FILE DESCRIPTION REPORT  
DXF Format

Coverage Name:

**8424 Federal - State Boundary (fedstate)**

Coverage type: line

Export FileName: fedstate.dxf

The Federal- State Boundary DXF file was created using the standard ArcInfo DXF convert command - ARCDXF. This command converts an Arc/Info coverage into an AutoCADD Drawing Interchange file. The coordinates in the Arc/Info coverage were in longitude/latitude. Annotation was written to the output DXF file and was output as text entities. The DXF file contains no arcs. They were converted to line segments that approximate the arc. The DXF file is an ASCII file.
