

2016 LAGC IFQ Initial and Proposed FW 27 Allocations

These are the initial fishing year (FY) 2016 LAGC Scallop IFQ allocations as well as the proposed framework 27 allocations. If Framework 27 is approved, we expect the the implementing regulations and final IFQ numbers to be published in the spring of 2016. Framework 27 proposes an increase in the annual catch limit of the scallop IFQ fishery from 3,406,142 lb to 4,067,529 lb.

The allocations listed below do not take into account any pounds landed or any pounds leased in or out during FY 2016. The initial 2016 allocations are effective March 1, 2016 and will be increased in the spring if FW 27 is implemented. Allocations will also be adjusted after the end of FY 2015 if the vessel has any carryover IFQ or an IFQ deduction for overages from the 2015 fishing year.
