Golden Tilefish Seafood Dealers
New Market Category for Dealer Reporting
Large - Medium Cull Added
Effective Date: Immediately

NOAA Fisheries is making a new market category available to seafood dealers reporting golden tilefish. Dealers may now report Large-Medium fish through their reporting systems. This is being done in response to requests from the tilefish industry. This category is available immediately to SAFIS web site users and will be available through program updates in other reporting systems.

This new market category is designated for fish between the large and medium sizes, and not large and medium fish mixed together. The full suite of size categories now available for gutted, head on/tail on golden tilefish include:

Extra Large
Large
Large-Medium (Not Mixed)
Medium or Select
Small
Kittens
Extra Small
Unclassified

The market categories for round/whole fish remain unchanged. However, head off categories have been removed from the reporting systems.

Please make sure you pick the correct grade and market when reporting. Some descriptions may wrap beyond the visible space in the web form field.

If you have any questions or need assistance using this new code please contact your local Greater Atlantic Regional Fisheries Office Port Agent.
