Course Goals of	or Overview	<i>,</i> -	G-IIIaii. IUIZII	igi @ meg.ioliett.com				
			to introduce students to	environmental scien	ce and to give students the			
	The goal of this course is to introduce students to environmental science and to give students the background information needed to critically think about current environmental issues. Topics will include							
basic ecology, a review of environmental policy and resource management theories. The course will								
include discussions of current environmental and conservation challenges. Students will be willing and								
		heir opinions on these	subjects as well as be	e respectful of the opinions of				
others.								
Learning Object			At the end of this cou		and the second second second second			
	Be able to explain the conflicting biological, social, economic and needs of humanity and other living							
	organisms Demonstrate the shillfulte and critically think about any ironmental issues, any ironmental policy							
	Demonstrate the ability to assimilate and critically think about environmental issues, environmental policy							
	and legislation Define the role of organisms in their environment and the interrelatedness of organisms and environment.				ess of organisms and environmental			
	processes							
- I global data and a second and all a second and all a second and a s								

Course Outline

This schedule is subject to change by the instructor. Any changes to this schedule will be communicated by the instructor in class.

TOPICS	TIMELINE
Course Introduction and Environmental Dilemmas We Face (Chapter 1)	1/21
Environmental Dilemmas We Face (Chapter 1)	1/26
Environmental Sustainability (Chapter 2)	1/28
Environmental Sustainability (Chapter 2)	2/2
Environmental History, Politics and Economics (Chapter 3)	
Environmental History, Politics and Economics (Chapter 3)	2/4
Risk Analysis (Chapter 4)	2/9
Risk Analysis (Chapter 4)	2/11
Exam I (Chapters 1-4)	2/16
Library Instruction – Research Literacy	2/18
How Ecosystems Work (chapter 5)	2/23
How Ecosystems Work (chapter 5)	2/25
Ecosystems and Evolution (Chapter 6)	
Ecosystems and Evolution (Chapter 6)	3/2
Human Population Change and the Environment (Chapter 7)	3/4
Human Population Change and the Environment (Chapter 7)	3/9
Exam II (Chapters 5-7)	3/11
Thesis Statement for Research Paper due on Blackboard via Turnitin	
SPRING BREAK	3/16-3/20
Air and Air Pollution (Chapters 8)	3/23
Global Climate Change (Chapters 9)	3/25
Global Climate Change (Chapters 9)	3/30
Freshwater Resources and Water Pollution (Chapters 10)	
Freshwater Resources and Water Pollution (Chapters 10)	4/1
Movie: The Estrogen Effect – Assault on the Male	4/6
Exam III (Chapters 8-10)	4/13
Biological Resources (Chapter 15)	4/15
Biological Resources (Chapter 15)	4/20
Research Paper due on Blackboard via Turnitin	
Solid and Hazardous Waste: An unrecognized Resource (Chapter 16)	4/22
Nonrenewable Energy Resources (Chapter 17)	4/27
Nonrenewable Energy Resources (Chapter 17)	4/29
Renewable Energy Resources (Chapter 18)	
Renewable Energy Resources (Chapter 18)	5/4
Movie: Kilowatt Ours	
Energy Discussion Question and Activity	5/6
Final Exam IV (Chapters 15-18)	5/13

Course Evaluation Methods

This course will utilize the following instruments to determine student grades and proficiency of the learning outcomes for the course.

Grade determination: Separate letter grades will not be assigned for the lab. While laboratory accounts for 28.6% of your grade (200 of 700 points), you must receive a passing grade (60% or higher) in the laboratory to receive a passing grade in the class.

Exams –You will be given four in-class examinations. Each exam is worth 100 points. The exams will consist of a combination of multiple choice questions. **Attendance is required for all exams**. **No makeup examinations will be allowed except for documented emergencies** Any student found cheating on an exam will receive a zero for the exam and may face other disciplinary action. **Note: 882-E scantrons and pencils are required for every exam.**

Presentation and Research Paper – You will give a presentation on an environmental issue that our society is currently facing. Your presentation, which will be made in class (laboratory section), should be approximately 10 minutes and include a description of the issue, the causes of the issue and potential resolutions. You will also submit a **5 page research paper** that addresses the biological, social, and economic arguments of the environmental issue that you chose to present. **A <u>thesis statement</u> for the research paper must be submitted and approved by the respective date.** Both the research paper and thesis statement will be submitted on Blackboard via Turnitin.

Energy Resource Discussion – We will have a class discussion on an environmental science issue that will be communicated by the instructor in advance. Students should come prepared to discuss the topic knowledgably and effectively. Student participation in the discussion will be graded and will be incorporated into the total grade as bonus points.

Lab Assignments - You will perform experiments designed to give you hands-on real-world applications of the lecture material. In some cases, you will watch documentaries to complement the experiments. After each laboratory exercise, you will have an associated lab report or lab assignment worth 10-20 points. Each assignment is due at the beginning of the next lab session. Late assignments will be graded, but with a penalty of 10% each day it is late.

Grading Matrix:

Ordania matrix.				
Instrument	Value (points)			
Exam 1	100			
Exam 2	100			
Exam 3	100			
Exam 4	100			
Presentation	50			
Research Paper	50			
Laboratory	200			
Total:	700			

Grade Determination:

A = 90% or better

B = 80 - 89 %

C = 70 - 79 %

D = 60 - 69 %

F = less than 60%

TEXAS CORE CURRICULUM

Student Learning Objective and Outcome Assessments:

Objective 1a, 2a, 2b and 2d: Students will write an argument style paper on an environmental issue that incorporates biological, social, and economic arguments. This will introduce them to the tools required for research in many disciplines, and facilitate successful research in the future. Students will be graded on content, spelling and grammar, references (one of which must be from the internet), the strength of the argument, and the extent to which they have thought critically about the causes and effects of the issue and the feasibility of the proposed resolutions. The student will then present the information they have collected to the class using a variety of media including, power point, prezi, posters, or any combination of these.

Objective 2c: During the unit exploring energy sources, students are presented an essay question in which they discuss the use of fossil fuels for energy from an environmental and non-environmental viewpoint. Students must construct a solution that adequately resolves the conflict. Students will be graded on the correctness of the discussion and the feasibility of the proposed resolution.

Objective 3a and 3b: Students will participate in a discussion of alternative energy sources and their environmental sustainability. Students will be graded on their participation.

Assessment Rubrics:

Objective: 1a, 2a, 2b and 2d: Topic choice and applicability to environmental science (5 points) Is the paper topic appropriate for the class?
Content (25 points) Has the student provided adequate background information and summarized it correctly? Have appropriate conclusions been drawn from background information? Has an original idea, supported by evidence, been proposed by the student? Has the student made an effective closing argument or statement?
Formatting, grammar, spelling, and style (10 points) Is the paper formatted correctly based on the requirements outlined? Are there spelling and grammatical errors? If so, with what frequency and intensity do they appear?
Literature Cited (10 points) Are the citations formatted properly in both the text and the literature cited section? Does the number of citations meet the requirements outlined (a minimum of 5, with at least 3 peer-reviews sources)? Are the citations appropriate for the topic?

Objective: 3a and 3b

Score:	Description
4 – Exceeds expectations	The student contributed to the discussion by offering his/her opinion, or by clarifying a topic of conversation. The information shared by the student will demonstrate that he/she has assimilated course curriculum and curriculum obtained from extra readings, or research, or both.
3 – Acceptable	The student contributed to the discussion by offering his/her opinion, or by clarifying a topic of conversation. The information shared by the student will demonstrate that he/she has assimilated course curriculum
2 – Below expectations	The student contributed to the discussion, but the comments made by the student demonstrated a lack of understanding of course curriculum
1 – Unacceptable	The student did not contribute to the discussion

University Policies and Procedures

Students with Disabilities (ADA Compliance):

The University of North Texas Dallas faculty is committed to complying with the Americans with Disabilities Act (ADA). Students' with documented disabilities are responsible for informing faculty of their needs for reasonable accommodations and providing written authorized documentation. Grades assigned before an accommodation is provided will not be changed as accommodations are not retroactive. For more information, you may visit the Student Life Office, Suite 200, Building 2 or call Laura Smith at 972-780-3632.

Student Evaluation of Teaching Effectiveness Policy:

The Student Evaluation of Teaching Effectiveness (SETE) is a requirement for all organized classes at UNT. This short survey will be made available to you at the end of the semester, providing you a chance to comment on how this class is taught. I am very interested in the feedback I get from students, as I work to continually improve my teaching. I consider the SETE to be an important part of your participation in this class.

Assignment Policy:

Assignments should be turned in on time. Late assignments will be graded, but with a penalty of 10% off each day it is late.

Exam Policy:

Exams should be taken as scheduled. No makeup examinations will be allowed except for documented emergencies (See Student Handbook).

Academic Integrity:

Academic integrity is a hallmark of higher education. You are expected to abide by the University's code of Academic Integrity policy. Any person suspected of academic dishonesty (i.e., cheating or plagiarism) will be handled in accordance with the University's policies and procedures. Refer to the Student Code of Academic Integrity at http://www.unt.edu/unt-

<u>dallas/policies/Chapter%2007%20Student%20Affairs,%20Education,%20and%20Funding/7.002%20Code%20of%20Academic_Integrity.pdf</u> for complete provisions of this code.

Bad Weather Policy:

On those days that present severe weather and driving conditions, a decision may be made to close the campus. In case of inclement weather, call UNT Dallas Campuses main voicemail number (972) 780-3600 or search postings on the campus website www.unt.edu/dallas. Students are encouraged to update their Eagle Alert contact information, so they will receive this information automatically.

Attendance and Participation Policy:

The University attendance policy is in effect for this course. Class attendance and participation is expected because the class is designed as a shared learning experience and because essential information not in the textbook will be discussed in class. The dynamic and intensive nature of this course makes it impossible for students to make-up or to receive credit for missed classes. Attendance and participation in all class meetings is essential to the integration of course material and your ability to demonstrate proficiency. Students are responsible to notify the instructor if they are missing class and for what reason. Students are also responsible to make up any work covered in class. It is recommended that each student coordinate with a student colleague to obtain a copy of the class notes, if they are absent.

Diversity/Tolerance Policy:

Students are encouraged to contribute their perspectives and insights to class discussions. However, offensive & inappropriate language (swearing) and remarks offensive to others of particular nationalities, ethnic groups, sexual preferences, religious groups, genders, or other ascribed statuses will not be tolerated. Disruptions which violate the Code of Student Conduct will be referred to the Office of Student Life as the instructor deems appropriate.
