

**NATIONAL OFFICE  
POTENTIAL INCIDENT  
OF NONCOMPLIANCE  
(PINC) LIST**

## LAST UPDATE 2015

### PREFACE

The Offshore Safety Improvement Branch of the Office of Offshore Regulatory Programs wishes to extend our appreciation to all participating BSEE and BOEM personnel for their dedicated effort and expertise in developing this edition of the National Office PINC List.

**PINC NUMBER:** A unique identifier for the specific requirement.

**PINC STATEMENT:** The clear and concise description of the requirement.

**AUTHORITY:** The regulatory authority as found in the Code of Federal Regulations.

**ENFORCEMENT ACTION:** This is the enforcement action(s) that must be taken by BSEE for an identified violation(s) of the regulations. Enforcement action(s) may result in a complete facility shut-in (**S**), a component shut-in (**C**), or a warning (**W**). A substantial number of the Potential Incidents of Noncompliance (PINCs) provide enforcement actions in all three enforcement categories [W/C; W/C/S]. Multiple enforcement action(s) [W/C; W/C/S] may be issued to document severity of identified violations. When multiple enforcement actions [W/C or W/C/S] are provided in the PINC, the criteria for each level of enforcement action are provided in the “IF NONCOMPLIANCE EXISTS” section of the PINC.

**RATIONALE/NOTE:** Additional information describing the basis or providing background information pertinent to the requirement stated in the “PINC Statement” block.

**DEFINITION:** Definitions of terms used in the PINC.

**INSPECTION PROCEDURE:** Preferred detailed guidelines to be used by BSEE personnel to ensure that the stated requirement is met. **However, the guidelines in this document are to be considered the preferable method of implementing the enforcement of each PINC and not intended as a directive or to supersede the regulatory language in the Code of Federal Regulations.**

**INSPECTION COUNT:** Describes the number of items checked to be entered on the inspection form. An incident of noncompliance (INC) must be issued to document any negative (no) answer to a PINC statement.

Examples:

**1. Enter one item checked per facility inspected.**

One (1) is entered in the “# CK” column on the inspection form and answered one [1] in the “#Y” or “#N”.

**2. Enter one item checked for each safety device inspected.**

A total count of the number of safety devices, components, wells, etc., is entered in the “#CK” column on the inspection form. The total entries in the “#Y”, “#N”, and “#N/A” columns must correspond to the total count in the “#CK” column.

**IF NONCOMPLIANCE EXISTS:** Describes the specific enforcement action to be taken for each identified violation and the severity level of each violation of the regulations. Examples:

1. Issue a warning (**W**) incident of noncompliance when the situation poses no immediate danger to personnel or equipment.
2. Issue a component (**C**) incident of noncompliance for a specific piece of equipment or location when it is determined to be part of an unsafe situation or it poses an immediate danger to personnel or other equipment and it can be shut-in without affecting the overall safety of the facility.
3. Issue a structure (**S**) incident of noncompliance when the unsafe situation poses an immediate danger to the entire facility or personnel and the specific piece of equipment or location cannot be shut-in without affecting the overall safety of the facility.

**INCIDENT(S) OF NONCOMPLIANCE TO BE ISSUED/ INC COUNT:** Dictates the specific number of incident(s) of noncompliance to be issued for identified violation(s) of the regulations. Examples:

**1. Issue one incident of noncompliance for each facility inspected.**

One (1) incident of noncompliance is issued on each facility inspected with detailed bullet descriptions of the identified violations. Exception to the one incident of noncompliance per facility inspected rule is when multiple enforcement actions [W/C or W/C/S] are provided in the PINC. PINCs with multiple enforcement action(s) [W/C; W/C/S] may dictate that multiple incidents of noncompliance are issued per facility to document severity levels of violations. Such cases will result in the issuance of one incident of noncompliance for the appropriate selected enforcement action with detailed bullet descriptions of the identified violations.

**2. Issue one incident of noncompliance for each safety device inspected.**

One (1) incident of noncompliance is issued for each safety device, component, well, etc., that is determined to be in violation of the regulations.

Should an immediate shut-in increase the risk to safety or pollution, a statement on the INC must indicate when the shut-in is to take effect. In an after-the-fact situation where no correction is possible, a warning (W) INC will normally be issued, since a shut-in would serve no useful purpose. However, an after-the-fact INC that may result in Civil Penalty Review (CPR) recommendation should be issued with the appropriate shut-in enforcement action.
