,585
Security Engineering	815
OMB Mandates (HSPD-12 Support) - includes Digital Media	450
Trusted Internet Connection (TIC) Support	725
Logging Strategy	425
Total	5,000

Funding includes contract costs & acquisitions for each category

Justification

Cyber Security will build upon existing capabilities within the Security Operations Center to include expanding the classified processing capabilities allowing for continuous TS/SCI and collateral classified access via an onsite Sensitive Compartmented Information Facility (SCIF) with Joint Worldwide Intelligence Communications System (JWICS) and Homeland Secure Data Network (HSDN) terminals. Funding will also form a “Focused Operations” branch which will provide tactical cyber intelligence of ongoing threats to the DHS and CBP environment while also providing skilled forensics experts capable of staffing a DHS/CBP Digital Media Analysis lab to identify and attribute cyber attacks.

CBP Network and Security Operations (NSO) is required by the Federal Information Security Management Act (FISMA) and DHS policy to monitor, detect and respond to attacks and policy violations that threaten the mission critical data communications traversing the internal CBP network and DHS OneNet and Data Communication Network (DCN) Wide Area network (WAN). The DHS Chief Information Security Officer (CISO) has mandated that all Security Operations Centers (SOC) throughout DHS be able to process classified information. As the steward for DHS CBP, NSO must be capable of processing information at all three classification levels (UNCLASSIFIED/SECRET/TOP SECRET) within the confines of the Operation Center. Furthermore proposed congressional legislation requires for the ability to support the identification and attribution of malicious activity throughout the CBP and DHS network. In order to provide this functionality the NSO needs to establish a Cyber Intelligence Branch within NSO which requires a SCIF within the National Data Center (NDC) complex capable of processing this type of information.

Additionally, the NSO will establish a “Focused Operations” unit which will provide Cyber Security Intelligence capability to aid in the detection, monitoring and identification of malicious activity to the DHS and CBP networks. Within this Cyber Intelligence branch there will also be a “Digital Media Analysis” unit which will provide forensic services to aid in the information processing and investigation of cyber security incidents.

Strategic Goal(s) & Objective(s):

DHS: Strategic Goal: Protecting our Nation from Dangerous Goods

CBP: Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel

Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States

Description of Item

CBP requests an increase of \$3 million to continue API/PNR in two key security partner countries (including continuing the program for a country previously identified in FY 2008); and to implement the program in one additional key country resulting in the deployment of three countries by the end of FY 2010. The increase continues funding for the existing countries and provides funding for the newly implemented country. Funding costs include start up costs and acquisition of hardware and software, recurring information technology costs and training and travel. Below is a detailed cost breakout:

API/PNR Cost Breakdown FY 2010
(Dollars in Thousands)

Start-up Costs: Hardware & Software Equipment	\$1,235
Foreign Travel & Training	\$704
Recurring IT costs (Operations & Maintenance)	\$1,061
Total	\$ 3,000

CBP began implementation in one key security partner country FY 2008. In FY 2009, CBP has continued the program in one key country and continues to conduct informational discussions with other interested partner countries (specific countries are classified). CBP has been working on an aggressive schedule to expand our current country Advance Passenger Information/ Passenger Name Record (API/PNR) programs with interested foreign partners, but must continue to remain flexible to changing internal and external political circumstances relating to the governments of those foreign partners.

Justification

The requested funds will expand the API/PNR program to enhance national security and facilitate legitimate travel, in partnership with select foreign governments, and per directive HSPD-6. API and PNR data, including historical records, are essential in assisting DHS and CBP officers with their risk-based screening of travel indicators and identifying potential links between known and previously unidentified terrorist facilitators. Analyzing these records for these purposes allows CBP to continue to identify suspect travel patterns and irregularities effectively. Acquiring additional traveler information that would otherwise not be available to CBP is imperative in our efforts to stem terrorism and other transnational crimes.

CBP understands the benefits of analyzing and evaluating API/PNR as a means of preventing terrorism and crime and is recognized as a world leader in the collection and use of API and PNR data. Over the course of nearly two decades, CBP has constructed systems from the ground up to capture these data sets and also designed a rules-driven mechanism to exploit discrete elements contained within them. As a result, CBP has a seasoned cadre of technical staff capable of developing future similar systems. Unfortunately, this cohort is small and is already stretched to meet its role in the design and development necessary to keep CBP's targeting systems dynamic and at the forefront of global border security systems. The requirements of new systems will engage the attention of this small technical group and will have a severe detrimental impact on CBP's capabilities to counter terrorist travel and smuggling trends within its rules-based targeting systems. CBP's ability to create timely rules to counter terrorist travel would also be detrimentally affected.

Similar API operations, such as the Mexico APIS program and the Caribbean Community (CARICOM) APIS program, have proven to be an effective tool in identifying and countering terrorism. Similar success is envisioned with this initiative. It would allow CBP to identify definitive links between suspect travel patterns, provide missing data on travel history, identify co-travelers otherwise unknown to CBP, and provide travel movements of people under current investigation. All these data elements, which are not currently available to CBP, would assist in enhancing our border security. The data will be instrumental in identifying terrorist-related and other border security threats to the homeland or civil aviation and responding with appropriate actions to save lives.

Impact on Performance (Relationship of Increase to Strategic Goals)

With this funding, the Department of Homeland Security and CBP will collaborate with foreign governments to allow participating countries to identify and track down known and suspected terrorists, detect potential threats to national security, and uncover additional information about terrorist networks and activities. The initiation, development and expansion of this foreign initiative will require greater planning, acquisition and maintenance costs than the successful domestic APIS system.

Transforming CBP into an intelligence driven agency is a top priority. Funding of API/PNR will allow CBP to provide officers with additional tools necessary that meet.

DHS and CBP strategic goals and objectives.

Global API/PNR project supports DHS Goal 1 by enabling DHS/CBP to acquire new data sets collected by foreign governments and the ability to perform important analysis to help mitigate threats related to terrorism and possible terrorist travel. The project will support and provide the implementation for protocols between DHS and foreign governments to prevent the movement of high-risk travelers, especially suspected terrorists. In addition to its primary mission to mitigate terrorism, Global API/PNR will assist DHS/CBP in securing our borders against illicit contraband, such as illegal drugs, counterfeit goods, other harmful materials and organisms, and other illegal activities (DHS Goal 1). The project will allow receipt of foreign government data in near real-time, allowing for timely analysis of high-risk travelers (CBP Objective 1.3). Furthermore API/PNR will allow data to be collected in an automated system that will enable standardization for possible further dissemination to other government partners (CBP Objective 1.3).

Finally, Global API/PNR provides a means to identify and address potential risks in advance of their ability to cause harm in the U.S., which will simultaneously facilitate legitimate travelers while ensuring the safety of the traveling public.

*\$2,848 reflects the amount after the realignment of \$.152M in rent associated with new positions, which will be reflected in the new Facilities Management account, Rent PPA.

Description of Item

CBP requests an increase of \$2.8 million to hire 20 Customs and Border Protection officers (CBPOs) and two mission support positions. The 20 CBPOs would be evenly split between the passenger and cargo facilities of the National Targeting Center (NTC), providing additional operational and analytical support, which is needed in both environments.

Justification

The increased staffing levels will ensure that NTC continues to provide CBP personnel with immediate responses to targeting and research inquiries. This request for funding is crucial for NTC to conduct its expanded passenger and cargo targeting operations, while maintaining current operations and providing anti-terrorism support to field operations. NTC workload continues to increase as its anti-terrorism mission grows in scope.

In the passenger arena, CBP is implementing additional vetting programs to ensure that people who present a threat to U.S. national security or are inadmissible on immigration grounds do not enter the country. Based on recommendations by the 9/11 Commission and congressional legislation, CBP has implemented a number of these programs, to include:

- Global Advance Passenger Information (API)/Passenger Name Record (PNR)
- Electronic System for Travel Authorization (ESTA)
- Iraqi Refugee Processing Program
- Document Assessment Tool (DAT)
- Immigration Advisory Program (IAP)
- Iraqi Refugee Processing Program
- Interagency Border Inspection System (IBIS)

The introduction and expansion of these programs are driving the increased workload in CBP's passenger environment. The success of these programs hinges on NTC-Passenger (NTC-P) ability to provide timely and accurate information. NTC-P personnel vet approximately 500 queries per day from nine IAP overseas airports and from 45,000 ESTA applicants.

Since its inception in July 2007, we have continued to expand The Iraqi Refugee Processing Program. In FY 2008, NTC-P processed 1,463 refugee applicants in three different countries.

Additionally, NTC-P has committed to continue to work with U.S. Citizenship and Immigration Services (USCIS) and the Department of State (DOS) for FY 2009 and FY 2010 circuit rides. NTC-P currently utilizes the Document Assessment Tool program at selected ports to assist in the interception of fraudulent documents. Based on the success of the pilot, there are plans to expand the DAT Program to additional ports of entry.

The Interagency Border Inspection System, which became active at all airports of entry on June 1, 2008 and at all seaports on January 25, 2009, has been linked to the Interpol's Stolen and Lost Travel Document (SLTD) database since 2007. NTC-P continues its support for sharing SLTD information. In FY 2008, 39 stolen or lost travel documents were discovered.

NTC-P will continue to participate in information sharing initiatives with our global partners such as the United Kingdom and Canada. In addition, NTC expanded the degree to which it monitors public health issues and liaises with the Center for Disease Control and Department of Health and Human Services.

In the cargo arena, the NTC-Cargo (NTC-C) provides 24/7 support for the Container Security Initiative (CSI) by performing bill review and research. NTC-C's daily responsibility increased from six to ten CSI ports in FY 2008. Due to CSI staffing shortages overseas, NTC-C will take on additional CSI daily support in FY 2009.

NTC-C also supports the Secure Freight Initiative (SFI) remote inspections in Qasim, Pakistan. This operation developed from a limited pilot where 40 containers were examined weekly to a 24/7 operation examining 800-900 containers per week. The NTC-C staff analyze and evaluate

data transmitted from Qasim, Pakistan, and make informed, risk based decisions on whether to inspect U.S. destined commercial cargo.

NTC-C has undertaken a number of special cargo targeting initiatives such as research on subjects of interest, narcotics trafficking, and trade and agriculture violations. NTC-C targeting efforts for FY 2008 resulted in 353 seizures worth in excess of \$430 million consisting of illicit drugs, counterfeit merchandise, and licensable export commodities

Impact on Performance (Relationship of Increase to Strategic Goals)

Analyze and Employ Information and Intelligence align to DHS Strategic Goal: Protecting our Nation from Dangerous People and Goods; CBP Strategic Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel; and Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology and personnel.

This initiative will help CBP improve upon its capabilities to provide critical information regarding prospective passengers and cargo entering the U.S. CBP's challenge is to continue to provide timely and accurate information while its workload increases. CBP's screening capabilities – and U.S. security – depend on CBP's ability to gather, analyze, and disseminate useful and timely information. To improve its ability to identify and target terrorists, CBP needs additional data points. Without this information, it will become increasingly difficult to detect or deter dangerous people intending us harm from entering the country.

The NTC (both Passenger and Cargo) is a 24/7 operation providing research and support for CBP antiterrorism efforts at foreign and domestic ports of entry. NTC research and intelligence gathering provides real time tactical and strategic targets for CBPOs in the field. This request allows the NTC to increase the daily support for CBP's antiterrorism operations; inadequate staffing will limit NTC support for these activities, adversely affecting their effectiveness in the war against terror.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, and agricultural inspections and regulatory activities related to plant and animal imports; purchase and lease of up to ~~4,500~~[6,300] (~~4,000~~ [3,300] for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [~~\$7,603,206,000~~]~~\$7,623,068,000~~, of which [~~\$3,154,000~~]~~\$3,226,000~~ shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$45,000 shall be for official reception and representation expenses; of which not less than [~~\$271,679,000~~]~~\$309,629,000~~ shall be for Air and Marine Operations; [of which \$4,500,000 shall be for the 2010 Olympics Coordination Center, of which not to exceed \$2,000,000 shall be available until September 30, 2010; of which \$2,000,000 shall be for Project SeaHawk;] of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), or any successor legislation, shall be derived from that account; [of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations]; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: Provided, That for fiscal year [2009]~~2010~~, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies. [Provided further, That no funding available under this heading may be obligated for the operation of the Analytical Framework for Intelligence Officers until the Commissioner of U.S. Customs and Border Protection certifies that this Framework complies with all applicable laws, including section 552a of title 5, United States Code, and other laws protecting privacy, and such certification is reviewed by the Inspector General of the Department of Homeland Security: Provided further, That the Commissioner shall submit to the Committees on Appropriations of the Senate and the House of Representatives the results of operational field testing of cargo container security devices in high risk trade lanes no later than 120 days after the date of enactment of this Act.] (Department of Homeland Security Appropriations Act, 2009.)

Headquarters Management and Administration

Headquarters Management and Administrative provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$445,816	\$400,945	\$415,879	\$14,934

Salaries and Benefits includes costs for 3,822 FTEs. The FY 2010 request includes increases of \$3,910,000 for pay annualization, \$6,014,000 for pay inflation, \$1,780,000 for annualization for integrity oversight, \$1,462,000 for annualization of OIOC intelligence and \$1,768,000 for the annualization of Customs Revenue positions.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$30,213	\$26,026	\$26,245	\$219

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes increases of \$78,000 for the annualization for integrity oversight, \$72,000 for the annualization of OIOC intelligence, and \$69,000 for annualization of Congressional add-on for customs revenue positions.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$1,883	\$4,185	\$3,713	(\$472)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request includes decreases of (\$116,000) for the annualization for integrity oversight and (\$356,000) for facilities consolidation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$192,793	\$213,115	\$0	(\$213,115)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes increases of \$206,000 for annualization for integrity oversight, \$210,000 for annualization of OIOC intelligence, \$164,000 for the annualization of Customs Revenue positions, and \$19,177,000 for realignment, and decreases of (\$232,872,000) for facilities consolidation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$2,561	\$4,176	\$0	(\$4,176)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes decreases of (\$252,000) for facilities consolidation, and (\$3,924,000) for realignment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$29,865	\$44,004	\$34,655	(\$9,349)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes increases of \$22,000 for annualization for integrity oversight, \$37,000 for the annualization of Customs Revenue positions and transfer of (\$9,408,000) for facilities consolidation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$7,196	\$6,188	\$6,188	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$20,782	\$29,821	\$29,821	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$269,848	\$258,864	\$189,757	(\$69,107)

Other Contractual Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes increases of \$162,000 for annualization for integrity oversight, decreases of (\$20,000) for the annualization of OIOC intelligence, (\$15,000) for the annualization of Customs Revenue positions, (\$29,000) for transfer for S1 travel, (\$55,678,000) for facilities consolidation, (\$15,051,000) for realignment, The FY 2010 request includes program increases of \$4,526,000 for cyber security. FY 2009 numbers reflect \$3,000,000 in carryover balances from FY 2008.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$49,281	\$49,844	\$89,880	\$40,036

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes increases of \$20,000 for annualization of Integrity Oversight positions, \$89,000 for the annualization of Customs and Revenue positions, and adjustment-to-base of \$1,278,000 for Working Capital Fund and \$38,650,000 for Data Center Migration.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$79,974	\$49,715	\$49,715	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request includes no change

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Research and Development	\$8	\$541	\$353	(\$188)

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2010 request non-recurs (\$62,000) for the integrity oversight positions, (\$20,000) for annualization of OIOC intelligence, and (\$106,000) for annualization of Congressional add-on for Customs revenue positions.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$455	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$27,639	\$38,529	\$34,529	(\$4,000)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request includes carryover balances of (\$4,000,000) from FY 2009. FY 2009 numbers reflect \$4,000,000 in carryover balances from FY 2008.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Subsistence & Support of Persons	\$12	\$22	\$22	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$39,046	\$30,258	\$30,243	(\$15)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes increases of \$16,000 for annualization for integrity oversight, \$4,000 for annualization of OIOC intelligence, \$3,000 for the annualization of Customs and Revenue positions and transfer of (\$38,000) for facilities consolidation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$100,526	\$122,498	\$106,851	(\$15,647)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes decreases of (\$1,044,000) for annualization for integrity oversight, (\$314,000) for annualization of OIOC intelligence, (\$303,000) for the annualization of Customs and Revenue positions, (\$9,038,000) for facilities consolidation and carryover balances of (\$5,423,639) from FY 2009. Program increases include \$476,000 for cyber security.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Land & Structures	\$5,187	\$202	\$0	(\$202)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2010 request includes decreases of (\$202,000) for realignment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Indemnity	\$1,906	\$2,649	\$2,649	\$0

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2010 request includes no change.

Inspections, Trade & Travel at the POE's

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP officers, Agricultural Specialists, and Imports Specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$1,623,538	\$1,651,887	\$1,844,643	\$192,756

Salaries and Benefits includes costs for 18,842 FTEs. The FY 2010 request includes an increase of \$16,073,000 for pay annualization and \$24,728,000 for pay inflation. Annualization increases of \$2,248,000 for Customs Revenue Positions, \$59,515,000 for CBPOs Land Ports of Entry, \$18,413,000 CBPOs Air Ports of Entry, \$7,047,000 for Agricultural Specialist, \$4,942,000 for WHTI, \$16,769,000 for RPM Staffing, \$12,280,000 for Passenger Screening and \$838,000 for Regulatory Program. Program increases of \$25,000,000 for Law Enforcement Retirement, \$5,110,000 for Import Safety and \$3,126,000 for Combating Southbound Firearms and Currency Smuggling. FY 2009 numbers reflect \$3,333,000 of FY 2008 carryover balance.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$27,005	\$17,535	\$18,897	\$1,362

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 include a non recur of \$500,000 for 2010 Olympics. Annualization increases of \$88,000 for Customs Revenue positions, \$1,093,000 for CBPOs Land Ports of Entry, \$337,000 for CBPOs Air Ports of Entry, \$4,000 for WHTI, \$163,000 for RPM staffing, \$68,000 for Passenger Screening, \$32,000 for Regulatory Attorneys, \$704,000 for API/PNR, \$256,000 for Import Safety, \$249,000 for Combating Southbound Firearms and Currency Smuggling and a decrease of \$410,000 for Agricultural Specialist. FY 2009 numbers reflect \$722,047 of FY 2008 carryover.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$5,548	\$4,657	\$4,786	\$129

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 request annualization increases of \$72,000 for CBPOs Land Ports of Entry, \$22,000 for CBPOs Air Ports of Entry, \$11,000 for Agricultural Specialist, \$7,000 for WHTI, \$15,000 for RPM staffing, \$16,000 for Passenger Screening, \$23,000 for Import Safety, \$30,000 for Combating Southbound Firearms and Currency Smuggling and a decrease of \$1,000 for Regulatory Attorneys. FY 2009 numbers reflect \$65,700 of FY 2008 carryover.

International Cargo Screening

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

The SFI builds on the operational pillars of the DHS Container Security Initiative (CSI) and the Department of Energy Mega ports initiative to maximize radiological and nuclear screening of U.S. bound maritime containers in foreign ports of departure. It merges data from a next generation risk assessment screening program and an overseas integrated detection network with existing and new information regarding maritime containers transiting through the supply chain in order to create detailed records for CBP's risk management process to target maritime containers that pose a threat.

Other International Programs

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

In FY 2010, CBP will pursue international partnerships to share best practices, exchange information and promote the facilitation of secure travel and trade; actively support implementation of the World Customs Organization framework; and implement initiatives to support an international immigration strategy to identify and interdict high risk travelers.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$8,964	\$7,949	\$8,145	\$196

Salaries and Benefits includes costs for 101 FTEs. The FY 2010 request includes an increase of \$119,000 for pay inflation and \$77,000 for pay annualization.

C-TPAT (formerly C-TPAT/FAST/NEXUS/SENTRI)

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised nor diverted by terrorists or their accomplices.

Summary Justification and Explanation of Changes

Trusted Traveler Program

CBP requests to change the FAST/NEXUS/SENTRI PPA title to the Trusted Traveler Program (TTP) to provide a better representation of the program. CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk "trusted travelers" arriving into the United States by allowing CBP Officers additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; responds to congressional and industry inquiries of trusted traveler program related matters, and etc.

Currently, CBP TTP has four programs – NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and Global Entry.

Summary Justification and Explanation of Changes

Inspection and Detection Technology

As trade increases, CBP's reliance on Non-Intrusive Inspection (NII) technology to secure the borders becomes increasingly critical. In conjunction with CBP's many other initiatives (C-TPAT, Automated Targeting System (ATS), National Targeting Center (NTC), Container Security Initiative (CSI), etc.), NII allows us to work smarter. An adversary can defeat any single sensor or device, and therefore, CBP does not rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon or weapons grade material will be detected. In addition, CBP uses NII technology to detect and interdict narcotics, currency, and other contraband secreted in large containers and commercial shipments.

NII technology has been the cornerstone of CBP's multi-layered strategy. Technologies deployed to our nation's land, sea, and airports of entry include large-scale X-ray and gamma-imaging systems, as well as a variety of portable and handheld technologies, to include our recent focus on radiation detection technology. NII technologies are viewed as force multipliers that enable us to screen or examine a larger portion of the stream of commercial traffic while facilitating the flow of legitimate trade, cargo and passengers.

Summary Justification and Explanation of Changes

Systems for Targeting

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection.

The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBP's targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$1,328	\$374	\$384	\$10

National Targeting Center

The priority mission of the U.S. Customs and Border Protection's National Targeting Center (NTC) is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. NTC is primarily staffed by CBP officers and Field Analysis Specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including Container Security Initiative personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Training at the Ports of Entry

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

Border Security and Control Between the POEs

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for "Border Security and Control between the Ports of Entry." The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities.

Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Strategic issues and challenges evolve around integrating unique and broader enforcement authorities working to uncover systemic vulnerabilities that pose a threat to the Nation and its economy and work to eliminate vulnerabilities as quickly as possible. Through an array of investigative processes in the areas of smuggling, finance and national security, Border Patrol's OI is challenged to identify the people, materials, & funding essential to sustaining terrorist threats and criminal enterprises, and to disrupt and dismantle their operations.

The requested amount will help address Border Patrol's strategic challenges of disrupting terrorist threats and preventing potential terrorists and immigration violators from entering the country. More effective immigration enforcement will contribute to enhanced national security as well as greater deterrence.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$2,035,382	\$2,460,007	\$2,999,172	\$539,165

Salaries and Benefits include costs for 22,774 FTEs. The FY10 request includes increases of \$23,985,000 for pay annualization, \$36,900,000 for pay inflation, \$337,982,000 for annualization of FY08 3000 agents, \$1,045,000 for annualization of FY08 259 mission support positions, decrease of \$23,900,000 for FY08 relocations, increases of \$176,540,000 for annualization of FY09 agents and support, \$923,000 for annualization of construction positions, \$2,832,000 for Combating Southbound Firearms and Currency Smuggling, and decrease of \$17,142,000 for FY 2010 PPA realignment for A&M salaries from BP.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$60,894	\$118,277	\$92,660	(\$25,617)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes a decrease of \$25,575,000 for non-recurring relocation costs, increase of \$874,000 for annualization of FY08 3000 agents, decrease of \$321,000 for annualization of FY08 259 mission support positions, decrease of \$592,000 for annualization of FY09 agents and support, increase of \$46,000 for annualization of construction positions, increase of \$323,000 for Combating Southbound Firearms and Currency Smuggling and decrease of \$372,000 for FY10 realignment for A&M salaries.

Training between the Ports of Entry

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

Summary Justification and Explanation of Changes

Air and Marine Operations - Salaries

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change

GSA rent	\$2,935	\$1,264	\$0	(\$1,264)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes a transfer of \$2,496,000 for facilities consolidation, an increase of \$985,000 for non-pay annualization for marine enforcement units, and increase of \$885,000 to support a program increase of 144 new positions, a decrease of \$885,000 for facilities consolidation related to the 144 new positions, and a decrease of \$4,745,000 for facilities consolidation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$676	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$63	\$3,675	\$4,265	\$590

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes an increase of \$254,000 for A&M enforcement units annualization and an increase of \$336,000 for A&M strategic plan (144 positions).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$15	\$18	\$29	\$11

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request includes an increase of \$11,000 for A&M strategic plan (144 positions).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$2,372	\$0	\$0	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2006 request includes an increase of \$217,000 in non-pay inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$10,197	\$9,125	\$6,946	(\$2,179)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes a non-pay increases of \$193,000 for A&M marine enforcement units annualization, increase of \$209,000 for A&M strategic plan (144 positions), increase of \$300,000 for FY1- PPA realignment for A&M salaries and a decrease of \$2,496,000 for realignment.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$2,556	\$516	\$3,743	\$3,227

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes an increase of \$192,000 for A&M enforcement units annualization and an increase of \$3,035,000 for A&M strategic plan (144 positions).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of Facilities	(\$93)	\$0	\$0	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Research and Development	\$0	\$1,711	\$2,039	\$328

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2006 request includes an

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$24	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2006 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$2,712	\$2,000	\$0	(\$2,000)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$9,605	\$6,148	\$7,377	\$1,229

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes a decrease of \$152,000 for A&M enforcement units annualization, increase of \$1,146,000 A&M strategic plan (144 positions) and an increase of \$235,000 for FY10 PPA realignment for A&M salaries.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$24,624	\$32,704	\$29,049	(\$3,655)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes a decrease of \$5232,000 for non-pay annualization and increase of \$3,029,000 to support a program increase of 144 new positions, and \$368,000 increase for the 39 FTE reprogrammmmed from Office, Border Patrol.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

To further the U.S. Customs and Border Protection (CBP) mission of securing our nation's borders while facilitating legitimate trade, CBP is in the midst of modernizing its information systems. The foremost automation effort is the phased implementation of the Automated Commercial Environment (ACE), which is being developed and deployed in increments and will replace the current trade management system, the Automated Commercial System (ACS). ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information. Critical Operations Protection and Processing Support (COPPS) provides nearly all the CBP Information Technology (IT) infrastructure to operate and maintain mission-critical IT systems requisite to securing the borders while facilitating legitimate trade and travel. TECS provides critical border enforcement and Port of Entry (POE) processing capabilities. TECS Modernization is a multi-year project that will enhance CBP's mission capabilities by developing and deploying a modernized TECS. The Terrorism Prevention Systems Enhancements (TPSE) initiative focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations.

B. Budget Activities:

Automated Commercial Environment/ International Trade Data System (ITDS)

CBP is modernizing its business processes, information technology systems, and infrastructure to provide the functionality needed to support its mission and sustain its global leadership position in the years to come. ACE is CBP's response to the explosive growth in trade volume and will supplement and/or replace the Automated Export System (AES) and ACS. Within DHS, ACE is a tool to combat illegal activities and terrorist threats to the United States. In addition, ACE satisfies numerous legislative mandates that could not otherwise be achieved. The International Trade Data System is intended to be a secure, integrated, government-wide vehicle for the electronic collection, use, and dissemination of trade and transportation data. To become a single window to the trade, ITDS will require the participation of approximately 79 federal entities.

Critical Operations Protection & Processing Support

COPPS provides the majority of support for the CBP IT infrastructure. The information technology systems supported by CBP's IT infrastructure allow for implementation of the unified border policy by providing efficient and effective sharing of information amongst the trade community and law enforcement agencies. COPPS supports the operations of CBP officers and Border Patrol agents at and between the POEs, and provides for coordinated targeting, command, control, and communications capabilities across CBP. IT systems are vital tools used by CBP and other Federal agencies to defend our borders. They assist CBP officers and Border Patrol agents in identifying potential catastrophic threats, including terrorists, weapons of mass destruction, and biological agents, as they attempt to enter the country, while simultaneously facilitating legitimate trade and travel.

COPPS serves as the backbone for mission critical trade and law enforcement systems. The major mission critical systems, applications, and programs supported include: ACE/ITDS; ACS; TECS; AES; Advanced Passenger Information System (APIS) and e-APIS; Free and Secure Trade (FAST); Seized Asset and Case Tracking System (SEACATS); CBP's Financial and Human Resources Management Systems; Fingerprinting and Identification System (IDENT); the Integrated Automated Identification System (IAFIS); the Arrival Departure Information System (ADIS); the Port Radiation Identification Detection and Evaluation (PRIDE) system; the Enterprise Data Warehouse system; the Border Patrol Enforcement Tracking System (BPETS); the Automated Targeting System (ATS); Container Security Initiative (CSI); and the Secure Freight Initiative (SFI). These systems directly support CBP's mission. One of the other systems supported by the IT infrastructure provided by COPPS outside of CBP is US-VISIT.

Funded within the COPPS PPA is TECS, a key border enforcement system for CBP and DHS that plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other federal agencies. The current TECS system is over 20 years old and uses technology that will be increasingly difficult to support in the future. Maintaining TECS functionality is critical to CBP's border enforcement mission. The modernization program will replace the mainframe components of TECS with a sustainable technical architecture including modern databases and graphical user interfaces.

Also funded within the COPPS PPA is TPSE. In FY 2008, CBP embarked on an initiative to enhance critical infrastructure, monitoring capabilities, networking and computing capabilities to support our worldwide passenger responsibilities such as facilitating electronic travel authorization, pre-clearance of all passengers coming into all POEs and analyzing passenger data for terrorist and threat analysis. CBP's current infrastructure contains many single points of failure and outdated components that have caused repeat problems at POEs. This initiative is intended to ensure 24/7 systems availability, network redundancy, and monitoring in the Passenger and Targeting areas. The TPSE infrastructure enhancements will be implemented at the CBP National Data Center, the DHS Stennis Data Center and targeted POEs. TPSE will enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity

**Department of Homeland Security
U.S. Customs and Border Protection
Automation Modernization**

Summary of FY 2010 Budget Estimates by Program/Project Activity
(Dollars in Thousands)

Program/Project Activity	FY 2008 Actual		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
ACE/ITDS	62	388,445	62	316,851	62	267,960	---	(48,891)	---	---	---	(48,891)
COPPS	1	135,545	1	194,483	1	194,485	---	2	---	---	---	2
Net, Enacted Appropriations and Budget Estimates	63	\$523,990	63	\$511,334	63	\$462,445	---	(\$48,889)	---	\$0	---	(48,889)

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Automation Modernization
Program Performance Justification
(Dollars in thousands)

PPA: ACE/ITDS

	Perm. Pos.	FTE	Amount
2008 Actual	62	62	388,445
2009 Enacted	62	62	316,851
2010 Adjustment to Base	---	---	(48,891)
2010 Current Services	62	62	267,960
2010 Program Change	---	---	0
2010 Request	62	62	267,960
Total Change 2009-2010	---	---	(48,891)

CBP requests \$268.0 million for ACE/ITDS. This is a decrease of \$48.9 million from FY 2009. The request includes:

- increase of \$0.09 million for pay annualization and \$0.12 million for pay inflation
- decrease of \$49.10 million for ACE/ITDS non-recurs

CURRENT SERVICES PROGRAM DESCRIPTION:

ACE is the U.S. trade processing system designed to consolidate and automate import processing. Automating time-consuming and labor-intensive transactions will allow goods through ports and onto markets faster and at lower cost thus simplifying dealings between CBP, the trade community, and other government agencies. CBP personnel will have automated tools and better information to decide - before a shipment reaches U.S. borders - what cargo should be targeted because it poses a potential risk, and what cargo can be expedited because it complies with U.S. laws.

ACE benefits include:

- Enhancing border security
- Expediting trade flow
- Increasing access to on-line data
- Simplifying and expediting cargo release
- Replacing transaction and paper-based processing with a national account-based processing
- Providing periodic monthly payment ability and account statements

A description of each release and associated performance data is provided below.

ACE Foundation (Release 1): COMPLETE

The ACE Foundation (Release 1) provided the first infrastructure investment for the deployment platform for ACE and established security measures that are consistent across ACE.

Account Creation (Release 2): COMPLETE

The ACE Account Creation (Release 2) provided CBP Account Managers and selected importers controlled access to information (such as the account's trade activity), and facilitated collaboration and communication among the various groups. This release laid the initial foundation for an account management structure that will eventually encompass all segments of the trade community and become a principal tool for CBP officers to assess national compliance and supply chain data. This tool continues to roll out to additional users, and has altered the methodology CBP employs to research and analyze supply chain information and achieve improvements in trade compliance. As of FY 2008, a total of 8,862 CBP personnel and 14,868 ACE accounts have access to the ACE Secure Data Portal.

Periodic Payment (Release 3): COMPLETE

The ACE Periodic Payment (Release 3) expanded the account management framework to a larger trade audience such as brokers, carriers, and CBP officers overseeing those areas. Monthly payment and statement capabilities are available within the account-based system. Duties and fees no longer have to be paid on a transaction-per-transaction basis, and companies can more easily track their activities through customized account views and reports. ACE periodic payment users have the ability to wait until the 15th working day of the next month to pay for shipments released during the previous calendar month. This provides a potentially significant cash flow benefit. During the month of February 2009, more than 52 percent of duties and fees were collected using the ACE periodic monthly statement process. Since its inception in 2004, the ACE periodic monthly statement process has collected more than \$32 billion in duties and fees via the ACE monthly statement process.

Screening Foundation (Release S1): COMPLETE

The ACE Screening Foundation (Drop S1) established the long-term foundation for modernizing screening and targeting. It uses a business rules engine to enhance the screening capabilities for all manifest and entry transactions. The business rules engine provides two significant benefits. First, it allows end users to define and maintain rules and data sources instantaneously without the assistance of a technical expert. Second, end-users are able to develop rules, perform impact assessments, and request approval for rule deployment. New rules can be added without software changes.

Additionally this release established a centralized standard data store for all screening and targeting criteria and results, and facilitated the ability to determine the reasons for an exam. It enhanced existing capability by enabling management of screening and targeting criteria by the business end-user using any combination of data related to manifest and entry processing that can be derived from existing data.

Targeting Foundation (Release S2): COMPLETE

Targeting Foundation (Drop S2) established the targeting platform and foundation for CBP. Just as Screening Foundation (S1) established the foundation for screening, the targeting platform established the merged, service-oriented architectural basis upon which analytical capabilities are deployed.

Targeting Foundation (S2) modernized the core workflow of the National Targeting Center (NTC). Through the targeting platform, the NTC has the ability to initiate activities, foster collaboration among analysts, and access past activity logs for additional intelligence. A core set of analytical capabilities within the targeting platform enables CBP analysts to develop actionable intelligence. Analysts have the ability to conduct searches of disparate data, both structured and unstructured. They also have the ability to research and collaborate on a real-time basis with other analysts. Sophisticated text analytics aid the analysts in finding relevant facts and discovering new relationships in the data. Analysts may annotate, store, and classify their findings for reference by others.

e-Manifest: Trucks (Release 4): COMPLETE

The ACE e-Manifest: Trucks (Release 4) provides an electronic truck manifest, a primary CBP officer interface, and expedited importation processing. The CBP officer interface consolidates more than seven separate cargo release systems to provide CBP officers with a comprehensive view of enforcement and transaction history data to enhance enforcement capabilities and simultaneously expedite the movement of trade. The electronic manifest provides one method to fulfill the mandate from the Trade Act of 2002 to provide advance cargo data for truck shipments.

e-Manifest: Trucks provides for the automated manifest processes to determine the admissibility of cargo, conveyance, and equipment arriving in the United States. The release interfaces with the Automated Targeting System (ATS) to provide screening data to CBP primary officers to target high-risk transactions. This release includes the provisions for the Federal Motor Carrier Safety Administration (the first participating government agency) to manage truck safety issues at U.S. land borders.

Trucks (Release 4) functionality: All 99 U.S. land border ports of entry are now equipped to accept and process e-Manifests. E-Manifests represent 99 percent of all manifests filed and can be processed 37 percent faster than the traditional paper manifest.

Advanced Targeting Capabilities (Release S3): COMPLETE

Advanced Targeting Capabilities (Release S3) extend the targeting platform by adding new tools and models that allow more robust analysis of data to support extended targeting. This release provides opportunities for viewing the data in new ways and enhancing the ability to target outlying data. It also implements metrics and compliance measures that provide insight into and feedback on the operational and technical targeting effectiveness.

Entry Summary, Accounts, and Revenue (ESAR) (Release 5)

ESAR provides enhanced accounts management functions, a single source for master data, and integrated account-based, financial and entry summary processing. This release builds upon ACE Account Creation (Release 2) through e-Manifest: Trucks (Release 4) by adding functionality to existing accounts management, periodic payment, ledger, and screening processing. The functionality for Release 5 is divided into two drops: ESAR Master Data & Enhanced Accounts and ESAR Entry Summary and Revenue.

- **ESAR: Master Data and Enhanced Accounts (Drop A1): COMPLETE**

Master Data and Enhanced Accounts (Drop A1) functionality includes enhanced account creation and maintenance using SAP Customer Relationship Management (CRM) and a portal for data management and edit checking. This release expands on prior ACE releases by adding most account types and corresponding system master data. Release 5 expands the current importer, broker, and carrier accounts management activities to treat any entity doing business with CBP as an account.

A key aspect of Master Data and Enhanced Accounts (Drop A1) is the establishment of ACE as the lead system for all specified master data elements required for CBP systems processing. This means that the creation and maintenance of master data elements and related reference files will originate in ACE and be distributed to other CBP systems.

- **ESAR: Entry Summary and Revenue (Drop A2): FY 2012**

Entry Summary and Revenue (Drop A2) will use integrated components to deliver the entry summary business process through liquidation: specifically electronic refund processing, debt management, centralized bond processing (including bond sufficiency checks) full accounts receivable sub-ledger processing, and Web-based collection processing via data exchange with pay.gov. Entry Summary and Revenue (Drop A2) will also provide integration between the ACE subsidiary ledger and the CBP general ledger to include financial information for all ACE accounts.

Entry Summary and Revenue (Drop A2) will expand ACE to encompass entry summary; liquidation/closeout processing; reconciliation processing; calculation of duties, taxes and fees; PGA interfaces; prior disclosure; post summary corrections; bond application/storage; bond sufficiency; team review; protest; CBP-issued licenses/permits/certificates and other documentation; accounts receivable; collections and receipts; and refunds.

E-Manifest: All Modes and Cargo Release (Release 6 – dates are provided in the following drop levels)

E-Manifest: All Modes and Cargo Release (Release 6) establishes the common repository for a multi-modal manifest (MMM) application and automates cargo release processing. This release will bring existing applications into the shared MMM environment and support CBP agreements such as the Container Security Initiative and the Security and Prosperity Partnership with Canada and Mexico.

The MMM environment will bring all modes of transportation (sea, rail, air, truck, and pipeline) into a common processing environment and extend Web portal access on import and export transactions for CBP external trade partners and PGA users. The MMM environment will also enfranchise the custodial community of port authorities, ocean terminal operators, warehouse proprietors, foreign trade zone (FTZ) operators, and others associated with the cargo control, materials handling and 3rd party logistics of international transportation and commerce.

In addition to the cargo control transportation manifest, the Automated Broker Interface (ABI) that governs the cargo release process will be modernized to operate in the new MMM environment. The ABI is an integral part of ACS that permits qualified participants to file import data electronically with Customs and expedites the release of merchandise for the trade community. Stand-alone applications

such as the Vessel Management System (VMS) and the Mail Entry Writing System (MEWS) will be modernized and enfolded into the wider MMM environment creating a coherent cargo control and release application environment.

E-Manifest: Rail and Sea Manifest (Drop M1): FY 2009

E-Manifest: Rail and Sea (Drop M1) will provide a common repository user interface, shared cargo control software, and an account-based trade interface with web portal access for the rail and sea modes of transportation within the new MMM environment.

Ocean and rail manifest will be modernized for the trade community and for the CBP officer. The entry filer will continue to submit data through the ABI gateway into the cargo release system in ACS. After acceptance, the entry data will be processed through ATS for risk assessment. After screening, the results of processing will be sent into the ACE cargo control component of MMM from which status notifications will be sent to the rail and sea carriers.

E-Manifest: Rail and Sea (Drop M1) will also deliver to the CBP officer the capability to view a rail, sea, or truck shipment at the bill of lading level along with the entry data and associated screening and targeting results via the ACE Secure Data Portal. The ACE Secure Data Portal will provide a consolidated view of manifest, entry and reference file information that will expedite pre-arrival processing and provide to the CBP Officer the capability to place holds, remove holds and electronically complete the cargo processing in advance of actual conveyance arrival.

E-Manifest: Air Manifest & Cargo Release (Drop M2): FY 2011

E-Manifest: Air Manifest & Cargo Release (Drop M2) will modernize Air Manifest and Cargo Release. For the air mode of transportation, this drop of ACE functionality will bring all of the functionality brought to the rail and sea modes as noted above plus enhanced split shipment bill of lading handling and other enhancements. E-Manifest: Air Manifest & Cargo Release (Drop M2) will result in the truck, rail, ocean, and air modes of transportation sharing a common repository. To the external trade partner, the Web portal will provide access to their carrier accounts and a true MMM environment for the four main categories of transportation providers that interchange cargo as it moves through the international supply chain network en route to, within, or as it is being exported from the United States.

E-Manifest: Air Manifest & Cargo Release (Drop M2) will also deliver to the CBP officer the capability to view a rail, sea, truck and air shipment at the bill of lading level along with the related entry data and the associated results of the screening and targeting via the ACE Secure Data Portal. The portal will provide a consolidated view of the manifest, entry and reference file information that will expedite pre-arrival processing. This will provide to the CBP officer the capability to place holds, remove holds and electronically complete the cargo processing for these shipments in advance of actual conveyance arrival.

E-Manifest: Exports and Mail Entry Writing System (MEWS) (Drop M3): FY 2012

E-Manifest: MEWS (Drop M3) will bring export cargo processing into the MMM environment, providing export manifest reporting capabilities for truck, sea, rail, and air. One significant difference from the previous drops is that there is no 'entry' or Cargo Release processing on export shipments since export goods are leaving the United States (no duty or tax is being collected).

E-Manifest: MEWS (Drop M3) will also include the modernization of MEWS. The MEWS data will be made available to screening and targeting for risk assessment and criteria screening to enhance the CBP ability to target, select, and intercept injurious shipments entering the country via international mail.

Exports and Cargo Control (Release 7 - dates are provided in the following drop levels)

Exports and Cargo Control (Release 7) completes the Account Management, Revenue, Manifest and Release, and Export Processes. This release will include ESAR: Drawback, Enhanced Protest, and Import Activity Summary Statement (IASS, Drop A3) and e-Manifest: Custodial Entities, Pipelines, and Batch Processes (Drop M4).

ESAR: Drawback, Protest and Import Activity Summary Statement (Drop A3): FY 2012

This drop of ACE functionality will include Drawback, IASS, and Enhanced Protest. The implementation of the IASS will constitute a major change to the current commercial process for CBP, PGAs, and the trade community. There will be an impact to the existing CBP and PGA users who will utilize the expanded capabilities. However, most users will already be using ACE, so familiarity with the form and feel of the system will allow rapid assimilation of new functionality with only limited training.

E-Manifest: Custodial Entities and Pipelines (Drop M4): FY 2013

E-Manifest: Custodial Entities and Pipelines (Drop M4) will bring the custodial cargo control partners (terminal operators, ocean/air port authorities, container stations, warehouses) of the international transportation providers and entry filers into the consolidated MMM environment, along with the final mode of transportation, the international pipeline operators.

The custodial partners are the trusted trade partners that have physical custody of imported merchandise prior to delivery authorization of the imported goods, or have physical possession of goods subject to export control regulations prior to the actual departure of those goods from the United States. These constitute the custodial community within the MMM operational environment.

In addition, this drop of ACE functionality will automate the declaration and cargo control procedures governing import and export cargo movements via pipelines. Data related to pipeline importations will be provided to screening and targeting for risk assessment and the CBP field officer will have the ability to view screening and targeting results for pipeline importations along with rail, sea, truck, air shipments and cargo release (entry) data.

International Trade Data System (ITDS) is intended to be a secure, integrated, government-wide vehicle for the electronic collection, use, and dissemination of trade and transportation data. To become a single window to the trade, ITDS will require the participation of approximately 79 Federal entities. ITDS interagency coordination efforts have remained focused on deepening existing relationships with the 46 ITDS Participating Government Agencies (PGAs), identifying the business requirements of these PGAs, and integrating these requirements through the ACE development process. As a result of ongoing training efforts, there are now more than 500 ACE Secure Data Portal end users from 27 PGAs. The Office of Management and Budget (OMB) has designated CBP as the managing partner for the ITDS E-Government initiative. The managing partner is responsible for assessing the status of the milestones defined in each PGA's ITDS integration plan as defined in the

September 28, 2007, memorandum from DHS, to CIOs and Senior Executives designated to support agency use of ITDS. CBP will track the 10 milestones for each agency and report results to the OMB Portfolio Manager.

PPA: COPPS

	Perm. Pos.	FTE	Amount
2008 Actual	1	1	135,545
2009 Enacted	1	1	194,483
2010 Adjustment to Base	---	---	2
2010 Current Services	1	1	194,485
2010 Program Change	---	---	0
2010 Request	1	1	194,485
Total Change 2009-2010	---	---	2

CBP requests \$194.485 million for COPPS. This is an increase of \$0.002 million from FY 2009. The request includes:

- increase of \$0.001 million for pay annualization and \$0.001 million for pay inflation

CURRENT SERVICES PROGRAM DESCRIPTION:

Critical Operations Protection and Processing Support (COPPS) supports the CBP IT infrastructure. The systems supported by CBP's IT infrastructure allow for a unified border presence and provides for more efficient and effective sharing of information and images amongst trade and law enforcement agencies. The IT systems are vital tools that CBP and other federal agencies use to defend our borders and support our Ports of Entry. The IT systems assist CBP in identifying potential catastrophic threats, including terrorists, weapons of mass destruction, and biological agents, as they attempt to enter the country. These IT systems provide the means for enforcing the U.S. criminal and trade laws and for collecting in excess of \$30 billion in revenue associated with international trade and commerce.

CBP facilitates trade growth, economic development, and the efficient processing of international travelers through the use of comprehensive, integrated surveillance, detection, scientific, forensic, and information systems technology. COPPS is the backbone supporting all of these capabilities. The technology utilized within CBP's infrastructure enables CBP to continually improve the selectivity of low-risk and high-volume cargo, vehicles, and people, while expediting clearance processes. The infrastructure provides the basis for maintaining a sound trade management system that maximizes compliance with the law, and moves legitimate cargo efficiently; targets high risk shipments, secures our borders, facilitates movement of international travel, protects the public from contraband, and maintains a strong support structure to achieve desired business results for both CBP and stakeholders.

COPPS provides networks, voice communications, data center, Technical Support Center (help desk), and e-mail. COPPS serves as the backbone for mission critical trade and law enforcement systems. The major mission critical systems, applications, and programs supported include ACE/ITDS; ACS; TECS; AES; Advanced Passenger Information System (APIS) and e-APIS; Free and Secure Trade (FAST); Seized Asset and Case Tracking System (SEACATS); CBP's Financial and Human Resources Management Systems; Fingerprinting and Identification System (IDENT); the Integrated Automated Identification System (IAFIS); the Arrival Departure Information System (ADIS); the Port

Radiation Identification Detection and Evaluation (PRIDE) system; the Enterprise Data Warehouse system; the Border Patrol Enforcement Tracking System (BPETS); the Automated Targeting System (ATS); Container Security Initiative (CSI); and the Secure Freight Initiative (SFI). These systems directly support CBP's mission. Many of these IT systems are funded by and described under other accounts but could not function without the basic IT infrastructure provided by COPPS. One of the other systems supported by the IT infrastructure provided by COPPS outside of CBP is US-VISIT.

Network and communications provided by COPPS include Blackberry servers, voice telephone (landline and cellular), audio/video conferencing, Internet, extranet and help desk and Value Added Network (VAN) connections. Communications also includes network bandwidth and fiber optic capabilities.

Hardware includes back up generators, scanners, hand held computers, a network operations center, LANs, WANs, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/application servers, modems, and VAN connections. Software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, Section 508 tools, testing tools, LAN/WAN administration tools, and other management tools.

The CBP National Data Center (NDC) houses the centralized infrastructure equipment supporting mission critical systems. Extensive connectivity and support facilities exist at the NDC, ranging from a large computer room and control center to back up power, storage, and generators. The primary technical environments for major applications are mainframe and UNIX environments. The mainframe systems run z/OS, CICS, DATACOM/DB, WebSphere, MQ Series, supporting applications written in Assembler, COBOL, and Java. The UNIX systems run Solaris OS, Oracle, MQ Series, and applications developed in C, C++, Linux, Windows and Java. The magnitude of the workload supported by the NDC is illustrated by the fact that the mainframes support over 100,000 users across government. The IT infrastructure currently supports over 61,000 users, full-time and other than full-time CBP staff. Additionally, CBP supports connectivity for more than 100 federal, state, local, international government agencies, and more than 3,000 commercial organizations. The infrastructure supports over 50,000 desktop workstations/PCs, 25,000 laptops, 11,500 network printers, 5,750 host printers, 700 domain controllers, more than 225 application servers (Microsoft/Intel based), 850 Novell Servers, four mainframes, 3,500 switches, and over 1,300 routers.

By keeping the IT infrastructure stable, available, and reliable, CBP greatly enhances the ability of CBP officers to make timely decisions and to take appropriate action in protecting our Nation's borders. CBP's infrastructure requirements continue to grow, both in response to greater DHS requirements and in response to the natural and beneficial growth of international trade and immigration. CBP's trade systems receive data from over 12,500 brokers, freight forwarders, and others representing the trade community. It is imperative that the infrastructure is augmented each year to accommodate this growth. Without the updated technology, CBP will not be able to keep up with demand and maintain acceptable response times. Software and hardware maintenance costs increase at an average rate of 15% per year. Critical system licenses include VERITAS, IBM, Tivoli, Mainframe support, Oracle, DB2, Fujitsu, and WebSphere MQ. Mainframe and UNIX DASD (direct access storage device) growth continues at an average rate of 15% per year.

FY 2008 accomplishments included support of approximately 61,000 CBP users (including CBP and contract staff), converting any additional CBP staff to Active Directory and Exchange, and the completion of the CBP migration to Windows XP. FISMA security control testing for 90% of CBP systems was completed. Satellites antennas were installed on buildings at each of the top 100 CBP Ports of Entry to provide network redundancy. The percentage of processor capacity used remained at the desirable rate of less than 80%. TECS was available to end users 99.8% of time and the network was available 99.9% of the time.

FY 2009 planned accomplishments include the continued support of 61,000 CBP users (including CBP and contract staff). CBP plans to complete enterprise-wide CBP Data Reference, Conceptual, Logical, and Physical data models. A baseline image of the latest Microsoft desktop operating system (Vista) is scheduled to be approved. Renewal of certification and accreditation (C&A) for systems with expiring C&A is also planned. The percentage of processor capacity used should remain at the desirable rate of less than 80%. TECS should be available to end users 98.7% of time and the network should be available 99.4% of the time. In addition, CBP plans to start updating the email system from MS Exchange 2003 to MS exchange 2007. Finally, CBP plans to deploy a journaling and archiving solution for email and single instance storage.

FY 2010 planned accomplishments include supporting additional CBP users including the increase in Border Patrol agents. CBP plans to complete enterprise-wide CBP Data Reference, Conceptual, Logical, and Physical data models. CBP will deploy the baseline image of the latest Microsoft desktop operating system (Vista) and continue the application of the Federal Desktop Core Computing (FDCC) to those new baseline imaged workstations and the existing legacy (Windows XP) workstations. Renewal of certification and accreditation (C&A) for systems with expiring C&A is also planned. The percentage of processor capacity used should remain at the desirable rate of less than 80%. TECS should be available to end users 98.7% of time and the network should be available 99.4% of the time. Finally, CBP plans to complete the email system update from MS exchange 2003 to MS exchange 2007.

TECS Modernization

TECS is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. CBP is collaborating with Immigration and Customs Enforcement (ICE) in the development of TECS Modernization.

TECS plays an essential role in the screening of travelers entering the US and in supporting the screening requirements of other federal agencies. TECS is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record “watch list” processing for DHS and other agencies. This includes maintenance of lookout records and vetting services against these records.
- Supports primary and secondary inspections at the POEs.
- Receives and processes passenger manifests from carriers.
- Supports over 70,000 users from over 20 federal agencies responsible for traveler processing, investigations, case management and intelligence.
- Provides entry/exit data to other systems/agencies.

- Provides a real time interface with Federal Bureau of Investigation's National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on line-queries of wants/warrants and criminal history records.
- Provides a real time interface to National Law Enforcement Telecommunications System (NLETS) for on-line queries of driver's licenses, vehicle registration and state wants/warrants from all 50 states and Canada.
- Processes over 2,000,000 transactions daily.
- Supports the case management solution for ICE investigations including functions such as Investigative Case Management, Money Laundering Tracking and Reporting, Telephone Analysis and other functionalities unique to the ICE Mission. Included within ICE's budget is funding to modify the portion of TECS that is unique to their mission.

Terrorism Prevention System Enhancements (TPSE)

In order to increase the continuity of Passenger systems to meet current operational mission requirements, OIT must make strategic investments to ensure the critical infrastructure services that enable continuity are improved to meet the mission demand. These services include extending our monitoring capabilities, improving our current data center infrastructure, services platforms to our continuity site. CBP OIT will implement and maintain a multi-tiered approach including:

- Establish the Passenger Continuity Team to advance the programs technology and human contingency planning.
- Migrate legacy systems to an advance replicated storage environment
- Establish a new Passenger Lightweight Directory Access Protocol (LDAP) services cluster to replace the legacy system
- Expand the current Web Services capabilities and establish redundancy in Stennis
- Create a mirrored virtual environment for legacy systems to allow continuous uninterrupted service between Stennis and NDC
- Establish continuity technologies to all remote management and automatic failover of systems
- Increase the network bandwidth redundancy account for new technology implemented and ensure mission success between Stennis and NDC
- Upgrade the current NDC LAN to allow additional traffic capacity for systems we migrate from their legacy hardware environments
- Establish advanced monitoring and fault detection systems in Stennis
- Improve remote management systems in Stennis and NDC to improve response time to system deficiencies
- Enable the mainframe environment at Stennis to an active/active state
- Eliminate legacy backup technology to improve the current recovery time for non-replicated systems
- Install the switch network in Stennis to allow these technologies to connect
- Determine continuity requirements for all Passenger offices
- Modernize the collection and maintenance of all Passenger lifecycle IT support documentation

ACE Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$6,000	\$8,123	\$8,330	\$207

Salaries and Benefits includes costs for 62 FTEs. The FY 2010 request includes an increase of \$122,000 for pay inflation, and a increase of \$85,000 for pay annualization.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$1,093	\$384	\$384	\$0

Provides for travel to and from the many localities where ACE is being deployed to provide support to the IT infrastructure, ACE application and for training of personnel. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
GSA rent	\$3	\$0	\$0	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	\$1,080	\$15,466	\$15,466	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$0	\$16,041	\$16,041	\$0

Provides for ACE support contracts and ACE system integrator support for requirements definition and design activities. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$215,141	\$228,079	\$178,981	(\$49,098)

Other Contractual Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes a program decrease of \$49,098,000 for non-recurs.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$2	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$65,279	\$25,799	\$25,799	\$0

Provides for all software and hardware maintenance costs associated with ACE. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$226	\$62	\$62	\$0

The FY 2010 request includes no change for ACE-related general office supplies. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Equipment	\$99,621	\$22,897	\$22,897	\$0

Provides for all capitalized and/or accountable software and hardware purchased to support ACE, as well as all system integrator labor to develop the ACE software. The FY 2010 request includes no change.

COPPS Mission Statement

The Critical Operations Protection & Processing Support (COPPS) mission is to consolidate all U.S. Customs and Border Protection (CBP) Information Technology (IT) infrastructure requirements together.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$99	\$101	\$103	\$2

Salaries and Benefits includes increase of \$1,000 for pay inflation, and \$1,000 for pay annualization.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Travel	\$77	\$351	\$351	\$0

Provides for travel to and from the many localities (over 1,000) where CBP maintains Information Technology (IT) systems, such as Ports of Entry, to provide support to the IT infrastructure, and for training of personnel. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA Rent	\$9	\$0	\$0	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$8	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$3,499	\$21,185	\$21,185	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	(\$9)	\$305	\$305	\$0

Acquisition of commercial services to support the CBP Information Technology (IT) infrastructure, including systems and LAN engineering, and enterprise-wide IT system security. The FY 2010 request includes no change.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$81,394	\$96,020	\$96,020	\$0

Acquisition of services to provide support related to the use of proprietary systems (e.g. for configuration management and e-mail) and network systems. The FY 2010 request includes no change.

	2,008	2,009	2,010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$5	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes no change.

	2,008	2,009	2,010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$30	\$0	\$0	\$0

Operation & maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request include no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$22,252	\$4,403	\$4,403	\$0

Contractors install, operate and maintain the CBP National Data Center's equipment (including mainframes, servers, printers, extensive communications equipment, and environmental controls) as well as that of the CBP IT networks, including voice communicate. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Subsistence & Support of Persons	\$2	\$0	\$0	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Supplies & materials	\$1,996	\$96	\$96	\$0

Enterprise licenses for large-scale database management systems, magnetic tapes for backing up data at the CBP National Data Centers, and general supplies such as printer toner and paper. The FY 2010 request includes no change.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Equipment	\$26,183	\$72,022	\$72,022	\$0

Acquisition of software licenses and IT hardware. Licenses include those for mainframe computer systems (including MIPs, Million Instructions per Second) WAN and LAN operating systems, desktop systems (such as Windows and Microsoft Office). The FY 2010 request includes no change.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Border Security, Fencing, Infrastructure, and Technology

I. Appropriation Overview

A. Mission Statement:

The DHS border security mission is to prevent dangerous and illegal people and things from entering the United States, including terrorists and instruments of terror. DHS created the Secure Border Initiative (SBI) to bring clarity of mission, effective coordination of DHS assets, and greater accountability to the work of DHS in securing the Nation's borders. SBI is the most far-reaching effort in United States history to gain control of its nearly 6,000 miles of international land border. Customs and Border Protection (CBP) is the lead agency within DHS for the development and deployment of SBI technology (called *SBI_{net}*) and tactical infrastructure to secure America's borders.

This appropriation provides continued funding for the SBI Program Offices tasked with developing and installing technology and tactical infrastructure solutions enabling a more effective and efficient method for controlling border security. Whereas the initial focus of SBI has been on serious vulnerabilities along the southwest border and between the official ports of entry (POE), increased attention is being given to the northern border to address needs and vulnerabilities there. More specifically, this request will be used to respond to the changing threat and operational needs by delivering enhanced border control capabilities and services to the operational user in the following major areas:

- **SBI_{net} Block 1 Deployments to Arizona.** Through *SBI_{net}*, CBP will continue to implement its initial technology solution, called Block 1, in Arizona. The solution consists of surveillance, detection, identification, classification, tracking, communications, and command and control capabilities that allow Border Patrol agents to efficiently detect, identify, classify, track, and resolve illegal incursions. The first two *SBI_{net}* operational deployments to Tucson Station and Ajo Station are currently underway. Following System Acceptance Test and Operational Test and Evaluation in early 2010, a production decision will be requested to acquire and complete the remaining Arizona Border Patrol Stations. FY 2010 funds will be used for Nogales, Sonoita, Naco, Douglas, and Willcox deployments and the laydown designs for the remaining Arizona deployments - Ajo-2, Casa Grande, and Yuma Sector, whose deployments are planned for FY 2011. Scheduled for completion in 2011, these deployments, when combined with personnel and tactical infrastructure, will contribute significantly towards the effective operational control across the entire Arizona border.
- **Other Technology Deployments.** Through *SBI_{net}*, CBP will continue to address operational gaps through proven technology capabilities, such as Mobile Surveillance System (MSS) units. These are mobile surveillance systems for detecting, identifying, classifying, and tracking

illegal incursions, thus providing the Border Patrol with the flexibility to rapidly fill gaps or augment the coverage of fixed surveillance assets.

- **P-25 Tactical Communications Deployments.** CBP has a critical need to modernize its tactical communications and move from a mixed analog/digital, leased circuit based architecture to an integrated internet protocol / quality of service-based digital network. FY 2010 funds will be used to procure and deploy additional P-25 systems to the southwest border, which will enable improved operations and agent safety.
- **Northern Border Demonstration Project.** As an area of increased concentration, through *SBI*net, CBP is in the process of demonstrating technology for addressing the needs and vulnerabilities of the northern border maritime (river / lake), cold weather environment, as well as deploying proven, stand-alone technology that provides immediate operational benefit. FY 2010 funds will be used to continue these demonstrations and deployments with an emphasis on learning how best to integrate various sensors, organizations involved in border security, and mission operations to optimize border security in this challenging environment. Lessons learned will inform the operational and system requirements for a technology solution tailored for follow-on deployments to the northern border.
- **Tactical Infrastructure (TI).** Through TI, CBP is in the process of successfully completing the construction of approximately 670 miles of pedestrian and vehicle fence along the southwest border – a significant accomplishment -- and shift attention to other priorities that contribute to effective border control. These efforts include fence gates, bridges, access roads, lighting, low water crossings, and brush clearing. FY 2010 funds will be used for similar projects based on operational priorities, as well as construct additional miles of pedestrian and vehicle fence required to meet mission needs.

Effective Control

The primary goal of the Department's strategy to secure our Nation's borders is Effective Control as described in the National Border Patrol Strategy. Effective Control is achieved when the Office of Border Patrol (OBP) determines that agents deployed in any given area are able to:

- *Detect* an illegal entry into the United States;
- *Identify and classify* the threat level associated with that illegal entry;
- *Respond* to the area of the illegal entry; and
- Bring the situation to a law enforcement *resolution* (e.g. arrest).

SBI Capabilities Enabling Effective Control of the Border

Effective Control is established through the proper mix of technology, personnel, and tactical infrastructure (fencing and roads) that will allow CBP to confront and appropriately resolve illegal cross border activity. The mix of these three components will vary depending on the challenges of the focus area.

- Technology is the baseline requirement for any area of operations. It allows us to detect the entries and to identify and classify the threat;
- Personnel provide the response to confront illegal cross border activity; and
- Tactical Infrastructure supports the response by providing access, and also extends response time by detering or slowing the ability to easily cross the border and escape.

The Department's strategy is to Gain, Maintain, and Expand Effective Control.

- Gain: Deploy resources based on known threats, vulnerability, and risk;
- Maintain: Sustain effective control once gained and seek efficiencies to allow us to hold the area with fewer resources; and
- Expand: As we gain control of any given area, activity will be displaced to other areas of operations. We will adjust deployment of resources to expand effective control to areas where there is new or increased activity.

While additional resources, tactical infrastructure, and technology will continue contributing to enhancing effective control of the Nation's borders, it is important to emphasize that effective control of a specific segment is not necessarily gained through the deployment of just one tool or resource. In most cases, fencing will be complemented with a technology component and enforcement personnel. In some cases, such as pedestrian fencing in urban areas, sensors and cameras will be installed to alert agents to any attempted breaches of the fencing. In more rural areas where vehicle fencing is installed, any range of technologies may be required to detect, monitor and facilitate a response to intrusions by foot.

Additionally, once established, border security levels remain dynamic. While the goal is always to increase the level of border security, security in a given sector may decline as a result of many factors. These factors include the effect of enforcement efforts in adjacent sectors, changes in the level or nature of activity, or unanticipated declines in resource availability. Therefore, in order to maintain and expand upon our established border security levels, it is critical to continue the balanced deployment of personnel, technology, and tactical infrastructure.

Each Border Patrol Sector has developed operational plans to achieve effective control of the border in their Area of Responsibility (AOR). These plans are updated annually, and provide a baseline assessment of the current level of control throughout their AOR and the resources (e.g., agents, air support, infrastructure, technology) needed to ultimately gain effective control of their AOR.

Based on an analysis of the terrain and operational dynamic, the Office of Border Patrol (OBP) determines the right mix of technology, tactical infrastructure, personnel, and other assets needed to detect, identify and classify, respond, and resolve illegal incursions in that area. OBP "rates" the different components' capabilities. Some of the key components employed today are rated against the following capabilities:

<u>Component(s)</u>	<u>Capabilities</u>
Radars, Aircraft, Sensors	Detection and Tracking
Cameras, Agents	Identification and Classification
Fence	Persistent Impedance/Delay
Agents, Aircraft, Vehicles, Facilities, Roads, Transportation	Response & Resolution

These capability components form the basis of specific system acquisition programs. The acquisition program plans and budgets are developed and approved. Then after appropriate testing, the systems are deployed, operated, and maintained.

B. Budget Activities

SBI programs must be responsive to the needs and requirements of the mission elements that share responsibility for the security of the Nation’s borders. Within CBP, those mission elements include Office of Border Patrol (OBP), Office of Field Operations (OFO), Air and Marine (A&M), and the Office of Intelligence and Operations Coordination (OIOC). In addition, SBI is charged with integrating and responding to requirements of mission elements outside of CBP—including but not limited to the U.S. Coast Guard (USCG), Immigration and Customs Enforcement (ICE), and the DHS Office of Intelligence and Analysis.

In meeting its responsibilities, SBI performs four broad types of functions: Operational Integration, Technology Demonstration, Commodity Procurement, and System Development. SBI has 3 major investment concentrations, which support the above functions:

Program Management

Program Management funds provide for the necessary government and support personnel, tools, planning, processes, procedures, and resource matrices in an integrated and effective manner to enable all other program objectives to be successfully implemented, while ensuring alignment across the program.

Development and Deployment

Development and Deployment provides for surveillance and detection which consist of sensor systems, such as Unattended Ground Sensors (UGS), radars, and day/night cameras to improve CBP operational forces’ ability to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed and relocatable towers, mobile platforms (wheeled vehicles and aircraft), and on the ground. Development and Deployment also provides for Command, Control, Communications, and Intelligence (C3I) which includes sensor control and data processing, tracking, identification and classification, friendly (blue) force tracking, enhanced intelligence collection and analysis/dissemination tools, and shared situational awareness (i.e., Common Operating Picture (COP)). This integrated network relies on upgraded and interoperable digital field communications, improved Command and Control (C2) facilities, an enhanced wireless communications network, and network and security operations.

Finally, Development and Deployment funds TI, which consist of fixed, relocatable, and mobile infrastructure assets built to deter or delay illegal entries into the United States. TI includes pedestrian

and vehicle fencing, roads, and lighting installed in relevant areas to support border enforcement activities.

Operations and Maintenance (O&M/ Operations and Support (O&S).

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain all SBInet deployments and legacy detection and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, and training. In addition, (O&M) provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include fence and gate M&R, road and bridge M&R, drainage structure and grate M&R, lighting and electrical system M&R, vegetation management and control, and debris removal. In addition to providing M&R services, a comprehensive maintenance tracking database will be implemented to capture pertinent metrics for planning future TI construction projects, evaluating possible changes to border operations, and formulating out-year TI O&M budgets.

C. Budget Request Summary:

CBP requests 200 (FTE) full time positions and \$779,452,000 for FY 2010. The total adjustments-to-base is a negative \$15.5 million. The total program increase is \$20,000,000. The additional funding will assist CBP in gaining situational awareness along part of the northern border.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security
U. S. Customs and Border Protection
Border Security, Fencing, Infrastructure, and Technology**
Summary of FY 2010 Estimates by Appropriation and Program
(Dollars in thousands)

Program/Project Activity	FY 2008 Actual		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
SBI Development and Deployment	-	\$1,809,000	-	\$505,000		\$494,000	-	(\$11,000)	-	\$20,000	-	(\$31,000)
Operations and Maintenance	-	31,000	-	150,000		200,000	-	50,000	-	-	-	50,000
Program Management	89	64,000	185	120,000	200	85,452	15	(34,548)	-	-	15	(34,548)
Net, President's Budget, and Budget Estimates	89	\$1,904,000	185	\$775,000	200	\$779,452	15	\$4,452	-	\$20,000	15	(\$15,548)

	FY 2008 Actual		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
BSFIT												
SBI Development and Deployment				100,000								
Total				100,000								

note: FY 2008 includes reprogramming funds to allow SBI to address their fence funding needs

FY 2009 does not include \$100 million from American Recovery and Reinvestment Act

FY 2009 CBP has submitted a reprogramming request to move \$20 million from Program Management to SBI Development and Deployment

FY 2009 CBP has submitted a reprogramming request to move \$30 million to NPPD for the Border Interability Demonstration Project

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology
Program Performance Justification
(Dollars in thousands)**

PPA: SBI DEVELOPMENT AND DEPLOYMENT

	Perm. Pos.	FTE	Amount
2008 Actual	1,809,085
2009 Enacted	505,000
2010 Adjustment to Base	(31,000)
2010 Current Services	474,000
2010 Program Change	20,000
2010 Request	494,000
Total Change 2009-2010	(11,000)

The table above excludes ARRA funding of \$100 million provided in P.L. 111-5. CBP requests \$494.0 million for Development and Deployment. This is a decrease of \$11.0 million below FY 2009 due to:

- \$31.0 million decrease for non-recurring FY 2009 enhancements.
- \$20 million program increase to continue efforts to secure the northern border.

CURRENT SERVICES PROGRAM DESCRIPTION:

Development and Deployment

SBI*net* and TI are the components of CBP SBI charged with developing and installing solutions that will help provide CBP the means to achieve effective control of the U.S. borders, in conjunction with additional CBP agents and officers. When fully implemented, SBI*net* and SBI TI will improve Border Patrol agents' abilities to rapidly and effectively respond to illegal activities and help DHS and CBP manage, control, and secure the border. SBI also serves as a force multiplier by augmenting interconnectivity with other agencies responsible for public safety and counter-terrorism, as well as integrating traditional security infrastructure (pedestrian and vehicle fencing) and multiple state-of-the-art technological systems into one comprehensive border security system for DHS and CBP.

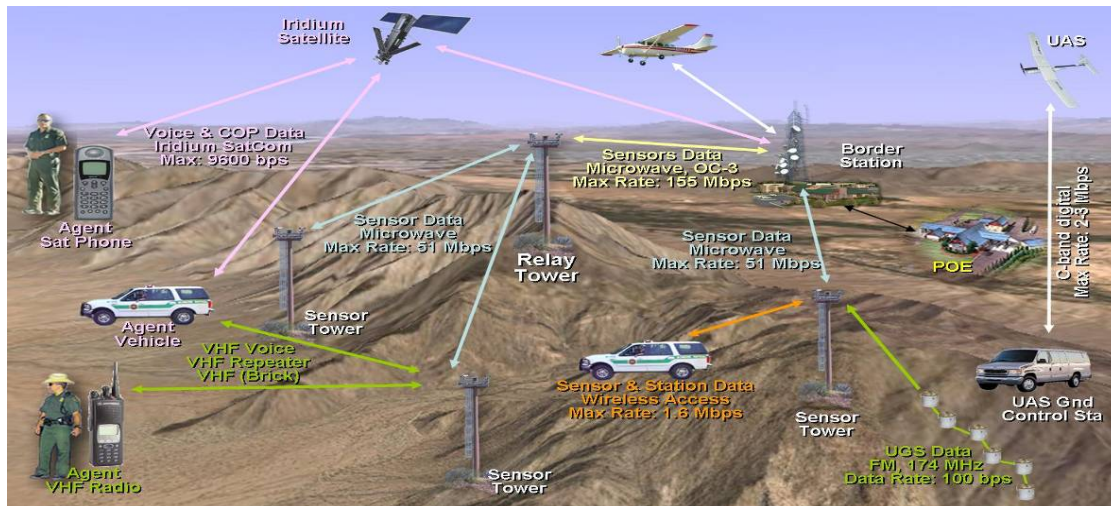

Due to the interdependency of SBI components, each component is vital to the system's overall success. A system with the technology to detect, identify, and classify illegal entries and criminal activity, but without the human capability for a rapid response or interdiction, cannot complete the law enforcement mission. Conversely, law enforcement personnel with inadequate intelligence, physical infrastructure, and technology required for situational awareness, or equipment necessary to conduct enforcement activities are much less likely to be effective in today's dynamic border enforcement environment.

SBI^{net} Block 1

FY 2008 and FY 2009 efforts have been focused on the design, development, integration, and test of the first increment of SBI^{net} functionality, called “Block 1”, and deployment laydown, design, and associated environmental and land acquisition activities. Block 1 is applicable to the southwest border desert environment between the ports of entry. The Block 1 system configuration consists of the following initial components:

- Fixed Tower segments (both sensor and communication towers)
- Advanced Radar Surveillance System (ARSS) radar
- Electro Optical Infrared camera
- Unattended Ground Sensors (UGS)
- Laser Range Finder
- Mobile Data Terminals (Enhancement)
- Standalone Mobile Surveillance System (MSS)
- High-Speed Wireless Broadband Communications (Enhancement)
- Microwave Backhaul Communications
- Command, Control, Communications, and Intelligence (C3I) COP Software Release 0.5

See the figure below, which depicts how the components of SBI^{net} are used to provide an end-to-end system solution for border security:

Conceptual View of SBI^{net}

Based on approval of the DHS Acquisition Review Board (ARB) in January 2009, these technologies are being deployed initially to two areas within the Tucson Sector of Arizona, referred to as TUS-1 and AJO-1. Following System Acceptance Test and Operational Test and Evaluation in early 2010, a production decision will be requested to acquire and complete the remaining Arizona Border Patrol Stations. FY 2010 funds will be used for Nogales, Sonoita, Naco, Douglas, and Willcox deployments, and the laydown designs for the remaining Arizona deployments -- Ajo-2, Casa Grande, and Yuma Sector, whose deployments are planned for FY 2011. Scheduled for completion in 2011, these

deployments, when combined with personnel and tactical infrastructure, will contribute significantly towards the effective operational control across the entire Arizona border.

P-25 Tactical Communications

CBP has a critical need to modernize its tactical communication assets and move from a mixed analog/digital, leased circuit based architecture to an integrated internet protocol/quality of service-based digital network environment. The P-25 Tactical Communication Project upgrades CBP Land Mobile Radios to P-25 systems and enables the *SBI*net COP to leverage P-25's inherent Global Positioning System (GPS) feature to track "friendly" forces. The P-25 tactical communications modernization provides:

- Initiation and assessment planning for each sector
- Requirements gathering and radio frequency (RF) site survey analysis
- System design – system includes subscriber units, civil infrastructure, communications infrastructure (repeaters, controllers) and dispatch equipment. P-25 modernization is dependent on *SBI*net to provide microwave backhaul in a given project area.
- Spectrum planning and site leasing
- Equipment and infrastructure construction and installation
- Acceptance testing, training, and close out

Prior year funds were used to support P-25 construction and deployment activities for Yuma, El Paso and Rio Grande Valley Sectors. Subject to operational priorities, FY 2010 funds will be used to continue Rio Grande Valley construction and deployment activities.

Northern Border Demonstration Project

The northern border is an area of increased concentration and emphasis, and *SBI*net represents only one piece of a larger CBP investment to the North. *SBI*net is in the process of demonstrating technology for addressing the needs and vulnerabilities of the northern border maritime (river/lake), cold weather environment, as well as deploying proven, stand-alone technology. Prior year BSFIT and Border Patrol funds are being used to deploy existing sensor systems to Detroit, Buffalo, and Swanton Sectors to provide immediate operational capability and also allow evaluation of these systems for their suitability to the northern border environment.

Specifically, Mobile Surveillance Systems (MSSs), consisting of truck-mounted sensor suites of day camera, night camera, and radar, are being deployed to Swanton and Buffalo in mid 2009. Remote Video Surveillance Systems (RVSSs) -- day and night cameras with remote control (pointing) from a Border Patrol station (command center) – are being deployed to Buffalo and Detroit. The first deployments will occur in mid 2009 for Buffalo along the Niagara River, where five new RVSSs will augment four existing RVSSs in Buffalo to expand coverage. Deployments to Detroit will begin in mid 2009 with eleven RVSSs along the St Clair River. RVSSs will be deployed and operated incrementally as construction is completed.

Congress also directed \$40 million in FY 2009 for northern border. CBP's analysis of northern border options is nearly complete. The likely focus will be on the centralized collection and processing of

data from multiple sources -- Border Patrol, Office of Field Operations, Air and Marine, Coast Guard, and others as available. Funds may also include additional deployment of existing sensors, such as RVSSs and MSSs. The goal is to enable more effective teaming and consolidation of resources.

FY 2010 funds will be used to continue these demonstrations and deployments with an emphasis on learning how best to integrate various sensors, organizations involved in border security, and mission operations to optimize border security in this challenging environment. Lessons learned will inform the operational and system requirements for technology solution tailored for follow-on deployments to the northern border.

Tactical Infrastructure

TI, while only one layer of the systematic law enforcement approach, has been recognized by the CBP as a necessary contributor to gain effective control of identified border areas. Pedestrian and vehicle fences provide persistent impedence so that agents and officers can gain a tactical advantage. The added physical barrier affords agents additional cover making physical assaults more difficult to carry out.

Bollard Pedestrian Fence with Steel Sheath Extension

Bollard Pedestrian Fence with Fence Caps

Post-on-Rail Vehicle Fence

Normandy Vehicle Fence

In FY 2008, CBP's focus was on TI awarding contracts for and completing construction of approximately 670 miles of pedestrian or vehicle fence.

For FY 2009, the funding priorities for CBP will be for TI to complete construction of approximately 670 miles of pedestrian and vehicle fence; construct approximately 75 fence gates in Rio Grande Valley Sector; construct 7 "crossovers" or bridges in El Paso Sector, construct an additional 3 miles of vehicle fence in the Tucson Sector, and construct approximately 7 additional miles of primary pedestrian fence in the Marfa, Rio Grand Valley, and El Paso Sectors.

As of April 4, 2009, through TI, CBP has constructed fencing totaling 618.6 miles along the southwest border (316.6 miles of pedestrian and 302 miles of vehicle fence) and contracts for all fencing projects needed to complete the approximately 670 miles of pedestrian or vehicle fence have been awarded.

For FY 2010, the current OBP operational requirements for the nine southwest border sectors also call for additional primary, secondary and tertiary/safety pedestrian fence, additional miles of access and all weather roads; additional lighting; bridges; low water crossings; and numerous acres of brush clearing, as well as associated environmental and real estate planning for all of these requirements. Completion of these requirements will contribute to the ability of OBP to obtain effective control of the southwest border. Note that as tactical infrastructure is constructed, shifts in illegal cross-border traffic may necessitate re-evaluating and adjusting operational requirements and priorities to address new vulnerabilities and/or officer safety.

PPA: SBI OPERATIONS AND MAINTENANCE

	Perm. Pos.	FTE	Amount
2008 Actual	31,023
2009 Enacted	150,000
2010 Adjustment to Base	50,000
2010 Current Services	200,000
2010 Program Change	0
2010 Request	200,000
Total Change 2009-2010	50,000

CBP requests \$200 million for Operations and Maintenance. This is an increase of \$50.0 million above FY 2009 due to an:

- Increase of \$50.0 million to the FY 2009 enacted budget for O&M costs of prior year development and deployment initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION:

Through CBP, SBI operations and maintenance funds are required to support sensors, cameras, and tactical infrastructure purchased in the prior year(s), wireless communications, operations and maintenance of new SBI technology, and maintenance of TI (vehicle and pedestrian fences, port of entry barriers, lights, and roads), while *SBI_{net}* includes power and data infrastructure, equipment supporting checkpoints, and necessary COP-related structures, a Network Operations Center and Security Operations Center, internal customer support for the systems, and IT systems support.

Recurring funding is required for operations and maintenance of the prime mission products acquired with previous acquisition funding and legacy equipment incorporated into the SBI program:

- Operations and maintenance for surveillance and detection systems for improved identification capabilities across all border environments including, new cameras, sensors, and agent surveillance tools.
- Operation and maintenance of physical infrastructure that has been built, to include maintenance of tactical infrastructure access roads. The towers for technology and surveillance also require regular maintenance intervals, including the maintenance of tower access roads.
- Operations and maintenance for command, control, and communications systems which will include all work associated with providing the COP, case processing, intelligence systems and applications, wireless communications, and information technology.
- Operation and maintenance of deployed P-25 tactical communications.
- Operations and maintenance of system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, maintenance, overhaul, and training.

PPA: PROGRAM MANAGEMENT

	Perm. Pos.	FTE	Amount
2008 Actual	170	89	63,583
2009 Enacted	200	185	120,000
2010 Adjustment to Base	...	15	(34,548)
2010 Current Services	200	200	85,452
2010 Program Change	0
2010 Request	200	200	85,452
Total Change 2009-2010	...	15	(34,548)

CBP requests \$85.5 million for Program Management. This is a decrease of \$34.5 million below FY 2009 due to:

- FY 2009 Annualization of Program Management Office - \$2 million
- FY 2010 Pay raise - \$0.3 million
- FY 2009 Annualization Pay Raise - \$0.2 million
- Decrease of \$0.4 million for consolidation within the Facilities Management program
- Decrease of \$36.8 million for non-recurring initiatives from FY 2009

CURRENT SERVICES PROGRAM DESCRIPTION:

The SBI Programs are led and managed by the SBI Executive Director who is ultimately responsible for their success. The Executive Director is assisted by the SBI*net* Executive Director and the SBI TI Program Manager who are responsible for the day-to-day operations of their assigned programs.

Program Management funds provide for the necessary government and support personnel, tools, planning, processes, procedures, and resource matrices in an integrated and effective manner to enable all other program objectives to be successfully implemented, while ensuring alignment across the program.

For FY 2010, the SBI Program Office require staffing with 200 government and contract employees. With the emphasis remaining on progress along the southwest border and northern border deployments and demonstrations, teams of people will be working on the various mix of technology and tactical infrastructure to best secure the border.

IV. Program Justification of Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology
Program Performance Justification
(Dollars in thousands)**

Program Increase 1: BSFIT –Northern Border Technology

Strategic Goal(s) & Objective(s): 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.

PPA: Development and Deployment

Description of Item

Additional funding in the amount of \$20 million is requested to assist CBP in securing the northern border. This will increase the total FY 2010 funding for the Northern Border Development and Deployment to \$40 million. Through *SBInet*, CBP is in the process of demonstrating technology for addressing the needs and vulnerabilities of the northern border maritime (river/lake), cold weather environment, as well as deploying proven, stand-alone technology that provides immediate operational benefit. FY 2010 funds will be used to continue these demonstrations and deployments with an emphasis on learning how best to integrate various sensors, organizations involved in border security, and mission operations to optimize border security in this challenging environment. Lessons learned will inform the operational and system requirements for a technology solution tailored for follow-on deployments to the northern border. The additional funds requested will enable more robust demonstrations and deployments to support CBP’s increased emphasis on securing the northern border.

Justification

In addition to securing the southwest border, CBP is focusing increased attention on capabilities for enhancing security along the northern border. *SBInet* will play a critical role in enabling OBP to gain and maintain effective control of nearly 4,000 miles of border along the U.S. border with Canada. Prioritized development and deployment of the appropriate mix of technology and infrastructure (i.e.,

roads, fencing, lights, sensors, and mobile and fixed towers, etc.), ensures resources are used optimally to secure this area.

Through *SBI*net, CBP is equipping operational forces with surveillance capabilities that enhance detection, situational awareness, and apprehension of illegal entrants. These new capabilities, in addition to providing near-term operational benefits, also inform the design and development of longer term northern border solutions.

Incremental increases in technology between FY 2010 and FY 2014 will be an important force multiplier for enabling OBP to minimize the number of agents otherwise required. Increases in northern border technology will increase the likelihood that illegal entrants, to include potential terrorists, are detected at the immediate border and monitored as they progress to the interior of the U.S. This capability is critical because the Border Patrol currently employs minimal levels of agents and liaison with other Canadian, federal, state, and local agencies to form a very manpower-oriented system.

Impact on Performance (Relationship of Increase to Strategic Goals)

*SBI*net gives CBP and other DHS enforcement agencies unprecedented capabilities for planning, directing, and conducting northern border enforcement operations. The means for objectively evaluating the performance and effectiveness of security and enforcement actions is also addressed.

In conjunction with the DHS infrastructure, communications systems disseminate operational orders in real-time. Managers have the ability to redeploy resources rapidly as DHS priorities or national crises evolve. At the command and control (C2) level, *SBI*net works with other systems to provide managers with continuous situational awareness, integrating new levels of collaboration and cooperation with other professionals and enforcement agencies. As agents report on activities, submit enforcement intelligence, and collaborate electronically from field locations, the C2 level receives a comprehensive view of the northern border enforcement environment.

Investment in northern border technology contributes to objective 1.1 of the CBP Strategic Plan: establish and maintain effective control of air, land, and maritime borders through the use of appropriate mix of infrastructure, technology, and personnel. This is accomplished in the northern border maritime (river/lake), cold weather environment by equipping CBP with the ability to consistently:

- Detect – Detect entries when they occur;
- Identify/Classify – Identify what the entry is and classify its level of threat (who they are, what they are doing, how many, etc);
- Respond – Effectively and efficiently respond to the entry; and
- Resolve – Bring the situation to the appropriate law enforcement resolution

In addition, northern border technology contributes to the core enabler: develop the capability to conduct seamlessly coordinated CBP operations and information/intelligence sharing, collocating command and intelligence structures wherever practical and operationally appropriate.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security U.S. Customs and Border Protection

Justification of Proposed Changes in Border Security Fencing, Infrastructure, and Technology Appropriation Language

For expenses for [customs and border protection] border security fencing, infrastructure, and technology, [\$775,000,000] \$779,452,000, to remain available until expended[: Provided, That of the amount provided under this heading, \$400,000,000 shall not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure, prepared by the Secretary of Homeland Security and submitted not later than 90 days after the date of the enactment of this Act, for a program to establish and maintain a security barrier along the borders of the United States of fencing and vehicle barriers, where practicable, and other forms of tactical infrastructure and technology, that includes the following_]

[(1) a detailed accounting of the program's implementation to date for all investments, including technology and tactical infrastructure, for funding already expended relative to system capabilities or services, system performance levels, mission benefits and outcomes, milestones, cost targets, program management capabilities, identification of the maximum investment, including life cycle costs, related to the Secure Border Initiative program or any successor program, and description of the methodology used to obtain these cost figures;]

[(2) a description of how specific projects will further the objectives of the Secure Border Initiative, as defined in the Department of Homeland Security Secure Border Plan, and how the expenditure plan allocates funding to the highest priority border security needs;]

[(3) an explicit plan of action defining how all funds are to be obligated to meet future program commitments, with the planned expenditure of funds linked to the milestone-based delivery of specific capabilities, services, performance levels, mission benefits and outcomes, and program management capabilities;]

[(4) an identification of staffing, including full-time equivalents, contractors, and detailees, by program office;]

[(5) a description of how the plan addresses security needs at the Northern border and ports of entry, including infrastructure, technology, design and operations requirements, specific locations where funding would be used, and priorities for Northern border activities;]

[(6) a report on budget, obligations and expenditures, the activities completed, and the progress made by the program in terms of obtaining operational control of the entire border of the United States;]

[(7) a listing of all open Government Accountability Office and the Office of Inspector General recommendations related to the program and the status of Department of Homeland Security actions to address the recommendations, including milestones to fully address such recommendations;]

[(8) a certification by the Chief Procurement Officer of the Department that the program: (a) has been reviewed and approved in accordance with the investment management process of the Department, and that the process fulfills all capital planning and investment control requirements and reviews established by the Office of Management and Budget, including as provided in Circular A-11, part 7; (b) that the plans for the program comply with the Federal acquisition rules, requirements, guidelines, and practices, and a description of the actions being taken to address areas of non-compliance, the risks

associated with such actions, together with any plans for addressing these risks, and the status of the implementation of such actions; (c) that procedures to prevent conflicts of interest between the prime integrator and major subcontractors are established and that the Secure Border Initiative Program Office has adequate staff and resources to effectively manage the Secure Border Initiative program, all contracts, including the exercise of technical oversight; and (d) the certifications required under this paragraph should be accompanied by all documents or memoranda, as well as documentation and a description of the investment review processes used to obtain such certifications;]

[(9) a certification by the Chief Information Officer of the Department that: (a) the system architecture of the program is sufficiently aligned with the information systems enterprise architecture of the Department to minimize future rework, including a description of all aspects of the architectures that were or were not assessed in making the alignment determination, the date of the alignment determination, and any known areas of misalignment together with the associated risks and corrective actions to address any such areas; (b) the program has a risk management process that regularly and proactively identifies, evaluates, mitigates, and monitors risks throughout the system life cycle and communicates high-risk conditions to U.S. Customs and Border Protection and Department of Homeland Security investment decision-makers, as well as a listing of all the program's high risks and the status of efforts to address such risks; (c) an independent verification and validation agent is currently under contract for the projects funded under this heading; and (d) the certification required under this paragraph should be accompanied by all documents or memoranda, as well as documentation and a description of the investment review processes used to obtain such certification;]

[(10) a certification by the Chief Human Capital Officer of the Department that the human capital needs of the Secure Border Initiative program are being addressed so as to ensure adequate staff and resources to effectively manage the Secure Border Initiative, together with a description of SBI staffing priorities;]

[(11) an analysis by the Secretary for each segment, defined as not more than 15 miles, of fencing or tactical infrastructure, of the selected approach compared to other, alternative means of achieving operational control, and such analysis should include cost, level of operational control, possible unintended effects on communities, and other factors critical to the decision making process; and]

[(12) is reviewed by the Government Accountability Office:]

[Provided further, That the Secretary shall report to the Committees on Appropriations of the Senate and the House of Representatives on program progress, and obligations and expenditures for all outstanding task orders as well as specific objectives to be achieved through the award of current and remaining task orders planned for the balance of available appropriations at least 15 days before the award of any task order requiring an obligation of funds in an amount greater than \$25,000,000 and before the award of a task order that would cause cumulative obligations of funds to exceed 50 percent of the total amount appropriated: Provided further, That none of the funds provided under this heading may be obligated unless the Department has complied with section 102(b)(1)(C)(i) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1103 note), and the Secretary certifies such to the Committees on Appropriations of the Senate and the House of Representatives: Provided further, That none of the funds under this heading may be obligated for any project or activity for which the Secretary has exercised waiver authority pursuant to section 102(c) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1103 note) until 15 days have elapsed from the date of the publication of the decision in the Federal Register: Provided further, That notwithstanding the previous provisos, \$100,000,000 of the amount provided under this heading shall be made available for obligation upon enactment of this Act without restriction]

Explanation of Changes:

No substantive changes.

1. Project Description, Justification and Scope

The DHS border security mission is to prevent dangerous and illegal people and things from entering the United States, including terrorists and instruments of terror. DHS created the Secure Border Initiative (SBI) to bring clarity of mission, effective coordination of DHS assets, and greater accountability to the work of DHS in securing the Nation’s borders. SBI is the most far-reaching effort in United States history to gain control of its nearly 6,000 miles of international land border. CBP is the lead agency within DHS for the development and deployment of SBI tactical infrastructure (TI) and SBI technology, called *SBI_{net}*. Under the SBI TI program, CBP is developing and installing pedestrian and vehicle fences, roads, and lights that will be a physical impediment to crossing the border, and provide additional time for Border Patrol agents to react to illegal border activity. This infrastructure is complemented by *SBI_{net}*, which include such technologies as radars, cameras, unattended ground sensors, communications, and integrating software that will provide CBP field personnel a common operational picture. When fully implemented, SBI TI and SBI technology will provide an enhanced capability to detect, identify, and track border activity, improve an agent’s ability to rapidly and effectively respond to illegal activities, enable more effective command, control, communications, and intelligence (C3I), and improve interoperability with other Federal agencies responsible for public safety and counter-terrorism.

2. Significant Changes

As of April 4, 2009, SBI TI has constructed fencing totaling 618.6 miles along the southwest border (316.6 miles of pedestrian and 302 miles of vehicle fence), and contracts for all fencing projects needed to complete the approximately 670 miles of pedestrian or vehicle fence have been awarded.

In late 2008, CBP re-planned of *SBI*net's development and deployment strategy to reduce schedule concurrency (program risk) between system testing and deployment. The program was baselined, presented to the DHS Acquisition Review Board in January, 2009, and approved for implementation. The *SBI*net System Program Office issues identified during formal System Qualification Testing (SQT) have been resolved, clearing the way for on-going construction and deployment of the initial *SBI*net Block 1 design to Tucson Station (TUS-1) and Ajo Station (Ajo-1). Following System Acceptance Test and Operational Test and Evaluation in early 2010, a production decision (Acquisition Decision Event 3) will be requested for approval to acquire and complete the remaining Arizona Border Patrol Stations (Nogales, Sonoita, Naco, Douglas, Willcox, Ajo-2, Casa Grande, Yuma, Blythe, and Wellton).

The FY 2010 budget supports deployments to Nogales, Sonoita, Naco, Douglas, and Wilcox stations and provided funds for the deployment design of the remaining Tucson and Yuma Sectors.

3. Project Schedule

The FY 2010 funding request for *SBI*net enables the completion of the Tucson East Stations (Nogales and Sonoita) in 2010 and Tucson West Stations (Naco, Douglas, and Wilcox) in 2011. The remaining Tucson and Yuma Sector stations are planned to be completed later in 2011 using FY 2011 funds. In addition, the funding will support Tactical Infrastructure to priority locations, and logistics support for legacy and new TI and *SBI*net construction / deployments.

4. Schedule of Project Funding (Dollars in Thousands)

	FY 2008	FY 2009	FY 2010	Total
Appropriation	1,809,085	505,000	494,000	2,808,085
Obligation (planned)	1,809,085	505,000	494,000	2,808,085
Expenditure (planned)	904,500	252,500	247,000	1,404,000

5. Cost Estimate Detail and Changes (Dollars in Thousands)

Description of Milestone Development and Deployment	Current Estimate
<i>SBI</i> net	384,000
Tactical Infrastructure	110,000
Total	494,000

6. Method of Performance

SBI_{net}

CBP has established performance metrics and parameters for the SBI_{net} solution, such as probability of detection, probability of identification, and operational availability. These operational and system performance parameters were used to design SBI_{net} Block 1, the initial deployment to the southwest border, and are reflected in the following table:

SBI_{net} Block 1 Performance Requirements	
Performance Measure	Requirements*
Probability of Detection	Threshold – 70% Objective – 85%
Probability of Identification	Threshold – 70% Objective – 85%
Operational Availability (Ao)	Threshold – 85% Objective – 95%

* Does not include all components of end-state solution for SBI_{net} deployment to southwest border, e.g. Air and marine assets.

** Threshold = minimum acceptable value; objective = target value

These performance parameters are expected to be exceeded at the end of SBI_{net}'s full deployment along the southwest border, when the full range of technologies that are planned to be part of the end state solution, e.g. ground based radars, cameras, Air and Marine assets, unattended ground sensors, etc. are taken into account.

CBP is also improving its capabilities to better measure system performance. Appropriate performance metrics and parameters are determined by modeling, actual performance during system testing, and more importantly by the technology capabilities included in the individual deployments. Moreover, given that these metrics are predicted targets, CBP will also continue to utilize the current process for determining effective control as the key measure of merit for the overall system's performance.

The method used to predict the detection and identification effectiveness of a particular SBI technology system solution is to estimate it in a simulation that models the performance and operations of the components (radar, camera, and unattended ground sensors) in a 3-dimensional terrain environment. The type, quality, and frequency of the sensor data delivered to the COP, the COP operator's proficiency at interpreting the delivered data, and the routes of ingress and tactics used by illegal border crossers are key factors. The effectiveness of identification is dependent on detection effectiveness and therefore it is necessary to assess these two measures concurrently against the same intruder scenario.

Field tests will be conducted to validate the performance of the sensors (radar, camera, and UGS) as well as the system performance. The TUS-1 field test results will be incorporated into the model and the model will be rerun and compared to the requirements of the TUS-1 and AJO-1 projects. Once the models have been validated, we will rerun the model with the TUS-1 field data to generate updated performance numbers and compare this performance to the project requirements. Moreover, given that

these metrics are predicted targets, we will continue to utilize the current process for determining effective control as the key measure of merit for the overall system's performance.

Tactical Infrastructure

The Fence performance standards were developed initially through the Fence Lab and refined by the Fence Engineering Integrated Project Team through value engineering and based on the expert knowledge and experience of OBP.

PF225 Pedestrian Fencing Requirements

#	Performance Requirement	Objective*	Threshold*	Verification
1	Capability of disabling a vehicle.	10,000 pounds Gross Vehicle Weight @ 40 miles per hour	6,000 pounds Gross Vehicle Weight @ 40 miles per hour	Analysis
2	Not easily climbed over or perched upon by a pedestrian, 16-35 years, without special climbing tools (PF Only).	18 feet high	18 feet high	Design / Inspect
3	Not easily penetrated or vandalized with common power tools including oxyacetylene or similar methods.	Cannot cut 24" x 24" square in 30 minutes	Cannot cut 24" x 24" square in 15 minutes	Tested
4	Ability to survive temperatures applicable to the southwestern border of the United States including diurnal and seasonal extremes.	Thermal expansion (delta in excess of 120 degrees)	Thermal expansion (delta in excess of 120 degrees)	Analysis
5	Ability to see through the fence with the human eye for situational awareness purposes.	Desired in some locations not required for all locations dependent upon operational needs.	6 feet tall from ground minimum see-through section desired in some locations for PF; dependent upon operational needs.	Design / Inspect
6	Compatible design applicable to desert, mountain, flood plains, open range, and remote conditions to address the different geographic conditions.	Government off-the shelf	Government off-the shelf or contractor design-build.	Analysis

7	Site adaptable where necessary to permit water and not cause backwater of greater than 3 inches in urban areas and 6 inches in rural area.	Comply with International Boundary and Water Commission (IBWC) design guidelines to comply with International treaties with Mexico; No flooding of structures or buildings; No significant erosion that could damage the fence.	Comply with IBWC design guidelines to comply with International treaties with Mexico; No flooding of structures or buildings; No significant erosion that could damage the fence.	Drainage Studies / Design / Inspect
8	Site adaptable where necessary to allow migration of small animal species across the border.	Site adaptable where necessary to allow migration of small animal species across the border.	Allows small animals to migrate across the border (PF); Allows small and large animals to migrate across the border (VF).	Design / Inspect
9	Provides deterrence to common/basic under-digging (PF only).	6 feet or deeper	3 feet	Design / Inspect
10	Allows access to border monuments and properties south of the fence to meet IBWC and general access requirements respectively.	3 feet for human 20 feet (vehicle), 40 feet for (farm equipment)	3 feet for human 20 feet (vehicle), 40 feet for (farm equipment)	Design / Inspect
11	Allow construction workers and maintenance crews room to build/maintain fence without breaching border.	Can be constructed and maintained from the U.S. side only (no less than 3 feet from the land border)	Minimum distance from the border deemed necessary to accommodate existing geographical conditions	Design / Verification
12	Long service life requiring minimal planned maintenance.	30-year Service life 10 years between planned maintenance	15-year service life 5 years between planned maintenance	Design / Inspect
13	A design that allows for expedient repair of damage or breaching.	Restore to original condition within 24 hours	Restore to original condition within 72 hours	Design / Inspect
14	Construct within real estate footprint.	60 feet	150 feet	Design / Verification

* Threshold = minimum acceptable value, objective = target value

41.0	Grants/Subsidies/Contributions	117,062	34,911	--	(34,911)
Total, SBI Development and Deployment		1,809,085	645,675	\$494,000	(\$151,675)
Full Time Equivalents			--	--	---

Mission Statement

The SBI Program Office will identify and provide relevant information to DHS stakeholders in a timely manner, using open information architecture. To achieve this strategic goal CBP will lead the effort to develop a Common Operating Picture (COP) that provides situational awareness necessary to improve mobility, rapid response, officer safety, and intelligence.

Summary Justification and Explanation of Changes

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Travel	1,737	1,952	500	(\$1,452)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes decreases of \$1,452,000 for non-recurring costs.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Other Rent	309	--	--	---

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes no change.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous charges	3,008	242	--	(242)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes decreases of \$242,000 for non-recurring costs.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Other Services	229,921	220,730	161,400	(59,330)

Other Contractual Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes decreases of \$59,330,000 for non-recurring costs.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Purchase from Government Accounts	28	--	--	---

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes no change.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Operation & maintenance of facilities	74,655	--	--	---

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request includes no change.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	97	--	--	---

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 request includes no change.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Supplies & materials	202	148	--	(148)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2010 request includes decreases of \$148,000 for non-recurring costs.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Equipment	41,637	254,095	232,100	(21,995)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 request includes decreases of \$21,995,000 for non-recurring costs.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Land & Structures	1,340,429	133,597	100,000	(33,597)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. FY 2010 request includes decreases of \$33,597,000 for non-recurring costs.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	2009 to 2010 Change
Grants/Subsidies/Contributions	117,062	34,911	--	(34,911)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2010 request includes decreases of \$34,911,000 for non-recurring costs.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Air and Marine Interdiction, Operation, Maintenance, and Procurement

I. Appropriation Overview

A. Mission Statement:

CBP protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. CBP Air and Marine's (A&M) core competencies include: air and marine interdiction, air and marine law enforcement, and air and national border domain security.

CBP A&M has a staff of over 1,871 personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative personnel. In FY 2009, mission critical assets consisted of approximately 300 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), approximately 200 marine vessels, a national air and marine operations center, fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangers, and marine facilities located along all of the nation's borders and at key interior support locations.

B. Budget Activities:

CBP A&M's Air Strategic Plan was updated in FY 2007 to include marine strategic plans, an expanded plan for Unmanned Aircraft Systems (UASs), revised staffing projections, a facilities enhancement approach, and updates to the ten-year investments model provided in the baseline plan submission to Congress. CBP A&M's approach to executing the plan can be divided along the three major border security areas of responsibility (AOR)—northern border, southwest border and southeast/coastal borders. Five primary air branches and supporting units were established along the northern border. Consideration will be given to establishing secondary or satellite sites to support the concentration of assets needed to meet specific threats as they are identified. Based on the results of operational demonstrations conducted from the joint CBP/Air National Guard (ANG) based in North Dakota in FY 2008, CBP A&M's UAS capabilities to obtain increased intelligence and gain better situational awareness in support of the Secure Border Initiative (SBI) was expanded to North Dakota. Both air and marine operations will expand along the Great Lakes and the northwestern and northeastern maritime approaches to our borders as additional aircraft, marine vessels, and personnel are deployed. The delivery of new aircraft and additional pilots/air crew will enable increased tactical support to the Border Patrol along the southwest, northern and southeast coastal borders as the number of agents on the ground increases. The UAS Branch, in Sierra Vista, will expand its operations as additional systems are delivered and deployed. Within the southeast/coastal AOR, P-3 aircraft wing operations will increase as assets are delivered from extensive depot-level rework. Maritime demonstrations of UAS capabilities in the southwest and southeast coastal approaches to the U.S. are also planned. Marine operations in the Gulf of Mexico will be enhanced as new interceptor

vessels replace the aging Black Night Interceptors and additional sea-borne radar platforms are acquired. The investments needed to achieve CBP A&M's end state and to support the operational objectives discussed above can be described in four broad categories discussed below.

Aircraft Safety and Service Life Extension. The highest priority within CBP A&M remains the P-3 Service Life Extension Program (SLEP) since it rectifies serious flight safety concerns. The average age of CBP A&M aircraft is over 22 years old, and the aircraft in the P-3 fleet are over 40 years old. The P-3 SLEP began in FY 2006 with the repair of fleet-wide wing stress cracks and the development of the requirements for extending the lives of the 16 P-3 aircraft by 20 years. Two P-3 aircraft will be inducted in the re-wing phase of SLEP in FY 2010, followed by four in FY 2011, three in FY 2012 and two in FY 2013. This will account for 11 of CBP A&M's 16 P-3 aircraft. The remaining 5 platforms will be inducted after 2013.

Establishment of a Strategic Intelligence, Surveillance, and Interdiction Capability. Equally high in priority is the UAS program. This program will support CBP A&M's efforts to accomplish the following: maintain priority coverage along the southwest and northern borders and increase effectiveness at the southeast/coastal borders. In FY 2006, CBP established a UAS program that will be the key element of the agency's strategic intelligence, surveillance, and interdiction capability. The total capability will include the P-3 Maritime Patrol Aircraft and the DHC-8/Q300 Multi-Role Patrol Aircraft (MPA). The strategic plan currently calls for up to three squadrons of UASs to be deployed along the southwest border, northern border, and southeast/coastal operating area. The end-state objectives for the MPA changed in FY 2007 when the manufacturer closed the DHC-8/Q300 production line in favor of a larger, more commercially viable DHC-8/Q400. CBP A&M concluded that the larger Q400 was not suitable for its missions and, instead, focused on the acquisition in early FY 2009 of a smaller, twin-engine, Multi-Role Enforcement Aircraft (MEA) capable of operating effectively over land and water. Additionally, UAS supports Immigration and Customs Enforcement (ICE) investigative efforts, extends cross border operations into the source and transit zones, as well as augments and enhances the crewed air and marine assets.

Air Recapitalization and Modernization. The present air fleet consists of 19 different aircraft types. Currently, seven of ten aircraft types have exceeded their normal service life expectancy, some by as much as almost two times the industry average. The impact has been an unavoidable loss of operational sorties because of additional maintenance down time due to increased inspections and a shrinking pool of spare parts. To accomplish its border security, anti-drug, and customs and immigration enforcement support missions, a more flexible and supportable air fleet is needed. To this end, the air fleet will be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The strategic objective is to reduce the types of aircraft to eight or nine, and to increase the total number of aircraft to a level consistent with operational demands. The total will likely change over time as the nature of the threat changes, therefore the CBP A&M's strategic plan and end-state model will be updated accordingly.

Marine Recapitalization and Modernization. In FY 2008, CBP A&M began to replace its aging fleet of Black Night Interceptor vessels, and continued acquiring replacement vessels in FY

2009. CBP A&M will continue the outfitting of seized boats with radars, sensors, data and communications systems, and at-sea refueling capabilities, to be used as radar platforms. The objective is to have up to 10 platforms deployed across all of the maritime operating areas. CBP A&M has worked with the Border Patrol to standardize the types of riverine vessels providing direct interdiction support to its agents. With the decision made on a new class of riverine vessels, CBP A&M will begin/continue purchasing sufficient assets to replace the existing craft and to increase the overall size of the riverine force. In addition, CBP A&M will expand marine maintenance and training operations in St. Augustine, Florida, and McAllen, Texas, with improvements to shops, equipment, and stowage facilities.

C. Budget Request Summary

CBP requests \$505,826,000. The total adjustments-to-base is a decrease of \$22,174,000. CBP A&M has no program increases, but will continue new procurements under ongoing contracts.

PPA: OPERATIONS AND MAINTENANCE

	<u>Pos</u>	<u>FTE</u>	<u>Amount</u>
2008 Actual	\$357,785
2009 Enacted	380,022
2010 Adjustment to Base	(5,805)
2010 Current Services	374,217
2010 Program Changes	0
2010 Request	374,217
Total Change 2009-2010	(5,805)

CBP requests \$374.2 million for this activity. The request is \$5.8 million below FY 2009. This request includes an increase of \$3.1 million for maintenance for FY 2009 assets and a decrease of \$8.9 million for rent transfer to the facilities management appropriation.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP A&M secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP A&M maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP A&M partners with numerous stakeholders in performing its missions throughout the continental United States and the western hemisphere. This includes domestic operations at the borders; source, transit and arrival zone operations; interior law enforcement support; and support to other agencies. Truly crosscutting within the Department and the Federal government as a whole, the unique capabilities of CBP A&M serve as both a stand-alone entity and as a force multiplier. In fulfilling the priority mission of CBP to protect the borders, our geographical disposition has shifted from a concentration on the southern border to include all of our Nation's borders. CBP A&M's priority mission is to continue protecting the American people and critical infrastructure by using an integrated and coordinated air and marine force of over 1,871 personnel, to include pilots and air crew, fixed wing aircraft, rotary helicopters, unmanned aircraft systems, marine vessels, a national air and marine operations center, and

surveillance equipment, to detect, interdict and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States.

FY 2008 Significant Accomplishments

CBP A&M established the fifth and last primary northern border air branch in the Great Lakes region of Detroit, Michigan. Assessed the need for secondary and satellite sites based on the results of operations across the northern border. Expanded UAS operations as additional systems were delivered to the southwest border, deployed for test and evaluation to the northern border, and re-outfitted with maritime search radars for test and evaluation in the southeast/coastal area of responsibility. Accomplished delivery of new aircraft and the hiring of new pilots and aircrew to enable CBP A&M to respond to the planned increase in Border Patrol agents along the southwest and northern borders. Outfitted and deployed to the Great Lakes additional marine interceptors purchased in FY 2007 and FY 2008, and tested and evaluated the first new prototype riverine vessels against Border Patrol mission requirements. Incorporated all legacy assets into a single, more effective logistics and maintenance support arrangement as a result of the new nationwide aviation maintenance contracts.

FY 2009 Planned Accomplishments

The \$36.7 million provided for improved aviation maintenance in FY 2008 recurs in FY 2009 and will incorporate all legacy assets into a single, more effective nationwide logistics and maintenance support contract. FY 2009 funding supports expanded flight hours in response to increasing mission demands from the Border Patrol and ICE. CBP A&M will continue to assess the need for secondary and satellite sites based on the results of operations across the northern border, expand UAS operations as additional systems are delivered to the southwest border, deploy for test and evaluation to the northern border, and re-outfit with maritime search radars for test and evaluation in the southeast/coastal area of responsibility.

FY 2010 Planned Accomplishments

CBP A&M has taken a clockwise approach with the deployment of its resources and assets. For example, in FY 2006 and FY 2007 CBP saw a rapid redeployment in its resource/asset requirement along the southwest border in support surge in the Office of Border Patrol (OBP) growth and Arizona Border Control Initiative (ABCI), ABCII and the Secure Border Initiative (SBI). In FY 2008 and FY 2009, CBP redeployed assets (primarily from the southeast coastal) to the northern border to support the establishment of the final two primary air branches in North Dakota and Great Lakes region of Detroit. In FY 2010 and FY 2011, CBP plans to replenish those resources/assets deployed from the southeast coastal in earlier years while at the same time continue to fill minor "holes" along the northern border. This approach represents CBP A&M's deployment end-state that takes into consideration the entirety of our Nation's borders that best address threats, increased efficiencies and operational effectiveness. CBP A&M will continue to support expanded flight hours in response to increasing mission demands from OBP and ICE.

PPA: PROCUREMENT

	<u>Pos</u>	<u>FTE</u>	<u>Amount</u>
2008 Actual	\$363,855
2009 Enacted	147,978
2010 Adjustment to Base	(16,369)
2010 Current Services	131,609
2010 Program Changes	0
2010 Request	131,609
Total Change 2009-2010	(16,369)

CBP requests \$131.6 million for this activity. The request is \$16.4 million below FY 2009. The -\$16.4 million for adjustments to base is the net of -\$20.4 million that non-recurs (initiative funding received in FY 2009 provided \$7 million to base funding for the acquisition of two Multi-Role Enforcement aircraft and spares, \$6 million to base funding for the acquisition of one complete UAS system, ground control and spares, and \$7.4 million to acquire marine interceptor vessels), \$9.0 million increase for P-3 Service Life Extension Program (SLEP) and a \$5 million decrease for the Wireless Access Surveillance Platform (WASP).

Current Services Program Description:

The CBP A&M Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, retire unserviceable assets, upgrade sensors and surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

2008 Significant Accomplishments

FY 2008 saw the delivery, testing and induction into inventory numerous aircraft with funds provided in FY 2006 through FY 2008 as follows:

- Light Observation Helicopter (LOH): Final two of original 15 funded in FY 2006 were taken into inventory in FY 2008. Of the funding provided in FY 2008 to purchase the five final of 20 total platforms, one was delivered in December 2008, one was delivered in January 2009, one was delivered in February 2009, and the final two to be delivered during the 4th quarter FY 2009.
- Light Enforcement Helicopter (LEH): 25 platforms have been funded in FY 2006 through FY 2008. Of these, eight were placed under contract in FY 2007 and 17 were placed under contract in the 4th quarter FY 2008. All of the first eight were taken into inventory during FY 2008. In December 2008, A&M took delivery of the first of the 17 platforms with an anticipated delivery date for the final 16 every 5 to 6 weeks thereafter. The last of the 17 platforms should be delivered by the 4th quarter FY 2010.
- Two new AW-139 Medium Lift Helicopters (MLH) were delivered in FY 2008 and have completed final test and evaluation.

- In a joint acquisition with the U.S. Army, an order was placed in FY 2008 for four UH-60M Medium Lift Helicopters for delivery starting in the 4th quarter FY 2009 and ending FY 2011.
- In cooperation with the U.S. Army, CBP A&M entered into a joint effort to convert up to 16 of its 25-year-old UH-60A Medium Lift Helicopters (MLHs) to UH-60L versions. Based on early projections, the conversions could increase individual aircraft service lives by 10-15 years, and reduce annual maintenance costs by 30-37%. The U.S. Army began its prototype efforts in late FY 2007 and established a fully functional production line in late FY 2008. CBP A&M plans to initiate one to two helicopters each year for conversion depending on operational commitments.
- CBP A&M completed the integration and test of its third DHC-8 Multi-role Patrol Aircraft (MPA) and accepted delivery of its fourth of desired seven platforms in December 2008. It is anticipated that the fifth will be delivered in July 2009, sixth in August 2009, and seventh in December 2009. The end-state objectives for the MPA changed in FY 2007. The DHC-8 manufacturer decided to close the DHC-8/Q300 production line in favor of a larger, more commercially viable DHC-8/Q400. CBP A&M has determined that the larger Q400 is not suitable for its missions and, instead, will pursue the acquisition of 40 smaller, twin-engine, Multi-Role Enforcement Aircrafts (MEA) capable of operating effectively over land and water. (See MEA below)
- Prior year funding from the discontinued MPA program was realigned with the FY 2009 enacted budget and will provide sufficient funding for the first of five of the 40 desired MEA platforms. Requirements were defined in FY 2008 for an initial acquisition in 3rd quarter, FY 2009.
- Key decisions were made on the final configuration of the Manned Covert Surveillance Aircraft (MCSA) mission package being acquired under a joint CBP/U.S. Coast Guard acquisition.
- Two additional UAS platforms were delivered in FY 2008 and one in the 1st quarter FY 2009, bringing total inventory to five of the six, and the final has an anticipated delivery date in the 2nd quarter FY 2009. The FY 2009 enacted budget will fund a seventh UAS which has an anticipated delivery date of 3rd quarter FY 2009.
- In addition, five new interceptor class marine vessels were purchased and began their deployment to the Great Lakes.
- In FY 2007 and FY 2008, Air and Marine purchased 11 Interceptor vessels and 8 Riverine Craft. Delivery of these vessels began in the 4th quarter FY 2008 and will continue until FY 2009. The FY 2009 enacted budget provided funding for up to 18 additional vessels with anticipated delivery through FY 2009 and into early to mid FY 2010.
- The FY 2008 enacted budget provided CBP A&M a total of \$26.0 million to establish 11 additional marine sites. Within the \$26.0 million, \$12.0 million was provided for the site stand-up; to include facilities and equipment, and \$14.0 million was provided for initial staffing salaries and expenses. In addition, five new interceptor class marine vessels were purchased and began their deployment to the Great Lakes.
- In FY 2007, Congress provided \$70 million of which approximately \$30 million was used to purchase the new wing/tail assemblies for the SLEP. The remainder

- was used to continue conducting special structural inspections (SSIs) and extended special structural inspections (ESSIs), acquire other long-lead components, repay the loan of Navy materials needed to place the aircraft back in service as soon as possible, and for emergent requirements coming out of the service life assessment. The FY 2008 budget recurs \$47 million in the base to procure new wing/tails to continue the SSIs/ESSIs, and to continue long-lead material purchases. The results of the P-3 service life assessment were delivered to the government in May 2007, allowing for the definition of SLEP requirements and the development of a new cost estimate through planned completion over the next eight to ten years. Work continues on a competitive contract for the SLEP with a projected award in FY 2009. CBP A&M continued to conduct a series of SSIs and ESSIs according to Navy standards, which has allowed the P-3 aircraft to operate safely until they undergo complete over haul and their service lives can be extended by about 20 years. CBP awarded a contract for two to three new wing and tail assemblies for the SLEP, which should be delivered in FY 2009, along with numerous long-lead components needed for both the SSIs/ESSIs and the SLEP
- In addition to all of the above, the fourth of five primary air branch sites along the northern border was established at Grand Forks, North Dakota. The FY 2007 supplemental appropriation (P.L. 110-28) provided funding to accelerate the establishment of the fifth and last primary air branch in the Great Lakes region of Detroit, MI.

2009 Planned Accomplishments

- CBP A&M continues to induct into inventory, those assets listed above in the FY 2008 accomplishments section incrementally.
- From within base resources and initiative funding of \$20.4 million, CBP A&M continues several acquisition efforts including 2 MEA, 1 UAS, 1 MLH A-L Conversion, 1 C-550 Interceptor sensor upgrade, various maritime vessels, and \$5 million towards Wireless Airport Surveillance Platforms (WASP).
- The FY 2008 enacted budget included \$47.0 million to continue the P-3 SLEP and extend the service life of CBPs existing aircraft by about 20 years. The FY 2009 enacted budget includes an additional \$9.0 million for a total funding level of \$56 million for P-3 SLEP. Funds will continue the procurement of the new wing/tail assembly, the wing/tail refurbishment kits for aircraft that do not need new wings/tails, continue the special structural inspections (SSI) and extended special structural inspections (ESSI), and begin the SLEP of the first of the 16 P-3 aircraft in the CBP inventory.

2010 Planned Accomplishments

- The FY 2010 budget request includes an additional \$9.0 million for P-3 SLEP which brings the total funding level to \$65.0 million. These funds will continue the procurement of the new wing/tail assembly, the wing/tail refurbishment kits for aircraft that do not need new wings/tails, continue the special structural inspections (SSI) and extended special structural inspections (ESSI), and induct an additional P-3 platform into the SLEP program.

- CBP A&M plans to address seams and gaps in radar coverage along the northern border by utilizing the DHS/DOD Long Range Radar joint program office to manage Long Range Radar Systems, and utilize Interceptor and the Multi Role Enforcement Aircraft (MEA).
- From within base resources, A&M will continue the acquisition of five or six AS-350s (Light Enforcement Helicopters), UAS spare parts and components (but no aircraft) one C550 Sensor Upgrade, continue the conversion of two UH-1 to UH-II Utility Helicopters and purchase a mixture of marine vessels.

1. Project Description, Justification and Scope

Project Description

In the summer of 2006, CBP A&M developed and submitted to Congress a Strategic Air Plan that defines the end state for the air force based on ongoing threat assessments, mission requirements determined by higher authority, and the evolving requirements of the Secure Border Initiative (SBI). In 2007, this Plan was updated to incorporate Marine vessels and Unmanned Aircraft Systems (UAS). The UAS PPA was formally merged into CBP A&M Procurement PPA in FY 2007.

The Air Plan calls for the air and marine fleets to be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The A&M Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, UAS, retire unserviceable assets, upgrade sensors and surveillance capabilities,

and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

Program Justification

Gain operational control of the borders

Through the coordinated use of integrated air and marine force to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP A&M support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively. This support also provides rapid-response relocation of personnel and equipment, to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract support the aircraft that makes it possible for CBP A&M to perform this mission.

2. Significant Changes

The funds requested will enable continued support for program operations through FY 2010 and include an increase to maintain current levels.

3. Project Schedule

	FY 2007	FY 2008	FY 2009	FY 2010
Aircraft Acquired	14	30	2	5
UAS Acquired	1	1	1	0
Vessels Acquired	5	21	18	20

6. Method of Performance

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

Charles Bourquardez

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Sharon Lim

3. Is there an Integrated Project Team?

Yes

If so, list the skill set represented.

The IPT is comprised of individuals from the Office of CBP Air, Office of Finance, Office of Information and Technology, Technology Systems Program Office (TSPO), Office of Chief Counsel, SBI-PMO, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air & Marine, (202) 344-3950.

Fiscal Year	Strategic Goal(s) Supported	Performance Measure / Type	Explanation or Description	Target or Goal	Actual Performance Results	Performance Metric Improvement
2010	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Provide Strategic Air Coverage Long Term/ Outcome	This measure shows the progress made toward expanding strategic air surveillance coverage along the borders and approaches to the borders of the U.S. by the end of the decade. The measure is the percent of border miles at risk that is under surveillance by CBP patrol-type aircraft (including unmanned aircraft systems). Measuring surveillance is an evolving metric. In FY 2003 and FY 2004 metrics were based on the measurement of 7200 P-3 flight hours provided in support of drug enforcement. In FY 2005, the UAV was	2003 – 2400 2004 – 2400 2005 – 7200 *2006 – 7200 2007 – 60% (of border at risk) 2008 – 70% 2009 – 80% 2010 – 90%	2003 – 4700 2004 – 6700 2005 – 7500 2006 – 55%	Effective FY08 the measure will be represented by the miles of at risk borders under strategic air surveillance in response to the anti-terrorism mission.

			introduced and added to these total hours.			
2010	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Extend the Zone of Security Beyond the Nation's Physical Boundaries Long Term/ Outcome	This measure monitors A&M efforts in reducing, with the intent of ultimately denying, the use of border air space for acts of terrorism or smuggling using intelligence and threat assessments. The number of Targets of Interest (TOI) has been reduced over time as strategic surveillance and tactical responses by CBP interceptors and patrols, work with the Border Patrol on the ground, to deter the use of air routes into the U.S. A&M continues to gather and analyze intelligence on past and current threat	2003 – 20 2004 – 11 2005 – 10 2006 – 10 2007 – 10 2008 – 10	2003 – 20 2004 – 11 2005 – 10 2006 – 13	N/A

			<p>patterns to forecast and disseminate information about potential and emerging threats. To highlight the effectiveness of these practices, commencing in the 1970's, there were over 7,000 known Targets Of Interests (TOI) violating the southwestern border airspace. This number was reduced to approximately 150 in the mid-1980's and further reduced to 10 in 2005. The targeted goal for this measure is to maintain this low level of border incursions at a minimum and reduce it if possible, until there are no border incursions.</p>

FY 2008 Actual does not reflect what is in MAX by OCC for the O&M PPA
FY 2009 includes \$44.4M in carryover

Mission Statement

CBP Air & Marine (A&M) is responsible for the protection of the borders of the United States. CBP A&M identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. CBP A&M has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, CBP A&M has established a presence along the northern border. CBP A&M has a staff of over 1,871 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Systems (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Travel (OC 21)	\$ 21,163	\$ 18,240	\$ 15,240	\$ (3,000)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Change reflects \$3,000,000 in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Transportation of Things (OC 22)	\$ 2,011	\$ 1,334	\$ 942	\$ (392)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidents to the transportation of things. Change reflect \$392,000 in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Other Rent (OC23.2)	\$ 18,404	\$ 18,305	\$ -	\$ (18,305)

Payments to a non-Federal source for rental of space, land, and structures. Change reflects a decrease of \$8,860,000 for transfer to facilities, a realignment of \$5,881,000 to Other Services, and \$3,564,000 in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Other Services (OC 25.2)	\$ 199,492	\$ 262,055	\$ 264,701	\$ 2,646

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Change reflects an increase of \$3,055,000 for the maintenance and operation of FY 2009 initiatives,\$5,881,000 transfer-in from Other Rents, and \$6,290,000 reduction in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Supplies & materials (OC 26.0)	\$ 102,671	\$ 104,707	\$ 73,558	\$ (31,149)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction of manufacture, (c) used to form a minor part of equipment of property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Change reflects \$31,149,000 reduction in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Equipment (OC 31.0)	\$ 14,044	\$ 19,776	\$ 19,776	\$ -

Equipment includes all costs for the purchase of personal property of a durable nature or the installation of equipment when performed under contract.

With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Travel (OC 21.0)	\$ 956	\$ 345	\$ 127	\$ (218)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Change reflects \$218,000 reduction in carryover for FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Other Services (OC 25.0)	\$ 67,864	\$ 61,103	\$ 8,378	\$ (52,725)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Net change reflects \$9,000,000 annualization for P-3 SLEP, a decrease of \$5,000,000 non-recr for FY 2009 funding increases, and \$56,725,000 reduction in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Supplies & materials (OC 26.0)	\$ 26,814	\$ 46,306	\$ 39,367	\$ (6,939)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction of manufacture, (c) used to form a minor part of equipment of property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Change reflects a decrease of \$1,000,000 non-recr for FY 2009 funding increases, and \$5,939,000 reduction in carryover from FY 2008.

	2008 Actual	2009 Enacted	2010 Request	2009-2010 Change
Equipment (OC 31.0)	\$ 268,221	\$ 178,478	\$ 83,737	\$ (94,741)

Equipment includes all costs for the purchases of personal property of a durable nature or the installation of equipment when performed under contract. Funding provides for the procurement of aircraft. Change reflects a decrease of \$14,369,000 non-recr for FY 2009 funding increases, a decrease of \$5,000,000 for the Wireless Access Surveillance Platform (WASP), and \$75,372,000 reduction in carryover for FY 2008.

BUDGET REQUEST AND SUPPORTING INFORMATION

U. S. Customs and Border Protection (CBP) Facilities Management

I. Appropriation Overview

CBP consistently strives to improve the planning, acquisition, execution, and management of its Real Property Program, and has restructured the FY 2010 budget request accordingly. CBP proposes a consolidation of all facilities-related funding into a single account, CBP Facilities Management, so the agency can consistently plan, finance, and manage its multifaceted facilities portfolio to best fulfill the driving mission needs. The FY 2010 request consolidates funding for CBP construction, leasing acquisition, rent, facility program support, operations, management, headquarters support, and tunnel remediation activities into this account.

A. Mission Statement for Facilities Management:

The success of CBP's mission depends heavily on the health and effectiveness of its physical infrastructure, specifically the facilities that support its operations and administrative support requirements. Adequate facilities are critical to CBP operations in that they provide logistical and operational support to CBP's agents, officers, pilots and other personnel, protect critical assets, and supply strategically-located bases to improve mobility and promote maximum efficiencies on mission-related activities.

The CBP Facilities Management account provides the facilities and associated infrastructure required to obtain and maintain operational control of the border, a primary factor of CBP's mission to prevent terrorists and terrorist weapons from entering the United States, and to ensure the efficient flow of legitimate trade and travel across the border.

The CBP Facilities Management account addresses facilities related requirements for new, modernized, expanded, and sustained facilities, including housing quarters to:

- Maximize CBP operational capabilities, efficiencies, and integration;
- Accommodate increasing capacity demands associated with expanded mission focus, personnel growth, increased space requirements for property assets, and changing inspection, detection, and communications technologies
- Mitigate and correct deficiencies within existing real property inventory and structures;
- Replace temporary or substandard structures with permanent solutions; and
- Sustain real property inventory through proactive maintenance.

Specific CBP facility types include, but are not limited to: ports of entry, administrative office space, Border Patrol stations, Border Patrol sector headquarters, traffic checkpoints, forward operating base camps, laboratories, aviation hangars, marine piers/docks, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, small arms ranges, intelligence and operations coordination centers, residential housing units, and parcels of land.

All CBP facility efforts are planned, executed, and managed by the Office of Finance, Facilities Management and Engineering Directorate, operating in conjunction with its business partners, service providers, and internal/external stakeholders.

B. Budget Activities:

Facilities Construction and Sustainment

New Construction

New Construction is defined as the erection, installation, or assembly of a facility, building, or structure; or the replacement of an existing facility. Construction activities include, but are not limited to: planning services; land acquisition; environmental planning, compliance, assessment, surveys, and remediation; site and facility planning, design, architecture, and engineering services; construction; cabling, circuit, and local area network infrastructure equipment and services; voice infrastructure equipment and services; and overhead and project management and oversight fees.

Lease Acquisition

Lease acquisition within the CBP Facilities Management account provides for leasing activities for facilities, buildings, structures, and land through either the General Services Administration (GSA) or non-federal sources. These actions include many of the same activities as construction projects.

Alterations

Alterations are defined as remodeling, reconfiguring, improving, or making any physical changes to the facility, building, space, and/or structure, exclusive of maintenance and repair work. Alterations include the modernization of facilities to implement new or higher standards (including regulatory changes). This includes the replacement of building systems with upgraded systems and components. Alterations also comprise enhancements to accommodate new functions including mission changes. The activity includes planning (including environmental planning), engineering, design services, architectural and engineering work, and construction execution.

Maintenance, Repairs, and Operations

Maintenance - defined as the upkeep of real property assets, facilities portfolio, and infrastructure systems to offset serious deterioration. This activity provides resources for maintenance activities necessary to keep a facility in good working order over its expected service life. It includes regularly scheduled adjustments and inspections, preventive maintenance tasks including component replacement with like or comparable equipment.

Repairs - defined as work to restore damaged or worn-out property to a normal operating condition. This activity provides resources for repair activities necessary to keep a facility in good working order over its expected service life. This activity also provides resources for the repair and replacement work to restore facilities accelerated deterioration due to lack of sustainment, excessive age, natural disaster (storm damage), fire, accident, or other causes. It includes emergency response and service calls for minor repairs and major repairs or the replacement of building systems with like or comparable systems. This work includes regular roof replacement, refinishing wall surfaces, repairing and replacing electrical, heating, and cooling systems, replacing tile and carpeting, and similar types of work. As a basic distinction, repairs are curative and maintenance is preventive.

Operations – defined as those services that are required to keep the facility performing the function for which it is currently classified (i.e. custodial services, grass cutting, landscaping, snow removal, waste disposal, etc.).

Tunnel Remediation

Tunnel remediation is the process whereby cross-border tunnels are physically secured and rendered unusable after discovery. The remediation process includes: initial analyses, environmental services, project oversight and support, obtaining rights of entry, engineering/surveying, filling/plugging, inspection/acceptance, and reporting of associated status.

Housing

The CBP Housing Initiative will focus on reducing the extensive deferred maintenance backlog of existing CBP employee housing with an emphasis on critical repairs for health and safety and correcting structural deficiencies.

CBP Training Facilities

Address requirements for CBP Training Facilities such as the Advanced Training Center in Harpers Ferry, West Virginia.

Co-location

Address requirements for CBP facilities to achieve significant efficiencies through shared common services and more stable operating and maintenance costs. The campus will house the operational components, as well as a number of Mission Support offices and facilities.

Rent

CBP leases a substantial portion of the real property that it operates through the U.S. General Services Administration (GSA) and by direct lease delegation to non-federal sources. Rent includes funds to support rental of space, structures, facilities, land and building services for Office of Border Patrol, Office of Field Operations, Air and Marine, and Mission Support activities. Rent encompasses both rental payments to GSA, including actual, planned, and requested changes in inventory, and rental payments to others, both non-Federal and Federal sources. Rent for GSA facilities also covers all Federal Protective Service (FPS) security charges and in some instances, associated utilities.

Program Oversight and Management

Facility Program Planning and Management

The planning component of the CBP Facilities Management account provides for programmatic studies, services, and initiatives. Examples include: facility condition and strategic resource assessments; feasibility studies; data and information management solutions; space models; costing; valuation; depreciation methodologies and tools; contract management services; and reconciliation of assets. These planning initiatives provide the decision support and communication mechanisms that CBP needs to respond to emerging operational demands and evolving facility requirements.

Facility Program Support

CBP employs a highly skilled cadre of government and contract professionals to plan and administer the agency's facilities program. These resources include funding for government contract services to support administration of the CBP facilities program. (Funding for the government employees will remain in the Salaries and Expenses account.) Examples include: program and project management services and support associated with facility acquisition and leasing activities; environmental planning and

remediation; land and facility procurement; and site planning, design, architectural, and engineering services. The operating budget includes training, mail, communications services such as voice and data, cellular phones and blackberry services, rental of equipment and technologies, contract and support services, supplies, equipment, and all other operational expenses associated with the acquisition, management, and sustainment of real property assets and facilities portfolio.

C. Budget Request Summary:

The U.S. Customs and Border Protection requests \$678,633,000 for the FY 2010 Facilities Management account request. The total adjustments-to-base is \$272,866,000. There is a program increase request of \$2,566,000 for rent associated with new position initiatives.

- CBP's FY 2010 budget submission reflects the agency's request to establish a Facilities Management account, which would require transferring the existing Construction account current services funding to a new consolidated CBP Facilities Management account. This account is a consolidation of all CBP facilities-related funding into a single appropriation account so the agency can consistently plan, finance, and manage its facilities portfolio to best fulfill mission needs.
- In the American Recovery and Reinvestment Act of 2009 (ARRA), CBP received \$420 million for CBP-owned Land Port-of-Entry Modernization. Those funds are treated separately and distinctly from traditional CBP Construction activities and they are not included in this submission's charts, funding tables, or exhibits.

(Dollars in thousands)

PPA: CONSTRUCTION

	Perm Pos	FTE	Amount
2008 Actual	\$287,145
2009 Enacted	403,201
2010 Adjustments-to-Base	(403,201)
2010 Current Services	0
2010 Program Change	0
2010 President's Budget	0
Total Change 2009-2010	(403,201)

*The table above excludes ARRA funding of \$420 million provided in P.L. 111-5. The submission for FY 2010 reflects the establishment of a Facilities Management Account, which has 3 new Program/Project Activities (PPA): Facilities Construction and Sustainment, Rent, and Program Oversight and Management. The FY 2010 request includes:

- Non-recurrence of \$33.7 million related to the Advanced Training Center (Harper's Ferry, WV) FY 2009 enhancement
- Non-recurrence of \$127 million related to the Border Patrol facilities FY 2009 initiative
- Non-recurrence of \$8.5 million related to the CBP-owned Land Ports-of-Entry Modernization FY 2009 initiative
- A transfer of \$205 million to the Facilities Construction and Sustainment PPA
- A transfer of \$29 million to the Program Oversight and Management PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP is requesting to have the current services funding level that was originally in the Construction account be transferred among the three PPAs within the new Facilities Management account for FY 2010.

Significant accomplishments in FY 2008 include:

Completion of the following major construction projects: Campo, California Border Patrol Station; Sumas, Washington Border Patrol Station; Van Buren, Maine Border Patrol Station; Brownsville, Texas Border Patrol Station; Gibraltar, Michigan Border Patrol Station; and El Centro, California Sector Headquarters Station, and Harpers Ferry Firing Range.

FY 2009 planned accomplishments include:

Delivery of the following Office of Border Patrol locations: Ft. Hancock, New Mexico Border Patrol Station; El Paso, Texas Border Patrol Station; Uvalde, Texas Checkpoint; Willcox, Arizona Border Patrol Station, Wellton; Arizona Border Patrol Station; McAllen, Texas Border Patrol Station; Havre, Montana Border Patrol Station; Sweetgrass, Montana Border Patrol Station; Fort Fairfield, Maine Border Patrol Station; Rangeley, Maine Border Patrol Station; Weslaco, Texas Border Patrol Station.

PPA: FACILITIES CONSTRUCTION AND SUSTAINMENT

	Perm Pos	FTE	Amount
2008 Actual	\$0
2009 Enacted	0
2010 Adjustments-to-Base	239,356
2010 Current Services	239,356
2010 Program Change	0
2010 President's Budget	239,356
Total Change 2009-2010	239,356

CBP requests \$239 million in FY 2010 for the Facilities Construction and Sustainment PPA. This amount reflects the transfer of funding from the original Construction account as part of the establishment of a Facilities Management account.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP depends heavily on the health and effectiveness of its physical infrastructure, specifically the facilities, buildings, structures, and land that support its operations and administrative support requirements. The Facilities Construction and Sustainment PPA provides the facilities and associated infrastructure required to obtain and maintain operational control of the border, a primary factor of CBP's mission to prevent terrorists and terrorist weapons from entering the United States. Specific CBP facility types include, but are not limited to: ports of entry, administrative office space, Border Patrol stations, Border Patrol sector headquarters, traffic checkpoints, forward operating base camps, laboratories, aviation hangars, marine piers/docks, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, small arms ranges, intelligence and operations coordination centers, residential housing units, and parcels of land.

Current services for the Facilities Construction and Sustainment PPA in FY 2010 include the sustainment and support of existing buildings and structures as well as other efforts, such as tunnel remediation.

The FY 2010 budget submission does not include a request for *new* construction. Resources are requested to *sustain* the current inventory and support ongoing and program-wide efforts. The rapid evolution of CBP's mission, coupled with unprecedented growth, has left these vital assets in dire need of repair, expansion, and/or modernization. Many of the existing facilities were designed to accomplish legacy missions and are struggling to accommodate new operational demands, increases in personnel, high traffic volume, constant use, changes in technology, evolving design and security standards, and general aging and deterioration.

CBP requests \$402.3 million in FY 2010 for the Rent PPA. The FY 2010 request includes:

- A transfer of \$399.7 million as part of the consolidation (see page 6 for more detail)
- An increase of \$868 thousand for rent associated with the new positions in the Combating Southbound Firearms and Currency Smuggling initiative
- An increase of \$152 thousand for rent associated with the new positions in the Analyze and Employ Information initiative
- An increase of \$885 thousand for rent associated with the new positions in the Air and Marine personnel initiative
- An increase of \$660 thousand for rent associated with the new positions in the Import Safety and Trade Enforcement initiative

CURRENT SERVICES PROGRAM DESCRIPTION:

The Rent PPA is used for the National Rent Account. CBP leases a substantial portion real property through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities. Rent also encompasses physical security assessments and services for GSA facilities conducted by Federal Protective Services.

CBP requests \$37 million in FY 2010 for the Program Oversight and Management PPA. This amount reflects the transfer of funding from the original Construction account as part of the establishment of a Facilities Management account.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Program Oversight and Management (POM) PPA is used for the planning and management component of the CBP Facilities Management account. This PPA provides for programmatic studies, services, and initiatives in support of facilities management, acquisition, construction, and sustainment requirements. Examples include: facility condition and strategic resource assessments, feasibility studies, data and information management solutions, space models, costing, valuation, and depreciation methodologies and tools, contractual management and oversight, and reconciliation of assets. These planning initiatives provide the decision support and communication mechanisms that CBP needs to respond to emerging operational demands and evolving facility requirements. CBP employs a highly skilled cadre of government and contract professionals to plan, administer, and manage the agency's facilities portfolio and real property assets. These resources also include funding for government contract services to support administration and management of the CBP facilities program. The operating budget includes training, mail, communications services such as voice and data, cellular phones and blackberry services, rental of equipment and technologies, contract and support services, supplies, equipment, and all other operational expenses associated with the acquisition, management, and sustainment of real property assets and facilities portfolio.

[CONSTRUCTION]FACILITIES MANAGEMENT

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, [\$403,201,000] **\$678,633,000**, to remain available until expended, of which [\$39,700,000 shall be for the Advanced Training Center: Provided, That for fiscal year 2010 and thereafter, the annual budget submission of U.S. Customs and Border Protection for “Construction” shall, in consultation with the General Services Administration, include a detailed 5-year plan for all Federal land border port of entry projects with a yearly update of total projected future funding needs] **not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; and of which \$402,263,000 shall remain available until September 30, 2010.** (Department of Homeland Security Appropriations Act, 2009.)

Explanation of Changes:

The FY 2010 budget request reflects CBP’s effort to consolidate its facilities-related funding into a new appropriation account so the agency can consistently plan, finance, and manage its multifaceted facilities portfolio and real property assets.

This appropriation request reflects a transfer of the entire CBP Construction account, as well as those portions of CBP’s Salaries and Expenses (S&E), Air and Marine, and Border Security Fencing, Infrastructure, and Technology (BSFIT) appropriations that have been historically used for facilities-related needs. Accordingly, CBP requests that the name of the appropriation be more appropriately titled, “Facilities Management” in lieu of “Construction”.

Those portions of the CBP S&E, Air and Marine, and BSFIT appropriations include the following:

- National Rent Account – CBP leases a substantial portion of the real property that it operates through the U.S. General Services Administration (GSA) and by direct lease delegation to non-federal sources. Rent includes funds to support the rental of facilities, space, buildings, structures, and land, along with rent-related building charges and services, including services provided by the Federal Protective Service (FPS), for the Office of Border Patrol, Office of Field Operations, Air and Marine, and Mission Support activities. Rent encompasses both rental payments to GSA, including actual, planned, and requested changes in inventory, and rental payments to others, both non-Federal and Federal sources.
- Federal Protective Services (FPS) – FPS provides physical security assessments and services for GSA facilities.
- Facility Program Operations and Management – CBP employs a highly skilled cadre of government and contract professionals to plan, administer, and manage the agency’s facilities portfolio and real property assets. These resources include funding for contract services to support the administration and management of the CBP facilities program. (Funding for the government

employees will remain in the Salaries and Expenses account.) The operating budget includes training, mail, communications services such as voice and data, cellular phones and blackberry services, rental of equipment and technologies, contract and support services, supplies, equipment, and all other operational expenses associated with the acquisition, management, and sustainment of real property assets and facilities portfolio.

- Facilities Funding Plan – S&E appropriation for forced/non-discretionary leasing actions for legacy U.S. Customs entities.
- Facilities in the Washington, DC Area – S&E appropriation utilized for facility reconfiguration, alterations, and space acquisition activities for CBP personnel at the Ronald Reagan Building and other locations in the Washington, DC area.
- Overtime utilities in the Washington, DC Area – Expenses associated with after-hours use of facilities.
- Tunnel Remediation – traditionally an S&E appropriation for remediation of cross-border tunnels. Tunnel remediation is the process whereby cross-border tunnels are physically secured and rendered unusable after discovery. The remediation process includes, but is not limited to: planning and initial analyses/assessments, environmental studies, project oversight and support, plugging, obtaining rights of entry and land access, engineering/surveying, filling, inspection/acceptance, and reporting of associated status.

The FY 2010 budget request for Facilities Management also reflects a change to the current services structure. Unlike prior years, the current services request for FY 2010 does not include provisions for new construction. The revised current services structure is intended to sustain the current inventory and support ongoing and program-wide efforts.

The rapid evolution in CBP's mission, coupled with unprecedented growth, has left the CBP's real property assets in dire need of replacement, repair, expansion, and/or modernization. Many of the existing facilities were designed to accomplish legacy missions and are struggling to accommodate new operational demands, increases in personnel, high traffic volume, constant use, changes in technology, evolving design and security standards, and general aging and deterioration. The change to current services will better enable CBP to address its existing real property portfolio.

5. Cost Estimate Detail and Changes

(Dollars in Thousands)

The FY 2010 Budget Submission requests funding for sustainment of existing facility and infrastructure requirements. There is no request for funding for new construction projects.

6. Method of Performance

CBP Facilities Management requirements are executed through the U.S. Army Corps of Engineers (USACE), the General Services Administration, and the CBP Office of Procurement.

Through a Memorandum of Agreement, the USACE provides CBP with consolidated program management services for real estate planning and acquisition, planning and programming, environmental protection, design and cost engineering, construction and warranty enforcement and integrated occupancy services.

For facilities and construction projects, the schedule and funding are tracked within the current CBP accounting system. This system includes modules that store specific information on each asset. That information is automatically linked to key information systems and includes modules that cover all aspects of the assets. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects in Progress are tracked and reported on a monthly basis by Project Managers in the field. The tracking consists of monitoring the project delivery for construction and leasing through industry standards, including tracking each specific project’s schedule, scope, and budget.

Across CBP’s owned facilities, the general performance indices include:

1. Facility Condition - Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Strategic Resource Assessment will be the primary means by which this information will be generated in the future.
2. Facility Utilization - These indices track the square footage of space and the number of FTE's assigned.
3. Operating Costs - These indices track the cleaning / janitorial, maintenance and utility costs at the asset level.
4. Mission Dependency - The primary categories include: Mission Critical, Mission Dependent Not Critical, and Non Mission Dependent.
5. Energy Consumption - As part of the Operating Costs Indices, energy consumption and conservation measures are tracked separately.
6. National Historical Preservation Assets - Real Property Assets that could be eligible for the National Historical Preservation List are tracked.

Within the land ports of entry, CBP applies an additional set of performance indices including:

1. Mission and Operations - Factors for the mission and operations criterion measure the facility's compatibility with specific inspection responsibilities. Individual factors address the type of activities performed within the facility and features of the facility necessary for successful inspection services. This criterion contains factors that cause the most significant disruptions to inspection activities and conditions that reflect the significance of the facility's operations.
2. Life Safety and Security - The factors for security and life safety measure a facility's ability to protect occupants and visitors and allow law enforcement functions to maintain safe and secure control of the public and detained individuals. The individual factors address compliance with security and life safety standards (features incorporated in the facility to resist assault and allow staff to maintain operations during emergencies) and deficiencies that represent hazards to the occupants. Safety standards include building life safety codes, as well as federal standards developed in response to terrorist attacks or other threats faced by the occupants.
3. Space and Site Deficiencies - Space and site deficiencies are related to the functional work environment and the overall facility site. Space deficiencies are determined by applying utilization rates, based on space standards, to existing personnel and functions to calculate the amount of usable space that should be available in an existing facility. In addition, the major facility systems and site and building layouts are evaluated for functionality and expansion potential.
4. Personnel and Workload Growth - The personnel and workload growth criterion contains factors related to both current and future personnel, along with current and projected workload categories that generate the need for additional personnel and space at each facility. The points for many of the factors are determined through a national ranking system.

**7. Related Annual Funding Requirements
(Dollars in Thousands)**

	FY 2010 Current Estimate
Program Oversight and Management	\$37,013
Rent (including FPS)	402,263
Tunnel Remediation	7,743
HQ Mission Support	35,456
Maintenance, Repairs, and Operations	111,320
Alterations	84,837
Total	\$678,633

PPA Mission Statement

Provide the facilities that the U.S. Customs and Border Protection needs to perform its enforcement and trade facilitation mission.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Transportation of Things	\$888	\$528	\$0	(\$528)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. No funding is requested for FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Communication, Utilities, and miscellaneous char	\$64	\$38	\$0	(\$38)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. No funding is requested for FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Advisory and Assistance Services	\$2	\$1	\$0	(\$1)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. No funding is requested for FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Other Services	\$21,959	\$136,072	\$0	(\$136,072)

Other services include report contractual services with non-Federal sources that are not otherwise classified under this object class. No funding is requested for FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Purchase from Government Accounts	\$490	\$292	\$0	(\$292)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. No funding is requested for FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & maintenance of facilities	\$99,125	\$76,531	\$0	(\$76,531)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. No funding is requested for FY 2010.

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Operation & Maintenance of equipment	\$279	\$166	\$0	(\$166)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. No funding is requested for FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$1,041	\$619	\$0	(\$619)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the four criteria listed above, at the option of the agency. No funding is requested for FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$20,313	\$12,076	\$0	(\$12,076)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. No funding is requested for FY 2010.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Land & Structures	\$142,984	\$347,589	\$0	(\$347,589)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. No funding is requested for FY 2010.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection COBRA User Fees

I. Appropriation Overview

A. Mission Statement for COBRA User Fees:

The Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) user fees are authorized under Title 19 U.S.C. 58c. These fees are used to recover certain costs of Customs services. COBRA fees are made available through permanent/indefinite appropriation created by the user fee statute.

The fees are deposited in the Customs User Fee Account (No Year) at the U.S. Treasury. Excess collections, after reimbursements for inspectional overtime and preclearance costs are available without fiscal year limitation, except that \$30 million of such excess remains in a contingency fund for use in any year in which receipts are insufficient to cover the costs of providing the services described in the statute.

The COBRA statute mandates that the fee collections be used to pay for (in the order listed):

- All inspectional overtime
- Premium Pay
- Civil Service Retirement and Disability Fund (Agency Contribution)
- Excess Preclearance
- Foreign Language Proficiency Awards
- Enhanced Equipment and Support

B. Budget Activities:

Not Applicable

C. Budget Request Summary

Collections for COBRA User Fees in FY 2010 are estimated at \$398,131,000 a decrease of \$12,535,000 from FY 2009. When FY 2009 projections were made, it was anticipated that the Federal Aviation Authority (FAA) projections of 4.8% growth in air passenger volumes would also allow collections to reflect a similar rate of growth in FY 2009. However, the effect of economic uncertainties, (including global economic recession, falling GDP in the US, consumer pessimism, volatile fuel costs and fluctuating currency exchange rates) is expected to dampen both business and personal travel through FY 2009. Adjustments and reassessments are thus reflected in the FY 2010 Budget Request.

For FY 2010, data from CBP internal systems as well as International Air Transport Association (IATA) statements forecast a marginal increase of only 0.8% in air passenger traffic. CBP applied the same rate

to the previously downwardly revised FY 2009 projections to project collections in FY 2010. The FY 2010 projections are 3.1% below the FY 2009 enacted level.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
COBRA User Fees
Program Performance Justification
(Dollars in thousands)

PPA: COBRA User Fees

	Perm		
	Pos	FTE	Amount
2008 Actual	1,440	1,440	378,679
2009 Enacted	1,538	1,538	410,666
2010 Adjustments-to-Base	(12,535)
2010 Current Services	1,538	1,538	398,131
2010 Program Change
2010 Request	1,538	1,538	398,131
Total Change 2009-2010	(12,535)

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

COBRA User Fees are set legislatively and rate adjustments require a statutory change. The American Jobs Creation Act of 2004 (P.L. 108-357 Section 892) authorized CBP to increase individual fees (excluding those already at their maximum levels) up to 10%. This increase became effective in April 2007.

The majority of funds that contribute to COBRA fees are generated by air passenger travel. When COBRA collections were originally projected, CBP was expecting that air passenger volumes would increase by 4.8%. However, due to the global recession and the downturn in the U. S. economy in FY 2009, CBP is now anticipating an air passenger volume decrease by 5%, which may be offset somewhat by marginal increases in other fee generating environments, such as sea and land.

For FY 2010, data from internal CBP systems are supported by International Air Transport Association (IATA) forecasts of a marginal increase of only 0.8% in air passenger traffic. Consequently CBP is applying a correspondingly conservative rate of growth in COBRA fee collections, by 0.8% to the previously downwardly FY 2009 estimates in the same period.

CURRENT SERVICES PROGRAM DESCRIPTION:

The components of the COBRA User Fees account are: international air and sea passenger, commercial trucks, loaded/partially loaded rail cars, commercial vessels, private aircraft and vessels, dutiable mail, customs broker permits, barges/bulk carriers, cruise vessel passenger fees and express consignment carrier fees.

*CBP and the appropriations committees are waiting for a decision from OMB on whether the \$639.4 million dollars balance due to collections from a temporary fee increase and elimination of country exemptions can become available to CBP via a specific appropriation. Until the availability of this balance is clarified by OMB these funds are deemed unavailable for CBP.

Note: Represents a realignment of funds from non-pay to pay categories to cover salary and benefit costs.

PPA Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent/indefinite appropriation created by the user fee statute. CBP collects customs inspection fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

The fees are deposited in the Customs and Border Protection User Fee Account (No Year) at the U.S. Treasury. The excess of collections over

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Inspection User Fees (IUF)

I. Appropriation Overview

A. Mission Statement for Immigration Inspection User Fees:

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for International Arrivals of air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the air and sea passenger fees to generate revenues that would reimburse “the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.” (These functions were transferred to the Secretary of the Department of Homeland Security by the Homeland Security Act of 2002.)

B. Budget Activities:

Not Applicable

C. Budget Request Summary

CBP’s share of the IUF collections for FY 2010 is estimated at \$522,322,000, a decrease of \$47,737,000 from the enacted FY 2009 levels.

The Collections estimate represents CBP’s share of the Immigration User Fee (IUF). Historically, the majority of funds (95%) for IUF fees are generated by International Air Passenger travel; marginal IUF fees are generated in the sea environment. When FY 2009 IUF collections were originally projected, CBP was expecting that air passenger volumes would increase by 4.8%. Multiple sources of data, including databases internal to CBP as well as external industry specific documents such as the International Air Transport Association’s (IATA) Monthly Economic Briefing Report confirm an anticipated rate of reduction of 5% in air passenger volumes. As a result, CBP’s estimate of a 4.8% decrease in air passenger volumes for FY 2009 is robustly validated and substantiates estimates of decreased IUF collections for this period.

For FY 2010, data from CBP internal systems are again validated by IATA forecasts of a marginal increase of only 0.8% in air passenger traffic. While IUF fees are generated in both Air and Sea environments, there is relatively little data to estimate collections generated in the latter environment. Consequently, CBP has applied a conservative rate of growth of 0.8%, generated by Air Passenger volumes only, from the previously downwardly revised FY 2009 projections to estimate collections in FY 2010. The FY 2010 estimates are 8.4% below the FY 2009 enacted level.

Total Change 2009-2010	144	144	(47,737)

- FY 2008 and FY 2009 values reflect updated collections and estimates
- The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

As established by a Memorandum of Understanding (MOU) signed by CBP and ICE in 2004, the formula for the disbursement of IUF Collections between the two agencies is set at 82.63% for CBP and 17.37% for ICE

In FY 2010, CBP expects a decrease of \$47.7 million in IUF collections from the FY 2009 projections. Several factors contribute to lowered expectations: \$46.4 million were received in FY 2007 but were accounted for in FY 2008, (CBP received \$38.2 million or 82.63% share) resulting in inflated FY 2008 collections. Further, when FY 2009 projections were made it was anticipated that the Federal Aviation Authority's (FAA) projections of 4.8% growth in air passenger volumes would allow collections to reflect a similar increased rate of growth in FY 2009. However, the effect of economic contractions, including a global economic recession, falling GDP in the US, increasing consumer pessimism, volatile fuel costs and fluctuations in exchange rates, is expected to dampen both business and personal travel through FY 2009. The International Air Transport Association (IATA) has projected significant decreases in air passenger traffic due to the recession. In FY 2010 forecasts predict a marginal increase of only 0.8% in air passenger traffic. CBP applied this same rate to the previously downwardly revised FY 2009 projections to estimate the collections in FY 2010.

CURRENT SERVICES PROGRAM DESCRIPTION:

As established in a Memorandum of Agreement between CBP and ICE, funds from the Immigration Inspection User Fee account are used by CBP (82.63%) and ICE (17.37%) to recover the costs of immigration inspection services and detention and removal of inadmissible aliens. At air and sea ports of entry specifically, the fees cover the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Enforcement Fines

I. Appropriation Overview

A. Mission Statement for Immigration Enforcement Fines:

Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996 created the Immigration Enforcement Account (IEA). In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

B. Budget Activities:

Not applicable.

C. Budget Request Summary

Based on previous year collections, FY 2010's Immigration Enforcement Fines collections are estimated at \$2,109,000, a decrease of \$1,222,000 over FY 2009 estimates.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security

Immigration Enforcement fines**

Summary of FY 2010 Budget Estimates by Program/Project Activity
(Dollars in Thousands)

Program/Project Activity	FY 2008 Actual		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Immigration Enforcement Fines	22	\$2,289	23	\$3,331	23	\$2,109	---	(\$1,222)	---	\$ -	---	(\$1,222)
Subtotal, Enacted Appropriations and Budget Estimates	22	\$2,289	23	\$3,331	23	\$2,109	---	(\$1,222)	---	\$ -	---	(\$1,222)

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Immigration Enforcement Fines
Program Performance Justification
(Dollars in thousands)

PPA: Immigration Enforcement Fines

	Perm Pos	FTE	Amount
2008 Actual	22	22	2,289
2009 Enacted	23	23	3,331
2010 Adjustments-to-Base	(1,222)
2010 Current Services	23	23	2,109
2010 Program Changes
2010 Request	23	23	2,109
Total Change 2009-2010	(1,222)

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

Due to an anticipated decrease in air passengers arriving to the United States from foreign locations in FY 2009 and a projected marginal increase in FY 2010, collections in Enforcement Fines are projected to decrease by \$1,222 in FY 2010 from the enacted FY 2009 levels.

CURRENT SERVICES PROGRAM DESCRIPTION:

These funds will be used for the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens at air and sea ports of entry in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

PPA Mission Statement

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Land Border Inspection Fee

I. Appropriation Overview

A. Mission Statement for Land Border Inspection Fee:

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

The following fees are deposited into the Land Border Inspection Fee account:

- Dedicated Commuter Lane additional vehicle (DCL)
- Arrival/Departure Land Border (I-94)
- Non-Immigrant Visa Waiver (I-94W)
- Canadian Boat Landing Permit Individual (I-68)
- Canadian Boat Landing Permit Family (I-68)
- Replacement of Papers for Non-resident Mexican Crossing (I-190)
- NEXUS
- SENTRI (Secure Electronic Network for Travelers Rapid Inspection)
- Fast (Free and Secure Trade Program) Driver Application Fee

B. Budget Activities:

Not applicable.

C. Budget Request Summary

Collections for Land Border Inspection Fee in FY 2010 are estimated at \$33,810,000 and will support 287 positions. An increase of \$6,930,000 over the enacted FY 2009 collections is based on higher than expected growth in revenues in FY 2008. However, it is unclear how the current global recession will impact collections in FY 2010.

Total Change 2009-2010	6,930

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

CBP anticipates an increase of \$ 6,930,000 in Land Border Inspection Fees in FY 2010 as compared to the FY 2009 enacted levels.

CURRENT SERVICES PROGRAM DESCRIPTION

As authorized by law, Land Border Inspection Fees are used to recover part of CBP's costs of immigration inspections at land border ports of entry. This includes inspections of pedestrians, buses, passenger occupancy vehicles, and rail cars. It also includes antiterrorism efforts, dedicated lane programs, and forms processing.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection APHIS User Fees

I. Appropriation Overview

A. Mission Statement for APHIS User Fees:

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136a authorized the Secretary of Agriculture to prescribe and collect fees to recover the costs of providing Agriculture Quarantine and Inspection (AQI) services for international arrivals of passengers, conveyances, animals, plants and agricultural goods at Ports of Entry. This authority establishes fees on five modes of international passenger transportation: (i) commercial aircraft, (ii) sea going vessels, (iii) trucks with single entry, (iv) trucks operating under a multiple entry decal, and (v) loaded rail cars. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with AQI user fees.

B. Budget Activities:

Not Applicable

C. Budget Request Summary

Collections for APHIS Fees in FY 2010 are estimated at \$325,276,000 (reflecting CBP's 60% share of total APHIS related collections) to fund 2,332 FTE positions. The total adjustments-to-base is a decrease of \$8,157,000.

While APHIS fees are generated in multiple environments, Air, Land and Sea, there is relatively little data to reassess collections generated by these environments, due to the fact that CBP is not the lead agency and simply receives its allocated share from the USDA. To estimate collections in FY 2010 and extrapolating from the economic climate and its overall effect on the bases of fee generation, CBP has conservatively applied a 0.8% rate of growth to the most recent and previously downwardly revised FY 2009 projections. The FY 2010 estimate reflects a 2.4% decrease from the FY 2009 enacted numbers.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
APHIS User Fees
Program Performance Justification
 (Dollars in thousands)

PPA: APHIS User Fees

	Perm. Pos	FTE	Amount
2008 Actual	2,468	2,468	317,011
2009 President's Budget	2,332	2,332	333,433
2010 Adjustments-to-Base	(8,157)
2010 Current Services	2,332	2,332	325,276
2010 Program Changes
2010 Request	2,332	2,332	325,276
Total Change 2009- 2010	(8,157)

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

When FY 2009 projections were made it was anticipated that the Federal Aviation Authority's (FAA) projections of 4.8% growth in air passenger volumes coupled with CBP estimates based on historical trends and patterns, would allow for a similar increased rate of growth for fee revenues in FY 2009. However, the effect of economic contractions, including a global economic recession, falling GDP in the US, increasing consumer pessimism, volatile fuel costs and currency exchange rate fluctuations, requires reassessment to reflect a reduction in international air travel in FY 2009.

For FY 2010, data from CBP internal systems as well as International Air Transport Association (IATA) statements forecast a marginal increase of only 0.8% in air passenger traffic. While APHIS fees are generated in multiple environments, Air, Land and Sea, there is relatively little scope to reassess collections generated by these environments, in part because CBP receives its share from the lead agency – USDA. Consequently, CBP has applied a 0.8% rate of growth to the previously, downwardly revised FY 2009 projections in order to estimate collections in FY 2010. The FY 2010 estimate reflects a 2.4% decrease from the FY 2009 enacted numbers.

CURRENT SERVICES PROGRAM DESCRIPTION:

These funds will be used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck (per crossing and annual decal) and loaded rail car inspectional activities associated with the APHIS user fees.

PPA Mission Statement

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agriculture Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to the fees.

	FY 2008 Actual	FY 2009 Enacted	FY 2010 Request	FY 2009 to FY 2010 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Puerto Rico Trust Fund

I. Appropriation Overview

A. Mission Statement for Puerto Rico Trust Fund:

Title 48 U.S.C. 740 authorizes the collection of duties, user fees and taxes in Puerto Rico and the creation of the Puerto Rico Trust Fund. Collections in Puerto Rico, less the costs of providing inspection and law enforcement services in the Island, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These collections are intended to fund the enforcement of U.S. Customs laws and collections of taxes and revenues, and to combat criminal elements that have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the United States.

B. Budget Activities:

Not applicable.

C. Budget Request Summary

Based on collection trends and the severe recession the Puerto Rican economy is facing, CBP projects a 5.1% percent decrease in collections from the enacted FY 2009 levels. Collections of duties, user fees, and taxes in Puerto Rico in FY 2010 are estimated at \$91.8 million.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Puerto Rico Trust Fund
Program Performance Justification
(Dollars in thousands)

PPA: Puerto Rico Trust Fund

	Perm		
	Pos	FTE	Amount
2008 Actual	606	606	113,403
2009 Enacted	529	529	96,719
2010 Adjustments-to-Base	(4,935)
2010 Current Services	529	529	91,784
2010 Program Change
2010 Request	529	529	91,784
Total Change 2009-2010	(4,935)

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

A decrease of \$4,935,000 from FY 2010 Request is anticipated, due to observed collection trends and the economic recession Puerto Rico is currently facing.

CURRENT SERVICES PROGRAM DESCRIPTION

CBP and U.S. Immigration and Customs Enforcement (ICE) have entered into a Memorandum of Agreement with the government of Puerto Rico to provide customs inspection and enforcement services in Puerto Rico. Collections in the Puerto Rico Trust Fund are used to fully reimburse CBP and ICE's costs incurred in Puerto Rico, excluding services covered by other inspection user fees.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Small Airport User Fee

I. Appropriation Overview

A. Mission Statement for Small Airport User Fee:

The Small Airport User Fee is authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c (b) (9) (A) (i). The Small Airport User Fee program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the user fee airport and Customs and Border Protection, and may be adjusted annually as costs and requirements change.

B. Budget Activities:

Not applicable.

C. Budget Request Summary

Based on the collections from the Small Airport User Fee, CBP is requesting 54 positions and \$8,164,000 for FY 2010.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

Total Change 2009-2010	1,107

The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

CURRENT SERVICES PROGRAM DESCRIPTION

The Small Airport User Fee program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. New facilities have a higher charge for the first year to recover upfront costs. CBP expects an increase in revenues in FY 2010 due to the opening of new user fee airports and expansion of current facilities.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Inspection User Fees (*Proposed new account*)

I. Appropriation Overview

A. Mission Statement for Inspection User Fees:

To further advance the “One-Face-at-the-Border” Initiative begun in 2003, the Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) is proposing to consolidate the statutes that govern certain customs and immigration inspection charges that financially support CBP’s “integrated” inspections at our ports of entry. If enacted the proposed legislation will improve CBP’s governance of user fees, generate additional revenues, and provide benefits for the industries that are currently paying multiple fees for integrated inspection services. Collections from the consolidated inspection user fees would be deposited into a new account to be called the Inspection User Fees Account (IUFA).

The proposed legislation aims to amend several sections of the customs and immigration user fee authorities. This legislation is intended to improve cash flow and reduce the need to carryover large unobligated balances to cover unexpected cost spikes and/or reductions in collections. DHS is proposing to require air and sea passenger carriers to remit user fees on a monthly basis, instead of quarterly as currently mandated. The proposed legislation would amend the COBRA user fee structure which under the current legal framework functions more like quasi taxes. Another challenge caused by the current user fee governing structure is the extension of the customs air passenger user fee exemptions to millions of passengers whose journey originates in Canada, Mexico, and most of the Caribbean. Based on CBP estimates, the elimination of country exemptions in the air environment will generate additional revenues. If country exemptions are eliminated, air passenger user fee collections would either approximate or fully recover the cost of inspecting air passengers.

The proposed legislation includes other improvements in areas ranging from standardization of the passengers’ record keeping requirement for air carriers and cruise lines to the harmonization of the definition of the United States for user fee liability purposes.

Under the current customs and immigration user fee structures in FY 2010 collections from these two user fees are estimated to support 6,459 FTEs. If enacted, the consolidated Inspection User Fees would support 8,167 FTEs, representing an increase of 26 percent.

The proposed consolidated Inspection User Fees would be made available through permanent/indefinite appropriations.

The proposed, consolidated Inspection User Fees would be deposited into a new IUFA (No Year) account at the U.S. Treasury. The revenues from the consolidated Inspection User Fees would be used to cover the full costs, to the extent possible, incurred in providing inspectional services for passengers and conveyances entering the United States.

B. Budget Activities:

Not applicable.

C. Budget Request Summary

The Inspection User Fee Account is a new fee account that will consolidate COBRA and IUF and is estimated to be \$1,017,693,000 and 8,167 FTE in FY 2010.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

2010 Program Changes
2010 Request	8,167	8,167	1,017,693
Total Change 2009- 2010	1,852	1,852	36,968

1. Represents consolidated COBRA and Immigration Inspection User Fees
2. The numbers included in the table represent the enacted amounts; while the numbers included in MAX represent the latest fee projections that were based off of current collection rates.

Below is a crosswalk of the two existing fee accounts to the proposed new fee account:

Fee Account	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	POS	FTE	Amount	POS	FTE	Amount	POS	FTE	Amount
COBRA and ECCF as currently authorized	1,440	1,440	378,679	1,538	1,538	410,666	1,538	1,538	398,131
Minus ECCF ¹							(145)	(145)	(22,940)
Removal of Country Exemptions and Additional FTEs to be supported by COBRA fees due to new authorization which will pay for services services directly related to fees. ²							1,853	1,853	120,180
Revised COBRA portion							3,246	3,246	495,371
Immigration User Fee	5,265	5,265	611,274	4,777	4,777	570,059	4,921	4,921	522,322
Total, as Currently Authorized	6,705	6,705	989,953	6,315	6,315	980,725	6,459	6,459	920,453
Total, Proposed New Account							8,167	8,167	1,017,693

1. Historically, COBRA budget submissions have included the anticipated collections from the Express Consignment Carrier Fee or ECCF (19 USC 58c(b)(9)(A)(ii)). However, the User Fee Consolidation Proposal, if enacted, will only impact only the COBRA fees under 19 USC 58c(a)(1-8). For fiscal year 2010, CBP projects ECCF to total \$22.9 million. If COBRA and Immigration User Fees were consolidated, ECCF collections will continue to be deposited in the Customs User Fee Account.
2. Under current authority CBP is authorized to use COBRA collections to pay for inspectional overtime, premium pay, benefits, preclearance services, foreign language proficiency awards, and enhanced equipment and positions. These expenses are not required to directly related to services rendered to the fee payers.

The CBP user fees are set legislatively and a review to determine the adequacy of the charges is conducted every three years and submitted to the appropriate authorizing committees in Congress, including recommendations for user fee adjustments.

The large majority of collections to be deposited into the Inspection User Fees Account will come from the air passenger user fee. CBP estimates that approximately 80 percent of the total user fee collections in FY 2010 will be generated by air passengers. CBP estimates a significant increase in collections from the CBP user fee due to the elimination of the air passenger customs user fee exemptions and a marginal 0.8 increase in air passenger volumes in FY 2010.

CURRENT SERVICES PROGRAM DESCRIPTION:

The components of the Inspection User Fee Account are: air and sea passengers, aircraft clearance, commercial trucks, loaded rail cars, commercial vessels, dutiable mail, and customs broker permits.

IV. Program Justification of Changes

Not applicable

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

The proposed authorization language enabling the fee consolidation will be provided to the appropriate Congressional committees as soon as possible.

1. DHS Inspection User Fees is a proposed new fee account to consolidate COBRA and Immigration Inspection User Fees in FY 2010.

Note: Represents a realignment of funds from non-pay to pay categories to cover salary and benefit costs required to maintain FTEs. All FY 2009 to FY 2010 changes reflect a technical adjustment due to the increased collection in fees

PPA Mission Statement

Customs and Border Protection Inspection is proposing to consolidate two existing fee accounts (Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) and Immigration Inspection User Fees (IUF)) and establish the DHS Inspection User Fees account. The proposed legislation will consolidate the authorities that govern the user fees that financially support CBP's inspection of passengers and conveyances entering the United States. This legislation will improve CBP's governance on user fees and produce benefits for the industries that are currently paying multiple fees for integrated inspection services.

	FY 2009 Actuals	FY 2009 Enacted	FY 2010 Request	FY 2009 to FY 2010 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection

CBP Express Consignment Carrier Facilities User Fee *(as part of the Inspection User Fee Proposal)*

I. Appropriation Overview

A. Mission Statement for Express Consignment Carrier Facilities User Fee:

Customs and Border Protection Express Consignment Carrier Facilities (ECCF) User Fee is authorized under 19 USC Section 58c(b)(9)(A)(ii) and (b)(9)(B). CBP collects ECCF user fees to help cover the costs of providing customs cargo inspection services to express consignment carrier or centralized hub facilities. The authority governing the ECCF charge also stipulates that out of the \$1 per individual airway bill, CBP is authorized to charge 50 percent of the amount collected, which shall be paid to the Secretary of the Treasury. Therefore, CBP retains 50 percent of the collections and transfers, through a negative warrant, the remaining 50 percent to the Treasury's General Fund.

Fee receipts are available through the Customs User Fee Account (No Year) at the U.S. Department of the Treasury (Treasury). The revenues from ECCF collections are authorized to fully recover the costs of providing CBP inspection services at express consignment facilities and courier hubs.

B. Budget Activities:

Not Applicable

C. Budget Request Summary

Collections from the CBP Express Consignment Carrier Facilities User Fees is estimated at \$22.9 million (CBP share) for FY 2010. If COBRA and Immigration User Fees are consolidated, ECCF collections will continue to be deposited separately into the Customs User Fee Account.

II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security
U.S. Customs and Border Protection
 Express Consignment Carrier Facilities
 Summary of FY 2010 Budget Estimates by Program/Project/Activity
 (Dollars in Thousands)

Budget Activity	FY 2008 Actual		FY 2009 Enacted		FY 2010 President's Budget		Increase (+) or Decrease (-) For FY 2010					
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	Total Changes		Program Changes		Adjustments-to-Base	
							FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Express Consignment Carrier Facilities					145	\$ 22,940						
Net, Enacted Appropriations and Budget Estimates					145	\$ 22,940						

Note: Previous budget submissions have included ECCF user fee with COBRA user fee collections.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Express Consignment Carrier Facilities User Fee
Program Performance Justification
 (Dollars in thousands)

PPA: Express Consignment Carrier Facilities

	Perm. Pos	FTE	Amount
2008 Actual	N/A
2009 President's Budget	N/A
2010 Adjustments-to-Base	22,940
2010 Current Services	145	145	22,940
2010 Program Changes
2010 Request	145	145	22,940
Total Change 2009- 2010	N/A

Note: Previous budget submissions have included ECCF user fee with COBRA user fee collections.

Historically, COBRA budget submissions have included anticipated collections from the Express Consignment Carrier Fee (ECCF) under 19 USC 58c(b)(9)(A)(ii). However, the user fee consolidation proposal, if enacted, will only impact the COBRA fees under 19 USC 58c(a)(1-8). For Fiscal Year 2010, CBP projects ECCF to total \$22.9 million. If COBRA and Immigration User Fees are consolidated, ECCF collections will continue to be deposited separately into the Customs User Fee Account.

CURRENT SERVICES PROGRAM DESCRIPTION:

The fee is for the inspection services provided by CBP officers at express consignment facilities and courier hubs.

A. Mission and Description of U.S. Customs and Border Protection

CBP is charged with the dual mission of securing our Nation's borders while facilitating legitimate trade and travel. CBP accomplishes this mission through six operational offices: the Office of Border Patrol, the Office of Field Operations, the Office of Air and Marine, the Office of International Affairs, the Office Internal Affairs, and the Office of International Trade. These six offices receive critical support from CBP's other mission-focused offices. Since the publication of our first strategic plan in 2005, CBP has made steady progress toward: protecting our country from the threats of global terrorism, illegal migration, and trafficking of narcotics and other contraband; protecting our economy by enforcing trade laws, intellectual property rights, and collection of revenue on goods imported into the United States; protecting the food supply and agricultural industry from pests and disease; and increasing the security of our airspace.

CBP's FY 2009-2014 strategic plan is one of the most important tools that will be used to chart the Agency's course of action for the next five years. It is designed to help guide the strategic planning efforts of the various offices and programs within CBP; enabling the development of effective strategies and the establishment of key priorities needed to achieve CBP's mission and improve organizational performance.

CBP's mission statement: CBP is America's frontline, guardians of the Nation's borders. CBP protects America and foster its economic security by securing the borders against the entry of terrorists and instruments of terror and by enforcing the laws of the United States, while ensuring the efficient flow of legitimate trade and travel. CBP leverage its enforcement and intelligence-gathering capabilities to execute the mission of border and airspace security. CBP cultivates its partnerships to help contribute to CBP's success. CBP employ vigilance, service to country, and integrity to ensure results.

CBP's primary field occupations include CBP Officers, Border Patrol Agents, Air and Marine Interdiction Agents, Import and Entry Specialists, and Agricultural Specialists. Its field organization includes 20 Border Patrol Sectors with 34 permanent traffic checkpoints and 98 tactical traffic checkpoints between the ports of entry (POE); 145 stations and substations; 20 Field Operations Offices and 327 associated POEs, of which 15 are pre-clearance stations in other countries; and 74 Air and Marine operating locations. Field personnel use a mix of air and marine assets, non-intrusive inspection technology such as large-scale imaging devices (imaging systems using x-ray and gamma ray technology), radiation portal monitors, automated targeting systems, and automation in support of efforts to identify and apprehend undocumented aliens and high-risk travelers, and to facilitate legitimate traffic and trade.

B. Major Activities and Key Strategic Goals

CBP uses the resources appropriated by Congress to achieve its strategic goals and priorities. During the development of these goals and priorities, careful consideration has been given to the National Strategy for Homeland Security, the Presidential Directive on National Security, the National Drug Control Strategy, Executive Orders, the FY 2008-2013 Department of Homeland Security (DHS) Strategic Plan, and the CBP 2009-2014 draft Strategic Plan to ensure alignment and mutual support. CBP's investments also reflect the goals and objectives of programmatic plans such as the National Border Patrol Strategy. Finally, the results of evaluations conducted by the Government Accountability Office (GAO) and the Office of the Inspector General (OIG), as well

as the Performance Assessment Rating Tool (PART) processes have been used to prioritize efforts and target capital investments.

The FY 2009-2014 draft CBP Strategic Plan outlines two strategic goals and three cross-cutting enablers.

Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

As the frontline border security agency, CBP has a multifaceted and complex mission of protecting the Nation against a multitude of cross-border violations. CBP's first priority is to prevent terrorists and terrorist weapons from entering the country. All of CBP's efforts to secure the border, including our traditional missions of enforcing the immigration, customs, trade, agricultural, and other laws of the United States, contribute to this priority mission of thwarting terrorism. As the lead DHS component responsible for securing the border, we also play a central role in the implementation of the DHS's Secure Border Initiative, a comprehensive, multi-year plan to secure America's borders and reduce illegal immigration.

CBP uses a layered, defense-in-depth approach that includes multiple technology combinations with Non-Intrusive Inspection (NII) technology, the U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT), Identification System/Integrated Automated Fingerprint Identification Systems (IDENT/IAFIS), and the Western Hemisphere Travel Initiative (WHTI).

NII technology is used to detect and interdict weapons, narcotics, currency, and other contraband concealed in large containers and commercial shipments. Technologies currently deployed include large-scale X-ray and gamma ray imaging systems, radiation detection technology, as well as a variety of portable and hand-held technologies. CBP screens 100 percent of all containers for illicit radiological materials and inspects 100 percent of all targeted high-risk containers. To achieve this, CBP must continue to deploy and maintain appropriate NII capabilities at all inspection points. Moreover, it must deploy enough NII systems to ensure that it can respond to increases in the threat level, either nationally or at specific locations, as well as examine the increasing volume of cargo and conveyances crossing our borders.

The US-VISIT program continues to deploy and support biometric systems at many of the land, sea, and air POEs. These systems enable CBP Officers to use biometric identifiers, such as fingerprints (using an inkless fingerprint scanner) and photographs (using a digital camera), to verify the identity of foreign nationals wishing to enter the United States. US-VISIT's biometric information also helps thwart identity fraud by providing unalterable, unassailable identity information.

Border Patrol Stations are equipped with equipment to collect and electronically transmit biometric information to the Automated Biometric Identification System/Integrated Automated Fingerprint Identification Systems (IDENT/IAFIS). IDENT collects and maintains a subject's biometric information (fingerprints and photographs) and performs a search against the Lookout, Recidivist, and Alien Registration databases within DHS.

DHS implemented WHTI at air POEs in January, 2007. As of January 31, 2008, CBP no longer accepts oral declarations alone as proof of citizenship and identity at land and sea POEs. U.S. and Canadian citizens aged 19 or older who are traveling by land or sea must present government-issued

photo identification, such as a driver's license, along with proof of citizenship, such as a birth certificate or naturalization certificate.

CBP will continue its efforts to expand and maintain effective control of all air, land, and maritime borders at and between POEs through a layered, defense-in-depth approach. Providing security along the northern, southern, and coastal borders requires effective coordination and integration of all of CBP's operational components and other DHS operational components, along with the guidance and assistance of essential CBP mission support personnel.

Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

In order to meet its twin goals of security and facilitation, CBP will develop and implement programs that expedite the processing of people and goods at land border ports, airports, and seaports, while at the same time securing the global trade environment and strengthening supply chain security. CBP will focus its resources on identifying and responding to high-risk travelers and conveyances. CBP employs a risk-based, layered enforcement approach through the use of accurate advance information; the most advanced inspection, screening, and scanning technology available; modernized systems for cargo processing; and international and trade compliance partnership programs such as the Automated Targeting System (ATS), TECS, Automated Commercial Environment (ACE), and the application of principles to prioritize efforts.

CBP's ability to expedite the processing of people, products, and conveyances is dependent on its ability to identify high-risk travelers and goods for inspection. Recent legislation and regulatory action, such as the Trade Act of 2002, the 24-hour rule, and the SAFE Port Act, have made it mandatory to provide advance information on passengers and goods arriving in the United States. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for closer inspection. The main platform used to perform this analysis is the Automated Targeting System (ATS). ATS and associated databases will provide CBP Officers (including those stationed overseas) with advanced notice of travelers and goods arriving at U.S. POEs, allowing them to cross-check the passenger and cargo manifests against databases, such as the TECS, for "lookouts" of unlawful activity.

ACE is the modernized U.S. trade processing system that consolidates seven cargo processing systems into a single portal; it provides CBP and other component personnel better information to decide—before a shipment reaches U.S. borders—what cargo should be expedited based on compliance with U.S. laws and what cargo should be targeted based on perceived potential risks. Additionally, by eliminating paper processes and automating documentation process, ACE will enable CBP to improve traffic management that will support the efficient movement of both passenger and commercial traffic at land border POEs and airports.

CBP employs a coordinated approach to balance security, risk, and efficiency in resolving compliance issues while facilitating legitimate trade, by applying three principles to prioritize its efforts. First, CBP identifies trade issues that cause significant revenue loss, pose economic risk to U.S. industry, or represent health and safety concerns to citizens. Second, CBP investigates trade issues that are susceptible to non-compliance; have a history of problems; or are characterized by a lack of automation, or by complexity. Third, CBP will provide the trade with guidance in the form of regulations, rulings, and directives that enable traders to meet their obligations. CBP uses these three principles to analyze information and identify high-risk trade areas. Currently, CBP concentrates on seven priority trade issues: Antidumping and Countervailing Duty, Intellectual

Property Rights, Textiles and Wearing Apparel, Revenue, Agriculture, Import Safety, and Penalties.

CBP must leverage its frontline officers and agents to gain information that can be used to strengthen the Nation's security and to act upon intelligence that will help it carry out its critical border security mission. CBP will become a fully integrated, intelligence-driven organization. Two of the greatest frontline challenges are the need for real-time information for decision making and the lack of detailed information about the persons or goods attempting to cross the border. To address this challenge, CBP's primary strategy is to develop and deploy an integrated intelligence capability.

Cross-cutting enablers in CBP's strategic plan also affect the Agency's ability to accomplish its mission and achieve its goals. CBP's cross-cutting enablers (improved intelligence and information sharing, maximizing partnerships, and effective management infrastructure) are critical to success in achieving the mission. By focusing on these three enablers that cut across CBP's goals, we can better integrate the work of the entire agency.

Leverage intelligence and information sharing to maximize the effectiveness of our limited resources.

CBP must leverage its frontline officers and agents to gain information that can be used to strengthen the Nation's security and to act upon intelligence that will help it carry out its critical border security mission. CBP will become a fully integrated, intelligence-driven organization. Two of the greatest frontline challenges are the need for real-time information for decision making and the lack of detailed information about the person or goods attempting to cross the border.

Maximize the power of partnerships.

Partnerships have contributed greatly to CBP's progress in developing and implementing the various strategies that have improved border security and facilitation of global trade and travel. CBP's success relies upon the creation of enduring partnerships and maintaining open lines of communication domestically and internationally. Partnerships must be wide reaching and touch Federal, State, local, tribal, foreign, and domestic law enforcement agencies, as well as private sector industry and international partners. CBP's ability to align and/or increase needed resources will enhance existing security measures in targeted areas. Identifying, establishing, and enhancing or expanding beneficial partnerships while aligning resources will also allow CBP to enhance the enforcement of and compliance with agriculture, customs, immigration, and other agency enforced laws and regulations.

Promote achievement and a results-driven culture through an effective management infrastructure that fosters the highest standards of integrity.

CBP fosters an environment designed to leverage state-of-the-art technologies, innovative strategies, and world-wide partnerships to protect America's communities and defend its borders. Through the development and implementation of an innovative strategic planning framework that integrates investment management, resource management, and program management, CBP will achieve a maximum return on investment on CBP's top mission-focused goals. CBP will provide the best support services throughout DHS by promoting a business culture that creates effective management partnerships among the Information Technology, Finance, Internal Affairs, Training

and Development, and Human Resources Management functions. To ensure that CBP remains the employer of choice for a talented, dedicated workforce, it will implement a leadership-focused culture that recruits, trains, and retains the right people.

C. Resources Requested and Performance Impact

Major Changes within the Base Level

The FY 2010 funding request will allow CBP to fulfill its mission of securing our Nation's borders while facilitating legitimate travel and trade. This request will provide CBP with the opportunity to transform border control and security at and between POEs, using an effective mix of manpower, infrastructure and technology. It will also provide additional means for extending our zone of security beyond our physical borders – so that American borders are not the first line of defense against terrorism. Furthermore, CBP will be able to continue to focus on its traditional mission of enforcing trade, agriculture, customs, and immigration laws and regulations at our borders. CBP will continue to reallocate resources from lower to higher priorities to meet its strategic goals and objectives.

CBP requests a total of \$10.057 billion in FY 2010, an increase of \$230 million from the FY 2009 enacted level of \$9.828 billion (not including funding provided by the American Recovery Reinvestment Act of 2009). This funding level will allow CBP to maintain current services level and improve its mission capability by providing additional support for important activities and programs in CBP. The FY 2010 budget request will allow CBP to increase direct FTE from 55,437 in FY 2009 to 58,105 in FY 2010, including, 1,320 FTE for the annualization of 2,200 new Border Patrol Agents and 441 operation and mission support personnel, 44 FTE for annualization of 89 CBP Officers for the Western Hemisphere Travel Initiative (WHTI), 117 FTE for annualization of 212 CBP Officers and 22 support for Passenger Screening at Land Ports of Entry (POE); 158 FTE for annualization of 238 CBP Officers, 20 scientists, 25 IT specialists and 12 mission support for Radiation Portal Monitors (RPM) Staffing Operation and Maintenance, 14 FTE annualization for 24 Investigators and 5 support personnel in Conduct and Integrity Oversight, 15 FTE annualization for 30 positions in the Border Security, Fencing, Infrastructure and Technology (BSFIT) appropriation, 13 FTE annualization for 27 personnel in the CBP Intelligence Program, 12 FTE annualization for 24 Air & Marine Unmanned Aircraft Systems (UAS) pilots, 6 FTE annualization for 7 Attorneys, 2 Economists, 2 Paralegals, and 1 mission support person for the Regulatory Program, and 1 FTE annualization for 2 positions in Ground Transportation.

Increments over Current Service Level

Within the FY 2010 President's Budget, CBP is requesting an additional number of FTE in the following programs: 72 FTE for 68 Air & Marine Pilots, 20 Marine Enforcement Officers and 56 Air and Marine Personnel and Support are requested for Air and Marine Personnel; 63 FTE for 44 Border Patrol Agents, 8 support, 65 Customs and Border Protection Officers and 8 support are requested for Combating Southbound Firearms and Currency Smuggling; 52 FTE for 12 Scientists, 1 Paralegal, 34 International Trade Specialists, 32 Auditors, 10 Attorneys, 3 Import Specialists and 11 support are requested for Import Safety and Trade Enforcement; 11 FTE for 20 CBP Officers and 2 mission support personnel are requested for Analyze and Employ Information and Intelligence (NTCP and NTCC).

Funds for program enhancements have a significant performance impact for CBP. The following is a list of programs or activities for which CBP seeks additional funding in FY 2010.

- Data Center Migration ---\$38.7 million is requested to provide a standardized information technology (IT) resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.
- Combating Southbound Firearms and Currency Smuggling – \$26.1 million and 63 FTE is requested FY 2010 to provide CBP with an enhanced capability to combat southbound firearms and currency smugglers through additional personnel at and between the port of entry and along the southern border, as well as continuing to expand and maintain the Licensed Plate Reader (LPR) program to help establish and maintain effective control of the border. The combating firearms initiative will fund 44 Border Patrol agents and 8 support staff for the Office of Border Patrol; and 65 CBP officers and 8 support staff for the Office of Field Operations to expand its capacity to effectively combat outbound firearms and currency smuggling. The LPR program reads the plate as vehicles pass through the POEs and automatically queries the TECS database for law enforcement information. This information is then passed to the officers. As vehicles approach the southern border, LPR's will be strategically positioned to capture approaching vehicles. Placement of LPR along the southern border will be based upon current and developing intelligence.

Law Enforcement Enhanced Retirement – Public Law 110-161 established special retirement provisions for CBP officers, similar to the retirement coverage for law enforcement officers and firefighters. The enhanced retirement package became effective on July 6, 2008, covering 19,865 employees. Funding was included in the FY 2008 and FY 2009 appropriations for this purpose, but an additional \$25 million is required in FY 2010 (for a total of \$225 million) as the final increment that will fully fund the new retirement coverage. CBP officers are accountable for ensuring the security of our Nation and are required to complete law enforcement training, including: firearms, arrest techniques, defensive tactics and officer safety and survival. CBP officers face the same risks and challenges as law enforcement personnel in other organizations.

- Western Hemisphere Travel Initiative (WHTI) – FY 2009 funding of \$106.9 million and 89 CBP Officers helped to complete the rollout of Radio Frequency Identification (RFID)-enabled primary lanes to all remaining top 39 high volume Ports of Entry (POEs) and support increased processing and installation of 5 additional stacked booths on vehicle primary lanes at San Ysidro. Moreover, FY 2009 funding helped support the installation of temporary stacked booths at Peace Arch and Pacific Highway for World Police games and the Winter Olympics in Vancouver, British Columbia. Finally, the initiative enabled CBP to cover 95% of land border arrivals with card reader technology.

The FY 2010 request of \$20.9 million builds on the continued operation and maintenance of the equipment and software installed during the implementation of WHTI. Funding will help support outreach/communication for Olympics; audits for Enhanced Driver's License (EDL) States/Tribal Entities/Wait Time Studies/Process Improvement Analysis; deployment of WHTI technology to dual use lanes/ different booth configurations; and WHTI impact/technical solution/mitigation for pedestrian and small boats.

- Northern Border Technology – \$20.0 million is requested in FY 2010 to further enable CBP to provide situational awareness along the northern border. Funding will also support the design, deployment, and integration of surveillance, sensing platforms, detection technologies and tactical infrastructure requirements. This technology will serve as a force multiplier and increase the probability of successful detection. The systems capability will provide increased detection and a higher probability of successful detection.
- Air and Marine (A&M) Personnel – In FY 2009 \$4.0 million was provided for 24 new UAS pilots and 115 new marine agents. The additional Marine Agents helped to fully staff the 11 new Marine Agent units funded in FY 2008 and to allow 24/7 marine operations at some existing sites. The additional UAS pilots helped to expand operations along the land borders and maritime approaches to the U.S.

The FY 2010 A&M personnel request for \$19.1 million builds on this capability and will provide an additional 68 Pilots, 20 Marine, and 56 support personnel necessary to achieve maximum compliance with strategic goals and objectives and to support Border Patrol agents on the ground. During FY 2010, A&M plans to continue the expansion of its capabilities across the northern and coastal border and place heavy emphasis on the maritime requirements along the southeast/Caribbean borders.

- Import Safety and Trade Enforcement – \$9.3 million is requested FY 2010 to hire 12 Scientists, 1 Paralegal, 34 International Trade Specialists, 32 Auditors, 10 Attorneys, 3 Import Specialists and 11 support personnel to implement the Action Plan on Import Safety developed in response to Executive Order 13439. Additional staffing is also needed to carry out commercial operations and to adequately staff priority trade areas as proposed in the Office of Trade Resource Allocation Model (RAM). The increase of personnel will offer an optimal mix of trade activities and resources that allow CBP to meet the growing demand in trade volume; meet CBP's mission of enforcing trade laws and collecting revenue; achieve executive management goals and objectives for the trade mission; align activities with the appropriate skill levels; leverage efficient gains from technology process improvements, and combat risks inherent in priority trade areas.
- Cyber Security – \$5.0 million is requested to provide continuous Top Secret/Sensitive Compartmented Information (TS/SCI) and collateral classified processing capabilities within a "Focused Operations" branch that will provide tactical cyber intelligence of ongoing threats to CBP and DHS while also providing skilled forensics experts capable of staffing a DHS/CBP Digital Media Analysis lab to identify and attribute cyber attacks.
- Global Advanced Passenger Information (API)/Passenger Name Record (PNR) – The FY 2010 request for \$3.0 million continues API/PNR in two key security partner countries (including continuing the program for a country previously identified in FY 2008); and to implement the program in one additional key country resulting in the deployment of three countries by the end of FY 2010. The increase continues funding for the existing countries and provides funding for the newly implemented country. Funding estimates include start up costs and acquisition of hardware and software, recurring information technology costs and training and travel expenses.
- Analyze and Employ Information and Intelligence – In FY 2009 base funding of \$24.5 million helped expand the Document Exploitation program to include research and targeting of high-risk suspects identified via cargo transactions and finalize international agreements. This enabled the program to evaluate 100% of the flights into/out of Mexico and to reach the U.S. mandated goal of 10,000 reviewing Iraqi Refugee Program applicants and source documents in order to identify

security concerns. The Document Exploitation program continues the expansion of Advance Passenger Information (API) by cooperating with one or more foreign governments in order to disrupt terrorist travel, identify criminals and coordinate all actionable outbound positive Terrorist Identities Datamart Environment (TIDE) with the Terrorist Screening Operations Unit (TSOU) within 30 minutes of notification.

The FY 2010 request for \$2.8 million builds on this capability and will provide an additional 20 Customs and Border Protection officers (CBPOs) and two mission support positions. These additional positions will be evenly split between the passenger and cargo facilities of the National Targeting Center (NTC), providing additional operational and analytical support, which is needed in both environments. The increased staffing levels will also ensure that the NTC continues to provide CBP personnel with immediate responses to targeting and research inquiries.

D. Performance Highlights, Resources and Alignment to Strategic Goals

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measures are shown below.

Performance Budget Highlights by Program
 CBP
 2010 Congressional

Program: Air and Marine						
Performance Goal: Deny the use of air, land, and coastal waters for conducting acts of terrorism and other illegal activities against the United States.						
DHS strategic objectives supported and % allocation of activities: 1.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$388,971	\$598,281	\$864,080	\$814,467	\$799,679	\$815,455
FTE	1,010	1,200	1,260	1,366	1,732	1,943

Performance Plan Measures

Measure: Number of airspace incursions along the southern border						
Description of Measure: This measure shows the number of airspace incursions along the southern border. A consistent standard of less than 10 incursions each year is an aggressive standard we strive to maintain. The measure monitors the programs efforts in reducing, with the intent of ultimately denying, the use of border air space for acts of terrorism or smuggling using intelligence and threat assessments. The number of Targets of Interest has been reduced over time as strategic surveillance and tactical responses by CBP interceptors and patrols, work with the Border Patrol on the ground, to deter the use of air routes into the U.S. The program continues to gather and analyze intelligence on past and current threat patterns to forecast and disseminate information about potential and emerging threats. The targeted goals for this measure are to maintain this low level of border incursions at a minimum and reduce it if possible, until there are no border incursions.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	10	10	10	10	10
Actual:	None	13	32	9	N/A	N/A

Measure: Percent of air support launches accomplished to support border ground agents to secure the border.						
Description of Measure: A primary and important measure for Air and Marine (AM) is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which the program was able to respond.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	>95%	>95%	>95%	>95%
Actual:	None	None	98%	98%	N/A	N/A

Measure: Percent of at - risk miles under strategic air surveillance						
Description of Measure: The measure is represented by the percent of at risk miles under strategic air surveillance and is evaluated according to up - to - the - minute information and intelligence. This measure describes the area of the U.S. border determined to be under the span of control of CBP Air and Marine (AM) assets. CBP AM uses a multi - level layer to aerial response and support to accomplish this goal: 1) Strategic surveillance for the P - 3 and UAS aircraft, 2) Intelligence driven support for the rapid deployment of forces, and 3) Strategic and tactical support to ground law enforcement such as Office of Border Patrol and Immigration and Customs Enforcement.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	50% of at risk miles	60% of at risk miles	70% of at risk miles	80% of at risk miles	90% of at risk miles
Actual:	None	55%	60%	84%	N/A	N/A

Program: Automation Modernization						
Performance Goal: Improve the threat and enforcement information available to decision makers to enforce trade rules and regulations and facilitate U.S. trade.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 12%, 2.4 - 56%, 3.2 - 32%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$449,909	\$509,632	\$451,440	\$476,609	\$511,334	\$462,445
FTE	35	62	62	63	63	63

Performance Plan Measures

Measure: Number of trade accounts with access to ACE functionality to manage trade information						
Description of Measure: This measures the extent to which the Automated Commercial Environment (ACE) is made available to and used by members of the trade community (importers, brokers, carriers, etc.) to process and manage trade -related information.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	1%	5000	9,000	14,000	15,500	17,000
Actual:	1%	3,737	11,950	15,465	N/A	N/A

Measure: Percent of CBP workforce using ACE functionality to manage trade information.						
Description of Measure: The number of Customs and Border Protection people using Automated Commercial Environment (ACE), compared to the targeted adoption rate shows that internal personnel have easier, timelier, access to more complete and sophisticated information than in the past.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	8%	14%	30%	40%	63%	100%
Actual:	8%	23%	30%	38.3%	N/A	N/A

Measure: Percent of network availability.						
Description of Measure: The CBP network provides the basis for linking all IT systems for communications and access to mission critical systems. High levels of system availability are needed to accomplish CBP's mission. The measure represents the percentage of network availability to users.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	98%	98%	98%	98%	98%
Actual:	None	99.9	99.4%	99.7%	N/A	N/A

Measure: Percent of time the TECS is available to end users.						
Description of Measure: This measure quantifies the availability of the TECS service to all end - users based on a service level of 24X7 service. TECS is a CBP mission - critical law enforcement application system designed to identify individuals and businesses suspected of or involved in violation of federal law. TECS is also a communications system permitting message transmittal between DHS law enforcement offices and other National, State, and local law enforcement agencies, access to the FBI's National Crime Information Center and the National Law Enforcement Telecommunication Systems (NLETS). NLETS provides direct access to state motor vehicle departments.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	90%	92%	97%	97.5%	98%	98%
Actual:	96.15%	98%	98.7%	99.9%	N/A	N/A

Measure: Total number of linked electronic sources from CBP and other government agencies for targeting information						
Description of Measure: This measure counts the number of electronic sources to which CBP information technology systems are linked to share information for targeting purposes. The measure reflects the ability to accurately and efficiently identify a potential risk to border security in any conveyance entering the U.S. is improved by linking data sources from CBP automated systems and other government agencies, through the Automated Commercial Environment (ACE), as a single source for border decision makers.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	0	4	16	16	22	25
Actual:	0	9	16	19	N/A	N/A

Program: Border Security and Control between Ports of Entry						
Performance Goal: Gain effective control of the U.S. border in areas deemed as high priority for terrorist threat potential or other national security objectives.						
DHS strategic objectives supported and % allocation of activities: 1.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$2,401,016	\$3,041,760	\$3,099,934	\$4,007,931	\$4,527,021	\$4,733,065
FTE	13,468	14,300	16,221	18,539	23,231	24,554

Performance Plan Measures

Measure: Border miles under effective control (including certain coastal sectors)						
Description of Measure: This measure depicts the number of border miles under control where the appropriate mix of personnel, technology, and tactical infrastructure has been deployed to reasonably ensure that an attempted illegal alien is detected, identified, and classified, and that the Border Patrol has the ability to respond and bring the attempted illegal entry to a satisfactory law enforcement resolution.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	150 miles	338 miles	524	674	815	815
Actual:	288	449	599	757	N/A	N/A

Measure: Border miles with increased situational awareness aimed at preventing illegal entries per year						
Description of Measure: This measure indicates the number of border miles where the situational awareness has increased, or improved, to prevent illegal entries into the U.S. The Border Patrol uses the following levels to describe border security from the least secure to the most secure: Remote/Low Activity; Less Monitored; Monitored; and Controlled. Border regions classified as Remote/Low Activity are generally characterized by rugged and inaccessible terrain. By raising the border security status to Less Monitored (or higher), the Border Patrol improves its situational awareness and border security.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	136	100	100	141
Actual:	None	None	387	480	N/A	N/A

Measure: Number of Border Patrol Agents trained in rescue and emergency medical procedures.						
Description of Measure: This measure will examine the number of agents trained and certified in rescue and emergency medical procedures. One of the Border Patrols Border Safety Initiative (BSI) objectives is to increase the number of agents trained and certified in rescue and emergency medical procedures at the field agent level to improve the Border Patrols capabilities to prevent and respond to humanitarian emergencies in order to create a safer and more secure border region.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	510	690	690	690
Actual:	None	N/A	796	1,381	N/A	N/A

Measure: Percent of apprehensions at Border Patrol checkpoints.						
Description of Measure: This measure examines the effectiveness of checkpoint operations in apprehensions as they relate to border enforcement activities and serves as a barometer for measuring operational effectiveness. Checkpoints are temporary and permanent facilities used by the Border Patrol to monitor traffic on routes of egress from border areas and are an integral part of the Border Patrols defense - in - depth strategy. As such, activities that occur at checkpoints serve as measures not only of checkpoint operational effectiveness but as barometers of the effectiveness of the Border Patrol's overall national border enforcement strategy to deny successful illegal entries into the United States. This measure will examine one checkpoint activity, apprehensions, and compare it to the Border Patrol apprehensions nationwide. This comparison will measure checkpoint effectiveness in terms of apprehensions as well as provide insights into the overall effectiveness of the Border Patrols national strategy.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	5 - 10%	5 - 10%	3 - 8%	>3%	<5%
Actual:	None	5.9%	5%	2%	N/A	N/A

Measure: Percent of traffic checkpoint cases referred for prosecution to the U.S. Attorney's office.						
Description of Measure: This measure will examine the percent of border related cases brought by the Border Patrol and originating from traffic checkpoint operations that are referred to one of the 92 U.S. Attorneys located throughout the United States, Puerto Rico, and the Virgin Islands for prosecution compared to the total number of apprehensions at traffic checkpoints. This measure will depict the effectiveness of Border Patrol checkpoint operations in identifying and prosecuting dangerous criminals thus enhancing overall public safety. All apprehensions by OBP are considered arrests (administrative or criminal). The number of cases referred for prosecution by OBP and being tracked in this measure are criminal arrests only.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	3% - 13%	8% - 15%	>18%	>18%
Actual:	None	N/A	13%	18%	N/A	N/A

Program: Border Security Fencing, Infrastructure, and Technology						
Performance Goal: Gain and maintain effective control of U.S. land border areas by deploying a combination of technology and tactical infrastructure to enhance the effectiveness of frontline officers and agents.						
DHS strategic objectives supported and % allocation of activities: 1.1 - 100%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	None	\$0	\$1,187,565	\$1,225,000	\$775,000	\$779,452
FTE	None	0	39	89	185	200

Performance Plan Measures

Measure: Percent of Border Miles Covered by SBInet technology - southwest border						
Description of Measure: The Secure Border Initiative (SBInet) is an integrated system of technology such as radars, cameras, and ground sensors that provide detection and surveillance capabilities to law enforcement personnel over the U.S. border. The measure describes the border miles covered by SBInet technology as a percentage of the total U.S. Southwest land border miles.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	31.00%	35.10%	37.60%
Actual:	None	None	None	None	N/A	N/A

Measure: Total number of cumulative miles of permanent tactical infrastructure constructed						
Description of Measure: This measure shows the total number of cumulative miles of tactical infrastructure constructed. Tactical infrastructure consists of barriers built to deter or delay illegal entries into the United States. Tactical infrastructure includes pedestrian fencing, all - weather roads, vehicle fence and permanent lighting installed in the border areas to support border enforcement activities.

Program: Border Security Inspections and Trade Facilitation at Ports of Entry						
Performance Goal: Improve the targeting, screening, and apprehension of high – risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 61%, 2.1 - 9%, 2.4-30%						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
\$ Thousands	\$3,282,459	\$3,827,103	\$3,890,812	\$4,313,718	\$4,661,749	\$4,646,498
FTE	26,123	26,117	26,479	28,687	30,280	31,399

Performance Plan Measures

Measure: Air passenger apprehension rate for major violations						
Description of Measure: This measure provides a statistically valid estimate of the apprehension rate of air passengers for major violations at international airports, displaying evidence that CBP typically apprehends approximately 30% to 40% of the major violations that come through the Ports of Entry. Data is derived from the results of a comprehensive compliance examination program used to identify the rate of major violations occurring in the sample. The sample rate is used to estimate the "expected" number of major violations in the general population. The major violations found during the regular primary inspection process are then compared to the "expected" number to compute the apprehension rate for major violations among air passengers traveling to the U.S. A major violation involves serious criminal activity, including possession of narcotics, smuggling of prohibited products, human smuggling, weapons possession, fraudulent U.S. documents, and other offenses serious enough to result in arrest.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	N/A	41%	25%	26%
Actual:	None	None	40.3%	25%	N/A	N/A

Measure: Air passengers compliant with laws, rules, and regulations (%)						
Description of Measure: This measure is the compliance rate of international air passengers with all of the laws, rules, regulations that CBP enforces at the Ports of Entry, with the exception of agriculture laws and regulations. It is also referred to as the Air Compex rate, and includes ALL customs and immigration violations, both category I (major) and category II (relatively minor). Category II violations far out - number category I violations and include all noncompliance with established customs and immigration laws, rules, regulations, as well as violation of all rules and regulations of other agencies that CBP is tasked by Congress with enforcing. This includes inadmissible alien travelers (for any reason) as well as discovery of prohibited items for other agencies, such as FDA pharmaceutical regulations, confiscation of alcoholic beverages on behalf of state authorities, CPSC product safety alerts, and trade violations such as amended declarations resulting in additional revenue or CBP action.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	99.3%	99.2%	99.2%	99.2%	99.2%	98.8%
Actual:	99.01%	98.7%	98.7%	99.5%	N/A	N/A

Measure: Border vehicle passengers in compliance with agricultural quarantine regulations (percent compliant)						
Description of Measure: The measure shows CBP's success at maintaining a high level of security in the land border environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions. CBP randomly samples border vehicle passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	96.4%	94.6%	94.6%	94.6%	95.5%	95.5%
Actual:	93.68%	92.9%	95.7%	97.73%	N/A	N/A

Measure: Compliance rate for Customs - Trade Partnership Against Terrorism (C - TPAT) members with the established C - TPAT security guidelines.						
Description of Measure: This measure provides a summary of the overall compliance rate achieved for all validations performed during the Fiscal Year. After acceptance into the C - TPAT program, all C - TPAT members must undergo a periodic validation in which CBP examiners visit company locations and verify compliance with an industry - specific set of CBP security standards and required security practices. These validations are prepared using a weighted scoring system that is used to develop an overall compliance rate for each company. This measure provides a summary of the overall Compliance Rate achieved for all validations performed during the Fiscal Year.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	98%	90%	95%	95.5%	99%	99%
Actual:	97.0%	98%	98%	99.9%	N/A	N/A

Measure: International air passengers in compliance with agricultural quarantine regulations (percent compliant)						
Description of Measure: The measure shows CBP's success at maintaining a high level of security in the international air environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions by international air passengers. CBP randomly samples international air passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010

Actual:	95.8%	95.5%	94.2%	95.8%	N/A	N/A

Measure: Land border apprehension rate for major violations						
Description of Measure: This measure provides a statistically valid estimate of the apprehension rate of land vehicle passengers for major violations who enter through U.S. land border ports of entry, displaying evidence that CBP typically apprehends approximately 30% to 40% of the major violations that come through the Ports of Entry. The sample rate is used to estimate the "expected" number of major violations in the general population. The major violations found during the regular primary inspection process are then compared to the "expected" number to compute the apprehension rate for major violations among vehicle passengers traveling to the U.S. A major violation involves serious criminal activity, including possession of narcotics, smuggling of prohibited products, human smuggling, weapons possession, fraudulent U.S. documents, and other offenses serious enough to result in arrest.

Measure: Percent of individuals screened against law enforcement databases for entry into the United States						
Description of Measure: This measure identifies the percent of individuals arriving at the ports of entry who have their names and other identification information checked against electronic law enforcement databases. A query is comprised of a review of identification documents such as passports, visas, border crossing cards, military identification, etc., for authenticity and a check of the individual's name and other identification information against the electronic law enforcement databases available through TECS during the entry process at all ports of entry, including airports, land border ports, and seaports. More thorough screening increases the likelihood that high - risk travelers that might cause harm are not allowed entry into the United States.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	60%	80%	85%
Actual:	None	None	None	73.5%	N/A	N/A

Measure: Percent of requested cargo examinations conducted at foreign ports of origin in cooperation with host nations under the Container Security Initiative (CSI)						
Description of Measure: Customs and Border Protection (CBP) officials located at foreign ports participating under agreements between the host nations and the Container Security Initiative (CSI) request examinations on containers that have been identified by CBP as higher - risk. This measure is the percent of requested container examinations resolved or conducted by foreign Customs officials meeting CBP examination standards and requirements divided by the total number of examinations requested by CBP CSI officials. These examinations would otherwise have taken place at US ports of entry. The measure is an indication of the extent to which potential higher - risk cargo is satisfactorily inspected before it leaves the foreign port of origin. It also reflects the cooperation of foreign Customs officials, who are not required by law to complete examinations, but do so by arrangement through the Declaration of Principles between CBP and the host country.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	97%	97%	97%
Actual:	None	None	None	95.1%	N/A	N/A

Measure: Percent of sea containers screened for contraband and concealed people.						
Description of Measure: The measure shows the progress towards increasing security by measuring the percent of sea containers arriving at seaports that were screened for contraband and concealed people using Non -intrusive (NII) technology. NII technology consists of x - ray imaging and electro - magnetic imaging equipment that is very effective at inspecting trucks, containers, and packages for shapes, density, and hidden cargo. It is very effective at identifying weapons, narcotics, smuggled humans, and concealed cargo. NII equipment is not effective at identifying radioactive or weapons - grade materials. NII equipment and radiation portal monitor (RPM) equipment use very different technologies that accomplish distinctly different things. They complement each other and work together to fully screen cargo.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	5%	5.25%	5.5%	5.75%	3.2%	3.1%
Actual:	5.6% (corrected from 8.1% previously reported)	5.25%	4.0%	3.6%	N/A	N/A

Measure: Percent of truck and rail containers screened for contraband and concealed people.						
Description of Measure: The measure shows the progress towards increasing security by measuring the percent of truck and rail containers that were screened for contraband and concealed people using Non - Intrusive (NII) technology. NII technology consists of x - ray imaging and electro - magnetic imaging equipment that is very effective at inspecting trucks, containers, and packages for shapes, density, and hidden cargo. It is very effective at identifying weapons, narcotics, smuggled humans, and concealed cargo. NII equipment is not effective at identifying radioactive or weapons - grade materials. NII equipment and radiation portal monitor equipment use very different technologies that accomplish distinctly different things. They complement each other and work together to fully screen cargo.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	10%	10.25%	33.0%	42%	35%	40.5%
Actual:	28.9%	32.80%	40%	35.8%	N/A	N/A

Measure: Percent of worldwide U.S. - destined containers processed through Container Security Initiative (CSI) ports						
Description of Measure: This measure is the percent of worldwide U.S. - destined containers (and their respective bills of lading) processed through CSI ports as a deterrence action to detect and prevent weapons of mass destruction/effect and other potentially harmful materials from leaving foreign ports headed to U.S. ports. Processed may include any of the following: 1) U.S. - destined cargo manifest/bills of lading data reviewed using the Automated Targeting System (ATS); 2) further research conducted; 3) collaboration with host country and intelligence representatives, and 4) physical examination of the container.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	68%	81%	86%	86%	86%	86%
Actual:	73%	82%	86%	86.1%	N/A	N/A

Additional Measures

Measure: Entry Summary Compliance Measurement (ESCM)						
Description of Measure: Entry Summary Compliance Measurement (ESCM) is conducted annually each fiscal year (FY) to collect statistical data to determine the compliance of commercial import with U.S. trade laws, regulations and agreements. ESCM is also used to estimate the revenue gap, a statistically calculated estimate of potential revenue loss due to noncompliance. The revenue gap is a calculation of uncollected duties based on statistical sampling, expressed as both a dollar estimate of under collections and a percentage of actual duty collections.						
Fiscal Year:	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Target:	None	None	None	1%	1%	1%
Actual:	None	None	None	None	N/A	N/A

Measure: Number of foreign cargo examinations resolved in cooperation with the Container Security Initiative.

Description of Measure: This measure provides an indicator of the benefit of locating CBP Officers at foreign locations that are cooperating with CBP under the Container Security Initiative (CSI). It provides the number of container examinations processed or mitigated by foreign Customs officials that were identified by CBP CSI as higher - risk and accepted as meeting CBP examination standards and requirements. These examinations would otherwise have taken place at US ports of entry. It is an indication of the number of higher - risk cargo shipments identified and examined prior to embarkation from foreign ports to US destinations.

American Recovery and Reinvestment Act (ARRA)	FY 2008 Actual		FY 2009 Enacted		FY 2010 Request		Increase (+) or Decrease (-) For FY 2010					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Automation Modernization ¹	---	---	---	20,000								
Total	0	\$0	0	\$20,000								

¹ The Headquarters Managed IT Investment PPA includes an adjustment-to-base of \$39.1 million to continue FY 2009 O&M efforts and includes the transfer of payroll for government personnel from the Automation Modernization account into the Salaries and Expenses account. The funds will be used for: completion of a three-year cycle technology refresh for E-Mail, Desktops/laptops, Printers, File Servers, OneNet/OBM, Streaming Video, LAN Upgrade, Enterprise Query, Interoperability Hub, Web Farm/Alt Web, Single Sign-On and Audit Log; support of the organizational costs associated with the increased level of IT-related spending, and hardening and right-sizing the ICEPIC and Netleads systems.

² DHS proposed in FY 2010 that FPS be realigned with NPPD. Thus, FPS does not appear in ICE's FY 2010 request.

iii. Status of Congressional Requested Studies, Reports, and Evaluation

**Department of Homeland Security
Immigration and Customs Enforcement (ICE)**

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2008	Overdue	FY 08 House Report	Textile Transshipment - ICE is directed to report on its execution of the five-year strategic plan regarding textile transshipment enforcement.	Final review stage at DHS OCFO
2008	Overdue	FY08 Conf Report	Detention and Removal Operations (DRO) Quarterly Report - ICE is directed to continue to report quarterly on deportation, exclusion, and removal orders sought and obtained by ICE.	Final review stage at DHS OCFO
2009	3/1/2009	FY 09 Conference Report	Transportation of Unaccompanied Alien Minors - ICE, along with DHS, OMB, and HHS, will issue recommendations on which agency is most appropriate to fund the transportation of unaccompanied alien minors between DHS and HHS custody.	In coordination with OMB and HHS.
2009	4/6/2009	FY 09 Conference Report	Transportation of Unaccompanied Alien Minors - ICE shall provide briefing on recommendations contained in March 1 report.	In coordination with OMB and HHS
2009	2/13/2009	FY 09 Senate Report	DRO Quarterly Report - ICE is directed to continue to report quarterly on deportation, exclusion, and - removal orders sought and obtained by ICE.	Final review stage at DHS OCFO
2009	Not specified	FY 09 Approp. Bill	Automation Modernization - \$5M is withheld until ICE submits expenditure plans.	In review in ICE.
2009	4/3/2009	FY 09 Stimulus Bill	ARRA Tactical Communications - The appropriations language of the stimulus bill requires ICE to submit an expenditure plan for the \$20 million ICE received for the procurement and deployment of tactical communications equipment and radios.	Sent to Congress 4/3/09.
2009	11/14/2008	FY 09 Conference Report	Special Interest Aliens - ICE is directed to provide a classified briefing on the disposition of Special Interest Aliens.	In review in ICE.
2009	4/6/2009	FY 09 House Report	287(g) Agreements - ICE should submit a comprehensive plan for ensuring adequate oversight and regulation of all state and local immigration enforcement agreements.	In review in ICE.

2009	1/5/2009	FY 09 Approp. Bill	Alternatives to Detention - ICE will submit a plan for nationwide implementation for the ATD program that identifies the following: the funds required for implementation, the timeframe for achieving implementation, and an estimate of the number of individuals	In review in ICE.
2009	4/26/2009 (with FY10 CJ)	FY 09 Conference Report	Textile Transshipment - ICE will report progress on textile transshipment enforcement. The report should delineate the actual and projected obligations of this funding from FY 05 to FY 10.	In review in ICE.
2009	5/15/2009	FY09 Senate Report & House Report	Secure Communities/Comprehensive Identification and Removal of Criminal Aliens (SC/CIRCA) - ICE will report on progress implementing the \$350M (total) SC/CIRCA funds and the \$1B for criminal aliens.	
2009	5/15/2009	FY 09 Conference Report	OI Quarterly Spend Plan - ICE will provide quarterly updates on the OI Spend Plan.	
2009	5/15/2009	FY 09 Conference Report	DRO Quarterly Report - ICE is directed to continue to report quarterly on deportation, exclusion, and - removal orders sought and obtained by ICE.	
2009	5/15/2009	FY 09 House Report	Children in Detention Quarterly Report - ICE will report quarterly on any incidents involving strip searches of children, or placing them in restraints and/or using disciplinary weapons against them.	
2009	8/14/2009	FY09 Senate Report & House Report	SC/CIRCA - ICE will report on progress implementing the \$350M (total) SC/CIRCA funds and the \$1B for criminal aliens.	
2009	8/14/2009	FY 09 Conference Report	OI Quarterly Spend Plan - ICE will provide quarterly updates on the OI Spend Plan.	
2009	8/14/2009	FY 09 Conference Report	DRO Quarterly Report - ICE is directed to continue to report quarterly on deportation, exclusion, and - removal orders sought and obtained by ICE.	
2009	8/14/2009	FY 09 House Report	Children in Detention - ICE will report quarterly on any incidents involving strip searches of children, or placing them in restraints and/or using disciplinary weapons against them.	
2009	11/14/2009	FY09 Senate Report & House Report	SC/CIRCA Quarterly Report - ICE will report on progress implementing the \$350M (total) SC/CIRCA funds and the \$1B for criminal aliens.	

2009	11/14/2009	FY 09 Conference Report	OI Quarterly Spend Plan - ICE will provide quarterly updates on the OI Spend Plan.	
2009	11/14/2009	FY 09 Conference Report	DRO Quarterly Report - ICE is directed to continue to report quarterly on deportation, exclusion, and - removal orders sought and obtained by ICE.	
2009	11/14/2009	FY 09 House Report	Children in Detention Quarterly Report - ICE will report quarterly on any incidents involving strip searches of children, or placing them in restraints and/or using disciplinary weapons against them.	
2009	Completed	FY 09 Conference Report	OI Quarterly Spend Plan - ICE will provide quarterly updates on the OI Spend Plan.	Sent to Congress 11/18/08
2009	Completed	FY 09 Conference Report	SC/CIRCA - ICE will report how it plans to spend \$1B across the agency to identify and remove deportable criminal aliens in FY 2009.	Sent to Congress 12/17/08
2009	Completed	FY 09 Conference Report	SC/CIRCA - ICE will report how the \$150 million in new, two-year funding will be used to identify and remove deportable criminal aliens.	Sent to Congress 12/17/08
2009	Completed	FY 09 Approp. Bill	FPS - The Secretary and OMB Director shall certify that FPS will be fully funded to ensure at least 1,200 enforcement personnel.	Sent to Congress 12/31/08
2009	Completed	FY 09 House Report	Financial System - ICE is to provide a briefing on the planned use of the \$7M provided for the financial system.	Sent to Congress 01/30/09
2008	Completed	FY08 Conf Report	DRO Quarterly Report - ICE is directed to continue to report quarterly on deportation, exclusion, and - removal orders sought and obtained by ICE.	Sent to Congress 01/30/09
2009	Completed	FY 09 House Report	Children in Detention Quarterly Report - ICE will report quarterly on any incidents involving strip searches of children, or placing them in restraints and/or using disciplinary weapons against them.	Reported 02/13/09
2009	Completed	FY09 Senate Report & House Report	SC/CIRCA Quarterly Report - ICE will report on progress implementing the \$350M (total) SC/CIRCA funds and the \$1B for criminal aliens.	Sent to Congress 02/17/09
2009	Completed	FY 09 Conference Report	OI Quarterly Spend Plan - ICE will provide quarterly updates on the OI Spend Plan.	Sent to Congress 02/17/09

2009	Completed	FY 09 House Report	Detainee Medical Care - ICE is given \$2M to immediately undertake a comprehensive review of the medical care provided to detainees. The review should be conducted by independent medical experts, selected with the advice of the OHA, to identify deficiencies	Completed
2009	Completed	FY09 House Report	Family Detention Centers - ICE will provide a briefing on future plans for family detention facilities	Briefing completed 3/18/09
2009	Completed	FY 09 House Report	Children - ICE is directed to submit a briefing that details training programs for its employees who encounter children.	Briefing completed 3/18/09

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement (ICE) **Salaries and Expenses**

I. Appropriation Overview

A. Mission Statement:

Programs funded through the Salaries and Expenses account contribute to the ICE mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. Salaries and Expenses resources are used to combat terrorism and illegal immigration activities through investigating, detaining, and prosecuting both criminal and other aliens, and domestic gangs. These activities protect the infrastructure and persons within the United States.

B. Budget Activities:

Management and Administration

The Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), State and Local Coordination (OSLC), the Chief Diversity Officer, the Chief Financial Officer (OCFO), the Chief Information Officer (OCIO), Acquisition Management, Human Capital, and Freedom of Information Act perform the management and administration (M&A) activities for ICE. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

Legal Proceedings

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

Investigations

The Office of Investigations (OI) is divided into four broad investigative categories: National Security; Financial and Trade; Smuggling and Public Safety; and Investigative Services. OI enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. OI also investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child pornography, child sex tourism, and health and public safety dangers.

International Affairs

The Office of International Affairs (OIA) conducts investigative efforts in over 50 Attaché offices in 40 foreign locations. OIA performs a multi-faceted enforcement mission that includes working with foreign governments and international partners to facilitate enforcement of U.S. customs and immigration laws beyond U.S. borders. OIA facilitates removals and repatriations of aliens from the United States to foreign locations. OIA operates the Visa Security Program (VSP), which focuses on high-risk visa-issuance locations to identify and interdict potential threats before they enter the United States. OIA represents ICE internationally and collaborates with U.S. Citizenship and Immigration Services (USCIS), U.S. Customs and Border Protection (CBP), other DHS components, Department of State (DOS), and other U.S. Government entities.

Intelligence

The Office of Intelligence collects, analyzes, and distributes information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intelligence utilizes data and information on the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Intelligence Operations' Field Intelligence Groups (FIGs) are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIGs link headquarters and field components to facilitate intelligence collection, integration, analysis, and dissemination.

Detention and Removal Operations

The Office of Detention and Removal Operations (DRO) is responsible for ensuring that every alien who has been ordered removed departs the United States through enforcement of the Nation's immigration laws and coordination with foreign governments to ensure countries will accept removable aliens. DRO is comprised of five Program/Project Activities:

Custody Operations Program – This program provides safe, secure, and humane detainment for removable aliens and seeks to ensure that aliens in ICE custody appear for their immigration hearings and subsequent removal from the United States.

Fugitive Operations Program – This program locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, creating a deterrent to potential absconders and increasing the integrity of the immigration process.

Criminal Alien Program – This program identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these criminal aliens are not released into the community, ICE secures a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to remove them from the United States.

Alternatives to Detention Program – This program places low-risk aliens under various forms of intensive supervision rather than traditional detention. It is a cost-effective way to ensure individuals' appearance for an immigration hearing or for removal. This program lowers the risk that aliens will become fugitives through different methods of supervision.

Transportation and Removal Program – This program provides safe and secure transportation of aliens in ICE custody and prepares for and conducts the removal of aliens from the United States, as ordered by an immigration judge.

Secure Communities/A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA)

SC/CIRCA sets out a comprehensive plan to improve community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain, and remove criminal aliens held in custody. Once it is fully implemented, SC/CIRCA will revolutionize immigration enforcement by using technology to share information between law enforcement agencies and by applying risk-based methodologies to focus resources on assisting all local communities in the removal of those criminal aliens representing the greatest threat to community safety.

C. Budget Request Summary:

U.S. Immigration and Customs Enforcement (ICE) requests 19,928 positions, 19,389 FTE, and \$5,348,000,000 for FY 2010 in the Salaries and Expenses (S&E) account. In order to accomplish the agency’s objectives and mission, ICE is requesting \$5,089,050,000 and 19,110 FTE to maintain current services and \$258,950,000 million and 279 FTE in program enhancements in the S&E account. As part of the current services budget, \$39,100,000 and 18 current on-board positions have been transferred to the S&E account from the ICE Automation Modernization account to fund the salaries of these positions and operations and maintenance costs of the Atlas infrastructure three-year refresh effort. In addition, as part of the current services budget, nine positions have been transferred from the Construction account to the S&E account.

Enhancement Requests

ICE requests program enhancements for the Salaries and Expenses Account in the following key areas:

- **Southwest Border Enforcement..... \$70.0M (176 FTE)**
This cross-program initiative is intended to increase national security by expanding activities to control our borders. This request includes funding to increase enforcement staffing, improve cooperative efforts with the Mexican government, and establish another Border Violence Intelligence Cell. At the highest level, this initiative helps prevent the movement of people, money, and materials that could harm the Nation and its people across the Southwest border.

- **Co-Location of ICE Facilities \$92.0M (13 FTE)**
This request funds the second year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in select metropolitan areas with the intended result being improved operational efficiencies and long-term cost savings.

- **Secure Communities\$39.1M (46 FTE)**
This program aims to remove all Level 1 criminal aliens (those convicted of violent felonies and major drug crimes) from the United States. In order to achieve this goal, ICE requests funds to hire 80 new enforcement personnel who will identify suspected criminal aliens, determine subjects’ alien status, prioritize ICE enforcement actions against the highest threat removable criminal aliens, assist in the removal of apprehended criminal aliens, and to continue ongoing information technology investments that will improve efficiencies within ICE criminal alien identification, prioritization and removal processes.

- **Detention Facilities Inspection Group \$12.4M (25 FTE)**
 The program increase will allow ICE to expand the number and scope of independent inspections on ICE detention facilities and will improve the welfare, safety, and living conditions of ICE detainees and the safety of ICE employees.
- **State and Local Law Enforcement Support \$11.6M (15 FTE)**
 This request will provide funding for the Office of State and Local Coordination (OSLC) to oversee outreach activities for the ICE ACCESS programs. Funding allows for permanent staff for OSLC, continuation of ICE ACCESS, training and information technology assistance for participants in the 287(g) program, and detention bedspace resulting from increased enforcement.
- **Data Center Migration.....\$33.9 M (4 FTE)**
 This request is targeted at migrating data center operations, active online data, and other IT assets from two Department of Justice (DOJ) data centers and multiple processing centers to two new DHS data centers while ensuring near continuous operations of mission-critical IT systems through contingency infrastructure, planning, and testing, to provide systems and data integrity that align with the DHS goal of ensuring that two new DHS Data Centers support fully redundant IT systems.

II. Summary of FY 2010 Budget Estimates by Program/Project Activity (PPA)

U.S. Immigration and Customs Enforcement requests \$259.8 million for this activity. This is a \$19.6 million increase over the FY 2009 Enacted Budget, of which \$6.6 million is for annualization of prior year funding, pay inflation, and non-pay inflation. The remaining \$13.0 million increase is additional funding for OPLA and requested program increases associated with the M&A programs.

CURRENT SERVICES PROGRAM DESCRIPTION

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal representation, advice, training, and services required to support the ICE mission. Pursuant to section 442(c) of the Homeland Security Act, OPLA is the exclusive legal representative for ICE and the DHS legal component authorized to represent the government in all exclusion, deportation, and removal proceedings before the Department of Justice's Executive Office for Immigration Review (EOIR).

As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Many of the hearings involve criminal aliens, while others involve terrorists and human rights abusers. Additionally, OPLA provides critical legal support to ICE operational elements concerning customs, worksite enforcement, ethics, employment law, tort claims, and administrative law issues.

OPLA consists of a headquarters component and 26 Chief Counsel Offices (CCOs). The areas of responsibility for these CCOs are consistent with the 26 domestic areas of responsibility within the ICE Office of Investigations (OI). Additionally, Mission Support Divisions provide administrative services to OPLA's operational elements. The following highlights the primary duties and responsibilities of OPLA's headquarters divisions:

- Appellate and Protection Law Division (APLD). APLD has various primary areas of responsibility, which includes the following: appellate and motions practice before the Board of Immigration

Appeals (BIA); federal litigation review; and protection law issues. APLD reviews all ICE appeals to the BIA and plays a lead role in briefing the most significant cases. APLD provides assistance and legal guidance daily to the Chief Counsel Offices and other OPLA/HQ Divisions on appellate and motion practices, as well as protection law issues. In addition, APLD reviews and makes recommendations on adverse federal litigation impacting ICE and provides guidance to the CCOs on developments in the federal courts. APLD works closely with the Department of Justice's Office of Immigration Litigation (OIL), DHS Office of the General Counsel, and U.S. Attorney Offices in developing legal strategy and briefing in significant federal cases. Furthermore, APLD reflects the commitment within ICE and OPLA to the sound and thoughtful handling of protection law issues and cases. The immigration courts and BIA adjudicates tens of thousands of requests for asylum, withholding of removal and for protection under the Convention Against Torture annually. These proceedings play a critical role in the development of U.S. protection law, including the issuance of decisions by the BIA and in federal courts. APLD also has primary responsibility for handling automatic and discretionary stays of immigration court bond decisions, oral arguments before the BIA, and recommendations to certify cases to the Attorney General.

- Commercial and Administrative Law Division (CALD). CALD provides legal advice to ICE and represents ICE in the areas of fiscal law, federal tort claims and Bivens actions, memoranda of understanding and other agreements, contract law, breached bonds, and a range of other administrative law matters in support of ICE operations. CALD also adjudicates administrative tort claims, provides guidance and legal advice concerning procurement actions, and develops and coordinates ICE legal policy in these areas. CALD represents ICE before the Government Accountability Office and the Civilian Board of Contract Appeals in procurement matters. CALD further assists Department of Justice litigation attorneys in representing ICE before the various federal courts in federal tort claims and Bivens cases, procurement matters, and other administrative law matters.
- Enforcement Law Division (ELD). The ELD is responsible for handling traditional immigration enforcement issues, general officer authority issues, and providing legal advice on custom issues. The demand for high quality products from ELD has increased tremendously in recent years. This is illustrated by the dramatic increase in enforcement activities and the need for increased ELD client advice in the areas of detention, expedited removal, stipulated removal, reinstatement of removal and custody determination. ELD plays a significant role in large enforcement operations, including review of warrant affidavits, providing legal advice to operational planners and agency leadership, traveling to the site to advise on legal issues arising during operations, and working extensively with the Department of Justice in related federal court litigation. Further, ELD provides legal support and counsel to the national security and cybercrimes sections of ICE Offices of Investigations and International Affairs, on highly specialized issues.

Additionally, any proposed legislation or regulation on immigration and customs issues requires ELD attention and expertise, whether to draft, negotiate, advise, or comment. OPLA's Regulatory Counsel has various major functions and plays a significant role in ICE's mission, which includes: drafting and assisting others in drafting ICE regulations, including changes in response to comments received during the clearance process, or public comments on a proposed or interim rule; guiding ICE regulations through the clearance process to the publication in the Federal Register of a proposed rule and ultimately a final rule; and reviewing regulations proposed by other agencies that affect ICE's operations.

- Ethics Division. The Ethics Division administers the ICE federal government Standards of Conduct Program, providing training, counseling, and management of the ethics financial disclosure process for all ICE employees. The Ethics Division provides legal professional responsibility advice to ICE attorneys and oversees management inquiries into OPLA employee misconduct complaints.
- Human Rights Law Division (HRLD). HRLD coordinates ICE's litigation efforts nationwide to pursue criminal prosecutions and judicial orders of removal against human rights abusers. HRLD team members work closely with the Office of Investigations and Office of Detention and Removal (DRO) to provide legal advice to agents and officers in the identification, investigation, prosecution, and removal of individuals involved in human rights abuses such as genocide, extrajudicial killings, and torture. HRLD works closely with the Departments of State and Justice, intelligence agencies, and non-governmental organizations to ensure that the United States does not become a safe haven for human rights abusers. HRLD currently has a caseload of 800 cases in various stages of litigation involving individuals from 85 different countries.
- Knowledge Management Division (KMD). KMD is responsible for assuring that information relating to the critical issues of the day is available and rapidly developed into knowledge for decision-making processes. This includes obtaining and managing access to all critical databases, such as TECS, Consular Consolidated Database (CCD), and the new systems of agencies and other DHS components, such as U.S. Citizenship and Immigration Services (USCIS) Enterprise Document Management System (EDMS). KMD develops and provides the organizational processes for a synergistic combination of the data and information-processing capacity of information technologies and the creative and innovative capacity of human beings. Toward this end, the KMD has developed and deployed the General Counsel Electronic Management System (GEMS) – a case and document management system. KMD develops, monitors compliance of users, and analyses OPLA workload and performance data. KMD is OPLA's liaison with the Office of the Chief Information Officer (OCIO) on all issues, including field office support, deployment of new systems and hardware, information sharing and system compatibility, and e-discovery. KMD staff serves as subject matter experts for OPLA IT in the field.
- Labor and Employment Law Division (LELD). LELED provides legal advice and represents ICE in the areas of employment and labor law. LELED represents ICE before the Equal Employment Opportunity Commission, the Merit Systems Protection Board, and the Federal Labor Relations Authority in employment and labor matters. LELED assists Department of Justice litigation attorneys in representing ICE before the various federal courts in Freedom of Information Act and Privacy Act cases and other labor law matters.
- Legislative Counsel. Legislative Counsel drafts and reviews legislative proposals for ICE, including coordinating the legislative proposals with the ICE Office of Congressional Relations, Office of Policy, and ICE Executive Secretariat, as well as coordinating with the DHS Office of the General Counsel and DHS Policy Office.
- National Security Law Division (NSLD). NSLD provides legal advice and oversees litigation involving special interest cases, including those involving international terrorism, counter-terrorism, espionage, and other national security matters. The legal work performed by the NSLD is critical to ICE's efforts to protect the nation's security. NSLD attorneys are involved in a fast-paced practice, working closely with other federal law enforcement and intelligence agencies, including the FBI and CIA, and routinely make decisions that have an immediate impact on national security.

Specifically, NSLD attorneys oversee and coordinate removal proceedings involving terrorists and foreign intelligence agents, provide legal support and training to ICE's OI (especially the Counter Terrorism Unit, National Security Integration Center, and Visa Security Unit) and Office of Intelligence, and liaison with the Civil and Criminal Divisions of the Department of Justice.

- Strategic Management Division (SMD). SMD serves as the central point for the general planning, budgeting, and managing of OPLA. SMD administers OPLA's strategic plan ensuring OPLA maintains a trained, professional, highly motivated, and client-focused staff who effectively and efficiently handle legal matters in support of the ICE mission. SMD ensures that OPLA's objectives are consistent with the ICE Assistant Secretary's strategic vision and coordinates refinements as necessary to OPLA's three to five year plan objectives. Additionally, SMD leads OPLA's risk management activities with ICE planning work groups. By incorporating the activities of strategic planning and risk management, SMD formulates future budget requests for OPLA that are based on Senior Leadership's vision for the organization. SMD conducts on-site reviews of Chief Counsel Offices and coordinates implementation of recommended "best practice" improvements. To help ensure consistency throughout OPLA, SMD drafts new or revised program policy and serves as the central repository for all OPLA policies.
- Training Division (TD). OPLA's TD is responsible for a variety of training events such as, Management Meetings, New Attorney Training, and specialty law training specifically tailored for OPLA staff such as National Security, Human Rights, Labor Law, and Leadership Development Training Program. The TD coordinates and facilitates training with other federal, state, and local government agencies (i.e., 287(g) training). Finally, the TD tracks training for all OPLA employees and ensures compliance with mandatory ICE training requirements.

Key Accomplishments

FY 2008 was a very successful year for OPLA in achieving staffing goals. OPLA had a 17 percent increase to have 831 attorneys on-board.

During FY 2008, OPLA realigned attorney resources to provide increased support and assistance to ICE components and external stakeholders such as the U.S. Attorney's Office. OPLA filled 72 newly created Senior Attorney positions in the field offices. Senior Attorneys provide a myriad of services, but their main duties include: providing training to other ICE components, handling national security and special interest cases, and providing specialized legal advice to the Special Agents-in-Charge (SACs) and Field Office Directors (FODs).

The creation of 21 Special Assistant U.S. Attorney (SAUSA) positions in FY 2008 focused resources primarily on criminal cases brought by the Office of Investigations, thereby increasing the number of ICE cases prosecuted by the US Attorney's Office.

During FY 2008, OPLA attorneys prepared 1,175,373 cases for immigration court (almost a 22 percent increase over FY 2007). In FY 2008, the total number of new matters received by the EOIR was 351,477 and the total matters completed were 339,071. Additionally, the Board of Immigration Appeals received 30,435 appeals filed from decisions made by the immigration judges.

In an effort to increase efficiency of the removal process, OPLA - in conjunction with DRO and EOIR - has focused legal support and stakeholder training efforts on the stipulated removal program to

eliminate the need to have an in-person hearing before an immigration judge. FY 2008 stipulated removal orders increased by almost 44 percent (33,440 total).

In FY 2008, ICE stepped up its worksite enforcement activities as part of its overall increased enforcement activities. OPLA was a major player in these activities and was involved from the initial planning phase of the various operations. During FY 2008, OPLA provided legal advice and training to OI in support of 123 worksite operations. In some of the larger, more significant operations, OPLA deployed attorneys to provide on-site advice to ICE agents and officers.

OPLA's workload also increased due to increased enforcement capabilities such as 287(g), Secure Communities, Criminal Alien Program, and other efforts. For example, as of the end of FY 2008, 287(g)-trained officers encountered over 85,000 aliens that are amenable for placement into removal proceedings.

OPLA's plan for FY 2009 builds upon the FY 2008 accomplishments by expanding support of immigration enforcement actions such as 287 (g), worksite, stipulated removals, and criminal prosecutions. Additionally, OPLA will implement the results of the High Performing Organization (HPO) study that concentrated on the legal support services performed in OPLA's field offices. By increasing efficiencies in field legal support services, support staff will be able to provide additional services in support of the attorneys.

ICE strategic planning indicators for FY 2010 and beyond suggest that ICE will continue to focus casework on immigration enforcement efforts, bulk cash smuggling, contraband smuggling, and aliens committing violent crimes against persons. In support of these ICE initiatives, OPLA will direct resources toward these efforts. Additionally, OPLA's broad objectives for FY 2010 include further enhancing OPLA's capabilities to effectively and efficiently prosecute immigration and customs law violations by further refining and improving efficiencies in how workload is managed.

U.S. Immigration and Customs Enforcement requests \$1.884 billion for this activity. This is a \$187.9 million increase over the FY 2009 Enacted Budget, of which \$64.6 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$123.3 million increase is for requested program increases associated with the M&A programs and the Southwest Border Enforcement enhancement.

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of Investigations (OI) enforces customs and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. Investigations lead to the arrest and prosecution of perpetrators and/or result in the removal of individuals posing risks to national security or public safety. OI investigates illegal trafficking in weapons and procurement of sensitive U.S.-origin technology (including weapons of mass destruction); the smuggling of narcotics and other contraband; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices; identity and benefit fraud; child pornography; child sex tourism; employers that hire illegal and undocumented workers; and health and public safety dangers.

The five investigative components of OI use immigration and customs authorities to address vulnerabilities and prevent violations that threaten national security and public safety. The following provides additional detail on OI activities:

National Security Investigations: OI works to deter and dismantle terrorist groups, individuals, and companies involved in the illegal procurement and movement of weapons of mass destruction and their materials and components. National Security Investigations personnel work closely with the Federal Bureau of Investigation's Joint Terrorism Task Forces (JTTFs). JTTFs utilize the collective resources of the participating agencies for the prevention, deterrence, and investigation of terrorism and related activities occurring in or affecting the United States.

The Counter Proliferation Unit (CPU) leads U.S. Government efforts to prevent foreign adversaries from illegally obtaining U.S. military products and sensitive technology, including weapons of mass

destruction components. ICE special agents possess the U.S. Government's most extensive expertise, longest ranging experience, and broadest export-related authorities.

Project Shield America is ICE's public and industry outreach program. Under this program, ICE special agents visit U.S. manufacturers and exporters of arms and sensitive goods to educate them about U.S. export laws and solicit their assistance in identifying potential illegal exports. Since late 2001, ICE special agents have conducted more than 14,000 presentations, resulting in tips that have led to ICE criminal investigations.

Millions of nonimmigrant aliens enter the United States every year to visit, work, and attend school. An estimated 100,000 of these aliens annually will overstay or violate the terms of their authorized period of admission, for economic, personal, and criminal reasons. In an effort to combat this threat, the federal government has implemented the National Security Entry Exit Registration System (NSEERS), the Student and Exchange Visitor Information System (SEVIS), and U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) to track nonimmigrant aliens in the United States. The responsibility for enforcing these systems lies with the Compliance Enforcement Unit (CEU).

The Threat Analysis Section (TAS), a part of the National Security Unit (NSU), is a specialized group of agents and intelligence analysts who proactively identify persons of interest from within the non-immigrant community of visitors, students, and temporary workers in the United States. The TAS uses the latest computer technology and access to immigration, law enforcement, and intelligence information to identify hidden links and associations between persons and events that could indicate a previously unknown threat.

National Security Investigations personnel participate in the Human Smuggling and Trafficking Center (HSTC), which combines ICE's resources with other federal agency representatives from the policy, law enforcement, intelligence and diplomatic arenas to work together to achieve increased progress in addressing the problems of human smuggling, human trafficking, and clandestine terrorist mobility.

Financial Investigations: OI identifies, investigates, disrupts, and dismantles criminal organizations and the complex systems used to launder funds generated from smuggling, human trafficking, financial scams, commercial fraud and intellectual property rights violations, forced child labor, and other criminal activity. In coordination with private sector partners, OI reduces the vulnerability of U.S. financial systems to exploitation by terrorist and other criminal organizations, and seizes illicit proceeds derived from and used for criminal activity. In view of the significant role that financial assets and money laundering play in sustaining criminal organizations and criminal activity, all ICE investigations include a financial component.

The Cornerstone Initiative focuses on coordination and cooperation with other domestic and foreign law enforcement agencies and the private sector to eliminate vulnerabilities in U.S. financial systems and disrupt and dismantle alternative financing mechanisms that terrorists and other criminals use to earn, move, and store illicit funds.

The domestic Trade Transparency Unit (TTU) and Money Laundering Coordination Center (MLCC) provide the analytical infrastructure to support financial and trade investigations. The TTU provides the capability to identify and analyze complex trade-based money laundering systems, such as the estimated \$5 billion-per-year drug money-laundering scheme known as the Black Market Peso Exchange (BMPE).

OI actively participates in collaborative investigative task forces with other federal, state, local, and international law enforcement agencies (e.g., High Intensity Financial Crime Area programs, Joint Vetting Units, Financial Action Task Forces) targeting terrorist financing and transnational money laundering.

Smuggling/Public Safety Investigations: OI identifies, deters, interdicts, and investigates activities associated with the unlawful movement of people and goods into and out of the country. In addition to conducting investigations targeted at disrupting and dismantling activities of groups and individuals engaged in the smuggling of humans and contraband, OI investigates human rights violations, exploitation of individuals, importation of hazardous and prohibited items, identity and benefit fraud, critical infrastructure protection/worksites enforcement, and violent criminal aliens.

Agents are confronted with numerous challenges in the effort to combat drug traffickers and, ultimately, significantly reduce the amount of illegal drugs introduced into the United States each year. Drug smuggling organizations continue to develop new and sophisticated methods to smuggle drugs into the United States by developing new concealment techniques, organizing internal conspiracies (i.e., criminals target corrupt personnel within a company or transportation industry to introduce contraband into otherwise legitimate cargo or conveyances), using various transshipment routes, and attempting to corrupt law enforcement officers.

Using programs such as the Maritime Port Security Program, OI is committed to eliminating the threats posed by internal conspiracies and smuggling organizations. Operation Safe Harbor focuses on investigative initiatives in the maritime port environment as well as non-investigative initiatives including cooperative programs with CBP and other DHS agencies.

Resources and support for these investigative efforts are enhanced through increased coordination and cooperation with other federal, state, tribal, local, and foreign law enforcement agencies and through participation in task forces such as the Organized Crime Drug Enforcement Task Force, the High Intensity Drug Trafficking Area, and the High Intensity Financial Crime Area programs.

The Commercial Fraud Unit and National Center for Intellectual Property Rights (IPR Center) targets predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the public health and safety of the American people at risk. ICE is the only federal agency that investigates predatory and unfair trade practices under title 19 of the U.S.C.

Identity and benefit fraud is a vulnerability of national security because it enables terrorists and criminals to exploit the legitimate immigration process and obtain “legal” status in the United States via fraudulent means. Benefit fraud is an extremely lucrative form of organized white-collar crime; it is complex and challenging to investigate, and often involves sophisticated, multi-layered schemes with multiple co-conspirators that take years to investigate and prosecute. OI focuses on identifying and targeting the most significant, prolific, and egregious violators, and individuals and organizations that pose a risk to national security or public safety.

Violent criminal aliens, such as sexual predators and street gang members, pose a significant threat to public safety. In partnership with state and local law enforcement, OI investigates foreign-born sex offenders for violations of laws in order to remove them from the country. Likewise, OI coordinates investigations with domestic and international law enforcement to disrupt and dismantle street gangs with foreign-born members, which have been involved in various crimes with a nexus to the border,

such as drug and human smuggling, weapons trafficking, document fraud, and the export of stolen goods. OI also works to deny safe haven to human rights violators in the United States by investigating their violations of U.S. criminal and immigration laws.

Through worksite enforcement initiatives, OI works with the federal and private sector to prevent criminals and terrorists from penetrating and crippling the U.S. economy by gaining employment in critical and sensitive areas. OI enforcement operations prioritize and target the most important, and vulnerable, facilities for enforcement activity, and identify and remove unauthorized facility workers through multi-agency screening and arrest operations. Furthermore, OI is applying sanctions to criminal employers whose employment practices constitute worker exploitation or have a nexus to alien smuggling or fraud. OI also conducts enforcement operations and I-9 audits on egregious violators that are not complying with the Employment Eligibility Verification requirements and have adopted the use of unauthorized workers as part of their business strategy. OI also conducts proactive outreach presentations and seminars under the ICE Mutual Agreement between Government and Employers (IMAGE) program to educate employers and trade associations as to their legal responsibilities that will help them remain in or achieve compliance with immigration and related laws.

Investigative Services: OI provides investigative support services to all categories of investigation, through including Asset Forfeiture and the Law Enforcement Support Center (LESC). Asset Forfeiture laws allow ICE OI agents to store and maintain seized property and forfeit the illicit proceeds and other criminally derived assets from critical infrastructure cases. Illicit proceeds are gained by organizations utilizing undocumented workers at Ports of Entry and/or In-Bond warehouses and are used to sustain the criminal activity and to fund other criminal endeavors. The LESL is an ICE 24-hour national enforcement operations facility that provides real-time immigration status assistance to federal, state, and local LEAs on aliens suspected, arrested, or convicted of criminal activity. The LESL responds to inquiries from state and local law enforcement partners who have apprehended individuals suspected of being in the country illegally. The LESL processes biometric information on criminal arrestees generated through interoperability between the FBI IAFIS database and the US-VISIT IDENT database to identify removable criminal aliens and research the severity of the subject's criminal history for prioritization of enforcement actions. These efforts directly support the ICE Secure Communities Initiative.

Law Enforcement Support & Information Management: OI provides investigative support services to all categories of investigation, including the Cyber Crimes Center (C3), Technical Operations, and the Forensic Document Laboratory (FDL). The C3 manages Operation Predator and investigates and provides computer forensics on domestic and international criminal activities occurring on, or facilitated by, the Internet, including document and benefit fraud, arms and strategic technology, money laundering, counterfeit pharmaceuticals, child pornography, and child sex tourism investigations.

The FDL is the only federal crime laboratory dedicated exclusively to detecting and deterring travel and identity document fraud. This capacity is critical to finding and eliminating the root causes of immigration fraud. Technical Operations assists the field by providing support for technical equipment needs including tracking devices, video equipment, body wires, covert entry, Title III equipment, Telecommunications Linking System as well as supporting all ICE OI Title III telephone, email and IP intercepts, and pen registers. Technical Operations provides training in undercover (UC) classes, designated technical agent (DTA) classes, technical enforcement officer (TEO) classes, Title III classes, Penlink software classes, and to foreign governments.

Key Accomplishments

In addition to ongoing activities, OI accomplished the following in FY 2008:

- initiated export enforcement programs dedicated to specific dual-use and military technology;
- initiated Operation TECH DEFENSE to identify and prosecute individuals, corporations and criminal organizations that unlawfully attempt to gain illegal entry into the United States to acquire export restricted information and technology and/or access to critical infrastructure facilities;
- established a visa waiver enforcement program that applies sophisticated name analysis software to investigate violators that pose an elevated risk to national security;
- activated the Bulk Cash Smuggling Center, within the LESC, to provide real time investigative and logistical support to law enforcement agents encountering bulk cash smuggling and other money laundering activity;
- expanded Border Enforcement Security Task Forces (BESTs) to target violent criminal organizations along the Northern border;
- established an ICE Intellectual Property Rights (IPR) and IMAGE Center (I3), which allows IMAGE and IPR to conduct corporate outreach and house the DC SAC Office's Document and Benefit Fraud Task Forces (DBFTFs);
- continued existing efforts by the Cyber Crimes Center (C3) to investigate and coordinate cases involving intellectual property violations (to include pharmaceuticals) and illegal export violations occurring online;
- implemented Operation Guardian in collaboration with CBP, Food and Drug Administration and the Consumer Product Safety Commission to target, interdict, and investigate the importation of substandard, tainted and counterfeit products being imported into the United States from the People's Republic of China (PRC);
- in conjunction with the Office of International Affairs (OIA), formally launched "Operation Armas Cruzadas" in order to combat the smuggling of weapons from the United States into Mexico. As part of this initiative, DHS and Government of Mexico (GoM) agencies are partnered in bi-lateral weapons smuggling interdictions, investigations, and intelligence-sharing activities; and
- in conjunction with Secure Communities, participated in outreach efforts to local law enforcement regarding ICE's transformative initiative to identify removable criminal aliens through use of biometric information submitted by local law enforcement to the FBI at time of arrest.

In addition to ongoing activities, OI plans to accomplish the following in FY 2009:

- coordinate with the Secure Communities initiative to identify removable criminal aliens and research the severity of the subject's criminal history for prioritization of enforcement actions;
- implement Operation Stamp Out in collaboration with CBP, U.S. Postal Inspection Service to combat the rise in the importation and distribution of counterfeit U.S. Postal money orders, stamps, and meter stamps into the United States;
- undertake an initiative to exchange information and conduct joint investigations with the PRC;
- in coordination with CBP, implement HQ-initiated Fraud Investigative Strike Team Operations to ten (10) ports/ICE Offices;
- expand the ability of the C3 to address the increases in digital data forensics volumes, while developing new tools and methods to manage and improve the analysis of derived digital information;
- continue the roll-out of Operation TECH Defense, an initiative intended to disrupt and deny suspect non-immigrants access to sensitive U.S. technologies through either immigration or export enforcement actions;

- reduce vulnerabilities in U.S. critical infrastructure, unlawful acquisition of export restricted technology, and unlawful entry of unauthorized non-immigrants into the United States; and,
- expand Operation Guardian to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the importation of substandard, tainted and counterfeit products being imported into the United States;
- initiate the Armas Cruzadas Surge Operation consisting of a three-month enforcement period that will utilize all available assets to conduct enforcement activities which will maximize weapons interdictions. These activities include targeting of known weapons proliferation networks and conducting roving southbound operations with CBP at the ports of entry (POEs);
- migrate the LESC's Alien Criminal Response Information Management (ACRIME) System from a FoxPro database to an Oracle database to further enhance system backup capabilities, improve scalability and availability, and ensure compliance with ICE IT architecture standards; and
- award a contract to gather requirements and document efforts to develop a system that will determine threat by utilizing data provided directly in the immigration status request, national security threat lists, and criminal history information provided by the National Crime Information Center (NCIC).

In FY 2010, OI will:

- expand Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the United States into Mexico to reduce the flow of weapons trafficking through U.S. borders;
- reduce the nation's vulnerability to exploitation of nonimmigrant visas/programs by increasing compliance enforcement actions;
- coordinate with CBP to expand the "security bond" initiative targeting the illegal diversion of commercial goods transported globally via the in-bond process;
- continue export enforcement programs dedicated to specific dual-use and military technology;
- expand training and targeting of potential violators in support of Operation TECH DEFENSE through the identification of sensitive technologies, the manufacturers of those technologies and determining whether the companies are compliant with immigration and export regulations and laws;
- develop additional commercial fraud based initiatives in coordination with CBP that focus on revenue protection and other import violations. Initiatives would include investigations of antidumping evasion, misclassified textiles, forced labor products, and restricted endangered species importations;
- build on the successful partnerships that have been created through the IMAGE program with exemplary businesses within the area of immigration compliance;
- conduct critical infrastructure and national security violation investigations that involve smuggling or trafficking of aliens or some other form of worker exploitation;
- further enhance national security violation investigations that involve smuggling or trafficking of aliens or some other form of worker exploitation;
- upgrade information technology to enhance trade-based money laundering and commercial fraud investigations;
- partner with the Department of Labor, Department of State, Social Security Administration, U.S. Postal Service, USCIS, and other federal state and local agencies to address document and benefit fraud and vulnerabilities in the immigration process;
- continue IPR Center outreach efforts both nationally and internationally;

- disrupt, dismantle, and eliminate vulnerabilities within internet financial sectors and services before terrorists and other criminal organizations can exploit them;
- continue asset forfeiture investigations by identifying, seizing, and forfeiting illegal proceeds;
- use early threat assessment efforts to identify recurring data availability and data quality issues to expand information sources to include state criminal history archives, prison release date sources, and statistical inferences (e.g., probable custody release dates based on severity of pending charges, criminal history, and holding jurisdiction);
- continue to review current operations to ensure resources are targeted based on risk;
- continue to develop plans that will provide continuity for critical ICE enforcement activities currently conducted at the LESC; and
- continue to support the activities, goals, and plans of Secure Communities working with Federal, State and local law enforcement agencies.

2010 Adjustments-to-Base	1	2	1,594
2010 Current Services	223	203	112,374
2010 Program Change	13	7	6,626
2010 President's Budget	237	210	119,000
Total Change 2009-2010	15	9	8,221

U.S. Immigration and Customs Enforcement requests \$119.0 million for this activity. This is an \$8.2 million increase over the FY 2009 Enacted Budget, of which \$1.6 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$6.6 million increase is for requested program increases associated with the M&A programs and the Southwest Border Enforcement enhancement.

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of International Affairs (OIA) conducts criminal investigations of legal violations involving contraband smuggling, immigration violations, money laundering, arms/technology trafficking, child sexual exploitation (child pornography and child sex tourism), and cyber crimes overseas. OIA Attaché offices also acquire law enforcement intelligence and information; support other Department of Homeland Security (DHS) missions (e.g., DHS security initiatives and trade programs such as the Container Security Initiative (CSI), and the TTUs); conduct international training; and act as the in-country ICE liaison with foreign governments and Embassy Staff.

The Attachés are responsible for the enforcement of health and safety issues related to products imported to the United States, including tainted or prohibited foodstuffs, unsafe toys, and other consumer products. OIA coordinates with foreign counterparts to share information under the bilateral agreements and Customs Mutual Assistance Agreements (CMAAs). The Office of International Affairs refers foreign leads to domestic ICE investigation offices and handles ICE investigative leads. The Attachés investigate and enforce laws for other Federal agencies that have a Memorandum of Understanding with DHS and any other matters as directed by the Secretary of DHS. OIA Attachés serve as senior DHS representatives in some overseas locations.

In addition to supporting the goals of DHS, OIA's activities also support the goals set forth by the Department of State in the areas of regional stability, counter-terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

Key Accomplishments

In FY 2008, OIA:

- conducted joint operations to take down a Special Interest Alien criminal facilitation network in Colombia, resulting in 10 high-profile U.S. extraditions and convictions;
- worked with the Department of Defense (DOD) to support efforts in Kabul, Afghanistan and Baghdad, Iraq to support the U.S. Central Command, U.S. Special Operations Command (SOCOM), and U.S. mission interests;
- expanded ICE OIA's presence at DOD Unified Combatant Commands (UCCs);
- established Senior ICE Representative positions at SOCOM and the European Command (EUCOM);
- expedited task force efforts to identify and investigate Politically Exposed Persons (PEPs) in coordination with foreign governments;
- expanded investigations impacting cross-border crime; dismantle multiple human and contraband smuggling organizations;
- assisted in the creation of additional TTUs with interested foreign governments, and initiated vetted units in Mexico and Colombia;
- initiated a major financial investigation of alleged public corruption and money laundering offenses committed within the United States and Italy; ultimately resulting in the seizure and forfeiture of \$122.9 million;
- continued support and assistance to CBP Container Security Initiative (CSI) and all other DHS international programs; and
- increased the number of formal partnerships with vetted foreign law enforcement units to eight. These units are located in Colombia, the Dominican Republic, Ecuador, El Salvador, Honduras, Mexico and Panama. The vetted unit in Colombia saw an increase in the number of seizure warrant applications by 471 percent, the number of assets seized by 994 percent, and the number of arrests for extradition by 280 percent.

In FY 2009, OIA will:

- initiate trans-national investigations in the areas of human trafficking, anti-smuggling, money laundering, child exploitation, fraud and sensitive technology investigations, as well as reduce threats associated with foreign nationals who pose a harm to the United States;
- open new Attaché offices in Ciudad Juarez, Hermosillo, and Monterrey, Mexico, and expand OIA's presence in Mexico to continue to work to combat the ongoing and increasing cross-border violence;
- deter, dismantle, and disrupt trans-national criminal organizations;
- in coordination with foreign governments, expedite task force efforts to identify and investigate "PEPs";
- redeploy assets to expand ICE OIA's presence at DOD Unified UCCs prioritized where DOD and DHS/ICE priorities intersect;
- coordinate and provide logistical support for the Textile Production and Verification Team (TPVT) visits and investigate leads to determine transshipment violations;
- conduct bilateral and multilateral BCS operations;
- deploy three Assistant Attachés to overseas offices based on repatriation workload needs;
- provide eTD demonstrations, conduct negotiations, install the eTD application, and train employees of three candidate country governments; and

- conduct one-on-one training to Parole Coordinators at each of the 26 domestic Special Agents in Charge offices to ensure the effective and efficient adjudication of significant public benefit paroles. SAC Parole Coordinators are the liaisons between each SAC Officer and the Law Enforcement Parole Branch (LEPB). The LEPB receives, vets, adjudicates, and coordinates all law enforcement paroles on behalf of DHS.

In FY 2010, OIA will:

- identify, disrupt and dismantle organizations involved in circumventing established laws and procedures designed to stem systemic vulnerabilities;
- continue to support goals set forth by DHS and the Department of State in the areas of regional stability, counter terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy;
- increase working relationships and coordination with DOD elements and other United States and foreign partners on the GWAT, and combat transnational criminal organizations;
- in coordination with foreign governments, expedite task force efforts to identify and investigate “politically exposed persons” (PEPs);
- increase coordination with host governments to remove aliens from the United States and reduce the time to secure the removal overseas;
- continue to coordinate TPVT visits, international EXBS and BCS training, and ILEA training of foreign law enforcement officials in a wide range of investigative areas;
- continue to support ICE and other DHS law enforcement related programs overseas; and
- participate in efforts to establish formal TTUs.

2010 President's Budget	77	73	32,313
Total Change 2009-2010	1	11	4,111

U.S. Immigration and Customs Enforcement requests \$32.3 million for this activity. This is an increase of \$4.1 million above the FY 2009 Enacted Budget, of which \$3.5 million is for annualization of prior year funding, pay inflation, and non-pay inflation. The remaining \$0.6 million increase is for requested program increases associated with the M&A programs.

CURRENT SERVICES PROGRAM DESCRIPTION

The Visa Security Program (VSP) was authorized by the Homeland Security Act of 2002. VSP enhances national security by identifying terrorists, criminals, and persons of special interest and preventing them from receiving visas to enter the United States. The Visa Security Program enhances the security of visa issuance at high-risk overseas post by deploying highly skilled and experienced law enforcement officers who: conduct an in-depth investigative review of visa applications that raise security concerns; investigate concerns relating to visa fraud and other criminal activity which can exploit the visa system; and provide advice and training on security issues to Department of State (DOS) consular officers, thereby enhancing their ability to screen security risks as they adjudicate visas.

ICE's overseas presence has been critical to performing the full spectrum of visa security functions, including applicant interviews, original document review, liaison with host country officials, and consular training. VSP is in 14 visa-issuing posts in 12 countries and will expand to an additional four countries in FY 2009. In May 2007, Congress addressed another facet of the Visa Security Program by passing H.R. 2206, which mandated the creation of a Security Advisory Opinion Unit (SAOU) within VSP. The purpose of the SAOU is to integrate ICE federal law enforcement expertise into the current SAO process. The SAOU's findings are incorporated into the overall SAO recommendation used by consular officers to adjudicate targeted non-immigrant visa applications involving cases of national security or foreign policy interest. The team is currently screening and vetting one category of SAO applications and is working to expand to other categories through improved technology.

Key Accomplishments

In FY 2008, OIA:

- increased overseas deployment of visa security officers to three new posts: Casablanca, Morocco, Dhahran, Saudi Arabia, and Frankfurt, Germany;

- expanded ICE participation in the SAO process by establishing a pilot Security Advisory Opinion Unit (SAOU) within VSP;
- developed and refined the VSP/SAOU Tracking System with DOS - a web-based, globally accessible system that will provide the necessary analytical, reporting and data storage capabilities the program requires;
- expanded VSP operations to 11 high-risk visa issuing posts where ICE Special Agents screened more than 748,500 visa applicants, conducted in-depth vetting of more than 311,000 applicants, recommended the refusal of 906 applicants, and generated 77 Watch List nominations; and
- conducted 97 training events to train and advise the DOS consular officers on security issues.

In FY 2009, OIA will continue to:

- expand the VSP by opening four new VSP offices in Amman, Jordan; Jakarta, Indonesia; Bogota, Columbia; and Sana'a, Yemen;
- expand the SAOU to screen and vet additional categories of SAOs;
- continue to develop and refine the VSP/SAOU Tracking System with DOS;
- work with the Office of Chief Information Officer (OCIO) to develop an updated VSP tracking system, called VSPTS-NET based off of existing software in use already by other federal agencies. This update is in response to a recent DHS/OIG audit which identified the need for a more robust VSP tracking system for managing workflow and gathering pertinent metrics, allowing better communication and tracking between OIA offices and with Department of State systems;
- screen visa applicants, conduct in-depth vetting of applicants, recommend the refusal of applicants and generate Watch List nominations to prevent terrorists from entering the United States; and
- conduct training events to train and advise the DOS consular officers on security issues.

In FY 2010, OIA will:

- continue VSP activities at high-risk overseas locations;
- screen visa applicants, conduct in-depth vetting of applicants, recommend the refusal of applicants and generate Watch List nominations to prevent terrorists from entering the United States;
- work with the OCIO to develop phase two of VSPTS-NET;
- expand SAOU operations to screen and vet additional categories of SAOs;
- support investigative initiatives by identifying emerging patterns and national security threats of increased risk from terrorists and other criminals organizations;
- continue to support DHS and other U.S. Government agencies and programs overseas; and
- conduct training events to train and advise DOS consular officers on security issues.

U.S. Immigration and Customs Enforcement requests \$79.9 million for this activity. This is a \$16.2 million increase over the FY 2009 Enacted Budget, of which \$3.1 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$13.0 million increase is for requested program increases associated with the M&A programs and the Southwest Border Enforcement enhancement.

CURRENT SERVICES PROGRAM DESCRIPTION

The ICE Office of Intelligence is responsible for managing the ICE intelligence system and its operational functions, including the activities of the headquarters staff, and field offices (Field Intelligence Groups or FIGs) spread throughout the country. The overall aim is to ensure that intelligence developed or received is processed, analyzed, and disseminated to ICE executive management and to operational units as it pertains to homeland security and ICE strategic goals, which include infrastructure protection and investigating the illegal movement of people, money, and cargo entering, exiting, transitioning, or moving within the Nation's borders. The Office of Intelligence recognizes that threats related to the foregoing issues are greatly facilitated by the illegal or uncontrolled migration of aliens across our borders.

The staff, assets, and resources of ICE Intelligence operate across the entire Nation, and respond to the intelligence needs, based on formal, documented requirements of its customers in support of the following programmatic and functional areas:

- **Border Violence Intelligence Cell (BVIC):** The focus of the BVIC is to support the national effort to combat weapons smuggling and stem the surge in violence along the U.S.-Mexico Border. This unit, located at the El Paso Intelligence Center (EPIC), facilitates timely information sharing with state, tribal, local, foreign and other federal law enforcement. The BVIC serves as the central point for analyzing all-source intelligence, referring leads to the Border Enforcement Security Task Force s (BEST) and ICE Attaché Mexico offices to seamlessly support investigation of the networks that span the Southwest border. BEST Groups, ICE Attaché offices, the U.S.-vetted Government of Mexico Arms Trafficking Group, through the BVIC, exchange cross-border weapons-related intelligence. BVIC along with the Alcohol Tobacco and Firearms (ATF) weapons desk, serves as ICE's central point for analyzing all-

source intelligence and trends in firearms smuggling. In December 2008, BVIC in conjunction with DHS intelligence components, produced a strategic assessment of southbound weapons smuggling that guided increased weapons investigation and interdiction operations along the Southwest Border. BVIC works to leverage Federal intelligence assets by improving information sharing between agencies.

- **Human Smuggling and Public Safety:** The focus of this program area is human smuggling, trafficking in persons, immigration benefit fraud, mass migration, and threats to public safety emanating from street gangs. Intelligence personnel assist ICE investigators in leveraging National Intelligence Community resources through intelligence research and continuing liaison. This also deals with violent gangs and criminals in the homeland, using immigration authorities and resources to gather information regarding foreign-born suspects, violators, and gang members.
- **Contraband Smuggling:** This program area deals with international narcotics trafficking organizations, and the disruption of smuggling groups and their operations. While narcotics is of primary importance, other forms of contraband trafficking, such as smuggling of prohibited goods are also of intelligence interest.
- **Illicit Finance and Trade Fraud:** This involves intelligence support regarding illicit movements of money or financial instruments, as well as other commerce-related crime issues such as international trade violations, protection of intellectual property rights, and investigations of public health threats that cross our borders.
- **Counter-Proliferation Intelligence (CPINT):** This program area focuses on the identification and disruption of individuals and organizations involved in the unauthorized movement and procurement of critical technology, dual-use goods, chemical, biological, radiological, nuclear/conventional weapons, and unauthorized U.S. exports to prohibited countries.
- **Field Intelligence Groups (FIGs):** This program area focuses on the support of ICE activities across the country by expanding the previous intelligence field structure from six regional offices to 26 Field Intelligence Groups (FIGs) collocated in cities with ICE investigative offices. This co-location yields the benefits gained by fostering habitual relationships between analysts and the customers they support, and allows for flexibility to support customers in a surge or task-organized manner through augmentation of the FIG staff with analysts temporarily deployed from around the country, connectivity with Intelligence Community assets, and deployment of additional technological assets such as Document Exploitation (IDocX) document exploitation capabilities deployed from headquarters such as that executed in FY09 during the Southwest Border surge, and many other smaller scale operations. Completion of this transition will bring a strategic level of support to ICE operations throughout the Homeland and includes support to all ICE operational components within the Area of Responsibility of each FIG to include the Border Enforcement Security Task Force (BEST) Groups and other joint task forces supported by federal, state, tribal, local and foreign law enforcement partners. On a day-to-day basis, FIGs disseminate products in response to customer requirements against all of the major program areas – Human Smuggling and Public safety, Contraband Smuggling, Illicit Finance and Trade Fraud, and CPINT.

- **SC/CIRCA:** ICE Office of Intelligence provides strategic and tactical intelligence support to Secure Communities operations. Intelligence analysts provide support by exploiting classified reporting, conducting Human Intelligence (HUMINT) collection activities to identify and locate criminal aliens at-large, conducting research using all-source information to develop actionable information on biometric “no match” hits, and producing alerts and reports that enhance officer safety and provide situational awareness to personnel participating in removal operations overseas. Intel also employs link analysis and trend and pattern research, develops risk/threat assessments, and analyzes threat reporting and trends in criminal patterns to support refinement of prioritization of criminal aliens. This allows the prioritization process to remain flexible in dealing with emerging threats and patterns of criminal behavior that put communities at risk.
- **International Intelligence (IIU):** The IIU serves as the focal point in ICE Intel for coordination of intelligence support to Office of International Affairs (OIA) operations worldwide with emphasis on specific regions that have significant levels of transnational criminal activity that affect ICE operations. The IIU gathers, analyzes, and disseminates intelligence relevant to ICE international operations to OIA, ICE Attaché offices, and ICE senior leadership and coordinates intelligence-sharing relating to OIA operations with other ICE Intel units and other law enforcement and intelligence community partners. IIU disseminates Homeland Security Intelligence Reports (HSIRs), to document, add value to, and share intelligence information obtained by Attaché personnel, provides country and regional assessments for leadership; and prepares assessments in support of the National Security Law Division.
- **Collections and Requirements:** This program executes tasks in commitment to increased responsiveness to customer and executive leadership intelligence needs. Intel places continued emphasis on transforming itself into a requirement-driven intelligence service and to improve internal and external information sharing. Critical steps in this process are to identify customer information needs, create requirements for collection and production, assist ICE intelligence analysts in acquiring the information needed to produce accurate, timely and relevant intelligence, and to disseminate that intelligence back to the community of interest. This translates to developing and satisfying strategic, operational and tactical intelligence needs or questions from ICE operational entities and policy makers. In order to meet these commitments, ICE must have clear expectations and requirements so proper resource allocation and staffing levels can be anticipated.

Key Accomplishments

In FY 2008, the ICE Office of Intelligence reported the following successes that reflect its mission of supporting its customers in achieving the strategic goals of the agency:

- **Resource Management-Intelligence Request Intake System (IRIS) and Field Intelligence Groups (FIGs):** A major achievement in FY 2008, which has long-term implications, is the stand up of a requirements gathering and management system that allows customers throughout ICE to elaborate requirements for intelligence support. This initiative allows for more timely and efficient satisfaction of requirements and allows for programmatic coordination in satisfying requirements, and leveraging existing products to meet customer needs. Combined with the reorganization of the program’s field operations into FIGs – to encourage better connectivity with customers – this process improvement allowed ICE to capture 1,131 requirements by year-end. This represents a major increase in the annualized estimate of requirements over FY 2007

(248 elaborated requirements) and provided program management with a much-cleared picture of customer needs. ICE Office of Intelligence satisfied 730 ad hoc customer requirements levied in FY 2008, and addressed, in part, over 19 standing information needs. In 2009, requirements levied are expected to reach over 3,600. The requirements system also allows the Program's leadership to ensure that the completed requirements map to the objectives of the ICE Strategic Plan.

- Customer Satisfaction: Respondent consumers within the National Intelligence Community found 76 percent of products originating from ICE Office of Intelligence of "High Value" and 24 percent were rated as "Of Value."
- Efficiency- IDocX support to Operation CEDAR VALLEY JUNCTION: IDocX system's scanning, digitization, search, retrieval and analysis capabilities were employed by ICE Office of Intelligence analysts to support law enforcement actions against unscrupulous employers by processing identification documents and other records in support of the largest Worksite Enforcement operation in U.S. history. The rapid processing of collected documents enabled the largest number of criminal arrests ever during such an operation. During this operation, ICE Office of Intelligence processed over 230,000 records and other documents within a 72-hour period. This turnaround yielded 303 successful prosecutions. This processing also enabled Office of Investigations to make the largest number of criminal charges ever in such an operation. Specifically, under Title 18 of the U.S. Code, these included 18 charges of Section 1028 (aggravated identity theft), 18 charges of Section 1546 (document fraud), and 42 charges of Section 408 (misuses of a Social Security Card).
- Information Sharing: During FY 2008, ICE Office of Intelligence made three operational Memoranda of Agreements that enabled information sharing with National Intelligence Community partners, and expanded its presence, via the BVIC in order to enhance information sharing capabilities with state, local and other federal law enforcement agencies in response to the issue of southwest border violence. ICE Intelligence is also committed to sharing information derived from ICE operations that can meet the needs of other agencies and governments that have a stake in protecting United States borders. To accomplish this, ICE Office of Intelligence manages the DHS Intelligence Fusion System, an unclassified web based network which enables the timely dissemination of intelligence reporting to over 14,000 law enforcement users worldwide.

In FY 2009 and FY 2010, the Office of Intelligence will continue to employ the Intelligence Requirement Intake System and requirements management process to support our customer's needs for intelligence products in line with the strategic objectives of ICE. As FY 2008 was the baseline year for collecting performance measures on requirements, ICE plans to increase the quantity of requirements satisfied by least 10 percent in FY 2009. This will, in part, be possible through fully staffing the Field Intelligence Groups (FIGs) – particularly in critical regions such as the Southwest border, expanding employment of IDocX, expanding the support of the International Intelligence Unit to ICE activities overseas, and leveraging information shared with other intelligence partners. By building upon our successes from last year, we will continue to meet our mission; ensuring that intelligence developed or received is disseminated to ICE executive management and operational units as it pertains to the objectives of the ICE strategic plan including, infrastructure protection, and the illegal movement of people, money, and cargo entering, exiting, transiting, or moving within the Nation's borders. In addition, ICE will continue to work with DOJ to ensure that each agency's collection and reporting

assets complement each other and that information is shared in an efficient and effective manner. Also, consistent with GAO's recent report recommendation, ICE will move expeditiously to assign people to OCEDTF's Fusion Center and the Special Operations Division. ICE will also take the actions necessary to become a full partner at the El Paso Intelligence Center (EPIC).

2010 President's Budget	5,713	5,676	1,936,594
Total Change 2009-2010	49	98	106,306

U.S. Immigration and Customs Enforcement requests \$1.937 billion for this activity. This is a \$106.3 million increase over the FY 2009 Enacted Budget, of which \$60.4 million is for annualization of prior year funding, pay, and non-pay inflation. In addition, due to the unforeseen increases and adjustment to the detainee healthcare delivery systems and oversight requirements, this amount includes a one-time adjustment-to-base of \$36.2M for the Custody Ops PPA to maintain current bed space levels. The remaining \$45.9 million increase is for requested program increases associated with the M&A programs.

CURRENT SERVICES PROGRAM DESCRIPTION

Custody Operations provides safe, secure, and humane conditions of detention for aliens taken into custody or arrested by ICE and other law enforcement entities, such as the Office of the Border Patrol, and state, county, and local law enforcement jurisdictions within the United States.

ICE secures bed space capacity in numerous detention facilities, and monitors these facilities for compliance with National Detention Standards. These standards specify the living conditions appropriate for detainees and ensure that detainees are treated with dignity and respect, and that they receive the best possible care while they are housed at a facility. The Detention Facilities Inspection Group (DFIG), within the ICE Office of Professional Responsibility, monitors conditions where ICE detainees are held in order to assure that facilities utilized by ICE maintain appropriate conditions of confinement consistent with correctional industry standards and practices.

Additional detention facility oversight mechanisms to assure compliance with the National Detention Standards include: annual inspections and on-sight at all of our facilities, and ongoing quality assurance compliance monitoring at our largest facilities. Both the inspections and compliance monitoring are performed by outside contractors who maintain considerable detention facilities, programs, and services expertise.

ICE owns and operates seven secure detention facilities called Service Processing Centers (SPCs). They are located in: Aguadilla, Puerto Rico; Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas. ICE implemented a design-build approach to enhance the physical plan of SPCs and support facilities. With the addition of two administration

and processing complexes at the Krome SPC in Miami and the Port Isabel SPC in Texas, operational efficiency at these locations has greatly advanced due to improving internal logistics and meeting the national standards for conditions of confinement.

ICE utilizes seven contract detention facilities (CDFs), which are run by contractors solely for ICE. These facilities are located in: Aurora, Colorado; Houston, Texas; Tacoma, Washington; Elizabeth, New Jersey; Broward County, Florida; Pearsall, Texas; and San Diego, California. In addition, nationwide Inter-governmental Service Agreements (IGSAs), ICE contracts for additional bed space with state and local facilities. Further, ICE supplements detention capacity through an arrangement with the Federal Bureau of Prisons' (BOP) Federal Detention Center in Oakdale, Louisiana.

In recent years, ICE launched efforts to consolidate the detained population in select detention facilities based on careful analysis of immigration, geographical and legal requirements. To this end, in FY 2007, ICE moved forward with plans to consolidate its detention capacity across the country by building a system that will include facilities of 1,000 beds or greater located strategically across the United States. ICE opened the first of these facilities in Stewart County, Georgia. These facilities increase efficiencies due to the immediate proximity between the detainee and case management staff, attorneys, Executive Office of Immigration Review (EOIR), and removal locations. The plan included maximizing the utilization of existing facilities and excess detention capacity in an effort to reduce costs and activation time in each facility. ICE has continued to consolidate populations according to strategic geographic areas such as San Diego, Phoenix, San Antonio, Seattle, New York, and Houston.

Arrests are increasing due to the recent resource enhancements for immigration enforcement staff (e.g., Fugitive Operations, Criminal Alien Program, SC/CIRCA, Border Patrol) and the Department's commitment to maintaining an end to the "catch and release" of illegal aliens along the Southwest Border. Key to ICE's success in managing a growing detention population has been the creation of the ICE Detention Operations Coordination Center (DOCC) to manage detention and transportation resources on a national level. The national management of these resources has allowed ICE to support arrests in field offices with limited detention capacity by transporting cases to field offices with excess detention capacity. Also, ICE is working to determine how to best utilize various means of supervision to best utilize detention capacity.

ICE's overall detention strategy for procuring bed space has been through a combination of privately owned and-operated facilities, contract facilities, and inter-governmental service agreements with state and local facilities. ICE is currently reviewing its procurement practices to determine what efficiencies can be gained in purchasing bedspace. ICE plans to work with DOJ's Office of the Federal Detention Trustee to better leverage Federal buying power.

ICE is conducting a study that into the feasibility, cost-benefit, and potential transition of SPC bed space requirements to the private sector. ICE completed the first phase of the study, which consisted of a review of physical conditions and market values of the SPCs, development of a cost model, and development of strategic options along a spectrum from status quo to full privatization. Phase II continued and expanded the analysis begun in Phase I, and addressed specific privatization issues, high level cost and benefits, and transition requirements on an individual facility basis. ICE is currently reviewing the Phase II results to determine appropriate next steps. ICE is currently evaluating whether it is in the best interest of the Federal government to own SPCs, and has requested a general provision allowing for the sale of the facilities.

Primary healthcare for alien detainees is managed by the Division of Immigration Health Services (DIHS), which became a component of DRO operations as of October 1, 2007. Through comprehensive health screening and the provision of direct patient care and managed care services to approximately 20,000 detainees, DIHS directly impacts the globalization of communicable disease and serves as a model for global health services delivery. A managed healthcare program is available system-wide to ensure adequate and appropriate care is provided to all detainees at the lowest possible cost.

The breadth of the responsibilities within the detention program requires a readiness to respond to a wide variety of emergency situations. As part of planning for a mass migration or disaster, the DRO Incident Response Unit has created contingency plans for DRO resources to remain readily available for deployment in the event of a natural disaster, terrorist attack, or mass immigration emergency and these plans are reviewed and modified based on lessons learned from recent occurrences.

Key Accomplishments

In FY 2008, DRO implemented several technology-driven resources to achieve greater program management efficiency. These include:

- The development of a customized bed space forecast model based upon transportation routes, arrest forecasts, and historical length of detention data and case type;
- The development of a tracking system to track acquisition and procurement information to better align ICE components and easily track key projects. Under this new system, OAO/DPAU stakeholders meet weekly to discuss acquisition and procurement projects, improving coordination between ICE Office of Acquisition Management and ICE DRO DMD.
- Institution of Special Response Teams (SRT) for field offices with dedicated Service Processing Centers (SPC) to ensure that each SPC has fully, operational well-trained SRT personnel. SRT have proven to be beneficial in responding to critical incidents, which poses a threat to the safety and security of the public, employees, detainees, or the integrity of the physical security at a facility. Additionally, SRTs can be used as a resource for law enforcement in support of national emergencies and security events.
- Initiating the second phase of the ICE study of the costs and benefits of consolidating contracts at all SPCs, including detention services, in accordance with A-76 efforts;
- Staffing Assessment/Credential Audit: This is both an accomplishment and an initiative. The DRO/Division of Immigration Health Services (DIHS) has made significant progress in hiring staff and decreasing existing vacancies at ICE site facilities. DIHS also conducted an internal desk audit on credentialing, which determined that all personnel were licensed in all facilities. This is a significant accomplishment because it reduced the risk to DIHS and ICE of adverse medical events and/or better responses to significant medical events; and
- Staffing Fulfillment: The initiative to achieve full staffing is a basic and important component to DIHS. DIHS is in the process of executing a hiring plan, which includes realistic priorities and timelines that span a calendar year. This will allow DIHS to be able to accept future commitments without sacrificing quality healthcare and service.

The Detention Standards Compliance Unit (DSCU) entered into an annual, detention compliance, inspection contract with Creative Corrections. Creative Corrections will conduct annual review of detention facilities housing ICE detainees and assist with program management, inspection schedules, reports, and an On-Site Detention Standards Compliance Contract with the Nakamoto Group. The Nakamoto Group will provide on-site compliance verification for detention facilities

housing ICE detainees, including an automated reporting function to allow DRO to monitor the current compliance status of any particular facility.

DCSU is currently in the final stages of modernizing ICE's National Detention Standards (NDS) to update agency policy regarding detention and bring ICE DRO practices in alignment with industry standards. The new standards are Performance-Based Standards (PBS), which focus on the *results* or *outcomes* the required procedures are expected to accomplish.

In FY 2008, medical examinations resulted in the detection of 175 cases of detainees with active tuberculosis, and 245 cases of other infectious diseases. Working with the countries of origin, DRO coordinated removals of 198 individuals with active and potentially active tuberculosis. By working with the countries of origin, it enabled officials to continue treatment of patients without interruption thus minimizing threats to public health domestically and globally and minimizing acquisition of drug-resistant and multi-drug-resistant tuberculosis.

In FY 2009, DRO will continue to enhance its efforts and capitalize on increasing efficiencies and successes and will:

- Continue to support the ending "catch and release" at the northern and southern U.S. borders;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue its detention inspection program;
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities; and
- Support Secure Communities initiatives to identify and remove all criminal aliens amenable to removal in jails and prisons throughout the United States.

In FY 2010, Custody Operations will:

- Continue to support the ending "catch and release" at the northern and southern U.S. borders;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue to support any additional bed space requirements generated by Secure Communities;
- As ICE's focus on criminal alien identification and removal intensifies, work to ensure current resources can strategically be focused on those efforts as well as specific SC/CIRCA appropriations;
- Create the Bed Space Tracking and Transportation (BST&T) system to increase the process efficiency of locating available beds and transporting detainees;
- Continue its detention inspection program; and
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities.

PPA: Detention and Removal Operations – Fugitive Operations

	Perm Pos	FTE	Amount
2008 Actual	656	482	224,403
2009 Enacted	736	732	240,643
2010 Adjustments-to-Base	1	3	4,567
2010 Current Services	737	735	245,210
2010 Program Change	5	3	5,967
2010 President’s Budget	742	738	251,178
Total Change 2009-2010	6	6	10,535

U.S. Immigration and Customs Enforcement requests \$251.2 million for this activity. This is a \$10.5 million increase over the FY 2009 Enacted Budget, of which \$4.6 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$6.0 million increase is for requested program increases associated with the M&A programs.

CURRENT SERVICES PROGRAM DESCRIPTION

The National Fugitive Operations Program (NFOP) is responsible for reducing the fugitive alien population in the United States. At the end of FY 2008, there was an estimated 557,761 fugitive aliens at large in the United States, according to the DRO Deportable Alien Control System (DACs). As of March 31, 2009, there were 551,246 fugitive aliens-at-large. ICE works to reduce the fugitive alien population by using Fugitive Operations Teams (FOTs), which consist of:

- One Supervisory Detention and Deportation Officer (SDDO);
- Four Deportation Officers (DOs);
- One Immigration Enforcement Agent (IEA); and
- One Deportation and Removal Assistant (DRA).

DRO created the Fugitive Operation Support Center (FOSC) to enhance the efficiency and effectiveness of the NFOP. The FOSC reviews and updates ICE fugitive alien cases in the Enforce Alien Removal Module (EARM) provides comprehensive leads to the FOTs, closes cases as appropriate, and facilitates the overall efforts to arrest fugitives. As a component of the NFOP, the goal established for the FOSC is to eliminate 26,000 cases from the fugitive population each fiscal year.

The FOSC conducts analysis, screening, background checks, and related support activities for the vetting of ICE fugitive aliens. The FOSC then reconciles data from external government and private sources. A significant number of cases are closed as a result of data analysis performed at the FOSC, resulting in more focused FOT operations. After analyzing, vetting, and compilation, actionable information is disseminated to FOTs.

ICE is currently reviewing NFOP activities to determine how NFOP assets could better support the identification and removal of criminal aliens with continued Secure Communities interoperability

rollout. The activities performed by NFOP are very similar to those performed by SC Interoperability Response Agents.

Key Accomplishments

In FY 2008, DRO accomplished the following.

- There has been an approximately twelve percent increase in the total number of arrests made by ICE Fugitive Operations teams as compared to FY 2007;
- As of September 30, 2008, ICE's fugitive case backlog was 557,761 fugitive aliens, which is 36,995 fewer fugitives than the population recorded on October 1, 2007;
- By the end of FY 2008, 99 of the 104 funded Fugitive Operations teams (FOTs) were operational, conducting enforcement activities across the United States. Presently, all 24 DRO Field Offices have at least one operational FOT;
- In FY 2008, 25,938 fugitive aliens were arrested and another 8,219 non-fugitive aliens were arrested during FY 2008;
- Of the ICE fugitives arrested in FY 2008, 5,652 were criminal aliens. Of the non-fugitive arrests, 2,276 were criminal aliens; and
- In FY 2008, the FOSC resolved 55,418 fugitive cases through various means assisting in the reduction of the fugitive backlog.

In FY 2009 and FY 2010, Fugitive Operations will:

- Continue to conduct targeted fugitive alien operations to reduce the fugitive alien backlog as directed by Congress. Fugitive alien enforcement operations conducted by 104 FOTs will primarily target criminal aliens and those found to be a threat to community safety or national security;
- Through the use of technology and partnerships with law enforcement agencies, the FOSC will continue to enhance procedures to process and analyze EARM fugitive data;
- The FOSC Resolution Unit will continue to develop and augment procedures in an effort to analyze the nature and characteristics of the fugitive alien population. This effort will aid in reducing the reported number of fugitives by reconciling the records of those fugitive aliens who have left the country, adjusted their status, immigrated or were discovered incarcerated;
- As ICE's focus on criminal alien identification and removal intensifies, work to ensure NFOP can support the Secure Communities Program's targeting criminal aliens and fugitives; and
- The FOSC Leads Unit will continue to enhance and incorporate technologies such as the analysis of government and commercial databases to prepare leads on fugitive aliens for transmission to the field.

Total Change 2009-2010	9	8	13,560

U.S. Immigration and Customs Enforcement requests \$222.1 million for this activity. This is a \$13.6 million increase over the FY 2009 Enacted Budget, of which \$5.3 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$8.2 million increase is for requested program increases associated with the M&A programs.

CURRENT SERVICES PROGRAM DESCRIPTION

The Criminal Alien Program (CAP) identifies criminal aliens incarcerated in federal, state, and local facilities and prepares them for immigration proceedings, ensuring that they are not released into the community. The identification and processing of incarcerated criminal aliens prior to their release into DRO's custody reduces the overall cost and burden to the federal government. CAP identifies criminal aliens through interviews at the facilities, matches those criminal aliens with a list of removal orders, and prepares to them for removal out of the country as soon as their criminal sentence is over. The program ensures the safety of our citizens as well as the national security of the United States by removing dangerous, often recidivist, criminal aliens before they engage in additional criminal activity.

A CAP team is made up of:

- One Supervisory Deportation Officer;
- One Deportation Officer;
- Six Immigration Enforcement Agents; and
- Two Deportation Assistants.

State and local correctional departments maintain independent data systems, and many do not track the immigration status of their prisoners. To resolve these issues, ICE is working with the states to receive their data and then compare the information given to the ICE immigration databases. In FY 2008, ICE received funding for an additional 30 CAP teams. ICE continued deployment of Video Teleconference (VTC) systems to CAP programs throughout the country. CAP will work to increase the number of charging document issued to individuals that are amenable to removal from the United States. ICE initiated a plan of action to implement interoperability with the U.S. Marshal Service to obtain electronic booking data. Matching this data against ICE databases will help the Bureau of Prisons

(BOP) to designate more efficiently and effectively foreign-born nationals in federal CAP sites where immigration hearings can be conducted via VTC or on site.

Key Accomplishments

In FY 2008:

- CAP issued over 210,000 charging documents. This exceeds the FY 2007 total of 164,296;
- 6,988 cases were presented to the U.S. Attorney's office for criminal prosecution. Of those, 5,374 cases were accepted;
- ICE strategically allocated 300 CAP funded positions (30 CAP teams) nationwide based on the risk based assessment;
- Deployed over 90 Video Teleconferencing units including eight Bureau of Prison sites; and
- CAP assisted in the deployment and expansion of Interoperability under the Secure Communities plan in 2008. The Secure Communities plan was approved by ICE leadership and is currently being implemented as a multi-phased, risk-based approach to identify and remove all criminal aliens amenable to removal in jails and prisons throughout the United States. As the operational partner of Secure Communities, CAP provides the required manpower to ensure successful operation of Interoperability.

In FY 2009, the Criminal Alien Program will:

- Continue to strategically allocate seven CAP teams nationwide.
- Continue the deployment of VTC systems to CAP programs throughout the country.
- Work to increase the number of charging documents issued to individuals that are amenable to removal from the United States.
- Increase the number of criminal prosecutions presented to the U.S. Attorney's Office.

In FY 2010, ICE will:

- Continue to increase efforts to identify criminal aliens incarcerated in federal, state, and local facilities, and the additional personnel will help to ensure that these criminals are not released into the community while preparing for immigration proceedings;
- Continue to increase the number of criminal prosecutions of violent recidivist criminal aliens;
- Continue to further the advancement of the Secure Communities Plan within the law enforcement community across the United States;
- As ICE's focus on criminal alien identification and removal intensifies, work to ensure current resources can strategically be focused on those efforts as well as specific SC/CIRCA appropriations; and
- Develop new advancements and best practices to ensure full screenings of institutional facilities.

2010 President's Budget	188	187	69,374
Total Change 2009-2010	2	3	2,775

U.S. Immigration and Customs Enforcement requests \$69.3 million for this activity. This is a \$2.8 million increase over the FY 2009 Enacted Budget, of which \$1.3 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$1.5 million requested increases are for additional funding associated with the M&A programs.

CURRENT SERVICES PROGRAM DESCRIPTION

National security and public safety are ICE's first priorities. To that end, ICE detains all aliens who pose a threat to community safety or national security, and those ICE is required to detain under the Nation's immigration laws. The Alternatives to Detention (ATD) Program was created to enable ICE to maintain current detention levels, while monitoring aliens who are likely to comply with immigration proceedings, without detention. ATD is comprised of two primary programs: Enhanced Supervision/Reporting (ESR) Program, and the Intensive Supervision Appearance Program (ISAP). Also funded within the ATD program is a separate Bond Management Unit.

The ISAP is a program that provides community-based supervision services for aliens while in the removal process or who are awaiting removal from the United States. The program employs case specialists who closely supervise the enrolled aliens, utilizing a variety of tools to ensure successful completion of the program. ISAP relies on electronic monitoring devices (e.g., telephonic reporting, radio frequency and global positioning satellite monitoring), unannounced home visits, and required office visits. In addition, the contractor assists the enrollees in obtaining travel documents information and utilizes community-based organizations to provide services such as housing, health, and employment services for those participants authorized to work.

ISAP provides services within 12 locations: Baltimore, MD; Delray Beach, FL; Denver, CO; Kansas City, MO; Los Angeles, CA; Miami, FL; New York, NY; Orlando, FL; Philadelphia, PA; Portland, OR; St. Paul, MN; and San Francisco, CA.

ISAP currently has a maximum participant limit of 6,000, of which, over 5,800 aliens are currently participating. Since its inception, ISAP has served over 12,500 participants. In FY 2004, ISAP's compliance rate with the administrative order of removal was 80 percent. The program currently reports an overall compliance rate with administrative removal orders of 91 percent.

The ESR is similar to ISAP in that supervision specialists closely supervise aliens utilizing electronic monitoring, residence verification, home visits, in-person reporting, and travel document information

collection. ESR is distinct from ISAP in that it requires fewer home visits, in-person reporting¹, and does not incorporate community-based organizations referral requirements. The contractor also provides support during large-scale operations. The Electronic Monitoring (EM) component requires the officers in the field to enroll the alien participant into the program and to respond to violation notifications. EM technologies available for use are telephonic reporting, radio frequency and global positioning satellite (GPS) monitoring.

ESR provides services within the 24 DRO Field Offices and three Sub-Offices (Charlotte, NC; Hartford, CT; and Orlando, FL). The current maximum participant limit for ESR 7,000 and there are currently over 6,600 active participants enrolled.

EM has no participant limit and is available nationwide and there are currently over 5,000 participants.

The Bond Management Unit (BMU), also funded within the Alternatives to Detention Program, is responsible for developing and implementing uniform bond policies and procedures. BMU provides uniform guidance to DRO field offices and ensures that bond related issues are addressed and resolved in a timely manner. BMU maintains liaison with the Debt Management Center (DMC), Burlington Finance Center, DOJ Attorneys and the Administrative Appeals Office (AAO) regarding bond-related litigation issues.

Key Accomplishments

In FY 2008:

- ATD increased its full-service participant slots by 667 percent; ISAP's participant slots were expanded from 1,800 to 5,000 and ESR added an additional 7,000;
- ESR and ISAP enrollments increased by 447 percent from the previous fiscal year at the same point in time (1,747 to 7,802);
- Implemented the Electronic Verification Information Process (eVIP). eVIP is a partnership between DRO and the Department of State's (DOS) Post Liaison Division's Visa Office, to expedite receipt of electronic alien departure verification information. The eVIP notice serves as evidence of departure by an alien from the United States. DOS foreign offices scan and electronically transmit departure verification documents directly to the BMU at VD-Bond-Verifications@dhs.gov;
- Experienced tremendous success with its Backlogged Bond Action Team (BBAT). This team assists field offices with backlogged bond cases. The team's objective is to update all backlogged bond cases so each field office has an up-to-date bond docket. In FY 2008, the BBAT has generated over \$30,563,105 dollars in Breached Bonds. These funds once deposited into the Breached Bond Detention Fund are utilized to fund detention beds. In 2008, BBAT has breached 7,531 bonds and canceled 2,072 bonds. The cancellations and breaches result in a savings of interest that is paid on the bonds by ICE; and

¹ The frequency of In-Person Office and Unannounced Home Visits range from two times per month to one time every other month.

- The BMU developed and implemented Uniform Bond Management Guidance. This guidance was distributed to field components in July of 2008 and provides important updated bond policies, procedures, and information.

In FY 2009, ICE:

- Solicited a new contract², which should be awarded by July of 2009³. The new contract will be similar to the current ISAP contract and will allow for staggered opening of ISAP programs nationwide as funding permits. The intention is to award the contract with initial offices beginning operations by September 2009. Expansion will continue into FY 2010 as dictated in the contract to reach coverage of all field and main sub-offices as funding permits during that year. The goal of this expansion is the successful transition of all current ESR, EM, and ISAP participant population to the new contract before September 20, 2009;
- Will continue the design and deployment of the eBONDS System. In FY 2008, BMU began working closely with OCIO and OAQ in aggressively pursuing the design, build, and deployment of the eBONDS Project. The eBonds application supports the Department of Homeland Security (DHS) bond management process and the Bond Management Information System (BMIS Web). The basic function of eBonds is to:
 - Reduce data entry costs by enabling customers to begin the bond process by providing the capability for surety companies to complete the I-352 Immigration Bond form using web-based technology;
 - Provide the capability to analyze and report on bond metrics associated with bond management and reduce the time spent on manually fulfilling report requests from field users; and
 - Develop a workflow dashboard for surety companies to view the status of active and historical bond processing.
- Provide the ability to enroll and update:
 - User information – names, roles, permissions, and associated digital signatures – for use by a third party Surety;
 - Surety contact information, including – managing agent, tax identification number, address, and telephone number; and
- Generate a PDF bond form documentation package, complete with a power of attorney form, I-352, and digital signature capability.

In FY 2010, Alternatives to Detention will:

- Conduct a feasibility study to implement “Kiosk-Type” technology nationwide. This initiative will assist the field office with the enormous task of supervising non-removable aliens who do not pose a risk to the community, by reducing face-to-face meetings with aliens to possibly save many man-hours to be used in other critical DRO mission areas; and
- Continue with the staggered opening of ISAP programs nationwide with the goal to increase coverage at 82 new locations and increase the participant capacity to 24,000.

² The contract will be awarded through the means of “full and open” competition as required by the Competition in Contracting Act (CICA), which was enacted as Title VII of the Deficit Reduction Act of 1984, Public Law 98-369.

³ The ISAP contract is set to expire on June 20, 2009. The final option year was exercised on June 21, 2008.

PPA: Detention and Removal Operations – Transportation and Removal Program

	Perm		
	Pos	FTE	Amount
2008 Actual	---	---	276,968
2009 Enacted	---	---	281,399
2010 Adjustments-to-Base	---	---	479
2010 Current Services	---	---	281,878
2010 Program Change	---	---	---
2010 President's Budget	---	---	281,878
Total Change 2009-2010	---	---	479

U.S. Immigration and Customs Enforcement requests \$281.9 million for this activity. This is a \$0.5 million increase over FY 2009 Enacted Budget, which is for annualization of prior year funding, pay, and non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION

The Transportation and Removal Program provides safe and secure transportation of aliens in ICE custody. It also prepares for and conducts removals from the United States, as ordered by an immigration judge.

The Removal Management Division formulates all DRO transportation and removal policy, conducts transportation and removal planning, defines and projects transportation and removal requirements, and oversees and supports Field Office Directors' (FODs) execution of transportation and removal funding. The division carries out its responsibilities through four supporting units: (1) Travel Document Unit; (2) Removal Coordination Unit; (3) Flight Operations Unit located in Kansas City, Missouri; and (4) Case Management Unit, including oversight of the DRO Cuban Unit and Post Order Custody Review (POCR) operations.

The **Travel Document Unit (TDU)** conducts diplomatic and liaison activities in order to remove persons from the United States through the procurement of travel documents. The TDU works with the Office of International Affairs and the Department of State on initiatives to compel greater cooperation from several countries that routinely refuse to accept or unreasonably delay the repatriation of their nationals. Another key initiative of the TDU has been to develop, implement, and deploy the electronic Travel Document system (eTD) to all Field Offices and to some foreign governments for the issuance of travel documents.

The **Removal Coordination Unit (RCU)** is comprised of two major components: Centralized Ticketing, and the Detention Operations Coordination Center (DOCC). Centralized Ticketing is responsible for the coordination and support of escorted and unescorted removal operations conducted by the field offices. The DOCC is responsible for maximizing the use of ICE detention space throughout the United States by maintaining an efficient process of utilizing commercial air travel for escorted and unescorted removals. RCU accomplishes this through the management of assigned

contract personnel and the oversight of multiple contract service providers by requesting country clearances through both the Secure Message and Routing Terminal cabling system and the Department of State's electronic Country Clearance system and coordinating the travel support service.

The DOCC is charged with maximizing detention space by maintaining capacity equilibrium as best as possible among detention locations by facilitating the goal that no alien amenable to removal proceedings will be released from DRO custody due to a lack of detention space.

The Mexican Interior Repatriation Program (MIRP) is managed by the RCU. The U.S. border with Mexico between the states of Arizona and Sonora, Mexico, has accounted for some of the highest levels of illegal immigration into the United States in the past eight years. The United States and Mexico, by joint accord, designated the Tucson Sector's western corridor as a "high risk" area under the bi-national Border Safety Initiative. In FY 2008, two flights a day departed Tucson, Arizona and arrive in Mexico City seven days a week for 70 days. The 2008 MIRP lasted from July 21 through September 28.

The **Flight Operations Unit (FOU)**, located in Kansas City, MO, manages all DRO mass airlift operations through a combination of ICE chartered aircraft and partnership with the Justice Prisoner and Alien Transportation System (JPATS). In conducting its DHS mission of transporting aliens with a removal order, the FOU oversees domestic and foreign scheduling of all DRO managed aircraft based on the operational requirements of the 24 field offices along with coordination with each respective receiving country and ICE Attaché office. The FOU also coordinates the procurement of ICE charters involved with the removal of aliens to Central Asia, the Pacific Rim, Africa, and the Middle East.

The **Case Management Unit (CMU)** has ensured compliance with applicable custody review regulations, thereby reducing adverse litigation and limiting DRO's liability in court actions. The Field Oversight Program, developed by the CMU, monitors and oversees case management operations of detained aliens under a final order of removal. This program has ensured that field offices follow up on custody reviews, travel document requests, and take appropriate case management actions in the cases of detained aliens.

The Transportation and Removal Program also includes case management activities. Aliens apprehended for violation of immigration law must be processed expeditiously and in accordance with laws and regulations.

The **Executive Information Unit (EIU)** coordinates the development and deployment of the Detention and Removal Operations Modernization (DROM) investment along with the Office of the Chief Information Officer. DROM will improve technology and business processes to better manage, track, and report on the movement of aliens through the immigration enforcement lifecycle.

Key Accomplishments

In FY 2008:

- DRO continued to engage other government agencies and embassies to accelerate travel documents issuance for aliens pending removal from the United States. DRO continued to develop and expand the eTD system and worked to encourage other foreign governments to use the system; the FOU operated seven charters outside of the Americas returning 495 alien passengers to Albania, Cambodia, Egypt, Indonesia, Jordan, Morocco, Nigeria, Pakistan, Philippines, Palestinian Authority, and Liberia while also supporting the policies of “catch and return” and increased interior enforcement operations. The FOU moved nearly 200,000 aliens, domestic and foreign; by increasing the number of ICE chartered aircraft and simultaneously augmenting JPATS aircraft.
- DRO implemented the Case Management Unit (CMU). The CMU implemented case management efficiencies, such as weekly and monthly reporting requirements and expanded field office site visits, to ensure field office compliance with regulations and procedures. The CMU successfully developed and ensured successful implementation of the November 2007 policy entitled Parole of Aliens Found to have a ‘Credible Fear’ of Persecution or Torture.
- DRO implemented the “Weekly Inventory List of Detained Cases” (WILDC) report in March. Through the first quarter of FY 2009, CMU has reviewed 26,068 detained cases through the WILDC, resulting in the identification of deficient cases in EARM. DRO has also implemented the monthly report, which replaces the quarterly report for better quality control.

In FY 2009, Transportation and Removals FOU will:

- Employ four ICE charter aircraft operating weekdays and Saturdays from San Antonio, Texas, (two aircraft) and Alexandria, Louisiana and Mesa, Arizona (one aircraft each) to support foreign removals;
- Use the San Antonio, Texas ICE chartered aircraft as a long-range platform capable of supporting special charter missions to South America, Eastern Europe, Africa, Middle East and Pacific Rim;
- Use JPATS contract aircraft to support shorter-range domestic movements with four airplanes—two each located in Alexandria, Louisiana and Phoenix, Arizona; and
- Place IEAs and Division of Immigration Health Services (DIHS) medical personnel on all DRO-managed aircraft, both foreign and domestic.

In FY 2010, Transportation and Removals FOU will:

- Continue to expand CMU activities; and
- Develop a strategic air plan for DRO flight operations based on a mission needs statement, operational requirements document, concept of operations plan, and an acquisition strategy that supports increased enforcement activity, decreased detention time, and increased removal operations.

2010 President’s Budget	601	558	211,846
Total Change 2009-2010	557	516	51,132

U.S. Immigration and Customs Enforcement requests \$211.8 million for this activity. This is an increase of \$51.1 million over the FY 2009 Enacted Budget, of which \$10.3 million is for annualization of prior year funding, pay, and non-pay inflation. The remaining \$40.8 million increase is for requested program increases associated with the M&A programs and the Secure Communities Enhancement.

CURRENT SERVICES PROGRAM DESCRIPTION

In FY 2008, Congress provided ICE with \$200 million to “improve and modernize efforts to identify aliens convicted of a crime, sentenced to imprisonment, and who may be deportable, and remove them from the United States once they are judged deportable.” Before the funds could be expended, Congress asked for a plan to modernize the policies and technologies used to identify and remove aliens.

On March 24, 2008, ICE submitted Secure Communities: A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA) to Congress. SC/CIRCA sets out a comprehensive plan to improve community safety by transforming the way the Federal Government cooperates with state and local law enforcement agencies to identify, detain, and remove all criminal aliens held in custody. Once implemented, SC/CIRCA will revolutionize immigration enforcement by using technology to share information between law enforcement agencies and by applying risk-based methodologies to focus resources on assisting all local communities in the removal of those criminal aliens representing the greatest threat to community safety.

To meet its stated mission, SC/CIRCA sets four goals along with a number of operational objectives that will move ICE toward achievement of those goals. The SC/CIRCA goals are:

- **Strategic Goal 1** – Identify and process criminal aliens amenable for removal while in federal, state and local custody;

- **Strategic Goal 2** – Enhance current detention strategies to ensure no removable criminal alien is released into the community due to a lack of detention space or an appropriate alternative to detention;
- **Strategic Goal 3** – Implement removal initiatives that shorten the time criminal aliens remain in ICE custody prior to removal, thereby maximizing the use of detention resources and reducing cost; and
- **Strategic Goal 4** – Maximize cost effectiveness and long-term success through deterrence and reduced recidivism of criminal aliens returning to the United States.

In the FY 2009 DHS Appropriations Act (P.L. 110-329) Congress appropriated an additional \$150 million for SC/CIRCA to meet the program’s goals. Congress further required ICE to utilize at least \$850 million of existing programs’ resources “to identify aliens convicted of a crime, and who may be deportable, and to remove them from the United States once they are judged deportable.” In FY 2009, ICE expects to obligate over \$1.4 billion of funds provided by Congress toward achievement of the four stated SC/CIRCA goals. ICE is currently reviewing how other current activities can better support the SC/CIRCA goals.

Key Accomplishments

In FY 2008, ICE accomplished the following activities aligned with meeting Secure Communities goals and objectives:

- Identified and issued charging documents on over 221,000 criminal aliens, representing greater than a 34 percent increase compared to FY 2007;
- Removed over 110,000 criminal aliens, representing greater than an 8% increase compared to FY 2007;
- Reduced criminal alien detention times by 5 percent to 45.6 days compared to FY 2007;
- Collaborated with U.S. Attorneys to initiate prosecutions against more than 6,500 violent, recidivist criminal aliens for felony violation of United States immigration law;
- Deployed 28 operational CAP teams, expanding ICE screening of foreign born criminals at all federal, all state and 13 percent of local prisons and jails (the remaining local prisons and jails make inquiries regarding foreign born detainees through 24x7 ICE call-in numbers);
- Developed prioritization criteria and an operational approach to roll out nationwide criminal alien screening over the next three to four years through biometric arrest information sent by law enforcement agencies to the DOJ;
- Began outreach to state and local Law Enforcement Agencies (LEAs) regarding Secure Communities goals and plans;
- Issued several procurements to improve the operational efficiency of ICE operational processes that identify, prioritize and conduct enforcement action against removable criminal aliens;
- Expanded the use of Institutional Removal Programs (IRP) to a total of 14 federal facilities, and approximately 50 state and local jails and prisons, significantly reducing ICE detention times for most criminal aliens processed through this program;
- Implemented a Case Management Unit (CMU) to standardize and streamline all detained case management processes with the goal of reducing average ICE detention times;
- Deployed a modernized system replacing ICE’s twenty-year old legacy mainframe detention and removal management system, improving operational efficiency; and
- Established an SC/CIRCA Program Management Office (PMO) reporting directly to the ICE Deputy Assistant Secretary for Operations.

In FY 2009, ICE will use over \$1.15 billion from ICE's base appropriation as well as an estimated \$255 million in SC/CIRCA appropriations to:

- Maintain existing criminal alien enforcement efforts ;
- Continue outreach to the national law enforcement community to communicate SC/CIRCA goals and objectives and strengthen information sharing partnerships for identifying and removing criminal aliens;
- Deploy an additional seven operational CAP teams to expand ICE screening for criminal aliens to additional local jails and prisons;
- Deploy biometric identification capability (integration of DOJ and DHS biometric databases) to more than 50 priority nationwide jurisdictions. Deployments will cover over 29 percent of the estimated nationwide number of criminal alien arrests.
- Expand ICE's operational capacity for completing threat assessments and alien status determinations on suspected criminal aliens by hiring 85 additional Law Enforcement Support Center (LESC) personnel and by improving IT systems supporting criminal alien identifications;
- Establish 24x7 operational response capability by reassigning current vacancies to hire 178 Interoperability Response Agents;
- Pilot methods to identify and apprehend at-large criminal aliens, whether fugitives or not, based upon threat to the community by hiring 26 enforcement agents;
- Aggressively prosecute violent, recidivist criminal aliens in coordination with U.S. Attorney offices, thus deterring removed criminal aliens from re-entering the country, by reassigning current vacancies to hire 62 additional Violent Criminal Alien Section agents;
- Increase ICE's capacity to process greater numbers of criminal alien removal cases by hiring 173 removal case management personnel;
- Procure Video Teleconferencing equipment for 170 priority locations to support Secure Communities, including additional Institutional Removal Programs at jails and prisons (where criminal aliens are processed for removal before entering ICE custody) and to expand the geographic area that CAP teams can cover when conducting interviews and other criminal alien screening/identification activities;
- Initiate development of systems to track the exact location of criminal aliens from the time they enter ICE custody until the time they are removed from the United States, improving officer safety and intelligence gathering efforts on detainees among other benefits;
- Initiate development of enterprise-wide bed space management and transportation management systems to make more efficient use of these limited and expensive ICE resources; and
- Add detention beds, additional removal transportation capacity and related costs to support the removal of greater numbers of criminal aliens taken into ICE custody.

In FY 2010, SC/CIRCA will maintain expanded operational capacity funded in FY 2008 and 2009. Using approximately \$75 million of remaining funds from the \$150 million provided by Congress to SC/CIRCA through the FY 2009 Appropriation, ICE will:

- Continue moving toward nationwide identification, apprehension and removal of all Level 1 (those convicted of violent felonies and major drug crimes) criminal aliens in accordance with the SC/CIRCA strategic plan, program goals and program objectives by extending criminal alien biometric identification capabilities to over 140 counties containing over 50% of the nation's estimated criminal alien population, to include all counties that touch the Southwest border;
- Increase the number of criminal aliens identified during FY 2010 to an estimated 450,000, more than doubling the number identified in FY 2008;

- Increase the number of violent Level 1 criminal aliens identified during FY 2010 to an estimated 38,000;
- Increase the number of Level 1 criminal aliens removed during FY 2010 to an estimated 13,000 (removal of Level 1 criminal aliens is expected to significantly lag identification due to extended incarceration sentences that many must serve prior to their removal); and
- Continue submitting a greater number of violent criminal aliens who repeatedly enter the United States illegally to U.S. Attorneys for aggressive prosecution under felony immigration charges.
- Work with other ICE programs to determine how existing activities and capacity can better support SC/CIRCA goals.

As a result, Secure Communities - in cooperation with Federal, state and local law enforcement agencies - will provide a safeguard to American communities by removing those criminal aliens from the United States that represent the greatest threats to community safety and by deterring their re-entry through aggressive prosecution of recidivists.

IV. Program Justification of Changes

**Department of Homeland Security
Immigration and Customs Enforcement
Salaries and Expenses
Justification of Resources Above Guidance**
(Dollars in Thousands)

Program Increase: Office of State and Local Coordination (OSLC) - ICE ACCESS

Strategic Goal(s) & Objective(s): ICE Strategic Goal 2: (Strategic): Prevent the Unlawful Exploitation of the Nation’s People and Institutions by those Violating Immigration Laws within the Homeland.

PPA: Management and Administration

Program Increase: Positions 28 FTE 15 Dollars \$11,600

Funding Profile

	FY 2008 Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	406	406	51,533	458	458	85,453	490	490	99,653
Program Increase	52	27	33,920	32	16	14,200	28	15	11,600
Budget Request	458	433	85,453	490	474	99,653	517	504	111,253

Description of Item

This request will provide funding for the OSLC to manage and oversee outreach activities for the ICE ACCESS programs. This includes: Customs Cross-Designation (Title 19) Training, Border Enforcement Security Task Forces (BESTs), Asset Forfeiture/Equitable Sharing, Document and Benefit Fraud Task Forces, Cross-Designation (Title 8) – 287(g) Program, Law Enforcement Support Center (LESC), Operation Community Shield, Operation Firewall, The Criminal Alien Program (CAP), Fugitive Operations, Operation Predator, and Secure Communities.

Personnel Costs (\$3.038 million)

- \$2.775 million of this increase will fund 25 positions within OSLC to facilitate increased program activities including:
 - Three Liaison Officer Positions within the ICE ACCESS Program (OTD) (GS-0301-12/14);
 - Six Program Managers for the OSLC Program, (Operations) (GS-0340-13/15);
 - Four Program Management & Support Staff; Mission Support OSLC HQ (GS-0342-13/14);
 - One Mission Support Specialist to support the OSLC Program (GS-0301-13/15);
 - Two Supervisory Management and Program Analysts at OSLC HQ (GS-0343-13/14)
 - Two Program Analysts in the Office of Professional Responsibility (GS-0343-13/14);

- Three Program Analysts (Management Oversight Branch) for the OSLC program (GS-0343-12/14);
 - Two Budget/Financial Analyst position at the OSLC (GS-0560-13/14); and
 - Two Administrative Program Support Specialists (OSLC) (GS-0343-9/12).
- \$0.263 million will fund three mission support personnel: one Attorney, one IT Specialist, and one Contracting Specialist.

Non-Personnel Costs (\$8.562 million)

- \$0.959 million of this request will fund initial training and training travel for 150 state and local officers and annual refresher training for 400 previously trained state and local law enforcement officers;
- \$1.2 million will fund approximately seven PCS moves to permanently staff the OSLC;
- \$1.185 million will fund contract extensions, to support the OSLC program;
- \$1.8 million will fund information technology assistance for participants in the 287(g) program and continuation of ICE ACCESS;
- \$3.241 million will fund detention bed space for an estimated additional 550 detained aliens;
- \$0.104 million will fund human resources contract support; and
- \$0.073 million will fund facilities costs for new employees.

Justification

On December 3, 2007, ICE created the Office of State and Local Coordination (OSLC) to better serve State and local law enforcement agencies (LEAs) by being a central point of contact for the LEAs. OSLC works to develop and facilitate partnerships with state and local LEAs through the ICE ACCESS program. ICE established the ICE ACCESS program in August 2007 in response to widespread interest from local LEAs who requested assistance through the 287(g) Program. Through ICE ACCESS, agents and officers meet with LEAs, assess local needs to accurately develop specific partnerships, and draft appropriate plans of action through agreements – which could be participation in the 287(g) program or another program within ICE.

One of the main programs overseen by OSLC is the 287(g) Program. This program has significant operational components within other ICE programs – primarily the Office of Detention and Removal Operations (DRO) and the Office of Investigations (OI). Because of this, the OSLC serves as one point of contact for the State and local LEAs to develop consistent and efficient partnerships instead of multiple ICE program POCs.

Since its creation, OSLC has functioned by utilizing personnel temporarily assigned from DRO and OI. To solidify a competent core group and organizational structure of operations and support management staff, OSLC is seeking this proposed enhancement. Providing full-time resources for this program will dramatically strengthen interaction with State and local LEAs and provide necessary oversight into the execution of program activities. In addition to funds and positions to stand up this division, this enhancement request also seeks funds and positions to further increase the supporting divisions that are impacted by the growth of the OSLC.

As of March 31, 2009, OSLC has established 67 Memoranda of agreement and has trained over 951 Law Enforcement officers in 23 States under the 287(g) Delegation of Immigration Authority Program.

ICE OSLC is expected to focus on the detention-based 287(g) program model and consider expansion to requesting agencies where the program is expected be mutually beneficial to ICE OSLC and the LEA, and to have a significant impact against the criminal alien element. With current trend data, OSLC is expected to increase MOAs at a level of 26 to 33 MOAs per year.

The FY 2010 budget request reflects a revision to the current staffing model. The Office of Training and Development is in need of permanent training funds to facilitate and maintain proper training levels for the OSLC – 287(g) program. In addition, OSLC HQ Operations will need to assign staff permanently, including mission support positions, within its office, rather than being staffed by detailees from other parts of ICE. ICE is also requesting additional staff positions in support of OSLC for the Office of Professional Responsibility (OPR), for upcoming and expected audits. OSLC is also requesting one Program Analyst; this revision will allow the program to further enhance the support of the removal process and dedicate staff to the oversight of service provider compliance within ICE detention standards.

In addition, OSLC is requesting funding for initial training, training travel, and annual refresher training for over 400 state and local law enforcement officers.

The program serves as a force multiplier for immigration enforcement by providing ICE training, certification, and supervision of state and local law enforcement officers. These officers will perform immigration-related enforcement functions with a focus on targeting criminal aliens, fraudulent document vendors, illegal aliens working in sensitive critical infrastructure positions, and violent sexual offenders.

In FY 2006, 89 officers were trained; 422 in FY 2007; 357 in FY 2008; and 45 as of March 2009.

This enhancement will provide for additional ICE oversight of the 287(g) program and increase the number of field audits conducted by OPR to 24 along with increasing the following activities up to:

- Aliens Identified for Removal – 71,500
- State and Local Officers Trained – 400
- Create core group of HQ staff to support the 287(g) and ICE ACCESS
- Create dedicated field supervisors in six most needed areas

With an increase in operational staff, equivalent increases in key mission support staff are required to cover critical functions (e.g., legal, acquisitions, information technology, investigations, financial, training, facilities, and EEO work). Such mission support costs have been included in this program increase, consistent with ICE and DHS workforce models. For example, ICE follows the DHS cost-to-spend preferred goal of 1.9 percent for acquisitions, which correlates with the need for one FTE for every \$8 million of additional contract award obligations, and, based on a facilities cost model, every new employee equates to an additional need for 300 square feet of workspace. This has resulted in the additional personnel and non-personnel costs above.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports the DHS Goal #1 “Protect our Nation from Dangerous People” – Objective 1.2 – “Protect Our Interior and Enforce Immigration Laws.” This initiative also supports state and local law enforcement by aggressively investigating all aspects of local criminal behavior with a nexus to illegal immigration.

Program Increase: Co-location

Strategic Goal(s) & Objective(s): Strengthen and Unify DHS Operations and Management

PPA: Headquarters Management and Administration

Program Increase: Positions 26 FTE 13 Dollars \$92,000

Funding Profile

	FY 2008 EOY Proj. Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	0	0	0	0	0	\$0	2	2	2,200
Program Increase	0	0	0	2	1	\$7,000	26	13	92,000
Budget Request	0	0	\$0	2	1	\$12,300	28	15	94,200

Description of Item

This request funds the second year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in 55 metropolitan areas, resulting in improved operational efficiencies and long-term cost savings. The Secretary has made ICE co-location a top Department priority, noting that failure to consolidate ICE's Legacy INS and Customs facilities since the merger impedes its effectiveness and efficiency as well as efforts to build a cohesive unified agency.

The FY 2006 House Congressional Appropriations Committee Report 109-79 cited "...ICE's need to co-locate all of ICE's legacy personnel... Physical co-location is needed to unify personnel and manage a cohesive workforce... within a significantly shorter period than five to seven years." In 2008, ICE identified 237 locations in 55 U.S. metropolitan areas suitable for co-location. Of these cities, ICE identified 27 possible prospectus-level (two in Northern Virginia) projects and 29 non-prospectus-level projects.

Given the imminent expiration of 72 percent of ICE leases by 2014, representing 475 leases in 3.9 million square feet of space, this initiative represents a unique opportunity. Even with the recent downturn in the real estate market, renewing existing leases would come at a steep cost, while failing to address integration issues or the many shortcomings with existing office space. Co-location offers the best strategy for containing future growth in lease costs, with additional savings through consolidated administrative and security functions. The Administration's commitment to environmentally friendly office buildings, fully reflected in this project, will result in lower energy and water usage.

ICE is currently evaluating whether it is in the best interest of the Federal government to own its SPCs, and has requested a general provision allowing for the sale of the facilities. If such sales are deemed to be in the best interest of the Federal government, ICE requests availability of the proceeds for additional support of the co-location plan.

Approach

To develop the plan, ICE engaged a real estate consultant and worked closely with GSA. The approach to determine suitable locations included creating and analyzing alternatives for each city, including cost and operational needs. ICE and GSA's strategy would pursue consolidation based on need and the timing of existing lease expirations. It recommends a preferred acquisition strategy for each city based on federal space availability and market conditions.

As part of the development of the ICE Co-location Plan, an analysis of five acquisition alternatives was developed for each city and incorporated into ICE's Co-location Plan:

1. GSA Inventory: This preferred alternative would house ICE in existing GSA-owned buildings.
2. Market Inventory: The next most preferred alternative would locate ICE in existing space in each city.
3. Federal Construction: In the relatively small number of cities where the first two options are not feasible, new buildings would be developed for ICE but the buildings would be federally owned and operated.
4. Inventory Consolidation: This alternative would have ICE consolidate in space it already leases.
5. Special: In rare cases, special circumstances require a customized solution which is not easily captured in any of the above alternatives.

The analysis included a financial summary of the alternatives showing the cash flow for estimated tenant costs, construction costs, and full service rent based on the size of the consolidation and the consolidation year. The consolidation year was selected by examining operational needs, expiring leases, current projects, and program needs to determine the most efficient year to co-locate in a city.

A preferred acquisition solution for each city was selected from among the alternatives based on cost estimates for each and local real estate conditions.

Personnel Cost (\$2.123 million)

The request would fund:

- Twenty-six new GS-13 personnel to provide full-time staff for asset management initiatives(\$2.123 million). Since the co-location plan is temporary in nature, ICE determining how contract staff can support the initiative, likely reducing the number of full-time staff included in the request.

Non-Personnel Costs (\$89.877 million)

- The remainder of the increase would be used to acquire and occupy office space and secure facilities that meet ICE mission needs and law enforcement requirements. Based on the Plan, ICE has identified 55 cities that will require co-location over a multi-year period.
- Given the long-term nature of the effort, and higher net cost that will result from any lease option ICE pursues, the plan is based on a consistent need for recurring funds each year. The FY 2010

funds will be used to implement 13 non-prospectus projects of various sizes each with an anticipated completion timeline of one to three years.

- Funds will be used for interior construction (“build-out” costs), voice and data cabling and other initial requirements of new office space, outfitting expenses for special spaces such as holding cells and security features.
- In addition, this increase would also fund human resources contractor support to hire the 26 positions (\$0.104 million) .

Justification

The Budget requests \$92.000 million and 26 positions (13 FTE) to achieve co-location of 351 leases in 55 U.S. metropolitan areas to support operational effectiveness.

- This funding would allow ICE to fund 13 non-prospectus projects in FY 2010.

1	El Centro	CA
2	Portland	OR
3	Spokane	WA
4	Columbus	OH
5	Reno	NV
6	Jacksonville	FL
7	Albuquerque	NM
8	Salt Lake City	UT
9	Orlando	FL
10	Raleigh	NC
11	Greenville	SC
12	Oklahoma City	OK
13	Charleston	SC

- The FY 2010 funding will allow ICE to consolidate 59 leases in 48 locations to 13.
- ICE has revised its co-location plan to prioritize the schedule of projects based on several factors, including operational needs, building condition and over-crowding and under the current plan and dependent on prospectus approvals.
- In light of current real estates market conditions, ICE is working with GSA to determine if the markets in the proposed 55 cities can now meet ICE’s operational needs. That analysis may increase the number of projects ICE can complete with these resources.

ICE Leases

Prior to undertaking the co-location effort, ICE conducted an assessment of its current leased inventory and analyzed its approach to meeting its space needs. ICE currently has 655 (6.4M SF) leases. This assessment illustrated that over the next five years (through 2014) 475 leases (72%) will expire impacting 3.9M SF. The Co-location Plan will reduce 351 leases of these leases (248 locations) to 55.

For example:

- In Houston, TX, ICE is currently housed in eight different locations with the Office of Investigations in six of those eight locations.
- In Phoenix, AZ, ICE is currently housed in six different locations with the Office of Investigations and Detention and Removal in four of those six locations.

- In Burlington, VT, ICE is currently housed in seven different locations with the Office of Investigations in five of those seven locations.
- In New York, NY, ICE is currently housed in seven different locations with the Office of Investigations in four of those seven locations.
- In El Paso, TX, ICE is currently housed in seven different locations with the Office of Investigations in four of those seven locations.
- In San Francisco, CA, ICE is currently housed in nine different locations with the Office of Investigations in three of those nine locations.
- In San Antonio, TX, ICE is currently housed in five different locations with the Office of Investigations in three of those five locations.

This consistent inefficiency across ICE's real property portfolio directly affects operations.

ICE Rent

ICE will realize a significant annual increase in its rent over the next five years. The average rental rate for the majority of leases set to expire is approximately \$25.40 per SF. The median market rental rate is \$36.75 per SF resulting in a 31% increase per SF when the existing leases are renewed. If ICE remains in its current existing space and renews its existing leases, ICE will incur an estimated \$60 million increase in lease costs over the next 5 years. Co-location would enable ICE to strategically implement new space, consolidate offices, reduce costs, and improve operational efficiencies across its leased portfolio.

ICE Growth and Current Initiatives

The ICE mission is to protect national security by enforcing our national customs and immigration laws and is the largest investigative agency in the Department of Homeland Security. In an effort to keep up with the growing need for security on the nation's border, over the course of the past four years, ICE's federal staffing increased 4,372 FTEs through March 2009. This growth does not reflect the additional FTE requested in the FY 2010 Budget.

The growth in personnel associated with increased enforcement initiatives has strained existing ICE infrastructure, but will be mitigated by the right sizing inherent to co-location.

The cost to build out specialty space, such as holding cells and processing areas, costs on average \$300 per square foot. It is important that this type of space not be duplicated in metro areas. Co-location is based on shared space among all of the ICE programs for these types of spaces.

Co-location addresses operational inefficiencies, barriers to building one ICE culture, and other deficiencies in the many older buildings where federal employees are presently located. It also supports efforts to raise the morale of ICE's employees. In addition to funding the build-out of ICE space, the plan would also update IT infrastructure.

American Recovery Act

ICE is dedicated to working in concert with GSA to target Federal buildings as viable co-location solutions in several cities in an effort to preserve the integrity of existing Federal Buildings and

collocate at the lowest cost possible. The American Recovery Act will modify existing Federal space making it more efficient and environmentally sound. ICE shares the commitment with GSA to increase green construction, reduce dependence on fossil fuels, and promote transparency in government projects. In addition, as part of the Co-location Plan, ICE has included a Leadership in Energy and Environmental Design (LEED) Silver rating goal for all its facilities. ICE is currently conducting feasibility studies on Federal Building Solutions to co-locate in the following cities which represent 25 percent of the total plan:

- Detroit
- Columbus
- Raleigh
- Orlando
- Tampa
- Los Angeles
- San Francisco
- San Diego
- Chicago
- Baltimore
- Austin
- St Louis
- Boston
- Newark

Real Property Management System

In addition, the request includes \$5 million for a real property management system. This system will allow ICE to better track the total cost of occupancy; manage and save on utility costs; provide for business continuity and disaster recovery; ensure regulatory compliance; and enforce standards and procedures. The management and implementation plans for ICE's real property portfolio are currently being managed in disparate and non-integrated MS Access databases and Excel spreadsheets. An up-graded integrated Real Property Management System (RPMS) will streamline ICE reporting and compliance, provide project management and tracking tools, enable strategic portfolio management and will be an essential part of co-location management. This system will allow ICE to understand the total cost of occupancy; manage and save on utility costs; provide for business continuity and disaster recovery; ensure regulatory compliance; and enforce standards and procedures. An up-to-date real property management system will help ICE justify its space requests to OMB and Congress and can be used to help programs manage, obligate, and track their space and property needs.

The system could also integrate a physical description of all facilities (e.g., square feet, structure type, and location), other real and personal property data, financial spreadsheets, integrated scheduling programs, Geographic Information Systems (GIS), Computer Aided Design (CAD) plans, technical material specifications, energy usage records, and repair parts lists. The up-graded RPMS through the facilities management portion of the program could also create an automated schedule for major mechanical repair events including condition assessment calculating maintenance and operational costs warning of impending operational failure of critical assets.

In addition, the RPMS will facilitate the tracking of critical data elements to enable deliverance of required real property data to in a timely manner. The RPMS will also enable ICE to better analyze its

real property portfolio and improve ICE's customer service by allowing customers to directly access their own real property data and view analytical reports of their individual portfolios; removing a step in the current process improving both customer service and efficiency.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports DHS Goal #5: Strengthen and unify DHS Operations and Management as it will allow ICE to unify personnel and manage a cohesive workforce. In addition, ICE will realize reduced costs and operational efficiencies. Current conditions are having a negative impact on information sharing capabilities and processing and on overall operational efficiency. Without co-location efforts, higher rent and overhead costs for lease administration on multiple facilities and leases will continue.

Budget Request	376	334	\$59,314	414	379	\$72,932	464	423	\$85,828

Description of Item

This program increase will support the ICE Office of Professional Responsibility (OPR) Detention Facility Inspection Group (DFIG) and Management Inspection Unit (MIU) Field Inspections Program.

Personnel Costs

\$8.815 million is requested to fund:

- 25 GS-14 Special Agents at a cost of \$4.448 million for DFIG operations deployment in field offices
- 21 positions for MIU at a cost of \$4.029 million:
 - nine GS-14 Special Agents;
 - eight GS-14 Management Program Analysts;
 - two GS-14 Criminal Research Specialist;
 - two GS-7 Management Program Technicians; and
- \$.338 million for four mission support personnel: two Attorneys, one Legal Assistant, and one IT Specialist.

Non-Personnel Costs

\$3.585 million of the program increase is requested to fund:

- \$1.950 million for Permanent Change of Station (PCS) for 13 Special Agents (\$150,000 each). OPR is requesting PCS costs in the first year since OPR agents are hired from the current ranks of the ICE officer corps and often must move in the first year of duty. Of this amount \$1.45 million is non-recurring;
- \$0.823 million for one-time, non-recurring facility build out and new lease requirements associated with DFIG;
- \$0.104 million for human resources contractor support; and
- \$0.708 million for facilities costs for new employees.

Justification

This program increase is required to support the ICE Office of Professional Responsibility (OPR) Detention Facility Inspection Group (DFIG) and Management Inspection Unit (MIU) Field Inspections Program. The DFIG conducts independent inspections of all ICE detention facilities to ensure that the facilities comply with ICE National Detention Standards. This initiative will enable ICE to increase the number and scope of the inspections, and will improve the welfare, safety, and living conditions of ICE detainees and the safety of ICE employees. This increase for the detention inspection program is paramount to ensuring effective management of the current and projected increase in the ICE detainee population.

Currently, DFIG is administered and operated from ICE headquarters in Washington, D.C. This program increase supports the deployment of the 25 Special Agents to OPR offices near DRO field offices. These agents will assiduously dedicate themselves to executing DFIG functions that ensure compliance with standards at DRO detention facilities.

The MIU conducts reviews of all domestic and foreign ICE programs. During the inspections process, MIUs examine internal controls and identify areas where these controls are circumvented, as well as ensure compliance with established guidelines, policies, and procedures. This program increase will augment personnel who conducted the inspections by 21 from a current staff of six.

With an increase in operational staff, equivalent increases in key mission support staff are required to cover critical functions (e.g., legal, acquisitions, information technology, investigations, financial, training, facilities, and EEO work). Such mission support costs have been included in this program increase, consistent with ICE and DHS workforce models. For example, ICE follows the DHS cost-to-spend preferred goal of 1.9 percent for acquisitions, which correlates with the need for one FTE for every \$8 million of additional contract award obligations, and, based on a facilities cost model, every new employee equates to an additional need for 300 square feet of workspace. This has resulted in the additional personnel and non-personnel costs above.

Impact on Performance (Relationship of Increase to Strategic Goals)

This program increase is expected to improve ICE's management of its program operations and detention facilities by producing: (1) an increase in the number and scope of facility inspections conducted; (2) a decrease in the number and frequency of reported violations of ICE National Detention Standards; and (3) a decrease in the number of violations of civil rights and civil liberties cases investigated.

The resources will strengthen ICE's accountability, enhance the effectiveness and efficiency of ICE, improve compliance, and develop internal controls for ICE programs. With these resources, the annual inspection rate is expected to increase by 75 percent - from 72 to 126 investigations/inspections - with an ultimate goal of inspecting each detention facility used by ICE every four years.

Description of Item

The Southwest Border Enforcement Initiative is intended to enhance national security by expanding activities to control our borders. At the highest level, this initiative helps prevent the movement of people, money, and materials across the Southwest border that could harm the Nation and its people. Plans include increasing enforcement staffing to combat a wide variety of illegal activities threatening the Southwest border, improving cooperative efforts with the Mexican government, reinforcing intelligence operations in the region, and establishing another Border Violence Intelligence Cell to collect, analyze, and disseminate vital information to the field and the intelligence community. These efforts are intended to lessen the risk of increased criminal activity, weapons and arms smuggling, victimization of smuggled aliens, and the entry of terrorists, criminals, and gang members from Mexico.

Office of Investigations (208 positions, \$48.743 million)

This request will fund 208 Office of Investigation positions needed to support the Southwest Border Enforcement Initiative, a key homeland security priority. The Southwest Border Enforcement Initiative will allow ICE to identify criminal activities and eliminate vulnerabilities that pose a threat to our nation's borders, as well as enforce economic, transportation and infrastructure security. By protecting our Nation and border security, ICE further expands efforts to eliminate the potential threat of terrorist acts against the United States.

Personnel Costs

\$34.877 million of this request will fund 208 OI positions:

- 24 GS-1811-14 Supervisory Special Agents/ASAC/DSAC;
- 125 GS-1811-7/13 Special Agents;
- One GS-1801-5/7/9 Seized Property Specialist;
- Eighteen GS-1801-13/14 Criminal Research Specialists;
- Two GS-1397-7/14 Forensic Document Examiners;
- Fifteen GS-1802-5/7 Investigative Assistants;
- Eight GS-0301-13 Mission Support Specialists;
- Eight GS-0343-14 Management and Program Analysts;
- Two GS-0072-7/13 Fingerprint Specialists;
- Two GS-1301-9/14 Physical Scientists;
- One GS-0101-13 Professional Victim Assistant; and
- Two GS-1801-13 Technical Enforcement Officers.

Non-Personnel Costs

The remaining \$13.866 million in non-personnel resources will fund travel, training, and other costs as indicated below. This initiative secures the Southwest Border of the United States and mitigates the risk associated with the foreign nationals operating outside and within the United States seeking to exploit border vulnerabilities. In addition, non-personnel costs for facilities seek to expand existing and create new operational facilities along the Southwest Border to adequately support the increase in personnel resources.

Office of International Affairs (12 positions, \$4.925 million)

OIA requests \$4.925 million for the Southwest Border Enforcement Initiative. This initiative will fund 11 Criminal Investigators along Mexico's northern border in high-risk locations and 1 Contracting Specialist to provide mission support. The Criminal Investigators will assist in reinforcing and strengthening Office of Investigations (OI) operations along the U.S. southwest border. These agents will:

- Enhance interagency and interdisciplinary efforts between ICE and Mexico
- Increase ICE's efforts to identify, disrupt and dismantle transnational criminal organizations and networks
- Increase the number of priority cases originating in Mexico
- Increase leads and intelligence information and domestic and host country enforcement actions
- Increase coordination with Mexico to target and reduce vulnerabilities and criminal organizations that threaten our security.

Without this enhancement, there is a risk of increased criminal activity, weapons and arms smuggling, victimization of smuggled aliens, and the entry of terrorists, criminals, and gang members from Mexico. This request also includes travel costs, will increase cooperation with our foreign counterparts, and improve intelligence sharing.

Personnel Costs

\$1.607 million of this request will fund:

- Eleven Criminal Investigators (Overseas), GS-13, for northern border of Mexico operations to be deployed to Attaché and Consulate offices in Mexico; and
- One Contracting specialist.

With an increase in operational staff, proportionate increases in key mission support staff are required to perform critical functions. Included in this initiative is \$.082 million for one Contracting Specialist

Non-Personnel Costs

\$3.318 million of this request will fund:

- Continuing support to the Attaché and consulate offices, which support the investigative component of criminal investigators preventing the criminal organizations along the northern border of Mexico. This funding will support operational travel, increased work with foreign counterparts, training, intelligence sharing, interdiction, and investigation of transnational crimes.

Office of Intelligence (90 positions, \$9.688 million)

ICE is requesting \$6.888M for 90 Intelligence Officers to reinforce intelligence operations along the Southwest Border at existing Southwest Border Field Intelligence Groups (FIGs), current and projected Border Enforcement Security Task Forces (BESTs) along the Southwest Border and at the Border Violence Intelligence Cell (BVIC) based at the El Paso Intelligence Center.

BVIC facilitates timely information sharing with state, tribal, local, foreign and other federal law enforcement activities, and serves as the focal point for analyzing all-source intelligence, referring leads to the Border Enforcement Security Task Force (BEST) Groups and ICE Attaché Mexico offices to seamlessly support investigation of the criminal networks that span the Southwest border. BEST Groups, ICE Attaché offices, the U.S.-vetted Government of Mexico Arms Trafficking Group, through the BVIC exchange cross-border weapons-related intelligence.

This enhancement will improve ICE's capability to develop pre-operational intelligence reports, strategic intelligence products, and post-operational impact assessments. These products will enable the enforcement resources of the Department, ICE, and partner agencies to have the maximum impact possible to protect the Homeland, stem Southwest Border violence, and uphold public safety.

The requested Report Writers will ensure that information collected by ICE is appropriately shared with the United States Intelligence Community. ICE information can fill in gaps in intelligence reporting and enable the United States to uncover previously unknown connections between terrorist or other criminal organizations. Proper reporting, which includes recognition of the source of the information, serves to promote secure borders by integrating domestic, border, and international intelligence.

The intelligence support provided to the Southwest Border will also include expanded liaison to the United States Intelligence Community, improved document exploitation capabilities for ICE field offices, improved trend and pattern analysis used to build forecast models, and greater ability to inform the overall enforcement focus along the Southwest Border on law enforcement execution and vital resource management issues.

ICE is also requesting \$2.8 million to acquire and install part of the DHS Homeland Security Data Network (HSDN) collateral network in ICE domestic field offices. This funding will cover nine prioritized ICE field locations and will enhance access to classified materials by BEST Groups operating along the Southwest Border.

Personnel Costs

\$6.888 million of this increase will fund 90 positions within Intel (Intelligence Officers, Intelligence Research Specialists, Intelligence Assistants, Criminal Investigators, Management and Program Analysts, and Supervisors):

- 40 GS 9-12 junior-level positions;
- 40 GS 13 mid-level positions; and
- Ten GS 14 senior-level positions.

Non-Personnel Costs

\$2.800 million to acquire and install nine Homeland Security Data Network (HSDN) collateral networks in ICE domestic field offices along the Southwest Border.

The BVIC will provide intelligence support to BEST in order to confront many of the contributing factors to acts of violence along our Nation's borders. One contributing factor of significant concern is southbound weapons smuggling from the United States into Mexico. This enhancement will improve ICE's capability to develop pre-operational intelligence reports, strategic intelligence products, and post-operational impact assessments required. These products will enable the enforcement resources of the Department and ICE to have the maximum impact possible to protect America and uphold public safety.

The requested Report Writers will ensure that information collected by ICE is appropriately shared with the U.S. Intelligence Community. ICE information can fill in gaps in intelligence reporting and enable the United States to uncover previously unknown connections between terrorist or other criminal organizations. Proper reporting - that includes recognition of the source of the information - serves to promote secure borders by integrating domestic, border, and international information and intelligence.

The intelligence support provided to the Southwest Border Enforcement Initiative will also include expanded liaison to the U.S. Intelligence Community, improved media exploitation capabilities for ICE field offices, improved trend and pattern analysis used to build forecast models, and greater ability to steer the overall enforcement focus along our borders.

Expansion of HSDN capability requested will dramatically improve ICE's ability to transmit classified information at the Secret level. Secret-level computer-to-computer communication is a critical tool of enforcement operations that target threats to our Nation's borders.

Mission Support

Personnel Costs

\$3.045 million of this request will fund 39 positions:

- Eleven Attorneys;
- Seven Legal Assistance and Support Positions;
- Two Personnel Security Positions;
- Six IT Specialist Positions;
- Three Contracting Specialists;
- Two Asset Management Portfolio Lead Positions;
- One EEO Specialist Position;
- One Financial Management Specialist Positions;
- Three Accounting Technician Position; and
- Three Training Positions.

Non-Personnel Costs

\$3.599 million of this request will fund:

- Human Resources Contract support; and
- Facility costs for new employees.

Justification

Office of Investigations

BEST

ICE OI is requesting funding for 90 GS-1811-7/13 Special Agents, 18 GS-1811-14 Supervisory Special Agents, 10 GS-1801-13/14 Criminal Research Specialists, 10 GS-1802-5/7 Investigative Assistants, 6 GS-0301-13 Mission Support Specialists, 7 GS-0343-14 Management and Program Analysts, 1 GS-1801-5/7/9 Seized Property Specialist, and 1 GS-1801-13 Technical Enforcement Officer to further support the Border Enforcement Security Task Forces (BEST). In addition, OI is requesting \$3.500 million in non-personnel costs facilities to house the BEST entities, training for U.S. and Government of Mexico (GoM) personnel, the contingent of foreign law enforcement officers, and the purchase of computer equipment for intelligence and data-mining purposes. BEST is a critical cornerstone of the Secure Border Initiative program. BEST integrates federal, foreign, state and local law enforcement efforts in the field that are focused on the identification, disruption and dismantling of cross-border criminal organizations. Interdiction efforts will prevent smuggling and illegal entry of persons, with a priority on terrorist groups, gang members, and criminal aliens. Investigative efforts will target human smuggling, contraband smuggling, weapons smuggling, money laundering, bulk cash smuggling, criminal gangs, critical infrastructure protection, identity theft and benefit fraud, and any other vulnerabilities that pose a threat to public safety or national security.

Financial

To augment investigations along the Southwest Border, ICE OI is requesting 5 GS-1811-7/13 Special Agents, 1 GS-1811-14 Supervisory Special Agent, 1 GS-1801-13/14 Criminal Research Specialist and 1 GS-1802-5/7 Investigative Assistant to focus its financial investigations program on crimes associated with national security and critical infrastructure investigations. ICE aggressively pursues the financial component of every investigation. ICE supports many long-standing initiatives concerning national

security: money-laundering, bulk cash smuggling, unlicensed money service businesses, and corrupt foreign officials, all of which pose threats to national security and critical infrastructure.

Arms and Strategic Technology Investigations (ASTI)

ICE is requesting funding for 5 GS-1811-7/13 Special Agents, 1 GS-1811-14 Supervisory Special Agent, 1 GS-1801-13/14 Criminal Research Specialist, and 1 GS-1802-5/7 Investigative Assistant. One GS-1811-14 Supervisory Special Agent will be assigned to Southwest Border BESTs. One GS-1811-7/13 Special Agent will be assigned to the BEST in El Paso, TX, 1 GS-1811-7/13 Special Agent will be assigned to the BEST in San Diego, CA, 1 GS-1811-7/13 Special Agent will be assigned to the BEST in Laredo, TX, 1 GS-1811-7/13 Special Agent will be assigned to the BEST in Rio Grande Valley, TX and 1 GS-1811-7/13 Special Agents will be assigned to the BEST in Tucson, AZ.

In addition, ICE is requesting non-personnel costs totaling \$200,000 to effectively respond to and support the task of investigating the illegal smuggling of weapons from the United States into Mexico. \$50,000 in funding will support training U.S. and GoM personnel. \$125,000 will support the purchase of computer equipment for exploitation of intelligence (computer media, pocket litter, etc). \$13,000 will pay for Project Shield America (industry outreach). \$12,000 will pay for media-related support (initiative publications, posters, and newspaper/television/ Internet advertisements to foster greater awareness of the initiative). ICE, in partnership with federal, state, and international law enforcement officials, expanded its ongoing Border Crimes Initiative to include the creation of Border Enforcement Security Task Forces (BESTs) in five locations along the U.S. southern border. ICE is initiating an expansion of "Operation Armas Cruzadas," which focuses on the synchronization of key elements in order to comprehensively identify and disrupt illicit trans-border activities that support weapons smuggling networks. The initiative implements numerous parallel activities that enhance timely exploitation of the 3I cycle - Interdiction, Investigation and Intelligence - by both the Department of Homeland Security (DHS) and Government of Mexico (GoM) law enforcement agencies.

Asset Forfeiture

ICE is requesting 5 GS-1811-7/13 Special Agents, 1 GS-1811-14 Supervisory Special Agent, 1 GS-1801-13/14 Criminal Research Specialist, and 1 GS-1802-5/7 Investigative Assistant to store and maintain seized property and evidence related to national security and critical infrastructure cases along the Southwest Border. Illicit proceeds are gained by organizations utilizing undocumented workers at Ports of Entry and/or In-Bond warehouses and are used to sustain criminal activity and to fund other criminal endeavors. Asset forfeiture laws allow ICE agents to seize and forfeit the illicit proceeds and other criminally derived assets from critical infrastructure cases.

Assist U.S. Attorney's Office (AUSA) Liaisons

This request funds five GS-1811-7/13 Special Agents for liaison positions at the Assistant U.S. Attorney (AUSA) offices along the Southwest border. The ICE OI liaison to the U.S. Attorney's Office will be responsible for managing any task or issue, and enhancing relationships at the U.S. Attorney's Office relating to ICE investigative authorities or activities. The ICE liaison will facilitate the presentation of other OI cases for intake by advising ICE agents and supervisors about prosecution guidelines.

With respect to the U.S. Attorney's Office's expedited "fast track" program to prosecute previously deported aliens with significant criminal histories, the agent liaison will coordinate and handle intake of such matters. Additionally, the liaison will support fellow ICE agents who request support with matters at the U.S. Attorney's Office, the grand jury, or the District Court.

Forensic Document Laboratory (FDL)

The ICE FDL is requesting 1 GS-1801-13/14 Criminal Research Specialist, 2 GS-1397-7/14 Forensic Document Examiners, 2 GS-1301-9/14 Physical Scientists and 2 GS-0072-7/13 Fingerprint Specialists and \$1.9 million in general expense funding for very specialized and expensive forensic examination equipment to support the Southwest Border Enforcement initiative. The FDL plays a pivotal role by directly supporting investigations involving documents or requiring fingerprint examination services, forensic examinations, and provides expert testimony concerning examinations. Many of the programs covered by this initiative, including BEST, ASTI, Financial, Human Rights Violators Center, Human Smuggling and Trafficking, and Worksite, use the services of the FDL to support their investigations.

Human Smuggling and Trafficking

ICE is requesting 8 GS-1811-7/13 Special Agents, 2 GS-1811-14 Supervisory Special Agents, one GS-1801 13/14 Criminal Research Specialist, one GS-1802-5/7 Investigative Assistant, one GS-0301-13 Mission Support Specialist and one GS-0343-14 Management and Program Analyst to assist critical infrastructure and national security violations that involve smuggling or trafficking in aliens or some other form of worker exploitation. In addition, ICE is requesting non-personnel costs totaling \$747,000 (\$122,000 for staff travel; \$125,000 for document translation costs; and \$500,000 for training for field investigators) to fund human smuggling and trafficking investigations.

Human Smuggling and Trafficking Center (HSTC)

ICE is requesting 1 GS-1811-7/13 Special Agent, 1 GS-1801-13/14 Criminal Research Specialist, 1 GS-0301-13 Mission Support Specialist, and \$750,000 to expand the HSTC in accordance with Section 7202 of the Intelligence Reform and Terrorism Prevention Act of 2004. Criminal organizations that smuggle aliens and facilitate the illegal international movement of people create the pipeline that supplies the flow of illegal aliens across the Southwestern border. The HSTC is a multi-agency organization representing the Departments of Homeland Security, Justice and State as well as the Intelligence Community and is designed to focus the U.S. Government's efforts to dismantle human smuggling and trafficking organizations. The HSTC has the unique capability to pull together elements from the diplomatic, prosecutorial, law enforcement and intelligence arenas to have a seamless and coordinated government approach to combating the illegal movement of people into the United States along the Southwestern border.

Identity and Benefit Fraud (IDBF)

ICE is requesting 5 GS-1811-7/13 Special Agents, 1 GS-1811-14 Supervisory Special Agent, 1 GS-1801-13/14 Criminal Research Specialist and 1 GS-1802-5/7 Investigative Assistant to assist national security and critical infrastructure efforts by targeting identity and benefit fraud along the Southwest Border. IDBF presents a national security vulnerability by which illegal aliens, to possibly include terrorists and other persons who pose a risk to public safety, can not only gain entry into the United States but also remain here under a guise of legitimacy.

Title 3

ICE is requesting 1 GS-1811-7/13 Special Agent, one GS-1801-13 Technical Enforcement Officer and \$5 million in non-personnel costs to financially support Title 3 operations. The \$5 million in non-personnel costs will fund court authorized intercepts. The personnel requested would administer the Title 3 National contract, facilitate security clearances of monitors, review and process funding requests, process Title 3 applications, coordinate the Title 3 training seminar, administer Title 3 equipment upgrades, maintenance, and call data.

ICE Title 3 intercepts are an integral tool in many successful criminal investigations. ICE Title 3 investigations include violations of narcotics, child pornography, child sex tourism, human trafficking and smuggling, technology transfer, financial investigations and gang related crimes.

Victim Witness Assistance

ICE is requesting one GS-0301-13 Professional Victim Assistant to increase the Victim Witness Assistance program along the Southwest Border. ICE employs a Victim Assistance Coordinator at ICE headquarters to oversee and manage the ICE Victim Assistance Program. However, ICE does not presently have full-time Victim Assistance Coordinators in field offices. Victims come from a variety of ICE investigations, including human trafficking, child sex tourism, child exploitation, child pornography, telemarketing, pharmaceutical fraud, identity theft, human rights abuse and genocide, and crimes occurring in 8,800 federal buildings.

Office of International Affairs

This initiative expands and reinforces the ICE efforts to protect America by upholding the security and safety of the public along the U.S. southwest border, specifically by expanding the law enforcement presence overseas along Mexico's northern border in high-risk locations. By adding investigators who will be supported from existing attaché and consulate offices, OIA will be able to sustain operations where investigations have rapidly increased and the need for cross-border investigative support has been identified. This initiative will fund experienced investigators conducting operations along the northern Mexico border based from three existing offices along the Mexican border and Mexico City. These efforts will increase support to a number of key homeland security priorities, including preventing cross-border crime and associated violence; increasing the ability to engage in bi-lateral interdiction, investigation, and intelligence-sharing activities with the Government of Mexico; and disrupting and dismantling trans-border criminal networks engaged in the smuggling of weapons, aliens, and contraband.

The comprehensive approach of the Southwest Border Enforcement Initiative will further allow ICE to identify criminal activities and eliminate vulnerabilities that pose a threat to our nation's borders, as well as address the public safety threat of criminal organizations operating from Mexican border communities and ultimately to eliminate the potential threat of terrorist acts against the United States.

The OIA Southwest Border Initiative will address four key areas:

U.S.-Mexico Border Enforcement

OIA has developed a comprehensive initiative that will partner with Mexico to increase investigations and operations along the U.S. southwest border and increase the law enforcement capabilities of Mexican agencies to combat the threat posed to public safety from the criminal organizations running rampant in Mexican border cities. The increased level of cross-border crime increases the need for OIA to strengthen partnerships and conduct joint investigations to combat the criminal organizations.

Global Trafficking in Persons (G-TIP)

In support of the Initiative to Combat Trafficking in Persons, OIA will expand the efforts of the Global Trafficking in Persons (G-TIP) Project to train Mexican, law enforcement entities and Non Governmental Organizations to conduct or support trafficking investigations. In FY 2008 over 552 foreign law enforcement personnel were trained and OIA assisted the Government of Mexico in rescuing 18 victims of human trafficking. OIA will further develop the project to combat the abuses and exploitation of human trafficking groups. OIA agents will work in conjunction with ICE's Victim-Witness Program to develop full time victim-witness coordinators for trafficking cases, and conduct

anti-trafficking projects.

Bulk Cash Smuggling

OIA special agents rely on a unique combination of historical expertise, laws, authorities, and innovative techniques, which they bring to the arena of financial crime investigations. The OIA International Bulk Cash Smuggling (BCS) program will include a comprehensive strategy for training, technical assistance, and interdiction operations in order to accomplish relevant ICE goals and strategic priorities. The BCS program would provide operational and training support to Mexico. It would also provide the international component for the Office of Investigations (OI) Hands Across the World Initiative and other financial investigations related to BCS with an overseas nexus. In FY 2007, OIA conducted BCS investigations in Mexico that resulted in \$55 million in seizures.

Financial Crimes

To increase investigations along the Southwest Border, OIA will aggressively pursue the financial component of every investigation. ICE has many long-standing and recently implemented enforcement initiatives concerning national security: money-laundering, bulk cash smuggling, unlicensed money service businesses, and corrupt foreign officials, all of which pose threats to national security and critical infrastructure.

Office of Intelligence

Border Violence Intelligence Cell

The initial cadre of four intelligence analysts was established at the BVIC in January 2008 taken from existing staff in order to respond to the upsurge of violence plaguing both sides of the U.S.-Mexico border with the objective of providing strategic and tactical intelligence support to government-wide efforts to target this violence. The BVIC also developed investigative leads for the BEST teams and supported Mexican law enforcement agencies investigating the murders of Mexican Officials. BVIC, along with the Alcohol Tobacco and Firearms (ATF) weapons desk, serves as ICE's central point for analyzing all-source intelligence and trends in firearms smuggling. In December 2008, BVIC in conjunction with DHS intelligence components, produced a strategic assessment of southbound weapons smuggling that guided increased weapons investigation and interdiction operations along the Southwest Border.

In FY 2009, the ICE Office of Intelligence surged 26 positions to the Southwest Border, this enhancement will capitalize on momentum established by these analysts in addressing Southwest Border issues, and build on the relationships, practices, and intelligence gathered by the initial, surge group.

ICE Intelligence has adopted a customer requirements system for ICE components to notify Intel of their required intelligence services. This system requires that requesting offices within ICE submit formal requirements via this system for action by the ICE Office of Intelligence. These requirements are all in support of ICE strategic objectives. FY 2008 was the first year of operation using this system that is currently operating throughout the United States and is accessible by OI, FPS, DRO, and other ICE field components like BEST. It is anticipated that the quantity of requirements will more than double in FY 2009 and increase in the out years as ICE components become more familiar with its operation and available intelligence services fostered by the ease of use of the customer requirements system.

Based on requirements levied during FY 2008 in response to violence along the Southwest Border, and the fact that requirements levies will at least double in FY 2009 based on requirements levied year-to-date, ICE Intelligence has sufficient BVIC staffing to meet a small portion of current customer requirements related to the issue of South West Border violence. The additional requested staff are needed to support current BEST and other Southwest Border enforcement requirements and to begin supporting requirements from other ICE, DHS, and other related requirements for Southwest Border issues. In addition, ICE will continue to work with DOJ to ensure that each agency's collection and reporting assets complement each other and that information is shared in an efficient and effective manner.

Impact on Performance (Relationship of Increase to Strategic Goals):

BEST, ASTI Financial Investigations, Southwest Border Facilities, ASTI, Asset Forfeiture, AUSA, FDL, Human Smuggling and Trafficking, HSTC, IDBF, Title III, and Victim Witness Assistance all promote DHS strategic objective 1.1 of the DHS Strategic Plan "Achieve Effective Control of Our Borders" and is aligned to the ICE Strategic Plan Goal 1 — Objective 1.1 – "Prevent the movement across U.S. borders of people, money and materials that could harm the Nation and its people — Prevent terrorist and other criminal organizations from launching illegal activities from other countries." This Southwest Border Enforcement Initiative also supports SBI in its goal of "Build a strong compliance and enforcement system for law abiding employers" by working to aggressively investigate all aspects of those employers who make it their business practice to work with smuggling and trafficking organizations to induce the illegal entry and knowingly hiring of undocumented aliens within critical infrastructures and Ports of Entry. In addition, the increases for FY 2009 will allow ICE to address critical infrastructure vulnerabilities through a holistic investigative approach leveraging Title 8 and export enforcement authorities as well as analytical capabilities unique to ICE.

ICE Office of Intelligence's contribution to the South West Border Violence initiative - BVIC - is an entity working in direct support to the other operational components of ICE targeting growing violence on the South West Border, and satisfies the intelligence requirements of those customers so engaged.

The requirements levied by BEST and other ICE and DHS components are a critical part of their efforts to achieve ICE strategic goals, involving violence along the South West Border. Intel is able to support these ICE strategic goals through its response to these customer requirements.

OIA interdiction efforts will prevent smuggling and illegal entry of persons, with a priority on terrorist groups, gang members, and criminal aliens. Investigative efforts will target human smuggling, contraband smuggling, weapons smuggling, money laundering, bulk cash smuggling, criminal gangs, critical infrastructure protection, identity theft and benefit fraud, and any other vulnerabilities that pose a threat to public safety or national security.

By end of FY 2008, FIGs will have received over 59 requirements, of which they will be able to meet about 20, leaving approximately 29 requirements unmet relating to various strategic objectives that relate to border violence. Without the additional requested staff, these specific requirements for information critical to law enforcement identified by OI and other components will go unmet. The lack of this required information is expected to impact the effectiveness of investigations as important information needs go unmet. The demand for support is also expected to grow keeping inline with the trend experienced by the Office of Intelligence since implementing a requirements-driven approach to providing intelligence support in support of its customers.

The Southwest Border Enforcement Initiative fosters coordinated enforcement with foreign law enforcement counterparts, other DHS and federal law enforcement agencies and entities to optimize ICE's enforcement efforts and benefits other ICE entities including the Office of Investigations and Detention and Removal Operations by supporting investigations, generating intelligence, and decreasing potential detention and repatriation costs of aliens subsequent to their arrival.

By denying access to terrorists to the United States via visas, this initiative supports the DHS Goal to Protect Our Nation from Dangerous People by (1) preventing movement across the border of people that could harm the United States and its people, and (2) reducing cross-border crime and associated violence. This initiative also supports ICE strategic goals: (1) to prevent the movement across U.S. borders of goods, money, and materials that could harm the Nation and its people; (2) to mitigate risks to national security at home and abroad; and (4) to ensure integration of enforcement support and intelligence services into operations. This initiative is a key component in the Department's commitment to improve border enforcement, the Secure Border Initiative. This initiative also promotes ICE Strategic Plan Goal 1 "Prevent the movement across U.S. borders of people, money, and materials that could harm the Nation and its people" – Objective 1.1 – "Prevent terrorist and other criminal organizations from launching illegal activities from other countries."

Southwest Border Analysts and Reports Officers: The additional 90 Intelligence Research Specialists and Reports Officer positions will be able to fulfill at least 180 more intelligence requirements, which is 12 percent of the expected total annual amount of unaddressed requests for FY 2009.

BVIC: The first ICE Office of Intelligence contribution to the South West Border Violence initiative – BVIC - is an entity working in direct support to the other operational components of ICE and other Federal, Foreign, Tribal, State and Local partner agencies targeting growing violence on the Southwest Border, and satisfies the intelligence requirements of those customers so engaged. Because of the emphasis on information sharing as part of the BVIC's mission, this enhancement will allow for more than doubling the throughput of intelligence products to law enforcement and intelligence community partners.

HSDN: will allow for classified connectivity at nine additional customer sites located along the Southwest Border allowing for classified information sharing along the Southwest Border in a more timely, and secure manner as classified connectivity was not enjoyed at these sites previously. Expansion of HSDN capability will dramatically improve ICE's ability to transmit classified information at the Secret level. Secret-level computer-to-computer communication is a critical tool of enforcement operations that target threats to our Nation's borders.

Performance impacts of this request include:

- Increase in initiation of investigative priority cases originating in Mexico of approximately 100 cases;
- Increased generation of leads and intelligence information, and related domestic and host country enforcement actions;
- Identification of trends and tactics of criminal networks and organizations, potential terrorists and other criminal organizations; and
- Increased working relationships, training, and coordination with the Government of Mexico to combat transnational criminal organizations.

Description of Item

In FY 2008, Congress provided ICE with \$200 million, available for two years, to “improve and modernize efforts to identify aliens convicted of a crime, sentenced to imprisonment, and who may be deportable, and remove them from the United States once they are judged deportable.” In response, ICE published the SC/CIRCA Strategic Plan. This plan describes how ICE will better identify criminal aliens and prioritize them for removal by strengthening state and local partnerships, improving interagency information sharing, leveraging emerging technologies, and improving the efficiency of ICE operations. In FY 2009, Congress appropriated an additional \$150 million, available for two years, for SC/CIRCA to meet the program’s goals. Congress further required ICE to utilize at least \$850 million of existing programs’ resources “to identify aliens convicted of a crime, and who may be deportable, and to remove them from the United States once they are judged deportable.” In FY 2009, ICE expects to obligate over \$1.4 billion of its Salaries and Expenses appropriation toward criminal alien enforcement efforts.

The initial focus of Secure Communities enforcement improvements is to move from biographic (name-based) to biometric (fingerprint-based) identification of criminal aliens. Use of biometrics leads to faster, more reliable, more efficient identifications that find criminal aliens earlier in the criminal justice process (at arrest versus at incarceration). By extending screening to the point of arrest, ICE will identify and remove greater numbers of violent criminal aliens, including those who committed past violent crimes and have been arrested again on minor charges. In many cases, such criminal aliens would have never been screened within jails participating in ICE’s Criminal Alien Program and would have been released back into our communities. Through biometric identification, ICE will apprehend and remove these criminal aliens.

In FY 2008, ICE successfully concluded seven pilot deployments that use newly developed information sharing capabilities between DHS and DOJ biometric databases to screen arrested individuals for criminal alien status. This enabled ICE to begin a three to four year project to fully activate biometric criminal alien identification technology nationwide. In FY 2009, ICE expects to complete deployments within counties containing an estimated 20% or more of the nation's criminal alien population potentially totaling over 7,431 new locations which will result in an estimated 3,671,300 new transactions. To continue deploying biometric identification technology in FY 2010, ICE requests \$11.8 million in personnel costs to make 80 new hires and \$24.5 million in non-personnel costs to continue ongoing information technology investments.

Personnel Costs (\$12.742 million, 92 positions)

ICE requests \$11.796 million to hire 80 new enforcement personnel who will identify suspected criminal aliens through improved information sharing within the national law enforcement community, determine subjects' alien status and threat to our communities based upon criminal record severity, prioritize ICE enforcement actions against the highest threat removable criminal aliens, and assist in the removal of apprehended criminal aliens.

- The 80 new enforcement personnel include:
 - Sixteen Deportation Officers (GS-1801-12)
 - Eight Supervisory Detention and Deportation Officers (GS-1801-12)
 - 48 Immigration Enforcement Agents (GS-1801-8)
 - Eight General Positions (GS-1802-12)

In addition, ICE requests \$.946 million for twelve support positions, including three Attorneys, one Legal Assistant, one Personnel Security Specialist, two IT Specialists, three Contract Specialists, one Asset Management Portfolio Lead, and one Accounting Specialist.

Non-Personnel Costs (\$26.358 million)

ICE requests \$24.493 million to continue ongoing information technology investments to automate alien status determinations, threat prioritization, and workflow management to improve efficiencies within ICE criminal alien identification, prioritization and removal processes.

In addition, ICE requests \$1.865 million for facility costs for new employees and \$.208 for human resources contract support.

Justification

Extend Biometric Identification Coverage to over 50 percent of the Estimated Criminal Alien

Population: ICE requests \$11.796 million and 80 new permanent positions to continue activating biometric criminal alien identification technologies in counties across the nation. ICE estimates that this funding level, in conjunction with any carry over of Secure Communities' FY 2009 two-year appropriation, will cover the costs associated with apprehending, detaining and removing greater numbers of criminal aliens identified by screening over 50 percent of the estimated nationwide criminal alien population. Added personnel will be responsible for numerous enforcement activities, including:

- Determining threat level and alien status of suspected criminal aliens;
- Interviewing suspected criminal aliens who cannot be biometrically identified, such as those who are in the country illegally without having been previously encountered by DHS;

- Issuing detainers with local law enforcement agencies to take custody of criminal aliens upon their release by the arresting agency;
- Apprehending criminal aliens prior to their release back into the community;
- Referring violent criminal aliens who have repeatedly violated immigration law to U.S. Attorneys for prosecution;
- Conducting removal proceedings against criminal aliens; and
- Removing criminal aliens.

Improve Efficiency of Criminal Alien Identifications, Prioritizations and Removals: ICE will use \$24.493 million to further automate processes (listed below) critical to identifying, prioritizing and removing criminal aliens from the United States after they are biometrically identified. By establishing the identity of a subject to enable further research on information held in DHS and other law enforcement systems, biometric identification is the first step in locating and removing criminal aliens. After biometric identification, ICE must then effectively determine the subject’s alien status, the subject’s severity of criminal history for use in enforcement prioritization, and the enforcement resources that are available to take actions against the highest threat criminal aliens. Each additional step requires more extensive IT automation support in order to handle the greatly expanded volume of subjects that ICE must research as biometric identification capabilities expand to cover over 50% of the criminal alien population. The IT automation projects, already initiated through prior SC/CIRCA appropriations, that ICE will continue funding are:

- *Automated Support of Alien Status Determinations* – By automating alien status determination research, ICE will reduce average determination times while also increasing their accuracy. This will allow ICE to effectively handle an expected several-fold increase in determination requests as ICE extends biometric identifications of criminal aliens towards full nationwide coverage;
- *Automated Threat Prioritization* – By gaining access to greater numbers of law enforcement partner systems containing relevant threat information (e.g. crime records, incarceration records, probation and parole compliance records, local gang task force repositories, etc.), ICE will more accurately identify additional Level 1 criminal aliens. This will enhance ICE’s ability to prioritize criminal aliens based upon threat to the community so that we put available resources to the most effective use for protecting our nation’s citizens; and
- *Automated Workflow Management* – By automating resource and workflow management across the enterprise, ICE will be able to more effectively prioritize enforcement resources toward removing the highest threat criminal aliens and ICE will make more efficient use of its available resources to remove greater numbers of criminal aliens within given resource constraints.

Impact on Performance (Relationship of Increase to Strategic Goals)

ICE established and executed the SC/CIRCA plan in direct response to a Congressional mandate to “to identify aliens convicted of a crime, and who may be deportable, and to remove them from the United States once they are judged deportable”. In addition, SC/CIRCA explicitly addresses one of the Secretary’s top priorities to effectively share mission information with federal, state, local, and tribal homeland security partners in ways that most effectively enhance the security of our homeland and its citizens. By linking local law enforcement arrests, convictions and criminal records with ICE alien status determinations and taking prioritized action against identified criminal aliens, SC/CIRCA targets the most violent, dangerous aliens for removal from the streets of our communities. These enforcement efforts remove individual threats to community safety, disrupt criminal organizations and ultimately improve the safety and well-being of our citizens in direct alignment with DHS Strategic Goal 1 – Protect our Nation from Dangerous People.

Current Services Level							0	0	0
Program Increase							4	4	\$33,850
Total Request	0	0	\$0	0	0	\$0	4	4	\$33,850

Description of Item

This funding request is targeted at migrating data center operations, active online data, and other IT assets from two Department of Justice (DOJ) data centers and multiple processing centers, including some enterprise-level applications hosted at the ICE headquarters facilities, to two new DHS data centers. The Data Center Migration project also involves disaster recovery planning; ICE intends to achieve migration while ensuring near continuous operations of mission-critical IT systems through contingency infrastructure, planning, and testing, to provide systems and data integrity that align with the DHS goal of ensuring that two new DHS Data Centers support fully redundant IT systems.

To complete the data center migration scope directed by DHS, maximize economies of scale, and ensure compatibility of infrastructure, ICE intends to purchase the equipment for both data centers simultaneously.

The Data Center Migration FY 2010 funding request of \$33.85 million includes the following:

Personnel cost (\$0.33) million

- Four Contracting Specialists.

Non-personnel costs (\$33.52 million)

- Migrate ICE non-mainframe production from DOJ to DHS Data Centers (\$22.7 million)
- Modernize ICE IT Disaster Recovery - Implement modernized contingency solution at DHS Data Center 1 (Stennis) to support ICE production systems hosted at DHS Data Center 2 (EDS) (\$9.65 million)
 - Complete ICE modernized contingency solution planning (\$1.4 million)

- Implement ICE modernized contingency solution (*\$6.1 million*)
- Execute equipment functionality testing and conduct enterprise-wide DR exercises of ICE IT infrastructure (*\$2.15 million*)
- DCM Planning and Oversight Team (\$1.17 million)

Justification

FY 2010 data center consolidation funding will be used to continue ongoing system and application migration to the two existing DHS Enterprise Data Centers. The Data Center consolidation efforts will standardize IT resource acquisitions across components, streamline maintenance and support contracts, resulting in an enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time. The Data Center Migration activity will be managed through the Working Capital Fund.

The Data Center Migration project consolidates ICE IT enterprise-level infrastructure (equipment, maintenance, operational, and logistics support processes) to DHS data centers in accordance with DHS directives, and provides load-balancing between mirrored primary and secondary data centers for increased survivability, common operating environments, integrated logistics support processes, and the reduction of redundant skill sets by consolidating data center operations.

The following benefits are derived from the DCM Project:

- Increased efficiency and cost-effectiveness by creating a common operating environment by not needing multiple environments.
- Integrated support processes by having fewer Data Centers to support with manpower or financial aid.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Data Center Migration initiative will increase infrastructure reliability; enhance disaster recovery capability; and improve survivability through mirrored primary and secondary sites with load balancing for upgraded performance.

In compliance with DHS goals, the Data Center Migration (DCM) Project focuses on transition of data center operations from multiple facilities to the new DHS consolidated data centers. The DCM Project evaluates potential data center consolidation alternatives, conducts necessary inventories of ICE IT data center infrastructure and services, develops detailed plans for execution, and provides management and oversight of ICE data center migration to the DHS consolidated data center infrastructure. The migration of disparate and complex ICE data center infrastructure is necessary to ensure compliance with the DHS Enterprise Infrastructure Program consolidation effort; provide survivability of the data center, a common operating environment, and integrated logistics support processes.

PPA Mission Statement

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or "OPLA") provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the U. S. in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change

PPA Mission Statement

In the Office of Investigations (OI), our broad Homeland Security mission is to defend the Nation by enforcing trade and immigration laws through investigations that target the people, money, and materials that support terrorist and other criminal activities. We work under that mandate by dividing our investigative effort into three broad investigative categories: National Security, Financial and Trade, and Smuggling and Public Safety. These three categories represent the general priorities we use to guide our efforts in our daily activities. Each priority can be broken down into many different sub-categories and, in fact, are operationally interrelated in a great many cases.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$1,088,456	\$1,098,136	\$1,219,782	\$121,647

Salaries and Benefits includes costs for 9,212 FTEs. The FY 2010 Request includes an increase of \$121,647,000 for pay raises, adjustments-to-base and 370 new hires.

PPA Mission Statement

Office of International Affairs (OIA) expands the investigative efforts of the Office of Investigations to over 50 foreign locations. The OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. The OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity. OIA also executes the operational mandate of Section 428 of the Homeland Security Act through ICE's Visa Security Program.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$47,691	\$55,589	\$59,714	\$4,125

Salaries and Benefits includes costs for 210 FTEs. The FY 2010 request includes an increase of \$4,125,000 in personnel compensation to support the Field Intelligence Groups (FIGs) and the Southwest Border Violence (SWBV).

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$6,090	\$7,098	\$7,625	\$527

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes a increase of \$527,000 to support the FIGs and SWBV.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Transportation of Things	\$4,777	\$5,569	\$5,982	\$413

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2010 requests an increase of \$413,000 to support the FIGs and SWBV.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$4,103	\$4,782	\$5,137	\$355

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 Request includes an increase of \$355,000 in non-pay inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$4	\$5	\$5	\$0

The FY 2010 Request includes no increase in Other Rent.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$1,178	\$1,373	\$1,475	\$102

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes an increase of \$102,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$1,407	\$1,640	\$1,762	\$122

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 Request includes an increase of \$122,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Services	\$26,020	\$30,329	\$32,580	\$2,251

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2010 request includes an increase of \$2,251,000 to support the FIGs and SWBV.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$1,023	\$1,192	\$1,281	\$88

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 request includes an increase of \$88,000 in non-pay inflation from the prior year.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$6	\$7	\$8	\$1

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 request includes an increase of \$1,000 in non-pay inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Research and Development	\$0	\$0	\$0	\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2010 Request includes no increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$205	\$239	\$257	\$18

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$18,000 in non-pay inflation.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Subsistence & Support of Persons	\$0	\$0	\$0	\$0

PPA Mission Statement

The Visa Security Program (VSP) is the first line of defense in preventing terrorists and other criminals from gaining access to the United States through a legally obtained visa. The integration of experienced ICE law enforcement officers in the visa issuance process enhances this program as a counterterrorism tool through the generation of new watch list entries, “not yet known” terrorist or criminal suspects, valuable intelligence reports and investigative leads, and identification of patterns at high risk locations that traditional screening systems do not detect.

Summary Justification and Explanation of Changes

	2008 Actual	2009 Enacted	2010 Request	2009 to 2010 Change
Salaries and Benefits	\$11,923	\$14,152	\$16,215	\$2,063

Salaries and Benefits includes costs for 73 FTEs. The FY 2010 Request includes an increase of \$2,063,000 .

PPA Mission Statement

Intelligence - Collect, analyze and share information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. The Office of Intelligence focuses on data and information related to the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends and new developments in a wide range of law enforcement areas. These include the following areas: Terrorism, Human Smuggling and Trafficking, Money Laundering and Financial Crime, Drug Smuggling, Criminal Aliens, Air and Marine Smuggling, Cyber Crimes, Identity Fraud and Document Fraud, and Arms Trafficking.

PPA Mission Statement

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and DRO must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$576,973	\$596,237	\$630,867	\$34,630

Salaries and Benefits includes costs for 5,676 FTEs. The FY 2010 Request includes an increase of \$34,630,000 for pay inflation and the annualization of prior year enhancements.

Full Time Equivalents		933	1,007	1,015	8

PPA Mission Statement

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$109,712	\$114,500	\$121,944	\$7,444

Salaries and Benefits includes costs for 1,015 FTEs. The FY 2010 request includes an increase of \$7,444,000 in personnel compensation to fund CAP teams.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request includes an increase a \$4,000 increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$2,390	\$2,428	\$2,432	\$4

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes a \$4,000 increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Research and Development	\$0	\$0	\$0	\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$15	\$15	\$15	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$551	\$560	\$561	\$1

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$1,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Subsistence & Support of Persons	\$240	\$244	\$245	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal Government account for the board, lodging, and care of persons, including prisoners. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$1,865	\$1,894	\$1,898	\$3

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 Request includes a \$3,000 increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$12,257	\$12,453	\$12,474	\$21

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request includes a \$21,000 increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Land & Structures	\$0	\$0	\$0	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Grants/Subsidies/Contributions	\$0	\$0	\$0	\$0

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Unvouchered	\$111	\$113	\$113	\$0

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. The FY 2010 Request includes no increase.

PPA Mission Statement

Secure Communities – A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA) sets out a comprehensive plan to improve community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain, and remove all criminal aliens held in custody.

Summary Justification and Explanation of Changes

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Salaries and Benefits	\$570	\$4,672	\$6,159	\$1,486

Salaries and Benefits includes costs for 558FTEs. The FY 2010 request includes an increase of \$1,486,000 in personnel compensation to support the Secure Communities/CIRCA.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Travel	\$1,185	\$9,704	\$12,791	\$3,087

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2010 request includes a \$3,087,000 increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
GSA rent	\$0	\$0	\$0	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Other Rent	\$0	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$0	\$0	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2010 request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Printing	\$0	\$0	\$0	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2010 request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$13,047	\$106,854	\$140,850	\$33,996

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2010 request includes a \$33,996,000 increase.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$0	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Research and Development	\$0	\$0	\$0	\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Medical Care	\$0	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2010 Request has no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$0	\$3	\$4	\$1

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Request includes an increase of \$1,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Subsistence & Support of Persons	\$0	\$0	\$0	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal Government account for the board, lodging, and care of persons, including prisoners. The FY 2010 Request includes no changes.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Supplies & materials	\$45	\$370	\$488	\$118

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2010 Request includes an increase of \$118,000.

	2008	2009	2010	2009 to 2010
	Actual	Enacted	Request	Change
Equipment	\$3,211	\$26,299	\$34,666	\$8,367

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2010 Request includes a \$8,367,000 increase.

	2008	2009	2010	2009 to 2010

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

In FY 2008, the ICE Automation Modernization account was expanded to include Atlas (IT Infrastructure and Tactical Communications) as well as the following information technology (IT) transformational initiatives: Detention and Removal Operations Modernization (DROM) and TECS Modernization. In FY 2009, the Automation Modernization account was further expanded to include the Modernization of Financial System project. In FY 2010, the Automation Modernization account will again expand to include other IT transformational initiatives: ICE Law Enforcement Systems Modernization (which includes the TECS Modernization project) and Electronic Health Record (eHR). Aligning all IT modernization initiatives under the Automation Modernization appropriation will help ICE standardize IT investment management and delivery.

The Automation Modernization account will allow ICE to improve information sharing with the Department of Homeland Security (DHS) and among partner organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

B. Budget Activities:

Atlas – IT Infrastructure

Atlas integrates enforcement capability rooted in a “One DHS” vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards, and weaving together networks. To this end, the Atlas program seeks to create and sustain a secure, scalable IT environment that supports ICE law enforcement programs.

These Atlas projects will improve infrastructure, consolidate and standardize IT equipment; improve the technology and functionality of IT products and services available to ICE employees; and ensure security of all equipment.

DRO Modernization (DROM)

This initiative will support the systems upgrades and improvements of Detention and Removal Operations (DRO) business processes for the detention and removal of illegal aliens from the United States, as well as support the requirements of the Secure Border Initiative (SBI). DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals.

ICE Law Enforcement Systems Modernization

This initiative includes the following projects:

- **TECS Modernization**– This system will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management, Intelligence Reporting and Dissemination, Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis. TECS modernization is a joint U.S. Customs and Border Protection (CBP) and ICE initiative.
- **Mobile IDENT (Mobile Automated Biometric Identification System)** – This project gives ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently, suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification. Mobile IDENT decreases transportation costs and increases officer safety by reducing the number of instances of alien transport.
- **ICEPIC (ICE Pattern Analysis and Information Collection System)** - DHS is embarking on a Regional Sharing Service (RSS) initiative that will deploy the required information sharing technologies and operating policies in compliance with the Information Sharing Environment’s (ISE) architectural framework. The data exchange between ICEPIC and external agencies will be Global Justice XML Data Model (GJXDM) and National Information Exchange Model (NIEM) compliant. It will improve information sharing between ICE and other law enforcement agencies, including ICE’s state and local partners while ensuring confidentiality.
- **ICE ACCESS** – This initiative provides the resources to help ICE’s state and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice’s gang database.
- **LEISS (Law Enforcement Information Sharing System)** - ICE is the steward for DHS in the Law Enforcement-Shared Mission Community (LE-SMC) space and is responsible for development, coordination, and support of policies, procedures, and processes that facilitate the mission and DHS Secretary priorities for information sharing.
- **Border Enforcement Security Task Forces (BEST) Expansion** – This initiative will fund IT integration and information sharing for the Office of Investigation’s Border Enforcement Security Task Forces (multi-agency task forces with state, Federal, and local participation to combat border crime).
- **Intelligence Support** – This initiative will fund improvements to ICE’s information technology for its intelligence programs, including the migration of Data Analysis and Research for Trade Transparency System (DARTTS) and Cyber Crimes Center (C3) into the enterprise solution. In addition, this initiative will fund the maintenance of hardware and software for cyber-crime investigations, the National Child Victim Identification System (NCVIS), e-Crimes and Overt and Covert Networks and will also fund the upgrade of the Digital Forensic Lab.
- **International Affairs Modernization** – This initiative will fund the overdue modernization of the tools currently being used to screen visa applicants at consular offices overseas.

- **Forensic Document Lab** – This project will fund the expansion of the technology infrastructure for the FDL Automated Document Library System. The FDL provides tools and information to ICE agents performing criminal investigations. The modernization of the FDL will ensure applications and tools are available to the agents and improve information sharing capabilities. The modernization of the FDL will ensure the systems are incorporated into the enterprise.

C. Budget Request Summary:

ICE requests 36 positions, 19 FTEs, and \$110.0 million for FY 2010 to continue the modernization of its information technology and systems infrastructure for the following program initiatives as well as continue FY 2009 efforts. \$39.1 million as well as 18 current on-board positions have been transferred from Automation Modernization to Salaries and Expenses (S&E) to fund salaries and operations and maintenance (O&M) on Atlas infrastructure's three year refresh.

Enhancement Requests

ICE requests program enhancements for the Automation Modernization Account in the following key areas:

- Atlas Infrastructure (\$9.0 million): The request for Atlas Infrastructure will be used to plan, schedule develop, and implement the replacement of many legacy ICE local area networks; continue modernizing an additional 290 ICE sites with new file & print servers; complete the integration of 22 data collection systems into one database; and oversee the migration of ICE IT assets from the Department of Justice Data Centers to the DHS Data Centers.
- DRO Modernization (\$22.0 million): This request will be used to develop and deploy version one of the Detainee Location Tracking Module as part of the Bed Space and Transportation Management System, expand the ICE Data warehouse data capacity and reporting capability to support the DRO IT data, and expand Web Services to allow the Electronic Travel Document application to communicate with other internal or external applications.
- Law Enforcement Systems Modernization (\$40.0 million): This request funds a number of case management (including the TECS Modernization project), information sharing, and operational support service projects that will improve access to law enforcement information.
- eHR (\$20.4 million): This request will address the Division of Immigration Health Services infrastructure deficiencies and begin the design and development of an electronic health records system, which will allow real-time reporting of detainees' medical information.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2009, the U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account focuses on specific, discrete information technology (IT) activities that help ICE achieve its mission, including the Modernization of financial systems, Detention and Removal Operations Modernization (DROM), TECS Modernization, and Atlas IT Infrastructure and Tactical Communications.

Modernization of Financial Systems

This initiative supports ICE’s portion of the Department of Homeland Security (DHS) enterprise-wide initiative of consolidating financial systems. This initiative will support ICE’s migration to the new DHS financial system and will result in improved financial services and internal controls. This will help ICE achieve and sustain unqualified financial audit opinions and perform more effective financial management.

Detention and Removal Operations Modernization (DROM)

The DROM funding will support system upgrades and business process improvements to the ICE Office of Detention and Removal Operations, facilitating the detention and removal of illegal aliens from the United States. DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and detainee tracking, bed-space availability management, and transportation management for detention and removals.

TECS Modernization

ICE will fund the modernization of the ICE portion of the DHS investigative case management system, TECS. TECS will provide greatly improved workflow processes; improve interoperability with DHS and other federal law enforcement agencies and homeland security

intelligence analysis and visualization toolsets; enhance quality law enforcement information sharing within DHS and external to DHS; and improve the collection of more consistent, timely, and accurate performance information on law enforcement activities and outcomes.

Atlas Infrastructure

The Atlas initiative was developed to address ICE's increasing requirement for a more robust IT infrastructure and to improve the technology and functionality of IT products and services available to ICE employees. Atlas consisted of eight major projects and 21 sub-projects.

By the end of FY 2008, eight sub-projects were completed: (DHS One Network (OneNet) Migration, E-Mail & Active Directory/Exchange (ADEX) Upgrade, Desktop Image Lab Transition, Project Management Training, Web Farm Upgrade, Streaming Video, Outside the Continental U.S. (OCONUS) Switch Upgrade, and Hardware Refresh). Prior to FY 2008, Atlas consisted of IT Infrastructure and Tactical Communications. In FY 2010, to better align with the strategic direction of the DHS CIO and to allow for more efficient management and oversight of ICE IT infrastructure modernization investments. These four major areas will continue in FY 2010 and include 8 sub-projects.

These projects are scheduled to be completed by FY 2015 and will allow ICE to improve information sharing within DHS and across ICE organizations, strengthen information availability, and provide a more fully secure IT environment.

Key Accomplishments

FY 2008 Accomplishments

In FY 2008, ICE expended \$30.7 million for the Automation Modernization program. ICE used \$15.0 million of these funds to complete several initial investments under Atlas IT Infrastructure. With the remaining \$15.7 million, the ICE Automation Modernization program initiated improvements to DROM, Mobile IDENT/ENFORCE, and TECS Modernization.

Because Automation Modernization was expanded to encompass multiple major initiatives, the ICE Office of the Chief Information Officer (OCIO) established a Program Executive Office (PEO) to standardize, streamline and coordinate IT program management planning and activities. In its capacity as an overarching governance division within OCIO, the PEO will perform portfolio management functions for all Automation Modernization activities, centralize common program management functions, and ensure alignment between major initiatives to avoid gaps or duplication of effort. Each major Automation Modernization initiative will maintain a distinct Program Management Office (PMO) and associated integrated project teams to execute PMO functions specific to that initiative within overarching PEO governance. This approach to program management will ensure alignment of initiatives to address each IT modernization requirement without duplication of effort; standardize practices and mitigate risks for all Automation Modernization activities; reduce program overhead costs by centralizing functions not specific to one initiative; and ensure stringent oversight of cost, schedule, and performance specific to each initiative.

Atlas –IT Infrastructure - ICE expended \$15 million to:

- Completed 4 Atlas sub-projects (Web Farm Upgrade, OCONUS Switch Upgrade, Streaming Video, and Hardware Refresh);
- Integrated 16 of 22 legacy systems into a single data warehouse, allowing ICE and its law enforcement partners to more easily share investigative and enforcement information;
- Worked with DHS OCIO and its integration partner to provide an ICE IT infrastructure footprint for use in the development of a planning and integration plan for the DHS Data Centers;
- Delivered the initial plan on the consolidation of DHS Data Centers;
- Replaced dated communications electronics at 51 foreign sites;
- Deployed streaming video to 70 major ICE offices nationwide;
- Deployed 2,582 printers and 12,941 desktop computers, completing an ICE-wide replacement of 18,314 desktops; and
- Securely retired and disposed of 24,530 legacy IT hardware items from ICE offices;
- Established a Single Sign-On framework for all ICE applications, including legacy mainframe systems.

DRO Modernization

ICE expended \$11.5 million to accomplish the following:

- Expanded the Electronic Travel Document (eTD) system to be capable of processing up to 25 countries targeted to participate with the eTD program, as well as created travel document request packages in the system for all non-participating countries;
- Developed and deployed eTD application to three of the 25 targeted countries (El Salvador, Guatemala, and Honduras), significantly reducing the average time necessary to process travel documents;
- Deployed ENFORCE Alien Removals Module (EARM) to replace the Deportable Alien Control System (DACS), and retired DACS as the DRO system of record;
- Expanded data sharing and integration with external agencies with the deployment of EARM and implemented an enterprise reporting system for the DRO Executive Information Unit;
- Released Request for Quotations (RFQs) for Bed Space, Transportation and Tracking (BST&T) contract(s); and

Mobile IDENT/ENFORCE

ICE expended \$2.2 million to develop portable IDENT for use in the positive identification and processing of aliens in remote places. These funds were used to accomplish the following:

- Developed portable IDENT to positively identify aliens, which is critical to the success of SBI interior enforcement initiatives and Temporary Workers Program (TWP) deployment;
- Upgraded services (including design, development, and deployment) of new and enhanced IT systems to build out the ENFORCE infrastructure necessary to support multiple law enforcement communities and initiatives (such as SBI), and facilitate integration efforts (such as the one between the Law Enforcement Service Center and the ICE Office of Investigations); and
- Processed aliens outside established ICE IDENT processing facilities, including jails, work sites, courts, and other locations requiring mobile capabilities.

TECS Modernization

- ICE expended \$2.0 million to upgrade services (including design, development, and deployment) of new and enhanced IT systems that were needed to build out the ENFORCE

infrastructure necessary to support multiple law enforcement communities; and facilitate integration efforts such as the one between the Law Enforcement Service Center (LESC) and the ICE Office of Investigations.

■

FY 2009 – Projected Accomplishments

In FY 2009, Congress appropriated \$57.0M to further expand Automation Modernization activities including the Modernization of financial system initiative, TECS Modernization, Atlas (IT Infrastructure and tactical communications) and DROM. The Automation Modernization programs will achieve the following:

Modernization of Financial System (\$7.0M)

- Develop ICE requirements in support of the DHS Transformation and System Consolidation (TASC) initiative for the following:
 - user access controls with DHS Enterprise Solution;
 - transitioning from client-server to web-based access by users;
 - financial reporting (both for migration of existing reports, development of new ones); and
 - user testing of the DHS Enterprise Solution.
- Conduct a GAP analysis showing discrepancy between current system processing and the DHS Enterprise Solution, and propose resolution of discrepancies;
- Develop detailed requirements to address functionality within the current Federal Financial Management System (FFMS) that will either be migrated to, or require customization within, the DHS Enterprise Solution;
- Determine interface requirements with various Consumer off-the Shelf applications that comprise the DHS Shared Baseline; and
- Acquire ICE FedTraveler Services to support standardizing electronic travel (e-Travel) processing throughout DHS.

DROM (\$11.3M)

- Implement biometric finger scanning with a combination of fixed and mobile devices to positively identify and track detainees remotely, improve officer safety, and enhance mission effectiveness;
- Track detainees inside ICE managed facilities through the use of Radio Frequency Identification (RFID) technology;
- Develop the Detainee Location Tracking (DLT) and Central Reservation System (CRS) modules of the Bed Space, Transportation, and Tracking (BST&T) Management System;
- Expand ICE Data Warehouse data capacity and reporting capability to support DRO, and expand web services to allow the eTD application to communicate with other internal or external applications;
- Expand EARM to include the ENFORCE Apprehension and Detention Module, Fugitive Case Management System (FCMS) and Alternatives to Detention Program (ATDP);
- Complete planning and requirements definition for a DROM Document Management System and the Electronic Detainee Visitor Log (eVisitor) application;

TECS Modernization (\$15.7M)

- This investment includes the following:
 - Perform Project Management Office support services (\$2.0M)
 - Gather and define requirements (\$1.5M)
 - Establish development environment (\$1.7M)
 - Perform design and development activities (\$8.0M)
 - Develop high-level TECS architecture and design (\$2.0M)
 - Provide Enterprise Data Warehouse and decision support services (.3M)
 - Perform Independent Verification and Validation services (.2M)
- Establish an initial planning capability by securing project management office support to manage requirements and develop the business case;
- Initiate and utilize results of business requirements analysis to conduct a formal Alternatives Analysis and lay down the foundation for program execution;
- Develop TECS architecture and ICE high-level design, and establish an investigative case management development, integration and testing environment;
- Develop and assess the alignment of the program to the DHS Enterprise Architecture;
- Develop the Mission Needs Statement; and
- Award a contract for TECS Modernization design and development.

Atlas – IT Infrastructure and Tactical Communications (\$23.0M)

- Acquire equipment for mobile communications system and hub upgrades, and acquire Project 25 (P25) compliant tactical communications equipment to modernize tactical communications systems in the first of 20 ICE regions (Georgia, North and South Carolina);
- Incorporate two additional data collection systems into one database, allowing ICE and its law enforcement partners to more easily share information;
- Deploy a framework to access 20 different ICE IT applications with a single sign-on;
- Analyze data center alternatives for lower cost options (to be facilitated by DHS);
- Replace the primary web hosting platform for DHS data centers, and build IT infrastructure to provide seamless communications across heterogeneous platforms;
- Upgrade obsolete and failing file & print servers at 100 ICE sites;
- Institute enterprise audit log management for all major ICE systems;
- Acquire, integrate, and deploy one mobile law enforcement communications system and one wireless communications kit for ICE emergency/crisis response and special operations; and

FY 2010 - Projected Accomplishments

In FY 2010, ICE will further expand Automation Modernization activities to include the following initiatives: ICE Law Enforcement Systems Modernization (which includes TECS Modernization) and Electronic Health Records (eHR). ICE will also continue to develop current services projects that were started in FY 2009.

DROM

The major goal of DROM is to create an efficient system and a streamlined process to minimize the length of detention, increase bed utilization and increase removals of aliens ordered removed from the U.S. As a result, DROM projects will enable DRO personnel to better manage, track, and report on the movement of aliens through the immigration enforcement lifecycle.

The following are the FY 2010 projected accomplishments:

- Transition EARM into Full Operating Capability (FOC) status;
- Conduct operational analysis for EARM;
- Deploy BST&T DLT and CRS Modules, and achieve Initial Operating Capability (IOC) status;
- Begin development and integration of the final BST&T Module, the Transportation Management System (TMS);
- Continue expanding the eTD system as Memoranda of Understanding (MOUs) are executed for target countries to use eTD for issuing electronic travel documents; and
- Award development contracts for the DRO Document Management System and eVisitor Log.

Electronic Health Records (eHR) System

The Division of Immigration Health Services (DIHS) provides direct patient care at DRO facilities and oversees managed care services for detainees housed in state, local, and contract detention facilities. DIHS was part of the Department of Health and Human Services (HHS) until October 1, 2007, when it was transitioned to ICE DRO. Prior to 2007 DIHS provided health services through an interagency agreement between ICE and HHS.

ICE is currently assessing DIHS IT infrastructure and systems to ensure adherence with DHS IT standards and alignment with mission and program goals.

The following are the FY 2010 projected accomplishments:

- Award a contract for comprehensive certified EHR including several subsystems;
- Configure and develop interfaces, complete testing and beta testing, and initiate deployment of a eHR application to support ICE medical operations at DIHS-staffed detention facilities; and
- Initiate development and deployment of appropriate eHR capability to over 350 Intergovernmental Service Agreement (IGSA) and Contract Detention Facilities (CDF) housing ICE detainees.

ICE Law Enforcement Systems Modernization

The ICE Law Enforcement Systems Modernization initiative includes a number of case management, information sharing and operational support service projects that will improve ICE law enforcement personnel access to law enforcement information. The TECS modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities for case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, and statistical performance reporting. Critical to this project is the fact that the legacy system is part of a larger system maintained by CBP, which is undergoing fully funded and rapid modernization. Projected accomplishments for FY 2010 include:

- TECS Modernization – The completion the requirements definition phase and begin the design and development phase of specific projects. A development environment will be created to support the development efforts.
- Mobile IDENT – The development of the Mobil IDENT proto-type booking service and pilot the proto-type at three SAC offices for user acceptance and gap analysis.

- ICEPIC - The hardware upgrade and migration to the enterprise data center along with the creation of the COOP for 24-7 support. The support of the national rollout to all SAC and RAC offices.
- ICE ACCESS - This initiative will provide requirements gathering with local and state agencies and the U.S. Department of Justice for gang information sharing and data integration. A design strategy will be delivered to plan for the design and development of an integrated solution for the following year.
- Law Enforcement Information Systems Sharing – The completion enhancements for the sharing of images and photos and the continue rollout to five additional information sharing partners.
- Border Enforcement Security Task (BEST) Force Expansion – This initiative accomplishments will include gathering and analysis of the requirements and design for the modernization of BEST information technology.
- Intelligence Support –The requirements gathering and design for moving the Data Analysis & Research for Trade Transparency (DARTT) system into the enterprise environment. The requirements and design for the modernization of Cyber Crimes Center systems and National Child Victim Identification System (NCVIS).
- International Affairs Modernization –The requirements gathering and design of the OIA systems including Parole Case Tracking System (PCTS), Visa Security System (VSP), World Customs Organization Information Sharing (WCO) and Human Resources Dashboard (HRD).
- Forensic Document Lab –The requirements and design for the modernization of the information technology infrastructure and moving into the enterprise environment.

Atlas IT Infrastructure

The Atlas IT Infrastructure initiative will improve information-sharing across the DHS and ICE organizations; strengthen information availability; provide a fully secure IT environment; and improve workforce productivity. The following are projected FY 2010 accomplishments:

- Continue modernizing an additional 290 ICE sites with new file & print servers;
- Complete the integration of 22 data collection systems into one database, allowing ICE and its law enforcement partners to more easily share information;
- Deploy immediate security solutions to resolve immediate security vulnerabilities;
- Implement vulnerability scanning tools to quickly detect and respond to IT security breaches; and
- Oversee the migration of ICE IT assets from the Department of Justice Data Centers to the DHS Data Centers.

IV. Program Justification of Changes

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Resources Above Guidance**

(Dollars in Thousands)

Program Increase 1: Electronic Health Records

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management

PPA: Automation Modernization

Program Increase: Positions 4 FTE 2 Dollars \$20,400

Funding Profile

	FY 2008 EOY Projected Actual			FY 2009 President's Budget			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0,000
Program Increase							4	2	\$20,400
Total Request	0	0	\$0	0	0	\$0	4	2	\$20,400

Description of Item

ICE is requesting funds to address Division of Immigration Health Services (DIHS) infrastructure deficiencies and continue evaluating electronic health records system solutions. ICE is reviewing off-the-shelf systems and those currently deployed by other entities to determine how to best move forward with this important initiative.

The DIHS serves as the health authority for ICE on matters related to detainee health care. DIHS provides direct patient care at 24 facilities (housing approximately 50-60% of the detainee population) and authorizes managed care services to the remaining ICE detainees housed at over 350 contracted detention facilities without on-site DIHS staff nationwide. The detainee population has increased by more than 40 percent since 2004. In addition, the number of facilities that DIHS staffs is projected to expand from the current 24 sites at a rate of 2-4 sites per year based current projections from Detention and Removal Operations (DRO). This growth significantly increased the complexity of the DIHS role to provide effective and reliable health care service to ICE detainees in support of the ICE mission.

Personnel costs (\$.631 million, 4 Positions, 2 FTEs)

- 2 IT Specialists - \$.468 million
- 2 Contracting Specialists – \$.163 million

Non-personnel costs (\$19.769 million)

- The FY 2010 request for \$19.664 million will allow ICE to begin the design and development of a new enterprise-based Electronic Health Records (eHR) system, and will include the following:
 - Customization of software elements (\$6.88M) – customizes a paper-based system to an electronic system that incorporates business processes for the DIHS and DRO environment. This process allows for customizing existing ICE applications that would potentially interface with the current suite of Detention and Removal applications. Customization may also be required for interfaces with external medical sources to obtain historical health information and medical diagnostic results.
 - Hardware/software acquisitions (\$11.414M) – include software licenses, server support, application servers, and standard software and hardware implementation for the new environment.
 - Program support (\$1.37M) – provide project management office support for cost, schedule and performance oversight.

The eHR will provide the needed capability for DRO to increase the speed and efficiency of submittal and approval of treatment authorization requests (TARs), and interface with other Federal systems (e.g., ENFORCE, the Bureau of Prisons' Sentry, and Plexus) necessary to track detainees across multiple instances of detention.

- The request also includes \$.105 million for facilities for new personnel.

Justification

Currently, medical encounters of detainees are recorded in paper-based systems and disparate IT applications. The medical documentation systems within the DIHS-staffed facilities include medical documentation, a patient scheduling system, a pharmacy system, a treatment authorization system, and several statistics and utility applications. Some facilities are completely paper-based. The applications are not integrated and information is not readily available among sites. Also, a 2008 study found the current medical documentation system to be inadequate with numerous functional and performance problems, including poor response time. The current system lacks critical components currently available in Health Information Technology (HIT) certified by the federally-endorsed Commission on the Certification of Health Information Technology (CCHIT) and in compliance with other applicable HIT guidelines.

The current systems used to oversee the healthcare of the ICE detained population also cause duplication of work efforts, particularly in capturing and updating detainee information. Extensive effort is required to provide timely, complete information for diagnosis and treatment support and to ensure accountability (through double or triple checks of paper documents). This duplication of work efforts enhances the likelihood of human error, reduces the availability of

medical information to providers, and may delay of delivery of appropriate healthcare. Real-time reporting of medical information also remains unavailable to ICE, making it difficult to provide ICE with prompt access to comprehensive medical information on the ICE detained population and reliable history to the treating physician at the place and time of care.

Other challenges include:

- Ensuring accountability and integrity of paper documents for accurate reporting and audit purposes;
- Providing appropriate, timely information enterprise-wide to guide custody decisions; and
- Providing timely medical alerts to all ICE staff on significant medical conditions (e.g. diabetes, heart disease, tuberculosis).

To meet these challenges, ICE will begin the procurement of an electronic health records system. As a result of preliminary research, it is expected that ICE will be able to utilize an existing commercial-off-the-shelf (COTS) or government-off-the-shelf (GOTS) system with some customization. Upon successful implementation of this project, ICE expects:

- Improved services to detainees through faster and timely dissemination of information.
- Appropriate, accurate information to guide medical decisions is available at the time and place of care.
- Reduced health care costs resulting from inefficiency, medical errors, inappropriate care, and incomplete information.
- Improved coordination with DRO staff to ensure medical conditions (i.e. diagnosis and treatment decisions, special needs, and medical alerts) are factored into immigration case management.
- Increased process compliance through improved service delivery and clinical operations to reduce negative patient outcomes (e.g. medication errors, unexpected detainee deaths, and limited access to healthcare).
- Improved oversight and monitoring of compliance with rules, regulations, and standards, especially time-sensitive service requirements (e.g. intake screenings and physical examinations) through timely metrics reporting related to detainee health, as well as provider efficiency.
- Migration from paper-based medical systems to an electronic system, in compliance with the Paperwork Reduction Act.
- The capability for IGSA and CDF facilities to enter critical medical information on all detainees in ICE custody.

Impact on Performance (Relationship of Increase to Strategic Goals)

An eHR that is customized for the needs of detention facilities is necessary in order to maximize efficiencies, reduce medical errors and standardize the care provided to detainees.

HSPD-21 calls upon DHS to develop a National Strategy for Public Health and Medical Preparedness Strategy, which would include electronic health information systems to “incorporate flexibility and depth of data necessary to respond to previously unknown or

emerging threats to public health and integrate its data into the national bio-surveillance common operating picture as appropriate.” Establishing an ICE eHR system to track detainee health records will serve to support ongoing efforts to evaluate the ICE population from a public health perspective and ensure ICE is prepared to meet interoperability directives within the Federal medical organizations.

In a report by the DHS Office of Inspector General (OIG-08-52), the OIG made the recommendation to expedite all necessary discussion and resources to develop a comprehensive system of electronic health records for ICE detainees (Recommendation Number 10). The report also stated that maintaining a complete and current picture of the clinical operations of its facilities should become a priority for ICE and its detention partners.

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Resources Above Guidance**

(Dollars in Thousands)

Program Increase 2: Detention and Removal Operations Modernization (DROM)

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management

PPA: Automation Modernization

Program Increase: Positions 14 FTE 7 Dollars \$22,000

Funding Profile

	FY 2008 EOY Projected Actual			FY 2009 Enacted			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$3,000
Program Increase							14	7	\$22,000
Total Request	4	2	\$11,500	4	4	\$11,300	14	7	\$25,000

Description of Item

The Office of Detention and Removal Operations Modernization (DROM) Program was established to oversee the systems upgrades and improvements of DRO business processes for the detention and removal of illegal aliens from the United States.

The DROM program is designed to improve:

- **real-time dynamic reporting on statistics and metrics** - for events from apprehension through the detention and removal process;
- **detainee management** – including the ability to identify the status of an individual alien’s case from apprehension to removal;
- **management of detention beds and detainees** - including the ability to track, count and manage detainees, including a system that stores all alien’s data for providing DRO personnel with necessary information to expedite the removal process;
- **bed-space availability management system** - to provide real-time visibility into the availability of beds by location, by relative likelihood of availability, by alien characteristic or classification, and to explore the capability of any potential system to make reservations and cancellations; and

- **transportation management** - for the scheduling and routing of detainees for detention and removal, and to improve fleet management and coordination of transportation events and needs.

The DROM investment provides funding of \$22.0 million to include 14 positions and be allocated as follows:

Personnel costs (\$1.345 million, 14 Positions, 7 FTEs)

- 11 IT Specialists - \$1.100 million
- 3 Contracting Specialists - \$.245 million

Non-personnel costs (\$20.654 million)

- Bed Space and Transportation System (BST&T) (\$11.842 million) – This system will create an automated bed space management process to track detainee movements and identify detainees during transfers through the use of mobile biometric identification devices. Funding will support development of the Transportation Management System module (TMS) as a deliverable. As part of the BST&T system, TMS addresses the DRO needs for improved transportation management. TMS will provide consistent automation of transportation transactions, provide decision support for complex moves, streamline communication and work flow, and provide the ability to measure and monitor transportation efficiency.
- Detention and Removal Document Management Automation (\$3.29 million) – The Document management system will provide a web-based user interface to allow authorized personnel to search and retrieve documentation associated with a case. It improves document management by scanning, classifying, converting to searchable text, indexing, and storing all incoming temporary file (T-File) documentation in a central document management system database. These documents include charging documents, court papers, birth certificates, transfer forms, and driver’s licenses. The deliverable for this will be a central document management system database with a web-based user interface.
- Detention and Removal Electronic Visitor’s Log (eVisitor’s Log) (\$1.22 million) – The development of the eVisitor’s Log deliverable will provide an automated audit trail of detainee visitors and the ability to immediately identify “wanted” individuals as they attempt to gain facility access. It will capture key information about the visitor, link the visitor to the respective detainee and adapt existing biometric screening services to conduct visitor background checks. As updated criminal history information becomes available, the system identity records can be updated automatically. Additionally, the system incorporates a visitation tracking application that will identify and track detention facility visitors.
- Systems Support (\$3.385 million) – The Project Management Office will continue providing support for consistent management processes and practices across all DROM projects in addition to standard programmatic administration of the

project cost, schedule, performance, and risks components of the DROM Program. Additionally, the existing ICE data warehouse will be expanded to accommodate new DRO enhancements in Enforce Alien Removal Module (EARM) and new data sources (e.g. BST&T). The expansion of support services is instrumental in providing DRO greater access to meaningful, accurate, and timely investigative data.

- Electronic Travel Document (eTD) (\$0.828 million) – These funds will provide an automated method of issuing travel documents with foreign consulates and DRO users. This will help to improve the removal process as ICE is able to obtain travel documents quickly from foreign consulates.
- Facility costs for new personnel (\$.085 million)

Justification

This initiative will support the systems upgrades and improvements of DRO business processes for the detention and removal of illegal aliens from the United States, as well as support the requirements of the Secure Border Initiative (SBI). DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals. The DROM Investment provides solutions to improve DRO performance and provide enhanced operational capability in the following areas targeted for improvement:

- **Real-time dynamic reporting on statistics and metrics** for events from apprehension through the detention and removal process enhancing ability to monitor and control DRO operations (aggregate and individual aliens);
- **Case management**, providing DRO the ability to identify the status of an individual alien's case from apprehension to removal (e.g. awaiting credible-fear review, awaiting travel-document issuance) and identify an individual alien's case status to improve efficiencies in the removal process;
- **Management of detainees** to expedite the removal process by providing the capability to track the location of, count and manage detainees, including the DRO system that will store alien data (e.g., property management) for providing DRO personnel with necessary information;
- **Bed-space availability management system** that provides DRO real-time visibility into the availability of beds by location, by relative likelihood of availability, and by alien characteristic or classification, and integrated with a central reservation system to make reservations and cancellations to maximize efficiencies in identifying and assigning available beds, and to shorten the average duration for detention, thereby increasing throughput; and

- **Transportation management** for scheduling and routing detainees for detention and removal to improve fleet management, coordination of transportation events and needs, and monitor and evaluate transportation performance.

DROM is an integral part of augmenting existing booking and removal case management systems to address specific requirements called for in the Secure Communities (SC/CIRCA) Initiative Strategic Plan, such as automated detainer distribution, enhanced custody transfer coordination, and expanded use of electronic travel documents.

The DROM Program allows SC/CIRCA leveraging efficiencies generated through technology modernization projects. The DROM projects support the (SC/CIRCA) program by providing the automated systems necessary to ensure criminal aliens are not released into the community due to a lack of detention space or an appropriate alternative to detention.

Impact on Performance (Relationship of Increase to Strategic Goals)

The DROM project improves the process of apprehending, detaining, and removing illegal aliens. New systems built to support the booking process allow simultaneous, streamlined booking of multiple aliens. As a result, physical booking workflows will no longer have to mimic inefficient systems requirements and can instead focus on meeting more important business needs such as officer safety and improved speed. Along with major speed improvements, redesigned workflows also lead to significant quality and accuracy improvements. Data entry error rates concerning subject biographical information will decline as a result of process improvements made possible by new system capabilities and improvements.

The DROM project will improve ICE's ability to share immigration and detention data with other DHS and law enforcement components, including the U.S. Customs and Border Protection's Border Patrol and Office of Field Operations, U.S. Citizenship and Immigration Services, the FBI, the State Department, and the CIA. Ultimately, the DROM Program will include the capability to track and identify an individual alien throughout the apprehension, detention and removal process and will improve the management and oversight of detention bed and transportation resources.

DROM will also have a significant impact on ICE's interaction with state and local enforcement. State and local law enforcement authorities are becoming increasingly important DROM stakeholders due to the information shared from the detention and removals data through EARM. These authorities may identify, process, and when appropriate, detain immigration offenders they encounter during their regular, daily law-enforcement activity. DROM Enhancements enable ICE to provide more accurate and timely information which is crucial to the success of this program with state and local partners. This capability is key in allowing ICE to comply with Section 287(g) of the Immigration and Nationality Act aimed at multiplying the ICE forces through enhanced cooperation and communication with state and local law enforcement.

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Resources Above Guidance**

(Dollars in Thousands)

Program Increase 3: ICE Law Enforcement Systems Modernization

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management

PPA: Automation Modernization

Program Increase: Positions 17 FTE 9 Dollars \$40,000

Funding Profile

	FY 2008 EOY Projected Actual			FY 2009 President's Budget			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$9,400
Program Increase							17	9	\$40,000
Total Request	0	0	\$4,200	5	3	\$15,700	17	9	\$49,400

Description of Item

The ICE Law Enforcement Systems Modernization (LESM) initiative includes a number of case management, information sharing and operational support service projects that will improve access to law enforcement information.

The ICE Law Enforcement Systems Modernization investment provides funding of \$40 million to include 17 positions and is allocated according to the following:

Personnel costs (\$2.334 million, 17 Positions, 9 FTEs)

- 2 GS-15 IT Specialists - \$0.275 million
- 10 GS-14 IT Specialists - \$1.651 million
- 5 Contracting specialists - \$.408 million

Non-Personnel Costs (\$37.666 million)

- TECS Modernization (\$16.400 million) – This system will modernize the existing TECS functions which are specific to ICE. These include Investigative Case Management, Intelligence Reporting and Dissemination; Bank Secrecy Act data access; Money Laundering reporting and tracking; and Telephone Link analysis. The

modernization of the functions will enhance ICE's ability to share law enforcement information with both federal and non-federal entities. TECS modernization is a joint CBP and ICE initiative. CBP commenced its modernization effort in FY 2005; ICE began its modernization effort in FY 2008. ICE must ensure that it is ready to move to the modernized system at the same time as CBP decommissions the existing TECS platform or ICE will be required to shoulder the entire Operations and maintenance costs of the legacy TECS platform (estimated to be between \$25 and \$40 million annually).

- Mobile IDENT (\$4.000 million) – This project will give ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification (IDENT). Mobile IDENT decreases transportation costs and increases officer safety by reducing the number of instances of alien transport.
- ICEPIC/ICE ACCESS/LEISS/BEST Expansion:
 - ICEPIC (\$4.400 million) - The resource will provide an enterprise solution that will be rollout nationally to all SAC and RAC offices. The application will be migrated to the enterprise data center to provide 24-7 support. The creation of the COOP facility will provide failover for the application.
 - ICE ACCESS (\$2.000 million) – This initiative provides the resources to help ICE's state and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice's database.
 - LEISS (\$2.748 million) - ICE has the goal of connecting to 25 external information sharing partners in five year plan and these funds will provide support for the continue rollout to these partner and the plan of five partners per year.
 - BEST Expansion (\$2.000 million) – This initiative will fund IT integration and information sharing for the Office of Investigations' Border Enforcement Security Task Forces, multi-agency task forces with state, federal, and local participation to combat border crime.
- Intelligence Support (\$2.000 million) – These resources will fund improvements to ICE's information technology for its intelligence programs, including the migration of DARTTS and Cyber Crimes Center (C3) into the enterprise solution. In addition, it will fund the maintenance of hardware and software for cyber-crime investigations, the National Child Victim Identification System (NCVIS), e-Crimes and Overt and Covert Networks. Funding will also include conducting a GAP analysis on the existing systems to determine where modernization should be completed, including the Digital Forensic Lab.
- International Affairs Modernization (\$2.000 million) – The resources will fund the overdue modernization of the tools currently being used to screen visa applicants at consular offices overseas

- Forensic Document Lab (\$2.000 million) – This project will expand the technology infrastructure for the FDL's Automated Document Library System.
- Facility costs for new personnel (\$.118 million)

Justification

The ICE Law Enforcement Systems Modernization initiative includes a number of case management, information sharing and operational support service projects that will improve ICE law enforcement personnel's access to law enforcement information. The TECS modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities for case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, information sharing of subject record data, and statistical/performance reporting. The funding will secure a contract to perform requirements, design, and development for the integration of ICE-ACCESS and Information Sharing.

Approval of the LESM initiative will provide ICE with improved interoperability with DHS and other federal law enforcement and homeland security intelligence analysis toolsets; enhanced quality law enforcement information sharing within, and external to DHS; and improved collection of more consistent, timely, and accurate performance information on law enforcement activities and outcomes. It will expand the ability of DHS to collect data using federal standardized data formats and support investigators with a primary source for information sharing within the ISE (Information Sharing Environment) and national Law Enforcement (LE) community.

Impact on Performance (Relationship of Increase to Strategic Goals)

ICE will collaborate with CBP to define the Service Oriented Architecture (SOA) for the entire TECS/Case Management (CM) solution. The TECS/CM architecture will align with services defined in the DHS Enterprise Architecture (EA) Service Reference Model (SRM). The architecture will make maximum use of services previously created by other DHS and federal agencies, as well as ensure that new services developed by the TECS/CM program are reusable with DHS. Additionally, the ICE ACCESS project will enable the integration of ICE GANGS with DOJ, state and local agencies further improving information sharing efforts and providing increased officer safety.

Program Increase 4: Atlas IT Infrastructure

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management

PPA: Automation Modernization

Program Increase: Positions 1 FTE 1 Dollars \$9,000

Funding Profile

	FY 2008 EOY Projected Actual			FY 2009 President's Budget			FY 2010 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$3,200
Program Increase							1	1	\$9,000
Total Request	7	7	\$15,000	7	7	\$13,000	1	1	\$12,200

Description of Item

DHS must be able to share information with federal, state, local, and homeland security partners. Atlas activities planned in FY 2010 directly address ICE IT infrastructure gaps hindering the sharing, management, analysis, security and privacy of mission information. This initiative will improve information-sharing across the DHS and ICE organizations, strengthen information availability, provide a fully secure IT environment, improve workforce productivity, and migrate ICE infrastructure to the DHS One Network. Meeting these program goals will directly improve the quality, speed and extent to which ICE can enforce trade and immigration laws, control our borders, prevent terrorist acts, and respond to national emergencies.

The Atlas IT Infrastructure investment provides funding of \$9.000 million and is allocated according to the following:

Personnel Costs (\$0.082 million)

- 1 Contracting Specialist

Non-Personnel Costs (\$8.918 million):

- ICE Mission Information Data Warehouse (\$4.153 million) - The first of the major FY 2010 projects under this initiative will be in its fifth and final year of investment. Accordingly, most project risks will have already been addressed. This investment will provide a single access point for critical investigative information from several federal law enforcement systems to assist in immigration and criminal status determinations. The system will vastly reduce determination times by automating much of the current process where such determinations are manually assembled by getting information one system at a time. This increase in efficiency will enable ICE to handle the expected significant increase in determination requests that it will have to handle as it executes its strategic plan for identifying and removing all criminal aliens from the United States.
- Local Area Network (LAN) modernization (\$1.48 million) - The second major FY 2010 project, will be the planning, schedule development, and implementation of the pilot associated with the initiative to replace many legacy ICE LANs that do not have sufficient data transmission capabilities to successfully run applications that transfer significant amounts of data over the network (e.g., uploading and replaying voice, video and similar large investigation related files). Correcting this deficiency will be necessary to use certain software features planned under other Automation Modernization initiatives so that they can fully deliver stated performance improvements.
- Program Office Support (\$3.254 million) – The program office will continue to support the Atlas IT Infrastructure effort as well as continue to provide support for over \$93 million in other planned and on-going Atlas initiatives for: Cyber Security Modernization, Data Center Migration, and Tactical Communications. The program office will continue to address all external program reporting requirements, plan future program activities, and ensure program adherence to cost, schedule, and performance goals.
- Facility costs for new personnel (\$.029 million)

Justification

Atlas will use FY 2010 funding to achieve the following IT improvements:

- Automate inadequate reporting capabilities, such as the inability to identify a suspect's aliases, the failure to discover possible relationships among individuals and organizations that violate immigration and customs laws, and inability to uncover potential terrorist threats and plots. Atlas will drastically improve the quality, speed and extent to which ICE can investigate violations of law, prevent acts of terrorism, and remove detained aliens by completing a multi-year investment to integrate ICE data and share ICE data with other enforcement agencies, which is a cornerstone of ICE's portion in the national strategy to share law enforcement information and further the security of our homeland.
- Improve usability of other modernization efforts by working to replace existing poor performing local-area-network infrastructure at pilot sites, much of which is over 10 years old, with modernized, secure, high performance network infrastructure. This would replace obsolete hardware with current hardware that allows new equipment to be fully utilized. For example, the replacement switches and cabling will greatly enhance bandwidth so servers,

printers, and other networked devices can send and receive data faster, cutting wait time, and improving user productivity.

Atlas activities planned in FY 2010 address infrastructure deficiencies that must be corrected before other Automation Modernization programs can fully deploy planned capabilities. Without these investments:

- ICE will be unable to complete the foundation of its DHS-wide law enforcement data warehousing strategy, which is critical to support cost efficient expansion of ICE's enforcement mission through several related ICE and DHS IT modernization efforts;
- ICE will be unable to begin the effort to modernize local-area-networks often more than 10 years old, thereby leaving a major IT performance bottleneck in place that will limit the usability of other ICE IT modernization efforts;
- Ongoing Atlas Automation Modernization projects that rely on the current contractor program office support to perform required reporting, planning, procurement, and financial administration will experience delays and reduced performance, leading to increased cost.

Impact on Performance (Relationship of Increase to Strategic Goals)

The ICE data warehousing project improves sharing of investigative and enforcement data within ICE, with other DHS components and with other federal, state, local and tribal law enforcement partners. This project is a cornerstone of ICE's part in the national strategy to share law enforcement information.

The local-area-network modernization project will significantly boost performance of affected ICE IT systems. This will result in significant increases in productivity for ICE personnel at those locations.
