AREA OF EXPERTISE

As a result of extensive professional development in the area of curriculum and instruction, I have successfully implemented horizontally and vertically aligned curriculum programs in four schools and for two different school districts. I have focused my own personal learning on finding, teaching, and modeling effective instructional strategies which address specific needs of a variety of learners. Over sixteen years ago, I developed an intervention process for struggling students before RTI was federally mandated. Since that time, I have worked collaboratively with other educators to create a system in which students are provided individual education plans to ensure their success. As a result, the knowledge I share with graduate students is practical and based on real-world experiences.
