

Facilities on the Active August 2012 CAA Watch List

The list of facilities below composes OECA's August 2012 Clean Air Act (CAA) Watch List. EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List may not mean that the facility has actually violated the law only that an evaluation or investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. The Watch List does not identify which alleged violations of environmental laws may pose the greatest risk to public health or the environment. It is an automated report based on data from the Air Facility System (AFS), which is used by federal, state and local agencies to track environmental enforcement and compliance information. Agencies input information into AFS, including information about violations that are identified as high priority violations (HPVs). Some facilities may appear on the Watch List due to data errors, which typically are identified and addressed during the EPA-state-local dialogue. EPA expects the government agency with jurisdiction over a facility with an HPV to initiate an appropriate enforcement response, in a timely manner, and input the action into AFS. Some facilities on the list are the subject of existing orders, are actively participating in negotiations with regulators, or are the subject of an investigation. While progress is being made toward resolving the violations, further activities may be required to achieve compliance. This list reflects updates from previous Watch Lists due to changes in the enforcement case status (e.g., HPVs addressed or resolved), data corrections made to AFS, or new facilities added. The dynamic nature of the Watch List is a result of its use as a management tool to oversee adherence by EPA, state, and local agencies to enforcement response policies. For detailed information, please see the Watch List Fact Sheet ([www.epa-echo.gov/echo/docs/watch\\_list\\_fact\\_sheet.pdf](http://www.epa-echo.gov/echo/docs/watch_list_fact_sheet.pdf)).
