

## History of Holloman Air Force Base

On June 10, 1942, an event occurred that permanently changed the face of the Tularosa Basin—Alamogordo Army Air Field was established at a site six miles west of Alamogordo, New Mexico. Initial plans called for the base to serve as the center for the British Overseas Training program; the British hoped to be able to train their air-crews over the open New Mexico skies. However, everything changed when the Japanese launched a surprise attack against the Hawaiian Islands on December 7, 1941. The British decided to no longer pursue its overseas training program, and the United States military saw the location as an opportunity to train its own growing military. Construction began at the airfield on February 6, 1942 and forces began to move in on May 14, 1942.

From 1942-1945, Alamogordo Army Air Field served as the training grounds for over 20 different groups, flying primarily B-17s, B-24s, and B-29s. Typically, these groups served at the air-field for about six months, training their personnel before heading to combat in either the Pacific or European Theater. The 450th Bombardment Group was one of the many to cut its teeth at Alamogordo. After training, the group went on to serve in nearly every major combat operation in Italy, France, Germany, Austria, Hungary, and the Balkans. During their combat service, the 450th garnered two distinguished unit citations and 11 campaign credits.

After World War II, the future of the base was uncertain. In fact, rumors spread concerning the closure of the site, fueled by the fact that most operations had ceased. However, in 1947, a new era began when Air Materiel Command announced the air field would be its primary site for the testing and development of pilotless aircraft, guided missiles, and other research programs.

For the next 25 years the site, which became known as the Holloman Air Development Center, and later the Air Force Missile Development Center, launched many missiles including Tiny Tim (the first Army rocket), Rascal, V-2, XQ-2 Drone, Falcon, MACE, Matador, and Shrike.

On January 13, 1948 the Alamogordo installation was re-named Holloman Air Force Base, in honor of the late Col. George V. Holloman, a pioneer in guided missile research.

---

### Mission Statement

The 49th Wing—host of Holloman Air Force Base—supports national security objectives by deploying worldwide to support peacetime and wartime contingencies. The wing provides combat-ready Airmen, F-22 Raptors, and trains MQ-1 Predator and MQ-9 Reaper pilots and sensor operators. Additionally, the wing delivers Air Transportable Clinics and Basic Expeditionary Airfield Resources while providing support to more than 17,000 military and civilian personnel to include German Air Force Training Center operations.
