GULF OF MEXICO REGION

FILE DESCRIPTION REPORT
DXF Format

Coverage Name: 8425 5 & 10 Year Lease Lines
Coverage type: line
Export Filenames: leaseterms510_dxf.DXF

The leaseterms510_dxf.DXF file was created using the standard ArcInfo ARCDXF command.
This command converts an ArcInfo coverage into an AutoCAD Drawing Interchange File
(DXF). The coordinates in the ArcInfo coverage were in longitude/latitude. Annotation for the
lease_term attribute was written to the output DXF file and was output as text entities. The DXF
file contains no arcs. Arcs were converted to line segments that approximate the arc. The DXF
file is an ASCII file.

NOTE: ArcInfo has no provisions to fix the width of a field on a DXF export. On the export the
width is set to the actual size of the data in each field. The width shown is the width of the field
in the TIMS attribute database; the data should not exceed this width.
