FIELD OPERATIONS GUIDE

US&R-23-FG

RESCUE FIELD OPERATIONS GUIDE (ROG)

The Federal Emergency Management Agency (FEMA) identifies four levels of operational guidance for use by emergency teams and other personnel involved in conducting or supporting disaster operations. This document corresponds to the level highlighted in bold italics.

Level 1	Overview: A brief concept summary of a disaster-related function, team, or capability.
Level 2	SOP: A complete reference document detailing the procedures for performing a single function (Standard Operating Procedure), or a number of interdependent functions (Ops Manual).
Level 3	***Field Operations Guide (FOG): A durable pocket guide, containing essential nuts-and- bolts information needed to perform specific assignments or functions.***
Level 4	Job Aid: A checklist or other aid for job performance or job training.

This document is consistent with and supports the Federal Response Plan for implementation of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. § 5121, *et seq.*
The most current copy of this document, including any change pages, is available through the FEMA Intranet in the National Emergency Management Information System (NEMIS) Reference Library (http://nemis.fema.net), under Response and Recovery/Policies and Guidance, Disaster Operations Guidance.

FOREWORD

This Rescue Field Operations Guide has been prepared to guide Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) Rescue personnel during Federal disaster response operations.

The National Urban Search and Rescue (US&R) Response System provides for the coordination, development, and maintenance of the Federal effort with resources to locate, extricate, and provide immediate medical treatment to victims trapped in collapsed structures; and to conduct other life saving operations.

This guide is designed to supplement the National US&R Response System Field Operations Guide, September 2003 (US&R-23-FG) which provides the US&R Response System methods of operation, organization, capabilities, and procedures in mobilization, on-site operations, and demobilization.

This guide provides a detailed reference for performing Rescue Operations. The content further elaborates on the content initially provided in US&R-23-FG.

Questions, comments, and suggested improvements related to this document are encouraged. Inquiries, information, and requests for additional copies should be directed in writing to the Department of Homeland Security, Federal Emergency Management Agency, Response Division, Operations Branch, 500 C Street SW, Washington, DC 20472

Introduction:

The Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA), developed the National Urban Search & Rescue (US&R) Response System to support the Emergency Support Function (ESF) #9 (Urban Search and Rescue) of the Federal Response Plan. Within this framework, resources are mobilized to respond to structural collapse and other incidents nationwide.

Document Purpose:

This DHS/FEMA US&R Rescue Operations Guide has been developed to support response resources during training and on missions. This guide supplements the National Urban Search and Rescue Response System FOG, September 2003 (US&R-2-FG). This guide is a compilation and summary of important strategic and tactical information, developed procedures, and reference material specifically for the performance of Rescue Operations.

Squad POA Requirements

- **Sign in/Check in**
- **Personal Pack inspection**
- **Vehicle keys**
- **Contact Information sheet**
- **Family Support Team information sheet**
- **Medical review/Shot Record**
- **MRE/Water**
- **Communications equipment issue**
- **Passport (if required)**
- **Brief Relief issue**

Rescue Team Manager

General Duties

- **Reports to TFL**
- **Provide input to assist the TFL in developing the tactical objectives**
- **Coordinate and supervise operations necessary to achieve the tactical objectives**
- **Determine logistical and organizational needs**
- **Receive briefings and SITREPs from TFL**
- **Brief assigned personnel**
- **Provide situation updates and maintain reports**
- **Prepare evaluations for assigned personnel**

Rescue Team Manager

On Site Duties

- **Overall assessment process to determine:**
  - **Functional requirements**
  - **Work schedules and rotation periods**
  - **Adequacy of support facilities**
- **Coordinate activities with Search & Recon**
- **Assist in development of team action plan**
- **Coordinate objectives and personnel assignments**
- **Ensure proper worksite setup, control & safety**
- **Evaluate operations and modify as needed**
- **Evaluate capacity of resources to complete assignment**
- **Order additional resources as needed**

Rescue Team Manager

On site Duties (cont.)

- **Resolve coordination, personnel and communication issues**
- **Provide periodic progress reports to the TFL**
- **Identify completion of assignments**
- **Identify availability of resources**
- **Submit daily reports to Plans**
- **Ensure proper information exchange at relief or demob**
- **Notify Logistics of equipment, supply or maintenance issues**

Rescue Squad Officer

General Duties

- **Reports to Rescue Team Manager**
- **Appoint Assistant Squad Leader (ASL)**
- **Implement rescue component of the Team Action Plan**
- **Coordinate and supervise assigned personnel at worksites**
- **Determine organizational and logistical needs**
- **Provide situation updates and maintain reports**
- **Evaluate and modify rescue tactics and methods as needed**
- **Prepare evaluations for assigned personnel**

Rescue Squad Officer

On Site Duties

- **Coordinate logistical requirements with Rescue Team Manager and Logistics**
- **Determine availability of resources**
- **Evaluate capacity to complete assignment**
- **Order additional resources as needed**
- **Make periodic progress reports to the Rescue Team Manager**
- **Submit daily reports and records to Plans**
- **Ensure proper information exchange at relief or demob**
- **Notify Rescue Team Manager of equipment, supply or maintenance issues**

NOTES:

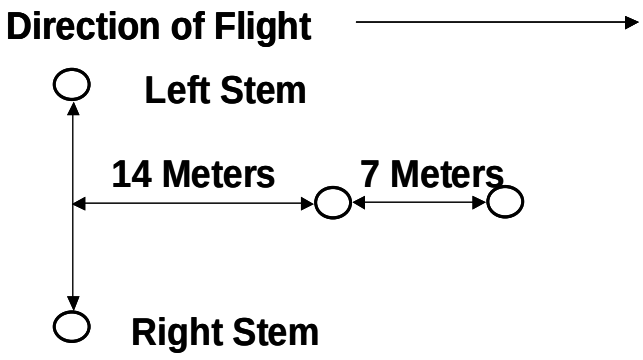
Medevac Procedures

Select and Secure Landing Site:

- **Size depends on number and type of aircraft**
- **Ground slope <15 degrees**
- **Ensure surface free of rocks and debris**
- **Avoid dust, sand and snow**
- **Ensure ground firm enough to prevent aircraft from bogging down during loading/unloading**
- **At approach/departure ends, clearly mark obstructions that cannot be removed**
- **Ensure 10:1 horizontal clearance to vertical obstructions**
- **Mark landing/touchdown site**
- **Use smoke, signalman and or lights**
- **When dark, mark touchdown point with inverted "Y" composed of four lights**

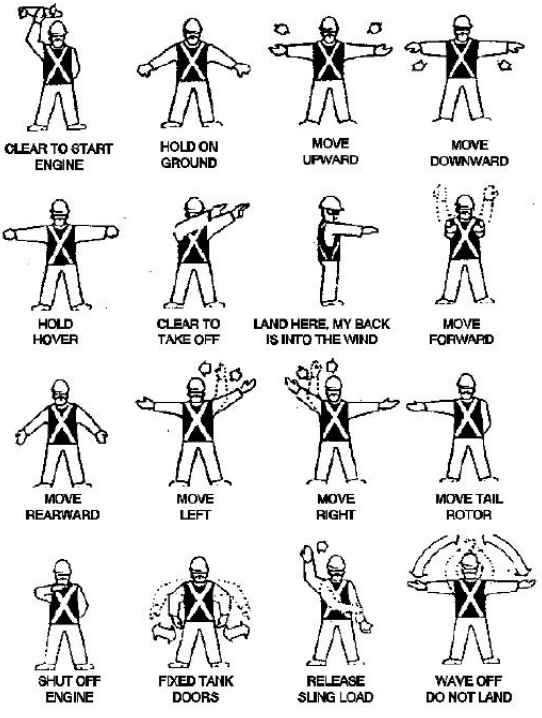
Medevac Procedures

Night Marking of Landing Zones



Note: The touchdown point will be midpoint of the legs of the "Y". If more than 1 small aircraft will land, add 1 additional light at the exact point each is to land. If more than 1 large aircraft will land, add 2 lights placed 10mm apart aligned in the direction of flight.

Helicopter Hand Signals



NATO Phonetic Alphabet

A - Alpha
B - Bravo
C - Charlie
D - Delta
E - Echo
F - Foxtrot
G - Golf
H - Hotel
I - India
J - Juliet
K - Kilo
L - Lima
M - Mike
N - November
O - Oscar
P - Papa
Q - Quebec
R - Romeo
S - Sierra
T - Tango
U - Uniform
V - Victor
W - Whiskey
X - X-ray
Y - Yankee
Z - Zulu

BOO Site Requirements

Preferred Size 200x200ft (61x61m)

Minimum size 110x150ft (33.5x46m)

- **Cultural/social considerations**
- **Access to work sites**
- **Runoff/flooding**
- **Noise considerations**
- **Utilities**
- **Damaged structures**
- **Prevailing winds/air hazards**

BOO Setup Priorities

Task	Priority
▪ Cache setup and organization	1
▪ Task Force Command Center	1
▪ Medical	1
▪ Personnel Shelters	1
▪ Sanitation/Hygiene	2
▪ Community Tent	3
▪ Canine Shelter	3
▪ Security/Hazards (constant)	N/A

BOO Setup Assignments

- **Squad 1:**
  - **Assigned to tent _____**
- **Squad 2:**
  - **Assigned to tent _____**
  - **Personnel Shelter setup (Priority 1)**
- **Squad 3:**
  - **Assigned to tent _____**
  - **Cache setup & organization (Priority 1)**
- **Squad 4:**
  - **Assigned to tent _____**
  - **Cache setup & organization (Priority 1)**

BOO Setup Responsibilities

- **Site Requirements (Immediate)**
  - **Task Force Leader, Rescue Team Manager, Log Chief & Comm Specialists**
- **Cache Setup and Organization (Priority 1)**
  - **Log Chief, Log Specialists, Squads 3 & 4**
- **TFCC Setup (Priority 1)**
  - **Task Force Leader, Plans Chief, Comm Specialists, Technical Info Specialist & Safety**
- **Medical Treatment Area Setup (Priority 1)**
  - **Medical Manager & Medical Specialists**
- **Personnel Shelter Setup (Priority 1)**
  - **Squad 2**
- **Sanitation/Hygiene Issues (Priority 2)**
  - **Safety**
- **Canine Exercise Area (Priority 3)**
  - **Search Team Manager & Canine Specialists**
- **Community Tent Setup (Priority 3)**
  - **Log Chief & Technical Info Specialist**

BOO Setup Procedures

- **Preferred Size, 200x200ft (61x61m)**
- **Minimum Size, 110x150ft (33.5x46m)**
- **Utilize Advance Team Kit**
  - **2 - 100ft tapes, roll fireline tape, BOO signs, digital camera, vests, chalk, binoculars & paint**
- **Layout and identify sections with signs and fireline tape**
- **Entrance should be adjacent to main access or travel route**
- **Mark ground for location, dimension and spacing of each section and tent**
- **Identify travel/access routes Ensure fire extinguishers and signs are present**
- **Generators placed on perimeter near section to be powered**
- **Identify remote fuel storage area**
- **Post signs for all sections and each tent**

BOO Setup (Cache) Procedures

- **Size (approximately) 50x60ft (15x18m)**
- **Layout/mark Cache area adjacent to BOO entrance and main travel/access**
- **Post conspicuous sign**
- **Mark perimeter with fireline tape and establish entry control point**
- **Mark location/layout for cache setup**
  - **4 rows Rescue**
  - **1 row Technical**
  - **1 row WMD (as needed)**
  - **1 row Logistics**
- **Erect 19x35ft Western Shelter tent for weather sensitive equipment and office**
- **Provide electricity and light**
- **Identify empty boxes for counter space/seating**
- **Provide tarps/sheeting for weather/security**

BOO Setup (TFCP) Procedures

- **Size (approximately) 40x30ft (12x9m)**
- **Mark perimeter with fireline tape and post sign**
- **Identify high ground/elevated structures for communications**
- **Erect 2 19x19ft Western Shelter tents**
- **Provide electricity and light**
- **Retrieve/setup all office supplies and forms**
- **Establish the following:**
  - **Command and Control**
  - **Workspace**
  - **Communications**
  - **Equipment setup**
  - **Plans/Technical Information workspace**

BOO Setup (Medical) Procedures

- **Size (approximately) 25x50ft (7.5x15m)**
- **Mark perimeter with fireline tape and post sign**
- **Erect 19x35ft Western Shelter tent**
- **Provide electricity and light**
- **Establish the following:**
  - **Patient treatment area, with privacy**
  - **Acute care equipment**
  - **Office workspace with shelving and seating**

BOO Setup (Shelter) Procedures

- **Size (approximately) 80x110ft (24x33.5m)**
- **Mark perimeter with fireline tape and post sign**
- **Erect Personnel Shelter tents**
- **Provide electricity and lighting**
- **Provide smoke & carbon monoxide detectors and fire extinguishers**
- **Affix identification signs to tents**
- **Consider weather and runoff issues**

BOO Setup (Sanitation/Hygiene) Procedures

- **Size (approximately) 25x25ft (7.5x7.5m)**
- **Mark perimeter with fireline tape and post sign**
- **Setup a minimum of 4 “Brief Relief” stations**
- **Provide lighting**
- **Set up hand washing and or wet wipe stations**
- **Place trash receptacles throughout BOO (segregate food scraps)**
- **Setup up Gross decon station at BOO entry points**
- **Request trash collection from local resources**
- **Collect and dispose of trash 2x daily (segregate food scraps)**
- **Request “Port-A-Potties” from local resources**

BOO Setup (Community Tent) Procedures

- **Size (approximately) 25x35ft (7.5x10.5m)**
- **Mark perimeter with fireline tape and post sign**
- **Erect 19x35ft Western Shelter tent**
- **Provide electricity and lighting**
- **Establish seating/eating area**
- **Establish hand washing/clean up area**
- **Setup up task force bulletin boards**

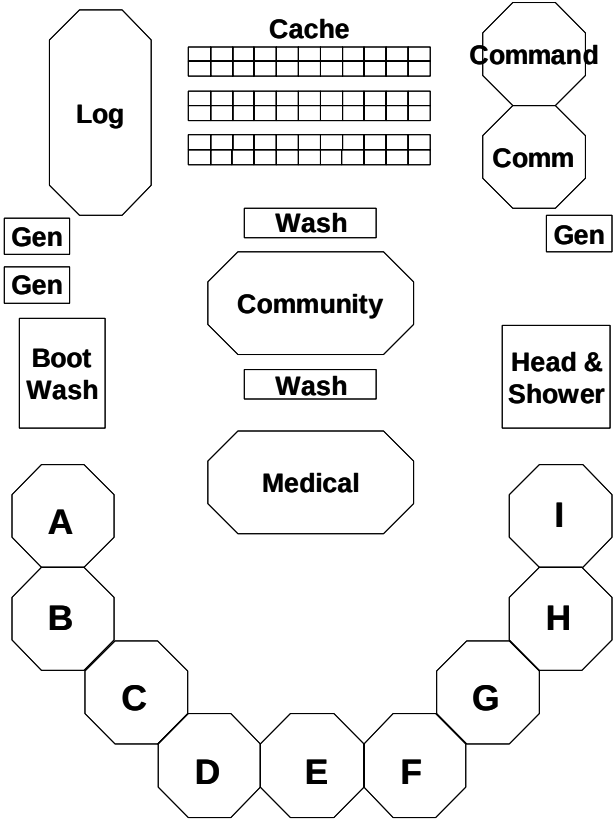
BOO Setup (Security/Hazards) Procedures

- **Identify/Mark Hazards within or adjacent to the BOO**
- **Isolate fuel storage**
- **Provide fire extinguisher at fuel storage and refueling locations**
- **Post “No Smoking” signs as appropriate**
- **Cover cache, supplies and equipment as appropriate**
- **Request additional generators/lighting for improved safety/security**
- **Post and announce plan for evacuation and assembly points**
- **Identify availability of local police/military**

BOO Setup Tent Assignments

Assignment	Tent
▪ TFL, RTM, Safety, Plans, TIS ENG	A
▪ TFL, RTM, Safety, Plans, TIS ENG	B
▪ Squad 3 & HM Specialist	C
▪ Squad 1 & HM Specialist	D
▪ Squad 4 & Driver/Mechanic	E
▪ Squad 2 & Driver/Mechanic	F
▪ Canine Specialists & Canines	G
▪ STM, Search Specs. & HER Spec.	H
▪ Non-Task Force Personnel	I
▪ Medical Personnel	Medical
▪ Communications Personnel	Comm
▪ Logistics Personnel	Log

Tent Assignments and Sample Layout



Strategic Considerations

The most effective rescue strategy should blend all viable tactical capabilities into a logical plan of operation. The general strategic considerations are outlined as follows:

Rescue Site Management and Coordination

Each rescue work site must have one person in charge to maintain unity of command. The Rescue Squad Officer of each rescue squad is responsible for all activities of the assigned rescue site including safety when a single squad operates alone. At large or complex rescue operations that require the commitment of two or more rescue squads to a single operation, the Rescue Team Manager may assume command or assign one of the Rescue Squad Officers to be in charge of the site. A Safety Officer should be identified at each rescue site.

Search Phases

There are generally five phases of organized search and rescue operations at collapse incidents:

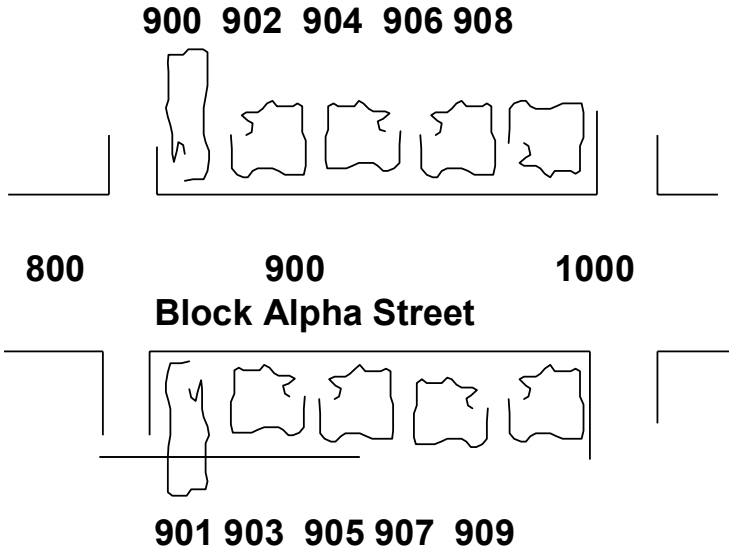
- **Phase One:** Assessment of the collapse area.
- **Phase Two:** Removal of all surface victims as quickly and safely as possible.
- **Phase Three:** Search and rescue of victims from accessible void spaces.
- **Phase Four:** Selected debris removal to locate and rescue victims.
- **Phase Five:** General debris removal. Usually conducted after all known victims have been removed.

Recon Initial Tasks

- **Area sketch/map and building ID (if no structure triage)**
- **Structural/Hazard evaluation and marking**
- **Building sketch/plan, include building cross section**
- **Building type/configuration, include size & stories**
- **Building occupancy type**
- **Collapse type**
- **Void locations**
- **Hazard locations**
- **Best access**
- **Hazard mitigation notes**

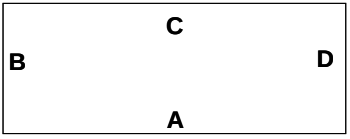
Structure Identification

If no numbers known, use low #'s



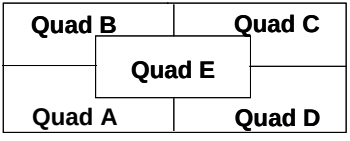
Structure Identification (Cont.)

Side ID



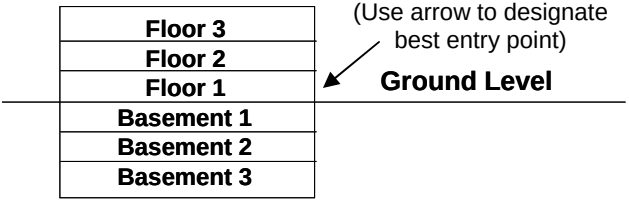
Front

Quadrant ID



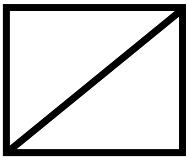
Front

Floor ID

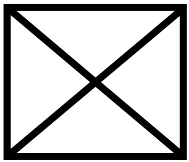


FEMA Structures/Hazards Marking

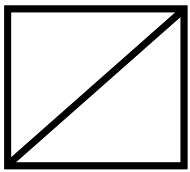
- 2x2ft (60x60cm)
- Structure relatively safe for US&R operations



- Structure significantly damaged
- Shoring/removal of hazards may be required



- Structure not safe for normal US&R operations
- Extensive safety measures must be taken before entry

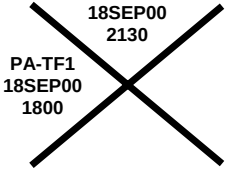


28 JUN 03
NATURAL GAS
1432HRS
NE-TF1

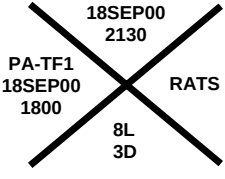
- To right of box:
  - Date
  - Hazards
  - Time
  - TF ID

FEMA Search Assessment Marking

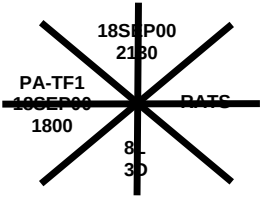
- Single slash upon entry into structure
- TF ID, date & entry time noted
- Indicates ongoing search



- Crossing slash upon exit
- Upon exit, date and time noted in top field
- Additional information placed in open areas of “X”

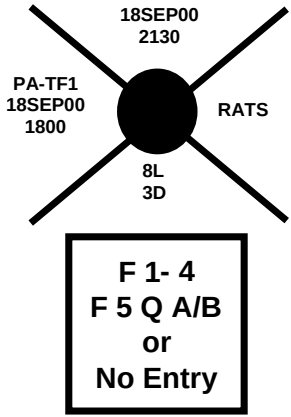


- Right - hazards
- Bottom - # of victims



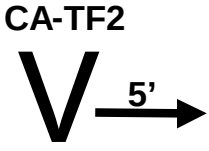
- When new search completed, cross out previous, and complete new search assessment marking

FEMA Search Assessment Marking
Incomplete Search Marking

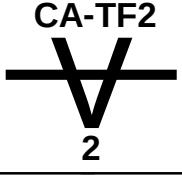


- When search terminated prior to completion:
  - Place filled circle at center of slash
  - Add date & time search terminated in top field
  - Note hazards to right
  - Note victims beneath
  - Place box below slash, & Note areas searched
    - Use “F” to ID floors searched
    - Use “Q” to ID quadrants searched
  - If only searched Exterior, as in Hurricane, write “No Entry” in box

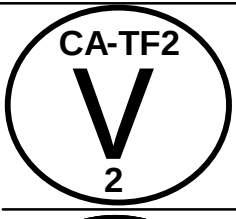
FEMA Victim Location Marking



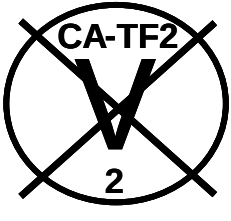
- “V” indicates potential victim location
- Arrow may be used to pinpoint location, add distance on arrow.



- Line through “V” indicates confirmed deceased victim. If more than one, mark total number under V.

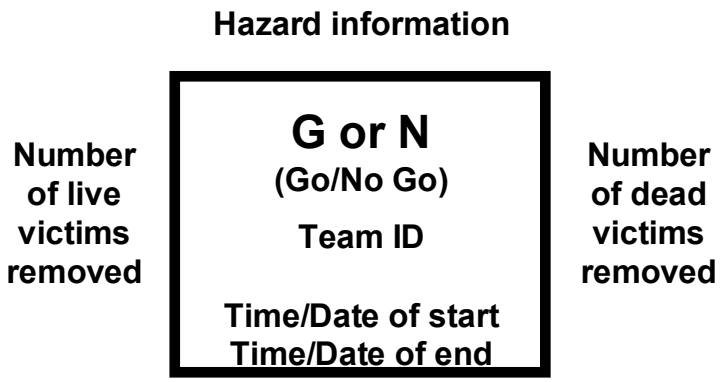


- Circle around “V” indicates confirmed live victim. If more than one, mark number under V.



- Cross out marking when victim is removed.

INSARAG Structure Assessment Marking

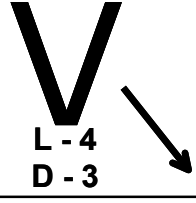


***When operation is completed, the box is circled.**

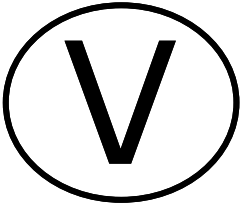
INSARAG Victim Location Marking

- "V" near location of known or potential victims

- Below "V":
  - Place "L" & # to denote live victims
  - Place "D" & # to denote dead victims



- Draw arrow to pinpoint confirmed victim
- Confirmation must be visual or audible, canine cannot confirm



- Circle marking when last live victim is removed *or* place line through "V" when only dead victims remain

Recon Team Make-Up

- Search Team Manager
- Technical Search Specialist
- Structures Specialist
- Medical Specialist
- 2 Canine Search Teams
- Haz-Mat Specialist
- 2 Rescue Specialists

Recon Operations

- **Identify buildings**
- **Structure/hazards marking**
- **Area/building search**
- **Search/assessment marking**
- **Assess void space and atmospheric conditions**
- **Victim location identification**
- **Sketch search area and record information**
- **Communicate findings to appropriate manager**

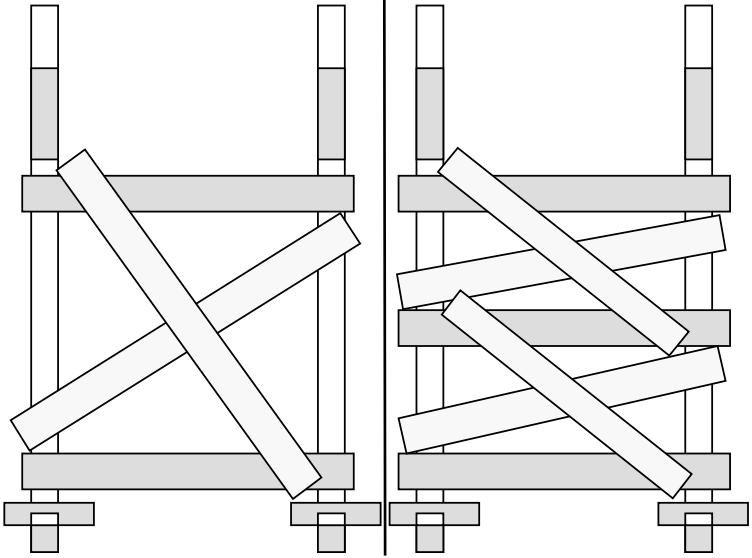
Raker Shore Lacing and Bracing

Every 40 ft (13.5m) and each end

Insertion Point
4x4 < 8 ft (330cm)
6x6 < 16 ft (480cm)

Insertion Point
4x4 > 8 ft (330cm)
6x6 > 16 ft (480cm)

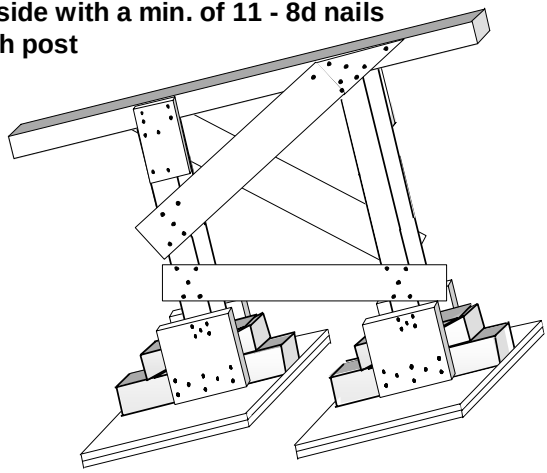


Sloped Floor Shore

Perpendicular - Type I

- **Used when slope is over 3 degrees (6 inches in 10 feet)**
- **Pairs placed up to 8 ft (240cm)**
- **Sloped floor/structure must be attached at top or bottom**
- **2x6 horizontal & diag. "X" bracing**
- **¾" plywood with a min. width of 12" (30cm) and a max. length of 5 ft (152cm), may replace bracing on short side with a min. of 11 - 8d nails to each post**

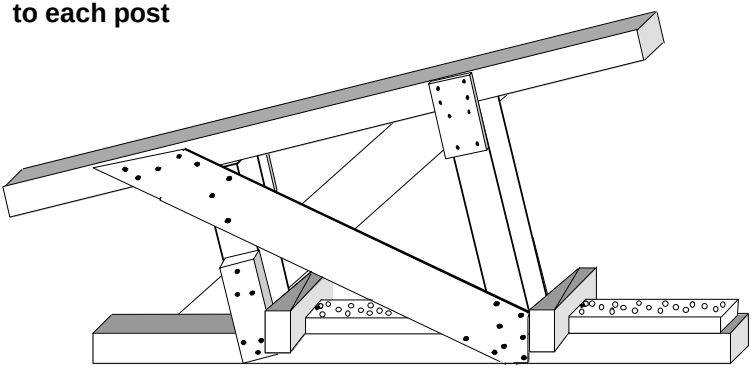
1 - Header
2 - Posts
2 - U Channels
2 - 2x6 Diagonals
1 - Horizontals
2 – Half-gussets
2 - U Channels
2 - Pair 2x4 wedges
2 - Sole plates



Sloped Floor Shore
Perpendicular - Type II

- **Used when slope is over 3 degrees (6 inches in 10 feet)**
- **Slope pairs placed up to 8 ft (240cm)**
- **2x6 horizontal and diag. "X" bracing**
- **Sloped floor/structure must be attached at top or bottom**
- **¾" plywood with a min. width of 12" (30cm) and a max. length of 5 ft (152cm), may replace bracing on short side with a min. of 11 - 8d nails to each post**

1 - Header
1 - Sole plate
2 - Posts
4 - Cleats
2 - Half-gussets
2 - 2x6 diagonals
2 - Pair 2x4 wedges



Sloped Floor Shore

Friction - Type III

- Used when slope is over 3 degrees (6 inches in 10 feet)
- Pairs placed up to 8 feet (240cm) on center
- Header must be attached to sloped surface over 5 degree slope
- 2x6 horizontal & diag. “X” bracing
- ¾” plywood with a min. width of 12” (30cm) and a max. length of 5 ft (152cm), may replace bracing on short side with a min. of 11- 8d nails to each post

1 - Header
1 - Sole plate
2 - Posts
2 - Cleats
4 - Half-gussets
2 - 2x6 Diagonals
2 - Pair 2x4 wedges

Signs and Symptoms of Nerve Agent Exposure

- **MILD**
  - **Headache**
  - **Blurred vision/pinpoint pupils**
  - **Tight chest**
  - **Excessive sweating**
  - **Tearing**
  - **Salivation**
  - **Unexplained runny nose**
- **MODERATELY SEVERE**
  - **Severe chest tightness**
  - **Diarrhea (rare)**
- **VERY SEVERE**
  - **Bluish discoloration of skin**
  - **Respiratory failure**
  - **Coma**
  - **Unconscious**
  - **Seizures**

"SLUDGEM"

- ***S*alivation**
- ***L*acrimation**
- ***U*rination**
- ***D*efecation**
- ***G*I upset (cramps)**
- ***E*mesis**
- ***M*uscular Twitching**

Treatment For Exposure

- **Must have no doubt of exposure and the need for treatment.**
- **Use these drugs only on symptomatic, contaminated personnel**
- **Depending on severity of symptoms, immediately administer 1 atropine auto-injector, followed by 1 "2-PAM Cl" auto-injector**
- **If signs and symptoms still exist after 5–10 mins, repeat injections**
- **If signs and symptoms still exist after additional 10 mins, repeat injections for third time**
- **If signs and symptoms remain after third set of injections, do not give any more antidotes but seek immediate medical help**

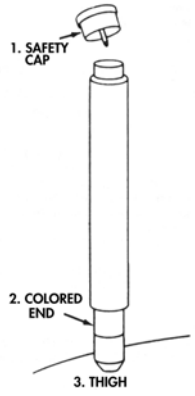
If Severe Signs and Symptoms are Present:

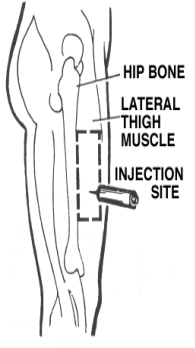
- **All three auto-injector kits (atropine and "2-PAM Cl") should be administered in rapid succession**
- **If patient is actively seizing, Valium (10mg) should be administered**

Mark I Kit Directions for Use

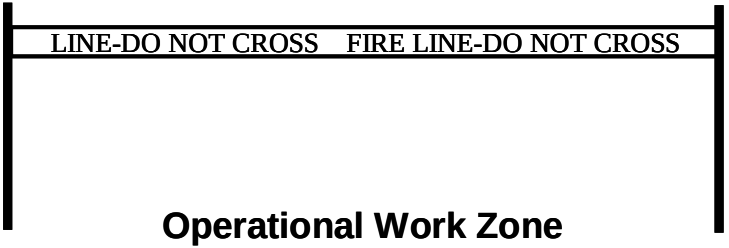
Partner Antidote Administration

- **Antidote administration primarily responsibility of your partner**
- **Antidote self-administration is the exception (to be accomplished only under extraordinary circumstances)!**
- **Agent exposure does not necessarily mandate antidote administration!**
- **Remove safety cap (yellow on atropine; gray on "2-PAM Cl"). Mark I kit clip holds the safety caps; may not notice if using Mark I kits. Do not touch colored end of injector after removing cap; injector can and will function into fingers or hand if any pressure applied to this end of injector**
- **Hold injector like a pen. Place colored end (green on atropine, black on "2-PAM Cl") on thickest part of thigh and press hard until injector functions**
- **Hold firmly in place for ten seconds, then remove. Massage the area of injection**

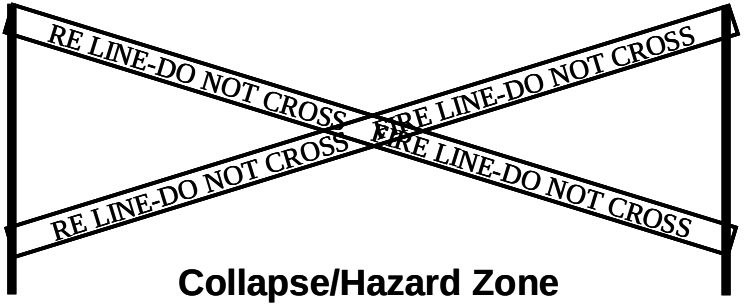




General Cordon Markings



Operational Work Zone



Collapse/Hazard Zone

Evacuation Signals

- **Evacuate**
  - **3 Short blasts**
  - **(*Continually until all out*)**
  - **(1 Second each)**
- **Cease Operations**
  - **1 Long blast**
  - **(3 Seconds)**
- **Resume Operations**
  - **1 Long and 1 short blast**

Note if different:
