Source: American FactFinder, U.S. Census Bureau

This EA uses data from both the 2000 and 2010 Decennial Censuses as not all data for 2010 has been released as of the writing of this EA. The American Community Survey (ACS) is also used for rough comparison as the data is more current however the data uses smaller sample sizes and has higher margins of error than the data used in the decennial censuses. As the 2008 flood heavily impacted all four Census Tracts in this EA; the 2010 Census address canvassing operation began in March 2009; and as housing acquisition funded through FEMA and Community Development Block Grants (CDBG) have been in progress since before the Census process began, the demographics of this area should be understood as dynamic and may vary from the 2010 Census data as released. Due to the sample size and the methodology used by the ACS, the real levels of population considered in poverty could vary considerably. The estimated proportion of the population of Cedar Rapids determined to be in poverty has increased with a much narrower margin of error due to the significantly larger sample size.
