93.596 CHILD CARE MANDATORY AND MATCHING FUNDS OF THE CHILD CARE AND DEVELOPMENT FUND

The Child Care Mandatory and Matching Funds of the Child Care and Development Fund (CCDF)

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title IV, Section 418, 42 U.S.C 618; Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193); Child Care and Development Block Grant Act of 1990, as amended (Public Law 101-508, 42 USC 9858, et seq); Balanced Budget Act of 1997 (Public Law 105-33); and the Deficit Reduction Act of 2005 (Public Law 105-171).

OBJECTIVES:

The Child Care Mandatory and Matching Funds are a part of the Child Care and Development Fund (CCDF) program, along with the Child Care and Development Block Grant (CCDBG) or Discretionary Funds (see CFDA 93.575). To make grants to States, Tribes, and tribal organizations for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State including systemic investments in quality child care to promote child development and learning, and to create a system that is child focused, family friendly, and fair to providers; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist States in implementing the health, safety, licensing, and registration standards established in State regulations. Current priorities include: making systemic investments in quality child care to promote child development and learning; and creating a system that is child focused, family friendly, and fair to providers.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Title IV of the Social Security Act appropriates funds (Mandatory and Matching Funds) for the purpose of providing child care assistance. Lead Agencies must use Mandatory and Matching Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG Act. Lead Agencies must ensure that not less than 70 percent of the total amount of Mandatory and Matching Funds are used to provide child care assistance to families who are receiving assistance under the Temporary Assistance for Needy Families program, families who are attempting through work activities to transition off of temporary assistance programs, and families who are at risk of becoming dependent on temporary assistance programs. Not more than five percent of the aggregate amount of CCDF Funds expended by the State (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State to carry-out all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State shall use not less than four percent of the CCDF Funds to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. Except for approved construction of child care facilities by tribal grantees, no Mandatory or Matching Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent

improvement of any building or facility (other than for minor remodeling and for upgrading of facilities to meet State and local child care standards.) No Mandatory or Matching Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction. However, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No Mandatory or Matching Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school.

Applicant Eligibility:

Eligibility: All 50 States, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and Federally recognized Tribal Governments, including Alaskan Native Corporations.

Beneficiary Eligibility:

In conjunction with the development of the CCDF plan, the Lead Agency must hold at least one public hearing no earlier than nine months before the CCDF plan becomes effective and after at least 20 days of statewide public notice, to provide the public an opportunity to comment on the provision of child care services under the plan. In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the provision of services under the program with other Federal, State, and local child care and early childhood development programs. Also, the Lead Agency must consult with appropriate representatives of local governments. Tribal Lead Agencies submitting applications for construction must submit an environmental impact assessment. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

The plan must also include: the designation of a Lead Agency; the provision of assurances regarding policies and procedures as stated in Section 658E(c)(2) of the amended CCDBG; an outline of the proposed use of block grant funds in compliance with Section 658E(c)(3) of the CCDBG; the provision of certification regarding payment rates as stated in Section 658E(c)(4) of the CCDBG; and the establishment of a sliding fee scale. Renewals:

CCDF plans must be submitted every two years.

Formula and Matching Requirements:

Statutory Formula: Title 45 CFR, Part 98.53.

Matching Requirements: Allocations of the Mandatory Funds are based on a State's Federal share of the expenditures for the now-repealed AFDC-linked child care programs (AFDC/JOBS Child Care, Transitional Child Care, and At-Risk Child Care) in 1994 or 1995, or the average of 1992 through 1994, whichever was greater. A State is not required to expend any State funds in order to receive its share of the Mandatory Funds. The remaining funds are Matching Funds and are distributed based on the number of children under age 13 in a State compared with the national total of children under age 13. To access Matching Funds, a State must obligate all of its Mandatory Funds allotted in a fiscal year and maintain 100 percent of the State's share of expenditures for the former programs in fiscal year 1994 or fiscal year 1995, whichever is greater. Matching Funds must be matched at the applicable FMAP rate, which is the Medicaid Program matching rate. Not less than one percent, but not more than two percent of the total Mandatory and Matching Funds are reserved for Tribes and tribal organizations based on the number of children living on or near tribal reservations or other appropriate area served by the tribal grantee. Tribes and tribal organizations are not required to provide matching funds. The District of Columbia is treated as a State for purposes of receiving its share of Mandatory and Matching Funds. Territories are not eligible to receive Mandatory or Matching Funds.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Grant awards are made to Lead Agencies with approved CCDF plans. If Matching Funds are requested, Mandatory Funds must be obligated by the end of the first fiscal year. There is no time limit on liquidation of Mandatory Funds and no time limit on obligation of Mandatory Funds if no Matching Funds are requested. Matching Funds must be obligated by the end of the first fiscal year and liquidated by the second fiscal year. State funds expended toward the Maintenance of Effort requirement must be both obligated and expended by the end of the first fiscal year. Mandatory and Matching Funds awarded to Tribes and tribal organizations must be obligated by the end of the second fiscal year and liquidated by the end of the third fiscal year. Method of awarding/releasing assistance: quarterly.

Reports:

As specified in 45 CFR Part 98, States must report to the Administration on Children and Families on an annual basis aggregate data on families, children in care, providers, payment methods, and consumer education. No cash reports are required. No progress reports are required. States must also submit quarterly expenditure reports. Territories are required to report estimates and expenditures for the Discretionary Fund only on a quarterly basis. One-third of the 50 States, DC, and Puerto Rico must report annually on a three-year cycle. Tribes report expenditures for the Tribal Mandatory, Discretionary, and Construction/Renovation funds. Monitoring is in accordance with 45 CFR 98.90.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

A State shall not expend an amount paid to the State under this grant except to provide to children of families any activity or service (including post-adoption services) that may be provided under Part B or E of Title IV of the Social Security Act. Amounts expended by a State in accordance with the preceding sentence shall be disregarded in determining State expenditures for purposes of Federal matching payments under Sections 423, 434, and 474 of the Social

Security Act.

Applicant Eligibility:

Applications are not required. The States, including Puerto Rico and the District of Columbia, may receive payments. The Children's Bureau shall determine the numbers of foster child adoptions, the special needs adoptions, and the older child adoption in a State on the basis of AFCARS data as reported by each State and accepted by the Children's Bureau no later than May 15 of the fiscal year subsequent to the fiscal year in which the adoptions were finalized (i.e., the "earning year").

Beneficiary Eligibility:

Beneficiaries are those children and families eligible under Title IV-B and Title IV-E of the Social Security Act, as amended.

Credentials/Documentation:

The Children's bureau shall determine the numbers of foster child adoptions, the special needs adoptions, and the older child adoptions, as well as the highest ever foster child adoption rate in a State on the basis of data reported by each State to the Adoption and Foster Care Analysis and Reporting System (AFCARS) data and accepted by the Children's Bureau no later than May 15 of the fiscal year subsequent to the fiscal year in which the adoptions were finalized (i.e., the "earning year"). OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. States are automatic applicants.

Award Procedure:

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

AFCARS reports must be received no later than May 15 of subsequent fiscal years in order to be considered for incentive payments.

Appeals:

Not Applicable.

Renewals:

Each "earning year" (fiscal years 2008 - 2012), State adoption data received through AFCARS will be considered on its own merit.

Formula and Matching Requirements:

Statutory Formula: The adoption incentive payment payable to a State for a fiscal year shall be equal to the sum of (a) \$4,000, multiplied by the number of foster child adoptions in the State during the fiscal year which exceeds the base number of foster child adoptions for the State for the fiscal year; (b) \$8,000 multiplied by the number of foster child adoptions of children age 9 or older in the State during the fiscal year in which exceeds the base number of foster child adoption of children age 9 or older for the State for the fiscal year; and (c) \$4,000, multiplied by the number of special needs adoptions of children under age nine in the State during the fiscal year which exceeds the base number of special needs adoptions of children under age 9 for the State for the fiscal year, if the state receives a bonus under (a) or (b). Awards are pro-rated if insufficient funds are available to make the full awards. In addition, if funds remain available after making the above awards, a State is eligible to earn an additional incentive award by exceeding the highest ever foster child adoption rate in the State between FY 2002 and the immediately preceding fiscal year. The incentive is calculated by multiplying the State's highest ever foster child adoption rate times the number of children in foster care on the last day of the preceding fiscal year and subtracting that number from the number of foster

child adoptions in the State in that fiscal year. That number is rounded to the nearest whole number and then multiplied by \$1,000. If a State does not qualify for an incentive payment under (a) or (b), the State may still receive an award for (c) if the State exceeds the highest ever adoption rate. There are no matching requirements for these funds.

This program has no matching requirements.

USES AND USE RESTRICTIONS:

Formula grant funds may be used by the State or local (under State supervision) child welfare agency or by the Tribal child welfare agency for FFP in foster care maintenance payments on behalf of eligible children; for administrative and training costs; and for costs related to design, implement and operate a statewide data collection system. Funds may not be used for costs of social services such as those that provide counseling or treatment to ameliorate or remedy personal problem, behaviors, or home conditions for a child, the child's family, or the child's foster family. Plan development/implementation grants to Tribes are one-time grants for projects lasting up to 24 months that are to be used to develop a plan to operate a Title IV-E program for foster care, adoption assistance and kinship guardianship as specified under section 479B of Title IV-E. FFP for foster care maintenance payments incurred by a title IV-E State agency is equal to the Federal medical assistance percentage (FMAP) rate for that State, i.e., the Federal share of payments is from 50 percent to 83 percent, depending on the State (Section 474(a)(1) and 1905(b) of the Social Security Act). FMAP rates are also temporarily enhanced by at least 6.2 percentage points through Section 5001 of Public Law 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA). For Tribes, the applicable FMAP rate is the highest of either a separate FMAP rate calculated based on the Tribe's service population or the FMAP rate for any State in which the Tribe is located. Training of agency staff and other administrative expenditures are matched at 75 and 50 percent Federal share, respectively (Sec. 474(a) of the Social Security Act). Short term training provided to specified professional partners is subject to a special FFP rate that varies by fiscal year (55% FFP in FY 2009; 60% for FY 2010, 65% for FY 2011). Plan Development/Implementation grants are available up to a maximum of \$300,000.

Matching Requirements: Formula Grants: The non-Federal share of program costs (difference between total cost and FFP) in each funding category constitutes the required match to be met by the title IV-E agency. Matching funds from State agencies must be appropriated monies raised from non-Federal revenue sources. Matching funds from Tribal agencies must also be appropriated monies, but may at the option of the Tribe include Federal funds specifically authorized by Federal statutes to be used as match for other Federal programs and, for a specified portion of administration and training costs only, in-kind expenditures (or contributions) from specified third party sources.

Assurances include provisions or procedures on reporting child abuse and neglect; the intake, assessment, screening, and investigation of reports of abuse and neglect; an appeals process; policies and procedures (including appropriate referrals to child protection service systems and for other appropriate services) to address the needs of substance exposed newborns; provisions for immunity for individuals making good faith reports; confidentiality of all records to protect the rights of the child and of the child's parents or guardians; disclosure provisions including those which allow for public disclosure of the findings or information about the case of child abuse or neglect which has resulted in a child fatality or near fatality; procedures to promptly expunge unsubstantiated records; provisions for appointment of a guardian ad litem or CASA to represent the child in judicial proceedings; expedited termination of parental rights in the case of any infant determined to be abandoned under State law; provisions and procedures for improving the training, retention, and supervision of caseworkers; processes for referral of a child under the age of 3 who is involved in a substantiated case of child abuse or neglect to early intervention services funded under part C of the Individuals with Disabilities Education Act; provisions for requiring criminal background checks for prospective foster and adoptive parents and other adult relatives and non-relatives residing in the household; procedures for responding to medical neglect; prevention efforts, caseworker training, community education, and the establishment of Citizen Review Panels. 93.710 ARRA - COMMUNITY SERVICES BLOCK GRANT

CSBG, Recovery Act.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5; Community Services Block Grant Act (CSBG Act), as amended by the Community Opportunities, Accountability, Training, and Educational Services Act of 1998, Public Law 105-285.

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well-being of children, youth,

families and communities. Objectives are to provide assistance to States and local communities, working through a network of community action agencies and other neighborhood-based organizations, for the reduction of poverty, revitalization of low-income communities, and empowerment of low-income families and individuals in rural and urban areas to become fully self-sufficient (particularly families who are attempting to transition off a State program carried out under part A of Title IV of the Social Security Act). Additional objectives are (1) to provide services and activities having a measurable and potential major impact on causes of poverty in the community or those areas of the community where poverty is a particularly acute problem; (2) to provide activities designed to assist low-income participants, including the elderly poor, to: (a) secure and retain meaningful employment; (b) attain an adequate education; (c) make better use of available income; (d) obtain and maintain adequate housing and a suitable living environment; (e) obtain emergency assistance through loans or grants to meet immediate and urgent individual and family needs, including health services, nutritious food, housing, and employment-related assistance; (f) remove obstacles and solve problems which block the achievement of self-sufficiency; (g) achieve greater participation in the affairs of the community; and (h) make more effective use of other related programs; (3) to provide on an emergency basis for the provision of such supplies and services, nutritious food, and related services, as may be necessary to counteract conditions of starvation and malnutrition among the poor; and (4) to coordinate and establish linkages between governmental and other social services programs to assure the effective delivery of such services to low-income individuals.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Uses and restrictions for CSBG Recovery Act funds differ from the uses and restrictions that apply to allotments to States from regular CSBG annual appropriations with regard to use and percentage of funds retained by the States. As with regular CSBG grants, States receive CSBG Recovery Act funds to ameliorate the causes of poverty in communities. The block grant approach gives the States flexibility to tailor their programs to the particular services needs in their communities. States are required to pass through 99 percent of their Recovery Act allocations for grants to eligible entities, as defined in the CSBG Act and use the remaining one percent of funds for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families. See Above.

Applicant Eligibility:

The Secretary is authorized to make grants to States. This includes each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Island, American Samoa, and the Commonwealth of the Northern Mariana Islands. The Secretary also provides assistance directly to the governing body of an Indian Tribe or Tribal organization upon application by the tribe. Only State-recognized tribes, as evidenced by a statement to that effect by the Governor, or tribes formally recognized by the Secretary of the Interior, under the procedure for such recognition in 25 CFR 54, are eligible to receive direct grants.

Beneficiary Eligibility:

States make grants to qualified locally-based nonprofit community anti-poverty agencies and other eligible entities which provide services to low-income individuals and families. The official poverty line, as established by the Secretary of Health and Human Services, is used as a criterion of eligibility in the Community Services Block Grant program. When a State determines that it serves the objectives of the block grant, it may revise the income limit, not to exceed 200 percent of the official poverty line.

Credentials/Documentation:

No Credentials or documentation are required. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Under the regularly-funded CSBG Program, each State desiring to receive an allotment for a fiscal year is required to submit an application to the Secretary of HHS. For Recovery Act funds, States will receive a separate allotment of funds based on the statutory formula. Within 30 days of receiving new grant allotments, each State must submit an application amendment outlining the intended use of Recovery Act funds, to include how the State will carry out the assurances in Section 676(b) of the CSBG Act. The application amendment must be a separate document from the original application and must contain assurances by the Chief Executive Officer of the State that the State will comply with the allowable uses of funds under Section 675C of the CSBG Act, with modifications to allowable uses specified in the Recovery Act. The application amendment must set forth the general purposes for which funds will be used, including a description of the State intended use for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families in Federal, State, and local benefit programs. The State also must describe how it will incorporate monitoring of Recovery Act funds into its regular monitoring of CSBG eligible entities. This includes descriptions of how the State will monitor restrictions on administrative expenses, eligible recipients, board requirements for community action agencies and other nonprofit organizations, fiscal control, monitoring, and Federal investigation provisions, coordination between antipoverty programs in each community and certain prohibitions on political activities. States also must include a description of how they plan to track CSBG funds from ARRA separately from CSBG funds provided through the regular FY 2009 and 2010 appropriations process. In addition, States must indicate how they plan to evaluate the effectiveness of ARRA CSBG funds, including tracking the number of jobs created. This program is excluded from coverage under 45 CFR Part 1050.

Award Procedure:

HHS determines the amount of funds to be allocated as block grants to each State in accordance with the formula set forth in the CSBG Act. The Office of Management and Budget (OMB) has the authority to apportion to HHS through the course of a year the Congressional appropriation for block grants. Consistent with OMB's apportionment of funds, HHS will assign allotments to the States through individual awards or a series of awards.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

Funds may be withheld from any State which does not utilize its allotment substantially in accordance with the provisions of the CSBG Act, the American Recovery and Reinvestment Act, and the assurances provided in its application. This may be done only after adequate notice and an opportunity for a hearing conducted within the affected State.

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory Formula: Title 45, Chapter 96.71, Part 96, Subpart G, Public Law 97-35. States are required to pass through 99 percent of their Recovery Act allocations for grants to eligible entities, as defined in the CSBG Act and use the remaining one percent of funds for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families.

This program has no matching requirements. This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Formula grant awards will be made in FY 2009. Grant funds allotted to the State will be awarded in accordance with apportionment of funds from OMB. Amounts unobligated by the State at the end of a fiscal year remain available for obligation during the succeeding fiscal year. See the following for

information on how assistance is awarded/released: Formula grant awards will be made in FY 2009.

Reports:

Funded grantees must submit quarterly reports required by Section 1512 of the Recovery Act. Cash reports are not applicable. Progress reports are not applicable. Expenditure reports are not applicable. Performance monitoring is not applicable.

Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. States must conduct financial and compliance audits of block grant funds annually in accordance with Section 678D of the CSBG Act.

Records:

States are required to keep records sufficient to permit preparation of the required reports and to permit tracking of funds to a level of expenditure adequate to ensure that funds have not been spent unlawfully.

93.711 ARRA STRENGTHENING COMMUNITIES FUND

SCF, Recovery Act.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5.

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well-being of children, youth, families, and communities.

The objectives of the Strengthening Communities Fund (SCF) are to (1) fund entities to provide training, technical assistance, and financial assistance to local faith-based and community organizations enabling them to more fully participate in economic recovery and (2) build the capacity of State, Local, and Tribal governments to provide outreach to faith-based and community-based organizations. The funding is used to build capacity of government and nonprofit organizations to partner with local faith-based and community-based organizations, with a focus on expanding economic recovery efforts, increasing community access to public benefits (including ARRA benefits), and helping low- and moderate-income people secure and retain employment.

SCF is composed of two programs:

(1) SCF Nonprofit Capacity Building Program

The focus of the SCF Nonprofit Capacity Building Program is to fund organizations that provide training, technical assistance, and competitive financial assistance to faith-based and community-based nonprofit organizations to help them address the broad economic recovery issues present in their communities, including helping low-income individuals secure and retain employment, earn higher wages, obtain better-quality jobs, and increase access to State and Federal benefits and tax credits.

(2) SFC Government Capacity Building Program

The focus of the SCF State, Local, and Tribal Government Capacity Building Program is to build the sustainability and effectiveness of the government entities that provide outreach to faith-based and community-based organizations. Ultimately, these partnerships will enable local nonprofit organizations to better serve those in need and to increase nonprofit organizations' involvement in the economic recovery. Government entities or their designees will use program funds to develop their capacity to serve as a resource to nonprofit organizations and other government agencies regarding ARRA funding/benefits to ensure that disadvantaged and hard-to-serve populations are aware of and understand how to access the benefits and services described in the ARRA. Grantees also will use program funds to offer free capacity building services to nonprofit organizations to improve awareness of and access to ARRA efforts/benefits, improve nonprofits organizational capacities to be active participants in ARRA efforts, and facilitate partnerships between and among nonprofits and other government agencies. For example, grantees could establish a beneficiary benefits clearinghouse for individuals and a funding opportunities clearinghouse for nonprofit organizations, provide outreach and education, and deliver training and technical assistance.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Under the SCF Nonprofit Capacity Building Program, lead organizations assist nonprofit project partners in distressed communities with capacity building activities in four critical areas: (1) organizational development, (2) program development, (3) collaboration and community engagement (4) leadership development and (5) evaluating their effectiveness. Capacity building activities are designed to increase an organization's sustainability and effectiveness, enhance its ability to provide social services, and create collaborations to better serve those in need. Lead organizations use the award funds to provide two services within their communities: (1) training and technical assistance to nonprofit organizations; and (2) competitive financial assistance to some subset of the nonprofit organizations receiving training and technical assistance. Training and technical assistance activities are conducted at no cost to interested nonprofit organizations. Each organization will also provide subawards to local non-profits to help these organizations build the capacity to expand and strengthen programs and services related to helping low-income individuals secure and retain employment, earn higher wages, and obtain better-quality jobs. Examples of these capacity building activities include staff training, technical assistance, and materials and equipment to enhance

efficiency or enable the ability to provide a new service. Funds also help organizations build capacity to expand and strengthen programs aimed at increasing low- and moderate-income individuals access to the state and Federal benefits and tax credits for which individuals are eligible. Examples include developing organizational capacity to offer a counselor-assisted centralized electronic screening and application tool, establishing procedures to assess eligibility of prospective and current clients for benefits and tax credits, developing referral protocols with other local service providers, developing a guide/clearinghouse of benefits and tax credits, and developing the capacity to offer free tax preparation assistance.

Under the SCF State, Local, and Tribal Government Capacity Building Program, funds are awarded to State, city, county and tribal government offices (e.g., offices responsible for outreach to faith-based and community organizations or those offices interested in initiating such an effort) or their designees for the purpose of building the sustainability and effectiveness of the government entities, other government agencies and ultimately local nonprofits to better serve those in need. Specifically, funds are used to build the capacity of organizations that are contributing to the economic recovery and help Federal, State, and local governments ensure that the information and services described in the ARRA reach disadvantaged and hard-to-serve populations. Grantees use program funds to provide free capacity building services to nonprofit organizations, such as developing a funding opportunities clearinghouse and/or training and technical assistance to improve access to ARRA funding/benefits and to improve organizational capacity to be competitive applicants for ARRA funding/benefits. Grantees also will use program funds to build their own capacity to provide these services to nonprofits. Priority for awards will be given to State and Indian/Native American Tribal governments and such governments designees. Grantees must also use funds to measure their own effectiveness and help non-profit organizations develop ways to measure their effectiveness. Costs of organized fund raising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are unallowable under this program. Awards will not allow reimbursement of pre-award costs. Construction is not an allowable activity or expenditure under this program. Purchase of real property is not an allowable activity or expenditure under this program. The SCF grantees and project partners (including subawardees) may not use funds for direct social service provisions. Funds are intended to help grantees and their partners build and strengthen their capacity to provide services. The cost of the augmentation or supplanting of direct services is unallowable. Direct Federal grants, financial assistance funds, or contracts under the Department of Health and Human Services shall not be used to support inherently religious activities such as religious instruction, worship, or proselytization. Organizations that receive HHS funds may not engage in inherently religious activities, such as worship, religious instruction, or proselytization, as part of the programs or services funded with HHS funds. An organization receiving a SCF award shall not, in providing Federally-funded services, discriminate against a program beneficiary or prospective program beneficiary on the basis of religion or religious belief. SCF program funding may not pay for capacity building activities that support medical and/or health care related activities or items such as medical equipment or supplies or medically-oriented trainings, certifications, or licensures. SCF Nonprofit Capacity Building Program lead organizations may not provide competitive financial assistance to a health care organization. A grantee is not to use award funds to provide a contract to organizations that provide the grantee with a cost share match..

93.713 ARRA CHILD CARE AND DEVELOPMENT BLOCK GRANT

Child Care and Development Block Grant (CCDBG), Recovery Act Funds.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5, 42 U.S.C 9858; Child Care and Development Block Grant Act of 1990, Public

Law 101-508, 42 U.S.C 9858.

OBJECTIVES:

The ARRA - CCDBG is a part of the Child Care and Development Fund (CCDF) program, along with Child Care Discretionary Funds (CFDA number 93.575) the Child Care Mandatory and Matching Funds (CFDA number 93.596). This supplemental FY 2009 CCDBG funding was appropriated under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5). This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well being of children, youth, families, and communities. Objectives under the CCDBG Act are: To make grants to States, Territories, Tribes, and tribal organizations for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist States in implementing the health, safety, licensing, and registration standards established in State regulations.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Congress directs that Recovery Act funds appropriated for the CCDBG must be used to supplement, not supplant, State general revenue funds for child care assistance for low-income families. Lead Agencies must use CCDBG Recovery Act Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG Act. Not more than 5 percent of the aggregate amount of CCDF Funds, including CCDBG Recovery Act Funds, expended by the State or Territory (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State or Territory to carryout all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State or Territory shall use not less than 4 percent of the aggregate CCDF Funds, including CCDBG Recovery Act Funds, to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. In addition to the minimum four percent quality expenditures, \$255,186,000 of the CCDBG Recovery Act Funds shall be reserved by the States for quality improvement activities, of which \$93,587,000 shall be for activities that improve the quality of infant and toddler care. Except for approved construction of child care facilities by Tribal Grantees, no CCDBG Recovery Act Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading facilities to meet State and local child care standards). No CCDBG Recovery Act Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction; however, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No CCDBG Recovery Act Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school. Lead Agencies shall assure that a substantial portion of the total CCDBG (CCDF Discretionary) Funds will be used to provide assistance to low-income working families who are not receiving assistance under the Temporary Assistance for Needy Families program, attempting through work activities to transition off of temporary assistance programs, nor at risk of becoming dependent on temporary assistance programs.

A decision on the approval of the amendment will be made by ACF within 90 days from the date the amendment is received. (An extension of the time period may be made by a written agreement.)

To receive funds under the CCDBG Act, a Lead Agency desiring to receive an allotment for a fiscal year is required to submit a two-year CCDF plan to ACF, as well as, financial and other information necessary for the grants process. Each plan must contain certifications and assurances by the Lead Agency that it will comply with the requirements of the CCDBG Act. 93.714 ARRA EMERGENCY CONTINGENCY FUND FOR TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) STATE PROGRAM

TANF Emergency Fund, Recovery Act

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

TANF Emergency Fund, Recovery Act, Title IV, Part A, Section 2101, Public Law 111-5, 42 U.S.C 603(c).

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well being of children, youth, families, and communities. The objective of the program is to provide up to \$5 billion for jurisdictions (States, Territories, and Tribes) in fiscal year (FY) 2009 and FY 2010 that have an increase in assistance caseloads and/or certain types of expenditures. This Emergency Fund is in addition to the TANF Contingency Fund in section 403(b) of the Act that currently gives money to qualifying States (but not Territories or Tribes) during an economic downturn.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Emergency Fund grants are Federal TANF funds. Jurisdictions must use these funds in accordance with section 404 of the Act. This does not include authority to transfer emergency funds to either the Social Services Block Grant (SSBG) or the Child Care and Development Block Grant (CCDBG) because that transfer authority is limited to grants made under section 403(a) of the Act. Emergency funds are available until expended.

Jurisdictions may carry over emergency funds for use in a succeeding fiscal year as authorized under section 404(e) of the Act. Section 403(c)(5) of the Act

imposes a cumulative cap on the amount of emergency funding that a jurisdiction can receive for the two-year period. The capped amount consists of the cumulative combined grants from the existing Contingency Fund (section 403(b)) and the Emergency Fund (section 403(c)) and the total of the two cannot exceed 50 percent of the jurisdictions annual Federal TANF family assistance grant.

The same financial and programmatic rules pertaining to the appropriate use of the jurisdictions Federal TANF block grant funds also apply when using the emergency funds. This also means that all TANF requirements, including work participation requirements and time limits, apply to families receiving assistance with emergency funds exactly as they do to families receiving other Federal TANF-funded assistance. See above.

Recovery Act Comparative Effectiveness Research - AHRQ

FEDERAL AGENCY:

Agency for Healthcare Research and Quality, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Title 8, Public Law 111-5; Social Security Act, Title XI, Part A, Public Law 74-271, 42 U.S.C 1301-1320; Medicare Prescription Drug, Improvement, and Modernization Act of 2003, Title IX, Section 1013, Public Law 108-173, 42 U.S.C 1305; Public Health Service Act, Title IX, 42 U.S.C 299 et seq.

OBJECTIVES:

To improve health outcomes by providing evidence to enhance medical decisions made by patients and their medical providers. This goal is pursued by

generating research comparing different interventions and strategies to prevent, diagnose, treat and monitor health conditions. Funds are available under the American Recovery and Reinvestment Act of 2009 to support research and evaluations, demonstration projects, research networks and multidisciplinary centers, predoctoral and postdoctoral training opportunities, individual fellowships, and to disseminate rigorous evaluations of the impact of different options that are available for treating a given medical condition for a particular set of patients.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

The research will contribute to the health services and clinical knowledge base in comparative effectiveness of different treatment and practices from which empirically based information can be derived by patients, providers, policymakers, and other stakeholders, both immediately and over the coming decades. Grant funds will be available in FYs 2009 and 2010 for costs necessary to carry out an approved project. Unallowable costs, as well as those for which prior written approval is required, are indicated in the HHS Grants Policy Statement. Grantees must comply with all Recovery Act reporting requirements. It is anticipated that 66.2% of the \$300,000,000 in Recovery Act funds provided to AHRQ for CER research will be awarded for discretionary grants.

Applicant Eligibility:

AHRQ anticipates that award recipients will include a combination of academic institutions, States, federally-recognized Indian Tribal Governments, community-based organizations, private or non-profit national organizations, and Federal agencies.

Beneficiary Eligibility:

Funds will be spent to research and provide information on the relative strengths and weaknesses of various medical interventions. Such research will give clinicians and patients valid information with which to make decisions that will improve the performance of the U.S. health care system.

Credentials/Documentation:

Nonprofit organizations must submit proof of their nonprofit status when applying for grants. Costs will be determined in accordance with HHS Regulations 45 CFR 74 or 45 CFR 92 as appropriate. OMB Circular No. A-87 applies to this program.

All FOAs are posted on www.Grants.gov. Refer to the FOA of interest for specific requirements regarding application procedures as AHRQ is in the process of transitioning to the new SF-424 Research and Related (R&R) grant application form and to electronic submission through www.Grants.gov for competing awards. For FOAs involving grant mechanisms that have not yet been transitioned to electronic submission through [Grants.gov](http://www.Grants.gov), nongovernmental applicants should submit using Form PHS-398 (Rev. November 2007); <http://grants.nih.gov/grants/funding/phs398/phs398.html>; State and local governments may submit using the standard application forms, as furnished by PHS and required by 45 CFR 92. For State agencies, no State Plan is required. Applications are reviewed and evaluated by a group composed of primarily nonfederal scientists. The review is conducted by a panel of experts in the specific study area proposed. This program is subject to the provisions of 45 CFR 92 for State and local governments and OMB Circular A-110 for non-profit organizations.

Award Procedure:

Following review for scientific merit by a group composed primarily of nonfederal scientists, grant applications may be reviewed by the National Advisory Council for Healthcare Research and Quality, after which AHRQ makes final decisions to support recommended applications. When such

decisions are made, applicants are notified directly by AHRQ staff and all required steps are taken to issue the Notice of Award.

93.716 ARRA TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) SUPPLEMENTAL GRANTS

Supplemental Grants for Population Increases in Certain States, Recovery Act

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Supplemental Grants for Population Increases in Certain States, Recovery Act, Title IV, Part A, Section 2102, Public Law 111-5, 42 U.S.C 603(a)(3).

OBJECTIVES:

These funds will help promote the economic and social well being of children, youth, families, and communities. The objective of the program is to provide supplemental TANF funds for States with exceptionally high population growth in the early 1990s, historic (1994) welfare grants per poor person lower than 35 percent of the national average, or a combination of above average population growth and below average historic welfare grants per poor person.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Federal TANF Supplemental Grants are in addition to the States annual Federal TANF block fund. Thus, these funds are subject to the same uses and restrictions as the States annual Federal TANF block grant (see CFDA 93.558 Temporary Assistance for Needy Families), and repeated below.

Each State designs and operates its own TANF program, and establishes the specific eligibility criteria that must be met to receive financial assistance payments or other types of benefits and services. Each State has broad flexibility to use the grant funds in any manner that is reasonably calculated to accomplish a purpose of the TANF program (including providing low-income households with assistance in meeting home heating and cooling costs). The purposes of the TANF program are to assist needy families to care for their children in their own homes; reduce dependency of needy parents by promoting job preparation, work and marriage; prevent and reduce the incidence of out-of-wedlock pregnancies; and encourage the formation and maintenance of two-parent families. A State may also use the funds in ways that had been authorized and allowable under its former approved Aid to Families with Dependent Children (AFDC), Job Opportunities and Basic Skills Training (JOBS), and Emergency Assistance (EA) plans. A State may also transfer a limited portion of its Federal TANF funds to the Child Care and Development Block Grant (CCDBG) and Social Services Block Grant (SSBG) Programs. No State may spend more than 15 percent of its Federal TANF funds on administrative costs, exclusive of certain computerization and information

technology expenses. See above.

Applicant Eligibility:

None.

Beneficiary Eligibility:

None.

Credentials/Documentation:

Federal funds go to the State (the grantee). States decide the objective eligibility criteria and verification required to determine eligibility and payment of TANF benefits. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110.

Award Procedure:

Supplemental Grants, like the annual Federal TANF block grant, are awarded in quarterly payments.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Varies by State (usually within 45 days).

Appeals:

States must provide opportunities for recipients who have been adversely affected to be heard in a State administrative or appeal process.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Percent: 75%. The TANF program, which includes the standard TANF block grant and the additional Supplemental Grants for 17 States, has an annual cost-sharing requirement known as maintenance-of-effort (MOE). This means that every fiscal year, each State receiving Federal TANF funds must spend an applicable percentage of its own money to help eligible families in ways that are consistent with the purposes of the TANF program. The applicable percentage depends on whether the State meets the minimum work participation rate requirements for that fiscal year. If the State does not meet the work participation rates, then it must spend 80 percent of the amount it spent for fiscal year 1994 on AFDC and AFDC-related programs. If the State meets the work participation rates, then the applicable percentage is 75 percent of the amount it spent for fiscal year 1994 on AFDC and AFDC-related programs.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

States are awarded Supplemental Grants in quarterly payments. Once awarded, the funds are available to the State until expended. See the following for information on how assistance is awarded/released: No information provided.

Reports:

States receiving the TANF block grant and Supplemental Grants must submit quarterly data reports on families receiving assistance. States must also report expenditures of grant funds on a quarterly basis. Expenditure data related to Supplemental Grants will be reported in a separate category on the quarterly TANF expenditure report for FY 2010. Cash reports are not applicable.

Progress reports are not applicable. Expenditure reports are not applicable.

Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit

conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. The TANF program (including the additional TANF supplemental grants) is subject to the Single Audit Act under Chapter 75 of Title 31, United States Code.

Records:

States are subject to the uniform administrative requirements in 45 CFR Part 92. In particular, the regulations at 45 CFR 92.20 require that all grantees have a financial management system that can adequately trace expenditures to ensure that the funds have been used appropriately, and not in violation of any programmatic restrictions and prohibitions; and require that accounting records are supported by source documentation to support all expenditures. Also, the regulations at 45 CFR 92.42 and TANF Program Instruction TANF-ACF-PI-2003-1, dated January 28, 2003 (<http://www.acf.hhs.gov/programs/ofa/policy/pi-ofa/2003/pi2003-1.PDF>), address record retention and access requirements applicable to all financial and programmatic records, supporting documents, statistical records, and other records of grantees or subgrantees.

93.722 ARRA - IHS TRIBAL AGREEMENTS

ARRA IHS Tribal Agreements

FEDERAL AGENCY:

Indian Health Service, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (ARRA), Public Law 111-5; Indian Self-Determination and Education Assistance Act, Title 1, Section 102, Public Law 93-638, Title 1, Section 102, Public Law 93-638.

OBJECTIVES:

\$500 Million in Recovery Act Funds to Improve Health Care and Boost Economy in Indian Country. These funds will be obligated both through tribal agreements and under contracts subject to the Federal Acquisition Regulation, as summarized in the Agency implementation plans.

The Recovery Act health facility construction funds will be used to complete the construction of the new IHS Eagle Butte Health Center in Eagle Butte, South Dakota and the Norton Sound Regional Hospital in Nome, Alaska. The Eagle Butte Health Center will serve approximately 9,300 American Indians residing on the Cheyenne River Reservation. The facility will replace the existing Eagle Butte IHS Hospital which, at approximately one-third the size of

the new facility, is stressed to meet the needs of the entire service population. The new Norton Sound facility replaces a 61-year-old hospital that is stretched to serve an estimated 10,000 users. The project will create a substantial number of new jobs in construction, transportation, and other professions and help fight unemployment in Nome.

Sanitation facilities funds will be used to complete 169 sanitation facilities projects constructed in 24 states. These projects will provide potable water, waste water disposal and solid waste systems to American Indian and Alaska Native homes and communities. An estimated 16,000 homes will be served by these projects, which will also help foster economic growth and create jobs.

The ARRA will also fund 302 maintenance and improvement projects. Many IHS and tribal facilities require structural renovations, additional space, and design updates to accommodate modern health care delivery practices. These projects will help maintain and improve facilities, which will improve patient care. These projects will also result in enhanced energy conservation and provide local jobs and economic stimulus.

Finally, Recovery Act funds will be used to purchase over 200 pieces of medical equipment, including 35 ambulances and 10 Computed Tomography (CT) scanners, all of which will contribute substantially to patient care. Other equipment to be purchased includes cardiac monitoring equipment, equipment for integration of electronic patient records, blood chemistry analyzers, dental equipment, emergency defibrillators, x-ray systems, among other items. The equipment will be distributed across 24 states.

93.725 ARRA - COMMUNITIES PUTTING PREVENTION TO WORK: CHRONIC DISEASE SELF-MANAGEMENT PROGRAM

CDSMP

FEDERAL AGENCY:

Administration on Aging, Department of Health and Human Services

AUTHORIZATION:

The statutory authority for cooperative agreements under this program announcement is contained in Division A, Title VIII of the American Recovery and Reinvestment Act (Recovery Act) of 2009 (Public Law 111.5). , Title VIII, Public Law 111-5.

OBJECTIVES:

The American Recovery and Reinvestment Act of 2009 (Recovery Act), signed into law February 17, 2009, is designed to stimulate economic recovery in various ways: to preserve and create jobs; to promote economic recovery; to assist those most impacted by the recession, to stabilize state, territorial and local government budgets to minimize and avoid reductions in essential services and counterproductive state, territorial, and local tax increases; to strengthen the Nations healthcare infrastructure; and to reduce healthcare costs through prevention activities. The Recovery Act includes \$650 million for evidence-based clinical and community-based prevention and wellness strategies that deliver specific, measurable health outcomes. The legislation provides an important opportunity for communities, States, territories, cities, rural areas, and tribes to advance public health across the lifespan and to eliminate health disparities. Of the \$650 million appropriated for this initiative (Communities Putting Prevention to Work), \$32.5 million will support States and territories in promoting wellness by deploying evidence-based chronic disease self-management programs targeted at older adults with chronic conditions. AoA, in collaboration with CDC, is providing Recovery Act funding under this announcement to support state efforts to deploy evidence-based chronic disease self-management (CDSMP) programs that empower older people with chronic diseases to maintain and improve their health status. The community-based collaborative networks setup through these efforts will provide the foundation for an infrastructure and statewide distribution system that States can use for delivering CDSMP and other evidence-based prevention programs to older adults. These statewide distribution systems will include a quality assurance component to ensure the evidence-based prevention programs are being delivered with fidelity and achieving results comparable to those produced in the original research. The ultimate goal is to have States and communities embed these structures into their statewide systems that provide community-based services and supports to older adults to help them maintain their health and independence in the

community.

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

In general, the use of these funds is to support state efforts to deploy evidence-based chronic disease self-management (CDSMP) programs that empower older people with chronic diseases to maintain and improve their health status. In using funds for this award for infrastructure investment, recipients shall give preference to activities that can be started and completed expeditiously, including a goal of using at least 50 percent of the funds for activities that can be initiated not later than 120 days after the date of the enactment of Recovery Act. Recipients shall also use grant funds in a manner that maximizes job creation and economic benefit (Recovery Act Sec. 1602). The following activities are not fundable: construction and/or major rehabilitation of buildings; basic research (e.g. scientific or medical experiments); and, continuation of existing projects without expansion. Furthermore, none of the funds appropriated or otherwise made available in the Recovery Act may be used by any State or local government, or any private entity, for any casino or other gambling establishment, aquarium, zoo, golf course, or swimming pool. FEDERAL AGENCY:

Office of the Secretary, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act (ARRA), Public Law 111-5; Public Health Services Act, Title 42, Section 301.

OBJECTIVES:

Comparative effectiveness research is the conduct and synthesis of research comparing the benefits and harms of different interventions and strategies to prevent, diagnose, treat and monitor health conditions in real world settings. The purpose of this research is to improve health outcomes by developing and disseminating evidence-based information to patients, clinicians, and other decision-makers, responding to their expressed needs, about which interventions are most effective for which patients under specific circumstances.

The purpose of this program is to develop and test strategies to improve the dissemination of CER information and the resultant translation of this evidence into practice in the non-profit and private sector. Doing so effectively would demonstrate a return on the CER investment, and, more importantly, improve the health of the patients served by a given organization. 93.728 ARRA - STRATEGIC HEALTH IT ADVANCED RESEARCH PROJECTS (SHARP)

SHARP

FEDERAL AGENCY:

Office of the Secretary, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (Public Law 111-5) (Recovery Act), Title XIII, Part A, Section 3011.

OBJECTIVES:

To competitively-awarded cooperative agreements to establish Strategic Health IT Advanced Research Projects (SHARP). The awardees will conduct research focusing on where breakthrough advances are needed to address well-documented problems that have impeded adoption of health IT and to accelerate progress towards achieving nationwide meaningful use of health IT in support of a high-performing, learning health care system.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

ONC expects to award four cooperative agreements to support establishment of Strategic Health IT Advanced Research Projects (SHARP) sites for a project period of four years. Each such research site will have a two-part mission:

- (1) to implement a collaborative, interdisciplinary program of research addressing a specific focus area from the list provided below, addressing short-term as well as long-term challenges; and
- (2) to develop and implement a cooperative program between researchers, patient groups, health care providers, and other health IT sector stakeholders to transition the results of research into practice.

Each site will focus on areas where breakthrough improvements are needed to address well-documented problems that have impeded adoption of health IT and thereby accelerate progress on the pathway towards achieving the goals outlined in the strategic plan for health IT developed by the National Coordinator pursuant to PHSA Section 3001(c)(3) as added by the Recovery Act, specifically including the nationwide achievement of meaningful use of health IT to achieve transformational improvement of the health care system.

Each site will implement a collaborative, inter-disciplinary research program addressing one of the specific focus area(s) listed below. An eligible entity may, apply for funding in separate applications to establish more than one site, and thus it is possible a single eligible entity (institution) may receive more than one award under this program. Regardless of the total number of institutions funded to establish sites under this program, it is expected that the all of the awardees will collaborate with each other, as there will be numerous points of intersection among the sites' agendas.

Within its focus (listed below) area, each site will carry out at least the following set of activities:

Initially define and subsequently update or redefine on a yearly basis, the key issues and research challenges within their respective area(s) of focus. The research areas identified will be those that significantly address barriers and solutions to achieving widespread adoption and meaningful use of health IT. Projects to address the identified issues will be mapped to either a short-term (< 2 years) or long-term (4 years) timeframe. Because this is a cooperative agreement, recipients shall plan and allow for collaboration with ONC and other federal staff with relevant expertise as identified or approved by ONC in establishing and updating the definition of key issues and research challenges in the sites focus area;

Conduct ambitious research addressing these key issues and challenges. This work will draw on the scientific methods and expertise of researchers and practitioners in diverse fields;

Collect specific, uniform data about the research activities and track progress toward milestones;

Facilitate practical and efficient processes that enable translation of research into health care and public health innovations, facilitating the transition of multidisciplinary research outcomes into new healthcare products and services both the short- and long-term;

Partner with industry to rapidly transfer short term results of this research into health IT products;

Publish and otherwise disseminate these research findings, preferably in open source journals that maximize the accessibility of this knowledge to the entire health IT community

Participate in an external evaluation; and

Select desired, measurable outcomes specific to the chosen research issue and methods for attaining results.

Research focus areas

In no particular order, the four foci for research identified below will be addressed by this program. The areas have been assigned numbers for ease of reference. Appendix B provides further detail about each of these areas.

1. Security of Health Information Technology This research area addresses the challenges of developing security and risk mitigation policies and the technologies necessary to build and preserve the public trust as health IT systems become ubiquitous.

This research area is responsive to paragraphs (1), (4), (5), and (6) of the PHSA 3011(a), as added by the Recovery Act, through the following activities:

Promoting the development and implementation of health information technology solutions that will support the electronic exchange and use of health information in a secure, private manner;

Promoting the development and implementation of technologies and best practices that enhance the protection of health information by all holders of individually identifiable health information;

Enhancing the capabilities and functionalities of tools to support privacy and security of individually identifiable health information as it is exchanged and used; and,

Supporting and enhancing the assurance of privacy needed providers and patients widespread acceptance of telemedicine and robust participation in

clinical data repositories and registries.

2. Patient-Centered Cognitive Support This research area addresses the challenge of harnessing the power of health IT so that it integrates with, enhances and supports clinicians reasoning and decision making, rather than forcing them into a mode of thinking that is natural to machines but not to people.

PHSA 3011(a), as added by the Recovery Act, directs the support of health IT architecture that will support the use of health information in an accurate manner. Additionally, paragraphs (3) and (5) of the same subsection of the statute authorize use of funding appropriated under PHSA Section 3018, as added by the Recovery Act, to disseminate training and information on best practices to integrate health IT into a providers delivery of care, and to promote the use of clinical data repositories and registries. All of these paragraphs ((1), (3), and (5) of PHSA 3011(a) as added by the Recovery Act) point to longstanding challenges that require new and creative research related to the accurate and effective use of electronic health information to enhance the safety, quality, efficacy, and thus the overall value of care.

3. Healthcare Application and Network Platform Architectures This research area focuses on the development of architectures that are necessary to achieve electronic exchange and use of health information in a secure, private and accurate manner.

PHSA 3011(a)(1), as added by the Recovery Act, authorizes support of health IT architecture that will support the nationwide electronic exchange and use of health information in a secure, private, and accurate manner. This research focus specifically supports the development of new and improved architectures and technology infrastructure needed to achieve the goals outlined in the plan for health IT by the National Coordinator in support of PHSA 3001(c)(3), as added by the Recovery Act, and to support measures for determination of meaningful use of health IT by providers over time (required by Social Security Act (SSA) Sections 1848(o) and 1866(n), as added by Title IV in Division B of the Recovery Act).

4. Secondary Use of EHR Data This research area focuses on strategies to enhance the use of health IT in improving the overall quality of health care.

PHSA 3011(a), as added by the Recovery Act, states that the Secretary shall invest in the infrastructure necessary to allow for and promote the electronic exchange and use of health information for each individual in the United States consistent with the goals outlined in the strategic plan developed by the National Coordinator. PHSA 3001(c)(3), as added by the Recovery Act, directs that the National Coordinator shall, in consultation with other appropriate Federal agencies (including the National Institute of Standards and Technology), update the Federal Health IT Strategic Plan (developed as of June 3, 2008) to include specific objectives, milestones, and metrics with respect to a specific set of topic areas. The current Federal Health IT Strategic Plan (developed as of June 3, 2008), as referenced in the statute, advances secondary use as a key mode of information technology use to transform health care. This is consistent with, and will be updated and expanded upon pursuant to the direction of PHSA 3001(c)(3)(i), (vii) and (vii), as added by the Recovery Act, to add to the updated strategic plan such objectives, milestones, and metrics with respect to:

(Reference: PHSA 3001(c)(3)(i)) the electronic exchange and use of health information and the enterprise integration of such information.

(Reference: PHSA 3001(c)(3)(vii)) strategies to enhance the use of health IT in improving the quality of health care, reducing medical errors, reducing health disparities improving public health, increasing prevention and coordination with community resources, and improving the continuity of care among health care settings.

(Reference: PHSA 3001(c)(3)(viii)) the specific plans for ensuring that populations with unique needs, such as children, are appropriately addressed in the technology design, as appropriate.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. The audit must be completed along with a data collection form, and the reporting package shall be submitted within the earlier of 30 days after receipt of the auditors report(s), or 9 months after the end of the audit period. The audit report must be sent to: Federal Audit Clearing House, Bureau of the Census, 1201 East 10th Street, Jeffersonville, IN 47132. Should you have questions regarding the submission or processing of your Single Audit Package, contact the Federal Audit Clearinghouse at: (301) 763-1551, (800) 253-0696 or e-mail: govs.fac@census.gov The grantee is to ensure that the sub-recipients receiving CDC funds also meet these requirements (if total Federal grant or grant funds received exceed \$500,000). The grantee must also ensure that appropriate corrective action is taken within 6 months after receipt of the sub-recipient audit report in instances of

non-compliance with Federal law and regulations. The grantee is to consider whether sub-recipient audits necessitate adjustment of the grantees own accounting records. If a sub-recipient is not required to have a program-specific audit, the Grantee is still required to perform adequate monitoring of sub-recipient activities. The grantee is to require each sub-recipient to permit independent auditors to have access to the sub-recipients records and financial statements. The grantee should include this requirement in all sub-recipient contracts.

Records:

113 Records:

Financial records, supporting documents, statistical records, and all other records pertinent to the grant program shall be retained for a minimum of 3 years, or until completion and resolution of any audit in process or pending resolution. In all cases records must be retained until resolution of any audit questions. Property records must be retained in accordance with 45 CFR 92.42 requirements or 45 CFR 74.53, accordingly to the type of recipient.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: The Epidemiology and Laboratory Capacity (ELC) for Infectious Disease program plays a critical role in strengthening our nations infrastructure for preventing and controlling infectious diseases. The program builds epidemiology, laboratory, and information systems capacity in all 50 states to assist frontline state programs respond to infectious disease outbreaks, address the increasing threat of antimicrobial resistance, and detect and respond to new and emerging infectious diseases. As states are in different stages of implementing laboratory information management systems and electronic laboratory orders and results reporting, ELC funding would be flexible in its applications; however monies would be directed specifically toward meeting the goals of meaningful use for electronic laboratory reporting for nationally notifiable conditions.

As of the end of 2008, 52 of 56 CDC Immunization Program grantees reported that approximately 18 million (75%) U.S. children aged <6 years participated in an Immunization Information System (IIS). Further, only 43% of grantees reported that Health Level 7 (HL7) was used as an electronic format for data received by the IIS while 68% reported the receipt of electronic data using flat file format. Grantees report that many Electronic Health Record (EHR) vendors exchanging data with IIS electronically are already certified by the Certification Commission for Health Information Technology (CCHIT), but not for interoperability with IISs. Direct funding to state and local CDC Immunization Program grantees with IIS will be used to plan, enhance, adopt, and apply health information technology standards for direct health care system interoperability. Enhanced EHR-IIS interoperability will improve the completeness of immunization histories available to clinicians and public health, improve the timeliness of immunization data submission to an IIS, improve the quality of IIS coverage assessments, and the data available to other public health systems (e.g. vaccine preventable disease surveillance units). Improved interoperability will also reduce extra immunization, thereby saving time and resources.

The Laboratory Technical Implementation Center for Public Health (LTICPH) will establish capacity to assist public health laboratories and state health departments to enhance laboratory information management systems (LIMS) and other critical IT infrastructure to support interoperability and sharing of electronic laboratory data with public health agencies and lay the groundwork for interoperability with EHRs. This Center will help labs implement and maintain the capacity to format and electronically share standard data, and public health recipients must be able to securely receive, parse, and use such data. Public health department partners, likewise, must develop and maintain

complementary IT infrastructure to securely receive, parse, analyze, and utilize shared data. Electronic laboratory data must be seamlessly incorporated into public health systems to adequately support public health in leveraging laboratory data to ensure a holistic approach to surveillance and to support epidemiological analysis and public health response. Fiscal Year 2010: No Current Data Available Fiscal Year 2011: No Current Data Available

93.730 ARRA PREVENTION RESEARCH CENTERS COMPARATIVE EFFECTIVENESS RESEARCH PROGRAM

PRC CER Program

FEDERAL AGENCY:

Centers for Disease Control and Prevention, Department of Health and Human Services

AUTHORIZATION:

This program is authorized under the American Recovery and Reinvestment Act of 2009 (ARRA), Public Law 111-5; Public Health Service Act, 42 U.S.C. 241(a) and 247b(k)2 and Public Health Service Act, Title 42, Part 330u-5, Section 1706, Public Law 111-5.

OBJECTIVES:

To support Prevention Research Centers (PRCs) to perform comparative effectiveness research (CER) that compares innovative public health strategies or interventions, in new settings or populations (such as minorities or people with disabilities), and that preferably include new endpoints such as biologic measures or combined clinical and social interventions. The emphasis is to develop new scientific evidence that fills important knowledge gaps. The interventions or strategies should be policy or environmental but are expected to consider what targeted outcome(s) are anticipated and how such outcomes will be achieved and to describe how the intervention will be implemented so it can be replicated by others.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

CDC has designated \$10,000,000 in FY 2010 to fund 3-5 cooperative agreements to PRCs to compare innovative public health strategies or interventions, in new settings or populations (such as minorities or people with disabilities), and that preferable include new endpoints such as biologic measures or combined clinical and social interventions. The use of and use restrictions are as follows: Recipients may only expend funds for reasonable program purposes, including personnel, travel, supplies, and services, such as

contractual to support policy and system changes to perform comparative effectiveness research that compares innovative public health strategies or interventions, in new settings or populations (such as minorities or people with disabilities) preferably those that assess the impact of policy and environmental interventions, and includes new endpoints such as biologic measures or combined clinical and social interventions. Recipients may not generally use HHS/CDC/ATSDR funding for the purchase of furniture or equipment. Any such proposed spending must be identified in the budget. The recipient must perform a substantial role in carrying out project objectives and not merely serve as a conduit for an award to another party or provider who is ineligible. Federal regulations at 45 CFR Part 46 require that applications and proposals involving human subjects research must be evaluated in accordance with those regulations, with reference to the risks to the subjects, the adequacy of protections against these risks, the potential benefits of the research to the subjects and others, and the importance of the knowledge gained or to be gained. Federal funds may not be used on human subjects research until appropriate IRB approvals are in place. .

Applicant Eligibility:

The CDC program limits eligibility only to applicants who have applied for and have been selected as PRCs under Funding Opportunity Announcement DP09-001. Competition is limited to PRCs under this CDC Program Announcement because (1) they are uniquely positioned to perform, oversee, and coordinate public health-oriented CER that promotes the field of prevention research due to their established relationships with community partners and previous experience with CER and (2) these PRCs recently competed for prevention research funding and were deemed to be the best applicants among research institutions that include all schools of public health and schools of medicine with preventive medicine residency programs. CRITERIA FOR SELECTING PROPOSALS:

Funding would be specifically directed to Prevention Research Centers to perform comparative effectiveness research that compares innovative public health strategies or interventions, in new settings or populations (such as minorities or people with disabilities), preferably includes CER that assesses the impact of policy and environmental interventions, and includes new endpoints such as biologic measures or combined clinical and social interventions. CDC will require applicants to specifically address in their applications plans for sustaining the impact of ARRA investments beyond the federal funding provided in the next 2 years. The following criteria will be used by the initial merit review panel in order to judge the likelihood that the proposed research will have a substantial impact on the pursuit of stated goals: significance, approach, innovation, investigators and environment. In addition, reviewers will consider the following additional items in the determination of the scientific and technical merit: budget, inclusion (adequacy of plans to address the needs of both genders, racial and ethnic minorities); protection of human subjects from research risk and privacy and security protections for patients. The following will be considered in making funding decisions: scientific merit of the proposed project as determined by peer review; availability of funds; relevance to program priorities; focus is on public health interventions or strategies in two or more of the following areas: community-level behavior change, environmental-level, and policy level; research addresses populations with major health disparities; and selected PRCs ensures geographic distribution of awards. PRCs will also need to demonstrate a continued plan for progress toward meeting HHS Action Plan prevention targets as demonstrated through reporting metrics outlined in the Plan.

USES AND USE RESTRICTIONS:

All funds granted should be expended solely for reimbursement of recognized outlier costs in accordance with Section 5302(c) of Public Law 109-171. In the Deficit Reduction Act, a rural PACE provider site is defined as a PACE provider that has been approved to provide services in a geographic service area that is, in whole or in part, a rural area that has received a site development grant under this section. Thus, the statute definition of a rural area as defined in section 1886(d)(2)(D) of the Social Security Act states that a rural area would be a county that is not part of a Metropolitan Statistical Area (MSA) (as defined by the Office of Management and Budget) as established for Medicare Inpatient PPS payments.

Applicant Eligibility:

This grant opportunity is open to any PACE provider that (1) demonstrates meeting the required definition as set out in the Social Security Act and; (2) is eligible to serve in a rural area as a rural PACE pilot site as defined in the Social Security Act; and (3) incurs recognized outlier costs for eligible outlier participants in accordance with section 5302(C) of the Public Law 109-171. To meet the qualification of a PACE provider, an applicant must meet the definitions established in sections 1894(a)(3) or 1934(a)(3) of the Social Security Act. The Act defines a PACE provider as being a public or private, nonprofit entity organized for charitable purposes under 501(3)(c) of the Internal revenue code of 1986; and has entered into a PACE program agreement with respect to its operation of a PACE program as defined in 1894(a)(2) and 1924(a)(2) of the Social Security Act. In addition to meeting the definitions of a PACE provider, the law also requires that each potential applicant meet the full statutory definition of a rural area.

Beneficiary Eligibility:

The medical, social and long-term care needs are met under this initiative and will benefit the elderly beneficiaries who reside in rural areas.

Each provider organization may only submit one application per county of interest by the due date. 93.767 CHILDREN'S HEALTH INSURANCE PROGRAM

(CHIP; SCHIP)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Children's Health Insurance Program Reauthorization Act of 2009.

OBJECTIVES:

1. To provide funds to States to enable them to maintain and expand child health assistance to uninsured, low-income children, and at a state option, low-income pregnant women and legal immigrants, primarily by three methods: (1) obtain health insurance coverage that meets the requirements in Section 2103 relating to the amount, duration, and scope of benefits; (2) expand eligibility for children under the State's Medicaid program; or (3) a combination of the two.
2. To provide funds to Indian health programs operated by Indian Health Service, urban Indian organizations operating a health program under the IHCA (Public Law 94-437, as amended) and tribes or tribal organizations operating a health program under the ISDEAA (Public Law 93-638, as amended to find eligible, not enrolled Indian children, ensure they are enrolled in Medicaid and CHIP programs and ensure they retain coverage as long as they remain eligible.
3. To provide funds to help States operating separate or combination child health assistance programs make the transition from current payment methodologies for Federally qualified health centers and rural health centers to a payment methodology consistent with section 1902(bb) of the Social Security Act.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

No State is eligible for payments for child health assistance for coverage provided prior to October 1, 1997. Standards used to determine eligibility may include those related to geographic areas to be served by the plan. Age, income and resources, residency, disability status (as long as the standard does not restrict eligibility), access to or coverage under other health coverage, and duration of eligibility are factors. Standards may not discriminate on the basis of diagnosis. Eligibility standards must not cover higher-income children without covering lower-income children, and must not deny eligibility based on a child having a preexisting medical condition. The State must ensure that only targeted low-income children are furnished child health assistance under the plan. Children found through screening to be eligible for Medicaid are to be enrolled in Medicaid. The insurance provided under the State plan does not

substitute for coverage under group health plans. Coordination with other public and private programs providing creditable coverage for low-income children should occur. Child Health Assistance (other than Medicaid), must consist of any of the following: Benchmark coverage; benchmark equivalent coverage (which can be FEHBP-equivalent coverage); State employee coverage or coverage offered through the HMO with the largest insured commercial non-Medicaid enrollment in the State; existing comprehensive State-based coverage; or Secretary-approved coverage. A State child health plan must include a description of the amount (if any) of cost-sharing and must be in accordance with a public schedule. Cost-sharing may be varied in a way that does not favor higher-income children over lower-income children. No cost-sharing is permitted for well-baby and well-child care, including age-appropriate immunizations. Cost-sharing for children at 150 percent of poverty must be consistent with Medicaid; Cost-sharing for children at 150 percent of poverty and above must be based on an income-related sliding scale.

The aggregate for all children in a family cannot exceed 5 percent of the family's income. The State child health plan may not impose pre-existing condition exclusions for covered benefits. States that provide for benefits through a group health plan or group health insurance coverage may permit pre-existing condition exclusions as allowed under the applicable Section of the Employee Retirement Income Security Act (ERISA) and the Health Insurance Portability and Accountability Act (HIPAA). Funds provided to a State under this Title may only be used to carry out the purposes of this Title. Health insurance coverage provided may include coverage of abortion only if necessary to save the life of the mother or if the pregnancy is the result of an act of rape or incest. States may spend up to 10 percent of their total CHIP expenditures (Federal and State) on non-benefit activities, including: outreach conducted to identify and enroll eligible children in CHIP; administration costs; health services initiatives; and other child health assistance. These expenditures are matched at the enhanced CHIP matching rate and counted against both the 10 percent limit and the allotment. Monetary amounts provided by the Federal government or services assisted or subsidized to any significant extent by the Federal government, may not be included in determining the amount of nonfederal contributions required for State matching purposes.

Indian health programs eligible under this title must use funds to provide outreach, enrollment and retention for targeted, low-income children who are Indian. The funds may not be used to provide direct benefits of the CHIP program or to supplant existing activities funded under federal programs.

Applicant Eligibility:

All States and Territories may apply.

Indian health programs operated by Indian Health Service, urban Indian organizations operating a health program under the IHCA (P.L. 94-437, as amended) and tribes or tribal organizations operating a health program under the ISDEAA (P.L. 93-638, as amended) may apply.

Beneficiary Eligibility:

Targeted low-income children will benefit. These children are defined (for the purposes of Title XXI) as children who have been determined eligible by the State for child health assistance under their State plan; are low-income children; or are children whose family income exceeds the Medicaid applicable income level but does not exceed 50 percentage points above the Medicaid applicable income level; and are not found to be eligible for medical assistance under Title XIX or covered under a group health plan or under health insurance coverage. This term does not include a child that is a member of a family that is eligible for health benefits coverage under a State health benefits plan on the basis of a family member's employment with a public agency in the State.

Indian children who are targeted, low-income children will benefit. These children are defined (for the purposes of Title XXI) as children who have been determined eligible by the State for child health assistance under their State plan; are low-income children; or are children whose family income exceeds the Medicaid applicable income level but does not exceed 50 percentage points above the Medicaid applicable income level; and are not found to be eligible for medical assistance under Title XIX or covered under a group health plan or under health insurance coverage. This term does not include a child that is a

member of a family that is eligible for health benefits coverage under a State health benefits plan on the basis of a family member's employment with a public agency in the State.

Credentials/Documentation:

States and Territories must submit and have approved by the Secretary of DHHS, a State Child Health Plan. Individuals must meet State requirements. Indian health programs selected under this solicitation must be operated by Indian Health Service, urban Indian organizations operating a health program under the IHCA ((Public Law 94-437, as amended) and tribes or tribal organizations operating a health program under the ISDEAA (Public Law 93-638, as amended) may apply. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Title XXI plans and amendments are submitted by the State Governor, or designee, to the CMS Center for Medicaid and State Operations; Families and Children Health Program Group (CMSO/FCHPG). The Title XXI plan should be a stand alone document that fully addresses each relevant Section of the statutory requirements.

Eligible Indian health program grantees will submit applications through grants.gov website prior to the closing date, January 15, 2010, of the solicitation. Applications will be reviewed and awarded to eligible grantees on a competitive basis by April 15, 2010.

Award Procedure (093):

Award Procedure:

The CMS Administrator exercises delegated authority to approve Title XXI plans and amendments. Letters of approval will be signed by the CMS Administrator. Grants to Indian health programs will be awarded on a competitive basis utilizing impartial panels and facilitators on April 15, 2010.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Section 2106 of the Law, specifies that a State plan is considered approved unless the Secretary notifies the State in writing, within 90 days after receipt of the plan, that the plan is disapproved (and the reasons for disapproval) or that specific additional information is needed. Informal clarification and discussion between the State and the DHHS review team is permitted and encouraged during the review period. This does not stop the "90-day clock." The 90-day review period may be stopped by formal written requests for additional information and clarification. The 90-day review period may be stopped as many times as necessary to obtain completed information necessary to disapprove or approve the plan. The 90-day period will resume when the finalized additional information is received by CMS. Grants to Indian health programs will be 3 year grants from April 15, 2010 through April 14, 2013.

Appeals:

If a State wishes to appeal a disapproval, it may petition for a reconsideration of this decision within 60 days after the date of receipt of the disapproval letter, by submitting a written request for reconsideration to the project officer and the regional office. States also have the option to submit a new application following the disapproval, starting a new 90-day review clock.

Renewals:

An approved State child health plan shall continue in effect unless the State amends that plan or the Secretary finds substantial noncompliance of the plan in accordance with the requirements of Title XXI.

The Indian health program grants are one-time grants for a period of three (3) years.

Formula and Matching Requirements:

Statutory Formula:

Matching Requirements: Section 2105(b), Title XXI, provides for an "enhanced Federal Matching Assistance Percentage (FMAP)" for child health assistance provided under Title XXI that is equal to the current FMAP for the fiscal year in the Medicaid Title XIX program, increased by 30 percent of the difference between 100 and the current FMAP for that fiscal year. The enhanced FMAP may not exceed 85 percent. CHIPRA implemented a limitation on matching rates for states that propose to cover children with effective family income that exceeds 300 percent of the poverty line to FMAP rather than EMAP, unless a waiver or State Plan Amendment or state law was in place to cover this population before the enactment of CHIPRA. The formula for determining the final allotment includes: determining the number of States with approved State Plans as the end of the fiscal year. In order for a State to receive a final allotment for a fiscal year, CMS must approve the CHIP State Plan for that State by the end of the fiscal year. Only States with approved State Plans by the end of the fiscal year will be included in the final allotment calculation. The Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA) was enacted on February 4, 2009 and provided appropriations through FY 2013. The States' FY 2009 final allotments are calculated as 110 percent of the highest of the following three amounts:

Total Federal payments under title XXI to the State for FY 2008, multiplied by an allotment increase factor for FY 2009;

FY 2008 CHIP allotment multiplied by the allotment increase factor for FY 2009; or

The projected Federal payments under title XXI for FY & 2009 as determined on the basis of the February 2009 estimates submitted and certified by the States no later than March 31, 2009. The State FY 2010 allotment will be calculated as the sum of the following four amounts, multiplied by the applicable growth factor for the year.

--the FY 2009 CHIP allotments;

--FY 2006 unspent allotments redistributed to and spent by shortfall states in FY 2009;

--spending of funds provided to shortfall states in the first half of FY 2009; and

--spending of Contingency Fund payments in FY 2009, although there may be none.

For FY 2011 and FY 2013 the allotments will be rebased, on prior year spending. This will be done by multiplying the states growth factor for the year by the new base, which will be the prior years federal CHIP spending. For FY 2012, the allotment for a state will be calculated as the FY 2011 allotment and any FY 2011 contingency fund spending, multiplied by the states growth factor for the year. The amount of the state allotment for previous fiscal year and the amount of any payments made to the State under subsection (k), (l), or (n) for the previous fiscal year multiplied by the allotment increase factor for the current year.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Enrolled children receive medical services as necessary. Federal funds are obligated to the States by issuing Title XXI grant awards. To ensure that all of the appropriated funds are available to States, CMS will issue grant awards to all States with Title XXI State plans approved by the end of the fiscal year equaling the national amount available for allotment to the 50 States, the District of Columbia, and the Commonwealths and Territories for that fiscal year. Grant awards must be issued by the time the CMS/HHS accounting system closes with respect to that fiscal year. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. Section 2108 of the Law specifies that States must develop annual reports assessing the operation of their State Plan for each fiscal year, including the progress made in reducing the number of uncovered low-income children and report to the Secretary by January 1, of the following year the results of the assessment. By March 31, 2000, each State with a child health plan must submit to the Secretary an evaluation that includes an assessment of the effectiveness of the State Plan in increasing the number of children with creditable health coverage, in increasing the availability of affordable quality individual and family health

insurance for children, and in coordinating recommendations for improving the program under this Title. By December 31, 2001, the Secretary must submit to Congress and make available to the public, a report based on the evaluations submitted by the States recommendations and conclusions. No expenditure reports are required. No performance monitoring is required.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. A State child health plan under Title XXI must include an assurance that the State will afford the Secretary access to any records or information relating to the plan for the purposes of review or audit.

Records:

A State child health plan must include an assurance that the State will collect the data, maintain the records, and furnish the report to the Secretary at the times and in standardized format (as the Secretary requires), in order to enable the Secretary to monitor State program administration and compliance and to evaluate and compare the effectiveness of State Plans under this Title.

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Ticket to Work and Work Incentives Improvement Act of 1999, Section 203, Public Law 106-170.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

While the proposals submitted by the States may vary, States participating in this grant program will use the funds to remove the barriers to employment of persons with disabilities, by creating health systems change through the Medicaid program. The development or enhancement of certain core Medicaid components in each State would enable people with disabilities not only to work, but to sustain adequate health coverage if they find they need to relocate to another State for employment purposes. An adequate personal assistance services benefit and a Medicaid buy-in for employed people with disabilities are significant components of the Ticket to Work and Work Incentives Improvement Act. The infrastructure grants program provides money to the States to develop these core elements. In addition, States may use funding to develop a comprehensive approach to bridge Medicaid services with other key supports and programs used by employed people with disabilities. Funds may not be used for the direct provision of services to people with disabilities except on a one-time, last resort, emergency basis for the purpose of sustaining the individual's competitive employment.

Applicant Eligibility:

Beneficiary Eligibility:

There are two groups of potentially eligible beneficiaries, as defined by the Ticket to Work and Work Incentives Improvement Act of 1999. State and local government employees not already in Social Security-covered positions and hired on or after April 1, 1986 also contribute toward Medicare hospital insurance coverage. Although States may request agreements to cover individuals employed prior to April 1, 1986, no credit is given toward establishing Medicare entitlement for prior employment. (CMS Research)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title XI, Sections 1110 and 1115; 42 U.S.C. 1310 and 1315(a); Title XVIII, Section 1875; 42 U.S.C. 1395 and 42 U.S.C. 1881 (f); Section 402, Public Law 90-248, as amended; Section 222, Public Law 92-603.

OBJECTIVES:

The Centers for Medicare & Medicaid Services (CMS) conducts research, demonstrations, and evaluations in support of CMS' key role as a beneficiary-centered purchaser of high-quality health care at a reasonable cost. These grants are awarded in the form of research grants and cooperative agreements; Hispanic health services grants; historically black colleges and university grants. For fiscal years 2010 and 2011, CMS research, demonstrations and evaluations will focus on expanding agency efforts to improve the efficiency of payment, delivery, access and quality of our health care programs that serve millions of beneficiaries.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Under all authorizations, all applications must meet standards of excellence in research or evaluation design. Funds may not be used for construction or renovation of buildings. Funds authorized by Section 1115 of the Social Security Act are limited to State agencies administering the Medicaid program.

The research issues and/or hypotheses identified by a project should be clearly stated and realistic and should reflect the issues of interest to CMS and, where appropriate, HHS, Federal Government, and the broader health services research community.

The research design should clearly identify the measures that will be collected and analyzed to address the issues and/or hypotheses. These proposed measures should reflect concepts and variables that are consistent with the stated issues and hypotheses.

The research design should also address the reliability of measures i.e., a measurement should not change when the concept being measured remains constant in value. A common reliability concern is the level of inter-rater reliability of an instrument, determined by the extent to which two or more persons measuring the same characteristic would assign the same score.

The research design should address the validity of proposed measures i.e., the extent to which differences in scores on variable or the measuring instrument represent true differences in the characteristic we are trying to measure, rather than constant or random errors or the influence of other factors.

93.789 ALTERNATIVES TO PSYCHIATRIC RESIDENTIAL TREATMENT FACILITIES FOR CHILDREN

(Demonstration Projects Regarding Home and Community-Based Alternatives to Psychiatric Residential Treatment Facilities for Children)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Section 6063, Deficit Reduction Act of 2005, Public Law 109-171.

OBJECTIVES:

Over the last decade, Psychiatric Residential Treatment Facilities (PRTFs) have

become the primary provider for youth with serious emotional disturbances requiring an institutional level of care. However, since they are not recognized as hospitals, nursing facilities or intermediate care facilities for the mentally retarded, many States have been unable to use the 1915(c) waiver authority to provide home and community-based alternatives to care, which would keep the youth in their homes and with their families. Section 6063 of the Deficit Reduction Act of 2005 addresses this issue by providing up to \$218 million to up to 10 States to develop demonstration programs that provide home and community-based services to youth as alternatives to PRTFs. CMS anticipates awarding each successful applicant between \$5 and \$60 million. The PRTF Demonstration is authorized for up to 5 years. Payments may not be made to States after fiscal year 2011. CMS will review and approve each State's Implementation Plan prior to allowing States to access funds for Federal reimbursement of services under this grant. Section 6063 also provides \$1 million for a National Demonstration Evaluation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Budget Neutrality: In conducting these demonstration projects, The Secretary of Health and Human Services shall ensure that the aggregate payments made by the Secretary under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) do not exceed the amount which the Secretary estimates would have been paid under the title, if the demonstration projects under Section 6063 had not been implemented. Any funding allocated for the Federal match for home and community-based services provided under the demonstration for the first year of this grant that remain unspent will be carried over to the next year of the Grant. **Indirect Costs:** The provisions of the OMB Circular A-87 govern reimbursement of indirect costs under this solicitation. A copy of OMB Circular A-87 is available online at:

<http://www.whitehouse.gov/omb/circulars/a087/a087.html>.

By "territory or possession" we mean Guam, the U.S. Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Beneficiary Eligibility:

For the purposes of this demonstration, youth are defined as "any child, adolescent or young adult under the age of 21". States shall ensure that each participant under the demonstration meets this level of care criterion to participate in the demonstration. Further, States may elect to add additional criteria to carve out or target a specific sub-population to receive home and community-based services under this demonstration. As a part of the application process, States shall submit a copy of the level of care assessment used to assess eligibility for participation in this demonstration. PRTFs are defined as any non-hospital facility with a provider agreement with a State Medicaid Agency to provide the inpatient services benefit to Medicaid-eligible individuals under the age of 21 (CFR 42 441.150 - 441.182). The facility must be accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or any other accrediting organization with comparable standards recognized by the State. 93.791 MONEY FOLLOWS THE PERSON REBALANCING DEMONSTRATION

(Money Follows the Person Demonstration)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Section 6071, Public Law Deficit Reduction Act of 2005, Public Law 109-171.

OBJECTIVES:

For more than a decade, States have been asking for the tools to modernize their Medicaid programs. With the enactment of the Deficit Reduction Act (DRA) of 2005, States now have new options to rebalance their long-term support programs to allow their Medicaid programs to be more sustainable while helping individuals achieve independence. The Money Follows the Person (MFP) Rebalancing Demonstration (MFP Demo), created by section 6071 of the Deficit Reduction Act of 2005 (P.L. 109-171), supports State efforts to "rebalance" their long-term support systems by offering \$1.75 billion over 5 years in competitive grants to States. Specifically, the demonstration will support State efforts to: "Rebalance their long-term support system so that individuals have a choice of where they live and receive services." Transition individuals from institutions who want to live in the community. Promote a strategic approach to implement a system that provides person centered services and a quality management strategy that ensures the provision of, and improvement of such services in both home and community-based settings and institutions. The demonstration provides for enhanced federal medical assistance percentage (FMAP) for 12 months for qualified home and community-based services for each person transitioned from an institution to the community during the demonstration period. Eligibility for transition is dependent upon residence in a qualified institution. The State may establish the minimum timeframe for residence between 6 months and two years as required by Section 6071(b)(2)(A) of the DRA. The State must continue to provide community-based services after the 12 month period for as long as the person needs community services and is Medicaid eligible. Demonstration grants will be awarded to States from January 1, 2007 through September 30, 2011. CMS will accept one proposal from each State interested in participating in the demonstration program. The State Medicaid Agency must be the lead applicant. States must propose a demonstration period of no less than two consecutive fiscal years but no greater than five years. The State will indicate in its application the targeted group(s) and number of individuals it intends to transition. In making awards, CMS will give preference to States if they include multiple target groups including older individuals, and if they propose to deliver self-directed services. The number of demonstration projects approved by CMS depends largely on the scope (i.e., proposed enrollment and breadth of services) and quality of the proposed projects. Under the demonstration project, the State must propose a system of Medicaid home and community-based care that will be sustained after the demonstration period and is deemed qualified by the Secretary. Specifically, the program must be conducted in conjunction with a "qualified HCBS program" which is a program that is in operation (or approved) in the State for such individuals in a manner that assures continuity of Medicaid coverage of services in the qualified HCBS program for eligible individuals. States may also propose to enhance the services they will provide during the demonstration period to achieve greater success with transition. States will be required to participate in a national qualitative and quantitative evaluation conducted by CMS. Data collected on a national level will help evaluate the core objectives of the statute that are listed below.

Award Procedure:

An independent review of all applications will be conducted by a panel of experts including members of the disability community, advocates, providers and staff from State and Federal agencies including CMS. The review panel will assess each application to determine the merits of the proposal and the extent to which it furthers the purposes of the demonstration program. CMS reserves the right to approve or deny any or all proposals for funding. CMS seeks to achieve

Unsuccessful applicants will be notified by letter, sent through the U.S. Postal Service to the applicant organization as listed on its SF 424, after December 1, 2009.

Appeals:

Appeals are governed by Title 45--Public Welfare SUBTITLE A--DEPARTMENT OF HEALTH AND HUMAN SERVICES PART 16--PROCEDURES OF THE DEPARTMENTAL GRANT APPEALS BOARD.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program. Matching Requirements: A State receiving an award under this solicitation will receive reimbursement for home and community-based services provided under the demonstration on a quarterly basis at the following Federal Medical Assistance Percentage (FMAP) rates: The FMAP rate will be adjusted to reflect the increased FMAP available to States through the American Recovery and Reinvestment Act of 2009 each quarter from October 1, 2008 through December 31, 2010 (increased rate). The funding for the increased FMAP will be provided from Money Follows the Person grant demonstration appropriations. The enhanced FMAP provided by the DRA of 2005 (Enhanced Rate increased up to 50% of the State Match capped at 90%) will be applied to the Recovery Act increased quarterly FMAP. Service Category Match rate for a 12-month demonstration period for "Qualified HCB program" services and HCB Demonstration services are at the Increased and Enhanced Match Rate. FEDERAL AGENCY:

Health Resources and Services Administration, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title VII, Section 751(a)(1), as amended; Health Professions Education Partnerships Act of 2010, Public Law 105-392.

OBJECTIVES:

The Basic/Core Area Health Education Centers (BAHEC) Program and Model State Supported Area Health Education Centers (MAHEC) Program goals are to assist schools to improve the distribution, diversity, supply, and quality of health personnel in the health services delivery system, and to attract and retain health personnel in underserved areas. The AHEC Program awardees link the academic resources of medical schools and participating health professions schools with local educational and clinical sites, and thereby establish a network of community-based training sites to provide educational services to health professions students, faculty-preceptors and health care providers in underserved areas, and ultimately, to improve the delivery of health care in an underserved region or in an entire state. Emphasis is placed on community-based training of health professions students, primary care-oriented medical residents, local providers, and also 9-12 grade students. The BAHEC program assists schools in the initial planning, development and implementation of community-based Area Health Education Centers (AHECs) which assist schools and organize the training of at least three health professions disciplines at training-service delivery sites in rural and underserved areas, of a region or an entire state. Schools which complete Basic AHEC Program development, then compete for Model AHEC Program awards in partnership with affiliated (contracted) AHEC Centers to maintain and enhance/expand training programs and training sites responsive to local, State and Federal needs and priorities. The BAHEC and MAHEC programs embrace the goal of increasing the number of health professions graduates who ultimately practice in underserved areas. TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. Individual Predoctoral and Postdoctoral National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas. Institutional NRSA awards may be made to eligible institutions to enable them to appoint individuals selected by the institution. Certain service and payback provisions may apply to postdoctoral individuals upon termination of the award or termination of the appointment. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process.

Phase II grants are for the continuation of research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. Some Phase II awardees may be eligible to apply for funds to continue research for up to three years beyond the original Phase II award. Eligible projects involve assessment and improvement of drugs or devices or propose to conduct preclinical studies of drugs or devices that ultimately require: 1) clinical evaluation and/or 2) approval of a Federal regulatory agency. The product being developed must be one for which Federal regulatory approval (e.g., FDA) is a required step toward commercialization. Prospective applicants are strongly encouraged to contact NIH staff to determine eligibility. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application.

Applicant Eligibility:

To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. Any nonprofit organization engaged in biomedical research and institutions or companies organized for profit may apply for almost any kind of grant. Only domestic, non-profit, private or public institutions may apply for NRSA Institutional Research Training Grants. An individual may apply for an NRSA or, in some cases, for a research grant if adequate facilities to perform the research are available. SBIR grants can be awarded only to United States small business concerns (entities that are independently owned and operated for profit and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. At least 67% of the research or analytic effort must be performed by the small business concern in Phase I. The research and analytic effort performed by the small business must be at least 50% during Phase II. STTR grants can be awarded only to United States small business concerns (entities that are independently owned and operated for profit and have no more than 500 employees) that formally collaborate with a university or other non-profit research institution in cooperative research and development. The principle investigator may be employed with the small business concern or collaborating non-profit research institution as long as s/he has a formal appointment with or commitment to the applicant small business concern. At least 40% of the project is to be performed by the small business concern and at least 30% by the non-profit research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants.

In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required

retention period, but shall last as long as records are retained.

The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants.

In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

OBJECTIVES:

To foster research and research training on the pathophysiology, diagnosis, treatment, and prevention of non-malignant blood diseases, including anemias, sickle cell disease, thalassemia; leukocyte biology, pre-malignant processes such as myelodysplasia and myeloproliferative disorders; hemophilia and other abnormalities of hemostasis and thrombosis; and immune dysfunction. Funding encompasses a broad spectrum of hematologic inquiry, ranging from stem cell biology to medical management of blood diseases and to assuring the adequacy and safety of the nation's blood supply. Programs also support the development of novel cell-based therapies to bring the expertise of transfusion medicine and stem cell technology to the repair and regeneration of human tissues and organs. Small Business Innovation Research (SBIR) program: To stimulate technological innovation; to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Small Business Technology Transfer (STTR) program: To stimulate and foster scientific and technological innovation through cooperative research development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. National Research Service Awards (NRSAs) are made directly to individuals for research training. Grants may be made to institutions to enable them to make NRSAs to individuals selected by them. Certain service and payback provisions apply to individuals upon termination of the award. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has

potential for commercial application. These awards are made to small businesses working in collaboration with academic institutions. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. While the intent of the SBIR/STTR programs is commercialization (Phase III), no SBIR/STTR funds are allowed for commercialization activities such as patents; market and sales; market research; business development/product development/market plans; legal fees, travel and other costs including labor relating to license agreements and partnerships.

Applicant Eligibility:

Any nonprofit organization engaged in biomedical research and institutions (or companies) organized for profit may apply for grants, with the exception of NRSAs. An individual may apply for a NRSA or, in some cases, may qualify for a research grant if adequate facilities in which to perform the research are available. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, or owned by another small business that itself is independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees including affiliates). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. SBIR projects must be performed at least 67% by the applicant small business in Phase I and at least 50% of the project in Phase II. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company or institution engaged in biomedical research. Only domestic for-profit small business firms may apply for SBIR and STTR programs.

Credentials/Documentation:

Applicants for individual National Research Service Awards must be citizens of the United States or have been admitted for permanent residency; must hold a doctoral degree (M.D., Ph.D, D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree); and must designate a desire for training in one of the health or health-related areas specified by the National Institutes of Health. Each applicant must be sponsored by an accredited public or private nonprofit institution engaged in such training. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present a research plan that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. SBIR and STTR applicants must use the SF424 Research and Related (R&R) application for electronic submission through Grants.gov. Electronic submission of SNAP Progress Reports (eSNAP) apply for non-competing continuations (e.g., second year of Phase II). OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. OMB Circular No. A-110 applies to this program. Research grant applications

are submitted on designated forms to the Center for Scientific Review, National Institutes of Health, Bethesda, MD 20892. Forms for individual NRSA applications may be obtained from and submitted to the Division of Extramural Outreach and Information Resources, Office of Extramural Research, National Institutes of Health, 6701 Rockledge Drive, Room 6207, MSC 7910, Bethesda, MD 20892. Telephone: (301) 435-0714. Fax: (301) 480-0525. E-mail: asknih@od.nih.gov. SBIR and STTR grant applications should be submitted to the Center for Scientific Review, 6701 Rockledge Drive, Room 1040 - MSC 7710, Bethesda, MD 20892-7710. NIH is transitioning to an electronic application by grant mechanism. Details, including the appropriate application form, can be found at <http://era.nih.gov/ElectronicReceipt/>.

Award Procedure:

All accepted applications are evaluated by an appropriate initial review group (study section). All grant applications receive a final secondary review by the National Heart, Lung, and Blood Advisory Council. Fellowship applications have a secondary review by the staff of the Institute. Staff informs applicants of the results of the review. If support is contemplated, staff initiates preparations of awards for grants. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research. Eligibility criteria must be verified prior to the competing award as stated in the SBIR/STTR Funding Opportunity Announcement and annual OMNIBUS SOLICITATION.

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Section 301, 437, 487, Public Law 78-410, 42 U.S.C 241.

OBJECTIVES:

To support research relevant to arthritis, musculoskeletal and skin diseases, the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) supports research training and basic and clinical investigations including epidemiology and clinical trials in the areas of skin and rheumatic diseases and musculoskeletal diseases. The Division of Skin and Rheumatic Diseases promotes and supports basic, epidemiological, and clinical studies of skin and rheumatic and related diseases. Studies range from determining the underlying basis and mechanisms of disease (including large genetic studies), to translational and clinical research aimed at the diagnosis, treatment, prediction, and/or prevention of disease. The skin program supports research in normal and diseased skin including keratinocyte biology and wound healing, and disorders such as psoriasis, atopic dermatitis and other chronic inflammatory skin disorders; the vesiculobullous diseases such as pemphigus, bullous pemphigoid, and epidermolysis bullosa; acne, alopecia areata, vitiligo, and skin neoplasia. The rheumatic disease program supports research in the systemic autoimmune diseases and arthritides, including systemic lupus erythematosus (SLE), systemic scleroderma, autoimmune myositis, rheumatoid arthritis, juvenile idiopathic arthritis, spondyloarthropathies, vasculitis, gout, Sjogren's

syndrome, and fibromyalgia syndrome. In addition, the Division supports studies on the extracellular matrix, including research on Marfan syndrome, keloid formation, and pseudoxanthoma elasticum. The Division also supports biopsychosocial research related to rheumatic, musculoskeletal, or skin diseases. Topics include behavioral interventions, pain mechanisms, neuroendocrine and neuroimmune mechanisms, behavioral and social research, and epidemiology. The Division of Musculoskeletal Diseases supports studies of the skeleton and associated connective tissues. Broad areas of interest include skeletal development, metabolism, mechanical properties, and responses to injury. Among these diseases and skeletal disorders are osteoporosis; osteogenesis imperfecta; Paget's disease of bone; vitamin D refractory diseases; and rickets and osteochondrodysplasias. Other areas of interest include treatment of acute and chronic injuries, including carpal tunnel syndrome, repetitive stress injury, low back pain and clinical and epidemiological studies of osteoarthritis. The Division supports development of new technologies with the potential to improve treatment of skeletal disorders and facilitate the repair of trauma in the normal skeleton. These include drugs and nutritional interventions, joint replacement, bone and cartilage transplantation, biomarkers and gene therapy. In addition, bioengineering, sports medicine and musculoskeletal fitness are areas of special research emphasis. This Division also encourages and supports research on skeletal muscle, its diseases and disorders, and its central role in human physiology and exercise. Topics include the molecular structure of muscle and the molecular mechanisms that produce force and motion. Muscle biophysics, cell biology, muscle biology, muscle disorders and therapies, musculoskeletal development, tissue reengineering, and regenerative medicine are encompassed in this area as well. The Division also supports research into the biology of cartilage, tendons, ligaments, menisci, and intervertebral discs, including pre-clinical studies on injury and disease conditions affecting these tissues. NIAMS participates in the Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs. The SBIR program is intended to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. The STTR program is intended to stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Research Grants provide funds for salaries, equipment, supplies, travel, and other expenses associated with scientific investigation relevant to program objectives. Individual National Research Service Awards (NRSAs) are made to individuals for research training in specified biomedical shortage areas. In addition, grants may be made to institutions to enable them to make NRSAs to individuals selected by them. Each individual who receives a NRSA is obligated upon termination of the award to comply with certain service and payback provisions. Small Business Innovation Research Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

Applicant Eligibility:

Research Grants: Individuals and public and private institutions, both nonprofit

and for-profit, who propose to establish, expand, and improve research activities in health sciences and related fields. National Research Service Awards: Individuals must be nominated and sponsored by a public or private, for-profit or nonprofit institution having staff and facilities appropriate to the proposed research training program. All awardees must be citizens or have been admitted to the United States for permanent residence. To be eligible, predoctoral awardees must have completed the baccalaureate degree and postdoctoral awardees must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D. Small Business Innovation Research grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

See the following for information on how assistance is awarded/released: A formal notification in the form of a Notice of Award (NoA) will be provided to the applicant organization.

Reports:

No reports are required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Project Grants provide funds for salaries, equipment, supplies, travel, and other expenses associated with scientific investigation relevant to program objectives. NRSA's are made directly to individuals for research training in specified biomedical shortage areas, or, to institutions to enable them to make NRSA's to individuals selected by them. Each individual who receives a NRSA is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Applicant Eligibility:

Project Grants: Universities, colleges, medical, dental and nursing schools, schools of public health, laboratories, hospitals, State and local health departments, other public or private institutions, both non-profit and for-profit, and individuals who propose to establish, expand, and improve research activities in health sciences and related fields. NRSA's: Support is provided for academic and research training only, in health and health-related areas that are periodically specified by the National Institutes of Health. To be eligible, predoctoral awardees must have completed the baccalaureate degree and postdoctoral awardees must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree). Individuals must be nominated and sponsored by a public or nonprofit private institution having staff and facilities appropriate to the proposed research training program. All awardees must be citizens or have been admitted to the United States for permanent residence. Nonprofit domestic organizations may apply for the Institutional NRSA. SBIR and STTR grants can be awarded only to domestic small businesses that meet the following criteria: 1) Is independently owned and operated, is not dominant in the field of operation in which it is proposing, has a place of business in the United States and operates primarily within the United States or makes a significant contribution to the US economy, and is organized for profit; 2) Is (a) at least 51% owned and controlled by one or more individuals who are citizens of, or permanent resident aliens in, the United States, or (b) for SBIR only, it must be a for-profit business concern that is at least 51% owned and controlled by another for-profit business concern that is at least 51% owned and controlled by one or more individuals who are citizens of, or permanent resident aliens in, the

United States. 3) Has, including its affiliates, an average number of employees for the preceding 12 months not exceeding 500, and meets the other regulatory requirements found in 13 C.F.R. Part 121. Business concerns are generally considered to be affiliates of one another when either directly or indirectly, (a) one concern controls or has the power to control the other; or (b) a third-party/parties controls or has the power to control both. STTR grants which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Health professionals, graduate students, health professional students, scientists, and researchers, any nonprofit or for-profit organization, company, or institution engaged in biomedical research. Project Grants: Although no degree of education is either specified or required, nearly all successful applicants have doctoral degrees in one of the sciences or professions. NRSAs: Predoctoral awardees must have completed the baccalaureate degree and postdoctoral awardees must have a professional or scientific degree.

Credentials/Documentation:

Each applicant for research projects must present a research plan and furnish evidence that scientific competence, facilities, equipment, and supplies are appropriate to carry out the plan. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Individual NRSA applications for postdoctoral training must include the candidate's academic record, research experience, citizenship, institutional sponsorship, and the proposed area and plan of training. Institutional Training grant applications for predoctoral and postdoctoral training must show the objectives, methodology and resources for the research training program; the qualifications and experience of directing staff; the criteria to be used in selecting individuals for stipend support; and a detailed budget and justification for the amount of grant funds requested. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant form PHS 398 is used to apply for SBIR and STTR Phase I Phase II and Phase I/Phase II Fast Track. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. OMB Circular No. A-110 applies to this program. Project Grants: Applications for Federal assistance must be submitted electronically through Grants.gov (<http://www.grants.gov>) using the SF424 Research and Related (R&R) forms and the SF424 (R&R) Application Guide. Applications may not be submitted in paper format. A registration process through Grants.gov is necessary before submission and applicants are highly encouraged to start the process at least four weeks prior to the grant submission date. SBIR and STTR Grant Solicitations

and SBIR Contract Solicitation may be obtained electronically through the NIH's "Small Business Funding Opportunities" home page at www.nih.gov/grants/funding/sbir.htm on the World Wide Web. The Solicitations include submission procedures, review considerations, and grant application or contract proposal forms.

Award Procedure:

Research Grant and Training Program applications are reviewed initially for scientific merit by an appropriate review panel, composed of scientific authorities, and by the National Diabetes and Digestive and Kidney Diseases Advisory Council composed of leaders in medical science, education, and public affairs. Approved applications will compete on a merit basis for available funds. The successful applicant is sent a Notice of Grant Award. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

PROJECT GRANTS

Uses and Use Restrictions (070):

Research grants may be used to provide salaries, equipment, supplies, travel and other expenses for research. The grantee institution is obliged to expend grant funds prudently for the purposes stated in the application and award document. National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas, or to institutions, to enable them to make NRSAs to individuals selected by them. Each individual who receives a NRSA may be obligated upon termination of the award to comply with service and payback provisions. Career Development Awards such as the Independent Scientist Awards (K02) provide support for newly independent scientists with health related degrees who can demonstrate the need for a period of intensive research focus as a means of enhancing their research careers and facilitating their ability to obtain major NIH research awards. Mentored Clinical Research Scientist Development Awards (K08) provide support for clinically trained health professionals who need an additional period of sponsored research experience as a way to gain expertise in a research area new to the candidate or in an area that would demonstrably enhance the candidate's scientific career. The Mentored Research Scientist Development Award (K01) are of two types: Re-Entry into the Neurological Sciences (RENS) which are made to women and men who have been out of neuroscience research for at least 3 years to give them an opportunity to re-establish their skills as independent neuroscientists and the Career Development Award to promote diversity in neuroscience research support, an intensive, supervised research career development experience for underrepresented, disabled or disadvantaged career neuroscientists. The Mentored Patient-Oriented Research Career Development Award (K23) provide support for a period of supervised study and research for clinically trained professionals who have the potential to develop into productive clinical investigators. The Mid-career Investigator Award in Patient-Oriented Research (K24) provides support for clinicians to allow them protected time to devote to patient-oriented research and to act as mentors for beginning clinical investigators. The Collaborative Neurological Sciences Award (S11) is to develop and promote competitive neurological science research programs at predominantly minority institutions through collaborations with grantees from research intensive institutions who have NIH grant support to conduct neurological science research. SBIR Phase I grants (of approximately 6-months

to 2 years in duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research efforts initiated in Phase I that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1 to 3 years in duration) are to determine the scientific, technical, and commercial merit and feasibility of proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. Grant funds may be expended only for the purpose stated in the application and award document. The NINDS participates in the NIH SBIR/STTR "fast track" initiative.

Applicant Eligibility:

Research Grants: Any public, private, nonprofit, or for-profit institution is eligible to apply. For-profit institutions are not eligible for Institutional National Research Service Awards but are eligible for Individual NRSA's. All proposals are reviewed for scientific merit, for evaluation of the qualifications of the investigators, for adequacy of the research environment, and for significance of the problem. Approved proposals compete for available funds. All Career Development Program awardees, with the exception of awardees of the Pathway to Independence Award, must be citizens or have been admitted to the United States for permanent residence. Candidates must be nominated for the program by a nonfederal public or private nonprofit institution located in the United States, its possessions or territories. Awardees for RENS must have been accepted by a sponsoring institution, had previous training and experience in neurological science, an interruption in their careers for a period of at least three years and not more than 8 years, and be citizens or non-citizen nationals of the United States. Awardees for the Collaborative Neurological Sciences Award must be from a predominantly minority institution and must have a doctoral degree in a basic or clinical science area. To be eligible, postdoctoral NRSA trainees or fellows must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D. Eng., or equivalent domestic or foreign degree). SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the entire research must be performed in the United States. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Health professionals, graduate students, health professional students, scientists, and researchers.

Credentials/Documentation:

Research grants are awarded to an institution in the name of an individual investigator. Persons qualified to carry out research related to the extramural programs described above may apply for funds to support their investigations. Mentored Career Program training must be conducted under the direction of a competent sponsor. National Research Service Awards: Individual NRSA Fellowships for postdoctoral training: the candidate's academic record, research experience, citizenship, institutional sponsorship, and the proposed area and plan of training must be included in the application. Institutional Training Grants for predoctoral and postdoctoral training: The applicant institution must show the objectives, methodology and resources for the research training program; the qualifications and experience of directing staff; the criteria to be used in selecting individuals for stipend support; and a detailed budget and

justification for the amount of grant funds requested. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74 and 92, Subpart Q. For SBIR and STTR grants, the applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Research grant applications exceeding \$500,000 direct costs in any yearly budget period will not be accepted unless the NINDS has agreed to accept the application prior to submission (see <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-02-004.html>). Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. NIH has transitioned to the SF424 family of forms and electronic submission through Grants.gov by research program or funding mechanism. See <http://era.nih.gov/ElectronicReceipt/> for a list of grant mechanisms that have already transitioned to electronic submission. For applications to be submitted electronically, see <http://era.nih.gov/ElectronicReceipt/>. Effective with the August 8, 2009 submission date, all grant applications for the Individual National Research Service Award (NRSA) Fellowships (F-series) will require electronic submission through Grants.gov to eRA Commons. Paper applications will not be accepted for submissions on or after the August 8 transition. The change from paper submission to electronic applications for grant programs that includes Career Development (K12 and K30) and Training & Development (T&D) has been rescheduled to begin with electronic submission on/after January 25, 2010. The complex mechanisms (P, U) has been delayed until further notice. See <http://grants1.nih.gov/grants/forms.htm> to determine the appropriate paper application package (PHS 398 or PHS 416) to be used.

Award Procedure:

Research Grant and Training Program applications are reviewed initially by technical panels, composed of scientific authorities, and by the National Advisory Neurological Disorders and Stroke Council composed of 18 leaders in medical science, education, and public affairs. Approved applications will compete on a merit basis for available funds. Formal award notices are transmitted to the grantee or awardee. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Research grants: Approximately 6 to 9 months. Career program: From 7 to 8 months. SBIR/STTR applications: About 7-1/2 months. Institutional Training Grants: From 6 to 12 months.

Appeals:

A principal investigator (P.I.) may question the substantive or procedural aspects of the review of his/her application by communicating with the staff of the Institute, and subsequently, the P.I. and applicant institution may appeal to the NINDS appeals officer. A description of the NIH Peer Review Appeal procedures is available on the NIH home page <http://grants.nih.gov/grants/guide/notice-files/not97-232.html>.

Research Grants: Annual and final progress reports, including a description of results, positive and negative, and a list of any publications. Career Program: Awardee submits annual progress report. Termination notice, PHS 416-7, must be submitted upon completion of NRSA training. Reports are required after termination of National Research Service Awards to ascertain compliance with the service and payback provisions. A Financial Status Report must be submitted within 90 days after the close of each budget period for which an award has been issued. No expenditure reports are required. No performance monitoring is required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year

retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

RELATED PROGRAMS:

Not Applicable.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2009: No Current Data Available Fiscal Year 2010: Grants support research on neurological disorders such as: (1) Cerebral palsy; (2) disorders of aging including Parkinson's, Huntington's, and Alzheimer's diseases and the dementias; (3) muscular, neuromuscular and demyelinating disorders; (4) neuroendocrine studies; neural aspect of learning and behavior; (5) nervous system tumors, and infectious diseases of the central nervous system. Recently funded applications include studies designed to result in advances for a group of useful glycosidases, as well as mechanistic information for the activator protein that is required for lysosomal degradation of GM2, a glycosphingolipid involved in Tay-Sachs disease. Another study focuses on mechanisms of synapse assembly, specifically the role of membrane associated quanylate kinases in the clustering and targeting of ion channels and receptors at the synapse. One example of the long range goal of a successful competing renewal application is to provide a better understanding of the mechanisms of movement of intracellular organelles along microtubules. Such movement plays a role in the process of fast axonal transport in nerve cells. The specific aims of another funded application are to assess environmental and genetic factors as determinants of hand preference, to determine whether measures of developmental stability can explain individual differences in phenotypic expressions of hand preference and to determine whether handedness is predictive of compromised immunological functioning and/or reproductive biology. A new project is aimed at addressing a series of fundamental issues regarding the mechanisms underlying the spread of synaptic modifications in neural networks. Another series of studies will take advantage of newly developed behavioral procedures and selective ibotenic acid lesions to compare the effects of lesioning hippocampus, subiculum, entorhinal cortex, and perirhinal cortex on learning and memory. Included in this effort are multi-disciplinary clinical research centers on Parkinson's disease, stroke, head and spinal cord injury, epilepsy, and demyelinating disorders, as well as program projects and a large number of individual grants. In head and spinal cord injury research studies, particular emphasis is given to the biomedical events and metabolism following injuries, with a view toward both salvaging damaged tissue and also creating conditions in which regeneration of injured nerve cells can take place. The clinical research program sponsors clinical trials to evaluate various therapeutic approaches to head and spinal cord injury, epilepsy, multiple sclerosis and other neurologic and neuromuscular disorders. The effects of systemic cancer on the central nervous system are studied, as part of the brain and spinal cord tumor research effort. Fiscal Year 2011: No Current Data Available

93.855 ALLERGY, IMMUNOLOGY AND TRANSPLANTATION RESEARCH

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Small Business Research and Development Enhancement Act of 1992, 42 U.S.C 241; Public Health Service Act, Title IV, Section 301.

OBJECTIVES:

To assist public and private nonprofit institutions and individuals to establish, expand, and improve biomedical research and research training in allergic and immunologic diseases and related areas to assist public, private, and commercial institutions to conduct developmental research; to produce and test research materials; and to provide research services as required by the agency for research progress in allergic and immunologic diseases. NIAID's Allergy, Immunology and Transplantation Research concerns the immune system as it functions in the maintenance of health and as it malfunctions in the production of diseases. Because of this dual focus, the program encompasses both basic research and clinical research. Small Business Innovation Research (SBIR) program expands and improves private sector participation in biomedical research. The SBIR Program intends to increase and facilitate private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. The Small Business Technology Transfer (STTR) program stimulates and fosters scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Research Career Development Awards support the development of scientists during the formative stages of their careers. Individual National Research Service Awards (NRSAs) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, Institutional National Research Service Awards are made to enable institutions to select and make awards to individuals to receive training under the aegis of their institutional program.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Beginning with fiscal year 1998, the direct costs awarded in the first year to a research project grant resulting from a competing renewal application will be limited to no more than a 20 percent increase over the direct costs awarded in the last non-competing year of that grant. Research grants provide funds for salaries, equipment, supplies, and travel. They also afford the collateral benefits of enriching the training experience of research workers. Grantees are expected to be judicious in using these funds. The application for a research grant sets forth specific terms and conditions and requires the signatures of the principal investigator and an official authorized to sign for the institution. Scientists and institutions are under an obligation to expend grant funds

prudently for the purposes stated in the application and award document. For Research Career Development Awards (RCDAs) the scientists must demonstrate an outstanding research potential for independent research in the sciences related to transplantation, immunology, allergies, and immunological diseases. For National Research Service Awards (NRSAs), each individual who receives NRSA support is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Applicant Eligibility:

Universities, colleges, hospitals, laboratories, and other public or private nonprofit domestic institutions, including State and local units of government, and individuals are eligible to make application for grant support of research by a named principal investigator or a research career development candidate. For-profit organizations are also eligible, with the exception of NRSA. Individual NRSA awardees must be nominated and sponsored by a public or nonprofit private institution having staff and facilities appropriate to the proposed research training program. All NRSA awardees must be citizens or have been admitted to the United States for permanent residence. To be eligible, predoctoral candidates must have completed the baccalaureate degree, and postdoctoral awardees must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree). SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is being proposed and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which researches proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

Credentials/Documentation:

Research grant applicants must define the objectives, methodology, and facilities for the program, and must present the program director's competence and scientific interest. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. Applicants for individual NRSAs must include their academic record, research experience, citizenship, institute sponsorship, and the proposed area and plan of training in their applications. The applicant for an institution must specify the objectives, methodology, and resources for the research training program, the qualifications experience of directing staff, the criteria to be used in selecting individuals for award, and a detailed budget justification for the amount of grant funds requested. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition

Regulations. For other grantees, costs will be determined by HHS Regulations 45 CFR, Part 74, Subpart Q. OMB Circular No. A-87 applies to this program.

FEDERAL AGENCY:**

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Small Business Research and Development Enhancement Act of 1992, 42 U.S.C 241; Public Health Service Act, Title IV, Section 301.

OBJECTIVES:

To support research related to Microbiology and Infectious Diseases with the broad aim of improving health by controlling disease caused by infectious or parasitic agents. Projects range from studies of microbial physiology and antigenic structure to collaborative trials of experimental drugs and vaccines.

Also supported are studies on the mechanisms of resistance to antibiotics as well as research dealing with epidemiological observations in hospitalized patients or community populations. The objectives of the program are to assist public and private nonprofit institutions and individuals to establish, expand and improve biomedical research and research training in infectious diseases and related areas; to assist public, private and commercial institutions to conduct developmental research; to produce and test research materials; and to provide research services as required by the agency for programs in infectious diseases. Small Business Innovation Research (SBIR) program expands and improves private sector participation in biomedical research. The SBIR Program intends to increase and facilitate private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. OBJECTIVES:

To conduct and support laboratory research, clinical trials, and studies with people that explore health processes. NICHD researchers examine growth and development, biologic and reproductive functions, behavior patterns, and population dynamics to protect and maintain the health of all people. To examine the impact of disabilities, diseases, and defects on the lives of

individuals. With this information, the NICHD hopes to restore, increase, and maximize the capabilities of people affected by disease and injury. To sponsor training programs for scientists, doctors, and researchers to ensure that NICHD research can continue. By training these professionals in the latest research methods and technologies, the NICHD will be able to conduct its research and make health research progress until all children, adults, families, and populations enjoy good health.

The mission of the NICHD is to ensure that every person is born healthy and wanted, that women suffer no harmful effects from reproductive processes, and that all children have the chance to achieve their full potential for healthy and productive lives, free from disease or disability, and to ensure the health, productivity, independence, and well-being of all people through optimal rehabilitation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grantee agrees to administer the grant in accordance with the regulations and policies governing the research grant programs of the Public Health Service as stated in the terms and conditions on the application for the grant. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2009: The NICHD and the NHLBI funded meritorious applications that focused on the link between preeclampsia and reduced thyroid function. The analysis combined two separate studies which each suggested a link between preeclampsia and reduced thyroid function. In the first study, women who developed preeclampsia were more likely to have slightly reduced thyroid functioning during the last weeks of their pregnancies. The second study found that women who had preeclampsia during their pregnancies were more likely to have reduced thyroid functioning more than 20 years after they had given birth,

when compared to women who had not had preeclampsia during pregnancy. Fiscal Year 2010: The NICHD, in collaboration with NIAID, NIDA, NIMH, NHLBI, NIDCD and NIH Office of AIDS Research plans to fund research project grant applications for the Pediatric HIV/AIDS Cohort Study (PHACS) network, supported by the NICHD Pediatric, Adolescent, and Maternal AIDS (PAMA) Branch. This initiative was established in 2005 to address two critical pediatric HIV research questions:

What is the long-term safety of fetal and infant exposure to prophylactic antiretroviral chemotherapy?

What are the effects of perinatally acquired HIV infection in adolescents. The goals of this network are to:

Create a body of data to promote better understanding of effect of HIV on sexual maturation, pubertal development, and socialization of perinatally HIV-infected pre-adolescents and adolescents; Acquire more definitive information regarding long-term safety of antiretroviral agents when used during pregnancy and in newborns; Ensure that a mechanism is in place to estimate the upper bounds of risk to children associated with the use of antiretrovirals by their HIV-infected pregnant mothers as recommended in the Public Health Service Guidelines to prevent perinatal HIV transmission; and Ensure that the follow-up of these populations continues.

The PHACS network currently consists of two protocols: the Adolescent Master Protocol (AMP); and the Surveillance Monitoring for ART Toxicities (SMARTT) Study. Both these protocols are structured to accommodate focused sub-studies in future years. Fiscal Year 2011: The NICHD will invest wisely in the strongest science, ensuring that our priorities fill critical knowledge gaps and exploit emerging opportunities, while addressing urgent public health needs. A planned NICHD initiative, utilizing the newest high-throughput genomic technologies, will leverage the research resources developed by the NIH Roadmap to support additional studies in developmental epigenetics. Epigenetic actions on gene expression may critically influence early development from before birth and at key stages throughout childhood, serving as a mediator between genetics and the environment. Thus epigenetic research will lead to a better understanding of birth defects, developmental disabilities, obesity, and other conditions.

To translate scientific knowledge into new and better treatments, the NICHD will continue to examine how medication during pregnancy and delivery affects the mother and the fetus. Researchers will examine why children respond differently than adults to certain drug therapies, and apply this knowledge to improve safety, efficacy, and dosage in children. Such studies will include cutting-edge research in pharmacogenomics, linking different pharmacological outcomes to genetic differences in individuals and laying the foundation for future research in personalized medicine.

NICHD will take strategic advantage of existing resources and infrastructure to ensure that scientific research improves health care. Scientists will assess the newest treatment approaches, but researchers will also evaluate the safety and efficacy of more established treatments for which safety and efficacy data are currently inadequate. The NICHD will invest in the development of new medical devices specifically for fragile infants in neonatal intensive care units, rather than relying on miniaturized versions of instruments designed for adults. NICHD researchers will work to identify the earliest developmental paths leading to obesity. We will address the understudied area of maternal obesity and its immediate and long-term impact on women and their children. Rehabilitation research priorities include better understanding of the immediate and long-term outcomes of critical care treatment of children and of autonomic dysreflexia, a grave and little-studied complication of spinal cord injury that often occurs unexpectedly.

The NICHD will continue efforts to promote women's and children's health around the globe, including studies to improve birth outcomes, to reduce maternal-fetal transmission of HIV, and to address interactions between iron deficiency and malaria.

Reinvigorating the U.S. biomedical research community will be essential in the

next decade. NICHD will build on successful training and career development programs to recruit and mentor the next generation of scientists. The Institutes focus on developmental processes, in both the child and the adult, will continue to provide the basic scientific and clinical insights needed to improve care for a wide range of conditions affecting many populations.

CRITERIA FOR SELECTING PROPOSALS:

The major elements in evaluating proposals include assessments of the significance of the proposed research; approach; innovation; investigators; and environment. The following criteria will be used in considering the scientific and technical merit of SBIR/STTR Phase I grant applications: (1) The soundness and technical merit of the proposed approach; (2) the qualifications of the proposed principal investigator, supporting staff, and consultants; (3) the technological innovation of the proposed research; (4) the potential of the proposed research for commercial application; (5) the appropriateness of the budget requested; (6) the adequacy and suitability of the facilities and research environment; and (7) where applicable, the adequacy of assurances detailing the proposed means for (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment. Phase II grant applications will be reviewed based upon the following criteria: (1) The degree to which the Phase I objectives were met and feasibility demonstrated; (2) the scientific and technical merit of the proposed approach for achieving the Phase II objectives; (3) the qualifications of the proposed principal investigator, supporting staff, and consultants; (4) the technological innovation originality, or societal importance of the proposed research; (5) the potential of the proposed research for commercial application; (6) the reasonableness of the budget requested for the work proposed; (7) the adequacy and suitability of the facilities and research environment; and (8) where applicable, the adequacy of (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment.

Individual NRSA awardees must be nominated and sponsored by a public or private nonprofit institution having staff and facilities suitable to the proposed research training. Nonprofit domestic organizations may apply for the Institutional NRSA. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application other than a fellowship must be assessed for scientific merit by a scientific review group and receive approval from a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

For grant programs still requiring submission of paper applications, the standard application forms, as furnished by the Public Health Service (PHS) and required by 45 CFR Part 92 for State and local governments, must be used. Consultation from institute staff is available for all grant programs. Applicants are encouraged to visit the Internet Web sites of the 27 institutes and centers at the NIH to obtain contact information for program staff. Applicants for multi-project awards are strongly encouraged to consult program staff before applying. Applicants may obtain forms and instructions for application preparation and submission at the following Internet Web site: <http://grants.nih.gov/grants/forms.htm> When completed these applications should be submitted to the Center for Scientific Review, National Institutes of Health, Bethesda, MD. Applications are reviewed for scientific merit, evaluation of applicant qualifications, adequacy of the research environment, and significance of the proposed problem to be studied. The application form and instructions for the preparation and submission of applications to the National Research Service Awards Research Training Grants and Fellowships (NRSA) Program, PHS Form 416-1, can be obtained from the following URL

(<http://grants.nih.gov/grants/funding/416/phs416.htm>). Prior to making formal application to the NRSA programs, individual NRSA applicants must be nominated and sponsored by a Federal, public or nonprofit institution having staff and facilities appropriate to the proposed research training program. Information concerning current areas of science being supported by those institutes participating in the NRSA Program at the NIH is available on the individual institute Web sites. A complete list of institutes at NIH is available at: <http://www.nih.gov/icd>. In addition, information about each institute's NRSA research topics and information about the NRSA Program can be obtained from the Division of Extramural Outreach and Information Resources, (see address above). The NRSA program is subject to the provisions of 45 CFR Part 92 for State and local governments and OMB Circular No. A-110 for nonprofit organizations. Applications to NIH's SBIR-STTR Programs must be submitted electronically through the U.S. Federal Government's Internet Web site, [Grants.gov](http://www.grants.gov). Submission of SBIR-STTR applications through [Grants.gov](http://www.grants.gov) requires pre-registration, which typically takes 2-4 weeks to complete. Information about registration to submit applications through [Grants.gov](http://www.grants.gov) can be found at: <http://era.nih.gov/ElectronicReceipt/preparing.htm>. Applicants are encouraged to read and refer to the extensive information on electronic submission of grant applications on the NIH Electronic Submission of Grants Applications Internet Web site at: <http://era.nih.gov/ElectronicReceipt>.

Award Procedure:

Grants and Institutional NRSA's: Each application receives an initial scientific review by non-NIH scientists and a secondary review by the National Advisory Council on Aging. Individual NRSA's do not receive a secondary review by the National Advisory Council on Aging. Awards are issued by the NIA to the grantee institution. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit

(commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Research grants and cooperative agreements provide funds for salaries, consultant costs, equipment, supplies, travel, patient costs, alterations and renovations, other expenses, and consortium/contractual costs. The scientists and institutions are under an obligation to expend grant funds prudently for the purposes as stated in the application and award document. The Conference Cooperative Agreement supports scientific meetings and workshops in high priority research areas to encourage exchange of information among scientists. The Center Core Grant is intended to enhance an institution's environment and capability to conduct vision research, to facilitate collaborative studies of the visual system and its disorders, and to attract scientists of diverse disciplines to research on the visual system. Career development awards include the Mentored Clinical Scientist Development Award, Mentored Patient-Oriented Research Career Development Award, Institutional Clinical Scientist Development Program, and the NIH Pathway to Independence Award. The Clinical Study Planning Grant is designed to support the development of an applied clinical research plan. NEI Research Grants for Secondary Data Analysis provide limited support for meritorious research projects that involve secondary analysis of research data generated from clinical trials, population research and other applied clinical vision research projects supported by the Institute. Bioengineering Research Grants (BRG) support basic bioengineering research whose outcomes are likely to advance health or health-related vision research. BRGs may propose to apply basic bioengineering design-directed or hypothesis-drive research to an important vision research area. Bioengineering Research Partnership grants support multidisciplinary research teams applying an integrative, systems approach to develop knowledge and/or methods to prevent, detect, diagnose, or treat diseases of the eye and visual system. NEI Translational Research Program on Therapy for Visual Disorders grants provide support to collaborative, multidisciplinary research focused on the development of novel therapies to restore or prevent the loss of function due to visual diseases and disorders. Small Business Innovation Research Phase I grants are awarded to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. Small Business Technology Transfer Research, Phase I grants are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. National Research Service Awards (NRSAs), both individual and institutional, support training in vision research. Some individuals who receive an NRSA may be obligated upon termination of the award to comply with certain service and payback provisions. The NIH Extramural Loan Repayment Programs provides payback of a portion of eligible student loan debt of qualified health professionals who agree to conduct clinical research.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

RESEARCH GRANT PROGRAMS: Research Grants are available for fundamental and applied research in biomedical informatics and bioinformatics. Areas of research interest include: representation, organization and retrieval of biomedical and biological knowledge, data and images; enhancement of human intellectual capacities through virtual reality, dynamic modeling, artificial intelligence, and machine learning; medical decision-making; linguistic

analyses for natural language processing and understanding; informatics topics relevant to public health and informatics for disaster management. Research Project Grants (R01) are available for rigorous scientific research studies and experiments. Exploratory/Developmental Grants (R21) support early, conceptual work and feasibility tests. Other research grants include Informatics Conference Grants and a number of NIH-wide grant programs on high priority topics such as health literacy. Further information on research grants is available at <http://www.nlm.nih.gov/ep/Grants.html#research>. TRAINING PROGRAMS: NLM's University Biomedical Informatics Research Training Programs promote the career training of talented persons who seek research careers in biomedical informatics, bioinformatics, clinical translational informatics, and public health informatics. A competition for these institution-based training grants is announced every five years. University-based training support may be at the pre- or post-doctoral level. Training sites recruit and choose their trainees, and are expected to have well established computer facilities, strong informatics research and education programs, experienced faculty and staff committed to research in the field of biomedical computing and/or bioinformatics, and available courses or experience in computer science, information science, and cognitive sciences. Institutional training grants provide trainee stipends, tuition and fees, travel, and certain institutional support costs. Further information on training grants is available at <http://www.nlm.nih.gov/ep/Grants.html#training>. CAREER DEVELOPMENT PROGRAMS: NLM offers an Independent Career Development award (K22) to help informatics trainees make the transition to a successful independent research career. NIH Pathway to Independence Career Development awards (K99/R00) are for investigators who are making the transition to their first research positions. These grants can last up to 5 years. They include a mentored period, followed by an unmentored period, and provide both salary and a research fund. Research supplement awards are also offered to promote diversity in health-related informatics research, and to promote re-entry into informatics careers. Diversity and re-entry awards are issued as supplements to existing research grants funded by NLM. NLM also participates in the NIH Loan Repayment Award (LRP) program. The LRP awards are available to those who qualify and will commit to two years of clinical or pediatric informatics research. Further information on career development grants is available at <http://www.nlm.nih.gov/ep/Grants.html#career>. RESOURCE GRANT PROGRAMS: NLM Information Resource Grants to Reduce Health Disparities (G08) support projects to bring useful, usable health information to health disparity populations and their health care providers. In addition, NLM offers Grants for Scholarly Works to support preparation of books in the history and philosophy of biomedicine, bioethics, and public policy areas of importance to health professionals and biomedical scientists. The purpose, restrictions, funding periods and award limits vary for these grant programs and are described in the FoAs. Further information on resource grants is available at <http://www.nlm.nih.gov/ep/Grants.html#resource>. SMALL BUSINESS RESEARCH & DEVELOPMENT PROGRAMS: Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants are made to U.S. small businesses that seek to undertake informatics research and development leading to commercialization. The STTR program requires a small business applicant organization to formally collaborate with a research institution in Phase I and Phase II. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. Further information on SBIR/STTR grants is available at <http://www.nlm.nih.gov/ep/Grants.html#small>.

Applicant Eligibility:

Any individual(s) with the skills, knowledge, and resources necessary to carry out the proposed research as the project director/principal investigator (PD/PI) is invited to work with his/her organization to develop an application for support. Individuals from underrepresented racial and ethnic groups as well as

individuals with disabilities are always encouraged to apply for NIH support. See Beneficiary Eligibility below for further details.

Beneficiary Eligibility:

Research Grants are available to public or private, domestic or foreign, for profit or not-for-profit institutions or organizations with research capabilities in biomedical informatics, bioinformatics, computer sciences, information sciences and related disciplines. With the exception of NIH Pathway to Independence awards, trainees or fellows must be citizens or non-citizen nationals of the United States or have been lawfully admitted to the United States for permanent residence. Resource grants (Information Resource, Scholarly Works) are open to any U.S. public or private nonprofit institution or organization. SBIR and STTR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Credentials/Documentation:

Cost allowability will be determined in accordance with OMB Circular A-87 for State, Local, and Indian Tribal Governments, OMB Circular A-21 for Educational Institutions and for For-profit organizations, costs will be determined in accordance with 48 CFR Subpart 31.2 Federal Acquisition Regulation (FAR). Nonprofit institutions cost principles are outlined under OMB Circular A-122 and for Hospitals, 45 CFR Part 74, Appendix E. These cost principles are codified under 45 CFR 74.27 and 92.22. Uniform Administrative Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations are outlined in OMB Circular A-110. Documentation providing NIH grants policy and guidance can be found at <http://grants.nih.gov/grants/policy/policy.htm>. For NLM resource grants, these include considerations as to relevance to program objectives; impact on the management and transmission of biomedical knowledge; institutional readiness and resources available to project; expertise of project director and key personnel; scientific or technical merit of project; sustainability of what is deployed, and appropriateness of budget. Comparative priorities on the above criteria are based on collective judgment of peer reviewers. The

following criteria are used in considering the scientific and technical merit of SBIR/STTR Phase I grant applications: (1) The soundness and technical merit of the proposed approach; (2) the qualifications of the proposed principal investigator, supporting staff, and consultants; (3) the scientific, technical, or technological innovation of the proposed research; (4) the potential of the proposed research for commercial application; (5) the appropriateness of the budget requested; (6) the adequacy and suitability of the facilities and research environment; and (7) where applicable, the adequacy of assurances detailing the proposed means for (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment. Phase II grant applications are reviewed based upon the similar criteria, and on the degree to which the Phase I objectives were met and feasibility demonstrated. CRITERIA FOR SELECTING PROPOSALS:

FLRP - The applicant will be rated on the extent to which the individual meets the intent of the program to expand disadvantaged representation in health professions faculty positions.

MFFP:

Overview: The health professions school should provide information that adequately documents the need and data relative to the school's experience and ability to identify, recruit, select and train underrepresented minority faculty. In addition to teaching, acquiring administrative skills and conducting research, the fellow must also provide health care services, especially as a means of meeting community needs for reducing barriers to health care services to rural or under-served populations. The application should also include a discussion of how the development of underrepresented minority faculty, through use of the fellowship program, will enhance the participant's academic career potential and community service abilities.

Review Criteria are used to review and rank applications. The Minority Faculty Fellowship Program has 6 review criteria:

(1) Need: This includes the extent to which the application describes the problem (e.g. lack of Minority Faculty), and associated factors contributing to this problem.

(2) Response: (a) Faculty Recruitment: This includes the extent to which the school demonstrates that it has the commitment and ability to identify, recruit, and select underrepresented minority individuals who have the potential for teaching, administration, and/or conducting research at a health professions institution; and (b) Faculty Development: This includes the extent to which the schools faculty training program will provide the fellow with the preparation, training, and skills needed to secure a tenured faculty position. The Faculty Development Plan should include the provision of counselors and protected time for research and faculty development. Training may include: pedagogical skills, including teaching experience; program administration; grant writing; research methods and design; and preparation of articles suitable for publication

in peer reviewed journals.

(3) Impact: Faculty Training in Providing Health Service - This includes the extent to which the Fellow is available to provide health services to rural or medically underserved populations.

(4) Resources/Capabilities: This includes the extent to which project personnel are qualified by training and/or experience to implement and carry out projects. This includes the capabilities of the applicant organization; and the quality and availability of facilities and personnel to fulfill the needs and requirements of the proposed project.

(5) Support Requested: This includes the extent to which the overall budget, including non-trainee expenses, is cost effective, reasonable, and consistent with the stated objectives and proposed activities. Expenditures are well justified and in-kind contributions are documented.

(6) Evaluative Measures: This includes the methodology that will be used to monitor and evaluate the project results. Evaluative measures must be able to assess to what extent the program objectives have been met.

93.917 HIV Care Formula Grants; 93.918 Grants to Provide Outpatient Early Intervention Services with Respect to HIV Disease

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2009: Fiscal Year 2009:

The Special Projects of National Significance Enhancing Access to and Retention in Quality HIV/AIDS Care for Women of Color Initiative is a multi-site demonstration and evaluation of HIV service delivery interventions for women of color, a population at increasing risk to HIV/AIDS. The initiative funds eleven demonstration sites for up to five years to design, implement and evaluate innovative methods for enhancing access to and retaining women of color living with HIV/AIDS in primary medical care and ancillary services. Interventions include community-based outreach, patient education, intensive case management and patient navigation strategies that promote access to care. The Albert Einstein College of Medicine, the evaluation and support center for this initiative, coordinates the multi-site evaluation and provide programmatic technical assistance to the demonstration sites. The study evaluation design assesses the effectiveness of the selected model(s) in enhancing access to and retention in HIV/AIDS care for women of color. Fiscal Year 2010: Fiscal Year 2010:

The Special Projects of National Significance Hepatitis C Treatment Expansion Initiative will implement and evaluate successful HCV treatment modalities into Ryan White-funded HIV medical care settings. This initiative will award

funds for up to two years to support organizations funded under the Ryan White Program to implement and evaluate interventions designed to provide Hepatitis C (HCV) treatment in the context of Ryan White-funded HIV primary care. HCV treatment is currently underutilized due to both resource and capacity issues. In order to expand HCV treatment, successful applicants must incorporate HAB identified clinical treatment settings and program components in their interventions. A national Evaluation and Technical Assistance Center (ETAC) will be funded to provide clinical and technical support to the demonstration sites. Fiscal Year 2011: The Special Projects of National Significance Health Information Technology Capacity Building Initiative for Ryan White HIV/AIDS Program AIDS Drug Assistance Program (ADAP) grantees will support Ryan White Part B grantees in building capacity in their Health Information Technology (HIT) systems to report client level data for recipients of AIDS Drug Assistance Program (ADAP) services. ADAP provides medications for the treatment of HIV disease, and ADAP funds may also be used to purchase health insurance for eligible clients and for services that enhance access to, adherence to, and monitoring of drug treatments. The program is funded through Part B of the Ryan White HIV/AIDS Treatment Extension Act of 2009 which provides grants to States and Territories. ADAP grants are awarded to all 50 States, the District of Columbia, Puerto Rico, Guam, the U.S. Virgin Islands, and the Pacific Jurisdictions.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In

accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

The NIH will maintain applicant records for 3 years after rejection and participant records for 6 years after completion of final service obligation. Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

93.938 COOPERATIVE AGREEMENTS TO SUPPORT COMPREHENSIVE SCHOOL HEALTH PROGRAMS TO PREVENT THE SPREAD OF HIV AND OTHER IMPORTANT HEALTH PROBLEMS

(SHEPSA)

FEDERAL AGENCY:

Centers for Disease Control and Prevention, Department of Health and Human Services

OBJECTIVES:

To improve the health and well-being of youth and prepare them to be healthy adults.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Cooperative Agreement funds may be used to support personnel, purchase equipment, supplies, services, and travel directly related to the program activities and consistent with the scope of this program. Cooperative agreement funds are used to help schools prevent sexual risk behaviors that result in HIV infection, especially among youth who are at highest risk. For example, cooperative agreement recipients implement and integrate effective policies and educational strategies to reduce risk behaviors that lead to HIV infection among youth; implement strategies to reduce disparities among sub-populations of youth disproportionately affected by HIV infection and other health problems related to sexual risk behaviors; evaluate the implementation and effectiveness of strategies to reduce risks for HIV infection among youth in schools for the purposes of programmatic improvement and long-range planning. CDC believes that the specific scope and content of HIV education programs in schools should be locally determined and should be consistent with parental and community values. CDC supports local decision-making by providing sound scientific information to grantees who work directly with schools, communities,

and parents. Funds may be expended for written materials, pictorials, audiovisuals, questionnaires or survey instruments, and educational group sessions related to HIV education for youth, school, and college populations if approved in accordance with the document "Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs." Cooperative agreement funds are also used to build state education and state health agency partnership and capacity to implement and coordinate school health programs across agencies and within schools. The expected outcome of this effort is to help schools reduce chronic disease risk factors, including tobacco use, poor nutrition, and physical inactivity. For example, cooperative agreement recipients implement and integrate effective policies, environmental changes, and educational strategies to reduce unhealthy behaviors; leverage resources to avoid duplication at the state and local levels; evaluate school health capacity-building efforts while implementing effective strategies to reduce priority health risks. Funds may not be used to conduct research projects, provide direct delivery of patient care or treatment services, and purchase or disseminate condoms. Although public health may have an assurance role in clinical testing and screening, funds are not to be used to provide clinical testing or screening services. Funds may not be used for purchasing computer equipment, office equipment or furnishing, renting or leasing office space, or to support construction or renovation unless specifically approved.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify

the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants.

In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. OBJECTIVES:

For more than fifteen years, the Corporation for National and Community Servicethrough its Senior Corps, AmeriCorps, and Learn and Serve America programshas mobilized a new generation of engaged citizens. This year, more than 1.8 million individuals of all ages and backgrounds will serve through these programs. They will help thousands of national and community non-profit organizations, faith-based groups, schools, and local agencies meet local needs in education, the environment, health, veterans, economic opportunity, and other critical areas.

AmeriCorps grants are awarded to eligible organizations that identify an unmet need in their community that will be addressed by AmeriCorps members that the organization recruits, trains, and manages. An AmeriCorps member is an individual who is enrolled in an approved national service position and engages in community service. Members may receive a living allowance and other benefits while serving. Upon successful completion of their service, members receive an education award from the National Service Trust.

AmeriCorps grant funding is distributed to Governor-appointed State Commissions and multi-state grantees. State Commissions award subgrants to organizations in their states, and the multi-state grantees work through operating sites in more than one state. These organizations recruit AmeriCorps members to respond to local needs.

Additional funding opportunities are available to existing AmeriCorps Programs under the American Recovery and Reinvestment Act (Recovery Act) funds to utilize service and volunteerism to stimulate the economy and meet the needs of those negatively impacted by the current economic crisis. Through AmeriCorps Recovery grants, individuals currently unemployed will gain work

experience and valuable skills, and nonprofit organizations and communities negatively affected by the economic crisis will gain critical human resources. Eligible activities include providing job counseling and skills training to the unemployed, constructing or rehabilitating housing, assisting nonprofits facing increased need and decreased resources, recruiting volunteers, making housing resource referrals for and providing legal services to those experiencing eviction or foreclosure, connecting children and families to health care, and allowing after-school centers that have lost funding to stay open.

USES AND USE RESTRICTIONS:

Volunteer: Provides full-time, full- year volunteers to local sponsoring organizations to work on clearly- defined tasks which help build sustainable anti poverty programs. The volunteers live among the people they serve at subsistence levels of support. All volunteers work to improve the community's ability to solve its own problems. Members of the poor community should actively participate in the development and implementation of the project. Projects must be responsive to the needs and desires of the people who are to benefit from them in order to be funded by VISTA. Volunteers are not to supplant hiring or displace employed workers, or impair existing contracts for service. No agency supervising volunteers shall request or receive compensation for services of the volunteers. Volunteers are not to be involved in, and funds are not to be used for, religious activities, labor or anti-labor organization, lobbying, or partisan or non-partisan political activities. Volunteers may be recruited locally to serve in their own communities or referred by the Corporation for National Service to sponsoring organizations in other parts of the country based on the volunteers' skills and project needs.

Applicant Eligibility:

Sponsors applying for VISTA Volunteers must be Federal, State or local government agencies or private, nonprofit organizations. The project proposing to use the volunteers must have a clear anti-poverty focus.

Length and Time Phasing of Assistance:

VISTA Volunteers are assigned to a project for a given length of time, generally 1 year, as designated in a Memorandum of Agreement between Corporation for National Service and the sponsor. Individual volunteers commit themselves to a 1- year term of service which may be extended with sponsor and Corporation for National Service approval. Note that, with certain small exceptions, the VISTA program does not grant financial resources to organizations, but rather provides the resource through the placement of a VISTA member. Method of awarding/releasing assistance: lump sum.

Reports:

Quarterly Project Progress Reports in first year; semi- annual thereafter unless requested otherwise by Corporation State Office. Annual VISTA Progress Report Supplement(VPRS) report. In the case of VISTA projects that receive small cash grants, HHS Payment Management System collects quarterly cash

OBJECTIVES:

To encourage greater State participation in response to actual or threatened discharges of oil.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Funds are to be used for immediate removal action costs that are directly related to a specific incident which occurs after August 18, 1990. Removal costs must

generally be incurred at the site or in support of site removal activities (e.g., salary costs for State officials actually engaged in the removal actions, transportation costs for transporting persons and materials to the site, costs of equipment usage and consumable, contract costs, and administrative costs for preparing reports and documenting actions which occurred at the site). Limited to \$250,000 per incident. Removal actions must be consistent with the National Contingency Plan (40 CFR 300) and must be approved by the cognizant Coast Guard or Environmental Protection Agency (EPA) Federal On-Scene Coordinator (FOSC). Remedial actions and restorations are ineligible. Funds are to be used for immediate removal action costs that are directly related to a specific incident which occurs after August 18, 1990. Applicant Eligibility:

The Governor (or his or her designated State official) of any State including Puerto Rico, Guam, American Samoa, U.S. Virgin Islands, Northern Marianas, and any other U.S. territory or possession may apply for financial assistance.

Beneficiary Eligibility:

State Governors.

Credentials/Documentation:

Applicant must either be the Governor of a State or have on file at the NPFC a letter signed by the Governor designating the applicant to be a State official authorized to make a request. The application must establish: (1) the incident is eligible for immediate removal under the Clean Water Act, as amended by OPA 90, (2) the substance discharged or threatening discharge is oil, (3) the incident occurred after August 18, 1990, (4) the aggregate amount of the request is equal to or less than \$250,000, (5) the proposed removal actions are consistent with the NCP (including 40 CFR 300.305(c)'s requirement that a reasonable effort is made to have the discharger voluntarily and promptly perform removal actions), (6) the proposed level of response, proposed actions, and money requested are appropriate for the circumstances, and (7) the State has the means to complete the immediate removal. Detailed application requirements are included in publication entitled Technical Operating Procedures for State Access under Section 1012(d) of OPA 90 (NPFCINST 16451.1). OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Application is initiated when the Governor or his or her designated State official contacts the cognizant Federal On-Scene Coordinator (FOSC) and requests State access to the Oil Spill Liability Trust Fund (OSLTF, or "the Fund") under 33 CFR 133. This initial request may be made verbally. If the FOSC agrees that the incident is eligible for State Access funding and that State access to the Fund is the best method for addressing the incident, the FOSC will seek obligation of the Fund from the National Pollution Funds Center (NPFC). Since the approval of a request establishes a Cooperative Agreement between the Coast Guard and the State, the provisions of 49 CFR 18 apply to the State Access process.

Award Procedure:

The National Pollution Funds Center will notify the State via telephone and hard copy of the award approval and amount.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

97.022 FLOOD INSURANCE

FEDERAL AGENCY:

Department of Homeland Security

AUTHORIZATION:

The National Flood Insurance Act of 1968, 42 U.S.C. 4001 et seq. authorized the National Flood Insurance Program (NFIP).

OBJECTIVES:

To enable personal and business property owners and renters to purchase flood insurance coverage for buildings and/or contents in low-to-moderate flood risk areas, as well as in high-risk flood zones to reduce taxpayer provided federal disaster assistance and to promote wise floodplain management practices in the Nation's high-risk flood zones.

TYPES OF ASSISTANCE:

INSURANCE

USES AND USE RESTRICTIONS:

The maximum limits of flood insurance coverage for a building and/or personal property, eligible building types, and more detailed additional flood insurance information is contained in the Flood Insurance Manual available online at <http://www.fema.gov/business/nfip/manual.shtm>. In a Regular Program Community the residential building limit is \$250,000 and non-residential building limit is \$500,000. The residential contents limit is \$100,000 and the non-residential contents limit is \$500,000. Lower limits apply to a limited number of Emergency Program buildings and buildings in Alaska, Guam, Hawaii and U.S, Virgin Islands and are listed in the Flood Insurance Manual. The Flood Disaster Protection Act of 1973, as amended by the Flood Insurance Reform Act of 1994, requires flood insurance purchased as a condition of any form of Federal or federally-related financial assistance, including Federal grants, disaster assistance, SBA low-interest disaster assistance loans, and mortgage loans from federally regulated lending institutions and FHA, Farm Credit Administration, VA or guaranteed mortgages secured by buildings in high-risk flood zones, which are called the Special Flood Hazard Areas (SFHAs). Communities having one or more identified SFHAs must enter into the NFIP within 1 year of the official identification of the SFHAs or be denied Federal financial assistance for acquisition or construction purposes within those areas. Federally regulated conventional sources (i.e., banks, savings and loan associations, or similar lending institutions) are permitted to make conventional loans secured by improved real estate or Manufactured Housing located or to be located in SFHAs of a nonparticipating community which has been formally identified as flood-prone for more than 1 year, but Federal disaster assistance for acquisition or construction purposes will not be available in the event of flood or flood-related property damage. The conventional lender is statutorily required to notify the borrower, before making a loan in such an area, that Federal flood insurance and disaster assistance will not be available to the property. The Coastal Barrier Improvement Act of 1990 amended the Coastal Barrier Resources Act of 1982 by greatly enlarging the acreage included in the designated coastal barrier resources system unit. The 1990 Act also added "otherwise protected areas." "Otherwise protected areas" are defined as an undeveloped coastal barrier within the boundaries of an area established under Federal, State, or local law, or held by a qualified organization, primarily for wildlife refuge, sanctuary, recreational or natural resource conservation purposes. The 1982 Act prohibits the sale of new flood insurance on or after October 1, 1983 for new construction or substantial improvements of structures located on any coastal barrier with the Coastal Barrier Resources System designated by this Act. The 1990 Act prohibits the sale of new flood insurance on or after November 16, 1990 for new construction or substantial

improvements of structures located on any new coastal barrier within the Coastal Barrier Resources System designated or modified by this Act. It also prohibits the sale of new flood insurance on or after November 16, 1991 for new construction or substantial improvements of structures located in an otherwise protected area that are not used in a manner consistent with the purpose of the otherwise protected area. Subsequent pieces of legislation have added or deleted areas. Also, the Secretary of the Interior is authorized to make technical revisions and modifications to the boundaries of such units as may be necessary.

Applicant Eligibility:

Federal flood insurance can be made available in any community (a State or political subdivision thereof with authority to adopt and enforce floodplain management measures for the areas within its jurisdiction) that adopts and enforces floodplain management measures consistent with the National Flood Insurance Program regulations.

Beneficiary Eligibility:

Residential and business property owners, renters and state owned property.

Credentials/Documentation:

Same as Applicant Eligibility. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Community officials must submit an NFIP eligibility application form, which is available from the FEMA, together with: copies of adopted floodplain management measures meeting the minimum standards of 44 CFR Section 60.3(a), 60.3(b), 60.3(c), 60.3(d), and/or 60.3(e), as appropriate for the type of flood hazards identified; a list of any incorporated communities within the applicant's boundaries; and estimates of population and, by kind, of buildings situated in the known flood-prone areas of the community. Such Applications should be submitted to the Mitigation Directorate, FEMA, Washington, DC 20472.

Award Procedure:

FEMA reviews the application and if complete, designates the community as participating. The community is informed of its admission, and notice is published in the Federal Register. Residents and property owners may then purchase flood insurance through any property insurance agent or broker.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

For complete applications, a maximum of 10 working days is allowed for review and notification.

Communities with one or more identified special flood hazard areas must enter the program within 1 year after the identification of those areas or else prohibitions against Federally related financial assistance for acquisition or construction purposes in identified special flood hazard areas take force. Once the community does qualify, after the prescribed date, these prohibitions are removed. Adequate floodplain management measures must be in effect within 6 months of the date that the special flood hazard area is identified and within 6 months of the date flood water surface elevations are provided.

Appeals:

Communities are allowed to appeal flood-prone identification and are also given an opportunity to appeal proposed flood elevation determinations for new construction and substantial improvement of existing structures in the special flood hazard areas. Notice of the proposed elevations is published in the Federal Register and is sent directly to the local governments. Following notification to the local government, the notice of proposed flood elevation determinations is published twice during a 10-day period in a prominent newspaper. The local community and its individual residents then have 90 days following the second

newspaper notice to submit any scientific or technical data that tend to negate or contradict FEMA's findings. If a conflict in data exists and cannot be resolved at the community level, the community consolidates all individual appeals for review by FEMA. FEMA shall resolve the appeals by consultation with officials of the local government, or by submission of conflicting data to an independent scientific body, or by administrative hearings.

OBJECTIVES:

To provide, through a State grant mechanism, a means to ensure that communities participating in the National Flood Insurance Program (NFIP) are achieving flood loss reduction goals of the NFIP. CAP-SSSE funds are to be used by States to provide technical assistance to NFIP communities, to evaluate community implementation/performance of NFIP floodplain management activities, and to build State and community floodplain management expertise and capacity.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Uses: CAP-SSSE funds are used for activities that support the NFIP. Such activities include the fostering of effective floodplain management programs in participating communities and assisting non-participating communities in enrolling in the NFIP. Restrictions: CAP-SSSE funds cannot be used for conducting floodplain studies or developing floodplain maps. Further, if a State does not have the necessary expertise and capability to conduct CAP-SSSE activities, the Region and State must develop a remedial plan. If the necessary expertise and capability does not develop in accordance with the remedial plan, the following year's CAP-SSSE funding may be reduced or withheld. For complete information on Uses and Restrictions, refer to program guidance. Applicants must be a qualified State that intends to provide technical assistance to NFIP communities. Refer to program guidance for complete information on applicant eligibility.

Applicant Eligibility:

FEMA's ten Regional Offices will provide each State Governor's Office with the grant application package. The CAP-SSSE is administered through the Mitigation Division of each FEMA Regional Office. FEMA's Regional Offices will contact eligible States to negotiate a mutually acceptable grant agreement. Funding is made available when the grant agreement is negotiated and agreed upon. Continued participation in the CAP-SSSE is dependent upon completing activities described in the grant agreement. The SSSE is designed to utilize the floodplain management capabilities of individual States in a cost effective cooperative agreement with FEMA. A State's participation in the SSSE is voluntary and is contingent upon need and skill level capability.

Beneficiary Eligibility:

In addition, participating NFIP communities and local governments which receive flood plain management and flood loss reduction assistance provided by the State are also (indirect) beneficiaries as a consequence of the services they receive.

Credentials/Documentation:

A State's participation in the CAP-SSSE is voluntary and is contingent upon

97.024 EMERGENCY FOOD AND SHELTER NATIONAL BOARD PROGRAM

FEDERAL AGENCY:

Department of Homeland Security

AUTHORIZATION:

Stewart B. McKinney Homeless Assistance Act of 1987, as amended, Title 3, Section 301-322, Public Law 100-77, 42 U.S.C 11331-11352.

OBJECTIVES:

To supplement and expand ongoing efforts to provide shelter, food, and supportive services for needy families and individuals. To strengthen efforts to create more effective and innovative local programs by providing supplemental funding for them. To conduct minimum rehabilitation of existing mass shelter

or mass feeding facilities, but only to the extent necessary to make facilities safe, sanitary and bring them into compliance with local building codes.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Food and related expenses (such as transporting food/food preparation and serving equipment); mass shelter; other shelter (such as hotels and motels); and rent/mortgage and/or utility assistance limited to one month; and limited repairs to feeding and sheltering facilities. Emergency Food and Shelter National Board Program funds cannot be used for: rental security, deposits of any kind, cash payments of any kind, lobbying efforts, salaries (except as administrative allowance and limited to that total allowance of 2 percent of total award), purchases or improvements of an individual's private property, telephone costs, repairs to government-owned or profit-making facilities and any payments for services not incurred. For a complete listing on eligible and ineligible costs under this program, refer to the current Phase (fiscal year): Responsibilities and Requirements, issued by the Emergency Food and Shelter Program National Board. Emergency Food and Shelter (EFS) National Board Program (EFSP) funds cannot be used for: rental security, deposits of any kind, cash payments of any kind, lobbying efforts, salaries (except as administrative allowance and limited to that total allowance of 2 percent of total award), purchases or improvements of an individual's private property, telephone costs, repairs to government-owned or profit-making facilities and any payments for services not incurred. For a complete listing on eligible and ineligible costs under this program, refer to the current Phase (fiscal year): Responsibilities and Requirements, issued by the Emergency Food and Shelter Program National Board.

Applicant Eligibility:

Since funds are initially distributed to jurisdictions based on either a National Board formula or recommendations from State Set-Aside Committees, there is no application process for jurisdictions. All jurisdictions are considered within the National Board formula and all jurisdictions in an individual State may be considered by the State Set-Aside Committee for either initial or additional (if the jurisdiction had previously been selected by the National Board) funding.

Beneficiary Eligibility:

The law directs that the Local Boards, which manage the program at the local level, shall "determine which private nonprofit organizations or public organizations of the local government in the individual locality shall receive grants to act as service providers." The range of participant groups on the Local Boards include the affiliates of the National Board membership which consists of American Red Cross, Catholic Charities USA, National Council of Churches of Christ in the U.S.A., The Jewish Federations of North America, The Salvation Army, and United Way Worldwide, with a local government representative replacing FEMA. Also participating are thousands of independent nonprofits (such as Community Action Agencies and Food Banks and food pantries) which provide food and/or shelter services. Due to the broad category of people in need of such emergency services, the providers can include specialized groups such as domestic violence shelters, Native American organizations, and organizations providing food or shelter to: AIDS patients, handicapped individuals, the elderly, homeless veterans, non-wards of the State teenage runaways, and many other groups with emergency food and shelter needs. As noted earlier, the decisions on selections are made through the consensus of the Local Board as they have assessed their community's most urgent needs. It is important that such agencies use these funds to supplement, not replace, their current efforts. This program is intended to supplement ongoing programs and allow them to extend and expand upon their existing services.

Credentials/Documentation:

The program employs a Local Recipient Organization Certification Form. This form certifies an applicant's status (i.e., that it is a nonprofit or government agency capable of delivering eligible services) and that it will abide by the program guidelines (both on eligible spending and reporting requests), and comply with other fiscal and program rules so stipulated. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

At the local level, following award notification, a Local Board is formed. That

board then advertises the availability of the funds to local nonprofit agencies and governments. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. There is no application process for local jurisdictions since the award notification to local jurisdictions is based on either a National Board formula or recommendations from State Set-Aside Committees.

Award Procedure:

Applications or plans are submitted to the National Board and reviewed by the National Board program.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Refer to announcement or application guidance for further information.

Appeals:

Refer to the Emergency Food and Shelter National Board Program, "Phase 27: Responsibilities and Requirements" document for information on the appeal process. Those cases that cannot be handled locally should be referred to the National Board giving details on action that has been taken up to that point. Any allegations regarding fraud or the misuse of funds should be referred directly to the DHS Office of Inspector General.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.

Matching Requirements: Fire Management Assistance Grants may be available to States on a 75 percent Federal/25 percent nonfederal cost-sharing basis when we determine that the State's application demonstrates either of the following: total eligible costs for the declared fire meet or exceed the individual fire cost threshold or total costs of all declared and non-declared fires in a given calendar year meet the cumulative fire cost threshold. The individual fire cost threshold for a State for FY 2010 is the greater of \$100,000 or five percent x \$1.29 x state population. The cumulative fire cost threshold for a State FY 2010 is the greater of \$500,000 or three times the five percent x \$1.29 x State population. Both formulas are adjusted annually for inflation using the Consumer Price Index for All Urban Consumers published annually by the Department of Labor.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

The time interval during which a declared fire occurs is the incident period. Generally costs must be incurred during the incident period to be considered eligible. Pre-positioning of resources may be approved for Federal funding up to a maximum of 21 days before a declared fire. Mobilization and demobilization also occur outside the incident period and are eligible for Federal funding. Temporary repair work must be completed within 30 days of the close of the incident period for the declared fire. See the following for information on how assistance is awarded/released: Payment based on Project need.

Reports:

Within 90 days of the Performance Period expiration date, the State must submit a Financial Status Report (FEMA Form 425) which reports all costs incurred within the incident period and all administrative costs incurred within the performance period. The performance period, defined on the SF-424, may be 9 months from the close of the incident period and may be extended for an additional 3 months by the Regional Administrator. During the performance period the Grantee will submit the subgrants, which document eligible costs; FEMA will review the eligibility of costs, and process, obligate, and close-out the grant. See program guidance. See program guidance. See program guidance. See program guidance.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

Records:

Grant records shall be retained for a period of 3 years from the day the recipient submits its final expenditure report. If any litigation, claim, negotiation, audit, or other action involving the records has been started before the expiration of

the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later.
