National Interagency Coordination Center Incident Management Situation Report Friday, November 4, 2016 – 0800 MT National Preparedness Level 1

National Fire Activity (Oct. 28 - Nov. 3)

Initial attack activity:	Light (928 new fires)
New large incidents:	33
Large fires contained:	19
Uncontained large fires:**	11
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

^{**}Uncontained large fires include only fires being managed under a full suppression strategy. **Link** to Geographic Area daily reports.

Southern Area (PL 4)

New fires:	855
New large incidents:	32
Uncontained large fires:	10
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

- * **Rough Ridge**, Chattahoochee-Oconee NF. IMT 2 (Bentley). Thirteen miles northwest of Blue Ridge, GA. Hardwood litter, timber and brush. Moderate fire behavior with backing, flanking and single tree torching. Structures threatened. Area and trail closures in effect.
- * **Boteler**, National Forests in North Carolina. IMT 1 (Dueitt). Nine miles east of Hayesville, NC. Timber and brush. Minimal fire behavior with backing and smoldering. Structures threatened. Area and trail closures in effect.
- * **Caney Hwy 2**, Kentucky DOF. Started on private land one mile east of Penny, KY. Hardwood litter and short grass. Active fire behavior with backing and creeping.
- * **Knox/Bell Line**, Kentucky DOF. Started on private land 10 miles north of Pineville, KY. Hardwood litter, tall grass and medium logging slash. Active fire behavior with running, uphill runs and wind driven runs.
- * **Wolf Creek**, Cherokee NF. Three miles northwest of Turtletown, TN. Timber and hardwood litter. Minimal fire behavior with backing, flanking and creeping. Area closures in effect.
- * **Knob**, National Forests in North Carolina. Ten miles southwest of Franklin, NC. Closed timber litter, hardwood litter and timber. Active fire behavior with flanking, backing and creeping.
- * **Cemetery**, Daniel Boone NF. Two miles northwest of Brightshage, KY. Hardwood litter. Moderate fire behavior. Structures threatened.

Dick's Creek, National Forests in North Carolina. Two miles northwest of Dillsboro, NC. Hardwood litter, short grass and timber. Minimal fire behavior. Last report unless significant activity occurs.

* Long Ridge #2, Kentucky DOF. Started on private land six miles south of Pineville, KY. Hardwood litter, tall grass and medium logging slash. Active fire behavior with running, spotting and backing. Structures threatened.

- * **Scotts Gulf**, Tennessee DOF. Thirteen miles southeast of Sparta, TN. Timber. Minimal fire behavior. Last report unless significant activity occurs.
- * **Davidson Road**, Tennessee DOF. Started on private land four miles northwest of Lancing, TN. Timber. Active fire behavior. Last report unless significant activity occurs.
- * **Rocky Face**, Georgia Forestry Commission. Two miles east of Tunnel Hill, GA. Hardwood litter. Moderate fire behavior. Structures threatened. Last report unless significant activity occurs.
- * **Taylor Ridge**, Daniel Boone NF. Two miles south of Beulah Heights, KY. Timber and brush. Moderate fire behavior with flanking, backing and running.

Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

<u>Predictive Services Discussion:</u> An upper low will slowly drift across the Southwest through the weekend while a series of ridges and troughs move across the rest of the country. Very warm conditions in the eastern half of the U.S. will gradually lower as cool high pressure drops into the region early in the week. Showers and thunderstorms will increase across the southern Rockies and the south central U.S. associated with the slow-moving upper low. Another Pacific system will bring more rain and snow to the mountains of the West Coast states by the end of the week. Dry conditions will continue in the East. Temperatures will be mild in the north and west, warm in the south.

VEHICLE ENTRAPMENT

Vehicles/Roads Category

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Burn out around the vehicle if there is time.
- Park behind a natural barrier or structure. Consider that a structure could become involved which could severely impact nearby exposures/vehicles (Harris Fire, SoCal, 2007).
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles and draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway; remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover themself with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
