CONTINUITY ASSISTANCE TOOL OVERVIEW

PURPOSE

This Continuity Assistance Tool (CAT) provides guidance and assistance for States, Territories, Tribal, and Local Government Jurisdictions (collectively referred to herein as “organizations”) to identify continuity program strengths and areas for improvement.

BACKGROUND

National Security Presidential Directive-51/Homeland Security Presidential Directive-20 (NSPD-51/HSPD-20) *National Continuity Policy* was issued by the President to establish and maintain a comprehensive and effective national continuity capability. The National Continuity Policy Implementation Plan (NCPIP) builds upon the Policy and provides guidance to executive departments and agencies and non-Federal Governments (including State, local, tribal, and territorial governments) on identifying and carrying out their Essential Functions to lead and sustain the Nation during a catastrophic emergency. The NCPIP also encourages coordination among Federal, State, local, tribal, and territorial governments and the private sector to achieve a comprehensive and integrated continuity capability. Through this collaborative effort, our national security posture can be enhanced to enable a more rapid and effective response to, and recovery from, a national emergency.

The Federal Emergency Management Agency (FEMA), in coordination with its non-Federal partners developed Continuity Guidance Circular 1 (CGC 1), *Continuity Guidance for Non-Federal Governments, States, Territories, Tribes, and Local Government Jurisdictions*, in July 2013 to provide operational guidance to implement the NCPIP. This assistance tool captures the key elements necessary for organizations to create a comprehensive continuity program and plan, as described in CGC 1, and provides a method to review those continuity programs and plans.

Continuity programs and operations are fundamental practices that allow critical services to remain available under all conditions. The CAT was created to establish industry-wide benchmarks for the management, overall performance, and readiness of organizations to respond to a continuity event. The tool allows for organizations throughout the United States to examine their continuity capability by utilizing an easy-to-use national and uniform method to identify gaps in continuity programs and justify the funding and resources needed for improvements. Through identifying and filling these gaps, viable continuity programs can be established to help keep organizations functioning during emergencies.

The CAT is useful for all organizations regardless of location, size and status of existing continuity programs or plans. The tool describes the elements necessary to establish and maintain a viable continuity capability and can assist with establishing a foundation and framework for building a comprehensive program. If an organization does not have an existing program, the CAT can be used as a checklist to create an initial continuity plan and program.

BENEFITS OF THE CAT

The CAT:

1. Allows for comprehensive continuity program review.
2. Defines/refines continuity program baseline for strategic planning to correct deficiencies and achieve the required capabilities.
3. Provides program orientation for new staff members and leaders.
4. Creates a framework for budget, staff, and resource justification.
5. Enables the development of plans to rectify deficiencies.

ABOUT THE CAT

The CAT process is designed to guide the operational readiness and capabilities of organizations to help ensure the performance of Essential Functions and services under any circumstance. The tool is divided into two continuity categories: (1) Elements of a Viable Continuity Capability and (2) Continuity Program Foundation. These categories are further grouped into **Continuity Management Functions (CMF)** that describes specific key components of continuity.

1. ELEMENTS OF A VIABLE CONTINUITY CAPABILITY

Continuity Guidance Circular 1 describes ten elements that are necessary, to establish and maintain a comprehensive and effective continuity capability. The ten elements of a viable continuity capability are:

- 1.1 Essential Functions
- 1.2 Orders of Succession
- 1.3 Delegations of Authority
- 1.4 Continuity Facilities
- 1.5 Continuity Communications
- 1.6 Essential Records Management
- 1.7 Human Resources
- 1.8 Test, Training, and Exercise Program
- 1.9 Devolution of Control and Direction
- 1.10 Reconstitution Operations

2. CONTINUITY PROGRAM FOUNDATION

An organization's resiliency is built upon a foundation of continuity planning and continuity program management. This foundation is comprised of (1) plans and procedures to help guide leadership during a crisis, (2) risk management initiatives to identify, control, and minimize the impact of uncertain events, (3) adequate budgeting and resource allocation to support resiliency efforts, and (4) operational phases that help guide implementation of the continuity plan during various phases of a continuity event. The four supporting components of a Continuity Program Foundation are:

- 2.1 Program Plans and Procedures
- 2.2 Risk Management
- 2.3 Budgeting and Acquisition of Resources
- 2.4 Continuity Plan Operational Phases and Implementation (*included as the separate Appendix A due to its unique nature*)

These CMFs are described in detail in CGC 1 (see Appendix B: References), and are summarized on pages v and vi. The guidance document addresses common attributes of continuity programs and provides detailed suggestions of how to create a viable continuity capability. However, some CMFs may not be appropriate for all organizations and may be excluded if they are not applicable.

Each CMF is subdivided into **Attributes**, and these attributes are further subdivided into **Characteristics**. **Attributes** are broad criteria by which the performance of a CMF in a particular area can be addressed. **Characteristics** are detailed criteria that further clarify the area being assessed.

The CAT questions are subjective in nature. Therefore, it is reasonable to expect some variability from organization to organization when characteristics are reviewed. This flexibility is acceptable, since no two organizations' continuity programs are identical.

Organizational leadership and other personnel supporting continuity plans and programs are encouraged to enroll in the Continuity of Operations Excellence Series. The series provides a curriculum for certification as either a Professional Continuity Practitioner (Level I) or Master Continuity Practitioner (Level II). This training will assist organizations develop and execute continuity functions. The Continuity Practitioner requirements list can be found in Appendix C. Additional continuity training information can be found at <http://www.fema.gov/courses>.

CAT PROCESS

The process provided below is the recommended method to apply this tool:

Step 1: The continuity manager meets with functional representatives (i.e., IT manager, HR manager, Security managers, etc.) of the organization to review the CAT.

Step 2: With the assistance of the continuity manager, the functional representatives review their respective characteristics.

Answer each characteristic “Yes”, “No”, or “Not Applicable” (N/A). Flexibility is built into the assistance tool. Therefore, “Not Applicable” (N/A) may be used for those characteristics that do not apply.

Some characteristics are identified as “critical” and are denoted with an asterisk (*) following the number. These critical characteristics represent high priority criteria necessary for functional continuity programs and plans. Responding “No” for these characteristics denote primary areas of focus for the organization. Funding and resources should be appropriately allocated to fulfill these critical areas to build a viable continuity capability.

Step 3: For each characteristic, a “comments” section is provided to enter any helpful notes.

Step 4: For each CMF, tally all Characteristics to obtain the “Yes”, “No”, and “N/A” CMF totals. Record this tally in the CMF header.

Step 5: Capture each CMF total in Table 2 - Continuity Management Functions Summary on page viii.

CONTINUITY MANAGEMENT FUNCTIONS FOR CONTINUITY ASSISTANCE TOOL

The Continuity Management Functions in this tool are defined as follows. For further information, please refer to CGC-1.

1. ELEMENTS OF A VIABLE CONTINUITY CAPABILITY

1.1 ESSENTIAL FUNCTIONS

The limited set of organization level functions that should be continued throughout, or resumed rapidly after, a disruption of normal activities.

1.2 ORDERS OF SUCCESSION

Provisions for the assumption of senior agency offices during an emergency in the event that any of those officials are unavailable to execute their legal duties.

1.3 DELEGATIONS OF AUTHORITY

Identification, by position, of the authorities for making policy determinations and decisions at HQ, field levels, and all other organizational locations. Generally, pre-determined delegations of authority will take effect when normal channels of direction have been disrupted and will lapse when these channels have been reestablished.

1.4 CONTINUITY FACILITIES

Continuity facilities are locations from which leadership and critical positions may operate during a continuity event. These may include one or many facilities or virtual offices from which to continue essential operations.

1.5 CONTINUITY COMMUNICATIONS

Continuity communications are the systems that support full connectivity among leadership, internal elements, and other organizations to perform Essential Functions during a continuity event.

1.6 ESSENTIAL RECORDS MANAGEMENT

Essential records management is the identification, protection, and availability of information systems and applications, electronic and hardcopy documents, references, and records needed to support Essential Functions during a continuity event.

1.7 HUMAN RESOURCES

Human resources involves policies, plans, and procedures that address human resources needs during a continuity event, such as guidance on pay, leave, work scheduling, benefits, telework, hiring, authorities, and flexibilities.

1.8 TEST, TRAINING, AND EXERCISE (TT&E) PROGRAM

An effective TT&E program identifies, trains, and prepares personnel capable of performing their continuity responsibilities and implementing procedures to support the continuation of Essential Functions. Training provides the skills and familiarizes personnel with procedures and tasks. Tests and exercises serve to assess and validate all the components of continuity plans, policies, procedures, systems, and facilities.

1.9 DEVOLUTION OF CONTROL AND DIRECTION

Devolution is the capability to transfer statutory authority and responsibility for Essential Functions from primary operating staff and facilities to other employees and facilities. It also provides the means to sustain that operational capability for an extended period.

1.10 RECONSTITUTION OPERATIONS

Reconstitution planning is the process by which organizations/personnel resume normal operations from the original or a replacement primary operating facility.

2. CONTINUITY PROGRAM FOUNDATION

2.1 PROGRAM PLANS AND PROCEDURES

Continuity planning is an effort to document the existence of, and seek the capability to continue Essential Functions during a wide range of potential emergencies.

2.2 RISK MANAGEMENT

Risk management is a process to identify, control, and minimize the impact of uncertain events. This process organizes information to provide decision makers with information about risks to the organization's readiness, and to provide them with options for risk mitigation.

2.3 BUDGETING AND ACQUISITION OF RESOURCES

The budgeting and planning process can help organizations provide the critical continuity resources necessary to continue performing Essential Functions before, during, and after a continuity event.

2.4 CONTINUITY PLAN OPERATIONAL PHASES AND IMPLEMENTATION

Organizations must be prepared to implement executive decisions that are based upon a review of the emergency, and then determine the best course of action based on readiness posture. Organizations should integrate implementation procedures and criteria into their continuity plans. The continuity plan must address four phases of: (1) readiness and preparedness, (2) activation, (3) continuity operations, and (4) reconstitution. These factors are most easily reviewed during an exercise or actual event. Therefore, they have been separated from the main tool and appear as Appendix A.

GENERAL INFORMATION

This section is provided to revisit an organization’s community information and continuity experience prior to starting the Continuity Assistance Tool. The preliminary questions asked below help “set the stage” for assisting an organization’s continuity program by refreshing the specifics of community, landscape, potential hazards, and continuity experience.

1. ELEMENTS OF A VIABLE CONTINUITY CAPABILITY

Continuity Management Function

1.1 ESSENTIAL FUNCTIONS

A subset of overall organization activities that are determined to be critical. These functions enable the organization to provide vital services, exercise civil authority, maintain the safety of the community, and sustain the industrial/economic base during an emergency. The functions must be continued under any and all circumstances.

1.4.2.7* Organization's alternate and devolution sites are capable of performing essential functions as soon as possible after continuity activation with minimal disruption of operations, the ability to maintain this capability for up to 30 days or until normal operations resume, and the capability to perform these essential functions under all threat conditions. [CGC 1 Annex G, Page G-4, bullet #9e] *Pick One*

Comments

1.4.2.8 Organization's alternate and devolution sites planned for reliable logistical support, services, and infrastructure systems. [CGC 1 Annex G, Page G-4, bullet #9f] *Pick One*

Comments

1.4.2.9* Organization's alternate and devolution sites have essential support resources available, such as food, water, fuel, medical facilities, and municipal services, such as fire and police, to ensure the health, safety, and security of ERG/DERG (Emergency Relocation Group/Devolution Emergency Response Group) members. [CGC 1 Annex G, Page G-4, bullet #9g] *Pick One*

Comments

Attribute

1.4.3 *Provide survivable protection and sustain continued, endurable operations under any circumstances from all organization's alternate facilities, to include alternate usages of existing facilities. In addition, as appropriate, virtual office options including telework.*

Characteristics

Please choose Yes, No, or N/A

1.4.3.1* Organization's alternate and devolution sites have the capability for emergency/back-up power capability, so that essential functions and operations can continue in the event the primary source of power is disrupted. [CGC 1 Annex G, Page G-4, 9h] *Pick One*

Comments

1.4.3.2 Organization's alternate and devolution sites have housing available to support the ERG/DERG at or near the continuity facilities, such as billeting within the facility, other locations, including motels, or at ERG/DERG members' homes if within commuting distance to the continuity facility. [CGC 1 Annex G, Page G-4, bullet #9i] *Pick One*

Comments

1.4.3.3 Organization's alternate and devolution sites have a defined transportation support plan that details ERG/DERG transportation to, from, and on the site. [CGC 1 Annex G, Page G-4, bullet #9j] *Pick One*

Comments

1.4.3.4 Organization ensured alternate and devolution sites have sufficient levels of physical and information security to protect against all threats, as identified in the facility's risk assessment and physical security surveys. This includes sufficient personnel to provide perimeter, access, and internal security, as required by organization policy. [CGC 1 Annex G, Page G-4, bullet #9k] *Pick One*

Comments (Section 1.4.3 Cont'd)

1.4.3.5 Organization incorporated telework into its continuity plans and procedures. [CGC 1 Annex G, Page G-4] *Pick One*

Comments

1.4.3.6 Organization assessed essential functions to identify which functions the organization must conduct on-site and which functions the organization can conduct via telework, and evaluated the use of telework for supporting extended continuity operations and use by non-ERG personnel. [CGC 1 Annex G, Page G-4, bullet #1] *Pick One*

Comments

1.4.3.7 For those essential functions that employees must conduct on-site, organization classified job by exposure risk level to pandemic influenza and notified those employees that they are expected to work on-site during an influenza pandemic. [CGC 1 Annex G, Page G-4, bullet #1a] *Pick One*

Comments

1.4.3.8 Organization established and maintained plans and procedures to use telework as a primary or back-up continuity strategy for those essential functions and supporting tasks that are telework authorized, based upon the assessment. [CGC 1 Annex G, Page G-4, bullet #2] *Pick One*

Comments

1.4.3.9 Organization established a policy under which eligible employees, both ERG and non-ERG personnel, are authorized to telework during a continuity event. [CGC 1 Annex G, Page G-4, bullet #3] *Pick One*

Comments (Section 1.4.3 Cont'd)

1.4.3.10 Organization established and maintained plans and procedures for notifying all employees of their eligibility to telework during continuity activation. [CGC 1 Annex G, Page G-4, bullet #4] *Pick One*

Comments

1.4.3.11 Organization ensured each eligible employee is authorized to telework during a continuity activation by successfully completing an interactive telework training program prior to entering into and signing a written telework agreement with his/her supervisor. [CGC 1 Annex G, Page G-4, bullet #5] *Pick One*

Comments

1.4.3.12 Organization coordinated with organization's designated Telework Managing Officer when developing and integrating the continuity plan. [CGC 1 Annex G, Page G-4, bullet #6] *Pick One*

Comments

1.4.3.13 Organizations using telework as a primary or back-up continuity strategy adhered to policy and guidance governing the use of telework. [CGC 1 Annex G, Page G-4] *Pick One*

Comments

1.4.3.14 Organizations using telework as a primary or back-up continuity strategy provided protection of information and information systems used during telework activities according to government standards. [CGC 1 Annex G, Page G-4] *Pick One*

Comments (Section 1.4.3 cont'd)

1.4.3.15 Organizations using telework as a primary or back-up continuity strategy coordinated with the organization's Chief Information Officer to identify equipment and technical support requirements. [CGC 1 Annex G, Page G-4] *Pick One*

Comments

1.4.3.16 Organizations using telework as a primary or back-up continuity provided access to essential records and databases and the robust communications necessary to sustain an organization's essential functions at the telework site locations. [CGC 1 Annex G, Page G-4] *Pick One*

Comments

1.4.3.17 Organizations using telework as a primary or back-up continuity strategy ensured continuance of a viable continuity capability in the event that telework is not a viable option (e.g., significant electrical and/or telecommunications infrastructure degradation). 1.5.1 *Identify and acquire effective communications systems that support full connectivity, under all conditions, among key government leadership, internal elements, other agencies, critical customers, and the public.*

Characteristics	<i>Please choose Yes, No, or N/A</i>
-----------------	--------------------------------------

1.5.1.1*	Organization considered and addressed telecommunication services availability needs at primary and continuity facilities. [CGC 1 Annex H, Page H-1]	<i>Pick One</i>
----------	---	-----------------

Comments

1.5.1.2	Organization implemented minimum communications requirements for its primary facilities and its alternate and other continuity facilities, as appropriate, which support the continuation of that organization's essential functions. [CGC 1 Annex H, Page H-1, bullet #1]	<i>Pick One</i>
---------	--	-----------------

Comments

1.5.1.3	Organization possessed interoperable and available communications capabilities in sufficient quantity and mode/media. These communications are commensurate with that organization's responsibilities during conditions of an emergency. [CGC 1 Annex H, Page H-1, Bullet #2]	<i>Pick One</i>
---------	--	-----------------

Comments (Section 1.5.1 Cont'd)

1.5.1.4 Organization possessed communications capabilities that support the organization's senior leadership while they were in transit to continuity facilities? [CGC I Annex H, Page H-1, Bullet #3] *Pick One*

Comments

Attribute

1.5.2 *Verify that organization communications systems meet all the organization's needs, including those mandated by applicable directives and regulations, and train organization's personnel on and test all continuity communications systems that support full connectivity, under all conditions.*

Characteristic

Please choose Yes, No, or N/A

1.5.2.1 Organization ensured their communications capabilities were maintained and operational as soon as possible following a continuity activation, and were readily available for a period of sustained usage for up to 30 days or until normal operations were reestablished. Organizations should plan accordingly for essential functions that require uninterrupted communications and IT support, if applicable. [CGC 1 Annex H, Page H-1, bullet #4] *Pick One*

Comments

1.5.2.2 Organization demonstrated the ability to provide assured and priority access to communications resources. [CGC 1 Annex H, Page H-1, bullet #5] *Pick One*

Comments

1.5.2.3 Organization had sufficient communications capabilities to accomplish its essential functions from an alternate or other continuity facility shared with another organization, and also had a signed agreement between those organizations ensuring adequate access to communications resources. [CGC 1 Annex H, Page H-1, bullet #6] *Pick One*

Comments

1.5.2.4 Organizations possessed, operated, and maintained, or had dedicated access to communications capabilities at their primary facility, continuity-facility locations, and mobile communications capabilities. Communications capabilities ensure the continuation of those organizations' functions across the full spectrum of hazards, threats, and emergencies, including catastrophic attacks or disasters. [CGC 1 Annex H, Page H-1] *Pick One*

Comments (Section 1.5.2 Cont'd)

1.5.2.5 Organizations reviewed their continuity communications programs to ensure they were fully capable of supporting pandemic and other related emergencies. In addition, organizations should give full consideration to supporting social distancing operations including telework and other virtual offices. [CGC 1 Annex H, Page H-1] *Pick One*

Comments

1.5.2.6 Organizations ensured that any additional communications capabilities acquired were compatible with existing equipment and complemented the established requirements. Organizations may expand or migrate, as appropriate, their communications capabilities to make use of emerging technologies. [CGC 1 Annex H, Page H-1] *Pick One*

2.4 CONTINUITY PLAN OPERATIONAL PHASES AND IMPLEMENTATION

The organization must be prepared to implement executive decisions that are based upon a review of the emergency, and then determine the best course of action based on the organization’s readiness posture. The organization should integrate implementation procedures and criteria into their continuity plans. The organization’s continuity plan must address the four phases of: (1) readiness and preparedness, (2) activation, (3) continuity operations, and (4) reconstitution. These actions are to ensure continuation of the organization’s Essential Functions before, during, and after an emergency or disaster and under all conditions.
