Note: Cohort enrollment inconsistencies occur because of withdrawals due to personal considerations (e.g., illness, relocation, etc.) and the periodic inclusion of exchange students. Retention rate and graduation rate percentages are based on actual ID majors.

Job placement rates are calculated based on the most accurate information on file to date. Percentages are provided tracking the individuals known to be in the market for an ID position as well as for the entire class. At the time of this posting, current year spring graduates are in progress in their pursuit of employment.
