The iRAPS provides financial and program managers a processing environment to access current and archived financial data for budget formulation, planning, execution, and internal financial processes.

This system allows managers to obtain data to develop management decisions and strategy based on the current environment as well as historical trends. It allows the organization to use existing information for forecasting, trend analysis, and analytical reporting. iRAPS is currently in a maintenance lifecycle phase.

The iRAPS is a Common Access Card (CAC), SSL, secured system. It is available to individuals with a need to know. The PII collected is protected through system data encryption and physical security. The server is housed in a key card room on a secured naval base, within a virtual server farm.
