

Clean Vessel Act (CVA) Awards, Fiscal Year 2009

U.S. Fish and Wildlife Service

Wildlife and Sport Fish Restoration Programs

Alabama, Coastal \$208,354, Inland \$88,834 - The Alabama Department of Environmental Management plans to install ten sewage pumpout stations throughout the state for its inland and coastal waters. In addition, the agency plans to maintain its efforts to inform boaters about the importance of proper sewage disposal and its benefits to the aquatic environment.

Arkansas, Inland \$323,335 - The Arkansas Game and Fish Commission plans to purchase five sewage pumpout boats and install fourteen sewage pumpout stations and provide funds for the operations, maintenance, repair and rehabilitation of existing sewage pumpout stations as needed to keep these stations functioning.

Arizona - Inland \$150,000 – The Arizona Fish and Game Department plans to install at least five sewage pumpout facilities, eight dump stations, and purchase one sewage pumpout boat for use on inland waters.

California – Coastal \$1,540,000, Inland \$1,590,000 - The California Department of Boating and Waterways plans to install eight sewage pumpout stations, purchase two sewage pumpout boats, and to install up to ten floating restrooms throughout the state for its coastal and inland waters. The agency will also continue its aggressive educational program to inform boaters about the importance of proper sewage disposal.

Florida – Coastal \$1,215,731, Inland \$600,844 - The Florida Department of Environmental Protection plans to install more 29 dual purpose sewage pumpout-dump station facilities for inland and coastal waters. The agency will continue its education and outreach efforts with boaters to stress the importance of proper sewage disposal.

Georgia – Coastal \$19,164, Inland \$44,268 – The Georgia Department of Natural Resources will install two sewage pumpout facilities and purchase one sewage pumpout boat for its inland and coastal waters.

Idaho – Inland \$95,000 - The Idaho Department of Parks and Recreation plans to replace or renovate approximately four sewage pumpout stations throughout the state.

Illinois – Coastal \$112,500 - The Illinois Department of Natural Resources plans install up to five sewage pumpout stations throughout the state dependent upon the requests and needs of the state's marina operators.

Indiana – Coastal \$397,741, Inland \$97,741 - The Indiana Department of Environmental Management plans to install eight sewage pumpout stations and one floating restroom and to continue efforts to inform boaters about the importance of proper disposal of their sewage.

Kansas – Inland \$32,250 – The Kansas Department of Wildlife and Parks plans to fund the installation of a sewage pumpout facility at Perry Lake.

Kentucky – Inland \$124,469 - The Kentucky Department of Fish and Wildlife Resources plans to install a sewage pumpout facility, purchase and operate one sewage pumpout boat, and renovate one sewage pumpout facility for use at marinas along the Ohio River, Lake Cumberland, and Dale Hollow Lake.

Louisiana – Coastal \$90,000 - The Louisiana plans to fund the purchase of a sewage pumpout boat and mobile sewage dump station for use on Lake Pontchartrain and Bayou Castine and continue education efforts throughout the State for proper sewage disposal.

Massachusetts – Coastal \$1,343,772 - The Division of Marine Fisheries plans to install sewage pumpout facilities, purchase seven sewage pumpout boats, renovate two sewage pumpout boats, and provide operation and maintenance funding for existing sewage pumpout boats and facilities throughout the state's coastal waters. The agency will also continue its educational efforts to inform boaters about the importance of proper sewage disposal.

Michigan – Coastal \$100,000 – The Michigan Department of Natural Resources plans to fund the installation of four sewage pumpout facilities on coastal waters and continue its education and awareness efforts for proper sewage disposal.

Minnesota – Coastal \$337,500 - The Minnesota Department of Natural Resources plans to install five sewage pumpout stations at marinas throughout the state and to educate boaters about the importance of proper sewage disposal and its importance to the environment.

Mississippi – Coastal \$89,500, Inland \$54,000 - The Mississippi Department of Marine Resources plans to install five sewage pumpout facilities throughout the state at coastal and inland sites.

Missouri – Inland \$48,000 - The Missouri Department of Conservation plans to install new or replacement sewage pumpout facilities at three to four marinas in the state's waters as needed.

New Hampshire – Coastal \$139,033, Inland \$71,337 - The New Hampshire Department plans install four sewage pumpout facilities at coastal and inland sites.

New Jersey – Coastal \$588,888 – The New Jersey Department of Environmental Protection plans to install eighteen sewage pumpout facilities, purchase one sewage pumpout boat, and educate boaters about proper sewage disposal.

New York – Coastal \$963,807, Inland \$306,200 - The New York Department of Environmental Conservation plans to purchase thirty one stationary sewage pumpout units, three sewage pumpout boats, and thirty one dump facilities for portable toilets; and to install two floating restrooms throughout the State's inland and coastal waters. In addition,

the State plans to provide operation and maintenance funds for existing facilities to ensure their availability for recreational boaters.

North Carolina – Coastal \$149,875, Inland \$45,000 - The North Carolina Department of Environment and Natural Resources plans to install four new sewage pumpout facilities and twelve dual purpose sewage pumpout-dump facilities throughout the state's coastal waters and to continue its efforts to inform boaters about the importance of proper sewage disposal.

Ohio – Coastal \$110,850, Inland \$137,775 - The Ohio Department of Natural Resources, Division of Watercraft plans to install sewage pumpout facilities at five locations throughout the state.

Oregon – Coastal \$470,400, Inland \$641,250 - The Oregon State Marine Board plans to purchase and install twenty two sewage pumpout stations and twenty eight dump stations for its coastal and inland waters throughout the state and to provide funding for the operation and maintenance of existing facilities. The agency will also continue its efforts to educate boaters about the importance of proper sewage disposal and its benefits to aquatic ecosystems.

Rhode Island – Coastal \$448,000 - The Rhode Island Department of Environmental plans to install ten sewage pumpout stations, replace or renovate five sewage pumpout stations, and purchase one sewage pumpout boat for the proper disposal of boater sewage on coastal waters throughout the State.

Tennessee – Inland \$600,000 - The Tennessee Wildlife Resources Agency plans to install sixteen sewage pumpout stations and to renovate two sewage pumpout stations throughout the state. The agency will also continue its efforts to educate boaters about the importance of proper sewage disposal and its benefits to aquatic environments.

Texas – Inland \$375,000 - The Texas Parks and Wildlife Department plans to install twenty five sewage pumpout stations for inland waters and to continue its educational efforts to inform boaters about the importance of proper sewage disposal.

Utah – Coastal \$103,243, Inland \$247,500 - The Utah Division of Wildlife Resources will construct two sewage pumpout facilities to replace older facilities that occur at Flaming Gorge Reservoir and Bear Lake.

Washington – Coastal \$510,000, Inland \$20,000 - The Washington State Parks and Recreation Department plans to install six new sewage pumpout and dump station facilities and to provide operation and maintenance funding for thirty six coastal marinas and twenty five inland marinas throughout the State.
